

**THE ADMINISTRATOR**

WASHINGTON, D.C. 20460

June 20, 2024

Mr. Kevin Fay  
Executive Director  
Alliance for Responsible Atmospheric Policy  
2111 Wilson Boulevard, 8<sup>th</sup> Floor  
Arlington, Virginia 22201

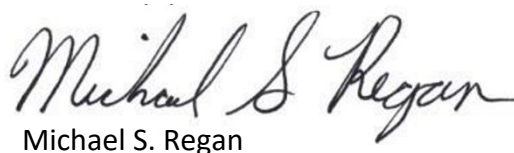

Dear Mr. Fay:

The U.S. Environmental Protection Agency received the December 21, 2023, petition submitted by the Alliance for Responsible Atmospheric Policy, along with the Air-Conditioning, Heating and Refrigeration Institute and the Heating, Air-conditioning and Refrigeration Distributors International, for reconsideration of the final rule, "Phasedown of Hydrofluorocarbons: Restrictions on the Use of Certain Hydrofluorocarbons Under the American Innovation and Manufacturing Act of 2020" (88 FR 73098, October 24, 2023). The EPA also received an April 30, 2024, supplemental letter.

The petition and supplemental letter identified as grounds for reconsideration the rule's allowance of continued manufacturing and import of single- and three-phase residential and light commercial air conditioning and heat pump condensing units less than 65,000 British thermal units using higher global warming potential refrigerants. The EPA will reconsider the issue raised in your petition and described in your supplemental letter and will evaluate whether there is a need to restrict the manufacturing and import of such condensing units. The EPA intends to initiate reconsideration of this issue and intends to develop a proposed action on this matter.

If you have any questions, my colleague Erin Birgfeld would be pleased to assist you and is available at [Erin.Birgfeld@epa.gov](mailto:Erin.Birgfeld@epa.gov) and (202) 564-6741.

Sincerely yours,

Michael S. Regan
