

Good Neighbor Plan (GNP) Powering the Great American Comeback Fact Sheet	
Action	<ul style="list-style-type: none"> Reconsideration of “Federal ‘Good Neighbor Plan’ for the 2015 Ozone National Ambient Air Quality Standards” 88 FR 36654 (June 5, 2023) and Federal “Good Neighbor Plan” for the “2015 Ozone National Ambient Air Quality Standards; Notice on Remand of the Record of the Good Neighbor Plan to Respond to Certain Comments” (89 FR 99105; December 10, 2024).
Reasons for Action	<ul style="list-style-type: none"> Concerns have been raised that the GNP is burdensome and constrains electric energy production, oil and gas companies, and industrial manufacturing. We are concerned it unduly burdens some states with questionable impacts on the air quality in other states. Unleash the development of domestic energy resources and manufacturing. Respect state choices in cooperative federalism. Alleviate significant burden on Electric Power Generation Companies, Industrial Pipeline Transportation of Natural Gas, Cement and Concrete Product Manufacturing, Iron and Steel Mills and Ferroalloy Manufacturing, Glass and Glass Product Manufacturing, Metal Ore Mining, Basic Chemical Manufacturing, Petroleum and Coal Products Manufacturing, Pulp, Paper, and Paperboard Mills, and Solid Waste Combustors and Incinerators.
Important facts on regulation/program	<ul style="list-style-type: none"> Costs estimated at \$14 billion over the next twenty years, including for manufacturers who will be the backbone of the great American comeback, with at least \$910 million in costs a year. Pulls critical US manufacturing sectors—like cement, iron and steel, paper, and glass— into a complex program that has been tied up in stop and start litigation for years. Imposes burdensome paperwork on states.
