

# Importers and Exporters of Fluorinated Greenhouse Gases Contained in Pre-charged Equipment or Closed-Cell Foams

## Subpart QQ, Greenhouse Gas Reporting Program

### What Must Be Monitored?

#### For importers and exporters of pre-charged equipment and closed-cell foams containing fluorinated greenhouse gases (GHGs):

- ☐ Annual mass of each fluorinated GHG imported and exported in pre-charged equipment or closed-cell foams (metric tons).
- ☐ For each type of pre-charged equipment with a unique combination of charge size and charge type, the identity of the fluorinated GHG used as a refrigerant or electrical insulator, charge size (including holding charge, if applicable), and number imported and exported.
- ☐ For closed-cell foam imported or exported inside of equipment, the identity of the fluorinated GHG contained in the foam, the quantity of fluorinated GHG contained in the foam (for each unique combination of quantity and identity of fluorinated GHG with the foam) in each piece of equipment, and the number of pieces of equipment imported and exported.
- ☐ For closed-cell foams that are not imported or exported inside of equipment, for each type of closed-cell foam that has a unique combination of fluorinated GHG identity and density, the identity of the fluorinated GHG in the foam, the density of the fluorinated GHG in the foam (kilograms (kg) fluorinated GHG per cubic foot (cu ft)), and the volume of foam imported and exported (cu ft).
- ☐ If the importer or exporter does not know the identity and mass of the fluorinated GHG within the closed-cell foam, the name of the foam manufacturer and certification that the importer or exporter was unable to obtain information on the identity, mass of the fluorinated GHG in carbon dioxide equivalent (CO<sub>2</sub>e) contained in the foam in each piece of equipment or per cu ft of foam.
