

MAJOR SOURCE OPERATING PERMIT

CONTINENTAL

AEROSPACE

PERMITTEE:

TECHNOLOGIES, INC.

FACILITY NAME:

FACILITY NO.:

503-0002

LOCATION:

MOBILE, ALABAMA

In accordance with and subject to the provisions of the Alabama Air Pollution Control Act of 1971, <u>Ala. Code</u> §§ 22-28-1 to 22-28-23, as amended, the Alabama Environmental Management Act, <u>Ala. Code</u> §§ 22-22A-1 to 22-22A-17, as amended, and rules and regulations adopted there under, and subject further to the conditions set forth in this permit, the Permittee is hereby authorized to construct, install and use the equipment, device or other article described above.

Pursuant to the **Clean Air Act of 1990**, all conditions of this permit are federally enforceable by EPA, the Alabama Department of Environmental Management, and citizens in general. Those provisions which are not required under the **Clean Air Act of 1990** are considered to be state permit provisions and are not federally enforceable by EPA and citizens in general. Those provisions are contained in separate sections of this permit.

law or otherwise, either from one location to another, from one piece of equipment to another, or from one person to another, except as provided in Rule 335-3-1613(1)(a)5. 2. Renewals An application for permit renewal shall be submitted at least six (6) months, but not more than eighteen (18) months, before the date of expiration of this permit. The source for which this permit is issued shall lose its right to operate upon the expiration of this permit unless a timely and complete renewal application has been submitted within the time constraints listed in the previous paragraph. 3. Severability Clause The provisions of this permit are declared to be severable and if any section, paragraph, subparagraph, subdivision, clause, or phrase of this permit shall be adjudged to be invalid or unconstitutional by any court of competent jurisdiction, the judgment shall not affect, impair, or invalidate the remainder of this permit, but shall be confined in its operation to the section, paragraph, subparagraph, subdivision, clause, or phrase of this permit that shall be directly involved in the controversy in which such judgment shall have been rendered. 4. Compliance (a) The permittee shall comply with all conditions of ADEM Admin. Code 335-3. Noncompliance with this permit will constitute a violation of the Clean Air Act of 1990 and ADEM Admin. Code 335-3 and may result in an enforcement action; including but not limited to, permit termination, revocation and reissuance, or modification; or denial of a permit renewal application by the permittee. (b) The permittee shall not use as a defense in an enforcement action that maintaining compliance	tions

6.	Property Rights The issuance of this permit does not convey any property rights of any sort, or any exclusive privilege.	Rule 335-3-1605(i)
7.	Submission of Information The permittee must submit to the Department, within 30 days or for such other reasonable time as the Department may set, any information that the Department may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit or to determine compliance with this permit. Upon receiving a specific request, the permittee shall also furnish to the Department copies of records required to be kept by this permit.	Rule 335-3-1605(j)
8.	Economic Incentives, Marketable Permits, and Emissions Trading No permit revision shall be required, under any approved economic incentives, marketable permits, emissions trading and other similar programs or processes for changes that are provided for in this permit.	Rule 335-3-1605(k)
9.	Certification of Truth, Accuracy, and Completeness: Any application form, report, test data, monitoring data, or compliance certification submitted pursuant to this permit shall contain certification by a responsible official of truth, accuracy, and completeness. This certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete.	Rule 335-3-1607(a)
10.	 Inspection and Entry Upon presentation of credentials and other documents as may be required by law, the permittee shall allow authorized representatives of the Alabama Department of Environmental Management and EPA to conduct the following: (a) Enter upon the permittee's premises where a source is located or emissions-related activity is conducted, or where records must be kept pursuant to the conditions of this permit; (b) Review and/or copy, at reasonable times, any records that must be kept pursuant to the conditions of this permit; 	Rule 335-3-1607(b)

Fed	erally	Enforceable Provisos	Regulations
	(c)	Inspect, at reasonable times, this facility's	
	, ,	equipment (including monitoring equipment an	ıd
		air pollution control equipment), practices, or	
		operations regulated or required pursuant to the	nis
		permit;	
	(d)	Sample or monitor, at reasonable times,	
	()	substances or parameters for the purpose of	
		assuring compliance with this permit or other	
		applicable requirements.	
11.	Con	apliance Provisions	
	(a)	The permittee shall continue to comply with the	e Rule 335-3-1607(c
	(ω)	applicable requirements with which the compar	1
		has certified that it is already in compliance.	,
	(b)	The permittee shall comply in a timely manner	
	(D)	with applicable requirements that become	
		effective during the term of this permit.	
12.	C.~	apliance Certification	
14.		mpliance certification shall be submitted annual	ly Rule 335-3-1607(6
		· •	•
		in 60 days of the anniversary date of issuance of	
		permit.	
	(a)	The compliance certification shall include the	
		following:	
		(1) The identification of each term or condition	on
		of this permit that is the basis of the	
		certification;	
		(2) The compliance status;	
		(3) The method(s) used for determining the	
		compliance status of the source, current	y `
		and over the reporting period consistent	
		with Rule 335-3-1605(c) (Monitoring an	.d
		Recordkeeping Requirements);	
		(4) Whether compliance has been continuou	s
		or intermittent;	1
		(5) Such other facts as the Department may	
		require to determine the compliance stat	us
		of the source;	
	(b)	The compliance certification shall be submitted	l
		to:	
	Alaba	ma Department of Environmental Management	
		Air Division	
		P.O. Box 301463	
		Montgomery, AL 36130-1463

13.		ening for Cause				
		er any of the following circumstances, this permit	Rule 335-3-1613(5)			
		be reopened prior to the expiration of the permit:				
	(a)	Additional applicable requirements under the				
		Clean Air Act of 1990 become applicable to the				
		permittee with a remaining permit term of three				
		(3) or more years. Such a reopening shall be				
		completed not later than eighteen (18) months				
		after promulgation of the applicable requirement.	`			
		No such reopening is required if the effective date				
		of the requirement is later than the date on				
	(In)	which this permit is due to expire.				
	(b)	Additional requirements (including excess				
		emissions requirements) become applicable to an				
		affected source under the acid rain program. Upon approval by the Administrator, excess				
		emissions offset plans shall be deemed to be				
		incorporated into this permit.				
	(c)	The Department or EPA determines that this				
	(0)	permit contains a material mistake or that				
		inaccurate statements were made in establishing				
		the emissions standards or other terms or				
		conditions of this permit.				
	(d)	The Administrator or the Department determines				
	()	that this permit must be revised or revoked to				
		assure compliance with the applicable				
		requirements.				
14.	<u>Addi</u>	tional Rules and Regulations				
	This	permit is issued on the basis of Rules and	§22-28-16(d), Code of			
	Regu	lations existing on the date of issuance. In the	Alabama 1975, as			
	event	t additional Rules and Regulations are adopted, it	amended			
		be the permit holder's responsibility to comply				
		such rules.				
15.	_	pment Maintenance or Breakdown				
	(a)	In the case of shutdown of air pollution control	Rule 335-3-107(1),			
		equipment (which operates pursuant to any	(2)			
		permit issued by the Director) for necessary				
		scheduled maintenance, the intent to shut down				
		such equipment shall be reported to the Director	•			
		at least twenty-four (24) hours prior to the				
		planned shutdown, unless such shutdown is				
		accompanied by the shutdown of the source				
		which such equipment is intended to control.				
		Such prior notice shall include, but is not limited to the following:				
•		(1) Identification of the specific facility to be				
		(1) Identification of the specific facility to be	1

-			taken out of service as well as its location	
			and permit number;	
		(2)	The expected length of time that the air	
			pollution control equipment will be out of	
			service;	
		(3)	The nature and quantity of emissions of air	
			contaminants likely to occur during the	
			shutdown period;	
		(4)	Measures such as the use of off-shift labor	
			and equipment that will be taken to	
			minimize the length of the shutdown	
			period;	
		(5)	The reasons that it would be impossible or	
			impractical to shut down the source	
			operation during the maintenance period.	
	(b)		e event that there is a breakdown of	
			oment or upset of process in such a manner	
			cause, or is expected to cause, increased	
			sions of air contaminants which are above	
		_	pplicable standard, the person responsible	
			uch equipment shall notify the Director	
			in 24 hours or the next working day and	
		-	ide a statement giving all pertinent facts,	
			iding the estimated duration of the	
			kdown. The Director shall be notified when	
4 ~	0		oreakdown has been corrected.	
16.			of Capture and Control Devices	500 00 16(d) Codo of
		-	ation control devices and capture systems	§22-28-16(d), Code of
			his permit is issued shall be maintained and	Alabama 1975, as
	_		t all times in a manner so as to minimize the	amended
			of air contaminants. Procedures for	
			hat the above equipment is properly operated ained so as to minimize the emission of air	
			nts shall be established.	
17.			s Odors	
11.			t is issued with the condition that, should	 Rule 335-3-108

				•

rede	rally	Enfor	ceable Provisos	Regulations
	(b)	Plan	t or haul roads and grounds will be	
		mair	ntained in the following manner so that dust	
		will 1	not become airborne. A minimum of one, or	
		a co	mbination, of the following methods shall be	
			zed to minimize airborne dust from plant or	
	/		roads and grounds:	
		(1)	By the application of water any time the	
		` '	surface of the road is sufficiently dry to	
			allow the creation of dust emissions by the	
			act of wind or vehicular traffic;	
		(2)	By reducing the speed of vehicular traffic	
		()	to a point below that at which dust	
			emissions are created;	
		(3)	By paving;	
		(4)	By the application of binders to the road	
		` '	surface at any time the road surface is	
			found to allow the creation of dust	
			emissions;	
	Sho	uld on	e, or a combination, of the above methods	
			quately reduce airborne dust from plant or	
		lroads		
		loyed,		
			e above control techniques, so that dust will	
			e airborne. Alternative methods shall be	
	appi	oved 1	by the Department prior to utilization.	
9 .	Add	<u>itions</u>	and Revisions	
	Any	modifi	cations to this source shall comply with the	Rule 335-3-1613
			on procedures in Rules 335-3-1613 or 335-	and .14
		14.	•	
20.	Rec	ordke	eping Requirements	
	(a)	Reco	ords of required monitoring information of the	Rule 335-3-16-
		sour	ce shall include the following:	.05(c)2.
		(1)	The date, place, and time of all sampling or	
			measurements;	
		(2)	The date analyses were performed;	
		(3)	The company or entity that performed the	
			analyses;	
		(4)	The analytical techniques or methods	
			used;	
		(5)	The results of all analyses; and	
		(ნ)	The operating conditions that existed at	
			the time of sampling or measurement.	
	(b)	Rete	ntion of records of all required monitoring	•
		data	and support information of the source for a	
		perio	od of at least 5 years from the date of the	'
		mon	itoring sample, measurement, report, or	
			ication. Support information includes all	

Fede	erally	Enforceable Provisos	Regulations			
		calibration and maintenance records and all				
		original strip-chart recordings for continuous				
		monitoring instrumentation and copies of all				
		reports required by the permit				
21.	Rep	orting Requirements	ľ			
	(a)	Reports to the Department of any required	Rule 335-3-16-			
	()	monitoring shall be submitted at least every 6	.05(c)3.			
		months. All instances of deviations from permit	.00(0)0.			
		requirements must be clearly identified in said				
		reports. All required reports must be certified by				
		a responsible official consistent with Rule 335-3-				
	/1_ \	1604(9).				
	(b)	Deviations from permit requirements shall be				
		reported within 48 hours or 2 working day of				
		such deviations, including those attributable to				
		upset conditions as defined in the permit. The				
		report will include the probable cause of said				
		deviations, and any corrective actions or				
		preventive measures that were taken.				
22.	Emission Testing Requirements					
		n point of emission which requires testing will be	Rule 335-3-105(3)			
		ided with sampling ports, ladders, platforms, and	and Rule 335-3-1-			
	othe	r safety equipment to facilitate testing performed in	.04(1)			
	acco	rdance with procedures established by Part 60 of				
,	Title	40 of the Code of Federal Regulations, as the same				
	may	be amended or revised.				
	The	Air Division must be notified in writing at least 10				
	days	s in advance of all emission tests to be conducted				
	and	submitted as proof of compliance with the				
		artment's air pollution control rules and				
		lations.				
	To a	void problems concerning testing methods and				
		edures, the following shall be included with the				
		ication letter:				
	(1)	The date the test crew is expected to arrive, the	Rule 335-3-104			
	` ,	date and time anticipated of the start of the first				
		run, how many and which sources are to be				
		tested, and the names of the persons and/or				
		testing company that will conduct the tests.				
	(2)	A complete description of each sampling train to				
	(-)	be used, including type of media used in				
		determining gas stream components, type of				
		probe lining, type of filter media, and probe				
		cleaning method and solvent to be used (if test				
		•				
	(2)	procedures require probe cleaning).				
	(3)	A description of the process(es) to be tested				
		including the feed rate, any operating parameters

(e)	Complete inventories of the VOC and HAP containing materials (their usage, VOC content and VHAP content) shall be made at the end of each calendar month.				
(f)	The amount of VOCs emitted per calendar month from the coating and cleaning operations in units of pounds and tons				
(g)	The rolling 12-month total of VOCs emitted from the coating and cleaning operations in units of pounds and tons.				

Operating Permit Summary No. 8.

Emission Unit(s): Polishing/Grinding Operation(s) with Cyclone(s)

/ Dust Collector(s)

Designation No(s). in Application:

Description:

800

(EP-06) Crankshaft Polishing (M476) (Blue

Marlin),

Crankshaft Polish & Debur (L435),

Speed Lathe (L451), Green Balance (H646), and

Snag Grinder (H534) w/ DEFP-4 Dust Collectors

(Blue Marlin)

Type and quantity of fuel used:

Primary:

Secondary:

None None

Pollutant	Regulatory Emission Limit	Applicable Standard
Particulate	$E = 3.59P^{0.62}$	SIP
Opacity	Only one 6-minute average opacity greater than 20% in a 60-minute period; No 6-minute average opacity greater than 40%	SIP

Fede	rally Enforceable Provisos	Regulations
Secti	on 1Applicability	
1.	This unit is subject to the particulate emission rate limits for Process Industries – General Sources.	ADEM Admin. Code R. 335-3-404
2.	This unit is subject to the opacity emission rate limits.	ADEM Admin. Code R. 335-3-401
Secti	on 2Emission Standards	
1.	This unit shall not discharge into the atmosphere particulate matter in any one hour in excess of: $E = 3.59$ ($P^{0.62}$), where P is the process weight in tons/hr	ADEM Admin. Code R. 335-3-404
2.	This unit shall not discharge into the atmosphere more than one six (6) minute average opacity greater than 20 percent (20%) in any 60-minute period. At no time shall this unit discharge a six (6) minute average opacity of greater than 40 percent (40%).	ADEM Admin. Code R. 335-3-401
	on 3Compliance and Performance Test Methods and edures	
1.	Method 5 as defined in 40 CFR 60, Appendix A or other method approved by the Department shall be used in the determination of particulate emissions from the stack.	ADEM Admin. Code R. 335-3-105
2.	Method 9 as defined in 40 CFR 60, Appendix A or other method approved by the Department shall be used in the determination of the opacity of the stack emissions.	ADEM Admin. Code R. 335-3-105
Secti	on 4Emission Monitoring	
1.	The monitoring requirements in this permit shall be as required in Section 5Recordkeeping and Reporting Requirements in addition to those listed below.	
2.	When the process is operating, someone familiar with the process shall perform a visible emissions check during daylight hours on the baghouse at a minimum of once weekly for excess visible emissions as determined by previous observations (when vented to	ADEM Admin. Code R.335-3-1605(c)(1)ii

Fede	rally Enforceable Provisos	Regulations	
	the atmosphere).		
3.	Whenever excess visible emissions are observed, corrective action to minimize emissions shall be taken as soon as practicable, but at least within 24 hours, followed by an additional visible emissions check to confirm that emissions are reduced to normal.	ADEM Admin. Code R.335-3-1605(c)(1)ii	
4.	The baghouse(s) shall be inspected for proper operation and cleaned at least annually and whenever excess visible emissions are observed.		
Section	on 5Recordkeeping and Reporting Requirements		
1.	A logbook of the weekly visible observations required in the Emission Monitoring Section shall be retained for at least five years and be available for inspection upon request. Each entry shall include the date, time, result, and identification of the observer. This logbook should also include the nature and date of any maintenance actions including those taken to correct excess opacity episodes.	ADEM Admin. Code R. 335-3-104

2.	This unit is subject to the opacity emission rate limits.	ADEM Admin. Code R. 335-3-401
3.	This unit is subject to 40 CFR Part 63 Subpart WWWWWW.	40 CFR Part 63 Subpart WWWWWW
Secti	ion 2Emission Standards	
1.	This unit shall not discharge into the atmosphere particulate matter in any one hour in excess of: $E = 3.59$ ($P^{0.62}$), where P is the process weight in tons/hr	ADEM Admin. Code R. 335-3-404
2.	This unit shall not discharge into the atmosphere more than one six (6) minute average opacity greater than 20 percent (20%) in any 60-minute period. At no time shall this unit discharge a six (6) minute average opacity of greater than 40 percent (40%).	ADEM Admin. Code R. 335-3-401
3.	Conduct Best Management Practices that include:	40 CFR Part 63
	(a) Minimize bath agitation when removing any parts processed in the tank except when necessary to meet part quality requirements.	Subpart WWWWWW
	(b) Maximize the draining of bath solution back into the tank by extending drip time when removing parts from the tank.	
	(c) Optimize the design of barrels, racks and parts to minimize dragout of bath solution.	
	(d) Use tank covers whenever possible, if already owned and available at the facility.	
	•	

40 CFR Part 63 Subpart WWWWWW

- (e) Minimize or reduce heating of process tanks, except when doing so would interrupt production or adversely affect part quality.
- (f) Perform regular repair, maintenance and preventive maintenance of racks, barrels, and other equipment associated with affected sources.
- (g) Minimize bath contamination using practices such as: the prevention or quick recovery of dropped parts, use of distilled/de-ionized water, water filtration, precleaning of parts to be plated, and thorough rinsing of pre-treated parts to be plated.
- (h) Maintain quality control of chemicals and other bath ingredient concentrations in the tanks.
- (i) Perform general good housekeeping, such as regular sweeping or vacuuming, if needed, and periodic washdowns.
- (j) Minimize spills and overflow of tanks.
- (k) Use squeegee rolls in continuous or reel-to-reel plating tanks.
- (I) Perform regular inspections to identify leaks and other opportunities for pollution prevention.

Section 3--Compliance and Performance Test Methods and Procedures

1. Method 5 as defined in 40 CFR 60, Appendix A or other method approved by the Department shall be used in the determination of particulate emissions from the stack.

ADEM Admin. Code R. 335-3-1-.05

<u>F</u> ed	erally Enforceable Provisos	Regulations
2.	Method 9 as defined in 40 CFR 60, Appendix A or other method approved by the Department shall be used in the determination of the opacity of the stack emissions.	ADEM Admin. Code R. 335-3-105
Sect	tion 4Emission Monitoring	
1.	NONE.	
Sect	tion 5Recordkeeping and Reporting Requirements	
1.	Conduct record keeping as required by 40 CFR Part 63 Subpart WWWWWW as applicable:	40 CFR Part 63
	(a) Records that demonstrate compliance with management practices.	Subpart WWWWWW
	(b) For cyanide tanks, the one-time pH measurement value.	
	(c) For non-cyanide tanks, amount and frequency of WAFS additions, if applicable.	
	(d) For short-term or flash electroplating tanks, the daily plating time.	
	(e) For batch electroplating tanks using covers as a control option, the time the tank is operated with cover in place.	
	(f) For continuous electroplating tanks, amount of tank surface covered and time tank is operated with cover in place.	
	(g) Operating manuals for all required control systems.	
	(h) All required notifications and reports, with supporting documentation.	
	(i) Records should be kept in a form suitable and readily available for review.

Sec	tion 4Emission Monitoring	
1.	The monitoring requirements in this permit shall be as required in Section 5Recordkeeping and Reporting Requirements in addition to those listed below.	,
Sec	tion 5Recordkeeping and Reporting Requirements	
1.	Records of engine usage must be kept in a permanent form suitable for inspection. These records should record if the usage was for emergency, maintenance checks, readiness checks, or other usage. The records shall be retained for at least five years from the date of generation and available upon request.	40 CFR Part 63
2.	Accurate and understandable records of consumption of CO, which record at least the last five years of data, will be maintained in a permanent form suitable for inspection and be available immediately upon request. This facility shall provide a copy of records and supporting background documents upon request that pertain to this air permit. These records shall contain the following information:	ADEM Admin. Code R. 335-3-104
	 (a) The calculations used to determine the amount of CO used during each calendar month. (b) The amount of fuel used in each fuel consuming device at this facility used each calendar month. (c) The amount of CO emitted per calendar month from the all operations at this facility in units of pounds and tons. (d) The rolling 12-month total of CO emitted from the 	
	all operations at this facility in units of pounds and	

Federally Enforceable Provisos

Regulations

tons.

- (e) Within the first 15 days of each month, compliance with all provisos in this permit will be determined. These records will be maintained for 5 years. Should this facility, at any time, exceed the limits in this permit, the Air Division must be notified in writing within ten (10) days of the identification of the exceedance. At least calendar quarterly reports shall be submitted to the Department by the 15th day following the end of the quarter.
- 3. The following federal requirements apply to these unit(s):

40 CFR Part 63

(a) Requirements for emergency stationary RICE.

Any operation other than emergency operation, maintenance and testing, and operation in non-emergency situations for 50 hours per year, as described in paragraphs (i) through (iii) of this section, is prohibited.

- (i) There is no time limit on the use of emergency stationary RICE in emergency situations.
- (ii) You may operate your emergency stationary RICE for the purpose of maintenance checks and readiness testing, provided that the tests are recommended by Federal, State or local government, the manufacturer, the vendor, or the insurance company associated with the engine. Maintenance checks and readiness testing of such units is limited to 100 hours per year. The owner or operator may petition the Administrator for approval of additional hours to be used for maintenance checks and readiness testing, but a petition is not required if the owner or operator maintains records indicating that Federal, State, or local standards require maintenance and testing of emergency RICE beyond 100 hours per year.
- (iii) You may operate your emergency stationary RICE up to 50 hours per year in non-emergency situations, but those 50 hours are counted towards the 100 hours per year provided for maintenance and testing. The 50 hours per year for non-emergency situations cannot be used for peak shaving or to generate income for a facility to supply power to an electric

grid or otherwise supply power as part of a financial arrangement with another entity; except that owners and operators may operate the emergency engine for a maximum of 15 hours per year as part of a demand response program if the regional transmission organization or equivalent balancing authority and transmission operator has determined there are emergency conditions that could lead to a potential electrical blackout, such as unusually low frequency, equipment overload, capacity or energy deficiency, or unacceptable voltage level. The engine may not be operated for more than 30 minutes prior to the time when the emergency condition is expected to occur, and the engine operation must be terminated immediately after the facility is notified that the emergency condition is no longer imminent. The 15 hours per year of demand response operation are counted as part of the 50 hours of operation per year provided for non-emergency situations. The supply of emergency power to another entity or entities pursuant to financial arrangement is not limited by this paragraph (iii), as long as the power provided by the financial arrangement is limited to emergency power.

Sect	on 1Applicability	
1.	This unit is subject to the opacity emission rate limits.	ADEM Admin. Code R. 335-3-401
2.	This source is subject to the applicable requirements of ADEM Admin. Code R. 335-3-1106 (86), "National Emission Standards for Hazardous Air Pollutants (NESHAPs) for Hazardous Air Pollutant (HAP) Emissions from Stationary Reciprocating Internal Combustion Engines (ZZZZ) as a "New Source" under 63.6590(a)(2)(iii), and this source is subject to Proviso No. 1.3 under 63.6590(c)(1).	40 CFR Part 63
3.	This source is subject to the applicable requirements of ADEM Admin. Code R. 335-3-1002 (88), "National Standards of Performance for New Stationary Sources (NSPS) for Stationary Spark Ignition Internal Combustion Engines (JJJJ) as a "New Source".	ADEM Admin. Code R. 335-3-1002(88) ADEM Admin. Code
4.	This source is subject to a PSD synthetic minor emission limitation.	R. 335-3-1404
Secti	ion 2Emission Standards	
1.	This unit shall not discharge into the atmosphere opacity greater than twenty percent (20%), as determined by a six (6) minute average. During one-six (6) minute period during any sixty (60) minute period, this unit may discharge opacity not exceeding forty (40%) percent.	ADEM Admin. Code R. 335-3-401

2. The emergency generator is subject to the Standards of Performance for New Stationary Sources; Stationary Spark Ignition Internal Combustion Engines, 40 CFR 60, Subpart JJJJ. The facility will operate and maintain the engine in compliance with the manufacturer's emission-related written instructions as listed in 60.4243(a). The facility will limit operating hours for maintenance checks and readiness testing to 100 hours per year as listed in 60.4243(d). The emergency generator will be certified to meet the standards as listed in 60.4233(e) and listed in Section 2.3 below or perform an initial performance test to show compliance with the pollutants listed in Section 2.3 below:

ADEM Admin. Code R. 335-3-10-.02(88)

3. The Emergency stationary SI RICE unit(s) shall: a. not emit more than 2.0 NOx g/HP-hr. b. not emit more than 4.0 CO g/HP-hr. c. not emit more than 1.0 VOC g/HP-hr.

ADEM Admin. Code R. 335-3-10-.02(88))

4. Emission of Carbon Monoxide (CO) from this facility from all operations including, but not limited to engine test cells, natural gas fired units, emergency generator usage, etc., shall not exceed 245 tons per year (TPY) in any consecutive rolling 12-month period

ADEM Admin. Code R. 335-3-14-.04(8)

Section 3--Compliance and Performance Test Methods and Procedures

1. Method 9 as defined in 40 CFR 60, Appendix A shall be used in the determination of the opacity of the stack emissions.

ADEM Admin. Code R. 335-3-1-.05

2. Method 7 or 7E as defined in 40 CFR 60, Appendix A shall be used in the determination of Nitrogen oxides emissions from the stack.

ADEM Admin. Code R. 335-3-1-.05

3. Method 18 or 25, as determined by the Department, as defined in 40 CFR 60, Appendix A shall be used in the determination of Volatile Organic Compound emissions from the stack.

ADEM Admin. Code R. 335-3-1-.05

4. Method 10 as defined in 40 CFR 60, Appendix A shall be used in the determination of Carbon Monoxide emissions from the stack.

ADEM Admin. Code R. 335-3-1-.05

Section 4--Emission Monitoring

1. The monitoring requirements in this permit shall be as required in Section 5--Recordkeeping and Reporting Requirements in addition to those listed below.

Section 5--Recordkeeping and Reporting Requirements

1. Records of engine usage listed in Section 2.2 above must be kept in a permanent form suitable for inspection. These records should record if the usage was for emergency, maintenance checks, readiness checks, or other usage. The records shall be retained for at least five years from the date of generation and available upon request. The owner or operator of a stationary internal combustion engine shall maintain all records specified in 40 CFR 60.4245(a).

ADEM Admin. Code R. 335-3-10-.02(88)

2. Accurate and understandable records of consumption of CO, which record at least the last five years of data, will be maintained in a permanent form suitable for inspection and be available immediately upon request. This facility shall provide a copy of records and supporting background documents upon request that pertain to this air permit. These records shall contain the following information:

ADEM Admin. Code R. 335-3-1-.04

- (a) The calculations used to determine the amount of CO used during each calendar month.
- (b) The amount of fuel used in each fuel consuming device at this facility used each calendar month.
- (c) The amount of CO emitted per calendar month from the all operations at this facility in units of pounds and tons.
- (d) The rolling 12-month total of CO emitted from the all operations at this facility in units of pounds and tons.
- (e) Within the first 15 days of each month, compliance with all provisos in this permit will be determined. These records will be maintained for 5 years. Should this facility, at any time, exceed the limits in this permit, the Air Division must be notified in writing within ten (10) days of the identification of the exceedance. At least calendar quarterly reports shall be submitted to the Department by the 15th day following the end of the quarter.
- 3. The following federal requirements apply to these unit(s) as specified in 40 CFR 60.4243, listed here in part:

ADEM Admin. Code R. 335-3-10-.02(88)

- (a) In order for the engine to be considered an emergency stationary ICE, any operation other than emergency operation, maintenance and testing, emergency demand response, and operation in non-emergency situations for 50 hours per year.
- (1) There is no time limit on the use of emergency stationary ICE in emergency situations.
- (2) You may operate your emergency stationary ICE for any combination of the purposes specified in paragraphs (a)(2)(i) through (iii) of this section for a maximum of 100 hours per calendar year.
- (i) Emergency stationary ICE may be operated for maintenance checks and readiness testing, provided that the tests are recommended by federal, state or local government, the manufacturer, the vendor, the regional transmission organization or equivalent balancing authority and transmission operator, or the insurance company associated with the engine.
- 4. Within the first 15 days of each month, compliance with all provisos in this permit will be determined. These records will be maintained for 5 years. Should this facility, at any time, exceed the limits in this permit, the Air Division must be notified in writing within ten (10) days of the identification of the exceedance.

ADEM Admin. Code R. 335-3-1-.04
