

Agency Financial Report

Fiscal Year 2024

ABOUT THIS REPORT

The U.S. Environmental Protection Agency is pleased to present the Fiscal Year 2024 Agency Financial Report (AFR). This report provides an overview of the financial and performance results for the fiscal year spanning October 1, 2023, through September 30, 2024.

The information, data, and analyses presented in this AFR are intended to aid the President, Congress, and the American people in evaluating the agency's annual activities and accomplishments towards its mission of protecting human health and the environment.

The FY 2024 AFR encompasses the EPA Office of Inspector General's FY 2024 Financial Statements Audit Report and the agency's FY 2024 *Federal Managers' Financial Integrity Act* Report, including the Administrator's statement assuring the soundness of the agency's internal controls.

The AFR reports information in accordance with the Chief Financial Officers Act and Office of Management and Budget Circular A-136, *Financial Reporting Requirements*, and fulfills the requirements set forth in OMB Circular A-11, *Preparation, Submission and Execution*

of the Budget, and the *Government Performance and Results Act Modernization Act of 2010*.

The AFR is one of two annual reports publishing information on EPA's programmatic and financial activities. The financial information within the AFR will be supplemented by the EPA's FY 2024 *Annual Performance Report*, which will present the agency's FY 2024 performance results as measured against the targets established in its FY 2024 *Annual Performance Plan and Budget* and the goals established in the *FY 2022–2026 EPA Strategic Plan*. The EPA's FY 2024 APR will be included with the agency's FY 2026 *Congressional Budget Justification* and will be posted on the agency's website.

Collectively, the AFR and APR present a complete summary of the agency's activities, accomplishments, progress, and financial information for each fiscal year. Both prior year reports are available at:

<https://www.epa.gov/planandbudget/fy-2022-2026-data-quality-records>.

How the Report Is Organized

The EPA's FY 2024 AFR is organized into four sections to provide clear insight into the agency's financial results.

Section I—Management's Discussion and Analysis

Provides an overview on the EPA's mission and organizational structure; a summary of performance results; an analysis of the financial statements and stewardship data; information on systems, legal compliance, and controls; and other management initiatives.

Section II—Financial Section

Includes the Agency's independently audited financial statements, which comply with the Chief Financial Officers Act, the related Independent Auditors' Report and other information on the agency's financial management.

Section III—Other Accompanying Information

Provides additional material as specified under OMB Circular A-136, *Financial Reporting Requirements*, and the Reports Consolidation Act of 2000. The subsection titled "Management Integrity and Challenges" describes the EPA's progress toward strengthening management practices to achieve program results and presents the OIG's list of top management challenges.

Section IV—Appendices

Provides links to relevant information on the agency website and a glossary of acronyms and abbreviations.

MESSAGE FROM THE ADMINISTRATOR

November 15, 2024

The President
The White House
Washington, D.C. 20500

Dear Mr. President:

It is my privilege to present the U.S. Environmental Protection Agency's Fiscal Year 2024 Agency Financial Report. For the 25th consecutive year, the EPA has earned a clean, unmodified financial audit opinion from the Office of Inspector General. This quarter century of achievement is made possible because of the dedication, professionalism and integrity of our agency's employees and the financial management oversight provided by the EPA's Office of the Chief Financial Officer. The AFR outlines how the EPA used its resources, maintaining the highest standards of accountability and financial integrity, to benefit the American people and advance the Administration's environmental and public health priorities.

The agency is at the center of the Biden-Harris Administration's Investing in America agenda, and every day we have been working to quickly and effectively mobilize more than \$100 billion in supplemental appropriations to protect public health and the environment, create good-paying jobs, grow our economy, advance private investment in clean technologies and address environmental justice by confronting decades of underinvestment in disadvantaged communities. We can already see that these investments are improving the health and wellbeing of Americans and will have lasting benefits for future generations.

Through the historic Infrastructure Investment and Jobs Act, commonly called the Bipartisan Infrastructure Law, and the Inflation Reduction Act, the EPA continues to fulfill the Administration's commitment to upgrade critical public utility infrastructure and services, accelerate the cleanup of toxic waste sites and address the current and anticipated impacts of climate change and extreme weather events. These investments are designed to help communities throughout the country, many that are among the nation's most vulnerable and underserved, who have been disproportionately burdened by pollution and environmental harm.

In continuing our nation's leadership in addressing climate change, the agency has utilized the IRA to provide \$27 billion in Greenhouse Gas Reduction Fund grants to accelerate clean energy and climate solutions across the country. These grants are being used to provide affordable financing for clean- technology projects, support community lenders to fund clean energy projects and deliver solar energy to more than 900,000 low-income households nationwide.

In addition, we recently announced \$300 million of the \$5 billion provided under the IRA for Climate Pollution Reduction implementation grants to assist 34 Tribes and territories for the first time, so they can apply greenhouse-gas reduction measures in their own communities.

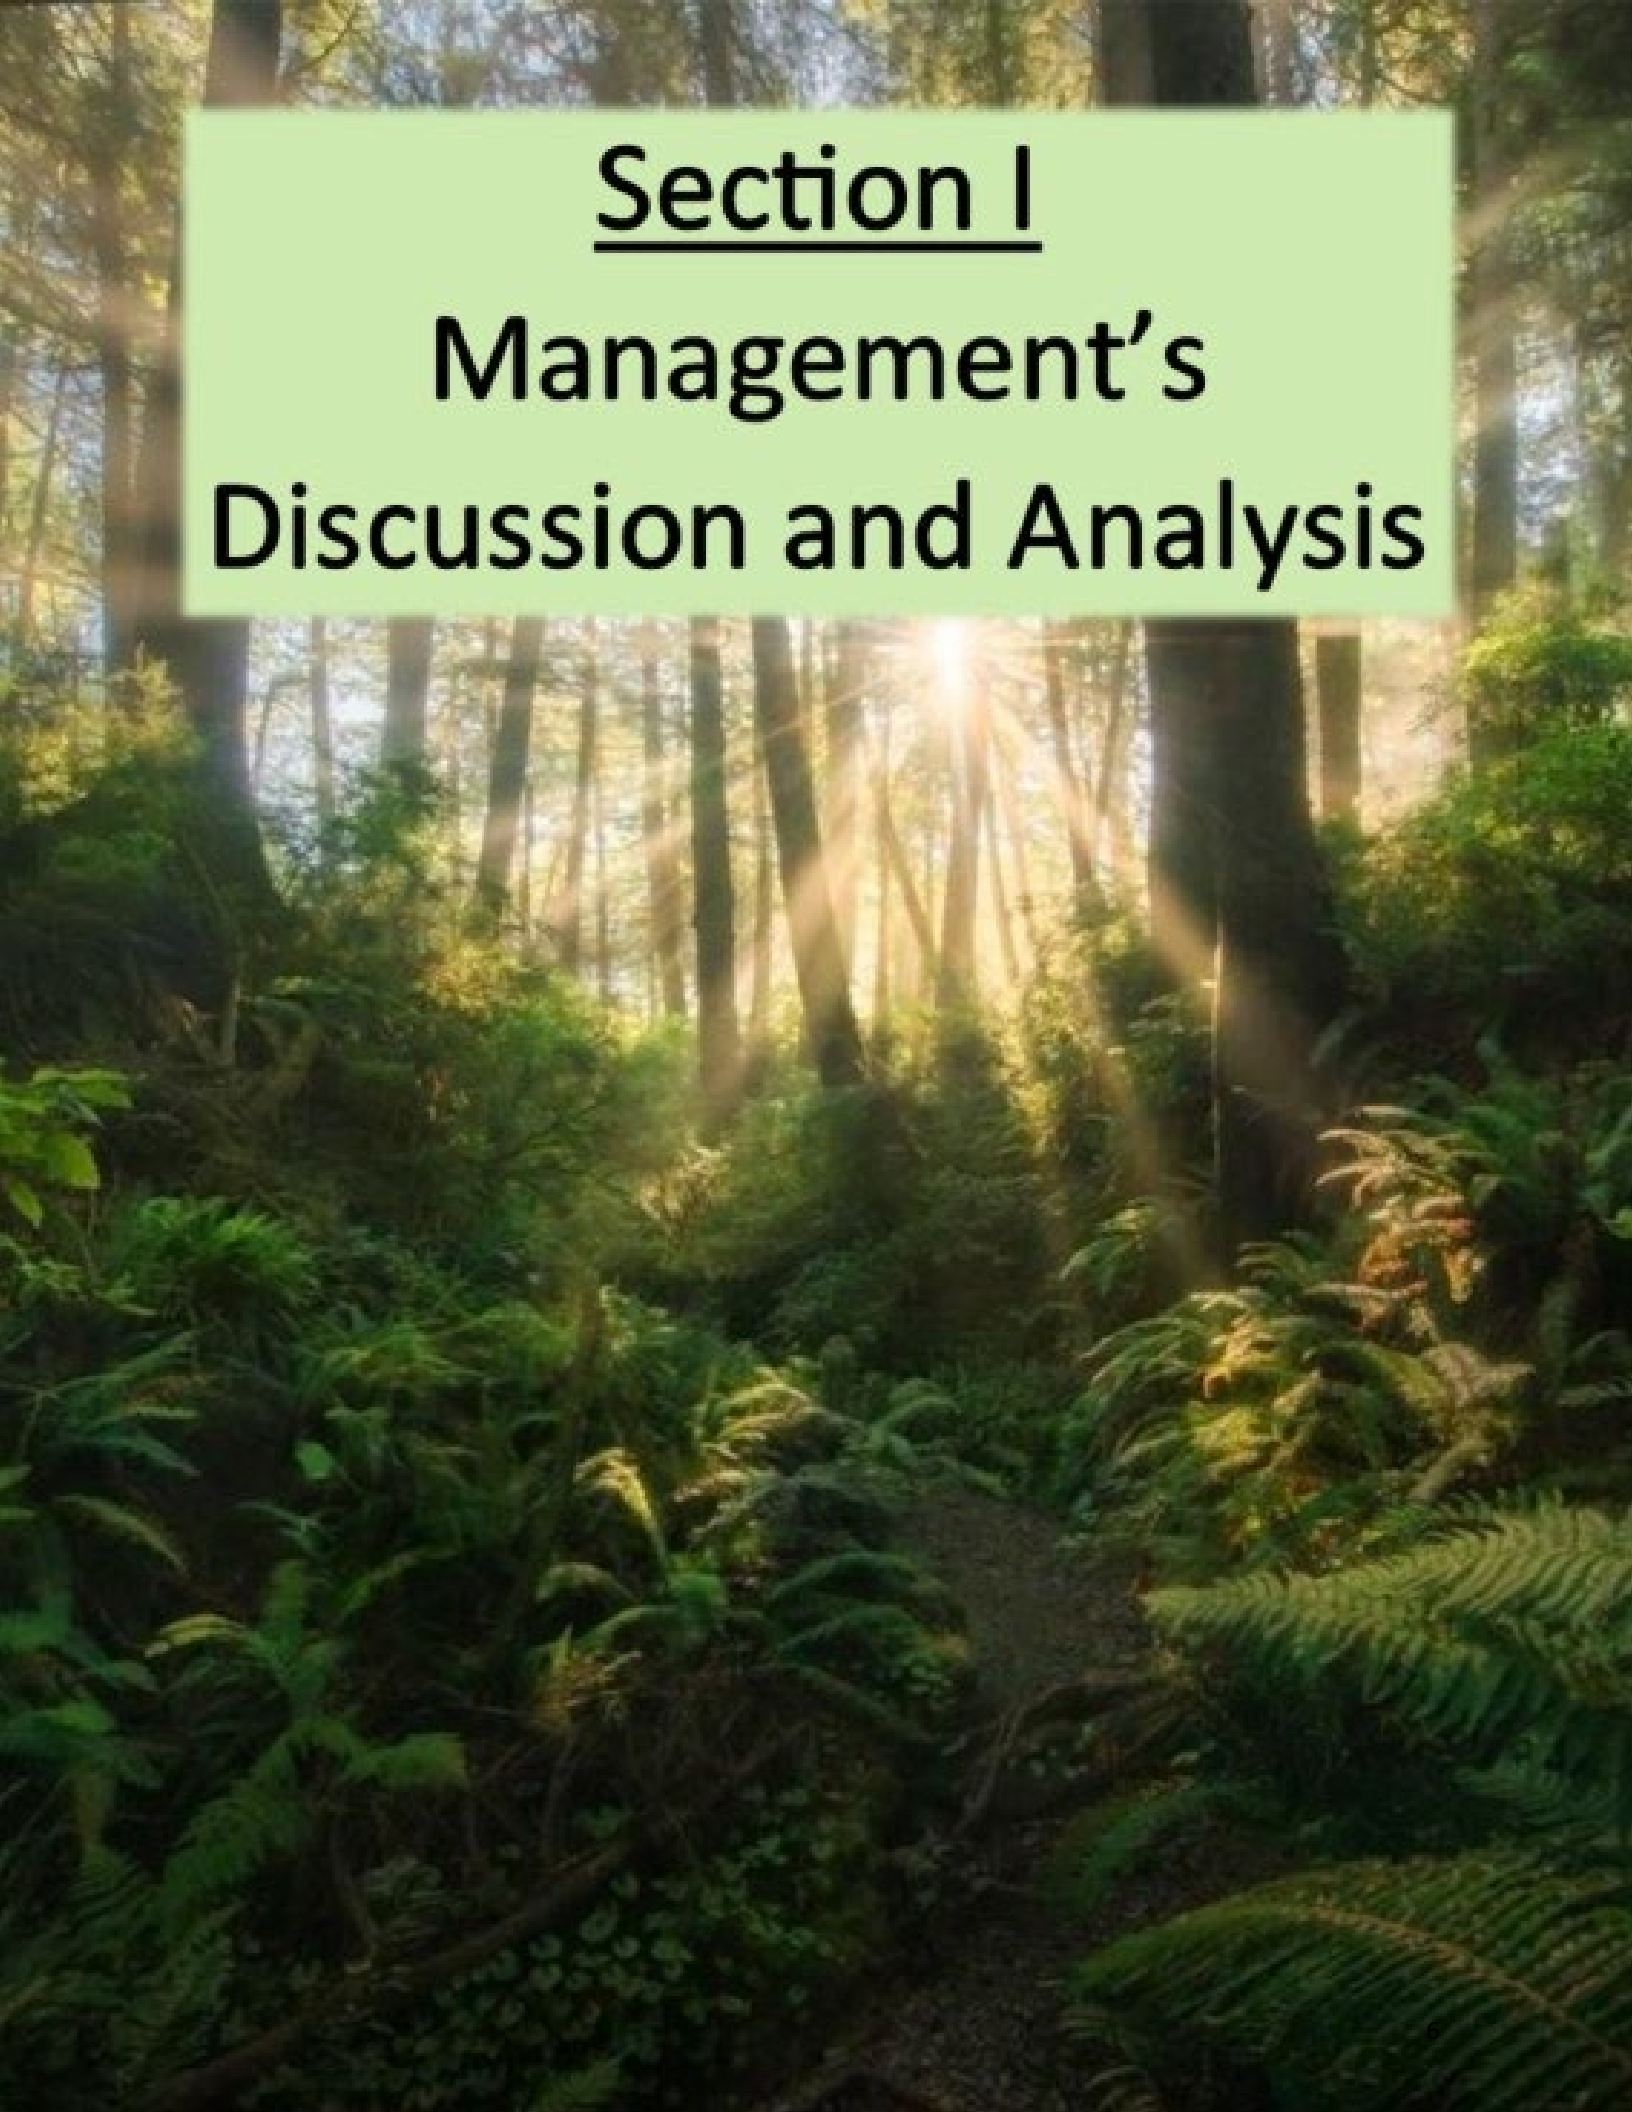

More detailed information on our accomplishments will be provided in the FY 2026 Annual Performance Plan and Budget. My assurance statement, as required under the Federal Managers' Financial Integrity Act, appears in Section I, "Management's Discussion and Analysis," of this report. Section III of this report provides details regarding corrective actions, including strengthened management controls, that have been implemented, reflecting the agency's dedication to ensure proper resources management.

I am grateful for the supplemental appropriations that provide the EPA with expanded opportunities to ensure that all Americans can access clean water and breathe clean air. We have a great responsibility to ensure that we manage these resources transparently and with the utmost financial integrity. We are committed to achieving these goals as we work with and support our Tribal, state and local partners to protect human health and the environment.

Respectfully,

A handwritten signature in black ink that reads "Michael S. Regan". The signature is written in a cursive, flowing style with a large initial 'M' and 'R'.

Michael S. Regan

A photograph of a forest scene with sunlight filtering through the trees, creating a warm, golden glow. The foreground is filled with lush green ferns and other vegetation. The background shows tall, slender tree trunks reaching upwards.

Section I

Management's Discussion and Analysis

ABOUT EPA

Mission

What EPA Does

- ✓ *Develops and enforces regulations*
- ✓ *Gives grants to states, local communities, and tribes*
- ✓ *Studies environmental issues*
- ✓ *Sponsors partnerships*
- ✓ *Teaches people about the environment*
- ✓ *Publishes environmental health information*

The mission of the EPA is to protect human health and the environment.

To accomplish this mission, the EPA works to ensure that Americans have clean air, land, and water for present and future generations. This includes the EPA's commitment to take steps and align its actions to respond to the climate crisis and continue engaging the global community. Also, the EPA will take critical actions to advance environmental justice and enforce civil rights laws that impact underserved and overburdened communities. The EPA relies on accurate scientific information to identify human health and environmental matters that affect policy decisions and enforcement actions.

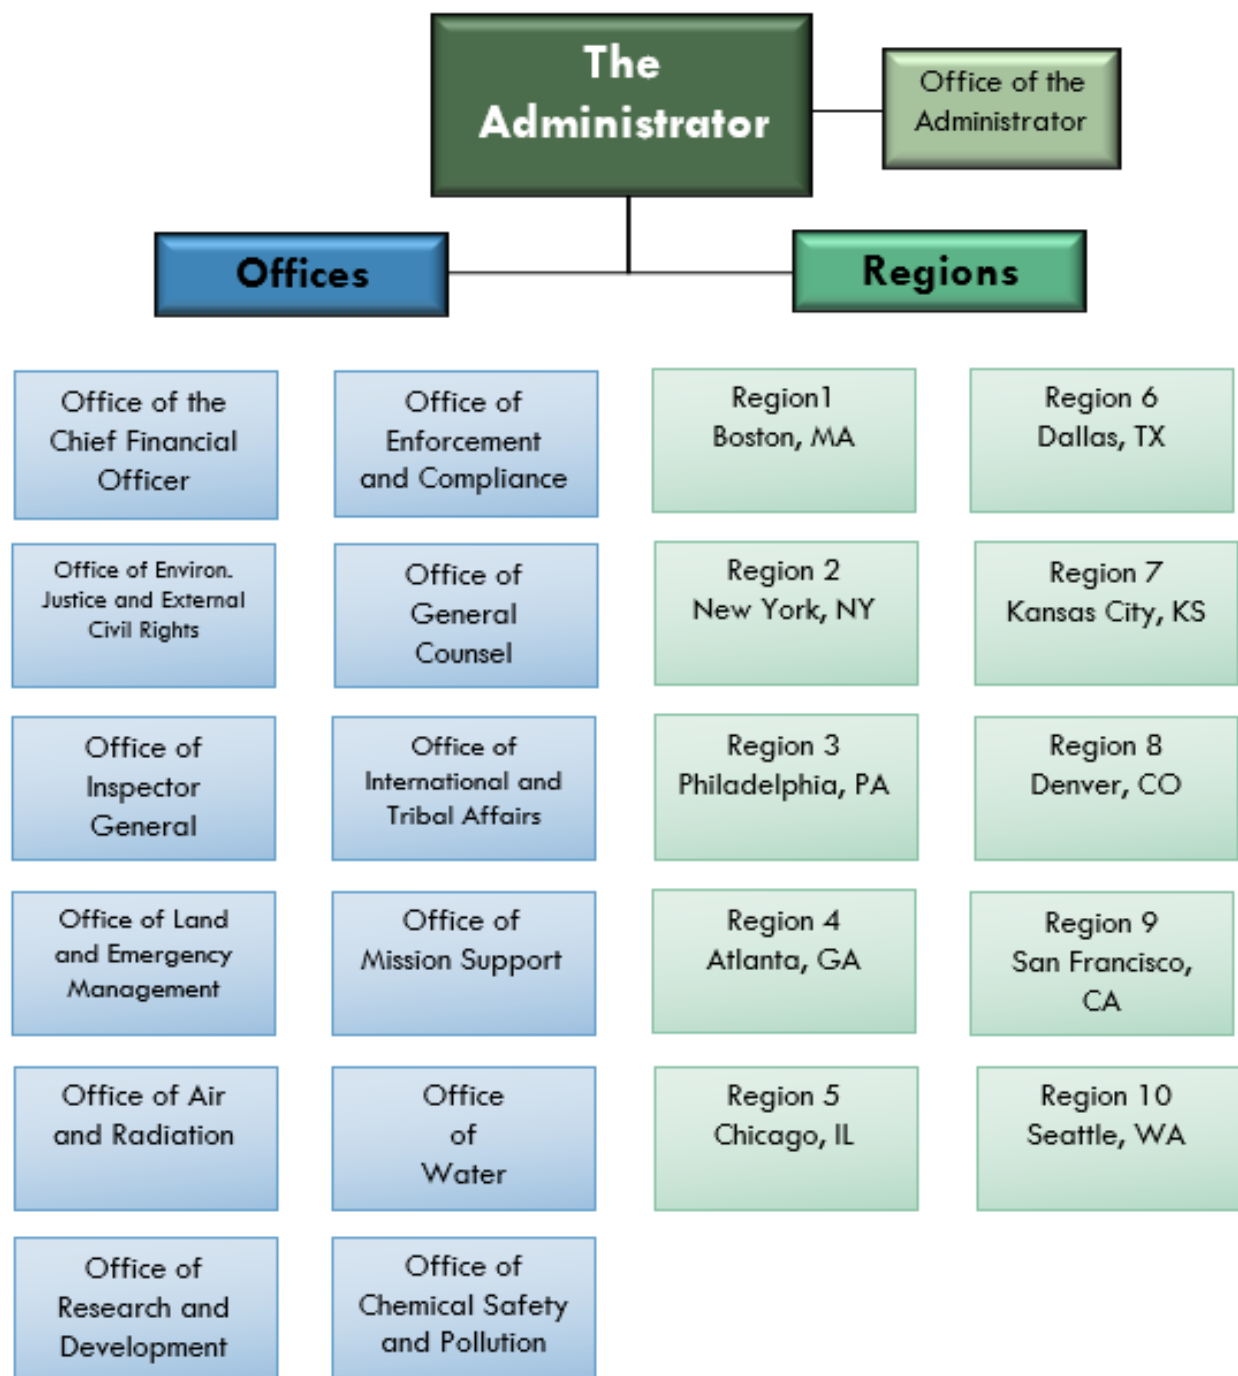

The EPA works to ensure all communities, individuals, businesses, and state, local and tribal governments have access to accurate and sufficient information to effectively participate in delivering a cleaner, safer, and healthier environment. The Agency ensures contaminated lands and toxic sites are cleaned up by potentially responsible parties and revitalized, and chemicals in the marketplace are reviewed for safety. Environmental stewardship is integral to U.S. policies concerning natural resources, human health, economic growth, energy, transportation, agriculture, industry, and international trade, and these factors are similarly considered in establishing environmental policy. The EPA is committed to effectively and efficiently serving the American people and conducting business with transparency in a manner worthy of the public's trust and confidence.

History and Purpose

The EPA was established in 1970 and has worked over five decades to identify, evaluate, and execute sustainable solutions to existing and emerging environmental and public health concerns. The negative impact and hazards of environmental pollution underscore the value and importance of EPA's mission. The American people deserve a clean, healthy, and safe environment where they live, work, and play.

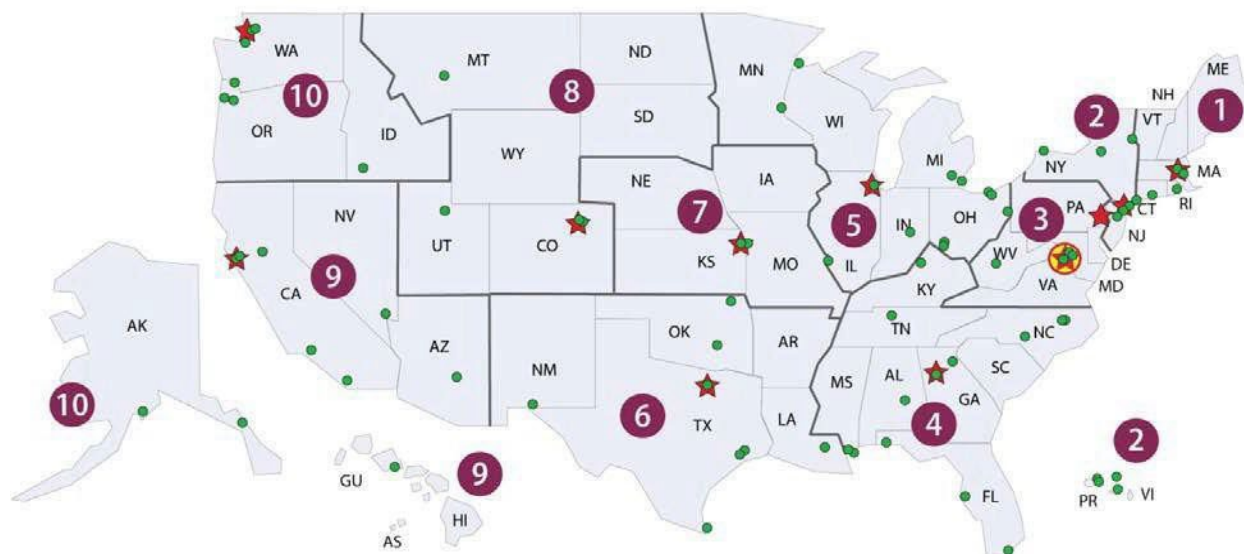

The EPA incorporates environmental research, monitoring, standard-setting, and enforcement functions under the guidance of a single, independent agency. As a result, the agency ensures environmental protection remains an integral part of all U.S. policies, whether related to economic growth, climate change, environmental justice, natural resource use, energy, transportation, agriculture, or human health.

The EPA has made and continues to make great strides in providing a cleaner, safer, and healthier environment for all Americans and future generations. Focused cleanup efforts have helped remedy the practices of the past, and the EPA continuously works to monitor and regulate pollutants, evaluate new chemicals and pesticides, and inspire better decision-making to safeguard our environmental future.

The EPA's headquarters offices, 10 regional offices, and more than a dozen laboratories and field offices across the country employ a diverse, highly educated, and technically trained workforce of roughly 16,000 people.

Headquarters and Regional Office Map

  EPA Regional and Program Laboratories and Facilities

Collaborating with Partners and Stakeholders

The EPA's partnerships with states, tribes, local governments, and the global community are central to the success of protecting human health and the environment. For five decades, this collaboration has strengthened federal environmental protection laws that are implemented within state, tribal, and local jurisdictions. Through continued partnerships communities, individuals, businesses, and state, local and tribal governments have access to accurate information sufficient to effectively participate in managing human health and environmental risks.

FY 2024 PROGRAM PERFORMANCE

Detailed FY 2024 performance results will be presented in EPA's FY 2024 Annual Performance Report. This report will be posted at <http://www.epa.gov/planandbudget> in January 2025.

FINANCIAL ANALYSIS AND STEWARDSHIP INFORMATION

Sound Financial Management: Good for the Environment, Good for the Nation

The financial management overview below highlights some of the EPA's most significant financial achievements carried out during the agency's efforts to execute its mission to protect human health and the environment during FY 2024:

- **Invoice Processing Platform.** In FY 2024, the agency continues to experience prolific efficiencies since the deployment of the Invoice Processing Platform (IPP), which fully launched in May 2023. IPP has significantly streamlined and standardized the invoice approval process for the agency. It allowed the agency to decommission multiple feeder systems, consolidating all commercial invoice payment processing into IPP. During FY 2024 the agency has benefited by taking advantage of over \$28k in discounts offered and experienced a 73% reduction in the number of late invoices paid since FY 2023. Since implementation, 50,324 invoices have been processed via IPP totaling over \$1.9B in payments to commercial vendors.
- **G-Invoicing.** OCFO partnered with the Office of Acquisition Solutions to improve the Interagency Agreement process for employee relocation services provided to external federal agencies via EPA's Working Capital Fund. This eliminated duplicate processes and data entry and implemented role changes in G-Invoicing to make the review and approval of Interagency Agreements timelier and more efficient, thus enabling improved customer service.
- **Continuous Improvement Summit.** In FY 2024, OCFO's Continuous Improvement Division (CID), previously the Office of Continuous Improvement, hosted the EPA's 6th annual continuous improvement summit. This year the event brought people together in Chicago Illinois at EPA's Region 5 Offices. Fifty-three participants joined us in person, while the rest took advantage of the virtual participation option, allowing for maximum participation. The summit in FY 2024 had 261 registrants and participation from 16 states and one other country, in addition to over 300 EPA employees. A total of 38 speakers delivered 26 different sessions focused on providing summit attendees training, tools, and techniques to help them innovate and continuously improve processes in their programs and organizations. This summit speaks to the OCFO's commitment to collaboration, innovation, and continuous improvement as we continue our efforts to ensure sound financial management of appropriated resources.
- **Tournament of Ideas.** In FY 2024, OCFO's Continuous Improvement Division (CID), previously the Office of Continuous Improvement, hosted the 2nd annual Tournament of Ideas. This year the march madness inspired competition incorporated 2 new actions into gameplay (3 points for grants ideas and 5 points for ideas stories) that resulted in the following innovations: 2,138 ideas received in a month (we usually average about 80 ideas implemented a month), 588 grants related ideas implemented, and over 36 ideas stories that were shared across the agency. This event spurs innovation across the EPA, engaging staff in making beneficial operational improvements, and showcases OCFO's commitment to innovation, employee engagement and sound fiscal management.

Financial Condition and Results

Financial statements are formal financial records that document the EPA's activities at the transaction level, where a "financial event" occurs. A financial event is any occurrence having financial consequences to the federal government related to the receipt of appropriations or other financial resources; acquisition of goods or services; payments or collections; recognition of guarantees, benefits to be provided, and other potential liabilities; or other reportable financial activities.

The EPA prepares four consolidated statements (a balance sheet, a statement of net cost, a statement of changes in net position, and a statement of custodial activity) and one combined statement, the Statement of Budgetary Resources. Together, these statements with their accompanying notes provide the complete picture of the EPA's financial situation. The complete statements with accompanying notes, as well as the auditors' opinion, are available in Section II of this report.

The balance sheet displays assets, liabilities, and net position as of September 30, 2024, and September 30, 2023. The statement of net cost shows the EPA's gross cost to operate, minus exchange revenue earned from its activities. Together, these two statements provide information about key components of the EPA's financial condition—assets, liabilities, net position, and net cost of operations. The balance sheet trend chart depicts the agency's financial activity levels since FY 2022.

Key Terms

Assets: What the EPA owns and manages.

Liabilities: Amounts the EPA owes because of past transactions or events.

Net position: The difference between the EPA's assets and liabilities.

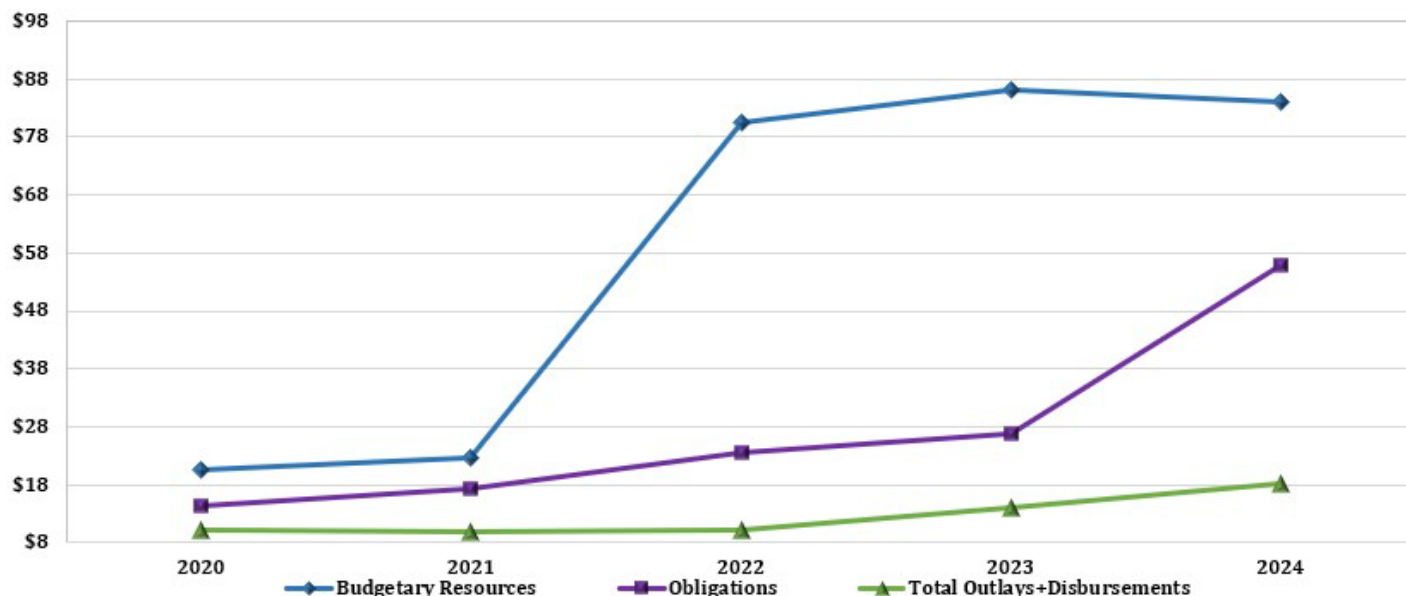

Net cost of operations: The difference between the costs incurred by the EPA's programs and revenues.

Balance Sheet Trend
(dollars in billions)

The figure below depicts the EPA’s aggregate budgetary resources (congressional appropriations and some agency collections), obligations (authorized commitment of funds), and total outlays (cash payments) for each of the last five fiscal years. The Statement of Budgetary Resources in Section II provides more information on the makeup of the agency’s resources.

EPA Financial Trends (dollars in billions)

Assets—What EPA Owns and Manages

The EPA’s assets totaled \$105 billion at the end of FY 2024, an increase of \$13.3 billion from the FY 2023 level. In FY 2024, approximately 91 percent of the EPA’s assets fall into two categories: fund balance with the Department of the Treasury and investments. All of the EPA’s investments are backed by U.S. government securities. The graph below compares the agency’s FY 2024 and FY 2023 assets by major categories.

FY 2023 COMPOSITION OF ASSETS

FY 2024 COMPOSITION OF ASSETS

Liabilities—What EPA Owes

The EPA's liabilities were \$12.3 billion at the end of FY 2024, an increase of \$4.1 million from the FY 2023 level. In FY 2024, the EPA's largest liability (56 percent) was debt. Additional categories include accounts payable, federal employee benefits, and advances from others/deferred revenue. The graphs compare FY 2024 and FY 2023 liabilities by major categories.

FY 2023 COMPOSITION OF LIABILITIES

FY 2024 COMPOSITION OF LIABILITIES

Net Cost of Operations—How EPA Used Its Funds

The graph that follows show how the EPA's funds are expended among five expenditure accounts in FY 2024 and FY 2023.

FY 2023 NET COST BY PROGRAM

FY 2024 NET COST BY PROGRAM

The EPA serves as a steward on behalf of the American people. The chart below presents four categories of stewardship: land, research and development, infrastructure, and human capital. In FY 2024, the EPA devoted a total of \$7.8 billion to its stewardship activities.

Per the Federal Accounting Standards Advisory Board, stewardship investments consist of expenditures made by the agency for the long-term benefit of the nation that do not result in the federal government acquiring tangible assets.

- Some of the largest infrastructure programs within the agency are the Clean Water State Revolving Fund and Drinking Water State Revolving Fund (SRF) programs that provide grant funds to states for water infrastructure projects, such as the construction of wastewater and drinking water treatment facilities. States lend the majority of these funds to localities or utilities to fund the construction and or upgrade of facilities (some may also be used for loan forgiveness or given as grants). Loan repayments then revolve at the state level to fund future water infrastructure projects. The EPA's budget included nearly \$6.4 billion in FY 2024 appropriated funds, from both regular appropriations and the Infrastructure Investment and Jobs Act, for the SRFs. In addition, states lent billions of dollars from funds they received as repayments from previous State Revolving Fund loans. These funds provide assistance to public drinking water and wastewater systems for the enhancement of water infrastructure, allowing for cleaner water bodies and crucial access to safer drinking water for millions of people.
- Research and development activities enable the EPA to identify and assess important risks to human health and the environment. This critical research investment provides the basis for the EPA's regulatory work, including regulations to protect children's health and at-risk communities, drinking water, and the nation's ecosystems.
- Land includes contaminated sites to which the EPA acquires title under the Superfund authority. This land needs remediation and cleanup because its quality is well below any usable and manageable standards. To gain access to contaminated sites, the EPA may acquire easements that are in good and usable condition. These easements may also serve to isolate the site and restrict usage while the cleanup is taking place.
- The agency's investment in human capital through training, public awareness, and research fellowships are components of many of the agency's programs and effective in achieving the agency's mission of protecting public health and the environment.

Financial Management for the Future

During times of environmental challenges, sound stewardship of the EPA's financial resources continues to be critical to the agency's ability to protect the human health and the environment. Reliable, accurate, and timely financial information is essential to ensure prudent and cost-effective decisions for addressing land, water, air, and broader ecosystem issues. The strength of EPA's financial stewardship capabilities reflects the fundamental elements of financial management: people and systems.

People: The EPA actively leverages available tools to recruit the highly qualified individuals with the necessary skills to meet tomorrow's financial challenges. Relevant staff members are trained in financial analysis and forecasting to understand financial data and what it means.

Systems: The EPA is integrating financial information into decision-making so that it effectively maximizes the prudent use of its resources. The EPA's core financial system, Compass, is based on a commercial-off-the-shelf software solution. Compass has improved the EPA's financial stewardship by strengthening accountability, data integrity, and internal controls within the following business areas:

- General ledger
- Accounts payable
- Accounts receivable
- Property
- Project cost
- Intra-governmental transactions
- Budget execution

Compass provides core budget execution and accounting functions while facilitating more efficient transaction processing. The system posts updates to ledgers and tables as transactions are processed and generates source data for the preparation of financial statements and budgetary reports.

The OMB had outlined several planned solutions to assist agencies with modernizing and maximizing information technology while retiring aging administrative systems. The implementation of shared solutions will allow the EPA to continue efforts already begun to streamline and enhance the delivery of financial management information and services. The EPA has implemented G-Invoicing for federal interagency agreements for all new interagency agreements. The second stage of the implementation involves the coordinated effort between the agency and trading partners to establish all existing interagency agreements in G-Invoicing. The agency is actively working with trading partners to close out or transfer all the existing IA agreements to G-invoicing, to meet the FY 2026 mandate. The EPA is currently in the process of migrating the agency financial system to the Office of Mission Support's AWS Customer Managed Cloud environment and expects this migration to be completed by Q3 FY 2025. In addition, the EPA expects to facilitate the migration to the new Travel System as part of GSA's ETSNext. EPA will take the latest version of the agency's financial system underlying software, Momentum, and ensure updated travel related fields are part of our integrated system.

Limitations of the Principal Financial Statements

The EPA prepared the principal financial statements to report the financial position and results of its operations, pursuant to the requirements of 31 U.S.C. 3515 (b). The EPA has prepared the statements from the books and records of the entity in accordance with federal generally accepted accounting principles and the formats prescribed by OMB. Reports used to monitor and control budgetary resources are prepared from the same books and records. The financial statements should be read with the realization that they are for a component of the final U.S. Government financial statements.

IMPROVING MANAGEMENT AND RESULTS

Office of Inspector General Audits, Evaluations, and Investigations

The OIG contributes to the EPA's mission to protect human health and the environment by assessing the efficiency and effectiveness of the agency's program management and results. The OIG ensures that agency resources are used as intended, develops recommendations for improvements and cost savings, and provides oversight and advisory assistance in helping the EPA carry out its objectives.

The OIG detects and prevents fraud, waste, and abuse to help the agency protect human health and the environment more efficiently and cost effectively. The OIG performs its mission through independent oversight of the programs and operations of the EPA. The OIG also contributes to the oversight integrity of, and public confidence in the agency's programs and to the security of its resources by preventing and detecting possible fraud, waste, and abuse and pursuing judicial and administrative remedies.

In FY 2024, the OIG identified key management challenges and internal control weaknesses and the audits, evaluations, and investigations resulted in:

- More than \$169.21 million in potential savings and recoveries;
- 132 recommendations for improvement; and
- 77 criminal, civil, or administrative enforcement actions.

Risk Management

The EPA continues to integrate the strategic reviews, risk management and internal control processes to provide reasonable assurance that the agency's programs are operating effectively and free of fraud, waste, and abuse. Annually, the agency evaluates progress towards strategic objectives and identifies the significant enterprise-level risks that may impede progress. In assessing the enterprise-level risks, the agency considers relevant and available information from internal control reviews, audit findings and recommendations from the Office of Inspector General and the Government Accountability Office, and other partnering external stakeholders.

Annually, the EPA issues agency Enterprise Risk Management and Program Integrity guidance to assist the program and regional offices in their risk management and internal controls. The guidance clearly stresses the importance of risk management and internal controls to help prevent actions of fraud. The guidance sets out the expectations of the senior leaders on how risk management should be performed and the benefits that the agency will see if the reviews are done well. It lays out the expectations for internal control testing to ensure that program and regional controls are operating and correctly established. As the agency continues to mature its enterprise risk management efforts, it will be looking to incorporate more best practices as proposed by GAO that will allow for risk management to become second nature at the EPA.

In FY 2024, the agency worked to evolve and enhance its risk management functions to create more cohesive analysis and tools to help promote effective enterprise risk management efforts. During this transition, all program offices and regions were advised to continue performing risk management and internal control review activities. Each NPM and regional office attested to the soundness of internal controls within the organization and provided a personal statement of assurance of the Administrator. Collectively, these statements support the Administrator's overall statement of assurance on the agency's internal control system.

One of the critical establishments in the area of risk management was the identification and designation of an interim Chief Risk Officer. This executive is accountable for developing and enabling the efficient and effective governance of significant risks, mitigation strategies and related opportunities, allowing for a clear path for the agency to achieve operational excellence and missional goals. At the early stages of this position, this individual will be responsible for developing the risk management framework for the agency, establishing the mechanisms to adequately collect and address risks, and working with senior leadership to establish the control environment to enable a culture of risk awareness.

As part of the agency's annual strategic review process, program and regional office worked collaboratively to identify the risks to achieving the strategic objectives in EPA's Strategic Plan and the results inform EPA's Enterprise Risk Profile. Additionally, in FY 2024, the agency conducted strategic reviews and risks assessments on the objectives in the FY 2022-2026 Strategic Plan.

Grants Management

The EPA has two major grants management metrics, one for grant competition and the other for grants closeout. The EPA's Policy for Competition of Assistance Agreements establishes requirements for the competition of assistance agreements (grants, cooperative agreements, and fellowships) to the maximum extent practicable. The Agency tracks the percentage of new grant funds that are competed according to the policy. For FY 2024, EPA competed 99.6% of new grant funds subject to the competition policy, which amounts to \$29,167,198,222.

EPA tracks the closeout of grants through two measures, one for grants for which the project period expired within the previous fiscal year and one for older grants for which the project period expired prior to the last fiscal year. For FY 2024, EPA closed out 87% of the awards that expired in 2023 and 97% of those that expired in earlier years (data as of 9/30/24).

Grants Management Performance Measures for EPA			
Performance Measure	Target	Progress in FY 2023	Progress in FY 2024
Percentage of grants closed out	90%	83% closure of grants that expired in 2022	87% closure of grants that expired in 2023
	99%	99% closure of grants that expired in 2021 and earlier	97% closure of grants that expired in 2022 and earlier
Percentage of new grant funds subject to the competition policy that were competed	90%	68%	99.6%

ANALYSIS OF SYSTEMS, CONTROLS, AND LEGAL COMPLIANCE

Federal Managers' Financial Integrity Act (FMFIA)

The FMFIA requires federal agencies to conduct ongoing evaluations of their internal controls over program operations and financial activities and report the results to the President and Congress. Additionally, agencies are required to assess and report on whether financial management systems comply with federal standards.

The EPA evaluated its internal controls in accordance with OMB Circular A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*. The agency operates a comprehensive internal control program, which ensures compliance with the requirements of FMFIA and other laws and regulations. The EPA's national programs and regional offices conduct risk and internal control assessments and submit annual assurance letters attesting to the soundness of the internal controls within their organizations. These assurance letters provide the basis for the Administrator's statement of assurance on the overall effectiveness of the EPA's internal controls designed for operations and financial management systems.

In FY 2024, the EPA did not identify any new material weaknesses related to effectiveness and efficiency of operations. The EPA continues to emphasize the importance of maintaining effective internal controls in order to comply with FMFIA and other applicable laws and regulations.

Internal Controls Over Financial Reporting

The agency has evaluated the key internal controls spanning its financial processes. Based on this evaluation, the EPA identified one new material weakness. Subsequent to the agency's review, The EPA's OIG identified two new material weaknesses during the FY 2024 financial statement audit.

Internal Controls Over Financial Management Systems

The FMFIA requires agencies to ensure that financial management systems consistently provide reliable data that comply with government-wide principles, standards, and requirements. Based on the agency's evaluation of its financial management systems, no material weaknesses were identified. The assessment included a review of the agency's core financial system, Compass, as well as those considered as financially related or mixed systems that support or interface with the core financial system. The EPA has determined that its financial management systems substantially comply with FMFIA requirements and federal standards.

Based on the results of the agency and the OIG's FY 2024 evaluations, the Administrator provides reasonable assurance on the adequacy and effectiveness of the EPA's internal controls over financial management systems.

The Digital Accountability and Transparency Act

The DATA Act of 2014 was designed to increase the standardization and transparency of federal spending. It requires agencies to report data, consistent with data standards established by OMB and the Department of the Treasury, for publication on USASpending.gov.

During the implementation of the DATA Act requirements, the EPA certified compliance with OMB guidance and provided reasonable assurance that internal controls support the reliability and validity of account-level and award-level data reported on USASpending.gov. This level of assurance in the internal controls enables through three elements of the EPA DATA Act submission process: 1) establishment of the DATA Act Evaluation and Approval Repository Tool (DEAR); 2) multi-level approval process; and 3) documentation of all associated warnings in its statement of assurance.

The DEAR Tool was designed to transform data to meet the data standards, pre-validate all warnings and edits that would be triggered when submitting the information to the DATA Act broker, and to standardize and fully document the multi-level approval process, culminating in the Senior Accountable Official approval.

The multi-level approval process within the DATA Act submission process allows all parties of the approval process to be informed of the issues present and documented within the files. The approval process consists of three independent reviews of the DATA Act files: appropriations and program activities/BOC (Files A and B), contract awards (File C and D1), and grant awards (File C and D2). The case manager for each review ensures that all warnings are within normal limits, edits have been removed and the files are ready for certification. Next, the Office Director provides a memorandum, which includes an explanation as to why particular warnings could not be fully resolved. By signing the memorandum, the Office Directors are confirming that the information submitted is valid and can be certified for publishing to USA Spending. A final briefing is held to give the appropriate assurance to the Senior Accountable Official and to address questions or concerns prior to official certification that the files fully comply with the law.

The DATA Act Statement of Assurance is the central piece of information for the agency to document its data issues that triggered the DATA Act warnings but remain unresolved. The EPA's approach is to address all data issues that can easily be resolved with changes to the host financial system or the DEAR. For those issues that what cannot be addressed in a timely fashion, the agency fully documents the cause of the warnings within the Statement of Assurance. Therefore, the EPA uses the DATA Act Statement of Assurance as the document to illustrate that even though our data has flaws, the agency understood and considered the issues in the larger context of the DATA Act submission.

The agency continually works to improve data quality and completeness, in line with the requirements of the DATA Act. Moving into FY 2025, the agency aims to continue to focus on improving data quality and streamlining the review processes to ensure that it continues to maintain exemplary transparency to the public on spending.

Antideficiency Act (ADA)

Per the Antideficiency Act (ADA), federal employees are prohibited from obligating funds in excess of an appropriation, or before those funds are available, and from accepting voluntary services. As of FY 2024, the EPA has no known violations of the Antideficiency Act for FY 2024.

Federal Financial Management Improvement Act (FFMIA)

FFMIA requires that agencies implement and maintain financial management systems that comply with the following:

- Federal financial management system requirements;
- Applicable federal accounting standards; and
- U.S. Standard General Ledger at the transaction level.

The agency evaluated its financial management systems and has determined they complied with FFMIA requirements. Additionally, FFMIA requires independent auditors to report on agency compliance with the three requirements as part of financial statement audit reports.

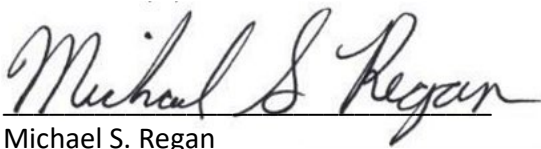

FISCAL YEAR 2024 ANNUAL ASSURANCE STATEMENT

The U.S. Environmental Protection Agency's management is responsible for managing risk and maintaining effective internal controls to meet the objectives of the *Federal Managers' Financial Integrity Act*.

In accordance with Section 2 of the FMFIA and the Office of Management and Budget's Circular A-123, "Management's Responsibility for Enterprise Risk Management and Internal Control," the EPA identified and evaluated risks and assessed the effectiveness of its internal controls to support the effectiveness and efficiency of operations, reliable financial reporting, and compliance with applicable laws and regulations. Section 4 of the FMFIA and the *Federal Financial Management Improvement Act of 1996* require management to ensure financial management systems provide reliable, consistent disclosure of financial data. In accordance with Appendix D of the OMB's Circular A-123, the agency evaluated whether financial management systems substantially comply with the FMFIA requirements.

Based on the EPA's and the Office of Inspector General's reviews, the agency has three new material weaknesses. The EPA identified a material weakness related to the inadequacy of accounting treatment of internal controls for new programs. The OIG identified two material weaknesses related to the Superfund State Contracts accrual methodology and the accrual methodology related to Clean School Bus rebates. The agency has completed several corrective actions and anticipates completing remaining corrective actions for these material weaknesses in FY 2025. More information on the identified material weaknesses is provided in Section III, "Other Accompanying Information" of this report.

As a result of the EPA's assessments, I can provide reasonable assurance that, except for the material weaknesses described above, the agency's internal controls over operations are effective, and the EPA's financial management systems conform to governmentwide standards as of September 30, 2024. The agency's internal controls over financial reporting are operating effectively as well.

Michael S. Regan
Administrator

(Dollars in Thousands)

Note 1. Summary of Significant Accounting Policies

A. Reporting Entities

The EPA was created in 1970 by executive reorganization from various components of other federal agencies to better marshal and coordinate federal pollution control efforts. The Agency is generally organized around the media and substances it regulates: air, water, waste, pesticides, and toxic substances.

The FY 2024 financial statements are presented on a consolidated basis for the Balance Sheet, Statement of Net Cost, Statement of Net Costs by Major Program, and Statement of Changes in Net Position. The Statement of Custodial Activity and the Statement of Budgetary Resources are presented on a combined basis. The financial statements include the accounts of all funds described in this note by their respective Treasury fund group.

B. Basis of Presentation

The accompanying financial statements have been prepared to report the financial position and results of operations of the U.S. Environmental Protection Agency (the EPA or Agency) as required by the Chief Financial Officers Act of 1990 and the Government Management Reform Act of 1994. The reports have been prepared from the financial system and records of the Agency in accordance with Office of Management and Budget (OMB) Circular No. A-136, *Financial Reporting Requirements* revised May 30, 2024, and the EPA accounting policies, which are summarized in this note.

C. Budgets and Budgetary Accounting

I. General Funds

Congress enacts an annual appropriation for State and Tribal Assistance Grants (STAG), Buildings and Facilities (B&F), and for payments to the Hazardous Substance Superfund to be available until expended. Annual appropriations for the Science and Technology (S&T), Environmental Programs and Management (EPM) and for the Office of Inspector General (OIG) are available for two fiscal years. When the appropriations for the General Funds are enacted, Treasury issues a warrant for the respective appropriations. As the Agency disburses obligated amounts, the balance of funds available in the appropriation is reduced at the U.S. Treasury (Treasury).

The EPA has three-year appropriation accounts and a no-year revolving fund account to provide funds to carry out section 3024 of the Solid Waste Disposal Act, including the development, operation, maintenance, and upgrading of the hazardous waste electronic manifest system. The Agency is authorized to establish and collect user fees for the Hazardous Waste Electronic Manifest System Fund (e-Manifest) to recover the full cost of providing the hazardous waste electronic manifest fund system related services.

The EPA receives two-year appropriated funds to carry out the Frank R. Lautenberg Chemical Safety for the 21st Century Act. Under the Act, the Agency is authorized to collect user fees (up to \$25 million annually) from chemical manufacturers and processors. Fees collected will defray costs for new chemical reviews and a range of Toxic Substances Control Act Service Fee Fund (TSCA) implementation activities for existing chemicals.

The Water Infrastructure Finance and Innovation Act of 2014 (WIFIA) established a federal credit program administered by the EPA for eligible water and wastewater infrastructure projects. The program is financed from appropriations to cover the estimated long-term cost of the loans. The long-term cost of the loans is defined as the net present value of the estimated cash flows associated with the loans. A permanent indefinite appropriation is available to finance the costs of reestimated loans that occur in subsequent years after the loans are disbursed. The Agency received two-year appropriations in fiscal years 2024 and 2023 to finance the administrative portion of the program.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

EPA reestimates the risk on each individual loan annually. Proceeds issued by EPA generally cannot exceed 49% of eligible project costs, but under certain circumstances small communities can receive up to 80%. Project costs must exceed a minimum of \$20 million for large communities and \$5 million for communities with populations of 25,000 or less. After substantial completion of a project, the borrower may defer up to five years to start loan repayment and cannot exceed thirty-five years for the final loan maturity date.

Funds transferred from other federal agencies are processed as non-expenditure transfers. Clearing accounts and receipt accounts receive no appropriated funds. Amounts are recorded to the clearing accounts pending further disposition. Amounts recorded to the receipt accounts capture amounts collected for or payable to the Treasury General Fund.

On November 15, 2021, the Infrastructure Investment and Jobs Act (Public Law 117-58) was signed into law, appropriating approximately \$60 billion to the Agency over fiscal years 2022 through 2026; some funds have five-year availability but most are available until expended. The Inflation Reduction Act (IRA), signed in August 2022, appropriated the Agency an additional \$42 billion, available for a minimum of two and a maximum of ten fiscal years.

II. Revolving Funds

Funding of the Pesticides Reregistration and Expedited Processing Fund (FIFRA) and Hazardous Waste Electronic Manifest System Fund (e-Manifest) is provided by fees collected from industry to offset costs incurred by the Agency in carrying out these programs. Each year, the Agency submits an apportionment request to OMB based on the anticipated collections of industry fees.

Funding of the Working Capital Fund (WCF) is provided by fees collected from other Agency appropriations and other federal agencies to offset costs incurred for providing the Agency administrative support for computer and telecommunication services, financial system services, employee relocation services, background investigations, continuity of operations, and postage.

The EPA Damage Assessment and Restoration Revolving Fund was established through the U.S. Department of the Treasury and OMB for funds received for critical damage assessments and restoration of natural resources injured as a result of the Deepwater Horizon oil spill.

III. Special Funds

The Environmental Services Receipts Account Fund obtains fees associated with environmental programs. The Pesticide Registration Improvement Act Fund (PRIA) collects pesticide registration service fees for specified registration and amended registration and associated tolerance actions which set maximum residue levels for food and feed. The Toxic Substances Control Act Fund (TSCA) collects user fees to defray costs for new chemical reviews and range of implementation activities for existing chemicals.

IV. Deposit Funds

Deposit accounts receive no appropriated funds. Amounts are recorded to the deposit accounts pending further disposition. Until a determination is made, these are not the EPA's funds. The amounts are reported to the U.S. Treasury through the Government-Wide Treasury Account Symbol Adjusted Trial Balance System (GTAS).

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

V. Trust Funds

Congress enacts an annual appropriation for the Hazardous Substance Superfund, Leaking Underground Storage Tank (LUST) and the Inland Oil Spill Programs accounts to remain available until expended. Transfer accounts for the Superfund and LUST Trust Funds have been established to record appropriations moving from the Trust Fund to allocation accounts for purposes of carrying out the program activities. As the Agency disburses obligated amounts from the expenditure account, the Agency draws down monies from the Superfund and LUST Trust Funds held at Treasury to cover the amounts being disbursed. The Agency draws down all the appropriated monies from the Principal Fund of the Oil Spill Liability Trust Fund when Congress enacts the Inland Oil Spill Programs appropriation amount to the EPA's Inland Oil Spill Programs account.

In 2015, the EPA established a receipt account for Superfund special account collections. Special accounts are comprised of settlements from other federal agencies and proceeds from Potentially Responsible Parties (PRPs) under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 122(b)(3). This allows the Agency to invest the funds until drawdowns are needed for special accounts disbursements.

VI. Classified Activities

Accounting standards require all reporting entities to disclose that accounting standards allow certain presentations and disclosures to be modified, if needed, to prevent the disclosure of classified information.

VII. Allocation Transfers

The EPA is a party to allocation transfers with other Federal agencies as both a transferring (parent) entity and a receiving (child) entity. Allocation transfers are legal delegations from one entity of its authority to obligate budget authority and outlay funds to another entity. A separate fund account (allocation account) is created in the U.S. Treasury as a subset of the parent fund account for tracking and reporting purposes. All allocation transfers of balances are credited to this account, and subsequent obligations and outlays incurred by the child entity are charged to this allocation account as they execute the delegated activity on behalf of the parent entity. Generally, all financial activity related to allocation transfers (e.g., budget authority, obligations, and outlays) is reported in the financial statements of the parent entity from which the underlying legislative authority, appropriations and budget apportionments are derived. The EPA allocates funds, as the parent, to the Center for Disease Control. The EPA receives allocation transfers, as the child, from the Bureau of Land Management.

D. Basis of Accounting

Generally Accepted Accounting Principles (GAAP) for federal entities is the standard prescribed by the Federal Accounting Standards Advisory Board (FASAB), which is the official standard-setting body for the Federal Government, and the American Institute of Certified Public Accountants (AICPA). The financial statements are prepared in accordance with GAAP for federal entities.

Transactions are recorded on an accrual accounting basis and a budgetary basis. Under the accrual method, revenues are recognized when earned and expenses are recognized when liabilities are incurred, without regard to receipt or payment of cash. Budgetary accounting facilitates compliance with legal constraints and controls over the use of federal funds posted in accordance with OMB directives and the U.S. Treasury regulations.

EPA uses a modified matching principle since federal entities recognize unfunded liabilities (without budgetary resources) in accordance with FASAB Statement of Federal Financial Accounting Standards (SFFAS) No. 5 *Accounting for Liabilities of the Federal Government*.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

E. Revenue and Other Financing Sources

As a component of the Government-wide reporting entity, the entity is subject to the Federal budget process, which involves appropriations that are provided annually and appropriations that are provided on a permanent basis. The financial transactions that are supported by budgetary resources, which include appropriations, are generally the same transactions reflected in entity and Government-wide financial reports.

The reporting entity's budgetary resources reflect past congressional action and enable the entity to incur budgetary obligations, but they do not reflect assets to the Government as a whole. Budgetary obligations are legal obligations for goods, services, or amounts to be paid based on statutory provisions (e.g., Social Security benefits). After budgetary obligations are incurred, Treasury will make disbursements to liquidate the budgetary obligations and finance those disbursements in the same way it finances all disbursements, using some combination of receipts, other inflows, and borrowing from the public (if there is a budget deficit).

The following EPA policies and procedures to account for the inflow of revenue and other financing sources are in accordance with SFFAS No. 7, *Accounting for Revenues and Other Financing Sources*.

I. Superfund

The Superfund program receives most of its funding through appropriations that may be used within specific statutory limits for operations and capital expenditures (primarily equipment). Additional financing for the Superfund program is obtained through settlements from other federal agencies and proceeds from PRPs under CERCLA Section 122(b)(3), which are placed into special accounts. Special accounts and corresponding interest are classified as mandatory appropriations due to the 'retain and use' authority under CERCLA 122(b) (3). Cost recovery settlements that are not placed in special accounts are deposited in the Superfund Trust Fund.

II. Other Funds

Funds under the Federal Credit Reform Act of 1990 receive program guidance and funding needed to support loan programs through appropriations which may be used within statutory limits for operations and capital expenditures. The WIFIA program receives additional funding to support awarding, servicing and collecting loans through application fees collected in the program fund. WIFIA authorizes the EPA to charge fees to recover all or a portion of the Agency's cost of providing credit assistance and the costs of retaining expert firms, including financial, engineering, and legal services, to assist in the underwriting and servicing of federal credit instruments. The fees are to cover costs to the extent not covered by congressional appropriations.

The FIFRA and PRIA funds receive funding through fees collected for services provided and interest on invested funds and can obligate collections up to the amount of anticipated collections within the fiscal year on the approved letter of apportionment. The e-Manifest Fund receives funding through fees collected for use of the Hazardous Waste Electronic Manifest System and can obligate collections up to the amount of anticipated collections on the approved letter of apportionment. The TSCA Fund collects user fees to defray costs for new chemical reviews and a range of implementation activities for existing chemicals and can obligate collections up to the amount of anticipated collections on the approved letter of apportionment. The WCF receives revenue through fees collected from the Agency program offices for services provided. Such revenue is eliminated with related Agency program expenses upon consolidation of the Agency's financial statements.

Appropriated funds are recognized as other financing sources expended when goods and services have been rendered without regard to payment of cash. Other revenues are recognized when earned (i.e., when services have been rendered).

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

F. Fund Balance with Treasury (See Note 2)

FBWT is an asset of a reporting entity and a liability of the General Fund. Similarly, investments in Federal Government securities that are held by Dedicated Collections accounts are assets of the reporting entity responsible for the Dedicated Collections and liabilities of the General Fund. In both cases, the amounts represent commitments by the Government to provide resources for particular programs, but they do not represent assets to the Government as a whole.

When the reporting entity seeks to use FBWT or investments in Government securities to liquidate budgetary obligations, Treasury will finance the disbursements in the same way it finances all other disbursements, using some combination of receipts, other inflows, and borrowing from the public (if there is a budget deficit).

The Agency does not maintain cash in commercial bank accounts; cash receipts and disbursements are handled by Treasury. The major funds maintained with Treasury are General Funds, Revolving Funds, Trust Funds, Special Funds, Deposit Funds, and Clearing Accounts. These funds have balances available to pay current liabilities and finance authorized obligations, as applicable.

G. Investments in U.S. Government Securities (See Note 4)

Investments in U.S. Government securities are maintained by Treasury and are reported at amortized cost net of unamortized discounts or premiums. Discounts or premiums are amortized over the term of the investments and reported as interest income. No provision is made for unrealized gains or losses on these securities because they generally are held to maturity.

H. Marketable Securities (See Note 4)

The Agency records marketable securities at cost as of the date of receipt. Marketable securities are held by Treasury and reported at their cost value in the financial statements until sold.

I. Accounts Receivable and Interest Receivable (See Note 5)

Superfund accounts receivable represent recovery of costs from PRPs as provided under CERCLA as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA). Since there is no assurance that these funds will be recovered, cost recovery expenditures are expensed when incurred. The Agency also records allocations receivable from the Superfund Trust Fund, which are eliminated in the consolidated totals.

The Agency records accounts receivable from PRPs for Superfund site response costs when a consent decree, judgment, administrative order, or settlement is entered. These agreements are generally negotiated after at least some, but not necessarily all, of the site response costs have been incurred. It is the Agency's position that until a consent decree or other form of settlement is obtained, the amount recoverable should not be recorded.

The Agency also records accounts receivable from states for a percentage of Superfund site remedial action costs incurred by the Agency within those states. As agreed to under SSCs, cost sharing arrangements may vary according to whether a site was privately or publicly operated at the time of hazardous substance disposal and whether the Agency response action was removal or remedial. SSC agreements are usually for 10 percent or 50 percent of site remedial action costs, depending on who has the primary responsibility for the site (i.e., publicly or privately owned). States may pay the full amount of their share in advance or incrementally throughout the remedial action process.

Most remaining receivables for non-Superfund funds represent penalties and interest receivable for general fund receipt accounts, unbilled intragovernmental reimbursements receivable, and refunds receivable for the STAG appropriation.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

J. Advances and Prepayments

Advances and prepayments represent funds paid to other entities both internal and external to the Agency for which a budgetary expenditure has not yet occurred.

K. Loans Receivable (See Note 7)

Loans are accounted for as receivables after funds have been disbursed. Loans receivable resulting from loans obligated on or after October 1, 1991, are reduced by an allowance equal to the present value of the subsidy costs associated with these loans. The subsidy cost is calculated based on the interest rate differential between the loans and Treasury borrowing, the estimated delinquencies and defaults net of recoveries offset by fees collected, and other estimated cash flows associated with these loans. Loan proceeds are disbursed pursuant to the terms of the loan agreement. Interest is calculated semi-annually on a per loan basis. Repayments are made pursuant to the terms of the loan agreement with the option to repay loan amounts early.

L. Amounts Held by Treasury (See Note 27)

Cash available to the Agency that is not needed immediately for current disbursements of the Superfund and LUST Trust Funds, and amounts appropriated from the Superfund Trust Fund to the OIG and Science and Technology appropriations, remains in the respective Trust Funds managed by Treasury.

M. Property, Plant, and Equipment (See Note 9)

The EPA accounts for its personal and real property accounting records in accordance with SFFAS No. 6, *Accounting for Property, Plant and Equipment* as amended. For EPA-held property, the Fixed Assets Subsystem (FAS) maintains the official records and automatically generates depreciation entries monthly based on in-service dates.

A purchase of EPA-held or contractor-held personal property is capitalized if it is valued at \$25 thousand or more and has an estimated useful life of at least two years. For contractor-held property, depreciation is taken on a modified straight-line basis over a period of six years depreciating 10 percent the first and sixth year, and 20 percent in years two through five. For contractor-held property, detailed records are maintained and accounted for in contractor systems, not in EPA's FAS. Acquisitions of EPA-held personal property are depreciated using the straight-line method over the specific asset's useful life, ranging from two to fifteen years.

Personal property are tangible assets that have an estimated useful life of 2 or more years, are not intended for sale in the ordinary course of business and are intended to be used or available for use by the entity.

The EPA accounts for leases in accordance with SFFAS 54. Federal lessees recognize a lease liability and a leased asset at the commencement of the lease term, unless it meets any of the scope exclusions or the definition/criteria of short-term leases, or contracts or agreements that transfer ownership, or intragovernmental leases. The lease liability is measured at the present value of payments expected to be made during the lease term. The future lease payments are discounted using the estimated rate that would be charged for borrowing the lease payment amounts for the lease term. The amortization of the discount on the lease liability is calculated and recognized as interest expense for the period. Payments are allocated first to the accrued interest liability and then to the lease liability.

Superfund contract property used as part of the remedy for a site-specific response action is capitalized in accordance with the Agency's capitalization threshold. This property is part of the remedy at the site and eventually becomes part of the site itself. Once the response action has been completed and the remedy implemented, the EPA retains control of the property (i.e., pump and treat facility) for 10 years or less and transfers its interest in the facility to the respective state for mandatory operation and maintenance – usually 20 years or more. Consistent with the EPA's 10-year retention period, depreciation for this property is based on a 10-year useful life. However, if any property is transferred to a state in a year or less, this property is charged to expense. If any property is sold prior to the EPA relinquishing interest, the proceeds from the sale of that property shall be applied against contract payments or refunded as required by the Federal Acquisition Regulations. An exception to the accounting of contract property includes equipment

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

purchased by the WCF. This property is retained in EPA's FAS and depreciated utilizing the straight-line method based upon the asset's in-service date and useful life.

Real property consists of land, buildings, capital and leasehold improvements, property owned by the reporting entity in the hands of or leased to others, land rights that do not meet the definition of a lease and contracts or agreements that transfer ownership. In FY 2017, the EPA increased the capitalization threshold for real property, other than land, to \$150 thousand from \$85 thousand for buildings and improvements and \$25 thousand for plumbing, heating, and sanitation projects. The new threshold was applied prospectively. Land is capitalized regardless of cost. Buildings are valued at an estimated original cost basis, and land is valued at fair market value, if purchased prior to FY 1997. Real property purchased after FY 1996 is valued at actual cost. Depreciation for real property is calculated using the straight-line method over the specific asset's useful life, ranging from 10 to 50 years. Leasehold improvements are amortized over the lesser of their useful life or the unexpired lease term. Additions to property and improvements not meeting the capitalization criteria, expenditures for minor alterations, and repairs and maintenance are expensed when incurred.

Internal use software includes purchased commercial off-the-shelf software, contractor-developed software, and software that was internally developed by Agency employees. In FY 2017, the EPA reviewed its capitalization threshold levels for PP&E. The Agency performed an analysis of the values of software assets, reviewed capitalization of other federal entities, and evaluated the materiality of software account balances. Based on the review, the Agency increased the capitalization threshold from \$250 thousand to \$5 million to better align with major software acquisition investments. The \$5 million threshold was applied prospectively to software acquisitions, modifications, and enhancements placed into service after September 30, 2016. Software assets placed into service prior to October 1, 2016 were capitalized at the \$250 thousand threshold. Internal use software is capitalized at full cost (direct and indirect) and amortized using the straight-line method over its useful life, not exceeding five years.

Internal use software purchased or developed for the working capital fund is capitalized at \$250 thousand and is amortized using the straight-line method over its useful life, not exceeding five years.

N. Liabilities (See Notes 8 & 13)

Liabilities represent the amount of monies or other resources that are more likely than not to be paid by the Agency as the result of an Agency transaction or event that has already occurred and can be reasonably estimated. However, no liability can be paid by the Agency without an appropriation or other collections authorized for retention. Liabilities for which an appropriation has not been enacted are classified as unfunded liabilities and there is no certainty that the appropriations will be enacted. Liabilities of the Agency arising from other than contracts can be abrogated by the Government acting in its sovereign capacity.

O. Debt (See Note 10)

Debt payable to Treasury results from loans from Treasury to fund the non-subsidy portion of the WIFIA direct loans. The Agency borrows the funds from Treasury when the loan disbursements agreed upon in the loan agreement are made. Principal payments are made to Treasury periodically based on the collection of loan receivables.

P. Accrued Unfunded Annual Leave (See Note 24)

Annual, sick and other leave is expensed as taken during the fiscal year. Annual leave earned but not taken at the end of the fiscal year is accrued as an unfunded liability. Accrued unfunded annual leave is included in the Balance Sheet as a component of "Federal Employee Salary, Leave and Benefits Payable". Sick leave earned but not taken is not accrued as a liability; it is expensed as it is used.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Q. Retirement Plan (See Note 23)

There are two primary retirement systems for federal employees. Employees hired prior to January 1, 1987, may participate in the Civil Service Retirement System (CSRS). On January 1, 1987, the Federal Employees Retirement System (FERS) went into effect pursuant to Public Law 99-335. Most employees hired after December 31, 1986, are automatically covered by FERS and Social Security. Employees hired prior to January 1, 1987, elected to either join FERS and Social Security or to remain in CSRS. A primary feature of FERS is that it offers a savings plan to which the Agency automatically contributes one percent of pay and matches any employee contributions up to an additional four percent of pay. The Agency also contributes the employer's matching share for Social Security.

With the issuance of SFFAS No. 5, *Accounting for Liabilities of the Federal Government*, accounting and reporting standards were established for liabilities relating to the federal employee benefit programs (Retirement, Health Benefits, and Life Insurance). SFFAS No. 5 requires that the employing agencies recognize the cost of pensions and other retirement benefits during their employees' active years of service. SFFAS No. 5 requires that the Office of Personnel Management (OPM), as administrator of the CSRS and FERS, the Federal Employees Health Benefits Program, and the Federal Employees Group Life Insurance Program, provide federal agencies with the actuarial cost factors to compute the liability for each program.

R. Prior Period Adjustments and Restatements

Prior period adjustments, if any, are made in accordance with SFFAS No. 21, *Reporting Corrections of Errors and Changes in Accounting Principles*. Specifically, prior period adjustments will only be made for material prior period errors to: (1) the current period financial statements, and (2) the prior period financial statements presented for comparison. Adjustments related to changes in accounting principles will only be made to the current period financial statements, but not to prior period financial statements presented for comparison.

S. Deepwater Horizon Oil Spill

The April 20, 2010 Deepwater Horizon (DWH) Oil Spill was the largest oil spill in U.S. history. In the wake of the spill, the National Contingency Plan regulation was revised to reflect the EPA's designation as a DWH Natural Resource Trustee. The DWH Natural Resources Damage Assessment is a legal process pursuant to the Oil Pollution Act and the April 4, 2016 Consent Decree between the U.S., the five Gulf states, and British Petroleum (BP) entered by a federal court in New Orleans. Under the Consent Decree, a payment schedule was set forth for BP to pay \$7.1 billion in natural resource damages. The Natural Resource Damage Assessments (NRDA) trustees are then jointly responsible to use those funds in the manner set forth in Appendix 2 of the Consent Decree to restore natural resources injured by the DWH Oil Spill. In FY 2016, the EPA received advances from BP and the U.S. Coast Guard, to participate in addressing injured natural resources and service resulting from the Deepwater Horizon Oil Spill. As additional projects are identified, the EPA may continue to receive funding through the 2016 Consent Decree to implement its DWH NRDA Trustee responsibilities in the Agency's Damage Assessment and Restoration Revolving Trust Fund.

T. Use of Estimates

The preparation of financial statements requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, including environmental and grant liabilities, and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

U. Reclassifications and Comparative Figures

Certain reclassifications have been made to the prior year's financial statements to enhance comparability with the current year's financial statements and footnotes in accordance with Office of Management and Budget (OMB) Circular No. A-136, *Financial Reporting Requirements* revised May 30, 2024. As a result, the form and content of the Balance Sheet, Statement of Changes in Net Position and footnotes have been changed to conform with OMB Circular No. A-136.

Note 2. Fund Balance With Treasury (FBWT)

Fund Balance with Treasury as of September 30, 2024 and 2023 consists of the following:

	2024			2023		
	Entity Assets	Non-Entity Assets	Total	Entity Assets	Non-Entity Assets	Total
Trust Funds:						
Superfund	\$ 26,546	\$ -	\$ 26,546	\$ (56,699)	\$ -	\$ (56,699)
LUST	23,778	-	23,778	20,603	-	20,603
Oil Spill & Misc.	17,565	-	17,565	20,556	-	20,556
Revolving Funds:						
FIFRA/Tolerance	34,713	-	34,713	30,826	-	30,826
Working Capital	158,800	-	158,800	116,764	-	116,764
E-Manifest	54,986	-	54,986	45,425	-	45,425
NRDA	2,826	-	2,826	2,544	-	2,544
WIFIA	13,153	-	13,153	17,441	-	17,441
Appropriated	82,393,381	-	82,393,381	73,765,838	-	73,765,838
Other Fund Types	653,009	5,674	658,683	622,876	3,594	626,470
Total	<u>\$ 83,378,757</u>	<u>\$ 5,674</u>	<u>\$ 83,384,431</u>	<u>\$ 74,586,174</u>	<u>\$ 3,594</u>	<u>\$ 74,589,768</u>

Entity fund balances, except for special fund receipt accounts, are available to pay current liabilities and to finance authorized purchase commitments (see Status of Fund Balances below). Entity Assets for Other Fund Types consist of special purpose funds and special fund receipt accounts, such as the Pesticide Registration funds and the Environmental Services receipt account. The Non-Entity Assets for Other Fund Types consist of clearing accounts and deposit funds, which are either awaiting documentation for the determination of proper disposition or being held by the EPA for other entities.

Status of Fund Balances:

Unobligated Amounts in Fund Balance:

	2024	2023
Available for Obligation	\$ 30,239,849	\$ 59,166,962
Unavailable for Obligation	122,602	114,325
Net Receivables from Invested Balances	(9,226,625)	(8,822,692)
Balances in Treasury Trust Fund	(95,273)	(182,653)
Obligated Balance not yet Disbursed	61,700,498	23,705,591
Non-Budgetary FBWT	643,380	608,235
Total	<u>\$ 83,384,431</u>	<u>\$ 74,589,768</u>

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

The funds available for obligation may be apportioned by OMB for new obligations at the beginning of the following fiscal year. Funds unavailable for obligation are generally balances in expired funds, which are available only for adjustments of existing obligations. For September 30, 2024 and 2023, no differences existed between Treasury's accounts and the EPA's statements for fund balances with Treasury. See Note 1 paragraph F for additional information.

Note 3. Cash and Other Monetary Assets

As of September 30, 2024 and 2023, the balance in the imprest fund was \$10.

Note 4. Investments, Net

As of September 30, 2024 and 2023, investments consist of the following:

		<u>Cost</u>	<u>Amortization Method</u>	<u>Amortized (Premium) Discount</u>	<u>Interest Receivable</u>	<u>Investments, Net</u>	<u>Market Value</u>
Intragovernmental Securities:							
Non-Marketable	FY 2024	\$ 13,166,439	Straight Line	431,532	2,459	12,737,366	\$ 12,737,366
Non-Marketable	FY 2023	\$ 12,438,324	Straight Line	289,586	10,545	12,159,283	\$ 12,159,283

CERCLA, as amended by SARA, authorizes the EPA to recover monies to clean up Superfund sites from responsible parties (RPs). Some RPs file for bankruptcy under Title 11 of the U.S. Code. In bankruptcy settlements, the EPA is an unsecured creditor and is entitled to receive a percentage of the assets remaining after secured creditors have been satisfied. Some RPs satisfy their debts by issuing securities of the reorganized company. The Agency does not intend to exercise ownership rights to these securities and instead will convert them to cash as soon as practicable. All investments in Treasury securities are funds from dedicated collections (see Note 17).

The Federal Government does not set aside assets to pay future benefits or other expenditures associated with funds from dedicated collections. The cash receipts collected from sources other than intragovernmental for dedicated collection funds are deposited in the U.S. Treasury, which uses the cash for general Government purposes. Treasury securities are issued to the EPA as evidence of its receipts. Treasury securities are an asset to the EPA and a liability to the U.S. Treasury. Because the EPA and the U.S. Treasury are both parts of the Government, these assets and liabilities offset each other from the standpoint of the Government as a whole. For this reason, they do not represent an asset or liability in the U.S. Government-wide financial statements.

Treasury securities provide the EPA with authority to draw upon the U.S. Treasury to make future benefit payments or other expenditures. When the EPA requires redemption of these securities to make expenditures, the Government finances those expenditures out of accumulated cash balances, by raising taxes or other receipts, by borrowing from the public or repaying less debt, or by curtailing other expenditures. This is the same way that the Government finances all other expenditures. See Note 1 paragraphs G and H for additional information.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Note 5. Accounts Receivable, Net

Accounts Receivable as of September 30, 2024 and 2023, consist of the following:

	<u>2024</u>	<u>2023</u>
Intragovernmental:		
Accounts & Interest Receivable	\$ 9,006	\$ 8,938
Less: Allowance for Uncollectible Accounts	<u>(902)</u>	<u>(1,252)</u>
Total	<u>\$ 8,104</u>	<u>\$ 7,686</u>
	<u>2024</u>	<u>2023</u>
Other Than Intragovernmental:		
Unbilled Accounts Receivable	\$ 100,293	\$ 110,567
Accounts & Interest Receivable	2,536,158	2,647,893
Less: Allowance for Uncollectible Accounts	<u>(2,200,345)</u>	<u>(2,237,768)</u>
Total	<u>\$ 436,106</u>	<u>\$ 520,692</u>

The Allowance for Uncollectible Accounts is determined both on a specific identification basis, as a result of a case-by-case review of receivables, and on a percentage basis for receivables not specifically identified. See Note 1 paragraph I for additional information.

Note 6. Inventory and Related Property

Inventory and related property as of September 30, 2024 and 2023, consist of the following:

	<u>2024</u>	<u>2023</u>
Inventory Purchased for Resale	\$ 540	\$ 626
Total	<u>\$ 540</u>	<u>\$ 626</u>

Note 7. Loans Receivable, Net

Direct loans receivable disbursed from obligations made after FY 1991 are governed by the Federal Credit Reform Act, which mandates that the present value of the subsidy costs (i.e., interest rate differentials, interest subsidies, anticipated delinquencies, and defaults) associated with direct loans be recognized as a cost in the year the loan is disbursed. The net loan present value is the gross loan receivable less the subsidy present value. The EPA does not have any loans obligated prior to 1992.

The EPA administers the WIFIA Direct Loans program. In fiscal years 2024 and 2023, the Agency received borrowing authority of \$3 billion and \$6 billion respectively for the non-subsidy portion of loan proceeds disbursed. For the fiscal years ended September 30, 2024 and 2023, the Agency closed \$3 billion and \$6 billion in WIFIA loans, respectively.

Interest on the loans is accrued based on the terms of the loan agreement. For the fiscal years ended September 30, 2024 and 2023, the WIFIA program has incurred \$45 million and \$16 million in administrative expenses, respectively.

Total Direct Loans Subsidy Expense

Direct Loan Program	2024	2023
WIFIA	\$ 36,887	\$ 8,687

Budget Subsidy Rates for Direct Loans for the Current Year Cohort

Direct Loan Program	2024 Interest Differential	Defaults	Fees and Other Collections	Other Subsidy Costs	Total
WIFIA	0%	0.7%	0%	0%	0.7%

Direct Loan Program	2023 Interest Differential	Defaults	Fees and Other Collections	Other Subsidy Costs	Total
WIFIA	0%	0.73%	0%	0%	0.73%

The subsidy rates disclosed pertain to the current year's cohort. The rates cannot be applied to the direct loans disbursed during the current reporting year to yield the subsidy expense. The subsidy expense for new loans reported in the current year could result from disbursement of loans from both current year cohorts and prior year cohorts. The subsidy expense reported in the current year also includes modifications and reestimates.

Schedule for Reconciling Subsidy Cost Allowance Balances

Beginning Balance, Changes and Ending Balance

	2024	2023
Beginning Balance of the Subsidy Allowance	\$ (861,407)	\$ (392,448)
Add: Subsidy Expense for Direct Loans Disbursed During the Reporting Years		
by Component		
Other Subsidy Costs	(36,887)	(8,688)
Reversal of PY subsidy costs	-	3,815
Total of the Above Subsidy Expense Components	\$ (36,887)	\$ (4,873)
Adjustments		
Loan Modifications	6,996	-
Subsidy Allowance Amortization	118,762	73,592
Ending Balance of the Subsidy Cost Allowance Before Reestimates	(772,536)	(323,729)
Add or Subtract Subsidy Reestimates by Component		
Interest Rate Reestimates	(115,543)	(76,295)
Technical/Default Reestimates	(730,933)	(461,383)
Total of the Above Reestimate Components	\$ (846,476)	\$ (537,678)
Ending Balance of the Subsidy Cost Allowance	\$ (1,619,012)	\$ (861,407)

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

The economic assumptions of the WIFIA upward and downward adjustments were a reassessment of risk levels as well as estimated changes in future cash flows on loans. Actual interest rates used for FY 2024 loan disbursements were higher than the interest rate assumptions used during the budget formulation process at loan origination. See Note 1 paragraph K for additional information.

	<u>2024</u>	<u>2023</u>
Beginning balance of loans receivable, net	\$ 2,401,922	\$ 1,291,508

Note 10. Debt

All debt is classified as not covered by budgetary resources, except for direct loan and guaranteed loan financing account debt to Treasury and that portion of other debt covered by budgetary resources at the Balance Sheet date.

The EPA borrows funds from the Bureau of Public Debt right before funds are disbursed to the borrower for the non-subsidy portion of WIFIA loans. As of September 30, 2024 and 2023, the EPA had debt due to Treasury consisting entirely of funds borrowed to finance the non-subsidy portion of the WIFIA Direct Loan Program:

	2023			2024	
	<u>Beginning Balance</u>	<u>Net Borrowing</u>	<u>Ending Balance</u>	<u>Net Borrowing</u>	<u>Ending Balance</u>
Debt to the Treasury	\$ <u>1,557,180</u>	\$ <u>1,396,045</u>	\$ <u>2,953,225</u>	\$ <u>3,928,501</u>	\$ <u>6,881,726</u>

See Note 1 paragraph O for additional information.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Note 11. Stewardship Property, Plant and Equipment

The Agency acquires title to certain property and property rights under the authorities provided in Section 104(j) CERCLA related to remedial clean-up sites. The property rights are in the form of fee interests (ownership) and easements to allow access to clean-up sites or to restrict usage of remediated sites. The Agency takes title to the land during remediation and transfers it to state or local governments upon the completion of clean-up. A site with “land acquired” may have more than one acquisition property. Sites are not counted as a withdrawal until all acquired properties have been transferred under the terms of 104(j).

As of September 30, 2024 and 2023, the Agency possessed the following land and land rights:

	<u>2024</u>	<u>2023</u>
Superfund Sites with Easements:		
Beginning Balance	48	47
Additions	<u>2</u>	<u>1</u>
Ending Balance	<u>50</u>	<u>48</u>
Superfund Sites with Land Acquired:		
Beginning Balance	32	33
Additions	2	-
Withdrawals	<u>(1)</u>	<u>(1)</u>
Ending Balance	<u>33</u>	<u>32</u>

Note 12. Liability to the General Fund for Custodial Assets

Liability to the General Fund for Custodial Assets represents the amount of net accounts receivable that, when collected, will be deposited to the Treasury General Fund. Included in the custodial liability are amounts for fines and penalties, interest assessments, repayments of loans, and miscellaneous other accounts receivable. As of September 30, 2024 and 2023, custodial liability is approximately \$379,168 and \$105,995 respectively.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Note 13. Other Liabilities

Other Liabilities consist of the following as of September 30, 2024:

	Covered by Budgetary Resources	Not Covered by Budgetary Resources	Total
Other Liabilities - Intragovernmental:			
Current			
Employer Contributions & Payroll Taxes	\$ 15,592	\$ -	\$ 15,592
Other Accrued Liabilities	178,429	-	178,429
Non-Current			
Unfunded FECA Liability	-	8,442	8,442
Unfunded Unemployment Liability	-	72	72
Payable to Treasury Judgement Fund	-	22,000	22,000
Total Intragovernmental	<u>\$ 194,021</u>	<u>\$ 30,514</u>	<u>\$ 224,535</u>
Other Liabilities - Other Than Intragovernmental:			
Current			
Liability for Deposit Funds, Other Than Intragovernmental	\$ 907	\$ 4,133	\$ 5,040
Other Accrued Liabilities	144,687	-	144,687
Grant Liabilities	572,391	-	572,391
Accrued Funded Payroll and Benefits	49,821	-	49,821
Capital Lease Liabilities	-	310	310
Direct Loans Subsidy Liability	-	1,169	1,169
Liability for Clearing Accounts	-	1,238	1,238
Total Other Than Intragovernmental	<u>\$ 767,806</u>	<u>\$ 6,850</u>	<u>\$ 774,656</u>

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Other Liabilities consist of the following as of September 30, 2023:

	Covered by Budgetary Resources	Not Covered by Budgetary Resources	Total
Current			
Employer Contributions & Payroll Taxes	\$ 9,653	\$ -	\$ 9,653
Other Accrued Liabilities	167,401	-	167,401
Loan Reestimates	-	769	769
Non-Current			
Unfunded FECA Liability	-	8,292	8,292
Unfunded Unemployment Liability	-	72	72
Payable to Treasury Judgement Fund	-	22,000	22,000
Total Intragovernmental	<u>\$ 177,054</u>	<u>\$ 31,133</u>	<u>\$ 208,187</u>
Other Liabilities - Other Than Intragovernmental			
Current			
Liability for Deposit Funds, Other Than Intragovernmental	\$ 510	\$ 4,313	\$ 4,823
Other Accrued Liabilities	132,683	-	132,683
Grant Liabilities	446,873	-	446,873
Accrued Funded Payroll and Benefits	38,217	-	38,217
Capital Lease Liabilities	-	1,007	1,007
Liability for Clearing Accounts	-	(254)	(254)
Total Other Than Intragovernmental:	<u>\$ 618,283</u>	<u>\$ 5,066</u>	<u>\$ 623,349</u>

Liabilities not covered by budgetary resources require future congressional action whereas liabilities covered by budgetary resources reflect prior congressional action. Regardless of when the congressional action occurs, when the liabilities are liquidated, Treasury will finance the liquidation in the same way that it finances all other disbursements, using some combination of receipts, other inflows, and borrowing from the public (if there is a budget deficit).

Other Accrued Liabilities are mostly comprised of contractor accruals.

See Note 1 paragraph N for additional information.

Note 14. Leases

The value of assets held under Capital Leases as of September 30, 2024 and 2023, are as follows:

Capital Leases:

	2024	2023
Summary of Assets Under Capital Lease:		
Real Property	\$ 24,666	\$ 24,485
Total	<u>24,666</u>	<u>24,485</u>
Accumulated Amortization	<u>\$ 24,212</u>	<u>\$ 23,464</u>

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

The EPA has one capital lease for land and buildings housing scientific laboratories. This lease includes a base rental charge and escalation clauses based upon either rising operating costs and/or real estate taxes. The base operating costs are adjusted annually according to escalators in the Consumer Price Indices published by the Bureau of Labor Statistics, U.S. Department of Labor. The EPA's lease will terminate in FY 2025.

Future Payments Due

<u>Fiscal Year</u>	<u>Capital Leases</u>
2025	\$ 335
Total Future Minimum Lease Payments	335
Less: Imputed Interest	(25)
Net Capital Lease Liability	310
Liabilities not Covered by Budgetary Resources	\$ 310

Note 15. Advances from Others and Deferred Revenue

As of September 30, 2024 Advances from Others and Deferred Revenue consist of the following:

	<u>2024</u>	<u>2023</u>
Other Than Intragovernmental:		
Cashout Advances, Superfund	\$ 3,394,211	\$ 3,544,466
Unearned Advances	162,729	131,740
Total	\$ 3,556,940	\$ 3,676,206

Cashout advances are funds received or receivable by the EPA, a state, or another responsible party under the terms of a settlement agreement (e.g., consent decree) to finance response action costs at a specified Superfund site. Under CERCLA Section 122(b)(3), cashout funds received by the EPA are placed in site-specific, interest-bearing accounts known as special accounts and are used for potential future work at such sites in accordance with the terms of the settlement agreement. Funds placed in special accounts may be disbursed to PRPs, to states that take responsibility for the site, or to other Federal agencies to conduct or finance response actions in lieu of the EPA without further appropriation by Congress.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Note 16. Commitments and Contingencies

The EPA may be a party in various administrative proceedings, actions and claims brought by or against it. These include:

- a) Various personnel actions, suits, or claims brought against the Agency by employees, and others.
- b) Various contract and assistance program claims brought against the Agency by vendors, grantees, and others.
- c) The legal recovery of Superfund costs incurred for pollution cleanup of specific sites, to include the collection of fines and penalties from responsible parties.
- d) Claims against recipients for improperly spent assistance funds which may be settled by a reduction of future EPA funding to the grantee or the provision of additional grantee matching funds.

As of September 30, 2024, there were no accrued liabilities for commitments and potential loss contingencies. As of September 30, 2023, there were no accrued liabilities for commitments and potential loss contingencies.

	<u>Accrued Liabilities</u>	<u>Estimated Range of Loss- Lower End</u>	<u>Estimated Range of Loss- Upper End</u>
FY 2024			
Legal Contingencies:			
Reasonably Possible	\$ -	\$ 8,065	\$ 8,065
FY 2023			
Legal Contingencies:			
Reasonably Possible	\$ -	\$ 7,522	\$ 7,522

A. Gold King Mine

On August 5, 2015, the EPA and its contractors were investigating under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) the Gold King Mine, an inactive mine in Colorado, when a release of acid mine drainage occurred. While the EPA team was excavating above the mine adit, water began leaking from the mine adit. The small leak quickly turned into a significant breach, releasing approximately three million gallons of mine water into the North Fork of Cement Creek, a tributary of the Animas River. The plume of acid mine water traveled from Colorado's Animas River into New Mexico's San Juan River, passed through the Navajo Nation, and deposited into Utah's Lake Powell.

As of September 30, 2024, legal claims exist for a claim made by an Environmental Restoration contractor for settlement costs of approximately \$2.6 million for the amount resolved through settlement with the Navajo Nation, and an additional claim made by an Environmental Restoration contractor for settlement costs in the amount of approximately \$2.7 million for the amount resolved through settlement with the state of New Mexico. The likelihood of an unfavorable outcome for EPA in these two matters is reasonably possible, but not probable.

B. Flint, Michigan

The EPA has received claims from over 9,400 individuals under the Federal Tort Claims Act for alleged personal injuries and property damage caused by the EPA's alleged negligence related to the water health crisis in Flint, Michigan. There is currently no estimated loss amount related to the water health crisis; the chance of an unfavorable outcome for EPA is only reasonably possible, not probable.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

C. Superfund

Under CERCLA Section 106(a), the EPA issues administrative orders that require parties to clean up contaminated sites. CERCLA Section 106(b) allows a party that has complied with such an order to petition the EPA for reimbursement of its reasonable costs of responding to the order plus interest. To be eligible for reimbursement, the party must demonstrate either that it was not a liable party under CERCLA Section 107(a) for the response action ordered, or that the Agency's selection of the response action was arbitrary and capricious or otherwise not in accordance with law. As of September 30, 2024, there are two cases related to Superfund; both are considered to have a reasonably possible likelihood of an unfavorable outcome for EPA. The first is **August Mack Environmental, Inc. v. EPA** for \$2.7 million. August Mack Environmental (AME) was a contractor for Vertellus, one of three PRPs (Potentially Responsible Parties) at the Big John Salvage Site in Fairmont, WV. The site was being cleaned up pursuant to a consent decree which named Vertellus the performing defendant; there is a Special Account at the site funded by the PRPs. Vertellus filed for bankruptcy, and AME did not recover in bankruptcy the moneys it claimed it was owed by Vertellus. AME then made a claim against the Superfund and/or the Special Account. EPA Region 3 denied the claim and AME appealed to the Administrative Law Judge (ALJ), who also denied it. AME then filed suit in district court. The court ruled in favor of EPA on a Motion to Dismiss and AME appealed to the 4th Circuit. The 4th Circuit ruled in AME's favor and the case was remanded back to the ALJ.

The second case related to Superfund is **Prudent Technologies, Inc. v. The United States**, a Contracts Dispute Act case on a Superfund contract for remediation of residential yards. There is currently no estimated loss amount related to this case; the chance of an unfavorable outcome for EPA is only reasonably possible, not probable.

D. Environmental Liabilities

As of September 30, 2024, there are no cases pending against the EPA that are reported under Environmental Liabilities for which the likelihood of an unfavorable outcome for EPA has been determined to be either probable or reasonably possible.

E. Other Pending Cases

As of September 30, 2024, several legal claims exist for which the potential loss could not be determined; all have a reasonably possible likelihood of an unfavorable outcome for EPA.

- **United Affiliates Corp., et al. v. United States** – Claim involves an alleged taking of property for which plaintiff is seeking just compensation under the 5th Amendment. It arises from EPA's withdrawal of certification for certain disposal sites of mining waste.
- **Alaska v. United States** - Alaska is seeking damages regarding allegations that EPA's 2023 Final Determination issued under the Clean Water Act Section 404(c) regarding the Pebble Deposit in Alaska constitutes a breach of contract and breach of covenant of good faith.
- **Northern Dynasty Minerals, Ltd., Pebble Limited Partnership, Pebble West Claims Corp., and Pebble East Claims Corp. v. United States** - Plaintiffs (collectively, "PLP") allege that EPA's 2023 Final Determination issued under the Clean Water Act Section 404(c) regarding the Pebble Deposit constitutes a categorical taking, or in the alternative, an ad hoc permanent taking, because it blocks any economically viable use of PLP's mineral rights. The complaint also alleges that the action constitutes a temporary taking even if it were to be withdrawn or vacated. The government plans to file a motion to dismiss.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

F. Judgement Fund

In cases that are paid by the U.S. Treasury Judgment Fund, the EPA must recognize the full cost of a claim regardless of which entity is actually paying the claim. Until these claims are settled or a court judgment is assessed where the Judgment Fund is determined to be the appropriate source for the payment, claims that are probable and estimable must be recognized as an expense and liability of the Agency. For these cases, at the time of settlement or judgment, the liability will be reduced, and an imputed financing source recognized. See Interpretation of Federal Financial Accounting Standards No. 2, Accounting for Treasury Judgment Fund Transactions. EPA has a \$22 million liability to the Treasury Judgment Fund for a payment made by the fund to settle a contract dispute claim.

G. Other Commitments

EPA has a commitment to fund the U.S. Government's payment to the Commission of the North American Agreement on Environmental Cooperation between the Government of Canada, the Government of the United Mexican States, and the Government of the United States of America (commonly referred to as CEC). According to the terms of the agreement, each government pays an equal share to cover the operating costs of the CEC. EPA paid \$3 million in FY 2024, and \$3 million in FY 2023 to the CEC.

EPA has a legal commitment under a noncancelable agreement, subject to the availability of funds, with the United Nations Environmental Program (UNEP). This agreement enables EPA to provide funding to the Multilateral Fund for the Implementation of the Montreal Protocol. EPA made payments totaling \$8 million in FY 2024, and \$8 million in the FY 2023.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

A. Funds from Dedicated Collections

i. Environmental Services Receipt Account:

The Environmental Services Receipt Account, authorized by a 1990 act, “To amend the Clean Air Act (P.L. 101-549),” was established for the deposit of fee receipts associated with environmental programs, including radon measurement proficiency ratings and training, motor vehicle engine certifications, and water pollution permits. Receipts in this special fund can only be appropriated to the S&T and EPM appropriations to meet the expenses of the programs that generate the receipts if authorized by Congress in the Agency's appropriations bill.

ii. Leaking Underground Storage Tank (LUST) Trust Fund:

The LUST Trust Fund was authorized by the SARA as amended by the Omnibus Budget Reconciliation Act of 1990. The LUST appropriation provides funding to prevent and respond to releases from leaking underground petroleum tanks. The Agency oversees cleanup and enforcement programs which are implemented by the states. Funds are allocated to the states through cooperative agreements and prevention grants to inspect and clean up those sites posing the greatest threat to human health and the environment. Funds are used for grants to non-state entities including Indian tribes under Section 8001 of the Resource Conservation and Recovery Act.

iii. Superfund Trust Fund:

In 1980, the Superfund Trust Fund was established by CERCLA to provide resources to respond to and clean up hazardous substance emergencies and abandoned, uncontrolled hazardous waste sites. The Superfund Trust Fund financing is shared by federal and state governments as well as industry. The EPA allocates funds from its appropriation to the Department of Justice to carry out CERCLA. Risks to public health and the environment at uncontrolled hazardous waste sites qualifying for the Agency's National Priorities List (NPL) are reduced and addressed through a process involving site assessment and analysis and the design and implementation of cleanup remedies. NPL cleanups and removals are conducted and financed by the EPA, private parties, or other Federal agencies. The Superfund Trust Fund includes Treasury's collections, special account receipts from settlement agreements, and investment activity.

B. Other Funds from Dedicated Collections

i. Inland Oil Spill Programs Account:

The Inland Oil Spill Programs Account was authorized by the Oil Pollution Act of 1990 (OPA). Monies are appropriated from the Oil Spill Liability Trust Fund to the EPA's Inland Oil Spill Programs Account each year. The Agency is responsible for directing, monitoring and providing technical assistance for major inland oil spill response activities. This involves setting oil prevention and response standards, initiating enforcement actions for compliance with OPA and Spill Prevention Control and Countermeasure requirements, and directing response actions when appropriate. The Agency carries out research to improve response actions to oil spills including research on the use of remediation techniques such as dispersants and bioremediation. Funding for specific oil spill cleanup actions is provided through the U.S. Coast Guard from the Oil Spill Liability Trust Fund through reimbursable Pollution Removal Funding Agreements (PRFAs) and other inter-agency agreements.

ii. Pesticide Registration Fund:

The Pesticide Registration Fund was authorized by a 2004 Act, “Consolidated Appropriations Act (P.L. 108-199),” and reauthorized until September 30, 2027, for the expedited processing of certain registration petitions and the associated establishment of tolerances for pesticides to be used in or on food and animal feed. Fees covering these activities, as authorized under the FIFRA Amendments of 1988, are to be paid by industry and deposited into this fund group.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

iii. Reregistration and Expedited Processing Fund:

The Revolving Fund was authorized by the FIFRA of 1972, as amended by the FIFRA Amendments of 1988 and as amended by the Food Quality Protection Act of 1996. Pesticide maintenance fees are paid by industry to offset the costs of pesticide re-registration and the reassessment of tolerances for pesticides used in or on food and animal feed, as required by law.

iv. Tolerance Revolving Fund:

The Tolerance Revolving Fund was authorized in 1963 for the deposit of tolerance fees. Fees were paid by industry for Federal services to set pesticide chemical residue limits in or on food and animal feed. Fees collected prior to January 2, 1997 were accounted for under this fund. Presently, collection of these fees is prohibited by statute enacted in the Consolidated Appropriations Act, 2004 (P.L. 108-199).

v. Hazardous Waste Electronic Manifest System:

The Hazardous Waste Electronic Manifest System Fund (e-Manifest) was established as a result of the Hazardous Waste Manifest Establishment Act (Public Law 112-195, October 5, 2012). The “e-Manifest Act” authorized the EPA to implement a national electronic manifest system and required that the costs of developing and operating the new e-Manifest system be recovered from user fees charged to those who use hazardous waste manifests to track off-site shipments of their wastes. To that end, the EPA charges and collects fees from facilities for each manifest they submit.

Note 18. Environmental and Disposal Liabilities

Annually, the EPA is required to disclose its audited estimated future costs associated with:

- a) Cleanup of hazardous waste and restoration of the facility when it is closed, and
- b) Costs to remediate known environmental contamination resulting from the Agency’s operations.

The EPA has 27 sites for which it is responsible for cleanup costs incurred under federal, state, and/or local regulations to remove, contain, or dispose of hazardous material found at these facilities.

The EPA is also required to report the estimated costs related to:

- a) Cleanup from federal operations resulting in hazardous waste
- b) Accidental damage to nonfederal property caused by federal operations, and
- c) Other damage to federal property caused by federal operations or natural forces.

The key to distinguishing between future cleanup costs versus an environmental liability is to determine whether the event (accident, damage, etc.) has already occurred and whether we can reasonably estimate the cost to remediate the site.

The EPA has elected to recognize the estimated total cleanup cost as a liability and record changes to the estimate in subsequent years.

As of September 30, 2024, the EPA has no sites that require cleanup stemming from its activities.

The EPA has 27 sites for which it is required to fund the environmental cleanup. As of September 30, 2024, the estimated costs for site cleanup were \$43 million unfunded, and \$292 thousand funded. For September 30, 2023 the estimated cost for site cleanup was \$37 million unfunded, with \$100 thousand funded. Since the cleanup costs associated with permanent closure were not primarily recovered through user fees, the EPA has elected to recognize the estimated total cleanup cost as a liability and record changes to the estimate in subsequent years.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

In FY 2024, the estimate for unfunded cleanup cost increased by \$6 million from the FY 2023 estimate. This is primarily due to increased estimates of future lab cleanup actions.

Note 19. State Credits

Authorizing statutory language for Superfund and related Federal regulations requires states to enter into Superfund State Contracts (SSC) when the EPA assumes the lead for remedial actions in their states. The SSC defines the states' role in the remedial action and obtains the states' assurance that they will share in the cost of the remedial actions. Under Superfund's authorizing statutory language, states will provide the EPA with a 10 percent cost share for remedial action costs incurred at privately owned or operated sites, and at least 50 percent of all response activities (i.e., removal, remedial planning, remedial action, and enforcement) at publicly operated sites. In some cases, states may use EPA-approved credits to reduce all or part of their cost share requirement that would otherwise be borne by the states. The credit is limited to state site-specific expenses the EPA has determined to be reasonable, documented, direct out-of-pocket expenditures with the public funds for remedial action.

Once the EPA has reviewed and approved a state's claim for credit, the state must first apply the credit at the site where it was earned. The state may apply any excess/remaining credit to another site when approved by the EPA. As of September 30, 2024 and 2023, the total remaining state credits have been estimated at \$22 million and \$18 million, respectively.

Note 20. Preauthorized Mixed Funding Agreements

Under Superfund preauthorized mixed funding agreements, PRPs agree to perform response actions at their sites with the understanding that the EPA will reimburse them a certain percentage of their total response action costs. The EPA's authority to enter into mixed funding agreements is provided under CERCLA Section 111(a) (2). Under CERCLA Section 122(b)(1), as amended by SARA, PRPs may assert claims against the Superfund Trust Fund for portions of the costs they incurred while conducting a preauthorized response action agreed to under a mixed funding agreement. As of September 30, 2024, the EPA had three outstanding preauthorized mixed funding agreements with obligations totaling \$12 million. As of September 30, 2023, the EPA had three outstanding preauthorized mixed funding agreements with obligations totaling \$13 million. A liability is not recognized for these amounts until all work has been performed by the PRPs and has been approved by the EPA for payment. Further, the EPA will not disburse any funds under these agreements until the PRPs' application, claim and claims adjustment processes have been reviewed and approved by the EPA.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Note 21. Custodial Revenues and Accounts Receivable

The EPA uses the accrual basis of accounting for the collection of fines, penalties and miscellaneous receipts. Collectability by the EPA of the fines and penalties is based on the respondents' willingness and ability to pay. EPA's mission requires it to collect nonexchange revenue for Cellulose Biofuel Waiver Credits from the public. The custodial collections do not affect EPA's net cost or net position. Instead, the collections are transferred to Treasury where the impact on financial statements is shown.

(Dollars in Thousands)

Note 22. Statement of Budgetary Resources

The purpose of Federal budgetary accounting is to control, monitor, and report on funds made available to Federal agencies by law and help ensure compliance with law.

The following budget terms from OMB Circular A-11, Section 20.3 are commonly used:

- **Appropriation:** A provision of law (not necessarily in an appropriations act) authorizing the expenditure of funds for a given purpose. Usually, but not always, an appropriation provides budget authority.
- **Budgetary resources:** Amounts available to incur obligations in a given year. Budgetary resources consist of new budget authority and unobligated balances of budget authority provided in previous years.
- **Distributed offsetting receipts:** Amounts that an agency collects from the public or from other U.S. Government agencies that are used to offset or reduce an agency's budget outlays. Agency outlays are measured on both a gross and net basis, with net outlays being reduced by offsetting receipts (and other amounts).
- **Offsetting collections:** Payments to the Government that, by law, are credited directly to expenditure accounts and deducted from gross budget authority and outlays of the expenditure account, rather than added to receipts. Usually, offsetting collections are authorized to be spent for the purposes of the account without further action by Congress. They usually result from business-like transactions with the public, including payments from the public in exchange for goods and services, reimbursements for damages, and gifts or donations of money to the Government and from intragovernmental transactions with other Government accounts. The authority to spend offsetting collections is a form of budget authority.
- **Offsetting receipts:** Payments to the Government that are credited to offsetting receipt accounts and deducted from gross budget authority and outlays, rather than added to receipts. Usually, they are deducted at the level of the agency and subfunction, but in some cases they are deducted at the level of the Government as a whole. They are not authorized to be credited to expenditure accounts. The legislation that authorizes the offsetting receipts may earmark them for a specific purpose and either appropriate them for expenditure for that purpose or require them to be appropriated in annual appropriations acts before they can be spent. Like offsetting collections, they usually result from business-like transactions with the public, including payments from the public in exchange for goods and services, reimbursements for damages, and gifts or donations of money to the Government, and from intragovernmental transactions with other Government accounts.
- **Obligation:** A binding agreement that will result in outlays, immediately or in the future. Budgetary resources must be available before obligations can be incurred legally.
- **Outlay:** A payment to liquidate an obligation. Outlays generally are equal to cash disbursements and are the measure of Government spending.

Budgetary resources, obligations incurred and outlays, as presented in the audited FY 2023 Statement of Budgetary Resources, are reconciled to the amounts included in the FY 2023 Budget of the United States Government. Differences between the FY 2023 Statement of Budgetary Resources and the FY 2023 Budget of the United States Government are due to the reporting of expired funds in the Statement of Budgetary Resources. The Budget of the United States Government with actual numbers for FY 2024 has not yet been published. We expect it will be published by early 2025, and it will be available on the Office of Management and Budget website at <https://www.whitehouse.gov/>.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

The actual amounts published for the year ended September 30, 2023 are listed immediately below (dollars in millions):

FY 2023	Budgetary Resources	Obligations	Offsetting Receipts	Net Outlays
Statement of Budgetary Resources	\$ 86,183	\$ 26,911	\$ 1,569	\$ 15,535
Reported in the Budget of the U.S. Government	<u>\$ 86,068</u>	<u>\$ 26,878</u>	<u>\$ 1,569</u>	<u>\$ 15,533</u>

Recoveries of Prior Year Obligations, Temporarily Not Available, and Permanently Not Available on the Statement of Budgetary Resources consist of the following amounts as of September 30, 2024 and 2023:

	2024	2023
Unobligated Balance Brought Forward, Oct 1.	<u>\$ 59,272,345</u>	<u>\$ 56,975,250</u>
Adjustments to Budgetary Resources Made During the Current Year		
Downward Adjustments of Prior Year Undelivered Orders	858,827	331,528
Downward Adjustments of Prior Year Delivered Orders	14,081	13,047
Permanent Reduction Prior Year Balances	(1,500)	(13,300)
Upward Adjustments of Prior Year Delivered Orders	(197,861)	-
Other Adjustments	<u>(20,023)</u>	<u>(24,159)</u>
Total	653,524	307,116
Unobligated Balance from Prior Year Budget Authority, Net (discretionary and mandatory)	<u>\$ 59,925,869</u>	<u>\$ 57,282,366</u>
Temporarily Not Available - Rescinded Authority	<u>\$ (16,382)</u>	<u>\$ (8,942)</u>
Permanently Not Available:		
Rescinded Authority	\$ -	\$ -
Cancelled Authority	<u>(20,369)</u>	<u>(21,196)</u>
Total Permanently Not Available	<u>\$ (20,369)</u>	<u>\$ (21,196)</u>

Unobligated balances are a combination of two lines on the Statement of Budgetary Resources: Apportioned, Unobligated Balances and Unobligated Balances Not Available. Unexpired unobligated balances are available to be apportioned by the OMB for new obligations at the beginning of the following fiscal year. The expired unobligated balances are only available for upward adjustments of existing obligations.

The unobligated balances available consist of the following as of September 30, 2024 and 2023:

	2024	2023
Unexpired Unobligated Balance	\$ 30,229,727	\$ 59,167,562
Expired Unobligated Balance	<u>116,343</u>	<u>104,783</u>
Total	<u>\$ 30,346,070</u>	<u>\$ 59,272,345</u>

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Budgetary resources obligated for undelivered orders as of September 30, 2024 and 2023:

	<u>2024</u>	<u>2023</u>
Intragovernmental:		
Unpaid Undelivered Orders	\$ 2,323,555	\$ 1,982,774
Paid Undelivered Orders	2,133,603	1,643,300
Other Than Intragovernmental:		
Unpaid Undelivered Orders	71,719,199	36,792,410
Paid Undelivered Orders	<u>99,155</u>	<u>8,275</u>
Total	<u>\$ 76,275,512</u>	<u>\$ 40,426,759</u>

Distributed offsetting receipts are amounts that an agency collects from the public or from other Government agencies that are used to offset or reduce an agency's budget outlays. Agency outlays are measured on both a gross and net basis, with net outlays being reduced by offsetting receipts (and other amounts). As of September 30, 2024 and 2023, the following receipts were generated from these activities:

	<u>2024</u>	<u>2023</u>
Trust Fund Recoveries	\$ 266,268	\$ 238,365
Special Fund Services	56,023	55,443
Trust Fund Appropriation	282,699	1,218,809
Miscellaneous Receipt and Clearing Accounts	<u>96,242</u>	<u>56,319</u>
Total	<u>\$ 701,232</u>	<u>\$ 1,568,936</u>

Note 23. Imputed Financing

In accordance with SFFAS No. 5, *Accounting for Liabilities of the Federal Government*, Federal agencies must recognize the portion of employees' pensions and other retirement benefits to be paid by the OPM trust funds. These amounts are recorded as imputed costs and imputed financing for each Agency. Each year the OPM provides Federal agencies with cost factors to calculate these imputed costs and financing that apply to the current year. These cost factors are multiplied by the current year's salaries or number of employees, as applicable, to provide an estimate of the imputed financing that the OPM trust funds will provide for each Agency. In FY 2023, the Agency began recording OPM amounts quarterly; previously it was recorded annually. The estimates for FY 2024 are \$252 million. For FY 2023, the estimates were \$196 million.

SFFAS No. 4, *Managerial Cost Accounting Standards and Concepts* and SFFAS No. 30, *Inter-Entity Cost Implementation*, requires Federal agencies to recognize the costs of goods and services received from other Federal entities that are not fully reimbursed, if material. The EPA estimates imputed costs for inter-entity transactions that are not at full cost and records imputed costs and financing for these unreimbursed costs subject to materiality. The EPA applies its Headquarters General and Administrative indirect cost rate to expenses incurred for inter-entity transactions for which other Federal agencies did not include indirect costs to estimate the amount of unreimbursed (i.e., imputed) costs. For FY 2024 total imputed costs were \$37 million.

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

In addition to the pension and retirement benefits described above, the EPA also records imputed costs and financing for Treasury Judgment Fund payments made on behalf of the Agency. Entries are made in accordance with the Interpretation of Federal Financial Accounting Standards No. 2, *Accounting for Treasury Judgment Fund Transactions*. For FY 2024, entries for Judgment Fund payments totaled \$4 million. For FY 2023, entries for Judgment Fund payments totaled \$9 million.

Note 24. Federal Employee Benefits Payable

Payroll and benefits payable to the EPA employees for the fiscal years ending September 30, 2024 and 2023, consist of the following:

	<u>Covered by Budgetary Resources</u>	<u>Not Covered by Budgetary Resources</u>	<u>Total</u>
FY 2024 Federal Employee Salary, Leave and Benefits Payable			
Employer Contributions Payable - Thrift Savings Plan	\$ 1,373	\$ -	\$ 1,373
Accrued Unfunded Annual Leave	<u>-</u>	<u>185,381</u>	<u>185,381</u>

FY 2023 Pension and Post-Employment Benefits Payable			
Actuarial FECA Liability	<u>-</u>	<u>44,349</u>	<u>44,349</u>
Total Benefits Payable	<u>\$ -</u>	<u>\$ 44,349</u>	<u>\$ 44,349</u>

United States Environmental Protection Agency
Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

FECA (Federal Employees' Compensation Act) provides income and medical cost protection to covered Federal civilian employees injured on the job, employees who have incurred a work-related occupational disease, and beneficiaries of employees whose death is attributable to a job-related injury or occupational disease. Annually, the EPA allocates the portion of the long-term FECA actuarial liability attributable to the entity. The liability is calculated to estimate the expected liability for death, disability, medical and miscellaneous costs for approved compensation cases. The liability amounts and the calculation methodologies are provided by the Department of Labor. The FY 2024 present value of these estimated outflows is calculated using a discount rate of 2.648 percent in the first year for wage benefits and 2.399 percent in the first year for medical benefits, and 2.648 percent in the years thereafter for wage benefits and 2.399 percent in the years thereafter for medical benefits. The estimated future costs are recorded as an unfunded liability.

See Note 1 paragraph P for additional information.

Note 25. Non-Exchange Revenue, Statement of Changes in Net Position

Non-Exchange Revenue on the Statement of Changes in Net Position for the fiscal years ended September 30, 2024 and 2023:

	2024		2023

Notes to the Financial Statements
For the Fiscal Years Ending September 30, 2024 and 2023
(Dollars in Thousands)

Budgetary and financial accounting information differ. Budgetary accounting is used for planning and control purposes and relates to both the receipt and use of cash, as well as reporting the federal deficit. Financial accounting is intended to provide a picture of the government's financial operations and financial position, so it presents information on an accrual basis. The accrual basis includes information about costs arising from the consumption of assets and the incurrence of liabilities. The reconciliation of net outlays, presented on a budgetary basis, and the net cost, presented on an accrual basis, provides an explanation of the relationship between budgetary and financial accounting information.

The reconciliation serves not only to identify costs paid for in the past and those that will be paid in the future, but also to assure integrity between budgetary and financial accounting. The reconciliation explains the relationship between the net cost of operations and net outlays by presenting components of net cost that are not part of net outlays (e.g., depreciation and amortization expenses of assets previously capitalized, change in asset/liabilities), components of net outlays that are not part of net cost (e.g., acquisition of capital assets), other temporary timing difference (e.g., prior period adjustments due to correction of errors). The analysis above illustrates this reconciliation by listing the key differences between net cost and net outlays.

Note 27. Amounts Held by Treasury

Amounts held by Treasury for future appropriations consist of amounts held in trusteeship by Treasury in the Superfund and LUST Trust Funds.

A. Superfund

Superfund is supported by general revenues, cost recoveries of funds spent to clean up hazardous waste sites, interest income, and fines and penalties.

The following reflects the Superfund Trust Fund maintained by Treasury as of September 30, 2024 and 2023. The amounts contained in these notes have been provided by Treasury. As indicated, a portion of the outlays represent amounts received by the EPA's Superfund Trust Fund; such funds are eliminated on consolidation with the Superfund Trust Fund maintained by Treasury.

In FY 2024, the EPA received an appropriation of \$283 million for Superfund. Treasury's Bureau of the Fiscal Service (BFS), the manager of the Superfund Trust Fund assets, records a liability to the EPA for the amount of the appropriation. BFS does this to indicate those trust fund assets that have been assigned for use and therefore are not available for appropriation. As of September 30, 2024 and 2023, the Treasury Trust Fund has a liability to the EPA for previously appropriated funds and special accounts of \$9 billion and \$9 billion, respectively.

B. LUST

LUST is supported primarily by a sales tax on motor fuels to clean up LUST waste sites. In FY 2024 and 2023, there were no fund receipts from cost recoveries. The amounts contained in these notes are provided by Treasury. Outlays represent appropriations received by the EPA's LUST Trust Fund; such funds are eliminated on consolidation with the LUST Trust Fund maintained by Treasury.

Note 28. Reclassified Financial Statement for Government-wide Reporting

To prepare the *Financial Report of the U.S. Government (Financial Report)*, the Department of the Treasury requires agencies to submit an adjusted trial balance, which is a listing of amounts by U.S. Standard General Ledger account that appear in the financial statements. Treasury uses the trial balance information reported in the Government-wide Treasury Account Symbol Adjusted Trial Balance System (GTAS) to develop a Reclassified Statement of Net Cost. Treasury eliminates intragovernmental balances from the reclassified statements and aggregates lines with the same title to develop the *Financial Report* statements. This note shows the agency's financial statements and reclassified statements prior to elimination of intragovernmental balances and prior to aggregation of repeated Financial Report line items. A copy of the 2023 *Financial Report* can be found here: [Bureau of the Fiscal Service - Reports, Statements & Publications \(treasury.gov\)](#) and a copy of the 2024 *Financial Report* will be posted to this site as soon as it is released.

The term "intragovernmental" is used in this note to refer to amounts that result from other components of the Federal Government.

The term "other than intragovernmental" is used in this note to refer to Federal Government amounts that result from transactions with non-Federal entities. These include transactions with individuals, businesses, non-profit entities, and State, local, and foreign governments.

Note 29. Restatements

During an internal review, EPA identified \$370 million in expenses that should have been reported on its financial statements as advances. EPA is restating its FY 2023 consolidated financial statements to reclassify these prior year prepaid assets. This change impacted the FY 2023 Balance Sheet, Statement of Net Cost, Statement of Net Cost by Major Program, and Statement of Changes in Net Position.

For the Year Ended September 30, 2023	Previously Reported	Restatement	Restated Amount
Balance Sheet:			
Other than Intragovernmental Assets: Advances and Prepayments	\$ 11,602	\$ 369,722	\$ 381,324
Total Other than Intragovernmental Assets	\$ 3,678,059	\$ 369,722	\$ 4,047,781

Required Supplementary Information (Unaudited)

United States Environmental Protection Agency For the Fiscal Years Ending September 30, 2024 and 2023 (Dollars in Thousands)

Deferred Maintenance

Deferred maintenance is maintenance that was not performed when it should have been, that was scheduled and not performed, or that was delayed for a future period. Maintenance is the act of keeping property, plant, and equipment (PP&E) in acceptable operating condition and includes preventive maintenance, normal repairs, replacement of parts and structural components, and other activities needed to preserve the asset so that it can deliver acceptable performance and achieve its expected life. Maintenance excludes activities aimed at expanding the capacity of an asset or otherwise upgrading it to serve needs different from or significantly greater than those originally intended.

Deferred Maintenance is described as the act of keeping fixed assets in acceptable condition.

Such activities include preventive maintenance, replacement of parts, systems, or components, and other activities needed to preserve or maintain the asset.

The deferred maintenance as of September 30, 2024 and 2023:

	<u>2024</u>	<u>2023</u>
Asset Category		
Buildings	\$ 228,486	\$ 128,180
EPA Held Equipment	<u>2,556</u>	<u>1,700</u>
Total Deferred Maintenance	<u>\$ 231,042</u>	<u>\$ 129,880</u>

Required Supplementary Information (Unaudited) Cont.

In Fiscal Year 2024, in accordance with SFFAS No. 42, *Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards* 6, 14, 29 and 32, the EPA presents Deferred Maintenance and Repairs (DM&R) information by asset category as follows:

Buildings:

Policy	Explanation
Maintenance and repairs policies and how they are applied.	The maintenance and repair policies are to maintain facilities and real property installed equipment to fully meet mission needs at each site. Systems are maintained to function efficiently at full capacity and to meet or exceed life expectancy of buildings and building systems.
How we rank and prioritize maintenance and repair activities among other activities.	Building and facility program projects are scored and ranked individually based on seven weighted factors to determine priority needs. High scoring projects are prioritized above lower scoring projects. The seven factors considered are: health and safety, energy conservation, environmental compliance, program requirements, repair and upkeep, space alteration, and operational urgency. Repair and Improvement (R&I) projects are identified and prioritized on a local basis.
Factors considered in determining acceptable condition standards.	The nine building systems must function at a level that fully meet mission needs. The nine building systems are: structure, roof, exterior components and finish, interior finish, HVAC, electrical, plumbing, conveyance, and specialized program support equipment. Each system is rated from 0 to 5 during facility assessments. Ratings are used to determine facility condition index and estimated deferred maintenance.
State whether DM&R relate solely to capitalized general PP&E and stewardship PP&E or also to non-capitalized or fully depreciated general PP&E.	Facilities assessments and the resulting DM&R estimates are applied to capitalize PP&E only. Full facility assessments using the NASA parametric model are used to determine facilities and systems indices and deferred maintenance estimates.
PP&E for which management does not measure and/or report DM&R and the rationale for the exclusion of other than non-capitalized or fully depreciated general PP&E.	Buildings are not excluded from DM&R estimates.
Explain significant changes from the prior year.	No significant changes.

Required Supplementary Information (Unaudited) Cont.

EPA Held Equipment:

Policy	Explanation
Maintenance and repairs policies and how they are applied.	Managers of the equipment consider manufacturers recommendations in determining maintenance requirements.
How we rank and prioritize maintenance and repair activities among other activities.	Equipment is maintained based on manufacture's recommendations.
Factors considered in determining acceptable condition standards.	Manufacturer recommendations.
State whether DM&R relate solely to capitalized general PP&E and stewardship PP&E or also to non-capitalized or fully depreciated general PP&E.	DM&R relates to all EPA Held Equipment as determined by individual site managers.
PP&E for which management does not measure and/or report DM&R and the rationale for the exclusion of other than non-capitalized or fully depreciated general PP&E.	Individual site managers determine the need to measure and/or report DM&R based on mission needs.
Explain significant changes from the prior year.	Individual site equipment managers decide on a case-by-case basis the need to maintain equipment.

Vehicles:

Policy	Explanation
Maintenance and repairs policies and how they are applied.	Vehicle managers maintain vehicles owned by the EPA in accordance with the recommendations of the manufacturer.
How we rank and prioritize maintenance and repair activities among other activities.	The goal is to maintain the vehicle as built and as recommended by the manufacturer. Repairs and maintenance are also described as <i>system critical</i> or <i>minor</i> . System critical repairs and maintenance are high priority and are immediately taken care of. Minor repairs are lower priority and may be taken care of at a later date (time/scheduling permitting). These are not critical to in-field functionality, but the repairs are needed to maintain the vehicle as built.
Factors considered in determining acceptable condition standards.	The vehicle is inspected to ensure that it (the vehicle) and related specialized equipment are in good working order. The criteria being that the vehicle is being maintained as built and as recommended by the manufacturer.
State whether DM&R relate solely to capitalized general PP&E and stewardship PP&E or also to non-capitalized or fully depreciated general PP&E.	All vehicles are capitalized.
PP&E for which management does not measure and/or report DM&R and the rationale for the exclusion of other than non-capitalized or fully depreciated general PP&E.	None.
Explain significant changes from the prior year.	No significant changes.

Beginning in FY 2015, requirements for recognizing and reporting significant and expected-to-be-permanent impairment of general PP&E (except Internal Use Software) remaining in use are in SFFAS No. 44, *Accounting for Impairment of General Property, Plant, and Equipment (G-PP&E) Remaining in Use*.

This statement establishes accounting and financial reporting standards for impairment of general property, plant, and equipment remaining in use, except for internal use software. G-PP&E is considered impaired when there is a significant and permanent decline in the service utility of G-PP&E or expected service utility for construction work in progress. A decline is permanent when management has no reasonable expectation that the lost service utility will be replaced or restored.

Required Supplementary Information (Unaudited) Cont.

This statement does not anticipate that entities will have to establish additional or separate procedures beyond those that may already exist, such as those related to deferred maintenance and repairs, to search for impairments. Impairments can be identified and brought to management's attention in a variety of ways. Although a presumption exists that there are existing processes and internal controls in place to reasonably assure identification and communication of potential material impairments, this statement does not require entities to conduct an annual or other periodic survey solely for the purpose of applying these standards.

Management may determine that existing processes and internal controls are not sufficient to reasonably assure identification of potential material impairments and impairments and implement appropriate additional processes and internal controls.

Land:

Estimated Acreage by Predominant Use

Below details the predominant use of Land in Property, Plant and Equipment on the balance sheet by acreage.

	<u>Commercial</u>	<u>Conservation and Preservation</u>	<u>Operational</u>	<u>Total Estimated Acreage</u>
PP&E Land				
End of FY 2023/Start of FY 2024	-	-	576	576
End of FY 2024	-	-	601	601
Held for Disposal or Exchange (also included in the balances above)				
End of FY 2024	-	-	10	10

All of EPA's land is for the Agency's operational facilities. The rights to this land are permanent and fully devoted to support the operational facilities contained therein.

Independent Audit of the EPA's Fiscal Years 2024 and 2023 (Restated) Consolidated Financial Statements

Why We Did This Audit

To accomplish this objective:

We performed this audit in accordance with the Chief Financial Officers Act of 1990, as codified at 31 U.S.C. § 3521(e), which requires the U.S. Environmental Protection Agency Office of Inspector General to audit the financial statements prepared by the Agency each year. Our primary objectives were to determine whether the EPA's:

- Financial statements were fairly stated in all material respects in accordance with generally accepted accounting principles.
- Internal control over financial reporting was in place.
- Management complied with applicable laws, regulations, contracts, and grant agreements.

This requirement for audited financial statements was enacted to help improve agencies' financial management practices, systems, and control so that timely, reliable information is available for managing federal programs.

To support this EPA mission-related effort:

- *Operating efficiently and effectively.*

Address inquiries to our public

OIG.PublicAffairs@epa.gov.

The EPA Receives an Unmodified Opinion for Fiscal Years 2024 and 2023 (Restated)

We rendered an unmodified opinion on the EPA's consolidated financial statements for fiscal years 2024 and 2023 (restated), meaning that they were fairly presented and free of material misstatement.

Material Weaknesses and Significant Deficiency Noted

We noted the following material weaknesses:

- The EPA did not have adequate internal controls in place to record the 2022 Clean School Bus Rebates Program funds for fiscal years 2024 and 2023.
- The EPA did not develop an adequate process for the Clean School Bus Rebates Program accrual calculation.
- The EPA significantly understated Superfund State Contract accrual revenue.

We noted the following significant deficiency: EPA property balances are not reliable.

The EPA used an existing rebate transaction type that was established to record the Clean School Bus rebate payments. This resulted in \$828 million of rebate payments being recorded as expenses instead of advances. The EPA will be developing guidance for new programs on financial management considerations that need to be implemented.

Noncompliance with Applicable Laws, Regulations, Contracts, and Grant Agreements Noted

We noted the following instances of noncompliance with laws and regulations:

- The EPA failed to comply with and implement provisions of Office of Management and Budget Circular No. A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*.
- The EPA improperly recorded advances as expenses for the Clean School Bus Rebates Program.

Recommendations and Planned Agency Corrective Actions

The EPA agreed with all 13 recommendations and have either completed corrective actions or provided an estimated time frame for completion.

OFFICE OF INSPECTOR GENERAL
U.S. ENVIRONMENTAL PROTECTION AGENCY

November 15, 2024

MEMORANDUM

SUBJECT: Independent Audit of the EPA's Fiscal Years 2024 and 2023 (Restated) Consolidated Financial Statements
Report No. 25-F-0010

FROM: Damon Jackson, Director
Financial Directorate
Office of Audit

Damon Jackson

TO: Faisal Amin, Chief Financial Officer

This is our report on the subject audit conducted by the U.S. Environmental Protection Agency Office of Inspector General. The project number for this audit was [OA-FY24-0086](#). This report contains findings that describe the problems the OIG has identified and corrective actions the OIG recommends. Final determinations on matters in this report will be made by EPA managers in accordance with established audit resolution procedures.

The Office of the Chief Financial Officer is responsible for the issues discussed in the report.

In accordance with EPA Manual 2750, your office completed corrective actions for Recommendations 3, 7, and 11. Your office also provided acceptable planned corrective actions and estimated milestone dates in response to Recommendations 1, 2, 4, 5, 6, 8, 9, 10, 12, and 13. These recommendations are resolved, and no final response to this final is required. If you submit a response, however, it will be posted on the OIG's website, along with our memorandum commenting on your response. Your response should be provided as an Adobe PDF file that complies with accessibility requirements of section 508 of the Rehabilitation Act of 1973, as amended. The final response should not contain data that you do not want to be released to the public; if your response contains such data, you should identify the data for redaction or removal along with corresponding justification.

We will post this report to our website at www.epaoig.gov.

Independent Auditor's Report on the EPA's Fiscal Years 2024 and 2023 (Restated) Consolidated Financial Statements

The Administrator

U.S Environmental Protection Agency

Report on the Audit of the Financial Statements

Opinion

We have audited the consolidated financial statements of the U.S. Environmental Protection Agency, which comprise the consolidated balance sheets as of September 30, 2024 and 2023 (restated); the related consolidated statement of net cost, net cost by major program, changes in net position, and custodial activity; the combined statement of budgetary resources for the years then ended; and the related notes to the financial statements.

In our opinion, the consolidated financial statements, including the accompanying notes, present fairly, in all material respects, the consolidated assets, liabilities, net position, net cost, net cost by major program, changes in net position, custodial activity, and combined budgetary resources of the EPA as of and for the years ended September 30, 2024 and 2023 (restated), in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with U.S. generally accepted auditing standards; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the comptroller general of the United States, commonly referred to as generally accepted government auditing standards; and Office of Management and Budget, or OMB, Bulletin No. 24-02, *Audit Requirements for Federal Financial Statements*. Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are required to be independent of the EPA and to meet our ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As described in note 29 to the financial statements, “Restatements,” the EPA identified \$370 million in expenses that should have been reported on its financial statements as advances in FY 2023. The EPA restated its fiscal year 2023 consolidated financial statements to reclassify these prior year prepaid assets. The change impacted the FY 2023 balance sheet, statement of net cost, statement of net cost by major program, and statement of changes in net position. However, we found that the EPA used insufficient documentation to develop its process to calculate the Clean School Bus rebate accrual for FYs 2024 and 2023.

The EPA used an existing rebate transaction type that was established in its financial system known as Compass to record the Clean School Bus rebate payments. This resulted in a total of \$828 million of the Clean School Bus rebate payments as being recorded as expenses instead of advances in FYs 2023 and 2024. The EPA will be developing guidance for new programs on financial management considerations that need to be implemented and discussed. This guidance should also be used during the design phase of the program development.

The Infrastructure Investment and Jobs Act invested \$3.5 billion in environmental remediation at Superfund sites and reinstated the Superfund chemical taxes, making it one of the largest investments in American history to address legacy pollution that harms public health in communities and neighborhoods. This funding will allow the EPA to initiate work on all backlogged remedial construction projects and accelerate cleanups at National Priority List sites across the country. The EPA estimated the FY 2024 tax collections to be about \$1.6 billion. In FY 2024, the EPA received an annual Superfund appropriation of \$538 million.

Our opinion is not modified with respect to these corrections.

Responsibilities of Management for the Financial Statements

The EPA’s management is responsible for the preparation (1) the preparation and fair presentation of the consolidated financial statements in accordance with U.S. generally accepted accounting principles; (2) preparing measuring and presenting the Required Supplementary Information in accordance with U.S. generally accepted accounting principles; (3) preparing and presenting other information included in the Agency’s Financial Report, and ensuring the consistency of that information with the audited financial statements and the Required Supplemental Information; and (4) designing, implementing, and maintaining effective internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements, as a whole, are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. **Reasonable assurance** is a high level of assurance but is not absolute assurance; therefore, it is not a guarantee that an audit conducted in accordance with generally

accepted auditing standards, generally accepted government auditing standards, and OMB Bulletin No. 24-02 will always detect a material misstatement or material matters when it exists.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered **material** if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, generally accepted government auditing standards, and OMB Bulletin No. 24-02, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the EPA's internal control. Accordingly, we express no such opinion.
- Evaluate the appropriateness of accounting policies used, the reasonableness of significant accounting estimates made by management, and the overall presentation of the financial statements.
- Perform other procedures we consider necessary in the circumstances.

We are also required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identify during the audit.

The financial statements include expenses of grantees, contractors, and other federal agencies. Our audit work pertaining to these expenses included testing only within the EPA. The U.S. Department of the Treasury collects and accounts for excise taxes that are deposited into the Leaking Underground Storage Tank Trust Fund. Treasury is also responsible for investing amounts not needed for current disbursements and transferring funds to the EPA as authorized in legislation. Since Treasury, and not the EPA, is responsible for these activities, our audit work did not cover these activities.

The Office of Inspector General is not independent with respect to amounts pertaining to OIG operations that are presented in the financial statements. The amounts included for the OIG are not material to the EPA's financial statements. The OIG is organizationally independent with respect to all other aspects of the Agency's activities.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the information in the Required Supplementary Information, Supplemental Information, and Management's Discussion and Analysis sections be presented to supplement the EPA's financial statements. Such information is the responsibility of management and, although not a part of the basic consolidated financial statements, is required by the OMB and the Federal Accounting Standards Advisory Board, which consider it to be an essential part of the financial reporting that places the basic consolidated financial statements in an appropriate operational, economic, or historical context.

We have applied certain limited procedures to the Required Supplementary Information, Supplemental Information, and Management's Discussion and Analysis, in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiring management about the methods of preparing and comparing the information for consistency with management's responses to our inquiries, the basic consolidated financial statements, and other knowledge we obtained during the audit of the basic consolidated financial statements, in order to report omissions or material departures from Federal Accounting Standards Advisory Board guidelines, if any, identified by these limited procedures. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

EPA's Other Information contains a wide range of information, some of which is not directly related to the financial statements. This information is presented for purposes of additional analysis and is not a required part of the financial statements or the Required Supplementary Information. Management is responsible for the Other Information included in EPA's Agency Financial Report. The Other Information comprises the following sections: *Message from the Chairperson*, *Message from the Chief Financial Officer*, *Management Discussion and Analysis and Performance*. Other Information does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the Other Information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the Other Information and consider whether a material inconsistency exist between the Other Information and the financial statements, or Other Information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the Other Information exists, we are required to describe it in our report.

Report on Internal Control over Financial Reporting

Results of Our Consideration of Internal Control over Financial Reporting

In connection with our audits of EPA's financial statements, we considered EPA's internal control over financial reporting, consistent with the auditor's responsibilities discussed below.

Our consideration of the internal control over financial reporting was for the limited purpose of expressing an opinion on the EPA's financial statements and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies or to express an opinion on the effectiveness of EPA's internal control over financial reporting; therefore, such deficiencies in internal control may exist that we did not identify during our audit. A **deficiency** in internal control over financial reporting exists when the design or operation of control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect and correct misstatements on a timely basis. A **material weakness** is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A **significant deficiency** is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness yet important enough to merit attention by those charged with governance.

We noted certain matters, which we discuss below, involving internal control and its operation that we consider to be material weaknesses and significant deficiencies. These issues are summarized below and detailed in Attachments A and B.

Material Weaknesses

The EPA Did Not Have Adequate Internal Controls in Place to Record the 2022 Clean School Bus Rebates Program Funds for FYs 2024 and 2023

We found that the EPA failed to implement internal controls to make sure funding was properly allocated for the 2022 Clean School Bus Rebates Program. The Agency recorded the full amount paid to the Clean School Bus rebate recipients as an expense, instead of an advance, prior to the recipient expending the funds. The EPA informed us that it paid \$567.6 million in FY 2023 and \$260.4 million in FY 2024 to the Clean School Bus Rebates Program recipients, totaling \$828 million.

The EPA Did Not Develop an Adequate Process for the Clean School Bus Rebates Accrual Calculation

We found that the EPA used insufficient documentation to develop its process to calculate the Clean School Bus Rebates Program accrual for FYs 2024 and 2023. In order to support its determination on the calculation of rebate accruals, the EPA sent the Clean School Bus rebate recipients survey questions relating to the recipients' funding. Since the information the recipients provided to the EPA lacked sufficient supporting documentation, the EPA's FYs 2024 and 2023 Clean School Bus Rebates Program accrual could be misstated.

The EPA Significantly Understated Superfund State Contract Accrual Revenue

We found that the EPA's updated Superfund State Contract, or SSC, accrual methodology did not recognize SSC state cost share revenue totaling \$115,272,077.64 for the third quarter of FY 2024, or April, May, and June 2024. Federal financial accounting standards require revenue to be recognized in

proportion to the estimated total cost when goods and services are acquired to fulfill a contract. The error occurred when the Agency did not consider accounting principles and standards when updating its SSC accrual methodology. Significant errors misstate the financial statements and reduce reliance on them as a fair representation of the Agency's financial condition and activities.

Significant Deficiency

EPA Property Balances Are Not Reliable

We found that the EPA's inventory management process did not adhere to procedures specified in EPA Manual 4832, *Personal Property Manual*, dated June 2017. Based on the information that was provided to us from the Agency, we identified the following: property was not received at a designated centralized receiving point and property decals were not affixed to EPA property; property held by contractors was not reconciled with EPA records; and \$5,454,962.57 worth of personal property was held as rejected in the EPA's accounting system. Due to a lag in invoicing, a discrepancy of \$40,610,646.43 was recorded in the construction in-progress general ledger account instead of property recorded in the building account.

Attachment D contains the status of issues reported in prior years' reports on the EPA's consolidated financial statements. The issues included in Attachment D should be considered among the EPA's significant deficiencies for FY 2024. We reported more significant internal control matters to the Agency during the course of the audit. We will not issue a separate management letter.

Basis for Results of Our Consideration of Internal Control Over Financial Reporting

We performed our procedures related to the EPA's internal control over financial reporting in accordance with generally accepted government auditing standards and OMB audit guidance.

Responsibilities of Management for Internal Control over Financial Reporting

The EPA's management is responsible for (1) designing, implementing, and maintaining effective internal control over financial reporting relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; (2) evaluating the effectiveness of internal control over financial reporting based on the criteria established under the Federal Managers' Financial Integrity Act; and (3) providing an assurance statement on the overall effectiveness of internal control over financial reporting included in management's discussion and analysis.

Auditor's Responsibilities for Internal Control over Financial Reporting

In planning and performing our audit of the consolidated financial statements as of and for the year ended September 30, 2024, in accordance with generally accepted government auditing standards, we considered the EPA's internal control over financial reporting as a basis for designing audit procedures

that are appropriate in the circumstances for the purpose of expressing an opinion on the financial statements and to comply with the OMB's audit guidance, but not to express an opinion on the effectiveness of the EPA's internal control. Accordingly, we do not express an opinion on the effectiveness of the EPA's internal control over financial reporting. We are required to report all deficiencies that are considered to be significant deficiencies or material weaknesses. We did not consider all internal controls relevant to operating objectives, such as those controls relevant to preparing performance information and ensuring efficient operations.

Definition and Inherent Limitations of Internal Control over Financial Reporting

An entity's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel. The objectives of internal control over financial reporting are to provide reasonable assurance that (1) transactions are properly recorded, processed, and summarized to permit the preparation of financial statements in accordance with U.S. generally accepted accounting principles, and assets are safeguarded against loss from unauthorized acquisition, use, or disposition, and (2) transactions are executed in accordance with provisions of applicable laws, including those governing the use of budget authority, regulations, contracts, and grant agreements, noncompliance with which could have a material effect on the financial statements.

Intended Purpose of Report on Internal Control over Financial Reporting

Because of inherent limitations, internal controls over financial reporting may not prevent or detect and correct misstatements and projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or the degree of compliance with the policies or procedures may deteriorate.

Comparison of the EPA's Federal Managers' Financial Integrity Act Report with Our Evaluation of Internal Control

OMB Bulletin No. 24-02 requires us to compare material weaknesses disclosed during the audit with those material weaknesses identified in the Agency's Federal Managers' Financial Integrity Act report that relate to the financial statements. We are also required to identify material weaknesses disclosed by the audit that were not communicated in the Agency's report.

For financial statement audit and financial reporting purposes, OMB Bulletin No. 24-02 defines material weaknesses in internal control as a deficiency or combination of deficiencies in internal control over

financial reporting, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected in a timely basis.

Report on Compliance with Laws, Regulations, Contracts, and Grant Agreements

Results of Our Tests for Compliance with Laws, Regulations, Contracts, and Grant Agreements

Our tests for compliance with selected provisions of applicable laws, regulations, contracts, and grant agreements disclosed two instances of noncompliance for FY 2024 that would be reportable under U.S. generally accepted government auditing standards. Providing an opinion on compliance with provisions of laws, regulations, contracts, and grant agreements was not an objective of our audit, and accordingly, we do not express such an opinion. We identified instances of noncompliance that could result in a material misstatement to the audited financial statements.

We identified two significant matters involving compliance with laws and regulations that came to our attention during the course of the audit. We found that the EPA failed to comply with and implement provisions of OMB Circular No. A-123, *Management's Responsibility for Enterprise Risk Management and Internal Control*, and that the EPA improperly recorded advances as expenses for the Clean School Bus Rebates Program. Attachment C provides additional details, as well as our recommendations on actions that should be taken on this matter. We will not issue a separate management letter.

The EPA Failed to Comply with and Implement OMB Circular No. A-123 Provisions

Based on the information the Agency provided to us, we found the EPA failed to implement and integrate key elements of OMB Circular No. A-123 such as:

- Assessment process for internal controls.
- Governance structure for risk management and defining risk appetite.
- Completion of annual risk profiles.

These key inputs determine the level and effectiveness of internal controls testing and evaluation. Internal controls are tools to help an agency and financial managers achieve results and protect the integrity of its operations.

The EPA Improperly Recorded Advances as Expenses for the Clean School Bus Rebates Program

During FYs 2024 and 2023, the EPA did not comply with federal financial accounting standards and financial requirements by improperly recording advances as expenses for the Clean School Bus Rebates Program disbursements. The federal financial accounting standards and financial reporting requirements recognize that advances are cash outlays made by a federal entity to others to cover a

part or all of the recipients' anticipated expenses or as advance payments for the cost of goods and services acquired. As a result, the EPA did not comply with federal financial reporting requirements.

Basis of Results of Our Tests for Compliance with Laws, Regulations, Contracts, and Grant Agreements

We performed our tests of compliance in accordance with U.S. generally accepted government auditing standards.

Responsibilities of Management for Compliance with Laws, Regulations, Contracts, and Grant Agreements

The EPA's management is responsible for complying with laws, regulations, contracts, and grant agreements applicable to the Agency.

Auditor's Responsibilities for Tests of Compliance with Laws, Regulations, Contracts, and Grant Agreements

Our responsibility is to test compliance with selected provisions of laws, regulations, contracts, and grant agreements applicable to the EPA that have a direct effect on the determination of material amounts and disclosures in EPA's financial statements, including whether EPA's financial management system comply substantially with the Federal Financial Management Improvement Act of 1996, or FFMIA, Section 803(a), requirements, and to perform certain limited procedures. Accordingly, we did not test compliance with all provisions of laws and regulations, contracts, and grant agreements applicable to the EPA. We caution that noncompliance may occur and not be detected by these tests.

Intended Purpose of Report on Compliance with Laws, Regulations, Contracts, and Grant Agreements

The purpose of this report is solely to describe the scope and results of our testing of compliance with selected provisions of applicable laws, regulations, contracts, and grant agreements, and not to provide an opinion on compliance. This report is an integral part of an audit performed in accordance with government auditing standards generally accepted in the United States of America. Accordingly, this report on compliance with laws, regulations, contracts, and grant agreements is not suitable for any other purpose.

FFMIA Compliance

Under FFMIA, we are required to report whether the Agency's financial management systems substantially comply with the federal financial management systems requirements, applicable federal accounting standards, and the U.S. Government Standard General Ledger at the transaction level. To meet the FFMIA requirement, we performed tests of compliance with FFMIA section 803(a) requirements and used OMB Memorandum M-09-06, *Implementation Guidance for the Federal*

Financial Management Improvement Act, dated January 9, 2009, to determine whether there was any substantial noncompliance with FFMIA.

The results of our tests did not disclose any instances of noncompliance with FFMIA requirements, including where the Agency's financial management systems did not substantially comply with the applicable federal accounting standard.

Other Governmental Reporting Requirements

Audit Work Required Under the Hazardous Substance Superfund Trust Fund

We also performed audit work to comply with 42 U.S.C. § 9611(k), including the requirement to conduct an annual audit of payments, obligations, reimbursements, or other uses of the Hazardous Substance Superfund Trust Fund. The material weakness reported above also relates to Superfund.

Prior Audit Coverage

During previous financial statement audits, we reported significant deficiencies, as detailed in Attachment D. These deficiencies include that:

- Originating offices did not forward accounts receivable source documents to the finance division in a timely manner.
- The EPA did not provide accurate information for its revenue accrual.

This report is intended solely for the information and use of the management of the EPA, the OMB, and Congress, and it is not intended to be and should not be used by anyone other than these specified parties.

Material Weaknesses

Table of Contents

1 The EPA Did Not Have Adequate Internal Controls in Place to Record the 2022 Clean School Bus Rebates Program Funds for FYs 2024 and 2023 12

2 The EPA Did Not Develop an Adequate Process for the Clean School Bus Rebates Program Accrual Calculation..... 14

3 The EPA Significantly Understated SSC Accrual Revenue 16

1 – The EPA Did Not Have Adequate Internal Controls in Place to Record the 2022 Clean School Bus Rebates Program Funds for FYs 2024 and 2023

We found that the EPA failed to implement internal controls to make sure funding was properly allocated in the 2022 Clean School Bus Rebates Program. The Agency recorded the full amount paid to the rebate recipients as an expense, instead of an advance, prior to the recipient expending the funds. The EPA informed us that it paid \$567.6 million in FY 2023 and \$260.4 million in FY 2024 to the Clean School Bus Rebates Program recipients for a total of \$828 million.

According to the monitoring component of the U.S. Government Accountability Office's *Standards for Internal Control in the Federal Government*, management should establish and operate monitoring activities to monitor the internal control system and evaluate the results.

According to OMB Circular No. A-123, federal leaders and managers are responsible for establishing and achieving goals and objectives, seizing opportunities to improve effectiveness and efficiency of operations, providing reliable reporting, and maintaining compliance with relevant laws and regulations. They are also responsible for implementing management practices that effectively identify; assess; respond; and report on risks, which can arise from a variety of external and internal environments.

Agency managers must continuously monitor, assess, and improve the effectiveness of internal control associated with those internal control objectives identified as part of their risk profile. This continuous monitoring and other periodic evaluations provide the basis for the Agency's annual assessment and reports.

The Agency assumed that the 2022 Clean School Bus Rebates Program would function similarly as its previous rebate programs and recorded the full amount paid to the recipients as an expense instead of an advance. The Agency failed to have multiple controls in place, such as a program checklist and updated guidance on how new programs will be handled once funds are ready to be disbursed.

We acknowledge that the chief financial officer informed us of the incorrect way that OCFO allocated funding for the Clean School Bus Rebates Program, which allowed us to identify the lack of controls for new programs. However, failure to properly exercise due diligence in the preparation of the Agency's financial statements compromises the accuracy of the financial statements and the reliance on them to be free of material misstatement.

Recommendation

We recommend that the chief financial officer:

1. Develop guidance, including an Office of the Chief Financial Officer checklist, to review, evaluate, and determine the accounting treatment and financial management considerations for new and modified programs.

Agency Response and OIG Assessment

The EPA agreed with our recommendation. The Agency provided an estimated milestone date of April 1, 2025. We consider this recommendation resolved with corrective action pending.

2 – The EPA Did Not Develop an Adequate Process for the Clean School Bus Rebates Program Accrual Calculation

We found that the EPA used insufficient documentation to develop its process to calculate the Clean School Bus Rebates Program accrual for FYs 2024 and 2023. In order to support its determination on the calculation of rebate accruals, the EPA sent the Clean School Bus rebate recipients survey questions relating to their funding. Since the information the recipients provided to the EPA lacked sufficient supporting documentation, the EPA's FYs 2024 and 2023 Clean School Bus Rebates Program accrual could be misstated.

During our review, we found that the EPA did not have sufficient documents or close-out forms to calculate the rebate accrual accurately. According to the EPA's *2022 Clean School Bus (CSB) Rebates Program Guide*, close-out packages for the 2022 Clean School Bus Rebates Program were not due to the Office of Air and Radiation for review and validation until October 31, 2024. A close-out package from the recipient is required per the program's terms. According to the *Program Guide*, the package must include the following:

- For existing buses being scrapped, scrappage photos and letter for buses being replaced.
- For existing buses eligible to be sold or donated, documentation of the vehicle sale or donation.
- A scan of the invoices for the replacement buses and eligible infrastructure.
- A scan of proof of delivery for the replacement buses and eligible infrastructure.
- One photo of the exterior of each replacement bus, labeled with the last four digits of the bus vehicle identification number.
- One photo of each electric vehicle charger after installation is completed if the EPA funds were used for charging infrastructure.

The Office of the Controller did not receive the close-out packages and the EPA determined that, since the office did not have a process or procedure to calculate the accrual of the rebates, further analysis and information was needed. As such, the Office of the Controller contacted the 2022 Clean School Bus rebate recipients asking them to provide the following information:

- Date and amount of funding received from the EPA for the Clean School Bus Rebates Program in 2023 or 2024.
- Dates when funding was moved to a third party to purchase the buses and the associated charging equipment.
- Amount of the rebate funding remaining with the recipient as of September 30, 2023.

- Amount of the rebate funding remaining in the recipient account as of August 30, 2024.
- Amount of the funding that has not yet been spent on eligible program expenses or transferred to a third party but is planned to be transferred or spent by September 30, 2024.

Eighty-five percent of the rebate recipients responded to the information request, representing \$705 million out of the \$828 million rebate amount that the EPA paid. Out of the \$705 million, \$624 million classified as expenses and \$81 million classified as advances. For the 15 percent of rebate recipients that did not respond, representing \$123 million out of \$828 million, the EPA did not obtain clear information and leveraged its statistical office to find noted trends in the survey responses to allocate a portion of the remaining rebates as either expenses or advances.

When we reviewed the documents that the EPA received from the rebate recipients, we noticed that the recipients provided varying levels of documentation. Recipients either provided emails, purchase orders, invoices, or emails with the invoices. Also, when we originally received the files from the intranet site that the EPA created for us, some of the files were empty. When we inquired as to why, it was discovered that a technical issue occurred. The EPA resolved the issue and uploaded the information in the files. Based upon the inadequate documentation in some of the rebate files, we believe the rebate accrual calculations may not be fully supported. We further note that the lack of information resulted in the EPA using statistical trends and not factual data to calculate the rebate accrual for certain rebates. Therefore, the EPA's FYs 2024 and 2023 Clean School Bus Rebates Program accrual could be misstated.

Recommendation

We recommend that the chief financial officer:

2. Develop and implement a methodology for calculating Clean School Bus Rebates Program accrual calculations.

Agency Response and OIG Assessment

The EPA agreed with our recommendation. The Agency provided an estimated milestone date of August 1, 2025. We consider this recommendation resolved with corrective action pending.

3 – The EPA Significantly Understated SSC Accrual Revenue

We found that the EPA’s updated SSC accrual methodology did not recognize SSC state cost share revenue totaling \$115,272,077.64 for the third quarter of FY 2024, or April, May, and June 2024. Federal financial accounting standards require revenue to be recognized in proportion to the estimated total cost when goods and services are acquired to fulfill a contract. The error occurred when the Agency did not consider accounting principles and standards when updating its SSC accrual methodology. Significant errors caused misstatements in the EPA’s financial statements, reducing reliance on them as a fair representation of the Agency’s financial condition and activities.

Statement of Federal Financial Accounting Standards 7, *Accounting for Revenue and Other Financing Sources and Concepts for Reconciling Budgetary and Financial Accounting*, is the standard for revenue recognition in the federal government. The standard states that revenue should be recognized for goods or services under contracts in proportion to the estimated total cost when goods and services are acquired to fulfill the contract.

The EPA’s Resource Management Directive System 2550D-09-P1, *Financial Management of Superfund Program State Cost Share Provisions for Superfund State Contracts and Remedial Cooperative Agreements*, describes the EPA’s process for managing the financial aspects of the Superfund program remedial state cost share provisions in SSCs. The directive states that “CFC [Cincinnati Finance Center] prepares an accrual each fiscal quarter to properly recognize remedial cost share revenue, liabilities, and accounts receivables based on the cost share requirements, cumulative billings and remedial action expenditures at each site.”¹

Pursuant to section 104 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, before the EPA can provide remedial action in a state, the state must agree to provide 10 percent of the cost of remedial actions in that state. In addition, in the case of facilities operated by or on behalf of a state at the time hazardous waste was disposed of, the state must have agreed to provide 50 percent or more, as determined by the Agency, of the cost of remedial action. These commitments are stated in the SSCs.

During the third quarter of FY 2024, the Agency updated its SSC accrual methodology to reduce accrued revenue. Under the updated methodology, the SSC accrued revenue decreased by \$115,272,077.64. The EPA’s previous SSC accrual methodology recognized earned revenue as costs were incurred based on the SSC cost-share requirements, cumulative billings, credits, and remedial action expenses at each site. The new methodology calculated a revenue accrual only when the Superfund appropriated fund

¹ On August 11, 2024, the Office of the Chief Financial Officer reorganized and changed the name of Cincinnati Finance Center to Cincinnati Finance Division. Resource Management Directive System 2550D-09-P1 is dated March 31, 2017.

expenses exceeded the EPA's share of the contract, which is typically 90 percent. As a result, some sites may not recognize revenue on state cost share for many years.

Table 3-1 shows the SSC accrual differences between the two methodologies for the third quarter of FY 2024.

Table 3-1: SSC accrual differences between the two methodologies

SSC accrual type	New (\$)	Old (\$)	Difference (\$)
Work in progress accrual	35,804,396.63	96,491,121.11	(60,686,724.49)
Unbilled receivables	15,935,509.82	70,520,0862.97	(54,585,353.15)
Total revenue		–	(115,272,077.64)

Source: OIG analysis of EPA data. (EPA OIG table)

The understatement occurred because the EPA did not consider accounting principles and standards when updating the SSC accrual methodology. The Agency believes aligning total expenditures for a site with the SSC percentage results in a much higher accrual than needed. However, generally accepted accounting principles and federal financial accounting standards require revenue to be recognized when earned, as expenses are incurred, and in proportion to the estimated total cost. As a result, the SSC accrued revenue was significantly understated. Significant errors impact the credibility of the EPA's financial statements, reducing reliance on them as a fair representation of the Agency's financial condition and activity.

Recommendation

We recommend that the chief financial officer:

3. Return to the original methodology involving the calculation of the Superfund State Contract accrual to recognize the revenue amount of \$115,272,077.64.

Agency Response and OIG Assessment

After we refuted the EPA's new methodology per generally accepted accounting principles, the Agency reevaluated the SSC accrual process. We verified that the Agency returned to the original methodology, which recognizes earned revenue based on the cost-share requirements, cumulative billings, and remedial action expenditures at each site in their year-end financial statements. The EPA agreed with our recommendation. The Agency completed the recommendation on September 30, 2024.

Significant Deficiency

Table of Contents

4 EPA Property Balances Are Not Reliable 19

4 – EPA Property Balances Are Not Reliable

We found that the EPA's inventory management process did not adhere to procedures specified in EPA Manual 4832, *Personal Property Manual*. Based on the information that was provided to us from the Agency, we found that property was not received at a designated centralized receiving point and property decals were not affixed to EPA property. We also found that property held by contractors was not reconciled with EPA records and \$5,454,962.57 worth of personal property was held as rejected in the EPA's accounting system. Due to a lag in invoicing, a discrepancy of \$40,610,646.43 was recorded in the construction in-progress general ledger account instead of properly recorded in the building account.

Section 5.3 of the *Personal Property Manual* provides that:

"As a standard practice, all personal property assets acquired by the EPA shall be received by a designated PAO [Property Accountable Officer] at a designated centralized receiving point. This will ensure that assets are properly inspected, labeled, recorded and secured. Only under unique circumstances will property be delivered directly (e.g., large outsized and heavy assets requiring special handling, or large volume [over 100] of assets) to a using location and only when coordinated through the Property Management Officer (PMO). All direct deliveries must be coordinated through the PAO so the property can be received properly."

We were informed that occasionally, the acquired equipment is shipped directly to the requesting offices instead of the Office of Mission Support centralized receiving warehouse for property. Not receiving property properly as set forth in the *Personal Property Manual* can lead to improperly documenting receipt of property.

The *Personal Property Manual* also provides protocol as to how materials are to be processed upon receipt. Section 5.5 of the *Personal Property Manual* provides that standard receiving procedures shall address, at a minimum, the following elements:

- Verifying. The correct items and quantities were delivered based on the associated purchase order and shipping documents.
- Inspecting. The determination that items were received undamaged.
- Accepting. The acknowledgement and verification of inspected items are correct and if an incorrect item or quantity was shipped or an item arrived damaged, it is returned.
- Decaling. The labeling and placement of an appropriate EPA property decal on accountable personal property received.
- Recording. The accurate recording of decaled personal property in the Agency Asset Management System
- Documenting. Maintaining documentation that evidences receipt, title, stewardship, delivery, and other activities.

In addition, section 3.9.5 and section 3.7.3 of the *Personal Property Manual* respectively provide:

“Conducting the Physical Inventory

PCOs [Property Custodial Officers] are responsible for conducting the physical inventory of the property assigned to their Custodial Area (CA) by the date scheduled by their PMO. PAOs should also develop procedures to guide their PCOs in conducting the inventories and ensure such activities meet the [appropriate] criteria.”

“Reconciliation of Property and Financial Records

EPA Financial Management relies on the agency’s property management team to maintain complete and accurate property records to report the investment and depreciation of capitalized personal property owned by the agency. Capitalized personal property accountability records must be reconciled quarterly with the financial control accounts in accordance with procedures established by the EPA CFO.”

During our audit, we were informed by Agency personnel that property was being received directly at the requesting offices, property was recorded incorrectly, property decals were not applied, and property was not recorded as received. Moreover, Agency personnel stated that property held by contractors was not reconciled with EPA records and capitalization of the property was not reconciled on a quarterly basis. This resulted in \$5,454,962.57 worth of personal property held as rejected in Compass and a \$40,610,646.43 discrepancy recorded in the EPA’s accounting system.

As a result of failing to follow the *Personal Property Manual*, inventory controls were not in place, personal property assets did not go through standard receiving procedures and personal property was not accurately recorded in the Agency Asset Management System. In addition, not properly reconciling capitalization accounts resulted in a misstatement of assets and expenses on the Agency’s financial statements.

Recommendations

We recommend that the assistant administrator for Mission Support, in conjunction with the chief financial officer:

4. Develop and implement a standardized intake process for receipt of personal property, including application of property decals, as provided in EPA Manual 4832, *Personal Property Manual*.
5. Develop and implement a process for capitalized personal property accountability records to include control logs or other similar accounting mechanisms, to be properly reconciled quarterly with the financial control accounts.

6. Reconcile the \$5,454,962.57 worth of personal property held as rejected in the EPA's accounting system.
7. Reconcile the \$40,610,646.43 that was recorded in the construction in-progress in the proper account.

Agency Response and OIG Assessment

The EPA agreed with our recommendations. For Recommendation 4, the Agency provided an estimated milestone date of October 15, 2025. For Recommendation 5, the Agency provided estimated milestone dates of February 1, 2025; October 15, 2025; and June 1, 2025. The Agency partially completed Recommendation 6 on October 18, 2024, and provided an estimated milestone date of July 1, 2025. The Agency completed Recommendation 7 on November 6, 2024. We consider these recommendations resolved with corrective actions pending.

Compliance with Laws and Regulations

Table of Contents

5 The EPA Failed to Comply with and Implement OMB Circular No. A-123 Provisions 23

6 The EPA Improperly Recorded Advances as Expenses for the Clean School Bus
Rebates Program 25

5 – The EPA Failed to Comply with and Implement OMB Circular No. A-123 Provisions

Based on the information that was provided to us, we found that the EPA failed to implement and integrate key elements of OMB Circular No. A-123, including:

- Assessment process for internal controls.
- Governance structure for risk management and defining risk appetite.
- Completion of annual risk profiles.

These key inputs determine the level and effectiveness of internal control testing and evaluation. Internal controls are tools to help an agency and financial managers achieve results and protect the integrity of operations.

According to OMB Circular No. A-123, federal leaders and managers are responsible for establishing and achieving goals and objectives, seizing opportunities to improve effectiveness and efficiency of operations, providing reliable reporting, and maintaining compliance with relevant laws and regulations. They are also responsible for implementing management practices that effectively identify; assess; respond; and report on risks, which can arise from a variety of external and internal environments.

OMB Circular No. A-123 directs that management must implement an assessment process “to properly assess and improve internal controls over operations, reporting, and compliance.” Similarly, management is responsible for a governance structure in order to have a robust process of risk management and internal control, including developing a process to define risk appetite. OMB Circular No. A-123 also provides that agencies must annually complete risk profiles to “identify risks arising from mission and mission-support operations and consider those risks as part of the annual strategic review process.” As further explained in the circular, “[t]he primary purpose of a risk profile is to provide a thoughtful analysis of the risks an Agency faces toward achieving its strategic objectives arising from its activities and operations, and to identify appropriate options for addressing significant risks.”

Based on information provided to us by the Agency, we found that the EPA failed to implement and integrate these key elements of OMB Circular No. A-123. More specifically, we identified that it does not have an appropriate governance structure to guide its risk management or have an assessment process to review and improve its internal controls. The Agency also does not implement the required annual risk profile. All these key inputs determine the level and effectiveness of internal controls testing and evaluation. According to the OMB circular, internal controls are tools to help an agency and financial managers achieve results and protect the integrity of their programs and operations.

Additionally, OMB Circular No. A-123, Appendix D, *Management of Financial Management Systems – Risk and Compliance*, applies a risk-based approach to determine whether an agency’s financial management systems comply substantially with federal financial management systems requirements,

applicable federal accounting standards, and the U.S. Standard General Ledger at the transaction level. Agencies have the latitude to apply risk management concepts defined in Appendix D to determine the scope necessary to meet management assurance requirements. The goal of Appendix D is to define agency requirements for determining compliance with the FFMIA.

Without the proper internal controls in place, an internal control assessment process, a governance structure to implement risk management, and complete annual risk profiles, the Agency does not have the ability to properly monitor, identify, and mitigate risk and correct internal control deficiencies. This can cause inaccuracy on the annual assurance statement for the Agency, in addition to potential misstatements in the financial statements and notes.

Recommendations

We recommend that the chief financial officer:

8. Develop and implement an assessment process to assess and improve internal controls over operations, reporting, and compliance.
9. Develop a governance structure to implement risk management and internal processes, including a process to define risk appetite.
10. Develop and implement a plan to complete annual risk profiles to identify risks arising from Agency programs and operations.

Agency Response and OIG Assessment

The EPA agreed with our recommendations. The Agency provided an estimated milestone date of October 1, 2025. We consider these recommendations resolved with corrective actions pending.

6 – The EPA Improperly Recorded Advances as Expenses for the Clean School Bus Rebates Program

During FYs 2024 and 2023, the EPA did not comply with federal financial accounting standards and financial requirements by improperly recording advances as expenses for the Clean School Bus Rebates Program disbursements. The federal financial accounting standards and financial reporting requirements state that advances are cash outlays made by a federal entity to others to cover a part or all of the recipients' anticipated expenses or as advance payments for the cost of goods and services acquired. By not recording the disbursements from the Clean School Bus Rebates Program as advances, the EPA did not comply with federal financial reporting requirements.

OMB Circular No. A-136 Section II.3, *Financial Reporting Requirements*, requires that information in financial statements be presented in accordance with generally accepted accounting principles, which include the Federal Accounting Standards Advisory Board's Statement of Federal Financial Accounting Standards. As stated in the OMB Circular:

"Advances are cash outlays made by a Federal entity to its employees, contractors, grantees, or others to cover a part or all of the recipients' anticipated expenses or as advance payments for the costs of goods and services the entity receives."

"Gross program costs should be reported and consist of: (a) direct and indirect costs and (b) the costs of identifiable supporting services provided by other programs within the entity and by other entities."

Statement of Federal Financial Accounting Standards 1, *Accounting for Selected Assets and Liabilities*, states:

"Advances are cash outlays made by a federal entity to its employees, contractors, grantees, or others to cover a part or all of the recipients' anticipated expenses or as advance payments for the cost of goods and services the entity acquires."

"Advances and prepayments should be recorded as assets. Advances and prepayments are reduced when goods or services are received, contract terms are met, progress is made under a contract, or prepaid expenses expire."

"In financial reports of an entity, advances and prepayments the entity paid out (assets) should not be netted against advances and prepayments that the entity received (liabilities)."

Resource Management Directive System Number 2540-04-P3, *Accounts Payable Policies and Procedures for Recognizing Year-End Accrued Liabilities for Grants*, states the following:

“1. Accruals must be established for that portion of obligations where the grantee incurred expense but has not yet billed. While the amounts recorded as grant accruals are estimates, every effort should be made to develop a methodology that will closely reflect the actual amount outstanding at the end of ... each quarterly and year end reporting period.”

“2. To the extent possible, estimates should be projected based on historical analysis of unbilled costs incurred prior to year-end.”

During our FY 2024 testing, we found that the EPA improperly recorded four Clean School Bus Rebates Program payments totaling \$19,838,292.17 as expenses instead of advances prior to the funds being expended, as shown in Table 6-1.

Table 6-1: FY 2024 payments recorded as expenses

Date	Document Number	Dollar Amount (\$)
12/13/23	24DRFZ2081	7,505,000.00
1/18/24	24DRFZ2007	7,615,164.17
1/18/24	24DRFS2101	1,580,000.00
1/24/24	24DRFS2112	3,138,128.00
Total payments	—	19,838,292.17

Source: OIG analysis of EPA data. (EPA OIG table)

We were also able to identify that in FY 2023, the EPA improperly recorded seven Clean School Bus Rebates Program payments totaling \$36,273,056.97 as expenses instead of advances prior to the funds being expended, as shown in Table 6-2.

Table 6-2: FY 2023 Payments Recorded as Expenses

Date	Document Number	Dollar Amount (\$)
5/23/23	23DRFZ2109	1,104,000.00
5/25/23	23DRFZ2091	9,875,000.00
5/25/23	23DRFS2108	9,874,500.00
5/25/23	23DRFZ2027	1,177,181.97
6/23/23	23DRFS2133	3,972,375.00
6/23/23	23DRFZ2004	395,000.00
6/29/23	23DRFS2002	9,875,000.00
Total payments	—	36,273,056.97

Source: OIG analysis of EPA data. (EPA OIG table)

The EPA used an existing rebate accounting model that was established for the Diesel Emissions Reduction Act to record the Clean School Bus Rebates Program payments in Compass. This resulted in the payments being recorded as expenses instead of advances. In September 2024, the EPA identified and corrected the posting model for the Clean School Bus Rebates Program and reclassified all payments

as advances. Also, all future payments involving the program should be recorded as advances instead of expenses. By not complying with the reporting requirements, the EPA could undermine the trust and reliability of its financial statements.

Recommendations

We recommend that the chief financial officer:

11. Update the accounting model for the Clean School Bus Rebates Program to comply with federal reporting requirements.
12. Develop guidance on recording the payments for the Clean School Bus Rebates Program in the EPA's accounting system.
13. Reconcile the advances and expenses quarterly for the Clean School Bus Rebates Program.

Agency Response and OIG Assessment

The EPA agreed with our recommendations. The Agency completed Recommendation 11 on September 2, 2024. The Agency provided an estimated milestone date of February 1, 2025, for Recommendations 12 and 13. We consider these recommendations resolved with corrective actions pending.

Status of Prior Audit Report Recommendations

As noted in the table below, there are still recommendations from previous financial statement audits that have not been fully implemented.

Table D-1: Significant deficiency issues not fully resolved

<p>Originating Offices Did Not Forward Accounts Receivable Source Documents to the Finance Division in a Timely Manner</p> <p>During our FY 2021 audit, we found that EPA regions did not submit supporting source documents to the EPA's Cincinnati Finance Division for accounts receivable in a timely manner, which then delayed recording and processing of those receivables. The EPA's Resource Management Directives state that the responsible offices must forward to the Cincinnati Finance Division source documents supporting an accounts receivable for settlements or orders demonstrating a debt owed to the Agency within five business days. The regional program office, the Office of Regional Counsel, and the regional legal enforcement office staff are responsible for providing these documents to the Cincinnati Finance Division. When the Cincinnati Finance Division is unable to create receivables timely, the debtor may not be billed appropriately, interest may not accrue, and the EPA may not collect all that it is owed. Furthermore, the EPA's delayed recording of accounts receivable could result in a material misstatement of the financial statements. While we have noted some improvements in the timely receipt of legal documents, we still identified instances of untimely receipt from FY 2015 through FY 2024. Therefore, the Agency's corrective actions are not completely effective, and we will continue to evaluate whether the Agency receives legal source documents in a timely manner going forward.</p>
<p>The EPA Did Not Provide Accurate Information for Its Revenue Accruals</p> <p>During FY 2023, we found multiple instances in which the Agency did not provide accurate information for revenue accruals resulting from cost-share agreements for SSCs and Great Lakes Legacy Act project agreements. Based on our findings, we recommended that the chief financial officer (1) instruct the regions to perform an analysis of financially closed SSCs to reclassify appropriated and reimbursable disbursements and financially close lines on the accrual and (2) instruct the regions to provide current SSC information quarterly to the Cincinnati Finance Division. We recommended that the director for the Great Lakes Legacy National Program Office review the Great Lakes Legacy Act accrual project information to the Cincinnati Finance Division to ensure its accuracy. During FY 2024, we found that the Agency reported the actions as complete; however, based on the results of SSCs and Great Lakes Legacy Act accrual analyses and sample testing, we found instances of inaccurate information reported on the revenue accruals. Therefore, the EPA's corrective actions are not yet effective.</p>

Source: OIG analysis of prior-year recommendations and the Agency's corrective actions. (EPA OIG table)

***The EPA's Fiscal Year 2024 and 2023 Consolidated Financial
Statements (with Restatement)***

Agency Response to Draft Report

THE CHIEF FINANCIAL OFFICER

WASHINGTON, D.C. 20460

November 15, 2024

MEMORANDUM

SUBJECT: Response to the Office of Inspector General Draft Report, Project No. OA-FY24-0086, *"Independent Audit of the EPA's Fiscal Years 2024 and 2023 (Restated) Consolidated Financial Statements,"* dated November 14, 2024

FROM: Faisal Amin, Chief Financial Officer
Office of the Chief Financial Officer

**FAISAL
AMIN**

Digitally signed by
FAISAL AMIN
Date: 2024.11.15
14:27:10 -05'00'

TO: Damon Jackson, Director
Financial Directorate
Office of Audit

Thank you for the opportunity to respond to the findings and recommendations in the subject draft report. The following is a summary of the U.S. Environmental Protection Agency's overall position, along with its position on the report's recommendations. This response has been coordinated with the Office of Mission Support.

AGENCY'S OVERALL POSITION

The draft report contains nine recommendations for the Office of the Chief Financial Officer and four recommendations for the OMS. The EPA agrees with the Office of Inspector General's recommendations.

AGENCY RESPONSE TO OIG STATEMENTS

As a result of the agency's internal control reviews over its financial transactions, the EPA discovered the accounting issue with the 2022 Clean School Bus Rebate payments and brought it to the attention of the OIG. The agency initiated corrective actions to address and mitigate the issue upon identification. The EPA disagrees that the accrual process for the CSB Rebate Program was inadequate and that the documentation was insufficient. Accruals, by definition, are estimates that are recorded to properly match expenses and revenues for financial statement reporting. The agency used the best available information to calculate the CSB Expense accrual, ensured compliance with published guidance, and applied due diligence to ensure the accuracy for basis of the accrual.

While the CSB rebate program is not a grant program, but a hybrid between a rebate and a grant program (advance), the EPA considered the guidance provided by the Federal Accounting Standards Advisory Board’s Federal Financial Accounting Technical Release 12, Accrual Estimates for Grant Programs (August 4, 2010), when formulating the CSB rebate expense accrual. Technical Release 12 advises agencies with new grant programs in section 16 that “in the absence of sufficient relevant and reliable historical data on which to base accrual estimates, agencies should prepare estimates based upon the best available data at the time the estimates are made.”

In the absence of historical data or closeout forms from the recipients (which were not due until the end of October 2024), the agency coordinated with the Office of Air and Radiation on the process for requesting information directly from the rebate recipients. To form a supportable expense accrual for the CSB rebate program, the EPA collected data from recipients of the 2022 rebate program requesting information on the status of the funds received by the recipients. The agency received an 85 percent response rate to its information request, which provided adequate information to form the basis of its expense accrual. For the remaining 15 percent (\$123 million) of the recipients, the EPA leveraged the expertise of its statistical office to allocate a portion of the remaining rebates as expenses and to provide further support in the reliability and reasonable assurance of the assumptions for the accrual calculation.

The agency believes that the process it used to calculate the expense accrual for the CSB rebate program was reasonable, had sufficient support to justify reliability of the accrual for a program in its second year of operation, and was applied consistently for the preparation and fair presentation of the consolidated financial statements for fiscal years 2024 and 2023. However, the EPA will further develop and implement an enhanced methodology as additional data is received from the recipients.

AGENCY RESPONSE TO DRAFT REPORT RECOMMENDATIONS

Recommendation	Office	High-Level Intended Corrective Action(s)	Planned Date
1. Develop guidance, including an Office of the Chief Financial Officer checklist to review, evaluate, and determine the accounting treatment and financial management considerations for new and modified programs.	OCFO	<u>Concur.</u> The OCFO-OC’s Policy and Accountability Division will develop guidance for new or modified programs to utilize during program design, in order to ensure proper accounting treatments and financial management principles are implemented.	4/1/25
		The OCFO-OC’s PAD will develop a checklist to assess risks and internal controls for new or modified programs to be included in the Enterprise Risk Management and Program Integrity Annual Guidance.	4/1/25

Recommendation	Office	High-Level Intended Corrective Action(s)	Planned Date
2. Develop and implement a methodology for calculating Clean School Bus Rebates Program accrual calculations.	OCFO	<u>Concur.</u> The OCFO-OC's Finance and Accounting Division will refine the methodology for calculating CSB Program rebate accruals.	8/1/25
3. Return to the original methodology involving the calculation of the SSC accrual to recognize the revenue amount of \$115,272,077.64.	OCFO	<u>Concur.</u> The OCFO-OC's Cincinnati Finance Division returned to the original methodology.	Completed 9/30/24
4. In conjunction with the Chief Financial Officer, develop and implement a standardized intake process for receipt of personal property, including application of property decals, as provided in EPA Manual 4832, Personal Property Manual.	OMS	<u>Concur.</u> The OMS will implement a standard intake process for receipt of personal property governing a new, varying process of receiving and decaling assets when receipt outside of an OMS warehouse is necessary.	10/15/25
5. In conjunction with the Chief Financial Officer, develop and implement a process for capitalized personal property accountability records to be properly reconciled quarterly with the financial control accounts and develop a process that allows the Agency to review and monitor all contractor activities with control logs.	OMS	<u>Concur.</u> The OMS will develop and implement a process for capitalized personal property accountability records to be reconciled quarterly. Additionally, OMS will develop a process to review and monitor contractor control logs.	10/15/25
		The OCFO-OC's Research Triangle Park Finance Division will enhance collaboration between the RTPFD and OMS, increasing the frequency of collaboration meetings from annually to quarterly to discuss new acquisitions and dispositions.	2/1/25
		The OCFO-OC's PAD will create a test plan and conduct an A-123 Review of Contractor Held Property transactions for FY2025.	6/1/25

Recommendation	Office	High-Level Intended Corrective Action(s)	Planned Date
6. In conjunction with the Chief Financial Officer, reconcile the \$5,454,962.57 worth of personal property held as rejected in EPA's accounting system.	OMS	<u>Concur.</u> As part of the normal OCFO-OC's RTPFD process, the two systems are reconciled quarterly, and variances are documented and investigated for resolution. The OCFO-OC's RTPFD and OMS will develop a business case to enhance Personal Property, Real Property, and Contractor Held Property through system integration between Compass and Sunflower.	Completed 10/18/24 7/1/25
7. In conjunction with the Chief Financial Officer, reconcile the \$40,610,646.43 that was recorded in construction in-progress in the proper account.	OMS	<u>Concur.</u> Fixed Asset Transfers in the amount of \$40,610,646.43 were properly reconciled and transferred in Period 15 of FY2024 by the OCFO-OC.	Completed 11/6/24
8. Develop and implement an assessment process to assess and improve internal controls over operations, reporting, and compliance.	OCFO	<u>Concur.</u> The OCFO-OC's PAD will further develop and implement strategies to improve internal controls, including strengthening guidance, enhancing training, and conducting an assessment to validate effectiveness.	10/1/25
9. Develop a governance structure to implement risk management and internal processes, including a process to define risk appetite.	OCFO	<u>Concur.</u> The OCFO is developing a process to strengthen its risk management oversight, including implementing an enhanced governance structure and establishing the agency's risk appetite process.	10/1/25
10. Develop and implement a plan to complete annual risk profiles to identify risks arising from Agency programs and operations.	OCFO	<u>Concur.</u> The OCFO will develop and implement the EPA's risk management plan to complete annual risk profiles for agency programs and operations.	10/1/25
11. Update the accounting model for the Clean School Bus Rebates Program to comply with federal reporting requirements.	OCFO	<u>Concur.</u> The OCFO-OC's FAD identified the accounting issue and updated the accounting models for the CSB rebate payments to properly record them as advances when disbursed.	Completed 9/2/24
12. Develop guidance on recording the payments for the Clean School Bus Rebates	OCFO	<u>Concur.</u> The OCFO-OC will develop guidance on the lifecycle of recording CSB payments to include the reconciliation of	2/1/25

Recommendation	Office	High-Level Intended Corrective Action(s)	Planned Date
Program in the EPA's accounting system.		the close-out packages for final expense transaction recording.	
13. Reconcile the advances and expenses quarterly for the Clean School Bus Rebates Program.	OCFO	<u>Concur</u> . The OCFO-OC's RTPFD will reconcile the advance payments and expenses for the CSB rebate program after the end of each quarter.	2/1/25

The background of the slide is a photograph of a large, billowing cloud formation, possibly a cumulonimbus cloud, illuminated from below by a low sun, giving it a bright golden-yellow and orange glow. The cloud is set against a clear blue sky. Below the cloud, a dark, calm body of water stretches to the horizon. The text is overlaid on a white rectangular box in the upper portion of the image.

Section III

Other Accompanying Information

MANAGEMENT INTEGRITY AND CHALLENGES

Overview of EPA's Efforts

Management challenges and internal control weaknesses represent vulnerabilities in program operations that may impair the EPA's ability to achieve its mission and threaten the agency's safeguards against fraud, waste, abuse, and mismanagement. These areas are identified through internal agency reviews and independent reviews by the EPA's external evaluators, such as the OMB, the Government Accountability Office and EPA's OIG. This section of the AFR discusses in detail two components: 1) key management challenges identified by EPA's OIG, followed by the agency's response and 2) a brief discussion of EPA's progress in addressing its FY 2024 material weaknesses.

Under the FMFIA, all federal agencies must provide reasonable assurance that internal controls are adequate to support the achievement of their intended mission, goals, and objectives. (See Section I, "Management Discussion and Analysis," for the Administrator's Statement of Assurance.) Additionally, agencies must report any material weaknesses identified through internal and/or external reviews and their strategies to remedy the problems. Material weaknesses are vulnerabilities that could significantly impair or threaten fulfillment of the agency's programs or mission. In FY 2024, the EPA identified one new material weakness. Two new material weaknesses were identified by OIG. (See following subsection for a discussion of the EPA's progress in addressing any material weaknesses.)

The agency's senior managers are committed to maintaining effective and efficient internal controls to ensure that program activities are carried out in accordance with agency policy and applicable laws and regulations. The agency will continue to address its remaining weaknesses and report on its progress, as appropriate.

FY 2024 and FY 2025 TOP MANAGEMENT CHALLENGES

Office of Inspector General – Identified Top Management Challenges

The Reports Consolidation Act of 2000 requires the OIG to report on the agency’s most serious management and performance challenges, known as the key management challenges. Management challenges represent vulnerabilities in program operations and their susceptibility to fraud, waste, abuse, or mismanagement. From the [FY 2024 Top Management Challenges](#), the OIG retained 7 management challenges and identified one new top management challenge for FY 2025. The table below includes issues the OIG identified as top management challenges facing the EPA and the years in which the OIG identified the challenge.

OIG-identified key management challenges for the EPA	FY 2024	FY 2025
Mitigating the causes and adapting to the impacts of climate change. The EPA has prioritized addressing climate change as a core aspect of its mission to protect human health and the environment. It therefore needs to continue efforts to reduce greenhouse gas emissions, promote resiliency and adaptation, address cumulative and disparate impacts, and engage with international partnerships.	•	
Integrating and implementing environmental justice. Achieving environmental justice remains a whole-of-government focus and necessitates that the EPA harness agencywide coordination and make cross-program decisions that weigh cumulative risks and impacts to the communities that the Agency serves.	•	
Safeguarding the use and disposal of chemicals. The public must be able to trust the EPA’s ability to identify the risks of using chemicals, including pesticides, and to provide safeguards for and verification of proper disposal, management, or remediation of toxic substances.	•	
Promoting ethical conduct and protecting scientific integrity. To ensure public trust and program integrity, the EPA’s decision-making and program implementation must be grounded in sound scientific principles and its employees, especially its senior officials, must adhere to rigorous ethical standards.	•	
Managing grants, contracts, and data systems. Effective management of grants, contracts, and related data is critical to reducing the risk of fraud, waste, abuse, and noncompliance with funding requirements, especially as the risks increase with the influx of approximately \$100 billion in supplemental appropriations under the Infrastructure Investment and Jobs Act and Inflation Reduction Act.	•	
Maximizing compliance with environmental laws and regulations. The EPA’s monitoring and enforcement activities remain below ten-year averages, while the Agency’s ability to maximize compliance faces difficulties related to variations in permitting, management of delegated state programs, incorporation of environmental justice concerns, and uncertainties that may result from recent court decisions.	•	
Overseeing, protecting, and investing in water and wastewater systems. The EPA has oversight responsibility for strengthening and securing the cyber and physical infrastructure at tens of thousands of public drinking water systems and publicly owned wastewater treatment systems. This critical infrastructure faces various threats from cyberattack, theft, vandalism, and other risks that can affect public health and leave communities vulnerable to the loss of clean water and drinking water.	•	
Recruiting and retaining staff for new and existing programs. The EPA faces difficulties recruiting and retaining the number and caliber of employees it needs to accomplish its mission. The recent influx of supplemental appropriations underscores the Agency’s need to complete workforce planning and support human capital development to maintain and grow its workforce so it can implement existing and new programs.		•

At a Glance

The EPA's Fiscal Year 2025 Top Management Challenges

What Are Management Challenges?

The Reports Consolidation Act of 2000 requires each inspector general to prepare an annual statement summarizing what the inspector general considers to be "the most serious management and performance challenges facing the agency" and to briefly assess the agency's progress in addressing those challenges.

To identify these top challenges for fiscal year 2025, the U.S. Environmental Protection Agency Office of Inspector General considered the body of our work, as well as our objective and professional observations, work conducted by the U.S. Government Accountability Office, Congress's interests, and Agency documentation and statements.

Our [report](#) *EPA's Fiscal Year 2024 Top Management Challenges*, published November 2023, identified seven top management challenges facing the Agency. For fiscal year 2025, we retained all seven of these challenges and added a new challenge related to the Agency's recruiting and retention efforts. In total, we identified eight top management challenges.

Address inquiries to our public affairs office at (202) 566-2391 or OIG.PublicAffairs@epa.gov.

What We Found

We identified eight top management challenges for the EPA for fiscal year 2025:

1. **Mitigating the causes and adapting to the impacts of climate change.** The EPA has prioritized addressing climate change as a core aspect of its mission to protect human health and the environment. It therefore needs to continue efforts to reduce greenhouse gas emissions, promote resiliency and adaptation, address cumulative and disparate impacts, and engage with international partnerships.
2. **Integrating and implementing environmental justice.** Achieving environmental justice remains a whole-of-government focus and necessitates that the EPA harness agencywide coordination and make cross-program decisions that weigh cumulative risks and impacts to the communities that the Agency serves.
3. **Safeguarding the use and disposal of chemicals.** The public must be able to trust the EPA's ability to identify the risks of using chemicals, including pesticides, and to provide safeguards for and verification of proper disposal, management, or remediation of toxic substances.
4. **Promoting ethical conduct and protecting scientific integrity.** To ensure public trust and program integrity, the EPA's decision-making and program implementation must be grounded in sound scientific principles and its employees, especially its senior officials, must adhere to rigorous ethical standards.
5. **Managing grants, contracts, and data systems.** Effective management of grants, contracts, and related data is critical to reducing the risk of fraud, waste, abuse, and noncompliance with funding requirements, especially as the risks increase with the influx of approximately \$100 billion in supplemental appropriations under the Infrastructure Investment and Jobs Act and Inflation Reduction Act.
6. **Maximizing compliance with environmental laws and regulations.** The EPA's monitoring and enforcement activities remain below ten-year averages, while the Agency's ability to maximize compliance faces difficulties related to variations in permitting, management of delegated state programs, incorporation of environmental justice concerns, and uncertainties that may result from recent court decisions.
7. **Overseeing, protecting, and investing in water and wastewater systems.** The EPA has oversight responsibility for strengthening and securing the cyber and physical infrastructure at tens of thousands of public drinking water systems and publicly owned wastewater treatment systems. This critical infrastructure faces various threats from cyberattack, theft, vandalism, and other risks that can affect public health and leave communities vulnerable to the loss of clean water and drinking water.
8. **Recruiting and retaining staff for new and existing programs.** The EPA faces difficulties recruiting and retaining the number and caliber of employees it needs to accomplish its mission. The recent influx of supplemental appropriations underscores the Agency's need to complete workforce planning and support human capital development to maintain and grow its workforce so it can implement existing and new programs.

We have identified these as the most serious management and performance challenges facing the EPA. They represent vulnerabilities to waste, fraud, abuse, and mismanagement, or the most significant barriers to the EPA accomplishing its mission.

Agency Response to Office of Inspector General – Identified Top Management Challenges

The Office of the Inspector General did not transmit the final *“EPA’s FY 2025 Top Management Challenges”* report by November 15, 2024. The agency plans to review the final report and prepare a response, if necessary, to this report.

3. USSGL at Transaction Level	No lack of substantial compliance noted.	No lack of substantial compliance noted.

PAYMENT INTEGRITY

Payment Integrity Information Act of 2019 Requirements

The Payment Integrity Information Act of 2019 (PIIA) requires executive branch agencies to review all programs and activities annually, identify those that may be susceptible to significant improper payments and report the results of their improper payment activities to the President and Congress through their annual Agency Financial Report or Performance and Accountability Report as well as post the results on [PaymentAccuracy.gov](https://www.paymentaccuracy.gov). The PIIA further requires each agency's Office of Inspector General (OIG) to determine if their agencies programs or activities are compliant with the statute.

The EPA is dedicated to reducing fraud, waste, and abuse and presents the following improper payment information in accordance with PIIA; the OMB guidance found in Circular A-123, Appendix C, Requirements for Payment Integrity Improvement; and the reporting requirements contained in OMB Circular A-136, Financial Reporting Requirements. The OMB implementing guidance directs federal agencies to take the following steps:

1. Review all programs and activities at least once every 3 years to identify those that are susceptible to significant improper payments, defined as gross annual improper payments exceeding (a) both 1.5 percent of program outlays and \$10 million of estimated improper payments or (b) \$100 million of estimated improper payments (regardless of the rate).
2. Obtain a statistically valid estimate of the annual amount of improper payments in programs identified as susceptible to significant improper payments.
3. Implement a plan to reduce improper payments in these programs.
4. Report the annual amount of each program's overpayments and recoveries.

An improper payment is defined as any payment that should not have been made or that was made in an incorrect amount, including an overpayment or underpayment, under a statutory, contractual, administrative, or other legally applicable requirements. It includes any payment to an ineligible recipient; any payment for an ineligible good or service; any duplicate payment; any payment for a good or service not received, except for those payments where authorized by law; and any payment that does not account for credit for applicable discounts. Further, the term "payment for an ineligible good or service" includes a payment for any good or service that is rejected under any provision of any contract, grant, lease, cooperative agreement, or other funding mechanism.

The term "payment" means any transfer or commitment for future transfer of federal funds such as cash, securities, loans, loan guarantees, and insurance subsidies to any non-federal person or entity or a federal employee, that is made by a federal agency, a federal contractor, a federal grantee, or a governmental or other organization administering a federal program or activity.

As described in Appendix C of OMB Circular A-123 all programs with annual outlays over \$10,000,000 will fall into one of two possible classifications: Phase 1 Programs that are not likely to have an annual amount of improper payments (IPs) above the statutory threshold. If a program in Phase 1 determines that it is likely to annually make IPs above the statutory threshold, then the program will move into Phase 2 the following year. Once in Phase 2 a program will need to develop and implement a corrective action plan and obtain a statistically valid estimate of the annual amounts of improper payments in that program. Programs in Phase 2 that exceed \$100 million of estimated improper payments are also designated as High-Priority Programs. High-Priority Programs will have additional quarterly reporting requirements.

Office of Inspector General's Compliance Determination for FY 2024

On May 29, 2024, the EPA's Office of Inspector General released its annual report of the agency's prior fiscal year PIIA compliance. In the report, the EPA's OIG stated that:

The EPA complied with the requirements of the Payment Integrity Information Act of 2019, or PIIA, and the applicable Office of Management and Budget guidance for its fiscal year 2023 reporting. The EPA has made progress in resolving corrective action plans and efforts to prevent and reduce improper payments from prior audit recommendations, but Agency corrective actions are still in process. The Agency satisfied these requirements for PIIA compliance for FY 2023 but has an opportunity to improve internal controls to provide better oversight of its payment integrity activities.

As a result of its review, the OIG recommended that:

- 1. The Chief Financial Officer develop guidance for generating and maintaining documentation to support risk assessment determinations of whether EPA programs are susceptible to significant improper payments.*
- 2. The EPA should develop oversight guidance and mechanisms to monitor the resolution of unknown payments, as well as develop processes and tools to periodically collect and analyze agencywide payment integrity activities and related information for preventing and reducing improper and unknown payments.*

The agency agreed to implement these recommendations and took the following actions to satisfy requirements of OIG's recommendations:

- In June of 2024, the EPA completed revisions to its Qualitative Risk Assessments Standard Operating Procedures that includes processes for standardizing and scoring the review process.
- Also, in June of 2024, the Payment Integrity Team started a monthly data call to survey each payment stream to report improper payments.

Summary of criteria to be compliant with PIIA

To be considered compliant with the Payment Integrity Information Act (PIIA), federal agencies must meet up to six annual reporting requirements listed below.

1. **Publish Payment Integrity Information:** Agencies must include payment integrity information in their annual financial statements and accompanying materials, which must also be posted on the agency's website and on PaymentAccuracy.gov. (Applicable to ALL Federal Agencies)
2. **Conduct Risk Assessments:** Programs with annual outlays over \$10 million must undergo risk assessments at least once every three years to determine susceptibility to improper payments. (Applicable to ALL Federal Agencies)
3. **Estimate Improper Payments:** Agencies must produce statistically valid estimates of improper and unknown payments for susceptible programs and publish these estimates. (Applicable to Programs Deemed Susceptible to Significant Improper Payments)

4. **Develop Corrective Action Plans:** Agencies are required to publish corrective action plans for programs with improper payment estimates above the statutory threshold. (Applicable to Programs Deemed Susceptible to Significant Improper Payments)
5. **Set and Achieve Reduction Targets:** Agencies must publish reduction targets for improper payments and demonstrate improvements in payment integrity or achieve a tolerable rate of improper payments. (Applicable to Programs Deemed Susceptible to Significant Improper Payments)
6. **Report on Payment Rates:** Agencies need to report an improper and unknown payment rate of less than 10% for each program. (Applicable to Federal Agencies with an Improper Payment or Unknown Payment Rate Above 10%)

Summary of current risk/susceptibility levels in EPA programs

The Office of Management and Budget uses three levels to classify federal agency improper payments risk: Not Susceptible to Significant Improper Payments, Susceptible to Significant Improper Payments, and High Priority. None of the agency's programs were identified as high priority (defined as exceeding \$100 million of annual estimated improper payments under PIIA). The individual risk status of the agency's programs is summarized in Table 1: Program Risk Level.

In FY 2023, the EPA conducted improper payment risk assessments using a systematic approach to determine whether each program or payment stream is susceptible to significant improper payments. The risk assessments required an evaluation of risk factors that could contribute to the potential for significant improper payments. One new program, the Water Infrastructure Finance, and Innovation Act (WIFIA) program was included in the risk assessment in the FY 2023 process. For their individual risk assessments, each office addressed risks known at the time of completion. Results showed that 8 of the 9 payment streams reviewed were unlikely to be susceptible to significant improper payments. The agency's Grants program was identified as likely to be susceptible requiring a more rigorous review of its payments.

In FY 2024, the EPA identified four additional programs that were expected to surpass the \$10 million of annual outlays threshold that triggers the requirement to complete a Payment Integrity risk assessment. Ultimately, two of the four programs (Clean School Bus- Rebates and Settlements) met the criteria, resulting in each completing their own qualitative risk assessment. The other two programs, the Greenhouse Gas Reduction Fund, and the Environmental Justice Grants program, are expected to complete their own risk assessments in FY 2025.

Table 1 summarizes the risk level for each of the agency's payment streams.

Table 1: Program Risk Level			
Payment Stream	Not Susceptible to Significant IPs	Susceptible to Significant IPs	Year of Last Risk Assessment
Commodities	X		2023
Contracts	X		2023
CWSRF	X		2023
DWSRF	X		2023
Grants	X		2023
Clean School Bus Rebates	X		2024
Clean School Bus Grants			2025
Settlements	X		2024
Payroll	X		2023

Table 1: Program Risk Level			
Payment Stream	Not Susceptible to Significant IPs	Susceptible to Significant IPs	Year of Last Risk Assessment
Purchase Cards	X		2023
Travel	X		2023
GGRF*			2025
Environmental Justice Grants*			2025
2018 Disaster Relief Funds†	X		N/A
WIFIA	X		2023
*The Green House Gas Reduction Fund (GGRF) and the Environmental Justice Grants are scheduled to do the program's risk assessments in FY 2025.			
†The 2018 Disaster Relief Funds continue to spend well below the \$10 million threshold for requiring a risk assessment.			

I. EPA's Risk Assessments

Under the PIIA, federal agencies are required to conduct risk assessments of their programs or activities at least once every three years to determine whether they are susceptible to significant improper payments¹. These risk assessments can be either qualitative or quantitative reviews. The EPA utilizes both methods to assess the risk of improper payments in its payment streams. A qualitative risk assessment is an evaluation of risk factors that could contribute to the occurrence of significant improper payments. A quantitative risk assessment may consist of a true statistical sample of payments for review or through the use of a non-statistical assessment where a subset of the population is sampled non-randomly. With each those results, the ratio of improper payments is projected onto the annual outlays.

The agency's qualitative risk assessments consist of a questionnaire designed to provide the payment streams with a tool for self-evaluation of these risk factors in consideration of their existing internal controls. The following risk factors are addressed in the agency's qualitative risk assessments:

1. How long the program has been at the agency and when did it make its first payment.
2. The complexity of the program reviewed.
3. The change in volume of payments made through the program reviewed.
4. Whether payments or payment eligibility decisions are made outside of the agency, such as by a State or local government.
5. Recent major changes in program authorities, practices, procedures, or funding,
6. The level, experience, documentation, and quality of training for personnel responsible for making program eligibility determinations or certifying that payments are accurate.
7. Significant deficiencies or material weaknesses identified in the audit report or other relevant management findings of the agency that might hinder accurate payment certification.
8. Similarities (a combination of outlays, mission, payment process, etc.) to other programs that have reported IP² and UP³ estimates or been deemed susceptible to significant IPs.

¹ OMB guidance document A-123 Appendix C (M-21-19) also requires agencies conduct risk assessments of each new programs after it has outlays greater than \$10 million within a 12-month period.

² IP = improper payment

9. The accuracy and reliability of IP and UP estimates previously reported for the program, or other indicator of potential susceptibility to IPs and UPs identified by the OIG of the executive agency, the Government Accountability Office, other audits performed by or on behalf of the federal, state, or local government, disclosures by the executive agency, or any other means.
10. Whether the program lacks reliable information or data systems to confirm eligibility or provide for other payment integrity needs.
11. The accuracy and reliability of the information or data systems used by the program.
12. The risk of fraud as assessed by the agency under the Standards for Internal Control in the Federal Government (commonly known as the 'Green Book') published by the Government Accountability Office.
13. Whether there are additional risks the payment stream faces not identified by the risk factors in the questionnaire.

The qualitative risk assessments consist of a questionnaire designed to provide the payment streams with a tool for self-evaluation of these risk factors in consideration of their existing internal controls. Directions for completion of the questionnaire are provided to the program managers of each payment stream. Payment streams justify their ratings with a brief narrative and supporting documentation. The payment stream self-assessment ratings, supported by a brief narrative, and submission of supporting documentation, provide the basis for the assigned risk scores. Upon completion, the Office of the Chief Financial Officer (OCFO) tabulates a scorecard providing an overall risk rating for each payment stream on a scale of 1 to 5.

Directions for completion of the questionnaire are provided to the program managers of each payment stream. Payment streams justify their ratings with a brief narrative and supporting documentation. The payment stream self-assessment ratings, supported by a brief narrative, and submission of supporting documentation, provide the basis for the assigned risk scores.

If the final score is between 1.0 - 2.5, the payment stream is not susceptible to significant improper payments; if the score is between 2.6 – 3.6, the payment stream is considered likely to be susceptible to significant improper payments; and if the score is 3.7 or above, the payment stream is at high risk of significant improper payments.

If the results of a risk assessment show that an agency program is determined to be likely susceptible to significant improper payments. Therefore, the program will need to undertake and complete a Sampling and Estimation Methodology Plan (S&EMP) to be considered statistically valid if the programs produce point estimates and confidence intervals around those estimates of its payments during the following fiscal year.

II. Improper Payments and Recoveries Reporting

a. Programs

Table 2 provides information on EPA's Grants program, and required to be gathered and finalized before the final determination that the Grants program was no longer susceptible to significant improper payments. The following results reinforce the Grants program is not susceptible determination. The website <https://paymentaccuracy.gov/> contains more detailed information on improper payments as well as all of the information reported in prior year AFRs.

³ UP = 'Unknown' Payment i.e., unknown payments as those that an agency cannot determine to be either proper or improper because of insufficient or lacking documentation.

Table 2: Improper Payment Rate (\$ in millions)		
FY 2024	\$ Outlays	\$1,720.30
	\$ Proper	\$1,707.11
	\$ Improper	\$13.19
	IP %	0.77%
	Proper %	99.23%
	\$ Overpay	\$13.19
	\$ Underpay	\$0.00
	\$ Insufficient Documentation	\$0.00
	% Sample Overpaid	0.77%
	% Sample Underpaid	0.00%
	% Sample Insufficient Documentation	0.00%
	Sampling Timeframe Start	October 1, 2022
	Sampling Timeframe End	September 30, 2023

Table 3 provides information on the estimated amount of improper payments made directly by the federal government and the amount of improper payments made by recipients of federal money.

Table 3: Monetary Loss (\$ in millions)					
Program	Estimated Total Monetary Loss to the Government	Monetary Loss within the Agency's Control	Monetary Loss Outside the Agency's Control	Estimated Non-Monetary Loss to the Government	Unknown (Insufficient Documentation to Determine)
Grants	\$13.19	\$0.00	\$13.19	\$0.00	\$0.00

Table 4 identifies the root causes of payment errors.

Table 4: Improper Payment Root Cause Category Matrix (Grants) (\$ in millions)					
Reason for Improper Payment		Type of Improper Payment			
		Overpayments	Underpayments	Unknown	Totals
Program Design or Structural Issue		—	—	—	—
Inability to Authenticate Eligibility:	Inability to Access Data	—	—	—	—

Insufficient Documentation to Determine		–	–	–	–
Other Reason		–	–	–	–
Totals		\$13.19	–	–	\$13.19

b. Recoveries of Improper Payments

PIIA requires agencies to conduct payment recapture audit reviews in any program expending more than \$1 million annually. Past experience has demonstrated that the low dollar value of improper payments recovered by an external payment recapture auditor resulted in an effort that was not cost-effective for the agency or the contractor. Therefore, EPA no longer uses a payment recapture audit firm to conduct formal payment recapture audits.

Nevertheless, the agency performs overpayment recovery activities internally, leveraging the work of agency employees and agency resources. As part of this process, each payment stream is routinely monitored to assure the effectiveness of internal controls and identify issues that could give rise to overpayments. The agency's payment review and recovery activities are part of its overall program of internal control over disbursements, which includes establishing and assessing internal controls to prevent improper payments, reviewing disbursements, assessing root causes of error, developing corrective action plans where appropriate, and tracking the recovery of overpayments.

The following table quantifies the results of the agency's efforts to identify and recapture overpayments across all of its payment streams.

Table 5: Overpayments Recaptured Outside of Payment Recapture Audits ⁽¹⁾ (\$ in millions)		
Program	Amount Identified in FY 2024	Amount Recovered in FY 2024
Commodities (2)	0.03	0.01
Contracts (2)	0.71	0.71
CWSRF	0.18	0.17
DWSRF	0.38	0.39
Grants	2.60	2.60
Payroll (3)	0.95	0.83
Purchase Cards	0.00	0.00
Travel	0.02	0.02
2018 Disaster Relief	0.00	0.00
Other (4)	2.00	0.03
Total	7.86	5.57
Recapture Rate – 71 %		

1. The amounts displayed in this table were identified and recovered using a variety of means available to the agency.
2. The amounts for contracts and commodities do not include lost discounts, which are uncollectible.
3. Payroll consists of salary, benefits, and awards. The amount of improper payments can be overstated if this figure also includes adjustments to pay (factors impacting changes include: changes to employee grade/step and health plans may lag behind bi-weekly payroll payments).
4. "Other" consists of improper payments identified by audits plus confirmed fraud.

The information provided below summarizes the actions and methods used by the agency to recoup overpayments, a justification of any overpayments determined not to be collectible, and any conditions giving rise to improper payments and how those conditions are being resolved.

A) Commodities and Contracts (Commercial Payments)

Given the historically low percentage of improper payments in commodities and contracts, the agency relies on its internal review process to detect and recover overpayments. The agency produces monthly reports for each payment stream and uses these reports as its primary tool for tracking and resolving improper payments. These reports identify the number and dollar amount of improper payments, the source and reason for the improper payment, the number of preventive reviews conducted, and the value of recoveries.

The commercial payments are subject to financial review, invoice approval, and payment certification. Since all commercial payments are subject to rigorous internal controls, the agency relies upon its system of internal controls to minimize errors. The following is a brief summary of the internal controls in place over the agency's commercial invoice payment process.

The payment processing cycle requires that all invoices be subjected to rigorous review and approval by separate entities. Steps taken to ensure payment accuracy and validity, which serve to prevent improper payments, include 1) the agency's Research Triangle Park (RTP) Finance Division review for adequate funding and proper invoice acceptance; 2) comprehensive system edits to guard against duplicate payments, exceeding ceiling cost and fees, billing against incorrect period of performance dates, and payment to wrong vendor; 3) electronic submission of the invoice to Project Officers and Approving Officials for validation of proper receipt of goods and services, period of performance dates, labor rates, and appropriateness of payment, citing disallowances or disapprovals of costs if appropriate; and 4) review by the RTP Finance Center of suspensions and disallowances, if taken, prior to the final payment certification for Treasury processing. Additional preventive reviews are performed by the RTP Finance Center on all credit and re-submitted invoices. Furthermore, EPA Contracting Officers perform annual reviews of invoices on each contract they administer, and DCAA audits are performed on cost-reimbursable contracts at the request of the agency.

Vendors doing business with federal agencies occasionally offer discounts when invoices are paid in full and within the specified discount period (e.g., within 10 days of billing). EPA makes its best effort to take all discounts, as they represent a form of savings to the agency. However, there are valid reasons for which it is not feasible to take every discount that is offered, including: 1) an insufficient discount period to process a discount offer, such as a discount offer in which the required processing time for payment exceeds the number of days of the offer; and 2) a situation in which it is not economically advantageous to take the discount. Specifically, if the discount rate exceeds the Treasury's current value of funds rate, taking the discount saves the government money, so the discount is accepted by paying the invoice early. However, if the discount rate is less than the current value of funds rate, taking the discount is not cost-effective for the government, so the discount is

rejected, and the invoice is paid as close to the payment due date as possible. For FY 2024 reporting, improper payments stemming from lost discounts totaled \$3,038 for commodities and contracts combined.

Improper payments can result from typographical errors, payments to incorrect vendors, duplicate payments, or lost discounts. Numerous training sessions have been conducted, and standard operating procedures have been updated to ensure the most current processes are properly documented. Any significant changes in policy or procedures are communicated in a timely manner. Despite the agency's best efforts to collect all overpayments, some overpayments are not recoverable. For example, lost discounts can result when the agency is unable to pay an invoice within the period specified by the vendor. While reported as improper payments, lost discounts are not recoverable and are excluded from the recovery percentage for both contracts and commodities.

B) Clean and Drinking Water State Revolving Funds

The SRFs are not susceptible to significant improper payments. For the SRFs, the agency both identifies and recovers improper payments during the state review process. EPA Regions are required to conduct annual reviews of state SRF programs using checklists developed by the agency's headquarters. Included in the checklist are questions about potential improper payments which the Regions discuss with the state SRF staff during the reviews. Errors in the SRFs most often arise from duplicate payments, funds drawn from the wrong account, incorrect proportionality used for drawing federal funds, ineligible expenses, transcription errors, or inadequate cost documentation. Many of the payment errors are immediately corrected by the state or are resolved by adjusting a subsequent cash draw. For issues requiring more detailed analysis, the state provides the agency with a plan for resolving the improper payments and reaches an agreement on the planned course of action.

The agreement is described in EPA's Program Evaluation Report, and the agency follows up with the state to ensure compliance.

C) Grants

For the agency's grants payment stream, overpayments principally consist of unallowable costs or lack of supporting documentation. When overpayments arise, EPA seeks to recover them either by establishing a receivable and collecting money from the recipient or by offsetting future payment requests. The agency follows established debt collection procedures to recapture overpayments.

EPA identifies overpayments in grants both through statistical sampling and through non-statistical means. As part of its non-statistical activity, the agency conducts transaction testing of active grant recipients through Advanced Administrative Monitoring reviews. Recipients selected for non-statistical reviews are chosen based on the results of risk assessments performed by grants management officers. Using a standard protocol, an onsite or desk review is performed, and each recipient's administrative and financial management controls are examined. The reviews include an analysis of the recipient's administrative policies and procedures and the testing of a judgmental sample of a minimum of three non-consecutive draws.

In addition, the agency responds to single audits and audits conducted by the Office of the Inspector General and uses them as a means of identifying and recovering improper payments. The agency follows established processes for evaluating questioned costs, validating, or disallowing costs where appropriate, and seeking the recovery of any sustained overpayments. EPA also identifies improper payments originating from enforcement actions, grant adjustments, and recipient overdraws. Grant adjustments arise when a recipient must return any unexpended drawn amounts prior to close out of the grant. Recipient overdraws occur when funds are erroneously drawn in advance of immediate cash needs, and the recipient is directed to repay the funds while also being reminded of the immediate cash needs rule. Depending on the type of error, improper payment

information is tracked by the Office of the Controller and the Office of Grants and Debarment, and the records of each are reconciled to ensure complete and accurate reporting. EPA also seeks to prevent improper payments. Prior to the issuance of a grant award, OGD's Compliance Team conduct pre-award certification of non-profit recipients that receive awards in excess of \$200K to ensure their written policies and procedures specify acceptable internal controls for safeguarding federal funds. Re-certifications are conducted every four years. Grants Management Officers (GMOs) concur on all certifications. GMOs are also required to ensure that recipients are not listed in the Excluded Parties List System within the System for Award Management. EPA conducts annual baseline monitoring reviews of all recipients to ensure overall compliance with assistance agreement terms and conditions, as well as all applicable federal regulations. If deemed necessary, recipients can be placed on a reimbursement payment plan which requires submission of cost documentation (receipts, invoices, etc.) for review and approval prior to receiving reimbursement.

In FY 2024, the agency performed statistical sample transaction testing, since the payment stream was identified as susceptible in FY 2023. Based on the transaction testing, the grants payment stream is not susceptible to significant improper payments.

D) Payroll

The agency's payroll is not susceptible to significant improper payments. Payroll is a largely automated process driven by the submission of employee time and attendance records and personnel actions. In-service debt can arise for a variety of reasons during the period of employment. When in-service debt arises, the employee is notified of the debt, given the right to dispute the debt, provided payment options, and an account receivable is recorded by the agency's shared service payroll provider, the Interior Business Center. Debts are typically recovered through payroll deductions in subsequent pay periods.

Out-of-service debt can arise when an employee leaves the agency and owes funds back to EPA following separation. EPA establishes the debt and tracks recovery status. A small portion of EPA's out-of-service debt was uncollectible as a result of the separating employee retiring on disability. For both in-service and out-of-service debt, recoveries are actively pursued by following established debt collection procedures.

E) Purchase Cards

The purchase card program is not susceptible to significant improper payments, and no improper payments were identified in FY 2024.

F) Travel

Travel is not susceptible to significant improper payments. For travel, improper payments can include ineligible expenses and insufficient or missing supporting documentation. When an overpayment is identified for travel, the agency establishes a receivable, and existing procedures are followed to ensure prompt recovery.

III. Agency Improvement of Payment Accuracy with the Do Not Pay Initiative

PIIA requires federal agencies to implement the Do Not Pay (DNP) initiative, a government-wide solution designed to prevent payment errors and detect waste, fraud, and abuse in programs administered by the federal government. EPA's payments are screened by Treasury's DNP working system to detect improper payments. Treasury analyzes each agency's payments and provides a monthly report itemizing any payments that were made to potentially ineligible recipients. These potential matches are identified when the name of an agency's payee matches the name of an individual or entity listed in federal data sources contained in Treasury's DNP working system.

In FY 2024, Treasury screened EPA payments through the following DNP data sources on a post-payment basis: the Social Security Administration's Death Master File and the General Services Administration's System for Award Management Exclusion List. Through September 30, 2024, approximately \$1.69 billion of EPA payments were screened, and no improper payments were identified.

In addition, 58,781 EPA payments totaling \$4.2 billion were made via the Automated Standard Application for Payments (ASAP), and ASAP's grantee listing is monitored by Treasury. Finally, agency payments are routinely monitored by the Treasury Offset Program, which offsets federal payments to recipients with delinquent federal nontax debt. These different tools provide a valuable external check of the agency's payment integrity.

CIVIL MONETARY PENALTY ADJUSTMENT FOR INFLATION

Report on Inflationary Adjustments to Civil Monetary Penalties

Pursuant to the [Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015](#), EPA and other federal agencies are required to adjust their maximum and minimum statutory civil penalty amounts by January 15 each year to account for inflation. In accordance with this requirement, EPA promulgated the [Civil Monetary Penalty Inflation Adjustment Rule](#) (Rule) on December 27, 2023, which became effective the same day. For details on this Rule, see 88 Fed. Reg. 89309-89313, codified in Table 1 of [40 CFR § 19.4](#). EPA will amend 40 CFR § 19.4 by January 15, 2025, to reflect changes in inflation since the last adjustment.

Current Statutory Maximum/Minimum Civil Penalties under EPA's Civil Monetary Penalty Inflation Adjustment Rule

U.S. Code Citation	Environmental statute	Year statutory penalty authority was enacted	Latest year of adjustment (via statute or regulation)	Statutory civil monetary penalties for violations that occur or occurred after November 2, 2015, where penalties are assessed on or after December 27, 2023

BIENNIAL REVIEW OF USER FEES

The Chief Financial Officer Act and OMB Circular No. A-25 Revised directs agencies to biennially review fees, royalties, rents, and other charges assessed for services and goods they provide and to recommend updates to those fee charges to reflect the cost of providing those services. OMB Circular, No. A-25 Revised further provides guidance to review other agency programs and determine whether fees be initiated for government services or goods for which fees are not currently charged.

EPA administers eight fee programs and conducts reviews at least biennially. The agency's fees are funded to recover the full or partial cost of the program's authorized activities. The bold-highlighted programs are required by statute or regulation to recover the full cost of the goods and services provided.

Agency Fee Programs	
Pesticide Registration Service Fees	Pesticide Maintenance Fees
Motor Vehicle and Engine Compliance Fee Program	Water Infrastructure Finance and Innovation Act Fees
e-Manifest System Fees	Toxic Substance Control Act Administration Service Fees
Lead-Based Paint Fee Program	Clean Air Part 71 Permit Fees

Fees established under the Toxic Substance Control Act, section 26(b), requires EPA to review and, if necessary, adjust the fees every three years, after consultation with parties potentially subject to fees.

The Agency reviewed the fees established in the 2018 TSCA Fee Rule and determined it necessary to adjust the fees due to changes in the program cost. On January 11, 2021, EPA proposed revisions to the TSCA fees rule, and on November 16, 2022, issued a supplemental notice to that proposal. The changes ensure the collected fees provide the Agency with up to 25% of the costs of TSCA activities. The final fees rule was published in February 2024 and the new fees took effect on April 22, 2024.

Also, the Agency conducted a review to determine whether fees should be assessed for programs that review all other programs to determine whether fees should be assessed for government services that provide special benefits. The review looked at a subset of the total universe of potential fee programs identified as part of the FY 2024 fee review process, we focused on the following programs: Compliance Assistance Services; Special, Environmental, or Voluntary RCRA Assessments; IT Support to External Entities for FOIA and IT Support for External Entities- Application / Service Fees.

As part of the FY 2024 user fee review, the EPA will be working with OMB to determine if exceptions are justified for each program that was reviewed. For some programs, the cost of collecting fees can often represent an unduly large part of the activity or other conditions may exist that would cause the implementation of a fee to be inappropriate.

The Agency is exploring options and opportunities for programs where collecting fees may be appropriate, for which the EPA is not recommending an exception to OMB. In the FY 2025 President's Budget, the Agency highlighted the Pesticide Registration Improvement Act of 2022 ("PRIA-5") which reauthorizes fee collection authorities through FY 2027 and expands the range of activities that the EPA can fund with existing pesticide registration and maintenance fees.

GRANTS PROGRAM

The EPA has tracked assistance agreement closeout performance since its first five-year Grants Management Plan was issued in 2002. The EPA reports in its Annual Financial Report on two grants closeout performance measures: 90% closure of recently expired grants and 99% closure of grants that expired in earlier years. The agency has consistently exceeded or met these targets or, in limited instances, missed them by a few percentage points. Below is a summary table showing the total number of federal grant and cooperative agreement awards and balances for which closeout has not yet occurred, but for which the period of performance has elapsed by more than two years.

CATEGORY	2-3 Years FY21 22	>3 5 Years FY19 20	>5 Years Before FY18
Number of Grants/Cooperative Agreements with Zero Dollar Balances	185	22	8
Number of Grants/Cooperative Agreements with Undisbursed Balances	18	12	11
Total Amount of Undisbursed Balances	\$ 9,456,632	\$1,816,846	\$3,050,486

The EPA has made great progress in reducing the amount of undisbursed balances on expired grants as well as reducing the number of older grants that have expired but have not been closed out. The timely closeout of grants can be delayed for a variety of reasons, but generally these include open audits with unresolved findings and where recipient appeal rights have not yet been exhausted, or lack of required documentation from the recipient. The EPA monitors unliquidated obligations (ULOs) on expired assistance agreements as well, requiring an annual review of ULOs to determine if funds are no longer needed and can be deobligated and the assistance agreement closed out.

CLIMATE-RELATED FINANCIAL RISK

Climate Adaptation Plan

In 2024, EPA released its 2024-2027 Climate Adaptation Plan [Climate Adaptation Plans | US EPA](#) (in response to Executive Order (E.O.) 14008: *Tackling the Climate Crisis at Home and Abroad*, and draft “Instructions for the 2024-2027 Federal Climate Adaptation Plans” issued by the White House Council on Environmental Quality issued in September 2023. EPA’s Climate Adaptation Plan accelerates and focuses attention on five priority actions the Agency will take over the next four years to increase human and ecosystem resilience as the climate changes and disruptive impacts increase:

1. Integrate climate adaptation into EPA programs, policies, rulemaking processes, and enforcement activities.
2. Consult and partner with states, tribes, territories, local governments, environmental justice organizations, community groups, businesses, and other federal agencies to strengthen adaptive capacity and increase the resilience of the nation, with a particular focus on advancing environmental justice.
3. Implement measures to protect the agency’s workforce, facilities, critical infrastructure, supply chains, and procurement processes from the risks posed by climate change.
4. Measure and evaluate performance.
5. Identify and address climate adaptation science needs.

In 2022, the EPA Program and Regional Offices developed Climate Adaption Implementation Plans (<https://www.epa.gov/climate-adaptation/climate-adaptation-plans#implementation>). Addenda to the plans were produced in Fiscal Year 2024. Additional information about EPA’s work on climate adaptation is located on the EPA Climate Adaptation Website: [EPA.gov/Climate-Adaptation](https://www.epa.gov/climate-adaptation).

A close-up photograph of several pink cherry blossoms in full bloom. The flowers have five petals each, with a delicate pink color and prominent yellow stamens in the center. The background is a soft, out-of-focus blur of more blossoms and green leaves, creating a serene and natural atmosphere.
