

My name is [REDACTED] I am the President of Summer Toxic a  
environmentalist in Cincinnati Ohio, who have learned and study a  
community in Cincinnati Ohio zip-code 45232 Winton Hills. To  
whom this may concern, I am writing a request for my  
community. This is a low-income project and the citizens are  
surrounded by large landfills consisted of dead animals -garbage -  
waste is health hazard. Large Chemical plants consisting of  
chemicals - toxics -particulate matter -methane -Smog and asbestos  
All this in one area makes this community a health hazard.  
There has been nothing but health and death problems in this  
environment since the early 1960,s Mothers, childrens, babies and  
senior citizens have been affected. There is majority of black  
people. This is a racial issue and the citizens are still suffering. In  
resolving this issue a request for relocation -compensation due to  
the suffering and pain, the hardship and problems that have been  
ignored. A investigation is needed. The community has the right to  
speak on their family, friends and loved ones that have been  
affected. This is a hardship problem and needs to be dealt with. A  
two day awareness program concerning environmental justice and  
in case of a emergency, different health and death affects. I would  
like to request the U.C - Xavier - City Manager +councils - EPA  
Local and Federal - OKI - NIEHS - ATSDR  
approve and sponsor a environmental awareness  
Town meeting for 2X days in Cincinnati Ohio.  
date-time last week of May, 2010
