

RFI from EPA's GHGRP Re: Methane Quantification Technologies

As a service to our Partners and other interested parties, the U.S. Environmental Protection Agency (EPA)'s Landfill Methane Outreach Program (LMOP) is sharing information regarding a request for information (RFI) about **methane quantification technologies at oil and gas sites and municipal solid waste (MSW) landfills**. Please note that LMOP is not involved with this RFI.

EPA invites public comment on the **potential for expanded use of advanced and emerging technologies for methane emissions quantification** in the Agency's Greenhouse Gas Reporting Program (GHGRP). EPA intends to use the feedback received in response to this RFI to consider whether it is appropriate to undertake **further rulemaking addressing the use of advanced measurement technologies for petroleum and natural gas systems and MSW landfills** beyond the role provided for these technologies in existing rules.

View the *RFI on Use of Advanced and Emerging Technologies for Quantification of Annual Facility Methane Emissions Under the Greenhouse Gas Reporting Program* at https://www.epa.gov/system/files/documents/2024-08/ghgrp_rfi_2024.pdf.

Responses to the RFI are due **60 days after the date of publication in the *Federal Register***. EPA appreciates your interest in EPA emissions data programs.

To request removal from this email list, please reply to this message. For further information or questions about LMOP, please do not reply to this email message, but rather visit the [LMOP website](#). Thank you.
