Office of Resource Conservation and Recovery

The CETA Program

The Community Engagement and Technical Assistance (CETA) Program helps communities address their environmental and health concerns related to RCRA waste management activities nationwide.

Overview of the CETA program

CETA Program Objectives:

Provide communities with tools and resources,
Promote collaboration between communities and the EPA,
Build capacity for addressing environmental issues at the local level.

Eligibility Criteria for CETA Program Participants:

Community or faith-based organizations and their partners,
Sovereign Nations, Tribes or tribal organizations,
Community representatives including local officials, concerned residents,
EPA regional offices or state organizations (on behalf of communities).

How the Program Works:

Provides access to support, resources, and information through a neutral third party.

Types of services provided by CETA

Community Engagement Workshops

Translation or Interpretation Services

Review and Interpretation of RCRA Decision Documents

How Can My Community Request Assistance?

Eligible entities can request assistance by completing and submitting the CETA Assistance Request Form:

<https://www.epa.gov/rcra/forms/ceta-program>.

Prioritizing communities with multiple stressors.

What is RCRA and how could it potentially impact my community?

RCRA is the federal regulation that gives EPA the authority to protect human health and the environment from the potentially harmful effects of improper management and disposal of waste. More than 2.96 billion tons of solid, industrial, and hazardous waste a year are subject to the RCRA regulations. Approximately 5.3 million people live within one mile of a permitted hazardous waste facility where hazardous waste is stored, treated, or disposed of. Approximately 118 million people live within three miles of a RCRA corrective action site (roughly 36% of the U.S. population), including 37% of all children in the U.S. under the age of five.

What happens after I submit an Assistance Request Form?

Upon receipt of your Assistance Request Form, EPA will:

1. Confirm receipt of the form.
2. Conduct an initial review of the request. EPA may contact you for additional information.
3. Evaluate whether requests fall within the scope and limitations of the CETA program.
4. Approve the request or redirect you to other appropriate assistance.
5. If approved for the CETA program, EPA will initiate a preliminary discussion with you and our contractor to confirm the services that are being provided.

EPA's CETA Program assists communities with addressing their concerns about environmental and health issues related to waste management by providing access to support, resources, and information through a neutral third party. These services empower communities to develop informed opinions when participating in environmental decision-making about their waste-related concerns. CETA services also facilitate effective and active participation in efforts to improve public health.

What is the CETA Program and how can it assist with addressing my community's concerns?

EPA's CETA Program, through contractor support, can assist your community by supporting opportunities for community engagement and technical assistance; facilitating transparent and open communication; and providing the information and tools to make informed decisions. CETA also empowers communities to make independent judgements about environmental matters that impact their lives.

What types of services can CETA provide to my community?

- Assisting with coordination and support for new and established community-based organizations.
- Providing translation or interpretation services for documents and meetings.
- Supporting community engagement workshops.
- Reviewing and interpretation of RCRA decision documents.
- Reviewing and interpreting scientific data and other technical reports.
- Providing information about basic science, environmental policy, and related resources.
- Assisting communities with understanding health risks and impacts.
- Developing a social media presence to assist with creating plain language messages and amplifying community voices.
- Identifying existing studies relevant to community concerns.

A community town hall discussion.

- Establishing a list of interested parties and contacts based on a particular issue.
- Helping the community engage in the planning and implementation process.
- Enhancing community and interested party involvement.
- Preparing outreach materials (e.g., fact sheets, brochures, newsletters, and reports).
- Presenting educational programs on RCRA issues (e.g., safety and sustainability for individuals and families at home and in the community).
- Developing and delivering virtual presentation slides that include research and documentation on RCRA issues to support community meetings.
- Supporting community meetings by providing subject matter experts to speak on topics identified by the community or by providing meeting facilitation.
- Assisting with gathering community input to ensure all questions/concerns are identified so that community leaders can seek answers and share information.

EPA's "Journey to Justice" tour in Houston, Texas.

Who is eligible for assistance through CETA?

- Community-based organizations.
- Partnerships of community-based organizations.
- Faith-based organizations.
- Tribes or tribal organizations.
- Community representatives, including local officials.
- Concerned residents.
- EPA regional offices (on behalf of communities).
- State organizations (on behalf of communities).

How can my community request assistance?

Eligible entities can request assistance by completing and submitting the CETA Assistance Request Form: www.epa.gov/rcra/forms/ceta-program.

Technical support capacity and resources are limited, so the CETA program may not be able to fulfill all assistance requests. EPA will prioritize disadvantaged and historically excluded communities. In cases that are beyond the scope or capacity of CETA, the program will attempt to redirect the request to other appropriate assistance vehicles.

CETA in Action

Project Title: St. Croix Community Technical Assistance

Project Goal: To provide technical assistance to address community concerns related to the RCRA corrective action permit renewal and CERCLA National Priorities List processes.

Types of CETA Services:

- Support for community engagement opportunities through public meetings:
 - Allow community members to express their environmental concerns.
 - Understand the RCRA Permitting and CERCLA National Priorities List processes.
 - Prepare for the public comment period.
- Provide translation and interpretation of RCRA-related documents in Spanish and Creole.

Thank You!
