

OFFICE OF GROUND WATER AND DRINKING WATER

WASHINGTON, D.C. 20460

June 12, 2025

MEMORANDUM

SUBJECT: Allotments of FY 2025 Appropriation for the *Voluntary School and Child Care Lead Testing and Reduction Grant Program*, authorized by Section 1464(d) of the Safe Drinking Water Act

FROM: Marietta Echeverria, Director
Drinking Water Capacity Compliance Assistance Division

TO: Water Division Directors, Regions I-X

OVERVIEW

This memorandum announces grant funding for the *Voluntary School and Child Care Lead Testing and Reduction Grant Program*. The grant is authorized under the Safe Drinking Water Act (SDWA) 1464(d), as amended by section 2107 of the Water Infrastructure Improvements for the Nation (WIIN) Act, to reduce children's exposure to lead. The grant program supports the EPA's Powering the Great American Comeback initiative by strengthening cooperative federalism and working with states and territories to maximize the impact of these funds to protect human health through access to clean water. Through the enactment of the Infrastructure Investment and Jobs Act (IIJA), P.L. 117-58, in November 2021, SDWA section 1464(d) was further amended to allow grant recipients to address lead exposure in drinking water at school and child care facilities through remediation (e.g., plumbing replacement, lead reduction certified point-of-use filters) in addition to testing.

The total amount available for this allotment is \$26,198,000. Included as part of this memo are the individual allotments for the participating states, DC, and territories. The EPA intends to release a separate memo pertaining to the funding designated for Tribal Consortia to support lead testing and remediation activities in schools and child care facilities serving Tribes. Eligibility to apply for and receive funding under this grant program is limited to the fifty states, DC, and U.S. territories. Current grant recipients include all fifty states, DC, and four territories (American Samoa, Puerto Rico, U.S. Virgin Islands, and the Northern Mariana Islands).

Grant recipients must continue to work with the EPA regional offices in the implementation of eligible activities under their respective grant awards. The EPA is committed to working with states, Tribes, and territories to maximize the impact of these funds in addressing lead exposure to children in drinking water.

To support the implementation of this grant, an implementation document is available at: <https://www.epa.gov/dwcapacity/wiin-grant-voluntary-school-and-child-care-lead-testing-and-reduction-grant-program>. The implementation document contains detailed information on how the EPA will award and administer grants that support eligible activities, such as those for remediation or replacement activities.

Further information about this grant program, including the grant implementation document, eligibilities, and frequently asked questions, is available at <https://www.epa.gov/dwcapacity/wiin-grant-voluntary-school-and-child-care-lead-testing-and-reduction-grant-program>.

If you have any questions about the allotments, please contact Hillarie Ishida at ishida.hillarie@epa.gov or (202) 564-3671.
