Re: Notification of Receipt of Administrative Complaint

Dear **(b) (6) Privacy**

This is to notify you that the U.S. Environmental Protection Agency (EPA) Office of Civil Rights (OCR) received your complaint on June 24, 2015, alleging that the West Virginia Department of Environmental Protection Office of Abandoned Mine Lands and Reclamation, Kinzer Drilling, LLC, and Energy Corporation of America violated Title VI of the Civil Rights Act of 1964, as amended (Title VI), 42 United States Code (U.S.C.) §§ 2000d *et seq.*, and the EPA's nondiscrimination regulations found at 40 Code of Federal Regulations (C.F.R.) Part 7.

The OCR is responsible for processing and investigating complaints alleging discrimination by programs or activities that receive financial assistance from the EPA. Pursuant to the EPA's nondiscrimination regulations, the OCR will review the complaint for acceptance, rejection, or referral to another Federal agency. See 40 C.F.R. § 7.120(d)(1). Once this jurisdictional review is completed, the OCR will notify you about its decision.

In the interim, if you have any questions about the status of this complaint, please contact Landzy Theodore of my staff at (202) 564-2714 or via e-mail at Theodore.Landzy@epa.gov.

Sincerely,

(b) (6) Privacy

Williamson, W.Va. 25661

Dear **(b) (6) Privacy**

I received your second letter this week regarding your property in Mingo County, West Virginia and as a result, I have further investigated your claims. What I have found reaffirms that your complaints are not with Energy Corporation of America (ECA).

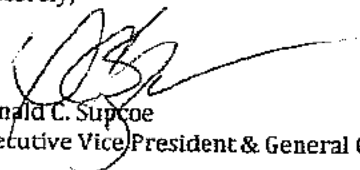

- First off, I want you to understand that we have never used Kinzer Drilling as a contractor in our business. Therefore, if any damage resulted from their operations, it was not for business conducted for ECA.
- Secondly, we have not drilled or blasted in Mingo County in decades.
- Thirdly, as you can see from the enclosed map, our closest wells (noted with a blue asterisk*) are several miles from your property. And again, we have not drilled at any of these sites since the 1980s.

It is also important to note: according to Page 1 of the *West Virginia Bureau of Environmental Protection Blasting Complaint Investigation* report you provided, "**(b) (6) Privacy** felt she had damage due to blasting from the above permit, which has not blasted since 5/30/12. After explaining this to her she now feels her damage is due to underground mining from another company. She has water damage and mold damage to her home which I explained is not caused by blasting. She feels now she has subsidence from Wolfcreek Mining, which may have caused her house to settle and roof to leak." Please note: the above permit referenced was for Consol of Kentucky, Inc. – Southern West Virginia Resources, not ECA. And to reiterate, ECA did not drill or build any natural gas wells in Mingo County during the time frame listed in the report (over the last two to three years).

As the permit was for a different company, ECA has not drilled wells in your area for several decades, the damage was not caused by natural gas development, and ECA has never used Kinzer Drilling in our business, I am at a loss to understand why you are contacting our company about this matter. Again, I am sorry that we cannot be of any assistance in this matter since it is not, in any manner, related to ECA.

I wish you all the best and hope you are able to contact someone who is capable of responding to your complaints.

Sincerely,

Donald C. Supcoe
Executive Vice President & General Counsel

Re: Pre-Blast Survey
Southern West Virginia Resources, LLC
P O Box 76
Naugatuck, WV 25685
Permit O-8-85 IBR #11, structure #NT-47, NT-56

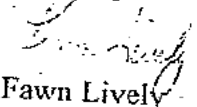

Dear (b) (6) Privacy

Enclosed is a copy of the pre-blast survey that was recently completed for your structure(s). Please keep your copy in a secure file for future reference. Please look over your survey carefully and compare the notes and photographs to your property. If you disagree with anything in the survey, please send your written comments to the Office of Explosives and Blasting. You may also include drawings and photographs. The Office of Explosives and Blasting will keep a copy of your survey in a confidential file along with your written comments, drawings and photographs which will be made a part of the official record.

You are also entitled to a pre-blast survey update any time you remodel your structure(s). If you require an update to your survey in the future, notify the company listed above explaining that you have recently remodeled, and specifically ask for a pre-blast survey update. Please include the coal company name, address, the permit number and the structure number referenced above.

If you have any questions or concerns, please contact me at (304) 926-0499 ext. 1500.

Sincerely,

Fawn Lively

NATURE OF COMPLAINT

Over a period of time, since 2008, blasting has eroded my house and land and everything here. I can't live here anymore. There is black mold in my house. It must be from the dampness of the land, which was eroded from blasting. The steps outside my house are busted and rotted from the dampness. The foundation is rotted and my house is tilted back. All of this is due to the dampness which is so bad because of the blasting around my house. No specific date of blasting

PUBLIC NOTICE OF BLASTING OPERATIONS

Revised 2/02

Notice is hereby given that Consol of Kentucky, Inc., P.O. Drawer L Oakwood, VA 24631, phone number (276) 498-8261, permit number O-8-85 situated in the Harvey District of Mingo County, approximately 1.3 miles northeast of Naugatuck, WV, will be conducting blasting activities in accordance with all State and Federal Laws and as approved by the Department of Environmental Protection.

Blasting activities will occur Monday through Saturday from "**sunrise to sunset**" No blasting shall be conducted on Sunday. Blasting is to commence on August 11, 2010 and continue through August 11, 2011.

Ten minutes prior to and immediately after each blast, all access to the specific area will be safeguarded from unauthorized entry. The warning signal prior to each blast shall be from an air horn audible to at least one half mile from the blast. The warning will be given three (3) minutes prior to detonation and will consist of three (3) short blasts of five (5) seconds duration with five (5) seconds between each blast. The all-clear signal shall be one (1) long blast from an air horn of twenty (20) seconds duration.

Blasting shall be conducted in such a way so as to prevent adverse impacts to the public or the environment.

Blasting activities will not be conducted at times other than those announced in the blasting schedule except in the event of an emergency situation where rain, lightening, or other atmospheric conditions, or operator or public safety requires unscheduled detonations.

INVESTIGATION RESULTS CONT.: and the septic tank location. The inspector calibrated a Garmin eTrex Vista HCx global positioning system (GPS) unit, then used it to record the following two locations: (b) (6) Privacy house at foundation's and steps' (b) (6) Privacy; (b) (6) Privacy elevation 678 feet. Quality Natural Gas, L.L.C. well API #47-5901679 (waypoint 005) -- (b) (6) Privacy elevation 951 feet. Inspector Miller walked a gas company road with (b) (6) Privacy to that U.L. taking pictures of both the well and road, which had water bars that direct drainage onto the property with the house -- the Lucas said the gas company had installed a culvert to take drainage to Ajax Branch, where he showed the inspector where the aforementioned bank erosion was, near his trailer -- no water was noted in either yard, and the stream was not flowing at a high rate. Mr. Miller learned the D.E.P.'s Office of Explosives and Blasting had already checked into the complaint, and the agency's Division of Abandoned Mine Lands had also been notified of the complaint -- he later that day discussed the situation with Consol of Kentucky, Inc. Engineer Jason Swann -- both UO-646 Revision #8 and U-57-85 Revision #8, which are pending D.E.P. approval, have certified maps showing interconnected underground Coalburg seam works. UO-646 Revision #8 map indicated the closest currently-permitted works were of Consol of Kentucky Inc.'s UO-650 underground mine in that seam, but they got no closer than the next hollow to the west, which is shown on the most recent UO-650 certified mine development map of its works -- both maps also showed pre-1977, or abandoned, Coalburg works in Ajax Hollow, and as already noted, the A.M.L. Division was aware of the complaint. . . further, Miller researched the D.E.P.'s GIS system to find out the pre-1977 mining shown on the maps in Ajax Hollow was done by a company named Maddy (northeast section), and by Himler Coal Company (southwest section), respectively -- D.E.P.'s Abandoned Mine Lands Division has jurisdiction over such pre-1977 mining. This complaint is being terminated for D.E.P. Division of Mining and Reclamation purposes -- however, due to (b) (6) Privacy's descriptions of the water and blasting problems as having arisen when gas wells were constructed in Ajax Hollow, this complaint is being forwarded to the D.E.P.'s Oil and Gas Division for their investigation. Copies of this report, pictures taken by Inspector Miller, and copies of those certified mine works maps pre-1977 mining in Ajax Hollow labeled by Miller, are being provided to (b) (6) Privacy.

David Miller
10-10-2014

I, the undersigned, do hereby certify that this map is correct, and shows to the best of my knowledge and belief all the information required by the West Virginia surface mining laws.

Re: Notification of citizen complaint

(b) (6) Privacy

The Office of Oil and Gas received a complaint from the Office of Explosives and Blasting concerning your property and the possibility of oil and gas operations causing damage to your property. An investigation of the occurrence has been performed with the following information being provided:

Damage to your property was Not considered the fault of oil and gas operations. Please see the attached inspector's comments from the site visit.

I am also enclosing your original material, and the inspector's notes from the Office of Explosives and Blasting. If I may be of further assistance to you, please feel free to contact me at 304-926-0499, ext. 1036 or email me at Lonnies.R.Mills@wv.gov

Sincerely,

Lonnie Mills

Quality Natural Gas 47-59-01679

- a. Have they been contacted? ☒ Yes ☐ No.
b. County: Mingo

5. What are the specific directions to the site? Last house up Ajax Hollow

6. Complaint in detail: Blasting from well pad may have damaged house. Septic tank started getting water in it after well pad construction. Surface runoff from well pad and access road causing erosion of property.

7. Does this complaint involve dust issues? ☐ Yes ☒ No.
☐ Well Pad ☒ Access Road ☐ Public Road ☐ Other _____

8. Inspector Assigned: Jeremy James

9. Inspectors remarks:

10-21-2014 Met with (b) (6) Privacy to inspect site. She showed me black mold on ceiling of house. (b) (6) Privacy believes this is caused by excess surface water, but it appears to be coming from a leaking roof. See attached photos.

No signs of blasting on access road or well pad. I spoke with company rep and he stated that no blasting occurred during construction and they used a hammer on an excavator to cut the rock for the road and location. Water breaks on lease road show signs of bypass. They need built up to keep water from bypassing to the next water break to reduce load on existing culvert at residence.

10-23-2014 Rick Campbell accompany me to site, he advised to have stone added to existing water breaks but not to do any dirtwork because the road was settled and well vegetated.

PUBLIC NOTICE OF BLASTING OPERATIONS

Revised 2/02

Notice is hereby given that Consol of Kentucky, Inc., P.O. Drawer L Oakwood, VA 24631, phone number (276) 498-8261, permit number O-8-85 situated in the Harvey District of Mingo County, approximately 1.3 miles northeast of Naugatuck, WV, will be conducting blasting activities in accordance with all State and Federal Laws and as approved by the Department of Environmental Protection.

Blasting activities will occur Monday through Saturday from "**sunrise to sunset**" No blasting shall be conducted on Sunday. Blasting is to commence on August 11, 2010 and continue through August 11, 2011.

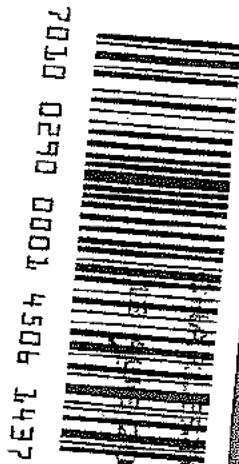

Ten minutes prior to and immediately after each blast, all access to the specific area will be safeguarded from unauthorized entry. The warning signal prior to each blast shall be from an air horn audible to at least one half mile from the blast. The warning will be given three (3) minutes prior to detonation and will consist of three (3) short blasts of five (5) seconds duration with five (5) seconds between each blast. The all-clear signal shall be one (1) long blast from an air horn of twenty (20) seconds duration.

Blasting shall be conducted in such a way so as to prevent adverse impacts to the public or the environment.

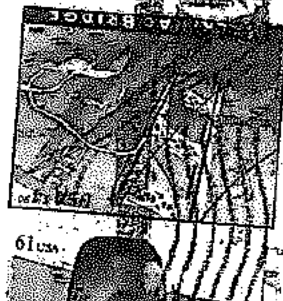

Blasting activities will not be conducted at times other than those announced in the blasting schedule except in the event of an emergency situation where rain, lightening, or other atmospheric conditions, or operator or public safety requires unscheduled detonations.

INVESTIGATION RESULTS: Inspector Miller spoke to (b) (6) Privacy on the phone that day at 1:21 p.m. -- she said (b) (6) Privacy who lives in a trailer next door, would be able to be present at the house, and the inspector met (b) (6) Privacy there at 2:16 p.m. He said water problems began at the house when two gas wells were built 2-or-3 years ago -- he also said he thought blasting, which he thought was associated with gas well construction, caused the house's damage. In addition, (b) (6) Privacy said the stream in Ajax Hollow started flowing at higher volumes at about the same time as the gas wells were installed -- he said bank erosion occurs in heavy rains -- plus he said his mother's septic tank started getting water in it, again at a time coinciding with the gas well building. The inspector took pictures of cracks in the house foundation, which (b) (6) Privacy said had widened in adjacent concrete steps, (CONTINUED ON MR-35C)

INVESTIGATION RESULTS CONT.: and the septic tank location. The inspector calibrated a Garmin eTrex Vista HCx global positioning system (GPS) unit, then used it to record the following two locations: (b) (6) Privacy house at foundation's and steps' cracks (waypoint 062) -- (b) (6) Privacy (b) (6) Privacy elevation 678 feet. Quality Natural Gas well API #47-5901679 (waypoint 063) -- (b) (6) Privacy elevation 951 feet. Inspector Miller walked a gas company road with (b) (6) Privacy to that well, taking pictures of both the well and road, which had water bars that direct drainage onto the property with the house -- Dale Lucas and the gas company had installed a culvert to take drainage to Ajax Branch, where he showed the inspector where the aforementioned bank erosion was, near his trailer -- no water was noted in either yard, and the stream was not flowing at a high rate. Mr. Miller learned the D.E.P.'s Office of Explosives and Blasting had already checked into the complaint, and the agency's Division of Abandoned Mine Lands had also been notified of the complaint -- he later that day discussed the situation with Consol of Kentucky, Inc. Engineer Jason Swann -- both UO-646 Revision #8 and U-57-85 Revision #15, which are pending D.E.P. approval, have certified maps showing interconnected underground Coalburg seam works. The UO-646 Revision #8 map indicated the closest currently-permitted works were of Consol of Kentucky Inc.'s UO-650 underground mine in that seam, but they got no closer than the next hollow to the west, which is shown on the most recent UO-650 certified mine development map of its works -- both maps also showed pre-1977, or abandoned, Coalburg works in Ajax Hollow, and as already noted, the A.M.L. Division was aware of the complaint -- further, Miller researched the D.E.P.'s ArcGIS system to find out the pre-1977 mining shown on the maps in Ajax Hollow was done by a company named Maddy Mas (northeast section), and by Himler Coal Company (southwest section), respectively -- D.E.P.'s Abandoned Mine Lands Division has jurisdiction over such pre-1977 mining. This complaint is being terminated for D.E.P. Division of Mining and Reclamation purposes -- however, due to Dale Lucas's descriptions of the water and blasting problems as having arisen when the gas wells were constructed in Ajax Hollow, this complaint is being forwarded to the D.E.P.'s Oil and Gas Division for further investigation. Copies of this report, pictures taken by Inspector Miller, and copies of those certified mine works maps with pre-1977 mining in Ajax Hollow labeled by Miller, are being provided to (b) (6) Privacy.

Re: Request for Clarification

Dear (b) (6) Privacy

Thank you for contacting the U.S. Environmental Protection Agency (EPA), Office of Civil Rights (OCR). We understand that you have some concerns about damage to your home and property, and that you have had some difficulty identifying who is responsible for that damage. In your complaint letter, you indicated that you had contacted the West Virginia Department of Environmental Protection, Office of Abandoned Mine Lands and Reclamation; Kinzer Drilling, LLC; and Energy Corporation of America regarding your property and their involvement in this matter. We would like to assist you. However, we need more information to correctly determine if the OCR can help you.

The OCR is responsible for processing and investigating complaints that allege discrimination by programs and activities receiving financial assistance from EPA. We enforce several civil rights laws, which, together, prohibit discrimination on the basis of: race, color, or national origin (including on the basis of limited-English proficiency); sex; disability; and age by applicants for and recipients of federal financial assistance from EPA.

Pursuant to the EPA's nondiscrimination administrative regulations, the OCR conducts a preliminary review of administrative complaints for acceptance, rejection, or referral to another agency. See 40 C.F.R. § 7.120(d)(1). To be accepted for investigation, a complaint must meet the jurisdictional requirements described in the EPA's nondiscrimination regulations. First, it must be in writing. See 40 C.F.R. § 7.120(b)(1). Second, it must allege discriminatory acts that would violate the EPA's nondiscrimination regulations, such as an intentionally discriminatory act or a policy with discriminatory effects based on race, color, national origin, sex, age or disability. *Id.* Third, it must be received within 180 calendar days of the alleged discriminatory act. See 40 C.F.R. § 7.120(b)(2). Finally, it must be filed against an applicant for, or a recipient of, EPA financial assistance that committed the alleged discriminatory act. 40 C.F.R. § 7.15. (A copy of EPA's nondiscrimination regulations is enclosed for your convenience).

Your complaint does not provide the OCR with enough information to complete the review needed to determine whether the OCR can process your complaint. To assist us in our review of the complaint, please provide us with the following information within fifteen (15) calendar days of your receipt of this letter:
