Re: Amendment to the April 17, 2008 Petition Approval to Use Alternative
Missing Data Substitution at INVISTA's Camden Plant (Facility ID
(ORISPL) 880057)

Dear Ms. Dankmyer:

On March 13, 2007, INVISTA submitted a petition to the United States Environmental Protection Agency (EPA) under 40 CFR 75.66, in which INVISTA requested to use alternative substitute data for nitrogen oxides (NO_x) concentration at its Camden Plant. By letter dated November 29, 2007, INVISTA corrected its petition. On April 17, 2008, EPA approved the petition, with conditions. The purpose of this letter is to amend the conditions of that approval.

The April 17, 2008 petition approval allows INVISTA to use an alternative maximum potential NO_x concentration for the purposes of recalculating the Camden Plant's NO_x mass emissions for the 2003-2006 ozone seasons. However, due to a rounding error, Camden Plant's 2006 ozone season NO_x emissions were miscalculated by EPA in the petition response. As a result, EPA is amending Table 3 in the April 17, 2008 petition approval to show that the total NO_x emissions for 2006 were 310.6 tons, rather than the 310 tons as was previously stated by EPA.

**Table 3: Impact of the Approved Alternative MPC Value on the
2004-2006 NO_x Mass Emissions
(Camden Plant, CS01)**

Ozone Season	2004	2005	2006
NO _x Tons Previously Reported	156	217	273.3
Additional NO _x Tons---Recalculated	12	181	37.3
Total NO _x Tons After Recalculation	168	398	310.6

As a result, INVISTA will be required to surrender a total of 311 tons of NO_x allowances for compliance with the 2006 NO_x Budget Program ozone season. This is an additional 38 tons beyond the 273 tons previously reported by INVISTA.

If you have any questions regarding this correspondence, please contact Venu Ghanta of my staff, at (202) 343-9009. Thank you for your continued cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read 'Sam Napolitano', with a large, stylized initial 'S' and a horizontal line extending to the right.
