- Results achieved include the first-ever biomarker qualification submission and favorable regulatory response through a pilot process at FDA, EMA, and PMDA; aided in the development of a new pathway and written guidance at FDA and EMA for the incorporation of new science into regulated drug studies; widespread adoption of novel kidney toxicity biomarkers into nonclinical and clinical studies that enable better patient protection and decision-making in drug development.
- Management and mentorship of an internal team of 7 (2 Ph.D./Pharm.D., 1 M.D., 2 M.S., 2 B.S.) that supported the PSTC: priority needs identification; clinical and nonclinical study design; project planning, budgeting, resourcing, tracking and execution; compilation and analysis of evidentiary databases; and writing and publication of regulatory qualification submissions and manuscripts.
- Strategic alliance identification and relationship building, scientific publications and presentations, and public education and interface.

Scientist, Toxicology 1/2007 – 1/2008
Associate Scientist, Toxicology 1/2006 – 1/2007
Safety Assessment, Preclinical Development
ZymoGenetics, Seattle, WA

- Performed as preclinical lead and project manager for novel antibody drug candidate for Hepatitis C virus. Designed and launched implementation of preclinical development plan, including species justification, PK/PD, mechanistic pharmacology, and toxicology studies.

ED_016126_00000592-00004

- Acted as Study Director for in-house combination therapy and mechanistic safety studies to enable expanded indication for Phase II trials of recombinant fusion protein for multiple sclerosis.
- Designed, performed, and reported in vitro and in vivo mechanistic toxicology studies to support successful IND submissions.
- Led the creation of a rigorous GLP-like process for in-house studies including defining roles, expectations, and responsibilities for protocol development and review, management of in-life activities, data acquisition and storage, and reporting.
- Wrote and formalized cross-departmental collaboration to generate risk assessments for impurities in BDS and drug product from manufacturing process that supported successful IND and BLA submissions.

Medical and Scientific Writer 7/2003 – 1/2005
Safety Assessment, Preclinical Development
ZymoGenetics, Seattle, WA

- Regulatory writing and editing of INDs; scientific writing and editing of peer-reviewed manuscripts; and scientific and medical writing of in-house white papers and SOPs.

SUMMARY

Passionate facilitator, listener, and problem solver bringing people together around environmental justice, health, and community.

EDUCATIONAL BACKGROUND

Presidio Graduate School, MBA in Sustainable Systems 2020
Williams College Williamstown, MA Bachelor of Arts in Environmental Policy 2013

WORK EXPERIENCE

April 2021– present | Community Engagement Coordinator at Resilient Methow
Resilient Methow is an initiative to support and implement the Methow Valley Climate Action Plan by leveraging funding for mitigation and resilience, supporting community projects, and collaborating across organizations and agencies.

- Coordinate communications, outreach, and engagement for implementation of the Methow Valley Climate Action Plan with an emphasis on equity and inclusion.
- Conduct outreach conversations with strategic stakeholders and partners to support implementation of the Climate Action Plan.

September 2018 – December 2020 | Graduate School Project and Course Work

- Selected relevant courses: Multisector Strategic Partnerships and Financial Solutions, Systems, Sustainability, and Social Justice, Civic Leadership and Diversity, Planning, Policy, and Sustainable Economic Development
- A visual systems mapping project to document the impact of the fossil fuel industry on preventing climate action.
- Research project and analysis for the Silicon Valley Leadership Group on the policies and financial implications of campus electrification.
- Student consulting project on leadership culture and organizational change for Seattle Venture Partners.

September 2016 – June 2020 |Associate at Thomas Goldstein Associates
Non-profit and business coaching, strategic development, values alignment, and talent acquisition for local Seattle organizations such as Grist, Delridge Neighborhood Development Association (DNDA), Molly Moon's Ice Cream, Caffe Vita, Café Gourmando, and the Derschang Group. Responsibilities included:

- Facilitating strategic planning and group decision making.
- Synthesizing information from organizational culture change projects into succinct recommendations.
- Communicating directly with clients, create meeting agendas, summaries, and project work plans.

August 2013 - July 2016| Project Assistant at Cascadia Consulting
Environmental consulting for salmon recovery, energy efficiency, and more. Responsibilities included:

- Supporting facilitation of the Puget Sound Salmon Recovery Council and Washington Coast Marine Advisory Council through research, work planning, meeting summaries, policy memos, and subcommittee facilitation.
- Supporting facilitation for the Yakama Nation Climate Plan. Interviewed scientific experts at the University of Washington tribal elders about the history of the land and the tribe and compiled notes and content for the final plan.
- Conducting customer service for the City of Seattle's Community Power Works Program helping home owners complete energy efficiency retrofits on their homes and benefit from efficiency rebate opportunities.
- Leading the logistics, coordination, and customer service for the Low Impact Development Training Program with the Department of Ecology. Scheduled and coordinated 80+ trainings around Washington State over 6 months.

Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP)

WELLNESS WORK EXPERIENCE

2016 - Present | Private Yoga teacher for PATH

- Teach twice weekly yoga classes for a global health equity non-profit.
- Teach to a wide range of ability and fitness levels with a focus on mental and physical well being for employees.
- Build community for employees and create connection outside of a work context.

2020 - Present | Yoga for Parkinson's at Daily Dose PD

- Teach weekly class for people with Parkinson's Disease.

2015- Present | Studio Yoga Teacher at Sol Yoga and Be Luminous Yoga

- Teach 6 classes per week in a variety of styles to inspire connection and balance in mind and body, facilitate community, and empower students to their fullest expression and potential.
- Assistant teacher training cohorts providing coaching and feedback for teacher training students.

ACTIVITIES

Climate Justice Steward – Initiative 1631

- Volunteer organizer with Initiative 1631 for a carbon fee in Washington state.
- Organized and hosted thirteen door to door canvassing events with 8-16 volunteers each.
- Recruited volunteers, and trained each group on the canvassing technology, and talking with voters about climate justice and the initiative.

Williams College Women's Rowing Team

- Captain and four time NCAA Champion (2009-2013)

Food Justice Volunteering

- Rainier Valley Food Bank - Volunteer for bulk food packaging and Saturday food distribution.
- FEEST - Volunteer for FEEST's youth led community food justice dinners.

.

ADDITIONAL TRAINING

- **"Climate-Change-Mind-Set: Why a Critical Racial Justice Mindset Is Essential for Effective Climate Justice"** Training with Heather Hackman September 2016
- **Wilderness First Responder** Winter 2012
- **Be Luminous Yoga Teacher Training:** Completed the 200-hour certification program in 2015
- **Mountaineers Basic Climbing Course:** 2016

.

Okanogan Conservation District
1251 S. Second Ave, Room 102 Okanogan, WA 98840

Dear Review Committee:

The Okanogan Conservation District is honored to submit this letter of commitment for the Methow Valley Citizen Council's proposal to the EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

Since 1940, the Okanogan Conservation District has coordinated many programs including habitat improvements, water quality and conservation, habitat improvement, agricultural assistance, wildfire resiliency and recovery, and community outreach and education. Our community relies on the Okanogan Conservation District to educate and advocate on large-scale public and private land through voluntary and non-regulatory services. We work closely with wildlife biologists, foresters, landowners, land management agencies, botanists, and community partners to identify top-level conservation priorities.

The Okanogan Conservation District is actively collaborating with the Methow Valley Citizens Council in the EPA EJ CPS grant project entitled, "Empowering EJ communities to build climate resiliency through community-oriented solutions, fuels reduction programs and protecting health from poor air quality." The Okanogan Conservation District commits to continuing this support and will help with outreach for the chipping and vegetation drives and offer insight into resource allocation and location suggestions for the events. Furthermore, Okanogan CD has vast knowledge about the local ecology and has been critically important when educating Clean Air Methow, Resilient Methow, and the public about chipping best practices for chipping and fire preparedness.

We look forward to strengthening our partnership with MVCC through the objectives we've collaborated on as well as those outlined in this project.

Sincerely,

Craig Nelson
Executive Director

ED_016126_00000592-00013

March 26, 2023

Dear Review Committee,

We are writing to affirm our enthusiastic commitment to the Methow Valley Citizens Council's (MVCC) proposal for the EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

Through collaborations with local, regional, statewide, and nationwide partners, Fire Adapted Methow Valley (FAMV) brings fire preparedness education, demonstration, and assistance to Methow Valley community members and visitors. FAMV's mission is to foster understanding and means that motivate and enable Methow Valley community members to live adaptively with fire.

For the last three years, FAMV, Clean Air Methow and, more recently, Resilient Methow have worked closely with state and local officials to assist those with limited means and avert backyard burning by conducting annual or biannual green waste disposal and chipping events. Clean Air Methow and Resilient Methow have been instrumental in their ongoing support of and outreach at these events and have sought alignment and joint opportunities to help community members and neighborhood leaders of existing or developing Firewise USA ® sites identify strategies and take action to reduce wildfire risk.

Clean Air Methow and FAMV both recognize that wildfire does not affect all residents equally. Those most vulnerable to wildfire risk and its impacts are community members who, due to their social, economic, and demographic situations, are unable to independently prepare for and mitigate risk.

FAMV recently completed a two-year pilot project focused on serving socially vulnerable residents in the valley. This work set the foundation for the development and management of an Equitable Risk Mitigation Program (EMP). We currently are completing an in-depth program report and toolkit to support EMP implementation in the Methow Valley and a framework for others from across the State and Nation to adopt and adapt. Future implementation of this program will rely on extensive collaboration with organizations like Clean Air Methow and Resilient Methow to meet the needs of those who are underserved.

FAMV is thrilled to support this proposal. If MVCC is awarded funding, FAMV looks forward to collaborating with Clean Air Methow to bring equitable fuel reduction events and fire preparedness work to the valley's vulnerable and underserved community members. We will work closely with CAM, Resilient Methow, and other partner organizations to ensure this work is successful in Okanogan County, and beyond.

Sincerely,

Kathryn Heim, Program Coordinator
Fire Adapted Methow Valley,
a program of the Washington Resource Conservation and Development Council

Pateros-Brewster Community Resource Center
169 Pateros Mall, Suite A, P.O. Box 491
Pateros, WA 98846 Ex. 6 - Personal Privacy (PP)

March 27, 2023

Dear Review Committee,

The Pateros-Brewster Community Resource Center (PBCRC) is grateful for the opportunity to submit this letter of commitment in support of Methow Valley Citizens Council's proposal to the EPA's Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement Program.

PBCRC is a Pateros-based 501(c)(3) charitable nonprofit corporation that provides social service support for members of our communities and a location for other providers to bring their programs to South Okanogan County. Our mission is actually the greeting that you would get when you walk in our door, "We're here to help. What's on your mind?".

We have been pleased to collaborate with Clean Air Methow in the past year with the air purifier box fan display program. During the year before that, PBCRC was the south Methow Valley distribution point for the air purifier program that was coordinated through the mayors of Winthrop, Twisp, and Pateros. We were happy to assume the responsibility for that program from the City of Pateros and distribute the remainder of their inventory on our own. PBCRC has also been the local bilingual promotion point for materials on smoke readiness and applications for MVCC's wood-stove program.

We are looking forward to continuing to be an active partner in their pursuit of the EPA EJCPS grant and other projects to help better serve our communities. We will continue to be the local source of information and material about smoke readiness to all of our neighbors. We enthusiastically encourage you to approve MVCC's grant application.

Thank you for your consideration,

Gene Dowers, Executive Director

Re: MVCC application for the EPA Environmental Justice Collaborative Problem Solving grant

To Whom it may Concern,

The Climate Impacts Group supports the Methow Valley Citizen Council's proposal to the EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

The Climate Impacts Group helps people across the Northwest understand how the effects of climate change — including rising air temperatures, decreasing snowfall, rising sea levels and drier summers — stand to affect life in our region. We focus on co-producing knowledge that is both *useful* and *used* to help our region prepare for, and better cope with, the effects of a changing climate. We support planners, natural resource managers, engineers, policymakers and community members across the region as they use science to build climate resilience.

Our partners work in a variety of sectors and contexts, including government agencies, non-profit organizations and community groups. We are widely recognized for scientific discovery, as an experienced creator of impartial and actionable science on identifying and managing climate risks, and as a catalyst and supporter of regional efforts to build climate resilience.

The Methow Valley Citizens Council's EPA EJ CPS grant project entitled, "Empowering EJ communities to build climate resiliency through community-oriented solutions, fuels reduction programs and protecting health from poor air quality" is in alignment with the CIG's efforts to center the needs of frontline communities that have been historically underserved in our region. The activities and program objectives of this grant directly align with our group's mission and vision.

Sincerely,

Jason Vogel
Interim Director
Climate Impacts Group

Methow Valley Citizens Council
305 East Methow Valley Highway
Twisp, WA 98856

Dear Review Committee:

We are happy to write this letter of support for the Methow Valley Citizens Council's (MVCC) proposal for the EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

The Department of Ecology's (Ecology) Air Quality Program (AQP) works to protect, preserve, and enhance Washington's environment for current and future generations. As a part of this work, Ecology's AQP manages smoke from agricultural and industrial sources and conducts air quality monitoring through permits, regulations, and reporting systems intended to keep air pollution at healthy levels. Additionally, Ecology's AQP strives to support community-based partnerships for better air quality and environmental equity and justice. We have worked with Clean Air Methow, which is a project of MVCC, on projects such as their smoke ready and outdoor burning communication campaigns. Additionally, MVCC is the recipient of a Woodstove Replacement grant, administered by Ecology, that seeks to reduce fine particle air pollution in Okanogan County.

In summary, Ecology's Air Quality Program is thrilled to support this proposal which includes activities designed to reduce fine particle air pollution in Okanogan County.

Sincerely,

Kathy Taylor
Air Quality Program Manager

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Oregon Coast Visitors Assocaition

Address: P.O. Box 940

City: Tillamook

State: OR: Oregon Zip Code: 97141

B. Unique Entity Identifier (UEI): K83MCVLDYRG7

C. Applicant/Recipient Point of Contact

Name: Arica Sears

Phone: Ex. 6 Personal Privacy (PP)

Email: deputy@thepeoplescoast.com

Title: Deputy Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

No Pending Civil Rights Lawsuits or admin complaints.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

No Civil Rights Lawsuits or admin complaints in the last year.

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

No civil rights compliance reviews.

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Not applicable

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Not applicable

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Marcus Hinz	Deputy Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Form 990 required: Yes

Dear Taxpayer:

We're responding to your request dated Apr. 04, 2023, about your tax-exempt status.

We issued you a determination letter in June 2010, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(6).

Because you're not an organization described in IRC Section 170(c), donors can't deduct contributions they make to you. You should advise your contributors that their contributions to you aren't deductible.

In the heading of this letter, we indicated whether you must file an annual information return. If you're required to file a return, you must file one of the following by the 15th day of the 5th month after the end of your annual accounting period:

- Form 990, Return of Organization Exempt From Income Tax
- Form 990EZ, Short Form Return of Organization Exempt From Income Tax
- Form 990-N, Electronic Notice (e-Postcard) for Tax-Exempt Organizations Not Required to File Form 990 or Form 990-EZ
- Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation

According to IRC Section 6033(j), if you don't file a required annual information return or notice for 3 consecutive years, we'll revoke your tax-exempt status on the due date of the 3rd required return or notice.

You can get IRS forms or publications you need from our website at www.irs.gov/forms-pubs or by calling Ex. 6 - Personal Privacy (PP)

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific time).

Thank you for your cooperation.

GRANT13861766

knot studio

April 14th, 2023

To: U.S. Environmental Protection Agency

Re: Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

Knot Studio is pleased to support the Oregon Coast Visitors Association's application to The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. Knot Studio has previously collaborated with the Oregon Coast Visitors Association assessing local access to food systems and food system resiliency, and building interpretive storymaps to support stakeholder engagement and outreach.

Knot Studio's role on this grant would be to develop a community vulnerability demographic assessment to understand the spatial distribution of priority communities of color, develop a community engagement strategy and support engagement planning. Knot Studio would also provide route analysis services to understand how coastal destinations can be better connected to priority inland communities. Our experience building leading edge community vulnerability assessment methodologies and other analytical tools in support of environmental justice will help support the work covered within this grant application. Knot Studio principal Michael Yun, project manager and technical lead Andrew Tillinghast and senior designer Anzelina Coodey will be the staff assigned to this project.

We look forward to working with the Oregon Coast Visitors Association and other project partners on this exciting initiative.

Sincerely,

Michael Yun

Principal, Landscape Architect

RE: Forth's support for the Oregon Coast Visitors Association application

Dear EPA:

Forth is pleased to partner with the Oregon Coast Visitors Association (OCVA) and other Key Partners on this exciting planning grant to create an equitable and inclusive movement to and along the Oregon Coast while reducing the incredible burden of vehicles generated by visitation and workforce movement.

We believe this project will help identify social solutions and coastal partnerships to increase access for people of color to visit the Oregon Coast and will also identify barriers to accessible and equitable transportation for workforce commuters on the Oregon Coast. Forth has confidence in the team's ability to deliver on this project's promise.

Forth's mission is to electrify transportation by bringing people together to create solutions that reduce pollution and barriers to access. Since its founding in 2011, Forth has a proven track record in accelerating transportation electrification, including the successful delivery of consumer engagement and outreach programs. Some of our recent initiatives include:

- GoForth Carshare: In early 2021 Forth was awarded funding by the American Public Power Association, the Bonneville Environmental Foundation and several rural and small city electrical utilities to set up the GoForth CarSharing platform to make shared EVs and charging infrastructure available for test drives and repeat rentals in small towns with limited EV availability, as a strategy to bring the benefits or transportation electrification and shared mobility to rural and low-income communities.

- Listening Sessions: In 2022, Forth was selected by Pacific Power to lead six virtual and in-person listening sessions communities across Oregon to collect information about barriers to EV adoption, identify perceived infrastructure gaps and learn about the communities goals of electrifying transportation. During the group discussions and mapping sessions, customers identified local barriers such as critical gaps in the existing network of charging stations which helped inform Pacific Power's Transportation Electrification

ED_016126_00000604-00002

FORTH
Empowering Mobility

Plan to be filed with the Oregon Public Utility Commission.

As a Key Collaborator with OCVA on this initiative, tasks that Forth will assist with include:

- Plan and deliver Listening Sessions in communities selected by the movement analysis results
- Develop a community engagement and outreach plan for identified strategic locations, including identifying key collaborators with relevant community based organizations and others who can/ are willing to manage plan at next stages
- Perform technical & financial analysis for strategic transportation infrastructure with an emphasis on micro-mobility , including electric vehicle, ebike and escooter procurement strategy analysis, including incentives and policy development and coordination with coastal government and utility providers
- Perform social analysis identifying and aligning visions, goals, and key barriers for Oregon coast tourism workforce
- Participate in three workshops with all key collaborators to align transportation issue identification, vision, goals and barriers while maintaining the specifics of location, determine key capacity and leadership development needed for the implementation of plan and develop implementation strategy

Together, we will work to decrease the traffic burden and air pollution of these highly trafficked coastal destinations while promoting clean transportation solutions that are equitable, accessible, and affordable for all. We look forward to working with OCVA and other project partners on this exciting initiative.

Sincerely,

Kelly Yearick

Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

The Oregon Department of Transportation is pleased to support the Oregon Coast Visitors Association's application to The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

The Oregon Coast Visitors Association is the Regional Destination Management Organization (RDMO) for the Oregon Coast and in 2022 became the first Destination Management Organization in the state of Oregon to publish a climate action plan. They received input from our Climate Office at the Oregon Department of Transportation (ODOT) to develop this plan. This plan followed years of experience working with partners on the North Oregon Coast, including, our Northwest Area Department of the Oregon Department of Transportation, to decrease the impact of transportation and travel to and along the coast. We have worked with OCVA and other local partners to collaboratively identify and promote car-free travel for visitors to high use areas in Clatsop and Tillamook Counties.

ODOT has been a consistent partner in these projects and has been a regular contributor to the planning and implementation of these projects. ODOT's technical expertise and access to transportation data has been and continues to be a crucial component of current and projected travel patterns. As a willing partner, ODOT supports the work OCVA has done and the work OCVA would be able to do with this grant funding; working with OCVA will allow ODOT to expand Oregon's zero-emission, equitable and accessible travel options to and along the coast.

This project directly aligns with ODOT's goal's to provide a safe and reliable multimodal transportation system that connects people and helps Oregon's communities and economy thrive.

We look forward to working with the Oregon Coast Visitors Association and other project partners on this exciting initiative. Thankyou for helping to create a more livable and climate friendly space for Oregonians and our visitors.

Sincerely,

Caroline Crisp

Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

I, Kathy Kleczek, am excited to support the Oregon Coast Visitors Association's application to The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

The Oregon Coast Visitors Association is the Regional Destination Management Organization (RDMO) for the Oregon Coast and in 2022 became the first Destination Management Organization in the state of Oregon to publish a climate action plan. This plan followed years of experience working with partners on the North Oregon Coast, including the North Coast Tourism Management Network, to decrease the impact of transportation and travel to and along the coast. As a member of the NCTMN, and the lead of the Transportation Options Action Group I have collaborated with OCVA on Car-Free Travel messaging for the region. The Planning projects proposed are a logical extension of the work that has been started by the network action group.

As a participant and lead in the efforts to promote sustainable transportation systems on the Oregon Coast in the past, I am eager to continue the next phase of planning. My knowledge of the existing public transportation systems will help foster effective conversations during the Route Analysis phases of planning. I have worked with the local transportation system networks for over a decade in various capacities. This planning collaboration could benefit the region, and State of Oregon as a whole to move tourism in a sustainable direction.

In the over 20 years of operating and managing my business in Cannon Beach, the connections to the community and experiences as a business owner will serve to foster connections to existing community bases organizations and companies. During the outreach and listening session phases this will assist in establishing a wide range of community engagement in the region.

Currently in my work as a transportation options specialist has allowed me to become educated on the vast approaches to sustainable transportation across the globe. I enthusiastically participate in seminars from leaders in mobility hub development in Germany and Holland. Analyzing the systems and means that are used to implement the infrastructure and mind shift to create the changes in behavior needed to be effective. The successes that many European and Asian cities have seen in moving people to public transportation, vehicle sharing, or E-bikes does not have to be a far distant reality for the Oregon Coast. Planning is the first step in implementing the changes needed to be successful, I would like to be part of the process to make sure we are reaching the audiences frequently underserved, especially those working to support the tourism industry often members of Latinx communities.

It is my goal to leverage my experience and knowledge to work with OCVA to expand Oregon's zero-emission, equitable and accessible travel options to and along the coast.

I look forward to working with the Oregon Coast Visitors Association and other project partners on this exciting initiative.

Sincerely,

Kathy Kleczek

Tillamook Coast Visitors Association

Visit Tillamook Coast

April 5, 2023

To: U.S. Environmental Protection Agency
Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

Hello,

My name is Nan Devlin, Executive Director of Tillamook Coast Visitors Association (TCVA), a destination management organization committed to sustainable tourism practices throughout Tillamook County on the Oregon Coast. We are a regional partner with Oregon Coast Visitors Association (OCVA), which represents the tourism industry on the entire Oregon Coast. I am writing in support of OCVA's application for the EPA grant, The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

One of our stewardship goals for Tillamook County is to prepare our community with needed infrastructure to support an increase in electric vehicle use. Currently, the city of Tillamook, located in the center of the county, is the only location with EV charging stations for use by visitors, both located in parking lots of tourism attractions. It is our plan to seek funding to install EV stations in north and south county, which is 70 miles long and more than 50 miles wide. Feasibility studies from this grant would greatly support our efforts.

Another goal is to provide incentives to encourage visitors to ride the bus to Tillamook County from Portland, Salem and Corvallis, all in the Willamette Valley, 70 miles or more away. Our local bus system, The Wave, is operated by the Tillamook County Transportation District and has well-timed schedules east and west, as well as north and south along the coast on Highway 101. We are currently conducting a pilot program in a north county town that will provide dining gift cards for those who show a bus ticket when checking into their hotel. This will help reduce carbon emissions, and encourage alternative forms of transportation, including bike and scooter rentals. We see the value in public transit options for visitors and appreciate the focus of this in the proposal OCVA is submitting. We can support the efforts in this grant by connecting partners with our local transit partners.

Two years ago, in partnership with Tillamook County Transportation District, we helped fund a free trolley shuttle on summer weekends in Pacific City, which has experienced heavy traffic congestion, decreasing both local livability and visitor experience. The shuttle has 3X higher ridership than expected. We see the great need for increased micromobility options in other cities along the Oregon Coast. Micromobility deliverables in this grant will help us secure more funding for the needed infrastructure.

We get our stewardship message to visitors and locals through social media, press releases, newsletters, radio programs and sponsored content in our regional target markets. We can support the deliverable in this grant by continuing this outreach and visitor engagement as more climate-aware methods of transportation and visitor experiences are implemented on the coast.

Tillamook Coast Visitors Association

Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

From: Lori Arce-Torres, Lincoln City Chamber Executive Director

I am writing this letter in full support of the Oregon Coast Visitors Association's application for the EPA three-year planning grant. The Chamber has partnered with OCVA many times in the past, and this grant opportunity would be one more way we could support the important work that they are doing.

The Lincoln City Chamber recognizes the challenges we face around transportation, and the increased need for equitable, low impact transportation on the Oregon Coast. We want to ensure our region is accessible and affordable for fellow Oregonians and visitors and the success of our business community is our number one goal at the chamber. Having viable transportation for residents, employees and visitors will be one way to make sure this happens.

We support the development of a feasible study for the extensive implementation of electric transportation infrastructure for both tourism workforce and visitors to the Oregon Coast. We also support the development of a zero emissions transportation program for coastal visitors and commuting workforces.

The Lincoln City Chamber has over 300 chamber members giving us the unique ability to reach a large audience. We could connect local businesses and their workforce to grant partners via our website, social media, monthly meetings and newsletters. We could play a strong role in communicating with businesses about the various transportation options for their workforce, as well as convey effective and creative transportation options which will help the mission by providing feedback on the reality of the program.

The Lincoln City Chamber has been focused on increasing accessibility for those traveling with disabilities. We realize our destination can be challenging for some visitors who have difficulty walking, and micromobiltiy upgrades such as scooters or bikes could support the movement of visitors as well as community members moving around town.

I urge you to strongly consider funding the grant request for the Oregon Coast Visitors Association.

Respectfully Submitted,

Lori Arce-Torres, Lincoln City Chamber Executive Director

OREGON COAST
Florence
Area Chamber of Commerce

April 11, 2023

Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

My name is Bettina Hannigan, President and CEO of the Florence Chamber of Commerce. Our Chamber is made up of over 350 local business owners and community leaders committed to improving the economy of Florence, Oregon. We are an active chamber partner with Oregon Coast Visitors Association (OCVA), which represents the tourism industry on the entire Oregon Coast. I am writing in support of OCVA's application for the EPA grant, The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

Florence, Oregon is located in Lane County, which has previously completed a Climate Action plan consisting of an internal plan and a community plan to reduce carbon emissions in the County. Throughout the county's process of developing this plan, equity was centered in an attempt to reach a broad cross section of our community and is a continued priority for our county. The plan outlines the top 10 actions that our county must take to reduce our greenhouse gas emissions with one of the top actions is Electric Vehicle adoption. Currently, Lane County has over 335,000 passenger vehicle registrations; over 99% are internal combustion engines. Most of these vehicles use gasoline fuel. In 2019, nearly 2,500 electric vehicles were registered – less than 1%. To reach the reduction potential, we would need to increase community use of electric vehicles to 100% by 2040. However, the equity score on this action could have adverse impacts on social equity.

We believe that the deliverables in OCVA's grant including listening sessions with underrepresented groups in the Portland Metro, Salem, and Eugene areas and on the coast regarding barriers for visitation to our destination would help us improve the EV adoption for workforce and visitors in a more equitable way. We also appreciate the focus on workforce movement, understanding that not all of the coast's workforce is able to live where they work and less barriers to transportation could make working on the coast easier for individuals and families.

The Florence Chamber will be able to support the deliverables in the grant by sharing surveys, community listening sessions and other pertinent information with our large membership base and local government. Additionally, we can ensure that developed transportation programs and incentives can be shared with our workforce and visitors.

Sincerely,

Bettina Hannigan

APPLICATION FOR EXTENSION OF TIME TO FILE AN EXEMPT ORGANIZATION RETURN - APPROVED

We received and approved your Form 8868, Application for Extension of Time to File an Exempt Organization Return, for the return (form) and tax period identified above. Your extended due date to file your return is **February 15, 2013.**

When it's time to file your Form 990, 990-EZ, 990-PF or 1120-POL, you should consider filing electronically. Electronic filing is the fastest, easiest and most accurate way to file your return. For more information, visit the Charities and Nonprofit web at www.irs.gov/eo. This site will provide information about:

- The type of returns that can be filed electronically,
- approved e-File providers, and
- if you are required to file electronically.

If you have any questions, please call us at the number shown above, or you may write us at the address shown at the top of this letter.

ED_016126_00000605-00003

16. We have complied with all restrictions on resources (including donor restrictions) and all aspects of contractual and grant agreements that would have a material effect on the financial statements in the event of noncompliance. This includes complying with donor requirements to maintain a specific asset composition necessary to satisfy their restrictions.

17. We believe significant assumptions used by us in making accounting estimates, including those measured at fair value, are reasonable in the circumstances.

18. We are in agreement with the adjusting journal entities, if any, you have recommended, and they have been posted to the entity's accounts.

19. No events have occurred subsequent to the date of the financial statements and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

20. We have responded fully and truthfully to all inquiries made to us by you during your review.

21. In regard to the adjusting journal entries, capital assets, 990 schedule, financial statements, and related notes services performed by you, we have -

- Assumed all management responsibilities.
- Overseen the services by designating an individual who possesses suitable skill, knowledge, and/or experience.
- Evaluated the adequacy and results of the services performed.
- Accepted responsibility for the results of the services.

Signed: _____

Title: Treasurer
Board Director

You are also responsible for all management decisions and responsibilities and for designating an individual with suitable skills, knowledge, and experience to oversee my preparation of your financial statements. You are responsible for evaluating the adequacy and results of the services performed and accepting responsibility for such services.

In preparing the financial statements and notes based on the information in the trial balance, I may propose adjusting entries or other changes affecting the financial statements. These are considered nonattest services. I also will prepare the federal Form 990 for the fiscal year ending June 30, 2017, and capital asset schedule, also nonattest services.

My Report

I will issue a written report upon completion of my review of the Association's financial statements. My report will be addressed to the board of directors of the Association. I cannot provide assurance that an unmodified accountant's review report will be issued. Circumstances may arise in which it is necessary for me to report known departures from accounting principles generally accepted in the United States of America, add an emphasis-of-matter or other-matter paragraph, or withdraw from the engagement. If, for any reason, I am unable to complete the review of your financial statements, I will not issue a report on such statements as a result of this engagement.

Other Relevant Information

Signe Grimstad is the engagement partner and is responsible for supervising the engagement and signing the report or authorizing another individual to sign it.

My contract fee is based on anticipated cooperation from your personnel and the assumption that unexpected circumstances will not be encountered during the work performed. If significant additional time is necessary, I will discuss it with you and arrive at a new fee before I incur the additional costs. My office will bill work in progress with delivery of the draft report. In accordance with my firm policies, work may be suspended if your account becomes sixty days or more overdue and will not be resumed until your account is paid in full. If I elect to terminate my services for nonpayment, my engagement will be deemed to have been completed upon written notification of termination, even if I have not completed my report. You will be obligated to compensate me for all time expended and to reimburse me through the date of termination.

I appreciate the opportunity to be of service to you and believe this letter accurately summarizes the significant terms of my engagement. If you have any questions, please let me know. If you acknowledge and agree with the terms of my engagement as described in this letter, please sign the enclosed copy and return it to me.

Sincerely,

GRIMSTAD & ASSOCIATES

Signe Grimstad
Certified Public Accountant

PROFESSIONAL EXPERIENCE

Deputy Director | 2018 - Present

Oregon Coast Visitors Association - OREGON COAST

- Oversees development and implementation of strategic plan and budget.
- Manages multiple contractors and department leads.
- Positions association as leading destination management organization in Oregon.
- Leads development of climate action planning through the international Glasgow Declaration community.
- Designs and oversees annual grant program of approximately $100K to coastal businesses and organizations.
- Represents association in public speaking engagements along the Oregon Coast.
- Fosters strategic partnership development and management with tourism stakeholders, local government, land management agencies and nonprofits.
- Aligns partners and funding streams for industry alignment .
- Strategizes communications campaigns for visitors and tourism industry needs.
- Inspires collaboration and motivates innovatiove practices both internal and external to the association.

Podcast Host of Big Tourism | 2020 - Present

American Shoreline Podcast Network - VIRTUAL

- Conducts interviews focused on destination (tourism) management.
- Networks with coastal tourism professionals and communities worldwide to foster idea-sharing and industry cross-collaboration.

English Tutor | Fall 2017 - Spring 2018

Independent English Tutor - PARIS, FRANCE

- Coordinated with students, parents and teachers to deliver English language programming.
- Connected with and supported a group of hotel maids protesting difficult working conditions at an international hotel chain.

Program Coordinator | 2016 - 2018

Rockaway Beach Citizens for Watershed Protection - OREGON / VIRTUAL

- Fostered positive relationships between community leaders, industry stakeholders, and fellow citizens to work on environmental issues.
- Moderated difficult conversations around land use and community rights.
- Challenged the status quo while offering practical solutions and ideas.
- Excelled in public speaking at community events, government hearings and educational presentations.

North American Language + Culture Assistant | 2015 - 2017

Auxiliar de Conversación, Gobierno de España - MALLORCA, SPAIN

- Used effective communication, writing and spelling skills to teach ESL students.
- Collaborated highly with fellow teachers to deliver creative programming.
- Required communication in English and Spanish.

PADI Dive Professional | 2016 - 2017

Scuba Mallorca - MALLORCA, SPAIN

- Worked on-site at over 15 resorts on the island to connect directly with tourists.
- Instructed and supported diverse international tourist groups.
- Highlighted delicate ecosystem needs with clients to foster an appreciation for diving and coastal ecosystems.

Server | Spring 2011 - Summer 2017

Pelican Brewing Co. - PACIFIC CITY, OR

- Shared community information with visitors looking to the Oregon Coast.
- Effectively communicated with teammates while multitasking in a high-paced enviornment

PUBLIC SERVICE EXPERIENCE

VOLUNTEER DIVER | 2023 - Present

Oregon Reef Check - OREGON COAST

- Attends online and inperson trainings.
- Participates in dives on the Oregon Coast to conduct scientific surveys of fish, invertebrates and kelp species.

BOARD MEMBER | 2019 - Present

Kiawanda Community Center - PACIFIC CITY, OR

- Facilitates monthly board meetings as acting President of the Board.
- Ensures long term financial sustainability and community reputation of the nonprofit.

BOARD MEMBER | 2020 - Present

Pacific City Doryman's Association - PACIFIC CITY, OR

- Oversees public engagement events like the annual Trick or Treat the Dory Fleet and Dory Days.
- Oversees budget and finances as the Board Treasurer.
- Attends all board meetings to support the mission of protecting the usual and customary access to, and use of, the public beach at Cape Kiwanda for all the traditional activities associated with dory vessels.

VOLUNTEER BUDGET COMMITTEE MEMBER | 2020 - Present

Nestucca School District - Cloverdale, OR

- Oversees and approves yearly school budget.
- Reviews budget and asks for staff and board input.
- Communicates school budget strategy to the community.

EDUCATION

University of Oregon | 2011 - 2015

Bachelor of Arts in International Studies - OREGON

- Concentration in community decision-making with local natural resources in Latin America and Oregon.

Environmental Leadership Program | 2014 - 2015

Environmental Studies Department - University of Oregon

- Co-created a short documentary elevating the voices of rural people on the Oregon Coast.
- Organized and hosted multiple film screenings and community forums around Oregon.
- Presented at Environmental Law Conference in Eugene, OR.
- Studied different forestry practices on the Oregon Coast.
- Promoted statewide legislative reform on house bills and safe industry practices.

IE3 Global Internships | 2014

Equilibrio Azul (NGO) - ECUADOR

- Collaborated with local fishermen, community members and an international team to collect and record data on bycatch and overfishing.
- Facilitated and trained new volunteers.
- Focused on sustainability issues through a community-based perspective.

SIT Study Abroad | 2013

Indigenous Peoples and Globalization - PERU

- Analyzed community decision-making on the proposed oil drilling by Hunt Oil.
- Conducted site visits, interviews, and a final research paper.
- Completed research, final paper, and final presentation in Spanish.

PROFESSIONAL EXPERIENCE

Oregon Coast Visitors Association | OREGON COAST **February 2013 - Present**
Executive Director

- Manage relationships in coastal network of Chambers of Commerce, Visitor and Convention Bureaus, Port Districts 24 incorporated cities and 7 county governments, NGO's and hundreds of businesses along all 363 miles of Oregon Coast.
- Align public relations and marketing campaigns with federal, state, county, cities and special districts (e.g. ports) to ensure coastal region is properly positioned in cooperative promotional opportunities.
- Work with agency partners who develop brand creative materials for use in all advertising media, including but not limited to print, broadcast and internet.
- Convene multijurisdictional dialogs to align capital and infrastructure investments by coordinating funding streams and collaboratively funding projects.
- Develop and oversee the annual operating budget, encompassing all activities and operations of the association, monthly financial reports and annual audit reports in accordance with written financial procedures approved by the Board

Oregon Country Fair | EUGENE, OR **February 2009 - September 2010**
Executive Director

- Oversaw legal, financial, and operational activities for annual event attracting 45,000 attendees, 700 craft & food vendors, and hundreds of performers on 18 stages and across 365 acres of fairgrounds.
- Supervised staff of seven, including a Site Manager and Operations Manager coordinating the work of 4,000 volunteers comprising 62 working crews which provided services such as sewer, water, fire, medical, construction, archaeological, emergency response, security and transportation.
- Oversaw coordination of public safety and emergency preparedness within a multi-agency setting of police, fire, medical, forestry, and public transit officials.
- Directed the marketing and public relations strategy for print, web, and broadcast news media outlets both locally and nationally.

Oregon Energy Coordinators Association | TELECOMMUTE, OR **February 2007 - September 2008**
Executive Director

- Secured $619,000 training and technical assistance contract from Oregon Housing and Community Services to deliver low-income weatherization and energy conservation programs in Community Action Agencies across the state.
- Facilitated communication and coordination of work between 30 member agencies serving low-income, multi-racial households and communities.
- Oversaw state certification training program for professional staff of 18 member agencies in Energy Education, Energy Auditing, and Weatherization.
- Restructured operations of state-wide nonprofit association, including Articles of Incorporation, By-Laws, and implementation of certification programs.

Tillamook Bay Community College | TILLAMOOK, OR **October 2003 - July 2005**
Director of Continuing and Community Education

- Founded the Watershed Activities To Estuary Recreation Program, an economic development initiative in rural-coastal Tillamook County, receiving the Gene Leo Award at the 2005 Oregon Governor's Conference on Tourism.
- Supervised 30-50 instructional and administrative staff developing and delivering educational, recreation and professional workforce trainings.
- Developed budgets, revenue/expense projections and fiscal reporting systems.
- Networked and developed partnerships with stakeholders in assessing social, economic and educational needs of agencies, businesses, and communities.
- Planned, organized and directed marketing and public relations efforts.

Food For Thought Cafe | PORTLAND, OR **May 2000 - October 2003**

Founding Board Member

- Developed inter-agency relationships with business, government, and non-profits to secure contractual agreements, resources and creative partnerships.
- Supervised 15-30 program staff and volunteers throughout strategic planning, program implementation, review and evaluation cycles.
- Organized and directed community participation and outreach campaigns.
- Raised start-up funds, monitored and controlled budget and fiscal resources to transform investment into a financially self-supporting educational program.

City of Portland Parks and Recreation | PORTLAND, OR **April 1998 - May 1999**

Public Events Coordinator

- Coordinated multi-agency services of city, county, regional, and state agencies such as OLCC, Multnomah County Health Department, Portland Fire Bureau, Portland Police Bureau, Portland Neighborhood Associations, Tri-Met, Multnomah County River Patrol, and Portland Water Bureau to support the public and private event activities of a full-spectrum of Portland's diverse businesses, organizations and residents.
- Organized, prioritized and evaluated workload in permitting and regulating public event activities across 200 parks with community participation and input from neighborhood associations, community groups, businesses, and numerous government agencies.
- Educated customers and agency officials on public process, rules and regulations.

PUBLIC SERVICE

Garibaldi Tourism Commission | 2004 - Present
Advised the formation of, policies programs, budgets, branding, public relations and marketing for this relatively.

Community Food Empowerment Project | 2010 - Present
Advise start-up and existing student food co-operatives throughout the region on strategic planning, market research, and campus organizing best practices.

West Coast Governor's Alliance: OR, WA, CA | 2009 - 2013
Jointly publish and implement the 2011 Work Plan of the Sustainable Coastal Communities Action Coordinating Team by conducting direct stakeholder outreach, analyzing existing research, and dialog with relevant officials

EDUCATION

St. Olaf College: Northfield, Minnesota — Graduation: **May 2022**
Bachelor of Arts — Cumulative GPA:
Majors: *(Distinction) Political Science & (Distinction) Philosophy* — GPA in Majors: **PS** **& Phil**
Honors & Awards: *Dean's List each Academic Semester, Student Senator Rookie of the Year (2018-19), Runner-up St Olaf Emerging Leader Award (2020), 2nd Place Ringstad Philosophy Essay Contest (2020), Delegate to WA State Democratic Party Convention (2020 & 2022), Interviewed on PBS The Almanac about 2020 Presidential Primary Campaign Work, Published in the Pi Sigma Alpha Undergraduate Journal of Politics.*

Technical Skills: Votebuilder, SPSS (statistics software), Google Workspace, Microsoft Office, Zotero, Zoom, Photoshop/Image Editing, Adobe Premiere Pro, Completion of Grant Writing Course taught by Meredith Howell (OR), Yoga Instructor Certification, Mental Health First-Aid Certification, Canva, Mailchimp

WORK EXPERIENCE

Coastal Tourism Resiliency Coordinator, *The Oregon Coast Visitors Association* — Sept 2022- Present

- Managed four projects designed to both reduce the GHG emissions of tourism and mitigate the effects of the impact of travel.
- Created a coastwide map of available EV chargers. Created analysis of coastwide EV charger gaps. Have worked with local businesses and Electrify America to fill EV charger gaps. Have coordinated the placement of $2million worth of EV charging equipment in identified gaps. This coastwide EV map is also now public facing
- Presented information to over 150 Businesses & Stakeholder along the coast about strategies to reduce GHG emissions and increase consumer visibility. Have built & shared EV toolkits, rebates, and funding opportunities
- Appeared on KMTR to share information about charging rebates and in the *Seaside Signal* and the *Big Tourism Podcast* to share about GHG emission reduction & mitigation strategies
- Compiled traffic data and travel habit information to build out business proposal for alternative transportation options to the north Oregon coast
- Created funding stream to let travelers donate money directly back to coastal restoration and conservation work. This involved creating connections with environmental nonprofits, putting together rigorous standards and criteria for org evaluation, building out website infrastructure and working with businesses to implement POS donation system
- Fundamentally, this role has been about coordinating partnerships and aligning interests to share strategies and resources and implement practices that make the coast a sustainable and resilient destination

Political Organizer, *Adrianne Moore for State Senate (Chelan County, WA)* — April 2020 - September 2020

- Created and facilitated working groups with 'key endorsement' community members centered around incorporating respected community expertise into the campaign platform
- Coordinated a 'Youth Organizers' program within the campaign to channel activist energy among young people into building a broader coalition of support for the campaign
- Trained and supervised campaign volunteers for phone-calling and canvassing
- Focused on establishing strong visible representation of support for the campaign by writing letters-to-the-editor (and encouraging volunteers and community members to do the same) and distributing of signs in the district
- Skills & Programs Used: *Votebuilder, Google Sheets/Excel, Consistent Phone & Email Communication, Zoom*

Physical Health Peer Educator, *St Olaf Wellness Center (Northfield, MN)* — Fall 2019-2022

- Presented public health topics to students on campus once a month (roughly hour-long presentations on a particular public health topic given to 25-45 students); presented both on zoom and in-person
- Acted as an on-campus resource for students wishing to talk about issues including mental health, physical health, sexual health and safety regarding alcohol and other drugs and connected students to relevant campus resources
- Conducted student outreach efforts to inform the general student body about health-related resources on campus

- Interviewed applicants for future positions in the Wellness Center

LEADERSHIP & COMMUNITY EXPERIENCE

RARE AmeriCorps Member, *Year 29 (Sept 2022-July 31)*

- Attended 3 project management multi-day trainings that focus on project management, DEIA implementation, purpose-driven approaches, building trust in rural communities,
- Have spent 20% of total work hours on professional development. Including a grant-writing certification course, RARE trainings, conferences (will be attending the FORTH Roadmap conference this spring), and networking events.
- Connected to 500+ RARE alumni in OR.

Democratic Primary Campaign Intern in New Hampshire, *Campaign Volunteer for Pete Buttigieg (Jan. 2020)*

- Worked to increase voter outreach for the Buttigieg campaign prior to the 2020 primary
- Provided training to new volunteers and assisted in collecting and compiling voter data through canvassing and phone calling as well as assisted in administrative roles such as drafting newsletter templates

COLLEGIATE EXTRACURRICULARS

St. Olaf Rowing Club: *Commodore (2021-2022; member since 2019)*

- Responsible for coordinating members' schedules for rowing events
- Coordinated recruitment activities for the club and engaging current members in team events

College Democrats/DFL & Chelan County Democrats: *Canvasser, Precinct Committee Officer (2018-2022)*

- Canvassed during the 2018 election season to 'Get Out The Vote' and relayed candidate information to voters
- Met with segments of the Northfield/Dundas community and with diverse groups of people on the St. Olaf campus
- Attended Democratic party meetings and served as Delegate for the WA State Democratic Convention

St Olaf *Rebuttal* Publication: *Staff Writer (2020-2022)*

- Selected as one of two Staff Writers for the yearly St. Olaf publication: *Rebuttal*
- Wrote on topical issues—relating to policy and ideology—and argued *for* and/or *against* any particular standpoint

Pi Sigma Tau - Philosophy Honor Society: *Treasurer (2021-2022; member since 2019)*

- Coordinated budget for PST and organized and planned member induction, philosophy colloquium and faculty presentations

Pi Sigma Alpha – Political Science Honor Society: *Treasurer (2021-2022; member since 2020)*

- Coordinated budget for PSA and organized and planned member induction and facilitated invitation for spring Political Science speaker

St. Olaf College Athletic Center Recreation Classes*: Yoga Instructor (2021-2022)*

- Certified as a yoga instructor through a NETA certification course and led free yoga classes four nights a week for student of all abilities and experience levels
- Worked closely with both the Athletic Center and the Wellness Center to increase awareness of free physical wellbeing programming on campus

Recent Reading List (books that may be relevant to this position): *Reimagining Capitalism in a World on Fire, Local is the Future, Home Economics, The Death and Life of Great American Cities, The Unsettling of America, Creating Wealth: Growing Local Economies with Local Currencies, The Wizard and the Prophet, The Economists' Hour, Zen and the Art of Motorcycle Maintenance, Into The Wild, After Nature, The Mushroom at the End of the World, The Organic Machine, Encounters with the Archdruid, The Essential Urban Farmer, Introduction to Urban Science, The Dawn of Everything, A Climate Scientists Case for Hope, Impact Networks, Stolen Focus, The First Oregonians, Local Dollars Local Sense,*

Experience

Industry Communications Coordinator
Oregon Coast Visitors Association
January 2023 to present

- design and execute an effective business to business and agency to agency communications strategy to support the Oregon Coast's tourism industry
- master the voice of the Oregon Coast Visitors Association (OCVA) in the written and spoken word
- champion the power of tourism to non-industry members
- convey the impact and opportunity of OCVA's programming
- create a desire for industry stakeholders to engage and participate in OCVA initiatives
- develop an understanding of industry perspectives and priorities

North Coast Tourism Management Network Manager
Oregon Coast Visitors Association
November 2020 to December 2022

- cultivated high quality relationships and collaborations
- worked with tourism organizations, industry stakeholders and network participants to increase the economic, social and environmental benefits of tourism in the region
- developed internal and external communication strategies
- connected with network participants to understand their work and their organization goals and needs
- identified patterns, assessed broader regional needs, communicated opportunities, created plans, facilitated collaboration, and held partners accountable to accomplish network projects and implement regional priorities
- kept network conversations vibrant and alive by recruiting, onboarding, and engaging new network participants
- designed and facilitated network convenings

BIOGRAPHICAL SKETCH

NAME: Ex. 6 Personal Privacy (PP)

POSITION TITLE: Climate Consultant

A. EDUCATION/TRAINING

INSTITUTION AND LOCATION	DEGREE	Completion Date	FIELD OF STUDY
University of California, Santa Cruz, CA	B.S.	2012	Molecular, Cell, and Developmental Biology
NYU School of Medicine, New York, NY	Ph.D.	2020	Immunology and Inflammation

B. PERSONAL STATEMENT

I am scientist, speaker, and climate consultant empowering small business, organizations, and communities into meaningful and impactful climate action. Using emerging technologies, behavior change, and nature-based solutions, I bring science literacy to decision making and help organizations prioritize impactful mitigation and adaptation strategies. I specifically focus on solutions with emission reduction potential, adaptability, that safeguard nature, have reach, ambition, empower people, and that are catalysts for change. I work internationally but focus on the California and Oregon Coast.

I have experience in climate resilience and scenario planning, climate standards and criteria consulting, the calculation of scope 1, 2, and 3 emissions, basic risk analysis, and scientific literature review.

I am also experienced managing grant funding having received a three-year grant for $270,000 (Ruth L. Kirsc-hstein National Research Service Award 2016-2018)

Lastly, I am skilled in outreach and community engagement. As a climate consultant I have spoken at conferences and workshops throughout California and Oregon. I am the host of The Disobedient Scientist Podcast and am frequently a guest on other podcasts and radio shows. I am experienced interviewing key opinion leaders and scientific experts. I also currently co-manage two groups in the climate tech space.

Ex. 6 Personal Privacy (PP)

Principal. Landscape Architect

Ex. 6 Personal Privacy (PP) is a landscape architect and landscape ecologist whose practice is grounded in collaboration, justice and equity, and a passion for translating complex science-driven analyses into design outcomes which uplift our shared public spaces. His qualifications emphasize the use of equitable community engagement supported by geospatial data and quantitative modeling to deliver environmental justice, estimate ecological performance, and integrate socio-ecological thinking into project work at multiple scales. His experience leading large collaborative groups working on complex planning, design, landscape architectural and environmental justice projects is an asset to a variety of clients and teams. Combining an experimental and explorative process with strong qualifications in design and planning, he leverages progressive, theoretical methods to support a more just, equitable and resilient culture within a rapidly changing environment.

Relevant Experience

Regional Habitat Connectivity Strategic Action Plan Equity Integration, Portland Metro Area, OR
Client: Regional Habitat Connectivity Working Group
Ex. 6 Personal Privacy (PP) was Principal in Charge for Knot's work with Multicultural Collaborative leading an equity audit for RHCWG, a partnership of federal, regional, and local agencies, non-profits, academics, and individuals convened to elevate and advocate for habitat connectivity in the region. The team's work included thoroughly reviewing RHCWG's Strategic Action through a custom Equity Lens, meeting with key stakeholders to discuss and resolve equity related concerns, and developing a framework for future community engagement focused on BIPOC communities most likely to be the most impacted.

2019 Bond Refinement Information Synthesis, Portland Metro Area, OR
Client: Metro
Ex. 6 Personal Privacy (PP) worked with the Metro Protect and Restore Program Manager to develop an approach to synthesize information collected in 24 ecological assessments and to present this material to the public during Phase 2 of the Bond Refinement. This project included the development of a custom Environmental Justice lens which identifies communities with the highest levels of vulnerability, the highest level of environmental burdens, the and the lowest access to nature for prioritization, outreach and engagement.

Associate Landscape Ecologist

Ex. 6 Personal Privacy (PP) is an experienced Project Manager, as well as a recreation and landscape planner, ecologist, and landscape designer, with expertise working on complex parks and open space projects. His approach is rigorous, creative, and collaborative, bridging the traditional division between culture and natural systems into a socio-ecological framework. He carries professional experience as a practitioner of restoration ecology and conservation biological research, and has a proven record of leveraging spatial and quantitative data to their highest and best use solving real-world problems. On the site scale, Ex. 6 Personal Privacy (PP) has a sensitive eye for building functional landscapes that achieve distinctive place-making and memorable human experience. Over the last few years, Ex. 6 Personal Privacy (PP) has been key to Knot Studio's approach to using spatial analytical tools to help public clients for stronger community connections through better understanding of the issues of diversity, equity, and inclusion (DEI).

Ex. 6 Personal Privacy (PP)

Associate Environmental Graphic Designer

Working through the various stages of design, Ex. 6 Personal Privacy (PP) has a calming effect on her clients. Her quiet confidence instills trust that Ex. 6 Personal Privacy (PP) will carefully guide a project from inception to completion. As Knot's Senior Communication Designer, Ex. 6 Personal Privacy (PP) possesses patience, as she guides clients to decisions through her own extensive education and impeccable listening skills. Ex. 6 Personal Privacy (PP) collaborates with enthusiasm and is known for her dedication to craft. With the benefit of increasingly advanced software and computer aided design, Ex. 6 Personal Privacy (PP) moves seamlessly between the physical and built environment and digital/virtual realms. Her eye for design and attention to detail and her ability to assemble large projects into a unified theme, like pieces of a puzzle, are the result of Ex. 6 Personal Privacy (PP) methodical approach to each project. Of equal importance, Ex. 6 Personal Privacy (PP) relies on her innate listening skills as she reaches common ground with every client.

Ex. 6 Personal Privacy (PP)

Transportation Options Specialist

Contact

Ex. 6 Personal Privacy (PP)
Seaside, OR
Ex. 6 - Personal Privacy (PP)
Ex. 6 Personal Privacy (PP)@ridethebus.org

Education

University of Rhode Island,
West Kingston, Rhode Island
BA Majors: Political Science and Philosophy
Minor: German

Executive Member of Student Government, Self-designed Study abroad semester in Germany-focusing on transitional effects of reunification

Attended 1987-91
Graduated 1991

Objective

Work to further collaborative efforts that benefit the community by reducing the effects of green-house gas emissions, congestion, and adoption of emerging technologies. I strive to find ways around challenges toward solutions. Build community through positive action that reinforces behavior change to improve the well-being of current and future users of transportation systems and programs.

Experience

OCT 2019 - PRESENT
TRANSPORTATION OPTIONS SPECIALIST • Develop and implement program outreach and education. This includes organizing meetings with employers and community groups as well as organizing events to present the TO program. Carry out related mode specific activities, establish and communicate the strategic plan for outreach. Develop partnerships with businesses, local community groups, advocacy groups and the neighboring Transit Districts (Columbia and Tillamook Counties) to help build interest in the program • Sunset Empire Transportation District

FEB 1997 – SEPT 2019
OWNER/MANAGER • Chief designer of boutique line of clothing in charge of design-ordering-manufacturing-importing. Established brand and operated two boutique retail locations, managing hiring of employees, payroll, inventory management, special promotional events, marketing, website, sales reports, and day to day operations • La Luna Loca

During the twenty-two years of establishing La Luna Loca I was able to build customer following by creating a business on the foundation of respect and fair trade before it became a catch phrase. Long standing relationships with producers of the artisan clothing and goods was the cornerstone to build equally strong relationships with customers. Quality and connection sustained what from the outside was a retail clothing boutique, and on a deeper level was a bridge to cultural appreciation. It has been a privilege to translate the work and mission of La Luna Loca into the work I do now building relationships in the Transportation Options program.

Key Skills

Analytical thinking and planning
Problem solving
Attention to detail
Strong communications
Ability to adapt and learn
Fluent in Spanish and German

Communication

Due to the pandemic related meeting restrictions, many struggled to continue outreach activities. The idea for LIVE Facebook events was born. I have co-hosted a weekly show all about transportation options. Introducing the concept that transportation choices are connected to everyone and everything we do. The show has been a great success. Technology presents us with an opportunity to reach people in different ways to create programming for harder to engage communities.

Leadership

Sunset Empire Transportation District Board Commissioner- 7 yrs.
Special Districts Association of Oregon Board Director- 5 yrs.
NorthWest Area Commission on Transportation Member- 8 yrs.
Clatsop Economic Development Resource- Small Business Entrepreneur Award 2016
Special District Association of Oregon Academy Graduate
Transportation Options Group of Oregon Board member – 2 yrs.

Re: Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

Knot Studio is pleased to support the Oregon Coast Visitors Association's application to The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. Knot Studio has previously collaborated with the Oregon Coast Visitors Association assessing local access to food systems and food system resiliency, and building interpretive storymaps to support stakeholder engagement and outreach.

Knot Studio's role on this grant would be to develop a community vulnerability demographic assessment to understand the spatial distribution of priority communities of color, develop a community engagement strategy and support engagement planning. Knot Studio would also provide route analysis services to understand how coastal destinations can be better connected to priority inland communities. Our experience building leading edge community vulnerability assessment methodologies and other analytical tools in support of environmental justice will help support the work covered within this grant application. Knot Studio principal Michael Yun, project manager and technical lead Andrew Tillinghast and senior designer Anzelina Coodey will be the staff assigned to this project.

We look forward to working with the Oregon Coast Visitors Association and other project partners on this exciting initiative.

Sincerely,

Michael Yun

RE: Forth's support for the Oregon Coast Visitors Association application

Dear EPA:

Forth is pleased to partner with the Oregon Coast Visitors Association (OCVA) and other Key Partners on this exciting planning grant to create an equitable and inclusive movement to and along the Oregon Coast while reducing the incredible burden of vehicles generated by visitation and workforce movement.

We believe this project will help identify social solutions and coastal partnerships to increase access for people of color to visit the Oregon Coast and will also identify barriers to accessible and equitable transportation for workforce commuters on the Oregon Coast. Forth has confidence in the team's ability to deliver on this project's promise.

Forth's mission is to electrify transportation by bringing people together to create solutions that reduce pollution and barriers to access. Since its founding in 2011, Forth has a proven track record in accelerating transportation electrification, including the successful delivery of consumer engagement and outreach programs. Some of our recent initiatives include:

- GoForth Carshare: In early 2021 Forth was awarded funding by the American Public Power Association, the Bonneville Environmental Foundation and several rural and small city electrical utilities to set up the GoForth CarSharing platform to make shared EVs and charging infrastructure available for test drives and repeat rentals in small towns with limited EV availability, as a strategy to bring the benefits or transportation electrification and shared mobility to rural and low-income communities.

- Listening Sessions: In 2022, Forth was selected by Pacific Power to lead six virtual and in-person listening sessions communities across Oregon to collect information about barriers to EV adoption, identify perceived infrastructure gaps and learn about the communities goals of electrifying transportation. During the group discussions and mapping sessions, customers identified local barriers such as critical gaps in the existing network of charging stations which helped inform Pacific Power's Transportation Electrification

ED_016126_00000608-00011

FORTH
Empowering Mobility

Plan to be filed with the Oregon Public Utility Commission.

As a Key Collaborator with OCVA on this initiative, tasks that Forth will assist with include:

- Plan and deliver Listening Sessions in communities selected by the movement analysis results
- Develop a community engagement and outreach plan for identified strategic locations, including identifying key collaborators with relevant community based organizations and others who can/ are willing to manage plan at next stages
- Perform technical & financial analysis for strategic transportation infrastructure with an emphasis on micro-mobility , including electric vehicle, ebike and escooter procurement strategy analysis, including incentives and policy development and coordination with coastal government and utility providers
- Perform social analysis identifying and aligning visions, goals, and key barriers for Oregon coast tourism workforce
- Participate in three workshops with all key collaborators to align transportation issue identification, vision, goals and barriers while maintaining the specifics of location, determine key capacity and leadership development needed for the implementation of plan and develop implementation strategy

Together, we will work to decrease the traffic burden and air pollution of these highly trafficked coastal destinations while promoting clean transportation solutions that are equitable, accessible, and affordable for all. We look forward to working with OCVA and other project partners on this exciting initiative.

Sincerely,

Kelly Yearick

Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

The Oregon Department of Transportation is pleased to support the Oregon Coast Visitors Association's application to The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

The Oregon Coast Visitors Association is the Regional Destination Management Organization (RDMO) for the Oregon Coast and in 2022 became the first Destination Management Organization in the state of Oregon to publish a climate action plan. They received input from our Climate Office at the Oregon Department of Transportation (ODOT) to develop this plan. This plan followed years of experience working with partners on the North Oregon Coast, including, our Northwest Area Department of the Oregon Department of Transportation, to decrease the impact of transportation and travel to and along the coast. We have worked with OCVA and other local partners to collaboratively identify and promote car-free travel for visitors to high use areas in Clatsop and Tillamook Counties.

ODOT has been a consistent partner in these projects and has been a regular contributor to the planning and implementation of these projects. ODOT's technical expertise and access to transportation data has been and continues to be a crucial component of current and projected travel patterns. As a willing partner, ODOT supports the work OCVA has done and the work OCVA would be able to do with this grant funding; working with OCVA will allow ODOT to expand Oregon's zero-emission, equitable and accessible travel options to and along the coast.

This project directly aligns with ODOT's goal's to provide a safe and reliable multimodal transportation system that connects people and helps Oregon's communities and economy thrive.

We look forward to working with the Oregon Coast Visitors Association and other project partners on this exciting initiative. Thankyou for helping to create a more livable and climate friendly space for Oregonians and our visitors.

Sincerely,

Caroline Crisp

April 14th, 2023

To: U.S. Environmental Protection Agency

Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

I, Kathy Kleczek, am excited to support the Oregon Coast Visitors Association's application to The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

The Oregon Coast Visitors Association is the Regional Destination Management Organization (RDMO) for the Oregon Coast and in 2022 became the first Destination Management Organization in the state of Oregon to publish a climate action plan. This plan followed years of experience working with partners on the North Oregon Coast, including the North Coast Tourism Management Network, to decrease the impact of transportation and travel to and along the coast. As a member of the NCTMN, and the lead of the Transportation Options Action Group I have collaborated with OCVA on Car-Free Travel messaging for the region. The Planning projects proposed are a logical extension of the work that has been started by the network action group.

As a participant and lead in the efforts to promote sustainable transportation systems on the Oregon Coast in the past, I am eager to continue the next phase of planning. My knowledge of the existing public transportation systems will help foster effective conversations during the Route Analysis phases of planning. I have worked with the local transportation system networks for over a decade in various capacities. This planning collaboration could benefit the region, and State of Oregon as a whole to move tourism in a sustainable direction.

In the over 20 years of operating and managing my business in Cannon Beach, the connections to the community and experiences as a business owner will serve to foster connections to existing community bases organizations and companies. During the outreach and listening session phases this will assist in establishing a wide range of community engagement in the region.

Currently in my work as a transportation options specialist has allowed me to become educated on the vast approaches to sustainable transportation across the globe. I enthusiastically participate in seminars from leaders in mobility hub development in Germany and Holland. Analyzing the systems and means that are used to implement the infrastructure and mind shift to create the changes in behavior needed to be effective. The successes that many European and Asian cities have seen in moving people to public transportation, vehicle sharing, or E-bikes does not have to be a far distant reality for the Oregon Coast. Planning is the first step in implementing the changes needed to be successful, I would like to be part of the process to make sure we are reaching the audiences frequently underserved, especially those working to support the tourism industry often members of Latinx communities.

It is my goal to leverage my experience and knowledge to work with OCVA to expand Oregon's zero-emission, equitable and accessible travel options to and along the coast.

I look forward to working with the Oregon Coast Visitors Association and other project partners on this exciting initiative.

Sincerely,

Kathy Kleczek

Tillamook Coast Visitors Association

Visit Tillamook Coast

April 5, 2023

To: U.S. Environmental Protection Agency
Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

Hello,

My name is Nan Devlin, Executive Director of Tillamook Coast Visitors Association (TCVA), a destination management organization committed to sustainable tourism practices throughout Tillamook County on the Oregon Coast. We are a regional partner with Oregon Coast Visitors Association (OCVA), which represents the tourism industry on the entire Oregon Coast. I am writing in support of OCVA's application for the EPA grant, The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

One of our stewardship goals for Tillamook County is to prepare our community with needed infrastructure to support an increase in electric vehicle use. Currently, the city of Tillamook, located in the center of the county, is the only location with EV charging stations for use by visitors, both located in parking lots of tourism attractions. It is our plan to seek funding to install EV stations in north and south county, which is 70 miles long and more than 50 miles wide. Feasibility studies from this grant would greatly support our efforts.

Another goal is to provide incentives to encourage visitors to ride the bus to Tillamook County from Portland, Salem and Corvallis, all in the Willamette Valley, 70 miles or more away. Our local bus system, The Wave, is operated by the Tillamook County Transportation District and has well-timed schedules east and west, as well as north and south along the coast on Highway 101. We are currently conducting a pilot program in a north county town that will provide dining gift cards for those who show a bus ticket when checking into their hotel. This will help reduce carbon emissions, and encourage alternative forms of transportation, including bike and scooter rentals. We see the value in public transit options for visitors and appreciate the focus of this in the proposal OCVA is submitting. We can support the efforts in this grant by connecting partners with our local transit partners.

Two years ago, in partnership with Tillamook County Transportation District, we helped fund a free trolley shuttle on summer weekends in Pacific City, which has experienced heavy traffic congestion, decreasing both local livability and visitor experience. The shuttle has 3X higher ridership than expected. We see the great need for increased micromobility options in other cities along the Oregon Coast. Micromobility deliverables in this grant will help us secure more funding for the needed infrastructure.

We get our stewardship message to visitors and locals through social media, press releases, newsletters, radio programs and sponsored content in our regional target markets. We can support the deliverable in this grant by continuing this outreach and visitor engagement as more climate-aware methods of transportation and visitor experiences are implemented on the coast.

Tillamook Coast Visitors Association

Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

From: Lori Arce-Torres, Lincoln City Chamber Executive Director

I am writing this letter in full support of the Oregon Coast Visitors Association's application for the EPA three-year planning grant. The Chamber has partnered with OCVA many times in the past, and this grant opportunity would be one more way we could support the important work that they are doing.

The Lincoln City Chamber recognizes the challenges we face around transportation, and the increased need for equitable, low impact transportation on the Oregon Coast. We want to ensure our region is accessible and affordable for fellow Oregonians and visitors and the success of our business community is our number one goal at the chamber. Having viable transportation for residents, employees and visitors will be one way to make sure this happens.

We support the development of a feasible study for the extensive implementation of electric transportation infrastructure for both tourism workforce and visitors to the Oregon Coast. We also support the development of a zero emissions transportation program for coastal visitors and commuting workforces.

The Lincoln City Chamber has over 300 chamber members giving us the unique ability to reach a large audience. We could connect local businesses and their workforce to grant partners via our website, social media, monthly meetings and newsletters. We could play a strong role in communicating with businesses about the various transportation options for their workforce, as well as convey effective and creative transportation options which will help the mission by providing feedback on the reality of the program.

The Lincoln City Chamber has been focused on increasing accessibility for those traveling with disabilities. We realize our destination can be challenging for some visitors who have difficulty walking, and micromobiltiy upgrades such as scooters or bikes could support the movement of visitors as well as community members moving around town.

I urge you to strongly consider funding the grant request for the Oregon Coast Visitors Association.

Respectfully Submitted,

Lori Arce-Torres, Lincoln City Chamber Executive Director

OREGON COAST
Florence
Area Chamber of Commerce

April 11, 2023

To: U.S. Environmental Protection Agency
Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Grant

To Whom it May Concern,

My name is Bettina Hannigan, President and CEO of the Florence Chamber of Commerce. Our Chamber is made up of over 350 local business owners and community leaders committed to improving the economy of Florence, Oregon. We are an active chamber partner with Oregon Coast Visitors Association (OCVA), which represents the tourism industry on the entire Oregon Coast. I am writing in support of OCVA's application for the EPA grant, The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

Florence, Oregon is located in Lane County, which has previously completed a Climate Action plan consisting of an internal plan and a community plan to reduce carbon emissions in the County. Throughout the county's process of developing this plan, equity was centered in an attempt to reach a broad cross section of our community and is a continued priority for our county. The plan outlines the top 10 actions that our county must take to reduce our greenhouse gas emissions with one of the top actions is Electric Vehicle adoption. Currently, Lane County has over 335,000 passenger vehicle registrations; over 99% are internal combustion engines. Most of these vehicles use gasoline fuel. In 2019, nearly 2,500 electric vehicles were registered – less than 1%. To reach the reduction potential, we would need to increase community use of electric vehicles to 100% by 2040. However, the equity score on this action could have adverse impacts on social equity.

We believe that the deliverables in OCVA's grant including listening sessions with underrepresented groups in the Portland Metro, Salem, and Eugene areas and on the coast regarding barriers for visitation to our destination would help us improve the EV adoption for workforce and visitors in a more equitable way. We also appreciate the focus on workforce movement, understanding that not all of the coast's workforce is able to live where they work and less barriers to transportation could make working on the coast easier for individuals and families.

The Florence Chamber will be able to support the deliverables in the grant by sharing surveys, community listening sessions and other pertinent information with our large membership base and local government. Additionally, we can ensure that developed transportation programs and incentives can be shared with our workforce and visitors.

Sincerely,

Bettina Hannigan

PROFESSIONAL EXPERIENCE

Deputy Director | 2018 - Present

Oregon Coast Visitors Association - OREGON COAST

- Oversees development and implementation of strategic plan and budget.
- Manages multiple contractors and department leads.
- Positions association as leading destination management organization in Oregon.
- Leads development of climate action planning through the international Glasgow Declaration community.
- Designs and oversees annual grant program of approximately $100K to coastal businesses and organizations.
- Represents association in public speaking engagements along the Oregon Coast.
- Fosters strategic partnership development and management with tourism stakeholders, local government, land management agencies and nonprofits.
- Aligns partners and funding streams for industry alignment .
- Strategizes communications campaigns for visitors and tourism industry needs.
- Inspires collaboration and motivates innovatiove practices both internal and external to the association.

Podcast Host of Big Tourism | 2020 - Present

American Shoreline Podcast Network - VIRTUAL

- Conducts interviews focused on destination (tourism) management.
- Networks with coastal tourism professionals and communities worldwide to foster idea-sharing and industry cross-collaboration.

English Tutor | Fall 2017 - Spring 2018

Independent English Tutor - PARIS, FRANCE

- Coordinated with students, parents and teachers to deliver English language programming.
- Connected with and supported a group of hotel maids protesting difficult working conditions at an international hotel chain.

Program Coordinator | 2016 - 2018

Rockaway Beach Citizens for Watershed Protection - OREGON / VIRTUAL

- Fostered positive relationships between community leaders, industry stakeholders, and fellow citizens to work on environmental issues.
- Moderated difficult conversations around land use and community rights.
- Challenged the status quo while offering practical solutions and ideas.
- Excelled in public speaking at community events, government hearings and educational presentations.

North American Language + Culture Assistant | 2015 - 2017

Auxiliar de Conversación, Gobierno de España - MALLORCA, SPAIN

- Used effective communication, writing and spelling skills to teach ESL students.
- Collaborated highly with fellow teachers to deliver creative programming.
- Required communication in English and Spanish.

University of Oregon | 2011 - 2015

Bachelor of Arts in International Studies - OREGON

- Concentration in community decision-making with local natural resources in Latin America and Oregon.

Environmental Leadership Program | 2014 - 2015

Environmental Studies Department - University of Oregon

- Co-created a short documentary elevating the voices of rural people on the Oregon Coast.
- Organized and hosted multiple film screenings and community forums around Oregon.
- Presented at Environmental Law Conference in Eugene, OR.
- Studied different forestry practices on the Oregon Coast.
- Promoted statewide legislative reform on house bills and safe industry practices.

IE3 Global Internships | 2014

Equilibrio Azul (NGO) - ECUADOR

- Collaborated with local fishermen, community members and an international team to collect and record data on bycatch and overfishing.
- Facilitated and trained new volunteers.
- Focused on sustainability issues through a community-based perspective.

SIT Study Abroad | 2013

Indigenous Peoples and Globalization - PERU

- Analyzed community decision-making on the proposed oil drilling by Hunt Oil.
- Conducted site visits, interviews, and a final research paper.
- Completed research, final paper, and final presentation in Spanish.

PROFESSIONAL EXPERIENCE

Oregon Coast Visitors Association | OREGON COAST **February 2013 - Present**
Executive Director

- Manage relationships in coastal network of Chambers of Commerce, Visitor and Convention Bureaus, Port Districts 24 incorporated cities and 7 county governments, NGO's and hundreds of businesses along all 363 miles of Oregon Coast.
- Align public relations and marketing campaigns with federal, state, county, cities and special districts (e.g. ports) to ensure coastal region is properly positioned in cooperative promotional opportunities.
- Work with agency partners who develop brand creative materials for use in all advertising media, including but not limited to print, broadcast and internet.
- Convene multijurisdictional dialogs to align capital and infrastructure investments by coordinating funding streams and collaboratively funding projects.
- Develop and oversee the annual operating budget, encompassing all activities and operations of the association, monthly financial reports and annual audit reports in accordance with written financial procedures approved by the Board

Oregon Country Fair | EUGENE, OR **February 2009 - September 2010**
Executive Director

- Oversaw legal, financial, and operational activities for annual event attracting 45,000 attendees, 700 craft & food vendors, and hundreds of performers on 18 stages and across 365 acres of fairgrounds.
- Supervised staff of seven, including a Site Manager and Operations Manager coordinating the work of 4,000 volunteers comprising 62 working crews which provided services such as sewer, water, fire, medical, construction, archaeological, emergency response, security and transportation.
- Oversaw coordination of public safety and emergency preparedness within a multi-agency setting of police, fire, medical, forestry, and public transit officials.
- Directed the marketing and public relations strategy for print, web, and broadcast news media outlets both locally and nationally.

Oregon Energy Coordinators Association | TELECOMMUTE, OR **February 2007 - September 2008**
Executive Director

- Secured $619,000 training and technical assistance contract from Oregon Housing and Community Services to deliver low-income weatherization and energy conservation programs in Community Action Agencies across the state.
- Facilitated communication and coordination of work between 30 member agencies serving low-income, multi-racial households and communities.
- Oversaw state certification training program for professional staff of 18 member agencies in Energy Education, Energy Auditing, and Weatherization.
- Restructured operations of state-wide nonprofit association, including Articles of Incorporation, By-Laws, and implementation of certification programs.

Tillamook Bay Community College | TILLAMOOK, OR **October 2003 - July 2005**
Director of Continuing and Community Education

- Founded the Watershed Activities To Estuary Recreation Program, an economic development initiative in rural-coastal Tillamook County, receiving the Gene Leo Award at the 2005 Oregon Governor's Conference on Tourism.
- Supervised 30-50 instructional and administrative staff developing and delivering educational, recreation and professional workforce trainings.
- Developed budgets, revenue/expense projections and fiscal reporting systems.
- Networked and developed partnerships with stakeholders in assessing social, economic and educational needs of agencies, businesses, and communities.
- Planned, organized and directed marketing and public relations efforts.

Food For Thought Cafe | PORTLAND, OR **May 2000 - October 2003**

Founding Board Member

- Developed inter-agency relationships with business, government, and non-profits to secure contractual agreements, resources and creative partnerships.
- Supervised 15-30 program staff and volunteers throughout strategic planning, program implementation, review and evaluation cycles.
- Organized and directed community participation and outreach campaigns.
- Raised start-up funds, monitored and controlled budget and fiscal resources to transform investment into a financially self-supporting educational program.

City of Portland Parks and Recreation | PORTLAND, OR **April 1998 - May 1999**

Public Events Coordinator

- Coordinated multi-agency services of city, county, regional, and state agencies such as OLCC, Multnomah County Health Department, Portland Fire Bureau, Portland Police Bureau, Portland Neighborhood Associations, Tri-Met, Multnomah County River Patrol, and Portland Water Bureau to support the public and private event activities of a full-spectrum of Portland's diverse businesses, organizations and residents.
- Organized, prioritized and evaluated workload in permitting and regulating public event activities across 200 parks with community participation and input from neighborhood associations, community groups, businesses, and numerous government agencies.
- Educated customers and agency officials on public process, rules and regulations.

PUBLIC SERVICE

Garibaldi Tourism Commission | 2004 - Present
Advised the formation of, policies programs, budgets, branding, public relations and marketing for this relatively.

Community Food Empowerment Project | 2010 - Present
Advise start-up and existing student food co-operatives throughout the region on strategic planning, market research, and campus organizing best practices.

West Coast Governor's Alliance: OR, WA, CA | 2009 - 2013

Jointly publish and implement the 2011 Work Plan of the Sustainable Coastal Communities Action Coordinating Team by conducting direct stakeholder outreach, analyzing existing research, and dialog with relevant officials

---

EDUCATION

Portland State University | Portland, OR
Conflict Resolution Training, 65 Graduate Credits
Master's in Public Administration, Administrative Law Focus

Majors: *(Distinction) Political Science & (Distinction) Philosophy* — GPA in Majors: **PS** Ex. 6 Personal Privacy (PP) **& Phil** Ex. 6 Personal Privacy (PP)
Honors & Awards: *Dean's List each Academic Semester, Student Senator Rookie of the Year (2018-19), Runner-up St Olaf Emerging Leader Award (2020), 2nd Place Ringstad Philosophy Essay Contest (2020), Delegate to WA State Democratic Party Convention (2020 & 2022), Interviewed on PBS The Almanac about 2020 Presidential Primary Campaign Work, Published in the Pi Sigma Alpha Undergraduate Journal of Politics.*

Technical Skills: Votebuilder, SPSS (statistics software), Google Workspace, Microsoft Office, Zotero, Zoom, Photoshop/Image Editing, Adobe Premiere Pro, Completion of Grant Writing Course taught by Meredith Howell (OR), Yoga Instructor Certification, Mental Health First-Aid Certification, Canva, Mailchimp

WORK EXPERIENCE

Coastal Tourism Resiliency Coordinator, *The Oregon Coast Visitors Association* — Sept 2022- Present

- Managed four projects designed to both reduce the GHG emissions of tourism and mitigate the effects of the impact of travel.
- Created a coastwide map of available EV chargers. Created analysis of coastwide EV charger gaps. Have worked with local businesses and Electrify America to fill EV charger gaps. Have coordinated the placement of $2million worth of EV charging equipment in identified gaps. This coastwide EV map is also now public facing
- Presented information to over 150 Businesses & Stakeholder along the coast about strategies to reduce GHG emissions and increase consumer visibility. Have built & shared EV toolkits, rebates, and funding opportunities
- Appeared on KMTR to share information about charging rebates and in the *Seaside Signal* and the *Big Tourism Podcast* to share about GHG emission reduction & mitigation strategies
- Compiled traffic data and travel habit information to build out business proposal for alternative transportation options to the north Oregon coast
- Created funding stream to let travelers donate money directly back to coastal restoration and conservation work. This involved creating connections with environmental nonprofits, putting together rigorous standards and criteria for org evaluation, building out website infrastructure and working with businesses to implement POS donation system
- Fundamentally, this role has been about coordinating partnerships and aligning interests to share strategies and resources and implement practices that make the coast a sustainable and resilient destination

Political Organizer, *Adrianne Moore for State Senate (Chelan County, WA)* — April 2020 - September 2020

- Created and facilitated working groups with 'key endorsement' community members centered around incorporating respected community expertise into the campaign platform
- Coordinated a 'Youth Organizers' program within the campaign to channel activist energy among young people into building a broader coalition of support for the campaign
- Trained and supervised campaign volunteers for phone-calling and canvassing
- Focused on establishing strong visible representation of support for the campaign by writing letters-to-the-editor (and encouraging volunteers and community members to do the same) and distributing of signs in the district
- Skills & Programs Used: *Votebuilder, Google Sheets/Excel, Consistent Phone & Email Communication, Zoom*

Physical Health Peer Educator, *St Olaf Wellness Center (Northfield, MN)* — Fall 2019-2022

- Presented public health topics to students on campus once a month (roughly hour-long presentations on a particular public health topic given to 25-45 students); presented both on zoom and in-person
- Acted as an on-campus resource for students wishing to talk about issues including mental health, physical health, sexual health and safety regarding alcohol and other drugs and connected students to relevant campus resources
- Conducted student outreach efforts to inform the general student body about health-related resources on campus

LEADERSHIP & COMMUNITY EXPERIENCE

RARE AmeriCorps Member, *Year 29 (Sept 2022-July 31)*

- Attended 3 project management multi-day trainings that focus on project management, DEIA implementation, purpose-driven approaches, building trust in rural communities,
- Have spent 20% of total work hours on professional development. Including a grant-writing certification course, RARE trainings, conferences (will be attending the FORTH Roadmap conference this spring), and networking events.
- Connected to 500+ RARE alumni in OR.

Democratic Primary Campaign Intern in New Hampshire, *Campaign Volunteer for Pete Buttigieg (Jan. 2020)*

- Worked to increase voter outreach for the Buttigieg campaign prior to the 2020 primary
- Provided training to new volunteers and assisted in collecting and compiling voter data through canvassing and phone calling as well as assisted in administrative roles such as drafting newsletter templates

COLLEGIATE EXTRACURRICULARS

St. Olaf Rowing Club: *Commodore (2021-2022; member since 2019)*

- Responsible for coordinating members' schedules for rowing events
- Coordinated recruitment activities for the club and engaging current members in team events

College Democrats/DFL & Chelan County Democrats: *Canvasser, Precinct Committee Officer (2018-2022)*

- Canvassed during the 2018 election season to 'Get Out The Vote' and relayed candidate information to voters
- Met with segments of the Northfield/Dundas community and with diverse groups of people on the St. Olaf campus
- Attended Democratic party meetings and served as Delegate for the WA State Democratic Convention

St Olaf *Rebuttal* Publication: *Staff Writer (2020-2022)*

- Selected as one of two Staff Writers for the yearly St. Olaf publication: *Rebuttal*
- Wrote on topical issues—relating to policy and ideology—and argued *for* and/or *against* any particular standpoint

Pi Sigma Tau - Philosophy Honor Society: *Treasurer (2021-2022; member since 2019)*

- Coordinated budget for PST and organized and planned member induction, philosophy colloquium and faculty presentations

Pi Sigma Alpha – Political Science Honor Society: *Treasurer (2021-2022; member since 2020)*

- Coordinated budget for PSA and organized and planned member induction and facilitated invitation for spring Political Science speaker

St. Olaf College Athletic Center Recreation Classes*: Yoga Instructor (2021-2022)*

- Certified as a yoga instructor through a NETA certification course and led free yoga classes four nights a week for student of all abilities and experience levels
- Worked closely with both the Athletic Center and the Wellness Center to increase awareness of free physical wellbeing programming on campus

Recent Reading List (books that may be relevant to this position): *Reimagining Capitalism in a World on Fire, Local is the Future, Home Economics, The Death and Life of Great American Cities, The Unsettling of America, Creating Wealth: Growing Local Economies with Local Currencies, The Wizard and the Prophet, The Economists' Hour, Zen and the Art of Motorcycle Maintenance, Into The Wild, After Nature, The Mushroom at the End of the World, The Organic Machine, Encounters with the Archdruid, The Essential Urban Farmer, Introduction to Urban Science, The Dawn of Everything, A Climate Scientists Case for Hope, Impact Networks, Stolen Focus, The First Oregonians, Local Dollars Local Sense,*

BIOGRAPHICAL SKETCH

NAME: Ex. 6 Personal Privacy (PP)

POSITION TITLE: Climate Consultant

A. EDUCATION/TRAINING

INSTITUTION AND LOCATION	DEGREE	Completion Date	FIELD OF STUDY
University of California, Santa Cruz, CA	B.S.	2012	Molecular, Cell, and Developmental Biology
NYU School of Medicine, New York, NY	Ph.D.	2020	Immunology and Inflammation

B. PERSONAL STATEMENT

I am scientist, speaker, and climate consultant empowering small business, organizations, and communities into meaningful and impactful climate action. Using emerging technologies, behavior change, and nature-based solutions, I bring science literacy to decision making and help organizations prioritize impactful mitigation and adaptation strategies. I specifically focus on solutions with emission reduction potential, adaptability, that safeguard nature, have reach, ambition, empower people, and that are catalysts for change. I work internationally but focus on the California and Oregon Coast.

I have experience in climate resilience and scenario planning, climate standards and criteria consulting, the calculation of scope 1, 2, and 3 emissions, basic risk analysis, and scientific literature review.

I am also experienced managing grant funding having received a three-year grant for $270,000 (Ruth L. Kirsc-hstein National Research Service Award 2016-2018)

Lastly, I am skilled in outreach and community engagement. As a climate consultant I have spoken at conferences and workshops throughout California and Oregon. I am the host of The Disobedient Scientist Podcast and am frequently a guest on other podcasts and radio shows. I am experienced interviewing key opinion leaders and scientific experts. I also currently co-manage two groups in the climate tech space.

Ex. 6 Personal Privacy (PP)

Principal. Landscape Architect

Ex. 6 Personal Privacy (PP) is a landscape architect and landscape ecologist whose practice is grounded in collaboration, justice and equity, and a passion for translating complex science-driven analyses into design outcomes which uplift our shared public spaces. His qualifications emphasize the use of equitable community engagement supported by geospatial data and quantitative modeling to deliver environmental justice, estimate ecological performance, and integrate socio-ecological thinking into project work at multiple scales. His experience leading large collaborative groups working on complex planning, design, landscape architectural and environmental justice projects is an asset to a variety of clients and teams. Combining an experimental and explorative process with strong qualifications in design and planning, he leverages progressive, theoretical methods to support a more just, equitable and resilient culture within a rapidly changing environment.

Relevant Experience

Regional Habitat Connectivity Strategic Action Plan Equity Integration, Portland Metro Area, OR
Client: Regional Habitat Connectivity Working Group
Ex. 6 Personal Privacy (PP) was Principal in Charge for Knot's work with Multicultural Collaborative leading an equity audit for RHCWG, a partnership of federal, regional, and local agencies, non-profits, academics, and individuals convened to elevate and advocate for habitat connectivity in the region. The team's work included thoroughly reviewing RHCWG's Strategic Action through a custom Equity Lens, meeting with key stakeholders to discuss and resolve equity related concerns, and developing a framework for future community engagement focused on BIPOC communities most likely to be the most impacted.

2019 Bond Refinement Information Synthesis, Portland Metro Area, OR
Client: Metro
Ex. 6 Personal Privacy (PP) worked with the Metro Protect and Restore Program Manager to develop an approach to synthesize information collected in 24 ecological assessments and to present this material to the public during Phase 2 of the Bond Refinement. This project included the development of a custom Environmental Justice lens which identifies communities with the highest levels of vulnerability, the highest level of environmental burdens, the and the lowest access to nature for prioritization, outreach and engagement.

Associate Landscape Ecologist

Ex. 6 Personal Privacy (PP) is an experienced Project Manager, as well as a recreation and landscape planner, ecologist, and landscape designer, with expertise working on complex parks and open space projects. His approach is rigorous, creative, and collaborative, bridging the traditional division between culture and natural systems into a socio-ecological framework. He carries professional experience as a practitioner of restoration ecology and conservation biological research, and has a proven record of leveraging spatial and quantitative data to their highest and best use solving real-world problems. On the site scale, Ex. 6 Personal Privacy (PP) has a sensitive eye for building functional landscapes that achieve distinctive place-making and memorable human experience. Over the last few years, Ex. 6 Personal Privacy (PP) has been key to Knot Studio's approach to using spatial analytical tools to help public clients for stronger community connections through better understanding of the issues of diversity, equity, and inclusion (DEI).

Ex. 6 Personal Privacy (PP)

Associate Environmental Graphic Designer

Working through the various stages of design, Ex. 6 Personal Privacy (PP) has a calming effect on her clients. Her quiet confidence instills trust that Ex. 6 Personal Privacy (PP) will carefully guide a project from inception to completion. As Knot's Senior Communication Designer, Ex. 6 Personal Privacy (PP) possesses patience, as she guides clients to decisions through her own extensive education and impeccable listening skills. Ex. 6 Personal Privacy (PP) collaborates with enthusiasm and is known for her dedication to craft. With the benefit of increasingly advanced software and computer aided design, Ex. 6 Personal Privacy (PP) moves seamlessly between the physical and built environment and digital/virtual realms. Her eye for design and attention to detail and her ability to assemble large projects into a unified theme, like pieces of a puzzle, are the result of Ex. 6 Personal Privacy (PP) methodical approach to each project. Of equal importance, Ex. 6 Personal Privacy (PP) relies on her innate listening skills as she reaches common ground with every client.

Education

University of Rhode Island,
West Kingston, Rhode Island
BA Majors: Political Science and Philosophy
Minor: German

Executive Member of Student Government, Self-designed Study abroad semester in Germany-focusing on transitional effects of reunification

Attended 1987-91
Graduated 1991

Objective

Work to further collaborative efforts that benefit the community by reducing the effects of green-house gas emissions, congestion, and adoption of emerging technologies. I strive to find ways around challenges toward solutions. Build community through positive action that reinforces behavior change to improve the well-being of current and future users of transportation systems and programs.

Experience

OCT 2019 - PRESENT

TRANSPORTATION OPTIONS SPECIALIST • Develop and implement program outreach and education. This includes organizing meetings with employers and community groups as well as organizing events to present the TO program. Carry out related mode specific activities, establish and communicate the strategic plan for outreach. Develop partnerships with businesses, local community groups, advocacy groups and the neighboring Transit Districts (Columbia and Tillamook Counties) to help build interest in the program • Sunset Empire Transportation District

FEB 1997 – SEPT 2019

OWNER/MANAGER • Chief designer of boutique line of clothing in charge of design-ordering-manufacturing-importing. Established brand and operated two boutique retail locations, managing hiring of employees, payroll, inventory management, special promotional events, marketing, website, sales reports, and day to day operations • La Luna Loca

During the twenty-two years of establishing La Luna Loca I was able to build customer following by creating a business on the foundation of respect and fair trade before it became a catch phrase. Long standing relationships with producers of the artisan clothing and goods was the cornerstone to build equally strong relationships with customers. Quality and connection sustained what from the outside was a retail clothing boutique, and on a deeper level was a bridge to cultural appreciation. It has been a privilege to translate the work and mission of La Luna Loca into the work I do now building relationships in the Transportation Options program.

Key Skills

Analytical thinking and planning
Problem solving
Attention to detail
Strong communications
Ability to adapt and learn
Fluent in Spanish and German

Communication

Due to the pandemic related meeting restrictions, many struggled to continue outreach activities. The idea for LIVE Facebook events was born. I have co-hosted a weekly show all about transportation options. Introducing the concept that transportation choices are connected to everyone and everything we do. The show has been a great success. Technology presents us with an opportunity to reach people in different ways to create programming for harder to engage communities.

Leadership

Sunset Empire Transportation District Board Commissioner- 7 yrs.
Special Districts Association of Oregon Board Director- 5 yrs.
NorthWest Area Commission on Transportation Member- 8 yrs.
Clatsop Economic Development Resource- Small Business Entrepreneur Award 2016
Special District Association of Oregon Academy Graduate
Transportation Options Group of Oregon Board member – 2 yrs.

APPLICATION FOR EXTENSION OF TIME TO FILE AN EXEMPT ORGANIZATION RETURN - APPROVED

We received and approved your Form 8868, Application for Extension of Time to File an Exempt Organization Return, for the return (form) and tax period identified above. Your extended due date to file your return is **February 15, 2013.**

When it's time to file your Form 990, 990-EZ, 990-PF or 1120-POL, you should consider filing electronically. Electronic filing is the fastest, easiest and most accurate way to file your return. For more information, visit the Charities and Nonprofit web at www.irs.gov/eo. This site will provide information about:

- The type of returns that can be filed electronically,
- approved e-File providers, and
- if you are required to file electronically.

If you have any questions, please call us at the number shown above, or you may write us at the address shown at the top of this letter.

16. We have complied with all restrictions on resources (including donor restrictions) and all aspects of contractual and grant agreements that would have a material effect on the financial statements in the event of noncompliance. This includes complying with donor requirements to maintain a specific asset composition necessary to satisfy their restrictions.

17. We believe significant assumptions used by us in making accounting estimates, including those measured at fair value, are reasonable in the circumstances.

18. We are in agreement with the adjusting journal entities, if any, you have recommended, and they have been posted to the entity's accounts.

19. No events have occurred subsequent to the date of the financial statements and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

20. We have responded fully and truthfully to all inquiries made to us by you during your review.

21. In regard to the adjusting journal entries, capital assets, 990 schedule, financial statements, and related notes services performed by you, we have -

- Assumed all management responsibilities.
- Overseen the services by designating an individual who possesses suitable skill, knowledge, and/or experience.
- Evaluated the adequacy and results of the services performed.
- Accepted responsibility for the results of the services.

Signed: _____

Title: Treasurer
Board Director

You are also responsible for all management decisions and responsibilities and for designating an individual with suitable skills, knowledge, and experience to oversee my preparation of your financial statements. You are responsible for evaluating the adequacy and results of the services performed and accepting responsibility for such services.

In preparing the financial statements and notes based on the information in the trial balance, I may propose adjusting entries or other changes affecting the financial statements. These are considered nonattest services. I also will prepare the federal Form 990 for the fiscal year ending June 30, 2017, and capital asset schedule, also nonattest services.

My Report

I will issue a written report upon completion of my review of the Association's financial statements. My report will be addressed to the board of directors of the Association. I cannot provide assurance that an unmodified accountant's review report will be issued. Circumstances may arise in which it is necessary for me to report known departures from accounting principles generally accepted in the United States of America, add an emphasis-of-matter or other-matter paragraph, or withdraw from the engagement. If, for any reason, I am unable to complete the review of your financial statements, I will not issue a report on such statements as a result of this engagement.

Other Relevant Information

Signe Grimstad is the engagement partner and is responsible for supervising the engagement and signing the report or authorizing another individual to sign it.

My contract fee is based on anticipated cooperation from your personnel and the assumption that unexpected circumstances will not be encountered during the work performed. If significant additional time is necessary, I will discuss it with you and arrive at a new fee before I incur the additional costs. My office will bill work in progress with delivery of the draft report. In accordance with my firm policies, work may be suspended if your account becomes sixty days or more overdue and will not be resumed until your account is paid in full. If I elect to terminate my services for nonpayment, my engagement will be deemed to have been completed upon written notification of termination, even if I have not completed my report. You will be obligated to compensate me for all time expended and to reimburse me through the date of termination.

I appreciate the opportunity to be of service to you and believe this letter accurately summarizes the significant terms of my engagement. If you have any questions, please let me know. If you acknowledge and agree with the terms of my engagement as described in this letter, please sign the enclosed copy and return it to me.

Sincerely,

GRIMSTAD & ASSOCIATES

Signe Grimstad
Certified Public Accountant

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Prince William Sound Science and Technology Institute

Address: 1000 Orca Rd.

City: Cordova

State: AK: Alaska Zip Code: 99574

B. Unique Entity Identifier (UEI): G6JKKYPL84S3

C. Applicant/Recipient Point of Contact

Name: Alysha Cypher

Phone: Ex. 6 - Personal Privacy (PP)

Email: acypher@pwssc.org

Title: Postdoctoral Researcher

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☒ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☒ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☐ Yes ☒ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

No

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

No

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Robert W Campbell	Chief Financial Officer/President	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Nonprofit Organization
Indirect Cost Negotiation Agreement

EIN: 92-0129853

Date: 12/30/2022

Organization:

Prince William Sound Science & Technology Institute,
dba Prince William Sound Science Center
P.O. Box 705
Cordova, Alaska 99574

Report Number: 2023-0003

Filing Ref.:
Last Negotiation Agreement
dated: 06/25/2018

The indirect cost rates contained herein are for use on grants, contracts, and other agreements with the Federal Government to which Public Law 93-638 and/or 2 CFR Part 200 apply subject to the limitations contained in Section II.A. of this agreement. The rates were negotiated by the U.S. Department of the Interior, Interior Business Center, and the subject organization in accordance with the authority contained in applicable regulations.

Section I: Rate

Start Date	End Date	Rate Type	Name	Rate	Base	Location	Applicable To
10/01/2020	09/30/2021	Final	Indirect	34.36 %	(A)	All	All Programs
10/01/2021	09/30/2022	Provisional	Indirect	34.36 %	(A)	All	All Programs
10/01/2022	09/30/2023	Provisional	Indirect	30.67 %	(A)	All	All Programs

(A) Base: Total direct costs, less capital expenditures and the portion of subawards in excess of the first $25,000.

Treatment of fringe benefits: Fringe benefits applicable to direct salaries and wages are treated as direct costs; fringe benefits applicable to indirect salaries and wages are treated as indirect costs.

Treatment of paid absences: Vacation, holiday, sick leave, and other paid absences are included in salaries and wages and are claimed on grants, contracts, and other agreements as part of the normal cost for the salaries and wages. Separate claims for the costs of these paid absences are not made.

DocuSign Envelope ID: 972E75D3-F5D8-47A7-A9CA-2DDDE942FBE6

Section II: General

A. **Limitations:** Use of the rate(s) contained in this agreement is subject to any applicable statutory limitations. Acceptance of the rate(s) agreed to herein is predicated upon these conditions: (1) no costs other than those incurred by the subject organization were included in its indirect cost rate proposal, (2) all such costs are the legal obligations of the grantee/contractor, (3) similar types of costs have been accorded consistent treatment, and (4) the same costs that have been treated as indirect costs have not been claimed as direct costs (for example, supplies can be charged directly to a program or activity as long as these costs are not part of the supply costs included in the indirect cost pool for central administration).

B. **Audit:** All costs (direct and indirect, federal and non-federal) are subject to audit. Adjustments to amounts resulting from audit of the cost allocation plan or indirect cost rate proposal upon which the negotiation of this agreement was based will be compensated for in a subsequent negotiation.

C. **Changes:** The rate(s) contained in this agreement are based on the accounting system in effect at the time the proposal was submitted. Changes in the method of accounting for costs which affect the amount of reimbursement resulting from use of the rate(s) in this agreement may require the prior approval of the cognizant agency. Failure to obtain such approval may result in subsequent audit disallowance.

D. **Rate Type:**

1. Fixed Carryforward Rate: The fixed carryforward rate is based on an estimate of the costs that will be incurred during the period for which the rate applies. When the actual costs for such period have been determined, an adjustment will be made to the rate for a future period, if necessary, to compensate for the difference between the costs used to establish the fixed rate and the actual costs.

2. Provisional/Final Rate: Within six (6) months after year end, a final indirect cost rate proposal must be submitted based on actual costs. Billings and charges to contracts and grants must be adjusted if the final rate varies from the provisional rate. If the final rate is greater than the provisional rate and there are no funds available to cover the additional indirect costs, the organization may not recover all indirect costs. Conversely, if the final rate is less than the provisional rate, the organization will be required to pay back the difference to the funding agency.

3. Predetermined Rate: A predetermined rate is an indirect cost rate applicable to a specified current or future period, usually the organization's fiscal year. The rate is based on an estimate of the costs to be incurred during the period. A predetermined rate is not subject to adjustment.

E. **Rate Extension:** Only final and predetermined rates may be eligible for consideration of rate extensions. Requests for rate extensions of a current rate will be reviewed on a case-by-case basis. If an extension is granted, the non-Federal entity may not request a rate review until the extension period ends. In the last year of a rate extension period, the non-Federal entity must submit a new rate proposal for the next fiscal period.

F. **Agency Notification:** Copies of this document may be provided to other federal offices as a means of notifying them of the agreement contained herein.

G. **Record Keeping:** Organizations must maintain accounting records that demonstrate that each type of cost has been treated consistently either as a direct cost or an indirect cost. Records pertaining to the costs of program administration, such as salaries, travel, and related costs, should be kept on an annual basis.

H. **Reimbursement Ceilings:** Grantee/contractor program agreements providing for ceilings on indirect cost rates or reimbursement amounts are subject to the ceilings stipulated in the contract or grant agreements. If the ceiling rate is higher than the negotiated rate in Section I of this agreement, the negotiated rate will be used to determine the maximum allowable indirect cost.

I. **Use of Other Rates:** If any federal programs are reimbursing indirect costs to this grantee/contractor by a measure other than the approved rate(s) in this agreement, the grantee/contractor should credit such costs to the

DocuSign Envelope ID: 972E75D3-F5D8-47A7-A9CA-2DDDE942FBE6

affected programs, and the approved rate(s) should be used to identify the maximum amount of indirect cost allocable to these programs.

J. **Other:**

1. The purpose of an indirect cost rate is to facilitate the allocation and billing of indirect costs. Approval of the indirect cost rate does not mean that an organization can recover more than the actual costs of a particular program or activity.

2. Programs received or initiated by the organization subsequent to the negotiation of this agreement are subject to the approved indirect cost rate(s) if the programs receive administrative support from the indirect cost pool. It should be noted that this could result in an adjustment to a future rate.

3. This Negotiation Agreement is entered into under the terms of an Interagency Agreement between the U.S. Department of the Interior and the cognizant agency. No presumption of federal cognizance over audits or indirect cost negotiations arises as a result of this Agreement.

4. Organizations that have previously established indirect cost rates—exclusive of the 10% *de minimis* rate—must submit a new indirect cost proposal to the cognizant agency for indirect costs within six (6) months after the close of each fiscal year.

Next Proposal Due Date: 03/31/2023

April 14, 2023

Matthew Tejada, Deputy Asst. Administrator for Environmental Justice
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue NW
Washington, DC 20004

Dear Dr. Tejada,

I am writing to express Prince William Sound Economic Development District's full support for and commitment to participate in the Prince William Sound Science Center's (PWSSC) proposal to catalyze development of kelp drying capacity for the emerging mariculture industry. The PWSSC's short and medium term solutions will address a critical bottleneck in kelp production, a rapidly growing industry in Cordova, and provide a needed solution to the community's climate change response and food security challenges.

Cordova is a remote, coastal Alaskan community that relies heavily on commercial fishing for both income and food security. Recent, repeated fisheries disaster declarations (2016 – 2020) are making clear to fishermen the need to diversify their income sources, given the effects they are seeing in their seafood harvests (smaller fish, declining numbers). Cordova's isolated location and high transportation costs make it difficult for residents to regularly access the fresh produce necessary to maintain a healthy diet.

To address these challenges, the community has begun exploring kelp farming as way to diversify its economy and provide a supplementary local food source. The number of kelp farm permits applied for over the past six years shows the significant interest in mariculture in Prince William Sound (PWS) waters. As of January 2022, the Alaska Dep. of Fish and Game reports eight permitted and 12 proposed commercial kelp farm sites in PWS, up from two permitted sites in October 2021.

Despite the industry's promising growth, PWS kelp farming is still in its infancy, and local processing capacity has yet to be developed for the kelp under cultivation. Independent, small-scale kelp farmers lack the resources to purchase and conduct the equipment-intensive research to experiment with drying and producing kelp products.

The PWSEDD will assist by drawing on our community network of mariculture stakeholders (40+ listserve subscribers) to engage business owners, tribal entities, education institutions and nonprofits in supporting development of business solutions for processing capacity, advertise community events, provide market information for the business viability analysis, and disseminate project results in PWS.

P.O. Box 1059, Cordova, Alaska 99574 Ex. 6 - Personal Privacy (PP) www.pwsedd.org
Serving the Sound communities of Chenega, Cordova, Tatitlek, Valdez & Whittier

Thank you for your consideration of this important project for our rural, underserved, coastal communities that will benefit small-scale, individual kelp farmers and help catalyze new business opportunities for our small towns.

Sincerely,

Kristin Carpenter

Our Letter Dated:
August 31, 1990
Addendum Applies:
No

Dear Applicant:

This modifies our letter of the above date in which we stated that you would be treated as an organization that is not a private foundation until the expiration of your advance ruling period.

Your exempt status under section 501(a) of the Internal Revenue Code as an organization described in section 501(c)(3) is still in effect. Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Code because you are an organization of the type described in section 509(a)(1) and 170(b)(1)(A)(vi).

Grantors and contributors may rely on this determination unless the Internal Revenue Service publishes notice to the contrary. However, if you lose your section 509(a)(1) status, a grantor or contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act, or the substantial or material change on the part of the organization that resulted in your loss of such status, or if he or she acquired knowledge that the Internal Revenue Service had given notice that you would no longer be classified as a section 509(a)(1) organization.

If we have indicated in the heading of this letter that an addendum applies, the addendum enclosed is an integral part of this letter.

Because this letter could help resolve any questions about your private foundation status, please keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above.

Sincerely yours,

Richard R. Orosco
District Director

Accounting Period Ending:
MARCH 31
Foundation Status Classification:
509(a)(2)
Advance Ruling Period Begins:
JUNE 14, 1989
Advance Ruling Period Ends:
MARCH 31, 1994
Addendum Applies:
YES

Dear Applicant:

Based on information supplied, and assuming your operations will be as stated in your application for recognition of exemption, we have determined you are exempt from Federal income tax under section 501(a) of the Internal Revenue Code as an organization described in section 501(c)(3).

Because you are a newly created organization, we are not now making a final determination of your foundation status under section 509(a) of the Code. However, we have determined that you can reasonably be expected to be a publicly supported organization described in section 509(a)(2).

Accordingly, you will be treated as a publicly supported organization, and not as a private foundation, during an advance ruling period. This advance ruling period begins and ends on the dates shown above.

Within 90 days after the end of your advance ruling period, you must submit to us information needed to determine whether you have met the requirements of the applicable support test during the advance ruling period. If you establish that you have been a publicly supported organization, you will be classified as a section 509(a)(1) or 509(a)(2) organization as long as you continue to meet the requirements of the applicable support test. If you do not meet the public support requirements during the advance ruling period, you will be classified as a private foundation for future periods. Also, if you are classified as a private foundation, you will be treated as a private foundation from the date of your inception for purposes of sections 507(d) and 4940.

Grantors and contributors may rely on the determination that you are not a private foundation until 90 days after the end of your advance ruling period. If you submit the required information within the 90 days, grantors and contributors may continue to rely on the advance determination until the Service

Letter 1050(DO)

ED_016126_00000623-00002

makes a final determination of your foundation status.

If notice that you will no longer be treated as a publicly supported organization is published in the Internal Revenue Bulletin, grantors and contributors may not rely on this determination after the date of such publication. In addition, if you lose your status as a publicly supported organization and a grantor or contributor was responsible for, or was aware of, the act or failure to act, that resulted in your loss of such status, that person may not rely on this determination from the date of the act or failure to act. Also, if a grantor or contributor learned that the Service had given notice that you would be removed from classification as a publicly supported organization, then that person may not rely on this determination as of the date such knowledge was acquired.

If your sources of support, or your purposes, character, or method of operation change, please let us know so we can consider the effect of the change on your exempt status and foundation status. In the case of an amendment to your organizational document or bylaws, please send us a copy of the amended document or bylaws. Also, you should inform us of all changes in your name or address.

As of January 1, 1984, you are liable for taxes under the Federal Insurance Contributions Act (social security taxes) on remuneration of $100 or more you pay to each of your employees during a calendar year. You are not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Organizations that are not private foundations are not subject to the private foundation excise taxes under Chapter 42 of the Code. However, you are not automatically exempt from other Federal excise taxes. If you have any questions about excise, employment, or other Federal taxes, please let us know.

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Contribution deductions are allowable to donors only to the extent that their contributions are gifts, with no consideration received. Ticket purchases and similar payments in conjunction with fundraising events may not necessarily qualify as deductible contributions, depending on the circumstances. See Revenue Ruling 67-246, published in Cumulative Bulletin 1967-2, on page 104, which sets forth guidelines regarding the deductibility, as charitable contributions, of payments made by taxpayers for admission to or other participation in fundraising activities for charity.

You are required to file Form 990, Return of Organization Exempt From Income Tax, only if your gross receipts each year are normally more than $25,000. However, if you receive a Form 990 package in the mail, please file the return even if you do not exceed the gross receipts test. If you are not

ED_016126_00000623-00003

required to file, simply attach the label provided, check the box in the heading to indicate that your annual gross receipts are normally $25,000 or less, and sign the return.

If a return is required, it must be filed by the 15th day of the fifth month after the end of your annual accounting period. A penalty of $10 a day is charged when a return is filed late, unless there is reasonable cause for the delay. However, the maximum penalty charged cannot exceed $5,000 or 5 percent of your gross receipts for the year, whichever is less. This penalty may also be charged if a return is not complete, so please be sure your return is complete before you file it.

You are not required to file Federal income tax returns unless you are subject to the tax on unrelated business income under section 511 of the Code. If you are subject to this tax, you must file an income tax return on Form 990-T, Exempt Organization Business Income Tax Return. In this letter we are not determining whether any of your present or proposed activities are unrelated trade or business as defined in section 513 of the Code.

You need an employer identification number even if you have no employees. If an employer identification number was not entered on your application, a number will be assigned to you and you will be advised of it. Please use that number on all returns you file and in all correspondence with the Internal Revenue Service.

If we have indicated in the heading of this letter that an addendum applies, the addendum enclosed is an integral part of this letter.

Because this letter could help resolve any questions about your exempt status and foundation status, you should keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown in the heading of this letter.

Sincerely yours,

Michael J. Quinn
District Director

PO Box 1566
Cordova, AK 99574

My passion for kelp began decades ago as a Herring Roe-on-kelp fisherman, participating in the Pound and Wild Kelp fisheries in Prince William Sound. We harvested Sugar kelp to use in our pounds, then progressed to Macrocystis kelp, harvested in SE Alaska and transported to PWS. In 1999, I wrote a paper, published in the University of Alaska SeaGrant publication Marketing and Shipping Live Aquatic Products, titled Shipping and Handling the Marine Algae Macrocystis in Alaska. My interest in kelp never diminished and in 2018, I began the permitting process to start a kelp farm in PWS. To increase my knowledge, I attended a 2 day conference in Kodiak sponsored by the Kodiak Archipelago Leadership Institute on Mariculture in the Kodiak Region. I also attended a presentation at the Pacific Marine Expo in Seattle titled Seaweed Farming 101.

EXPERIENCE

Spring of 2023, will be mark the second year harvesting Sugar and Ribbon kelp at my kelp farm in Prince William Sound. I have been actively involved in promoting the mariculture industry in Cordova and Prince William Sound through regular meetings with the PWS Economic Development District. I have also been a Commercial Fisherman and Small Business owner since 1985. Actively participating in the PWS Salmon Gillnet fishery and Halibut long-lining, as well as in the past, Salmon Seining, Herring Pounding, Wild Kelp Harvest.

COMMUNITY SERVICE

Alaska Mariculture Alliance, Board of Director, Chair of the Public Outreach Committee.

Prince William Sound Science Center, Board of Director, Chair of the Mariculture and Finance Committees.

Copper River/Prince William Sound Marketing Association, Board of Director.

Alaska Seafood Marketing Institute, member of the Domestic Marketing Committee.

MASTERS EDUCATION

Water Cooperation and Diplomacy Joint Masters Education Program: *focus on international, interdisciplinary research, cross-cultural mediation, and collaborative fieldwork*

Oregon State University (OSU) 2019

- Master of Science, Water Resources Policy and Management

IHE Institute for Water Education, Netherlands 2018

- Master of Science, Water Management and Governance

University for Peace, Costa Rica 2017

- Master of Arts, Water Cooperation and Diplomacy

UNDERGRADUATE EDUCATION

University of California at Santa Barbara (UCSB) 2014

- Bachelor of Arts, Environmental Studies
- High Honors, Outstanding Academic Achievement Award and Outstanding Service to the Environmental Community Award

University of Ghana, Education Abroad Program 2013

- Concentration in Animal Biology and Conservation Science

PROFESSIONAL EXPERIENCE

President 2020-present

Noble Ocean Farms, LLC.

- Kelp farmer, director of communications/outreach, research coordination, marketing/branding, financials

Program Manager 2019-present

Eyak Preservation Council/Copper River Delta Sound Waterkeeper, Cordova, AK

- Led partner collaborations, community engagement/outreach, strategic planning, implementation of habitat protection initiatives, water resources research

Program Director 2015-2017

Kenai Watershed Forum, Soldotna, AK

- Built partnerships with the Kenaitze Indian Tribe, Alaska Department of Fish and Game, U.S. Forest Service and U.S. Fish and Wildlife Service
- Co-facilitated natural resource management meetings with multiple agencies
- Coordinated 75 volunteers for the nationally-recognized Stream Watch Program
- Led Adopt-A-Stream Program including teaching water quality testing procedures
- Carefully managed all program data for grant reporting for both programs

Environmental Educator 2014-2015
High Trails Outdoor Science School, Big Bear, CA
- Organized field trips and taught environmental science courses to highly diverse groups of youth in a remote, backcountry setting
- Provided emotional support, managed health and food needs, and mediated conflicts

Aid for Students with Autism 2012-2013
UCSB Koegel Autism Center, Santa Barbara, CA
- Worked as a one-on-one aid to help low-functioning students integrate into peer groups

RESEARCH ACTIVITIES

Governance of Groundwater Resources in Transboundary Aquifers Project, United Nations Educational, Scientific, and Cultural Organization (UNESCO) 2018-2019
- Designed UNESCO Hydro-diplomacy Toolkit and wrote chapters on educational tools

Yakama Nation: Climate Change and Water Issues Assessment, OSU 2018
- Interviewed stakeholders about climate-related challenges to water management

UCSB Koegel Autism Center Research Assistant, UCSB 2012-2013
- Collected and analyzed data to determine progress of individual clients

Environmental Ecology Dept., UCSB 2013
- Participated in field research on oak tree regeneration at Sedgwick Reserve

Ecology, Evolution and Marine Biology Dept., UCSB 2011-2013
- Researched rockfish and cabezon in Dr. Peter Collins' marine aquaculture laboratory

CERTIFICATES

Alaska Boat and Safety Program July 2015
8 HR HAZWHOPER Sep. 2020

EXPERIENCE

Owner/Operator Aug. – Present
33' F/V Lindy and 15' skiff

- Travel 11 nautical miles to and from Cordova and our kelp farm site in Simpson Bay.
- Maintenance and upgrades since purchase include: new water pump, new serpentine belt, new coolant system expansion tank, new 14x18" Kinematics hydraulic anchor winch and 80lb anchor, installed a secondary in line RACOR fuel water separator.

Co-Founder/VP of Operations Jan. 2020 - Present
Noble Ocean Farms, Cordova, AK

- I oversee the operations of a 22-acre regenerative Alaskan kelp farm.
- I helped build site specific underwater arrays to grow kelp from; purchased and ordered materials; spliced and tied thousands of feet of line; rigged and deployed mooring anchors and buoys; out-planted over 4,000ft of kelp seed string in Oct. 2021.

Commercial Fishing Gillnet Crew – Bristol Bay (sockeye) May – July 2021
F/V Highwayman, Naknek, AK

- Gillnetted for sockeye salmon aboard a 32'
- Pre-season boat prep; mended and sorted 28 shackles of gillnet; inventoried supplies and equipment; operated hydraulics; picked a record return of sockeye from gillnets; delivered fish to tenders; cleaned fish holds; mended nets and gear; wheel watched; hydraulically set and retrieved the anchor; cooked; spliced ropes and line.

Independent Contractor Oct. 2020 - Feb. 2021
Native Conservancy, Cordova, AK

- Deployed moorings at 7 kelp research sites throughout PWS aboard F/V Montague.
- Built and inventoried site-specific kelp arrays, spliced lines, inflated and labeled buoys, ordered project materials, and coordinated logistics with program managers.

Acoustic Technician – Herring Research and Monitoring Program Apr. 2018, 2019, 2020

Prince William Sound Science Center (PWSSC), Cordova, AK

· Acoustically monitored Pacific herring populations aboard the M/V Auklet during annual, spring spawning events throughout Prince William Sound (PWS).

· Summarized herring biomass indices into Excel and logged GPS coordinates of survey.

Fish and Wildlife Technician II – Observer Oct. 2019 - Oct. 2020

Alaska Department of Fish and Game (ADFG), Cordova, AK

· Observed aboard F/V NipNTuck during the 2020 PWS Golden King Crab Test Fishery.

· Identified fish and shellfish to species, collected length, weight, sex, otoliths, and interviewed fisherman to obtain the statistical areas of fish landings.

Commercial Seafood Processor Sep. 2018, Sep. 2019

60 North Seafoods, Cordova, AK

· Custom processed a variety of value-added Alaskan seafood products.

Commercial Fishing Gillnet Crew – Copper River Aug. – Sep. 2018

F/V Crown Royal, Seward, AK

· Gillnetted for coho salmon aboard a 32' Hard Drive Marine bowpicker.

· Conducted wheel watches; operated hydraulics; picked fish from gillnets; delivered fish to tenders; cooked; mended nets and gear; hydraulically set and retrieved the anchor.

Commercial Fishing Seine Crew – Prince William Sound July - Aug. 2018

F/V Liveley Jane, Seward, AK

· Seined for pink salmon aboard a historic 52' wooden seine boat.

· Pre-season boat prep; installed new water pump for RSW; stacked corks; identified fish to species; delivered fish to tenders; spliced ropes and line; mended nets and gear; hydraulically set and retrieved the anchor; put boat and gear away at end of season.

Commercial Fishing Gillnet Crew – Copper River/Prince William Sound May-July 2018

F/V Resolute, Seward, AK

· Conducted wheel watches; operated hydraulics; picked fish from gillnets; delivered fish to tenders; cooked; mended nets and gear; hydraulically set and retrieved the anchor.

Biological Science Technician Jul. - Sep. 2015, 2017

PWSSC, Cordova, AK

· Lived and traveled aboard the M/V Auklet while collecting biological samples from 32 remote pink and chum salmon streams in Prince William Sound during summer 15' & 17'.

Scientific Technician I - Observer Aug. - Oct. 2011

Washington Department of Fish and Wildlife, Vancouver, WA

· Observed and summarized catch per unit effort values aboard commercial vessels during lower Columbia River non-tribal commercial gillnet fisheries.

Ex. 6 Personal Privacy (PP)

22-year nonprofit manager
Grant-writer/fundraiser
Community volunteer

PROFESSIONAL EXPERIENCE

Prince William Sound Economic Development District, Executive Director, April, 2020 – present, Cordova, AK. Managing regional nonprofit focused on fostering economic growth and diversification in the Prince William Sound communities of Chenega, Cordova, Valdez, Tatitlek and Whittier. Building partnership networks to support pandemic relief for businesses, provide business counseling, promoting outdoor recreation in PWS, supporting the growth of kelp farming in PWS, exploring the feasibility of a regional PWS ferry authority, and working with community partners on workforce development, broadband service, and maritime industry infrastructure.

Copper River Watershed Project, Cordova, AK. Executive Director Mar. 1999 – Nov. 2019.

Managed financial planning and $450,000 – $750,000 annual budget for a sustainable development non-profit, grant writing, publications production, membership program, and strategic planning; provide board support. The CRWP received the Public Lands Foundation's Landscape Stewardship Award in 2011 for its work to promote stewardship of the Copper River watershed and foster collaboration among regional partners.

Grants written for and awarded by National Oceanic & Atmospheric Administration ($1,073,886, 2009), National Fish & Wildlife Foundation, Alaska Department of Environmental Conservation, *Exxon Valdez* Oil Spill Trustee Council, U.S. Fish & Wildlife Service, and private foundations. Management of program work included:

- Convening public dialogue (Copper River Salmon Harvesters Roundtable, 2017 – 2019; Cordova Tourism Plan, 2002);
- Initiating and managing fish habitat restoration and fish passage culvert replacement projects with budgets range from $46,516 to $591,000. CRWP work in designing a culvert scoring protocol has facilitated region-wide agreement on restoration priorities, and led to an $8.1 million award from the *Exxon Valdez* Oil Spill Trustee Council for watershed restoration on the Copper River delta.
- Facilitating partnerships among state, federal and local organizations for addressing community issues like small fuel spills and waterfront development, tourism resource development, as well as coordinating large scale habitat restoration efforts;
- Annual membership program, including major donor contributions and fundraising events, that raises $70,000 – 80,000 for CRWP operating support.

Prince William Sound Science Center, Cordova, Alaska

Education Assistant/Grantwriter. Sept. 1994 - Sept.1998. Worked with PWS Science Center's education program, *Science of the Sound*, to plan, prepare and teach science education activities to elementary school children. Prepared proposals in coordination with PWSSC education and research staff.

TAG Associates Inc., Norwood, Mass. September 1991 - April 1994, Sr. Associate.

TAG Associates provides management operations consulting services to low income housing providers and HUD. Ms. Carpenter served as Project Manager of most corporation projects, and was responsible for managing project budgets, teams of sub-contractors, and report production. Contract work included strategic planning for housing authority re-organizations and implementing project-based accounting systems, and designing and delivering training programs for public housing authority staff and residents. Conducted case study research for National Commission on Severely Distressed Public Housing, whose recommendations were the basis for new public housing legislation authorizing the Urban Revitalization Demonstration program.

Executive Office of Communities & Development, Commonwealth of Massachusetts. Sept., 1989 - Aug., 1991, Housing Management Specialist for 20 state-assisted local housing authorities, served as *Program Manager* of state-assisted special needs housing program, which contains 146 community residences for people with mental and physical disabilities.

National Center for Municipal Development, Washington, D.C. July, 1984 - November, 1986, Asst. City Representative. Represented client city governments to congressional delegations and tracked housing and community development legislation for inter-governmental lobbying.

EDUCATION

Kennedy School of Government, Harvard University, Master of Public Policy, June, 1989.

- Policy Concentration: Housing and Human Services issues.

Middlebury College, Bachelor of Arts Degree in Political Science, May, 1984.

PROFESSIONAL DEVELOPMENT

Planning and Facilitating Collaborative Meetings, NOAA and Alaska SeaGrant, November 2017.

Planning for Effective Public Participation, International Association of Public Participation, February, 2015.

Certified Erosion and Sediment Control Lead (CESCL) training, September 2010.

COMMUNITY LEADERSHIP

Alaska Salmon Runs Race Coordinator, 2006 – present: organize annual community running event for 250+ participants, draws 100+ visitors to Cordova annually.

Cordova Community Foundation (CCF), 2018 – present.

City of Cordova Councilmember, November 1996 – March, 2003, March 2013 – 2016, 2022 – present.

Cordova Community Medical Center Health Services Board Member, 2007 – 2012, 2014 – 2017.

PWS Regional Citizens' Advisory Council Board Member, March 2003 – February 2004.

Cordova Family Resource Center, Board of Directors, Treasurer, 1995 – 1997, crisis line volunteer 1995 – 2001.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: TerraGraphics International Foundation, Inc.

Address: 121 South Jackson Street

City: Moscow

State: ID: Idaho Zip Code: 83843

B. Unique Entity Identifier (UEI): C83QUXEKJ2C4

C. Applicant/Recipient Point of Contact

Name: Casey Bartrem

Phone: Ex. 6 Personal Privacy (PP)

Email: casey@terrafound.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Casey Bartrem, Executive Director, Ex. 6 Personal Privacy (PP) casey@terrafound.org, Ex. 6 Personal Privacy (PP)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Casey Bartrem, Executive Director, Ex. 6 Personal Privacy (PP) casey@terrafound.org, Ex. 6 Personal Privacy (PP)

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Casey Bartrem	Executive Director	03/24/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

RE: Environmental Justice Collaborative Problem Solving Cooperative Agreement Program

To whom it may concern:

Cordova Electric Cooperative (CEC), strongly supports the " Drying seaweed using waste heat: a proof of concept to build community resilience for food security and economic diversity in PWS, AK." Project. CEC is committed to providing partner support to assist this project to successful completion. CEC is willing to provide, at a minimum:

- Space to place a temporary structure on CEC property, adjacent to the Orca power plant, Cordova, Alaska
- Assistance with running ducting and/or hydronic heat loops from the power plant to the structure to deliver excess heat, and
- Permission for the project team to clear brush from the designated area to provide room for the temporary structure.

CEC is committed to supporting this project through its full term, from 2024 through 2026. We are excited to provide support to meet the community need to sustainably process kelp in Cordova to build a strong mariculture industry in Prince William Sound. We share a common goal to fully utilize the excess heat from legacy and renewable sources and increase the net efficiency of our power plants by re-capturing excess heat. We encourage your support of this project and thank you for your time and consideration.

Respectfully,

Clay R. Koplin

Clay Koplin
CEO Cordova Electric Cooperative

1.0 PROGRAM OBJECTIVES

A. Project Summary Page

Project Title: Drying seaweed using waste heat: a proof of concept to build community resilience for food security and economic diversity in PWS, AK.

Project Location: Cordova, Alaska 99574

Applicant/contact Information: Alysha Cypher, Prince William Sound Science Center (PWSSC), 1000 Orca Rd. Cordova, AK 99574, [HYPERLINK "mailto:acypher@pwssc.org"], Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization -The PWSSC is a research and education institution located in Cordova, Alaska that develops and delivers theme-based education and conducts research, including the Gulf Watch Alaska Long-Term Monitoring program. Our mission is to advance community resilience and the understanding and sustainable use of ecosystems.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No.

Abstract – Prince William Sound (PWS), located in southcentral Alaska, is home to five communities, Chenega, Cordova, Tatitlek, Valdez, and Whittier. Their economy is disproportionately affected by environmental issues because of their dependence upon commercial salmon fisheries. Since 2016, PWS has experienced five fisheries disasters, drastic population declines, that have affected all five salmon species native to this region. The COVID-19 pandemic added to economic strain and food insecurity by disrupting supply chains that provide 95% of Alaska's food. The State of Alaska and the PWS Economic Development District have identified the mariculture industry as a means to increase economic diversity and food security. PWS currently holds 26% of Alaska's seaweed farm permits and thousands of pounds of kelp is harvested each year. However, there is no dedicated capacity to process seaweed. This is a barrier that prevents growth of an industry that can increase economic diversity and food security. The goal of this project is to address this barrier by determining if waste heat can be used to efficiently dry large quantities of seaweed. Our objectives are to 1) establish a temporary structure that uses waste heat from a diesel power plant to dry seaweed efficiently, 2) identify long-term options for processing and assess business viability, 3) build acceptance or social license for mariculture and 4) provide training to increase the mariculture workforce. These objectives will provide dedicated capacity and directly support mariculture industry growth for PWS and coastal Alaskan communities.

Project Type(s) – Demonstration Project, Training, Public education

Special Considerations: 1. Projects addressing Climate Change, Disaster Resiliency 2. Rural areas

Environmental Issue(s)–Food Security, Fisheries Disasters, Climate Change

List of Project Partners – CBOs: Alysha Cypher, Prince William Sound Science Center; Kristin Carpenter, Prince William Sound Economic Development District Local business/industry; Skye Steritz and Sean Den Adel, Noble Ocean Farms; Thea Thomas, Royal Ocean Kelp Company; Clay Koplin, Cordova Electric Cooperative

Will you need to develop a QAPP for your project? No.

B. Environmental and Public Health information of the Underserved Community

Prince William Sound (PWS) is located at the north end of the Gulf of Alaska, extending over 20,000 square miles and similar in size to West Virginia. There are five communities in the sound including Chenega, Cordova, Tatitlek, Valdez, and Whittier which fall into the Chugach Census Area and have a combined population of 6,751 (US Census, 2020; See Table 1 for break down by community). All PWS communities are unconnected by a unified road system and access is dependent on water and air transportation. The waters of PWS are critical to the area's character and economy, sustaining more than 300 species of fish that are essential to traditional subsistence practices and commercial seafood production (PWSEDD, 2021).

Table 1. 2020 Demographic Information for PWS Communities (1-US Census; 2-EJScreen Tool)

Community	Population Size[1]	% Alaska Native/ American Indian[1]	Median Household Income[1]	Employment Rate (%)[1]	Demographic Index (state percentile)[2]	Supplemental Demographic Index (state percentile)[2]
Cordova	2,609	18.8	$77,667	64.3	35	15
Tatitlek	90	94.5	$70,624	35.3	82	67
Chenega*	59	69.1	$75,833	70.3	N/A	N/A
Valdez	3,985	3.4	$99,151	61.9	17	16
Whittier	272	25.2	$49,583	48.9	82	67
*The EJScreen Tool did not generate demographic information for Chenega						

PWS has been ground zero for some of the most widely publicized environmental disasters, including the 1964 Good Friday Earthquake and 1989 *Exxon Valdez* oil spill (EVOS). The Good Friday Earthquake is the second largest earthquake in recorded history and displaced nearly 200,000 mi^2 of land, causing uplifts by up to 15 meters in PWS. The earthquake and resulting tsunamis killed 106 people and caused $84 million in damages. This event forever changed the topography of PWS and its effects are still visible today (Sun, 2022). Then, in 1989, the *Exxon Valdez* ran aground and emptied 11 million gallons of oil into PWS's pristine ecosystem, resulting in $300 million in economic losses and psychological harm to more than 32,000 people who depended on commercial fishing in PWS (Cohen 1993, 1995; Picou and Gill, 1996). Four years later, the Pacific herring population of PWS collapsed (Pearson et al., 1995), ultimately resulting in the permanent closure of 5 herring fisheries which has caused hundreds of millions of dollars in lost income over the last 30 years (McKinley Research Group, unpublished data). These events, and more recent fisheries disasters, disproportionately affect PWS communities because of their reliance on the renewable resources of PWS.

Commercial fishing is a key driver of the PWS and Cordova economies. Half of all households in Cordova have someone working in the fishing industry (Fried and Windisch-Cole, 1999). In 2019, 330 permit holders harvested 69 million pounds of fish and shellfish valued at $48 million. Salmon fisheries accounted for 96% of PWS residents' volume and 86% of ex-vessel earnings in 2019. Pink salmon generally make

up the highest share of salmon harvest volume by regional residents, with volumes significantly greater in odd-numbered years. The 2018–2020 average commercial salmon harvest was 32% lower than the 2008–2017 average (Russell et al., 2021), resulting in four federal fishery disaster declarations, including PWS salmon fisheries for 2020, Copper River Chinook, sockeye and chum salmon fisheries in 2020, Copper River Chinook, sockeye and chum salmon fisheries for 2018, and River Chinook and sockeye salmon fisheries in 2018. These disasters followed the 2016 Gulf of Alaska pink salmon disaster and marine heat wave which altered the PWS ecosystem for several years (Suryan et al., 2021). Federal relief funds for PWS totaled $34,360,624, 26% of the total $131.8 allocated to Alaska, for the 2018 and 2020 salmon fishery disasters. However, these relief funds can take years to distribute and do not fully replace lost income for fishermen (Welch 2019, 2020, 2022). Because our economy is heavily reliant upon salmon fisheries, these disasters have resulted in millions of dollars of lost income. Therefore, economic diversity is critical to building resilience for PWS communities.

PWS communities were also disproportionately affected by the COVID-19 pandemic, primarily due to disruption in supply chains which caused food shortages (Johnson et al., 2021). Nearly 95% of Alaska's food is imported and supply chain failure will leave the state with one week's worth of food (AK Exec. Order No. 334). Food shortages (Jenkins, 2020), access to subsistence fishing (Johnson, 2021), loss of transportation routes (Sullivan, 2020), and reduced wholesale value of commercial seafood (McKinley Research Group, 2021b) were all consequences of the pandemic that disproportionately affected citizens of isolated, coastal communities, like PWS, that cannot drive to cities for resources like food and medicine. In 2020, one Cordovan fishermen told Alaska Public Media that he "lost 2/3 of his gross earnings this year, compared to 2019" and that "the season was, it was almost a complete loss" (Flower-webdesign, 2020).

The State of Alaska and the Prince William Sound Economic Development District (PWSEDD) have identified the mariculture industry, farming of shellfish and seaweed, as a means to increase economic diversity and food security of PWS and mitigate the impacts of climate change (Alaska Mariculture Task Force, 2018; PWSEDD, 2021). One major barrier to development of the mariculture industry in PWS is a lack of processing capacity. The Alaska Fisheries Development Foundation evaluated regional processing capacity in PWS and identified Cordova as a 'primary hub community' for processing due to its proximity to farms and existing seafood processing infrastructure (AFDF, 2021). Unfortunately, existing fish processors in Cordova have not expanded their operations to mariculture due to concerns about contamination between seaweed and seafood and a general lack of information. High electricity costs (30% higher than state average) also make it financially difficult to use conventional drying equipment and wet kelp cannot be exported due to high shipping rates. Until existing processors or another long-term solution is identified, a short-term solution is necessary to maintain growth of this sustainable industry. The objectives of this project will provide an immediate solution, a temporary structure that utilizes waste heat from a diesel power

plant and identify long-term options to continue beyond project duration. While this project will take place in the community of Cordova, we will share our results (Table 2) and access to processing with other PWS communities.

Table 2. Anticipated project results/outcomes and benefits to PWS communities (see Logic Model)	
Results/Outcomes	Community Benefit
Dedicated capacity to dry large quantities of kelp	PWS-based farmers can dry large quantities of kelp at costs that are not prohibitive to industry growth (free during project duration).
Optimized drying procedure	Stakeholders interested in taking on drying capacity after project completion will have an efficient procedure.
Reduced shipping costs to export products	It is cheaper to ship dry products than wet. Lower costs will help farmers and stakeholders stay in the industry.
Options for scalability and long-term solutions	Dedicated capacity for drying will continue beyond project duration and project information will guide scaling up drying capacity.
Business plan	Stakeholders interested in taking on drying capacity after project completion will know what is necessary to earn a profit.
Social license for kelp farming	Community members are informed of the benefits of mariculture and have opportunities to provide input.
Developed workforce	Community members receive training on how to process kelp.
Famers grow more kelp	Current farmers are limited because they can't process what they have. With processing capacity, farmers can grow more kelp, develop products, and generate more income.
Product development	Developing products and markets is another barrier to industry growth that is impeded by a lack of processing in PWS.
Increased access and exports	Community members can purchase local seaweed products, outside of harvest season, and farmers can export products.
Economic diversity	PWS community members generate income from mariculture.
Food Security	Locally-sourced seaweed products provide a cheaper, nutritious alternative to vegetables even when supply chains are disrupted.

This project addresses the following environmental issues that are relevant to PWS communities: 1) Food security, 2) fisheries disasters, and 3) climate change. As described above, these issues disproportionately affect PWS communities and stakeholders have identified mariculture as a viable solution that will increase economic diversity and food security. The seaweed industry can provide a means to generate income, outside of fishing, and a local, nutritious alternative to vegetables. The seaweed industry also has restorative potential and seaweed farming has been linked to increased removal of carbon (Duarte et al., 2005), reduced ocean acidification in proximity to farms (Xiao et al., 2021), and enhanced habitat for marine species (Forbes et al., 2022). Wild seaweed accounts for 50% of all carbon sequestered from oceans, globally (Duarte et al., 2005). Not only does kelp remove carbon from the atmosphere, it substantially reduces (40-95%) methane emissions when fed in small quantities to livestock, which produce 2.7% of global greenhouse gas emissions (Vijn et al., 2020). There are numerous benefits to growing seaweed, but a lack of dedicated processing prevents PWS communities from benefiting from the mariculture industry.

Our project will address two special considerations including:

1. Projects addressing Climate Change, Disaster Resiliency: This project will address climate change and disaster resiliency by building capacity for a zero or low-emission industry that can provide restorative effects to the PWS ecosystem and economic diversity for PWS communities affected by fisheries disasters.
2. Rural areas with limited access to resources: PWS communities are small in population size (Table 1) and disconnected. It is too expensive to export wet seaweed products or process seaweed in another city. PWS has the interest and infrastructure to lead the mariculture industry, but local, dedicated capacity for drying seaweed is necessary for regional industry growth.

C. Organization's Historical Connection to Underserved Community

In 1986, a group of Cordova-based fishermen, scientists, and resource managers started exploring a question: What can we do to better understand this globally-relevant region and share what we learn for the benefit of our community and the world? Two years later, the discussion resulted in a commitment to develop a community-based organization to serve as a repository for knowledge gained from nearly 30 million acres of coastline, wetlands, estuaries, mountains, rivers and streams, all while engaging residents with education and entrepreneurial endeavors. The dream was ambitious. Then, as the Prince William Sound Science Center's (PWSSC) nonprofit papers were being developed in March 1989, the *Exxon Valdez* ran aground on Bligh Reef, spilling more than 11 million gallons of crude into PWS, forever altering the environment and the fishery. Shortly after, on Earth Day, April 22, 1989, PWSSC's legal papers were filed.

Since the oil spill, we have become well-known for leading research in the areas of resource use and sustainability, environmental monitoring, oil spill response, hatchery-wild salmon interactions, herring recovery, and climate change. This information has fed our education programs which serve rural PWS communities. In 2022, we opened a new 5-acre campus and are expanding research and education programs to address the development of the mariculture industry and food security in PWS. We purchased a commercial farm, a Conex-based aquaculture system, to provide a local source for fresh vegetables and are developing a seaweed nursery which will provide juvenile kelp to farmers for out planting onto farms. This proposed work would further support our mission of supporting the livelihood of the citizens of our community and maintaining healthy ecosystems.

This project is the culmination of many stakeholder meetings since 2020 when a community vision for the PWS mariculture industry began to form. The first seaweed farms were permitted in 2021 and began harvesting sugar and ribbon kelp in 2022. Shortly after harvesting, stakeholders came to the conclusion that the growth of the mariculture industry in PWS is dependent on drying kelp. The stakeholders involved in these meetings included, but is not limited to, the PWSSC, PWSEDD, NOF, ROKC, Alaska Sea Grant, Alaska Mariculture Alliance (AMA), Alaska Blue Economy, Native Village of Eyak, Native Conservancy, NOAA Alaska Fisheries Science Center, and the Alaska Department of Fish and Game. In 2023, the Cordova Electric Cooperative (CEC) provided a solution for drying capacity by offering to provide a site and waste heat from

a diesel power plant. PWSEDD, PWSSC, Noble Ocean Farms (NOF), and Royal Oceans Kelp Company (ROKC) then came together to design this project. Numerous stakeholder meetings are included throughout this project to provide frequent opportunities for the project team and other mariculture stakeholders to participate in decision-making. We have also included community forums to solicit input from community members and evaluate social license, or acceptance, of the mariculture industry in PWS.

D. EJCPS Model

Collaborative Problem Solving (CPS) Elements 1, 2, and 4 have been addressed by the state of Alaska and PWS. Administrative orders #280 and #297 led to the formation of the Alaska Mariculture Task Force, now called the AMA. The AMA is a non-profit organization, that represents >90 stakeholders across Alaska with the shared vision of "developing and supporting a robust and sustainable mariculture industry for the long-term benefit of Alaska's economy, environment, and communities" (Alaska Mariculture Task Force, 2018). The PM and project team (PWSEDD, NOF, ROKC) have participated in AMA meetings since 2021. PWS mariculture stakeholders have adopted this vision for mariculture for PWS and have held ongoing meetings since 2020, starting with a PWSEDD-hosted webinar series "Mariculture in PWS: Webinar Series for Independent Kelp Farmers." This series prompted conversations about a PWS community vision for mariculture and have continued through PWSSC-hosted mariculture committee meetings and attendance at the 2021 and 2023 Mariculture Conference of Alaska.

In developing this project, we further addressed CPS Element 2 and 4 by determining that CEC can provide a source of heat for drying seaweed. We will further address this element by educating PWS residents about the mariculture industry and soliciting their input. During the duration of this project, we will begin Elements 3, 5-7. Regular meetings between stakeholders, a written record of meetings, and clear communication are our main strategies for consensus building and dispute resolution (CPS Element 3). These meetings will also be used to ensure sound management and implementation of the project (CPS Element 6). While we will continuously evaluate lessons learned and replicate successes, CPS Element 7 will continue beyond project duration as we develop long-term solutions for processing in PWS.

E. Project Linkages

Our project will further the EPA strategic plan Goal 2, Objective 2.1 by:

- Building capacity for an industry that will provide a nutritious food source, offer an economic alternative to the fishing industry, and mitigate climate change.
- Providing a solution to an industry barrier that prevents community members from benefiting from another economy and food source.
- Benefiting PWS communities which are disproportionately affected by environmental disasters due to its reliance on renewable resources and food insecurity.

- Using a community-led approach to address a community need.
- Advancing the ability of PWS and coastal Alaskan communities to have the same resources and opportunities in the mariculture industry as more populated areas.

F. Partner and Collaborate

This project promotes collaborations with diverse stakeholders by including a project team that represents industry, business, science, education, and farmers. Each organization included on this proposal has been involved in community vision planning for the mariculture industry at the state and PWS-level since 2020 and regularly communicates with each other and dozens of other stakeholders through AMA meetings, attendance at the Mariculture Conference of Alaska, and PWSSC-hosted mariculture committee meetings. During this project, we will hold 12 stakeholder meetings for the project team to evaluate progress and to disseminate information to other federal, state, academic, industry, and non-profit stakeholders.

Our partnership will allow us to meet our goal of providing dedicated processing capacity for seaweed in PWS. CEC will provide a waste heat source from their Orca Diesel Power Plant that can dry seaweed without high electricity costs. PWSSC will conduct the science by collecting data, determining what factors affect drying rates of seaweeds, and identifying ways to optimize drying efficiency. PWSSC will also leverage their education department for providing community events that attract a diverse audience. As a regional economic development organization, PWSEDD will facilitate stakeholder meetings and assist with identifying long term solutions for processing in PWS. The farmers, NOF and ROKC, will provide their seaweed for evaluating the drying efficiency of this structure and contribute to community events. Together, we have the resources and interest in solving this need for our community.

Partner Descriptions, Planned Roles/Contributions, and Project Interest:

Prince William Sound Science Center (PWSSC)- CBO: PWSSC will act as the pass-through entity for any contracts and ensure that funds are distributed after work has been performed. The PM, an employee of PWSSC, will participate in Activities 1-11 by managing the project, ensuring milestones are met, establishing the temporary structure, drying kelp, data collection, data analysis, reassessment/optimization in collaboration with project team, facilitating regular stakeholder meetings, collecting survey data at community events, planning the processing workshop, reporting, and disseminating results. PWSSC is participating in this project because it is dedicated to advancing the mariculture industry for community resilience and sustainable use of the PWS ecosystem.

Prince William Sound Economic Development District (PWSEDD)-CBO: PWSEDD serves the communities of Chenega, Cordova, Tatitlek, Valdez, and Whittier as a regional development non-profit organization. For over 25 years, the PWSEDD has worked with municipal and tribal governments, businesses, and residents to improve the business climate and the quality of life in PWS. The scope of PWSEDD's work ranges

from infrastructure development to mitigating climate change (McKinley, 2021). PWSEDD will assist with Activities 5-9 and 11 by leveraging their existing community relations to engage other stakeholders, advertise community events, network with stakeholders to identify long-term solutions for processing capacity, provide market information for the business viability analysis, and disseminate project results in PWS. PWSEDD is participating in this project because they recognize that processing is a barrier to industry growth, and therefore economic diversity of PWS.

Cordova Electric Cooperative (CEC)-industry: CEC is the only electric utility company for Cordova. CEC provides local, renewable sources of energy including two hydropower plants that provided 71% of electricity generation in 2022. A diesel power plant provides the remainder at a rate that is 7 times more expensive (CEC, 2023). CEC recovers ~10% of waste heat from the diesel plant for on-site heating. CEC has received funding from the Department of Energy for a pilot initiative titled "Resilient District Heating for Sustainable Energy Adoption in Cordova Emergency Center ([HYPERLINK "https://www.energy.gov/eere/iedo/technical-partnerships-foa-selections"])", that will evaluate diverting waste heat to city buildings. CEC will assist with Activity 1 by providing space on the Orca Power Plant property to erect a temporary structure that is heated with waste heat for drying kelp from 2024-2026. CEC is a non-financial partner and supports this project because it captures waste heat for the benefit of Cordova.

Noble Ocean Farms, LLC (NOF)-local business: NOF is co-owned by Skye Steritz and Sean Den Adel who began farming in 2021 in Simpson Bay of PWS and have been pioneers of the mariculture industry. For this project, they will provide kelp in spring of 2024-2026 and assist with activities 1, 2, 7, 10, and 11 by establishing the temporary structure, providing 1000 lb. of kelp for drying, assisting with drying operations, hosting community events, training processing workshop attendees, and presenting at the Mariculture Conference of Alaska. NOF is participating in this project because they do not have an alternative for processing seaweed and need local capacity to remain active in the mariculture industry.

Royal Ocean Kelp Company, LLP (ROKC)-local business: ROKC is a family-owned kelp farm that has been operating in Windy Bay of PWS since 2021. Co-owner, Thea Thomas, is also the chair of the AMA Outreach Committee. ROKC will assist with activities 1, 2, 7, and 11 by establishing the temporary structure, providing at least 500 lb. of kelp for drying, assisting with drying operations, hosting community events, presenting at the Mariculture Conference of Alaska, and disseminating information to the AMA. ROKC is participating in this project because they do not have an alternative for processing seaweed and need local capacity to remain active in the mariculture industry.

We will maintain these relationships into the future by continuing to meet during stakeholder meetings and work together on projects that improve prospects for the mariculture industry in PWS. The PWSSC will generate professional service contracts with PWSEDD, NOF, and ROKC to compensate for time allocated towards this project.

Our relationship with CEC is non-financial. We will abide by the EPA's Subaward Policy and EPA Guidance on Participant Support Costs by only compensating for time dedicated to progressing this project.

2.0 Project Activities/Milestone Schedule

A. Project Activities

Project Goal: Address an industry barrier by determining if waste heat can be used to efficiently dry large quantities of seaweed.

Objectives and Corresponding Activities (1-11):

1. Establish a temporary structure that uses waste heat from a diesel power plant to dry seaweed efficiently (1-6)
2. Identify long-term options for processing and assess business viability (5, 8-9)
3. Build acceptance or social license for mariculture (7,11)
4. Provide training to increase the mariculture workforce (10).

Activity 1. Establish a structure for drying seaweed using waste heat from a power plant. In the spring of 2024, we will construct a portable structure (steel frame, canvas cover) adjacent to the CEC Orca Power Plant in Cordova. With assistance from CEC, we will run ducting from the diesel power plant to the structure to divert waste heat from diesel generators. We will heat the structure for at least one week prior to drying kelp and utilize sensors to take daily measures of temperature and humidity inside and outside of the structure. These measurements will be used to assess consistency of the drying environment with varying outdoor conditions. In 2025 and 2026, this data will also be used to define the ideal temperature and humidity parameters for optimized drying rates and times. At the end of the drying season, this structure will be removed from CEC property. This activity will result in an established structure for drying and dedicated capacity for processing kelp.

Activity 2. Dry locally grown seaweed from 2024-2026. NOF and ROKC will provide a subset of their kelp harvest (~500-1000 lbs) to evaluate drying efficiency each year. NOF and ROKC will harvest their kelp from Simpson and Windy Bays, respectively, from their permitted farms. They will transport their kelp to the PWSSC where we will use an electric salad spinner to remove excess water. The kelp will then be transported to the portable structure at the CEC Orca Power Plant and distributed onto racks. We will utilize a variety of methods to minimize time spent distributing kelp and optimize the use of the space. This may include racks with trays, hanging kelp, or designing a tumbler system that moves the kelp continuously. At each stage, pictures will be taken to later evaluate density of kelp per rack for later correlation with drying rates/times. Drying will result in numerous data outputs including drying rate, drying time, water activity (a_w), pounds of wet kelp dried, density, labor hours, and internal/external temperature and humidity. This data will be used to reassess and optimize the efficiency of the structure for drying kelp for the following year. As the structure is optimized for efficient drying, we will increase the amount of wet kelp to determine the maximum

amount that can be dried per unit time. The farmers will assess quality control of dried, food-grade kelp by sending samples to Chris Sannito, the Seafood Technology Specialist at Alaska Sea Grant.

Activity 3. Quantify drying times, rates, heating needs, and labor hours necessary for adequate drying. Data collection will occur at regular intervals during the drying process (6, 12, 24, 48, 72, 96 hours, etc). We will use a_w, a ratio of vapor pressure of the kelp to the saturated vapor pressure of pure water that predicts bacterial and mold growth (Heldman, 2013), as a metric for dryness. A a_w of 0.7-0.8 (0.929 ± 0.025 average for wet kelp; Sappati et al., 2018) is required for a shelf-stable product (Gupta et al., 2011). However, a lower a_w would be ideal for developing crispier food-grade products or powdered kelp for beauty/hygiene products. We will evaluate whether we can dry to a a_w of 0.7-0.8 and the lowest a_w that can be achieved. To measure a_w, we will store samples in vacuum sealed bags and utilize an AquaLab water activity meter at the PWSSC laboratories, as described in Sappati et al., (2018). Frequent a_w measurements will be used to calculate drying rates and the average time to reach a desired a_w. We will keep records of hours spent distributing wet kelp, monitoring, and removing dry kelp through a log-in sheet to determine how much labor is required per unit of wet kelp that enters the structure. These data outputs will guide subsequent activities.

Activity 4. Analyze Data. Our analysis of drying data will focus on determining what factors affect drying rates and how much effort (hours, persons) is required per unit of wet kelp. We anticipate that numerous factors will affect drying including: internal/external temperature and humidity, kelp density on racks, fan/dehumidifier usage, kelp blade size, and pounds of wet kelp inside the structure. We will use linear and nonlinear regressions in Prism (Graphpad) to evaluate statistical relationships between drying rates and factors of interest. We will also identify the lowest a_w that can be achieved and the minimum time needed to reach a shelf-stable product (a_w =0.7-0.8).

Activity 5. Hold regular stakeholder meetings. We will hold stakeholder meetings at least 2 times per year to provide progress updates to the project team and build consensus. These meetings will be in person at the PWSSC or virtual. Other mariculture stakeholders will be invited to these meetings to learn about project progress and provide input. During these meetings, we will ensure milestones are being met, assess performance metrics, optimize drying efficiency, renegotiate resources, delegate tasks, identify ways to disseminate project results, identify and track progress towards long-term solutions for processing capacity, and resolve disputes. The PM will generate agendas for each meeting that allocate time for each of these tasks.

Activity 6. Reassess and optimize drying efficiency. Each year, the outputs of Activities 1-5 will be used to optimize the drying efficiency of the structure for the following year by maximizing the amount of wet kelp that can be dried and minimizing labor hours. To accomplish this, we will make modifications as needed including increasing rack space, using an alternative to racks (electric tumbler), altering kelp density, and utilizing fans and ventilation to reduce heat or adding ducting for more heat. Modifications will be

compared to previous methods to evaluate changes in drying rates and labor needs. This activity will provide science-backed information for best practices to dry kelp.

Activity 7. Assess social license for kelp farming. We will hold two types of community events during this project: a food-tasting demonstration (fall 2024, 2025) and a community forum (winter 2024, 2025). The food-tasting demonstration will provide information to community members on the kelp industry, samples of kelp products, and activities for children. The PWSSC education staff will assist with this event by advertising and providing existing mariculture-related K-12 activities. We will survey 50 participants at each event (n=2), orally or with a written survey (see Appendix A) that evaluates interest in eating and cooking with kelp and social license to operate.

The community forum will invite community members and stakeholders to provide input and ask questions about mariculture. This forum will be mediated by a TBD neutral third-party (e.g., a representative of the City of Cordova, Cordova District Fishermen's United) and responses will be recorded. We will also use a "social license to operate" survey to evaluate community approval of the mariculture industry and this project in comparison to background information like city of residence, profession, and duration of time living in Alaska. This survey was developed by the project team based on social license surveys for other industries and for seaweed (Boutilier, 2017; Billing et al., 2020). To avoid bias in our data, we will also survey participants at other PWSSC events that are not related to mariculture. This will also help us reach our desired sample size if events are not well attended. Oral and written responses will be binned into categories for main concerns and interests in the mariculture industry and growing capacity for drying kelp in PWS. We aim to survey a total of 200 participants during this project and use this data to track changes in social license for mariculture during and after this project.

Activity 8. Evaluate scalability and long-term solutions. Utilizing the CEC power plant property for a temporary structure is a short-term solution for providing dedicated capacity to drying seaweed. If this project demonstrates that utilizing waste heat is an efficient means of drying large quantities of kelp, we will evaluate several options for long-term drying capacity and explore alternatives. Identified long-term options include:

1. PWSSC offers a user lease agreement,
2. A kelp farmer cooperative is developed to lease the structure,
3. A small business is developed by a community member, or
4. Established fish processors take on seaweed processing.

Each of these options will depend on identifying an alternative site for the drying seaweed. Currently, CEC is not recovering waste heat for use off-site of the Orca Power Plant property. However, they have received funding from the Department of Energy for a pilot initiative, REDSEA, that will evaluate piping waste heat to city buildings to reduce community energy costs in Cordova. This may present an opportunity to continue using waste heat at another location in Cordova beyond the duration of this project. Alternatively, we may continue our collaboration with CEC, utilizing a site on or near

their property, to continue this project beyond 2026. Evaluating these options and exploring alternatives will include holding meetings with mariculture stakeholders and property owners adjacent to the CEC diesel power plant. These meetings will disseminate information, gathered during Activities 1-5, about drying efficiency using waste heat and the viability of a business that utilizes this method (Activity 9).

Activity. 9. Assess business viability. We will determine whether seaweed processing using waste heat is economically viable for a mariculture stakeholder or local business in PWS to continue operating beyond project completion. We will contract with the Alaska Manufacturing Extension Partnership (MEP) Center for 9 months in 2025-2026 to have a TBD University of Alaska business undergraduate conduct a viability analysis of our project. This student will compare data from this project to conventional drying methods and identify price points for food-grade and non-food-grade products (hygiene products, fertilizer, cattle feed) that would generate positive profit margins. This analysis will incorporate facility costs, projected price-points for waste heat, utility costs, and drying and effort data and synthesize data on existing kelp markets. The student will be responsible for identifying data sources with assistance from PWSSC and PWSEDD.

Activity 10. Train current and prospective kelp farmers about kelp processing. We will provide a processing workshop in 2025 and 2026. The PWSSC currently hosts an annual "Kelp the Sound" workshop which provides an overview of kelp farming and attracts participants from throughout PWS. This processing workshop will provide further training to teach attendees (n=20 per year) about processing, food-grade products, non-food-grade products, and marketing. This workshop will be free to participants and survey attendees (Appendix A) to improve workshop content.

Activity 11. Disseminate Results. We will share the results of this project at the Mariculture Conference of Alaska in Juneau (winter 2025, 2026), community food demonstrations (fall 2024, 2025), community forums (winter 2025, 2026), Delta Sound Connections and The Breakwater newsletters (winter 2024-2025), a City of Cordova council meeting (2026), and through scientific publication of drying results (fall 2026).

B. Milestone Schedule

This project will occur between the fall 2023 and fall 2026. Seaweed harvest occurs between April to May each year and we anticipate drying and data collection will take 3 weeks to complete. Data analysis will precede stakeholder meetings so that the project team and stakeholders can evaluate results prior to reassessment which will guide the following year's drying procedure. We have included 3 years of data collection to ensure that we have two opportunities to optimize drying efficiency. Community events and workshops will occur in winter months so that community members can attend during the off-season for fishing. In 2025-2026, we will evaluate long-term options over the course of at least 1 year. The business viability analysis will begin in the fall of 2025 and take 9 months to complete. Project activities will co-occur during project duration and completion of each activity represents a major milestone (Figure 1).

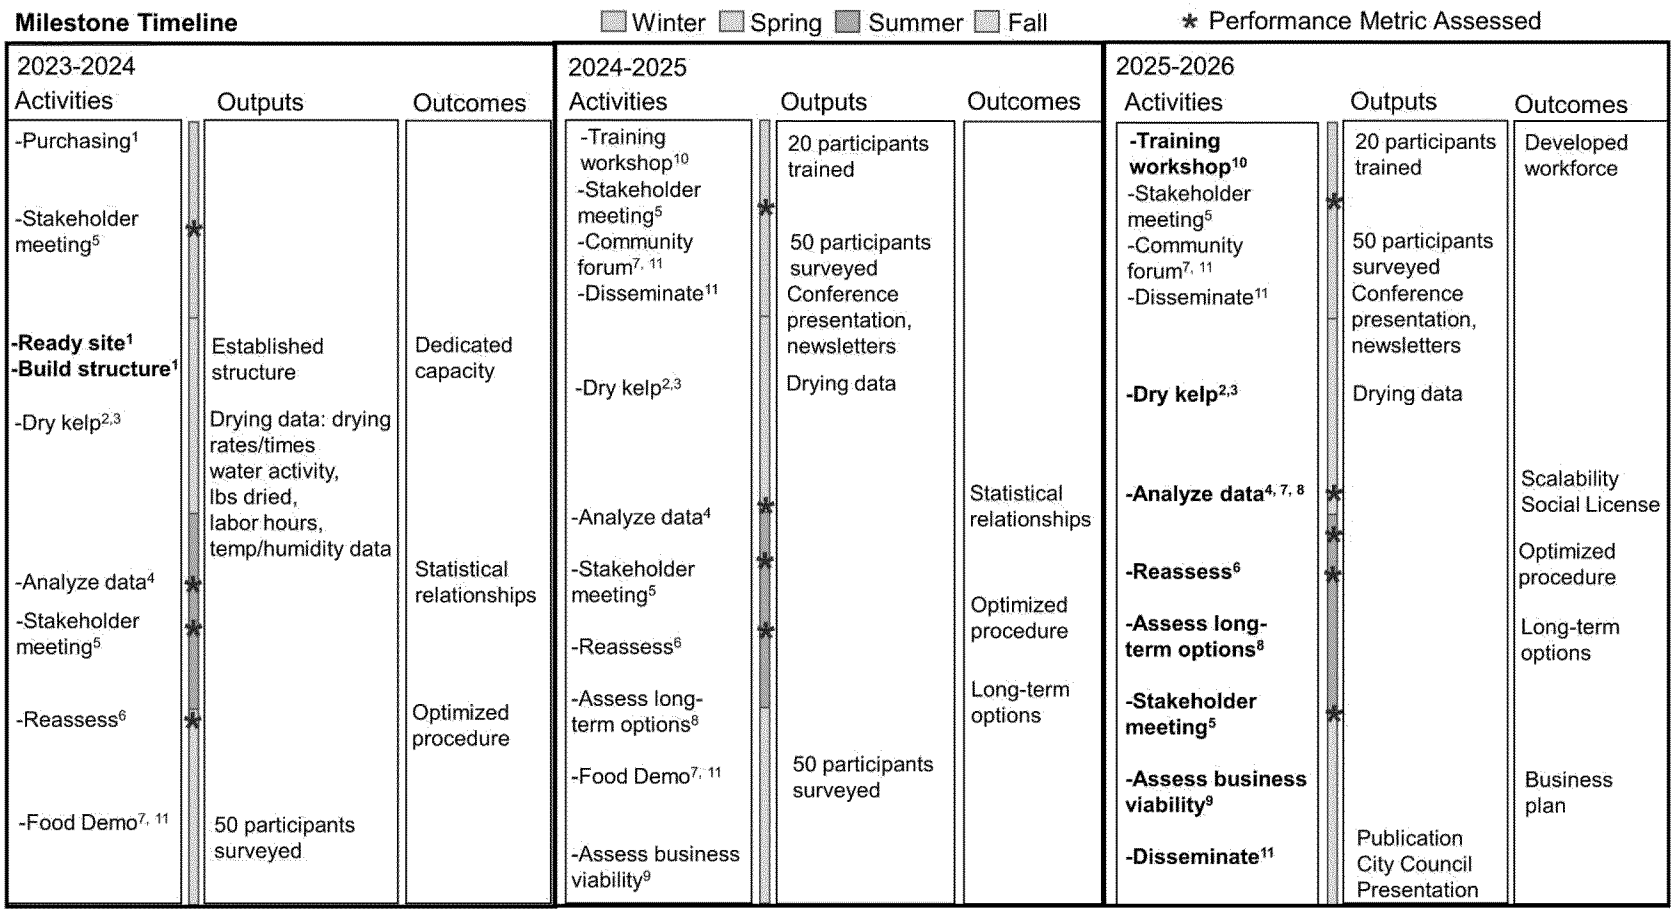

Figure 1. Project Milestone Schedule. Each year, starting in November, we will conduct activities (denoted by superscript to relevant Project Activities 1-11) which will result in outputs and short-term outcomes. Activities near the top of the chart occur first for each year with anticipated season for each activity denoted by color. A red asterisk indicates a performance metric will be used to assess project success at this time point (see Project Performance Management Plan). Activities in bold indicate a major milestone which is the completion of that activity (1-11).

3.0 ENVIRONMENTAL RESULTS

A. Environmental Results – See attached Logic Model

B. Performance Measurement Plan.

We will monitor the progress of this project through regular stakeholder meetings (Activity 5) and ongoing reassessments of drying operations (Activity 6) during at least 12 time points (Figure 1). Data analysis and reassessments will provide an opportunity after each drying season to assess data quality, identify trends in the data, and use those trends to improve the efficiency of drying operations. During each reassessment (summer 2024-2026), the project team will answer the following questions:

1. Is the structure working?
2. Do we have enough data (power analysis) and does it make sense?
3. Are we able to acquire a minimum, shelf stable a_w level of 0.8?
4. What can we change about the drying operation to increase efficiency?
5. Did we dry more kelp this year than the year prior?
6. Are community events well attended?
7. Is there bias in our survey data?
8. Are community member in favor of the project and mariculture industry?
9. Are workshops well attended and are attendees satisfied with training?

The answers to these questions will guide the following year's activities and be presented at stakeholder meetings. Stakeholder meetings will be used to make sure each project team member (PM, NOF, ROKC, PWSEDD, CEC) is completing assigned tasks and outputs are being generated and contributing to our short and long-term outcomes (see Logic Model). During each stakeholder meeting (summer, winter 2023-2026), we will answer the following questions:

1. Is the project team meeting the milestones of our established timeline (Figure 1)?
2. Are we generating anticipated outputs?
3. What short-term outcomes have we accomplished?
4. Can we broaden our collaborations with mariculture stakeholders?
5. What stakeholders or community members should we meet with about long-term options for drying capacity?
6. Do we have enough information to complete a business viability assessment?
7. What are the intermediate and long-term outcomes of our work?
8. What can we do to disseminate information more effectively to the community and mariculture stakeholders?

The answers to these questions will be used to ensure we are meeting project milestones (Figure 1) and that our outputs and results are being disseminated to mariculture stakeholders and the community.

C. Sustainability Plan and Community Vision

The state of Alaska and PWS envision "communities with a robust and sustainable mariculture industry for long-term benefit of Alaska's economy, environment, and communities". We also envision a mariculture industry that generates $100 million annually within 20 years that will increase economic diversity and food security for Alaska and PWS. Mariculture stakeholders agree that processing is the greatest barrier to this industry because it prevents product and market development and leaves farmers with 1000's of pounds of wet kelp that they process with meager equipment in their own kitchens. This proof-of-concept study provides a short-term solution to this industry barrier that will help current farmers stay in operation and begin developing products out of dried seaweed. We will use the results of this short-term solution to identify and establish a long-term solution so that PWS does not return to a state where it lacks processing capacity. Our results (Table 2) will be used to inform stakeholders, inspire new ideas and conversations, and build acceptance amongst community members for the mariculture industry. PWS is already a leader in Alaska mariculture and this project would maintain the momentum that we've spent years building to reach our community vision. The partners on this project represent a subset of the stakeholders interested in developing mariculture in PWS. Current work towards this vision includes:

- AMA is hiring a PWS mariculture liaison who will travel to all 5 PWS communities annually to share information and provide training.
- Native Village of Eyak operates a research farm in PWS that evaluates best practices for kelp farming.
- PWSEDD and PWSSC are partners with the Alaska Mariculture Cluster, led by the Southeast Conference, which will provide processing equipment funds by region.
- Native Conservancy offers a Native Regenerative Fund to support Native farmers who grow kelp and prevent barriers that exclude Native peoples from this industry.
- PWSSC received funds to develop a seaweed hatchery.
- PWSSC provides a "Kelp the Sound" farmer training workshop.
- *Exxon Valdez* Oil Spill Trustee Council (EVOSTC) funded the Mariculture Research and Restoration Consortium to study how mariculture farms affect the ecosystems of PWS, Cook Inlet, and Kodiak Island.

Our data and results will be shared with other communities in PWS through presentations to the AMA, the AMA-funded PWS mariculture liaison, and [HYPERLINK "https://amrtc.org/"], a repository for mariculture information across Alaska.

4.0 PROGRAMATTIC CAPABILITY

A. Organizational Experience

PWSSC has 34 years of experience of receiving federal and non-federal grants, managing projects, and reporting. PWSSC scientists have an extensive publication record and a track record of disseminating information to the community through

education programs, and [HYPERLINK "https://pwssc.org/education/delta-sound-connections/"] and The Breakwater newsletters. The PWSSC recently moved into its new 5-acre, 20,000 sq. ft [HYPERLINK "https://pwssc.org/support/new-campus/"] which includes advanced laboratories, a running seawater lab, and education space. During this project, the PWSSC will be utilized to stage the project, store supplies and equipment, and provide training workshops.

B. Staff Experience / Qualifications of Project Manager (PM)

The PM has 6 years of experience managing scientific research projects and currently manages 4 grants, 3 of which grow capacity for mariculture in PWS. These projects include 1) EVOSTC funded [HYPERLINK "https://evostc.state.ak.us/restoration-projects/project-search/sustainable-mariculture-development-for-restoration-and-economic-benefit-in-the-evos-spill-area-22220302/"] to evaluate fish interactions with mariculture farms, 2) NOAA funded Alaska Marine Education and Training Mini-Grant Program for farmer training workshops, and 3) Pacific States Marine Fisheries Commission funded project to start a kelp nursery at the PWSSC. These projects were developed through communication with PWS farmers and stakeholders. ROKC and NOF farmers are also involved in these projects and assisted the PM with providing the first kelp farmer training in 2023. PWSEDD staff provide additional expertise to this project through their extensive industry stakeholder network that spans PWS and multiple interest groups.

C. Expenditure of Awarded Grant Funds

The PWSSC has the adequate controls, systems, and procedures to comply with the EPA's Pre-Award Compliance Review for Nonprofit Organizations. If awarded, we will be prepared to submit the EPA's Administrative Capability Questionnaire prior to release of funds.

5.0 PAST PERFORMANCE

The following federal and state-funded assistance agreements have been successfully managed and either completed or in progress. All progress and financial reporting requirements have been timely and adequately reported.

1. *Long-Term Monitoring & Herring Research & Monitoring Program* (02/01/2017 to 01/31/2023), Award Total $11,819,289; NOAA- passed through from EVOSTC
   Eleven sub-awardees and one multi-year professional service contract
   NOAA reporting: Semi-annual financial and technical progress reports
   EVOSTC reporting: Semi-annual technical progress reports, annual financial reports
   Final technical reports required by both agencies
2. *Gulf Watch Alaska Research and Monitoring* (06/01/2023 to 05/31/2027), Award total $14,135,770; NOAA- passed through from the EVOSTC
   Nineteen sub-awardees.
   NOAA reporting: Semi-annual financial and technical progress reports
   EVOSTC reporting: Annual financial and technical progress reports
   Final technical reports required by both agencies

3. *Observations of Meteorological and Oceanographic Conditions* (07/01/19 to 03/01/22), Award total $383,715; NOAA- passed through from Alaska Ocean Observing System (AOOS)
   Semi-annual technical progress and financial reports
4. *Body size and spawning abundance of sockeye salmon* (07/01/19 to 03/01/22), Award Total $339,283; NOAA- passed through from the EVOSTC
   Annual technical progress and financial reports
5. *Facilities Replacement* (07/01/2019 to 06/30/2024 – expended and closed 05/31/2022), Award Total $17,500,00; State of Alaska; Department of Commerce, Community and Economic Development (DCCED) – passed through from the EVOSTC
   DCCED report requirements – Monthly financial reports with descriptive narrative progress reports – Certificate of Significant Completion
   EVOSTC report requirements – Project status updates as requested by funder

6.0 QAPP

We will not use existing environmental data or collect new data to complete this project.

SMOKEWISE ASHLAND

Better Together

SOFEE
SOUTHERN OREGON FIRE ECOLOGY EDUCATION

Ashland Forest Resiliency
STEWARDSHIP PROJECT

Dear EPA –

The City of Ashland is a municipality serving 21,500 residents who live in a heavily forested community that's experienced significant loss from wildfire and impacts from wildfire smoke. Ashland was rated #9 out of 377 Oregon communities analyzed for wildfire risk by the U.S. Forest Service in 2018. Ashland has been threatened by large wildfires including the 2010 Oak Knoll Fire, which burned 11 homes and damaged three more in less than an hour. The 2020 Almeda Fire began at the northern edge of the City and moved quickly down the valley, decimating the towns of Talent and Phoenix. The Ashland community has taken bold action to prevent more wildfire and plan for wildfire smoke. The Wildfire Division at Ashland Fire & Rescue helps organize Ashland Forest Resilience(AFR), Smokewise Ashland, Southern Oregon Fire Ecology Education(SOFEE) and Fire-Adapted Ashland. Each of these projects has made the community more prepared for smoke and wildfire.

Recently, the City of Ashland and Ashland Fire & Rescue secured a $40,000 grant with the Oregon ASP3IRE Center for helping organizations serving children adapt to wildfire smoke in Ashland, Oregon. Research and field work completed for improving (IAQ) in spaces utilized by children will be used for train-the-trainer classes to help organizations serving children develop their own smoke preparedness plans for improving health outcomes for the 91,000 children living in the Southern Oregon Wildfire Resilience Education area. Each child in Southern Oregon is at risk from the long-term health damages of PM 2.5. EPA funding resources and expertise are needed for improved collaborative planning for vulnerable populations and detailed risk assessments for children and youth for inclusion in regional wildfire plans. Additional funding will also facilitate implementation of more wildfire resilience education projects serving students and youth. The Ashland Forest Resiliency and City of Ashland is committed to:

- Facilitating the transfer of the SOFEE project from the City to Southern Oregon Forest Restoration Collaborative(SOFRC) for a broader geographic area and reach
- Sharing and development of smoke preparedness curriculum and resources for area facilities serving children 0-18 in train-the-trainer classes
- Assisting in development of diversity, equity and inclusion planning for regional wildfire resilience education
- Providing services for teacher training and collaborative planning of fire prevention, fire safety and fire basics education with ScienceWorks in student pilots

Sincerely,

Sara Jones, Community Engagement Coordinator, Ashland Forest Resiliency

Tina Kotek, Governor

OREGON DEPARTMENT OF EDUCATION
Oregon achieves . . . together!

Colt Gill
Director of the Department of Education

April 7, 2023

To: EPA Grant Review Committee
Subject: Letter of Endorsement for the Oregon Forest Restoration Collaborative

I am writing in support of a grant by Southern Oregon Forest Restoration Collaborative (SOFRC) with Environmental Protection Agency Region 10. The grant is an effort to advance the collaborative planning for wildfire resilience education for all student populations and learners including underserved and vulnerable populations. SOFRC is coordinating with regional education partners and land management organizations to provide wildfire education in Southern Oregon in an effort to be more adapted and prepared for wildfire and smoke. The implementation of the FireBright and Southern Oregon Forest & Fire Ecology curriculums will assist in these efforts. This collaboratively planned fire education for k-12th grade students and youth workforce training and development in the Rogue Valley will facilitate greater coordination among organizing partners and achieve the mission set forth in the National Cohesive Wildfire Strategy for – *Fire-adapted communities: Human populations and infrastructure can withstand a wildfire without loss of life and property.*

The FireBright and Southern Oregon Forest & Fire Ecology program will have students in Southern Oregon be informed and engaged by understanding fire ecology, wildfire resilience and forestry education and develop their knowledge, skills, and confidence so they can be stewards of a healthy forest and make good decisions during a wildfire or smoke emergency. The end result will have students and families actively participate in future decisions that will shape the economic, social, and ecological outcomes from science-based management of Southern Oregon's forest ecosystems. Additionally, addressing air quality and community resiliency challenges, students and teachers will partner with our education coalition to address the threats from increasing wildfire. The student learning goals will meet the education goals outlined in the Rogue Valley Integrated Fire Plan (RVIFP) and the funding will serve as a conduit for planning the long-term wildfire education and career pathways goals for meetings the needs of the student population.

Within the Southern Oregon area, students recently went through both home loss and evacuation during the Oregon 2020 Fire Storm where locally, the Almeda and South Obenchain Fires burned 2900 homes. Students and families are still currently displaced from these fires which creates a social and economic burden on families. As part of this program that provides comprehensive trauma informed wildfire education students receive the social-emotional support and wrap around education needed to thrive in a wildfire prone environment. The investment within this project will benefit not only Southern Oregon, but will be extended and shared across Oregon. The end result will have greater education towards some of the greatest hazards associated with both smoke and wildfire due to the changing climate and warmer temperatures.

Education and community engagement are critical components of the RVIFP. When Southern Oregon students are educated about potential hazards faced during and after a wildfire and have a greater knowledge of our local forests; as a community, we are more prepared for climate change.
Sincerely,

Reynold Gardner, PhD

Jacob Burney
Office of Environmental Justice
USEPA Headquarters
William Jefferson Clinton Building
1200 Pennsylvania Avenue NW
Washington, DC 20460

Mr Burney,

We are writing to strongly support the proposal set forth by the Southern Oregon Forest Restoration Collaboration (SOFRC) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program in the Environmental Protection Agency (EPA) Region 10. Catastrophic wildfire impacts populations of all demographics in our region. Much of the attention and funding has gone to people living in the Wildland Urban Interface, but the recent uptick in wildfire activity, highlighted by the community destroying wildfires of 2020, called "The Labor Day Fires" showed us this approach is not enough to help those living in town, often as renters in denser developments, including trailer parks, who have less control over their landscapes to improve fire resiliency.

The challenges of living with wildfire, on the other hand, also present an opportunity. Careers in wildland firefighting are both lucrative and do not require a degree. For the past three years Oregon State University Extension (OSU Ext.) has been in partnership with SOFRC to develop and run a high school Career and Technical Education curriculum, FireBright, that helps students of all backgrounds both recognize that they can play a proactive role in defending their communities against wildfire, as well as helping interested students start on the path to a wildfire or natural resource related career.

In our development of the FireBright curriculum, we have found a desire by teachers and students for this material in all schools, but especially those schools working with students that come from a variety of backgrounds thanks to hands-on labs, career path development and trauma-informed care. We have worked with students that have faced expulsion, have experienced high levels of trauma in their lives, including due to loss from catastrophic wildfire, and students from lower income families.

With SOFRC's help, OSU Ext has been able to develop the FireBright Curriculum and pilot test it in 5 different schools. Through this proposal, SOFRC seeks to build on this work by spreading the FireBright Curriculum as well as the Sothern Oregon Forest & Fire Ecology (SOFFE) curriculums to additional schools, provide more concrete pathways to wildfire careers by adding paid internship opportunities and trainings, and helping students to graduate from high school with certification to fight wildfire. This is an opportunity for the long term, to help wildfire vulnerable communities to help themselves, while getting paid to do so.

We greatly appreciate your consideration of this proposal to help continue and expand on great work being done to help our local communities become resilient to wildfire in the face of climate change.

Kara Baylog
Program Coordinator – FireBright Lead Author

April 12, 2023

Dear EPA Decision-Makers –

My name is Benjamin Ho and I am writing in support of a grant by Southern Oregon Forest Restoration Collaborative (SOFRC with Environmental Protection Agency Region 10(EPA) to advance collaborative planning for wildfire resilience education for all student populations and learners including underserved and vulnerable populations.). I am a science teacher at Central Medford High School. Central is the Medford School District's alternative high school, and we serve the most at-risk students in the entire district. In addition to students with clearly identified and defined barriers to success, we also have students that simply need education to look different. With that end in mind, I was part of a district committee that transformed our school into an interdisciplinary co-taught project-based learning school of choice. I was responsible for implementing our natural resources CTE curriculum again this year with the added challenges of the paradigm shift our school embraced.

This shift of course posed substantial challenges, but I was once again fortunate to have the opportunity to collaborate with The Southern Oregon Forest Restoration Collaborative (SOFRC). Jennifer Payne was my point of contact for the organization and main collaborator during the piloting of the program last year and has continued to be an invaluable resource and partner for both myself and the success of my program. It was crucial for me to be able to work with SOFRC again to be able to tailor the already excellent curriculum for my ever-changing population's needs as well as support organizing the suite of local industry experts that we have been able to host for both classroom and field experiences.

I will be shifting to our district's new middle school next year and have already been approved to teach a forestry elective. I will, without a doubt, be incorporating SOFRC's FireBright and Southern Oregon Forest & Fire Ecology curriculums as part of the course. I have seen how transformative the education has been for my high school students the past several years, and I am eager to see how the curriculums can support younger students' ownership of not only their own education, but of the Rogue Valley itself. Supporting students desire for stewardship of our natural resources is a personal goal, and I truly believe that the work that SORFC is doing to help collaboratively plan fire education for k-12th grade students and youth workforce training and development in the Rogue Valley can support students personal and professional growth.

Sincerely,

Ben Ho

Dear EPA Decision-Makers –

I am writing in support of a grant by Southern Oregon Forest Restoration Collaborative (SOFRC) with Environmental Protection Agency Region 10(EPA) to advance collaborative planning for wildfire resilience education for all student populations and learners including underserved and vulnerable populations.

Over the past four years, I have served as the lead for Oregon Department of Forestry (ODF) on a USDA funded LSR grant to co-develop the FireBright curriculum and implement it in five pilot schools in Jackson County, serving as lead instructor for many lessons, teacher trainings, and site coordination for field labs. In collaboration with OSU Ext. and SOFRC, we have provided wildfire resiliency and career education for students in underserved, fire-prone rural areas.

ODF has invested resources, leveraged community relationships and collaboratively fostered commitments from community partners to prepare to expand FireBright career pathways and wildfire resiliency education for all efforts. ODF is committed to continuing this work as outlined in the SOFRC Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program in the Environmental Protection Agency (EPA) Region 10 grant, to advance the collaborative planning for wildfire resilience education for all student populations and learners including underserved and vulnerable populations. SOFRC is coordinating with regional education partners and land management organizations to provide wildfire education in Southern Oregon in an effort to be more adapted and prepared for wildfire and smoke. The implementation of the FireBright and Southern Oregon Forest & Fire Ecology curriculums will assist in these efforts. This collaboratively planned fire education for k-12th grade students and youth workforce training and development in the Rogue Valley will facilitate greater coordination among organizing partners and achieve the mission set forth in the National Cohesive Wildfire Strategy for – Fire-adapted communities: Human populations and infrastructure can withstand a wildfire without loss of life and property.

The FireBright and Southern Oregon Forest & Fire Ecology program will have students in Southern Oregon be informed and engaged by understanding fire ecology, wildfire resilience and forestry education and develop their knowledge, skills, and confidence so they can avail themselves of natural resource career opportunities and be stewards of a healthy forest and make good decisions during a wildfire or smoke emergency. The result will have students and families actively participate in future decisions that will shape the economic, social, and ecological outcomes from science-based management of Southern Oregon's forest ecosystems. Additionally, addressing air quality and community resiliency challenges, students and teachers will partner with our education coalition to address the threats from increasing wildfire. The student learning goals will meet the education goals outlined in the Rogue Valley Integrated Fire Plan (RVIFP) and the funding will serve as a conduit for planning the long-term wildfire education and career pathways goals for meetings the needs of the student population. Education and community engagement are critical components of the RVIFP. When Southern Oregon students are educated about potential hazards faced during and after a wildfire and have a greater knowledge of our local forests; as a community, we are more prepared for climate change

Sincerely,

Herb Johnson, Prevention Forest Officer, Oregon dept. of Forestry SWO District

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Form 990 required: Yes

Dear Taxpayer:

We're responding to your request dated July 22, 2019, about your tax-exempt status.

We issued you a determination letter in March 2006, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

We also show you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Under IRC Section 170, donors may be eligible to deduct contributions they make to you exclusively for the charitable purposes specified in Section 501(c)(3). If you solicit contributions or gifts for non-501(c)(3) purposes, you must include a statement indicating that these payments aren't deductible as charitable contributions for federal income tax purposes.

In the heading of this letter, we indicated whether you must file an annual information return. If you're required to file a return, you must file one of the following by the 15th day of the 5th month after the end of your annual accounting period:

- Form 990, Return of Organization Exempt From Income Tax
- Form 990EZ, Short Form Return of Organization Exempt From Income Tax
- Form 990-N, Electronic Notice (e-Postcard) for Tax-Exempt Organizations Not Required to File Form 990 or Form 990-EZ
- Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation

According to IRC Section 6033(j), if you don't file a required annual information return or notice for 3 consecutive years, we'll revoke your tax-exempt status on the due date of the 3rd required return or notice.

You can get IRS forms or publications you need from our website at www.irs.gov/forms-pubs or by calling Ex. 6 Personal Privacy (PP) Ex. 6 - Personal Privacy (PP)

Deborah K Allan
Program Manager, AM OPS 1

Oregon State University

April 10, 2023

Dear EPA Decision Makers,

I am writing in support of the grant proposal submitted by Southern Oregon Forest Restoration Collaborative (SOFRC) with Environmental Protection Agency Region 10 that will advance collaborative planning for wildfire resilience education for all students and educators throughout the Southern Oregon region with a specific and intentional lens to include underserved and vulnerable populations.

Oregon Natural Resources Education Program (ONREP) supports the goal of the grant: students in Southern Oregon understand fire ecology and learn about wildfire resilience so they can be stewards of healthy forests, exhibit responsible behaviors, and make good decisions before, during, and after wildfire events. ONREP professional development events for Oregon educators and resources reach rural communities and underserved schools and programs.

SOFRC is coordinating with ONREP, regional education partners and land management organizations to provide wildfire education through the implementation of the Fire Bright and the Southern Oregon Forest & Fire Ecology curricula. This collaboratively planned fire education for students in grades K-12, and youth workforce training and development in the Rogue Valley will facilitate greater coordination among organizing partners and contribute to the International Association of Fire Chiefs' vision:

> "To safely and effectively extinguish fire when needed; use fire where allowable; manage our natural resources; and as an international community to live with wildland fire."

ONREP is committed to supporting teacher professional development events using Fire Bright and SOFEE curricula to build student environmental literacy focused on wildfire awareness and knowledge, cultural use of fire, wildfire basics, prevention, ecology, effects, and behavior is integrated into all classrooms at every level throughout Oregon. The Southern Oregon Wildfire Resilience Education Program (WREP) will be a collaborative model for future regional WREPs. ONREP can help facilitate delivering the WREP model to communities across Oregon.

Please feel free to contact me if you have any questions.

Sincerely,

LeeAnn Nikkelson

OMB Control No. 2030-0020
Approval expires 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 0.5 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Southern Oregon Forest Restoration Collaborative

Address: PO Box 1946

City: Jacksonville

State: Oregon Zip Code: 97530

B. Unique Entity Identifier (UEI):

C. Applicant/Recipient Point of Contact

Name: Terry Fairbanks Phone: Ex. 6 - Personal Privacy (PP) Email: tfairbanks@sofrc.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints, unless covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination under federal law based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints, unless covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ■ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ■ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ■ Yes ☐ No

b. Is the notice posted in a prominent place on the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ■ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ■ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☑ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. 563 (1974))** ☑ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

n/a

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

n/a

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items “Applicant” means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. “Recipient” means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. “Civil rights lawsuits and administrative complaints” means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. “Civil rights compliance review” means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write “NA” for “Not Applicable.” In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Oregon Forest
Resources Institute

April 3, 2023

Dear EPA Decision-Makers,

I am writing in support of the grant by Southern Oregon Forest Restoration Collaborative (SOFRC) with Environmental Protection Agency Region 10 that will advance collaborative planning for wildfire resilience education for all students, including underserved and vulnerable populations.

The goal of the grant is for students in Southern Oregon to understand fire ecology and learn about wildfire resilience so they can be stewards of a healthy forest, and make good decisions during a wildfire or smoke emergency. SOFRC is coordinating with regional education partners and land management organizations to provide wildfire education through implementation of the FireBright and Southern Oregon Forest & Fire Ecology curricula. This collaboratively planned fire education for students in grades K-12, and youth workforce training and development in the Rogue Valley will facilitate greater coordination among organizing partners and achieve the mission set forth in the National Cohesive Wildfire Strategy for – *Fire-adapted communities: Human populations and infrastructure can withstand a wildfire without loss of life and property.*

In support of the grant, Oregon Forest Resources Institute is committed to supporting teacher training and providing our materials to teachers and their students.

Please feel free to contact me if you have any questions.

Sincerely,

Norie Dimeo-Ediger

Norie Dimeo-Ediger, Director of K-12 Education Programs

Objective

Contribute communication skills & education experience to regional problem-solving efforts where my abilities can be utilized for positive community outcomes.

Relevant Experience

2019 to present

Education & Workforce Development Director
Southern Oregon Forest Restoration Collaborative, Jacksonville, OR
Provide evaluation for federally funded wildfire curriculum pilot project. Write student assessments. Document project. Serve as liaison with teachers and project team. Coordinate and implement curriculum delivery. Co-lead pilot lessons. Provide outreach to community. Chair team meetings. Track budgets and provide progress reports.

2019 - 2021

Education & Outreach Program Director
Applegate Partnership & Watershed Council, Jacksonville, OR
Develop watershed education program. Write grant proposals. Coordinate and implement programming for public school students. Supervise Interns. Develop budgets and project planning. Write progress reports for grant reporting.

2007 - 2011

Storm Water Management Public Education & Outreach Consultant City of Chico, CA
Develop and coordinate public education programs for the City of Chico and Butte County; Develop and coordinate public school education program; Develop outreach materials and disseminate; Provide public presentations; Manage website content; Serve as contact for the press; Collaborate with local government and community groups; Develop and track budgets; Hire and supervise subcontractors and interns; Collect data; and Report on all program activities and benchmarks reached.

2008 - 2010

Administrative Secretary III
Butte Community College, Oroville, CA
Organize and manage the activities of multiple departments: Hire, train and supervise student employees; Interpret and apply policy as appropriate; and Maintain confidential issues.

2007 - 2008

Director of Communications, Interstellar Studios, Chico, CA
Write and submit Informal Science Education, NSF proposal to secure three million dollars in funding for International Year of Astronomy project; Co-Edit internationally distributed e-newsletter; and Serve as liaison. Track budget and provide quarterly reports.

2005-2007

Public Education & Outreach Coordinator
Butte Environmental Council, Chico, CA
Coordinate programs and events; Supervise volunteers and interns; Develop outreach materials and disseminate; Serve as contact for the press; Collaborate with non-profits and government; Track budgets; Collect data and coordinate survey; Report on program activities.

Teaching Experience

2000-2015

Fifth Grade ELA Teacher, Washington School, Prescott, AZ
First Grade Teacher, Second Mesa Day School, Hopi Reservation, AZ
Art Teacher, Public School 157, Brooklyn, NY
Seventh grade teacher, Hotevilla-Bacavi Community School, Hopi Reservation, AZ

Education

BA degree, Liberal Arts, The New School for Social Research, New York, NY, 1998, Deans List. Full time student 1996-98.

Arizona Teacher Certification (Grades 1 – 8), 2015
Oregon Teacher Certification (PreK – 12), 2018

Arizona State University, Masters Degree in progress, Social Work
Fall 2016, 9.0 units earned, 4.22 GPA

Skills

Proficient Computer Skills: Microsoft Word, Excel, PowerPoint, Outlook; Adobe software applications; and web applications. Facilitation of Technology of Participation strategic planning and consensus building workshops for community development.

NIMS4MIM Budget Detail

	Description	Total
Personnel	Project Manager @ $60,000 annual salary x 25% of time on project for years 1 & 2 = $15,000 per year and x 15% of time on project for year 3 = $9,000; $39,000 total Environmental Science Tech @ $50,000 annual salary x 40% of time on project for years 1 & 2 = $20,000 each year and 20% of time on project for year 3 = $10,000; $50,000 total	$89,000.00
Fringe Benefits	Project Manager @ 16.8% x $39,000 = $6,552 Environmental Science Tech @ 16.8% x $50,000 = $8,400	$14,952.00
Travel	Year 1 travel to DVIR, ID $4,133.16 Year 2 travel to DVIR, ID $5,166.45 Year 3 travel to DVIR, ID $7,233.03 *Travel costs for each trip include mileage, lodging, and M&IE and are detailed in budget narrative.*	$16,532.64
Equipment	None	$0
Supplies	Software (ArcGIS license), year 1 $ 2,295.00 Field Supplies, year 2 $ 2,881.55 Lab Analysis of Samples, year 2 $44,134.00	$49,310.55
Contractual	Grant support $50/hr x 10 hrs/mo. x 12 mo. x 3 yrs, $18,000 Bookkeeping $50/hr @ 2.5 hrs/mo. x 12 mo. x 3 yrs, $4,500	$22,500.00
Construction	None	$0
Other Direct Costs	TEPP Subaward • Grant Coordinator, $50,000 per yr x 3 yrs, $150,000 • Videographer, $20/hr x 29 hrs/week x 3 mos, $6,960 • Sho-Pai Tribe IDC Rate: 20.33%, $31,909.97 Fish and Game Subaward *(details in narrative below)* • Staff Wages: Director, $10,233; Habitat Manager, $7,833.70; Fisheries Biologist, $7,833.70 Participant Support Costs • Training event meals, $15 per person x 10 people x 13 events, $1,950 • Coursera© GIS training course $49/month x 6 people x 5 months, $1,470	$218,190.37
Indirect Charges	10% de minimus indirect cost rate • Year 1: $104,808.16 MTDC x 10% = $10,480.82 • Year 2: $100,562.00 MTDC x 10% = $10,056.20 • Year 3: $36,925.03 MTDC x 10% = $3,692.50	$24,229.52
TOTAL PROPOSAL REQUEST		**$434,715.08**

Budget Narrative

Personnel & Fringe Benefits

Two personnel will be compensated for contributions to this grant: Casey Bartrem (Project Manager, TIFO) and a TIFO Environmental Science Tech (EST). The budget reflects their respective salaries and percentage of time committed to the grant as follows:

Casey Bartrem, Project Manager: Ex. 6 Personal Privacy (PP) time, yr 1	Ex. 6 Personal Privacy (PP)
Casey Bartrem, Project Manager: Ex. 6 Personal Privacy (PP) time, yr 2	
Casey Bartrem, Project Manager: Ex. 6 Personal Privacy (PP) time, yr 3	
Environmental Science Tech: $50,000 x 40% time, yr 1	$20,000
Environmental Science Tech: $50,000 x 40% time, yr 2	$20,000
Environmental Science Tech: $50,000 x 20% time, yr 3	$10,000
Total Personnel Cost:	**$89,000**

Fringe benefits are based on a rate of 16.8%, which includes FICA (6.2%), State Unemployment Insurance (1.0%), Workers Compensation (0.4%), Medicare (1.5%), Retirement (1.5%), and Health Insurance (6.2%).

Casey Bartrem, Project Manager: Ex. 6 Personal Privacy (PP)	$ 6,552
Environmental Science Tech: $50,000 x 16.8%	$ 8,400
Total Fringe Benefits:	**$14,952**

Travel (key personnel)

Year 1: Oct 2023 – Sep 2024

Casey Bartrem and Tech – Moscow, ID to DVIR, ID (918 miles round trip) at GSA mileage rate of $0.655/mi = $601.29 for transportation costs. One (1) night lodging at $98/night for two people = $196. Two (2) days M&IE at $59/day for two people = $236. Total cost per trip = $1,033.29

Four (4) total trips in year 1: $1,033.29/trip x 4 = $4,133.16

Year 2: Oct 2024 – Sep 2025

Casey Bartrem and Tech – Moscow, ID to DVIR, ID (918 miles round trip) at GSA mileage rate of $0.655/mi = $601.29 for transportation costs. One (1) night lodging at $98/night for two people = $196. Two (2) days M&IE at $59/day for two people = $236. Total cost per trip = $1,033.29

Five (5) total trips in year 2: $1,033.29/trip x 5 = $5,166.45

Year 3: Oct 2025 – Sep 2026

Casey Bartrem and Tech – Moscow, ID to DVIR, ID (918 miles round trip) at GSA mileage rate of $0.655/mi = $601.29 for transportation costs. One (1) night lodging at $98/night for two people = $196. Two (2) days M&IE at $59/day for two people = $236. Total cost per trip = $1,033.29

Seven (7) total trips in year 3: $1,033.29/trip x 7 = $7,233.03

Total Travel Cost: $16,532.64

Equipment

There are no equipment costs associated with this budget.

Supplies

ArcGIS License (ESRI). TEPP and F&G have access to a license through the Tribe; TIFO's GIS Professional Basic Annual License will be purchased for $765/year for 3 years totaling $2,295.00.

Field supplies and laboratory expenses for analyses of samples will be purchased in year 2 (2024-25) of this grant and the items and costs are summarized in the tables below:

Item	Purpose	Unit Cost	Number	Total Cost
Rite in the rain notebook	data collection	$ 11.09	20	$ 221.80
Rite in the rain pen	data collection	$ 17.33	10	$ 173.30
Insect repellent	field work	$ 9.71	10	$ 97.10
Sunscreen	field work	$ 8.99	10	$ 89.90
Whirl pak bags	soil sampling	$ 455.61	1	$ 455.61
Ziplock bags - 2 gal	soil sampling	$ 17.97	1	$ 17.97
Permanent marker	sampling	$ 41.44	1	$ 41.44
1 L glass bottle	water sampling	$ 82.83	10	$ 828.30
8 oz glass jar	soils sampling (organics)	$ 174.24	2	$ 348.48
stainless steel bowl	soil compositing	$ 41.42	4	$ 165.68
steel shovel	soil sampling	$ 41.23	2	$ 82.46
stainless steel spoon	soil sampling	$ 33.80	1	$ 33.80
action packer	field work	$ 108.57	3	$ 325.71
Total Supplies				**$ 2,881.55**

Lab	Media	Test	Cost	No. Water Samples	No. Soil Samples	Total Cost
Anatek, Moscow, ID	water/solids	nitrate/nitrite	$ 45.00	50	50	$ 4,500.00
Anatek, Moscow	water/solids	priority pollutant metals	$191.00	50	25	$14.325.00
Anatek, Moscow	water/solids	organochlorine pesticides	$250.00	50	50	$25,000.00
Purple Air	PM2.5	particulate matter in air	$269.00	1		$ 269.00
Purple Air	PM2.5 power supply	particulate matter in air	$ 40.00	1		$ 40.00
Total Laboratory Expenses						**$44,134.00**

Total Supplies: $49,310.55

Contractual

Grant financial reporting by Kim Olson at 10 hours/month and [redacted]/hour for 12 months totals [redacted] per year for all 3 years at [redacted] Bookkeeping (e.g., payroll) support from Bev Bafus at 2.5 hours/month and [redacted]/hour for 12 months totals [redacted] per year for all 3 years at [redacted]
Total Contractual Cost: $22,500

Other Direct Costs

TEPP Subaward: The Tribal Environmental Protection Program (TEPP) will be awarded a subaward in the amount of $188,869.97. An indirect rate of 20.33% has been added to the TEPP subaward to cover their internal costs of creating a new position and providing the associate infrastructure. The breakdown of the subaward costs is as follows:

TEPP Grant Coordinator: $50,000/yr x 3 yrs	$150,000.00
Sho-Pai Tribe Videographer: $20/hr x 348 hours	$ 6,960.00
TEPP Indirect Costs: $156,960 x 20.33% IDC rate	$ 31,909.97
Total TEPP Subaward	$188,869.97

Fish & Game Subaward: The Fish & Game will be awarded a subaward in the amount of $25,900.40. No indirect rates applied to the F&G subaward. The breakdown of the subaward costs for F&G is as follows:

Buster Gibson, Director: [redacted]/hr x 150 hrs, yr 1	
Chris Cleveland, Habitat Mgr: [redacted]/hr x 150 hrs, yr 1	
Sterling Teller, Fish Biologist: [redacted]/hr x 150 hrs, yr 1	
Buster Gibson, Director: [redacted]/hr x 80 hrs, yr 2	
Chris Cleveland, Habitat Mgr: [redacted]/hr x 120 hrs, yr 2	Ex. 6 Personal Privacy (PP)
Sterling Teller, Fish Biologist: [redacted]/hr x 120 hrs, yr 1	
Buster Gibson, Director: [redacted]/hr x 40 hrs, yr 3	
Chris Cleveland, Habitat Mgr: [redacted]/hr x 40 hrs, yr 3	
Sterling Teller, Fish Biologist: [redacted]/hr x 40 hrs, yr 3	
Total Fish & Game Subawaard	$ 25,900.40

Participant Support Costs: Training events will provide meals for participants with a cost of $15 per person x 10 people for a total of 13 events for a total of $1,950. Coursera© GIS training course will be purchased at a cost of $49/month x 6 people for 5 months for a total of $1,470.

Total Other Direct Costs: $218,190.37

Indirect Costs

Indirect charges are calculated using a 10% de minimus indirect cost rate. Modified total direct costs are as follows for each year of the grant:

Year 1: $104,808.16.16 MTDC x 10% = $10,480.82
(*includes IDC on the first $25 K on each of the two subawards*)
Year 2: $100,562 MTDC x 10% = $10,056.20
Year 3: $36,925.03 MTDC x 10% = $3,692.50

Total Indirect Costs: $24,229.52

Cost Share

While cost sharing is not required under the EJCPS RFA, multiple partners have committed significant in-kind donations to project activities. The value of the cost-share has not been calculated for this cooperative agreement. However, past awards provide an example of cost-share contributions. TIFO received an EPA Environmental Justice Small Grant (EJSG) in 2021-22 for our collaborative *One Habitat* project with DVIR partners. TIFO, the Sho-Pai Tribe, and OCS donated significant time and in-kind resources to those activities. For the $75,000 grant award, partners committed an additional $21,358 in cost-share prior to initiating grant activities. Actual cost-share reporting totaled $31,904 at the end of the grant period.

Cost share commitments for this cooperative agreement follow; it is likely that additional contributions will be made from partners who are engaged later in the EJCPS process.

- **TIFO**: Margrit von Braun and Ian von Lindern will support development and delivery of NEPA, HIA, EIS, and EA trainings, and will participate in workshops in years 2 and 3. This time will be donated by TIFO.
- **TEPP**: Time for Marissa Snapp and Racheal Thacker will be donated by TEPP.
- **F&G:** Hours for Fish and Game personnel included in the grant budget are for time worked beyond the standard 40 hours/week. Time spent on the grant within the 40-hour work week will be donated by the department.
- **OCS**: All OCS staff time to coordinate and facilitate student participation will be donated.
- **USRT**: All USRT staff time and travel expenses to support the 8 Workshops will be donated.
- **ICL**: All ICL staff time to support trainings and other activities will be donated.

THE SHOSHONE-PAIUTE TRIBES
OF THE DUCK VALLEY INDIAN RESERVATION

TO: US EPA Office of Environmental Justice and External Civil Rights

FROM: Shoshone Paiute Tribes-Tribal Environmental Protection Program (TEPP)

RE: Letter of support

DATE: March 20, 2023

To Whom it May Concern,

On behalf of the Shoshone-Paiute Tribal Environmental Protection Program (TEPP) on the Duck Valley Indian Reservation, I am pleased to write a letter of strong support for TIFO and TEPP's collaborative NIMS4MIM innovation. Our Tribal lands are increasingly under pressure from mining and our small Tribe needs to develop a streamlined approach to reviewing proposed mines and developing technically sound and compelling responses to these proposals within the short government-to-government response period and public 45-day comment period required under federal law.

We are not alone in this challenge – many reservations face the same issue across the west. But we are a small Tribe and our capacity is easily stretched with the increasing number of potential mining sites. Adapting the (National Incident Management System) for this purpose is a unique and creative strategy because it enables us to assign quickly assign resources and coordinate between agencies effectively. TEPP will lead the effort to develop the NIMS4MIM strategy and has already identified other partners within the Tribe, including the Fish and Game Department and our Fire Department to join us in advancing this project. Fire has committed to providing training for us on how NIMS is used in emergency response, which we will then adapt to work for rapid response to proposed mining operations. In keeping with the Collaborative Problem Solving Model, we are also involving students at our local K-12 school, stakeholders from our broader community, and have engaged our Upper Snake River Tribes (USRT) Foundation partner in helping us develop the program.

TIFO has been a strong partner to TEPP and other groups in Duck Valley for the past three years, and we look forward to growing our collaboration with them through the development of NIMS4MIM. We are committed to coordinating on this effort, making sure to collect and integrate baseline environmental data, traditional ecological knowledge, wildlife habitat, and agricultural land use information in our planning. We will act as the liaison between groups, coordinating feedback before and after each in-person event. We will establish regular meetings with TIFO to keep grant activities on

schedule, and we will help to track performance measures throughout the grant period. TIFO will provide valuable technical support and expertise with sample collection and quality control, reviewing environmental impact statements, and other technical aspects of the project. They will also support with project management.

Through a subaward from TIFO, we will use grant funds to pay for the salary of a coordinator position at TEPP. When the grant is awarded, we will develop an agreement with TIFO detailing how the subaward will be distributed to TEPP (under 2CFR 200) to cover the costs outlined in the grant budget. TEPP will provide staff time for myself and any employees (other than the coordinator) who participate in the activities as an in-kind donation to the project.

Building NIMS4NIMS with all partners will enable us to meaningfully participate in the NEPA process and lead in determining our role in mining on and near our ancestral lands. We are looking forward to the collaboration with partners and EPA on this project. Please feel free to contact me if you have any questions.

Sincerely,

Marissa Snapp
TEPP Director

TO: US EPA Office of Environmental Justice and External Civil Rights

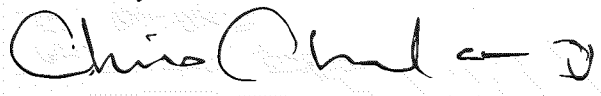
FROM: Shoshone Paiute Tribes- Fish & Game Department

RE: Letter of support

DATE: March 20,2023

To Whom it May Concern

As the Habitat Manager of the Shoshone-Paiute Tribes Fish and Game Department on the Duck Valley Indian Reservation, I am writing a strong letter of support for the NIMS4MIM project. This project is being jointly developed by multiple Sho-Pai Agencies in partnership with TerraGraphics International Foundation (TIFO). We have worked with TIFO since 2021 and successfully implemented the *One Habitat* Program with them and other partners here in Duck Valley under EPA Environmental Justice Small Grants (EJSG) funding.



The NIMS4MIM project will help us develop programing and capacity to respond to proposed mining operations through government-to-government consultation, a critical need for Duck Valley. Specifically, it will help us to better understand how proposed mining operations might impact our wildlife resources and thus our community. As part of this project, we will be able to develop a GIS database of critical wildlife habitat on the reservation. We will use that database, and our knowledge of fish and game in the area, to give feedback on development of the NIMS4MIM process throughout the three-year project.

Fish and Game is committed to meaningfully engaging in the workshops, trainings, and activities throughout the grant period. Relying on the Collaborative Problem-Solving Model will be a useful tool for developing NIMS4MIM; we will engage in community forum events to get feedback from stakeholders on how their input can best be represented in responding to proposed mining activities. We will also gain valuable technical skills from the training events, including benefiting from establishing GIS proficiency for our staff.

We will use grant funds to pay for staff time spent working on grant activities outside of their 40 hours/week, which will likely occur during community forums, GIS training, and in collection of field data. We will develop and sign an agreement with TIFO in compliance with 2CFR 200 in order to receive subawards under the grant.

We look forward to collaboratively building NIMS4MIM with our TIFO, TEPP and other Tribal partners, community stakeholders, and any additional project partners identified before or after grant funding is awarded.

Sincerely,

Chris, Cleveland
Habitat Project Manager

ELEMENTARY - JUNIOR HIGH - SENIOR HIGH

Barbara Pete
Education Specialist, Owyhee Combined School
Address
P.O. Box 100
Academic Way
Owyhee NV. 89832

To Whom it May Concern,

It's my pleasure to write a letter of commitment for the NIMS4MIM collaboration between TerraGraphics International Foundation (TIFO), the Shoshone-Paiute Tribal Environmental Protection Program (TEPP), and other partners on the Duck Valley Indian Reservation (DVIR). We have seen first-hand how mining impacts our community and having a process in place to better understand and respond to proposed mines is a serious need.

I am a teacher at the Owyhee Combined School (OCS) on DVIR. OCS is a part of the Nevada School District in Elko County. TIFO and OCS have collaborated successfully on previous endeavors in collaboration with the Tribe's Fish and Game department and TEPP. In 2022, our "One Habitat" project received EPA Environmental Justice funding that enabled us to engage dozens of 7-12th grade students at OCS in experiential learning activities, field trips, and scientific conferences on the reservation and in the greater Snake River Basin in Idaho, Nevada, and Washington. This was a successful and very meaningful project – several students went on to win national awards for = scientific research they did with the project leaders. We are looking forward to new collaborations and projects with TIFO, TEPP, Fish and Game, and other partners.

NIMS4MIM is an excellent opportunity to engage our OCS students in learning about baseline environmental conditions on the Duck Valley Reservation, and in learning about how Tribes are engaged in government-to-government consultation in the National Environmental Protection Act (NEPA) process. During baseline data collection, students will learn about sampling methods for soil and water analysis, where critical wildlife habitats are located, where important cultural and sacred sites are located, the locations for traditional medicine gathering, and how all of this can be integrated into GIS maps for easy retrieval and data analysis. We will also have them join some of the training activities and workshops to learn about the NEPA process, how environmental impact statements are prepared and reviewed, and how the Tribe can be meaningfully involved in participating in these processes. We will also invite outside partners who come to Owyhee to do training join the Environmental Science Class and give additional presentations to our students.

OCS will work with TEPP and TIFO to identify and support students for participation and facilitate their involvement. Any time for this will be donated by OCS as an in-kind service. Building NIMS4NIMS with all partners will enable us to meaningfully participate in the NEPA process and lead in determining our role in mining on and near our ancestral lands.

Sincerely,

Barbara J Pete

RE: Environmental Justice Collaborative Problem Solving Grant - USRT Letter of Commitment

The Upper Snake River Tribes (USRT) Foundation submits the following letter of commitment for Terragraphics International Foundation, Inc (TIFO) project proposal "National Incident Management System for Meaningful Input on Mining (NIMS4MIM)."

USRT is composed of four Indian tribes of the Upper Snake River region in Idaho, Nevada, and Oregon: the Burns Paiute Tribe, Fort McDermitt Paiute-Shoshone Tribe, Shoshone-Bannock Tribes of the Fort Hall Reservation, and Shoshone-Paiute Tribes of the Duck Valley Reservation. While the members of USRT currently reside within the Upper Snake River region, their aboriginal areas of use extend far beyond the region in all geographic directions. The four tribes have common vested interests to protect rights reserved through the United States Constitution, federal treaties, federal unratified treaties (including but not limited to the Fort Boise Treaty of 1864, Malheur Treaty of 1864, Bruneau Treaty of 1866, and Long Tom Creek Treaty of 1867), executive orders, inherent rights, and aboriginal title to the land, which has never been extinguished by USRT member tribes. USRT works to ensure the protection, enhancement, and preservation of the tribes' rights, resources, cultural properties, and practices and that they remain secured. These include but are not limited to hunting, fishing, gathering, and subsistence uses.

USRT is pleased to support the NIMS4MIM collaboration under EPA EJCPS programming in partnership with TIFO, the Duck Valley Tribal Environmental Protection Program (TEPP), and other Sho-Pai Tribal departments. Utilizing the EPA Collaborative Problem Solving model will be a valuable tool for developing the NIMS4MIM strategy because of the strong community engagement components and partnerships that TIFO and TEPP are actively developing. Increasing DVIR's capacity to engage in meaningful government-to-government consultation on mining activities is critically important, and the potential for NIMS4MIM to be adopted and adapted by other Tribes is encouraging.

ED_016126_00000664-00006

USRT is committed to supporting NIMS4MIM activities. We will help with coordination and facilitation of the 8 workshops outlined in the Workplan, and are looking forward to working with TIFO and TEPP to determine any additional support we can offer for the workshop events. USRT will provide this support as an in-kind donation to the project.

Sincerely,

Scott Hauser

IDAHO CONSERVATION LEAGUE

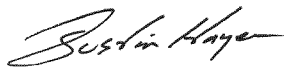
3/20/23

Letter of Support for Proposal from Terragraphics International Foundation (TIFO)

To: US EPA Office of Environmental Justice and External Civil Rights

The Idaho Conservation League is Idaho's oldest and largest state based conservation organization. We work across Idaho to protect water quality, special places and human health from the impacts that can result from improperly sited and poorly designed or poorly operated mining projects.

Our staff participates extensively in federal and state review of proposed mining operations, reviewing and commenting on numerous NEPA related comment opportunities annually. As part of our work on these issues we seek to ensure that members of affected communities are engaged in review and commenting opportunities.



Western Tribes are experiencing increased pressure from proposed mining activities. In the past, Tribal participation in these processes has been (at times) viewed or treated as members of the public, eroding the power of their right to participate as sovereign nations with unique opportunities to engage in government-to-government talks. Developing a program that strengthens systems for meaningful consultation is greatly needed.

ICL supported TIFO and DVIR's One Habitat project in 2022 when 18 Owyhee Combined School students visited McCall, Idaho to learn about the proposed Stibnite Mine. An ICL representative presented on concerns related to the potential environmental and ecological impacts of the activities. We are pleased to continue and grow this collaboration. ICL supports the NIMS4MIM effort under the EPA Environmental Justice and Collaborative Problem Solving program and will participate in workshops, meetings, and trainings where our expertise in past and ongoing mining impacts can be most useful. This will include supporting trainings on the NEPA process and EIS review, and in providing feedback on the development and tabletop implementation of NIMS4MIM. ICL will contribute expertise based on our knowledge of

the NEPA process, EIS review, and previous reviews of mining proposals in Idaho. We will provide staff time and associated expenses for this work.

We look forward to collaborating with TIFO, TEPP, and other DVIR partners on the NIMS4MIM project.

Thank you for your consideration of this important proposal

Justin Hayes
Executive Director

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. We determined that you are a public charity under the Code section(s) listed in the heading of this letter.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

Objective To obtain a position as a Senior Environmental Coordinator that utilizes my experience with environmental compliance, experience with soil, air, and water, sample taking, along with my experience being an Environmental Engineer at a gold mine and my bachelor's degree in environmental science.

Experience

June 2021 – Current

Environmental Director, Shoshone Paiute Tribes

- Assessing, analyzing and collating environmental performance data and reporting information to internal staff, clients and regulatory bodies
- Plan, direct and coordinate, through subordinate level staff, the Environmental Services department's work plan; assign projects and programmatic areas of responsibility; review and evaluate work methods and procedures; meet with key staff to identify and resolve problems
- Managing multiple EPA budgets
- Manage and direct the development and implementation of departmental goals, objectives, policies and priorities for each grant
- Keeping up to date with relevant changes in environmental legislation and initiatives including international legislation where applicable
- Producing educational or information resources for internal staff, clients or the general public
- Monitor various service contracts for compliance with established performance levels; follow-up and insure corrective action is taken as necessary
- Assess and monitor workload, administrative and support systems, and internal reporting relationships; identify opportunities for improvement; direct and implement changes

January 2020 – June 2021

Fisheries Biologist, Shoshone Paiute Tribe

- Fisheries, reservoir, and riparian habitat management
- Development, implementation and coordination of aquatic/riparian and reservoir operations and projects under the "Duck Valley Fisheries Operations and Maintenance Program" and infrastructure improvement grants
- Collection of fish and aquatic macro invertebrates of streams, rivers and reservoirs
- Oversight of seasonal work crew, including scheduling, training, supervising and payroll responsibilities
- Analyze and report data for quarterly and annual reporting requirements
- Monitor earthen dams and any investigations/actions to address potential problems
- Prepare and review management plans, grant applications and other documents

- Promote Duck Valley Fisheries at trade shows, fly fishing expos, fishing club presentations and other venues
- Program budget and drafting contracts, purchase orders, payment requests, etc.
- Inform, educate and engage tribal community about Fish, Wildlife and Parks Department
- Coordinate with private, state and federal agencies about projects

December 2016 – July 2019
Environmental Engineer I, Barrick Gold Corporation

- Coordinated activities necessary to obtain, modify and renew major environmental permits
- Compliance oversight for all Federal, State and Local Environmental permits
- Data management
- Regulatory reporting
- Liaison with State and Federal Regulators for site inspections, monitoring, reporting and permitting issues
- Major overhaul of environmental management database for Title V and Class II Air Permits
- Participated in Environmental Management Team that achieved ISO14001:2015 certification
- Title V and Class II Air Permit inspections, monitoring and reporting
- Environmental guidance on material usage and handling for the maintenance facilities to reduce hazardous waste generation and to ensure compliance with hazardous waste regulations
- Presentation of Environmental Awareness Training Program
- Sampling, regulatory reporting and interaction with all departments within the corporation
- Accompanied State and Federal Regulators during site inspections and communicated with regulators on a routine basis regarding existing environmental compliance and permitting issues
- Reporting releases, wildlife mortalities, excess emissions, and hazardous waste storage facilities inspections to State Regulators.

Education

Haskell Indian Nations University – Lawrence KS – BS Environmental Science
December 2016

Work Experience

Shoshone-Paiute Tribes Tribal Environmental Protection Program (TEPP) Pesticide Coordinator/Solid Waste Technician, March 2022-Current

- Maintain a recycling retrieval schedule, outreach on recycling, and operate equipment during collection.
- Housekeeping at the TEPP Solid Waste Station
- Retain and build Pesticide program duties include various inspections, outreach, retain program documents (Pesticide Ordinance, Quality Assurance Project Plan, Worker Protection Standard, and various forms).
- Nonpoint Source program coordination duties include, mapping of various trough locations, inspections, coordinate/partake maintenance work, and interact with tribal stakeholders for resources.
- EPA quarterly and annual reporting for two grants. Maintain open communication with EPA grant officers.
- TEPP Sampling program assistance during various sampling events
- Participate and conduct various outreach activities during community events (Arbor Day, health fairs, Owyhee school events, etc.).

Nevada Gold Mines Cortez District Environmental Technician, October 19, 2015-March 2022

- Train onboarding Environmental Technician(s) to take accurate samples and field records. Maintain
- all equipment. Familiarize with many site locations and ensuring safety.
- Coordinate with entire water media group with possible non-compliance issues and help to resolve
- in a timely manner.
- Interact with stakeholders around site to arrange sampling drop off schedules and procedures.
- Development of new sampling data collection program with stakeholders.
- Daily strategize sample locations for quarterly samples and weekly/monthly monitoring for
- monitoring group (water technicians).
- Upkeep of sampling schedule, changes on field sheets, ordering necessary supplies, and projects to
- improve field work.
- Provide weekly staff updates about pervious work, upcoming work, and outstanding items.
- Knowledge of Water Pollution Control Permits (WPCP), sampling procedure, navigating all well
- locations, and sampling equipment.

Shoshone Language Program at the Elko Band Council, September 2014-October 2015

- Shoshone Language Program assistant

- Assist with different Shoshone language programs/classes and with our evening language classes.
- Teach and coordinate the ITCN Head Start Shoshone language class.
- Create activities and curriculum for various ages to learn Shoshone.

Shoshoni Language Project at the University of Utah, June-August 2014

- Third summer returnee/intern
- Organize activities and dinner twice a week for first year summer students to learn and use only Shoshone for the duration of time it took for complete their tasks.
- Discuss with fluent Shoshone elders different phrases and teaching methods that would benefit the student effectively.

Shoshoni Language Project at the University of Utah, June-August 2013
Second summer returnee/intern

- Digitize cassette tapes of traditional Shoshone songs, stories and discussions.
- Organize a language profile and study medicinal Shoshone plants.
- Illustrate an informative children's pine nut picking book.

Newe-Water LLC. Contractor at the Barrick Goldstrike Mine, June-August 2012
Summer Worker

- Worked in the environmental department as an environmental clerk and field work observer.
- Main and Roaster warehouse labor worker.
- Miscellaneous contractor labor work around the mine.

Shoshoni Language Project at the University of Utah, June-August 2011

- First year summer student/intern
- Write and Illustrate a Shoshone children's book.
- Record and Edit sound files of fluent Shoshone elders for a Shoshone Talking Dictionary.

Education

Great Basin College: 2012-2023

- Courses towards degree requirements; degree in progress

Owyhee High School

- High School Diploma (2012)

Work Training

- Opacity (Expired)
- EQuIS Training
- Kubota RVT 900/1100
- Backhoe
- Bailer
- Various Sampling Equipment

OBECTIVE

Diversely educated individual who is working for the Shoshone-Paiute tribes Fish & Game Department where I utilize my education and work experience to fulfill the needs of the Fisheries Biologist position.

SKILLS

- Class B Commercial Driver's License
- OSHA Construction Safety and Health Trained
- Automotive Technology Certificate Degree
- Diesel Technology Applied Science Associate Degree
- Electrical Technology Applied Science Associate Degree
- Science Associate Degree
- Drone and Photography Experience
- EXCEL

EXPERIENCE

09/22 to Present
Shoshone-Paiute Tribes
Fisheries Biologist—Owyhee, Nevada

- Comprehend and carry out actions necessary for the fisheries project management plan—actions revolve around three put-and-take reservoirs, and this includes but is not limited to rainbow trout stocking, fish tagging, reservoir upgrades, and reservoir facility maintenance
- Utilized EXCEL for the purposes of a line item budget and rainbow trout data collection
- Performed rainbow trout research for the purpose of understanding the Shoshone-Paiute tribes' fisheries stocked species
- Basic understanding of aquatic invasive species such as quagga and zebra mussels
- Operation of equipment such as a skid steer, utility terrain vehicles, tractors, various power and hand tools, trucks, trailers, and outboard motor boats
- Attended and participated in the Columbia River Treaty workshop, Boise Fly Fishing Expo and the Upper Snake River Tribes commission meeting

12/16 to 7/17
Barrick Gold Corporation
Maintenance Training Cooperative (MTC) Diesel Student—Crescent Valley, Nevada

- Performed routine maintenance and repair on large mining equipment; for example, on equipment such as Liebherr and Cat Haul Trucks.
- Helped to maintain shop areas, tools, and equipment
- Carried out daily work inspections while making sure to identify safety concerns, hazards, and resolutions
- Worked as part of a team and practiced emotional intelligence to increase job safety and communication

EDUCATION

2020 Associate of Science
Great Basin College—Elko Nevada

- Familiar with laboratory setting and equipment
- Knowledge of aseptic technique and the inoculation process
- Ability to perform and interpret experiments

2021 Associate of Applied Science Electrical Technology
Great Basin College—Elko, Nevada

- Interpret relay ladder logic diagrams
- Ability to utilize digital multimeter for alternate current applications
- Exposure to single-phase, 3-phase power sources

2021 Associate of Applied Science Diesel Technology
Great Basin College—Elko, Nevada

- Read and interpret direct current electrical schematics
- Familiar with basic heavy-duty shop equipment
- Maintenance welding proficient (MIG, 7018 & 6010)

2010 Certificate of Automotive Technology
Universal Technical Institute—Rancho Cucamonga, California

- Familiar with hand and power tools
- Ability to utilize digital multimeter for direct current applications
- Familiar with basic shop equipment

Synergistic Activities Relevant to STEM Projects
Broadening participation in STEM with research/education with Native Americans:

1. Indian Summer: This project enabled Native American students to learn natural production and mortality factors associated with salmon in the early life stages. With a goal of increasing live egg-to-fry hatch rate, more than million eggs have been used in old recycled refrigerators streamside incubation boxes in 40 locations. The results indicated we had more than 90 percent live hatch rate. Idaho National Laboratory (INL) and Office of Navy Research (ONR) provided research funding.

2. SimSho-Ban: Computer simulation of indigenous knowledge at the Shoshone-Bannock school. The characterization of inadequate information technology resources in disadvantaged communities as a "digital divide" was a useful wake-up call. At the same time however, this metaphor is often taken to imply a problematic solution: the "one-way bridge." We have all the technology, they have nothing. This one-way bridge perpetuates stereotypes, and overlooks the valuable resources that disadvantaged groups can offer. This project is based on a "two-way" bridge approach in which we illuminate both technology and culture on each side of the divide. By deploying an anthropological framework, our collaborative design for simulation of Shoshone-Bannock traditional knowledge systems enabled a more symmetric epistemological basis, empowering local education while offering new approaches for participatory software design in high-tech frontiers.

3. TechLink: Imagine being in a spacecraft light years from Earth and surrounded by your own garbage but with nothing to eat. Your life would depend on your ability to recycle your waste and to grow food, and that would depend on your ingenuity in using materials at hand in your spacecraft. This experiment was designed to test how well food crops grow in substances available in space. Partners included students from Sho-Ban School in Fort Hall, Idaho, researchers from the J.R. Simplot Company of Boise, Idaho and researchers from the NASA Johnson Space Center in Houston, Texas. The professional and student science teams grew peas, potatoes, beans, squash, radishes and other vegetables in a combination of Martian soil, space mission wastes, and zeolite. The results of the experiment provided valuable information about food production in closed-loop systems that might ultimately affect the longevity of space missions.

4. Beaver Buster Transplant Team (BBTT): The objective of BBTT is two- fold. One, is to form partnerships in the relocation of beavers. The partners were defined as Universities, Tribes, High Schools, Forest Service Agencies, Bureau of Land Management, veterinary professionals, land owners and volunteers. Two, explore these scientific questions: Do all beavers carry Giardia? Are all beavers genetically related? Can the team transplant a wild beaver family safely to a new location? What can we learn together?

Current Position: **Program Manager, Utah State University**
Utah NASA Space Grant Consortium

Profile

Administrative professional offering versatile business management skills and proficiency in multiple software programs. Strong planner and problem solver who readily adapts to change, works independently and exceeds expectations. Able to juggle multiple priorities and meet tight deadlines without compromising quality. Close attention to detail.

Education

Utah State University, College of Business — Logan, UT
B.S. Degree, Business Information Systems, Office Systems Management Emphasis, December 1994 Minor in Accounting
Graduated *Summa Cum Laude*, [redacted] GPA

Professional Development:
Attend monthly business manager forums with USU Sponsored Programs Office to enhance knowledge of USU policies and procedures with contracts and grants.
Proficient in using USU Banner modules of finance, HR, and travel and USU EZ Buy
Work closely with departmental offices in USU Colleges of Engineering & Science
Working relationship with USU Contracts & Grants and Controller's Offices
Attend national and regional Space Grant Meetings of the National Consortia
NASA training in OEPM and Gateway reporting systems.

Key Skills

Office Skills:	*Office Management*	*Subcontracts & Awards*	*Executive Support*
	Grant Writer	*Budgets/Accounts*	*Event/Meeting Planning*
	Records & Database Management	*Spreadsheets/Reports*	*Travel Coordination*
		Proposal Preparation	*Calendaring/Event Mgt.*
Computer Skills:	*MS Word*	*MS Outlook*	*MS Visio*
	MS Excel	*MS Access*	*USU Banner System*
	MS PowerPoint	*MS Project*	*WordPress/Dreamweaver*

Experience

Utah NASA Space Grant Consortium & NASA EPSCoR of Utah — **Program Manager, 2018 – present**

Program Coordinator, 2004 – 2018

Utah State University, Logan, UT

Coordinate all programs of the Utah (formerly Rocky Mountain) NASA Space Grant Consortium headquartered at the University of Utah and formerly, Utah State University. Manage all aspects of the Space Grant, EPSCoR, and other affiliated Space Grant awards including writing of the grant proposals and budgets, working closely with 19 affiliate members of Space Grant throughout the State of Utah and monitoring their work through

ED_016126_00000666-00012

subawards, managing all sub-awards including tracking of expenditures and matching funds. Collect all data on the grants including NASA Internships, Fellowships and Scholarships, Research Infrastructure and Higher Education Awards, Pre-college and Informal Education components of the grant and reports all necessary data to NASA on a regular basis. Prepare annual and final reports on all of the grants and communicates regularly with NASA Office of Education and other Space Grant Consortia across the nation. This position includes solving problems, working well under pressure, managing multiple tasks simultaneously, taking self-initiative, maintaining confidentiality, and working with little supervision. Strong interpersonal and communication skills are a must. Specific duties being performed are outlined as follows:

- Utah NASA Space Grant Consortium grant proposals and budget preparation
- Prepare Affiliate subcontracts and work closely with affiliates to monitor activities
- Utah NASA Space Grant Consortium awards annual and final reporting
- Develop internal solicitations for competitive awards
- Facilitate fellowship/scholarship awards at different Space Grant institutions and maintain database of student awards
- Event management/Website management/General office/Regular correspondence with 19 Affiliate members

Additional Professional Experience:

TerraGraphics International Foundation, Inc. (TIFO) — **Grant Support Specialist, 2021-current**

Work as a grant support specialist with Terragraphics International Foundation (TIFO) on grants submitted to and funded by the Environmental Protection Agency (EPA). TIFO has extensive expertise in environmental and health impact assessment, education, and training and works with communities to address environmental health challenges. Specific duties performed are outlined as follows:

- Proposal budget preparation; creation and maintenance of grant subaward processes
- Post-award processes of financial tracking, funds draw-down, and monitoring of grant funds/expenditures
- Familiar with EPA policies and procedures, reporting, and financial systems
- Correspondence and communication with TIFO staff to maintain federal grants and adhere to EPA standards • Prepare final financial documents to close out awards

NIH SBIR Grant Proposal Preparer/Submitter — **Consultant, 2013 - 2017**

Worked as a consultant with Utah companies to prepare small business grant proposals to submit to the National Institutes of Health (NIH). To-date, these grants have brought in over a million dollars to small Utah companies.

Rocky Mountain NASA Space Grant Consortium
Utah State University, Logan, UT
Administrative Assistant, 1995 - 2004
Student Intern/Secretary, 1993 – 1995

Worked as a student secretary and then promoted to Administrative Assistant after graduation from USU. Assisted with proposals and contacted Space Grant Affiliates for inputs and upcoming projects, input data into annual CMIS reporting system, prepared newsletter of RMNSGC, and performed general office duties.

Ex. 6 Personal Privacy (PP)
Ex. 6 Personal Privacy (PP) | Moscow ID 83843 | USA
Ex. 6 Personal Privacy (PP)@terrafound.org Ex. 6 - Personal Privacy (PP)

Education

Ph.D., Environmental Science and Engineering, Yale University, 1980
M.F.S., Biometeorology and Atmospheric Studies, Yale University, 1973
B.S., Chemical Engineering, Carnegie-Mellon University, 1971

Professional & Technical Certifications

Professional Engineer, Idaho #Ex. 6 Personal Privacy (PP) (1975)

Professional Experience

Ex. 6 Personal Privacy (PP) is co-founder of TerraGraphics International Foundation (TIFO), a non-profit humanitarian environmental response organization. He served as Chief Executive Officer and Principal Scientist of TerraGraphics Environmental Engineering Inc. from 1984-2014. Under his direction, TerraGraphics developed into a one-hundred person multidisciplinary environmental firm, specializing in the design and management of complex projects including site characterization, risk assessment, hazardous waste remediation, engineering design, GIS and database, and remediation oversight. He has 46 years of national and international engineering and scientific experience that includes a variety of environmental assessments; studies in air, water, and soil pollution; toxic and hazardous materials investigations; remedial and cleanup plans; human health risk assessments; and application of statistical analysis techniques to multidisciplinary environmental problems. He has directed more than 40 major health/environmental projects including primary and secondary smelters, used battery processors, landfills, uranium mill tailings, and organic chemical waste sites in the U.S. He has designed and implemented international health risk assessment/remediation projects in countries with high levels of childhood morbidity and mortality including Russia, China, Peru, Bangladesh, Dominican Republic, Senegal, Nigeria, and Kyrgyzstan.

As a Principal Scientist at TIFO, Ex. 6 Personal Privacy (PP) works with marginalized mining and recycling communities around the world to address pollution-related health and environmental issues. Projects are implemented at the local level acknowledging diverse ethnic, religious, socio-economic, and geographic backgrounds to protect future generations and maintain livelihoods in vulnerable communities. TIFO's mission focuses on building environmental health capacity in both the host countries and the next generation of US scientists by sponsoring and directing collaborative projects, pairing US and local professionals and students; and encouraging programmatic research publications summarizing project outcomes and lessons learned. Since 2010, TIFO has partnered with Médecins Sans Frontières (MSF, Doctors Without Borders) in implementing joint medical, public health and environmental responses. TIFO's recent projects are evolving into a global juxtaposition of simultaneously assisting indigenous and disadvantaged communities in both the US and poor/middle income countries responding to the exponential demand for gold and green-energy technologies in the US, central Asia and west Africa. These projects offer promise of reviving a specialty metals industry in the US and providing subsistence incomes for poor populations suffering from climate-related loss of traditional agricultural and pastoral support systems. Conversely, there is the potential for catastrophic health and environmental damages. US efforts involve rigorous technical analysis of sophisticated regulatory environmental impact and permit applications, conveying that to uninformed communities, and advocating for the highest levels of environmental responsibility. Responses in poor countries involve identifying and implementing protective measures achievable within the socio-economic, political and economic capacity of the community. International projects often involve developing

practicable community, family, and individual worker level health interventions, as governments often lack the resources and capacity to effectively regulate industry in either the artisanal or formal sectors.

Ex. 6 Personal Privacy (PP) has served as an EPA Science Advisory Board and Clean Air Scientific Advisory Committee (CASAC) Subcommittee Member on several occasions, including: EPA Criteria Assessment Committee for Lead in the Ambient Air (1975-1977), and subsequent CASAC NAAQS lead reviews (1982-1986, 2006-2008); Review Subcommittee Assessing the Use of the Biokinetic Model for Lead Absorption in Children at RCRA/CERCLA Sites (1988); Subcommittee Assessing the Consistency of Lead Health Regulations in U.S. EPA Programs (1992); SAB Review Subcommittee for Urban Soil Lead Abatement Demonstration Project (1993); the Ad Hoc All-Ages Lead Model (AALM) Review (2005-2007, 2019-2020); External Peer Review of EPA's Draft Report Peer Review of the Proposed Modeling Approaches for a Health-Based Benchmark for Lead in Drinking Water (2017).

Project Experience

Bunker Hill Mining and Metallurgical Complex/Coeur d'Alene Basin Superfund Site, ID, 1974–2016

Washington State Department of Justice – Natural Resources Division Litigation Support and Expert Witness, Northeastern Washington State, December 2009– December 2012

Trail of the Coeur d'Alenes and Bayhorse Ghost Town Remediation and Idaho State Parks and Recreation (IDPR) Development

Lead Poisoning – Emergency Health Response, Haina, Dominican Republic 2007-2011.

Lead Poisoning – Emergency Health Response, Dakar, Senegal 2009-2011.

Lead Poisoning – Emergency Health Response, Zamfara and Niger States, Nigeria, 2010–Present

TIFO-Médecins Sans Frontières Collaborations: Bangladesh and Kyrgyzstan, 2011-Present.

Gold and Strategic Minerals Development Impact Evaluations on Historic Tribal Lands, Intermountain West, USA, 2020 – Present.

Regulatory Knowledge

Ex. 6 Personal Privacy (PP) has worked on projects regulated under Federal, State, local, and foreign regulations, including CERCLA, TSCA, CWA, CAA, NESHAPs, DOT, EPRCRA, SARA, NEPA, and RCRA in the U.S.

He has provided litigation support and expert witness testimony in administrative and court proceedings. He has served on several U.S. government advisory panels, including the appointments pertinent to lead health and remediation as shown in the list below.

Special Appointments/Memberships/Affiliations (last 5 years)

U.S. EPA Science Advisory Board. Peer Review. All Ages Lead Model (AALM). Washington, DC. October 16-20, 2019.

U.S. EPA External Peer Review. Draft Report, Proposed Modeling Approaches for a Health Based Benchmark for Lead in Drinking Water. Prepared for: U.S. Environmental Protection Agency, Office of Water, Washington, DC. June 27-28, 2017.

U.S. EPA External Peer Review. EPA's Approach for Estimating Exposures and Incremental Health Effects from Lead due to Renovation, Repair, and Painting Activities in Public and Commercial Buildings. Prepared for: U.S. Environmental Protection Agency, Office of Pollution Prevention and Toxics, Washington, DC. January 2015.

American University of Armenia, School of Public Health, Yerevan. Invited Professor, Graduate course Risk Assessment for Environmental Health Professionals for Master of Public Health (MPH) Students. 2012-present.

B.S., Engineering Science and Mechanics, 1974, Georgia Institute of Technology

Professional & Technical Certifications

Professional Engineer, Idaho # Ex. 6 Personal Privacy (PP) (1975)

Professional Experience

Ex. 6 Personal Privacy (PP) is co-founder and board member of TerraGraphics International Foundation (TIFO), a non-profit organization that assists community leaders, local and traditional governments, universities, and other non-governmental organizations (NGOs) to protect community health by adapting and applying responsible environmental health intervention and remediation methodologies in the developing world. TIFO is continuation of the TerraGraphics/University of Idaho (TG/UI), International Health and Restoration Initiative, established in 2005, as a non-profit, joint research and development project to adopt lessons learned in US environmental cleanups to developing countries.

Ex. 6 Personal Privacy (PP) is professor emerita and former Dean of College of Graduate Studies at the University of Idaho, where she taught environmental science, engineering, risk assessment, and founded the interdisciplinary Environmental Science Program. Ex. 6 Personal Privacy (PP) is a visiting professor at the American University of Armenia's School of Public Health, where she teaches Risk Assessment for Environmental Health Professionals. She is a member of the Collegium Ramazzini, an international scientific community of occupational and environmental health professionals, and is recipient of numerous awards at the University of Idaho, Washington State University, and the US EPA.

Ex. 6 Personal Privacy (PP) served as Dean of the College of Graduate Studies at the University of Idaho from 2005 to 2010, and was Associate Dean from 2002 to 2005. She provided leadership and administration for five interdisciplinary programs including the Environmental Science Program and the Water Resources Program with faculty members from throughout the University. These programs provide a valuable network of faculty and students who conduct research in environmental areas. Ex. 6 Personal Privacy (PP) has been very active in undergraduate and graduate education, research, and extension.

Academic Experience

Ex. 6 Personal Privacy (PP) faculty positions include Professor of Chemical Engineering, 2000-2011, Associate Professor (1993-2000) and Assistant Professor (1989-93). She founded and directed the Idaho Science Camp for underrepresented junior high students from 1986-1993. She served as

Director of the Environmental Science Program at the University of Idaho from 1993 to 2003 and also directed the Environmental Engineering Program from 1999 to 2002. Ex. 6 Personal Privacy (PP) served as Associate Vice President for Research in 2000-01 (temporary appointment to develop Strategic Plan) and as Acting Vice President for Research and Graduate Studies during 2003.

Ex. 6 Personal Privacy (PP) has served as Chair of the Inland Northwest Research Alliance (INRA) Council of Graduate Deans, which oversees a subsurface science fellowship program across 8 universities, funded by the Department of Energy. She was also President, Western Association of Graduate Schools (WAGS), serving ~100 universities.

Regulatory Knowledge

Ex. 6 Personal Privacy (PP) was Chair, Idaho Department of Health and Welfare, DOE INEEL Dose Evaluation Review and Assessment (DERA) Advisory Panel from 1991 to 1993. She held positions as Regional Environmental Engineer of the Division of Environment, Lewiston, Idaho, from 1977 to 1979 and Environmental Engineer for USEPA Region IV, Water Enforcement Division, Atlanta, Georgia, 1975-1977.

Honors and Awards:

Invitee, Women's Engineering Leadership Conference, National Science Foundation, October 2000 (one of 40 women selected from over 200 applicants)
Kellogg National Fellowship, $75,000, 1993-96 (awarded to 50 individuals/year)
Outstanding Faculty Award, College of Engineering, 1992
Nominee, NSF Faculty Awards for Women Scientists and Engineers, 1991
Outstanding Woman in Graduate Studies, Washington State University, 1987
EPA Fellowship, Office of Drinking Water, Washington, D.C., 1979-80
EPA Suggestion Merit Award, 1975
Outstanding Engineering Student, Georgia Institute of Technology, 1973

• Ex. 6 Personal Privacy (PP) Owyhee, Nevada, 89832 • Ex. 6 Personal Privacy (PP) • Ex. 6 - Personal Privacy (PP)

EXPERIENCE:

OWYHEE COMBINED SCHOOL, OWYHEE, NV **11.2003-present**
Special Education Teacher 7th – 12th

- Design specialized instruction for students with disabilities
- Complete required documentation and keep comprehensive, confidential files
- Assess student progress

TITLE VI INDIAN EDUCATION, ELKO COUNTY SCHOOL DISTRICT
Board Member / Instructor

- Help students meet challenging state academic content and academic achievement standards
- Meet the unique culturally related needs of Native American Students
- Plan and fund projects related to improved academic student outcomes

UPPER SNAKE RIVER TRIBES (USRT), DUCK VALLEY INDIAN RESERVATION **12.2018-present**
School Liaison

- Plan and coordinate activities related to USRT mission
- Create and implement lesson plans
- Collaborate with 21st Century After School program to implement program

AMERICAN INDIAN SCIENCE AND ENGENEERING SOCIETY (AISES), OWYHEE, NV **12.2015-present**
Owyhee High School Chapter Co-Coordinator

- Plan and implement student research projects and Promote STEM Education in the school community
- Partner with outside agencies to provide mentoring and workplace experiences
- Mentored four, national award-winning science projects

UNIVERSITY OF NEVADA RENO, COOPERATIVE EXTENSION, OWYHEE, NV **08.2015-06.2018**
STEM Instructor

- Implemented Robotic lesson plans
- Instructed students in computer code
- Taught student to build and operate drones

OWYHEE JR. HIGH SCHOOL, OWYHEE, NV **08.2001-05.2003**
GEAR UP Coordinator

- Coordinated college and worksite visits
- Tutored students in core subjects
- Created a school mentoring program called The Inner Circle

GREAT BASIN COLLEGE, OWYHEE, NV **08.1995-06.2003**
Owyhee Site College Class Coordinator.

- Planned GBC college classes to be offered in Owyhee
- Conducted community needs assessment
- Facilitated interactive video and on-line classes

GREAT BASIN COLLEGE, OWYHEE, NV **09.1994-05.2006**
Adult Basic Education Instructor

- Taught GED preparation skills
- Coordinated with Shoshone Paiute Tribal Court and Education Department to provide services
- Awarded the Outstanding Adult Educator from the State of Nevada

UNITED STATES FOREST SERVICE, McCALL RANGER DISTRICT **05.1986-10.1988**
Initial Attack Heli-tack Helicopter Crew Member / Fuels Inventory Specialist

- Conducted fuels inventories and made recommendation post-harvest treatment
- Wildland Initial Attack fire fighter

EDUCATION:

WASHINGTON STATE UNIVERSITY, PULLMAN, WASHINGTON **June 2002**
B. S. Social Sciences

GREAT BASIN COLLEGE, ELKO, NEVADA **June 1999**
Associate of Science

NIMS4MIM Work Plan
1.0 PROGRAM OBJECTIVES
1a: Project Summary Page

Title: National Incident Management System for Meaningful Input on Mining (NIMS4MIM)

Location: Sho-Pai Tribe | Duck Valley Indian Reservation, PO Box 219, Owyhee, NV 89832

Applicant Information: TerraGraphics International Foundation, Inc. (TIFO) | 121 S. Jackson Street, Moscow ID 83843 | Dr. Casey Bartrem, casey@terrafound.org, Ex. 6 - Personal Privacy (PP)

Applicant Organization: TIFO works with vulnerable communities to address environmental health challenges related to mining and other industries. TIFO has extensive expertise in environmental and health impact assessment, education, training, and in grassroots community collaboration. Ongoing projects include health impact assessment and intervention in mining communities in Kyrgyzstan, environmental assessment in climate and water-stressed communities in Uzbekistan, and supporting local environmental and educational initiatives in U.S. Tribal communities. TIFO is a U.S. 501(c)(3) nonprofit organization.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No.

Project Abstract*:* Like many Tribal communities, the Shoshone-Paiute (Sho-Pai) Tribe of the Duck Valley Indian Reservation (DVIR) is experiencing intense mining pressure related to minerals needed for low-carbon energy. Tribes have a short time to engage in government-to-government consultation on proposed mine operations through the National Environmental Protection Act, which requires them to review thousands of pages of environmental impact statements, identify potential impacts, coordinate with stakeholders and community members, and provide feedback. As a small reservation, the Tribe's limited resources are quickly overwhelmed, thus the need for an emergency response strategy. **Objective:** Partners will utilize the EJCPS Model to develop and implement an innovative strategy for DVIR to use when engaging in government-to-government consultation. Using all seven EJCPS elements, partners will adapt the federal National Incident Management System (NIMS) framework for disaster preparedness and response to achieve meaningful input on mining (NIMS4MIM). The result will be a rapid response strategy using the three components of the federal NIMS for emergency response and preparedness: *resource management, coordination, and communications*. **Activities:** NIMS4MIM will be developed through workshops, trainings, community forums, and hands-on activities. **Outputs** include development of baseline datasets, workshops, trainings, community forums, engaging K-12 youth, and the NIMS4MIM rapid response strategy. **Outcomes** include increase in local knowledge, enhanced technical capacity to assess potential mining impacts, stronger collaborative decision making in responding to proposed mining activities, the protection of DVIR environmental, wildlife, and cultural resources for future generations, and adaptation and adoption of NIMS4MIM by other Tribes.

Project Type(s): Pollution prevention, climate resiliency and adaptation, facilitating engagement of disadvantaged communities in Federal processes

Special Considerations: Climate change, rural areas, and health impact assessment.

Environmental Issues: Environmental justice, air, water, wildlife, mining, NEPA

List of Project Partners: TIFO (CBO); DVIR Tribal Environmental Protection Program (Tribal Government); DVIR Fish & Game (Tribal Government); Owyhee Combined School (K-12 School); Upper Snake River Tribe Alliance (CBO); Idaho Conservation League (nonprofit partner)

Will you need to develop a QAPP for your project? Yes.

1b. Environmental and Public Health information of the Underserved Community

Disproportionate harms: The Shoshone-Paiute (Sho-Pai) Tribe of the Duck Valley Indian Reservation (DVIR) is comprised of descendants of the Western Shoshone and Northern Paiute Tribes who once freely occupied the area now known as Idaho, Nevada, and Oregon. The Sho-Pai Tribe is one of five federally recognized tribes in Idaho.[1] DVIR is an economically and geographically isolated community located on the Idaho-Nevada border with 50.2% of the reservation and Tribal Headquarters in Idaho. Of the 2516 registered tribal members, 1800 live on the reservation.[2,3] The K-12 school serves 326 children, 92% of whom are Native American and 67% who qualify for Free or Reduced Lunches.[4] EPA's Environmental Justice Screening Tool (EJSCREEN) reports the area in the 70th percentile of U.S. low-income populations, the 75th percentile for U.S. unemployment rate, and the 87th percentile for U.S. populations with less than a high school education. DVIR is in the 73rd percentile in the state of Nevada for proximity to a Superfund site.[5]

Nationally, Native communities face disproportionate burden of environmental harm, especially related to heavy metal exposures.[6] More than 600,000 Native Americans live within 10 kilometers of an abandoned mine.[7] Public water systems are a considerable risk factor in many Native communities, with elevated lead levels in drinking water a serious concern.[7,8] Cancer mortality rates among Native communities have increased over a 20-year period, with evidence linking some of this increase to heavy metal exposures.[1] Cancer mortality rates are higher for Native Americans, even when compared to other at-risk groups.[2]

Community impacts: Mining companies are actively exploring areas near DVIR. Nevada accounts for about 80% of U.S. gold production.[9] Approximately 40% of this production is from 50 major gold deposits in Elko County, NV, where 49.8% of DVIR's territory and most of its population is located.[10] National Mercury Deposition Network monitors near DVIR show high mercury concentrations associated with nearby processing.[11] Rising gold prices will continue to drive mining development, potentially increasing landscape damage, fugitive and hazardous emissions, and adverse impacts to tribal resources. Nevada has the largest mining program in the U.S., with more than 180,000 active mining claims (totaling 49% of mining on BLM lands), 198 planned mine operations, and 282 active exploration notices.[12] The potential human health impacts of these issues alone pose significant risks to residents, especially to young children.

DVIR has already been directly impacted by the Rio Tinto copper mine on Mill Creek, a tributary of the East Fork of the Owyhee River (EFOR), 4 miles up-gradient (see DVIR map). From 1932-1987, hazardous substances were discharged into Mill Creek during mining operations and waste impoundment failures.[13] Rio Tinto is a Superfund site and though it has been remediated, water quality has not reached pre-mining conditions.[14] The EFOR is the primary water source for surface and groundwater recharge and for tribal livestock and fisheries.

The Sho-Pai face additional challenges related to climate change. Increasing frequency and severity of wildfires due to climate change are a major risk to communities like DVIR, which relies on grazing lands for much of its economy.[15] Water shortages are also a concern, highlighted by recent droughts. Modelling predictions indicate temperatures will continue to rise in the Upper Snake River region.[16] Water quality and quantity are impacted by wildfires and droughts and will be a significant challenge for DVIR in coming years.

A critical part of DVIR Tribal identity is the alliance with its 3 sister tribes: The Burns Paiute, the Fort McDermitt Paiute-Shoshone, and the Shoshone-Bannock Tribes. The four tribes are represented in the Upper Snake River Tribes (USRT) Foundation, an alliance whose charter is to facilitate Tribal unity to protect Tribal rights, languages, cultures, and traditions.[17] DVIR and the

other three USRT members face a unique and often undervalued climate change threat: demand for minerals such as lithium and copper to power low-carbon technology.[18] Global demand for lithium is projected to increase >900% by 2050 to meet demand for 'green' energy (electric vehicles, wind and solar power, and energy storage). Cobalt demand will increase >500%, and speculation over development of antimony batteries has driven that market demand in recent years.[19] Mining claims for these three metals have increased dramatically in the Nevada/Oregon/Idaho region, with multiple examples of projects impacting traditional lands of Native American communities, including the McDermitt Reservation, a USRT member.[20,21]

Environmental/public health issues the project addresses: A summary of disproportionate challenges faced by DVIR are detailed in the previous section. In addition, Tribes have a short window to respond to proposed mine operations through the National Environmental Protection Act (NEPA) process, required by the *EPA Policy on Consultation and Coordination with Indian Tribes* (EO 13175). Government-to-government consultation requires Tribes to review thousands of pages of documents regarding each proposed mine, identify potential impacts to cultural sites and environmental resources, coordinate with stakeholders and community members, and provide clear evidence for any concerns. This process overwhelms small governments like DVIR, despite the fact these mines will impact traditional hunting and fishing lands, water, sacred sites, public health, and future generations. Also, each federal agency (e.g., Forest Service, Bureau of Land Management) has adopted its own procedures on how environmental assessments (EAs) are prepared – DVIR is surrounded by both Forest Service (FS) and Bureau of Land Management (BLM) lands, and these lands are administered by two FS and three BLM field/district offices in two states. As one example, the BLM manages 26,000 acres of public land in the Owyhee River Wilderness. In the past 10 years, for BLM alone, there have been 109 EIS in the Idaho Bruneau District (10 are currently active), 156 in the Nevada Elko District (14 are active) and 178 in the Nevada Battle Mountain District (49 are active).[22] Meaningful participation in NEPA and provision of feedback regarding the numerous proposed actions are a serious challenge to the Sho-Pai.

An innovative strategy for DVIR to meaningfully participate in the NEPA process is to use the federal National Incident Management System (NIMS) framework for disaster preparedness and response to achieve meaningful input on mining (NIMS4MIM). Adapting NIMS, a tool intended for emergency response planning, is fitting for developing a government-to-government response strategy given the "emergency" of the rapid expansion of mining proposals faced by DVIR. According to the EPA EIS database, there have been 278 EIS in NV and ID in the last 10 years.[23] Using the EJCPS Model, TerraGraphics International Foundation (TIFO), the Sho-Pai tribe, and other partners will develop a rapid response strategy to respond to such proposals using the three components of NIMS: *resource management, coordination, and communications*.

NIMS4MIM is a novel approach that empowers the Sho-Pai to more effectively participate in U.S. democratic processes, preserve culturally significant heritage sites, and protect environmental resources. By relying on the NIMS framework and EJCPS Model, and working with the Tribe to adapt the strategy, this process can be readily scaled by other USRT members.

Results and community benefits: Potential for new mining operations to impact DVIR are significant, especially considering past and current injustices. Mining has historically resulted in devastating impacts for Tribes; DVIR has been directly impacted by the Rio Tinto Superfund Site; the controversial lithium mine at Thacker Pass – adjacent to DVIR's sister reservation, Fort McDermitt – threatens the environment, hunting and gathering areas, and sacred sites.

NIMS4MIM will enable the Tribe to establish baseline conditions on DVIR, rapidly assess potential mining impacts, communicate with community stakeholders to understand their concerns, and assemble a technically strong response that can mitigate environmental and social impacts of mining operations on/near Tribal lands. Building capacity in Health Impact Assessment (HIA) means that public health threats will be considered and mitigated. NIMS4MIM enables DVIR to have meaningful and impactful participation in the NEPA process. It also results in increased technical capacity. Because the idea for this project comes from within the community, it is inherently representative of community goals and objectives.

The following summarizes the three components of NIMS (*resource management, coordination, communication)* that will be adapted through utilization of the EJCPS process. Associated project activities (see Section 2a) are indicated under each component.

1. Resource management
    a. Identify existing technical expertise within the Tribe and with partners to be used in trainings, workshops, and in final NIMS4MIM strategy *(Workshops 2-4)*
    b. Develop baseline environmental, wildlife, and traditional ecological knowledge (TEK) data to facilitate understanding of potential and actual mining impacts, and determine how best to manage that data for future retrieval *(Activity 1)*
    c. Determine training needs such as geographical information systems (GIS) skills, how to review environmental impact statements (EIS), HIA, etc. *(Trainings 1-5)*
    d. Engage keepers of historical and traditional knowledge *(Activity 1)*
2. Coordination
    a. Identify responsibilities of various Tribal government departments and community partners and incorporate into final NIMS4MIM strategy to create a unified approach *(Workshops 5-7)*
    b. Work within existing organizational structures and skillsets to improve efficacy and efficiency *(Workshops 6-8)*
3. Communication strategies
    a. Identify when and how community stakeholders will be engaged in developing response to proposed mining operations *(Community Forums)*
    b. Share information between partners throughout response process *(Activity 2, 3)*
    c. Use local newsletter (*Sho-Pai News*) to seek participation in project activities.

Section V: NIMS4MIM includes HIA, Rural Areas, and Climate Resiliency:

NIMS4MIM will enable the Tribe to determine potential impacts of mining on health and well-being, taking a holistic view of a range of potential impacts, complimenting EPA's intent for HIA as decision-support tool for health communities. By including consideration of impacts to wildlife and cultural resources, NIMS4MIM includes health determinants (factors influencing health outcomes) that are specific to the Tribes.

There are 1800 residents on DVIR; the community is centered around the town of Owyhee, NV, which is economically and geographically isolated, accessible by one two-lane north-south road. It is 100 miles north of Elko, Nevada and 100 miles south of Mountain Home, Idaho (see appendix DVIR map). Most of the economy relies on grazing and sales from fishing licenses.

Successfully managing climate change impacts requires DVIR to manage increased incidence of wildfires, increased droughts, and, ironically, the increase in demand for critical minerals needed to power low-carbon energy alternatives. The latter requires DVIR to adapt for future challenges, including developing a system for assessing potential impacts of mining within their region.

1c. Organization's Historical Connection to Underserved Community

History: TIFO's Project Manager Dr. Casey Bartrem has worked with the Tribal Environmental Protection Program (TEPP), Fish and Game (F&G), and Owyhee Combined School (OCS) since 2021, supporting educational activities and local capacity building. In 2022, TIFO, F&G, and OCS received an EPA Environmental Justice Small Grant (EJSG) to implement an environmental education project for OCS students. TIFO worked closely with DVIR partners throughout the project period and has continued to regularly collaborate with partners on developing additional support of DVIR priorities since that time. Dr. Ed Galindo (TIFO Board of Directors, Yaqui Indian) has been involved in environmental education projects with the Sho-Pai since 2000 focusing on STEM education to improve the environment. Dr. Galindo also received NASA's "Summer of Innovation" funding to implement STEM programs in tribal communities throughout the region, including OCS in 2005. He has continuously collaborated with teachers and leaders in DVIR on environmental and STEM education initiatives. Dr. Margrit von Braun (TIFO Board of Directors) founded and directed a Science Camp at the University of Idaho (1986-1999) that recruited students from Idaho's reservations. She first visited DVIR in 1986 to engage OCS students in science education.

Past work and results: Compounding environmental injustices faced by the Sho-Pai, Native American communities are consistently underrepresented in Science, Technology, Engineering, and Math (STEM) fields, including environmental sciences. To address these issues, TIFO, TEPP, F&G, and OCS collaborated on an experiential environmental education project called One Habitat (*Sumu'yoo Tüpippüh*) in 2022, funded by EJSG and in-kind contributions from the Tribe, OCS, and TIFO. Through 4 classroom workshops, 2 field trips, 3 field activities, 3 scientific conferences, and 2 community presentations, One Habitat increased DVIR students' environmental science competency, providing 7^{th}-12^{th} grade OCS students the opportunity to blend TEK and western science. Three One Habitat students won awards for their posters at scientific conferences, two received paid internships to participate in air quality monitoring on the reservation, and three became involved in a fish genetics study with Idaho State University. Through engagement in One Habitat, students are better prepared to understand and address local environmental challenges related to mining, water quality issues, impacted salmon and beaver populations, riparian ecosystem function, and climate change. One Habitat enabled partners to build a foundation for future collaborations to assess and mitigate environmental degradation issues, including mining pressures and climate change impacts. It was also an opportunity to build mutual trust and understanding between TIFO and DVIR partners.

Community driven participation: The need for a strategy to improve Tribal participation in government-to-government consultation was first identified by TEPP during implementation of the One Habitat project in 2022. TEPP representatives asked TIFO to work with them to develop a plan for how the Tribe can achieve more effective participation in NEPA, highlighting the mining boom and limited capacity to respond within short comment periods. A short (pilot) training on NEPA provided by EPA Region 10 in November 2022 during One Habitat activities further increased the Tribe's interest in developing a response strategy. TEPP and TIFO brainstormed ideas, using components of EJCPS Element 1 (community vision and planning). NIMS4MIM is the result of those initial conversations. TEPP identified other partners, including F&G and USRT, and highlighted the importance of building on TEK held by community elders.

The idea for using EJCPS to realize NIMS4MIM was subsequently shared with other Tribal agencies, including F&G, who gave feedback and suggestions on the idea. External partners, including OCS, USRT, and Idaho Conservation League (ICL) were engaged and have committed support to activities outlined in their letters of support.

1d. EJCPS Model

The EJCPS Model will facilitate a community-driven, equitable process involving multiple stakeholders that work together to develop the NIMS4MIM strategy. Including feedback from the community in developing NIMS4MIM will enhance the sustainability and efficacy of the overall project and set the foundation for collaboration in the future when responses to mining proposals need to be developed. Environmental justice includes not only protecting human and environmental health in vulnerable communities, but also ensuring all people have an opportunity to meaningfully participate in development, implementation, and enforcement of environmental laws, regulations, and policies. That mission is exactly what will be incorporated in NIMS4MIM. This project advances environmental equity and justice through a locally developed system that streamlines engagement in NEPA, building on systems that already exist within the Sho-Pai Tribal Governance system. This ensures that DVIR interests are adequately and honestly represented. The need for a rapid response strategy was first identified by DVIR stakeholders, thus the NIMS4MIM project inherently represents community interests, increases equity and environmental justice, and has an improved prognosis for long-term sustainability.

The three goals of the NIMS4MIM project will be achieved through use of the EJCPS model. Goal 1 is to develop a holistic understanding of baseline conditions and increase capacity to assess potential impacts to those conditions. Goal 2 is to improve engagement in NEPA, including collaborative decision making. Goal 3 is to protect Tribal environmental, wildlife, and cultural resources for generations to come.

The need for the Sho-Pai Tribe and broader DVIR community to engage in meaningful participation in the NEPA process for proposed mining operations is an excellent opportunity to employ the EJCPS Model; this approach will ensure that various stakeholders work together to develop a strategy for efficiently and collaboratively responding to proposed mining development on or near the reservation. NIMS4MIM includes significant coordination between partners, workshops, trainings, activities, and community forums. All of these events rely on elements of the EJCPS process in order to maximize success and project sustainability. *Activities associated with each element are described in greater detail in Project Activities (Section 2a) and elements relevant to each activity are included in the Milestone Schedule (Section 2b).*

Element 1 (Issue Identification, Community Vision, Strategic Goal Setting) and Element 2 (Community Capacity-Building and Leadership Development) are underway and will continue to play an important role in all three years. TIFO and TEPP have already identified multiple project partners, including F&G, and USRT, in addition to external partner ICL. The DVIR Fire Management and Culture Departments are also committed to participating. Some training needs have also been identified. Partners will continue to involve community residents in planning of NIMS4MIM through community forums and during specific project activities, such as the development of baseline databases and implementation of the extended tabletop activity (Activity 2). Community plans, goals, and concerns are consistently incorporated into the process through Community Forums. The collection of traditional ecological knowledge and other baseline data and consistent engagement with the community allow us to build a strong understanding of DVIR history and local practices. Partners will have at least five training events to nurture leadership and increase technical capacity. The Milestone Schedule in 2b shows that Elements 1 and 2 appear throughout each of the three years of project activities.

Element 3 (Consensus Building, Dispute Resolution) plays a critical role in year 3, when partners "practice" implementation of NIMS4MIM. Despite the small size of the community, there are divergent interests regarding mining development: mining operations can bring

economic stimulus to the area; mining companies may provide infrastructure improvements or donations to the local community; mines will inevitably have some environmental and ecological impact on the area; there may be associated public and environmental health concerns; and mining operations may impact cultural, spiritual, and historic sites with important value to the Tribe. These divergent, and at times conflicting interests, are an opportunity to improve the representative nature of the response that DVIR provides during NEPA government-to-government consultation. Utilizing conflict resolution and ensuring all views are treated fairly is crucial for fostering consensus building and for the ultimate success of NIMS4MIM.

Using **Element 4 (Multi-Stakeholder Partnerships, Leveraging of Resources)**, partners will share resources and identify new partners when baseline data collection begins in the first year. In the workshops in year 2, partners will rely on Element 4 to create a common vision for NIMS4MIM and to develop a clear and workable plan for the strategy. Having the ability and willingness to engage new partners to bring additional technical expertise is vital and will be promoted throughout.

Element 5 (Constructive Engagement by Relevant Stakeholders) is an important aspect of the trainings that will be developed and implemented by all project partners. Partners will invite support from EPA and/or BLM to better understand NEPA, EIS, EA, and HIA. This will include reaching out to EPA's National Incident Management Assistance Team (NIMAT), which provides support of NIMS programs. Additionally, partners will seek support from business (e.g., mining companies, environmental consultants) to understand how they approach development of EIS, and will seek training from academic institutions in GIS and collection of baseline data.

When partners develop plans for and then share results of baseline data collection, **Element 6 (Sound Management, Implementation)** will enable us to clarify plans and use each partners' abilities and strengths, maximizing resources available on the reservation. Partners will also use Element 6 during the extended tabletop exercise to clarify the commitments of each partner.

Partners will use **Element 7 (Evaluation, Lessons Learned, Replication of Best Practices)** early in year 3 to adapt NIMS4MIM to better work for the Tribe and community.

1e. Project Linkages

NIMS4MIM advances EPA's commitment to healthy environments for communities that have not benefited from environmental progress. One of the project goals is to empower DVIR to assess the impacts of mining on environmental, ecological, and cultural resources, ultimately protecting human health and the environment. Using the EJCPS framework, the project team will build technical capacity with the Sho-Pai Tribe to review potential impacts of 'green mineral' mines, which have increased dramatically in NV and ID with demand for low-carbon energy production to combat climate change. This integrates environmental justice and climate resiliency into implementation of government-to-government consultation, resulting in the Sho-Pai achieving more proactive engagement in the NEPA process. Importantly, NIMS4MIM promotes engagement with the DVIR community in how their ancestral lands are impacted by planned activities. Finally, NIMS4MIM directly supports EPA's focus on honoring their responsibility to federally recognized Tribes.

1f. Partner and Collaborate

Diverse partnerships to accomplish goals: NIMS4MIM includes 6 distinct partners. These partners represent 5 distinct and diverse stakeholder groups within and beyond DVIR. TIFO is a community-based organization (CBO) that supports collaborative development of programs to

reduce impacts of active, historic, and future mining activities in Indigenous communities. Tribal government partners include TEPP and F&G. They will lead engagement with the wider DVIR community and will coordinate with other Sho-Pai departments, including Fire Management and Culture. OCS is a K-12 Elko County public school that is representative of the wider Owyhee community. USRT represents a compact of Tribes that will facilitate expansion of NIMS4MIM to other Tribes. ICL is Idaho's largest conservation nonprofit organization, with experience supporting Tribes' on environmental issues, including assessing mining impacts on Tribal lands. TIFO and TEPP will continue to identify partners and resources to assist throughout the project period. Partners are actively engaging additional academic, consulting, and nonprofit experts through TIFO's Professional Network[24] to contribute to this project, including University of Nevada Reno Federally Recognized Tribal Extension Program, University of Idaho, Alta Science and Engineering, Great Basin Resource Watch, and Advocates for the West. These partners have expressed interest in engaging in project activities as they evolve.

Partners' Roles/Contributions and Resources: TIFO has extensive experience in supporting collaborative, community-based approaches to solving complex environmental challenges in diverse communities around the world. TIFO has worked with DVIR since 2021; as a CBO, TIFO has established strong programmatic support for community priorities, including environmental education projects and support of EA and monitoring activities. In the NIMS4MIM project, TIFO will provide technical support in EA, mining impact, HIA, EIS review, NEPA, and utilizing the EJCPS framework. TIFO's extensive experience in environmental health projects in mining-impacted communities around the world will be a vital resource, as is TIFO's Professional Network of experts across dozens of disciplines.

TEPP will coordinate all NIMS4MIM activities in close collaboration with TIFO throughout the project period. They will engage other partners on a regular basis, communicate with community stakeholders, and, with TIFO support, arrange workshops, trainings, activities, and community forums. The Coordinator will take on most of these responsibilities, with support from TEPP's director Marissa Snapp, who will report on progress to the Sho-Pai Tribal Council. TEPP's knowledge of local environmental and ecological conditions, previous sampling efforts, impacts from the upstream Rio Tinto Superfund site, and other environmental considerations will contribute to the success of activities under this cooperative agreement.

F&G will provide knowledge of critical wildlife habitats and migration patterns essential to understanding potential impacts of proposed mining activities in the area. They will take a leadership role in all project activities and support local student involvement in baseline data collection, as they have done in past TIFO/TEPP/F&G projects.

Owyhee Combined School (OCS) will identify and support students to engage in baseline data collection and other activities where students will benefit from learning about the NEPA process, EIS review, and how both western and TEK sciences can be applied to assessing potential impacts of proposed activities. Past engagement of students with TIFO/TEPP/F&G activities provides a strong foundation from which to incorporate this participation.

USRT Foundation brings significant experience from working with the four Tribes on a variety of environmental projects. They will engage in the 8 workshops, providing facilitation, expertise, and coordination as needed. USRT's support of the workshops is an in-kind donation.

ICL will participate in workshops, trainings, and hands-on activities, bringing their experience with federal and state review of proposed mining operations in addition to past and ongoing collaborations with Idaho Tribes. ICL's support of these activities will be in-kind services.

Vested Interest: NIMS4MIM highlights the overlap of TIFO, TEPP, F&G, OCS, USRT, and ICL missions and the opportunity to build a partnership for future collaborations. TIFO's mission is to support locally-driven environmental health projects and build capacity in reducing impacts from mining and hazardous industry, emphasizing meaningful involvement and project development by local stakeholders. TEPP, a part of tribal government, is charged with managing water quality, pollution, and Superfund programs on DVIR, all issues that are closely tied to potential mining impacts. F&G manages fisheries, wild game, and recreational land use on DVIR. Knowledge of these ecological resources is a vital component of understanding potential mining impacts. OCS will support the engagement of community youth as a K-12 educational system, building their knowledge of Tribal resources, western science, and TEK, all vital to the future of the Owyhee community and DVIR. USRT's mission is to ensure the protection and restoration of natural resources and rights of the Tribes reserved by treaties and executive orders. ICL works to protect water quality and human health from poorly planned mining operations across Idaho. Other partners play equally important roles in building and adapting NIMS4MIM to have the greatest impact and positive long-term outcomes. While all partners will engage in development of baseline datasets and eventually the NIMS4MIM process, only TIFO, TEPP and F&G will receive financial compensation for staff time due to the demands for coordination and project management. TIFO will donate additional staff time as an in-kind contribution to the project, as was done with our previous EPA EJSG *One Habitat* program. Other partners are also donating time and resources as in-kind contributions.

Maintaining Relationships: TIFO will maintain and sustain these relationships into the future by using NIMS4MIM to explore additional areas of collaboration with DVIR related to mining impacts, environmental education and workforce development, ecological restoration, and costs associated with engaging in NEPA. TIFO has successfully accomplished this transition in previous projects, including a previous EPA EJSG awarded to TIFO for work in DVIR in 2021. Each organization's responsibilities, vested interests, and commitment to partnership are further detailed in the letters of support in the appendix.

2CFR Part 200: TIFO will issue subawards to fund participation for TEPP and F&G and has budgeted financial transactions to comply with 2CFR 200. TIFO will provide salaries, course fees, and meals budgeted under "Other Direct Costs." The costs are reasonable and will be incurred within the project period and are allocable to the EPA agreement. Records for all costs will be documented. Participant support costs have been excluded from indirect costs under Modified Total Direct Costs (MTDC). Subrecipients will receive reimbursement for their actual direct or approved indirect costs such that they do not "profit" from the transaction and will be subject to the same Federal requirements as the pass-through entity.

2.0 Project Activities / Milestone Schedule / Detailed Budget Narrative

2a. Project Activities

To meet NIMS4MIM project goals (see Section 1d), we will implement four categories of project activities: Partner workshops, training events, community forums, and hands-on activities. At least 10 Tribal employees and 6 partner representatives will be engaged in workshops, trainings, and hands-on activities. Having smaller groups for partner trainings, workshops, and activities is deliberate: DVIR is a small Tribe and this group represents the relevant stakeholders in the Sho-Pai government. Engaging more participants in an already overburdened community is neither feasible nor effective. Similarly, we aim to engage 20 community members in community forums. The first group of participants will learn the process and skills for NIM4MIM and be able to train other individuals.

Partner Workshops (8): Partner workshops will be held throughout the project period to foster information sharing, shared goal setting, building of leadership skills, development of actionable plans, and building on strengths and existing systems within each partner organization. Each workshop will include representatives from TIFO and Tribal partners. Some workshops will also invite participation from OCS, the Senior Citizen Center, the Tribal Council, USRT, and ICL. Most workshops are planned to occur in-person to maximize engagement, but accommodations will be made for some partners to join virtually if travel becomes difficult due to illness, weather, or other limitations. These workshops will result in understanding and then adapting relevant components of NIMS, which are summarized in italics and described in Section 1b. Workshops will be planned by the TEPP coordinator with support from TIFO and other partners as needed. Other USRT member tribes will be invited to engage in workshops 4, 5, and 6 to build foundations for their own development of a rapid-response strategy.

- Workshop 1 (Nov 2023): Kickoff meeting.
- Workshop 2 (Jan 2024): Baseline data coordination; partners share plans for collection and aggregation of baseline data; any additional training needs are identified at this time; *NIMS "resource management."*
    - TEK (medicinal plants, culturally significant sites, wildlife habitat, and other knowledge)
    - Contaminant concentrations in soil and water
    - Wildlife habitat (including seasonal patterns)
    - Cultural, spiritual, and historic sites otherwise not identified
- Workshop 3 (Mar 2024): Finalize scheduling and staffing needs for upcoming summer baseline data collection; share results of TEK baseline data collection (done in winter) so partners can include any relevant findings in their own planning for summer field work; *NIMS "resource management."*
- Workshop 4 (Dec 2024): Share baseline findings between partners and receive feedback on best system for storing and sharing data in future; *NIMS "resource management."*
- Workshop 5 (Apr 2025): Using information from baseline data collection and four Training events:
    - Brainstorm how NIMS components can be utilized in developing a similar system for engaging in NEPA process
    - 'Homework' given to each partner for them to determine their agencies' resources, capacity, and needs for engaging in NEPA; NIMS "coordination"
- Workshop 6 (Jun 2025): Bring partners together to develop NIMS4MIM; *NIMS "coordination."*
    - Define the process to mobilize a response to government-to-government consultation under NEPA, including resources needed, coordination plan, and communication strategy
- Workshop 7 (Feb 2026): Gather feedback on extended tabletop activity (Activity 2) and adapt NIMS4MIM as needed; *NIMS "coordination."*
- Workshop 8 (Jun 2026): Feedback on project activities, including most recent NIMS4MIM implementation (Activity 3); *NIMS "coordination."*

Training Events (5): The following are identified training needs; additional needs will likely be discovered during early partner workshops and trainings will be added to meet those needs. Trainings will result in increased technical capacity for each of the topics. *These are part of "resource management" under NIMS.*

- Training 1 (Jan 2025): NEPA process; TEPP and TIFO will reach out to EPA to determine if (a) representative(s) can be involved in this training; TEPP and TIFO will identify additional trainers as well.
- Training 2 (Feb 2025): EIS review; this will be led by agencies with expertise in the process; additional training from TIFO staff provided as requested by TEPP, especially with HIA as it relates to potential impacts on the DVIR community.
- Training 3 (Feb 2025): HIA six-step process that is mandated in EIS and EAs; training will include information on:
  - The six-steps of HIA and how to adapt these to fit Tribal scenarios
  - Using the decision-support to minimize negative health impacts
  - Incorporating community-led efforts by potentially affected populations to ensure concerns are identified and addressed
  - Special considerations for Tribes, such as how exposures vary based on distinct cultural practices (e.g., use of wild game, collection and use of medicinal plants)
- Training 4 (Mar 2025): NIMS; led by the Sho-Pai Fire Management; training will focus on areas most relevant to this project under the three main components:
  - Resource management
  - Coordination
  - Communication
- Training 5 (Date TBD): GIS training for TEPP, F&G, and TIFO staff.
  - Coursera© offers an online, 4-course GIS certificate through University of California-Davis that is self-paced
  - Each course requires approximately 30 hours of work to complete within ~4 weeks, totaling ~ 4 months of training
  - Training is in ArcGIS, which the Tribe has an existing user license for (no new license needed for TEPP or F&G)
  - Staff will go through online trainings at the same time in order to support each other

Community Forums (6): Community Forums will be held throughout the 3-year project to engage community early and often in the EJCPS process. In this way, residents are involved in planning and goal setting for baseline data collection and NIMS4MIM development, and trust is built between partners and in the overall process. This will also ensure that the collaborative effort is representative of different stakeholder views and that non-Tribal government stakeholders are meaningfully engaged throughout. During the first community forum, partners will develop a strategy for increasing engagement in forums; this could be a certificate for those who attend a certain number of events, or development of a community task force that would be the focal point for the Sho-Pai government to work with when engaged in government-to-government consultations under NEPA. Community forums will be held at an accessible community location (e.g., the school or Tribal Headquarters) and will be held in-person to the extent practicable. We will advertise these events in the Sho-Pai Newsletter to encourage broad community participation. We will also use the Sho-Pai Newsletter to share project activities and outcomes. *Community Forums are part of the "communication" component of NIMS.*

- Forum 1 (Feb 2024): NIMS4MIM project introduced to community with emphasis on how community will be involved in process; community asked to provide feedback on baseline data collection as a first step.
- Forum 2 (Dec 2024): Update community on year one activities, how baseline data collection was modified based on their feedback and share baseline data results.
- Forum 3 (Aug 2025): Draft NIMS4MIM plan shared with community for their feedback.

- Forum 4 (Sept 2025): Share updated NIMS4MIM based on feedback from Forum 3.
- Forum 5 (Feb 2026): Gather feedback from community on Activity 2 (extended tabletop).
- Forum 6 (Jul 2026): Get feedback from community on Activity 3 (application of NIMS4MIM to active NEPA proposal).

Hands-on Activities (3): *Activity 1 is part of NIMS resource management and Activities 2 and 3 are part of NIMS Communication.*

Activity 1 (baseline data collection) will occur within the first year of the project. Baseline data will be collected by relevant agencies, coordinated by TEPP and supported by TIFO. The result will be a database of current environmental, ecological, and cultural conditions on DVIR that could be impacted by mining operations. Establishing an accessible and robust database is important to understand how proposed mining activities could impact DVIR, and for measuring impacts should mines begin operating. A clear schedule for development of each baseline dataset (e.g., TEK, soil/water contaminant concentrations, wildlife habitat) has not been developed – that will come from discussions during Workshops 2 and 3, utilizing elements of the EJCPS process. The exception is development of the TEK database, which will be completed in the first winter when field sampling is not likely to occur. K-12 students will be engaged in TEK interviews and field work through OCS and the Summer Youth Employment program. Partners may engage academic institutions in Activity 1 to support data collection and analysis.

Activity 2 and Activity 3 will occur in year 3. Activity 2 is an extended table-top exercise that will allow partners to test NIMS4MIM, which will be developed over the course of year 2. The intended result of Activity 2 is for partners and community members to identify the strengths and weaknesses of NIMS4MIM. This activity will engage participants in modifying NIMS4MIM as needed. Other USRT member tribes will be invited to engage in Activity 2 to build foundations for development of their own response strategy. Activity 3 will occur shortly after adaptations are made, when partners and community members will apply NIMS4MIM to an active mining proposal. If there is not a proposal at that time, a proposal impacting a nearby Tribe will be used as an example and treated as though it is being proposed near DVIR. However, information from Idaho Department of Environmental Quality, ICL, and Advocates for the West suggests that there are multiple NEPA proposals requiring Tribal input at any given time. There are currently 73 active EIS in the three BLM districts near DVIR.[25] The result of Activity 3 will be further adaptations of NIMS4MIM to fit DVIR community and government needs.

Coordination for activities will be led by TEPP. TEPP will engage with partners one-on-one as the project develops, documenting their input, needs, and feedback throughout. TIFO will provide technical support and project management for all activities and will connect partners with outside expertise through TIFO's Professional Network when needed. TEPP and TIFO will hold virtual weekly coordination and management meetings.

2b. Milestone Schedule

Date (Month-Year)	Milestone	Activities	Details
Nov-23	Begin project activities	Coordination and virtual meetings, Workshop 1	Oct-23 through Nov-23: Identify additional partners; introduce process and project; develop and deliver Workshop 1; identify partner roles; build on existing plans/goals of partners; **EJCPS Elements 1 and 2**
Jan-24	Baseline data needs and associated	Coordination and virtual meetings, Workshop 2	Dec-23 through Jan-24: Identify additional partners needed for data collection; develop QAPP; summarize goals for baseline databases; build on existing leadership and expertise; nurture

Date (Month-Year)	Milestone	Activities	Details
	resources identified		leadership skills, facilitate communication and understanding of shared goal; conduct outreach; **EJCPS Element 2**
Feb-24	Community engaged in project	Activity 1 (TEK only), coordination and virtual meetings, Community Forum 1	Jan-24 through Feb-24: TEK interviews and video editing; identify students to participate in summer data collection; introduce project to community and involve them in planning; develop strategy for sustaining community participation and building trust; incorporate community feedback into project plans; facilitate communication; **EJCPS Elements 1 and 2**
Mar-24	Baseline data collection strategy finalized	Workshop 3	Develop shared plans, goals, and objectives; review community feedback; invite partners to share resources and skills; share summary of TEK results to inform baseline data collection plans; **EJCPS Elements 2, 3, 4**
Nov-24	Baseline data collected (A1), analyzed, and aggregated	Activity 1, coordination and virtual meetings	Apr-24 through Nov-24: Environmental sampling; mapping of wildlife habitat, TEK info, cultural sites; OCS students engaged; GIS work; support from academic and/or private businesses as needed; TEK interviews and video editing; partners share resources and strengths; organize work to maximize time and resources; **EJCPS Elements 4, 5, 6**
Dec-24	Baseline data shared with partners and community	Workshop 4 and Community Forum 2	Baseline results shared among partners and with community; ensure community participation; build trust; use strengths of partners; maximize resources, clarify partner commitments; seek results to improve community conditions; **EJCPS Elements 1, 2, 3, 6**
Apr-25	Partner trainings complete	Trainings 1-5	Jan-25 through Apr-25: NEPA, EIS, HIA, NIMS, and GIS trainings; identify where government, industry/business, and academic institutions can support project; **EJCPS Elements 4, 5**
Apr-25	Begin building NIMS4MIM	Workshop 5	Invite partners to share resources and ideas for NIMS modifications, identify where government can support strategy
Sep-25	NIMS4MIM developed and modified with feedback	Coordination, Workshop 6, Community Forums 3-4	May-25 through Sep-25: draft NIMS4MIM, share feedback, and modify based on community and partner visions and goals; share resources; develop clear and workable strategy; clarify commitments; clarify plans and timelines, use partner strengths; **EJCPS Elements 4, 6**
Jan-26	Extended tabletop executed (A2)	Coordination, Activity 2	Oct-25 through Jan-26: plan Activity 2; use strengths of partners and clarify their commitments; organize work and maximize resources; implement Activity 2, involve community; resolve conflicts; ensure all partners are engaged fairly; **EJCPS Elements 1, 2, 3, 6**
Mar-26	NIMS4MIM modified and strengthened	Workshop 7, Community Forum 5, coordination	Feb-26 through Mar-26: Gather feedback from partners (W7) and community (CF5); ensure community fully participates in process; evaluate progress and lessons learned to measure success; document and share successes and lessons learned; **EJCPS Elements 2, 7**
May-26	Apply NIMS4MIM to active NEPA proposal	Activity 3, coordination	Apr-26 through May-26: apply NIMS4MIM to active NEPA proposal; ensure community participates in process, resolve conflicts, ensure partners are treated fairly; organize work and maximize resources; clarify commitments; evaluate progress; use lessons learned; describe measures of success; document and share info on successes; **EJCPS Elements 2, 3, 6, 7**

Date (Month-Year)	Milestone	Activities	Details
Aug-26	Final feedback from partners and community	Workshop 8, Community Forum 6	Jun-26 through Jul-26: Feedback on project activities and NIMS4MIM from partners (W8) and community (CF6); evaluate progress, describe measures of success; use lessons learned; document and share information on successes; **EJCPS Elements 2, 7**
Sep-26	Grant closeout activities	Coordination, final reporting	Document and describe clear measures of success; **EJCPS Element 7**

2c. Itemized Budget Sheet / Budget Narrative

The itemized budget sheet and budget narrative are included as attachments to this Workplan.

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

3a: Environmental Results (Logic Model)

The NIMS4MIM Logic Model is included as an attachment to the Work Plan; it includes inputs, activities, outputs, audience, and outcomes. Project outcomes are also included in Section 3b, along with associated progress indicators (performance measures).

Environmental justice is improved by relying on the EJCPS model to increase community participation in development of NIMS4MIM, which in turn increases DVIR's participation in the NEPA process. Technical capacity is built within DVIR agencies, resulting in better management of Tribal resources and increased understanding of potential impacts to those resources. Community education and empowerment are attained by involving local partners in development and deployment of NIMS4MIM. Approaches to building consensus and setting priorities are also facilitated with community meetings, and by the collaborative nature of NIMS4MIM.

3b: Performance Measurement Plan

Resources/inputs, activities, and outputs related to NIMS4MIM outcomes are detailed in the Logic Model in Section 3a. Timeframes for achieving these results are indicated in milestone schedule (Section 2b). The outputs associated with outcomes in the following Performance Measure Table are detailed in the logic model. Progress indicators will be evaluated by personnel from TIFO and TEPP.

Outcome	Progress Indicator 1	Progress Indicator 2	Goal 1[1]	Goal 2[2]	Goal 3[3]
Develop baseline TEK database, including traditional medicines, wildlife and habitat management practices, cultural sites, etc.	Pre/post surveys show 75% of OSC students increase understanding of TEK	Interviews with staff who receive training show increase in understanding of TEK and its relationship to other environmental indicators	X		
Develop baseline database documenting existing environmental, ecological, and cultural status	Monitor baseline data development and document progress	Identify key issues/concerns remaining to establish baseline conditions	X		

[1] NIMS4MIM Goal 1: Develop holistic understanding of baseline conditions and increase capacity to assess potential impacts to those conditions.
[2] NIMS4MIM Goal 2: Improve engagement in NEPA, including collaborative decision making.
[3] NIMS4MIM Goal 3: Protect Tribal environmental, wildlife, and cultural resources for generations to come.

Outcome	Progress Indicator 1	Progress Indicator 2	Goal 1[1]	Goal 2[2]	Goal 3[3]
Increase understanding of baseline environmental, ecological, and cultural status.	Pre/post surveys show 75% of community members increase knowledge	Focus group discussions with partners and community stakeholders; track that participants with increased understanding represent diverse backgrounds	X		
Increase DVIR GIS knowledge and application to existing management practices.	Number of people who participate in the training	6 TIFO, TEPP, and F&G staff receive GIS certificate from Coursera© / UC-Davis	X		
Increase students' knowledge in baseline environmental, wildlife, and TEK data.	Number of K-12 students who participate in data collection	Pre/post surveys show 75% of OSC students increase knowledge of sampling and mapping techniques	X		
Increase knowledge about local and regional environmental challenges.	Pre/post surveys show 75% of OSC students increase knowledge of environmental challenges	Number of community members who participate in associated activities; in-depth interviews document increased understanding of baseline status on DVIR	X		
Increase competency with NEPA process.	Pre/post surveys show increased ability of Tribal staff and community members to engage in NEPA process	Focus groups show community's increased understanding of and ability to engage in NEPA	X		
Increase competency in EIS and EA review and comment.	Pre/post surveys show 75% of Tribe staff increase competency in EIS and EA	Pre/post surveys show 75% of community increase competency in EIS and EA	X		
Increase competency in HIA	Focus groups with Tribal staff indicate increased understanding of HIA	Focus groups with community stakeholders indicate increased understanding of HIA	X		
Increase competency with NIMS framework.	Pre/post surveys show 75% of Tribe staff increase understanding of NIMS	Pre/post surveys show 75% of community increase understanding of NIMS	X		
Increase community involvement collecting holistic environmental, ecological, and cultural data.	Number of community members involved and participating	In-depth interviews of community members reflect self-disclosed increase in understating baseline conditions		X	
Increase in application of baseline data collection/management, GIS, EIS, EA, HIA, and EA in NEPA	Number of community members and Tribal staff who actively participate	Focus groups seek to understand if there has been an increase in application of NIMS4MIM to the NEPA process		X	
Develop efficient process for DVIR, an underserved community, to mobilize limited resources.	NIMS4MIM developed and used consistently in responding to mining proposals	Conduct focus groups to explore whether stakeholders feel the NIMS4MIM process is efficient, participatory, and effective			X
Increase Tribe's capacity to provide meaningful response to government-to-government consultations on proposed mines.	Increased rate of response to gov-to-gov consultation	In-depth interviews to understand Tribe's capacity to meaningfully respond to government-to-government consultations			X
Deploy holistic, collaborative, efficient approach to responding to mining proposals.	Track attempts to deploy NIMS4MIM process	Interview Tribal staff to understand their roles and skill levels in deploying the approach and to explore challenges and issues			X
Engage USRT member Tribes to develop their own version of NIMS4MIM.	Survey USRT members to gain insights into whether they would	Interview USRT members to understand the challenges and			X

Outcome	Progress Indicator 1	Progress Indicator 2	Goal 1[1]	Goal 2[2]	Goal 3[3]
	develop their own version of NIMS4MIM	issues they see in developing their own version			
Increase community participation in developing process for responding to proposed mining.	Formation of local task force or other organization as identified by partners and community	Tribe engages community members during NIMS4MIM on future responses to NEPA proposals			X
Increase communication and collaboration between project partners and community.	Focus group discussions with partners and community members to understand successes and challenges				X

3c: Sustainability Plan and Community Vision

Rather than creating a new program within the Sho-Pai Tribe and community, NIMS4MIM builds on existing structures and stakeholder groups. Because the idea for this project comes from within DVIR, it is inherently representative of community goals and objectives. For example, TEPP's mission is to "neutralize and/or remediate environmental threats."[3] Primary goals of the TEPP Water Pollution Prevention program include managing tribal resources so that water bodies on DVIR fully support beneficial uses in accordance with the Tribe's Water Quality Standards. Further, as part of the USRT alliance, DVIR is committed to restoring the greater Snake River ecosystem, including improving ecological features to support anadromous fish species.[26] NIMS4MIM will build on these community objectives to increase capacity to assess potential impacts of proposed mines on local ecosystems.

The inclusion of multiple stakeholder groups further strengthens the sustainability of the project. TEPP, F&G, and other agency partners are already serving DVIR interests by protecting vulnerable resources; this builds on those efforts to achieve a unified vision for how DVIR can meaningfully engage in self-determination of their role in mining development. The inclusion of USRT and inviting other Tribes to participate in NIMS4MIM hands-on activities will facilitate the development of NIMS4MIM in other Tribal communities.

4.0 Programmatic Capability

4a: Organizational Experience

TIFO has worked in mining impacted communities since being founded in 2012, and TIFO staff have worked on mining sites in the U.S. and globally for more than 40 consecutive years. TIFO's expertise in assessing existing and potential impacts mining operations includes quantifying environmental, human health, and ecological factors. This includes decades of experience at the Bunker Hill Superfund Site, one of the largest Superfund sites in the U.S. TIFO has worked with Indigenous communities in the U.S. and around the world, supporting their priorities by offering scientific technical support alongside the traditional knowledge of local populations. TIFO's experience includes managing large projects across multiple stakeholder groups, including the environmental assessment and remediation of 10 rural villages impacted by mining activities in Northern Nigeria, which included participation from Centers for Disease Control and Prevention, the World Health Organization, the United Nations, and Nigerian Federal, State, and Local Governments. The project lasted 13 years, spanned two states, and TIFO was awarded the prestigious Green Star Award from the UN for the successes in reducing human health impacts of mining. Within the U.S., TIFO has provided detailed comments to the Idaho Department of Environmental Quality (IDEQ) regarding permit applications for Midas Gold/Perpetua Stibnite

Mine in central Idaho, supporting the Nimi'ipuu (Nez Perce) Tribe and other organizations in their appeal of the IDEQ air permit. TIFO also successfully managed an EJSG from EPA in collaboration with DVIR, and TIFO staff have managed more than a dozen projects under federal grant funding and state contracts, in conjunction with other organizations. TIFO has consistently demonstrated its organizational capacity, technical experience, and infrastructure necessary to successfully implement projects in vulnerable communities impacted by environmental health risks.

4b: Staff Experience / Qualifications of Project Manager (PM)

Project Manager Dr. Casey Bartrem is TIFO's Executive Director. Her experience supporting environmental initiatives in Indigenous communities, includes 13 years working with Hausa and Fulani Tribes impacted by artisanal gold mining in northern Nigeria, 6 years working with ethnic communities impacted by mercury mining in Kyrgyzstan, and 3 years working with partners from DVIR. Dr. Bartrem's expertise includes environmental assessment, health impact assessment, environmental sampling, community engagement, and environmental education. Her collaboration with DVIR began in 2021 when Dr. Bartrem worked with TEPP, F&G, and OCS to develop and implement an environmental education project in 2022. She has continued to work with all three partners to identify future areas of collaboration; during that time, Dr. Bartrem and colleagues at TEPP (see below) identified the need for increased capacity to respond to government-to-government consultation on proposed mining. She also facilitated an EPA Region 10 pilot NEPA training event held at the Sho-Pai Tribal Headquarters in November 2022. Dr. Bartrem collaborated with TEPP, F&G, and OCS on developing a collaborative, effective, and sustainable strategy to engage in NEPA, eventually resulting in the framework for NIMS4MIM.

Marissa Snapp (Sho-Pai Tribal Member) is the Environmental Director at TEPP, responsible for review of environmental data, managing department activities and priorities, overseeing grants, engaging with the public, and identifying opportunities for building TEPP programming. Racheal Thacker (Sho-Pai Tribal Member), Pesticide Coordinator/Solid Waste Technician at TEPP, is responsible for coordinating programming, reporting to federal grant officers, supporting routine environmental sampling, and conducting community outreach activities on DVIR. Previously, Ms. Snapp and Ms. Thacker both worked for gold mining companies in Nevada; experience from their current roles at TEPP and working with mining companies is extremely valuable to this project.

Upon TIFO receiving the cooperative agreement award, TEPP will advertise the new Coordinator position and hire a qualified candidate within 8 weeks. In the interim, Ms. Snapp and Ms. Thacker will take on all responsibilities of the Coordinator position. The TEPP Coordinator will support the development of the rapid response strategy by liaising with other Tribal departments and community stakeholders, arranging meetings, keeping open communication between partners, identifying additional partners, communicating regularly with the project manager, and identifying technical expertise needed throughout the project period.

Additional staff include Chris Cleveland (Sho-Pai Tribal Member), F&G Habitat Specialist; Mr. Cleveland will lead mapping of critical wildlife habitat areas, engagement with OCS students, support community forums, and will ensure that ecological protections are fully considered during development of NIMS4MIM. Sterling Teller (Sho-Pai Tribal Member), F&G Fish Biologist, will support identification of watersheds critical to native and hatchery fish. TIFO co-founders Margrit von Braun, P.E., Ph.D., and Ian von Lindern, P.E., Ph.D., have more than four decades of experience working with communities impacted by mining operations, including U.S. Tribes. Most recently, they have represented TIFO in responding to the proposed Stibnite Mine

in Idaho, which poses significant threats to the Nimi'ipuu (Nez Perce) Tribe. Kim Olson, TIFO Grant Specialist, will manage the budget under the direction of the Project Manager. Bev Bafus, TIFO bookkeeper, will assist Ms. Olson with tracking expenses and financial reporting in compliance with federal protocols. Drs. Von Lindern and von Braun and Ms. Olson were also engaged in the EJSG funded *One Habitat* project.

4c: Expenditure of Awarded Grant Funds

TIFO has the infrastructure and experience to ensure timely, efficient expenditure of grant funds. TIFO has accounting and financial reporting services to manage payrolls, reimbursements, and grant expenditures for this project. The personnel responsible for these tasks have extensive experience with bookkeeping and grant management. The Project Manager will work closely with TEPP to ensure that the milestones outlined in Section 2b are achieved and funds are expended in a timely manner. TIFO's previous projects have demonstrated the organization's ability to carry out successful projects. As an example, TIFO's EJSG One Habitat project (see Section 5) was successfully developed and implemented in collaboration with DVIR partners in a timely and efficient manner. Past TIFO projects have been successfully implemented in a variety of low-resource settings with multiple partnerships, including the Nigerian Environmental Health Project implemented in close collaboration with Doctors Without Borders, the World Health Organization, the United Nations Children's Fund, the Federal Government of Nigeria, multiple levels of State and Local government, and traditional leadership.[27]

5.0 Past Performance

TIFO received an EPA EJSG in 2022 for the collaborative 'One Habitat' project, a joint undertaking by OCS, F&G, and the North American Native Research and Education Foundation (NANREF). TIFO successfully managed and completed this grant, engaging a total of 119 OCS students in 3 experiential education activities, 4 classroom workshops, 2 field trips, and 2 scientific conferences to increase students' environmental science competency, increase the number of students expressing interest in pursuing environmental science/STEM higher education, and improving the riparian ecosystem on DVIR. For the 1-year grant period, TIFO consistently met progress report deadlines, communicated with the grant officer, and completed activities, expenditures, and final reports within the grant period without extensions. Meeting the output and outcome goals in a timely and efficient manner is especially impressive given that the team worked through several school and tribal government closures due to COVID-19.

In addition to the EJSG, TIFO has managed cooperative agreements with Doctors Without Borders (MSF) to support humanitarian projects in underserved communities globally. Projects within the last three years include work in Indigenous communities impacted by mercury mining in Kyrgyzstan (2016-2022), and communities impacted by climate change and pesticide exposures in Uzbekistan (2022-present). For these projects, annual workplans and budgets are developed, managed, and reported to MSF, similar to requirements for public and private grants.

- **Kyrgyzstan Environmental Health Project:** $120,000 average annual budget for TIFO contribution alone (total project costs up to $500,000/year)
- **Uzbekistan Environmental Health Project:** $40,000 budget for 2023 for TIFO contribution alone (total project costs for 2023 not yet available)

6.0 Quality Assurance Project Plan (QAPP) Information

NIMS4MIM will involve the collection of environmental data to develop a database of baseline conditions for the Tribe to use in determining potential impacts of proposed mining operations. Partners will have an approved QAPP in place before initiation of project activities.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: The Trust for Public Land

Address: 23 Geary Street, Suite 1000

City: San Francisco

State: CA: California Zip Code: 94108

B. Unique Entity Identifier (UEI): HN7CS4YNMBC4

C. Applicant/Recipient Point of Contact

Name: Stephanie Flynn

Phone: Ex. 6 - Personal Privacy (PP)

Email: stephanie.flynn@tpl.org

Title: Sr. Manager of Government Grants

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☒ Yes ☐ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☒ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☐ Yes ☒ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☐ Yes ☒ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☐ Yes ☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Kate Vlasak, Director, People Partner, People and Culture Department; 23 Geary Street, Suite 1000, San Francisco, CA 94108; kate.vlasak@tpl.org; phone: Ex. 6 Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

From TPL's HR Manual:
OPEN DOOR POLICY
Your suggestions for improving the Trust for Public Land's operations are always welcome. At some time or another, you may have a complaint, suggestion, or question about your job, your working conditions or the treatment you are receiving. We ask that you take your concerns first to your supervisor, following these steps:
1. Within a week of the occurrence, bring the situation to the attention of your immediate supervisor, who will investigate and provide a solution or explanation.
2. If the problem is still not resolved, you may present the problem to your supervisor's supervisor or to the Director of Human Resources, who will attempt to reach a final resolution.
This procedure, which we believe is important for both you and the organization, cannot result in every problem being resolved to your satisfaction. However, The Trust for Public Land values your input and you should feel free to raise issues of concern without fear of retaliation.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Stephanie Flynn	Sr. Manager of Government Grants	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

From TPL's HR Manual:
OPEN DOOR POLICY
Your suggestions for improving the Trust for Public Land's operations are always welcome. At some time or another, you may have a complaint, suggestion, or question about your job, your working conditions or

the treatment you are receiving. We ask that you take your concerns first to your supervisor, following these steps:
1. Within a week of the occurrence, bring the situation to the attention of your immediate supervisor, who will investigate and provide a solution or explanation.
2. If the problem is still not resolved, you may present the problem to your supervisor's supervisor or to the Director of Human Resources, who will attempt to reach a final resolution.
This procedure, which we believe is important for both you and the organization, cannot result in every problem being resolved to your satisfaction. However, The Trust for Public Land values your input and you should feel free to raise issues of concern without fear of retaliation.

ACQUISITION AND GRANTS OFFICE

November 30, 2021

Ms. Michelle Pandori
Vice-President Finance and Accounting
The Trust for Public Land
101 Montgomery Street, Suite 900
San Francisco, CA 94104

Dear Ms. Pandori:

This letter is a response to your request concerning the granting to your organization a NOAA approved indirect cost rate for fiscal year 2022.

Since you have already completed your organization's Indirect Cost Rate Proposal (Proposal) and on October 22, 2021, submitted it to the NOAA Grants Management Division (GMD) for review, you may use the indirect cost rate of 32.71% cited in your organization's Proposal. It is not necessary for you to wait for the signed agreement that you would normally receive as a response from GMD to your audit submission.

The usual process for this is that your organization's Proposal would be sent to the CPA firm NOAA contracts to review Proposals. The results of that review are returned to me and then I send you a signed agreement containing the NOAA approved rate for your review, approval, and countersignature. However, NOAA does not now have a CPA firm contracted to accomplish this task. The NOAA Contracting Office has not yet completed the solicitation process necessary to secure a new firm. Given this, I cannot in the immediate future send you a signed agreement in response.

NOAA will eventually secure a CPA firm and as soon as they are ready to work, I will send this Proposal to the firm for evaluation. The fact that GMD cannot provide you a signed agreement should not interrupt or interfere with the effective operations of your organization, so please use the rate cited in the Proposal you have submitted.

Please do not hesitate to contact me if you need anything else or if you have questions. I can be reached at Ex. 6 - Personal Privacy (PP) or at lamar.revis@noaa.gov. Thank you.

Sincerely,

Lamar Dwayne Revis

Dear Taxpayer:

This is in response to your Oct. 29, 2013, request for information regarding your tax-exempt status.

Our records indicate that you were recognized as exempt under section 501(c)(3) of the Internal Revenue Code in a determination letter issued in February 1978.

Our records also indicate that you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Please refer to our website www.irs.gov/eo for information regarding filing requirements. Specifically, section 6033(j) of the Code provides that failure to file an annual information return for three consecutive years results in revocation of tax-exempt status as of the filing due date of the third return for organizations required to file. We will publish a list of organizations whose tax-exempt status was revoked under section 6033(j) of the Code on our website beginning in early 2011.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Upper Snake River Tribes Foundation

Address: 3380 W Americana Terrace Suite 360

City: Boise

State: ID: Idaho Zip Code: 83706-2500

B. Unique Entity Identifier (UEI): DYUCPZHLFAC1

C. Applicant/Recipient Point of Contact

Name: Scott Hauser

Phone: Ex. 6 Personal Privacy (PP)

Email: scott.hauser@usrtf.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☐ Yes ☒ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Alexis Malcomb	Executive Director	04/13/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

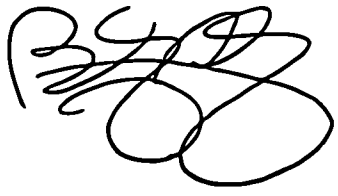
EPA Form 5700-54 (Rev 4-02)

WILLAMETTE PARTNERSHIP

April 11, 2023

Reference: Letter of Commitment to EPA

To whom it may concern,



It's my distinct pleasure to put Willamette Partnership's support behind Trust for Public Land's efforts to seek funding from EPA for the Madras Elementary Rural Community Schoolyard Project in Madras, Oregon.

Willamette Partnership is a conservation non-profit with a deep commitment to helping build stronger, healthier, and more equitable communities that are sustained by nature. We believe that people need nature and that the well-being of communities and natural systems is inextricably linked. Communities don't have to choose between a healthy economy and a healthy environment. We do work that benefits both people and nature, building innovative, cross-sector solutions through effective collaboration.

The Madras Elementary Community Schoolyard Project will be a multi-benefit space designed alongside the community. Rural community schoolyards benefit kids, the environment, and the community by providing safe and accessible access to outdoor recreation space for the Madras Elementary students during school hours and the surrounding community when school is not in session. Equitable access to nurturing green space supports students' and community members' educational, emotional, and physical health. After conducting statewide landscape scans, we found that Madras is a community where health, social, environmental, and economic burdens co-occur. Yet, they have the community leadership and connections to co-create a healing outdoor community space together. We bring our expertise in collaborative processes to advance environmental justice in Madras, Oregon.

Willamette Partnership is committed to the project and will provide community engagement, technical assistance, and environmental justice lens throughout the project. Willamette Partnership is proud to be a partner in this effort, and we encourage your full support.

Sincerely,

Barton Robison, Program Director

Jefferson County
School District 509J
UNITE. ENGAGE. SOAR.

Students flourish here. We care for each other. Better every day.

To whom it may concern,

The Jefferson County School District (JCSD) enthusiastically supports Trust for Public Land's efforts to seek funding for the Oregon Rural Community Schoolyards Program, Madras Elementary Community Schoolyard Project in Madras, Oregon.

The Madras Elementary Community Schoolyard Project, a priority for the Oregon Rural Community Schoolyards Program will benefit the community of Madras and the greater Jefferson County by providing safe and accessible access to outdoor recreation space for the Madras Elementary students during school hours, and the surrounding community when school is not in session. Equitable access to nurturing green space supports the educational, emotional, and physical health of students and community members.

JCSD is committed to continued partnership, and being a liaison for the Madras Elementary Community Schoolyard Project and will continue to support the program's efforts to engage with students, staff and parents of Madras Elementary School, the School District, and the greater community to design, activate, and maintain the future schoolyard.

The Jefferson County School District is proud to be a core partner in this effort and we encourage your full support.

Sincerely

The Latino Community Association (LCA) enthusiastically supports Trust for Public Land's effort to seek funding for the Oregon Rural Community Schoolyards Program, Madras Elementary Community Schoolyard Project in Madras, Oregon.

The Madras Elementary Community Schoolyard Project, a priority for the Oregon Rural Community Schoolyards Program will benefit the community of Madras and the greater Jefferson County by providing safe and accessible access to outdoor recreation space for the Madras Elementary students during school hours, and the surrounding community when school is not in session. Equitable access to nurturing green space supports the educational, emotional, and physical health of students and community members. As we shift away from the pandemic, opportunities for outdoor activities are needed more now than ever. Community spaces for families to connect, and children to play and engage are an important and necessary part of a community. LCA is committed to continuing to be a community partner and liaison for the Madras Elementary Schoolyard Project to further efforts in community outreach & engagement, fundraising, and the design and activation of the future Community Schoolyard.

The LCA's mission is to empower our Latino families to thrive, creating opportunities for advancement and building bridges that unite and strengthen our communities. We help families pay their bills, file their taxes, work through legal issues, find work, improve their English, and connect to new opportunities. We are an essential connecting point for our immigrant community to ask questions, have letters translated, get help making phone calls (interpretation), and negotiate payment plans (advocacy). Our programs include Workforce Education and Training, Family Empowerment, Healthy Families, Cultural Enrichment, and Youth Rising - all designed to help create a cohesive and diverse community where all people are valued and empowered to participate and contribute to the health and prosperity of Central Oregon.

The Latino Community Association is proud to be a partner in this effort and we encourage your full support.

Sincerely,

Cynthia L. Jurgensen
Development Manager

JEFFERSON COUNTY
FAITH BASED NETWORK
PO Box 416
Madras, OR 97741

April 11, 2023

To whom it may concern,

I serve on the board of directors for the Jefferson County Faith Based Network and am delighted to express my support for the Trust for Public Land's efforts to seek funding for the Oregon Rural Community Schoolyards Program, Madras Elementary Community Schoolyard Project in Madras, Oregon.

The Madras Elementary Community Schoolyard Project, a priority for the Oregon Rural Community Schoolyards Program, will benefit the community of Madras and Jefferson County by providing safe and accessible outdoor recreation space for the Madras Elementary students during school hours, and the surrounding community when school is not in session. While the benefit to students is obvious, I'm excited about the opportunity the completed project will provide seniors who live within walking distance of the school to enjoy a safe place to walk without having to drive to get there.

The Jefferson County Faith Based Network is committed to continuing to be a partner and liaison for the Madras Elementary Community Schoolyard Project and will continue to support the programs efforts to engage the greater community of Madras. Your full support of the project is encouraged.

Sincerely,

Dana St John
Jefferson County Faith Based Network Board Member

BEAN FOUNDATION INC.

RE: EPA Environmental Justice Collaborative Problem Solving – Letter of Commitment

The Nature Conservancy in Idaho (Conservancy) is pleased to join the Upper Snake River Tribes Foundation (USRT) as a partner in achieving the goals of the Tribal Youth Environmental Justice and Climate Leadership Program. The Conservancy supports USRT's goals of improving environmental justice literacy of tribal youth, authentically connecting tribal youth to local and regional environmental justice issues that impact their community through collaborative civic engagement, and empowering tribal youth to take action through career and workforce development in climate and environmental justice.

The Nature Conservancy is a global non-profit with the mission to protect the lands and waters on which all life depends. Through the Tribal Youth Environmental Justice and Climate Leadership Program, the Conservancy will share expertise in land conservation, stewardship and ecosystem restoration, climate action, and regenerative agriculture.

The Nature Conservancy commits to the following:

- Year 1:
  - Host 1 virtual climate justice class
- Year 2:
  - Host 1 service-learning field day for a maximum of 12 students at one of The Nature Conservancy's Idaho preserves
- Year 3:
  - Host 1 intern (18 years or older) at Silver Creek Preserve (paid, up to 6 months)
  - Host 1 career-focused field day for a maximum of 12 students at one of The Nature Conservancy's Idaho projects

In coordination with the USRT, The Nature Conservancy will be responsible for facilitating these activities. The Nature Conservancy staff time and materials for the activities will be provided in-kind. Internship and travel expenses will be included in the grant and administered by USRT.

Sincerely,

Mark Menlove
State Director, Idaho

2003-2004 M.S., University of Idaho, Moscow, December 2004 Major: Environmental Science
Relevant coursework: Research Methods, Natural Resource Policy, Environmental Regulations and Law, Natural Resource Policy Development, Politics of Science, Soil and Water Quality Seminar, Wildland Issues Colloquium, Environmental Mediation, Human Dimensions of Restoration Ecology, International Environmental Issues, Environmental Science Graduate Seminar, Drinking Water and Human Health, and Law, Ethics, and the Environment.

2000-2002 B.S., University of Idaho, Moscow, December 2002
Majors: Political Science
Relevant coursework: Politics and the Environment, Political Science Research Methods, American National Government, Political Philosophy, Contemporary Political Ethics, American Congress, American Presidency, and American Political Thought.

2000-2002 B.S., University of Idaho, Moscow, May 2002
Majors: History
Relevant coursework: American Environmental History, The Historian's Craft, Idaho and Pacific Northwest History, U.S. History (seven 3-credit courses)

1998-2000 North Idaho College, Coeur d'Alene
Major: Education
Relevant coursework: Physical Geology, Historical Geology, Biology, Mathematics, Technical Writing, Astronomy, Physical Geography.

Experience:

2016 – Present Executive Director – Upper Snake River Tribes Foundation. Key management leader of USRT. Responsible for overseeing the administration, programs, employees, and strategic plan of USRT. Coordinate directly with USRT's tribal leaders and staff on environmental, fish & wildlife, and natural resource issues throughout the Upper Snake River Basin and beyond. Engage in hydroelectric projects across the Columbia River Basin. Full-time/40+ hours/week.

2012 – 2016 Environmental Program Director – Upper Snake River Tribes Foundation. Establish a USRT environmental program. Coordinate and pursue USRT objectives and strategies through information gathering and dissemination, facilitation of technical and policy meetings, and drafting of technical and policy statements. Assessment of the effects of climate change on USRT's four member tribes. Prioritization of actions and identification of projects on tribal lands. Identify funding sources and implement projects. Data collection and synthesis. Engage in hydroelectric projects across the Columbia River Basin. Full-time/40+ hours/week.

2009-2012 Environmental Scientist – Ecosystem Research Group. Research, write, review, and edit National Environmental Policy Act (NEPA) and non-NEPA documents and reports for public and private clients. Consult and develop activities, alternatives, and design elements for NEPA projects and non-NEPA. Researched and authored a successful appeal on a NEPA project. Acting wildlife manager overseeing the production of wildlife assessments, biological evaluations, biological assessments, connectivity evaluations, management indicator species reports, and specialist reports. Manage all aspects of multiple projects including proposal writing, budgeting, invoicing, client/stakeholder communication, and staff direction. Facilitate stakeholder coordination/cooperation efforts. Primary editor and writer of external and internal documents. Regulatory review and compliance. Conduct research on the cause/effect of

disturbance regimes on diverse landscapes. Proposal and grant writing. Document formatting and final presentation organization and printing. Full-time/40+ hours/week.

2008-2010 Hydrologic Technician – United States Forest Service, Lolo National Forest. Create and conduct studies and write sections of the 2010 Lolo National Forest best management practices (BMPs) report. BMPs are implemented on all forest projects that will likely impact soil and water resources. The 2010 report quantitatively analyzes numerous projects within the Lolo National Forest to assess the effectiveness of BMPs in protecting soil and water resources. The report addresses examples of projects where BMPs were not implemented or properly enforced. Principal 2008 duties included conducting forest road inventories, surveying bridges, culverts, and streams and collecting stream data. Information obtained from road inventories were used to assess the natural recovery value of decommissioned logging roads. Bridge and culvert survey data was used to evaluate functionality and to assess the impacts on soil and stream characteristics. Stream monitoring data were collected and compared with previous data to identify change over time. Full-time/40 hours/week.

2005-2008 Technical Information Specialist, Fire Effects Information System (FEIS) – United States Forest Service/Rocky Mountain Research Station. The primary responsibility of this position was to write plant species reviews for the FEIS website. Species reviews involved an extensive search for all available literature on assigned plant species. All available information regarding plant taxonomy, distribution, succession, reproductive biology, disturbance responses, wildlife value, and management dilemmas was summarized in a concise review. Species reviews highlighted information pertinent to plant-fire adaptations and/or postfire regeneration methods. Gaps in or inconsistent data was highlighted in reviews. For a list of my FEIS writings, enter Hauser, Alan into the search pane on the FEIS homepage: http://www.fs.fed.us/database/feis/index.html. Full-time/40 hours/week.

Scholarships/Awards/Achievements:

2016: Promoted to the Executive Director Position
2012: Hired to lead USRT's Environmental Program
2010: Promotion to project manager
2010: Promotion to environmental scientist II and wildlife manager and performance bonus
2007: Performance award pay increase
2004: M.S. in Environmental Science, 4.0 GPA
2003: First place, *Pi Sigma Alpha* National Political Science Class Paper of the Year, $250
2002: *Pi Sigma Alpha* National Political Science Honor Society
2002: Graduated Summa Cum Laude, B.S. History and Political Science
2002: Jeffrey Mesenbrink Memorial History Scholarship, $1580
2002: Charles H. Burt Scholarship, $300
2001: *Phi Alpha Theta* National History Honor Society
2001/2002: Winkler Memorial History Scholarship, $500

Thesis Title:

Public Perceptions and Attitudes in Idaho about Water Rights, Water Rights Transfers, and the Revocation of the Local Public Interest Review Criterion in Idaho Water Law.

Short Courses/Workshops Attended and Committee Positions:

EPA Region 10 Tribal Leaders Summit, Suquamish, WA, March 2017
Pacific Northwest Climate Conference, Seattle, WA, March 2016
Great Basin Consortium Conference, Reno, NV, February 2015
EPA Water Quality Standards Academy, Washington, D.C., May 2014
EPA Region 9 Tribal Leaders Conference, Lemoore, CA, October 2013
EPA Region 10 Tribal Environmental Leaders Summit, Spokane, WA, September 2013
Climate Change Science for Effective Resource Management and Public Policy in the Western United States Conference, Las Vegas, NV, March 2013
Great Basin Consortium Conference, Boise, ID, January 2013

Climate Change in the Northern Rockies Workshop, Boise, ID, November 2012
EPA Region 9 Tribal Leaders Conference, San Francisco, CA, November 2012
Pacific Northwest Climate Change Science Conference, Boise, ID, October 2012
ITEP Climate Change Adaptation Planning Workshop, Missoula, MT, September 2012
USFWS Climate Change Vulnerability Assessment Workshop, Shepherdstown, WV, June 2012
EPA Region 10 Tribal Environmental Leaders Summit, Grand Ronde, OR, May 2012
Clear Writing for NEPA Specialists, Park City, UT, August 2010.
Watershed Education Network Community Stream Monitoring Training, March 2009.
Conservation Lands Citizen Working Group, Missoula, MT, 2009.
Water Commissioner/Manager Workshop, Hamilton, MT, May 2005.
Graduate Assistant Professional Training, University of Idaho, Moscow, ID, Spring 2004.

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. During your advance ruling period, you will be treated as a public charity. Your advance ruling period begins with the effective date of your exemption and ends with advance ruling ending date shown in the heading of the letter.

Shortly before the end of your advance ruling period, we will send you Form 8734, Support Schedule for Advance Ruling Period. You will have 90 days after the end of your advance ruling period to return the completed form. We will then notify you, in writing, about your public charity status.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

Letter 1045 (DO/CG)

UPPER SNAKE RIVER TRIBES FOUNDATION

We have sent a copy of this letter to your representative as indicated in your power of attorney.

Sincerely,

Robert Choi
Director, Exempt Organizations

SKILLS & ABILITIES effective oral and written communicator, proficient researcher, coordinator, physically active, intercultural communication, shares information effectively in group settings, highly organized, dependable, reliable, prompt and present, independent and self-driven, works well in groups, responsible money-handler, effective in Google and Microsoft Office, experience in ArcGIS

EDUCATION

WARREN WILSON COLLEGE, SWANNANOA NC, AUGUST 2019-DECEMBER 2022

MAJOR: Global Studies with a concentration in Environment and Society, MINOR: Environmental Studies, 3.99 GPA, matriculated from high school with 26.0 credit hours, completed 3 semesters of Spanish, a global studies, environmental education, foundations of high school and middle school education, and environmental policy course. Has completed global studies thesis on indigenous technology and global agricultural trade, studied abroad in Chiapas, Mexico May 2022.

EXPERIENCE

OUTREACH AND EDUCATION COORDINATOR UPPER SNAKE RIVER TRIBES FOUNDATION (USRT), JANUARY 2023-PRESENT

Manage USRT social media, create quarterly technical newsletters, create public newsletters, perform outreach to local companies/organization, host booths at tribal and local events, Attend 4 council meetings per tribe a year (16 total), travel to conferences and forums, build and maintain relationships with/communication with donors and supporters, identify additional funding sources to help build USRT's education and climate program, researching and writing grants, foster strong relationship with a wide range of community stakeholders, including government agencies, educators, school administration, and tribal staff, plan and develop tribal youth engagement activities and events including camps, market climate curriculum and other learning opportunities, facilitate workshops, classes, and other learning opportunities for tribal community members, regularly travel to member tribes' reservations to meet with teachers and other community members.

BLACKSMITH WARREN WILSON COLLEGE, AUGUST 2020-DECEMBER 2022

Make products, teach blacksmithing techniques to peers and adults, assist in teaching craft classes, manage intercrew communication, manage forge social media, fabricate tools, maintain clean and effective work environment, communicate with other campus crews, collaborate on larger fabrication projects.

RESIDENT ASSISTANT WARREN WILSON COLLEGE, AUGUST 2020- JANUARY 2022

Maintain a friendly and connected community within dorms, connect with residents and communicate is needs are being met, facilitate fun and uplifting programs for residents to participate in, fill out work orders that need to be addressed in dorms, fill out incident reports when community violations occur, conduct rounds of multiple dorms to ensure community guidelines are being respected, maintain a positive and inclusive environment, fill out weekly reports for supervisors, handle sensitive information effectively.

BARISTA INGLES/STARBUCKS, JANUARY 2022-PRESENT; KROGER/STARBUCKS, MARCH 2017-APRIL 2018

Welcomes customers and determine their coffee interest and needs, educates customers by presenting and explaining coffee drink menu and food items; sells coffee and coffee grinding by explaining difference in coffee beans and coffee preparation equipment machines, demonstrating how coffee brewing equipment operates; prepares and sells coffee drinks by following prescribed recipes and preparation techniques for coffee drinks; maintains inventories and stock supplies; keeps equipment operating, troubleshoots breakdowns and performing preventative maintenance, and calling for repairs as needed; maintains safe and healthy work environment by following organization standards and sanitary regulations; and updates knowledge by participating in educational opportunities and reading coffee, retail and food service publications.

SALES ASSOCIATE DANCING BEAR TOYS, MAY 2021-DECEMBER 2021

Welcomes customers, advises and directs customers to items for their preferences, interacting with children, handling money, taking inventory, maintaining a clean and organized work environment.

SALVAGE LABORER WARREN WILSON COLLEGE AUGUST, 2019-2020

Salvage materials on campus, separates reusable materials from waste materials, sorts recyclable items, operates a motor vehicle, orchestrated donations to local shelters, maintains compost, weighs materials in containers and keeps records of total waste collected, handles money.

SALES ASSOCIATE AND PLANT CARE GIVER FEASEL'S GARDENING CENTER, MAY 2020-JUNE 2020

Water plants, repot plants, advise customers, assist customers in finding the right flower or plant for them, putting together flower displays, organizing display shelves, maintaining an organized and clean work environment, restocking gift shop areas, pricing items, unloading large plants and cement sculptures, maintaining relationships with regular customers.

SERVER CHIPOTLE, MARCH 2019-JANUARY 2020

Welcomes customers, prepares orders to customers' preferences, fulfills online orders, handles money and credit card transactions, maintain hygienic environment, performs inventory, answers questions about food items.

FOOD SALES CLERK BRINKMAN'S COUNTRY CORNER, APRIL 2018-MARCH 2019

Fills customer order, performing duties such as obtaining items from shelves, freezers, coolers, bins, tables, or containers; preparing single-serve desserts for take-out; washing, cutting, mixing ingredients according to recipes; baking food items in the oven. Place food items in container.Stamps, marks or tags price on merchandise. Informs customers of total price of purchase. Sets up displays and stocks shelves, coolers, counters,bins, tables, freezers, containers or trays with new merchandise.

SERVER JOLLY DIPPER APRIL, 2016-2017

Greet customers, take order, answer questions about food items, provide information about daily specials, repeat orders to ensure accuracy, provide customers with payment information and take cash or process credit and debit card purchases, return change and provide receipts, assist in food preparation, tally receipts and ensure any discrepancies are handled immediately, hand customers their orders and politely thank them for choosing Jolly Dipper.

VOLUNTEER/ COMMUNITY ENGAGEMENT

PET PAL, Humane Society & SPCA of Hancock County, 2008 to 2015, fostered kittens and puppies, socialized pets pre-adoption

CAMP VOLUNTEER, Findlay City Schools, 2015-2019, Camp World and Camp Discovery (K-6), aided teachers in science, technology, engineering, and mathematics (STEM) as well as geographical and cultural classes

TEACHER'S ASSISTANT, ArtSpace Charter School, 2019, assisted first-graders in reading, writing, and research

ECOTEAM MEMBER, Oakley Elementary, 2020, taught a third grade classroom about the environment

SPECIAL PROGRAM TEACHER, Hinds' Feet Farm, 2020, dissecting owl pellets and teaching environmental science to folks with traumatic brain injuries

GENERAL VOLUNTEER, Bounty and Soul, 2021, directing and helping patrons through a free food market

ESL ASSISTANT, Owen Middle School, 2022, reaching out and talking to ESL students

ESL TEACHER, Beacon of Hope, 2022, creating and executing lesson plans to teach English to Spanish speakers

Education

University of Denver
Environmental Policy and Management
Concentrations in Energy and Sustainability
Master of Science .....3.93 GPA.....2019 – 2021

- Relevant Graduate Courses: Environmental Protection Law, Sustainable Transportation, Renewable and Alternative Energies, Climate Change and Science; Sustainability: Policy and Practice.

Reinhardt University
Interdisciplinary Studies: English, History, & Religion
Minors in Mathematics and International Studies
Bachelor of Arts ..... 3.83 GPA – Graduated with Honors .....2015 – 2019

Work Experience

Environmental Program Director, Upper Snake River Tribes Foundation *2021-Present*
Boise, ID

- Build and foster relationships with stakeholders, tribal members, and agencies.
- Attend and present at national and regional conferences.
- Co-lead in community outreach and education through workshops, tabling, social media, and newsletters.
- Identify, write, and submit LOI's, grant proposals, and donor-inquiries to meet the financial needs of the environmental program.
- Coordinate in-kind contributions from NGO's.
- Manage grant invoicing, reporting, monitoring, and budgeting for grants up to $200,000.
- Enter data and manage databases for the environmental program and various projects.
- Create a positive, team-oriented workspace and manage program staff, interns, and volunteers.
- Assist in recruiting, interviewing, and training new program employees, interns, and volunteers.
- Plan and execute events for tribal leadership, board members, tribal community members, and tribal youth.
- Design and implement Tribal Youth Climate Camps throughout the year.
- Coordinate between federal, private, national/regional, and tribal entities.
- Serve as lead on climate and environmental justice issues for the USRT tribes.
- Manage all aspects of the environmental program and projects.
- Perform outreach to member tribes' leadership, staff, community members, and youth.
- Generate a myriad of reports for executive staff.
- Demonstrate continued cultural-competency, compassion, and respect.
- Assess effectiveness of environmental programs and climate projects.
- Research, co-author, and submit comment letters on various issues for the tribes.
- Continued use of Canva, Google Suite, Zoom, and Microsoft.

- Lead the development and implementation of the Climate Change Program: Tribal Resilience Action Database, Tribal Climate Hazard Mitigation, Climate Change Outreach and Education Program (focused on tribal youth and community members).

Administrative Assistant & Maintenance Coordinator, Skyline Properties Group
Remote *2019-2021*

- Accurately file and keep record of lease agreements, maintenance records, and financial records.
- Entered data and management systems for record keeping and progress tracking.
- Perform duties as needed for executive staff.
- Perform outreach to owners, tenants, and vendors.
- Independently managed over 300 properties maintenance needs and projects.
- Completed between 120-200 work orders a month.
- Work with owner budgets and handle any invoicing after work order completion.
- Managed projects with budgets up to $20,000.
- Effectively communicated with multiple agencies, departments, and stakeholders: Maintenance vendors, leasing and accounting department, insurance adjusters, warranty companies, owners, and tenants via phone, email, in-person, and Zoom.
- Co-lead staff meetings.
- Generate and distribute reports to stakeholders, colleagues, and executive staff.
- Continued use of Microsoft Word, Excel, and PowerPoint.
- Independently managed my own work schedule, projects, and deadlines.
- Troubleshoot and problem solved continuously throughout the work week.

Legal Intern, Chief Judge Ellen McElyea
Canton, GA *2019-2019*

- Attended daily court hearings.
- Took notes for Judge McElyea.
- Draft proposed decisions for Judge McElyea in high-profile court case.
- Assisted in filing and record keeping.
- Researched case law and identified supporting documents for the legal team.
- Transcribed recorded interviews and interrogations in criminal cases.
- Work alongside the District Attorney to research court cases.
- Write analysis of the court system and procedures for my academic advisor at the end of the internship.

Resident Advisor, Reinhardt University
Waleska, GA *2017-2019*

- Monitor residential areas to ensure they remain in compliance with school policies and procedures.
- Display ability to independently handle a variety of difficult situations.
- Foster community development for undergraduate residents through educational programming focused on environmental sustainability.
- Collaborate and foster relationships with residents.
- Collaborate with supervisors, professors, outside speakers, etc. for programs.

Tutor, Reinhardt University
Waleska, GA *2017-2019*

- Tutor in English, Math, History, and low-level biology.
- Assist peers in utilizing higher order thinking skills (analysis, synthesis, creation)
- Review/edit essays and papers for peers.
- Aid peers in comprehending and applying information from source material.

Achievements and Publications

- Master's thesis examines Boise's transportation future, focusing primarily on public transportation and urban planning. Examines social, economic, and environmental impacts, with a special focus on the impacts to vulnerable communities (women, children, minorities, low-income, and homeless).
- Microsoft Office / Google Suite / Social Networking (Facebook, Instagram, Twitter, LinkedIn) Experience.
- Member, Sigma Tau Delta – English Honor Society
- Member, Phi Alpha Theta – History Honor Society
- Certificate in Grant Writing - Boise State University
- Certificate in Email Marketing and Fundraising - National Grant Foundation
- Certificate in NEPA Process - Archer Institute
- Certificate in Water Quality Standards Academy - Environmental Protection Agency
- Certificate in Environmental Education and Community Engagement - Cornell University
- Certificates in Excel & Pivot Tables - National Grant Foundation
- Volunteer experience with the Citizens Climate Lobby (CCL)
- Volunteer experience with Boise's homeless shelter: Interfaith Sanctuary

3-30-2023

Scott Hauser
Executive Director
Upper Snake River Tribes Foundation
Boise, ID 83702

RE: EPA Environmental Justice Collaborative Problem Solving - Letter of Commitment

I am writing to indicate our commitment to partnering with the Upper Snake River Tribes (USRT) Foundation on the Tribal Youth Environmental Justice and Climate Leadership Program. We are excited by the goals of this project to 1) improve the environmental justice literacy of tribal youth; 2) authentically connect tribal youth to local and regional environmental justice and climate issues that impact their community through collaborative engagement; and 3) empower tribal youth to take action through career and workforce development in climate and environmental justice.

The WaterShed is an organization run by the City of Boise. We are committed to increasing water and climate change awareness and inspiring action by teaching people of all ages how to protect and conserve our natural resources for future generations. We engage our community through exhibits, programs, and outreach.

We have partnered with the Upper Snake River Tribes Foundation on facilitating and hosting a climate field trip and have engaged the Foundation on exhibit designs for our education center.

Should USRT be awarded the EPA EJCPS grant, The WaterShed will assist through our expertise in climate education and engagement and commitment to uplifting disadvantaged communities. The WaterShed will participate in all partnership meetings and necessary calls to organize and plan for appropriate engagement throughout the course of the program. The WaterShed also commits to the following:

Year 1:

- Participating in 2 virtual EJ/climate classes

Year 2:

- Participating in 1-2 virtual EJ/climate classes

- Providing activities and support for 2 field trips

Year 3:

- Participating in 2 virtual EJ/climate classes

In addition, the City of Boise will explore opportunities to participate in on-reservation workshops alongside USRT as well as offer internships to tribal youth. These are services we will have to explore further before fully committing.

The above services will be contributed in-kind, apart from the internship, which will be paid under the grant.

We are excited to be a partner on this project and increase the engagement of tribal youth in Environmental Justice, climate change, and the City of Boise's many opportunities.

Sincerely,
Cindy Busche
Education Manager, The WaterShed

1.0 PROGRAM OBJECTIVES

Project Summary

Project Title

Tribal Youth Environmental Justice and Climate Leadership Program.

Project Location

The Upper Snake River Tribes (USRT) Foundation office is in Boise, Idaho and its four member tribes reside within the following reservations: Fort Hall Reservation (Idaho), Burns Paiute Reservation (Oregon), Duck Valley Reservation (Idaho & Nevada Border), and Fort McDermitt Reservation (Oregon and Nevada Border). The member tribes' cultural, environmental, and spiritual ties span over 64 million acres, crossing legal borders and boundaries in three states (Figure 1).

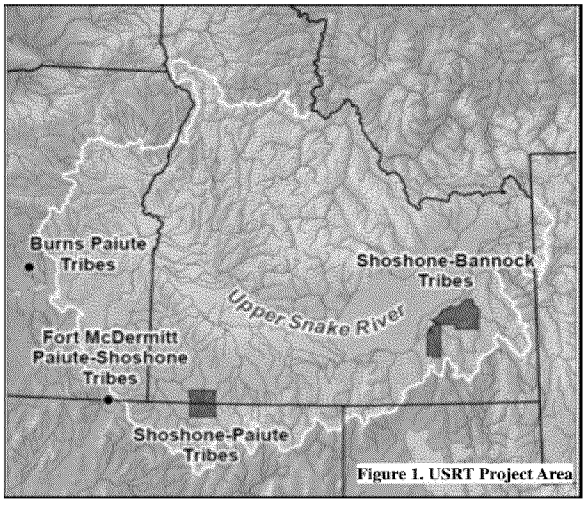

Figure 1. USRT Project Area

Applicant Information

USRT Foundation, Scott Hauser, Executive Director, scott.hauser@usrtf.org, Ex. 6 - Personal Privacy (PP)

Organization Description

USRT is composed of four Indian tribes of the Upper Snake River Basin in Idaho, Nevada, and Oregon: the Burns Paiute Tribe, Fort McDermitt Paiute and Shoshone Tribe, Shoshone-Bannock Tribes of the Fort Hall Reservation, and Shoshone-Paiute Tribes of the Duck Valley Reservation. While the members of USRT currently reside within the Upper Snake River Basin, their aboriginal areas of use extend far beyond the region in all geographic directions. The four tribes have common vested interests to protect rights reserved through the United States Constitution, federal treaties, federal unratified treaties (including but not limited to the Fort Boise Treaty of 1864, Malheur Treaty of 1864, Bruneau Treaty of 1866, and Long Tom Creek Treaty of 1867), executive orders, inherent rights, and aboriginal title to the land, which has never been extinguished by USRT member tribes.

USRT works to ensure the protection, enhancement, and preservation of the tribes' rights, resources, cultural properties, and practices and that they remain secured. These include but are not limited to hunting, fishing, gathering, and subsistence uses. USRT's recent work has focused heavily on a suite of climate-focused projects, including climate vulnerability assessments (2016), climate adaptation plans (2018), a tribal resilience action database (in progress), tribal climate hazard mitigation plans (in progress), and several climate-based tribal youth engagement programs (2019-present).

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No.

Project Abstract

USRT's work in the last several years has focused on improving the climate literacy of our member tribes' communities and youth. USRT accomplished this work by creating a K-12 climate curriculum, hosting climate workshops for tribal educators, and hosting climate camps and field trips for tribal students. However, this work was only the beginning for USRT. With the Environmental Protection Agency (EPA) Environmental Justice Collaborative Problem Solving (EJCPS) funding opportunity, we hope to build off our previous efforts to implement a stronger, better prepared generation of tribal environmental leaders. There are three focus areas in which USRT can engage

tribal youth on climate hazards and environmental justice concerns: 1) improve the environmental justice literacy of tribal youth; 2) authentically connect tribal youth to local and regional environmental justice issues that impact their community through collaborative civic engagement; and 3) empower tribal youth to take action through career and workforce development in climate and environmental justice. The overarching goal of this program will be to provide collaborative experiences, training, and opportunities that will help the next generation of tribal leaders address their most pressing environmental justice concerns within their own communities, regionally, and beyond. USRT will accomplish this work with the continued implementation of our climate curriculum and suite of environmental justice-focused programming (figure 2). The geographic location of this work will vary depending on the circumstances. Some work may be conducted virtually, in person at each reservation, and in Boise where many of the resources we hope to offer the students are located.

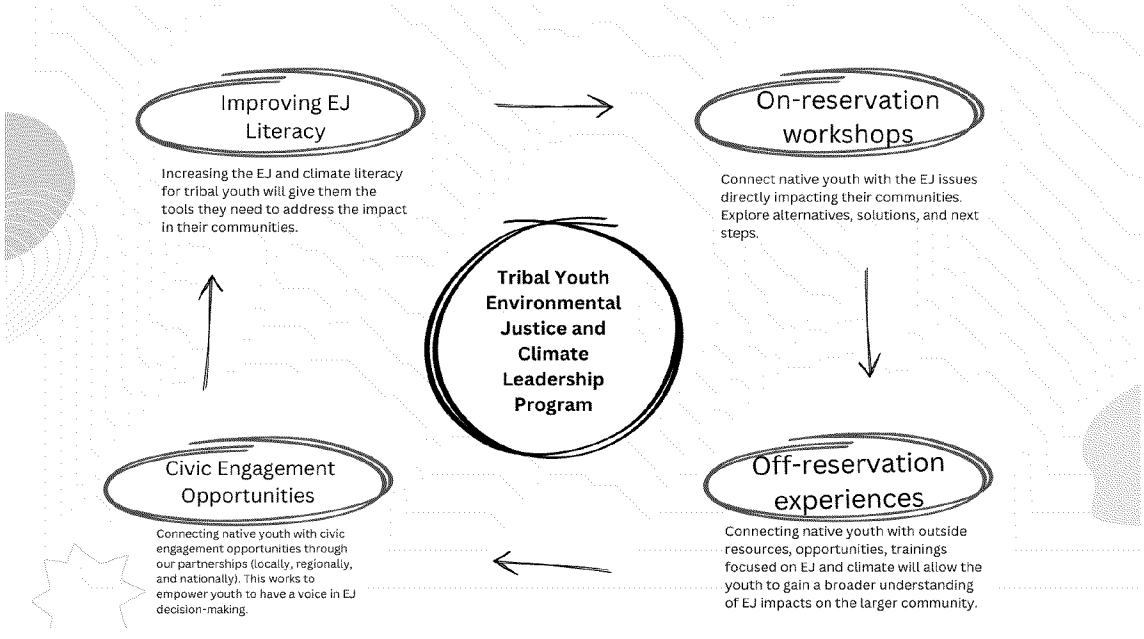

Figure 2.

Project Type

USRT's project will focus on public education, youth engagement and training, workforce development, and citizen science/stewardship.

Special Considerations

USRT's work qualifies for Rural Areas consideration based on the U.S. Census Bureau[1] (Table 1).

Tribe	Location	Population Size
Burns Paiute Tribe	Burns, Oregon	104 (+/- 60)
Fort McDermitt Paiute andShoshone Tribe	McDermitt, Nevada	283 (+/- 118)
Shoshone-Bannock Tribes	Fort Hall, Idaho	5,168 (+/- 496)

[1] US Census Bureau My Tribal Area Tool. https://www.census.gov/tribal/index.html

Shoshone-Paiute Tribes	Owyhee, Nevada	1,125 (+/-)

Table 1.

Environmental Issue

The environmental issues USRT seeks to address in this work includes the impacts to tribal youth and their communities from air pollution, extreme heat and wildfires, poor water quality, and hazardous waste. USRT member tribes experience disproportionate impacts from mining operations that create pollution, hazardous waste, diminished water quality, extreme heat, drought, episodic weather events, and wildfires from climate change. It is important that we educate and engage tribal youth on the myriad of environmental justice issues that their communities face to ensure they become well-informed decision makers.

List of Project Partners

The Nature Conservancy (TNC), City of Boise Watershed Department, Idaho Conservation League (ICL), and Friends of the Owyhees (FOTO). USRT has strong relationships with other partners throughout Idaho and Oregon, and plans to engage more potential partners if awarded the grant. Potential partners include Boise State University, 4H extension through University of Idaho, Oregon Natural Desert Association, and American Rivers.

Will you need to develop a QAPP for your project? This project will not require a QAPP.

Environmental and Public Health information of the Underserved Community

Underserved Community Description

USRT's four member tribes are some of the most vulnerable to the changing climate, environmental degradation, cultural degradation, and other disasters, such as the COVID-19 pandemic. These disadvantages are caused by a long history of oppression and forcible removal from their historic homelands to reservations. For the USRT tribes, their history, income, education, remoteness, and size have had significant impacts on their ability to respond to environmental justice and climate hazards. Firstly, three of our four member tribes are "Executive Order tribes," although each is federally recognized. Absent a ratified treaty, they do not have off-reservation rights, which severely limits access to myriad resources. Although recent efforts have been made to right historical wrongs for tribal communities, their marginalization throughout history is still impacting them today.

Currently, USRT's member tribes (like many tribal communities) are more vulnerable to extreme weather events and harmful environmental trends. Climate-based impacts are known to have greater ramifications on under-served communities, such as Native American tribes (USGCRP 2018, IPCC 2014). Presently, the impacts of a changing climate on species have been observed and range from changes in phenology to local extirpations (Klausmeyer et al. 2011, IPCC 2014). Great Basin temperatures have increased during the 20th century from 0.3 to 0.6 °C. In fact, 2022 was ranked the world's 6th warmest year on record (NOAA 2023). The 10 highest monthly temperatures departures from above average have all occurred since 2015 (NOAA 2019). Minimum temperatures have increased more than maximum temperatures and variability in interannual temperatures has declined. As a result, the probability of very warm years increased, and very cold years declined (Wagner 2003). Projected warming for the Great Basin over the 21st century is expected to range from 2 to 5 °C or more (USGCRP 2018, USRT 2017, Cubashi et al. 2001). Expected elevated temperature will

be dependent on the increase in CO2 and will vary across the Great Basin due to significant differences in topography.

Changing climate conditions are also expected to have multiple effects on fire regimes in the Great Basin (USRT 2017). Since 1986, the length of the active wildfire season has increased by 78 days and the average burn duration of large fires has increased from 7.5 to 37.1 days (Westerling et al. 2006). Earlier snowmelt, coupled with a lack of snow retention, has resulted in longer periods of dry conditions. Exacerbating this situation later in the season is hot, dry, and windy weather, providing ideal conditions for wildfire (Ford et al. 2012). The number of high fire days is on the increase and the Great Basin is one of the most affected regions in the U.S. Extremely dry conditions lead to erratic fire behavior, increased flame lengths, torching, crowning, and blowups (Cong. Rec. 2007, Brown et al. 2004). Mega fires, far exceeding those of recent decades, are on the increase in the Great Basin (Chambers and Pellant 2008). This can have significant effects on plant and animal species and water quality. For instance, the Long Draw Fire of 2012, in the Owyhee portion of the Upper Snake River, burned 558,198 acres and was the largest fire in Oregon in more than 100 years (BLM 2013). Higher levels of CO2 increase production and water-use efficiency of C3 plants (carbon fixation plants) but may increase the invasion of non-native species such as cheatgrass and other annual grasses. Non-native perennial forbs and woody species may also be favored over native species in a changing climate (Smith et al. 2000, Ziska et al. 2005). This can contribute to the loss of culturally important species.

One of the greatest challenges facing tribal resource managers is engaging tribal youth in climate-related science and adaptation efforts and translating that information into relatable examples for them, as many tribal members generally lack scientific backgrounds. The climate data outlined above, although important, is not immediately recognizable for tribal youth. Furthermore, USRT's member tribes generally lack the necessary Science, Technology, Engineering, and Mathematics (STEM) education needed to fully understand environmental justice impacts. High impact outreach, communication, and workshops about the value of ecosystems, a changing climate, adaptation projects, and mitigation efforts can empower tribal youth to act in ways that protect and sustain the environment and their cultural resources. Environmental justice decision-making requires engaging people with diverse, conflicted, and/or limited perspectives in dialogues about what is at stake, who benefits, and who stands to lose without mitigation action. Collaborative learning and discussion can reduce conflict and contribute to development of shared meaning amongst tribal youth and their community leaders. These discussions can facilitate the development of actions and planning of future projects that sustain and create resilience for ecosystem services and cultural resources that support and sustain tribal lifeways, while also identifying and exploring the tribes' environmental justice needs.

The U.S. Climate and Economic Justice Screening Tool identified all four of our member tribes as disadvantaged to climate impacts. This tool identifies climate, economic, health, and workforce development rates for disadvantaged communities. The listed percentiles show how much burden

each tract experiences when compared to other tracts. The most pressing impacts to the USRT tribes identified by the tool are outlined below[2].

Burns Paiute Tribe, Harney County

Agricultural Loss Rate: 45%	Building Loss Rate: 68%	Wildlife Risk: 92%	Low Income Population: 75%	Unemployment population: 89%

Fort McDermitt Paiute and Shoshone Tribe, Humboldt County

Agricultural Loss: 98%	Building Loss: 97%	Wildfire Risk: 88%	Low Income: 47%	No Higher Ed: 96%	Unemployment: 23%

Shoshone-Bannock Tribes of the Fort Hall Reservation, Bannock County

Agricultural Loss: 81%	Building Loss: 69%	Population Loss: 88%	Wildfire Risk: 81%	LowIncome: 91%	No Higher Ed: 94%	Unemployment: 98%

Shoshone-Paiute Tribes of the Duck Valley Reservation, Elko County

Agricultural Loss: 99%	BuildingLoss: 99%	Population Loss: 59%	Wildfire Risk: 93%	Low Income: 83%	No Higher Ed: 94%	Unemployment rate at 82%

Furthermore, the Fort McDermitt Paiute and Shoshone Tribe has seen significant impacts from COVID-19 and has been documented as a high risk population by the Humboldt County Jurisdictional Assessment[3]. The assessment outlines the Fort McDermitt Tribe's continued struggle with COVID-19 during the summer of 2020, including metrics of which the risk was measured, and an action plan for the County to implement throughout 2020.

It can be difficult to fully encapsulate the disproportionate impacts felt by our member tribes as there are many factors that contribute to their disparities. One issue that is particularly difficult to describe is the loss of culturally significant species and practices. The loss of salmon and other important cultural resources, as well as a long history of oppression has greatly impacted the USRT tribes ability to sustain their important cultural practices.

Addressing Environmental and Public Health Issues

USRT's member tribes are on the frontlines of a changing climate, experiencing some of the first and worst impacts of climate change. USRT's four member tribes, located in remote areas throughout the Snake River Basin, often experience natural disasters that are exacerbated by climate change, such as bouts of extreme heat and drought, unpredictable winds storms and snowstorms that cause power outages, the inability to travel and obtain living essentials for long periods of time, and wildfires that threaten homes, communities, and natural and sacred resources. Rarely do tribal staff members have the time and resources to analyze, plan, and prepare for extreme weather events and their associated

[2] Percentages identified by the tool are subject to change as more data is gathered. These percentages were gathered on March 3, 2023. https://screeningtool.geoplatform.gov/en/#13.88/42.10352/-116.31042

[3] Humboldt County Jurisdictional Assessment.

hazards, nor consider how climate change will influence those hazards. It is extremely difficult for these small and under-resourced communities to obtain funding for climate-related work and effectively protect valuable cultural resources, nor prepare their youth for the long journey ahead.

The tribal youth also have very few opportunities to engage with educators, communities, or the natural world outside of their reservation. Many students may be unaware or unable to utilize the resources that are available to them outside of their communities. USRT has received feedback from tribal leadership that the tribal youth are mostly unaware of how to address climate change impacts, nor what opportunities are available to them through education, training, and workforce development. USRT's hope is to demystify climate change, making it less intimidating and foreign to the tribal youth through comprehensive programming.

Because the USRT tribes experience environmental and health related impacts from a myriad of climate-related issues, it can be difficult to identify just one area of focus. USRT's program will separate key issues into categories and perform specific educational workshops and learning opportunities regarding those specific areas. Examples of categories include: 1) air quality, monitoring, and mitigation; 2) water quality monitoring and mitigation; 3) civic engagement and tribal environmental leadership; 4) hazardous waste and remediation; and 5) climate hazards (wildfire, heat, winter storms, etc). This list, although not exhaustive, does allow USRT to design lesson plans and workshops on specific topics as they relate to the unique challenges tribal youth face.

Benefits to the Underserved Community

Preparing tribal youth to be well-informed about environmental justice and climate issues is a paramount goal for USRT's member tribes in the face of an ever-changing climate significantly impacting their cultural, spiritual, and subsistence lifeways. The USRT Commission has directed USRT staff to prioritize tribal youth initiatives. USRT's program will address the lack of education, understanding, and opportunities regarding environmental justice issues for the tribal youth. This will benefit the youth and the larger community in a myriad of ways: 1) improve climate and environmental justice literacy; 2) empower tribal youth to be decision-makers; 3) increase civic engagement, and 4) create a framework for collaborative problem solving among the tribes and USRT's partners.

Organization's Historical Connection to Underserved Community

Organization History

USRT was formed by the four member tribes in 1998 and became a non-profit with 501(c)(3) status in 2007. USRT was created to provide a unified voice for the Snake River Tribes on environmental and cultural resource issues. USRT's tribal Commission, made up of two elected Council members from each tribe, directs all of USRT's work. Before any major project or program is undertaken, USRT staff first engages with the tribal Commission to ensure proposed work meets the priorities for their communities.

USRT is a trusted tribal community-based organization that has been working with and supporting our four member tribes for two decades through a myriad of successful climate-based projects.

Examples of successful past projects with our member tribes include a Climate Change Vulnerability Assessment (2016), Climate Adaptation and Strategy Project (2018), Hells Canyon Complex Fisheries Resource Management Plan (2018), Climate Change Adaptation Strategies for Rangeland Managers (2019), and Climate-based Community Outreach and Education (2019-present). USRT also has several projects currently underway with our tribes, including a Tribal Climate Adaptation Database, which creates a website tool for tribal environmental professionals, a Tribal Climate Hazard Mitigation Project, which creates FEMA-approved hazard plans for each tribe, an Upper Snake River Basin Fish & Wildlife Loss Assessment, and a series of tribal youth climate camps, on-reservation workshops, and climate curriculum implementation.

Community Driven Participation

As noted above, USRT's work is directed by our Commission. When the education program was initially developed in 2019, USRT's staff met with tribal leaders to determine the most appropriate method for engaging tribal youth. USRT recently hosted a Commission meeting on February 8th and 9th of 2023 and gathered feedback from tribal leaders, natural resources staff, and educational staff regarding youth-development programming. The feedback was overwhelmingly positive and encouraging. The tribes' were eager to pursue more youth development projects that specifically address climate, environmental justice, and cultural concerns. USRT engages regularly with tribal leadership, staff, and community members throughout the year via quarterly Commission meetings, social media, newsletters, annual events, and tribal festivals and celebrations.

One of the primary challenges we've experienced with our education program is the lack of confidence the tribal students have in STEM and decision-making processes. Currently, tribal members and youth may not have opportunities to be decision-makers or may not feel comfortable or safe expressing their concerns outside of their own communities. We believe that through this next round of youth programming, we will be able to focus heavily on civic engagement and encouraging young tribal members to voice their concerns on multiple levels of government, whether tribal, federal, and/or state and local. The long-term outcome of increasing the number of Native American students pursuing and participating in STEM and civic engagement will be accomplished through twelve on-reservation workshops, four field trips, four career-focused field work expeditions, eight service learning opportunities, eight internships, 14 virtual climate and environmental justice classes, and 33 educational newsletters.

Collaborative Problem-Solving Model

Utilizing EJCPS Elements

USRT's youth engagement program will undertake five of the seven elements listed in the EJCPS model. Those elements are as follows: 1) Issue Identification, Visioning, and Strategic Goal-Setting. This will be accomplished through a youth-led issue identification process, where students will first learn how to put a name to the issues they experience and be empowered to find creative solutions; 2) Community Capacity-Building and Leadership Development through workshops, camps, and field trips focused on workforce development and leadership; 3) Development of Multi-Stakeholder Partnerships and Leveraging of Resources through a system of organizations and entities that support environmental justice for tribal youth through various opportunities; 5) Consensus Building and

Dispute Resolution through youth-led roundtable discussions that build unity and strength between tribal youth, leadership, and outside environmental justice-focused agencies; and 7) Evaluation through yearly program evaluation both internally and externally.

We believe that by empowering youth to identify challenges together will build trust amongst them and facilitate creative problem solving. We also hold that connecting the youth with various stakeholders, partnerships, and resources will give them a sense of unity outside of their communities. It is important for the youth to not feel alone or forgotten in their fight for environmental justice.

Project Linkages

Supporting EPA's Strategic Goals

USRT's project aligns with several goals and objectives outlined in EPA's 2022-2026 Strategic Plan. USRT's project directly meets EPA's Goal 2, Objective 2.1 (promote environmental justice and civil rights at the federal, tribal, state, and local levels). USRT's program also works to strengthen the civil rights and environmental justice of our tribes through strategic youth engagement. This occurs through promoting civic engagement on climate and EJ topics at a young age. USRT understands that preparing the next generation of tribal decision makers is vital in ensuring an equitable and sustainable future for tribal communities. USRT's project also aligns with EPA's Strategy 2 (consider the health of children at all life stages and other vulnerable populations). Notably, USRT's work focuses on one of the tribes' most vulnerable populations, their youth. Not only will USRT's work increase the tribal youth's understanding and engagement in environmental justice, but it will also educate its partnering organizations and EPA on tribal issues, workforce development strategies for disadvantaged communities, and approaches for engaging with tribal communities.

Partnerships and Collaboration

Partnership Uses

USRT understands that engaging tribal youth on the numerous environmental justice and climate issues is no easy task. Addressing the lack of EJ-focused education for tribal communities requires creative and collaborative problem solving. USRT believes that by leveraging the expertise of various conservation-focused organizations, we can connect tribal youth to opportunities and experiences that may otherwise be unavailable to them.

Partnership Identification and Description

1. The Nature Conservancy (TNC) will bring expertise to the virtual climate justice classes, host two service learning field days at one of the TNC's preserves, and host one tribal youth intern at their Silver Creek Preserve (paid 3-6 months).
2. Friends of the Owyhees (FOTO) will bring their expertise to lead career, field-work focused expeditions into the Owyhee canyonlands to offer participants in-the-field experiences.
3. City of Boise - Watershed and Climate Change Department will bring their expertise to our monthly calls and provide support and activities for field trips based in Boise. The department is also interested in exploring opportunities to host interns in the third year.
4. Idaho Conservation League will bring their expertise to our monthly calls, on-reservation workshops, youth-led service learning projects, field trip activities, and hosting a tribal youth intern.

2.0 PROJECT ACTIVITIES / MILESTONES / SCHEDULE

Project Activities

USRT's Tribal Youth Environmental Justice and Climate Leadership Program seeks to prepare the next generation of tribal leaders to be well-informed decision-makers and active in civic engagement. To accomplish this, USRT has designed a program approach that will start within the tribal community. This will allow the tribal youth to become acquainted with environmental justice and climate topics in a comfortable and safe setting. Following that, we will begin to introduce opportunities both on-reservation and off through workshops, service-learning opportunities, and field trips. Finally, the participating students will have an opportunity to intern and participate in training or workforce development opportunities with our partnering organizations. The timeline for this program is as follows:

Year One (Oct 2023 - Oct 2024):

- Collaborative Program Development: USRT, within the first three months, will meet with tribal leaders, educators, and our partners to strategize on next steps. This includes hiring or training necessary staff, engaging stakeholders, and creating a strong framework for communication amongst partners.
- On-reservation workshops (8): USRT will host two workshops at each reservation over the course of the first year. These workshops will focus on building community collaboration, discussion of environmental justice and climate issues, identifying service learning opportunities (to be conducted in year 2), and introducing the program and plan to the community.
- Monthly Virtual EJ Classes (6): USRT will host six virtual classes that are open to each member tribe. These calls will allow USRT and its partners to continue engaging with tribal youth and community members during the school year. At these virtual meetings, USRT or one of its partners will present to participants an environmental justice topic of discussion followed by a guided discussion. These classes will also be an opportunity for participants to learn about education and career opportunities.
- Monthly newsletters (8): USRT will publish eight newsletters focused on environmental justice, climate education, engagement, and career opportunities for tribal youth. The newsletters will also allow USRT to advertise for workshops, monthly calls, and internships.
- Program Evaluation (year 1): USRT will conduct a program evaluation for year one to determine successes, areas of improvement, potential obstacles, and solutions. This will be conducted internally through staff reviews and reports, as well as externally through community surveys.

Year Two (Oct 2024 - Oct 2025):

- On-reservation workshops (4): Building off of the workshops in year one, USRT will host an additional four workshops (one at each community) to further explore environmental justice topics with old and new tribal youth participants.
- Field Trips (4): USRT, along with its partners, will conduct four field trips/EJ camps focused on immersive environmental justice and climate change learning. This includes guided ecology hikes, testing water quality, testing air quality, touring labs at Boise State University, and participating in renewable energy demonstrations.
- Youth-Led Service Learning Activities (8): USRT will identify, along with the community, eight service learning opportunities in year one. During year two, USRT will work with student participants

to implement two service learning activities at each reservation (eight total). Youth-led service learning activities include: air quality monitoring, water quality testing, environmental justice presentations at the community center, and public-education campaigns on an environmental justice topic.

- Quarterly Virtual EJ Classes (4): USRT will host virtual classes that are open to each member tribe. These calls will allow USRT and its partners to continue engaging with tribal youth and community members during the school year. At these quarterly meetings, USRT or one of its partners will present an environmental justice topic of discussion for the participants followed by a guided discussion. These quarterly classes will also be an opportunity for participants to learn about education and career opportunities.
- Monthly newsletters (12): USRT will publish twelve newsletters focused on environmental justice and climate education, engagement, and career opportunities for tribal youth. These newsletters will also allow USRT to advertise for workshops, monthly calls, and internships.
- Program Evaluation (year 2): USRT will conduct a program evaluation for year two to determine successes, failures, potential obstacles, and solutions. This will be conducted internally through staff reviews and reports, as well as externally through community surveys.

Year Three (Oct 2025 - Oct 2026):

- Tribal Youth Internships (8): USRT and its partners will select eight tribal youth participants to participate in paid internships focused on environmental justice, climate change, and civic engagement. This offers the students applicable work experience in the field.
- Career-focused Field Work (4): USRT will work with its partners to conduct four career-focused field work experiences (one for each tribe).
- Quarterly Virtual EJ Classes (4): USRT will host virtual classes that are open to each member tribe. These calls will allow USRT and its partners to continue engaging with tribal youth and community members during the school year. At these virtual meetings, USRT or one of its partners will present an environmental justice topic of discussion for the participants followed by a guided discussion. These virtual calls will also be an opportunity for participants to learn about education and career opportunities.
- Monthly newsletters (12): USRT will publish twelve newsletters focused on environmental justice and climate education, engagement, and career opportunities for tribal youth. These newsletters will also allow USRT to advertise for workshops, monthly calls, and internships.
- Program Evaluation (year 3): USRT will conduct a program evaluation for year three to determine successes, failures, potential obstacles, and solutions. This will be conducted internally through staff reviews and reports, as well as externally through community surveys.

Milestone Schedule

M/Y	Event/Activity	EJ CPS Element	Participant
Oct-Nov 23	-Internal program preparation / training / acquire materials / stakeholder engagement plan	Element 1 (issue identification, visioning, and goal setting) Element 3 (develop multi-stakeholder partnerships and leveraging of resources)	USRT and Tribal Leadership
Dec 23	-Virtual kickoff meeting	Element 1 (issue identification, visioning, and goal setting) Element 3 (develop multi-stakeholder partnerships and leveraging of resources)	USRT & Partners[4]

[4] City of Boise, The Nature Conservancy (TNC), Friends of the Owyhees (FOTO), Idaho Conservation League (ICL), and Tribal Leadership/Educators

Jan 24	-Publish monthly newsletter	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT **Target Audience:** Tribal Youth, Community Members, and Leadership
Feb 24	-Schedule on-reservation workshops -Publish monthly newsletter	Element 1 (issue identification, visioning, and goal setting) Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT / Tribal Educators **Target Audience:** Tribal Youth, Community Members, and Leadership
March 24	-1st virtual EJ/Climate call -Publish monthly newsletter	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & COB **Target Audience:** Tribal Youth and Community Members
April 24	-2nd virtual EJ/Climate call -Publish monthly newsletter	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & TNC **Target Audience:** Tribal Youth and Community Members
May 24	-3rd virtual EJ/Climate call -Publish monthly newsletter	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & TNC **Target Audience:** Tribal Youth and Community Members
June 24	-4th virtual EJ/Climate call -Publish monthly newsletter -Host four community EJ workshop (1 at each community) - Identify service learning opportunities for year 2	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & Partners **Target Audience:** Tribal Youth and Community Members
July 24	-5th virtual EJ/Climate call -Publish monthly newsletter -Host four community EJ workshop (1 at each community) - Identify service learning opportunities for year 2	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & Partners **Target Audience**: Tribal Youth and Community Members
Aug 24	-6th virtual EJ/Climate call -Publish monthly newsletter -Year 1 program evaluation	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders) Element 7 (evaluation)	USRT & FOTO **Target Audience:** Tribal Youth and Community Members
Oct 24	-Publish monthly newsletter -Program preparation for year 2	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT **Target Audience:** Tribal Youth and Community Members
Nov 24	-Publish monthly newsletter -Program preparation for year 2	Element 1 (issue identification, visioning, and goal setting) Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & TNC **Target Audience:** Tribal Youth and Community
Dec 24	-Publish monthly newsletter	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & TNC **Target Audience:** Tribal Youth and Community Members
Jan 25	-Publish monthly newsletter	Element 2 (community capacity building gand leadership	USRT & Partners

	-1st virtual quarterly EJ/Climate call	development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	**Target Audience:** Tribal Youth and Community Members
Feb 25	-Publish monthly newsletter -Planning/prep for field trips	Element 1 (issue identification, visioning, and goal setting) Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT **Target Audience:** Tribal Youth and Community Members
Mar 25	-Publish monthly newsletter -Planning/prep for field trips	Element 1 (issue identification, visioning, and goal setting) Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT **Target Audience:** Tribal Youth and Community Members
Apr 25	-Publish monthly newsletter -Planning/prep for field trips	Element 1 (issue identification, visioning, and goal setting) Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT **Target Audience:** Tribal Youth and Community Members
May 25	-Publish monthly newsletter -2nd virtual quarterly EJ/Climate call	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT & COB **Target Audience:** Tribal Youth and Community Members
June 25	-Publish monthly newsletter -Host two community workshops -Assist in four youth-led service learning activities (1 at each community) -Co-host 2 EJ field trips	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT, TNC, ICL **Target Audience:** Tribal Youth and Community Members
July 25	-Publish monthly newsletter -Host two community workshops -Assist in four youth-led service learning activities (1 at each community)	Element 2 (community capacity building gand leadership development) Element 4 (consensus building and dispute resolution) Element 5 (constructive engagement with other stakeholders)	USRT, TNC, ICL **Target Audience:** Tribal Youth and Community Members

Budget Narrative and Itemized Sheet

The Budget Narrative and Itemized Sheet has been included in the attachments sections as directed by the grant guidance.

3.0 ENVIRONMENTAL RESULTS

Outputs, Outcomes, and Performance Measures

Environmental Results (Logic Model)

The Environmental Results Logic Model has been included as an attachment as directed by the grant guidelines.

Performance Measurement Plan

The program performance will be measured by determining whether the three core goals that guide this work are met. Performance indicators are identified and outlined next to their corresponding output. Further details on the outputs, outcomes, and activities can be found in the above section.

GOAL #1: Improve EJ Literacy of Tribal Youth

Output	**Performance Indicator**
Partnership Collaboration	Identify needs, approach, and engagement plan
Workshops 1-8	Improved EJ literacy
Virtual EJ & Climate Classes	Improved EJ literacy and increase connections between tribal youth and USRT's partners
Monthly Newsletters	Publication of 32 newsletters over the course of the three-year program Increased engagement with tribal youth and members throughout the year

GOAL #2: Authentically Engage Tribal Youth to Local and Regional EJ Issues

Output	**Performance Indicator**
Service Learning Activities 1-4	Successful completion of four service learning activities at each tribe. Increased engagement between youth and community members on EJ topics.
EJ-focused Field Trips 1-4	Increased tribal youth participation in in-the-field EJ activities.
Monthly Newsletters	Publication of 32 newsletters over the course of the three-year program Increased engagement with tribal youth and members throughout the year
Virtual EJ & Climate Classes	Improved EJ literacy and increase connections between tribal youth and USRT's partners

GOAL #3: Empower TribalYouth to Take Action Through Career & Workforce Development

Output	**Performance Indicator**
Career-focused Field Trips 1-4	Increased tribal youth participation in in-the-field workforce development / EJ activities.
Partnership Internships (eight students)	Increased tribal youth participation in workforce development activities.

Sustainability Plan and Community Vision

It is a priority for USRT to make this program sustainable in the long term. USRT's previous projects have each been building blocks to creating a healthier, more resilient community. USRT's previous work with outreach and education has been focused on strengthening unity among the tribal community regarding climate change. USRT will build off the momentum of this program by identifying more funding opportunities, empowering the tribes to take ownership of this program, and building community support for the long-term sustainability of environmental justice youth programming. Current initiatives include building and fostering relationships with education staff and parents, hosting and implementing climate-focused field trips and camps, co-developing on-reservation workshops, and exploring opportunities to implement USRT's climate curriculum in the fall of 2023. Through this process, USRT staff have trusted relationships with educators, parents, and youth who have voiced their support for youth-centered programming.

The USRT tribes have a vested interest in sustaining youth programs for a number of reasons, which include: 1) cultivating future tribal leaders, 2) empowering youth to continue their education beyond high school, 3) developing technical experts in the climate sciences to assist their tribes with climate resilience, 4) maintaining and continuing cultural practices for future generations, and most importantly, 5) providing tribal youth a strong foundation for their transition to adulthood and becoming positive and productive members of their communities.

The process of engaging with tribal communities, empowering youth, and sustaining youth programming can be modeled by other communities and organizations across the nation. Engaging with tribal communities requires a unique approach due to cultural differences in communication and education. USRT's program materials and curriculum may also be utilized by other tribes as they are specific to a tribal audience.

4.0 PROGRAMMATIC CAPABILITY

Organizational Experience

USRT has successfully implemented climate-focused programs for the last eight years. Furthermore, USRT is a trusted community organization for the tribes and has demonstrated over two decades of successful tribal engagement efforts. USRT's current Climate Outreach and Education Program has been immensely successful and is something the tribal leadership is passionate about continuing. Furthermore, USRT has demonstrated an ability to adapt to the unique needs of each community. For example, during the COVID-19 pandemic, USRT converted its climate curriculum into a hybrid format, which allowed us to still educate tribal youth on climate issues. Additionally, USRT successfully brought 20 tribal youth to Boise for an immersive climate camp in August of 2022. USRT has also successfully implemented two spring break field trips in March and April of 2023, which brought 14 tribal students and two tribal members to Boise to learn about climate change and how it relates to snow-science. Lastly, USRT has developed on-reservation workshops at each community for the summer of 2023, as well as a Tribal Youth Climate camp for ages 11-14 in June of 2023 and a Climate Career Camp for ages 15-18 in July of 2023. Through our most recent youth and community engagement efforts, USRT has created strong, trusted relationships with parents, education staff, and youth at each tribe.

Staff Experience / Qualifications of Project Manager

Project Manager: Zoe Roberts, Environmental Program Director, has successfully implemented USRT's Climate Education and Outreach Program from 2021 to present, including planning and implementing USRT's first ever climate camp. Ms. Roberts has four years of combined project management experience, experience as a teaching assistant and tutor, and has built trusted relationships with tribal leaderships and community members.

Project Coordinator: Rhys Kutschbach, Outreach and Education Coordinator, has a background in education and youth engagement. They participated in 10 youth day camps focusing on STEM, taught and led classroom lessons on environmental science, tutored and assisted kindergartners in reading comprehension for Art Space Charter, and taught English as a second language to students ranging from 7-70 years old. Mx. Kutschbach has also successfully implemented or prepared for USRT's spring break field trips (March & April 2023), Summer Camps (summer 2023), on-reservation workshops (summer 2023), and climate curriculum implementation (fall 2023).

Expenditure of Awarded Grant Funds

USRT has demonstrated fiscal responsibility in expending grant funds from the EPA, the Bureau of Indian Affairs, Bonneville Power Administration, the U.S. Geological Survey, and various non-governmental grantors. USRT staff have experience submitting necessary financial documents and reports to EPA staff, as well as invoicing appropriately in ASAP. USRT financial management follows these guidelines:

1. Establish grant tracking guidelines based on award requirements, including establishing excel tracking sheets.
2. USRT staff keeps record of the grant and track expenses for each transaction.
3. The Executive Director must approve all purchases for the program.
4. Three to four USRT employees review the bank statement and ensure the grant funds are tracked accordingly every month.
5. USRT reimburses itself for any expenses through ASAP at the end of each month.
6. USRT contracts an accountant who reviews the bank statements each month and provides monthly/quarterly financial reports, which are then shared with the USRT Commission.

5.0 PAST PERFORMANCE

List of Funded Programs

Funder	Program	Status	Reporting History
Environmental Protection Agency (EPA)	General Assistance Program (GAP)	Active	USRT has received EPA GAP funding since 2012. USRT's Environmental Program Director submits quarterly reports to our EPA Project Officer. These reports have always been submitted on time and in the appropriate format. These include all work completed in that quarter as well as plans for the following quarter. EPA requires final annual reports and SF424's at the end of the grant cycle.

Bureau of Indian Affairs (BIA)	Climate Resiliency	Active	USRT's Environmental Program Director submits quarterly reports using the BIA's online reporting tool (grantsolutions.gov). These reports are submitted on time and in the correct format. These include plans for the following quarter, as well as SF424 reports. Annual reports are submitted at the end of the grant period.
Bonneville Power Administration (BPA)	Columbia Basin Coordination	Active	USRT submits detailed invoices monthly to BPA and also submits quarterly reports to BPA via cbfish.org.Additionally, BPA reviews USRT's performance annually through an extensive review of our work products and deliverables.
Oregon Community Foundation (OCF)	Community Grants	Active	OCF requires USRT to submit a final report at the end of the grant cycle (August 2023). USRT tracks progress on this project through internal monthly reporting.
U.S. Geological Survey (USGS)	Northwest Climate Adaptation Science Center	Active	USRT's Executive Director submits invoices for this grant every month. This grant does not require monthly or quarterly reporting, but progress is tracked by USRT Environmental Program Director through monthly reports.

6.0 QUALITY ASSURANCE PROJECT PLAN

USRT's project will not require the development of a Quality Assurance Project Plan (QAPP) as we are not gathering new environmental data. USRT's project seeks to utilize existing, peer-reviewed data on environmental justice and climate to educate tribal youth. USRT will accomplish this program by leveraging the existing knowledge and expertise brought by our own staff and partnering organizations.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Brooklyn Communities Collaborative

Address: 4802 Tenth Avenue

City: Brooklyn

State: NY: New York Zip Code: 11219

B. Unique Entity Identifier (UEI): LRXYC8FM62A1

C. Applicant/Recipient Point of Contact

Name: Gretchen Susi

Phone: Ex. 6 Personal Privacy (PP)

Email: gsusi@maimonidesmed.org

Title: Deputy Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

NA

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☒ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☐ Yes	☒ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☒ Yes	☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

NA

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

NA

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Alison Feuer	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Brooklyn Communities Collaborative: **Health + Wealth Domain**

Resources / Inputs	**Activities**	**Outputs**	**Audience**	**Short-term Outcomes** (6 - 12 months)	**Intermediate Outcomes** (12 - 24 months)	**Long-term Outcomes** (2+ years)
• Staff-time • Partnering organizations supporting stakeholder engagement / organizing • Contractors auditing buildings in the pilot • Additional grants / funds identified for capital improvements • Findings from prior Participatory Action Research, data from healthcare institutions	• Connect public health/building data, identify targets; develop program evaluation methodology • Develop materials for and engage: general public, building owners, building tenants • Assess buildings in target area, capture "value proposition," and identify potential capital funding sources • Strategize alternative means of accountability for tenants in building improvements	• Framework for tracking impact of building improvements on health, care cost savings • At least 50 bldgs targeted • 300 residents engaged in general program outreach • Outreach to 25 building owners to consider pilot • 4 buildings complete pilot assessment • ~100 tenants in pilot reached through door-to-door outreach • Policy brief about the value of potential improvements and tools to protect tenants	• Community residents, residents of key buildings • Local partners • Building owners, developers, facilities managers • University research partners • Hospital / healthcare organizations • Policymakers at local, state, and federal levels	• Increase in number of residents aware of / engaged around building quality (target=400 residents) • Increase in number of building owners, managers aware of indoor air / energy efficient investments (target=40) • Increase in awareness among policymakers of the challenges facing renters in buildings that invest in energy efficiency (target=5 agency / elected officials)	• Increase in number and degree of building maintenance / improvements undertaken and inclusion of tenant protections • Increase in demands from policymakers, tenants, and environmental advocates for tenant protections alongside building improvements	• Decrease in GHG emissions, hospital visits for asthma-related illnesses among tenants in pilot project • Development of new policy terms that encourage investments in multi-family buildings, without resident displacement • Increase in number of healthy homes in key project area, decrease in asthma-related hospital visits, measurable cost-savings to hospitals (4+ years)

April 14, 2023

US Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

To Whom It May Concern:

East New York Restoration Local Development Corporation (ENYR) is pleased to support Brooklyn Communities Collaborative's (BCC) application for the Environmental Protection Agency's *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.*

ENYR's mission is to promote sustainable economic growth for all community businesses, foster prosperity for all community residents, and lead a Renaissance in East New York. ENYR's vision is to ensure direct access to local employment opportunities, provide on-going small business support, and lead neighborhood enhancement through an array of community development initiatives. ENYR is also committed to making East New York Clean & Green. Through our Green Champions program young people have learned about renewable energy and built a solar-powered shed; attended solar installation classes; learned how to recycle and held Earth Day teach-ins.

BCC is a non-profit 501c3 organization that envisions a Brooklyn where all communities are healthy, economically sound, culturally vibrant, and civically engaged. Launched in 2019 in collaboration with longtime Brooklyn community leaders, BCC seeks to tangibly improve health and wealth in the Brooklyn neighborhoods where the intersection of poor health outcomes and racial inequity is most evident. BCC's approach and strategy is directly informed and guided by seven years of participatory action research (PAR) efforts, its key practice for harnessing community insight to solve problems and implement solutions. This drives targeted efforts to address structural conditions through the anchor mission approach, which calls on large institutions with deep community roots to leverage their economic power to benefit the communities in which they serve.

BCC, ENYR and partners are uniquely positioned to address this complex challenge, creating a blueprint that can be replicated nationwide. Organizations like ours provide critical

opportunities for stakeholders across sectors to address the complex conditions that have led to disparities in environmental quality and in health outcomes. BCC and partners are known for meeting people where they are, galvanizing stakeholders through community-based participatory research, and supporting collaboration and ensuring community voice and decision-making power that leads to measurable improvements in health and wellbeing.

ENRY was BCC's partner in launching the Fellowship for Property Management and Stewardship of a Healthy Built Environment, a successful pilot that is becoming a program. We have been an important community voice in the formation of BCC's proposal for the Health and Wealth Domain and at the forefront of advocating to address the need for work among community-based organizations, building owners and facilities managers, healthcare institutions, and universities to identify critical sources of air pollution and mold that, with investments in remediation and technology, have the potential for outsized impact on environmental health. Our project is designed to build a model of community planning and investment, and that it will serve as a platform for undertaking other projects to realize community health goals, reduce greenhouse gas emissions, and increase community climate resilience.

ENRY looks forward to collaborating with BCC and partners as we address long-standing environmental and health disparities and create models for environmental justice and community health, wellbeing and wealth-building.

Sincerely,

Colette Pean

US Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

To Whom It May Concern:

I am writing to express the support of One Brooklyn Health System, Inc. for the application from Brooklyn Communities Collaborative (BCC) for funding through the Environmental Protection Agency's *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.*

One Brooklyn Health System, Inc. (OBHS) is a not-for-profit, tax-exempt corporation licensed under Article 28 of the Public Health Law. OBHS is the NYS Department of Health approved co-operator of Brookdale University Hospital Medical Center, Interfaith Medical Center, and Kingsbrook Jewish Medical Center. OBHS seeks to preserve and enhance access to health care services in Brooklyn by coalescing the separate hospitals and their governed affiliates into a sustainable, quality integrated health system. The OBHS mission is to provide greater access to high-quality health care, keep our communities healthy through an integrated delivery system that respects the diversity of our communities, and addresses both the health needs and unique factors that shape them.

Rates of asthma and illnesses related to poor air quality in the borough of Brooklyn are highest in the neighborhoods of Brownsville and East York, where BCC's work is focused. BCC and its partners play critical roles in Brooklyn, and working together in collaboration, we are uniquely positioned to address this complex challenge, creating a blueprint that can be replicated nationwide. Organizations like BCC and its partners provide critical opportunities for stakeholders across sectors to address the complex conditions that have led to disparities in environmental quality and in health outcomes. BCC and partners are known for meeting people where they are, galvanizing stakeholders through community-based participatory research, and supporting collaboration and ensuring community voice and decision-making power that leads to measurable improvements in health and wellbeing.

BCC's proposal for the Health and Wealth Domain will address the need for work among community-based organizations, building owners and facilities managers, healthcare institutions, and universities to identify critical sources of air pollution and mold that, with investments in remediation and technology, have the potential for outsized impact on environmental health. We understand that the project is designed to build a model of community planning and investment, and that it will serve as a platform for undertaking other projects to realize community health goals, reduce greenhouse gas emissions, and increase community climate resilience.

My office looks forward to collaborating with BCC and other partners so that, together, we can tackle long-standing environmental and health disparities and create a replicable model for environmental justice and community wealth-building.

Sincerely,

LaRay Brown
Chief Executive Officer, One Brooklyn Health

MONADNOCK

April 14, 2023

US Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

To Whom It May Concern:

I am pleased to submit this letter of support on behalf of Brooklyn Communities Collaborative (BCC) in response to their application for the Environmental Protection Agency's *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.*

BCC is a non-profit 501c3 organization that envisions a Brooklyn where all communities are healthy, economically sound, culturally vibrant, and civically engaged. Launched in 2019 in collaboration with longtime Brooklyn community leaders, BCC seeks to tangibly improve health and wealth in the Brooklyn neighborhoods where the intersection of poor health outcomes and racial inequity is most evident. BCC's approach and strategy is directly informed and guided by seven years of participatory action research (PAR) efforts, its key practice for harnessing community insight to solve problems and implement solutions. This drives targeted efforts to address structural conditions through the anchor mission approach, which calls on large institutions with deep community roots to leverage their economic power to benefit the communities in which they serve.

BCC's work is focused in Brownsville and East York, Brooklyn where our company develops and manages residential buildings. BCC and its partners play critical roles in Brooklyn, and working together in collaboration, they are uniquely positioned to address this complex challenge, creating a blueprint that can be replicated nationwide. Organizations like BCC and its partners provide critical opportunities for stakeholders across sectors to address the complex conditions that have led to disparities in environmental quality and in health outcomes. BCC and partners are known for meeting people where they are, galvanizing stakeholders through community-based participatory research, and supporting collaboration and ensuring community voice and decision-making power that leads to measurable improvements in health and wellbeing.

BCC's proposal for the Health and Wealth Domain will address the need for work among community-based organizations, building owners and facilities managers, healthcare institutions, and universities to identify critical sources of air pollution and mold that, with investments in remediation and technology, have the potential for outsized impact on environmental health. We understand that the project is designed to build a model of community planning and investment, and that it will serve as a platform for undertaking other projects to realize community health goals, reduce greenhouse gas emissions, and increase community climate resilience.

HUNTER URBAN POLICY & PLANNING
shaping the city since 1965

Department of Urban Policy and Planning

April 14, 2023

US Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

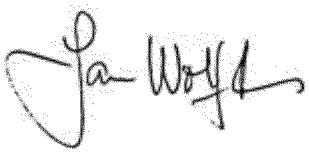
To Whom It May Concern:

We are pleased to submit this letter on behalf of Brooklyn Communities Collaborative (BCC) in support of their application for the Environmental Protection Agency's *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.*

BCC is a non-profit 501c3 organization that envisions a Brooklyn where all communities are healthy, economically sound, culturally vibrant, and civically engaged. Launched in 2019 in collaboration with longtime Brooklyn community leaders, BCC seeks to tangibly improve health and wealth in the Brooklyn neighborhoods where the intersection of poor health outcomes and racial inequity is most evident. BCC's strategy is directly informed and guided by seven years of participatory action research (PAR) efforts, its key practice for harnessing community insight to solve problems and implement solutions. This drives targeted efforts to address structural conditions through the anchor mission approach, which calls on large institutions with deep community roots to leverage their economic power to benefit the communities in which they serve.

As faculty members in Hunter College's Department of Urban Policy and Planning, we currently partner with BCC on a project funded by the Ewing Marion Kauffman Foundation as part of its Community Engaged Research Portfolio. The effort is intended to research and promote Black entrepreneurship in the neighborhoods served by BCC member hospitals. Our goal is to build and grow locally owned enterprises by engaging them to participate more actively in the hospitals' supply chains. Participatory Action Research (PAR) is key to our approach. The work we do with BCC draws on our strong track records of research and community service and spills over into our engagement with students of policy and planning (Hunter College's Master of Urban Planning program is CUNY's only nationally accredited planning program). One of the assets we bring to BCC's work is experience in mobilizing knowledge through the publication and dissemination of research results and policy recommendations.

The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program would provide an outstanding opportunity for us to deepen our existing relationship with BCC and its partners. The Health and Wealth Domain that BCC is proposing will address a need to identify critical sources of air pollution and mold in the built environment and to galvanize investments in remediation and technology that have the potential to make an outsized impact on environmental health as they create local jobs. We are excited about the project's model of community planning and investment, and about its potential to serve as a platform for other comprehensive efforts to achieve community health goals, reduce greenhouse gas emissions, and increase community climate resilience.



Hunter College of The City University of New York, 695 Park Avenue, Room W1611, New York, NY 10065

Phone: Ex. 6 - Personal Privacy (PP) fax: Ex. 6 - Personal Privacy (PP)

We would be delighted to participate in the community-engaged research at the center of the project and are also enthusiastic about helping to disseminate the knowledge gained from this important work.

BCC and its partners are known for meeting people where they are, motivating stakeholders through participatory research, and ensuring that community voice and decision-making power leads to measurable improvements in health and wellbeing. We look forward to further collaborating with them as part of the EPA's Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

EAST BROOKLYN CALL TO ACTION
EBC2A

April 14, 2023

US Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

To Whom It May Concern:

The East Brooklyn Call to Action (EBC2A) is pleased to submit this letter of support on behalf of Brooklyn Communities Collaborative (BCC) in response to their application for the Environmental Protection Agency's *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.*

The East Brooklyn Call to Action for Health and Economic Justice (EBC2A) is a community-labor alliance to empower local organizations and individuals to unite and improve lives in Central and East Brooklyn. BCC is a non-profit 501c3 organization that envisions a Brooklyn where all communities are healthy, economically sound, culturally vibrant, and civically engaged. Launched in 2019 in collaboration with longtime Brooklyn community leaders, BCC seeks to tangibly improve health and wealth in the Brooklyn neighborhoods where the intersection of poor health outcomes and racial inequity is most evident. BCC's approach and strategy is directly informed and guided by seven years of participatory action research (PAR) efforts, its key practice for harnessing community insight to solve problems and implement solutions. This drives targeted efforts to address structural conditions through the anchor mission approach, which calls on large institutions with deep community roots to leverage their economic power to benefit the communities in which they serve.

BCC's work is focused in Brownsville and East New York, Brooklyn where the EBC2A is also focused. BCC and partners are uniquely positioned to address this complex challenge, creating a blueprint that can be replicated nationwide. Organizations like BCC and its partners provide critical opportunities for stakeholders across sectors to address the complex conditions that have led to disparities in environmental quality and in health outcomes. BCC and partners are known for meeting people where they are, galvanizing stakeholders through community-based participatory research, and supporting collaboration and ensuring community voice and decision-making power that leads to measurable improvements in health and wellbeing.

Given our mission to represent the community's health interests, especially those related to housing, EBC2A has been an important community voice in the formation of BCC's proposal for the Health and Wealth Domain and has been at the forefront of advocating to address the need for work among community-based organizations, building owners and facilities managers, healthcare institutions, and universities to identify critical sources of air pollution and mold that, with investments in remediation and technology, have the potential for outsized impact on environmental health. We understand that the

EAST BROOKLYN CALL TO ACTION
EBC2A

project is designed to build a model of community planning and investment, and that it will serve as a platform for undertaking other projects to realize community health goals, reduce greenhouse gas emissions, and increase community climate resilience.

Our coalition looks forward to collaborating with BCC and partners as we address long-standing environmental and health disparities and create models for environmental justice and community health, wellbeing and wealth-building.

Summary

Entrepreneurial policymaker with more than 15 years experience leading diverse teams in strategic planning, project implementation, and organizational innovation. Designed and launched high-impact programs at citywide and national scales. Building new ventures to organize the power and financial potential of sidelined communities.

Selected Professional Experience

1/2022 - Present
Community Investment and Economic Development Advisor (selected projects) — New York, NY

CUNY Community and Worker Ownership Project / Brooklyn Communities Collaborative (2023)

- Supporting development of energy retrofit initiative that builds community wealth and economic impact.
- Advisor to Community Fellows on projects including community land trusts, cooperative districts, and food guild.
- Supporting research and program development to localize economic impact from public procurement.

Seed Commons / Kyanite Partners (2023)

- Advising national Community Development Financial Institution on developing investment pipeline for green bank finance.
- Supported analysis of funding available through the Inflation Reduction Act to worker-owned cooperative businesses.

Build Back Better Regional Challenge, federal recovery initiative (2022)

- Advised 60 Finalist coalitions from across the country vying for $1 Billion in federal recovery funding.
- Developed and delivered workshops around designing and implementing policies and programs that further equity.

1/2021 - 12/2021
Office of Deputy Mayor for Strategic Policy Initiatives — New York, NY

Senior Policy Advisor and Director, Inclusive Economic Development and Business Innovation

- Advised Deputy Mayor on policies and strategies to address the racial wealth gap, including economic development strategy, business services, workforce development, and inclusive recovery.
- Collaborated with community organizations and City agencies to design and launch initiatives to build community wealth.
- Led design of the City's *Good Jobs Challenge* proposal, awarded $18.6M federal grant for systems-change strategy.
- Launched the largest municipal effort to preserve jobs and increase worker equity through employee owned business, including an outreach campaign that reached 28K+ business and initiatives in home healthcare and sustainability.
- Designed initiative to pair financial technology businesses with community stakeholders to address bank loss in the Bronx.
- Supported scaling citywide as Board Member and Administrator of NYC's "baby bond" and college savings program.

11/2018 - 12/2020
Deputy Director, Mayor's Office of MWBE

- Expanded portfolio of programs to support Minority- and Women-owned Business Enterprises (MWBE), including an MWBE Accelerator launched as part of the City's commitment to Black entrepreneurs and innovation initiatives.
- Secured $1.5M in philanthropic grants to support new community and program partnerships and model catalytic policy.
- Spearheaded program to support minority and worker ownership and business innovation in the industrial sector.
- Supported negotiations with banks and financial technology firms to get 1M New Yorkers access to financial systems.

8/2016 - 10/2018
Mayor's Office of Workforce Development — New York, NY

Director, Business Initiatives and Job Quality

- Developed and scaled programs and policies that drive business growth and improve outcomes for low-wage workers.
- Conceptualized and launched Bronx-based model for business growth and community investment; secured $330K grant.
- Partnered with financial institution to deliver education and responsible products to 1,500+ businesses and their employees.
- Spearheaded interagency efforts to institutionalize job quality metrics across city processes, including procurement.

8/2015 - 7/2016
NYC Economic Development Corporation — New York, NY

Assistant Vice President, Center for Urban Innovation

- Managed 12-person team in implementing a $10M portfolio of economic opportunity initiatives citywide.
- Founded program in collaboration with business, labor, and community leaders. Led campaign design, citywide marketing, and partnership development. Resulted in engagement of 1,500+ NYC businesses, that employ more than 65,000 workers. Campaign model has been replicated by more than 30 cities across the U.S. and globally.
- Advised other NYCEDC divisions on strategies to leverage real estate transactions to support local hiring and job quality.

8/2013 - 7/2015
Senior Project Manager, Center for Urban Innovation

- Managed 14 consultant teams and a $5M grant portfolio in design, execution, and evaluation of citywide programs, including workforce programs, a loan program, a business incubator, and community revitalization projects.
- Raised more than $1M in impact investment and philanthropic funding for projects.
- Led interagency effort to accelerate development of three City-owned vacant lots in Brownsville and East New York into community entrepreneurship spaces, including property transfer and permitting as well as long-term program sustainability.
- Designed new program concepts for using City capital to underwrite small business and community-banking initiatives.

9/2011 - 6/2013 **Community Innovators Lab / MIT Department of Urban Studies & Planning** Cambridge, MA
Public Service Scholar / Graduate Research Assistant
- Conducted applied research for government agencies and community organizations, including a foreclosure mitigation strategy for the City of Boston and strategic acquisition of vacant property for the New Orleans Redevelopment Authority.
- Drafted local hiring and procurement provisions of community benefits agreement for major Bronx redevelopment project.

11/2009 - 5/2011 **U.S. Environmental Protection Agency** Washington, DC
Program Analyst, Office of the Chief Financial Officer
- Worked with senior Agency leaders to develop Obama Administration priorities into 2010-2015 Strategic Plan.
- Responsible for internal and external communications and public engagement process to advance Strategic Plan.
- Coordinated budget and program development across 10 regional and program offices and more than 30 staff.
- Designed and launched Agency-wide innovation initiative to support environmental justice outcomes.

6/2009 - 9/2009 **NeighborWorks America** Washington, DC
Community Scholar, Field Operations
- Selected to participate in national program for young professionals in housing and community development.
- Designed and initiated implementation of a capacity-building program for 200+ NeighborWorks housing organizations.

6/2008 - 4/2009 **World Bank Inspection Panel** Washington, DC
Consultant
- Conducted research for accountability mechanism of the World Bank, which reports to the Bank President.
- Evaluated projects in Uganda, Ghana, and Albania. Investigation resulted in Bank-wide operations reform.

11/2007 - 5/2008 **NYC Department of Parks and Recreation** New York, NY
PlaNYC Program Assistant
- Assisted the launch, as part of Commissioner-level team, of seven citywide initiatives to improve public health, reduce the city's greenhouse gas emissions by 30 percent, and put every resident within a ten-minute walk of a park or open space.
- Supported development and management of partnerships for 10-year campaign to plant one million trees across the City.

Leadership and Community Experience

2019 - 2022 Instructor, Colin Powell Fellowship, City College of New York CUNY
- Taught year-long leadership and public service course for students selected as Colin Powell Fellows. Designed the course to include community negotiation simulation, community-driven capstone project, and professional development.

2017 - 2018 Aspen Institute Job Quality Fellow
- Selected as one of 13 leaders across the county, who are working to improve the quality of jobs for low-wage workers.
- Contributing to Aspen's emerging national narrative and "toolkit" on reconnecting work and wealth for other practitioners.

2016 - 2017 Coro Leadership New York (LNY28)
- Selected as one of 54 mid-career professionals in NYC to participate in 175-hour adaptive leadership training program.
- Immersive learning on pressing civic challenges, including criminal justice, housing, and education reform.

2014 - Present Senior Scholar and Selection Committee, Harry S. Truman Scholarship Foundation
- Selected by Foundation to advise Truman Scholars and lead policy exercise during Leadership Week.
- Serve on the Selection Panel for the New York Regional Selection Committee.

Education

2013 **Massachusetts Institute of Technology** Cambridge, MA
Master in City Planning, Housing, Community, and Economic Development Group
- Coursework in Economic Development, Real Estate, Public Finance, Community Development, Labor Policy
- Management courses MIT Sloan School of Management and Harvard Kennedy School of Government
- Awarded a graduate assistantship and scholarship

2008 **Hunter College, City University of New York** New York, NY
Bachelor of Arts, Phi Beta Kappa, magna cum laude
- Majors: Urban Studies, Minor: Economics
- Semester-long international studies of urban planning in Argentina, China, and India
- Macaulay Honors College: Awarded full merit-based scholarship and funding for international studies
- Jeannette K. Watson Fellowship: Professional development and full-time work program for three summers
- Truman Scholarship: National recognition for leadership awarded to 60 annually; provides funding for graduate study

EDUCATION

Brooklyn College, Brooklyn, NY
M.S. Business Administration, May 2023

City University of New York School of Law, Queens, NY
Juris Doctorate, May 2020

Hampton University, Hampton, VA
Bachelor of Arts in Political Science, May 2015

EXPERIENCE

Brooklyn Communities Collaborative (BCC), New York, NY
Manager, Business Development, March 2022 – Present
Facilitate engagements between BCC staff with essential public and elected officials concerning legislation, public policy, administrative law. Responsible for collaborating with supply chain teams to identify opportunities for local MWBE businesses to participate in healthcare supply chain. Expertly facilitated supply/service partnerships between small businesses and healthcare partners, resulting in successful agreements that meet the needs of all parties.

Goldstein Hall PLLC, New York, NY
Associate – Litigation, January 2019 –April 2021
Drafted corporate resolutions, attorney opinion letters, transfer documents, certificates of incorporation and by-laws. Reviewed title reports, regulatory agreements and land disposition agreements. Conducted legal research concerning on-profit title issues, client meetings and loan closings. Worked directly with managing partners to prepare and manage project loans, sales and lease closings. Assisted with the formation of not-for-profit corporation structure.

New York State Office of the Attorney General, New York, NY
Legal Intern, June 2019 – August 2019
Assisted with research initiative for the newly established Special Investigation and Prosecution Unit, which focuses on innovative ways to reform New York State police use-of-force policies. Effectively performed legal research and drafted memorandums on a myriad of social justice issues ranging from immigration to gender pay equity. Assisted special counsel with day-to-day activities. Supported executive level staff. Conducted document review.

Kings County District Attorney's Office, Brooklyn, NY
Legal Intern – Early Case Assessment Bureau, May 2018 – August 2018
Screened incoming arrests that occurred in Brooklyn to determine whether prosecution would be declined or advanced. Prepared charging documents for Desk Appearance Tickets (DAT) and misdemeanors. Drafted criminal complaints for felonies, misdemeanors and violations. Organized arrest paperwork, and corroborating affidavits. Compile detailed lists of police and civilian witnesses for individual cases. Prepared supporting documents and notices to be submitted in court.

Lazard Asset Management, New York, NY
Administrative Assistant, August 2016 – September 2017
Efficiently provided professional administrative and clerical service to colleagues and managers to facilitate effective operation of the office. Examined the accuracy of legal documents and edited as needed.

Brooklyn Ecumenical Cooperative (BEC), Brooklyn, NY
Assistant Project Manager, January 2015 – January 2018
Reviewed owner responses to findings and determined the feasibility of proposed remediation. Evaluated initiatives and policies affecting the physical strength of BEC's real estate portfolio. Prepared long and short-term projects, reports, correspondence, and other materials accurately, following established guidelines and procedures.

CERTIFICATION & PROFESSIONAL MEMBERSHIPS

Effective Date of Exemption:
February 12, 2019
Contribution Deductibility:
Yes
Addendum Applies:
No

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: COOPERATIVA DE SERVICIOS PROFESIONALES

Address: Ex. 6 Personal Privacy (PP)

City: San Juan

State: PR: Puerto Rico Zip Code: 00927

B. Unique Entity Identifier (UEI): U5MCNHPCR914

C. Applicant/Recipient Point of Contact

Name: Harrison Flores

Phone: Ex. 6 Personal Privacy (PP)

Email: Ex. 6 Personal Privacy (PP)

Title: President

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

NA

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

NA

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☒ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

No

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

No

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Yogani Govender	Treasurer	04/13/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

EDUCATION

Graduate School of Environmental Affairs, *Universidad Metropolitana de PR*; San Juan, PR
Master of Science, Environmental Management (Cum laude) June, 2007
School of Science, Technology and Health, *Universidad Metropolitana de PR*; San Juan, PR
Bachelor of Science, Environmental Sciences June, 2003

Additional Education, Training and Certification:

Certified Interpretive Guide Trainer (sanctioned), 2020 National Association for Interpretation

RELEVANT EXPERIENCE WORKING IN LOW-INCOME UNDERSERVED COMMUNITIES

Director and Educator, Centro Ambiental Santa Ana / Sociedad de Historia Natural de PR/ Universidad Interamericana de PR 2013-present

-Coordination of daily activities of this nature center, document attendance and revenue, prepare monthly and annual reports of activities and participants to board members and stakeholders.

-Management of special projects, supervision of staff and volunteers and, design and implementation of environmental education, environmental interpretation, and research activities for diverse low-income audiences. Funding for projects were from Puerto Rico's Department of Natural and Environmental Resources (DRNA, as in Spanish), US Forest Service, PR Legislative Funds, and Fundación Angel Ramos

-Coordinate symposia, educ. festivals & workshops for volunteers, educators, and the general public

-Partner as mentor for volunteers of *Cuerpo de Intérpretes Científicos Auxiliares (CICA, as in Spanish)* of the DRNA.

OTHER WORK EXPERIENCE

Blue Flag Program Coordinator, *Organización ProAmbiente Sustentable*2022-present

-Promote orientation meetings for potential candidates, stakeholders, educational opportunities.

-Provide coordination guidance, support and mentorship for local Blue Flag awardees.

-Coordinate and oversee schedule of program auditors, educational activities to increase capacity and promote the programs best practices, provide recruitment support to identify potential new awardees.

Facilitator for Centro Esperanza / The Bravo Family Foundation (BRAVO) 2019-2021

-Recruit and engage youth served by Centro Esperanza (CE) as potential participants of an interpretive training support funding from BRAVO for a community organization (Centro Esperanza) in Loíza

-Planning of training content and educational activities to prepare youth as volunteer interpreters at CE

Estuarine Urban Waters Coordinator, San Juan Bay Estuary Program, PR 2018

-Coordination of workplan actions and outcomes for project *Urban Waters Program Relief Efforts in the Urban Watershed of the San Bay Estuary* for the San Juan Bay Estuary Program and the Urban Waters Program Partnership.

Environmental Interpreter, CASA / SHNPR; Bayamón, PR 2007-2013

-Contribute in the design of interpretive environmental activities for a nature center.

-Offer interpretive activities for diverse audiences in an outdoor setting.

-Offer orientation, booking and coordination services for participants of CASA's activities.

Research Coordinator, Centro Ambiental Santa Ana (CASA / SHNPR); 2010-2013

-Design interpretive hike focused in promoting research, the scientific method, and science careers.

-Collaborate with basic research training of special activities for CASA's partners.

-Promote citizen science programs and initiatives among nature center participants and elsewhere

-Work with research partners to fulfill projects objectives.

Achieved: Addition of a newly designed interpretive hike to CASA's interpretive program focused on research and careers related to the environment.

SYNERGISTIC ACTIVITIES

De la Montaña al Mar: Una conexión Natural

-Assist Project Coordinator designing participant recruitment, educational activities, and documenting workshop attendance and report to funding agency.

More Kids to the Woods

-Assist Project Coordinator in designing, offering and documenting activities, helped recruitment of staff. Prepared a pre/post test to determine changes in knowledge about forests concepts, benefits and ways to its conservation.

Puerto Rico's Endemic Bird Festivals / Migratory Birds Festivals

-Coordinate two annual festivals (in April and October) with staff, festival partners and volunteers celebrating our birds, promoting bird watching activities and increasing the knowledge of ways in which all people can help protect birds.

PUBLICATIONS

Ex. 6 Personal Privacy (PP)

SELECT AWARDS AND GRANTS

-Outstanding Interpreter Award by The Sunny Southeast Region of the National Association for Interpretation (NAI).

-Environmental Education Award to CASA, Caribbean Urban and Community Forestry Conference, US Forest Service

-Environmental Quality Award to Fellows Enhancing Science and Technology Project (FEST), EPA.

EDUCATION

Doctorate in Curriculum and Teaching and Learning Environments, with a concentration in Technology. University of Turabo in Gurabo, PR. 2013

Master of Education, Specialty in Curriculum with a Concentration in Biology. University of Puerto Rico, Rio Piedras. 1994

Baccalaureate in Secondary Education with a concentration in Biology. University of Puerto Rico, Rio Piedras. 1981

RELEVANT WORK EXPERIENCE

- 2014 School Transformation Project Manager Improvement Grant (SIG) with the Yabucoa Educational Services Corporation (COSEY) at Rafaelina Lebrón Flores High School and Josefina Muñoz de Bernier de Patillas Middle School. Supervisor,

-1981-2011- Science Teacher Maunabo School District, Department of Public Education.

OTHER WORK EXPERIENCES

-2017 to 2019 - Part-time Professor School of Education University of Puerto Rico in Humacao. Course (EDPE 3041) Science teaching in elementary school.

-2015 Professor of Human Anatomy and Physiology at the Interamerican University Guayama Campus, Ryder Extension Center. Nursing Program.

-2015 to 2016 - Compañía Carvajal Educación Inc., Resource in coaching science teachers.

-2013 Part-time Professor School of Education Interamerican University of Guayama. Course: Teaching natural sciences at the K-3 level.

-2012 to May 2013 - Rocket Training Company. Workshop resource: The integration of Curricular Maps in Daily Planning.

-2012 Company Youth Innovative Solutions, Inc., Science Coaching Resource for Public School Teachers.

-2012 Resource specialist in science in the Technology Integration Workshop for Intermediate and Higher-Level Teachers with EdGroup company Educational Development.

-2011 to July 2012 (retired), Teaching Facilitator for the Yabucoa School District Science Program. Supervisor, Redacted Superintendent.

-2010 -2011 -, Professor Trainer Alliance of Mathematics and Sciences Project of the Inter American University of Puerto Rico, Fajardo Campus. Supervisor, Redacted

-2008 to 2010 - Professor Trainer of the Mathematics and Science Alliance Project at the University of Puerto Rico in Humacao.

-1992 To 2002 - Teacher and Resource Systemic Initiative Project for Educational Excellence in Science and Mathematics (PR-SSI). Resource Center for Science and Engineering, University of Puerto Rico, Río Piedras.

-1999 to 2001- Trainer in Earth Science Workshops of the Institute 2000 in the Center of the School District of Las Piedras. Sponsored by the Science and Engineering Resource Center of the University of Puerto Rico at Río Piedras. Supervisor, Redacted

-1993 Trainer in Earth Science Workshops for teachers from Caguas and San Lorenzo in extended hours. Sponsored by the Science and Engineering Resource Center of the University of Puerto Rico at Río Piedras.

-1989 A 2000 - Field Assistant Earth Science Workshop for teachers held in North Carolina and Puerto Rico, in the summer. Sponsored by the Puerto Rico Department of Public Education.

-1982 To 1985 - Maunabo School District Adult Program Math and Science Teacher.

RECOGNITIONS AND SPECIAL AWARDs

- 1999 and 2004 Nomination by alumni for "Who is Who in America`s Teachers ".
- 1989 Maunabo School District Excellence Teacher, awarded by the PR Industrial Association.
- 1989 Teacher of the Year in Earth Sciences of Puerto Rico, awarded by the " Geological Society of America ".
- 1989 Finalist for the " Presidential" award Awards for Excellence in Science and Mathematics Teaching ", awarded by the Association of Science Teachers of the United States.

SYNERGISTIC ACTVITIES

2001-present Member of Comité Pro-Desarrollo De Maunabo, Inc, I complete several tasks in the Reserve including assisting with nature guide, providing workshops for students and teachers, assessments of biodiversity, assessment of damage to Reserve after Hurricanes Irma and Maria, coordinate with researchers visiting Reserve and promote Reserve activities in school district and in local communities.

Attention: Mr. Harrison W. Flores Ortiz
Project Manager (COSPRO)

Dear Mr. Maysonet:

Our records indicate that you have submitted all the required project performance and financial reports for the Solid Waste Management grant you received in fiscal year 2017.

We have reviewed your financial reports and have no further comments at this time. After processing your last reimbursement request of $6,384.00 covering expenses incurred through reimbursement requested on September 24, 2018, our records show a balance of cero (0) left over.

Financial records pertinent to the grants must be retained three (3) years from the date of the financial review or last file transaction. The review was completed on September 24, 2018 and records should be retained until September 30, 2021. If any litigation or claim is started before the expiration of the 3 years, the records shall be retained until all litigation or claim findings have been resolved. Records for real property and equipment acquired with grant funds shall be retained for 3 years after final disposition.

The Federal Government reserves the right to timely and unrestricted access to any books, documents, papers, or other records to the grant for examining or making copies for as long as the records are retained.

Should you have any questions, please do not hesitate to contact Elis A. Marrero at [Ex. 6 - Personal Privacy (PP)] or email at elis.marrero@pr.usda.gov.

Sincerely,

NEREIDA RODRIGUEZ
Community Programs Director

COSSEC Contigo

A, Project Title: Addressing environmental justice: Community Care program for chronic illness through immersion in nature (**iNature**) in the Maunabo municipality, Puerto Rico.
Project Location: Municipality of Maunabo, 00707, Puerto Rico.
Applicant Information: Cooperativa de Servicos Profesionales (COSPRO), Ex. 6 Personal Privacy (PP)
San Juan, PR 00927-4118, Harrison W.Flores Ortiz, Ex. 6 Personal Privacy (PP)
Are you applying for the Small CBO Set Aside Track for $150,000 projects? No
Applicant Organization: COSPRO is a not-for-profit organization that has been incorporated since 2007. The mission of the cooperative is to respond to federal; state government, NGO's and community needs for professional and technical services in sustainable development, environmental planning, and conservation. COSPRO has worked with USDA on the development of holistic management plans for the landfills of two rural underserved communities in Culebra and Vieques and is currently working on the PR Biodiversity data based in partnership with the University of InterAmerican, the PR Department of Natural and Environmental Resources and US Fish and Wildlife Services.
Project Types: Public Education in Rural Areas for Climate Change/Disaster Resiliency
The environmental justice issue addressed by iNature is the disproportionate access to recreation for physical activity (PA) that significantly improves the management of chronic illness and **public health**. Despite the importance of PA for good health, not all populations have equal access to PA facilities and resources. This disparity is an **environmental justice** (EJ) issue because of the negative impact on the health of low-income and racial/ethnic minorities. Unfortunately, no dialogue in Puerto Rico has transpired to promote PA to improve public health. The partnership between COSPRO and the CBO, *Comité Pro-Desarrollo De Maunabo,* Inc. is to create a 12-week Community Care **iNature** program to address this environmental injustice. By adopting the CDC's evidence-based lifestyle change program approach, this EJ project aims to improve chronic illness management by increasing PA through empowering and culturally relevant nature-based activities in the Punta Tuna Nature Reserve in the municipality of Manuabo. Muanabo is medically underserved, with a demographic index of zero, with a high incidence of chronic illness the leading cause of death in Puerto Rico, and has been severely impacted by natural disasters due to climate change. The objectives are to1) Increase access to PA by engaging 160 participants with chronic illnesses in a 12-week Community Care **iNature** program for three years; 2) At least 80 % of participants will complete the 12-week program 3) At least 80 % of participants will be satisfied or very satisfied with the 18 activities in the 12-week program and 4) At least 50 % of participants continue visiting the reserve after completing the iNature program. **Products:** A iNature program that increases access to recreational activities for people with chronic illness and health limitations; content for workshops, seminars, and nature walks that are designed and planned by integrating participants' health conditions; and the increased participation of community members in the Punta Tuna Nature Reserve, that was designated after years of public environmental advocacy. This environmental justice project will advance leadership, and capacity building, develop collaboration among multi-stakeholder partnerships, and leverage resources. This **public education** project qualifies for special considerations as the project addresses building climate resilences and is executed in **rural areas** and quality assurance project plans (QAPP) does not need to be developed for this project.
Project Partner - Comité Pro-Desarrollo De Maunabo, Inc., Co-management Board of Punta Tuna Reserve, Iglesia Metodista de Puerto Rico "El Aposento Alto", Salas Outsourcing Solutions, Llc, Zulmarie Hernández Bello, Municipality of Maunabo and Égida de la Asociación de La Policía de Maunabo, Centro Educativo Sico Social Ayuda Inc.

ED_016126_00000738-00001

B. Issue Identification, Visioning, and Strategic Goal-Setting

Puerto Rico is a U.S. territory that in recent years has been devastated by an economic crisis, two major Hurricanes, Earthquakes and, the COVID-19 pandemic. These natural disasters have exacerbated poverty, severely impacted the urban and natural environment, and resulted in a weaker [1] health system. In addition, this year we have seen the significant increase in blackouts due to a failing electrical system.

Self-reported health status is far worse in Puerto Rico than in the mainland US, with adults reporting higher rates, 35.4 percent of fair or poor health compared to 17.9 percent in the mainland US. Human Resources Services Administration has deemed 72 of Puerto Rico's 78 municipalities as medically underserved areas and has identified 32 primary care health provider shortage areas[2].

Despite the importance of physical activity (PA) for good health, not all populations have equal access to PA facilities and resources. This disparity is an environmental justice (EJ) issue because of the negative impact on the health of low-income and racial/ethnic minorities[3]. With regard to PA, these communities face inadequate access to, quality of, financing for, and public involvement in recreation opportunities. Unfortunately, little dialogue has occurred between the recreation and public health professions in Puerto Rico.

Two community-based organizations Comité Pro-Desarrollo De Maunabo, *Inc* (COMITE)[4] and Cooperativa De Servicios Profesionales (COSPRO) are entering into a partnership to address this lack of access for PA as an **environmental injustice** by advancing justice and equity and using science-based strategies through a pilot project entitled: ***Community Care program for people suffering from chronic illness through immersion in nature (iNature) to Safeguard and Revitalize Communities in the Maunabo municipality*** (Fig. 1). The proposed project is aligned to the EPA FY mission, principles and strategy 6 and specific objective 6.3: Prepare for and Respond to Environmental Emergencies[5] . Further, iNature highlights the opportunities and advances in cooperation and collaboration between the Puerto Rico Department of Natural and Environmental Resources (DNER), public health researchers and practitioners, and community-based organizations that influence public health decisions at the macro (agency) and micro (individual) levels.

The Maunabo community is an underserved community directly impacted by **disproportionate** environmental and/or public health harms and risks. Chronic diseases are the leading cause of death in Puerto Rico[6]. In 2018, a comprehensive health profile study showed 20% reported smoking, 27% alcohol use, **74% light/sedentary physical activity**, 51% sleeping difficulties, and 36% self-rated fair/poor diet. Social support was moderate, and 53% screened positive for depressive symptomatology. Abdominal obesity was observed in 33% of men and 76% of women ($p < 0.0001$). Self-reported medically-diagnosed conditions included

ED_016126_00000738-00002

hypertension (39%), anxiety (30%), obesity (28%), arthritis (26%), hypercholesterolemia (24%), depression (22%), respiratory problems (21%), and diabetes (21%). Higher odds of having ≥2 cardiometabolic conditions (37%) was observed among participants aged ≥50y, with sedentary physical activity, and self-rated fair/poor diet[7].

In 2020, diabetes ranked third cause of death on the island. Which represents 60 adults for each 100,000 inhabitants died from this disease. In 2021, it was estimated that 16.8% (456,640) of adults of the population of Puerto Rico (PR) live with diabetes. About 1 in 6 adults has diabetes in PR. When compared to the states in the United States (USA), as of 2020, PR has a prevalence (age-adjusted) of 14.4%, while the US was 11.1% (median prevalence)[8]. In 2021, it was observed that the prevalence of diabetes increases with age, being the most affected group of 65 years or more (35.0%). It is observed that the prevalence of the condition is higher in those with a low economic income with less than $15,000 per year, a lower educational level or equal to high school, widowed, and retired.

In the aftermath of Hurricanes Irma and Maria, the severity of health disparities for diabetes was exposed with approximately 3000 persons dying in the aftermath of the Hurriacnes from complications of chronic illness such as diabetes, hypertension, and heart diseases. Similarly,the investigative report by Gabriel López Albarrán in 2020 reported that most people (78%) in Puerto Rico answered that they still regularly face some emotional challenges and symptoms two years after the Hurricane. He reported that those who live in vulnerable situations, who suffered losses as a result of the disaster, are at greater risk of developing symptoms related to post-traumatic stress syndrome, anxiety or depression. An important segment of the people affected in disasters and who face damage to their homes are adults over 65 years of age, who comprise 20% of Puerto Rico's total population (US Census, 2020). After Hurricane María, the Mental Health and Anti-Addiction Services Administration (ASSMCA, in Spanish) "did what it could"[9] and that the response would have been different and much more efficient if Puerto Rico had a more robust mental health infrastructure.

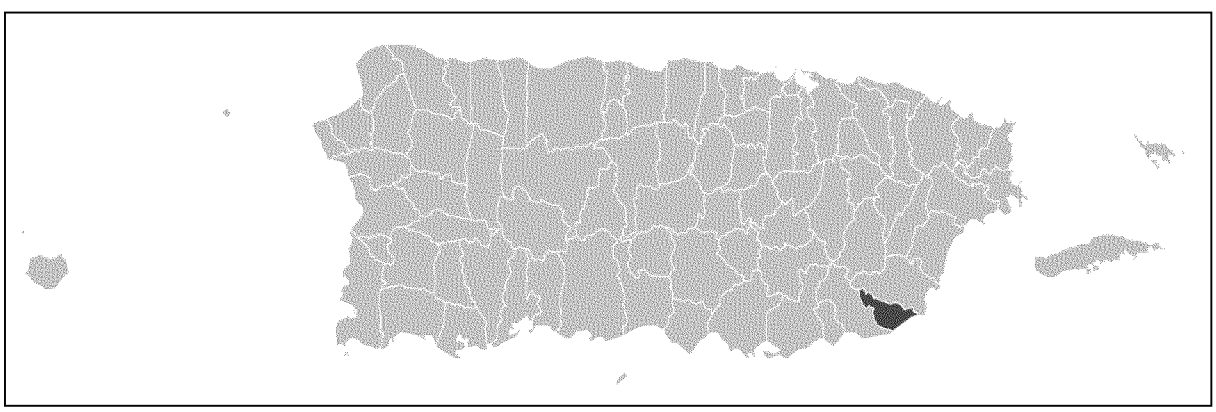

Figure 1: Map of Puerto Rico showing the Municipality of Maunabo in south east.

[7] Mattei, J., Tamez, M., Ríos-Bedoya, C. F., Xiao, R. S., Tucker, K. L., & Rodríguez-Orengo, J. F. (2018). Health conditions and lifestyle risk factors of adults living in Puerto Rico: a cross-sectional study. *BMC public health*, *18*(1), 491. https://doi.org/10.1186/s12889-018-5359-z

[8] https://www.salud.gov.pr/CMS/DOWNLOAD/6792

[9] https://periodismoinvestigativo.com/2020/09/recurrent-trauma-the-effects-of-climate-change-on-mental-health-in-puerto-rico/

ED_016126_00000738-00003

In 2021, the national obesity prevalence was 35 % of adults over 18 years of age. For Puerto Rico it was 35.95 %. Obesity prevalence in Puerto Rico increased from 28.4 % in 2012 to 35.95 % in 2021 growing at an average annual rate of 2.78%[10]. According to the Puerto Rico Heart Program, found that Puerto Rican men who are physically active experienced significant reductions in all-cause mortality compared with their sedentary counterparts[11].
Therefore, it is important to develop environmental justice projects by addressing and strengthening community capacity and leadership in public health and the environment. The proposed iNature program is designed and developed with community members, partners and leaders in the Municipality of Maunabo to increase PA in the community as a tool to improve management of chronic illness especially in communities impacted by climate-related disasters . The municipality is found in the direct path of Hurricanes and is constantly in a state of emergency from natural disasters. In recent years natural disaster events have increased in intensity and frequency increasing the community's health and environmental vulnerability.

Environmental and Public Health information of the Underserved Maunabo Community.

Population 10,506, 99.6 % Hispanics, 25 % over the age of 64, and 46 % of persons live in poverty (US CENSUS 2022)[12]. In addition, this within this municipality is a superfund site and a RMP facility (EJ, 2023)[13]. In 2017 There is only one health clinic within the municipality and is a medically underserved community (Fig. 2). The municipality has a higher number of death from heart disease, with 40-60% prevalence of inactivity for 18 years to 64 years old respectively, and the municipality had a high number who were overweight (Fig. 3).

The socio-economic, environmental, and health status of the community in Maunabo denies them the full opportunity to participate in all aspects of economic social, and civic life. Therefore the proposed iNature program was purposefully designed using the Collaborative Problem-Solving Model to provide community members the tools required to identify and manage their chronic illness crisis especially after the recent natural disasters. The iNature program is designed and developed by community leaders as a community care program that teaches participants to effectively manage their chronic illness to accelerate resilience and adaptation to natural distaers impacts caused by climate change. Evidence shows that community-in-home care model were more likely to improve depressive symptoms and mental health outcomes than physical health or service use outcomes[14], therefore we have designed an innovative program to include outdoor immersion in nature activities to improve PA[15,16].

ED_016126_00000738-00004

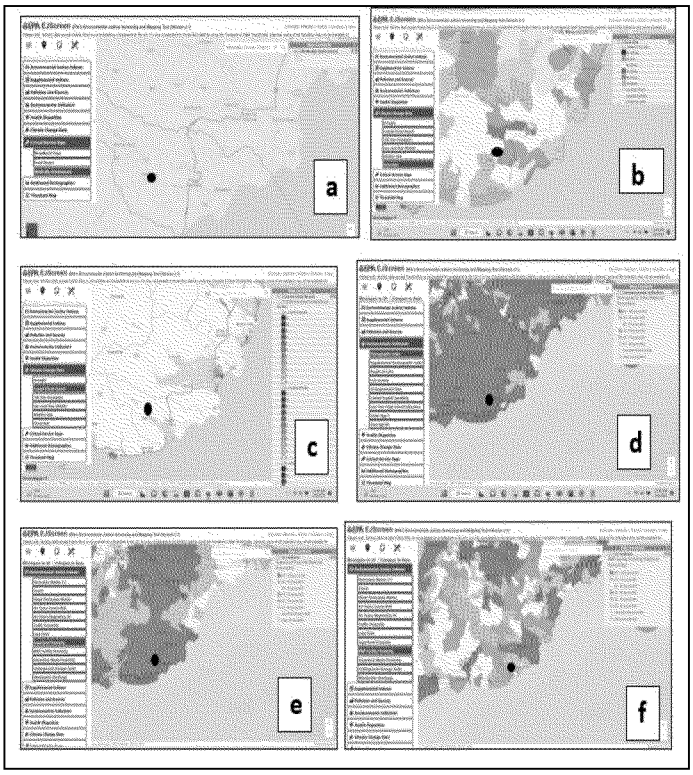

Figure 2: The Environmental Justice Profile of Maunabo Municipality indicated by black dot on maps a) Critical Services gaps in 90-100% percentile b)60-70 % percent Flood Risk c) Level 1 for coastal flooding d) 90-100% percentile for demographic index (Low income and people of color populations), e) 90-100% for proximity to a superfund sites and e) 90-95 percentiles for proximity to a RMP Facility.

With the exodus of health care professionals in Puerto Rico, many chronic illness patients are left to take care of themselves the best they can with the limited resources they have available. Many focus on their expensive medication needs and struggle to find other support (economic and social) to improve the management of their illness. The population of Maunabo with the socio-economic-environmental profile (Fig. 2 & 3) the community is extremely vulnerable to the impacts of climate climate change. In the proposed iNature project we will address both local environmental and public health issues, by empowering the community through educational and immersive activities to improve public health and building consensus and setting community priorities in the underserved community.

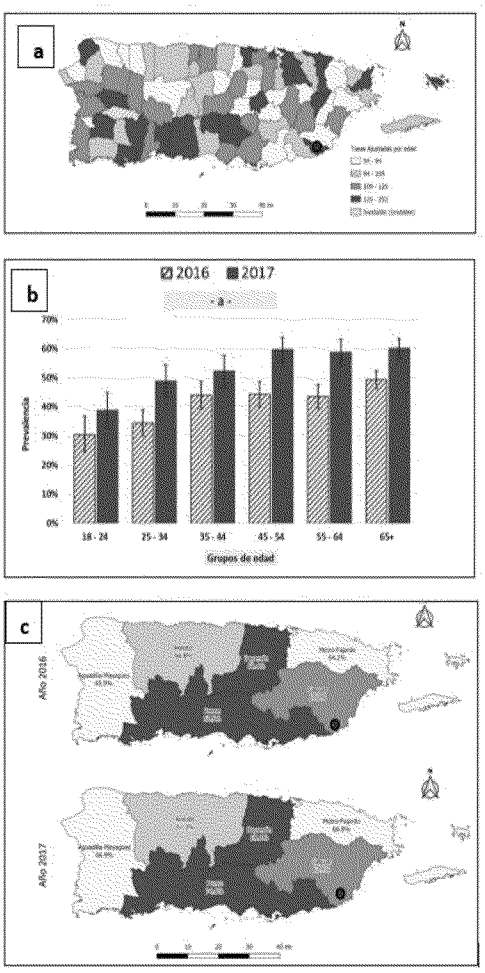

Figure 3: Environmental Justice profile of the municipality of Maunabo (red dot) a)Total deaths by heart disease b) Prevalence of Inactivity by age c) Prevalence of overweight by health regions in Puerto Rico.

ED_016126_00000738-00005

Development of Multi-Stakeholder Partnerships and Leveraging of Resources

Partnerships for iNature– a Formal partnership between presidents, memorialized in writing and legally binding will be formed between Comité Pro-Desarrollo De Maunabo, Inc (COMITE)[17] and Cooperativa de Servicios Profesionales (COSPRO) [18] for the development and the execution of the iNature project.

COSPRO is a **non-for-profit organization** whose mission is to offer professional advisory, consulting, training, development, management services of projects and orientation to the community on matters of public interest[19]. COSPRO is a versatile entity that provide services to a wide spectrum of companies, including suppliers and contractors from various sectors such as the Cooperative, Government, companies in the construction industry, transportation, development of infrastructure, urban and social development, municipalities, banks, educational institutions and Non-Governmental Entities (NGOs), among others. COSPRO has provided professional and technical services to municipalities and organizations who serve 90-100% percentile of Hispanics from underserved and underrepresented communities throughout Puerto Rico.

COMITE is a **community-based organization** in the southeast of Puerto Rico. The mission is to help improve the quality of life for citizens through the conservation of our natural environment and promote sustainable development alternatives for Maunabo and the southeast of Puerto Rico, and facilitate environmental education so that citizens are committed to the conservation of the natural environment. This community-based organization works to protect the Punta Tuna wetland and adjacent coastal systems of the town of Maunabo. After several years of public advocacy by the COMITE, the Department of Natural and Environmental Resources (DNER) in 2000 designated 447 ha. as the Punta Tuna Wetland Reserve (Reserve) protecting wetland and adjacent coastal systems in Maunabo[20]. For the past 25 years the COMITE through a co-management contract with DNER has been working closely with the state and federal agencies such as Department of Recreation and Sport to provide educational and outreach services to their community that are majority low-income, Hispanic and from rural areas in southern Puerto Rico[21]. For their work they have been awarded the EPA environmental Award in 2009.

The Reserve have received over 20,000 visitors including school children, youth, university students and visitors from PR and abroad. Only a low percent of the community members visit and use the nature reserve. The board of directors of COMITE, consisting of community leaders identified the place where they live, work, worship or play does not have these options and therefore makes it difficult for them to make the healthy choice to increase their PA. In 2002 the COMITE together with the DNER developed a nature trail for persons with impediments. The first nature trail of its kind in Puerto Rico allows participants with mobility impairments, the blind and audio impaired to enjoy nature. The impacts of Hurricanes and COVID-19 has severely impacted the services and visitors in the Reserve and at the same time caused an increase of chronic illness such as obesity, diabetes, heart disease, and mental health in the community to increase (Fig. 3). The iNature program aims to address this environmental

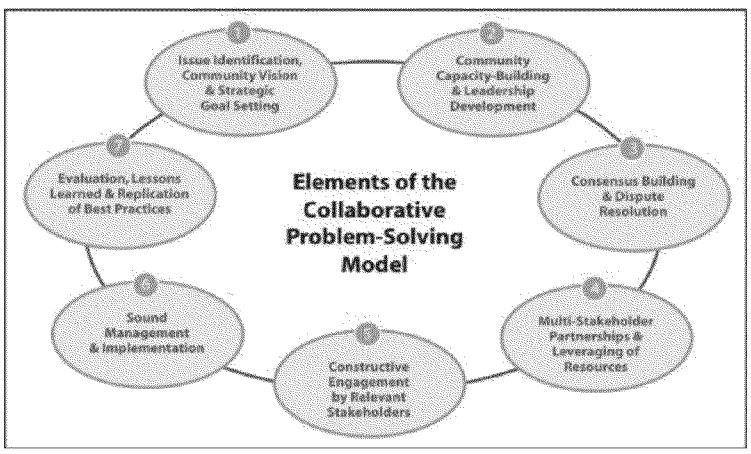
ED_016126_00000738-00006



justice issue by increasing access to recreational activities for people with chronic illness and health limitations. This environmental justice project will advance leadership, capacity building, develop collaboration among multi-stakeholder partnerships and leverage resources to enhance green infrastructure and improve chronic illness management . This **public education** project qualifies for special considerations as the project addresses building climate resilences and is executed in **rural areas.**

C. Organization's Historical Connection to Underserved Community

Both COSPRO and COMITE work closely with underserved communities over the past 20 years in Puerto Rico. COSPRO works in environmental projects by providing scientific and technical assistance through professional and cooperative agreement contracts. COMITE has worked in the Maunabo municipality for over twenty years providing environmental advocacy and educational services. COSPRO works nationally with rural and underserved communities through partnerships with federal and non-federal stakeholders. COSPRO has worked on related USDA-funded projects ($158,798,00) for the low-income underserved municipalities of Culebra and Vieques (See Attached Compliance letters). In these projects entitled: Reduction of Solid Waste at the Vieques and Culebra Landfills, COSPRO was approached by the Major to work closely with stakeholders to find solutions to the municipal solid waste environmental problems. COSPRO trained landfill operators with best practices on solid waste management and developed with community leaders a Recycling and Composting Enterpreneurship Program for the two islands.

D. EJCPS Model

The project has been designed and will be implemented using the Environmental Justice Collaborative Problem-Solving (CPS) Model. **Community-Driven Participation** –Steps 1, 3 & 5 have begun to develop this EJ project. Below we present the application of the other 4 steps in the CPS model. The project was developed in consultation with the board members of the COMITE and community members in a meeting held on 11 March, 2023. Further, COSPRO has presented the project plan to several health care services providers in the region who support the project and are willing to leverage resources (see letters of support). They have provided inputs on the services to provide within the 12-week iNature program to ensure a holistic approach to improve the management of chronic illness through PA in the reserve. The community will further participate in the decision-making process of the iNature project through the advisory committee.

It is well known that lack of exercise is a major cause of chronic illness[22]. Therefore, to reduce the sedentary lifestyles of 160 community members over the age of 50 and to increase the number of visitors using the reserve, the COMITE in partnership with COSPRO will develop

[22] Booth, F. W., Roberts, C. K., & Laye, M. J. (2012). Lack of exercise is a major cause of chronic diseases. *Comprehensive Physiology*, *2*(2), 1143–1211. https://doi.org/10.1002/cphy.c110025https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4241367/

an environmental justice **Community Care program for chronic illness through immersion in nature (iNature)** program in Maunabo. The **goal of iNature project is to provide nature-based activities that are empowering and culturally relevant to improve chronic illness management in the disadvantaged communities in the municipality of Manuabo.**

The objectives are:

1. Increase access to PA by engaging 160 participants with chronic illnesses in a 12-week environmental justice Community Care **iNature** program for three years
2. At least 80 % of participants will complete the 12-week program
3. At least 80 % of participants will be satisfied or very satisfied with the activities in 12-week program
4. At least 50 % of participants continue visiting the reserve after completing the iNature program.

With financial and logistical support, the iNature project will provide the community with the services and support they require to improve their environment and health. The following barriers have been identified by the board of the COMITE that are currently preventing community members from participating in reserve activities: 1) Lack of knowledge about the reserve 2) Lack of transportation 3) State of their physical and mental health and motivation and 4) Concern for their safety within the reserve. Therefore, to address these environmental injustice issues, the COMITE and COSPRO are partnering with nature educators and healthcare professionals to develop a comprehensive holistic program to increase community immersion in nature to improve their physical and mental health as a tool to managing their chronic illness. COSPRO will enter into the partnership agreement with COMITE for the purposes of accountability for the proper expenditure of Federal funds, performance of the assistance agreement, liability for claims for recovery of unallowable costs incurred under the agreement.

COSPRO will be responsible for the administration and monitoring of the project for federal compliance while Comite will be responsible for the programmatic implementation of the project. COSPRO in this partnership will receive EPA funding as the direct recipient of the cooperative agreement and the other partner(s) or as a subrecipient(s). This partnership agreement allows members of COSPRO to provide technical support to Comite for the development of the environmental education program for participants with chronic illness. Comite will be responsible for recruiting and retaining participants throughout the 12-week program. Other partnerships will be formed with a mental-health service providers, health care providers and nutritionists through professional service contracts. The partners together with COSPRO and the COMITE will develop guidelines with activities to address participant's physical and well-being capacity. Participation level in nature activities will be developed according to participant health profiles.

e. Project Linkages: The iNature project is aligned to strategy 4, Goal 2, Objective 2.1, "Promote Environmental Justice and Civil Rights at the Federal, Tribal, State and Local Levels. The proposed CPS project assists vulnerable and underserved communities in Puerto Rico in developing proactive and innovative approach to address their environmental justice public health and environmental issues to achieve community health and environmental sustainability.

f. Partner and Collaboration: Constructive Engagement with Partners and Collaborators

The iNature community care program requires diverse partners for it to be effective. Therefore COSPRO and the COMITE have reached out to several partners who work in low-income Hispanic underserved communities.

The mental health provider, Dr. Zulmarie Hernandez is a social worker who had strong roots in the community. She will provide activities such as workshops and seminars on well-being and mindfulness for mental health[23] (see letter).

Healthcare providers will provide orientation to family members and friends of participants on understanding of and management of chronic illness during natural disasters[24] (to be identified). activities such as workshop and seminars on chronic illness preparation before, during and after natural disasters (to be identified).

Nutritionist/Dietitian will provide services to participants of healthy eating and lifestyle choices to improve their chronic illness conditions. activities such as workshop and seminars on mindful eating and develop menu plans for participants. (to be identified).

Constructive Engagement with Other Stakeholders

The iNature team will be working closely with other community leaders and organizations to promote project activities and provide the team with recommendation and suggestions through the creation of an advisory committee. The advisory committee will be comprised of two community leaders, one representative from the government, one medical plan health care provider and one social worker . The advisory committee is purposeful to ensure constructive engagement by stakeholders in the planning, execution and evaluation of the program activities.

Community Leaders have direct contact with participants and will be able to provide valuable feedback to the iNature team about logistics that they may not express in the satisfaction surveys. They can also help with challenges such as recruitment and retention of participants in the project.
Government Official, Mr. Humberto Figueroa has been collaborating on the co-management board of the Reserve since its inception and is familiar with the DNER policies and norms that govern the memorandum of understanding between the DNER and COMITE. He will provide advice on compliance with the MOU and opportunities for nature guides and participants of nature actvities within the DNER natural reserve system.
Medical Plan Service Provider, Mr. Edward Munoz, is the senior VP of SALUS Medical Health Care Plam, he will be able to evaluate the value of the project to include in potential activities that can be covered by the government medical plan. Currently, several services such as pet grooming, garden clean up and transportation to non-emergency medical appointments have been covered by the medical plans.

---

[23] Merkes Monika (2010) Mindfulness-based stress reduction for people with chronic diseases. *Australian Journal of Primary Health* **16**, 200-210.
[24] https://link.springer.com/article/10.1186/s12889-019-6800-7

ED_016126_00000738-00009

The Municipal Major office, Community Leaders, and *other collaborators & stakeholders* in the iNature program have committed to promote recruitment events and calendar of activities in local community centers, Diabetes Center, and Doctors offices (see letters).

Furthermore, consultants will be hired through professional service contracts to develop and provide services for the proposed comprehensive holistic iNature program.

(1) One Health care provider will be hired to provide family and participants educational materials and workshops on understanding and managing their chronic illness during time of emergencies due to natural disasters. This partner already works in providing medical services to chronic illness participants and are familiar with shortfalls in holistic care. This experience strengthens the workshops so that they are meaningful and impactful with participants. (see letters)

(2) One Clinical Social Worker will be hired to provide workshops and educational materials on mental health and mindfulness. The social worker has been attending to underserved communities in southern Puerto Rico and is familiar with the state of mental-health within the community (see letters)

(3) One National association for Interpretation trainer will be hired to certify 5 community members to be nature guides for the continuation of the project. They will be responsible for working with health care provider to certify the planned nature walks are appropriate for participants with chronic illness, The trainer has over 20 years experience training and providing education nature tours to Hispanic audiences with diverse medical needs (see letter)

(4) Two nature guides will be hired to provide cultural relevant and appropriate nature walks within the reserve. Nature guides must be able to effectively communicate in Spanish and have empathy required to work with participants with disabilities and limitations due to chronic illness (not yet identified)

2.0 Project Activities / Milestone Schedule

Community Capacity Building and Leadership

Approach: iNature community care based program will follow the CDC's successful National Diabetes Program[3] approach. With the following components[3]:

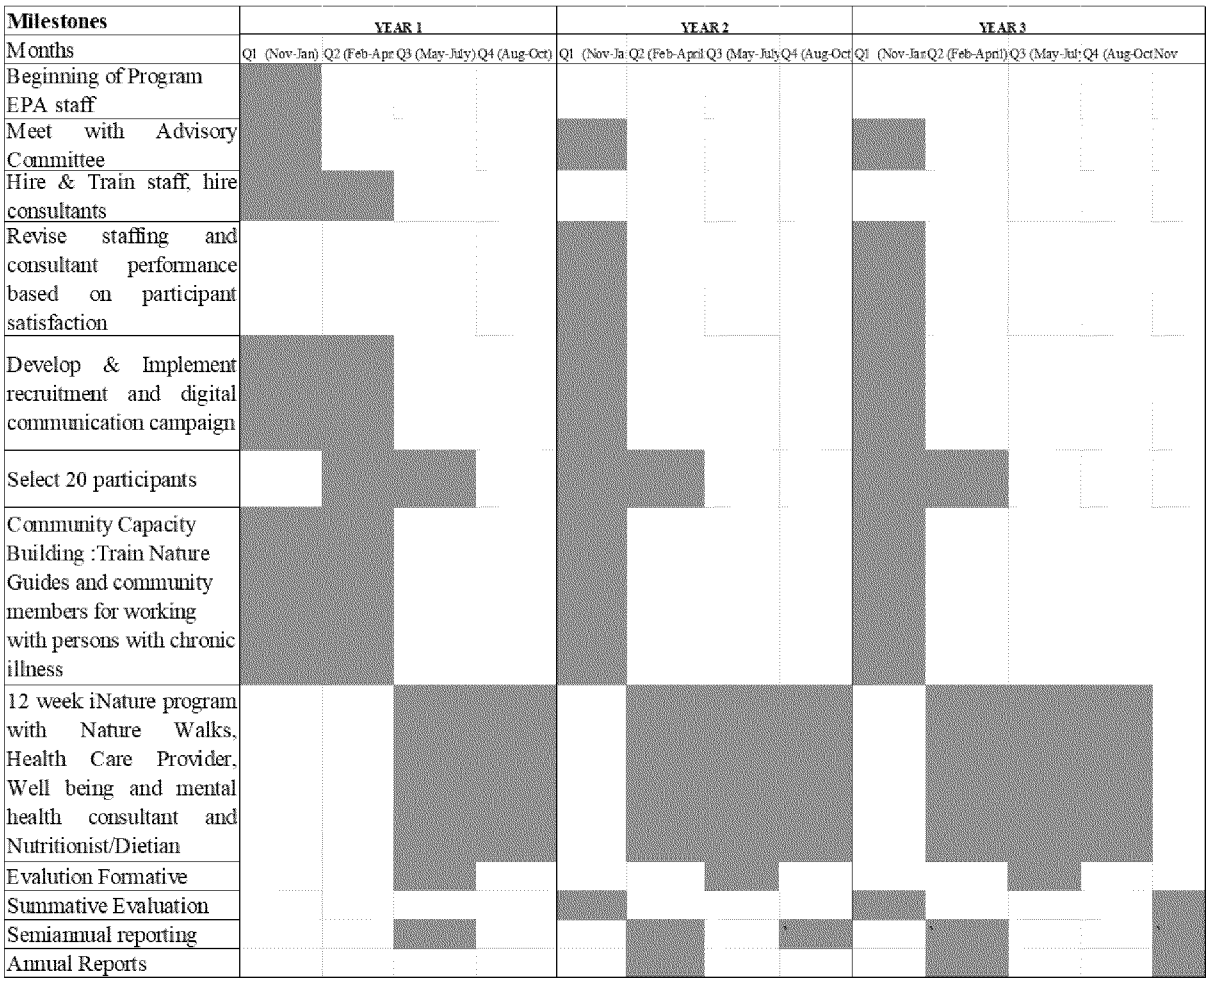
Part 1: Education and Support for People with Chronic Illness: In this section, participants will learn about the roles of: 1. Health Care Providers; 2. Chronic Ilness Self-Management Education; 3. Their Community 4. Family and friends .

Part 2: Planning Community-Based Activities such as 1. Promoting healthy living; 2. Raise awareness of healthy behaviors and offer education programs and support groups; 3.Linking iNature participants to recognized or accredited chronic illness health care professional and centers in the region; 4) Offer space for recognized or accredited programs to give seminars and workshops by creating healthy environments, 5. Increase access to healthy food choices for persons with low income; and 6) Increase access to safe places to be physically activity.

Part 3: Tools and Resources such as 1. Assessing participants needs and resources and 2. Engaging Partners to work within the problem-solving model.

ED_016126_00000738-00010

Sound Management and Implementation



a. Project Objectives, Activities, Anticipated Products and Person Responsible.

Objectives	**Activities**	**Anticipated Products**	**Person Responsible**
1- Increase access to PA by engaging 160 participants with chronic illnesses in a 12-week Community Care **iNature** program for three years	Meeting with Advisory Committee to design and develop 12-week program Develop and implement communication campaign to recruit 160 participants from communities. Develop education activities and weekly calendar for: 1.Understand your chronic illness and connecting to nature 2. Mental Health 3. Nutrition 4. Nature Walks	Finalized Conceptual framework of iNature Program Posters, Flyers, Radio Announcement, Newspaper articles, social media posts, uploads and response. Select 100 participants per year 3 seminars for family and friends of participants. 3 Workshops on well-being and mindfulness 3 activities of building a healthy menu on a low-income budget Menu plans shared with participants 9 Nature walks that are aligned to groups illness and interest, Increase PA for project participants	Project Manager (PM) Project Coordinator (PC) PM PC Nature Guides Publicity Consultant Health Care Provider, PM, PC Mental Health Professional, PM, PC Licensed Professional, PM, PC Hired Nature Guides (NG), PM, PC
2- At least 80 % of participants will complete 6 nature immersion	Create a Digital support system of Motivation text messages.	Compendium of motivational texts Social media accounts in	PM, PC, NG Consultants, External Evaluator

ED_016126_00000738-00011

sessions of the 12-week program	Social media posts group of activities Phone call follow up from nature guides and other participants	Facebook, Tic Tok and Snapchat	
3-At least 80 % of participants will be satisfied or very satisfied with iNature activities	Develop participant satisfactions surveys for Workshops, Seminars and Nature immersion activities	Surveys administered and analysis	PM, PC, External Evaluator
4-At least 50 % of participants continue visiting the reserve after completing the iNature program.	Sign in sheet to longitudinal track of participant visits to Reserve	Increase visitors to Reserve	PC, NG

b. Milestone Schedule

c. Itemized Budget Sheet / Budget Narrative - See Attached Budget and Budget Justification

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures

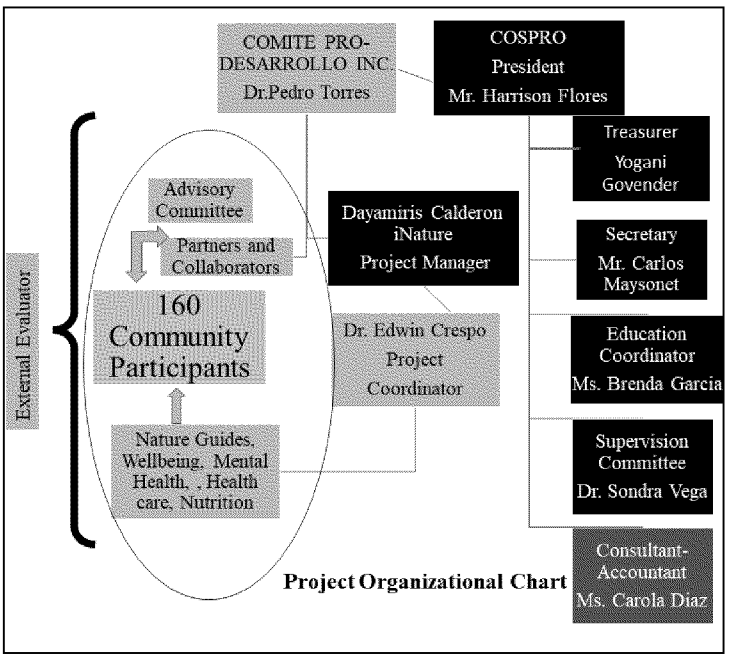
Evaluation, Lessons Learned and Repliation of best practices

a. Logic Model -
See Attachment

b. Performance Measurement Plan –The day to day activites of the project will be reported by the PC and PM to the Boards to COSPRO and COMITE via monthly reports take stock of where we are with respect to the tasks to achieve our 12 week iNature program and project milestones. We plan to meet PM to monitor and evaluate the performance of the project every months and present project progress to stakeholders and advisory board annually to evaluate the progress towards the goal of increasing PA for 160 participants to readdress EJ.

c. Sustainability Plan and Community Vision :Investment in Green Infrastruture through the iNature project will elevate the reserve as a community space for PA that is well designed, has interesting and diverse programming that is adapted for persons with chronic illness. The training of fifteen local community members as nature guides through the iNature project ensures sustainability of the program of actvities and the continued use of educational materials and natural features developed for the projects. The COMITE can offer an increased number of events in the Reserve therefore increase its income and thus its financial stability. The creation of the institutional structures and policies for obtaining and managing federal funds for programmatic activities and the partnerhip with COSPRO increases opportunities for the COMITE to diversify its funding source to include foundations and other federal programs.

The knowledge and skills acquired during the 12-week program will motivate participants to continue to use the reserve for PA. The lessons learned and removal of barriers of access to a nature reserve through this EJ project will allow the COMITE to further expand their educational programs to organizations in the community that work with seniors, children with learning disabilities, and communities members with health limitations. The COMITE will leverage the resources of the EJ iNature project to work with the local municipality and public health agencies to seek further funding to support non-traditonal visitors to the reserve. The educational materials provied for nutrition, well-being and mental health, understanding your disease and nature tours will remain in the visitors center for future visitors to the reserve. The additional natural features , resting places and meeting areas along nature trails developed with signage will be used for future educational tours.



The success of getting persons with chronic illness to make a lifestyle change in the 12- week iNature program has broader impacts as it can be replicated in the other 77 municipalities in Puerto Rico, where community members suffer from high-incidence of chronic illness and lack of access to PA. Also, the inclusion of the Health Care Service Provider, SOS as an advisory member is to showcase the communities vested interest in sustaining the project's momentum on managing chronic illness and to work on advocacy to provide continued logistical and financial support to non-traditional solutions such as iNature for Public Health Care into the future.

ED_016126_00000738-00013

4.0 Programmatic Capability

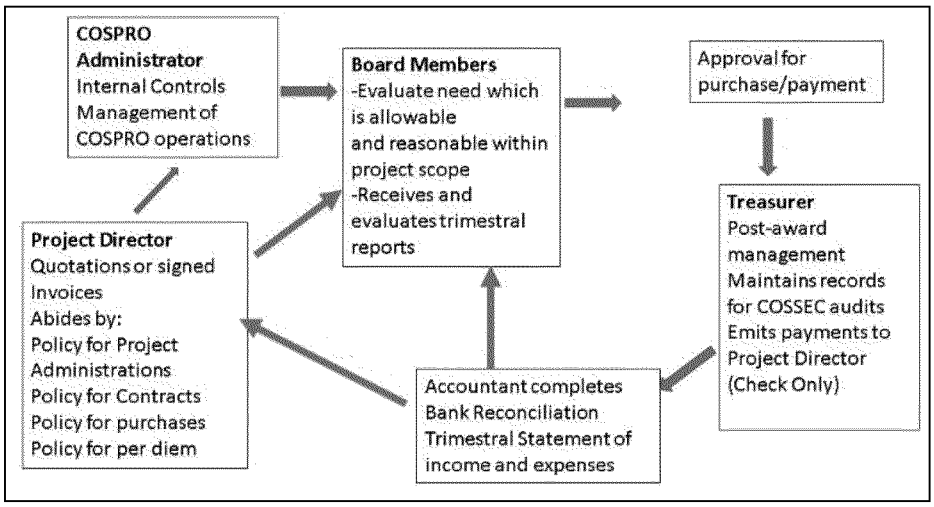
a. Organizational Experience

COSPRO, projet team is experiential qualified to plan, execute and evaluate the iNature project. COSPRO has received funds from both federal, state, and non-federal organizations using an organizational structure of a worker's cooperative Law 239, 2004 (black shaed areas). We have an elected board of 5 members who are volunteers and a hired accountant who supervise the day-to-day financial operations of COSPRO. COSSEC is the governmental structure that provides financial and programmatic oversight and audits for COSPRO. We have had continued good standing since 2008 (Attachment Good standing certificate). The members pay an annual membership fee to participate in the cooperative, currently COSPRO has eight active members who submit proposals to provide technical and professional services. Members are financial compensated for the work they complete in projects and submit all relevant documentation to COSPRO's 5 member elected board. COSPRO has no employees but hires through professional services an independent accountant to monitor expenditures on external funded projects and submit trimestral financial reports to COSSEC. Accountant's services to ensure independent financial transparency of the Board to its members. The board members carry out the administration of COSPRO on a voluntary basis. COSPRO has in place the necessary controls to manage external funds and has successfully implemented all projects with collaborators and partners meeting the compliance of contracts and cooperatives agreements with state and federal agencies (see Attachment on Compliance).

COSPRO in the past three years received funds ($48,100.00) from the University of Interamerican, to provide technical assistance for two projects 1) the management of the Puerto Rico, Biodiversity Data Base and 2) Identify potential habitat of Coqui Llanero. COSPRO was successfully able to complete the project for three consecutive years by working in consultation and frequent meetings with faculty of Interamerican University and other state and federal partners (DNER & Fish & Wildlife Services). The detailed work plans COSPRO developed included project objectives aligned with specific activities, milestones and timelines to ensure effective supervision, compliance and programmatic and financial reporting. The Board supervised the implementation of the project within the work plan and ensured funds were spent in compliance with the terms of the contract. For the Coqui project three new members were brought into the project team to ensure the services required for the execution of the project was completed by experts in the field and results were achieved within the projected timeframe. All reports were submitted to the Agency in a timely manner to comply with project deadlines for biannual and final technical reports in Grantsolutions.

ED_016126_00000738-00014

b. Staff Experience



The project manager (PM) for the iNature Project hired by COSPRO will be Dayamiris Candelario Maysonet**.** She has over 15 years of experience working in supervising, overseeing the planning and implementation of education and conservation projects for diverse audiences in underserved communities. She has been responsible for providing environmental and interpretive activities for over 3,000 people per year (pk-12 students, families, homeschoolers, Boy Scouts, Girl Scouts, community groups, and volunteers); totaling over 38,000 people served over ten-years as environmental educator and interpreter. She has managed the first local project to investigate the potential positive effects in ADHD symptoms of Puerto Rican children after being exposed to nature and local forests. She is well recgonised as an effective educator and has won the Outstanding Interpreter Award of 2015 by The Sunny Southeast Region of the National Association for Interpretation (NAI). She has been the Director of the Centro Ambiental Santa Ana and was responsible for strategic planning, fund-raising, grant writing and management and reporting to Board and Donors. She developed the activities calendar according to clients needs and develop specific nature experiences based on the audience health and physical condition. She managed the first local project to investigate the potential positive effects in ADHD symptoms of Puerto Rican children after being exposed to local forests. She has grant management expertise and has worked with funds from foundations, US Forest Services, and the PR Department of Natural Resources. The PM will oversee overall project management. She will be responsible for the implementation of the project together with the PC. Her duties include providing day to day oversight of the grant. In addition, she will provide leadership for and direct all aspects of the project, working closely with all project staff to develop and implement all planned project strategies. She will oversee the execution of the programmatic and financial aspects of the project ensuring COSPRO and EPA compliance. She will be responsible for compliance of Non-Discrimination Obligations and Best Practices during the iNature project. She will be responsible in submission of reports to agency in timely manner and will work with hired accountant for payments inaccordance to process and controls of COSPRO and COSSEC.

The project coordinator, Dr. Edwin Crespo has committed to join the iNature project at Reserve as the project coordinator (PC). He holds a Ph.D. in Curriculum and Teaching and Learning Environments with a Concentration in Technology. He has worked in several federally funded projects training tecahers and has managed the School Improvement Grant (SIG) in rural and underserved communities in the south-east region of Puerto Rico. He has been recognized for his efforts as an educator by several organizations. He has been selected by the COMITE to lead the iNature project, for his dedication and volunteering efforts to provide the community of Maunabo services in the Reserve. He is a community leader who is well respected. and He has over 30 years experience working closely with low-income underserved communities to provide experiential learning education. He will work with COSPRO and the PM to plan, develop and execute the programmatic activities together with consultants, partners and stakeholders. He will be responsible for supervising the nature guides and coordinating all activities: nutrition, well-being and mental health, understanding chronic diseases, and nature activities to increase PA to improve chronic illness. He will work with the PM to ensure compliance with reporting requirements for the project.

All consultants hired through professional contracts have been or will be carefully selected for their experience working with low-income communities and/or are clinical practitioners working with patients with chronic illnesses .

ED_016126_00000738-00015

c. Expenditure of Awarded Grant Funds

COSPRO has in place established workflows for the management of projects with external funds. Our Peachtree system, is adequate to report Federal Awards in compliance with Federal statutes, regulation and terms and conditions of the EPA award. We have implemented effective control over and accountability for all funds. We confirm that our organization follow federal requirements for grants management and have written policies and procedures in place for determining the allowability of costs in accordance with terms and conditions of federal and state agencies. Our procedures and controls ensure that the awarded grant funds are spent in a timely and efficient manner. The treasurer manages post award tasks and is responsible for the drawdown of funds. By following the milestones chart above and by adhering to the timeline we will be certain to expend the funds in a timely manner.

5.0 Past Performance

No relevant grants or cooperative agreements in past three years.

6.0 Quality Assurance Project Plan (QAPP) Information

No Quality Assurance Project Plan (QAPP) Required

7.0 Evaluation Plan

External evaluation of this project will be conducted by Gabriele Haynes, Ph.D., Principal Consultant and Senior Researcher at Haynes Evaluation. Haynes Evaluation (HEVAL) provides culturally responsive external evaluation for several federally and philanthropically funded programs. HEVAL's areas of evaluation expertise include broadening participation in STEM, college student access and retention/graduation, professional and leadership development for faculty, and institutional cultural change. Haynes is a member of American Evaluation Association (AEA) and adheres to the professional and ethical values set forth by AEA, follows the What Works Clearinghouse (WWC) standards established by the U.S. Department of Education (What Works Clearinghouse (WWC), 2019), and the "Common Guidelines for Education Research and Development" of the Institute of Education Sciences and NSF and maintains current Collaborative Institutional Training Initiative (CITI) certifications for Social and Behavioral Responsible Conduct of Research. Haynes holds a master's degree in Program Evaluation from the University of Melbourne, Australia and a PhD in Education Leadership from the University of the Virgin Islands.

This evaluation will use mixed methods and will generate robust evidence that assesses program impacts including participant engagement as well as psychosocial metrics such as wellness and willingness to participate in physical activity and satisfaction with program components.

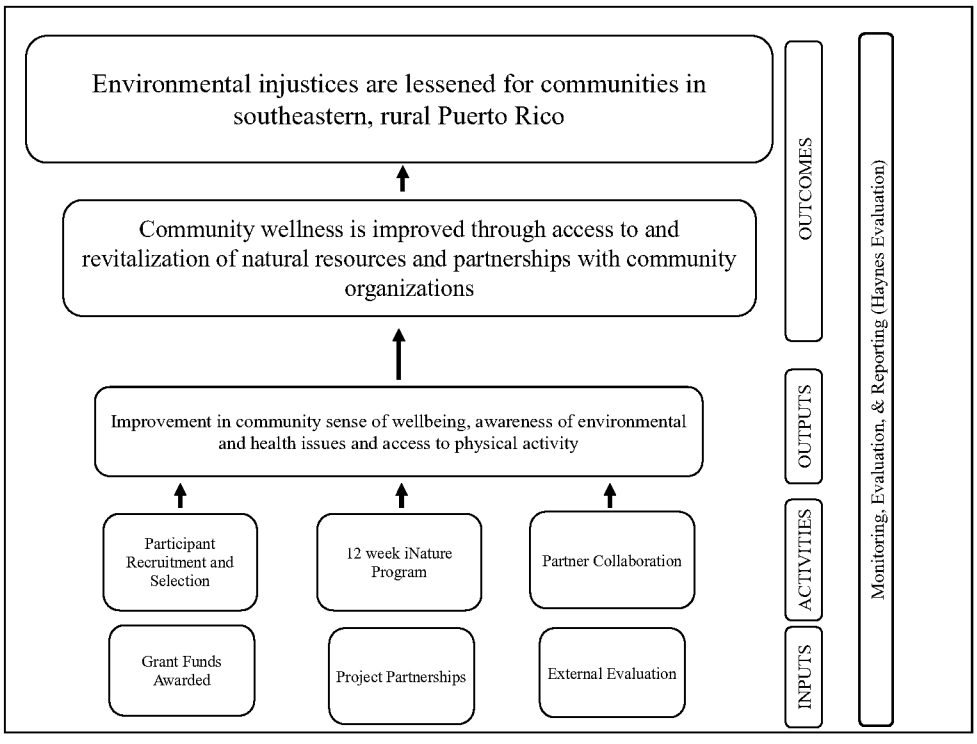
The study will be guided by the following (specific) research questions:

1. What are the relationships between exposure to the program components and changes in participant perceptions of well-being and willingness to participate in physical activity?
2. What are the impacts of the program activities on the number of chronically ill persons that participate in wellness activities?

Data Collection and Metrics

Data will be collected in both qualitative and quantitative forms. Administration of pre/post survey instruments for the iNature program will quantitatively measure (multiple choice/scaled responses) overall well-being (wellness) and willingness to participate in physical activity (PA). The surveys used will be modifications of existing (validated) instruments that are tailored to the specifics of the program. Open-ended survey items will be included to allow the "voice of the participants" (which is a crucial element in qualitative research) to emerge in the data. The pre/posttests will be administered immediately prior to and after the program activities.

Analyses



The program is expected to improve wellness and willingness to participate in PA by .5 standard deviation points above baseline (which will be collected with the pre-test). An improvement of .5 above baselines with 80% statistical power and effect size of .5 (moderate effect) is achievable with a sample size of ≥27 which is supported by the participation numbers. Changes in scores from pre- to post-assessment will be explored using matched-pair analysis to increase statistical power (Shipley et al., 1989), either using program-specific anonymous IDs or anonymous tracking via survey administration software. Effect sizes will be calculated using Hedge's g to determine whether small, medium, or large effect sizes were achieved in each quantitative outcome measure, per WWC standards (What Works Clearinghouse (WWC), 2019). Conventional content analysis (Creswell & Poth, 2017) will be used to code and analyze qualitative data from observation field notes and open-ended items on surveys to identify key themes about the cultural relevance, quality, and impacts of the activities and supports.

Reporting

Formative and summative reports will be submitted to PM and Boards of COMITE and COSPRO to make any relevant adjustments to programmactic activities. The formative and summative reporting underpins the project implementation and effective management. The consultant will submit reports according to milestone schedule to ensure the PM & COSPRO will comply with the EPA reporting requirements. Further, COMITE & COSPRO will provide EPA post-period follow-up and updates on project sustainability and long-term community revitalization impacts such a visits to the Reserve and improvement of community PA.

ED_016126_00000738-00017

The program theory of change is represented in the visual graphic included below which complements the program logic model and will be used to guide the evaluation.

Comité Pro Desarrollo de Maunabo Inc.
P.O. Box 1411
Maunabo, Puerto Rico 00707-1411

April 8, 2023

President
Cooperativa de Servicios Profesionales (COSPRO)

Re: Letter of partnership and commitment

The Board of the Comité Pro-Desarrollo De Maunabo, Inc a community-based nonprofit organization, is entering into a formal financial relationship with the Cooperativa de Servisios Profesionales (COSPRO) (partnership non-for-profit) to develop and implement an environmental justice project entitled: Community Care program for chronic illness through immersion in nature (iNature) to Safeguard and Revitalize Communities in the Muanabo municipality. A subaward agreement for the sum of $298,972.50 is planned to establish the partnership. The parameters of the partnership, and the role and responsibilities are detailed below:

1) COSPRO will enter into the assistance agreement with EPA for the purposes of accountability for the proper expenditure of Federal funds, performance of the assistance agreement, liability for claims for recovery of unallowable costs incurred under the agreement.

2) COSPRO in this partnership will receive EPA funding as the direct recipient of the cooperative agreement and the other partner(s) or as a subrecipient(s).

3) COSPRO will be responsible for the administration and monitoring of the project for federal compliance while COMITE will be responsible for the programmatic implementation of the project.

4) This partnership agreement allows members of COSPRO to provide technical support to COMITE for fiscal and programmatic management of the INature program.

5) COSPRO & COMITE will be responsible for compliance with all state and federal regulations to ensure continuation of project.

6) COSPRO & COMITE will comply with financial practices by having internal controls for

expenditure of federal funds using Uniform Guidelines and have accountability for the proper expenditure of Federal funds, performance of the assistance agreement, liability for claims for recovery of unallowable costs incurred under the agreement.

7) COSPRO and COMITE will develop strategies with advisory board members and collaborators for recruiting and retaining participants throughout the 12-week program.

8) COMITE will supervise and certify completion of services provided by personnel and consultants working in the iNature Project.

9) Share the necessary information, related to accountability, transparency, quality of service provision.

10) Coordinate the events, seminars, and conferences related to iNature project.

11) Handle the complaints about project in timely and respectful manner.

12) Participate in monitoring processes for fiscal and programmatic audits by relevant agencies.

13) Participate in the completion of relevant reports to the federal agency.

The iNature project was developed through the CPS model by COSPRO and COMITE consulting with community members and leaders, health care providers, environmental educators to address a serious environmental injustice for improving public health. The disadvantaged communities in the municipality of Muanabo are being served by this partnership. Community leaders will participate in the advisory committee during the decision-making processes and community members will be hired as personnel for the implementation of the proposed projects activities who will be responsible to ensure project participants served by the project are from the Municipality of Maunabo.

The partnership is built on mutual mission to provide services to underserved communities through projects that help transform them into healthy, thriving communities capable of addressing the environmental and public health challenges they have historically faced, as well as current and future challenges.

Sincerely,

Dr. PedroM. Torres-Morales
President
Comite Pro Desarrollo de Maunabo

April 5, 2023

Dr. Pedro Manuel Torres
Comite Prodesarrollo de Maunabo, Inc.
Maunabo, Puerto Rico

Cooperativa de Servisios Profesionales (COSPRO)

Receive a cordial greeting from all those who work in the Municipal Government of Maunabo and this server. The Municipality of Maunabo supports the project entitled: **Community Care for chronic illness through immersion in nature** (*iNature)* proposed by Comite Prodesarrollo de Maunabo Inc, (Comite) and Cooperativa de Servisios Profesionales (COSPRO) in the project The goals and objectives of increasing physical activities through immersion in nature to improve chronic illness in a underserved low income addresses historical environmental injustice. The major's office has in our strategic plan to improve public health. This 12-week program will have two-fold benefits 1) increase physical activities in citizens who have chronic illness and 2) increase the number of visitors using the Punta Tuna Reserve.

The major's office has worked closely with the COMITE providing logistical support to include school children and educators in the reserve educational and outreach activities. For the iNature project major's office will work with the iNature team to provide logical support such promote recruitment of participants in municipal offices and schools, facilitate a meeting with public health services providers of chronic illness in the municipality with the iNature team and participate in the advisory committee of the iNature project.

With the severe impacts of Hurricanes and COVID-19 pandemic and limited public funds available for recreation and sports in the municipality, the iNature project compliments the major efforts of increasing public health and welfare for our low-income underserved communities.

Sincerely,

Ángel Omar Lafuente Amaro
Major

El Municipio de Maunabo no discrimina de ninguna manera por razón de edad, raza, color, sexo, nacimiento, condición de veterano, deología política o religiosa, origen o condición social, orientación sexual o identidad de género, discapacidad o impedimento físico o mental; ni por ser víctima de violencia doméstica, agresión sexual o asecho.

Iglesia Metodista de Puerto Rico
"El Aposento Alto"
Reverenda Johanna González Reyes

April 10, 2023

Dr. Pedro M. Torres Morales
President
Comité Pro-Desarrollo de Maunabo, Inc,
Cooperativa de Servicios Profesionales (COSPRO)

I hereby certify that this servant, the Reverend Johanna González Reyes, senior pastor of the Methodist Church of PR "El Aposento Alto" Inc. de Maunabo, will join in collaboration with the Comité Pro-Desarrollo de Maunabo Inc, (COMITE) and Cooperativa de Servicios Profesionales (COSPRO) in the project entitled: Community care for chronic diseases through immersion in nature (iNature). My primary purpose will be as a counselor. I currently have a Master of Divinity (theological studies) and I am a doctoral student in Social Work with a specialization in administration of social programs and social policy.

The church that I pastor has a group of more than 60 people between the ages of 50 and 90; these people reside in the town of Maunabo. In addition, I am the coordinator of the Support Group for Caregivers and Relatives of Patients with Alzheimer's. One of the objectives of the church is to accompany the community in their life experiences seeking to obtain a full life within all the challenges they face daily, affirming God's love over all creation. Personally, as a community leader, I seek to affirm and support an integral health of the residents of Maunabo, which is aligned with the goals and objectives of this project.

Throughout the thirteen years that I have been residing in the town of Maunabo, I have supported various activities of the COMITE, contributing for the good of our communities. Therefore, I will partner with the COMITE on the iNature project to:

1. Promote the 12-week iNature project to Church members, Support Group participants, and the community at large.
2. Support meetings and outreach activities with iNature staff in the different areas in which I serve.
3. Support different activities as a counselor in said project.

Through this partnership, I will share experiences and feedback from those involved in the iNature project with staff to ensure the program meets the chronic disease needs of our community members. I totally support the project and I am confident that the participants will increase their physical activity within the Punta Tuna Reserve in the iNature project.

God bless you,

Rev. Johanna González Reyes- Senior Pastor

SALAS OUTSOURCING SOLUTIONS

March 30, 2023

President,

COOPERATIVA DE SERVICIOS PROFESIONALES (COSPRO)

Re: Partnership for iNature Project

SALAS OUTSOURCING SOLUTIONS, LLC will enter into a collaboration with the COOPERATIVA DE SERVICIOS PROFESIONALES (COSPRO), to provide support for the development and implementation of the project entitled: *Community Care program for chronic illness through immersion in nature (iNature) in the Muanabo municipality* The partnership between COSPRO and Comité Pro-Desarrollo De Maunabo, Inc. to create a 12 week Community Care iNature program in Puerto Rico provides an innovative approach to tackling public health through environmental justice. The goal of the project to provide opportunities to 160 participants to increase their physical activities is aligned to the preventative care and educational programs of SALUS. Today, sedentary lifestyle or physical inactivity is common in the Puerto Rican population. Especially when barriers such as no motivation, do not want to do it alone and do not have equipment are imposed that limit the possibility of being active. https://saluspr.com/actividad-fisica-en-adultos/.

SALUS is a network of clinics created to simplify health care in Puerto Rico. We provide various primary medical services with more than 20 specialists and dentists under one roof. By working in an integrated way, you have a single electronic medical record for your convenience. In addition, they have preventive care programs, diagnostic testing services, and integrated programs that allow you to receive several services on the same day. Salus provides accessibility and efficiency in medical care on the island Puerto Rico.

In the partnership SOS, LLC commits to

- provide all health care providers in our network in Puerto Rico recruitment, promotional and educational materials produce through the iNature project.
- Access to health care providers to give educational seminars/workshops in the 12-week iNature program.
- Participate as an advisory board member in the iNature project

Cordially,

Edward Munoz

Senior Provider Executive

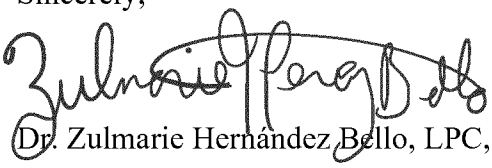
Mrach 27, 2023

President
Comite Prodesarrollo de Maunabo Inc,
Cooperativa de Servisios Profesionales (COSPRO)

Dr. Zulmarie Hernández Bello is delighted to partner Comité Prodesarrollo de Maunabo Inc, and Cooperativa de Servisios Profesionales (COSPRO) in the project entiled: ***COMMUNITY CARE FOR CHRONIC ILLNESS THROUGH IMMERSION IN NATURE*** (*iNaturaleza*). The goals and objectives of the project is aligned with our mission of providing patient care. In this role, Dr. Zulmarie Hernández Bello will:

1. Participate in planning meetings to develop a cultural relevant project for participants with chronic illness (obesity, diabetes, mental health, hypertension, heart disease).
2. Consultant in the development of educational resources to incorporate in the nature trails exercises that include wellness practices.
3. Consultant in development of workshops, seminars and talks for participants in mental health and holistic wellness e.g., (Endogrinoloy, Diabetes, Heart Disease or Obesity).
4. Refer patients and community with chronic illness to the iNaturaleza program.
5. Coordinate with Comité and COSPRO organize outreach activities in underserved, rural, and remote communities.



Dr. Zulmarie Hernández Bello is highly qualified to provide technical and outreach services to underserved, rural, and remote communities as we have been performing these services for over a dozen years (and our staff has been performing these types of services for much longer). Dr. Hernández holds a bachelor's degree in social work from the University of Puerto Rico, Río Piedras Campus. She completed a master's degree in social work with a specialty in Administration and Supervision from the Interamerican University Metropolitan Campus. She completed doctoral studies in Education with a concentration in Counseling from the Interamerican University Metropolitan Campus. At present, she holds the rank of Associate Professor at the Interamerican University Metro Campus. She has researched and published articles about the family in Puerto Rico, obstetric violence, gender violence, perinatal and child loss, old age, dyadic adjustment in the couple and compulsive sexual behavior in adults. Dr. Hernández is currently involved in a qualitative study with the University of North Texas on the effectiveness of services offered to children in communities after Hurricane Maria and other natural disasters. Currently, she serves as a collaborator and resource in a support group for families going through perinatal and child loss in the office of Dr. Roberto Burgos, Ob. Gyn., in Ponce Puerto Rico. She holds a certification in Child-Centered Play Therapy from the University

of North Texas at Dallas. Dr. Hernández has offered psychotherapy services in Caguas Puerto Rico and currently offers Play Therapy at Centro NOAC, Guayama.

Through this partnership, we will share best practices and experiences with working with underserved, rural, and remote communities to maximize the value of the technical assistance, training, and support/resources envisioned by this partnership, in addition, this partnership ensures an expeditious project start for technical assistance, training, and support resources as Dr. Zulmarie Hernández Bello already has an established framework for working in underserved, rural, and remote communities.

We fully support the project to ensure participants with chronic illness improve their health and wellbeing.

Sincerely,

Dr. Zulmarie Hernández Bello, LPC, MSW, CCPT

CENTRO EDUCATIVO SICO SOCIAL DE AYUDA, INC (CESSA)
PARROQUIA
SAN ISIDRO LABRADOR Y SANTA MARÍA DE LA CABEZA
MAUNABO, PUERTO RICO
Labrando en el límite...

April 10, 2023

President
Comité Pro Desarrollo de Maunabo, Inc.
Cooperativa de Servicios Profesionales (COSPRO)

The Centro Educativo Sico Social de Ayuda, Inc. (CESSA) of Maunabo will partner Comité Pro Desarrollo de Maunabo Inc, (COMITE) and Cooperativa de Servicios Profesionales (COSPRO) in the project entitled: Community care for chronic illness through immersion in nature (*iNature*). CESSA currently offers free social and psychological services to the community. Includes all ages. Our mission is to provide services that will promote positive changes on the participants self esteem to help them to value and improve their quality of life. The goals and objectives of the project is aligned with our mission of providing activities to persons within social and emotional conditions in the municipality of Maunabo. We have collaborated with the COMITE. We will form a partnership with the them in the iNature project to:

1. Promote the 12-week iNature project among participants of CESSA
2. Participate on meetings and outreach activities with iNature staff

Through this partnership, we will share experiences and feedback from persons that participate in the iNature project with staff to ensure the program meet the chronic illness needs to our community members. We fully support the project and look forward for our participants to increase their physical activity within the Reserve Punta Tuna in the iNature project.

Sincerely,

Paula Lebrón López, MSW, JD
Director of CESSA

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Clean and Healthy New York, Inc.

Address: 69 State St., Suite 1400C

City: Albany

State: NY: New York Zip Code: 12207-2546

B. Unique Entity Identifier (UEI): UXEQEJNU6J95

C. Applicant/Recipient Point of Contact

Name: Roberta Wilding

Phone: Ex. 6 - Personal Privacy (PP)

Email: bobbi@cleanhealthyny.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/a

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/a

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/a

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☒ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☐ Yes	☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

N/a

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

N/a

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Arbor Hill Development Corporation

Serving urban neighborhoods of Albany since 1981

US Environmental Protection Agency
Environmental Justice Collaborative Problem-solving Cooperative Agreement Program
Funding No: EPA-R-OEJECR-OCS-23-01

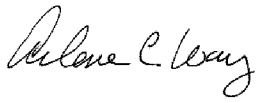
April 13, 2023

Dear Reviewer:

Arbor Hill Development Corporation, (AHDC), a non-profit, Neighborhood Preservation Company, is pleased to provide this letter of commitment as a partner in Clean and Healthy New York's (C+H) Clean Air and a Healthy Future for Albany, NY project under the US Environmental Protection Agency's Environmental Justice Collaborative Problem-solving Cooperative Agreement Program. We have worked closely with C+H to develop this proposal.

AHDC looks forward to engaging and empowering community members in the City of Albany's most disproportionately impacted neighborhoods to determine their priorities for environmental health and justice actions and to speak for themselves with elected officials, government agencies, businesses and other NGOs to address the most pressing environmental justice concerns, including air pollution, vehicle traffic, especially in and around the Port of Albany, bulk storage of diesel and other toxic chemicals in the Port and at surrounding businesses, the impact of rail and road traffic on people living in Ezra Prentice housing, and the potential removal of I-787 as an elevated highway.

We bring our experience doing community-driven advocacy and are prepared to do the same in service of the Clean Air and Healthy Future for Albany, NY project. Specifically, we will:



- Train an intergenerational corps of citizen scientists to collect data that supports the development of a geo-informed map and database. This tool will be available to community members in furtherance of Environmental Justice knowledge and advocacy campaigns.
- Attend and participate in Planning meetings and neighborhood forums.
- Recruit residents from Arbor Hill, North Albany, Sheridan Hollow, and West Hill to serve as neighborhood ambassadors on behalf of this initiative.
- Participate in the development and implementation of advocacy campaigns.

C+H has committed to entering into a partnership agreement for a subaward of $51,000 during the three-year grant period. We understand all work must be performed within those three years, without extension.

This project is an outgrowth of many years of work and the collaborative conversations facilitated under US EPA's award to C+H for their EVAAC Project (US EPA EJ Small Grants project).

We are confident that the proposed project will ensure greater cohesion among community members in Albany, greater visibility for the self-identified needs of those disproportionately harmed, and improvements being driven by these priorities being discussed and advanced by community members with elected officials, government agencies, businesses and industry in Albany, resulting in cleaner air and a healthier future for all.

Sincerely,

Arlene C. Way

RADIX
ECOLOGICAL SUSTAINABILITY CENTER

April 13, 2023

RE: US Environmental Protection Agency
Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program
Funding No. EPA-OEJECR-OCS-23-01

To Whom it May Concern:

We are pleased to provide this letter of commitment as a funded partner in **Clean and Healthy New York's Clean Air and a Healthy Future for Albany, NY** project under the US Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

The mission of the Radix Center is to promote equitable sustainability, ecological literacy, and environmental justice through education, advocacy, and the promotion of regenerative socio-ecological systems. The Radix Center gives children and adults a hands-on educational experience to understand the main environmental issues we face today, and the tools to work toward positive solutions. We cover air, health, food security, soil, and water pollution, renewable energy, waste reduction, composting, and organic food production based on demonstrations of sustainable practices. Our educational programs include Ecojustice Associates (EA), an afterschool and summer youth employment program for high school students. Through our program, high school students develop the knowledge, techniques, and advocacy tools needed to excel in STEM higher education while developing their resumes and earning money. We also have regular programming in the Albany City School District and assist with school gardens.

We launched the Albany South End Biocultural Diversity Forest project Fall 2021 and have planted 175 street trees, including many fruit and nut trees. Our work also centers around promoting food justice. We operate a one-acre urban farm and manage several neighborhood gardens for residents' use. We distribute produce from the gardens at the free food table by our entrance, at the South End Night Market, and to local food pantries. We have an X-Ray Fluorescence Spectrometer and offer free soil lead screenings to residents in Albany's environmental justice neighborhoods. We also operate the Community Compost Initiative (CCI), promoting composting through education, offering free compost drop-off, and running a curbside collection program that collects food scraps weekly from nearly 200 households and businesses via solar charged E-Bikes.

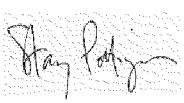
We have been partnering with AVillage for over 10 years on many endeavors to advance food and environmental justice in the South End. As part of the Ezra Prentice (EP) Community Health Program, we trained residents as outreach workers, conducted a survey of environmental concerns, health, and food access, and counted diesel vehicles. The preliminary results of these studies, showing elevated asthma and allergies, have focused public attention on the injustices at Ezra Prentice and spurred air quality studies from NYS Department of Environmental Conversation (DEC).

This summer we will begin collecting data for the Urban Heat Island Effect and the Impact of Tree Cover Study in collaboration with the City of Albany's Office of Sustainability. We will be collecting meteorological data from streets with varying tree cover in Albany's South End, with comparison sites in more affluent neighborhoods and outside of the city. We have also received funding from the NYS Department of Environmental Conversation to

RADIX
ECOLOGICAL SUSTAINABILITY CENTER

install air quality monitors at study locations and will be reporting back results to the community. Our Executive Director, Stacy Pettigrew, PhD, MS, has been selected to be the co-convener of the regional Community Advisory Committee for the DEC's Community Air Monitoring Program.

The Clean Air and Healthy Future for Albany project brings together a broad coalition of stakeholders, each of which have ongoing, longstanding, environmental justice projects, in the underserved communities identified as the targets of this project: the neighborhoods of South End, Mt. Hope, Sheridan Hollow, West Hill, Arbor Hill, North Albany, Downtown, Second Ave. in Albany, NY. Specific issues of concern include road traffic in and around the Port of Albany and I-787, train transport of toxic petrochemicals as well as their storage in the community, air pollution and other environmental hazards at the Ezra Prentice public housing community, indoor air pollution sources including combustion for heat and cooking, lead poisoning, and the heat island effect in the city.



This project will expand, strengthen, integrate, and secure additional resources to sustain already existing and effective community-led environmental justice projects, and to identify priorities for government action and work with agencies and officials to implement them. This coalition will use integrative design as a community-led design approach and methodology to launch a neighborhood "greening" project, expand the Innovation Blocks community organizing program, and facilitate effective collaborative problem-solving to address social systems challenges. We have played an active role in the development of this proposed project.

Clean and Healthy New York has committed to granting a subaward of $60,000 over the no-extension three year grant period. We commit to:

- On-going participation in program planning and implementation coalition meetings, as well as community meetings, throughout the entire program period
- Environmental Educators consultation and support of Block Ambassadors in greening projects
- Lead soil screening via XRF Spectrometer and results consultation for residents in the target neighborhoods
- Assistance developing, administering, and analyzing community survey instruments
- Participate in the development of the Community Environmental Justice Agenda
- Lead the Health Impact Assessment

I am proud to be part of the Clean Air and Healthy Future for Albany coalition and believe this project will connect neighborhoods and build environmentally resilient communities that promote clean air and healthy futures in Albany, NY.

Yours truly,

Stacy Pettigrew, PhD, MS
Executive Director

To whom it may concern:

The Capital Area Urban League Inc. (CAUL), a non-profit organization, is pleased to provide this letter of commitment as a partner in Clean and Healthy New York's (C+H) Clean Air and a Healthy Future for Albany, NY project under the US Environmental Protection Agency's Environmental Justice Collaborative Problem-solving Cooperative Agreement Program. We have worked closely with C+H to develop this proposal.

CAUL looks forward to engaging and empowering community members in the City of Albany's most disproportionately impacted neighborhoods to determine their priorities for environmental health and justice actions and to speak for themselves with elected officials, government agencies, businesses and other NGOs to address the most pressing environmental justice concerns, including air pollution, vehicle traffic, especially in and around the Port of Albany, bulk storage of diesel and other toxic chemicals in the Port and at surrounding businesses, the impact of rail and road traffic on people living in Ezra Prentice housing, and the potential removal of I-787 as an elevated highway.

We bring our experience as practitioners of participatory action research (PAR) and integrative design. We are relationship brokers in the community and are prepared to bring this knowledge, skills, and abilities for training and technical support in service of the Clean Air and Healthy Future for Albany, NY project. Specifically, we will:

- Design a train the trainer to train block ambassadors of AVillage's Innovation Blocks program as community organizers
- Solicit and facilitate the development of corporate and other stakeholder relationships to identify and secure additional funding and resources for long-term project sustainability and further project development
- Organize and facilitate the design of charrettes (based on participatory action research and integrative design methodologies) for stakeholder engagement and for identifying and planning the execution of community-led solutions

C+H has committed to entering into a partnership agreement for a subaward of $52,000 during the three year grant period. We understand all work must be performed within those three years, without extension.

This project is an outgrowth of many years of work and the collaborative conversations facilitated under US EPA's award to C+H for their EVAAC Project (US EPA EJ Small Grants project).

USEPA Region 2

Re: Clean Air and a Healthy Future for Albany, NY

Dear Ms. Frazier:

The Capital District Transportation Committee (CDTC), the designated Metropolitan Planning Organization for New York's Capital Region, is pleased to offer our support for the application by Clean+Healthy NY, Inc. for funding through the USEPA's Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program for its Clean Air and a Healthy Future for Albany, NY project. The proposed project is consistent with the strategies of the Capital Region metropolitan transportation plan, known as New Visions 2050, which includes a set of principles, strategies, and budgetary priorities that guide regional investment in the next-generation transportation system.

CDTC's approach to transportation planning is comprehensive and holistic – a structured balance between actions that reduce congestion and improve safety, provide equitable access to transportation choices like transit, walking, or bicycling, and support economic development efforts. The plan is developed collaboratively with communities throughout the Region and with other local, state, and federal agencies.

CDTC stands ready to support Clean+Healthy NY, Inc. on the execution of this project. If you need any additional information, do not hesitate to contact me at smisiewicz@cdtcmpo.org or Ex. 6 - Personal Privacy (PP)

Sincerely,

Sandra Misiewicz, AICP

ALBANY COLLEGE OF PHARMACY
AND HEALTH SCIENCES

April 13, 2023

RE: US Environmental Protection Agency
Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program
Funding No. EPA-OEJECR-OCS-23-01

To Whom it May Concern:

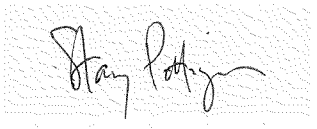
As a faculty member of the Population Health Sciences Department at the Albany College of Pharmacy, I offer my commitment as an unfunded partner in **Clean and Healthy New York's Clean Air and a Healthy Future for Albany, NY** project under the US Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

The Clean Air and Healthy Future for Albany project brings together a broad coalition of stakeholders, each of which have ongoing, longstanding, environmental justice projects, in the underserved communities identified as the targets of this project: the neighborhoods of South End, Mt. Hope, Sheridan Hollow, West Hill, Arbor Hill, North Albany, Downtown, Second Ave. in Albany, NY. Specific issues of concern include road traffic in and around the Port of Albany and I-787, train transport of toxic petrochemicals as well as their storage in the community, air pollution and other environmental hazards at the Ezra Prentice public housing community, indoor air pollution sources including combustion for heat and cooking, lead poisoning, and the heat island effect in the city. This project will expand, strengthen, integrate, and secure additional resources to sustain already existing and effective community-led environmental justice projects, and to identify priorities for government action and work with agencies and officials to implement them. This coalition will use integrative design as a community-led design approach and methodology to launch a neighborhood "greening" project, expand the Innovation Blocks community organizing program, and facilitate effective collaborative problem-solving to address social systems challenges. I have played an active role in the development of this proposed project.

I earned an MS in Epidemiology and a PhD in Environmental Health Sciences from the University at Albany School of Public Health. I have a long record of community engagement and facilitation of academic-community partnerships. I am the Principal Investigator on the South End Community Health Study, which was part of the Ezra Prentice (EP) Community Health Program, an academic-community collaboration with the community advocacy organization AVillage and the Radix Ecological Sustainability Center, which I co-founded. We trained residents as outreach workers, conducted a survey of environmental concerns, health, and food access, and counted diesel vehicles. The preliminary results of these studies, showing elevated asthma and allergies, have focused public attention on the injustices at Ezra Prentice and spurred air quality studies from NYS Department of Environmental Conversation (DEC). I presented results at the International Society for Environmental Epidemiology's Annual Conference and have a manuscript under preparation.

I am also leading the Urban Heat Island Effect and the Impact of Tree Cover Study in collaboration with the City of Albany's Office of Sustainability and the Radix Center. We will be collecting meteorological data from streets with varying tree cover in Albany's South End, with comparison sites in more affluent neighborhoods and outside of the city. We have also received funding from the NYS Department of

Environmental Conversation to install air quality monitors at study locations and will be reporting back results to the community. I am also the co-convener of the regional Community Advisory Committee for the DEC's Community Air Monitoring Program.



In addition to Environmental Health Science, Topics in Environmental and Climate Justice, Statistics for Public Health, and Determinants of Health, I teach the Service Learning in Public Health class, in which students are required to complete 40 hours of community service over the semester. I look forward to involving students to assist neighbors with their block greening projects, as well as the collection and analysis of data for community surveys and the Health Impact Assessment.

I commit to:

- On-going participation in program planning and implementation coalition meetings, as well as community meetings, throughout the entire program period
- Assistance developing, administering, and analyzing community survey instruments
- Participate in the development of the Community Environmental Justice Agenda
- Lead the Health Impact Assessment

I am proud to be part of the Clean Air and Healthy Future for Albany coalition and believe this project will connect neighborhoods and build environmentally resilient communities that promote clean air and healthy futures in Albany, NY.

Sincerely,

Stacy Pettigrew, PhD, MS

LEAGUE OF WOMEN VOTERS®
OF ALBANY COUNTY

US Environmental Protection Agency
Environmental Justice Collaborative Problem-solving Cooperative Agreement Program

Funding No: EPA-R-OEJECR-OCS-23-01

April 13, 2023

To whom it may concern:

The League of Women Voters of Albany County (LWVAC), a grassroots non-partisan, non-profit organization committed to diversity, equity and inclusion, is pleased to provide this letter of commitment as a partner in Clean and Healthy New York's (C+H) Clean Air and a Healthy Future for Albany, NY project under the US Environmental Protection Agency's Environmental Justice Collaborative Problem-solving Cooperative Agreement Program.

We have worked closely with C+H to develop this proposal as well as on the lead up steps to this project. The LWVAC looks forward to engaging and empowering community members in the City of Albany's most disproportionately impacted neighborhoods to identify their priorities for environmental health and justice action and speak for themselves with elected officials, government agencies, businesses, and NGOs. Promoting this skill-building is intended for use in addressing pressing environmental justice concerns. These concerns include air pollution, vehicle traffic, especially in and around the Port of Albany, bulk storage of diesel and other toxic chemicals in the Port and at surrounding businesses, the impact of rail and road traffic on people living in Ezra Prentice housing, the potential removal of I-787 as an elevated highway, and the absence of green spaces to mitigate the effects of climate change.

The LWVAC has a 100+ year track record as an organization with the mission of working to protect and expand voting rights and ensure everyone is represented in our democracy. Our organization aims to empower voters and defend democracy through advocacy, and education at the local, state, and national levels of government. We bring a strong history and wide experience in advocacy to this project. LWV routinely publishes position papers to guide the grassroots membership in taking action on issues facing our country, our state, and our communities, as well as joins sign-on letters, sends letters to industries and individuals, and aids in organizing to make community voices heard. Examples from the environmental front include:

- LWVUS urges the EPA to take additional measures to reduce methane air pollution from the oil and gas industry, via a 2/13/2023 letter to EPA Administrator, Michael S. Regan.
- LWVNYS adopted a Climate Emergency Resolution in 2021, calling upon the LWVNYS Board and local Leagues to urge the State and local governments to adopt and publicize "Declarations of Climate Emergency."
- LWVAC co-authored a Four County League "Position on Waste" in 2022 which outlines our commitment both to environmental stewardship and environmental justice.
- LWVAC locally advocated for passing the Clean Water, Clean Air, and Green Jobs Bond Act of 2022 (Prop 1).

The LWVAC is prepared to share in providing the needed education and advocacy training in service of the Clean Air and Healthy Future for Albany, NY project. Specifically, we will:

- Support empowerment through the development of advocacy skills of the Block Ambassadors via Train-the-Trainer Program and implement with partners (some of whom may be outside of this proposal).
- Assist in coordinating and conducting community meetings for the capacity-building of residents to fully advocate for themselves, and in partnership with other entities, to plan visits and engage with legislators and other decision makers in all levels of government.
- Promote the advancement of environmental justice and civil rights, and work to complement the organizing strategies and training being provided to community leaders and residents by other community based organizations; we will highlight the need for voter participation and the methods to do so, in various settings including community meetings and tabling events.

C+H has committed to entering into a partnership agreement with LWVAC for a subaward of $3,500 during the three-year grant period. We understand all work must be performed within those three years, without extension. This project is an outgrowth of many years of work and the collaborative conversations facilitated under US EPA's award to C+H for their EVAAC Project (US EPA EJ Small Grants project).

We are confident that the proposed project will ensure greater cohesion among community members in Albany, greater visibility for the self-identified needs of those disproportionately harmed, and improvements being driven by these priorities being advanced by community members via discussions and advocacy with elected officials, government agencies, businesses and industry in Albany, resulting in cleaner air and a healthier future for all of Albany's residents.

Sincerely,

MaryKate Owens

To whom it may concern:

The African American Clergy United for Empowerment, a non-profit organization, is please to provide this letter of commitment as a partner in Clean and Healthy New York's (C+H) Clean Air and a Healthy Future for Albany, NY project under the US Environmental Protection Agency's Environmental Justice Collaborative Problem-solving Cooperative Agreement Program.

The African American Clergy United for Empowerment looks forward to engaging and empowering community members in the City of Albany's most disproportionately impacted neighborhoods to determine their priorities for environmental health and justice actions and to speak for themselves with elected officials, government agencies, businesses and other NGOs to address the most pressing environmental justice concerns, including air pollution, vehicle traffic, especially in and around the Port of Albany, bulk storage of diesel and other toxic chemicals in the Port and at surrounding businesses, the impact of rail and road traffic on people living in Ezra Prentice housing, and the potential removal of I-787 as an elevated highway.

Our organization brings together African American clergy from across Albany and we look forward to participating in regular project meetings and promoting public activities, including town halls, surveys, and public meetings to our congregations in service of the Clean Air and Healthy Future for Albany, NY project.

This project is an outgrowth of many years of work and the collaborative conversations facilitated under US EPA's award to C+H for their EVAAC Project (US EPA EJ Small Grants project).

We are confident that the proposed project will ensure greater cohesion among community members in Albany, greater visibility for the self-identified needs of those disproportionately harmed, and improvements being driven by these priorities being discussed and advanced by community members with elected officials, government agencies, businesses and industry in Albany, resulting in cleaner air and a healthier future for all.

Sincerely,

Rev. McKinley Johnson Sr.

US Environmental Protection Agency
Environmental Justice Collaborative Problem-solving Cooperative Agreement Program
Funding No: EPA-R-OEJECR-OCS-23-01

To whom it may concern:

The Albany NAACP, a non-profit Civil Rights Organization, is pleased to provide this letter of commitment as a partner in Clean and Healthy New York's (C+H) Clean Air and a Healthy Future for Albany, NY project under the US Environmental Protection Agency's Environmental Justice Collaborative Problem-solving Cooperative Agreement Program. We have worked closely with C+H to develop this proposal.

The NAACP organization looks forward to engaging and empowering community members in the City of Albany's most disproportionately impacted neighborhoods to determine their priorities for environmental health and justice actions and to speak for themselves with elected officials, government agencies, businesses and other NGOs to address the most pressing environmental justice concerns, including air pollution, vehicle traffic, especially in and around the Port of Albany, bulk storage of diesel and other toxic chemicals in the Port and at surrounding businesses, the impact of rail and road traffic on people living in Ezra Prentice housing, and the potential removal of I-787 as an elevated highway.

We bring our experience fighting to ensure the civil and human rights of black, brown, and marginalized communities are protected and are prepared to do the same in service of the Clean Air and Healthy Future for Albany, NY project. Specifically, we will:

- Participate in planning meetings and townhall forums.
- Engage in the development and implementation of advocacy campaigns.
- Meet with media and political leaders in furtherance of the effort.
- Keep NYS NAACP Leadership informed, and
- Facilitate litigation, when necessary.

This project is an outgrowth of many years of work and the collaborative conversations facilitated under US EPA's award to C+H for their EVAAC Project (US EPA EJ Small Grants project).

We are confident that the proposed project will ensure greater cohesion among community members in Albany, greater visibility for the self-identified needs of those disproportionately harmed, and improvements being driven by these priorities being discussed and advanced by community members with elected officials, government agencies, businesses, and industry in Albany, resulting in cleaner air and a healthier future for all.

Sincerely,

D Brown-Johnson

Qualifications

Strong public speaker, writer, and organizer. Recognized national leader. Proven policy advocate. Effective coordinator and facilitator of projects, campaigns and collaborations. Experienced fundraiser, both through private foundations and individual donors. Technically proficient with word processing, spreadsheets and databases, bookkeeping, basic HTML design, graphic design and layout, including using Microsoft Office Professional suite, Open Office, GIMP, Canva, Intuit Quickbooks, basic ESRI mapping, Adobe products.

Professional Experience

Clean and Healthy New York, Inc., formerly Clean New York (2006-present)

Executive Director (2021 - present): Responsibilities include overseeing the organization, creating and implementing annual work and fundraising plans, staff management, liaising with the Board of Directors as well as program responsibilities. These include guiding the production of the national Building Healthy Futures Summit and ongoing related work, directing the national Getting Ready for Baby campaign, serving on numerous advisory boards, providing thought leadership on coalition campaigns for Lead Free Kids New York and the JustGreen Partnership.

Deputy Director (2010 - 2020): Worked with the Executive Director to craft and implement campaign and fundraising plans, served as Chief Financial Officer to the Board of Directors, represented the organization to the media, funders, allies and policy makers, assisted Executive Director in directing staff, and served as a national leader within a variety of collaborative efforts. Directed the national Getting Ready for Baby campaign and Reducing Toxics in Child Care program, conducted product screening and reported results in county and statewide reports, designed CHNY materials. Wrote and co-wrote numerous reports, including *New York State's Environmental Health Leadership: A Roadmap to a Nontoxic, Just, Sustainable Circular Economy*.

Organizing Director (2006 - 2012): Responsibilities include joint organizing for Clean New York campaigns, building a base of organizations across New York State, financial management and fundraising. Provide leadership through state and national collaborative. Supported legislative advocacy campaigns on e-waste, BPA, lead, and flame retardants at the county and state levels. Co-authored national biomonitoring report, *Is It In Us? Chemical Contamination of Our Bodies: Toxic Trespass, Regulatory Failure and Opportunities for Action* (www.IsItInUs.org) and co-coordinating Physicians for Social Responsibility's national Health Care Professional Biomonitoring Project, *Hazardous Chemicals in Health Care: A Snapshot of Chemicals in Doctors and Nurses*.

Citizens' Environment Coalition (1998 - 2006)

Associate Director (2002- 2006): Responsible for budget and cashflow development and oversight, fundraising, and leadership of the Community Environmental Hazards Project and advocacy campaigns. Researched and authored *Environmental Racism in New York State*, co-wrote *Building Green without Going in the Red: a Guide to Healthy, Affordable Building Materials*, created ecothreatny.org.

Program Associate (2001-2002): Responsible for Community Environmental Hazards Advocacy Project (GIS mapping) and the NYC Health Care Without Harm campaign. Fundraising and program support.

Health Care Without Harm Associate (1999-2000): Conducted monthly NYC coalition meetings, liaison to national campaign. Wrote *Environmentally Safe Hospitals* for waste managers and purchasers.

Intern (1998-1999): Organized 90-person conference at Beth Israel Medical Center on environmentally safer hospital waste management and purchasing practices.

Field Manager (1998): Responsible for nightly Community Outreach staff and financial management.

New York Public Interest Research Group (1997-1998)

Project Coordinator, State University of New York at Albany (1997–1998): Organize students on priority projects. Staff office on University campus. Coordinate with state NYPIRG staff.

Field Manager: Responsible for nightly Community Outreach staff and financial management.

Public Interest Research Group in Michigan (1996)

Field Manager: Responsible for nightly Community Outreach staff and financial management.

Dear Taxpayer:

This is in response to your Aug. 29, 2014, request for information regarding your tax-exempt status.

Our records indicate that you were recognized as exempt under section 501(c)(3) of the Internal Revenue Code in a determination letter issued in December 2011.

Our records also indicate that you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Please refer to our website www.irs.gov/eo for information regarding filing requirements. Specifically, section 6033(j) of the Code provides that failure to file an annual information return for three consecutive years results in revocation of tax-exempt status as of the filing due date of the third return for organizations required to file. We will publish a list of organizations whose tax-exempt status was revoked under section 6033(j) of the Code on our website beginning in early 2011.

1.0 Program Objectives *A. Project Summary Page*

Project Title: Clean Air and a Healthy Future for Albany

Project Location: In Albany, NY: South End, Mt. Hope, Sheridan Hollow, West Hill, Arbor Hill, North Albany, Downtown, Second Ave. Zip codes include: 12202, 12204, 12206, 12207, 12210.

Applicant Information: Clean and Healthy New York, Inc. | Bobbi Wilding, Executive Director | 69 State St. Suite 1400C, Albany, NY 12207 | Cell: Ex. 6 - Personal Privacy (PP) | bobbi@chny.org | chny.org

Description of Applicant Organization: Clean and Healthy New York (C+H) advocates for a just and healthy society where toxic chemicals are unthinkable. Our work changes laws, shifts markets, and empowers people. C+H provides thought leadership nationwide; coordinates coalitions; and authors reports. We work with Albany-based groups to advance Clean Air and a Healthy Future for our community. **Applying for Small CBO Set Aside Track:** No

Project Abstract:
The Clean Air and Healthy Future for Albany project brings together a broad coalition of stakeholders, each of which have ongoing, longstanding, environmental justice (EJ) projects in the underserved communities targeted in this project: Albany's South End, Mt. Hope, Sheridan Hollow, West Hill, Arbor Hill, North Albany, Downtown, and Second Avenue neighborhoods. Specific issues of concern include road traffic in and around the Port of Albany and I-787, train transport and storage of toxic petrochemicals, air pollution from combustion for heat and cooking and stationary sources, concerns at Ezra Prentice housing, lead poisoning, and urban heat islands. This project will expand, strengthen, integrate, and secure additional resources to sustain already existing and effective community-led EJ projects, and identify priorities for government action and engagement with agencies and officials. We will use integrative design as a community-led design approach to launch a neighborhood "greening" project, expand the Innovation Blocks community organizing program, and facilitate effective collaborative problem-solving to address social systems challenges. We will produce a survey, conduct outreach to community members, and organize public meetings to produce a Community EJ Agenda, and empower residents to speak about their needs with local, regional, state and federal officials, during public comment periods and through town halls that our coalition will organize to facilitate dialog. Through government partners, we will help ensure that future funding efforts successfully address the primary concerns identified and articulated by the community. This coalition will connect neighborhoods and build environmentally resilient communities that promote clean air and healthy futures in Albany, NY.

Project type(s): public education, leadership development, engagement with governments.

Special Considerations: Health Impact Assessment re: I-787. Climate Resiliency.

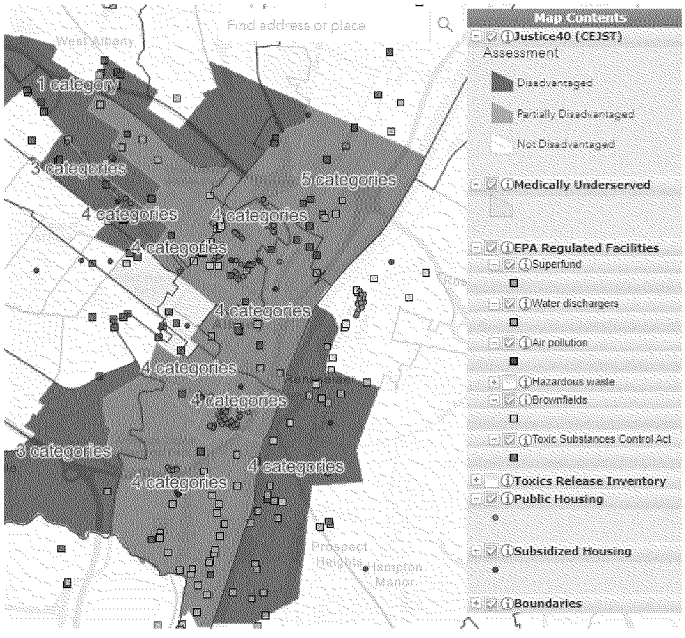
Environmental Issues: Air pollution, climate impact mitigation, toxic chemical storage and transport, indoor air quality and toxics

Project Partners: Albany County League of Women Voters, Albany NAACP, AVillage Inc., Arbor Hill Development Corp., Capital Area Urban League, Capital District Transportation Committee, City of Albany Sustainability Office, Radix Center, The Albany African American Clergy United For Empowerment

QAPP Required? We don't believe so; survey results will be used for educational purposes only.

ED_016126_00000764-00001

B. Environmental and Public Health Information of the Underserved Community



This project will serve the neighborhoods in Albany, NY along the I-787 corridor which have been identified as being "disadvantaged communities" by CEQ in four or more categories. This includes parts of Albany, NY: South End, Mt. Hope, Sheridan Hollow, West Hill, Arbor Hill, North Albany, Downtown, and Second Avenue, primarily the corridor along I-787. Zip codes include (all and partial): 12202, 12204, 12206, 12207, 12210.

The people who live in these communities are predominantly Black, Indigenous and other People of Color, and/or low income, with life expectancies 7-8 years lower than the state average, and significantly lower than surrounding communities.

The following tracts are identified on the EJScreen as disadvantaged for the purposes of Justice 40 in four areas - health, housing, legacy pollution, and workforce development: 36001000200, 36001000600, 36001000700, 36001000800, 36001001100,36001002300, 36001002500, and 36001002600. Tract 36001000100 is identified for these four, as well as for transportation impacts.

At the same time, these neighborhoods are also predominantly medically underserved, and are home to much of the city's public and subsidized housing. Because of the age of many of the buildings, lead poisoning remains a serious concern. As this part of the City of Albany is close to the Hudson River, portions of this area are within the 100 year flood plain, a concern that will increase due to climate change. The areas described are urban, with significant portions covered in nonporous surfaces. As climate change increases, without intervention, the urban heat island effect already experienced is likely to increase.

The South End of Albany was designated a potential environmental justice area by DEC in 2003. The neighborhood is also identified as a Disadvantaged Community by the NYS Climate Justice Working Group. Home to roughly 8300 residents, the South End is a majority Black, historically redlined neighborhood with a $27,750 median household income (2019 American Communities Survey). 32% of households live below the poverty line. The southern

tip of Albany is an industrial area that includes the Port of Albany, state Route 32, and interstate highways I-787 and I-87. In response to community concerns, the DEC conducted extensive air quality monitoring at Ezra Prentice Homes, a public housing complex located on the southern border of the neighborhood. The study observed elevated levels of Traffic Related Air Pollution along Route 32 at Ezra Prentice and elevated levels of benzene at the Albany County Health Department's monitor, located next to the neighborhood's public elementary school.

In addition to air pollutants, the neighborhood qualifies as a food desert by USDA criteria due to the absence of grocery stores and transportation opportunities. While a legacy of redlining has resulted in general disinvestment, it can also be seen in decreased tree cover and greenspace compared to more affluent neighborhoods, which result in elevated temperatures.

In the northern part of our geographic range, Arbor Hill Development Corporation (AHDC) serves an estimated population of 24,388 residents approximately 26% of whom are under the age of 18 and 14 % are seniors, age 62 or older. 71.8 % are persons of color. The median income for the service area is $29,993 with an unemployment rate as follows for the neighborhoods: Arbor Hill (10.10%), North Albany (10%), Sheridan Hollow (18%), West End (14%), and West Hill (16%). 52% of the service area pays 35% and more of the gross household income for rent.

Environmental Hazards in AHDC Service Area include: brownfields and hazardous waste sites including former auto repair, metal plating, printing, dry cleaning facilities, the former ANSWERS plant which still burns natural gas to power the State campus, and old manufactured gas plant. Active facilities include Davies Office which holds a permit to release solvents and carcinogens into the air, and Surpass Chemical Co, which stores chlorine gas onsite, and is required to have an emergency plan under the Emergency Planning Community RIght-to-Know Act.

Due to the age of its buildings, the Arbor Hill community has a very high amount of lead paint in its housing stock, which can cause developmental and respiratory problems, discomfort, and irritability. Highways and major roads I-90, I-787, US Hwy 9, and major roads like State Route 85, Washington Ave., Clinton Ave. and Central Ave., bring very high levels of traffic through and around Arbor Hill, resulting in some of the highest levels of diesel particulates nationally. This results in community members having worse than average respiratory health problems according to the EPA's National Air Toxics Assessment. Air quality in areas near major roads increases the likelihood of asthma attacks, impaired lung function, dementia, cardiovascular disease and cardiovascular morbidity.

Residents of the South End bear a disproportionate share of health issues, compared even with the other demographically similar neighborhoods in our focus. The NYS Department of Health (2019) observed significantly greater hospitalization rates for asthma, chronic obstructive pulmonary disease, acute bronchitis, and hypertension in the South End compared to Albany's Arbor Hill/West Hill, a demographically similar neighborhood. Children's emergency department visits for asthma were also higher. A community-academic collaboration conducted a health study in 2016-2019, observing elevated asthma rates at South End public housing complexes Ezra Prentice Homes (34%) and Creighton Storey Homes (21%).

ED_016126_00000764-00003

As stated in the 2019 Capital Region Community Health Needs Assessment, compared to the Capital Region (CR) as a whole, South End (SE) residents have elevated hospitalization rates (CR:SE per 10,000 residents) for asthma (11.3:78.1), congestive heart failure (18.6:68.8), coronary heart disease (21.5 : 31.2) heart attack (13.0:18.6) chronic lower respiratory disease (23.0:116.2) any diagnosis of diabetes (169:568.6), primary diagnosis of diabetes (11.1:43.8); and rates of emergency department visits for asthma (44.5:251.1), chronic lower respiratory disease/chronic obstructive pulmonary disease (66.2:324.0).

Environmental and Public Health Issues Addressed by the Project

This project will help address a number of environmental health and justice concerns, including road traffic in and around the Port of Albany and I-787 including the potential removal of I-787 as an elevated highway, air pollution and other environmental hazards at the Ezra Prentice public housing community, indoor air pollution sources including combustion for heat and cooking, train transport of toxic petrochemicals as well as their storage in the community, lead poisoning, and the heat island effect in the city. It addresses public health concerns including respiratory, cardiac, and neurological impacts from indoor and outdoor pollution and stress.

Results Achieved by the Project and Community Benefits

This project's goals are to improve community health and longevity (including respiratory and heart health) through community education and empowerment, building ongoing collaborative problem solving among stakeholders, centering the voices and needs of disproportionately impacted residents.

Our objectives are as follows:

1) Use one-on-one outreach, meetings, surveys and other tools to develop a Community Environmental Justice Agenda that reflects the needs and priorities of the disproportionately impacted communities of Albany.
2) Build community capacity for leadership and engagement in public processes
3) Improve community health by connecting and leveraging the many projects already underway by partners and others in the City of Albany
4) Increase community capacity to engage and respond to environmental justice concerns as they arise, particularly as pertains to Climate Change disaster responsiveness.
5) Increase coordination among stakeholders through regular meetings and a website hub.

The community will benefit from this project in numerous ways. Albany-based organizations are often either focused on addressing state policy, due to Albany's position as the State's capital, or on specific neighborhoods. There are many important projects underway to address environmental and social justice, but many lost ground during the Covid-19 pandemic, and others continue, but could be stronger through interconnection with other similar or related projects. Our collaboration will foster increased community dialog, clarify and amplify community EJ priorities, increase capacity for neighborhoods and residents to engage in public comment periods, and respond to emerging issues, including emergencies driven by climate change. Over time, aligning government and business actions to the Community EJ Agenda will reduce diseases driven by air pollution and heat.

Special Considerations

Health Impact Assessment of taking down I-787: Building on this collaborative outreach process, academic partners will lead a Health Impact Assessment of the state-funded removal plans for Interstate 787, and the impact of various methods and final results on the adjacent disproportionately impacted neighborhoods, with the goal of driving benefits first to those communities while minimizing negative impacts from possible increased traffic on residential streets or increased air pollution (lead from paint, asbestos from worn brakes, silica from concrete) created by a demolition process.

Further, as we build the capacity of community members to be aware of and engaged in environmental efforts in the city, we will create capacity to respond and address impacts created by climate change, increasing the community's capacity to respond to and prepare for climate change-driven disasters.

C. Organization's Historical Connection to Underserved Community

Clean+Healthy (C+H)

Clean and Healthy New York (C+H) has maintained offices in the community area for the past 12 years. We have partnered with Arbor Hill Development Corporation to create online community mapping of environmental issues of community concern, via a grant from the NYS DEC's Environmental Justice program. We are currently working with Capital Area Urban League and many other partners in this grant proposal to engage the community around issues of air pollution (through funding from US EPA) and broader considerations of what makes a "healthy future" for these neighborhoods (through funding from NYS Pollution Prevention Institute). We have tabled at community events, and supported residents in Ezra Prentice public housing. AVillage was a regular participant in JustGreen Advocacy Days in 2014-15. Before their dissolution, we worked with Arbor Hill Environmental Justice Corporation.

Clarifying our longstanding connection to community organizations, in early 2021, C+H approved a strategic plan that prioritizes centering the needs and voices of Black, Indigenous, and other People of Color, and this led us to seek to deepen our support for the community in which we are based. With funding from the US EPA, we have met with neighborhood associations, clergy, community groups, government agencies and more to discuss air pollution concerns. The outcome of those ongoing conversations informs this proposal. As you will see from the organizations submitting letters of commitment, and the structure of this project's budget, this project ensures resources flow to the on-the-ground community organizations and community identified needs.

AVillage

AVillage Inc. is a community Advocacy organization whose vision is a just community where empowered people have equitable access to opportunities and resources. We identify inequities and confront their root causes by galvanizing the community and leveraging resources to create transformational change in Albany's South End. We prioritize marginalized voices. We fight systemic racism and oppression. We deliver strategic solutions. We are stronger together. AVillage hosts summertime South End Night Markets to bring locally sourced produce to community members and to support local entrepreneurs at the Radix Center, organizes Block

ED_016126_00000764-00005

Ambassadors to engage community members on an array of relevant topics, and supports advocacy to improve conditions for the residents of Ezra Prentice public housing.

Radix Center

The mission of the Radix Center is to promote equitable sustainability, ecological literacy, and environmental justice through education, advocacy, and the promotion of regenerative socio-ecological systems. The Radix Center gives children and adults hands-on educational experiences to understand the main environmental issues we face today, and the tools to work toward positive solutions. We cover air, health, food security, soil, and water pollution, renewable energy, waste reduction, composting, and organic food production based on demonstrations of sustainable practices. Our educational programs include Ecojustice Associates (EA), an afterschool and summer high school student employment program. Our EA high school students develop the knowledge, techniques, and advocacy tools needed to excel in STEM higher education while developing their resumes and earning money. We also have regular programming in the Albany City School District and assist with school gardens.

We launched the Albany South End Biocultural Diversity Forest project Fall 2021 and have planted 175 street trees, including many fruit and nut trees. We operate a one-acre urban farm and manage several neighborhood gardens for residents' use. We have an X-Ray Fluorescence Spectrometer and offer residents free soil lead screenings. We also operate the Community Compost Initiative (CCI), promoting composting through education, offering free compost drop-off, and running a curbside collection program that collects food scraps weekly from nearly 200 households and businesses via solar charged E-Bikes.

We have partnered frequently with AVillage for over 10 years to advance environmental and food justice in the South End. As part of the Ezra Prentice (EP) Community Health Program, we trained residents as outreach workers, conducted a survey of environmental concerns, health, and food access, and counted diesel vehicles. The preliminary results of these studies, showing elevated asthma and allergies, have focused public attention on the injustices at Ezra Prentice and spurred air quality studies from NYS Department of Environmental Conservation (DEC).

This summer we will begin collecting data for the Urban Heat Island Effect and the Impact of Tree Cover Study in collaboration with the City of Albany's Office of Sustainability and Albany College of Pharmacy and Health Sciences. We will be collecting meteorological data from streets with varying tree cover in Albany's South End, with comparison sites in more affluent neighborhoods and outside of the city. We have also received funding fromDEC to install air quality monitors at study locations and will be reporting back results to the community. Our Executive Director, Stacy Pettigrew, PhD, MS, has been selected to be the co-convener of the regional Community Advisory Committee for the DEC's Community Air Monitoring Program.

Capital Area Urban League

The Capital Area Urban League (CAUL) is a civic engagement and policy advocacy organization that connects communities across five-counties in NY's capital area. CAUL works to ensure that African Americans, Hispanics and other disenfranchised citizens can secure economic self-reliance, parity, power and civil rights. Environmental hazards disproportionately threaten the health and wellbeing of BIPOC communities and CAUL's environmental justice work aims to

ensure that everyone has equal access, can fully participate in the decision-making process for a healthy environment, and is equally protected from environmental and health hazards regardless of race, color, national origin, or income. CAUL's current collaborative work is with Clean + Healthy NY to organize community conversations and engage underserved residents in BIPOC Albany communities around issues of air pollution and to consider what makes for healthy futures for these residents in Albany, NY.

At CAUL's 4th Annual Values – Voice – Vigilance Conference (VVV), Resilience and Agency - Theory Into Practice, Practice Into Advocacy, Advocacy Into Action, conference planners and facilitators used the opening plenary and conference break-out group sessions, like Agency and Health, to encourage continued community conversations on climate justice and environmental health within a resiliency and agency context. Prior to this 2021 VVV conference, the 2nd Annual VVV Conference, held in 2018, was influenced heavily by the devastation left by Hurricane Maria. At this conference, we were able to begin a community conversation around disaster preparedness and mutual aid that continues to evolve.

Arbor Hill Development Corporation

The Arbor Hill Development Corporation (ADHC) is a certified Neighborhood Preservation Company serving the contiguous neighborhoods of Arbor Hill, North Albany, Sheridan Hollow and West Hill, zip codes: 12204, 12206, 12207 and 12210. AHDC seeks to improve the quality of life through advocacy campaigns and resources that facilitate welcoming environments, thriving neighborhood economies, and access to world class education and careers. The Arbor Hill Development Corporation seeks to stimulate and promote the stability and vitality of neighborhoods through Community Engagement, Public/Private Investments and Economic Development. Current projects include: The Nehemiah Project, a holistic, block by block neighborhood revitalization effort in West Hill; ARPA-funded collaboration with Central Avenue and Downtown Business Improvement Districts to deliver grants and technical support to new entrepreneurs and small and minority-owned businesses recovering from COVID-19 impacts ; development of an intergenerational, community-driven project to identify and address environmental hazards; and restoration of inner-city children's baseball.

D. EJCPS Model

We believe that the EJCPS model is ideal to use in Albany at this time. There are numerous concerns and efforts underway, some of which are coordinated, and others of which are happening in relative isolation. Through the grant awarded to Clean and Healthy New York (under Federal award 66.604 from 2021), the groups listed in partnership for this proposal have already organically started the process described in Element One of the EJCPS. Identifying issues and discussing community vision is ongoing under the current project, but there are many other moving parts that need to be taken into consideration.

Further, USEPA has already invested time in having meetings with a number of stakeholders in the South End of Albany, and has identified some possible action steps. Other conversations are taking place in disadvantaged neighborhoods in other parts of our project's geographic range, and bringing these efforts together under one umbrella will have significant benefits for everyone. AVillage, Radix Center, Capital Area Urban League, NAACP Albany Chapter, Arbor Hill

ED_016126_00000764-00007

Development Corporation, and numerous Neighborhood Associations and groups, in addition to government bodies, elected officials, academic institutions and others need capacity to create a formal process to consider the complex issues facing the community identified for this Clean Air and Healthy Future for Albany, NY project, to establish common understanding and trust, and to build the capacity for acting collectively in ways that address the overall community wellbeing.

The issues to be addressed will include air pollution from fossil fuel-based combustion in land traffic and buildings, point source pollution from industries and bulk chemical storage, the need for affordable, accessible, healthy housing, the Port of Albany including industrial expansion, the potential for increased flooding and urban heat through climate change, mitigating the climate impact through tree planting, the changes that will occur if I-787 is taken down, and the need to ensure the residents in this part of Albany can be part of the workforce addressing these challenges and opportunities.

We will also be engaging in Element 2 in tandem with Element 1. Community members will be trained to engage people living on their block in an expansion and reinvigoration of AVillage's Innovation Block Ambassadors program. Capital Area Urban League will provide community organizing training for Block Ambassadors. Throughout the process, we will look to find ways of building the trust necessary to seek consensus with all stakeholders. As EPA notes in its EJCPS Model Guide, power dynamics at play give certain stakeholders more leverage than others, and finding the opportunities for equitable dialogue will be essential. Therefore, **we will touch on Element 3** but we do not plan for it to be our focus.

This will help the community take advantage of the multitude of programs and funding sources being made available through the Inflation Reduction Act, under Executive Orders 14008 and 13985, and other programs to invest in solutions that achieve the goals identified in Element 1. Given the timeline for funds becoming available, we anticipate that some of this work will be undertaken prior to the start of work under this proposed project, and continue throughout. Further, **utilizing Element 4**, our project will help interconnect existing projects and leverage resources by avoiding duplication and unintended conflicts between projects.

E. Project Linkages

This project will clearly articulate the steps needed to make Albany an environmentally just community, with all residents enjoying higher quality and length of life, in neighborhoods that foster this. By establishing clear goals with many stakeholders, we will enable them/us to take decisive action, knowing they are aligned with the community's self-identified needs. We as Community-Based nonprofit Organizations (CBOs) and residents will have added capacity to engage with government and corporate decision making in ways that ensure accountability to those needs. This clearly falls within US EPA's Goal #2, to Take Decisive Action to Advance Environmental Justice and Civil Rights, and especially Objective 2.1 Promote Environmental Justice and Civil Rights at the Federal, Tribal, State and Local Levels.

F. Partner and Collaborate

As described above, this project is founded on collaborative efforts between diverse organizations and entities. As we identify community resident priorities, we will need to

ED_016126_00000764-00008

collaborate on an ongoing basis with government and business partners to implement the actions that will achieve a just and healthy quality of life for those residents. All funded partners qualify for subawards under 2 CFR 200, which do not require competitive procurement. C+H has a commitment to this community as our home base and the infrastructure created for this program (website, email list, regular meetings) will help ensure the sustainability of relationships after the close of this grant period. Further, we are committed to securing resources for future ongoing engagement to implement community-identified priorities.

AVillage **Category:** CBO **Status:** Prime funded partner, letter

Resources: Existing Innovation Blocks Program, deep connection with South End and similar neighborhood residents. Community engagement with trusted community voices that also have deep connections in the community. South End Night Market will serve as a seasonal outdoor hub space bringing community, resources, and important information.

Contribution to project: Community connection, through Innovation Blocks Program, regular community events, trusted leader in community through years of work. Participation in planning and public meetings.

Vested interest: AVillage's mission is to identify inequities and confront their root causes by galvanizing the community and leveraging resources to create transformational change in Albany's South End. They have an ongoing programmatic focus on achieving environmental justice for residents of Ezra Prentice Public Housing. This project directly aligns with achieving that mission.

Radix Ecological Sustainability Center **Category:** CBO **Status:** Prime funded partner, letter

Resources: Community gardens, tree planting, urban sustainability, youth program, scientific expertise, X-Ray Fluorescence Spectrometer.

Contribution to project: Radix Center's Environmental Educators will provide technical assistance and support to greening projects and Block Ambassadors, including soil lead screenings; survey development and analysis; health impact analysis; assist with educational material creation.

Vested interest: The mission of the Radix Center is to promote equitable sustainability, ecological literacy, and environmental justice through education, advocacy, and the promotion of regenerative socio-ecological systems. Their work is centered in the South End of Albany, where they are based.

Capital Area Urban League **Category:** CBO **Status:** Prime funded partner, letter

Resources: Facilitation and solicitation of corporate partnerships; trainings (i.e., participatory research design; integrative design for systems change, small and large group facilitation, community organizing).

Contribution to project: Design a train the trainer to train Block Ambassadors of AVillage's Innovation Blocks program as community organizers; solicit and facilitate the development of corporate and other stakeholder relationships to identify and secure additional funding and

ED_016126_00000764-00009

resources for long-term project sustainability; organize and facilitate the design of charrettes (based on participatory action research and integrative design methodologies) for stakeholder engagement and for identifying and planning the execution of community-led solutions.

Vested interest: As a civic engagement and policy advocacy organization that connects communities across five-counties in NY's capital area, the mission of the Capital Area Urban League is to ensure that African Americans, Hispanics and other disenfranchised citizens can secure economic self-reliance, parity, power and civil rights.

Arbor Hill Development Corporation **Category:** Neighborhood Preservation Company
Status: Prime funded partner, letter

Resources: Citizen-guided research and mapping capacity, engagement in key neighborhoods, relationships with neighborhood associations.

Contribution to project: Geo-mapping and database, citizen science training, participation in regular meetings, assistance with identifying Block Ambassadors in Arbor Hill, North Albany, Sheridan Hollow, and West Hill.

Vested interest: Agency serves identified neighborhoods, improvements in environmental conditions help achieve Agency mission.

League of Women Voters Albany County (LWVAC) **Category:** CBO **Status:** Funded partner, letter

Resources: LWVAC has a 100+ year history as a grassroots, non-partisan non-profit organization and has the earned respect of both legislators and residents for our work with voting rights and advocacy. The League often partners with other organizations and government agencies to advocate for causes. Local recent environmental action includes efforts to support passage of the Environmental Bond Act of 2022 (Prop1). We bring a history of advocating to empower impacted communities and skills in education, coordination and organization.

Contribution to project: Design an "Advocacy Skills" oriented train-the-trainer offering for Block Ambassadors and residents, which will include educational visits with legislators at various levels of government to support initial engagement by community residents. We will assist in the coordination of community-based meetings for resident capacity-building, and will encourage and assist with voter registration as we promote consideration of environmental issues and advancement of related civil rights.

Vested Interest: The LWV believes that democracy depends on broad citizen participation in community decision-making, so is committed to empowering communities, especially those that have been historically marginalized. Diversity, equity, and inclusion principles are central to this work, and the LWV is both actively engaging these principles in our own organization and using them as a lens to guide our broader work.

Albany College of Pharmacy & Health Sciences **Category:** Academic **Status:** Volunteer partner, letter

Resources: Environmental Epidemiological Expertise, Student Volunteers.

Contribution to project: Health Impact Assessment, Student Volunteers.

Vested interest: Radix Center co-founder and Executive Director Stacy Pettigrew, PhD, MS, is faculty in the Population Health Sciences Department.

The Albany African American Clergy United For Empowerment (TAAACUE) **Category:** Religious community **Status:** Volunteer partner, letter

Resources: This collaborative roundtable of clergy represents numerous congregations.

Contribution to project: Promote of events to congregations, connect to networking projects of their own, spread information, promote events, and encourage participation.

Vested interest: TAAACUE is committed to improving the conditions of the people of Albany. This project aligns directly with past work on petrochemical transport via the nearby rail system, health concerns at Ezra Prentice Housing, and more.

NAACP Albany Chapter EJ Committee **Category:** CBO **Status:** Volunteer partner, letter

Resources: Capacity to implement policy advocacy to change harmful policy and practices.

Contribution to project: Research, advocacy, communication to members, participation in meetings.

Vested interest: The EJ Committee's purpose is to address EJ issues in Albany.

Capital District Transportation Committee **Category:** Government **Status:** Volunteer partner, letter

Resources: Transportation planning.

Contribution to project: Engagement with community partners at meetings.

Vested interest: As the designing Metropolitan Planning Organization for the Capital Region, they need to understand community priorities in their planning processes and this is part of their stated ongoing approach.

City of Albany Office of Sustainability **Category:** Government **Status:** Volunteer partner, letter

Resources: Area of responsibility that overlaps with goals of this project; planned hire of full-time Climate Justice Fellow.

Contribution to project: Participate in regular project meetings and take information developed under this program back to the City of Albany for consideration in our planning; participate in public activities, including town halls and public meetings; incorporate this project into our pre-existing outreach efforts.

Vested interest: The outcomes of this project will help our office better understand community needs and priorities, so we can better tailor our work to be aligned with these priorities, resulting in cleaner air and a healthier future for all.

Albany County **Category:** Government Agency **Status:** Volunteer partner, letter

Resources: Climate resiliency programs, policy-making capacity.

Contribution to project: participation in public meetings to develop Community EJ Agenda.

Vested interest: As the government for the county, they want a high quality of life for residents.

2.0 Project Activities / Milestone Schedule / Detailed Budget Narrative

A. Project Activities

Our objectives are to:

1) Use one-on-one outreach, meetings, surveys and other tools to develop a Community Environmental Justice Agenda that reflects the needs and priorities of the disproportionately impacted communities of Albany.
2) Build community capacity for leadership and engagement in public processes.
3) Improve community health by connecting and leveraging the many projects already underway by partners and others in the City of Albany.
4) Increase community capacity to engage and respond to environmental justice concerns as they arise, particularly as pertains to Climate Change disaster responsiveness.
5) Increase coordination among stakeholders through regular meetings and a website hub.

Objective 1) Develop Community Environmental Justice Agenda

A core outcome of this project is a clear Community Environmental Agenda that can be used by residents to frame comments in public forums at all levels of government, by elected officials to understand the community's priorities, and in dialogue with business stakeholders. To develop this, we will use a process that is both by and for the community.

First, we will convene project partners to plan our steps, and to share in more detail our existing resources. These include recommendations from previous EPA meetings, work done by Arbor Hill Development Corporation to be completed in Summer 2023, past engagements through Block Ambassadors, community conversations being held by many of the listed grant partners under Clean+Healthy's funding from EPA and NYS Pollution Prevention Institute, to be completed by fall 2023, and more.

We will develop basic materials and talking points to engage residents, and using one-on-one engagement from Block Ambassadors, outreach events, engagement at AVillage's South End Night Markets, and a survey instrument, we will compile community feedback. We will then use our project partner meetings to review a draft agenda, and bring it back to the community for feedback via Block Ambassadors and one or more community meetings.

Once complete, this living document will be shared with stakeholders in government, businesses, and communities. We will post it on our collective website hub (discussed below) and use it to craft Town Hall meetings and trainings for community members.

Objective 2) Build community capacity for leadership and engagement in public processes

In the winter of 2023-24, we will hold 3-4 meetings with Prime and funded partners to create detailed plans, identify additional stakeholders, create "Block Greening" Competition plan and infrastructure. This will include a compilation of resources available to neighbors to engage in a

ED_016126_00000764-00012

"greening" activity, soil testing plan, promotion plans, recognition plan, and plan to connect block competitors to broader conversation.

We will also set goals by neighborhood for the number of AVillage's Block Ambassadors and set a timeframe for recruitment and training of these Ambassadors, which Capital Area Urban League will provide, in consultation with Albany LWV, Radix Center, C+H, and other project partners. Arbor Hill Development Corporation will help identify Block Ambassadors and promote the program in its service area.

We will host a "Block Greening" Competition in Spring 2024 to raise awareness of issues, and connect residents with broader systems in need. Radix Center Environmental Educators will support residents with design and implementation of green systems and will offer free lead soil screening and counseling to determine appropriate interactions with soil to help residents determine if/how to include fruit and vegetable plants.

AVillage's Innovation Block Ambassadors will assist in (1) sharing general information about the "Block Greening" Competition and (2) distributing a survey to gather initial input on key environmental issues that community members face to help inform overall project focus. Care will be taken to distribute outreach across the previously redlined Albany neighborhoods within the scope of this project [see section B above for map and more details on project scope].

Inspired by friendly competitions like the Brooklyn Botanic Garden's 'Greenest Block in Brooklyn', program partners will assist community members across the identified neighborhoods in Albany to (1) provide information about the local "Block Greening" program [Innovations Block Ambassadors], (2) share environmental education [Radix] and (3) gather community input on solutions to the environmental issues impacting Albany's diverse neighborhoods [Innovation Block Ambassadors].

Informational meetings will be held at AVillage's Night Markets and at city libraries (Howe, Arbor Hill and Washington Ave branches) to give opportunities for partner organizations to provide information, share education and gather community feedback. Additionally, Innovations Block Ambassadors will conduct the initial outreach through door to door canvassing distributed across the previously redlined communities that this project focuses on.

Objective 3) Connecting and leveraging the many projects already underway

Through regular meetings of project partners and other stakeholders, we can exchange information about projects underway through other sources of funding (including in-kind support). This will include identifying all of the different forms of GIS mapping being conducted in the project area, and looking for ways to streamline and/or connect these. Projects we plan to connect include: DEC air monitoring, Port expansion, the Albany Riverfront Collaborative/I-787 deconstruction, NYSERDA funding for replacement sources for heat and cooking, community engagement and leadership development at numerous organizations, tree planting, public transportation planning, Port traffic, lead poisoning reduction activities, community gardens, other climate mitigation projects, and more. While we have a strong understanding of work underway, we are constantly learning more. We will explore ways that these projects align with the Community EJ Agenda, and how resources can be leveraged

ED_016126_00000764-00013

between projects to streamline each effort and maximize resources. This should also enable stakeholders to produce greater impact per dollar spent than if our activities remain siloed. Between partner/stakeholder planning meetings, trainings, and Town Halls (to present thematic priorities from community members to relevant stakeholders) we plan to hold 30 events across the project grant period.

Objective 4) Increase community capacity to engage and respond to EJ concerns
By training Innovation Block Ambassadors and interested community residents, having Ambassadors engage with their neighbors, and conducting training, planning, and educational meetings, and development and promotion of the Community EJ Agenda, we will increase resident understanding of issues across neighborhoods about environmental concerns, and increase their comfort with speaking up. Then, as unanticipated events arise, these interconnected residents will be prepared to engage and to identify their priorities within a problem-solving context.

Objective 5) Increase coordination among stakeholders through regular meetings and website
We can increase coordination through the regular meetings described above. We will also create infrastructure for ongoing communication via email, and develop and launch an Albany EJ hub website that allows stakeholders, especially residents, to connect with the wide array of organizations and projects seeking to promote environmental and social justice in Albany. This site will include a common community calendar, enabling multiple organizations to cross-promote events and activities, and to be able to schedule their programming in ways that do not conflict with other stakeholders.

B. Milestone Schedule

Milestone	**Date**	**Lead Partner(s)**	**Activities**
Planning phase	March 30, 2023	All	● Convene named partners and other stakeholders to make detailed plans for implementing grant, including all of below
"Block Greening" Competition	June 30, 2024	AVillage, Radix, AHDC, C+H	● "Block Greening" Competition plan development complete by March 31 ● "Greening" activities complete by June 1 ● Event recognizing efforts and presenting awards held by June 30
Block Ambassadors expanded to project region	June 30, 2024	AVillage, AHDC, CAUL, Radix, C+H	● Promote openings, recruit Ambassadors ● Develop and conduct training ● Provide content, information, surveys, and community reported mapping
Block Ambassadors	Through June 30,	AVillage, AHDC, CAUL,	● Monthly one-on-one engagement ● Maintain training to sustain 20 BAs

ED_016126_00000764-00014

engage residents	2026	Radix, C+H	● Distribute survey ● Promote community mapping
Develop **Community EJ Agenda**	February 28, 2024	All partners, C+H	● Use survey input to draft Agenda ● Hold public meetings, attend partner events to solicit further community input ● Finalize written document, distribute
Health Impact Assessment of I-787 removal plans	Dependent on release of infor-mation	Albany College of Pharmacy and Health Sciences, C+H	● Evaluate proposed options for traffic changes ● Identify strategies for mitigating any negative consequences for disproportionately impacted communities ● Prepare materials to empower resident and stakeholder engagement
Connection and leverage existing projects	Ongoing through-out	All	● Compilation of existing efforts created ● Assess areas of duplication, overlap, identify ways to streamline/amplify/align ● Establish and maintain planning Town Hall, educational and training meeting schedule ● Evaluate progress on project outputs and outcomes, adjust plan accordingly
Hub website and email list	May 1, 2024; ongoing upkeep	C+H, all partners	● Gather relevant resources from partners and stakeholders ● Create simple website with links, resources, editable calendar ● Create basic listservs for project area, for named partners
Secure resources for implementatio n	Ongoing through-out	CAUL, C+H, Radix, government	● Track government funds available to CBOs, NGOs, and government bodies. ● Advance Community EJ Agenda as guide for responses to RFAs ● Identify corporate partners for in-kind support
Review phase	October 31, 2026	All partners	● Assess impact, determine effective strategies, solutions to overcome challenges in future

C. Itemized Budget Sheet / Budget Narrative

Please see uploaded file under Other Attachments

ED_016126_00000764-00015

This program's budget is focused on Subawards to partner organizations, for support of staff time, inhouse materials, and especially for the Innovation Block Ambassadors program run by AVillage. Additional resources are allocated for "greening" competition - soil, access to the local tool library, a recognition and educational event, and recognition materials such as plaques. C+H costs will go to staff, and overhead costs (using the standard 10% de minimus) will include staff and contract time to process financial and administrative aspects of the program.

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures

A. Environmental Results (Logic Model)

*Outputs: "*Block Greening" competition is planned, executed, and celebrated. Block Ambassadors are recruited, trained, and engage with community members monthly. Survey instrument created, administered, and compiled. Community Environmental Justice Agenda produced. Planning meetings held. Educational meetings, Town Halls, planned, produced, promoted and held. Government-directed public engagement opportunities (comment periods, engagement meetings, public hearings, etc.) promoted and prepared for. Mapping projects connected. Additional resources sought for implementation of the Community EJ Agenda. Guidance for government grant seeking and budget allocation given.

Outcomes: Community residents are more active in public participation opportunities and advocate in ways that are aligned with the Community Environmental Justice Agenda. Local, regional, state, and national government stakeholders understand community priorities based on the Agenda and seek to invest in alignment with these priorities. Actions such as investments in zero-emission vehicles or appliances, public transit capacity, changes in traffic patterns, healthy affordable housing development, and tree planting are conducted in alignment with the Agenda, resulting in decreased air pollution especially in previously hardest-hit areas, increased access to safer solutions, decrease in urban heat island effect, and improved health outcomes, measured in decrease in asthma and other respiratory challenges, heart disease.

Please see uploaded file under Other Attachment

B. Performance Measurement Plan

We will track our impact in the following ways:

- Number of blocks participating in our "Block Greening" project. We will track this by having residents register their blocks. We plan for roughly 10-12 blocks.
- List of hired Block Ambassadors (BA) and time sheets. We plan to have 20 BAs at a time.
- Number of contacts between BAs and residents. We plan for this to increase over time, from 2-5 residents per BA engaged 1-2 times each month for six months in year one, ramping up to 10-20 residents per BA engaged 1-2 times each month in year two, and 20-40 residents per BA engaged in the first six months of year 3.
- Number of BAs and other community members trained in organizing, engagement, and on relevant subject matter. We plan to train at least 50 residents. We will track this using sign-in sheets at training events and a log of residents that have been trained.
- Number of people completing the survey, and their geographic spread across our project area. We plan to have at least 500 people complete the survey.

ED_016126_00000764-00016

- Number of planning meetings and public events (trainings, meetings, Town Halls, etc.). We will use a calendar to track these, and plan to hold at least 30 over the course of 36 months.
- Number of community people attending regular meetings, trainings, and other events organized by project partners. We expect a fluctuating number of participants. We will track participation and use it to assess our choice of content and format by having a sign-in sheet at each event, be it a planning meeting or public meeting of any kind.
- Resources for implementation.
- Production of community-approved Community Environmental Justice Agenda.

C. Sustainability Plan and Community Vision

This project's purpose is both to achieve specific outcomes and outputs, but also to create interconnections, collaborations, and resources for ongoing work that allow stakeholders to achieve community resident-determined priority changes that will make Albany healthier and more just. As discussed above, one of our performance measurement approaches will be to assess the capacity and willingness of stakeholders to continue meeting to ensure future activities are aligned with the community's overall vision for itself. Success will also be measured in our ability to help various stakeholders secure and allocate the resources necessary to implement changes in line with the community's vision. We view this project as one that coalesces the existing work ongoing to leverage it, and to identify and fill gaps.

4.0 Programmatic Capability

A. Organizational Experience

Clean and Healthy New York has a seventeen-year track record of education and empowerment. Under a US EPA grant, we successfully trained nearly 1,000 child care providers to avoid toxic chemicals in their programs. We are Community Partners in both Albany and Syracuse to the state-funded New York State Children's Environmental Health Centers. We have extensive technical knowledge about chemicals of concern, mapping environmental hazards, and conducting effective training events. We now have a project underway with EPA funding, and were previously funded by a US EPA Great Lakes Restoration Initiative grant in 2012-2014.

Our 2021-26 Strategic Plan includes the following goal: center the voices and needs of frontline Black, Indigenous, and People of Color (BIPOC) communities in our work. This is an expansion of our decade and a half collaboration with WE ACT for Environmental Justice as co-leaders of the JustGreen Partnership, and several stand-alone joint projects, including our current partnership to address environmental health and justice concerns within the carceral system.

Clean and Healthy New York's theory of change is focused on collaboration, and as such we have co-led the JustGreen Partnership for 17 years across many changes in funding availability and external factors affecting the achievement of our collective goals. Ten years ago, we launched the national Getting Ready for Baby campaign. For both of these campaigns, we have raised funds at various times and been the lead organization disbursing the funds. We also co-lead the Lead-Free Kids NY coalition, and play a significant role in joint fundraising for that work.

We have experience in coordinating projects with multiple partners and achieving our outputs and outcomes together. We understand how to convene partners, work through differences of

opinion, create and foster collective accountability, and disburse and track funds. We have the infrastructure in place in our organization - including administrative and bookkeeping capacity, program expertise, and logistical support.

B. Staff Experience / Qualifications of Project Manager (PM)

Bobbi Wilding, Executive Director, will serve as Project Manager. She has more than a quarter century of experience as an environmental health and justice advocate, and co-founded and co-leads the collaborations listed above. With a background in Environmental Science (BS) and Ecological Economics, Values, and Policy (MS) from Rensselaer Polytechnic Institute, over eight years she moved from canvasser, to intern, to Program Associate to Associate Director at Citizens' Environmental Coalition, after which she co-founded Clean and Healthy New York with Kathy Curtis. Bobbi has written or co-written numerous reports for Clean and Healthy New York and national partners, including for Physicians for Social Responsibility, Coming Clean, and the Childhood Cancer Prevention Initiative. In her time at Clean and Healthy New York, she used XRF technology to test children's products for heavy metals and indicators of organohalogens. She was a 2020 recipient of the Children's Environmental Health Excellence Award. She is the Project Manager for the currently funded EPA program and works closely with the Partner organizations listed in this grant. She was the lead staff person responsible for working with Arbor Hill Development Corp. on their EJ citizen science mapping project.

C. Expenditure of Awarded Grant Funds

Clean and Healthy New York is confident in our ability to manage the funds if awarded this grant. We have past experience with a grant of similar size and timeline from the US EPA. We have experience drafting subaward agreements and administering payments, and we use Quickbooks to manage our finances. We have in place methods for tracking income and expenses by source and project. Further, we have had staff at full time salaries since 2012. We prepare and file a full 990, and have an independent CPA prepare a financial review each year, advising us on any changes necessary to maintain consistency with GAAP standards.

5.0 Past Performance

Clean and Healthy New York is currently engaged in a project funded by the US EPA. We will be submitting our interim report by May 1, 2023. The total budget for this project, issued under Assistance # 66.604, is $75,000.

We have successfully secured Community Foundation and private foundation grants for over a decade, many of them repeatedly renewed for our ability to complete exemplary work and to provide paperwork in a timely manner. Foundations include New York Community Trust, Park Foundation, Prospect Hill Foundation, and Marisla Foundation.

6.0 Quality Assurance Project Plan (QAPP) Information (If applicable)

We do not believe our survey will require development of a QAPP as it will be used for educational purposes only, but if the US EPA determines that our project requires one, C+H has prepared and executed a project with a QAPP in the past, as have partners like the Radix Center.

The non-profit volunteer organization, working in partnership with the New Jersey Division of Parks and Forestry, dedicated to preserving and enhancing the New Jersey State Botanical Garden at Skylands

April 12, 2023

Environmental Protection Agency [Mail Code 2201A]
1200 Pennsylvania Avenue, NW
Washington, DC 20460

RE: Letter of Support for Clifton Garden Club Application
Environmental Protection Agency *Environme11tal Justice Collabomtive ProblemSolving*
***Cooperative Agreeme11t Program*, 2023**

Dear Review Committee:
The Skylands Association Inc. (A Section 501 c 3 tax exempt organization and official friend of the NJ Botanical Garden) is proud to support the Clifton Garden Club's application to the **Environmental Protection Agency and Office of Environmental Justice and External Civil Rights** (hereinafter EPA-OEJ) *Environmental Justice Collaborative Problem-Solving Cooperative Ag eement Program.* If awarded, this grant would be carried out in collaboration with the Ringwood State Park located in Ringwood, NJ.

The Clifton Garden Club would like to plant twenty five trees in a section of Ringwood State Park which is designated as the New Jersey State Botanical Garden. This is to ensure the sustained presence of trees in the garden. It is critical because future generations
depend on the continued existence of parks to offset carbon emissions from transportation vehicles and factories. If funded, this project will continue the tradition of local organizations collaborating with the County.

We are dedicated to preserving our Park. This project will improve the quality of life for the community. I am please to reiterate our support of Clifton Garden Club's application to the EPA-OEJ's
Environmental Justice Collaborative Problem-Solving Program. If I may be of further assistance, please do not hesitate to contact me. I can be reached via email at info@NJBG.org

Respectfully,
Kenneth Merz
Kenneth Merz,
President of Skylands Association, Inc.

NJBG/Skylands Association is a 501(c)(3) non-profit corporation.

1.0 PROGRAM OBJECTIVES A. Project Summary Page
Project Title = 125 trees

Project Location (including community/neighborhood(s), city, state, and zip code) = applicant at 07013 in Clifton, New Jersey in Passaic County, specifically planting trees at Garret Mountain Reservation (Paterson 07424), Dundee Island Park (Passaic 07055), Goffle Brook (Hawthorne 07506), and Rifle Camp Park (Woodland Park 07424) and Weasel Brook Park (Clifton 07013). Also planting trees at Ringwood State Park (Ringwood 07456).

Applicant Information (name, address, main contact information) =
Clifton Garden Club Ex. 6 Personal Privacy (PP) Clifton, NEW JERSEY 07013,
Contact Elliot Solomon at Ex. 6 - Personal Privacy (PP)

Applicant Organization Brief Description =
To maintain city gardens, encourage love of gardening, and beautification of city of Clifton through education, lectures, field trips, and discussion of local environmental issues.
Key projects:
Scholarship funds given to 2 Clifton High School seniors/year planning to study botany, horticulture, entomology, or environmental science.
Club presents to public **7-8 speakers**/year **on horticultural topics.**
Club distributes **free plants** to public at annual **Harvestfest**.
Clifton Public Libraries Gardening Project helps maintain City Library grounds.
Clifton Morris Canal Gardening Project helps maintain Clifton Morris Canal garden grounds.
Club **educates public about horticultural topics on Earth Day at Garret Mountain.**

Are you applying for the Small CBO Set Aside Track for $150,000 projects?
YES applying for $150k project, we have only volunteers. We do not have employees.

Project Abstract -- Brief description (250 words or less) of the main objective, activities, and outputs/outcomes of the project, including the specific geographic areas of focus.
main objective = to buy native trees, give them to the land owners, who will then use their existing staff/volunteers & equipment to plant trees in various parks in Passaic County, NJ.
outputs/outcomes = to plant 125 trees resulting in small trees growing into larger, healthy trees in the cities of Clifton(Weasel Brook Park), **Hawthorne(**Goffle Brook), **Passaic(**Dundee Island Park), **Paterson**(Garret Mountain Reservation),**Woodland Park(**Rifle Camp Park).

Project Type(s)
Monitoring budget, **partnering** with County staff and Friends volunteers to accomplish tree **purchase**, **transport**, and **planting** of trees in various parks.

Special Considerations
There is a great need to offset carbon emissions from transportation vehicles and nearby factories in **Clifton** border areas, and especially in the economically depressed **Paterson and Passaic** New Jersey areas.
Special Consideration is needed for these areas because they suffer from high traffic volumes from local roads and interstate route 80, very low income populations, high percentages of people of color, high percentages of unemployed, significant percentages of limited English speakers, significant

percentages of the population having less than a high school education, and significant percentages of the population having low life expectancies.
Also according to NJSPOTLIGHTNEWS.COM, around the homes in the Ringwood Superfund area LEVELS OF LEAD IN PAINT SLUDGE NEAR HOMES HAVE BEEN FOUND TO BE 100 TIMES THE LEVELS THE EPA CONSIDERS ACCEPTABLE.
Due to the long term presence of these socioeconomic and environmental factors, **Special Consideration is justified. Our project will only focus on helping to reduce air pollution by planting more trees.**

Environmental Issue AIR POLLUTION
Tree planting helps to improve air quality of life for communities.

List of Project Partners

Friends of Passaic County Parks, Inc., contact-Kelly Rufel
Friends of Garret Mountain Reservation, contact-Vera Lazar
COUNTY OF Passaic, office of county administrator, contact-Kelly Rufel
Friends of NJ Botanical Gardens State Park contact-Ken Merz
STATE-NEW Jersey Botanical Gardens, contact-Eric Pain, superintendent
*** State letter will not be sent by the deadline, so the Friends group will tell the planting plan for the State Park involving state staff & them.**

Will you need to develop a QAPP for your project? No

B. Environmental and Public Health information of the Underserved Community (1)
According to NJ.COM the Ringwood New Jersey superfund site is the only ever to be deleted from the National Priorities List only to be relisted. The Ford Motor Company dumped toxic paint sludge and other wastes from its Mahwah factory into abandoned mines in the Ramapo Mountains, endangering nearby communities, including members of the Ramapough Lenape Indian Tribe. After an investigation from The Record newspaper in 2005, the EPA re-listed the site, but Ford and the borough, both responsible parties in the cleanup, have resisted efforts to remove all of the contamination from the mines and a connected landfill site, preferring to cap it in place. The EPA says the threat to human health posed by the site is still "not under control." The controversy was also subject of the 2010 HBO documentary "Mann vs. Ford." The NJ Botanical Gardens State Park is connected to this superfund site.
Cities of Paterson, Passaic, Clifton border areas have significant air pollution due to numerous factories, trains,& buses & high traffic volumes from cars on local roads & interstate route 80. These problems have existed for many decades. We will help improve their air by planting trees in their Parks.

Also especially in Passaic and Paterson there are 1. very low income populations, 2. high percentages of people of color, 3. high percentages of unemployed, 4.significant percentages of limited English speakers, 5.significant percentages of the population having less than a high school education, and 6.significant percentages of the population having low life expectancies. Census.gov was used to verify these issues being faced, which this project will not address.

(2) Describesthelocalenvironmental/publichealthissue(s) that the project seeks to address **Project will help reduce high air pollution levels in the county by planting more trees.**

(3) Describesthelocalenvironmental/publichealthresults the project seeks to achieve and how will the underserved community benefit from those results

Project will help reduce high air pollution in the counties by planting more trees, thereby helping to improve the health of the communities.

C. Organization's Historical Connection to Underserved Community

(1) **Our group has existed since before 2000 (when it was incorporated) and has participated in Earth Day & similar events that made our educational services and plant giveaways available to the public throughout Passaic county and other nearby counties as a public service, especially since we are a 501C3 corporation as of 2023. This EPA project is another opportunity for our organization to provide service to the community.**

(2) **We are currently partnering with county staff and community volunteers to plan for tree planting in various parks, which would be purchased with EPA funds to help decrease air pollution, especially in the underserved cities.**

(3) **We have used numerous phone discussions to plan with county staff and community volunteers the strategy to implement this tree planting project, especially for the underserved city parks.**

D. EJCPS Model Demonstrates 1+ of seven elements of the EJCPS Model

Element 1 (Issue Identification, Visioning, and Strategic Goal-Setting) is & will be used and element 5 (Constructive Engagement with Other Stakeholders) also was used and will continue to be used. Strategic goals were identified and created, which include tree planting as the goal involving selecting, purchasing, transporting, and planting. Constructive Engagement with all the stakeholders was, is, and will be done through numerous phone calls and emails to keep all key people informed and to minimize task errors **The timeline and milestones are all reasonable and achievable over 3 years or sooner in some sites.**

E. Project Linkages
The application will be evaluated on (1) Supports EPA Strategic Plan Goal 2 (Take Decisive Action to Advance Environmental Justice and Civil Rights), Objective 2.2 link Below:https://www.epa.gov/planandbudget/strategicplan
We support the EPA Strategic Plan Goal 2 by The addition of trees to provide forest sustainability & resilience in response to climate change.

We Support Objective 2.2 by maintaining the Parks, which especially help Environmentally overburdened communities with minority & low income populations in regard to environmental equity & justice. at the local city, county, and state park levels.

F. Partner and Collaborate a.-**The county staff will get their requested tree quantity from our purchased supply. We will arrange tree type, quantity, and any protective materials for tree delivery based on county or state requests. The county or state staff will decide when, how, and where tree planting will occur. The volunteer (FRIENDS) groups will assist with the planting tasks at the direction of the county or state staff. The county and state have the manpower & equipment to do the planting on their properties, even if the volunteer groups are unable to be available to assist on the scheduled planting dates. The county & state have a vested interest to maintain their properties for the public good & that is why their staff obtained those paid jobs. The FRIENDS volunteer groups are interested in assisting the government land owners in maintaining their properties for altruistic or charitable purposes.**

How the applicant organization plans to maintain and sustain these relationships on into the future

We will periodically contact these partners to check the plant health status of their parks. Also we will inquire about air pollution monitoring methods they may be choosing to use. Additionally we will suggest a subject matter expert on air pollution such as professor Jaime Mirowsky from Syracuse University at Ex. 6 - Personal Privacy (PP) and Ex. 6 - Personal Privacy (PP) email.

2.0 Project Activities / Milestone Schedule

A. Project Activities -**With county & state land owners input, decide the type, quantity, size, & price of trees to purchase, and the delivery method & schedule for their park properties. On the agreed dates, purchase the trees & monitor the delivery of each group of trees to the appropriate sites. Verify all tasks are completed on schedule. For any delays, asap call or email to resolve the problem with the appropriate organization or person. Verify planting schedule is being followed, but if not, see if we can assist in returning to the schedule. If resumption of the schedule is not possible, discuss a new alternative schedule, so it can be reported to the EPA in case a delay in future partial payments needs to be done. If everything is on schedule, report that quarterly to the EPA.**

After each tree group is delivered, the county & state land owners, will decide when to use their existing staff & equipment and any available volunteers to plant trees in their various parks. The exact planting dates will depend on priorities,season and how frozen the ground is. The results for each previously

mentioned task is self described. The planting results will be the growth of small trees into larger, healthy trees in the desired park locations. A final project task review will be done after all trees have been planted.

B. milestone schedule, including timeframes and major milestones

On or before 11/1/23 an all partners phone meeting will be held to agree on all information needed to purchase the trees.

Based on the agreed upon delivery schedule, purchase & receive the first tree groups between November 2023 and May 2024.

Purchase & receive the second tree groups between June and September 2024.

Purchase & receive the third tree groups between November 2024 and May 2025.

Purchase & receive the fourth tree groups between June and September 2025.

Purchase & receive the fifth tree groups between November 2025 and May 2026.

The schedule is subject to change based on county or state priorities.

Actual planting dates will be dictated by county & state land owners & tracked by us. Final review by us will be done by September 2026.

C. Itemized Budget **The only costs will be for tree supplies. The individual cost of the 125 trees is expected to be $500 each or less. This includes any protective materials needed to prevent animal attack. Therefore the total funds are estimated to be: 125x500. The total is $ 62,500, which can be paid out in quarterly partial payments. Depending on the speed of partner planting, we may request EPA to adjust up or down those payments.**

3.0 Environmental Results – Outputs, Outcomes, & Performance

A. Measures (Logic Model) If you choose not to provide a logic model, you must still detail the outputs and outcomes of your project and address how you will measure performance.

Outputs: Phone meetings with partners to plan the tree purchases, tree deliveries, tree planting and additional calls to resolve any problems that may arise.

Outcomes: Tree growth from small to larger & healthy, and air pollution is reduced to an unmeasured degree.

B. Performance: Tree growth & health is seen by observation.

C. Sustainability Plan and Community Vision: This project can be replicated repeatedly in the future. **Air pollution measurement methods can be suggested by a subject matter expert in the future, such as professor Jaime Mirowsky from Syracuse University at** Ex. 6 - Personal Privacy (PP) **and** Ex. 6 Personal Privacy (PP) **email, who has lived in this area.**

4.0 Programmatic Capability

A. **Since our organization has at least 4 volunteers who have attained the title of master gardener, we feel confident that we have the organizational experience to successfully implement this project.**

B. **The PM has had over a decade of experience using project management tools and 2 years coordinating events in our garden club. The associates have a variety of master gardener ranks & related experience. The county and state managers are paid professionals with years of administrative experience.**

The PM has been in this community for over 20 years, so is familiar with the environment. The PM has been in the organization for over 10 years and has most recently managed the organization's email and voice mail for 2 years. The PM, as VP of the organization, has worked with our President for 2 years to manage all events, such as Earth Day and other presentations & plant giveaways.

C. **Timely & efficient grant funds distribution focuses on partnership procedures & controls such as using emails as an audit trail to follow the money flow. Also use the simplest procedures so that if a malfunction occurs, it can be found & fixed quickly. Additionally, the PM and other key partner leaders will review all inbound & outbound emails on the day of transmission so that any errors can be recognized & corrected immediately. The PM will also keep a log of all voicemails and key decisions. The PM will be the only person authorized to purchase the trees (and any protective materials), which is the only task that EPA funds are paying for. Our organization is financially stable, since we have a $1000+ monthly income from invested funds and our monthly expenses are far less than our income. We are not a prior recipient of Federal awards. The organization and PM have never had an audit. Upon EPA request, we can submit quarterly progress reports to the EPA project officer within thirty days after each reporting period.**

5.0 Past Performance: Our organization has no past grants experience.

6.0 QAPP NOT NEEDED.

7.0 Itemized Budget is very concise and therefore is seen in above text in Section 2C.

PM RESUME:

Most recent work at **AT&T** for 15+ years involving systems analysis, computer programming, and managing an internal international help line.
Also created customized programming for an International Customer Phone Call Database. Additionally, an International System for tracking 10 billion dollars of billing between numerous countries phone companies was maintained.
Previous work at the **American Broadcasting Company** for 2 years involving systems analysis, computer programming, and tracking various TV ratings related to Nielsen and Arbitron, as well as Radio station playlists.

The PM has an MBA in Finance and a BS in Biology cum laude.

RE: Letter of Support for Clifton Garden Club Application
Environmental Protection Agency, Environmental Justice Collaborative Problem--Solving Cooperative Agreement Program, 2023

Dear Review Committee:

The Friends of Garret Mountain Reservation is proud to support the Clifton Garden Club's application to the Environmental Protection Agency and Office of Environmental Justice and External Civil Rights (hereinafter EPA-OEJ) Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. If awarded, this grant would be carried out in collaboration with the County of Passaic which operates and maintains sixteen public parks located in the County's most industrious locales; and the Friends of Garret Mountain Reservation, a 501(c)(3) nonprofit organization, whose purposes include "to preserve, protect, and enhance the natural beauty of Garret Mountain Reservation and Rifle Camp Park, in cooperation with Passaic County officials."

The Clifton Garden Club has pledged to provide trees for urban public parks, including Garret Mountain Reservation and Rifle Camp Park. These parks are especially important for Environmental Justice as they service overburdened communities, including minority and low income populations. Planting new trees will ensure the sustained presence of native plant species in the area. In recent years, many trees have been lost due to drought, disease, and insects such as the emerald ash borer. It is critical to plant new trees because future generations depend on the continued existence of these parks to offset carbon emissions from transportation vehicles and nearby factories. The proposed additional trees will also provide forest sustainability and resiliency in response to Climate Change.

If this project is funded, volunteers from Friends of Garret Mountain would collaborate with County Parks to help recommend planting locations, and can assist with the planting of smaller trees (under the direction of County Department of Parks and Recreation) in Garret Mountain Reservation and Rifle Camp Park. The Friends of Garret Mountain are dedicated to preserving the natural resources of these important urban parks, and this project will improve the quality of life for the surrounding communities. We are pleased to support the Clifton Garden Club's application to the EPA-OEJ's Environmental Justice Collaborative Problem-Solving Program. If any questions, please feel free to contact me at Ex. 6 - Personal Privacy (PP)

Sincerely,

Vera Lazar

RE: Letter of Support for Clifton Garden Club Application
Environmental Protection Agency *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program*, 2023

Dear Review Committee:

The Friends of Passaic County Parks, Inc. is proud to support the Clifton Garden Club's application to the **Environmental Protection Agency and Office of Environmental Justice and External Civil Rights** (hereinafter EPA-OEJ) *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program*. If awarded, this grant would be carried out in collaboration with the County of Passaic which operates and maintains sixteen public parks located in the County's most industrious locals.

The Clifton Garden Club would like to plant one hundred trees across the County, specifically in urban public parks, such as Garret Mountain Reservation, Weasel Brook Park, and Dundee Island Park. This is to ensure the sustained presence of native plant species in the area. It is critical because future generations depend on the continued existence of these parks to offset carbon emissions from transportation vehicles and nearby factories. If funded, this project will continue the tradition of local organizations collaborating with the County to maintain and plant native species in our Parks since the system's establishment in 1927.

We are dedicated to preserving our Park System. This project will improve the quality of life for the community. I am please to reiterate our support of Clifton Garden Club's application to the EPA-OEJ's Environmental Justice Collaborative Problem-Solving Program. If I may be of further assistance, please do not hesitate to contact me. I can be reached via email at kellyr@passaiccountynj.org or by phone: Ex. 6 - Personal Privacy (PP) ext. [redacted]

Title: VP

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☐ Yes	☒ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☒ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☐ Yes	☒ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☐ Yes	☒ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☐ Yes	☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

No

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/recipient's website address for, or a copy of, the procedures.

No

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

RE: Letter of Support for Clifton Garden Club Application
Environmental Protection Agency *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program*, 2023

Dear Review Committee:

The County of Passaic is proud to submit this letter of support for the Clifton Garden Club's application to Environmental Protection Agency and Office of Environmental Justice and External Civil Rights (hereinafter EPA-OEJ) *Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.*

The County of Passaic supports the efforts of the Clifton Garden Club to prioritize the purchase and planting of trees throughout the Passaic County Park System. The following parks will receive trees: Garret Mountain Reservation (Paterson), Dundee Island Park (Passaic), Goffle Brook (Hawthorne), and Rifle Camp Park (Woodland Park) and Weasel Brook Park (Clifton).

Clifton Garden Club has pledged 100 trees in total to this effort for County and Municipality owned parks. The County has agreed to partner with Clifton Garden Club for implementation of this project. The County Department of Parks and Recreation will manage and plant the trees over a three-year period, ending in 2026. While we do not have final cost of the trees and labor at this time, the following species to be purchased are: Sweet Bay Magnolia, Musclewood/ Blue Beech/ Hornbeam, Red Maple, Sycamore, Black/Sweet Birch, American Holly, Swamp White Oak, Grey Birch, Hackberry, Bitternut Hickory, and Hophornbeam/Ironwood. [*Attached is estimate in reference to tree purchase]*

The County of Passaic understands that the EPA-OEJ will provide funding for the purchase of the trees and any protective materials needed to counter damage done by animals. If I may be of further assistance, please do not hesitate to contact me. I can be reached via email at kellyr@passaiccountynj.org or by phone Ex. 6 - Personal Privacy (PP) ext. CLIFTON, NJ 07013

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Sincerely,

Stephen A. Martin

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Khaatim Sherrer El

Address: Ex. 6 Personal Privacy (PP)

City: Newark

State: NJ: New Jersey Zip Code: 07108

B. Unique Entity Identifier (UEI): PDNPBCZ2GB51

C. Applicant/Recipient Point of Contact

Name: Kim Gaddy

Phone: Ex. 6 Personal Privacy (PP)

Email: Ex. 6 - Personal Privacy (PP)

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☐ Yes ☒ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Joan-Marie Foushe
Director of Talent & Operations
Ex. 6 Personal Privacy (PP)
Newark, NJ 07108

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Joan-Marie Foushe
Director of Talent & Operations
Ex. 6 Personal Privacy (PP)
Newark, NJ 07108

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Khaatim Sherrer El	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Letter 947

CLINTON HILL COMMUNITY ACTION

We sent a copy of this letter to your representative as indicated in your power of attorney.

Sincerely,

Stephen A. Martin

Director, Exempt Organizations
Rulings and Agreements

Work Experience // Hired Work

Managing Editor, *The Ithacan*, Ithaca College **(Apr. 2021 - Dec. 2021)**
The Managing Editor is in charge of making sure the production of the paper goes smoothly each week. Responsibilities include but are not limited to:
- Continual contact with the printer and then send paper to the printer each week.
- Organize and oversee the hiring and training of new Editorial Board members.
- Facilitate the creation, scheduling, and overseeing of weekly board meetings.
- Check, spell check, and PDF the paper each week.
- Maintain both an online and print schedule to make sure that deadlines are being met.

Orientation Leader, *New Student Transition Program*, Ithaca College **(Apr. 2021 - Aug 2021)**
- Led and facilitated community based activities with first year students
-Individually worked with 30+ students answering questions and giving advice
-Completed trainings that focused on conflict resolution, deescalation and diversity

Community Outreach Manager, *The Ithacan*, Ithaca College **(Aug. 2020 - Dec. 2021)**
As the Community Outreach I strengthen the relationship between The Ithacan and the wider campus community. As the Community Outreach Manager I have so far implemented; "Meet the Editors" to introduce the staff to the community, "The Intersection" a podcast to talk about intersectionality in relation to campus, and Common Hours once a month for people to connect and voice concerns.

Resident Assistant & Virtual Resident Assistant, *Residential Life*, Ithaca College **(Apr. 2019 - May 2021)**
-Created community, encouraged intersectional dialogue, mediated conflict, and planned engaging events for first-year students
-Served as a primary resource for students dealing with mental health issues, connected them with counseling services, and handled mental health crisis situations
- Providing virtual connections with students during fully remote learning

Social Media Manager, The Ithacan, Ithaca College **(Dec. 2019 - Feb. 2021)**

Ex. 6 Personal Privacy (PP)
Ex. 6 - Personal Privacy (PP)
Ex. 6 Personal Privacy (PP)
Ex. 6 Personal Privacy (PP)

The Social Media Manager for The Ithacan runs all of The Ithacan's social media platforms. They work to increase the following and engagement of those accounts. In addition, they create unique pieces for all of the different platforms.

Job includes but is not limited to:

- Scheduling stories to go up on Facebook and Twitter
- Making sure all our social media platforms are up-to-date and work uniform
- Keep up with DM's and notifications for messages
- Interact with other clubs and or groups on campus to keep a good relationship with them
- In charge of making graphics for the Instagram
- Update graphics for stories and breaking news
- At weekly meetings the social media editor will do weekly analytics to report impressions and interactions

Podcast Social Media Strategist, ***Everything's Political with Junius Williams*** **(Aug. 2020 - May 2021)**

- Development of the social media pages
- Managing and promoting social media by creating new posts and ensuring scheduled posts are released
- Checking analytics and ensuring all website pages and buttons are working correctly
- Creating hand-drawn images for guests and monthly graphics for the Podcast
- Creating Headliners/Moving graphics for promotions

Video Production Insturctor, Media Produtcion Assistant, & Youth Mentor (Jun. 2017 - Aug. 2021)

Graphic Designer, Web Designer, Social Media Manager, & photographer, ***Newark Moonlight Cinema***

Newark Moonlight Cinema is a pop-up black-owned drive-in movie theater. **(Jun. 2020 - Dec. 2020)**

-Created all company branding and content (ie. logo, social media graphics, banners, etc.)
-Made daily graphics to go out on all social media platforms
-Handled the scheduling of the graphics for all platforms
-Designed and branded a new website for a pop-up drive-in movie
-Implemented website design utilizing WIX
-Managed website by making updates daily; adding trailers, making tickets live, and handling customer questions on the chat feature

Orignial Content Creator, Youth Media Symposium (Aug. 2019)

- Created original branded content for the Youth Media Symposium (YMS) to highlight the summer program and what the students learned

On Campus Involvement

Dean's Host for the Roy H. Park School of Communications, Ithaca College (Sep. 2021-Dec. 2021)

- Provide weekly tours of the Park School of Communications to prospective students and their families.
- Assist in the planning, staffing, and running of All Park School Admission Events.

Marketing Committee Member, ***Students Today Alumni Tomorrow*****, Ithaca College (Sep. 2019-Jan. 2021)**

Public Relations and Event Planner, ***The D.O.P.E. Steppers*****, Ithaca College (Apr. 2019 - Jan 2020)**

Message from Our Founder & Executive Director

Welcome to February South Ward Family!

As we celebrate Black History Month, I appreciate this year's theme Black Resistance. This theme honors and recognizes the resistance of historic and ongoing oppression of Black people.

As I reflect on my work in the Environmental Justice space, I must thank the past, current and future EJ leaders for fighting for residents to Breathe Clean Air and have access to safe affordable drinking water in their neighborhoods and homes.

For the most part, community members, primarily people of color, started the environmental justice movement in the 1980s to address the inequity of environmental protection in their communities. The movement seeks to shed light on widespread environmental disparities and advocate for every American's right to live in a clean and healthy environment.

As members of the South Ward Environmental Alliance, you are a key part of the South Ward EJ Movement to address the environmental racism and unfair treatment we suffer from today and historically based on our zip code. You are the current Voices we need to resist the continued oppression that targets our families.

As an Environmental justice advocate, we seek to address, repair, and provide solutions to the historical and ongoing environmental injustices that are disproportionately experienced by Black, Indigenous, and people of color as well as low-income communities.

As part of our Environmental Resistance we must fight everyday to ensure environmental justice is prioritized in the government policies to address, mitigate, and alleviate environmental costs by dismantling systemic injustices and barriers to environmental and economic progress.

We will win, Mighty South Ward!
Stand up for Environmental Justice, Resist, Resist and Resist!
Your Life Matters. Join Us as we build One Ward, United for Environmental Justice.
In the Struggle,
Kim Gaddy, **Executive Director**

Upcoming Events:

- SWEA Monthly Meetings
  - Every 4th Wednesday
  - @ 6pm-7pm
  - Zoom Link
- Save the Date for SWEA's 2nd annual Enviornmental Summit
  - April 22nd @ 10AM

Clean Energy Jobs Coalition Meeting

On January 31st, South Ward Environmental Alliance's Executive Director, Kim Gaddy and Environmental Justice Organizer, Asada Rashidi attended the Clean Energy Jobs Coalition meeting. The Clean Energy Jobs NJ coalition is working to ensure New Jersey's clean energy transition is equitable and pro-worker. This coalition is composed of more than 40 community, labor, health, faith, equity, environment, and business groups including South Ward Environmental Alliance. The meeting consisted of ideas to strengthen strategizing advocacy efforts. Members discussed ways to influence elected officials to embrace an equitable transition to clean energy. Strategies to strengthen communication and community leadership through mobilizing non-traditional voices, using storytelling, Op-eds, advertisements, and targeted events were also explored. As a state and coalition, we can simultaneously take on the climate crisis and create well-paying, family-sustaining jobs. The coalition anticipates the state legislature to introduce a Clean Energy Jobs bill package in early 2023. Visit cleanenergyjobsnj.org to stay updated and learn how you can help.

New Hires

South Ward Environmental Alliance welcomes two new members to the team

Christopher Westbrook

SWEA is excited to bring in a new Youth Organizer into our community. South Ward family meet Christopher Westbrook. Chris Westbrook is a current junior at Towson University, where he studies Environmental Science.
He is a Baltimore native with past experiences working for Amazon as a fulfillment associate. Which is a fancy

way of saying manual labor. Westbrook would be the one to load your Christmas presents and bowling balls onto the trucks.
Westbrook is a passionate leader, he has goals in finding fulfilling work in the environmental sphere. He wishes to change people's lives in positive ways. Westbrook spent the second semester of his sophomore year studying abroad with the program Semester at Sea. Which is where he met our Communications liaison Frankie Walls. Since exploring the world, Westbrook has been reinvigorated to his passions in environmentalism and sustainability.

Westbrook's role in the organization as the Youth Organizer is to cultivate, recruit and engage South Ward youth to become the next generation of environmental justice advocates. This council of 5-7 youth leaders will work collaboratively to create an environmental justice action plan for a thriving and sustainable South Ward community. SWEA's Youth Council will plan and organize workshops, trainings and community meetings to educate the youth. They will also establish community outreach networks and clubs within schools to build urban sustainability Green Teams of students.

Azania Heyward-James

Azania Heyward-James is South Ward Environmental Alliance's new consultant. Ms. Heyward-James is a well-known expert public health analyst, advocate, and community development strategist. Her passion for empowering the community by bringing information, capacity, and tools to advocate for themselves was sparked through exposure during her upbringing and schooling. Ms. Heyward-James is a graduate of Spelman College, University of Massachusetts Amherst, CDC's Leadership and Management Institute, and the Institute of Integrative Nutrition in partnership with SUNY and is a board-certified holistic health coach through the American Association of Drugless Practitioners. Cultural experience with PanAfricanism and Kwanzaa principles influence her everyday personal and professional lifestyles. She has always been interested in the health of bipoc communities. Ms. Heyward-James led public health campaigns, pipeline training and workforce development, environmental remediation efforts at the Centers for Disease Control and Prevention (CDC) and Agency for Toxic Substances and Disease Registry (ATSDR) for more than 20 years traveling internationally to provide technical assistance.

Ms. Heyward-James now leads a team of strategists in a newly launched policy nonprofit

organization, the Cornerstone Collective 2020 Global and Dame Consultants. The Collective seeks to support and implement existing and emerging sustainable strategies to improve all aspects of health, wellness and quality of life, and mitigate adverse health outcomes through engaging, informing, influencing, and collaborating with policymakers to drive policy change.

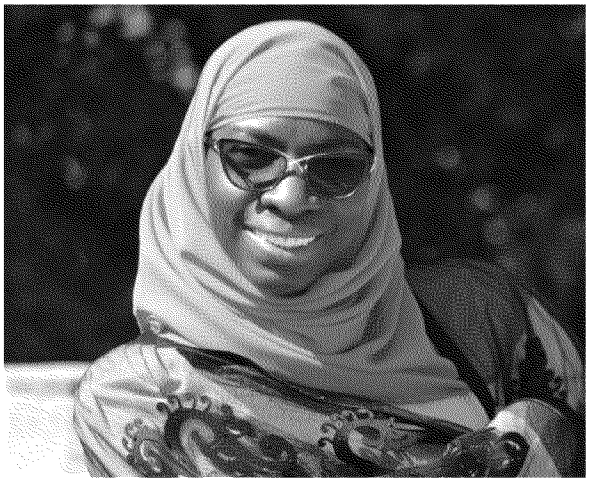
South Ward Environmental Alliance is excited to work with Azania Heyward-James, as she will assist with transforming the data received from our Air Quality Monitoring Project into a narrative that captures disproportionate exposures to pollution that the South Ward community faces. Ms. Heyward-James will assist in creating infographics that will break down the language and science, make it digestible for anyone in the community to understand. Ms. Heyward-James believes that there is not a more powerful voice than we the people. With her help SWEA will be able to build capacity and capability in the South Ward community to have residents become active participants in decision-making policies that impact their neighborhood.

SWEA Senior Advisory Board Member Highlight: Marva Hopps

The South Ward Environmental Alliance has established a Senior Advisory Board composed of senior citizens representing the Clinton Hill section, Weequahic section, and Dayton Street section, all areas of the South Ward of Newark. This board will seek to educate and engage other seniors from the community on environmental issues that are affecting the health and welfare of their specific population, and will motivate other senior residents to become active participants in the environmental justice movement.

We are proud to highlight this month one of our Senior Advisory Board members from the Seth Boyden Elderly community, Ms. Marva Hopps, affectionately known as “Cookie”, who was borned and reared in Dade City, Florida and migrated to Newark, NJ in 1999. She worked in child care for Karate for Youth in Irvington, NJ for several years.

Ms. Hopps said she was proud to have taken computer classes at the New Community Corporation. She later was employed as a dietician at the Mt. Carmel Guild until her retirement. Ms. Hopps moved to Seth Boyden Elderly Complex in 2003. She later became active in the community working with other resident leaders. She is the founder and president of Women on the Rise and served as the tenant association vice president and later president. Ms. Hopps continues to serve her community in assisting other senior residents in need of medical and social services. Her life has been dedicated to volunteerism and advocacy.



She was asked the question of as a community leader and SWEA Senior Advisory Board member, what do you see as your role to address the environmental issues in the community? She simply responded that her role is to educate other seniors on the environmental issues and its impact on their health and to develop other leaders in the community to continue this fight.

Ms. Hopps says the greatest problem that she sees in the Dayton Street community is impacting the environment is the immense truck traffic and the related fumes of emissions that it generates. She also fears that as pedestrians, they have to carefully negotiate the truck and tractor trailer traffic often placing them at high risk of accidents.

SWEA welcomes Ms. Marva Hopps to the team and the energy that she will bring to our organization.

Sonny William Gaddy Jr. Entrepreneurship Recipient:

Dena Corbin

2023 Sonny William Gaddy Jr. Recipient of the Entrepreneurship Award
Growing season 2022 was a very full year for Natural Ground 1. On June 30, 2022, I had to close my schedule. I could no longer assist with planting any more gardens, lead any more workshops or take on any more speaking engagements. But that did not sit well with me. So, I decided to design a gardening program, with the name I used when I was a Special Needs Teacher entitled, "GrOW a Garden and GrOW Yourself: Where Gardening, Creativity, and Nature Meet". This program focuses on teaching individuals, families, and communities my signature gardening skills. The program infuses my knowledge and most of all my passion for creating expansive garden spaces, the art of growing food and bringing people together for enjoyment. Having developed a unique way of learning engagement, skills development, and personal enhancement through the joy of gardening and connecting to Nature; I am beyond excited to get started.

I truly feel it is now time to impart that knowledge onto other people. I will be teaching my life's work through field trips and invited speakers' participants will learn about various aspects of gardening through a different lens. Engage in ways that will teach garden design and implementation of gardens and green spaces that offers a full wellness and well-being environment along with growing and harvesting food. Participants will be encouraged to support existing gardens or design one of their own and share what they have learned from Natural Ground 1: Grow a Garden and Grow Yourself, and the cycle of support continues.

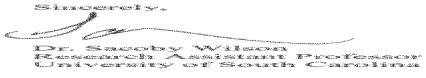
April 11, 2023

Mr. Jacob Burney
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
Washington, D.C.

Dear Mr. Burney,

My name is Dr. Sacoby Wilson and I am pleased to describe my commitment and that of my CEEJH colleagues to the proposal being set forth by the South Ward Environmental Alliance (SWEA) and their fiscal sponsor, Clinton Hill Community Action (CHCA), titled "One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative". I am a Professor with the Maryland Institute for Applied Environmental Health, School of Public Health, University of Maryland-College Park and Director of the Center for Community Engagement, Environmental Justice, and Health (CEEJH). CEEJH was founded in 2011 as a laboratory and relaunched in 2021 as a Center to assist frontline and fenceline communities impacted by environmental, climate, and energy justice issues through technical assistance, scientific support, and use of community-engaged research approaches including the community-based participatory research (CBPR) framework and community science. I personally have almost 25 years of experience using the EPA Collaborative Problem-Solving Model dating back to my contribution to the efforts of the West End Revitalization Association to address the lack of basic amenities and the planned expansion of the 119 Bypass in the late 90s. I have integrated the CPS Model into all of my community-engaged research, scholarship, and practice since then.

CEEJH has been working throughout the Mid-Atlantic for over a decade with community-based organizations including groups like SWEA. Recently, CEEJH received a grant from the Robert Wood Johnson Foundation (RWJF) to launch the Mid-Atlantic Climate Action Hub (MATCH) whose goal is to provide technical assistance to communities impacted by environmental and climate justice issues. We have engaged community-based organizations in Prince George's County, Virginia, Eastern Shore/Southern Delaware, Philadelphia, New Jersey, and Baltimore to act as hubs for MATCH. SWEA is a community hub for MATCH. Additionally, I am co-Director of the recently funded Thriving Communities Technical Assistance Center (TCTAC)(National Wildlife Federation is the lead and the UMD EFC is a core partner) for Region III. Through this TCTAC, we will provide technical assistance to communities impacted by environmental and energy justice issues to help them build their capacity to address their local concerns. The technical assistance will include providing grantwriting assistance.



Additionally, with Namati (lead organization), I am helping to develop and implement the Mid-Atlantic Environmental Justice Academy which was funded through an EPA Collaborative Problem-Solving Grant. Through this funding, we will be training members of impacted communities and other stakeholders to develop their skills to address their local environmental justice concerns. Furthermore, through funding from Meta, I have launched the Climate Justice Fellows Program, a sister program to the Mid-Atlantic EJ Academy, to train residents and other stakeholders on climate justice, equity, and health issues. Participants are required

to complete a Capstone project as a way to provide direct support to a community experiencing environmental, climate, and energy justice issues.

The implementation of SWEA's project is extremely important to the underserved and overburdened communities in the Dayton, Weequahic and Clinton Hill neighborhoods in the South Ward of Newark, New Jersey. The South Ward community is surrounded by the second largest port in the United States, Newark Airport, major interstate highways, such as the New Jersey Turnpike and numerous county roads including Routes 22, 1, 9, and 78. All of the aforementioned environmental burdens expose the targeted communities to high levels of toxic emissions from air, marine, vehicular and freight traffic. For the past two years, my team has been working with SWEA to develop and implement a community-driven hyperlocal air quality monitoring network to understand the cumulative impacts of air pollution in the area.
In support of SWEA's proposal, CEEJH will provide workshops to communities that SWEA serves. The workshops will cover: (1) The relationship between environmental justice, air quality and community science; (2) The importance of implementing user-friendly air monitoring technology to track every day and cumulative exposures to air pollution; (3) The utilization of low cost sensors (such as the Purple Air) to collect continuous real time data; (4) Analysis and Interpretation of data from air monitors; (5) The importance of reliable, compelling data for environmental justice advocacy and health policy changes; and (6) Use of effective dissemination strategies to present the air monitoring data in a compelling and convincing manner to local, state, and federal agencies and policy makers.

As a designated environmental justice and climate action hub and close collaboration with the Mid-Atlantic Environmental Justice Coalition, we feel we are particularly well suited to serve as a partner in the work of this proposed project. Should EPA have any questions about the outlined commitments, please reach out via the contact information noted below.

Sincerely,

Dr. Sacoby Wilson, Professor and Director

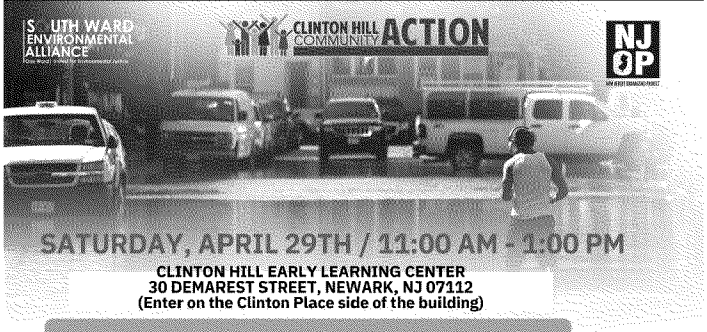
Message from Our Founder & Executive Director

Welcome Spring!



Greetings South Ward Family,
April is the month we celebrate Earth Day. The theme, "Invest in Our Planet" is the opportunity for everyone to invest in activities to improve our environment. We only have one planet to live and raise our families, so we must protect Mother Earth for the future generations. This is your opportunity to increase awareness about the air you breathe, the water you drink and the food you eat. Encourage your neighbors to participate in a community clean up, plant a tree, visit a park, recycle, reduce and reuse items.
The actions we take can save our planet, our health and community.
Join us on April 22nd for our 2nd Annual Environmental Summit, 10am-2 pm, breakfast starts at 930am.
Mighty South Ward, our health and life matters!
Join Us at the table for Environmental Justice, your seat is waiting for you.

In Solidarity,
Kim Gaddy, Executive Director

Upcoming Events:

- Administrative Public

Hearing for Sims Metal Newark (virtual)theinformation session will be held on April 13th 6:00pm - 8:00pm For instructions on how to register for and join the session, please contact Sims by email at

One and a half years after Hurricane Ida, both renters and homeowners are still struggling with no true recovery in sight. Since the storm, the New Jersey Organizing Project has connected with other survivors and now are standing together to demand that Ida survivors get the recovery we deserve.

Great news, there are grant programs for impacted Newarkers! Join us to learn about Hurricane Ida grant money by attending this Community Meeting & connect with our Housing Justice Team!!!

- Join us on April 22nd for the South Ward Environmental Alliance's 2nd annual Environmental Summit. Register with the link here. Full agenda and more summit information here on our website.
- SWEA Monthly Meeting via Zoom on April 26th at 6pm Monthly Meeting Zoom Link
- Join us for SWEA's Annual air quality monitoring and truck count to collect data on emissions in the South Ward on April 26th and 27th. Registration link here.
- Join SWEA and CHCA on Saturday, April 29th, 11AM-1PM to discuss Hurricane Ida Recovery Programs and the $228 million in Community Development Block Grant-Disaster Recovery (CDBG-DR) funding from the U.S. Department of Housing and Urban Development to fund the recovery programs. See flyer above, and visit online for more information or to apply for storm recovery programs.

Apply to join NJ's Environmental Justice Advisory Council!
DEP is seeking applications from interested individuals to be considered for appointment to the Environmental Justice Advisory Council (EJAC).
There are seven (7) vacancies for three-year terms from 2023 through 2026 in the following sectors:

- Local grassroots or community groups (1 vacancy)
- Statewide environmental justice or environmental advocacy organizations (1 vacancy)
- Statewide social justice/civil rights or labor organization (1 vacancy)
- County or municipal government or planning professional (1 vacancy)
- Academia (2 vacancies)
- Business and Industry (1 vacancy)

Applications must be submitted by 5:00 pm on April 21, 2023 in order to be considered.

Two South Ward Organizations Team Up to Train Residents for the emerging Green Jobs Economy

Newark, NJ – March 27, 2023 Partner organizations South Ward Environmental Alliance and Clinton Hill Community Action, both of Newark, were honored as the recipients of a NJ Building Our Resilient, Inclusive, and Diverse Green Economy (NJ BRIDGE) grant award at a New Jersey Council on the Green Economy event on Monday, March 27th. The award provides $1.3. million, over two years, and will fund a pilot program focused on building a diverse, inclusive green workforce in the South Ward of Newark.

The NJ BRIDGE grant was announced by NJ First Lady, Tammy Murphy, who participated in a roundtable on "Building New Jersey's Inclusive Green Workforce" with panelists including, Kim Gaddy, Founder and Executive Director of the South Ward Environmental Alliance; NJ Council on the Green Economy Executive Director, Jane Cohen; and representatives of other awarded organizations.

"This project represents a true partnership between the South Ward Environmental Alliance (SWEA) and our community development organization," observed Khaatim Sherrer El, Executive Director of Clinton Hill Community Action (CHCA). "The work follows Kim's vision to grow the next generation of environmental justice advocates and to diversify the green jobs sector."

In creating a Green Jobs Hub, SWEA will partner with CHCA to recruit 120 South Ward residents and provide wrap-around support for a 16-week job training

program that starts with participation in SWEA's Green Alliance Leadership Academy (GALA). GALA is a work-ready program designed to help traditionally underrepresented populations explore careers in environmental justice and connect them with certification-bearing job training programs in areas including green infrastructure (water management that protects, restores, or mimics the natural water cycle) and energy efficiency. SWEA will identify prospective employers, and the two groups will then work together to match participants with employment and additional specialized training opportunities.

Timisha Woods, a South Ward resident, and certified Newark's Green Infrastructure Installer participated in the City of Newark, Green Works program. "Newark's Green Infrastructure Program has not only created more awareness of the environmental issues we face here in Newark and cities like ours but has also trained us to be part of the solution. I am prepared to manage GI projects in the South Ward, City of Newark, and throughout the State of New Jersey, stated Timisha Woods."

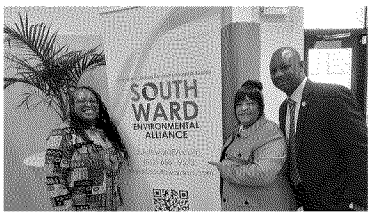
"The green economy and jobs in the green workforce—like *Green Infrastructure Installer* or *Solar Installer*—have not been careers discussed in schools or around the kitchen table in African-American and Latino communities. GALA will give participants the background, language, and confidence to pursue careers in the field," explains Ms. Gaddy. "GALA will empower participants as leaders who turn their years of living through environmental degradation into opportunities to effect positive changes in their communities and the State."

"The project will create a sustainable workforce development ecosystem for green jobs in Newark's South Ward. This Green Jobs Hub will integrate strategies to address barriers to employment and foster strategic partnerships to help participants secure living wage jobs with upward mobility in the green economy," concluded, Gaddy.

"Clinton Hill Community Action has been committed to environmental justice since its inception. "We are grateful that our strategic partner, South Ward Environmental Alliance, helped us connect the dots between housing and environmental justice from the beginning. We have worked together to empower residents to address in-home lead and asthma hazards, and made environmental justice a priority focus in our Neighborhood Plan. In the Fall, we will launch a tree planting and sidewalk repair project to grow our tree canopy as one of the priorities for our neighborhood identified by residents," continued, Mr. Sherrer El.

Newark's South Ward is an area that, like many low-income urban areas, suffers disproportionately from pollution. In its case, this is a result of proximity to incinerators, the Port of Newark and its truck traffic, Newark Liberty International Airport, and the highways that crisscross the South Ward.

South Ward Environmental Alliance is an alliance of residents and community-based organizations focusing on the cumulative impacts of pollution impacting the three neighborhoods of the South Ward. SWEA's mission is to cultivate healthy and vibrant neighborhoods by ensuring residents' voices are heard, and they are active participants in decision-making policies that impact their neighborhoods. SWEA has three core programs: Air Quality Monitoring, Water Equity, and the Green Alliance Leadership Academy.



Clinton Hill Community Action was founded in 2019 as a non-profit community development organization that aims to revitalize the Clinton Hill neighborhood in Newark's South Ward. Priority areas include housing and environmental justice; food and economic justice; citizen journalism and advocacy; and community building. Nearly 95% of CHCA's employees live in the South Ward. In 2021, CHCA completed a comprehensive redevelopment plan for the Clinton Hill neighborhood

contributed to by more than 300 residents and 25 community organizations.

Governor Phil Murphy's Office of Climate Action and the Green Economy (OCAGE), in collaboration with the New Jersey Department of Environmental Protection (NJDEP), are the agencies overseeing the NJ BRIDGE initiative—a program to fund scalable projects to support residents entering the green workforce or climbing the green career ladder, with a focus on engagement in overburdened communities.

Moving Forward Network (MFN) Delegates Convene in D.C.

The Moving Forward Network, a national network of over 50 member organizations representing over two million people from across this nation convened in Washington, DC on March 13-16, 2023 to meet with the Environmental Protection Agency Administrator Michael Reagan to address the issue of Zero Emissions within the freight transportation industry. Asada Rashidi, Environmental Justice Organizer was a presenter. In addition, delegation groups met with their Senate and Congressional Legislative staff to seek support for the administration's policy to regulate mandates to eliminate diesel fuel emissions from freight vehicles that are affecting the health of our overburdened communities.
The South Ward Environmental Alliance, a member of this network, was well represented and spoke on how this issue and other pollutants are devastating the South Ward neighborhoods. Kim Gaddy, SWEA Executive Director and a MFN Advisory Board Member representing the New York/New Jersey region led the NJ delegation and introduced our next generation of environmental justice leaders from our community to the legislative side of advocacy.

Zero Emission in Freight: Specific Demands From MFN to EPA

1. MFN is calling for EPA to have 100% zero emission across the freight sector by 2035 at the latest.
2. MFN is demanding the retirement of all combustion trucks, trains and ships on or before 2045.
3. Freight impacts are not limited to modes of transportation and therefore the EPA must immediately begin to move an indirect source rule and review process for warehouses, railyards and ports.
4. EPA must support state and local actions to address freight pollution, EPA should immediately be accounting for and issuing guidance on State Implementation Plans. Ensure that all states are submitting state implementation plans and meeting air quality standards. As well as require States to report the emissions from freight facilities and devise and advocate for control measures and solutions to address the problem.
5. Funding of public money regarding transportation must go to zero-emission solutions and technology. This funding should prioritize environmental justice communities who are most impacted. Funding programs must be coupled with regulatory requirements that will target mandatory emission reductions for EJ communities.

Climate Action Campaign & National Public Health Lobby Week in Washington D.C.

South Ward Environmental Alliance (SWEA) and Parents Engaging Parents (PEP) were invited by Friends of the Earth (FOE) to join the Climate Action Campaign & National Public Health Lobby Week in Washington D.C. during March 21st through March 23rd, 2023. Day one consisted of messaging training and meeting preparation. Day two and three were scheduled meetings on Capitol Hill. Asada Rashidi, Atlorice Frazier, Erica Beverett, Brehal West and Terrance Bankston from SWEA, PEP, and FOE met with the staff of New Jersey Representatives, Congressman Payne, Congressman Kim, Congresswoman Coleman and Congresswoman Sherill, as well as Senator Booker and Senator Menedez. During the meetings on Capitol Hill, members from SWEA, PEP, and FOE expressed how soot pollution and the EPA's 24-hour rule affects their prospective communities in New Jersey, such as Newark and East Orange. The specific requests were to ask the Congressional representatives and Senators to sign the Soot Dear Colleague letter, to oppose the Congressional Review Act (CRAs) including the Heavy-Duty Truck rollback, and how constituents can continue to strategize to engage the members on regulatory issues. By the end of the last day, news was received that all the representatives that SWEA, PEP, and FOE spoke with, signed on to the Dear Colleague Soot letter, which was a major victory. Individuals and organizations must continue to advocate and fight for their rights in order for change to occur. Thank you, Friends of the Earth, for inviting South Ward Environmental Alliance and we look forward to our continued partnership and collaboration.

SWEA Senior Advisory Board Member Highlight: Bernice Johnson

The South Ward Environmental Alliance is happy to welcome Ms. Bernice Johnson to our Senior Advisory Board representing the Dayton Street community. This is a frontline community that is greatly impacted by the pollution of being in the

proximity of the airport, seaport, railway, highways and commercial warehouse industrial zone. The crippling air quality in that community has rested heavily on the respiratory issues in her community. The Johnson Family has played a significant role in the development and stabilization of that community for years. She was born and raised in Newark, NJ and proud to have raised her family here as well. She graduated from Weequahic High School. Ms. Johnson retired from the Newark Public Schools as a teacher's assistant in special education. Still a very active and visible pillar in the community, she participates in many senior events and affairs, always impeccable in dress and style, and is known for her wonderful sense of humor. Ms. Bernice, also affectionately known, alway adorns
the most elegant hats when she attends her church services on Sundays.
Ms. Johnson said that her greatest concern for her community is the increase in crime and the air quality where many children in her community are born with asthma and suffer from respiratory illnesses. She sees her role as an Advisory Board Member to this organization to educate her community on environmental issues and have a greater level of input.

Jacob Burney
U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External
Civil Rights (OEJECR)

RE: Letter of Support for South Ward Environmental Alliance's Proposal to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program

Dear Jacob Burney,

The Rutgers Cooperative Extension Water Resources Program is pleased to write this letter of support for South Ward Environmental Alliance's plans to implement a One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure project to improve air quality and amplifying engagement to improve the quality of life for residents of the South Ward of Newark.

As a partner delivering services and as an instructor for the Green Infrastructure Champion Training Program for the South Ward Environmental Alliance, I am very excited to support this grant. I have been working with the Newark Workforce Development Board and Newark Greenworks to deliver green infrastructure training to residents in the city. It is very important to focus on giving the local residents the skills they need to become successful and for the city to use their funding to hire Newark residents to help address environmental justice issues. This allows funding to stay in the city of Newark, increasing the community's wealth and helping promote equity within the community.

Please feel free to contact me directly at Ex. 6 - Personal Privacy (PP) or Ex. 6 - Personal Privacy (PP) with any questions. I hope that you will respond positively to this proposal request.

Sincerely,

Christopher C. Obropta, Ph.D., P.E.
Extension Specialist in Water Resources

Message from Our Founder & Executive Director

Welcome Women's History Month!

Greetings South Ward Family,
As we celebrate Women's History Month, I want to acknowledge women leaders in the environmental justice field who have made a difference in the Newark communities.

Gratitude to Regina Townes, Asada Rashidi, Frankie Mo'Nay Walls,Chloe Desir,Tia Ryans, Melissa Miles, Maria Lopez-Nunez, Dr. Ana Baptista, Nicole Miller, Donna Kirkland, Cynthia Mellon, Elizabeth McGrady, Carla Robinson, Rhenotha Whitaker and Wynnie Hinds.

My favorite quote from Shirley Chisholm,"You don't make progress by standing on the sidelines, whimpering and complaining, You make progress by implementing ideas".

Thank you to the Unsung Sheroes for standing up. I see you, appreciate you and recognize the great work you are doing to clean the air, provide safe & affordable drinking water, ensure food justice, open space and healthy homes.

Let's continue the fight everyday, lifting up the voices of the voiceless. We can change our communities and live a healthier life free of pollution. Join us at the table, your seat is waiting.

Peace and Blessings,

Kim Gaddy
Executive Director

SWEA Youth Summit

We are excited to share the success of our youth retreat on Saturday, February 25, 2023, at The City of Newark's Camp Watershed. It was a fantastic event that brought together young people from the South Ward to learn, engage, and connect with their community.

We want to thank Kenya Travitt, the camp director, for allowing us to host our event there and leading a tour of Sun Tan Lake. It was an enriching experience for our youth to learn about the local environment and its importance to the community. The retreat was a collaboration with Parent Engaging Parents (PEPNJ), and we were delighted to have their participation. The panels and activities included workshops from our Executive Director, Kim Gaddy, and Retreat Coordinator, Terrance Bankston.

The workshops focused on various topics, including environmental justice, climate change, and sustainability. The young participants learned the importance of advocating for clean air, safe drinking water, and a healthy environment. They also explored the impact of climate change on their community and learned ways to reduce their carbon footprint.

In addition to the workshops, the retreat also included team-building activities and group discussions hosted by various members of the SWEA team. It was an opportunity for young people to connect with their peers, share their experiences, and build new friendships.

We are proud of the enthusiasm and commitment showed by the youth who participated in the retreat. The youth are the future of our community, and we are

confident that they will become strong advocates for environmental, social, and economic justice. Once again, we want to express our appreciation to all who made this retreat successful. We look forward to more events like this in the future.

Love is in the Air

February is the month historically known for celebrating our loved ones and special sweethearts,sending them flowers, chocolate candies, gifts and having romantic candle lit dinners. This is that one time of the year that we pause on Valentine's Day to show how much we love our special loved ones. This year SWEA embarked on a new concept to show love to the community and the environment in which we live, love, work, learn, play and raise our families.

We hosted our first Valentine's Party for our senior residents at the Newark Public Library, Weequahic Branch on Wednesday, February 15, 2023 to celebrate our love for our South Ward community. A delicious dinner buffet was prepared, to include a sparkling cider champagne toast to initiate our continued support to protect our environment.

This community event brought out many of our community partners, community police officers and community greetings from our South Ward Councilman Patrick Council and Councilwoman-at-Large Louise Scott-Rountree, both who engaged the guests on issues that affect our community. Kim Gaddy, Executive Director of SWEA led the community conversation on how we can better serve and advocate for the protection of our South Ward community.

Ms. Elizabeth McGrady,AARP Newark Representative, former member of the Newark Environmental Commission and a member of the United Parks As One, was the keynote speaker for this year's event. Ms. Azania Heywood-James, Data Analyst Consultant for SWEA introduced THE DAPP(Translating Health-Related Environmental Community Data for Actionable Practice & Prevention) a community guidance tool to inform, educate, equip and empower communities. Educating our community on the importance of translating data into action, practice and policy aligns with improving our quality of life and a hazard-free living in the South Ward.

SWEA Senior Advisory Board Member Highlight: Minnie Green

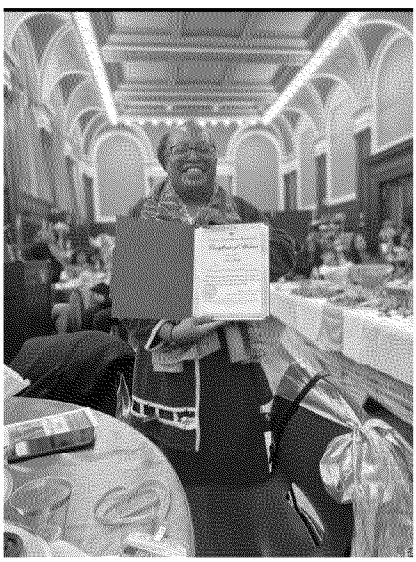
This month SWEA would like to shine the spotlight on another one of our community representatives. We are pleased to introduce Ms. Minnie Green of the Seth Boyden Elderly community. She has resided in this community for the past 16 years and has been an active participant in the resident leadership in this community. She has served on the tenant association board, worked with the community food bank and continues to assist her neighbors whenever she is needed. Ms. Green prides herself in being of service to her community and understands the need to provide opportunities and programs to better serve the many residents of public housing.

Ms. Green was born and raised in the City of Newark, attending Morton St. School and graduated from South Side High School (now renamed Malcolm X Shabazz High School). Her career began working for Prudential Insurance Company in several different capacities in the clerical field for 29 years. She worked in child care for several different day care centers which developed her love for children. Ms. Green, wife, mother of 8 children, and 5 grandchildren, understands the importance of family and raising them in a safe and healthy community. Her greatest concern is the demolition of the commercial and industrial buildings on Frelinghuysen Ave. and all of the debris dusting that is emitted into the air. Her community has to also deal with the voluminous commercial traffic of the trains, planes, buses and trucks all emitting diesel fumes that are impacting the health of her community.

We welcome Ms.Green to our SWEA family and look forward to her activism in supporting us for a healthier community.

Spotlight for Women's History Month Unsung Shero

KIM GADDY is the National and New Jersey Environmental Justice Director for Clean Water Action. She has been advocating for communities impacted by industrial pollution and the goods movement system in Newark and



across the country for 21 years. Kim develops and implements Clean Water Action/Clean Water Fund's grassroots environmental justice campaigns and coalition building efforts in New Jersey.
Kim was recognized as the 2021 Russ Berrie Making a Difference Honoree for New Jersey, 2021 International Black Women's Congress Oni Award Recipient, 2021 Weequahic High School Hall of Distinction, 2020 UUFaith in Action Environmental Justice Award, 2020 New Jersey Governor's Richard J. Sullivan Environmental Excellence Award, 2018 Newark Women from Suffragettes to the Statehouse, 2017 selected as 100 People of Newark and a 2007 recipient of the Environmental Protection Agency Region 2 Environmental Community award.

Congratulations on your Women's History Month recognition of Honor from the Greater Newark Women's Assembly for your life-long service to the South Ward community. We thank you for your many contributions to the City of Newark, serving as the first female Chief of Staff for the Newark Municipal Council, Hon. Mildred Crump, the first African American Councilwoman elected to the Newark Municipal Council, first legislative Aide to work for three different Municipal Council members, the first Chair of the Newark Environmental Commission, the founder of the first South Ward Cultural Center and the founder of the first Environmental Justice Organization in the South Ward.

"I am thankful for being the first, but I want residents to remember me as a strong Black Woman from the Mighty South Ward, who showed up everyday as her true authentic self fighting passionately for environmental, social and economic justice for all people of Newark" stated Kim Gaddy, Founder and Executive Director, South Ward Environmental Alliance

We thank you Kim Gaddy and honor you as a true trailblazer training up and preparing the next generation of environmental advocates to Stand Up and Fight for our basic human Rights to breathe Clean Air and have access to safe affordable drinking water.

PROGRAM OBJECTIVES

Project Title: One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative

Project Location: The project is located in the South Ward of Newark, New Jersey, USA, 07112. The affected neighborhoods include the Dayton Street, Clinton Hill, and Weequahic areas. The South Ward is the backyard of the Port of NYNJ, the 2nd largest port in the US. Zip codes are as follows: 07112, 07114, 07108.

Brief Description of Applicant Organization

Clinton Hill Community Action ("CHCA") was founded in 2019 as a nonprofit community development organization that aims to revitalize the Clinton Hill neighborhood in Newark's South Ward. Our priority areas include housing and environmental justice; food and economic justice; citizen journalism and advocacy; and community building. Nearly 95% of CHCA's (25) employees live in Clinton Hill or the South Ward. In 2021, CHCA completed a comprehensive redevelopment plan for the Clinton Hill neighborhood. Environmental justice is a priority, and the work calls for investments to address the lead in the older homes in the neighborhood, increasing the energy efficiency of those homes and expanding the tree canopy in the neighborhood. The South Ward Environmental Alliance ("SWEA") served on the planning committee for the plan and now leads the implementation, alongside CHCA, of this priority. CHCA's Housing & Environmental Justice team works closely with SWEA. CHCA partnered with SWEA to focus on clean air in the home, school, and community. South Ward Environmental Alliance of Newark was honored as the recipient of a NJ Building Our Resilient, Inclusive, and Diverse Green Economy (NJ BRIDGE) grant award at a New Jersey Council on the Green Economy. The award provides $1.3. million, over two years, and will fund a pilot program, to be implemented in partnership with Clinton Hill Community Action, focused on building a diverse, inclusive green workforce in the South Ward of Newark. This project represents a true partnership between the South Ward Environmental Alliance (SWEA) and CHCA, our community development organization. The work follows SWEA's vision to grow the next generation of environmental justice advocates and to diversify the green jobs sector.

No, SWEA is not applying for the Small CBO Set Aside Track for $150,000 projects.

Project Abstract

SWEA proposes to create the One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative. This project will address underserved and overburdened communities in the Dayton, Weequahic and Clinton Hill neighborhoods in the South Ward of Newark, New Jersey. SWEA is uniquely suited to serve as the EJCPS lead because of the credibility and trust we have gained from community leaders and residents to address and increase awareness of local environmental and public health issues in the city of Newark. The South Ward Environmental Alliance (SWEA) has established trust and credibility in the South Ward of Newar by moving at a speed of trust and lifting as we climb. SWEA utilizes an intentional focus to create an inclusive collaborative table to allow all voices to be heard. We ensure residents speak for themselves and control the narrative of how their community functions. SWEA recruits South Ward

residents and stakeholders to serve on our Community Advisory Board for the Air Quality Monitoring Project and the Youth Advisory Board. We know the residents are the experts, so we engage them at every level, regarding research planning, data dissemination and implementation of our programs.
Main Objective: The One Wrd United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative is a comprehensive training and monitoring project that will amplify and unify engagement in the three neighborhoods of the South Ward to improve the quality of life for all residents.
Objective 1: Capacity building for air monitoring and advocacy. SWEA will facilitate workshops that increase public awareness on environmental justice issues, and empower residents to use low-cost, real-time air quality monitors to detect, measure, and visualize concentrations of common air pollutants. This effort will help streamline best practices for establishing a community-based air pollution monitoring network.
Deliverable(s): Create Translating Health-related Environmental Community Data for Actionable Practice and Prevention (THE DAPP), a community guidance tool to inform, educate, equip and empower communities with understandable information and tools that translate into action.
Activities: The Green Alliance Leadership Academy (GALA) workshops will increase public awareness on environmental justice issues, and empower residents to use low-cost, real-time air quality monitors to detect, measure, and visualize concentrations of common air pollutants.
(6 days, 2-hour sessions)
Objective 2: Capacity building for Green Infrastructure Initiatives. SWEA will develop strategic partnerships with community organizations to identify strategies and partners to leverage GI as an educational and job opportunity.
Deliverable(s): SWEA will facilitate the development of new GI projects in the city, bring more awareness to new and imminent GI projects while soliciting valuable community feedback and highlighting the green job opportunities which are one of many co-benefits of green stormwater management solutions.
Activities: Train and engage South Ward residents as GI Reformers and participants of the Rutgers Cooperative Extension Green Infrastructure Champion class.

SWEA partner, NewarkDIG, established in 2013, is committed to continuously improving the quality of life, health, and viability of the City of Newark and its residents through the use of strategic collaborative methods including: community-driven urban design, public policy planning, environmental and social justice advocacy, education, and local capacity building. Our primary goal is the establishment of sustainable green infrastructure (GI) as the first line of defense to better manage stormwater runoff, improve water quality and resiliency to flooding, and reduce combined sewer overflows (CSOs), with a focus on the Passaic River and its tributaries. Additionally, our programs will build public awareness and stewardship of our local waterways through a process centered in community engagement principles.
NewarkDIG has built a reputation of starting with community engagement led by local organizers to spread the word about CSOs and seek public input on the development of plans to manage these concerns. Funding for our GI Reformer team will help to expand our outreach, supply updated materials in a variety of mediums and hire local ambassadors allowing our teams to educate the public on adopting catch basins in their neighborhoods.
In 2020, SWEA and NewarkDIG worked with our partners to help establish Newark GreenWorks, a program training classes for the National Green Infrastructure Certification Program (NGICP). Coming out of the worst effects of this pandemic, NewarkDIG and our partners identified the potential opportunity on the near horizon for Newark-trained workers and entrepreneurs with knowledge and experience in green infrastructure. The NewarkDIG GI Apprenticeship program will provide paid employment hours for NGICP trainees to assist with designing, installing and/or maintaining green infrastructure systems. The work of our GI Reformer team, South Ward ambassadors and our technical partners at the Rutgers Water Resources Program will develop working designs for these locations to install and maintain them. These three priority areas will allow SWEA to facilitate the development of new GI projects, bring more awareness to new and imminent GI projects while soliciting valuable community feedback and highlighting the green job opportunities which are one of many co-benefits of green stormwater management solutions.

NewarkDIG (Doing Infrastructure Green) is deeply involved in the work of improving stormwater management throughout the city of Newark. Through our involvement with the City of Newark Department of Water & Sewer

Utilities, NewarkDIG has advocated for a comprehensive approach to stormwater management including green infrastructure as the most visible yet underused municipal solution. With the support of NewarkDIG and our partners, the City of Newark has committed to managing more than 214 acres of public property in their submitted CSO Long Term Control Plan. As we anticipate the start of Newark's ambitious green infrastructure plan, SWEA and our partners, Rutgers Water Resources, NewarkDIG have secured a $1.2 million grant from the NJDEP to construct one portion of our Fairmount Avenue Green Streets CSO mitigation project. Anticipated to begin in the 2nd Quarter of 2023, this project will likely be the first major GSI project in the city. Expected to manage 15 acres of urban CSO territory, the project will also include a large engagement and outreach component to inform residents and local businesses about the effects of unmanaged stormwater and the benefits of green infrastructure.

Outputs/Outcomes

SWEA will build on the previous air monitoring and truck count activities as the lead project coordinator and community liaison with technical assistance rendered by; the University of Maryland School of Public Health Center for Community Engagement, Environmental Justice, & Health (CEEJH); Rutgers University Environmental and Occupational Health Sciences Institute (EOHSI); and the New Jersey Department of Environmental Protection's Division of Air Quality. Together the partners collocated and deployed a series of 12 Purple Air PA-II-SD stationary particulate matter monitors (four per neighborhood) throughout the study area. Real-time data will be aggregated and made available for public viewing and download. The data collected--and findings reached--through study of this network will be used to collect air pollution data at a level granular enough to help citizens and policymakers confidently make decisions. SWEA will build capacity and coalitions with local stakeholders to take actionable measures to protect their neighborhoods from local toxic pollution in the freight transportation system. In addition, we will communicate the evidence and needs effectively to the South Ward leadership to improve air quality and prioritize electrification of vehicles, zero emission zones in the South Ward. The project will expand on the current project and add 12 black carbon monitors low-cost sensors in the South Ward, engage residents, local schools, and community members to monitor their air, collect the data, analyze the data and build evidence of the health and climate impact of emissions in this community. This project will build support within key Newark departments to utilize air quality data as an indicator for action needed in the Newark Sustainability Action Plan and their health programs to achieve their climate mitigation goals. The project will enable South Ward residents to independently collect air quality measurements, using low-cost, accurate, and verifiable instruments to produce three Neighborhood Climate Action Plans. Collecting the data first-hand will engage the community and allow them to learn directly about the issue. Improving the availability and access to reliable air quality data will also allow policymakers to identify hotspots, more strongly inform policy action to improve air quality, and ensure enforcement agencies are better able to enforce regulations. Reduction of air pollution and improvement in health outcomes. Working in collaboration with our community partners, we will engage the city health officials and departments to listen to residents' ideas and implement projects based on them. The chart below further explains the outcomes/outputs of this initiative. Please note that this document is attached to our application.

Resources/Inputs	Activities	Outputs	Audience	Short-term outcomes (6-12 months)	Intermediate Outcomes (12-24 months)	Long-term Outcomes (2+ years)
Air Monitoring Partners: • City of Newark Green Team • New Jersey DEP • Center for Community Engagement, Environmental Justice, and Health (CEEJH). • University of Maryland • EOSHI Rutgers University	• Train community residents to conduct Hyper Local air monitoring. • Engage in a network of technical and public health experts. • Establish neighborhood Air Monitoring Advisory Boards in three neighborhoods	• Monthly meetings with the 3 neighborhood Air monitoring Advisory Board. • Monitor data from 10 sites with Purple Air Monitors • Select sites and Conduct truck Count with Air Beams and Black Carbon Monitors	• Residents in the Weequahic, Dayton Street and Clinton Hill neighborhood. • South Ward partners, CBO's, Faith Based institutions, government, and municipal officials.	• Increased attendance of residents attending SWEA monthly meetings. • Quarterly training sessions for community partners • Conduct two Truck count events. • Increase residents' participation at yearly Environmental Summit	• Select 1 EJ Youth Community Ambassador for each neighborhood. • Select 2 community groups leader from each neighborhood as the Lead Train the Trainer Partner	• Develop Neighborhood Climate Action Plans for the three neighborhoods. • Develop Translating Health-related Environmental Community Data for Actionable Practice and Prevention (THE DAPP), health literacy and translation tool.
Reducing Flooding through Green Infrastructure Partners: • NewarkDIG • Rutgers Cooperative Extension Water Resources Program • City of Newark Department of Water & Sewer Utilities	Expand reach of GI Reformer team to outreach to South Ward residents and business stakeholders in the three neighborhoods where GI projects will take place.	Identify community groups to assist with recruitment of South Ward GI Reformers. Street canvassing and Door Knocker delivery to attend public events.	Residents in the Weequahic, Dayton Street and Clinton Hill neighborhood. South Ward partners, CBO's, Faith Based institutions, government, and municipal officials.	• Post 3,000 door knockers across the South Ward (1000 in each Neighborhood) • Paint 12 catch basins (4 in each neighborhood) • Host/Attend 6 events (2 in each neighborhood) • Post at least 1 on-site signage per neighborhood	• Formalize GI Apprenticeship Program partnerships. • Establish new partnerships with projects in the South Ward. • Employ 3 GI trainees with positions.	• Establish calendar of projects and GI trainee assignments. • Establish process for post-assignment evaluation including surveys by trainees. • Evaluating apprenticeship experience and supervisor. • Evaluation of demonstrated skills.
Workforce development • CHCA • NewarkDIG • City of Newark Green Works Program	Planning, a project team, including additional partners, to review the program plan, develop the necessary supporting materials and data tracking tools, and formalize partnerships.	• Establish Green Jobs Task Force, Develop brochure for Green Hub Recruitment of 60 residents (20 from each neighborhood). • Monthly meeting with community-	• Residents in the Weequahic, Dayton Street and Clinton Hill neighborhood. • South Ward partners, CBO's, Faith Based institutions and High	• Increase in South Ward residents' knowledge of Green Infrastructure and urban tree forestry. • Target 45 residents (15 from each neighborhood) for Green Alliance	• Workforce Readiness Training & Career Exploration. • Plant and maintain trees to expand the tree canopy and improve air quality.	• Match participants with a Green Jobs coach to explore a credential-bearing green job training of their choice. • Post-Training Support, Evaluation

Geographic Area: One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative will service three overburdened neighborhoods in the South Ward of Newark, New Jersey.

Project Type: One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative will focus on hyper local air monitoring and workforce development of the next generation of environmental advocates.

Environmental Issue

Outdoor air pollution causes 4.2 million deaths annually worldwide and is the fifth leading risk factor for death globally. A robust body of evidence links PM 2.5 exposure with a wide range of health outcomes, including increased risk of premature mortality, cardio-respiratory diseases, cancer, and adverse pregnancy outcomes. Emerging evidence also suggests that air pollution is associated with cardio-metabolic diseases, such as diabetes and neurological diseases, such as Alzheimer's and dementia, underlining the substantial disease burden of air pollution exposures. Residents of the South Ward of Newark are exposed to high air pollution. The issue of cumulative impacts (CI) has been a central focus of the environmental justice (EJ) movement for decades. Understanding cumulative impacts requires consideration of the complex interplay between socio-demographic, environmental, and public health factors that impact EJ communities. These communities are both more likely to be overburdened with pollution (higher vulnerability) and more likely to suffer severe impacts from pollution (higher susceptibility). Yet advancing actions that address cumulative impacts in EJ communities has been challenging for a variety of reasons. One of the key barriers to addressing CI in environmental decision-making is the narrow focus of existing environmental regulations that do not include an explicit mandate to consider multiple pollutants from multiple sources. There are gaps in our knowledge about how multiple pollutants interact with each other and impact public health under different conditions; and most environmental laws do not consider the socio-demographic and health disparities that impact EJ communities.

Information from the EJ Screens illustrates data that reflects the premise of the One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative. The charts below show that the three South Ward neighborhoods in the city of Newark, specifically, zip codes-07114, 07108 and 07112, at least 35 percent of the households qualify as low-income households (at or below twice the poverty threshold as determined by the United States Census Bureau); at least 40 percent of the residents identify as minority or as members of a State recognized tribal community; and at least 40 percent of the households have limited English proficiency (without an adult that speaks English "very well" according to the United States Census Bureau).

Newark Green Team/Newark Green Team-Residents and Stakeholders (quasi government)

Environmental and Public Health information of the Underserved Community

With 400,000 residents, Newark is the largest city in New Jersey. Poor air quality disproportionately affects low-income communities and people of color in the US. This is very true in the Dayton Street, Clinton Hill and Weequahic neighborhoods, where this project will focus. Its residents are predominantly African American within lower income census tracts. The South Ward community is surrounded by the 2nd largest port in the US, Newark Airport, major interstate highways and high-volume county roads including the New Jersey Turnpike, Route 22, Route 1 & 9, Highway78, exposing nearby communities to toxic emissions from transportation and freight. The Port of New York/New Jersey is the economic engine for the region and diesel death zone for the South Ward. In the US, for example, 80% of people hospitalized in the early stages of the outbreak suffered from pre-existing conditions. Pre-existing respiratory conditions are caused by air pollution. In the US, a long legacy of social and racial inequality has left black and Hispanic communities exposed to an average of 56% to 63% more PM2.5

pollution than they produce. There is a lack of adequate data on air pollution in the South Ward of Newark available to residents and policymakers, exacerbating the adverse impacts of air pollution on communities. There is only one air quality monitoring station in Newark, that is currently offline for the past 5 months. This means that residents cannot protect themselves and their families, enforcement agencies are unable to enforce regulations, and policy makers are unable to identify hotspots and make informed, evidence-based arguments to advance climate and clean air regulations, policies, and projects for the city. As a result, there is an increase in the adverse impact of poor air quality on the health of low-income communities.

The South Ward and Newark is an EJ community that is overburdened with cumulative impacts of pollution and the most ratepayers in the State of New Jersey. 1 out of 4 children suffer from asthma. As EPA is well aware, pollution from diesel trucks and equipment harms human health, leading to asthma, respiratory illnesses, heart and lung disease, and cancer.[1] Eliminating air and climate pollutants from the freight transportation system is an urgent challenge: in 2021, the Port of Los Angeles alone saw a 56% rise in diesel particulate matter, a 54% increase in nitrogen oxides (NOx) emissions, and a 39% increase in greenhouse gas emissions.[2] The nearby Port of Long Beach saw similar increases.[3] Residents living near the Port of New York and New Jersey are exposed to levels of diesel air pollution that are 100 to 1,000 times the amount considered safe for humans.[4] Importantly, these impacts fall disproportionately on low-income communities and communities of color, as these communities are more likely to live near ports, highways, and freight corridors.[5]

Air Quality Monitoring

The One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative will expand on the current project of 12 purple air monitors and low-cost sensors. In addition, the project will utilize black carbon monitors in the South Ward, engage community members to monitor their air, collect the data, analyze the data, and build evidence of the health and climate impact of emissions in this community. This project will build support within key Newark departments to utilize air quality data as an indicator for action needed in the Newark Sustainability Action Plan and their health programs to achieve their climate mitigation goals. The project will enable South Ward residents to independently collect air quality measurements, using low-cost, accurate, and verifiable instruments. Collecting the data first-hand will engage the community and allow them to learn directly about the issue. Improving the availability and access to reliable air quality data will also allow policymakers to identify hotspots, more strongly inform policy action to improve air quality, and ensure enforcement agencies are better able to enforce regulations.

Green Infrastructure: Green Jobs and Workforce

SWEA will partner with the Rutgers Cooperative Extension Water Resources Program to build on the strength of our partners. It targets a community that has long been negatively impacted by environmental hazards from its proximity to major highways, airports, and ports. SWEA will leverage its standing in the environmental justice movement to create "passports to green jobs and careers" through its work with green economy employers for

entry-level jobs and local labor unions for pre-apprenticeships and apprenticeships. This vertical alignment in job training will prepare a ready workforce for entry-level green jobs or further credentialing. The goal of this initiative is to create a sustainable workforce development ecosystem for green jobs in Newark's South Ward. The One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative will integrate strategies to address barriers to employment and foster strategic partnerships to help participants secure living wage jobs with upward mobility in the green economy. Additional employment opportunities through collaboration with NewarkDIG and Rutgers Cooperative Extension to leverage the efforts of Newark's Green Works Program of training residents using the National Green Infrastructure Certification Program (NGICP). In partnership with the Newark Workforce Development Board, Rutgers Cooperative Extension (RCE) Water Resources Program, and the Newark Green Works Program, we will provide additional support (e.g., remediation in math) to increase participants' success rate in obtaining the NGICP certification.

Results

The One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative seeks to reduce air pollution and improve health outcomes for Newark residents in the three neighborhoods of the South Ward. Working in collaboration with community based organizations, like the Newark Environmental Commission, the Newark Green Team, Clinton Hill Community Action will engage the city health officials and departments to listen to resident's ideas and implement projects based on them.

Organization's Historical Connection to Underserved Community

SWEA was founded in 2015 by Kim Gaddy, a mother of three asthmatic children with 20 years of experience as an Environmental Justice Organizer. Gaddy raised her family in the South Ward and knows, on a personal level, how disproportionately burdened the South Ward is with the cumulative impacts of pollution impacting residents' health and quality of life. She has long been a vanguard of the environmental justice movement, often the only woman of color around the table. Gaddy joined other local advocates to push Newark Mayor Ras Baraka to become the first city in the nation to pass an environmental justice Cumulative Impacts ordinance calling for developers to inform the city of the environmental impacts of development projects. More recently, she, and other advocates, won the support of Gov. Phil Murphy to sign the state's landmark and strongest Cumulative Impacts bill. The new law will allow NJDEP to deny new pollution permits/set conditions on existing ones if they pose extra stressors on EJ neighborhoods. SWEA is an alliance of residents and community-based organizations focusing on environmental issues in the South Ward of Newark.

SWEA's mission is to cultivate healthy and vibrant neighborhoods by ensuring residents' voices are heard, and they are active participants in decision-making policies that impact their neighborhoods. SWEA has three core programs – Air Quality Monitoring, Water Equity and Green Infrastructure, and Leadership Training. As a nationally certified Green Infrastructure instructor, Gaddy developed the Green Alliance Leadership Academy to introduce the next generation to careers and advocacy opportunities in environmental justice. The South Ward Environmental Alliance (SWEA) foundation is based on the Jemez Principles for democratic organizing which include the following principles, Be Inclusive, Emphasis on Bottom-Up Organizing, Let People Speak for Themselves, Work Together in Solidarity and Mutuality, Build Just Relationships Among Ourselves and Commitment to Self-Transformation. SWEA is an alliance of residents and community-based organizations with a focus on environmental justice issues in the South Ward of Newark, New Jersey. SWEA centers the perspectives of Newark residents at the forefront of our efforts by providing opportunities for meaningful participation in identifying the social and environmental injustices that plague our community. SWEA informs, empowers, and engages residents to demand a seat at the table and meaningful participation for environmental justice in the city

of Newark. It is our obligation to prepare community members in our overburdened community to advocate for the regulations and enforcement of environmental laws that are protective of their health and quality of life.

The One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative has received input from the community in creating and structuring this project. SWEA has three advisory boards consisting of Newark residents, senior citizens, and youth members. SWEA has established credibility and trust of community members through collaborative efforts of advocating for equitable access to good air quality. SWEA recruited 11 South Ward residents and stakeholders to join the Community Advisory Board for the Air Quality Monitoring Project. The Air Monitoring Advisory board, led by the Environmental Justice Organizer, is tasked with providing community insights and oversight of research planning, implementation, and data dissemination.

The Senior Advisory Board led by the Senior Community Outreach Organizer includes seven senior residents from the South Ward, representing the Weequahic, Clinton Hill and Dayton St. sections of Newark. The SWEA Senior Advisory Board is instrumental in assisting and educating the senior community on the environmental issues that affect their quality of life. It is important to note that some seniors reside in public housing, and some are homeowners. Having the life experience of living, working, and raising their families in Newark, their input is invaluable in sharing its history and legacy.

The Youth Advisory Board led by the Youth Organizer consists of seven Newark youth members between the ages of 16 and 22. The goal of the South Ward Environmental Alliance Youth Advisory Council is to cultivate, recruit and engage south ward youth to become the next generation of environmental advocates. These members are trained through the Green Alliance Leadership Academy (GALA), which are a series of workshops that focus on increasing public awareness on environmental justice issues. Through the GALA, South Ward youth receive the necessary tools and strategies to speak up for themselves about their overburdened communities.

EJPCS Model Element 1: Issue Identification, Community Vision and Strategic Goal Setting

The South Ward Environmental Alliance EJCPS Model element 1 uplifted in this project started with community meetings and discussions with residents, block associations, community and faith-based organizations regarding their quality of life being impacted by lack of tree canopy, flooding and increased truck traffic in the community. Residents and stakeholders participated in a mapping exercise to determine the high traffic hotspots and flooding locations in each neighborhood. A survey was developed, and the top issues were selected to develop an environmental justice plan of action and three anchoring organizations were selected, one representing each respective neighborhood. Monthly meetings were scheduled to build trust in the partnerships and allow a seat at the table for meaningful participation for everyone.

EJPCS Model Element 2: Community Capacity Building and Leadership Development

The South Ward Environmental Alliance (SWEA) Green Alliance Leadership Academy (GALA) will leverage the expertise of experienced EJ leadership and established relationships of collaboration, to build the capacity of underserved, impacted communities. This is a unique coalition of partners with a history of working on a range of impactful quality of life issues; water quality, flooding, air quality, food justice and energy justice policies and programs that can serve as a model for community-based organizations. This project will benefit the South Ward community through engaging and educating the next generation of Environmental Justice advocates regarding the environmental injustices in their community. SWEA created a collaborative EJ hub to assess the organizational needs and EJ priorities of underserved, EJ communities in the South Ward of Newark. Identify

hard to reach residents and neighborhoods in the South Ward and implement strategies for effectively outreaching to these areas with our partners and through our community networks. Develop Community Capacity-building Modules that focus on air, water, and food justice. Coordination will include providing support for the creation of informational webinars, online/in-person meetings/workshops, flyers or factsheets, blog and social media postings, and other methods of both generating and sharing substantive content created by coalition members.

Project Linkages

Goal 2: One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative will advance EPA Strategic Plan Goal 2 by fostering environmental justice and collective power-building in the underserved South Ward communities. The EPA's efforts, as part of a government-wide effort to address environmental, public health, and energy challenges affecting communities, and specifically those adversely and disproportionately affected by environmental, climate, and human health harms and risks; Executive Order 13985; and Executive Order 140008 – all contribute to the potential for a significant increase in advancing environmental justice and civil rights. To create a better quality of life, SWEA will lift as we Climb to ensure all voices are heard. Moreover, we must meet the residents where they are to increase their understanding of all the potential environmental justice harms and risks facing the three neighborhoods and all stakeholders. Lastly, the frontline and fence line communities like Newark must learn how to gain access to federal grant funding and other resources that will help them build the capacity to achieve energy justice goals and address environmental health and environmental justice issues.

Goal 2.1: As described above, One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative will ensure the voices of the voiceless are heard and engaged in a meaningful way to build knowledge, power, and capacity. Moreover, our outreach approach will ensure that EJ and civil rights are advanced in our community by building a collaborative table with open seats for everyone to build local power and civic engagement know-how, as well as facilitating access to resources that can promote capacity-building and environmental justice solutions.

Partner and Collaborate

The Newark Green Team is a multi-sector coalition of local stakeholders working to advance policies and programs related to urban sustainability, environmental health, community greening, quality of life, and green economic opportunities for Newark residents. The Newark Green Team fully supports this project and will participate as a stakeholder throughout the project period. They believe that the goals and outcomes of this project will directly empower residents to collect and use air quality data to advocate for the changes they want to see, provide evidence for policymakers, and reduce air pollution, local flooding and greenhouse gas emissions while improving health outcomes for our residents.

Rutgers Cooperative Extension Water Resources Program is a partner delivering services and as an instructor for the Green Infrastructure Champion Training Program for the South Ward Environmental Alliance project. Rutgers has the experience of training residents to assist with the design, construction, and maintenance of green infrastructure projects throughout the South Ward. Rutgers has included green infrastructure in our park and community schoolyard projects for many years. This partnership is an opportunity to show the apprentices how these types of projects work in a practical way in their community while providing support to make sure the facilities operate at their highest possible level with proper care and maintenance. It is very important to focus on giving the residents the skills they need to become successful and for the city to use their funding to hire Newark residents to help address environmental justice issues. Provide a clear and concise description of how the proposed project promotes collaborations with partners from multiple stakeholder groups, such as industry, business, academia, government, etc., to develop solutions that will

address environmental and/or public health issues. We encourage applicants to seek diversity in partnerships to enhance the process of achieving the project's goals.

Dr. Sacoby Wilson, a Professor with the Maryland Institute for Applied Environmental Health, School of Public Health, University of Maryland-College Park and Director of the Center for Community Engagement, Environmental Justice, and Health (CEEJH). CEEJH was founded in 2011 as a laboratory and relaunched in 2021 as a Center to assist frontline and fence line communities impacted by environmental, climate, and energy justice issues through technical assistance, scientific support, and use of community-engaged research approaches including the community-based participatory research (CBPR) framework and community science. He has 25 years of experience using the EPA Collaborative Problem-Solving Model dating back to my contribution to the efforts of the West End Revitalization Association to address the lack of basic amenities and the planned expansion of the 119 Bypass in the late 90s. CEEJH has been working throughout the Mid-Atlantic for over a decade with community-based organizations including groups like SWEA. Recently, CEEJH received a grant from the Robert Wood Johnson Foundation (RWJF) to launch the Mid-Atlantic Climate Action Hub (MATCH) whose goal is to provide technical assistance to communities impacted by environmental and climate justice issues. We have engaged community-based organizations in Prince George's County, Virginia, Eastern Shore/Southern Delaware, Philadelphia, New Jersey, and Baltimore to act as hubs for MATCH. SWEA is a community hub for MATCH. Additionally, we will be training South Ward members of impacted communities and other stakeholders to develop their skills to address their local environmental justice concerns.

For the past two years, CEEJH has been working with SWEA to develop and implement a community-driven hyperlocal air quality monitoring network to understand the cumulative impacts of air pollution in the area. In support of SWEA's proposal, CEEJH will provide workshops to communities that SWEA serves. The workshops will cover: (1) The relationship between environmental justice, air quality and community science; (2) The importance of implementing user-friendly air monitoring technology to track every day and cumulative exposures to air pollution; (3) The utilization of low cost sensors (such as the Purple Air) to collect continuous real time data; (4) Analysis and Interpretation of data from air monitors; (5) The importance of reliable, compelling data for environmental justice advocacy and health policy changes; and (6) Use of effective dissemination strategies to present the air monitoring data in a compelling and convincing manner to local, state, and federal agencies and policy makers.

Project Activities

Schedule of Activities Attached.

Budget Attached.

Environmental Results

Reference attached document.

The long-term goal of the One Ward United for Environmental Justice, Air Monitoring and Green Infrastructure Collaborative Problem-Solving Initiative is to train residents, monitor the air quality, amplify and unify engagement in the three neighborhoods of the South Ward to improve the quality of life for all residents. More specifically, this initiative will be implemented in three phases over a three-year period. We will utilize our academic, governmental, and community-based partners to 1) build capacity for air monitoring and advocacy and 2) build green infrastructure initiative to leverage GI as an educational and job opportunity.

Activities/Outcomes

In Phase I of this initiative, SWEA will train community residents to conduct hyperlocal air monitoring, engage in a network of technical and public experts and establish neighborhood advisory boards in three neighborhoods.

To ensure the Air Monitoring component of our initiative is effective, we will conduct monthly meetings with the three neighborhood air monitoring advisory boards, monitor and analyze data from purple air monitors and select sites to conduct truck counts using air beams and black carbon monitors. SWEA intermediate outcomes for this initiative are to select one EJ Youth Community Ambassador for each neighborhood and two community group leaders from each neighborhood as the lead Train the Trainer partner. Long-term outcomes include developing neighborhood action plans for the three South Ward neighborhoods and developing a health literacy and translation tool-The DAPP (Data for Actionable Practice and Prevention).

In Phase II, SWEA will facilitate the development of new GI projects in the city, bring more awareness to new and imminent GI projects while soliciting valuable community feedback and highlighting the green job opportunities which are one of many co-benefits of green stormwater management solutions. To meet this objective, we will train and engage South Ward residents as GI Reformers and participants of the Rutgers Cooperative Extension Green Infrastructure Champion class. This means identifying community groups to assist with recruitment of South Ward GI Reformers, street canvassing and door knocker delivery to attend public environmental justice events. Short-term goals include formalizing GI Apprenticeship Program partnerships, establishing new partnerships with community-based organizations/projects in the South Ward and employing three GI trainees with positions. To solidify our efforts, SWEA will establish calendar projects and GI trainee assignments so that collaborative efforts are clear and direct. Gathering feedback will be crucial to this component of our initiative so we will utilize post-assignment evaluation including surveys by trainees, apprenticeship experience and supervisors.

In Phase III, SWEA will establish a Green Jobs Task Force, develop a brochure for Green Hub Recruitment of 60 residents and conduct monthly meetings with community-based partners. We will engage community members by planting and maintaining trees to expand the tree canopy and improve air quality. This will bring more awareness to new and imminent GI projects while soliciting valuable community feedback and highlighting the green job opportunities which are one of many co-benefits of green stormwater management solutions. SWEA will match participants with a Green Jobs coach to explore a credential-bearing green job training of their choice. Post-Training Support, Evaluation & Planning will be used to assess the program's efficacy while pursuing additional funding to scale and sustain the effort.

Programmatic Capability

Resumes Attached-Executive Director, Environmental Justice Organizer, Youth Organizer

SWEA Newsletters Attached

The work of the South Ward Environmental Alliance speaks for itself in the South Ward, Newark and the State of New Jersey. Just to name recent awards, The Clinton Hill Community Action and the South Ward Environmental Alliance were 1 of 5 recipients of the Green Jobs Council's NJ Building our Resilient, Inclusive, and Diverse Green Economy (BRIDGE) Initiative grant award. This grant will allow the South Ward Environmental Alliance and Clinton Hill Community Action to introduce and expand green job opportunities for South Ward residents as a result of the collaboration with our partners and set a standard for implementing green infrastructure projects, train residents to become solar installers and engage local businesses to help them see the return on investment for going green, in Newark and across the State of New Jersey. Also, The South Ward Environmental Alliance is the New Jersey partner with WE ACT for Environmental Justice's Environmental Justice Thriving Community Technical Assistance Center. As a project partner, South Ward Environmental Alliance will serve as an advisor and outreach partner for New Jersey's underserved communities. Specifically, as a subrecipient SWEA will coordinate outreach activities in underserved communities in the greater Newark area. Participate in the EJ TCTAC steering committee, and advise the TCTAC on its strategy for engaging and building the EJ capacity of underserved, rural, and remote communities; Comply with reporting and fiscal

requirements of project; Coordinate with local stakeholder and participants of environmental justice training to attend annual in-person convenings.

Past Performance Our organization does not have any federally and/or non-federally funded assistance agreements performed within the last three years.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

n/a

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

n/a

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

n/a

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

n/a

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Personnel:

Edgar Oscar Ruiz-Project Manager

As the Project Manager and Executive Director of Community Through Colors, Edgar Oscar Ruiz will be actively involved in all day-to-day operations and decision-making throughout the project. He will oversee all project activities and will be responsible for making sure project staff and collaborators follow the work plan and project goals are achieved effectively and efficiently. Mr. Ruiz effort on this project will be 240 hours each year at $40/hour, totaling $28,800 over the three-year project.

Renewable Energy Systems Lead

One employee will be in charge of Renewable Energy Systems integration, helping to: install New Use systems at residences and emergency shelters; periodically check on the health of the energy systems; provide necessary maintenance and updates; and interface with New Use Energy technical support as needed. They will also lead the renewable energy workshop training development and implementation, as well as leading the high school innovation challenge. This employee will work 1500 hours per year at $20 an hour, totaling $30,000 per year and $90,000, over the three-year project.

Mobile Communications Lead

A Mobile Communications Lead, working through project partner ViequesLove, will support multiple activities for this project. They will interface with disaster response coordinators and government agencies to integrate this project into existing disaster response plans. The Mobile Communications Lead will be in charge of mobile radio deployment and training to residents and disaster response personnel. This employee will also support the radio station manager with radio programming in the event of an emergency. The Mobile Communications Lead will work 1500 hours per year at $20 an hour, totaling $30,000 per year and $90,000, over the three-year project.

Community Lead

A Community Lead, working under project partner COREFI, will be in charge of coordination with community members and interfacing with targeted populations who receive support through this project. The Community Lead will be an integral component of this project as a point of contact for the community to ensure the needs of the most vulnerable residents are heard and addressed. They will work with the Renewable Energy and Mobile Communications Lead to ensure both technologies are successfully adopted and achieve desired project goals. The Community Lead will work 900 hours per year at $15 an hour, totaling $13,500 per year and $40,500 over the three-year project.

Radio Station Manager

One Radio Station Manager will operate the radio station and help to disseminate communications technologies to project recipients at households and disaster response teams.

This employee will broadcast communications over the CTC radio frequency in the event of an emergency. They will communicate with emergency responders to help those in need receive assistance, and will assist with mobile radio deployment and training. The Radio Station Manager will work 900 hours per year at $15 an hour, totaling $13,500 per year and $40,500 over the three-year project.

Total Personnel: $286,800

Fringe Benefits:
No Fringe Benefits will be charged for this project.

Travel:
Local mileage for Renewable Energy and Mobile Communications outreach for community outreach efforts: 30 miles @ $0.625/mi.[2] X 100 total routes around the island (over 3 project years) = $1875

Local mileage for Vieques leadership team: 10 miles @ $.625/mi. * 36 (monthly meetings over 3 project year) = $225

Travel for Joseph Siegel to attend project initiation meeting:
Airfare: Roundtrip flight from Boston to Vieques: $400
Lodging: $100/night for 3 nights = $300
Per diem: $50/day for 3 days = $200

***Total Travel*: $3,000**

Equipment:
No Equipment costs will be applied to this project.

Supplies:
This project cannot exist without supplies for critical power and communications in the event of a power outage. Therefore, a necessary cost is for the provisioning of renewable energy systems and portable radio units that are off-grid capable when the electrical grid is not operational.

- For this project CTC will procure and install 25 New Use Energy systems: 30 systems to populations who need power for life-saving medical devices; 3 systems to the emergency shelters; and 2 systems for the high school innovation challenge. The chosen system for this project is the New Use Energy Mobile Solar Systems: *2000W Medium PowerPac (Reference:* https://www.newuseenergy.com/product/mobile-solar-system-2000w-medium/). Each

[2] Retrieved April 5, 2023 from:
https://www.prd.uscourts.gov/news/no-22-05-new-mileage-rate-effective-july-1-2022

system comes with: 2000 watts of solar photovoltaic panels; a 1500 watts pure sine wave inverter and built in charge controller for instant plug and play convenience; and a 2200 watt-hour Lithium iron phosphate battery. This system can power larger appliances including refrigerators/ freezers, portable satellite dishes and other communication devices, and charging multiple personal devices including phones and computers.

25 New Use Energy Systems at a volume discount rate of $3,500/system (retail is $3,706) and bulk shipment to Vieques totaling $7,000 = $94,500

- To maximize communications capabilities and information dissemination during a grid outage, this project will provide 400 self-powering portable radios to vulnerable households, disaster response units, and community organizers. Each radio is equipped with a LED flashlight, has mobile phone charging capability, and will be powered by solar energy. Kaito Voyager Pro KA600 Digital Solar Dynamo Hand Crank AM/FM/LW/SW & NOAA Weather Emergency Radio with Flashlight, Reading Lamp,Smart Phone Charger & RDS and Real-Time Alert, with AC Adapter, Black.

- 400 Radios at $80/radio = $32,000

Additional supplies are needed for materials to support the following: educating mobile power and communication system recipients through workshops; holding group meetings; and for the energy education innovation challenge.

- Miscellaneous supplies cost for workshop promotion and materials, office supplies, and community outreach is $2,000 for the three years of this project.

Total Supplies: $122,750

Contractual:
No Contractual costs will be applied to this project.

Construction:
No Construction costs will be applied to this project.

Indirect:
- CTC will apply the de minimis rate of 10% of modified total direct costs for this project.

  General Administration for additional staff to support with project management, financial management, and additional staff hours to help with coordination between project partners COREFI and Vieques High School.

  Overhead for computer fees, electricity costs and support with day-to-day activities needed for CTC to function effectively.

Total Indirect: $45,450

Other:

Joseph Siegel, *Sustainable Designs*: Mr. Siegel's support will be vital for the success of this project under a subrecipient award. He will work closely with all CTC Team members to ensure programmatic activities are delivered on-time and within budget. Mr. Siegel will provide support for project design, implementation, outcomes reporting, project performance and analytical support, management services, and techno economic advising. His work will be under a noncompetitive agreement described in 2 CFR 200.320(c)(1), as the fee was below the micro-purchase threshold of $50,000. His work cannot be performed by another contractor. Mr. Siegel will devote 250 hours at $56 per hour to this project annually over the three-year project duration, for a total fee of $42,000.

Total Other: $42,000

Total Project Cost: $499,950

CONCERNED RESIDENTS FOR IMPROVEMENT, INC.

Ex. 6 Personal Privacy (PP)

April 15, 2023.

To Whom It May Concern,

Concerned Residents for Improvement, Inc. also known as COREFI VIEQUES, pledges its support to Community Through Colors for their EPA Grant, Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

The local demographic and outreach programs include all sectors of the community from children to seniors. Nonetheless we target the elderly, homeless and underserved population. Our history of successful partnerships with local businesses, schools, individual and community organizations has been in good standard over the years.

We look forward to collaborating with Community Through Colors on this proposed program. We currently conduct weekly meals delivered to diminish the food insecurity in our population.

It is our hope that you will consider their application and offer an award.

Sincerely,

Gladys Yaritza Pérez Pagán
Executive Director

At Concerned Residents for Improvement Inc., better known as COREFI, there is no discrimination based on race, color, sex, sexual orientation, origin or social condition, age, handicap, political and/or religious ideas or any other discriminatory cause in the provision of services being consistent with the Health and Safety Civil Rights Laws.

Sustainable Designs

April 5, 2023

To Whom It May Concern,

Sustainable Designs pledges its support to Community Through Colors for their project under the EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. Specifically, Sustainable Designs will provide support for project design, implementation, outcomes reporting, project performance and analytical support, management services, and technoeconomic advising as needed to ensure this project is as successful as possible. We acknowledge the expectations of our role set by the Community Through Colors for this project. Sustainable Designs will devote Ex. 6 Personal Privacy (PP) to this project annually over the three-year project duration, for a total fee of Ex. 6 Personal Privacy (PP)

Best,

Joseph Siegel

President

Center for International Media Action

Philadelphia Office
Ex. 6 Personal Privacy (PP)
Philadelphia, Pa 1945 USA

3/14/2023

To Whom It May Concern,

The Center For International Media Action (CIMA) would like to express our support of Community Through Colors for their EPA Grant, Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

Community Through Colors was a key collaborator in our effort to move 300 solar panels to Vieques, and 10 donated solar hot water systems. Oscar Ruiz also provided technical support and training at several of the sites where we installed solar electric systems. We rely on their collaboration and support each year when we work to provide reliable solar electricity to families whose access to electricity is precarious.

We believe that this grant, in the able hands of Community Through Colors, will be responsibly manages, wisely spent, and have great impact for environmental and energy security efforts in Vieques. Should the grant be awarded to Community Through Colors, we are certain that their expanded capacity would make CIMA's efforts on behalf of green energy in Vieques more successful. We also look forward to collaboration on radio efforts, and are happy to lend our expertise to this aspect of the project as well.

Thanks,

Pete Tridish

Re: Funding Opportunity:
ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS)
COOPERATIVE AGREEMENT PROGRAM
FUNDING NO.: EPA-R-OEJECR-OCS-23-01
U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA)
OFFICE OF ENVIRONMENTAL JUSTICE AND EXTERNAL CIVIL RIGHTS (OEJECR)

Letter of Intent to Collaborate

ViequesLove is pleased to collaborate with the Community Trough Colors on your proposal for the "ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS) COOPERATIVE AGREEMENT PROGRAM" of the U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA) OFFICE OF ENVIRONMENTAL JUSTICE AND EXTERNAL CIVIL RIGHTS (OEJECR), in response to the recent funding opportunity EPA-R-OEJECR-OCS-23-01.

We believe this initiative will help provide the necessary training and infrastructure to implement its goal of delivering resilient power and communications to vulnerable populations in Vieques, Puerto Rico.

Viequeslove is a 501(c)(3) not for profit organization, which also holds the Puerto Rico Tax Exemption under Section 1101.01 of the Puerto Rico Internal Revenue Code. ViequesLove's mission is defined as follows: "***To initiate, support, coordinate and implement sustainable community programs and to foster collaboration with groups and individuals working to improve the quality of life for residents of Vieques, Puerto Rico*".**

Viequeslove was created during the Hurricane Maria disaster and worked diligently during its response and recovery phases and continues to participate in the post-disaster analysis and advocacy efforts that are necessary for the fostering of local resiliency and the assurance of future just recovery processes.

ViequesLove raised and managed over a million dollars for the response and recovery programs on the island. One of the most successful uses of those funds, was the acquisition and deployment of over 150 thousand dollars' worth of mobile energy systems with photovoltaic panels. These were used on vulnerable homes, chronic illness patient care, and even powered several health service facilities. The units were also a key source of energy for communications and connectivity services. We strongly believe this elements are key for the delivery of legitimate energy justice to this isolated community that currently lacks a reliable backup energy system.

During our efforts to empower the local community groups and critical infrastructure we developed a vision to: "***facilitate the collaboration of community groups and local government to design and implement a transformation of Vieques into a resilient and sustainable island prepared for an unpredictable future***."

Working on our Asset Mapping Project and through our ongoing support to the Municipal Emergency Management Office, we have seen firsthand the chaotic results of a lack of communications during the disasters and loss of energy events on the island. Sadly, we have also witnessed the loss of life and detriment to overall human health, due to the lack of energy to operate medical equipment and other basic energy needs to the vulnerable households that are on the island. Due to the lack of a proper health and emergency shelter infrastructure on Vieques, initiatives such as this Community Through Colors proposal, become vital to provide lifesaving resources and to assure the most vulnerable members of this underserved community will not be once again abandoned in future disasters.

We fully support the Community Trough Colors "***Delivering Resilient Power and Communications to Vulnerable Populations in Vieques, Puerto Rico***" proposal, and reiterate our commitment to collaborate on the established components in the grant application.

I am available to provide additional documentation and information regarding our organization, and to discuss the details of our participation in the proposal application.

Sincerely,

Paul Lutton

Professional Summary

Dedicated professional with eleven years of outstanding performance in the U.S. Military. Earned two promotions and excelled as a leader. Accountable and ambitious, able to remain focused and productive in challenging situations. Calm under pressure with superior time management and conflict resolution skills. Offering top-quality customer service and security operations. Exceptionally hard worker, well versed in supply and inventory management. Extraordinary leader and problem solver, transitioning from a successful career in the military to the civilian industry. Currently the Executive Director of Community Through Colors, a 501(c)(3) non-profit disaster relief and resiliency organization focusing in the Caribbean.

Skills

Farmer, Offgrid Solar Installer, Emergency Response Coordinator, Complex data management, Project management, Disaster preparedness, Budget analysis, First Aid/CPR certified, Customer Service Training/Conflict resolution, Cross-Cultural Communications training, Quick learner, Spanish and English proficient, Proficiency in Word, Excel, Outlook and Powerpoint

Professional Experience

Executive Director, Sep 2017 to Current

Community Through Colors

Manage and direct the relief and resiliency operations of a disaster relief organization focused on Puerto Rico recovery efforts.

- Responsible for the coordination of several evacuation flights and relief operations post Hurricane in Sep 2017.
- Oversaw the transportation and delivery of 2 tons of supplies by sailboat from the Mainland US to Puerto Rico.
- Oversaw and/or supervised over 30 solar resiliency installations
- Oversaw and managed the on the ground volunteer effort of over 100 volunteers and thousands of volunteer hours.
- Reviewed and advocated for legislation on resilient energy in Puerto Rico. • Continue to comment and review legislation on Renewable energy topics. • Helped train and translate for a class of 22 students in offgrid solar installation. • Helped train and translate 10 students in a 2 day course in off grid solar. • Transported and distributed 500 solar kits to the island of Ill le Vache in Haiti, providing power and light to half the households.

Ophthalmology Clinic Manager, May 2011 to November 2013

U.S. Army – Fort Belvoir Community Hospital – Ft Belvoir, VA

Senior Medical Coordinator, May 2008 to May 2010

U.S. Army – Schweinfurt, Germany/FOB Endeavor Iraq

Senior Eye Technician, May 2006-Apr 2008

U.S. Army, Walter Reed Army Medical Center – Washington, DC

Accomplishments

Maintained 100% accountability of all assigned equipment worth more than $6 million dollars, with no loss of equipment. Also maintained 100% accountability of equipment during the Walter Reed, Dewitt, Fort Belvoir transition.

- Designed and opened both the New Ophthalmology Clinic and the Refractive Surgery Clinic at Ft Belvoir.
- Created Supply Chains for Ophthalmic equipment at the new clinics.
- Trained and certified nearly 120 soldiers as CPR/First Aid from the Bulgarian Army. • Developed a tracking system for the Brigade that maintained 100% accountability during medical reintegration of over 5000 personnel.
- Earned the Expert Field Medical Badge and Awarded the Combat Medic Badge. • Won Expert Field Medic for the North Atlantic Medical Region in 2007. • Trained and supervised more than 50 Army personnel.

Education and Training • Bachelor of Science Degree (Professional Aeronautics),Utah Valley State University, Orem Utah, Anticipated Graduation 2023 • Commercial Pilot's License, Instrument Rating, 300 hours Flight time Potomac, Maryland, 2010 • Military-Earned Certificates: o Warrior Leaders (160 hrs) Fort Bragg, North Carolina, 2012 o Ophthalmology training (15 credit hours), Fort Sam Houston, San Antonio, TX 2011 o Combat Medic Training (45 credit hours), Fort Sam Houston, San Antonio, TX 2011 o Aerostat operators course, (160 hrs), Forward Operating Base Echo, Ad Diwaniyah, Iraq 2010 o Trusted Agent (4 hours), Fort Belvoir, VA, 2012 o CPR/First Aid Instructor (8 hours), Fort Belvoir, VA, 2012 o Field Sanitation (40 hours), Schweinfurt Germany, 2008 o Expert Translator Spanish Language, Washington DC, 2007 o Chemical Biological Response Team Member and Instructor (80 hours) Washington, DC, 2004

Summary of Qualifications

Redacted has over 15 years of experience in research, policy analysis, and project management addressing climate change, ecosystem resilience, and sustainable development challenges. Currently, Redacted is a Consultant and Founder of Sustainable Designs, an environmental policy and sustainable development firm, where he conducts research and implements projects for governmental and non-governmental organizations on renewable energy and energy efficiency, agriculture and food system interventions, water conservation and land-use policy. He has worked for over a decade to support sustainable livelihoods and increase job opportunities for low-income populations. Redacted holds a Masters degree from Virginia Polytechnic Institute and State University and a BA from George Mason University.

Education

2013-2016 **Virginia Polytechnic Institute and State University, Department of Natural Resources**
M.N.R. Masters in Natural Resource Management (*summa cum laude)*
Global Natural Resource Specialist Program

2006-2011 **George Mason University**
B.A. Religious Studies
Minors in Global Affairs and Psychology

Professional Experience (2009 –Present)

Consultant: Sustainable Designs, Falmouth, MA, USA (2018-Present)

Project Development, Proposal Writer, Software Quality Assurance CMMI Lead

Provides technical consulting services (research and analysis, proposal development, policy guidance, quality assurance, project design and implementation) to governments, multilateral institutions, foundations, and industry. Develops and manages complex projects, budgets, and teams of experts. Projects include:

2022 – Present: USDA Community Food Project Competitive Food Grants Program – Co-Project Director on this USDA-funded project to increase access to nutritious food for low-income populations in Vieques, Puerto Rico. Helping lead project design, financial benchmarking, and project reporting activities.

2021 – Present: USDA Beginning Farmers and Ranchers Program – Co-Project Director on a USDA-funded project to support beginning farmers and enhance the local food system in Vieques, Puerto Rico. Led the project design and proposal effort for this successful USDA grant award.

2020 – Present: UN Sustainable Development Goal Currency – In partnership with academic and industry partners, working to develop a complementary currency based on UN SDG targets to produce a platform for universal basic income.

2020: Solar Foundation Community Microgrid Pilot – Designed and wrote the proposal to establish a solarpowered microgrid for a low-income development and hospital on the island of Vieques, Puerto Rico. Working with leaders in Vieques to extend the microgrid to interconnect all critical infrastructure on the island. *Finalist.*

2019 – Present: USAID Development Innovation Venture (DIV) Grant – Designed and wrote a proposal for the USAID DIV Grant Program featuring a unique technoeconomic model to help address adverse effects of climate change experienced by a network of farming villages in Telangana state, India. The proposed work will integrate a blockchain token platform with local sustainable energy, water, food, and waste systems. *Grant is still in the review process.*

2019 – Present: Business Development Lead: TWD Associates – Assisting with business development tasks for TWD, including proposal research and development.

ED_016126_00000825-00005

2018 – 2021: Capability Maturity Model Integration (CMMI) Director: TWD Associates – Run the Software Engineering Process Group and Software Quality Assurance unit at TWD to attain CMMI-Development Level 3 and working to attain CMMI Dev-Level 4. Coordinate with the CEO, VP of Development, Project Managers, and Scrum Masters to ensure CMMI-Development Level 3 requirements are maintained.

2018 – 2019: US Department of Energy Office of Energy Efficiency and Renewable Energy – Led proposal effort to develop solar PV, battery storage, and biogas microgrids to increase energy access and resilience for critical infrastructure and community facilities in Vieques, Puerto Rico.

Vice President, ITAR Compliance Manager, Policy and Research Analyst: Energy and Security Group, Reston, VA, USA (2009-2017)

Developed regional programs to promote renewable energy projects worldwide, working in cooperation with senior government, private sector, financial community, and NGOs. Provided support for the development of new renewable energy financing programs at the US Trade and Development Agency (USTDA), US EXIMBANK, the Overseas Private Investment Corporation (OPIC), the Department of Commerce, USAID, and the Department of Energy; the World; and regional programs. These programs collectively yielded millions of dollars in funding support for renewable energy and energy efficiency programs worldwide.

2017: USAID Power Africa Uganda – Designed and wrote the 5-year workplan of a winning eleven million-dollar USAID project for the Power Africa program in Uganda. Project activities increased renewable energy access for local food hubs, agricultural schemes, health clinics, and education centers in Uganda.

2013 – 2017: World Bank, Energy Access Case Studies for Developing Nations – Conducted research and developed energy assessments of twelve countries for World Bank, analyzing data on existing energy capacity and geo-specific potential for renewable integration (solar radiation, wind, geothermal, biomass opportunity).

2012 – 2017: US Trade and Development Agency Microgrid Development for 100 towns in Post-Earthquake Haiti – Helped with project coordination, and led the composition of the final report for, a USTDA-funded project overseeing the establishment of 100 solar powered mini-grids in post-earthquake Haiti.

2012 – 2017: US EPA Small Businesses and Congregations Database Manager – Managed the EPA Energy Star Portfolio database for the Small Businesses and Congregations program which assisted participants to calculate cost savings and reduction in greenhouse gas emissions with energy efficiency measures.

2016: US EPA Energy Star Success Stories – Composed a series of success stories on religious congregations energy savings and greenhouse gas emission reduction from the application of renewable energy and energy efficiency measures.

2013 – 2015: US EPA Energy Star Action Workbook for Small Businesses and Congregations – Helped prepare documentation and analysis for the EPA Energy Star Workbooks which provided guidance for small businesses and religious congregations on how to benefit from EPA Energy Star programs for implementing energy efficiency and renewable energy measures at their organization. This work provided clients with informative data on cost, design principles, products, vendors, rebates, and tax deductions.

2012 – 2014: World Bank Best Practices for Rural Electrification – Supported the World Bank in developing a series of best-practice case studies on rural electrification from renewable sources, prepared case studies on rural electrification from pilot programs in Bangladesh, China, India, and Vietnam.

Education

Cornell University, College of Arts and Sciences Ithaca, NY
Bachelor of Arts in Biological Sciences with a concentration in Biochemistry | GPA 4.0 **2022**
Relevant Coursework: Biochemistry, Organic Chemistry, Caribbean Worlds, Art of Education, Cover Crops Agroecosystems

Penfield High School Penfield, NY
Advanced Designation Diploma with Honors with annotations that denote mastery in Math and in Science **June 2019**

Research Experience

Sardana Lab, Cornell University Ithaca, NY
Undergraduate Research Assistant **January 2022 – December 2022**
- Wrote an analysis code to analyze comparative protein colocalization and increase data processing capacity
- Presented data and conclusions at an annual forum of peers and specialists in the field of biology
- Generated novel strains with inducible protein inactivation and in vivo tags to characterize cellular proteins

Donnelly Lab, Cornell University Ithaca, NY
Undergraduate Research Assistant **July 2020 - December 2021**
- Applied FTIR imaging and Raman spectroscopy to analyzing pathologies, cancers, and stem cell development
- Designed and modified experimental procedures and R/MATLAB code using recent literature and experimentation
- Updated laboratory protocols to streamline training and improve data collection reliability
- Created new data logging procedures and accessible forms to increase efficiency and collaboration
- Led an ethics case study group discussion on data selection and maintained laboratory website to facilitate outreach

Legal Decision Lab, Cornell University Ithaca, NY
Undergraduate Research Assistant **January 2019 - May 2020**
- Administered a multi-stage variable condition experiment and managed sensitive personal participant information
- Transcribed debates, entered coded responses, and identified patterns within large data sets

Work Experience

Community Through Colors Vieques, PR
System and Operations Manager **December 2021 - Present**
- Coordinated global volunteer efforts for renewable energy, environmental sustainability, and food security projects
- Responsible for safety of volunteers while working with tools and operating heavy farm equipment
- Created and maintained databases to improve metric tracking and reporting capabilities
- Wrote protocol manuals and designed outreach material for educational activities
- Responsible for daily collection of and record keeping for food scrap collection program
- Processed produce market food scraps with tiered quality metrics in accordance with EPA guidelines

Cornell University Sustainability Ithaca, NY
Compost Manager **September 2021 – December 2022**
- Posted proper signage around accessible compost buckets in student dormitories
- Promoted composting activities and proper techniques through community messaging services
- Worked with staff, community, and other managers to improve composting on campus
- Ensured communal buckets were contamination free and reported weekly data
- Implemented safety measures to protect volunteers during heightened rates of COVID19 transmission

Raising Education Attainment Challenge Ithaca, NY
Co-president, site liaison, and classroom assistant for fifth grade mathematics **March 2021 – December 2022**
- Worked with individual students to complete daily activities and provided additional explanation of new material
- Communicated with tutors and teachers to provide critical updates at multiple schools and community centers
- Facilitated outreach and advertisement through new channels and initiated new procedures to expedite on-boarding
- Coordinated the hire and placement of new students through interviews, training, and transportation
-

SKILLS AND CERTIFICATIONS

Data Management • CITI IRB Training • Compost Management • Spectroscopy • PCR • Western Blots • Fluorescence Microscopy • Familiarity with Python, Matlab, R, ImageJ, ISYS, SnapGene, and Excel • Data presentation

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Corporacion Pinones se Integra

Address: PR 187 km. 4.2

City: Loiza

State: PR: Puerto Rico Zip Code: 00772

B. Unique Entity Identifier (UEI): CQJHEYM5R3U7

C. Applicant/Recipient Point of Contact

Name: Maricruz Rivera Clemente

Phone: Ex. 6 Personal Privacy (PP)

Email: Ex. 6 Personal Privacy (PP)

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

none

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

none

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

none

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☒ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

na

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

na

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Maricruz Rivera Clemente	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

GOVERNMENT OF PUERTO RICO
DEPARTMENT OF NATURAL AND ENVIRONMENTAL RESOURCES

April 13, 2023

Corporación Piñones se Integra
PR 187 Km 4.2
Bo. Torrecilla Baja
Loiza, Puerto Rico 00772

Dear Maricruz Rivera-Clemente:

We are writing this letter to support the proposal entitled "Community Initiative for the Long-Lasting Conservation of the Piñones Forest." Given the agreement between COPI and the DRNA to jointly manage the Piñones Forest Natural Reserve, we would be willing to continue as consultants on technical and scientific matters related to reforestation, channel cleanup, and conservation practices (particularly those related to studying and addressing pollution). In addition, we could continue our role and mission to educate the Piñones community and the broader public to enhance conservation awareness and the use of the forest's recreational and educational facilities.

Our management officers at the DRNA station in the Piñones Forest have previously offered the same technical-scientific consulting and educational workshops we now provide to support the proposed community initiative. Furthermore, DRNA is Puerto Rico's government agency tasked with protecting, conserving, and administrating the island's natural and environmental resources; we are well-equipped as an agency to provide consulting expertise on reforestation, cleanup, and preventing pollution.

We are interested in supporting this proposal to further our mission as a government agency and continue our co-management partnership with COPI in protecting the Piñones Forest.

Sincerely,

Alberto Mercado Vargas
Deputy Secretary

ED_016126_00000837-00001

LIMPIAR

Corporación Piñones Se Integra **Ex. 6 Personal Privacy (PP)**

April 14, 2023

Dear Maricruz Rivera Clemente:

Since 2018, LimPiaR has been committed to addressing improper waste management in Puerto Rico's coastal areas. Because one of our first projects involved cleanup events and working with business owners to achieve adequate waste disposal and recycling, we are happy to support and participate in the proposed Community Initiative for the Long-Lasting Conservation of the Piñones Forest.

Because we have worked with Piñones' business owners over the last few years, we believe we could be a strategic partner in helping to incorporate their needs within a broader effort of conservation of the surrounding ecosystems. Moreover, we have developed expertise in cleanup projects and helping communities build infrastructures for waste management and recycling. We would be willing to consult with COPI, business owners, and community members on these matters.

Piñones is where we first began our initiative. We have successfully completed several projects and specifically worked with COPI. We know business owners and community members, so our interest in collaborating with COPI in this project is a great promise to be able to effectively carry out our mission. Please do not hesitate to contact us with any questions or concerns.

Sincerely,

AGT

Auraluz Guzmán Torres
Director of education and alliances

PROFESSIONAL SUMMARY

PhD. Social Worker and Community Organizer with a background and experience in administration of NGO and governmental-public sector.

WORK HISTORY

Founder and Executive Director

Corporación Piñones Se Integra (COPI) - Loíza, Puerto Rico 08/1998 - Curren

COPI has supported and helped to strengthen the relationship between the community and government agencies, as well as the socio-economic conditions through sustainable community development.

- Design and develop the mission and vision and incorporate COPI as a non-profit organization.
- Recruit people from the community to form the first Board of Directors.
- Acquisition of a building to locate the headquarters of COPI that serves as a cultural-community center that houses the Majestad Negra International Folkloric Ballet, artisans, and cultural and ecological projects.
- Investigated and addressed community development challenges to proactively mitigate problems.
- Search for funds through the development of proposals (state, federal government, and foundations) and through artistic, cultural, sports, and recreational events.
- Development of programs and projects of community outreach in areas of culture, education, economy, and health.
- Avoid community displacement by paralyzing mega tourism projects.
- Develop economic and financial sustainability activities for COPI and the community, thereby creating the first mentoring program for the community.
- Agreement between the Department of Natural and Environmental Resources and COPI for co-management of the preservation and protection of Natural Reserve, and cleaning of lagoon channels to mitigate flood problems in the community.
- Advocate for public transportation with Metropolitan Bus Authority so that the community would have bus services for Piñones-Loíza.
- Coordinate two community meetings between Democratic Congressman Raúl Grijalva, COPI, and members of Loíza communities.

- Collaboration with the Medical Sciences Campus of the University of Puerto Rico in the Health Project for Piñones.
- Co-Founder with Dr. Marta Moreno Vega of the Corredor Afro project in collaboration with Creative Justice Initiative.
- Managed purchase of Casa Afro building.
- Coordinate international presentations of Majestad Negra to represent Puerto Rico in Africa, Cuba, Ecuador and the United States.

Advisor to the Governor

Government of Puerto Rico - San Juan, PR 02/2013 - 06/2015

Advise the Governor of Puerto Rico, Redacted, on government and public policy issues.

- Administer the Governor's Office of Citizen Services.
- Member of the Evaluation Commission of the Administration and Operation of the Luis Muñoz Marín International Airport.
- Articulate the National Plan for the Prevention of Child Abuse 2014-2024 of the Department of Housing and the Public Housing Administration.
- Worked flexible hours; night, weekend, and holiday shifts.
- Used Microsoft Word and other software tools to create documents and other communications.
- Developed team communications and information for meetings.
- Used critical thinking to break down problems, evaluate solutions and make decisions.
- Identified issues, analyzed information, and provided solutions to problems.

Professor of Social Work and Social Sciences

Ana G. Méndez University - Puerto Rico 01/2005 - 03/2013

- Offer courses related to social sciences in the university institutions of the Ana G. Mendez system. (UMET, UNE and Turabo).
- Maintained excellent attendance record, consistently arriving to work on time.
- Drafted examination papers and evaluated students' assignments and classwork.
- Maintained records of students' progress.
- Assisted in curriculum revision and academic planning activities.
- Addressed teaching and research issues.
- Coordinate the internships of the students of the Social Work program.

Supervising Bilingual Counselor

YWCA - Rochester, New York 01/1996 - 07/1998

- Resolved conflicts and negotiated mutually beneficial agreements between parties.
- Participated in continuous improvement by generating suggestions, engaging in problem-solving activities to support teamwork.
- Manage the Women's Resource Center.
- Establish alliances with governmental and private institutions to reach resources for the participants.
- Supervise program counselors, volunteer staff, and participants in the Department of Social Services job training program.

EDUCATION

PhD: Graduate School of Social Work Beatriz Lassalle

University of Puerto Rico - Puerto Rico 07/2022

- **Dissertation:** *Autoethnography of a Maroon on Rhythm of Social Work: Memories and Experiences of Racism, Cultural Resistance, and Public Policy in the Afro-Descendant Community of Piñones.*

Master in Social Work

University of Puerto Rico - Puerto Rico 05/2004

- **Thesis:** *Cultural Context in the Design, Development and Administration of Social Programs.*

Bachelor of Arts in Sociology

Interamerican University - Puerto Rico 05/1993

- **Graduated** Magna Cum Laude

ACCOMPLISHMENTS

VANDERBILT
College of Arts *and* Science

Department of Anthropology

Corporación Piñones Se Integra
Ex. 6 Personal Privacy (PP)

April 6, 2023

Dear Dr. Maricruz Rivera Clemente:

It is with great pleasure that I write to support a partnership with the Corporacíon Piñones se Integra (COPI) as part of their application to secure EPA funding for the project entitled *Community Initiative for the Long-Lasting Conservation of the Piñones Forest*. I have been working with COPI since 2016 on several community-based initiatives, including some ethnographic work on their ongoing mangrove cleanup and reforestation. I have also acted as a coordinator for Vanderbilt students, both in the social and biological sciences, who want to work in the community.

Vanderbilt's role in this project is twofold. First, COPI has asked me to lead the documentation of their mangrove project to assess best practices and areas of improvement. In addition, I have secured funding from the Wenner-Gren Foundation to carry out ethnographic work and community surveys to better understand what the community needs relative to conservation and to gauge their investment in conservation projects. This research will be conducted during the summer of 2023, and findings will be shared with COPI and the community in order to support the objectives of their proposal. Second, I will coordinate for Vanderbilt faculty and students to volunteer to train and work with COPI's staff in (1) best monitoring practices for channel cleanup and reforestation and (2) simple and effective ways to take measurements for pollution and identify polluting sources.

Our interest in working with COPI is that we strongly believe that community-based research should be at the service of the community (and not having the community be at the service of researchers). Furthermore, as an institution of higher learning, we believe that it is our responsibility to document and showcase through our scholarship how marginalized communities are working to fight the consequences of climate change.

Sincerely,

Dr. Gabriel A. Torres Colón

Assistant Professor, Department of Anthropology

Addendum applies:
Yes

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

You're treated as a U.S. domestic organization for purposes of IRC Sections 507-509 and Chapter 42, and thus are subject to these provisions.

You can receive contributions deductible by U.S. citizens and residents for U.S. income tax purposes under IRC Section 170.

You can receive transfers deductible by U.S. citizens and residents for U.S. estate and gift tax purposes to the extent allowable under IRC Sections 2055 and 2522.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ). If you don't normally have more than $50,000 in annual gross receipts from sources within the U.S., and you don't engage in significant activity in the U.S. (other than investment activity), you may submit the Form 990-N, e-Postcard, annually instead of Form 990 or 990-EZ. If you don't file a required return or notice for three consecutive years, your exempt status will automatically be revoked. For more information on filing requirements, see Revenue Procedure 2011-15, 2011-3 I.R.B. 322.

ED_016126_00000843-00001

CORPORACION PINONES SE INTEGRA

You're subject to unrelated business income tax under IRC Section 511 on your unrelated business taxable income derived from sources within the U.S. or effectively connected with the conduct of a trade or business within the U.S. (whether or not such income is derived from sources within the U.S.). For purposes of these rules, the "U.S." includes only the fify states and the District of Columbia. See Publication 598, Tax on Unrelated Business Income of Exempt Organizations, for more information.

If you have employees in the U.S. (whether they are U.S. residents or not) you may be liable for federal employment taxes, including the withholding of tax. See Publication 15, (Circular E), Employer's Tax Guide, and Publication 515, Withholding of Tax on Nonresident Aliens and Foreign Entities, for more information.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities and search "4221-PC" to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for information on your recordkeeping, reporting, and disclosure requirements as a public charity.

Based on the information you submitted with your application, we approved your request for reinstatement under Revenue Procedure 2014-11. Your effective date of exemption, as listed at the top of this letter, is retroactive to your date of revocation.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

Sincerely,

Stephen A. Martin

Director, Exempt Organizations
Rulings and Agreements

Project Summary Page

Title:
Community Initiative for the Long-Lasting Conservation of the Piñones Mangrove Forest

Project Location:
Piñones Sector and Piñones State Forest, Loíza, Puerto Rico, 00772

Applicant Information:
Corporación Piñones se Integra (COPI)
Maricruz Rivera Clemente, Executive Director
Ex. 6 Personal Privacy (PP) (physical address)
HC 02 Box 7631 Loíza PR 00772 (mailing address)
Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization:
COPI's mission is to transform community through culture, development, and conservation. COPI's efforts have resulted in increased access to public transportation, improved drinking water, housing security, and the development of tourism. Since 2020, the Flood Mitigation and Canal Cleaning Project has achieved the partial ecological restoration of canals and lagoons; as a result, community flooding after storms has decreased. Around 5,000 red mangrove saplings have been planted and 2,500 have been dispersed white mangrove seeds on slopes and banks of canals and lagoons. COPI currently has a mangrove nursery with 3,000 red, black, and white mangrove saplings.

Are you applying for the Small CBO Set Aside Track for $150,000 projects?:
YES

Project Abstract:
This project has five key objectives: ecological restoration, reforestation, monitoring, and education. We have begun working on achieving these objectives; however, funding and expanded community involvement are crucial to ensure long-lasting conservation. Ecological restoration consists of cleaning and removal of vegetative debris in the mangrove channels, lagoons, and forest areas. The natural growth of the red mangrove closes the channels that connect the lagoons, so it is necessary to keep them open so that the waters, fish, and organisms flow and interconnect. In addition, the strong winds of storms and hurricanes knock down trees and branches that obstruct the channels, causing the stagnation of the waters and consequently their sedimentation, as well as causing flooding in the Piñones sector. The cleaning of the channels and lagoons allows the natural flow of water and the natural restoration of the existing vegetation and biodiversity in the various ecosystems. Deforestation caused by the onslaught of storms and hurricanes, the indiscriminate felling of trees, and the filling of the wetland with construction waste are accelerating the loss of mangroves. COPI has developed a nursery that has produced more than 5,000 specimens for reforestation in future efforts. With help from our community partners, monitoring will involve field visits, observation, taking

photographs, notes in the log, measuring the size of the plants, and water sampling. Moreover, we aim to add pollution monitoring to this project. Finally, we aim to educate community members and business owners, visitors, and the public about the importance of conservation.

Project Types:
cleanup, reforestation, monitoring, education

Special Considerations:
Climate Change/Disaster Resiliency, Rural Areas

Environmental Issues:
Water, waste, land (flooding/pollution), and air (because of deforestation)

List of Project Partners:

1. Vanderbilt University
2. (Government of Puerto Rico's) Department of Natural and Environmental Resources (DRNA in Spanish)
3. LimPiaR

Will you need to develop a QAPP for your project?
Possibly, but COPI does not currently have the capacity/staff to develop such a plan and could have to rely on EPA guidance and Vanderbilt University partners to develop a QAPP before project implementation.

Community Initiative for the Long-Lasting Conservation of the Piñones Mangrove Forest

Describe and characterize the underserved community directly impacted by disproportionate environmental and/or public health harms and risks and describe how the community is impacted by those harms and risks

Nestled in the northeastern coastline of Puerto Rico and within one of the largest mangrove forests in the Caribbean, most of the people of Piñones, *piñoneros*, are descendants of both formerly enslaved and self-liberated African peoples. With an estimated population of 2,296, with 81% identifying solely as Black in the 2010 US Census, Piñones—a subsector of the municipality of Loíza—is both a rural and impoverished area adjacent to the San Juan metropolitan area. Piñones was the last sector in the greater San Juan area to receive drinking water, public transportation, and housing security.

The Piñones sector can be generally divided into four areas with different uses: first, the beach is a popular recreational area for tourists and locals; second, along the road that usually runs from 100-200 feet from the ocean, there are many restaurants and bars (most operated by small business owners that do not live in Piñones); third, behind the road and businesses, there are main neighborhoods (and a few smaller ones) that are home to the 2,296 residents; fourth, these neighborhoods are nestled in the mangrove forest and its lagoons.

The Piñones Forest, which is protected as a wetland and part of the greater San Juan Estuary, has an impressive biodiversity—including being home to protected species such as the “tinglar” (Dermochelys coriacea) and the manatee (Trichechus manatus). However, Piñones faces many threats from climate change and human threats to the environment. With an increase in storms and an increase in the strength of storms, the community has increasingly felt the effects of these threats.

Because in the 1950s the government of Puerto Rico removed the sand dunes along the Piñones coastline, flooding is a threat from the coast. Meanwhile, the eradication of drainage pathways for the mangrove forests has meant that storm surges flood the mangrove channels and lagoons to the point that these waters flood the communities from within the forest. In addition, we estimate that the forest has been reduced in size by 25% as building—legal and illegal—results in the cutting of trees.

Upstream pollution and rising water temperatures will be challenges for piñoneros for generations to come since a call for coordinated efforts and resources from the Puerto

Rican government has been ignored for generations. However, we also face pollution from local sources that include trash from some residents, trash from tourists, and inadequate disposal of restaurant waste and cooking oils.

Additional threats include inappropriate water drainage in residents' neighborhoods, invasive flora species (Spartina alterniflora), antelopes that eat mangrove leaves, excessive traffic from visitors on the weekends and holidays, displacement of residents from developers looking to build new hotels, and noise pollution from the airplanes that take-off right over the people of Piñones.

What are the environmental/public health issue(s) that the project seeks to address?

With this project, we wish to *not have our community drown* and be at the mercy of the next major storm to hit Puerto Rico and to have *a forest free of pollution* for our children and grandchildren. Therefore, we would like to achieve the long-term conservation of the mangrove forest by continuing our work to clean up mangrove channels and reforestation, but also by working with all stakeholders in our community to increase participation and interest. In turn, increased participation and interest will allow for the establishment of organizational and infrastructural mechanisms in the future.

What are the environmental/public health results the project seeks to achieve and how will the underserved community benefit from those results?

The reduction or elimination of floods will allow a community with high rates of poverty and lower-class workers to not lose their ancestral homes as a result of climate change and environmental decay.

A cleaner and healthy forest, coupled with a reduction in floods, will allow the underserved community to enjoy adequately enjoy some of the greatest natural resources that Puerto Rico has to offer. There are two dimensions of this benefit for residents. First, psychologically, the forest is their ancestral homeland, and pride in the community stewardship of the project is important for raising community morale and being willing to invest themselves in future conservation efforts. Second, an increase in green space will lead to cleaner air and the use of the forest for exercise and recreation.

Meanwhile, the improvement of Piñones as a green area has the potential to increase how business owners can grow their businesses relative to eco-tourism. Residents have also shown interest in small eco-tourism-related startups (indeed, COPI has led the way in this movement by renting kayaks and bicycles to generate income for their

organization).

Additional details about how the project addresses Rural Areas, Climate, and Disaster Resiliency

Although Piñones is close to the San Juan metropolitan area, it was historically marginalized from the urban development that Puerto Rico experienced during the second half of the 20th Century. In fact, Piñones was disconnected from San Juan for many of those decades because the channel that connects the sea with the mangrove lagoon had no bridge. The rural nature of Piñones, combined with racism towards piñoneros, were factors in the underdevelopment of the community as the airport was built with the community's dunes and without consultation of how airplanes taking off could affect the community's development. In addition, housing in Piñones has always been "irregular" in the eyes of the state (i.e., piñoneros have been treated as squatters) even though families trace their ancestry to the maroons that took refuge in the forest. As a result, Piñones neighborhoods have remained with low density and only a handful of families.

This historical marginalization of Piñones has made it more vulnerable to disasters as a result of climate change. More and stronger storms are making climate resiliency an urgent necessity in our community.

History of your organization's involvement with the underserved community

COPI has been the most well-organized and socially active organization in Piñones since it was formed in 1999. Founded by piñonera Maricruz Rivera Clemente, COPI is an organization formed by piñoneros for piñoneros. Over the years, many people from Piñones have been involved with one or several of COPI's community initiatives.

COPI has been committed to finding alternatives to the existing social problems that deteriorate Piñones in order to improve the quality of life of residents, families, and visitors. COPI led campaigns to improve the quality of drinking water, extend the public bus lines to Piñones so residents could go to work, participate in public health outreach campaigns, and provide food and water relief after the passing of recent hurricanes. COPI also led a well document (in local and some international press) effort to halt a mega hotel development in the part of Piñones called Costa Serena.

Currently, COPI is focused on strengthening the community of Piñones through numerous sustainable development initiatives, recognizing the peculiarities and necessities of community residents and its business community. COPI tries to promote

an authentic process of community participation, empowerment, and mobilization through social improvement actions and micro-enterprise development.

COPI is also highly invested in anti-racism through the promotion and offereing of cultural activities. COPI offers different cultural and eco touristic services: Bomba workshops and classes, Afro-Puertorican Music Shows (Bomba y Plena), micro-enterprises like CicloNatura bike rentals and AcuaNatura kayaks rentals, tours through the mangrove forest, and other services. Finally, the International Folkloric Ballet Majestad Negra (officially recognized as an artist of the Puerto Rican Culture Institute) regularly performs around the island and the world. The message communicated through their music often incorporates lessons about conservation and community advocacy.

How has the organization worked with the underserved community's residents and/or organizations to address local environmental and public health issues currently or in the past and what are some of the results of that work?

As mentioned above, this project seeks funds to continue efforts that we have already begun (but are in need of funding to achieve long-term conservation). Previous clean-up and reforestation work has led to the following results:

- Opening of the Torrecilla and Clemente Mangrove Channels

On July 2, 2020, the cleaning, unhooking, and removal of trees and branches that had been felled by the strong winds of hurricanes Irma and María began. During the first week of work, the plug was removed between the Piñones Lagoon and the Torrecilla Canal. Vegetative material was removed from an area of approximately 50 linear feet (15.24 meters). By July 23, the cleanup of 656 linear feet (200 meters) had been achieved. In the most recent field study, August 12, 2020, the cleaning of a little more than 400 meters had already been completed. With the cleaning of the Torrecilla Canal, the need to open and clean other canals and bodies of water that connect to it has been identified. A group of workers continues to clean the Torrecilla Canal and another group has begun cleaning the Laguna Las Marías and related pipes to mitigate flooding in other areas surrounding this lagoon. This is a complex lagoon system and its interconnection makes it necessary to work considering other bodies of water belonging to the ecosystem.

The opening of the Clemente Canal was successfully achieved with work carried out from mid-August 2020 to mid-March 2021. The channel was heavily clogged, mostly by debris left by hurricanes Irma and María. After cleaning, the first exploratory trip was

carried out on March 22, 2021, with a group of collaborators.

- Water Flow

After channel cleanup began, the currents and the flow of water were observed in rapid movement from east to west. The fluidity of the water and the change in its composition are perceived, now less muddy and cloudy. The biologists of the project (Herminio Díaz-DRNA and Israel Díaz-COPI) state the following: "Before starting the Flood Mitigation and Canal Cleaning Project, little water and air circulation was observed in the lagoon, and this is associated with the pestilence or bad odors and the mortality of fish. The latter is related to hypoxia or loss of oxygen and the absence of fish-eating birds such as pelicans, sea eagles and others. As a result of the Cleanup Project, turbidity as an indicator of the cleanliness of tidal and rain waters has improved from 4 inches of light in the water column to 2.5 to 3 feet (one meter) of light in the water column. Change in watercolor has also been observed. It was dark brown before the start of the cleanup and changed to a pastel brown once the project started. Foul smells have decreased (on a scale of 1 to 10 where higher number has a worse smell) before cleanup it was a value of 8 and currently (August 2020) the level on the odor scale is 3. This finding indicates significant changes to the ecosystem."

In the Clemente Channel, the restoration works demonstrate the remarkable flow of water with the change of the tide, this helps the exchange of nutrients and prevents their accumulation. No human contamination, such as oils, were observed (since it is being washed away), nor did we observe used water discharges (except for some plastic bottles). Depths range from 0.5m to 1.5m. There is no marked presence of bad odors such as hydrogen sulfide (H2S) or ammonia (NH3); there is the presence of both anoxic conditions and the entry of oxygen-rich waters. It is important to maintain the flow of water in the canal and avoid anoxic conditions that encourage methane production. In turn, it allows the entry of fauna such as fish, mollusks, and crustaceans for reproduction, protection from predators, juvenile development area, and hunting. It was possible to appreciate not only the diversity of species but also their numbers, such as the violinist crab (Uca spp) and the woodcreeper (Aratus pisonii); while the tide rises, a large number of woodcreepers can be seen towards the canopy of the red mangrove (Rhizophora mangle) on the edges of the Clemente Channel; while the fiddler crab present in large numbers hide in the background. In addition, a specimen of Puerto Rican boa (Epicrates inornatus) was observed very close to the exit of the Clemente Canal to the Torrecilla Lagoon.

- Ecosystem Restoration

In this flood mitigation and channel-cleaning project through pruning, loosening, and extraction of vegetative material in the Torrecilla Canal, significant changes have been observed in field studies and in relation to the ecosystem. The biologists, Herminio Díaz and Israel Díaz, associated with our project at the time pointed out the following findings: "Until July 23, 2020, in field study evaluations conducted in the early morning hours and at noon of each workday, it was found that light manages to enter between 1 foot to three feet. With the cleaning of the canal, an average of 1 meter of light in the water column is achieved. Turbidity is measured by the entry of light into the water column. Prior to channel cleaning, only 2 to 4 inches were recorded in the water column. Another way to measure the results of ecosystem restoration is through population research fishing. This method consists of doing initial fishing in a boat run with lures for fish predators. Schools rich in grazing fish and breeding stages are needed for large fish to thrive." With the assistance of Mr. Israel Diaz, a consulting scientist and member of COPI, experimental fishing began. The fish that were caught were identified, measured, and weighed. The gills were observed to see the health of the fish and when these are red it means that the animal is oxygenating well.

In the Clemente Canal, the zone extends from Laguna Las Marías to Laguna Torrecilla; the presence of red mangrove (Rhizophora mangle) and white mangrove (Lacuncularia racemosa) on the edges of the channel is notable. The red mangrove is understood to live in the water directly and the white mangrove generally follows in succession as we go inland. There is a presence of black mangroves further away from the Paseo Tablado where we use the kayaks to enter the canal. There the concentrations of salt must be higher due to the evaporation of water. There is also a presence of button mangrove (Conocarpus erectus) near the residence where we left to work. The roots of the red mangrove, in addition to giving protection to the fauna of the place, filter the water, reduce erosion, and avoid strong tides. Red mangrove seedlings are observed on the slopes of the canal.

- Flood Mitigation

Another significant effect of this mitigation project through the cleaning (pruning, unhooking, and extraction) of the Torrecilla Canal has been the reduction of flood events. It is corroborated in the most recent atmospheric event that neither the community of Piñones nor the properties near the Laguna Piñones suffered flooding. Storm Isaías posed for Puerto Rico at dawn on July 30, 2020, leaving heavy rains and associated disasters (floods, landslides, and others). In the field study conducted on July 30, 2020, at 12:00 noon, it was observed that the community did not present flooding as in other similar atmospheric events that occurred in previous years (storm

Janet in 2004). In the Clemente Canal works, after they were completed, a decrease in flood events has been observed after rain events.

Community Driven Participation

COPI is composed of members from the community of Piñones and the greater township of Loiza. The people who have so far worked in our projects are all from the community; therefore, all of our ideas for this project come directly from the community through COPI. Our community partners at DRNA gauged the effects of our projects by surveying community members (see the section directly above), and their feedback has been invaluable in how we have evolved in our conservation mission. Moreover, COPI always reaches out to the community first for work and volunteer opportunities, so community-driven participation in this project is guaranteed.

Which of the seven elements of the EJCPS Model will be undertaken for this project? Also, describe which EJCPS Model element(s) associated with this project may have already begun or been accomplished

Because we have already begun work on this project, element 1 of the EJCPS Model has been partially achieved. We will need to work with LimPiaR, one of our project partners to vision and strategic goal-setting that is inclusive of business owners. This situation with business owners also applies to elements 2 and 3 since we wish to incorporate business leadership into leadership development. It is important to mention that we have, in fact, worked with business leaders before, but they had a small association, and their leader has been hospitalized for a few months. The components of our project that involve residents, cleanup, and reforestation have already begun with previous projects; however, the question of long-term conservation will have to be revisited in conversations with all stakeholders.

Element 4 will be undertaken with this project. Part of the problem with our previous conservation work is that we took on a lot of the work through COPI. Although we believe that our undertaking is evidence of our capacity to carry out the proposed projects, long-term conservation will require collaboration our project partners. For example, monitoring could be more effective and robust if undertaken by our Vanderbilt Partners. Similarly, in order to advocate for long-term advocacy, we need the DRNA to leverage its resources as a government agency.
Elements 4 and 5, will be addressed by this project since cleanup and reforestation are works that can easily be undone with severe atmospheric events. Therefore, we need our community partners to be fully involved along the way as we build more effective future management practices and we evaluate and formulate best practices for future

generations.

How the project supports EPA Strategic Plan Goal 2

Although this is a humble community-based project, we believe that we live in times when we can no longer rely on solutions to climate change from high above the government. With this project, we are both practicing conservation to mitigate climate change and demonstrating how environmental justice and civil rights can be achieved through the empowerment of community organizations representing minorities that have been historically the target of discrimination and social exclusion.

Partners Involved

All three partners will bring their own resources to our collaborations, and they will not receive sub-awards from this project.

(1) Vanderbilt University: VU researcher will utilize qualitative research to document the conservation work in the mangrove. This documentation will then be important for assessing best practices and areas for improvement. VU will also carry out qualitative and quantitative research in the community, business owners, and government stakeholders in and outside the community to evaluate how to increase partnerships and collaborations to achieve long-term conservation. VU will also coordinate their faculty and students to volunteer their time and educate COPI's staff in monitoring practices (particularly of reforestation), measuring pollution, and identifying polluting sources.

(2) Department of Natural and Environmental Resources (DRNA): COPI and the DRNA have a signed agreement to jointly manage the Piñones Forest Natural Reserve. DRNA will be continuing its role as a consultant in technical, scientific, and educational matters as they relate to this project. Historically, the DRNA station in the Piñones Forest has not always been involved in community conservation efforts. This is partly due to what we understand are the station's limited resources but also because there has not been a concerted effort to grow our partnership beyond the signed agreement. Beyond the station in the Piñones Forest, the DRNA, as a state agency, is tasked with protecting, conserving, and administrating the island's natural and environmental resources; our partnership with DRNA will serve to properly identify environmental problem and specify which resources the DRNA can contribute to fix those problems.

(3) LimPiaR: Because the business owners in Piñones are currently lacking a working organization and leadership to represent their needs, it is crucial that LimPiaR serves as

a community partner to mediate any conflicts between conservation practices, addressing pollution emanating from businesses and their visitors, and working towards viable solutions. LimPiaR already has experience with creating and implementing recycling plans in Piñones, but more work needs to be done. Furthermore, LimPiaR carries out their own cleanup efforts in Piñones and other parts of the island, so they could benefit from the organizational resources of COPI and consulting from VU and the DRNA.

Project Activities and Milestone Schedule

In attending to elements 1-3 of the EJCPS Model, COPI will organize a series of meetings over a three-month period to reevaluate the community's vision of conservation. These meetings will be led by members of LimPeaR since they are from outside the community and have a good working history with COPI and business owners. In addition, consultation with VU researchers and the DRNA will be necessary to educate and train COPI staff on best monitoring practices. Also, it will be important to determine which monitoring practices will be taken up by VU researchers and DRNA.

Of course, the elements of cleanup and reforestation will be undertaken from the first day of this project. This project will take place over two years. Although we are aware that some of the clean-up and reforestation workplan might change after the first set of meetings with partners, these conservation efforts cannot stop given the grave threat of climate change and flooding disasters for Piñones. Again, one of the main objectives of this project is for our partners to help us grow, refine, and achieve long-term conservation with the work that we already have in place. Clean-up and reforestation project activities are as follows and will be completed over two years:

1. Continue with the maintenance and cleaning of the channels, edge of the lagoons, and forest areas. Cut vegetation and remove garbage to avoid reducing the flow of water in the lagoons and runoff in rainy events.
2. Plant 24,000 red mangrove and black mangrove trees in forest zones of approximately 20,000 m2 which is within a total deforested area of 2040,000 m2. These zones are primarily located to the northeast of the Piñones sector between Highway 187 to the north and the Piñones lagoon to the south. Planting is urgently needed in this area to mitigate possible storm surges and prevent soil erosion.
3. Expand the nursery with the planting of 24,000 mangrove trees (with the four varieties found in Piñones: "red," "black," "white," and "button"), 300 beach grape bushes and 300 icaco bushes to reinforce the buffer zone.
4. Systematically monitor the water quality in canals and lagoons and in reforested areas of the forest through field visits, water tests, mortality, and survival of planted

plants. We realize that this part of the work plan will have to be developed in consultation with VU and the DRNA.

Before the start of the second year of the project, COPI will meet with partners to assess progress, evaluate the quality of collaboration, and identify areas for improvement. In addition, we plan to tackle questions of pollution in the second year since we anticipate that this is the area where there is greater potential for conflict; therefore, we would like to have one year of a working relationship with all partners before elaborating solutions for pollution.

Performance Measurement Plan Sustainability Plan and Community Vision

Regarding clean-up and reforestation, we will measure our performance by the number of mangrove trees planted and the total area of mangrove regrowth (in accordance with the numbers presented in the section above).

The question of increased community cooperation to address long-term conservation will be at first measured by the quality and practicality of the working plans agreements that result from the meetings at the beginning and halfway through the project. Projecting what will be measured beyond those agreed collaborations is difficult at this point, but we would like to measure (1) the number of business owners that participate in conservation efforts, (2) the quality and quantity of scientific data that result from monitoring collaborations, (3) the number and quality of policy plan proposals that result at the end of the project—particularly those policy plans proposals that DRNA can use to advocate for more government resources.

Sustainability Plan and Community Vision

Above, we have detailed the results of our work of cleaning up and reforestation up until the present. Specifically, we addressed the opening of the Torrecilla and Clemente Mangrove Channels, water flow, ecosystem restoration, and flood mitigation. (Please consult those detailed results in evaluating COPI in this criterion.)

The community has a vested interest in this project because it is a known solution to preventing catastrophic human and material loss after major storms; furthermore, business owners have an interest in not conducting business in an area experiencing disasters and being able to harness increased green spaces for the purposes of eco-tourism.

Finally, our community-based initiative thus far and our prosed work for this project can serve as a model for governments to empower communities to confront the consequences of climate change more effectively. Also, as a historically marginalized community, Piñones can show the world that tackling climate change can be both a problem for humanity and for the preservation of culture in communities.

Organizational Experience

Because we are such a small organization, the experience that we have had in environmental projects is one and the same with all our past and current staff, including Maricruz Rivera Clemente, our executive director. COPI often has one or fewer full-time employees, so there is not much division of labor. Nevertheless and to clarify how our small organization operates, we want to explain that our "executive director" acts as director and all other administrative roles because everyone else is doing service work.

Staff Experience / Qualifications of Project Manager (PM)

In continuing to clarify how our small staff works, the project manager for this project will also be Maricruz Rivera Clemente, particularly since she is the one with the most administrative experience (and the only one available) to maintain a continuous dialogue with partners and the EPA. Also, see above for Maricruz's long-time involvement with COPI, as founder and current director (she is also from Piñones)

However, what we might call the "field manager" is Marcos Peñalosa Pico, who is a part-time employee of COPI. He is the one who has been with leading the difficult work in the mangrove, coming up with innovative planting techniques, and designing/implementing monitoring of reforestation. Marcos and his part-time staff usually work no more than 4 hours in the morning since the work is too difficult to carry out thorough the day. All of the staff that he oversees has also been involved in our conservation projects up to this point. In addition, during the initial channel cleanup phase to mitigate flooding, there were up to 10 part-time workers. All of the current and former staff were hired from the community with the purpose of increasing how residents see themselves invested in our projects.

Expenditure of Awarded Grant Funds and Past Performance

As mentioned above, we have a very small staff, so our executive director accounts for our expenditures. In the last three years, COPI has received funding from the Hispanic Federation and Banco Popular. For both organizations, COPI has submitted final

executive reports that the granting agencies approved. Still, we would be happy to receive guidance from the EPA on these matters.

Quality Assurance Project Plan

For our proposed monitoring objectives, we will likely need to develop a QAPP. However, we do not have the necessary expertise at COPI to formulate such a plan. We hope that, in collaboration with the DRNA, VU researchers, and the EPA, we are able to develop a QAPP if necessary.

EPA KEY CONTACTS FORM

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Authorized Representative: *Original awards and amendments will be sent to this individual for review and acceptance, unless otherwise indicated.*

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Great Swamp Watershed Association

Address: P.O. Box 300

City: New Vernon

State: NJ: New Jersey Zip Code: 07976

B. Unique Entity Identifier (UEI): YBZWKKZ4KMD1

C. Applicant/Recipient Point of Contact

Name: Lynne Applebaum

Phone: Ex. 6 Personal Privacy (PP)

Email: lapplebaum@greatswamp.org

Title: Director of Institutional Relations

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☒ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☐ Yes	☒ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☐ Yes	☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Lynne Applebaum	Director of Institutional Relations	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Morristown, NJ 07960

Dear Ms. Applebaum,

The mission of the Boys & Girls Club of Paterson and Passaic (BGCPP) is to enable all young people, especially those who need us most, to reach their full potential as productive, caring, responsible citizens. This mission is met through the provision of after school, summer camp, academic and workforce readiness at 12 sites within Paterson and Passaic.

We are happy to be listed as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by Great Swamp Watershed Association (GSWA).

We are committed to working with GSWA and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the Request for Applications (RFA). BGCPP will provide space for program meetings and access to BGCPP student members who may be interested in joining the proposed program, Developing Youth Advocacy Corps to Identify and Implement Environmental Justice Solutions. BGCPP has worked with GSWA on other grants over the years, including a recent grant application for after school environmental education programs.

Relationship to Community: BGCPP provides a safe and wholesome after school environment for 1,100 youth ages 5 through 18 daily. During summer months, we provide full day camp for youth to stay active, engaged, and learning when school is out of session. Our professional staff and dedicated community partners deliver a comprehensive array of high quality educational, social, and recreational programs.

If GSWA is selected for participation in the program, BGCPP commits to regularly engaging with GSWA and other key partners of the Collaborative Problem-Solving Agreement. This includes the potential to participate in EJCPS meetings with the technical advisory panel and other key partners and stakeholders from our community. We will provide meeting space within our Clubhouse for up to 5 hours per week for 12 months at a cost of $100/hour.

We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

If you need any further information, please contact me directly at Ex. 6 - Personal Privacy (PP) x [redacted] or via email at wmcguire@bgcppnj.org.

Thank you.

Sincerely,

Wendy McGuire

RE: ***Developing a Youth Advocacy Corps to Identify and Implement Environmental Justice Solutions***

Dear EPA Environmental Justice Collaborative Problem-Solving Selection Committee,

I am pleased to provide this letter of commitment to the Great Swamp Watershed Association and the project team for the proposal entitled *Developing a Youth Advocacy Corps to Identify and Implement Environmental Justice Solutions*. The Nature Conservancy (TNC) is a partner on several projects with the existing project team and is pleased to participate as a core member for this funding opportunity. TNC is excited to work with the project team to train, empower, and uplift local youth in prioritizing community-centered projects that address climate and environmental justice impacts within the city of Paterson, such as urban heat, flooding, air quality, public health, and well-being.

TNC is one of the leading conservation organizations in the world, with a presence in all 50 states and over 70 countries worldwide. Our mission is to conserve the land and waters on which all life depends by working in a collaborative, science-based manner with a variety of partners. In New Jersey, TNC has been working with communities and supporting cities and partners to use nature-based approaches to improve the well-being of overburdened communities through a process that is community centered and collaborative.

TNC is committed to being a core member of this project team and to provide thought partnership, technical assistance, and additional support that may be needed throughout the project period. Additionally, TNC will commit to assist the mentorship component of the Youth Advocacy Corps, promote the engagement of community members, and provide facilitation of meetings with stakeholders. We strongly believe that the goals and outcomes of this project are in line with the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program and have added values that will lead to increased community and city resilience to climate impacts, as well as create the next generation of environmental leaders, advocates, and professionals that will guide the protection of communities, restoration of natural resources, and creation of green jobs.

Thank you for considering our commitment to this project. We are excited about the potential impact of this initiative and are looking forward to working alongside our partners to create a Youth Advocacy Corps and share our challenges, successes, and lessons learned with communities across the nation.

Regards,

Johnny Quispe

RE: Letter of Support for Great Swamp Watershed Association's Proposal to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program

Dear Ms. Applebaum,

The Rutgers Cooperative Extension (RCE) Water Resources Program is pleased to write this letter of support for Great Swamp Watershed Association's plan to develop a youth advocacy corps to identify and implement environmental justice solutions in Paterson, New Jersey.

The RCE Water Resources Program has been working with urban communities throughout New Jersey to identify green infrastructure opportunities to manage stormwater and reduce combined sewer overflows. We have begun to identify potential green infrastructure projects in Paterson. This proposal will engage the youth of Paterson in environmental justice issues. Paterson has many EJ problems, introducing youth to these problems is crucial to developing long term advocacy among the City's residents. The RCE Water Resource Program will provide technical support to NJIT and the Great Swamp Watershed Association in working with the Youth Corps to educate them on EJ issues and develop solutions to the issues. We will also oversee implementation of the solutions that the students identify as discussed in the proposal. For this effort, we will receive $30,000 ($10,000/year).

Please feel free to contact me directly at Ex. 6 - Personal Privacy (PP) or Ex. 6 - Personal Privacy (PP) with any questions. I hope that you will respond positively to this proposal request.

Sincerely,

Christopher C. Obropta, Ph.D., P.E.
Extension Specialist in Water Resources

April 13, 2023

Lynne Applebaum
Director of Institutional Relations
Great Swamp Watershed Association
P.O. Box 3200
Mt. Vernon, NJ 07976

Dear Ms. Applebaum,

Trust for Public Land (TPL) is a national non-profit dedicated to the conservation of land and the development of parks and playgrounds with a mission to ensure that everyone in the United States lives within a ten minute walk to an open space or well-design park. We have offices across the country with one located in Newark, NJ and have been working in New Jersey for nearly 40 years. We are happy to be a key community partner in the Request for Applications for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EJCPS) submitted to the Environmental Protection Agency (EPA) by the Great Swamp Watershed Association.

TPL is committed to working with Great Swamp and other partners identified in the EJCPS application to advance the local vision and need articulated in the application. We look forward to being part of the leadership team to help develop and guide the program forward. TPL has expertise in designing and constructing parks and playgrounds and we intend to bring that experience to the table in addition to our community connections particularly in Newark but also in many other communities across New Jersey. Our experience and connections, coupled with that of the other community partners, will ensure we have a successful program that is rewarding to the participants and to the communities they serve.

TPL and Great Swamp have had aligned missions for decades. Many protected parcels of the Great Swamp were obtained through work that TPL did as part of our land conservation work. We continue to add to protected open space around Great Swamp and across New Jersey. In addition, we have been creating

TRUST FOR PUBLIC LAND™

60 Park Place.
Suite 901
Newark, NJ
07102
t: Ex. 6 - Personal Privacy (PP)
tpl.org

public access along the Passaic River the past decade, we see a path forward in how our work two organizations can work together along the Passaic – public access, improved water quality, and working to make sure the river is a benefit and enhances the quality of life for the communities along it.

Our organization has strong community relationships in the areas we work. One of our signature initiatives is that all of our parks and playgrounds are designed by and for the community. Whether it is a series of community meetings around a future park project, or a new schoolyard where we work with students over many weeks through a participatory design process; a landscape architect is on board to turn the project into a buildable facility – but is the community who designs it and, of course, will ultimately benefit and be a part of its care. The goal is two-fold, to ensure parks reflect what the community wants and to connect the community to the land, to nature, to the earth. We see this Youth Advocacy Corps as one more way to further that work.

If Great Swamp is selected for the grant, TPL is committed to regularly engaging with them and other key partners of the Collaborative Problem-Solving Agreement. Our understanding that TPL will be compensated $20,000 over the three year grant cycle for its time commitment to the program. This includes the potential to participate in EJCPS meetings and the technical advisory panel along with other key partners and community stakeholders. We look forward to this opportunity to advance transformative environmental justice projects.

Thank you,

Scott Dvorak
Associate Vice President and New Jersey State Director

Re: Letter of resource commitment for USEPA EJPS Cooperative agreement program.

Dear Ms. Applebaum,

The Center for Natural Resources (CNR) at NJIT was founded in 2012 to foster sensible approaches for environmental and energy resource utilization, produce next generation of scientists that are well informed of societal needs, provide environmental education and best methods for stewardship of natural resources. We are pleased to support the Great Swamp Watershed Association for the project titled "Developing a Youth Advocacy Corps. to Identify and Implement Environmental Justice Solutions" under the grant: Environmental Justice Collaborative Problem-Solving (EJPS) Cooperative Agreement Program.

The Center for Natural Resources, NJIT is committed to work with Great Swamp Watershed Association (GSWA), Passaic County Habitat for Humanity and Rutgers cooperative program to train high school on environmental education by raising awareness about environmental challenges, laboratory and field investigations conducted using cutting edge techniques. The identified project scope from Center for Natural Resources, NJIT will help young students understand the current environmental justice issues and learn how to reduce them. For these efforts, NJIT will receive $81,200 over the course of three years, approximately $27,066 per year.

Personnel from the CNR have interacted with the GSWA through the Newark DIG (Doing Infrastructure Green) for the last two years.

Thank you for considering this application to the EJPS agreement program. We look forward to working with the project key partners of the collaborative problem-solving agreement to address environmental issues in a collaborative manner with all stakeholders and communities.

Sincerely,

Michel C. Boufadel

Created and designed presentation and flyers for clients to promote new products and special deals on social media platforms

Collected, researched and analyzed market information and consumer buying patterns to create an inventory plan, media strategy and social media content

Communication internally to management and other stakeholders about the social media plans

WOMEN'S PELVIC SURGERY OF NORTH JERSEY, HACKENSACK — CLINICAL MANAGER

January 2018 - April 2021

Oversaw all social media platforms such as Instagram, Facebook and Google business pages, along with responding to media inquiries

Managed daily operations of the office and supervised five employees on an ongoing basis and was responsible for hiring and training

Developed a paperless environment by implementing an electronic medical record system to manage data, process surgical/lab orders and integrate processes

INTERNSHIPS

GREAT SWAMP WATERSHED ASSOCIATION, MORRISTOWN, NJ - EDUCATION, OUTREACH AND WATER QUALITY ASSOCIATE

January - May 2022

Conducted water quality education programs that included both outreach and onsite programs for schools and the public

Created writing pieces about water quality, environmental justice and environmental programs for 'Across the Watershed' newsletter and GSWA website

Performed water chemistry monitoring, visual stream assessments, and macroinvertebrate monitoring

Dear Jacob Burney,

I am happy to offer support for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by Great Swamp Watershed Association (GSWA) on behalf of the Paterson Public Schools.

The proposed project entitled "**Developing a Youth Advocacy Corps to Identify and Implement Environmental Justice Implement Solutions**" will engage Paterson youth in solutions-based learning activities that prepare them to be stewards of their local environment. The cohort of technical, educational and community experts assembled for this program will provide students with a deep dive into their local environmental challenges and creative problem solving that results from interagency and multiple stakeholder collaboration. This endeavor in critical thinking and creative solution making will offer lifelong benefits to students irrespective of their career path.

We urge you to support GSWA's application for this program submitted by the Great Swamp Watershed Association. Thank you for your consideration.

Sincerely,

Sarah Sterling-Laldee
Director of STEAM Education

Dear Taxpayer:

This is in response to your request dated Feb. 16, 2017, regarding your tax-exempt status.

We issued you a determination letter in August 1982, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

Our records also indicate you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If a return is required, you must file Form 990, 990-EZ, 990-N, or 990-PF by the 15th day of the fifth month after the end of your annual accounting period. IRC Section 6033(j) provides that, if you don't file a required annual information return or notice for three consecutive years, your exempt status will be automatically revoked on the filing due date of the third required return or notice.

For tax forms, instructions, and publications, visit www.irs.gov or call Ex. 6 Personal Privacy (PP) Ex. 6 - Personal Privacy (PP)

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific Time).

Dear Mr. Burney,

I am happy to offer support for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by Great Swamp Watershed Association (GSWA) on behalf of Urban Wilderness Renewal, based in Paterson, NJ. We are devoted to awakening an awareness of the presence of God in the ordinary and wilderness places of our lives and in the beauty of God's creation. One way we do this is through taking out groups of children, teens and adults to explore the beauty of the Passaic River around the city of Paterson.

The proposed project entitled "**Developing a Youth Advocacy Corps. to Identify and Implement Environmental Justice Implement Solutions**" will engage Paterson youth in actively pursuing solutions to the city's environmental challenges and provide them with a valuable learning experience. The guidance the students receive from the cohort of technical, educational and community will provide the students with a deeper knowledge through active exploration of real-world challenges and problem solving resulting in authentic learning. The ability to utilize critical thinking skills and explore creative solutions will help the students in life, no matter what path they choose to take.
We urge you to support GSWA's application for this program submitted by the Great Swamp Watershed Association. Thank you for your consideration.

Sincerely,

Rev. John A Algera, President

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Green & Healthy Homes Initiative, Inc.

Address: 2714 Hudson Street

City: Baltimore

State: MD: Maryland Zip Code: 21224-4716

B. Unique Entity Identifier (UEI): HYQKKGCH7XZ5

C. Applicant/Recipient Point of Contact

Name: Ruth Ann Norton

Phone: Ex. 6 Personal Privacy (PP)

Email: ranortong@ghhi.org

Title: President & CEO

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Yes. Erika Buffaloe, Director of Human Resources, Ex. 6 Personal Privacy (PP) Baltimore, MD 21224-4716, ebuffaloe@ghhi.org, Ex. 6 - Personal Privacy (PP) fax, Ex. 6 - Personal Privacy (PP) phone

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Yes. GHHI does not discriminate on the basis of race, color, national origin, sex or handicap. Attached: GHHl's Employee Grievance Procedures-Section 403 Employee Concerns: Mediation Process from Employee Handbook & GHHl's Public Client Grievance Procedures, complying with 40 CFR 5 & 7. Due to space constraints, this response is continued as an attachment and has been uploaded to the attachments form. The file name is: EPA FORM 4700-4 XI Response Continued.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Wes Stewart	President & Chief Executive Officer	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Environmental Justice Collaborative Problem-Solving (EJPS) Proposal

1.0 Program Objectives

a. Project Summary Page

Project Title: Developing a Youth Advocacy Corps to Identify and Implement Environmental Justice Solutions

Project Location: Paterson, NJ

Applicant Information: Great Swamp Watershed Association Ex. 6 Personal Privacy (PP)
Ex. 6 Personal Privacy (PP) Lynne Applebaum, Director of Institutional Relations

Brief Description of the Applicant Organization

Great Swamp Watershed Association (GSWA), located in New Vernon, NJ, has dedicated itself to the preservation and protection of the water and land resources of the Great Swamp Watershed and Passaic River for 41 years.

MISSION

The Great Swamp Watershed Association protects and improves the health of the Passaic River through science, education, land preservation and stewardship, and advocacy. We are the only entity monitoring the streams of the Great Swamp Watershed and the main stem of the Passaic River on a consistent basis. Great Swamp Watershed Association offers STEM Environmental Education programs at a variety of schools all across our watershed.

Project Abstract:

Great Swamp Watershed Association (GSWA) and its partners will develop a Youth Advocacy Corps to Identify Environmental Justice (EJ) Issues and Implement EJ Solutions in Paterson, NJ.

Paterson, which sits along the Passaic River, is the third most populous city in New Jersey. According to the EJ Mapping Tool, 145,484 people live in Paterson, with the 2020 US Census reporting a minority population of over 86%. Over 25% of the residents of Paterson are at or below poverty level. A combination of high impervious surface cover and 23 Combined Sewer Outfalls result in local flooding and Combined Sewer Overflow events that discharge into the Passaic River. The project will:

- Train and educate students to engage in local environmental and climate issues
- Identify EJ issues in Paterson and devise solutions
- Advocate for and Implement EJ solutions
- Design a Neighborhood Green Infrastructure Plan

GSWA will recruit and hire a Program Liaison to engage with students to identify local EJ issues, brainstorm remedies, pursue funding, and implement solutions. New Jersey Institute of Technology will work with the students to develop these potential solutions to address the problems. Flooding will likely be the primary issue and green infrastructure one of the

solutions. Rutgers Cooperative Extension Water Resources Program will provide technical support and help students design and install green infrastructure in areas the Youth Advocacy Corps. identifies as priority areas. The project team intends to offer this program every year for students in Paterson and possibly surrounding communities.

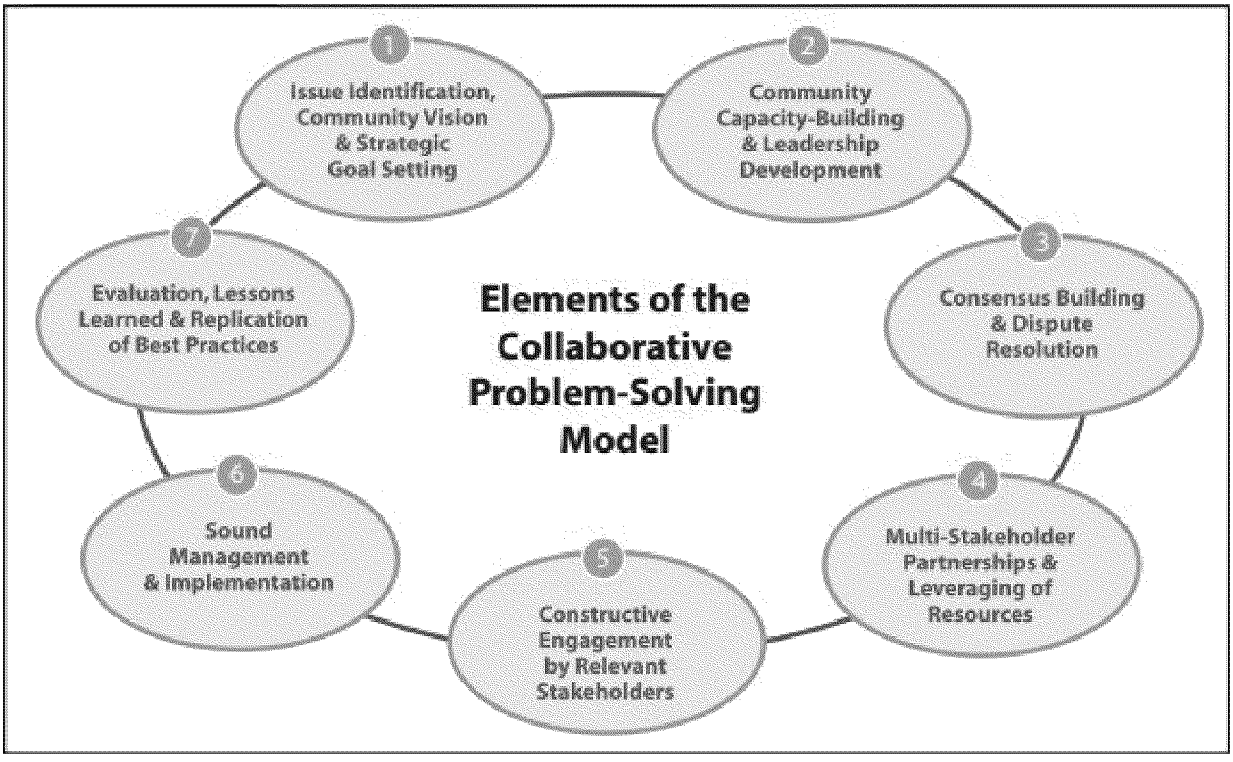
Project Type(s): Student Environmental Advocacy Training

Environmental Issues: The City of Paterson experiences flooding during major and minor rainstorm events due to both combined sewer overflows and the severity and frequency of storm impacts from climate change. Flooding is an ongoing problem for the city of Paterson. In addition to damage to properties, flooding can also cut off access to utilities, emergency services, transportation, exacerbate pollution, negatively impact water quality, and may affect the overall economic well-being of an area. Untreated sewage can seep into the Passaic River after a storm, a source of drinking water for two million New Jersey residents, which carries additional human consequences. The downstream urbanized portions of the river are impacted by heavy development and increased areas of impervious cover, which compound issues arising from flooding and runoff. Urban areas suffer from a wide range of factors which impact the health of residents. One factor is the lack of equitable access to green space. According to a 2015 study conducted by the National Institute for Health, research has shown that children who live within five minutes of green space are healthier than those that live 20 minutes from green space. Through lectures by the Center for Natural Resources (CNR)-New Jersey Institute of Technology (NJIT) personnel, students will learn about the human health issues associated with lack of green space and opportunities to address this issue. One solution to this issue may revolve around identifying vacant lots in Paterson that can be converted into green space, pocket parks, or community gardens. Another solution to local flooding and pollution issues could be to expand GSWA and The Nature Conservancy's (TNC) Adopt-A-Catch Basin program, which targets the clearing of debris from storm drains in order to reduce the clogging of the sewer systems that trigger Combined Sewer Overflow events. The direction of identifying and prioritizing issues and solutions will be guided through a community-based approach which the Youth Advocacy Corps and the project team will facilitate, which could mean that either of the aforementioned projects would be prioritized, in addition to other issues not yet identified. Ultimately, the deliverable for this project will result in the identification and prioritization of target areas for the implementation of nature-based solutions throughout the city in addition to providing the technical support and materials needed to successfully address the identified issues.

List of Project Partners:
Great Swamp Watershed Association - Community Based Non-Profit Environmental Organization

New Jersey Institute of Technology – Academic Institution
Rutgers Cooperative Extension Water Resources Programs – Academic Institution
Passaic County Habitat for Humanity – Global Non-Profit Housing Organization

Boys & Girls Club of Paterson and Passaic – National Non-Profit Youth Organization
The Nature Conservancy – Global Non-Profit Environmental Organization
The Trust for Public Land – National Non-Profit Environmental Organization



b. Environmental and Public Health information of the Underserved Community:
Paterson residents are constantly dealing with flooding issues, a city comprised of a large Black and Indigenous and People of Color (BIPOC) community. The purpose of this specific program is to mitigate some of Paterson's flooding and water quality issues and provide a steady stream of upcoming environmental leaders. The Youth Advocacy Corps. will encourage the next generation of urban youth to identify issues and find solutions and work with the community to implement these solutions, creating a healthier environment for all, exposing the participants to careers in the STEM field. This program will facilitate ownership in project ideation and implementation. Students will have a leading role in the decision-making process to address their community's environmental issues and investing in their own future.

c. Organization's Historical Connection to Underserved Community:
GSWA was founded in 1981 and expanded its mission to include the entire length of the Passaic River from its source in Mendham, NJ, to its mouth in Newark, NJ in 2016. GSWA chaired Paterson SMART (Stormwater Management And Resource Training), a collaborative of 21 organizations, municipal representatives, and individuals, which was created to address flooding and new CSO permits from the New Jersey Department of Environmental Protection.

GSWA and TNC are currently working with Paterson residents on an Adopt-A-Catch Basin Program empowering residents to take action to improve their health and environment with tools and resources. Adopt-A-Catch Basin programs leverage volunteers to regularly inspect storm drains, remove leaves or debris pollution, and report damaged or clogged drains. Volunteers need to check their storm drains before major storms. These simple actions help communities maximize their maintenance resources, prolong the life of stormwater and roadway infrastructure, and reduce the chance of localized flooding in neighborhoods. By being proactive, residents are empowered to take control of their environment.

Additionally, GSWA delivers STEM environmental education to students in Paterson including P.S. 28, JFK High School, International High School, Paterson STEAM HS, P.S. 7, New Roberto Clemente Middle School, and others. Programming includes in class and offsite water quality STEM environmental education programs. GSWA has also installed several rain gardens in Paterson.

d. EJCPS Model

This project will employ all the elements of the collaborative problem-solving model, as they are all relevant to the student's successful identification of EJ issues and EJ solutions. This model provides a framework that enables the students to stay on task.

CPS Element 1 - Issue Identification, Community Vision, and Strategic Goal Setting

GSWA and its program partners will educate students and the community about various local issues and potential solutions. GSWA's Program Liaison will recruit students to participate in the Youth Advocacy Corps. via outreach and public education in schools, community centers, and social media. Additionally, the Program Liaison will provide a program overview and promotion to community groups to encourage support and to solicit feedback throughout the process. During this phase, project partners will provide education as part of the outreach. Through a visioning process, the Youth Advocacy Corps. will identify specific EJ issues and locations and consider potential projects to address the problems.

CPS Element 2 - Community Capacity-Building and Leadership Development

Using feedback gathered from outreach and education events, student participants and partners will work together to identify issues, brainstorm issue prioritization, and establish community support. Students then begin analysis of solutions and the feasibility of potential projects. Students will learn the importance of collaboration and leadership as they work through this process.

CPS Element 3 - Consensus Building and Dispute Resolution

Under the guidance of the Program Liaison and partners, the student groups will learn how to

identify issues that they can realistically solve through criteria such as sound science, finance, and support from local organizations such as Paterson Green Team, created in 2018, to help organize community clean ups and keep their neighborhoods free of litter and waste, and Urban
Wilderness Renewal, created by Pastor John Algera, which provides participants opportunities to "experience and get to know God through the beauty of creation that surrounds the city of Paterson," Sarah Sterling-Laldee Director of STEAM Programs for Paterson Public Schools, Passaic Habitat for Humanity, church groups, youth organizations such as Boys & Girls Club of Paterson and Passaic (BGCPP). These criteria will help the students select appropriate solutions. The groups will learn about internal and external consensus building, compromise, and evaluation of potential projects as part of this program. They will meet and hear from project partners who will provide technical support and oversight and cite specific examples of successes and failures from their own experiences, and help the students draw conclusions using these examples as case studies. Students will have to work together to prioritize problems and their appropriate solutions.

CPS Element 4 - Multi-Stakeholder Partnerships and Leveraging of Resources

The stakeholders involved in this project represent a healthy cross-section of talents and expertise. GSWA will provide the leadership and outreach for the student program, professionals from the New Jersey Institute of Technology and Rutgers Cooperative Water Resources Program will provide the scientific and technical expertise needed to expedite the student-led projects. Passaic Habitat for Humanity will help the students identify neighborhoods in need of EJ solutions. BGCPP will provide space and program participants. The Nature Conservancy will facilitate team meetings, and help with community engagement, technical assistance and support. The Trust for Public Land will assist with program refinement and connections to the schools. With this guidance, the students will learn throughout the process how to best access the community and financial resources needed to implement their vision. Speakers from various related professions will be invited to meet with the students to give them insight about the various STEM careers available to them and where they can study for these careers. One such speaker might be an environmental engineer, who uses the principles of engineering, soil science, biology, and chemistry to develop solutions to environmental problems. Additional speakers could include arborists or representatives from energy companies. It is an important component of the program to provide both educational and career guidance, especially on topics these urban students might not otherwise be exposed to.

CPS Element 5 - Constructive Engagement by Relevant Stakeholders

Constructive engagement will be employed throughout the program. The students are the first relevant stakeholders, as residents and program participants. They will have facilitated discussions and build consensus on which issues should be addressed. They will learn advocacy skills, such as communication, collaboration, presentation, and professionalism when approaching community stakeholders with an EJ solution. They will learn how to manage setbacks and opposition and must be prepared to advocate for what they believe will be the best EJ solutions that will benefit the city. Relevant stakeholders can include neighborhood

ED_016126_00000869-00005

residents, municipal government, local businesses, all who may have varying opinions about proposed projects.

CPS Element 6 - Sound Management and Implementation

Sound management and implementation techniques will drive the project selection and execution. The program partners will provide guidance on the design and execution of the project based on sound science, design considerations and project cost. Projects that fit within the confines of the grant budget may be realized, while more costly projects may require additional funding.

CPS Element 7 - Evaluation, Lessons Learned, and Replication of Best Practices

Solutions that have been implemented will be evaluated by the students and project team for their successes in addressing the EJ issue identified. Post program surveys given to the student participants will supply valuable program insight to GSWA and the partners.

The students involved will share their experiences with other student groups and school administrators, via public presentations, videos and social media, with the goal of creating a sustainable program that can be used by students everywhere.

e. Project Linkages:

The project that we are proposing supports the EPA Strategic Plan, Goal 2, Objective 2.1 by investing in the future of cities like Paterson, which experience constant flooding, water quality, and pollution challenges. A Youth Advocacy Corps. dedicated to identifying and implementing environmental solutions to this, and other environmental issues, will empower the city's youth to embrace its environmental challenges and seek solutions. This underserved urban community has a deep, storied history, a multicultural population who take great pride in their city, and beautiful natural resources in Paterson Great Falls National Historical Park.

The program is designed to foster a lasting connection between Paterson's youth participants and their hometown to create a healthier outlook for their local communities and introduce them to excellent local colleges such as New Jersey Institute of Technology and Rutgers University.

f. Partner and Collaboration:

In order to provide the diverse communities of the Passaic River region with the level of environmental support they deserve, comprehensive collaboration amongst multiple organizations is necessary. GSWA is pleased that the following partners will form our leadership team for this project to both define and refine project objectives throughout the term of the grant:

Chris Obropta, PhD
Extension Specialist in Water Resources
Rutgers Cooperative Extension
Professor with the Department of Environmental Sciences at the School of Environmental & Biological Sciences, Rutgers University

With his extensive and impressive background, Dr. Obropta leads his highly specialized team of professional staff who are determined to create innovative solutions to water quality issues in New Jersey. Dr. Obropta brought the idea of a Youth Advocacy Corps. To Identify and Implement Environmental Justice Issues and Solutions to GSWA's attention. GSWA has worked with Dr. Obropta on the design and installation of several rain gardens at urban schools. Dr. Obropta also served on the GSWA's board of trustees.

Michel C. Boufadel, PhD, PE, BCEE, F. ASCE
Editor-in-Chief, Marine Pollution Bulletin (Elsevier)
Distinguished Professor, John A. Reif Jr. Dept. Civil and Env. Engineering
Director, Center for Natural Resources
Newark College of Engineering, The New Jersey Institute of Technology
Dr. Boufadel is an expert in water technology and resources. Dr. Boufadel' s role for this project is to provide the students with support from him and his graduate students during the design process and ensure that sound scientific and engineering concepts are being considered and practiced throughout.

Steve Kehayes
Director of Community Development
Passaic County Habitat for Humanity
As the Director of Community Development for Passaic Habitat for Humanity, Mr. Kehayes focuses on neighborhood revitalization work, partnering locally with residents and community leaders, and organizations to best address real concerns and improve the lives of the people who live in the neighborhood. Mr. Kehayes will offer critical guidance of the Paterson community and government landscape as well as access to potential open space.

Wendy McGuire
Chief Executive Officer
Boys & Girls Club of Paterson and Passaic
Wendy McGuire, a seasoned and passionate nonprofit professional, has served as Chief Executive Officer of the Boys & Girls Club since 2018, which serves more than 1,100 kids daily. McGuire previously worked at the Paterson and Passaic Club as the Chief Development Officer and Deputy Executive Director. Ms. McGuire will provide program space and access to potential participants.

Johnny Quispe, PhD
Cities Program Manager
The Nature Conservancy
Dr. Quispe is the Cities Program Manager at The Nature Conservancy—New Jersey. Dr. Quispe uses his interdisciplinary nature to work on issues related to climate change, ecology, and community resilience. His work integrates social, economic, engineering, and natural systems and methods to increase the resilience of communities and ecosystems to climate change.

Dr.Quispe will provide thought partnership, technical assistance, student mentorship, project team meeting facilitation, and programmatic support.

Scott Dvorak
Associate Vice President and New Jersey State Director
The Trust for Public Land
Scott Dvorak, AICP, became the New Jersey state director of The Trust for Public Land in 2020, taking the helm of a 40-year legacy of conserving land, supporting legislation for open space funding, and building parks for people across New Jersey. Mr. Dvorak and Trust for Public Land will assist in program refinement and making connections to local schools.

Building a 21st century corps of environmental justice youth advocates will pave the way for future environmental leaders. GSWA will work with these partners for this program and on the continuation of this program as resources allow.

2.0 Project Activities/Milestone Schedule/Detailed Budget Narrative
a. Project Activities
YEAR ONE
The first action is to recruit, interview and hire a Program Liaison. This individual will be the main GSWA program representative with the students, partners and community and will work 20 hours per week in the first year. The Program Liaison will receive training on environmental education, issue identification, and potential solutions to these issues. Training will be provided by GSWA, NJIT, RCE Water Resources Program, TNC, and TPL. The Program Liaison will be introduced to contacts in the schools and community organizations, as well as developing his/her own contacts for recruiting program participants in schools, churches, BGCPP, YMCA, etc. This will include in-person and virtual presentations, email, social media outreach, press releases.

With the first group of participants established, regular meeting places and schedules will be determined. One location, such as BGCPP, may be utilized for meetings. We anticipate holding weekly meetings which will be after school or early evening and may include food to encourage participation. A T-shirt might be designed by program participants to wear when out in the community, to generate pride in their involvement, team spirit and program identification. The first meetings will involve environmental science education, identification of local environmental justice issues, such as localized flooding, possible solutions, and an overview of steps required to implement a solution from start to finish. Presentations from the GSWA and partners will be included in this phase. RCE Water Resources Program and NJIT graduate students, TNC and TPL will provide professional insight and technical advice and will comprise the leadership team. GSWA will engage a volunteer who will participate in these and subsequent meetings to assist and translate program information to Spanish for Spanish-speaking participants.

The next phase of this program will include meetings to identify strategies and discuss specific issues in specific locations, to address environmental problems and injustices. These meetings may be conducted at potential, accessible distressed sites being considered for a project. For example, in sections of the city such as Paterson's Northside Neighborhood of the 1st Ward, the combined sewer and stormwater flood the streets and local properties during typical rain events, compounding the flood hazard concerns with the health risks associated with direct contact to sewage. This community is an environmental justice community with limited resources and equitable access to open space and a disproportionate risk from environmental vulnerabilities. In this case, students would work directly with Passaic Habitat for Humanity, who have been working on community development projects in addition to constructing many homes on the Northside. Passaic Habitat for Humanity, with support from TNC and other partners, is currently building a 1-acre park, named Clinton Street Park, and has been working within the community to implement the community-based Northside Neighborhood Plan, a multi-step program to revitalize this overburdened community. This is one of many examples of potential environmental injustice sites impacting Paterson minority low-income communities.

In addition to implementing environmental justice solutions, students will be exposed to a myriad of careers in the environmental sector throughout the grant period. Speakers from our partner organizations, in addition to other environmental or related professions, such as engineers, tree companies, utility companies, business owners, etc. will speak to the students about various future career options. This practice may further cement their interest in pursuing higher education in the STEM field at local universities, such as NJIT or RCE Water Resources Program. These presentations may be recorded for future use.

At this point in the program, we plan to have one or two environmental justice issues and locations identified and selected by the group. Possible solutions will be brainstormed with the partners for validity and feasibility. NJIT graduate students will assist in this process, helping the students confirm that sound scientific and engineering concepts are factored in their decision-making. Case studies of similar projects will be studied to determine the success potential of possible projects. Once a location, issue and the proposed solution have been selected, next steps will begin.

NJIT students will help with the design process, along with the Rutgers Water Resources Program. The students and partners will create a budget for the proposed project and identify the necessary stakeholders to move the project forward. Stakeholder meetings will be held. The final design will be presented to the stakeholders, who will identify pros and cons with the plan with the intention of rectifying any issues in a reasonable amount of time, with the goal of finalizing the design. If a green infrastructure project has been selected, RCE Water Resources Program will prepare a bid ready design and oversee the construction and installation of this feature. In the case of a rain garden, students will help with installation. The garden will need ongoing maintenance for the establishment and continued function of this green infrastructure

ED_016126_00000869-00009

feature. One solution could be to provide stipends for program students to water and take care of the garden during the summer months. This can encourage the students to take ownership of their projects and provide some income which can be spent in the community, helping foster a circular economy.

Once the design meets approval by all necessary stakeholders, the solution may be implemented through funding from this grant, or additional funding may need to be solicited. Project completion will be promoted through local news venues, social media, etc. Follow up analysis will be conducted to provide further education about the project to determine what was successful and what might have been done better/differently. This will also serve as a blueprint for future groups and projects. At this time, student participants will be surveyed about their experience in the program so far and invited to come back the following school year as participants once again and some will be invited to take on a larger role in the program the following year.

A project to address flooding and stormwater management may evolve in this way:

The CNR-NJIT will work with students to identify areas that regularly flood and help students select locations where green infrastructure can be installed to help remedy these flooding issues. While green infrastructure cannot be used to control flooding from large storms, it can be effective for smaller rainfall events to help prevent localized flooding. NJIT will help the students understand the concept of hydrology and stormwater runoff using: 1) Lecture materials 2) YouTube videos, 3) Scaled-down physical models (3 feet x 3 feet) of watersheds and foam material (to simulate the role of infiltration), 4) Using Virtual Reality, such as the Outlook, and 5) Site visits. For the latter, the NJIT team will tour sites with students to select the best location for installing GIs and identify the most appropriate green technology system for the sites. The NJIT team, with support from Professor Obropta from RCE Water Resources Program, will educate the students on various green infrastructure practices and how they work and where to place them. In addition, the students will learn the design components of green infrastructure according to the best management practices manual in New Jersey (NJDEP). These include a catalog of various green infrastructure, such as bioswales, rain gardens, permeable pavement, green roofs, infiltration ponds and planter boxes.

The main deliverable for this project is a green infrastructure plan for a neighborhood that identifies locations to install specific green infrastructure practices. A secondary deliverable is several designs of green infrastructure practices like rain gardens or bioswales. Ideally, the students will work with the project partners to implement these deliverables.

YEAR TWO

Year Two will follow a similar path to Year One. The major difference will be the number of student groups. The goal in Year Two is to create two to four groups of student advocates, with some students from year one and some new student participants. The number of hours

ED_016126_00000869-00010

allocated for the Program Liaison will increase to 30 hours a week to accommodate the additional time needed for the increase in program participant numbers, projects and locations.

The Program Liaison has a larger role this year. With one year completed, the Program Liaison will begin to identify, and train invested high school student participants as Volunteer Assistant Program Liaisons. These individuals would take on some of the responsibility to support the growth of the program in scope and size. They might take on promotion of the program and serve as ambassadors to new participants.

The goal at the end of Year Two is to continue to seek and address issues of environmental justice in Paterson and also research, possibly expanding beyond the city's borders to other nearby under-resourced, environmentally impacted communities.

YEAR THREE

Year Three will follow a similar path to Year One and Year Two. The goal is to grow the number of student groups beyond Year Two's groups of student advocates. The number of hours allocated for the Program Liaison will increase to 40 hours a week to accommodate the additional time needed for the increase in program participant numbers, projects, and locations. Outside funding will be solicited for additional or more expansive projects. Three to four (or more, if needed) student Volunteer Assistant Program Liaisons will be trained.

The goal at the end of Year Three is to continue to seek and address issues of environmental justice in Paterson, and just beyond the city's borders to other nearby under-resourced, environmentally impacted communities. Additional sources of funding for the program will be sought to continue its presence and growth into new communities.

b. Milestone Schedule

MILESTONE SCHEDULE YEAR ONE		
GOAL	**MILESTONE**	**MONTHS**
Recruit and hire Program Liaison (PL)		1-3
Train PL		1-4
Introduce PL to contacts,PL establish own contacts, promotes & recruits for program		2-5
	Establish first advocacy group	3-6
Begin meetings at meeting venue, first meeting, design T-shirts		4-7
PL and partners teach environmental education/discuss local EJ issues and locations		4-7

Speakers talk to students about environmental careers once a month		4-12
	Identify specific EJ issues/locations. Discuss implementation of solution	5-7
Create budget for solution and identify community stakeholders		6-8
Design solution and present final design to community stakeholders, rectify design or location issues		6-8
Obtain permits and permissions for project implementation if needed		8-10
	Implement design, PL identifies and trains students for leadership roles in next groups	10-12
EJ Solution is shared with community stakeholders and promoted		12
MILESTONE SCHEDULE YEAR TWO		
GOAL	**MILESTONE**	**MONTHS**
PL promotes & recruits for program, trains assistant PL		12-16
	Establish second advocacy group(s)	15-18
Begin meetings at meeting venue, first meeting		16-19
PL and partners teach environmental education/discuss local EJ issues and locations		16-19
Speakers talk to students about environmental careers once a month		16-24
	Identify specific EJ issues/locations. Discuss implementation of solution	17-19
Create budget for solution and identify community stakeholders		18-20
Design solution and present final design to community stakeholders, rectify design or location issues		18-20
Obtain permits and permissions for project implementation if needed		20-22
	Implement design, PL identifies and trains students for leadership roles in next groups	22-24
EJ Solution is shared with community stakeholders and promoted		24
MILESTONE SCHEDULE YEAR THREE		
GOAL	**MILESTONE**	**MONTHS**
PL promotes & recruits for program, trains assistant PL		24-28

	Establish third sets of advocacy group(s)	27-30
Begin meetings at meeting venue, first meeting		28-31
PL and partners teach environmental education/discuss local EJ issues and locations		28-31
Speakers talk to students about environmental careers once a month		24-36
	Identify specific EJ issues/locations. Discuss implementation of solution	29-31
Create budget for solution and identify community stakeholders		30-32
Design solution and present final design to community stakeholders, rectify design or location issues		30-32
Obtain permits and permissions for project implementation if needed		32-34
	Implement design, PL identifies and trains students for leadership roles in next groups	34-36
EJ Solution is shared with community stakeholders and promoted to other communities		36
Seek funding for program continuation		36+

c. Itemized Budget Sheet/Narrative…. Submitted as attachment

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

b. Performance Measurement Plan

Project Performance will be tracked and monitored throughout the three-year program for a variety of benchmarks with the following overall objectives:

1. Hire and train Program Liaison
2. Promote program in schools and throughout community to recruit student program participants
3. Create and train student groups to identify and develop EJ solutions
4. Identify EJ issues with students, program partners and community groups
5. Identify EJ solutions with students, program partners and community groups
6. Research feasibility and advocate for selected solutions
7. Design solutions with students, project partners
8. Implement EJ solutions withstudents, program partners and community groups
9. Develop methods for training future assistant program liaisons
10. Promote and grow program to additional schools, groups and communities
11. Procure funding for future programs and projects

Post-Program evaluations include the following:

1. Number of students engaged in the program each year, with goals to increase the number of students and locations each year.
2. Number of EJ issues identified, and solutions implemented each year.
3. Success of implemented projects. Follow-up will include specific improved environmental conditions, community engagement, and continued project oversight.
4. Continued student involvement after annual program completion. This includes the number of student "trainees," as a result of having participated in a successful program; student advocates for the program; students who actively pursue further involvement in environmental issues and studies.
5. Success of funding support annually, and projected post-program support.
6. Interest from other communities to undertake programs in their communities.

c. Sustainability Plan and Community Vision

The vision for the city of Paterson, as stated in the 2021 Parks and Open Space Vision Plan mentions Health, Environmental Protection and Flood Prevention, and Education as three of its five foci. This program's first goal is to identify, train and develop the next generation of environmental advocates, who will help realize the city's vision.

The second goal is to determine EJ issues and implement solutions each year. In order to achieve these goals, we must provide student program participants from overburdened communities with education, support and resources to achieve realistic, manageable EJ solutions, such as green infrastructure, catch basin programs and community gardens. These are all solutions that can be sustained and grown beyond the three-year grant period.

Another goal is that each solution will be tracked for metrics such as square feet of impervious surface being managed by flood control green infrastructure practices, square feet of rain gardens installed and maintained, and gallons of water managed annually.

Training new leaders is an ongoing part of this program. The Program Liaison will expand his/her knowledge of environmental science, EJ issues, leadership and advocacy under the guidance of GSWA senior staff and the program partners. This knowledge will be shared and potential student leaders will be trained to assist with or lead future programs. The program will be documented, so that additional schools and communities have a blueprint to launch their own Youth Advocacy Corps. programs.

This program will sustain itself if successful solutions are shared and replicated. Communities can seek funding to bring the program to their schools and youth organizations.

4.0 Programmatic Capability

Organizational Experience

Great Swamp Watershed Association (GSWA), a 501(c)(3) environmental organization in New Vernon, NJ, has dedicated itself to the preservation and protection of the water and land resources of the Great Swamp Watershed and Passaic River for over 40 years.

GSWA is the environmental guardian of the Passaic River region. As an Accredited Land Trust and the official Waterkeeper Alliance Affiliate for the Passaic River, the only entity monitoring the five streams of the Great Swamp Watershed and Passaic River on a regular basis, we continually assess and act on the best ways to fulfill our mission, which is to protect and improve the health of the Passaic River through science, education, land preservation and stewardship, and advocacy.

GSWA recognizes that proposed changes or new developments can threaten local and regional lands and waters, and natural habitats can be compromised, and we work to remediate these situations. GSWA participates in the Lower Passaic Superfund Community Advisory Group, which addresses the contamination of that portion of the lower Passaic River. High levels of contaminants, including polychlorinated biphenyls (PCBs), mercury and dioxin, are present in the sediment and can cause health effects. Indeed, the lower Passaic River region is not suitable for consuming fish and signs are posted throughout the region warning people not to eat the fish and crabs. It is anticipated to be the most expensive cleanup in the country.

In addition to our critical water quality monitoring, connecting the people who live in our watershed and the Passaic River communities with our mission is a key objective. We achieve this by providing relevant environmental education to students and families, advocating for creative solutions to environmental issues, preserving open space, providing stewardship and education at our wetland forest, and deepening our connections into all the communities in our watershed.

GSWA works extensively with students from K-12, providing unique and impactful STEM environmental education programs all across the Passaic River region. We regularly provide in class and outside experiential learning opportunities for students from underserved urban communities such as Paterson, Newark and Orange. As referenced earlier, we are working with Paterson residents on an Adopt- A-Catch Basin program to address CSO issues.

With the expert assistance of New Jersey Institute of Technology, Rutgers Cooperative Extension Water Resources Program and Habitat for Humanity, The Nature Conservancy, Boys & Girls Club of Paterson and Passaic, Trust for Public Land and others, Great Swamp Watershed Association is more than ready to launch the Youth Advocacy Corps. to Identify and Implement Environmental Justice Solutions and develop a model that is replicable and scalable.

b. Staff Experience/Qualifications of Project Manager, Program Liaison and Program Assistant

Sally Rubin, a retired attorney, has served as Executive Director of Great Swamp Watershed Association (GSWA) since 2008. During Ms. Rubin's tenure, GSWA has expanded its mission to

include the entire Passaic River, from its headwaters in Mendham to Newark Bay. Ms. Rubin has also been responsible for improving GSWA's financial operation and manages a staff of eleven employees. Ms. Rubin participates in numerous Community Action Groups in support of environmentally friendly development and advocating for open space preservation. Her leadership at GSWA, along with her legal and political expertise are sought after for many local environmental advocacy issues. Ms. Rubin will mentor the Program Liaison, who will be the "face" of the program.

Tyshon Johnson, the Program Liaison, has a Bachelor of Arts in Earth & Environmental Sciences and worked with Dr. Boufadel at the Center for Natural Resources at NJIT as an assistant. Mr. Johnson assisted graduate students with environmental experiments, compiling experiment data and results. Mr. Johnson also has experience working with youth, having been a camp counselor in Newark, NJ. Mr. Johnson is eager to be part of this program to move forward in his environmental career.

Tatiana Morales, the Program Assistant, will volunteer her time to assist with the program meeting and provide translation for Spanish speaking students in the program. Paterson has a large Spanish speaking population and Ms. Morales will engage participants whose first language is Spanish. Ms. Morales has a Bachelor of Science Degree in Public Health. She interned at GSWA and helped with signature programs such as the Native Plant Sale, a multi-community watershed friendly program and many others. Ms. Morales helped with translating GSWA's environmental education materials to Spanish.

Resumes of the Program Manager and Key Personnel Attached

c. Expenditure of Awarded Grant Fund

Ms. Rubin, the Program Manager and GSWA's Executive Director will manage the grant funds. She will be responsible for the drawdown of funds. As a seasoned non-profit professional and oversees all of GSWA's financial activities, Ms. Rubin is well qualified to manage the expenditures necessary to achieve the goals of this program. GSWA has accounting and payroll software and procedures in place necessary to maintain strict controls over how this funding will be expended, in accordance with the goals set in the milestone chart.
Sue Levine, GSWA's Director of Finance and Human Resources, is responsible for GSWA's financial management. Ms. Levine has a B.A. in Economics and Finance and an M.B.A. from Rutgers University.

5.0 Past Performances No relevant grants or cooperative agreements in the past three years.

Project: Developing a Youth Advocacy Corps to Identify and Implement Environmental Justice Solutions

Contribution of the Center for Natural Resources at NJIT, CNR-NJIT

Overall Summary

The Youth Advocacy Corp will work with the project partners to identify EJ issues in Paterson. The most likely issues that will arise are flooding, air quality, and human health.

The NJIT Team will work with k8-12 students to develop solutions to address these problems, while the Great Swamp Team will work with the students to develop an advocacy plan to increase awareness about the EJ issues they have identified, and encourage elected officials to fund the solutions that they have identified with the NJIT Team. Since flooding will most likely be the primary issue and green infrastructure one of the solutions, Rutgers in addition to providing technical support to both teams, will help the students install some of the rain gardens in areas the Youth Advocacy Corps has identified as priority areas. Below is a short discussion of some of the possible solutions to the anticipated EJ issues that the students identify.

The CNR-NJIT team will use the "Outlook" a 300 ft^2 virtual reality (VR) room located within the physical space of the Center for Natural Resources at NJIT. High school students in the Outlook will observe the neighborhood using Google Earth (Figure 1), and they could use the StreetView either through helmets or projected on a wall-size screen (Figure 2). For example, the emplacement of infrastructures in the streets will be explored using the software Sketchup (www.sketchup.com), (Figure 3). Alternatively, VR helmets could be used in a make-shift room at the local venue in Paterson, and the view will be projected on a large screen. The Virtual Reality approach is advantageous for pre and post site visit to the field sites by the students. Prior to the site visits, the students will gain familiarity with the sites and the surrounding area which allows them to better comprehend the situation on the ground. For post visit, the usage of real-size projection and the Sketchup software will facilitate discussion of options, and exploring various configurations of Green Infrastructures and/or optimal emplacement of sensors etc.

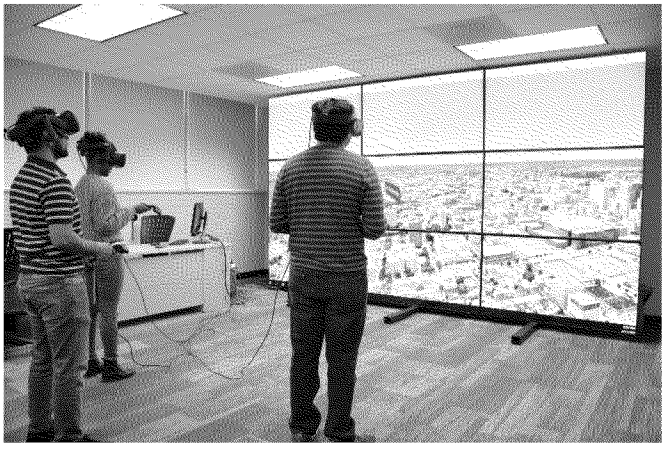

Figure 1: Outlook showing google earth view

Figure 2: Street view on the wall-sized screen

ED_016126_00000870-00001

Figure 3: Placement of infrastructures on sketchup software and understand them using virtual reality

Project 1: Flooding and Stormwater Management

The CNR-NJIT will work with students to identify areas that regularly flood and help students select locations where green infrastructure (GI) can be installed to help remedy these flooding issues. Figure 4 obtained from EPA EJScreen shows the areas with flood risk in Paterson. While green infrastructure cannot be used to control flooding from large storms, it can be effective for smaller rainfall events to help prevent localized flooding. NJIT will help the students understand the concept of hydrology and stormwater runoff using: 1) Lecture materials 2) Youtube videos, 3) Scaled-down physical models (3 feet x 3 feet) of watersheds and foam material (to simulate the role of infiltration), 4) Using Virtual Reality, such as the Outlook, and 5) Site visits. For the latter, the NJIT team will tour sites with students to select the best location for installing GIs and identify the most appropriate green technology system for the sites. The NJIT team, with support from Professor Obropta from Rutgers Extension, will educate the students on various GI practices and how they work and where to place them. In addition, the students will learn the design components of green infrastructures according to the best management practices manual in New Jersey (NJDEP). These include a catalogue of various GIs: Bioswales, rain gardens,permeable pavement, green roofs, infiltration ponds and planter boxes.

The main deliverable for this project is a green infrastructure plan for a neighborhood that identifies locations to install specific green infrastructure practices. A secondary deliverable is several designs of green infrastructure practices like rain gardens or bioswales. Ideally, the students will work with the project partners to implement these deliverables.

ED_016126_00000870-00002

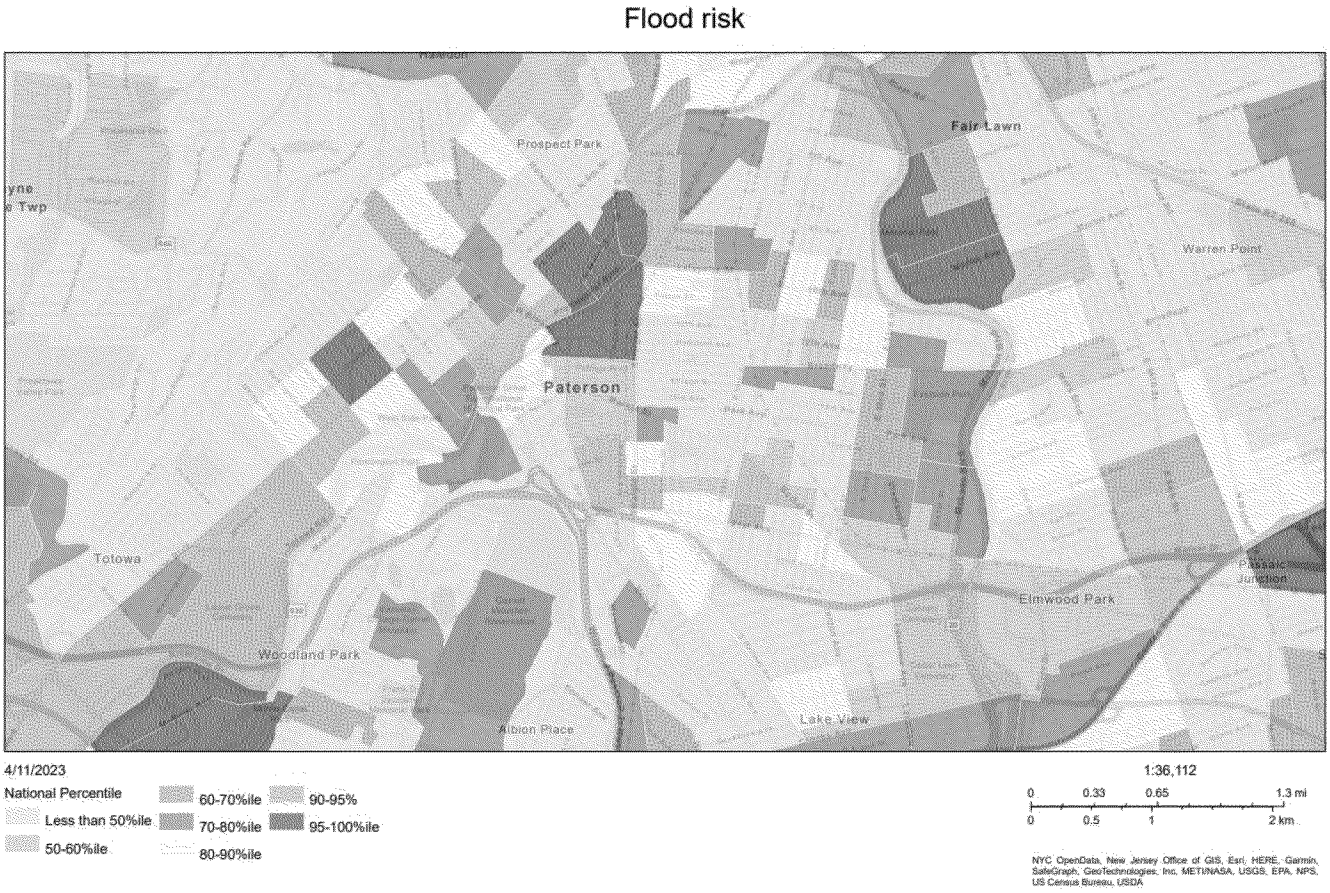

Figure 4: EJScreen report on the flood risk areas in Paterson, NJ (also attached a PDF for better quality)

Project 2: Air Quality

Air quality is a critical issue in all urban areas, particularly in New Jersey. Figure 5, 6, 7 shows the air quality risks in Paterson obtained from EPA EJScreen. Vehicle and factory emissions, the heat island effect, lack of vegetation to filter the air contribute to these problems, resulting in children and adults with asthma and chronic breathing illnesses. For this project, the CNR-NJIT team will work with the students in the Youth Advocacy Corps to help them better understand the science behind air quality issues and what can be done to address these issues. Through lectures and training on air sensors by the CNR-NJIT personnel, students will learn about the six criteria air pollutants determined by the EPA, which are: particulate matter, ozone, nitrogen dioxide, carbon monoxide, lead, and sulfur dioxide, along with hazardous air pollutants (HAPs). In addition, the team will address additional aspects of air pollution, such as sources of air pollution, health and environmental impacts of air pollution, air quality monitoring, and air pollution mitigation. The training material will be developed based on multiple sources, including EPA's website, case studies, and lessons learned from the previous related initiatives in Paterson and other urban/suburban areas. The CNR-NJIT team will coordinate with Steve Morlino Ex. 6 - Personal Privacy (PP) , EPA's Local Indoor Air Quality Champions from Newark Public Schools, for his support in developing the training materials, especially on indoor air quality. While eliminating the

ED_016126_00000870-00003

causes of air quality issues requires a complex set of programs and regulations, implementing strategies to protect residents from the effects of poor air quality may be a little easier for the Youth Advocacy Corps. The NJIT team can work with the students to design an air quality monitoring program that could be used to identify hot spots in Paterson and the times of day when conditions are the worst. The students can select air monitoring equipment and identify where to place it. We will rely on information from the EPA's Air Sensor Toolbox, especially "A Guide to Siting and Installing Air Sensors" (https://www.epa.gov/air-sensor-toolbox/guide-siting-and-installing-air-sensors) for site selection and installation of the sensors. The key determining factors, including target monitoring location, placement, security of the sensors, accessibility of the area, power availability, and reliable communication, will be considered. A workshop will be conducted to ensure the students are proficient in installing and operating the sensors. Before actual installation, each student will be requested to propose potential sites that they identify based on the guidelines. Then, the plan will be reviewed by the instructor, and the final installation site will be recommended. The student can identify home air filters that can be used by residents during critical air quality times.

The deliverable for this project would be a plan for an air quality monitoring network in Paterson. It could also result in deploying a small portion of this network as an example of how the air quality monitoring system would work.

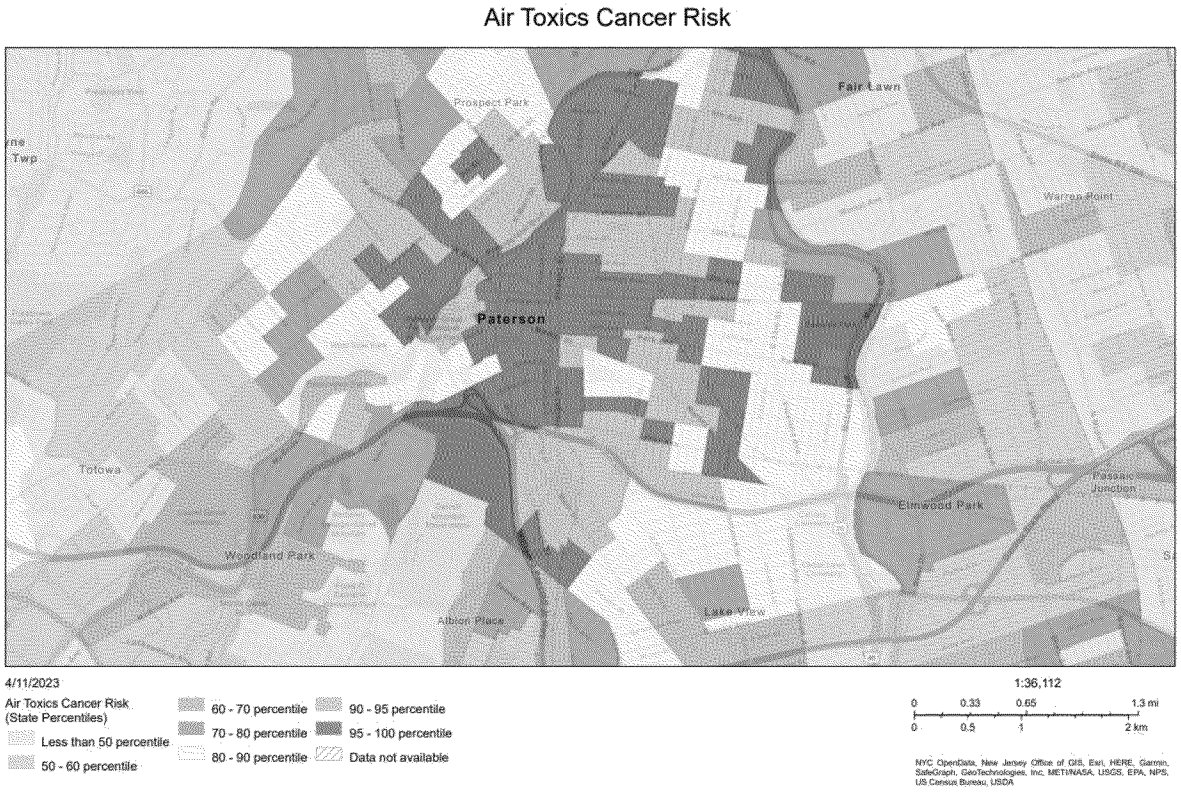

Figure 5: EJScreen report on the air toxics cancer risk in Paterson, NJ (also attached as PDF)

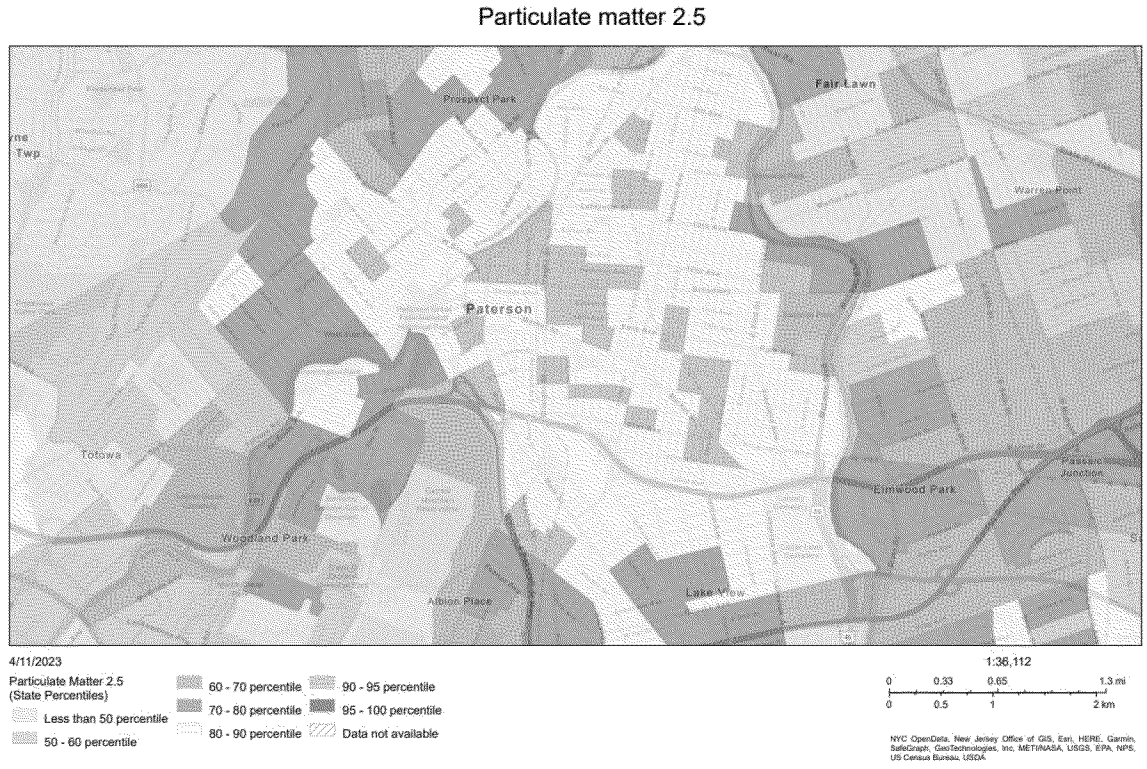

Figure 6: : EJScreen report on particulate matter 2.5 in Paterson, NJ (also attached as PDF)

Figure 7: EJScreen report on ozone level in Paterson, NJ (also attached as PDF)

Project 3: Human Health

One major concern with EJ issues is the impact on human health. Many urban areas suffer from a wide range of factors that impact the health of urban residents. Lack of fresh produce is one major factor. Another is the lack of green space (Figure 8). Research has shown that children who live within five minutes of green space are healthier than those that live 20 minutes from green space. Through lectures by the CNR-NJIT personnel, students will learn about the human health issues with lack of green space as a concern and ways to improve it. This project will be implemented as an interactive activity workshop which will include identifying vacant lots in Paterson that can be converted into green space, pocket parks, or community gardens. The community gardens can further be used to grow fresh produce. The CNR-NJIT Outlook (Virtual Room, please see above) will be used for this purpose where students can virtually visit Paterson areas, identify vacant lots and provide their solutions to convert them into environmental friendly areas.The deliverable for this project could be a plan of where to locate the features in the city and possibly convert one vacant lot into a pocket park or community garden. The students will work with CNR-NJIT to deliver the plan and help with the implementation of pocket park or community garden. CNR- NJIT will work with the project partners, stakholders and community to implement the garden.

Dear Sir or Madam:

This is in response to your request dated January 6, 2016, regarding your tax-exempt status.

We issued you a determination letter in November 1994, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

Our records also indicate you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If a return is required, you must file Form 990, 990-EZ, 990-N, or 990-PF by the 15th day of the fifth month after the end of your annual accounting period. IRC Section 6033(j) provides that, if you don't file a required annual information return or notice for three consecutive years, your exempt status will be automatically revoked on the filing due date of the third required return or notice.

For tax forms, instructions, and publications, visit www.irs.gov or call Ex. 6 Personal Privacy (PP) Ex. 6 - Personal Privacy (PP)

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific Time).

Sincerely yours,

Jeffrey I. Cooper

1.0 PROGRAM OBJECTIVES a. Project Summary Page

Project Title: Building Community Capacity and Advancing Environmental Justice to Address Racial Equity By Creating Healthy, Lead Safe and Climate Friendly Housing

Project Location: States of New Jersey, New York; Territories of Puerto Rico, US Virgin Islands

Applicant Information: Green & Healthy Homes Initiative (GHHI), Ex. 6 Personal Privacy (PP) Baltimore, MD 21224-4716 (Primary Contact: Ruth Ann Norton, President and CEO; ranorton@ghhi.org; Ex. 6 - Personal Privacy (PP)

Organization Description: GHHI is the nation's healthy housing leader with three decades of proven accomplishments in advancement of programs, policies and practices to eradicate lead poisoning and reduce asthma episodes. A non-profit organization dedicated to addressing the social determinants of health and racial disparities, GHHI was founded in Baltimore in 1986 in response to the twin tragedies of unhealthy housing and lead poisoned children. GHHI has remained a community-based service provider while the scope of GHHI's work has grown nationally to encompasses the development of comprehensive program services that create lead safe, healthy and energy efficient housing for low income communities.

Are you Applying for the Small CBO Set Aside Track: No

Project Abstract: The Green & Healthy Homes Initiative model transforms the approach to health-based housing interventions and the associated issues of environmental justice through a holistic approach to creating healthy, lead-safe and climate friendly homes for our most children and seniors in historically disinvested communities. With EPA funding, GHHI will provide 73 trainings, 6 multi-day Boot Camps, and ongoing technical assistance in working with local community-based organizations, government agencies and other stakeholders in EPA Region 2 to build local capacity and help scale preventive healthy homes services for environmental assessments, resident education and housing interventions. Increased services locally will improve the health of low-income families and seniors by reducing asthma triggers and lead hazards as well as conducting important energy efficiency interventions to improve occupant health and reduce energy consumption and carbon emissions for vulnerable families. GHHI will provide trainings for community organizations and government agencies on how to implement the comprehensive Green and Healthy Homes intervention model, how to braid federal, state and local resources, and help facilitate new cross sector partnerships and collaboratives across the health, housing and energy sectors in New Jersey, New York, Puerto Rico and the US Virgin Islands. This work will strengthen partnerships to support a comprehensive, whole-house approach to creating healthier housing, access resources to build a well skilled healthy housing contractor base in impacted communities and most importantly increase the capacity of our local community-based organizations to access and implement preventive resources across sectors to create healthier homes, communities and people.

Project Type(s): Training and Demonstration **Special Considerations:** Climate Change

Environmental Issue: Indoor Air Quality, Lead Hazards, Indoor Allergens, Carbon Emissions

List of Project Partners: CBO Subgrantees Newark Water Coalition, Affordable Housing Coalition and Center for Puerto Rico; WE ACT (CBO), BlocPower (energy-WFD CBO), New Jersey Board of Public Utilities (state gov.-energy), New Jersey Dept. of Health (state gov.-health). Puerto Rico Health Department (territory gov.-health), NJ Future & Lead Free New Jersey (policy), and The Fund for New Jersey (philanthropy). **Will you need to develop a QAPP:** No

ED_016126_00000881-00001

b. Environmental and Public Health Information of the Underserved Community: Home-based environmental health hazards and energy inefficiency housing disproportionately impacts impoverished communities and denies children the opportunity to reach their full potential. 535,000 children in the US are lead poisoned with 23 million homes containing lead paint hazards and 6.1 million homes with lead service lines. 25 million Americans have asthma resulting annually in: 2 million ER visits, 500,000 hospitalizations, 14.4 million missed school days and 14.2 million missed work days. 40% of asthma episodes are caused by triggers in the home, and we have the knowledge and best practices to address these preventable asthma events. Low-income families spend 20% of their income on home energy bills -- 6 times more than average households. Families and seniors in poverty in New Jersey, New York, Puerto Rico and the Virgin Islands disproportionately live in unhealthy, energy inefficient homes causing ill health (lead poisoning, respiratory disease, injury) and destabilization (due to high energy costs, high maintenance costs and unlivable conditions). In New Jersey, 1.9% of children under age six in the state were poisoned by lead in FY 2021 with 3,016 children under age six diagnosed with EBLs ≥5 µg/dL. Trenton has the highest rate of lead poisoning compared to other major municipalities in the state, with 6.4% of children under age six diagnosed with an EBLL ≥5 µg/dL. In FY 2021, Newark had the highest total number of children under age 6 diagnosed with an EBL compared to other major municipalities in New Jersey with 384 children under age six with EBLs. Trenton and Newark residents experience higher burdens from asthma as well. 2020 data show age adjusted rates of asthma for ED visits statewide to be 2,488 per 10,000 compared to a rate of 3,236 per 10,000 in Essex County (Newark) and 3,523 per 10,000 in Mercer County (Trenton). In Newark, the median income is $41,335 and 25.8% of residents are living in poverty. Trenton's median income is $39,718 with 27.7% of Trenton residents living in poverty. Residents in both Trenton and Newark experience higher energy burden compared to the state overall with low income households in Trenton showing the highest energy burden compared to the statewide rates. In New York, the rate of childhood lead poisoning ≥5 µg/dL for children 6 years of age or younger in the state is 10.4 per 1,000 children tested. In New York City, the rate children under age 6 with lead levels ≥ 5 µg/dL is 6.7 per 1,000 children tested and the rate in Albany County is 34 per 1,000 children tested. In New York City, the rate of children who received at least one test indicating an EBLL was 10.8 per 1,000 children. Asthma hospitalization rates in NYC and Albany are 11.3 and 12.7 per 10,000 respectively, compared to 7.2 per 10,000 for the state overall. Within the City of Albany, the median income is $52,583 and 21.7% of residents live in poverty. In New York City, the median income is $70,663 and 17% of people live in poverty. In Puerto Rico, Puerto Ricans has among the highest rates of asthma rates in the world with the disease affecting 14.2 percent of Puerto Rican residents. As many as 40% of residents with asthma visit the ER annually due their asthma. EBL blood lead prevalence rates for children under six in Puerto Rico is estimated at over 3%. 54% of the homes were built before 1978. The median household income is $21,967 in Puerto Rico and 40.5% of the population lives in poverty. In the US Virgin Islands, more than 6.3% of the adult population has asthma. Blood lead data was not available for the US Virgin Islands. The median household income is $40,408 and 32.5% of the population lives in poverty.

c. Organization's Historical Connection to Underserved Community: GHHI is a racial justice and environmental justice founded community-based organization that has been providing direct prevention services in Baltimore City and other at risk low income communities in the US on

lead poisoning prevention and healthy homes since 1994 including 75 current jurisdictions and healthcare partners -with a goal for children to come to school ready and able to learn. GHHI has been working on lead poisoning prevention and healthy housing initiatives in low income communities in Newark and the State of New Jersey since 2014 and the State of New York since 2009. GHHI provides direct community-based services in Trenton in leading the Governor's groundbreaking Whole House Pilot Project in coordination with the New Jersey Board of Public Utilities, the Comfort Partners state utility energy efficiency program and its weatherization contractors, and local community partners that are conducting lead hazard remediation and healthy homes services. GHHI Trenton staff are directly coordinating lead hazard reduction interventions and energy efficiency retrofits in 100 low income homes in Trenton. GHHI has served as a technical advisor to the New Jersey Department of Health and The Fund for New Jersey foundation in developing a comprehensive State of New Jersey Lead Poisoning Prevention Strategic Action Plan in 2018 and helping provide technical assistance to local governments and community agencies in developing and implementing lead prevention strategies. GHHI is a member of the New Jersey Lead Free Coalition and local advisory boards. In the State of New York, GHHI has longstanding partnerships since 2010 in providing technical assistance at the local government and community service provider level in Buffalo, Greater Capital Region (Albany, Schenectady, Troy), Syracuse/Onondaga County, and Utica/Oneida County to develop holistic housing assessment and intervention programs to improve health outcomes. In New York City, GHHI leads a $4.3 million value-based payment project where asthma education services by local CBO AIRNYC are being coordinated with asthma trigger reduction interventions being conducted by energy efficiency provider AEA for 850 clients. GHHI has committed to work with the Puerto Rico Department of Health to assist in advancing lead poisoning and asthma prevention initiatives. GHHI's Hector Moreno, a Puerto Rican native who has worked on environmental health and comprehensive healthy housing and weatherization models for over twenty years in the United States, has returned to San Juan to help lead GHHI's collaborations and partnerships in Puerto Rico and US Virgin Islands. Built on a collaborative platform, GHHI's strength is as a convenor of key stakeholders to continue to advance new innovations in the green and healthy homes field in each of these communities.

d. EJCPS Model: GHHI's proposed program encompasses all 7 elements of the EJ CPS Model.

CPS Element 1: Issue Identification, Community Vision, and Strategic Goal Setting. Working with stakeholders in over 40 communities throughout Region 2, GHHI works with community residents and stakeholders to address the impact of unhealthy housing and environmental justice through community informed asset and gap analysis, interviews with residents on lived experience and review of public and health data sets to form a community vision and strategic action plan to address key environmental health impacts of unhealthy housing including lead poisoning, asthma, injury and energy burdens. The GHHI EJ collaborative problem-solving approach looks at economic impacts and opportunities such as Justice 40 workforce development to create opportunities for residents to become certified contractors and risk assessors and business owners to help scale healthy and climate friendly housing rehabs and retrofits. By offering education, capacity and skill building partnerships, GHHI works with communities to set key goals and clear steps to reach the goals including sustained funding models. GHHI has spurred over 150 sustained community driven strategies to create holistic healthy, lead safe and climate friendly homes driven through fellow community-based

organizations and allies. True capacity building takes time and the willingness to go deep after generations of disinvestment and disregard. By helping to build broad competencies for a holistically healthy housing approach, communities can build goals around better health (lower asthma, lead poisoning, injury and emotional stress), economic (work, wages and wealth building through jobs and improved housing stability) and social outcomes (lower crime, better educational attainment) in ways that address core community values and needs for environmental justice. **CPS Element 2: Community Capacity-Building and Leadership Development**. Capacity building will include teaching skills to access and align, braiding and coordinated funding to scale efforts to address unhealthy housing. Through workshops, trainings, boot camps and ongoing technical assistance, CBOs, government agencies, contractors and community health workers and related stakeholders will learn how to access resources and implement evidenced-based programs, build skilled program management and how to implement ethical data collection to build sustained practices and strong impact evaluation. Building effective leadership, strong program management and sustained funding is a 30-year hallmark of GHHI that will be a focus of the Region-wide boot camps, workshops and online training – including mentoring sessions and onsite coaching. **CPS Element 3: Consensus Building**. GHHI's capacity building model is built on a collaborative learning network to ensure effective partnerships and sustained success built on a common vision for continual evolution of the work. Using evidence, data and community informed experience, the collaborative approach allows organizations to build trust and build on each other's strengths toward greater efficiencies and common goals. GHHI depth of experience in working in diverse demographics, culture, and legislature helps to create trusted learning environments toward consensus building, The use of an asset and gap analysis also creates a foundation for consensus building as it is built on data, fact finding and learning from community interviews. **CPS Element 4: Multi-Stakeholder Partnerships and Leveraging Resources**. The GHHI Model's focus is completely related to multi-stakeholder partnerships and leveraging resources from different organizations and different funding sources to efficiently, comprehensively deliver healthy housing services to those in need. This not only saves money, but saves residents the hassle of engaging with multiple organizations for intake and income verification processes, housing assessments, and follow-ups. The model even includes scheduling healthy housing interventions in a way that is convenient for the resident. The GHHI model reduces the administrative burden to the underserved community through partnerships that ensure residents engage with one agency for intake, housing intervention coordination, and quality control assessments. GHHI will train participants on the GHHI Model to help each jurisdiction begin the process of establishing common vision, goals, and objectives for either implementing the GHHI Model, or strengthening the existing GHHI Model ecosystem with additional capacity building provided in the proposed program. **CPS Element 5: Constructive Engagement by Relevant Stakeholders**. GHHI's extensive experience in engaging CBO's, NGO's, government, healthcare, philanthropy and the private sector in learning networks to solve environmental justice issues has been built on constructive, goal-oriented engagement. Each partner brings distinct strengths, expertise, resources and skills to share and understand the mutual benefits of eliminating disparities and building equity through better environments and health. By offering technical expertise to ignite community problem solving, communities and the core CBO's driving change are strengthened and supported by its broader community ecosystem.

ED_016126_00000881-00004

GHHI's experience and expertise with technical assistance contributes to a keen understanding of stakeholder engagement, as well as the relevancy and specific contributions each stakeholder needs to make to maximize positive impact to the community. GHHI's success throughout the country is a testament to consistently following the principles and elements of the problem-solving model. **CPS Element 6: Sound Management and Implementation**. GHHI has proposed an exceptional program management team with vast experience in strategizing, managing, and coordinating collaborative efforts to advance healthy housing objectives. GHHI is focused on tangible outcomes and developing strategies tailored to community needs and service deficits. Clear commitment from partners has already been established through preexisting partnerships and attached letters of commitment detail the nature of such partnerships. All partners will be invited to attend the available trainings and every training participant will complete a pre- and post- competency assessment to capture pertinent information to inform the training process and to evaluate training effectiveness. The focus on management of the GHHI Model is intentional to help CBOs and other organizations that typically need capacity building support for implementation efficiency and effectiveness. **CPS Element 7: Evaluation, Lessons Learned, and Replication of Best Practices**. Tracking progress is a consistent priority throughout the proposed program. GHHI will conduct surveys and pre/post test to capture pertinent evaluation data. Capturing such data will not only give GHHI an opportunity to evaluate program activities, but also make adjustments throughout to improve program activities throughout the duration of the program. GHHI consistently shares best practices, data, and success stories with housing stakeholders nationwide. GHHI works tirelessly to advance healthy housing practices throughout the country. Evaluation results are critical to demonstrate the effectiveness of GHHI Model and collaborative healthy housing partnerships. **e. Project Linkages:** Program activities directly support Clean Air Act and TOSCA objectives as well as EPA Strategic Plan Goal 2, Objective 2.1 by building capacity and promoting climate resilience, as well as maximizing benefits to underserved communities. Building capacity for CBOs and local/state government agencies to provide more comprehensive healthy housing services, that include energy efficiency services, will also increase efficiency and cost savings for Justice40 climate change goals. Underserved, low-income communities do not have the financial means to acquire healthy housing services. These services are typically grant funded from federal, state, local, and philanthropic sources. GHHI has advocated for the efficient use of these funds to maximize collective opportunity for achieving climate goals and safe, healthy housing at lower costs, in less time. This project will also address federal strategy to promote equity for federally recognized tribes. New York State is home to 8 Federally-recognized tribal nations that will be invited and encouraged to participate in healthy housing training and capacity building activities. **f. Partners and Collaborate:** GHHI will bring together strong local CBO partners as well as key stakeholders from the health, housing, energy, government and philanthropic sectors. These partnerships will synergize capacity at the community, local and state level and utilize innovative strategies and funding through groundbreaking cross sector collaboratives that produce asthma and lead poisoning preventive services at scale and reduce energy burdens and carbon emissions through increased energy efficiency services. GHHI partners in the anchor cities of Trenton, Newark, New York City, Albany/Greater Capital Region and San Juan will receive extensive training and technical assistance that they will implement and demonstrate best practices and improved health outcomes for lead poisoning and asthma.

ED_016126_00000881-00005

GHHI proposes to enhance its focus on community driven change and public/private partnerships and investments with the goal of substantially improving health, economic, social and climate change mitigation outcomes for low income households in the four target states and territories by also offering trainings and technical assistance statewide to supplement the concentrated work in the anchor jurisdictions. GHHI has a strong track record of engaging CBOs and service providers with cross sector leaders and agencies stakeholders to create systems change. For this grant, GHHI is partnering with key CBOs and stakeholder organizations in public (government) and private (philanthropy, health insurers) sectors as well as key drivers of change in health, housing and energy arenas that will build transformational collaboratives locally. GHHI will partner with these lead partners but will also be convening broader CBO partnerships to receive training and technical assistance and to get exposure to new network partners to help improve lead, asthma and climate change mitigation outcomes. Key initial committed CBO and multi-sector partners: New Jersey: Subgrantee Newark Water Coalition (Newark CBO) New Jersey Board of Public Utilities (state government/energy), The Fund for New Jersey (philanthropy), New Jersey Department of Health (state government/health), New Jersey Future and Lead Free NJ (CBO-policy); New York: Subgrantee Affordable Housing Coalition (Greater Capitol Region CBO), BlocPower (energy and WFD NYC CBO), Affinity by Molina (healthcare), WE ACT (NYC CBO), Black Millenials 4 Flint (CBO); Puerto Rico: Subgrantee Center for Puerto Rico (San Juan CBO), Puerto Rico Health Department (territory government/health) and Affinity by Molina (healthcare). In the US Virgin Islands, GHHI will provide trainings for CBOs and government agencies and explore more formal partnerships with local agencies over the course of the grant after developing a full strategy for the territory in partnership with EPA. Subgrantees Newark Water Coalition, Affordable Housing Coalition and Center for Puerto Rico are committing to be lead CBO convenors in their jurisdictions and states as a community-based partner convenor of CBOs and other partners, and work with GHHI to help train and build funding and capacity for increased resident education and housing intervention services for low income homes for lead, asthma and energy.

2.0 Project Activities/Milestone Schedule a. Project Activities

Capacity Building: GHHI's CBO Training and Technical Assistance plan for this grant is to build community level capacity and skill sets, dynamic cross sector partnerships (Health, Housing, Energy, Federal/State/Local, Philanthropic) integrated service delivery models, and increased housing services funding to meet the demand in low income communities. By building greater capacity in and through our community-based organizations and effectively equipping community stakeholders how to access and align funding from all sectors to scale the stock of affordable, healthy and climate friendly homes, GHHI will help close the gaps on health and racial disparities and build community resiliency through targeted workforce training, skill building and strategic resource deployment that will ensure the lift and leadership of long overlooked communities. Indoor environmental exposures, particularly allergens and lead paint, soil and water hazards, are major contributors to lead poisoning and asthma morbidity and as such environmental control services aimed at reducing these exposures are an integral component of comprehensive lead prevention and asthma management strategies. Physical and social determinants of health related to the indoor environment are known to be contributing causes of asthma morbidity and exacerbations and disproportionately burden populations, especially children and minorities, rendered systematically vulnerable by

underlying social structures and political, economic and legal institutions. The health, educational and economic burden of asthma and lead poisoning in the United States is substantial and demands an innovative strategy to change systems at the state and national level while implementing programs that are successfully tailored to meet the community needs at the local level. Through the efforts outlined in this proposal, GHHI will provide the training to equip CBOs and local government agencies with the tools and capacity to not only addresses health and environmental issues but reduces energy consumption and costs while improving housing stability for impoverished families and neighborhoods that are disproportionately impacted by unsafe housing. GHHI has established a proven model to align, braid and coordinate public and private sector investments in a holistic approach to deliver healthy, safe and energy efficient housing interventions. In the broader healthy homes landscape, GHHI focuses on effective implementation at the ground level by working in communities and capturing directly the data and lessons learned to continue improving standards, effectiveness, environmental and health impacts and to build the local business case for increased investments. GHHI will serve as a connector between the fields of energy efficiency and healthy housing to leverage opportunities for collaboration and to look at energy and non-energy benefits (health, income retention, climate change mitigation) of integrated funding streams. GHHI will build local capacity at CBO organizations by GHHI helping connect CBOs with state and local government agency partners, healthcare insurers and providers, and climate funders to build sustainable platforms for healthy homes and energy efficiency services.

GHHI will train CBO services providers and agency stakeholders how to cut across silos and work on a collaborative platform for collective impact, by building capacity at the local level through establishing local leadership, shared data, holistic interventions and effective partnerships. * Align: Share a common application, intake, home assessment, intervention, and data platform; * Braid: Optimize and leverage funds and resources from multiple programs to drive outcomes; and * Coordinate: Cross-train field agents, leverage collaboration tools and deliver new financing sources. CBOs will be taught how to coordinate multiple programs' interventions which drives: * Cost Savings,* Efficiency for Households, * Better Outcomes, * New Funding, and * Reduction in Client Barriers: Without coordination, each program by itself often defers the client and refuses to take on the project because other work is also needed from a different funding source. Community-based leaders (Outcome Brokers) and Community/Site Engagement Capacity Building trainees that receive GHHI trainings and TA will create more community-based leaders and non-profit agency capacity to serve directly at the grass roots level in advancing the healthy homes and lead poisoning prevention strategies. Armed through local TA and trainings on evidence based, holistic service delivery models, such as the one GHHI has developed and is implementing will prove crucial so that all families are not trapped within the unhealthy barrier of disconnected services that exists today in most cities. Local communities and cross sector partners trained on this new holistic model is necessary to transform systems and policies to be able to meet the scale of need and produce fundamental changes in how preventive housing services are delivered. Training will be conducted for CBOs and local agencies on how to secure and then implement coordinated federal, state, local and private sector philanthropic funding. In addition to innovative healthcare funding, the Grant Program will teach service provides how to reduce barriers to weatherization enrollment and deferral rates and increase electrification and decarbonization

that will demonstrate how low income communities can access climate funds to more equitably gain access to new energy technologies that currently are not accessible to their low income households. Electrification-Decarbonization measures that replace gas appliances, install electric heat pumps and other energy efficient retrofits will reduce energy cost burdens while improving indoor air quality and particulate matter levels that improves respiratory health.

Training: All 73 trainings and boot camps courses will be planned and designed in consultation with local community-based partners and other stakeholders to build capacity in local networks of health, housing and energy professionals for preventive services. Each of these training courses will be accompanied by tailored mentorship, coaching, and technical assistance to help community partners implement preventive lead and asthma strategies in a coordinated and effective way with energy efficiency program services. GHHI's trainers will be available for one-on-one follow-ups to discuss real-time challenges during program development and delivery. GHHI will utilize culturally competent training materials with local resident education lead and asthma materials in Spanish and English for LEP populations. All GHHI materials are checked by trained, certified staff for technical accuracy and cultural appropriateness. Community Health Workers and Community Partners Lead and Asthma Awareness Trainings (8)/Healthy Homes 101 Trainings (8)/Health and Safety Assessment Training for CHWs (8) - Based on GHHI's experience in providing trainings for CHW, healthcare providers, home visiting program staff, GHHI training staff will provide trainings in the target area jurisdictions as well as offering virtual statewide trainings in New Jersey, New York, Puerto Rico and the Virgin Islands. The training curriculum will include core lead and asthma education competency, asthma care management including proper medication usage; assessing home-based asthma triggers and educating residents on reducing those triggers (e.g., smoking cessation); developing and utilizing the asthma action plan; connecting and linking services and clients with clinical care; and other lead, asthma and healthy homes education. In these trainings, participants will learn the necessary lead, asthma and healthy homes related content and skills to perform in-home resident educations for clients in their communities and become prevention ambassadors to increase community awareness and linkage to direct prevention services. Training will teach CHWs, environmental educators and nurses how to work with residents to determine adequate, sustainable, and cost-effective management strategies to address lea hazards and asthma triggers through trigger reduction and behavioral change and other home-based environmental health hazard remediation through local leverage resources. This training will support efforts to increase capacity and prepare community health workers, home visiting professionals and community advocates to provide educational, housing assessment and lead hazard and asthma trigger reduction client support services for clients enrolled in local programs. GHHI staff will complete webinar education on the root causes of asthma episodes, exposure routes, and health and safety impacts of asthma environmental health hazards and concludes with a review of best practices to effectively incorporate this information into resident teaching protocols and material to reduce asthma episodes and improve asthma related health outcomes. The curriculum will also include hands on and interactive training sessions with participants in the identification and evaluation of lead hazards, asthma triggers and environmental hazards. Healthy Homes 101 trainings will include broader healthy homes topics of mold, radon, asbestos, household safety and injury and other home-based environmental health hazards.

Comprehensive Assessment and Cross Trained Contractors (8) - Training provides an overview of the comprehensive assessment process and how to assess homes holistically. Training is composed of two days of training on comprehensive assessment of lead, asthma triggers, home-based environmental health hazards, and energy loss commonly encountered by weatherization and energy efficiency programs followed by training on environmental assessment, remediation techniques, and in conformance with HUD, EPA, DOE Safety Guidance, and other standards. Combines classroom instruction and hands-on assessment training in the field. The training session concludes with hands on exercises by participants in the identification of Healthy Homes hazards and the development of GHHI braiding strategies to address hazards that often result in client deferrals under current program practices. Green Jobs Workforce Development and Contractor Capacity Building (9) (HH, EE, EPA RRP Rule/Lead) – GHHI will conduct planning with CBOs to develop green jobs workforce development that provide local economic opportunity for local residents in low income communities though green jobs workforce development, training, hiring and job placement in the lead hazard remediation, healthy homes and energy efficiency contractor fields. GHHI is a national leader in best practices for comprehensive health and energy assessment, intervention, resident education, and wrap-around services to support consumer's health and housing needs, and improve energy efficiency. With EPA's support, GHHI will help local agencies build an infrastructure for green jobs training and certification that leads to greater capacity within the national healthy homes and energy-efficiency workforce, creates pathways for meaningful work in the health, housing and energy sectors for Section 3 residents, supports racial equity and increases economic opportunity and household income for unemployed and unemployed residents of black and brown communities. GHHI and local workforce development agencies will provide training to locally to build capacity in front line communities for green jobs worker and contractor related trainings and certifications so those services can be scaled and performed by community residents. GHHI will assist local CBOs in partnering with green jobs workforce development programs to increase contractor capacity to scaled housing intervention services such as with grant partner BlocPower's Civilian Climate Corps Program in New York City.

GHHI Integrated Model Boot Camps (Trenton/Newark/NY Greater Capital Region/New York City/San Juan/Virgin Islands)(6): GHHI Comprehensive Housing Assessment and Integrated Intervention Model - GHHI brings a wealth of green and healthy homes technical expertise on how to conduct comprehensive interventions that combine weatherization interventions with other lead hazard reduction and healthy homes interventions and in how to replicate best practices that will be provided by GHHI through local Boot Camp trainings by this grant. GHHI works across the country with energy, housing and healthcare providers to advance innovation in the field by analyzing cost benefits, educating stakeholders, building organizational capacity at the local level and creating integrated service models and new financing pathways (value-based payments, outcomes based financing, healthcare and philanthropic investment strategies) that drive cross sector health, energy and housing collaboration to address racial and health equity. CBOs and local stakeholders in each state and territory will be trained during the multi-day Boot Camps on how to utilize the Green and Healthy Homes Initiative comprehensive intervention model which is comprised of evidence-based practices that improve housing conditions, health outcomes, climate mitigation, quality

of life, and life trajectory. The holistic model integrates lead, healthy homes and energy efficiency resources including the following key components:

- Single stream client intake through a "no wrong door" process ensures clients access the multiple funding streams needed to address their needs and prevent client deferrals.
- In-home resident education provides the family with the knowledge and skills to address asthma triggers and other hazards and to sustain positive health outcomes.
- Comprehensive housing assessments and energy audits of the home environment to identify hazards that cause lead poisoning, asthma exacerbation, and energy loss.
- Integrated housing intervention model that addresses the whole home as a system.

Technical Assistance Trainings – Data and Evaluation (4): GHHI will provide local trainings on evaluation metrics, database platforms and tools to collect data that better measure local impact on health, energy, and climate that will build the business case for healthcare investment as well increase philanthropic and federal and state resources to scale services.

Technical Assistance: Region 2 includes a broad range of communities, with varying resources and different degrees of complexity and scale in their healthy housing and energy efficiency needs. Using deep, meaningful and transformative engagement through 19 in-person and virtual capacity building sessions as well as other ongoing technical assistance with our local CBOs and other agency partners in the four states and territories, GHHI will provide concentrated technical assistance and CBO capacity building in the HUB jurisdictions of Newark, Trenton, Greater Capital Region (Albany, Schenectady, Troy), New York City and San Juan while providing offering virtual trainings that are accessible to CBOs and agencies state and territory wide. Hands on education and training, technical assistance and tool kits from GHHI will assist state and local leaders in the design, development and effective implementation of lead poisoning prevention and asthma programs (including how to identify gaps, create infrastructure and funding development) that utilize best practices and innovative tools. Capacity Building Trainings (19) - Cross Sector Partnership Development – GHHI will assist with engagement with and development of cross sector partnerships with health, housing and energy sectors. EPA grant funding will allow GHHI to continue its national collaborative work by targeting Region 2 for the further integration of health interventions with energy efficiency and weatherization including programs to improve housing resiliency. The organization will advance the research, groundwork and results that have been achieved through GHHI partnerships with federal agencies (HUD, DOE, EPA), energy stakeholders (such as EEFA, BPI, New Jersey Board of Public Utilities, National Grid, NYSERDA and Connecticut Greenbank), health care providers and insurers (such as Affinity by Molina, Penn Medicine, Amerigroup, Blue Cross Blue Shield of North Carolina), Medicaid, Medicare Advantage plans, and others in spurring further development of health resources with housing and energy stakeholders to implement new comprehensive intervention methodologies. Braiding of Funding Sources -Training by GHHI on the techniques involved in aligning and braiding of funding sources and building the framework for comprehensive housing interventions. GHHI will teach CBOs how to leverage health, housing and energy funds to generate comprehensive interventions. This improved coordination among funding and housing program service providers, reduces client weatherization deferrals due to lead hazards through lead hazard remediation, conducts healthy homes interventions to reduce client deferrals due to other home-based environmental health hazards (mold, asbestos, safety hazards, radon) and will foster a sustainable, integrated

intervention model in New Jersey, New York, Puerto Rico and the Virgin Island that produces lead safe, healthy and weatherized homes. A key component will be detailed trainings and sharing of real world experiences on how to access but also to implement effectively new and increased energy efficiency, climate mitigation, lead hazard reduction funding from federal sources such as: Federal Inflation Reduction Act (IRA), billions in new Infrastructure and Investment Jobs Act funding for expanded DOE Weatherization Assistance Program (WAP) and Lead Service Line Replacement Programs, and HUD Lead Hazard Reduction and Healthy Homes Grants.

Securing Innovative Funding to Scale Services (9) - GHHI will provide training for CBOs and local and state agencies on how they can effectively partner with and utilize innovative funding from healthcare providers, health insurers and Medicaid/CHIP to improve health and social outcomes through integrated interventions that sustainable provide increased services capacity to improve lead and asthma outcomes. GHHI will provide technical assistance and train CBOs and local government agencies in how to pursue and obtain innovative financing to cover lead hazard control and healthy homes services. These financing models could include direct reimbursement from Medicaid/CHIP, support from hospital community benefits, financing through managed care in the form of value-added services or value-based payments, utilizing outcomes based payment mechanisms, establishing public-private funds, or other innovative models. Based on the state Medicaid program structure and priorities, and direction from the federal Center for Medicare and Medicaid Services (CMS), GHHI will use its vast experience to work with jurisdictions to identify the most promising opportunities to finance asthma trigger reduction, and lead hazard reduction through in-home prevention education and housing intervention services. There is considerable momentum across the country as CMS and states are increasingly looking to address social determinants of health such as the built environment, and an increasing look at value-based or alternative payment models that GHHI has helped to pioneer. CMS has approved CHIP funding for these types of services and there is the potential in NJ and NY for securing sustainable funding through Medicaid and other health-related funding. Hospitals and health systems are increasingly looking to utilize their capital to support lead hazard reduction and healthy homes interventions and GHHI has developed a track record of working with healthcare providers and insurers to utilize hospital community benefits funding, philanthropic, and other funding to produce programs and a substantial scaling of preventive services that GHHI will help Region 2 jurisdictions capitalize on securing.

GHHI Executive Leadership Institute (3): Participants from all four states and territories on the grant will participate in a three day, match funded, GHHI Executive Leadership Institute conference is conducted annually by GHHI since 2010 and which produces increased knowledge and training and fosters cross-sector collaboration and problem solving in addressing how housing conditions and climate change and energy equity impact health and racial equity. GHHI annually brings together best practice leaders in the field for the Executive Leadership Institute (ELI) which is the preeminent national convening of practitioners implementing an integrated health, energy and housing model. ELI is a unique platform designed to catalyze thought leaders, community leaders, advocates, health care providers, policymakers, and housing and energy service providers for workshops and networking conversations around healthy housing, integrated service delivery and innovative financing to scale preventive services for lead, asthma and household injury prevention and coordinated energy efficiency and electrification

ED_016126_00000881-00011

interventions. Community-based organization and agency representatives from New Jersey, New York, Puerto Rico and the US Virgin Islands will participate annually in ELI. **Climate Objectives:** Energy Efficiency and Weatherization, Electrification and Decarbonization- Through CBO trainings and community input and planning, GHHI will help local communities and states increase access to decarbonization, electrification and renewable energy technologies in low income communities in furthering racial equity and Justice40 goals and supporting climate change mitigation. GHHI will train CBOs and other agencies how to access and braid healthy housing with energy efficiency and lead remediation funding from Federal Inflation Reduction Act (IRA), billions in new Bipartisan Infrastructure Bill (BIL) funding for expanded DOE Weatherization Assistance Program (WAP) and Lead Service Line Replacement Programs, HUD Lead Hazard Reduction and Healthy Homes Grants and Greenhouse Gas reduction funding. **National Decarbonization Convenings** (3)**:** Representatives from CBOs in all four states and territories in the grant will participate in the match funded, annual National Decarbonization Convening. The goal is to bring together CBOs, advocates and policy makers to establish policies and strategies that need to be prioritized to decarbonize homes and buildings in the states, with an emphasis on historically disinvested communities, and design implementation strategies for low income communities. Participants will have access to a catalog of resources on decarbonization including educational webinars, briefing papers, and other practical guidance materials to help CBOs implement decarbonization programs that reduce carbon emissions. The Convenings help with the creation and updating of strategic roadmaps for equitable housing decarbonization, especially in historically disinvested communities; creation of resource guide of specific sources of assistance; and creating vibrant networks to advance electrification that also improves indoor and outdoor air quality and health outcomes.

b. GHHI EPA EJCPS Grant Program Milestone Schedule

Program Activity	Year 1	Year 2	Year 3
1. Program Startup (months 1-3 in Year 1)	Subgrantee Agreements, initial local collaborative convenings, materials development, establish Data and Evaluation processes	N/A	N/A
2. Asthma & Lead Awareness Training for CHWs (Virt.-8x)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1) US Virgin Islands (1
3. Healthy Homes 101 Training for CHWs (Virtual-8x)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1) US Virgin Islands (1)
4. Health & Safety Housing Assessment Training for CHWs (Virtual-8x)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1) US Virgin Islands (1)
5. Comprehensive Home Assessment Training for Assessors, Energy Auditors (In-Person & Virtual-8x)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1) US Virgin Islands (1)
6. GHHI Integrated Model Boot Camps (In-Person-6x)	Trenton, NJ (1) Greater Capital Region, NY (1)	Newark, NJ (1), New York City, NY (1), PR (1)	US Virgin Islands (1)

7. Technical Assistance Training – CBO Capacity Building (In-Person and Virtual-19x)	New Jersey (2) New York (2) Puerto Rico (2)	New Jersey (2) New York (2) Puerto Rico (2)	New Jersey (2) New York (2) Puerto Rico (2) US Virgin Islands (1)
8. Technical Assistance Training – Innovative Funding Sources (Virtual-9x)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1) US Virgin Islands (1)
9. TA Training – Green Jobs, Workforce Development, Contractor Capacity (In-Person and Virtual-9x)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey (1) New York (1) Puerto Rico (1)	New Jersey/New York (1) Puerto Rico (1) US Virgin Islands (1)
10. Technical Assistance Training – Data and Evaluation (Virtual-4x)	New Jersey/New York/ Puerto Rico (1)	New Jersey/New York/ Puerto Rico (1)	New Jersey/New York/US Virgin Islands (1) Puerto Rico (1)
11. GHHI Executive Leadership Institute (In-Person-3x)	New Jersey/New York/Puerto Rico/US Virgin Islands (1)	New Jersey/New York/Puerto Rico/US Virgin Islands (1)	New Jersey/New York/Puerto Rico/US Virgin Islands (1)
12. National Decarbonization and Electrification Convening (Virtual-3X)	New Jersey/New York/Puerto Rico/US Virgin Islands (1)	New Jersey/New York/Puerto Rico/US Virgin Islands (1)	New Jersey/New York/Puerto Rico/US Virgin Islands (1)
13. Data and Evaluation Grant Closeout (months 34-36 in Year 3)	Ongoing project data collection	Ongoing project data collection	Complete final data collection, analysis and evaluation, Final Report

3.0 Environmental Results – Outputs, Outcomes and Performance Measures (Logic Model)

a. Environmental Results (Logic Model)(see attachment) b. Performance Measurement Plan

GHHI broadly defines success as achieving healthier and more energy efficient homes, higher quality green jobs, increased economic opportunities for low income communities, and better health outcomes for children and families in poverty. Strong data and evaluation by the Program will measure impact at the client, resident and cross agency coordination level to evaluate individual family outcomes and systems change level results that can be shared nationally including: energy cost and consumption, health outcomes and medical costs, deferral rates, decarbonization and electrification access and utilization, housing and financial stability, social outcomes (school attendance, work attendance), equity goals, use of leverage funding and advancement of climate objectives. ROI for energy and health outcomes will be undertaken for Program metrics. Housing is a key social determinant of health and this project will create an integrated platform that supports Justice40 and environmental justice objectives by providing services for families in low income communities that are faced with mounting utility bills and are unable to afford the installation of measures to: reduce energy consumption costs, undertake electrification and decarbonization, take advantage of renewable energy technologies or reduce costly health hazards in their home that directly impact health and racial equity. GHHI has a proven history of demonstrating how improved asthma and other health outcomes, reduced energy costs, and more stable homes in primarily African-American and Hispanic communities can be achieved by addressing home-based health hazards (indoor allergens, safety hazards, and lead hazards) and weatherization and energy efficiency issues through an integrated assessment, education, and intervention model with cross sector

partnerships. Grant Metrics will include: number of trained CBOs and partner agencies, new prevention partnerships, number of new cross sector collaboratives created, number and amount of new or expanded funding sources for lead hazard and asthma trigger remediation and energy efficiency services. Client outcomes will include:

- Reductions in asthma related hospitalizations and emergency department visits at the client level, missed school days and improved school performance
- Reductions in asthma related missed work days and increased income for the household
- Reductions in childhood lead poisoning and health disparities
- Reduction in energy consumption, GHG emissions supporting climate change mitigation
- Reduction in medical, energy and housing maintenance costs and government savings

Program Goals: GHHI proposes a dynamic 36 month EPA Environmental Justice Collaborative Problem Solving Grant Program that will catalyze the integration of lead hazard reduction, healthy homes and energy efficiency housing interventions through a comprehensive service delivery model to create healthy and energy efficient homes for low income families and seniors in the most at risk communities in New Jersey, New York, Puerto Rico and the US Virgin Islands. Growing out of GHHI's history and experience as a community-based organization (CBO) in Baltimore and nationally, GHHI has developed a collaborative model that will build CBO capacity to advance healthy, lead-safe and energy efficient homes in our most historically disinvested, underserved and under-resourced communities. With EPA funding, GHHI will provide training and direct technical assistance in working with local community-based organizations, government agencies and other stakeholders in EPA Region 2 to build local CBO capacity and innovative cross sector partnerships to scale preventive lead and healthy homes services for environmental assessments, resident education and housing interventions. The Program will generate sustainable impact by reducing barriers to energy efficiency program enrollment and client deferral rates from hazards in the home, increasing electrification, and supporting Justice40 objectives by demonstrating how low income communities can more equitably gain access to decarbonization measures that currently are not accessible to them. Low income communities in the four jurisdictions have been disproportionately affected by lead poisoning, asthma episodes and energy inefficient, poorly weatherized housing that creates energy cost burdens and unhealthy indoor air quality. The development of community capacity to address historic health disparities and scale preventive services in the four states and territories will serve as national models for addressing social determinants of health and environmental justice through partnership between health, housing and energy organizations at the community and state levels to meaningfully impact health and racial equity. In addition to reducing energy cost burdens, energy efficiency and weatherization services provide other non-energy benefits that impact health including improved indoor air quality, reduced environmental toxins, and thermal comfort. With GHHI's technical expertise in working with CBO and agency stakeholders, communities will be able to develop community -driven solutions that produce housing upgrades and energy retrofits that braid funding while producing community-based green jobs and greater housing stability . This EPA grant funding and leverage investments created through local capacity building will serve as a mechanism for reinvesting savings back into underserved communities, increasing inter-generational wealth for low income families, mitigating climate impacts, building greater resiliency, and improving capacity of communities to address their own health and housing needs.

c. Sustainability Plan and Community Vision

Through this grant program's systems change framework, sustainable outcomes will include:

- Government innovation through the utilization of an integrated Green & Healthy Homes housing intervention model by local and community housing, energy and health agencies
- Based upon the results achieved through this model Initiative, adoption by HUD, DOE, EPA and HHS of greater cross sector coordination and leveraging models for improved service delivery to low income homes and sustainable funding for preventive CBO services
- Demonstrated improvements in health and social outcomes through a strong evaluation component will further build the evidence and business case for sustainable healthcare (Medicaid) and public investments (climate funds) in healthy, energy efficient housing

4.0 Programmatic Capability a. Organizational Experience: GHHI continues to lead market transformation in the health, energy and housing sectors by creating and replicating models that effectively address social determinants of health and advance racial and health equity. GHHI has 27 years of experience in providing technical assistance to cities, counties, and states in developing, implementing, and evaluating programs and policies to prevent children from suffering asthma episodes and lead poisoning due to poor-quality housing and lack of access to standard preventive care. GHHI is unique in that it can rely on the knowledge and lessons learned as a community-based organization from serving over 30,000 low-income clients through in-home resident education, housing assessment, and training direct services and in completing more than 5,000 lead, healthy homes and energy efficiency housing interventions with its in-house hazard reduction crew to inform its technical assistance services to community organizations, healthcare providers, housing and energy service providers, and government agencies on what can be effective in at-risk communities. Building off its experience in operating direct service programs and providing technical assistance to jurisdictions nationally, GHHI in 2009 launched a national model on the integration of health, safety, housing, and energy efficiency in partnership with the CDC, HUD, DOE, the White House and the Council on Foundations. GHHI's model has been adopted by over partner jurisdictions to unify cross-sector public and private partners who agree to work collaboratively to coordinate health and housing services to low-income persons in need in their community and pursue innovative funding sources to scale what is effective. GHHI's national team works with 75 local GHHI partner sites and healthcare sector partners to create learning networks and a shared data platform; provide a comprehensive full house assessment tool and better access to community-based green jobs; and implement a single intake portal for green and healthy housing interventions. GHHI has successfully launched a number of seminal healthcare sector healthy housing initiatives that are providing unprecedented investments in preventive housing services at scale for low-income families and serve as the leading models nationally for healthcare investments in healthy housing. In 2021, GHHI led the final development and closing on the nation's first outcomes-based financing arrangement with a Medicaid health plan (Affinity by Molina) as the end payer. The $4.75 million project, called the New York Healthy Homes Collaborative, that is providing comprehensive home-based asthma services including home repairs to 850 high risk members of Affinity by Molina's Medicaid plan. GHHI worked with Penn Medicine's Lancaster General Hospital (LGH) to develop and operationalize in 2021 its $50 million investment in residential lead remediation project in Lancaster County, PA that is remediating lead hazards in more than 2,000 homes in the County will set the standard for anchor healthcare institutions investment.

In 2018 and 2022, GHHI was awarded the HUD Secretary's Healthy Homes Award for its work in Baltimore City and its contributions to advancing healthy homes best practices nationally. GHHI's results oriented Asthma Program was recognized by the EPA as one of only two recipients in 2015 of the National Environmental Leadership Award in Asthma Management and again in 2022 as an EPA Asthma Hall of Fame Program.

b. Staff Experience/Qualifications: See attached resumes. **Ruth Ann Norton, President and CEO:** She is responsible for the overall management of the organization and will provide project oversight and subject matter expertise in review and development of project deliverables and work products. Ms. Norton joined the organization in 1993 and has led its development into one of the nation's most effective and foremost authorities on healthy housing and its impact on the social determinants of health. An expert on lead poisoning prevention, healthy housing and the housing intersection of climate, energy and health, she directs GHHI's national strategy, policy framework and services to advance housing as a platform for improved health, economic, educational and social outcomes for low-income communities. Ms. Norton designed and developed the holistic Green & Healthy Homes model for integrated housing interventions in low-income housing to ensure that healthy homes standards are incorporated into green housing investments. She serves as the national director and technical assistance provider to 75 GHHI partner jurisdictions and technical assistance clients. Ms. Norton has served in key management roles and senior advisor for multiple federal grants and weatherization, lead hazard reduction and healthy homes programs including 50 programs totaling over $500 million related to the HUD Office of Healthy Homes and Lead Hazard Control, DOE and other federal and local housing intervention programs. Ms. Norton serves as a member of the EPA Children's Health Protection Advisory Committee, the National Council of State Housing Agencies' National Advisory Group, the National Leadership Academy for the Public's Health (NLAPH), the Ohio Asthma Council, the Johns Hopkins Bloomberg School of Public Health Center for Population Health Information Technology Advisory Board, and she is Chair of the Maryland Lead Poisoning Prevention Commission. She is also a federally appointed Liaison Member to the CDC's Lead Exposure and Prevention Advisory Committee (LEPAC) and was on the Expert Panel for the development of HUD's Healthy Homes Manual. Ms. Norton is a Robert Wood Johnson Foundation Community Health Leader, a Weinberg Foundation Fellow, a WE ACT Environmental and Social Justice awardee, and received the Tony Woods Award for Excellence from the Building Performance Industry in 2016 for her efforts to integrate energy efficiency with healthy homes interventions nationally. **Wesley Stewart, Senior Advisor:** Wes Stewart is the Senior Advisor and General Counsel for the Green & Healthy Homes Initiative (GHHI) and will provide staff management, project benchmark tracking, subject matter expertise in trainings and development of project deliverables. He provides national technical assistance on program management, national best practices, and project implementation to GHHI partner sites and technical assistance clients. He has twelve years of experience as Program Director overseeing GHHI's Maryland Program Services. **Michael McKnight, Senior Vice President of National Programs** has been with the organization for twelve years and oversees a national portfolio of projects integrating housing, energy, and health, and has developed numerous innovative healthcare financing projects around the country. He also provides significant technical assistance around federal, state, and local policy related to healthy housing and how improving housing conditions lead to tangible public health outcomes. **Catherine Lee, Director of Client Services,** will serve as Grant Program

Manager to manage project activities, including asset mapping, coordination, and facilitation of partnership convenings, development of the Coordinated Workflow Plan, and production of related work products in coordination with other project team members. She has also led GHHI site onboarding services including network development and meeting facilitation, staff trainings for implementation coordinators, and ongoing mentoring for jurisdictions implementing the GHHI Model. Her experience is grounded in work as an GHHI Outcome Broker in Jackson, where she established the first partnership of Lead Hazard Control and Weatherization Assistance programs in the city. **Bert Cooper, Vice President of State and Local Strategic Services** has more than 20 years of experience in housing development, strategic development and policy, program planning, evaluation and systems change work. He will serve as EPA Grant Project Director to support the project team with strategic planning and project management on implementation of project deliverables, reporting and community capacity and agency stakeholder development in each target jurisdiction. **Wynn Tucker is Director, Policy & Innovation,** will serve as a trainer and provides technical assistance on innovative healthcare financing and local capacity building and program implementation of innovative models. **Hector Moreno, Trainer and Subject Matter Expert,** resides in San Juan, Puerto Rico and will lead comprehensive assessment, Boot Camps, and workforce training sessions to support implementation of the Integrated model. Mr. Moreno is a Healthy Homes and Energy Subject Matter Expert, providing national technical assistance and training on Healthy Homes and Building Energy Performance to home assessors, energy auditors, community health workers, housing contractors, including Healthy Homes professionals working for state, county and city agencies, non-profits, housing service providers and private organizations conducting programs in Lead Hazards Control, Asthma Triggers Control, Healthy Homes and Energy Efficiency. Mr. Moreno has been in the health and housing field for over 30 years, including working in the federal government and non-profit sectors. He is a fluent English and Spanish speaker and is certified to provide Lead Renovation Repair and Painting and OSHA 10 trainings in English and Spanish languages. **Celisia Rouson-Smith, Manager of Environmental Health Education & Community Engagement,** leads GHHI's asthma programs as well as providing direct asthma services for GHHI clients including the State of Maryland Department of Health, Amerigroup. LifeBridge Health, and other healthcare and housing sector partners. Ms. Rouson-Smith is an experienced, results oriented trainer and environmental health educator and case manager who has managed and supervised various client services programs in the past and delivered improved asthma outcomes for her GHHI pediatric clients. She has conducted numerous asthma, lead poisoning prevention and healthy homes resident education and community health worker certification trainings in Maryland and nationally. Ms. Rouson-Smith will serve as a trainer on the project. **Isabel Shargo, Data and Evaluation Manager**, supports internal data and evaluation efforts, as well as offers assistance for external projects seeking to embed evaluation and data management practices into existing project work. She will design the data metrics and evaluation tools and will conduct grant project data analysis and evaluation. **Sade McKoy, Senior Communications Associate for Digital and Social Media** at GHHI and will provide training promotion, community social media engagement and training and community training outreach materials development.

c. Expenditure of Awarded Grant Funds & Plan for Meeting with EPA's Compliance Review

GHHI has in place multiple internal controls and accounting practices to ensure sound fiscal management of the EPA grant. GHHI utilizes internal controls, a purchase order process, and Quickbooks accounting software to tracks revenues and expenditures by separate accounts and an EPA EJCPS grant account will be maintained to ensure that the expenditures are allowable and on track. Grant funded payments will be made to all subgrantees and vendors following the receipt of valid invoices, documentation for expenses, applicable program reports and approval by the Program Manager that the costs are allowable and in compliance with EPA grant requirements and any Subgrantee Agreement terms or contractor contract. GHHI's Finance Department provides monthly income statements that itemize expenses and also prepares the quarterly financial reports and monthly invoices to EPA by GHHI's Chief Financial Officer and three Staff Accountants. GHHI has safeguards in place to prevent co-mingling of funds as every GHHI grant or contract is assigned a separate Department number to ensure that revenue and expenditures are tracked separately. GHHI has been certified by the Maryland Association of Nonprofits as a Standards of Excellence organization and maintains high standards for program management operations. GHHI has successfully managed over $110,000,000 in public and private grant and contract funds and has a 26 year history of excellent A-133 audits with no findings. Project Reporting - GHHI will complete all EPA grant reporting requirements under the grant including grant progress reports, annual performance reports, financial reports, data reports, and Final Narrative and Financial Reports among other EPA requirements.

5. Past Performance i. Successful completion and management: GHHI has been awarded four EPA Environmental Justice Grants for Baltimore City, a 2007 $243,000 EPA Community-Based Outreach and Training Grant for Baltimore City, a 2018 $597,000 EPA National Indoor Environments Program Grant for national technical assistance to 21 jurisdictions in the United States, a 2021 Environmental Justice Grant for Baltimore City that has just concluded on February 28, 2021, a 2022 $75,000 EPA Multisector Integrated Pest Management Education Project Grant for City of Memphis, and a 2023 $100,000 EPA Environmental Education Grant for several Maryland counties that is process of award. GHHI is meetings its EPA benchmarks on the EPA IPM Education Grant in Memphis and has met its key benchmarks on its Baltimore City GHHI has been the Co-Principal Investigator and subgrantee on multiple HUD Office of Lead Hazard Control and Healthy Homes Technical Studies and Lead Technical Studies grants and successful manager of Healthy Homes Production, Healthy Homes Demonstration and LEAP grants awarded to GHHI by HUD. **ii. History of meeting reporting requirements in meeting expected outputs and outcomes:** All grant deliverables for GHHI's prior EPA grants were met or exceeded and GHHI has submitted all grant reporting. For most of the HUD grants listed above GHHI scored 100 out of 100 for their final rating for meeting project outcomes and all six green rated HUD grants met or exceeded benchmarks and were completed on time. GHHI's direct prevention services, development of community-based and cross sector partnerships, and scaling of funding has produced a 99% decline in lead poisoning in Baltimore City and State of Maryland and produces documented improved asthma related outcomes for clients served such as: 66% reduction in asthma related pediatric hospitalizations, 62% increase in asthma related perfect school attendance and 82% increase parents not missing work due to their child's asthma episodes. **6.0 Quality Assurance Project Plan (QAPP) Information:** N/A

Re: EPA Environmental Justice Collaborative Problem Solving Grant

Dear Mr. Burney:

The Green & Healthy Homes Initiative (GHHI) respectively submits for your consideration the attached proposal seeking $500,000 from the U.S. Environmental Protection Agency's Environmental Justice Collaborative Problem Solving Grants Program. The collaborative model proposed in this application articulates a dynamic and catalytic approach to the integration of lead hazard reduction, healthy homes, and energy efficient housing interventions for low-income families and seniors in the most at risk communities in New Jersey, New York, Puerto Rico, and the US Virgin Islands. Grounded in our deep and sustained commitment to environmental justice, GHHI's model leverages our more than 30 years of regional and national community capacity building experience to facilitate new cross sector partnerships across the health, housing, and energy sectors in New York, New Jersey, Puerto Rico, and the US Virgin Islands.

As a Baltimore, Maryland community-based organization (CBO) that has grown in prominence and expertise in communities across the nation over the last three decades, GHHI is uniquely positioned to build and deliver an EPA grant program that empowers and enables other CBOs to build the capacity needed to advance the goal of environmental justice for the country's most historically disinvested, underserved, and under-resourced communities. GHHI's work in lead poisoning and asthma prevention and energy efficiency has spanned more than 75 jurisdictions, engaging cities, municipalities, school districts, health care providers, and philanthropic institutions, among other groups, to create innovative strategies that advance equity, catalyze collaboration, and deliver significant, evidence-based improvements in health, economic, climate change mitigation, and social outcomes.

With EPA grant funding and $373,755 in GHHI in-kind funding, GHHI and its community partners will build community-based capacity to maximize federal, state, local and philanthropic funding to create healthier homes that improve lead poisoning and asthma outcomes for the lowest income and most under-resourced residents of New York, New Jersey, Puerto Rico, and the US Virgin Islands.

By building greater capacity in and through community-based organizations and effectively equipping community stakeholders to access and align funding from all sectors to scale the stock of affordable, healthy, and climate friendly homes, GHHI will help close the gaps on health and racial disparities and build community resiliency through targeted workforce training, skill building and strategic resource deployment that will ensure the lift and leadership of long overlooked communities. We ask you to fund this important Environmental Justice Collaborative Problem Solving Grant.

Sincerely,

Ruth Ann Norton
President and CEO

EPA Form 4700-4 Attachment

XI. (cont.) If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/recipient's website address for, or a copy of, the procedures.

Yes. GHHI does not discriminate on the basis of race, color, national origin, sex or handicap. Attached: GHHI's Employee Grievance Procedures-Section 403 Employee Concerns: Mediation Process from Employee Handbook & GHHI's Public Client Grievance Procedures, complying with 40 CFR 5 & 7.

The attached Client Grievance Procedures and the Client General Complaint Form refer to public clients that receive direct education and other services from the Green & Healthy Homes Initiative (GHHI) and the process for public clients to file a grievance and be assured a prompt and fair resolution by GHHI of any complaints that allege a violation of 40 C.F.R. Parts 5 and 7.

See GHHI's attached, excerpted Employee Handbook Sections 102-105 and Section 403 Employee Concerns: Mediation Process: An employee who has a concern should attempt to resolve it informally with the individual before filing an official complaint. If the issue cannot be resolved on an informal basis, the employee shall commit the complaint to writing, providing as much detail and documentation as possible. The formal complaint shall be submitted to the employee's immediate supervisor. Green & Healthy Homes Initiative will endeavor to resolve the complaint within seventy-two (72) hours of receipt, excluding weekends and holidays. A decision will be made on the merit of the complaint and a written response will be provided to the employee(s) involved, with a copy placed in the employee(s) personnel file(s). The decision of management is final. If an employee has a complaint with the President and cannot resolve the issue on an informal basis, he/she may file the complaint in writing. GHHI's attached adopted policies include employees and clients/public and address and assure compliance with 40 C.F.R. Parts 5 and 7.

Appendix I

Green & Healthy Homes Initiative®

EMPLOYEE HANDBOOK

Last updated: February 2018

Equal Opportunity and Commitment to Diversity

102 Equal Opportunity

Green & Healthy Homes Initiative provides equal employment opportunities to all employees and applicants for employment without regard to race, color, ancestry, national origin, gender, sexual orientation, marital status, religion, age, disability, gender identity, results of genetic testing, or service in the military. Equal employment opportunity applies to all terms and conditions of employment, including hiring, placement, promotion, termination, layoff, recall, transfer, leave of absence, compensation, and training.

Green & Healthy Homes Initiative expressly prohibits any form of unlawful employee harassment or discrimination based on any of the characteristics mentioned above. Improper interference with the ability of other employees to perform their expected job duties is absolutely not tolerated.

103 Americans with Disabilities Act (ADA) and Reasonable Accommodation

To ensure equal employment opportunities to qualified individuals with a disability, Green & Healthy Homes Initiative will make reasonable accommodations for the known disability of an otherwise qualified individual, unless undue hardship on the operation of the business would result.

Employees who may require a reasonable accommodation should contact Human Resources.

104 Commitment to Diversity

Green & Healthy Homes Initiative is committed to creating and maintaining a workplace in which all employees have an opportunity to participate and contribute to the success of the business and are valued for their skills, experience, and unique perspectives. This commitment is embodied in company policy and the way we do business at Green & Healthy Homes Initiatives and is an important principle of sound business management.

105 Harassment and Complaint Procedure

Sexual and other unlawful harassment is a violation of Title VII of the Civil Rights Act of 1964 (Title VII), as amended, as well as many state laws. Harassment based on a characteristic protected by law, such as race, color, ancestry, national origin, gender, sex, sexual orientation, gender identity, marital status, religion, age, disability, veteran status, or other characteristic protected by state or federal law, is prohibited.

It is GHHI's policy to provide a work environment free of sexual and other harassment. To that end, harassment of Green & Healthy Homes Initiative's employees by management, supervisors, coworkers, or nonemployees who are in the workplace is absolutely prohibited. Further, any retaliation against an individual who has complained about sexual or other harassment or

ED_016126_00000884-00004

retaliation against individuals for cooperating with an investigation of a harassment complaint is similarly unlawful and will not be tolerated. GHHI will take all steps necessary to prevent and eliminate unlawful harassment.

Definition of Unlawful Harassment. "Unlawful harassment" is conduct that has the purpose or effect of creating an intimidating, hostile, or offensive work environment; has the purpose or effect of substantially and unreasonably interfering with an individual's work performance; or otherwise adversely affects an individual's employment opportunities because of the individual's membership in a protected class.

Unlawful harassment includes, but is not limited to, epithets; slurs; jokes; pranks; innuendo; comments; written or graphic material; stereotyping; or other threatening, hostile, or intimidating acts based on race, color, ancestry, national origin, gender, sex, sexual orientation, marital status, religion, age, disability, veteran status, or other characteristic protected by state or federal law.

Definition of Sexual Harassment. "Sexual harassment" is generally defined under both state and federal law as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature where:

- Submission to or rejection of such conduct is made either explicitly or implicitly a term or condition of any individual's employment or as a basis for employment decisions; *or*
- Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creating an intimidating, hostile, or offensive work environment.

Other sexually oriented conduct, whether intended or not, that is unwelcome and has the effect of creating a work environment that is hostile, offensive, intimidating, or humiliating to workers may also constitute sexual harassment.

While it is not possible to list all those additional circumstances that may constitute sexual harassment, the following are some examples of conduct that, if unwelcome, may constitute sexual harassment depending on the totality of the circumstances, including the severity of the conduct and its pervasiveness:

- Unwanted sexual advances, whether they involve physical touching or not;
- Sexual epithets, jokes, written or oral references to sexual conduct, gossip regarding one's sex life, comments about an individual's body, comments about an individual's sexual activity, deficiencies, or prowess;
- Displaying sexually suggestive objects, pictures, or cartoons;
- Unwelcome leering, whistling, brushing up against the body, sexual gestures, or suggestive or insulting comments;
- Inquiries into one's sexual experiences; *and*
- Discussion of one's sexual activities.

All employees should take special note that, as stated above, retaliation against an individual who has complained about sexual harassment and retaliation against individuals for cooperating with

an investigation of sexual harassment complaint is unlawful and will not be tolerated at Green & Healthy Homes Initiative.

Complaint Procedure. Any employee who believes he or she has been subject to or witnessed illegal discrimination, including sexual or other forms of unlawful harassment, is requested and encouraged to make a complaint. You may, but are not required to, complain first to the person you feel is discriminating against or harassing you. You may complain directly to your immediate supervisor or department manager, Human Resources, or any other member of management with whom you feel comfortable bringing such a complaint. Similarly, if you observe acts of discrimination toward or harassment of another employee, you are requested and encouraged to report this to one of the individuals listed above.

No reprisal, retaliation, or other adverse action will be taken against an employee for making a complaint or report of discrimination or harassment or for assisting in the investigation of any such complaint or report. Any suspected retaliation or intimidation should be reported immediately to one of the persons identified above.

All complaints will be investigated promptly and, to the extent possible, with regard for confidentiality.

If the investigation confirms conduct contrary to this policy has occurred, Green & Healthy Homes Initiative will take immediate, appropriate, corrective action, up to and including immediate termination.

ED_016126_00000884-00006

Green & Healthy Homes Initiative, Inc.
Employee Grievance Policy -
2018 GHHI Employee Handbook

Section 403 Employee Concerns: Mediation Process

An employee who has a concern should attempt to resolve it informally with the individual before filing an official complaint. If the issue cannot be resolved on an informal basis, the employee shall commit the complaint to writing, providing as much detail and documentation as possible. The formal complaint shall be submitted to the employee's immediate supervisor.

Green & Healthy Homes Initiative will endeavor to resolve the complaint within seventy-two (72) hours of receipt, excluding weekends and holidays. A decision will be made on the merit of the complaint and a written response will be provided to the employee(s) involved, with a copy placed in the employee(s) personnel file(s). The decision of management is final.

If an employee has a complaint with the President and cannot resolve the issue on an informal basis, he/she may file the complaint in writing. A copy of this complaint shall be forwarded to the President, the Chief Operating Officer, the Human Resources, and President of the Board of Directors. The President of the Board of Directors shall endeavor to review the complaint within seventy-two (72) hours of receipt excluding weekends and holidays. If the Board President concludes that the complaint has no merit, the decision and reasons shall be reduced to writing and provided to the employee. A copy of the decision will be placed in the employee's personnel file.

If the Board President finds that the complaint may have merit, a meeting to discuss the issue involving the complaint and the President will be held. Following the meeting the Board President shall render a written decision, with copies provided to the employee, the President and the employee's personnel file. The decision of the Board President is final.

Green & Healthy Homes Initiative

Direct Services Client Grievance Policy

Staff at the Green & Healthy Homes Initiative ("GHHI") believes that a satisfied customer is the most important service we offer. However, we also recognize that disagreements and/or misunderstandings occur from time to time. To address these situations, GHHI has adopted the following procedure for addressing service-related concerns. Copies of this policy are available to all potential and actual clients. The procedures are as follows:

1. A client who wishes to make a complaint or who has a concern about the service he or she received from GHHI may do so by contacting the immediate supervisor of that employee. The name of the immediate supervisor may be obtained by contacting GHHI by telephone and requesting the name of the supervisor. Home phone numbers and addresses will not be provided.

2. If a client has a complaint or concern about a GHHI service, the client is asked to state the exact nature of the complaint, so that the supervisor can investigate the matter. The complaint may be made over the telephone or in writing. If verbal, a copy of the Complaint Summary is provided to the Client for affirmation.

3. Upon receiving a complaint or notice of concern, the immediate supervisor will send the client a written notice using the Client General Complaint Form. This form will explain the complaint and how the immediate supervisor is addressing the complaint.

4. The immediate supervisor will attempt to resolve the client's complaint or concern by mediating any unresolved issues. If the mediation fails to resolve the matter, the immediate supervisor will conduct further investigation into the client's complaint or concern and take other measures to solve the situation. These measures may include, but are not limited to:

    - steps to address any fault or shortcoming of the employee's services for the client;
    - solving the problem by providing additional services to the client;
    - other measures as deemed appropriate by the immediate supervisor.

    The suggested problem solving solution shall be given to the client in writing.

ED_016126_00000884-00009

5. If the immediate supervisor cannot address the complaint or concern that satisfies all parties, the client can request that the Program Manager, Program Area Vice President, or President and CEO address the problem – in protocol order.

6. After a proper review, the appropriate GHHI official will make the decision regarding the complaint or concern listed in step 4 of this policy and file this response with the Human Resources Office and President and CEO.

7. At each stage of this complaint/concern resolution every effort will be made to resolve the issue by all parties trying to work out the problem together. When appropriate and necessary, actions regarding the employee in question may be taken.

8. This policy is designed to promote quick and fair problem solving when they may arise between clients and staff by GHHI staff in the interest of providing high-quality services.

Ex. 6 Personal Privacy (PP)
Green & Healthy Homes Initiative, 2714 Hudson Street, Baltimore, Maryland 21224
Ex. 6 Personal Privacy (PP) ranorton@ghhi.org www.ghhi.org

Education University of North Carolina - Chapel Hill *BA Economics - Graduated, 1983*

Ex. 6 Personal Privacy (PP) serves as the President and CEO of the Green & Healthy Homes Initiative ("GHHI"). She is the chief strategist for public policy, program design, and development for the organization. An expert on lead poisoning prevention, healthy housing and the intersection of climate, energy and health, she directs GHHI's national strategy, policy framework and services to integrate climate, healthcare and healthy housing as a platform for improved health, economic, educational and social outcomes for low-income communities. A noted national expert on building community capacity and effective work plans to incorporate sound environmental health standards in housing-related programs, Ex. 6 Personal Privacy (PP) serves as an Advisor to government agencies, non-profit organizations, and national foundations. She has been engaged with the development, project design and technical assistance for federal, state and privately funded lead and healthy homes programs and local housing intervention programs with an aggregate value of over $500 million.

She serves as a technical advisor to over 75 cities, counties and states and healthcare entities on how to blend complimentary healthy homes, lead and energy efficiency programs to maximize outcomes as well as how to effectively engage impacted communities for a triple net benefit of better housing and health outcomes for children, and higher quality employment opportunities. Ex. 6 Personal Privacy (PP) has been credited by Maryland's Governor as the architect of the state's Lead Poisoning Prevention Program that has resulted in a 99% reduction in childhood lead poisoning in the State of Maryland and in Baltimore City. One of the nation's leading experts on healthy housing, she has served as the primary author of 49 pieces of enacted lead poisoning prevention and healthy housing legislation.

In partnership with the Council on Foundations, the U.S. Department of Housing and Urban Development, the U.S. Centers for Disease Control and Prevention, the U.S. Department of Energy and the U.S. Conference of Mayors, Ex. 6 Personal Privacy (PP) designed the national Green & Healthy Homes Initiative to cost effectively integrate energy efficiency and weatherization investments with lead hazard control and health and safety efforts. She serves as an advisor to Governors and Mayors on the GHHI integrated model and directs GHHI's groundbreaking work across the United States where partnering cities, counties, states and non-profit organizations are using housing and innovative healthcare financing as a platform for improved health, education and social outcomes. GHHI's work helped to produce 597,000 green and healthy homes integrated housing interventions in low income communities in partnership with HUD from 2010-2016.

In 2014, Ex. 6 Personal Privacy (PP) led GHHI's entry into the Social Impact Bond/Pay for Success field to advance social impact financing and demonstrate health and other benefits of energy efficiency improvements to create models for Medicaid reimbursement. Her work on the health and cost benefit analysis led to GHHI's leadership role in examining the use of Social Impact Bonds (Pay for Success transactions), value-based payments and other innovative healthcare investments currently in multiple jurisdictions to help scale evidenced-based interventions to create healthy, safe and energy efficient housing. She has lead GHHI's efforts to develop the program models that have produced health care sector investments in lead, asthma and household injury prevention services. She has helped develop the business case and supported the approval by the Centers for Medicaid Services of Medicaid reimbursement for asthma trigger and lead hazard reduction interventions that have been successfully approved in a number of states. She co-authored *Pay For Success for Lead Poisoning Prevention* which examines the cost-benefit analysis justification and economic modeling support for health sector investments in lead poisoning prevention and hazard remediation. She worked with the Maryland Department of Health and State Medicaid to develop the original $14.4 million Healthy Homes for Healthy Kids Program in Maryland that has funded lead inspections, lead hazard reduction and preventive asthma services through CHIP/Medicaid funding.

She provides a leading voice on climate and equity and to articulate the significant health and social benefits of energy efficiency investments through her senior advisory role with Energy Efficiency for All

ED_016126_00000887-00001

(EEFA)(NRDC, Elevate Energy, NHT, Energy Foundation and ENI). She has authored several publications on energy equity including the recent *Leading with Equity and Justice in the Clean Energy Transition.* Ex. 6 Personal Privacy (PP) is also currently spearheading GHHI's work in the development and implementation of decarbonization, electrification and climate change mitigation services for low income households. She lead the organization's partnership with DOE and NASCSP on the WAP Weatherization Plus Health national initiative to improve safe practices and foster the greater integration of weatherization and healthy homes interventions. In 2010, she drafted the *Identified Barriers and Opportunities to Make Housing Green and Healthy Through Weatherization Report* for the White House that highlighted the need to reduce WAP Program deferral rates and detailed the opportunities for greater cross sector collaboration.

Ex. 6 Personal Privacy (PP) serves as a member of the EPA Children's Health Protection Advisory Committee and as a federally appointed Liaison Member to the CDC's Lead Exposure and Prevention Advisory Committee (LEPAC). Ex. 6 Personal Privacy (PP) serves as Chair of the Maryland Lead Poisoning Prevention Commission, and as a member of the Ohio Asthma Council and the National Council of State Housing Agencies' National Advisory Group. She currently serves or has served as a board member of Groundswell, a member of the National Council of State Housing Agencies, a member of the APHA Environmental Leadership Network, as a technical advisor to the National League of Cities, as an expert panel member for HUD's Healthy Homes Guidance Manual and as a member of Johns Hopkins Bloomberg School of Public Health Center For Population Health Information Technology Advisory Board. She served as a member of the National Advisory Group on the Executive Committee of the Maryland Asthma Control Council, the Maryland State Innovation Model Local Health Improvement Coalition Stakeholder Group, Maryland's Workgroup for Workforce Development for Community Health Workers and the Maryland Medicaid Advisory Committee. She was one of ten founders and serves on the steering committee for Network Energy Water and Health in Affordable Housing (NEWHAB) and is a Technical Advisor for the National Environmental Health Association in the area of Healthy Homes and Housing.

Ex. 6 Personal Privacy (PP) a Robert Wood Johnson Foundation Community Health Leader (2005) and a Weinberg Foundation Fellow (2003), was named as one of Maryland's Top 100 Women by The Daily Record and in 2016, she received the Tony Woods Award from the Building Performance Industry for her contributions to increasing cross sector collaboration of health and energy sectors.

Examples of other National Professional contributions include:

- In 2021, GHHI launched a groundbreaking partnership with the ProMedica National Social Determinants of Health Institute to improve the health of individuals and communities by enhancing the safety and energy efficiency of 7,000 homes in the cities of Baltimore, Chicago, Cleveland, Detroit, Philadelphia, Pittsburgh and Toledo. This transformative initiative represents the inaugural investment of $100 million of ProMedica Impact Fund supported funding, a bold commitment to raise and leverage $1 billion to transform how healthcare is defined, delivered and funded by demonstrating the connection between social needs interventions, health outcomes and healthcare costs.
- In 2021, GHHI led the final development and closing on the nation's first outcomes-based financing arrangement with a Medicaid health plan (Affinity by Molina) as the end payer. The $4.75 million project, called the New York Healthy Homes Collaborative, will provide comprehensive home-based asthma services including home repairs to 850 high risk members of Affinity by Molina's Medicaid plan. The initial investment comes from Northern Trust and GHHI (through funding from The JPB Foundation). Services will launch in 2022 and continue for a total of four years. After each year, Affinity by Molina will be making a payment based on the reduction in total cost of care for their members enrolled in the program, until the initial investment is paid back.
- In 2021, GHHI worked with Penn Medicine's Lancaster General Hospital (LGH) to develop and operationalize its $50 million investment in residential lead remediation and equity-driven lead and healthy homes workforce development in coordination with other housing, health and energy initiatives in Lancaster County, PA. The project is focused on ending lead poisoning in Lancaster County and this substantial funding commitment will set the standard for anchor healthcare institutions seeking to invest in housing as a means of improving the trajectory of young children and supporting economic

ED_016126_00000887-00002

opportunity at the community level. The project will remediate lead hazards in 2,800 homes and GHHI has also assisted in bringing federal healthy homes funding to leverage with LG Health's investment.

- In 2020, Ex. 6 Personal Privacy (PP) helped GHHI and its partner sites nationally develop COVID-19 response protocols and safe practices and provide training nationally to enable local service providers to continue serving low income families and seniors by providing in-person and remote resident education, housing assessment and housing interventions. GHHI developed the Virtual Healthy Homes Toolkit of operational protocols, policies and best practices for how to use virtual technologies to conduct resident education, environmental assessment and hazard remediation services as well as data collection.

- In 2019-2020, Ex. 6 Personal Privacy (PP) continued to catalyze the development of funding solutions at scale to address the social determinants of health. She provided technical assistance to the State of Michigan Department of Health and Human Services in the development of its planned Lead Poisoning Prevention Fund that has a target goal of $750 million and which has received $2 million in initial state funding to establish the Fund.

- In 2018, Ex. 6 Personal Privacy (PP) was an author of the *New Jersey Lead Poisoning Prevention Action Plan* that provides a framework of comprehensive action steps that can be taken by local and state agencies and other prevention partners to fully eliminate childhood lead poisoning in the state. Similar Lead Poisoning Prevention Action Plans that offer leading recommendations, policy reforms and program models that Ex. 6 Personal Privacy (PP) has helped draft include: 2018 City of Buffalo Action Plan - *Renewing Our Pledge: A Path to Ending Lead Poisoning of Buffalo's Most Vulnerable Citizens,* 2018 *Get The Lead Out: The Greater Syracuse Lead Poisoning Prevention Action Plan*, the 2013 *Strategic Action Plan for the Elimination of Childhood Lead Poisoning in the City of Lewiston* and the *Lead Safe St. Louis Comprehensive Action Plan*.

- Ex. 6 Personal Privacy (PP) has been a national leader in advancing environmental justice, racial and health equity and social justice for disadvantaged and underserved communities. In 2018, Ex. 6 Personal Privacy (PP) was awarded the WE ACT Environmental and Social Justice Award for her work in reducing childhood lead poisoning and asthma episodes in low income communities across the country. Ex. 6 Personal Privacy (PP) is an advisor to Black Millennials 4 Flint and an annual lecturer on environmental justice and health equity at the Morgan State University School of Community Health and Policy and the Johns Hopkins Bloomberg School of Public Health. She worked to establish the Andrea Kidd Taylor Environmental Health Endowed Fund at Morgan State University to advance racial equity and combat health disparities through environmental health.

- In 2016, Ex. 6 Personal Privacy (PP) helped lead the renewed effort to more aggressively focus on lead poisoning prevention and establishing more substantial lead poisoning elimination strategies including the major convening of 250 bipartisan national and local stakeholders at the National Lead Summit in Washington, DC in December 2016. She led the development of GHHI's multi-pronged National Lead Campaign that brings together public and private partners at the national and municipal level to ignite a national movement to eradicate lead poisoning. She was the author of GHHI's 2016 *Strategic Plan to End Childhood Lead Poisoning - A Blueprint For Action* that outlines federal and local policy recommendations and also served on or participated in a number of other lead roundtables and strategic plan working groups including: Pew Foundation and Robert Wood Johnson Foundation Health Impact Project, Find It Fund It Fix It Action Plan, Lead Summit White Papers, Earth Justice Plan of Action, and EPA Lead and Water panel.

- Ex. 6 Personal Privacy (PP) and GHHI are one of the preeminent organizations in the country having provided technical assistance on the development of lead poisoning and healthy homes programs and asthma Pay For Success and innovative healthcare financing projects to 75 jurisdictions across the country. With over $4.63 million in funding support from the Robert Wood Johnson Foundation and the Corporation for National and Community Service/White House Social Innovation Fund since 2015, Ex. 6 Personal Privacy (PP) has lead a cohort of asthma and injury PFS feasibility studies and transaction structuring projects with healthcare organizations and housing service providers including among others: Baltimore, MD, Buffalo, NY, Chattanooga, TN, Chicago, IL, Grand Rapids, MI, Houston, TX, Memphis, TN, New York City, NY,

Philadelphia, PA, Richmond, VA, Salt Lake, UT, Springfield, MA, and State of Rhode Island.

- Worked with the Federal Interagency Healthy Homes Workgroup to develop the *Advancing Healthy Housing – A Strategy for Action*. The Plan, published in February 2013, provides a framework to establish and encourage the adoption of federally-recognized criteria for Healthy Homes and for federal agencies to develop consensus on the basic concept of a healthy home – including adoption of GHHI standards and practices.

- Ex. 6 Personal Privacy (PP) worked with the Baltimore City Housing Authority to create the nation's first and only Lead Preference Housing Choice Voucher Program that provides 250 Vouchers to lead affected families to relocate permanently from lead hazardous housing to lead certified housing.

- In 2009, Ex. 6 Personal Privacy (PP) was called on to help launch the Surgeon General's Call to Action for Healthy Homes and provided expert input on the CDC's determination of health-based housing interventions that yield direct health improvements.

- In 2008, Ex. 6 Personal Privacy (PP) presented on behalf of GHHI, HUD and the EPA, a successful application to the Ad Council that resulted in a $32 million national lead poisoning awareness campaign that also developed a national call in center and the website Leadfreekids.org.

- In January 2000, Ex. 6 Personal Privacy (PP) wrote *Windows of Opportunity – A Comprehensive Action Plan to Eliminate Lead Poisoning in Maryland* which lead to $33.6 million in new lead abatement and enforcement funds primarily focused on the City of Baltimore.

- In 1999, Ex. 6 Personal Privacy (PP) developed the nation's first full service community-based Healthy Homes programs, expanding GHHI's services to address a full complement of home-based environmental health hazards beyond lead. This Healthy Homes initiative provided lead hazard reduction, indoor allergen, and safety interventions for pregnant mothers in at risk communities and full Healthy Homes interventions to reduce environmental health hazards and document the interventions through a rigorous data collection and evidenced-based practice system.

Ex. 6 Personal Privacy (PP) has been instrumental in designing best practice programs and developing innovative GHHI models with its sites and partners that have been nationally recognized including among other organizational awards: 2022 HUD Secretary's Award for Healthy Homes, 2018 HUD Secretary's Healthy Homes Award; 2018 ACEEE Health and Energy Linked Programs (HELP) Award; GHHI is one of the primary partners in the Baltimore Housing Upgrades to Benefit Seniors (HUBS) Program that was recognized by the Harry and Jeanette Weinberg Foundation and the HUBS partners' receipt of the 2018 HUD Secretary's Award for Public-Philanthropic Partnerships; 2015 EPA National Environmental Leadership in Asthma Management Award, and the 2011 HUD National Partnership Award.

Publications and Research

In 2021, Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) that outlines strategies to advance a just transition to clean energy in residential buildings, with a focus on advancing racial and health equity. She is co-author of a 2020 publication in the Yale University Journal of Health Policy, Law and Ethics entitled *Health Justice Strategies to Eradicate Lead Poisoning: An Urgent Call To Action To Safeguard Future Generations* that provides guidance and insights on best practice lead poisoning prevention policies. In 2019, she co-authored *Duty to*

ED_016126_00000887-00005

Protect: Enhancing the Federal Framework to Prevent Childhood Lead Poisoning and Exposure to Environmental Harm in the Yale University Journal of Health Policy, Law and Ethics that includes recommendations on actions to improve the federal response to lead poisoning. In 2019, Ex. 6 Personal Privacy (PP) authored a paper on cross sector collaboration entitled Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) She has been a contributing author on numerous papers examining the business and program models for innovative healthcare financing including the use of Medicaid funding for preventive services in articles such as: *Value-Based Payments Within Medicaid and Medicare: How to Pay for What Works in Public Health; State Playbook: Pay for Success Financing, How to Use Innovative Financing to Fund Innovation in Medicaid Value-Based Purchasing Programs;* and *Developing Sustainable Financing Models to Scale Aging-in-Place Programs.*

Ex. 6 Personal Privacy (PP) is a national thought leader to promote the cross sector, integrated green and healthy homes model and in her research papers supporting the benefits of greater investments in lead hazard reduction and healthy homes by the energy and health sectors among others in publications including: Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP) served as Principal Investigator or Co-Principal Investigator on multiple HUD funded research projects and has managed the IRB process on numerous GHHI projects that have been approved and overseen regularly by the State of Maryland Department of Health, Johns Hopkins University, University of Maryland Baltimore County and other university Internal Review Boards. In 2014, Ex. 6 Personal Privacy (PP) published Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) in the journal Environmental Justice which detailed research conducted by GHHI and Morgan State University School of Community Health and Policy on the GHHI Baltimore model and its demonstrated results in substantially reducing asthma related hospitalizations, ER visits, missed school days and missed work days for a cohort of families and children in Baltimore City.

She serves as Co-Principal Investigator on a $999,871 HUD 2020 Healthy Homes Technical Studies Grant with the Johns Hopkins Bloomberg School of Public Health's Center for Injury Research and Policy that will research the use of a new Child Housing Assessment for a Safe Environment (CHASE) Tool and various injury prevention remediation measures in 300 homes in Baltimore City. Ex. 6 Personal Privacy (PP) oversees GHHI's research team on a NASA funded Equity and Environmental Justice grant that is researching and conducting data analysis on climate change impacts on urban environments in the State of New York in partnership with Yale University as part of the Identifying Temperature Disparities, Energy Insecurities and Social Vulnerability for Energy Justice in New York State Project. She served as Co-Principal Investigator on a $750,000 HUD Healthy Homes Technical Studies Grant with the University of Maryland Baltimore County's Hilltop Institute that researched the GHHI Baltimore integrated service delivery model's impact on asthma outcomes, Medicaid costs, school attendance, and energy consumption and costs among other indicators through Medicaid claims data, school attendance records and other records. She has served as a researcher and/or investigator on HUD's HB760 study of the Maryland Reduction of Lead Risk in Housing Law and several HUD Lead Technical Studies Grants. Ex. 6 Personal Privacy (PP) has served as a co-coordinator for the State of Connecticut's Green and Healthy Homes Project's feasibility research and oversaw GHHI claims data analysis of HUSKY Medicaid claims data in 2019 of three years of patient data to quantify the expected return on investment for DSS HUSKY's investments in preventive services for asthma, household injury and older adult falls for Medicaid patients.

Ex. 6 Personal Privacy (PP) has extensive experience with PHI usage, HIPAA requirements, Data Use Agreements, and privacy agreements as well as with AWS and similar claims data access systems. She has received training on HIPAA and the HITRUST process and standards, and specific training on Protecting Human Research Participants. As President and CEO of GHHI, she is responsible for insuring compliance with HIPPA compliance for all of the organization's research and Direct Service Programs for clients receiving services.

EXPERIENCE

4/23-Present **GREEN & HEALTHY HOMES INITIATIVE** Providence, RI
Vice President of State and Local Strategic Services

- Manage GHHI's site development and technical assistance projects
- Oversee site development assistance on program management and implementation of the innovative GHHI model currently to Green & Healthy Homes Initiative designated and onboarding sites across the country.
- Provide technical assistance in the development of cross sector green and healthy homes statewide projects where innovate, sustainable healthcare financing is being with states including Connecticut and New York on Provide technical assistance on Lead Poisoning Prevention and Healthy Homes Programs and the development of Lead Action Plans and strategies under contracts with government agencies across the country.

10/14- 4/2023 **C3 COMMUNITY SOLUTIONS, INC.** Providence, RI
President and Founder

- Established C3 Community Solutions to provide consulting services to public, non-profit, and philanthropic clients to strengthen organizations and design, fund and implement innovative economic and workforce development, affordable housing, education, and community-based initiatives to create better futures for low and moderate-income families nationally and in Rhode Island. Selected projects include:
  - *Annie E. Casey Foundation*: Grant writing, planning, and early implementation services to establish the Annie E. Casey Foundation's 5-year, $24 million Learn and Earn to Achieve Potential (LEAP) Social Innovation Fund Program. Lead by a national partnership that includes MDRC, AECF, Jobs for the Future, and Jobs for America's Graduates, LEAP is a national initiative to demonstrate how youth involved in child welfare and juvenile justice systems can successfully attain post-secondary credentials in 10 sites around the country.
  - *Comprehensive Community Action Program*: Facilitation, planning, and grant writing to win a Federal Reserve Bank of Boston Working Cities Challenge grant award to establish One Cranston, a 10-year collective impact initiative in Cranston, RI to increase social cohesion and address economic and racial disparities in employment and education.
  - *Housing Network of Rhode Island:* Management, planning, facilitation, grant writing, legislative advocacy and other services to strengthen the organization as its Board of Directors navigated an executive transition and on-ramped a new Executive Director. Raised over $1.3 million from multiple sources to deploy and demonstrate a statewide tenant education/eviction prevention initiative designed to reduce provider costs and to launch a new collective impact effort, now called Homes RI, to increase the supply of affordable housing in Rhode Island.
  - *Rhode Island Coalition to End Homelessness:* Served as Interim Administrator and worked closely with the Board of Directors, staff, funders, partner organizations and others to guide the organization through an unexpected and challenging executive transition, preserving the organization's status as a key asset in the State of Rhode Island's Continuum of Care. Retained to develop a new strategic plan.
  - *Rhode Island Department of Human Services:* Planning and grant writing services to submit a $6 million proposal to the US Department of Agriculture seeking to establish a Supplemental Nutrition Assistance Program Employment and Training pilot in Rhode Island to demonstrate an innovative transitional jobs program in the State's Healthcare, Hospitality, and Retail sectors.
  - *West Elmwood Housing Development Corporation:* Facilitation, planning, and grant writing to establish Dunamis Synergy, a "two-generation" collective impact initiative to support parents to successfully secure post-secondary credentials and prepare their children to enter kindergarten healthy and prepared to succeed in school. Secured over $2 million in federal and private funding to launch the initiative. Planned and developed a successful proposal to establish a new

Health Equity Zone in Providence's 02907 zip code. Secured agency designation as a Rhode to Equity site to address disparities in asthma prevalence between the 02907 zip code and more affluent areas of the City of Providence by deploying community health workers, mitigating housing related asthma triggers, and air quality monitoring, among other strategies.

- *Newport Partnership for Families:* Strategic planning and facilitation to strengthen the organization following the unexpected and sudden departure of the Executive Director.
- *Rhode Island College:* Worked with the President and the College's Executive Team to lay the groundwork for the College's next 5 year strategic plan. Transitioned to emergency operational planning at the beginning of the COVID-19 pandemic.

ED_016126_00000887-00008

9/12-9/14 **COMMUNITY WORKS RHODE ISLAND (CWRI)** Providence, RI

Executive Director

- Responsible for the management of CWRI, a South Providence based NeighborWorks America chartered Community Development Corporation, and its lines of business, including real estate development, homeownership, foreclosure counseling, asset management, and community building.
- Worked with Board of Directors, local and national funders, and community partners to lead the organization though a significant fiscal crisis.
- Secured public and private grants, donations, subsidy, and real estate financing from multiple sources to stabilize the organization and achieve programmatic obligations.
- Engaged in substantial portfolio and organizational strengthening to significantly reduce vacancy rates within CWRI's residential and commercial real estate portfolios.
- Negotiated multiple workouts with financial partners to improve CWRI's balance sheet.
- Initiated and implemented a merger agreement with the Olneyville Housing Corporation, creating ONE Neighborhood Builders.

7/10-8/12 **COALITION TO END CHILDHOOD LEAD POISONING** Providence, RI

Senior Project Officer, Green and Healthy Homes (GHHI)

- Supported establishment of GHHI project sites in Providence RI, New Haven CT, Buffalo NY, Oakland CA, and Philadelphia PA as part of an innovative national demonstration to make homes in low income communities more energy efficient, healthier, and safer for children and their families.
- Implemented workforce development strategies to train contractors, community members and incumbent employees in construction and healthcare sectors to efficiently implement the initiative.
- Developed and managed resources as required to ensure the success of the initiative, both nationally and in designated project sites, including management of a $3 million Open Society Foundation grant to train and place 1400 low skilled workers into "Green Sector" jobs. Over two years assembled more than $5 million in public and private funding commitments for the Providence demonstration.
- Established and managed a Providence office to support implementation of the national initiative and to provide technical assistance to Northeastern demonstration sites.

2/08-6/10 **CITY OF PROVIDENCE, OFFICE OF MAYOR DAVID CICILLINE** Providence, RI

Director, Pathways to Opportunity

- With support from the Annie E. Casey Foundation, established a new initiative within a fast paced, changing, and political environment to implement strategies to increase economic opportunity.
- Successfully competed against over 1000 applicants to become one of 30 organizations to secure a $2.4 million "Pathways out of Poverty" Green Jobs grant from the US Department of Labor to place low skilled residents into green sector jobs.
- Created and funded programs that resulted in 316 job placements, 51 prevented foreclosures, $2.8 million in tax refunds and $1.5 million in tax credits to low income working families, exceeding targets.
- Lead effort to establish a Supplemental Nutrition Assistance Program-Employment and Training initiative in RI to support the creation of the State's Centers for Working Families.
- Developed and monitored performance measures to ensure quarterly progress towards targets and goals.

1/03-2/08 **MAKING CONNECTIONS PROVIDENCE, ANNIE E. CASEY FOUNDATION** Providence, RI

Director, Family Economic Success Initiatives (2006-2008)

- With resources from the Annie E. Casey Foundation, established a grant portfolio to advance strategies designed to increase economic security among low income Providence families.
- Established program initiatives that resulted in 480 job placements in targeted industries and over $4.7 million in tax refunds and $2.6 million in tax credits to low income families.
- Secured legislation requiring the State of Rhode Island to employ a federal funding mechanism that resulted in at least $1.5 million per year in new workforce training resources. Seeded policy work that led to legislation increasing state funding for adult education by $2.6 million.
- Established and built support for defined, measureable standards of performance against which partners and management could regularly be held accountable.

ED_016126_00000887-00009

Coordinator, Providence Local Learning Partnership (2003-2006)

- Managed staff and resources to provide planning, evaluation, and research related services, including local coordination of a longitudinal study of 1,500 Rhode Island residents.
- Led qualitative and quantitative research to inform planning, goal setting, and evaluation of investments.

6/95-11/02 **SEATTLE HOUSING AUTHORITY** Seattle, WA

Manager, HOPE VI Community and Supportive Services (1999-2002)

- Managed over $3 million in foundation and government grants and directed a diverse 20-member multidisciplinary staff to plan and implement key components of two large public housing redevelopment projects involving the construction of over 2,000 new housing units.
- Led economic development and human services initiatives, managed budgets, procured and monitored contractors, and facilitated multi-agency task forces.

Director, Jobs Plus Demonstration (1995-1999)

- Raised over $2 million from diverse sources to implement the Jobs Plus initiative to transition public housing residents from public assistance to sustainable employment. Attained significant outcomes including over 100 job placements per year that resulted in a 300% increase in employment over three years and an average annual increase of over 20% in participating household's incomes.

ASSOCIATIONS, COMMITTEES & AWARDS

CURRENT AND PAST VOLUNTEER ASSOCIATIONS AND COMMITTEES:

San Miguel School-Board Member, Secretary: The San Miguel School is a private, independent Lasallian middle school for boys from the Providence area that is dedicated to the belief that education is the key to breaking the cycle of poverty.

Housing Network of RI Board of Directors-Secretary: The Network is RI's association of non-profit community development corporations/affordable housing developers and promotes public awareness and policies that address Rhode Island's housing and community economic development needs.

Building Futures Advisory Council: Building Futures helps the commercial construction industry meet its current and future needs for a well-trained workforce and creates career opportunities for low-income urban residents through established building trades apprenticeship programs.

Cities for Financial Empowerment: CFE is an association of 13 Cities seeking to leverage their municipal influence to increase the financial assets and economic well-being of their residents.

Stepping Up Advisory Committee: The Stepping Up Advisory Committee is comprised of labor leaders, management, community partners, funders, and institutions of higher education to develop career pathways for low income, low skilled Providence residents and incumbent workers within the healthcare industry.

RI Welcome Back Center Fundraising Committee-Chairperson: Responsible for securing financing to support the operations of the RI Welcome Back Center, which re-credentials foreign trained immigrant healthcare workers seeking to pursue their chosen professions in the US.

AWARDS:

Recognized as a Friend of the Network by the Housing Network of Rhode Island for work to establish the Homes RI initiative. Inducted into Young Voices Founder Society to recognize sustained commitment to the organization as it empowers low income youth to become confident civic leaders in their communities; RI Senate Citation offering Special Recognition as a RI Welcome Back Center Founding Partner; Best Practices Award from the U.S. Department of Housing and Urban Development and Individual Singular Achievement Award from the American Society of Public Administration, both for implementation of the Jobs Plus Demonstration.

Ex. 6 Personal Privacy (PP)

Current Position

Director, State and Local Strategic Services, *Green & Healthy Homes Initiative* Jun. 2022 – present

Build network of partners across housing, health and energy sectors to lead organization's work to create and disseminate capacity building resources for jurisdictions implementing GHHI's model to align, braid, and coordinate housing repair programs to reduce home health hazards and energy cost burdens.

- Manage ongoing programs in Mississippi to deliver services for lead hazard control, asthma management, and energy efficiency; engaging 75 housing program clients per year and building capacity statewide for healthy housing repair program grants management and service implementation.
- Identify and provide writing and research support for federal and philanthropic grant opportunities, both internally and for external partners on a contractual basis; and provide cross-team support for organizational research projects in healthy homes, energy efficiency and building decarbonization sectors.
- Produce and disseminate educational content and strategic communications to the national network of GHHI partners and represent GHHI on national and regional coalitions advancing equity in access to healthy, safe, efficient and decarbonized housing.

Previous Positions

Senior Site Engagement Specialist Jan. 2019 – Jun. 2022

- Collaborated with over 30 GHHI Site Coordinators to provide technical assistance to support planning, network building, and project administration using GHHI's model to align, braid, and coordinate housing repair programs to reduce home health hazards.
- Delivered trainings and presentations to diverse audiences (average 10 per year) to expand awareness of housing-related health hazards, health and economic outcomes of housing interventions, and resources to build community strategies to coordinate housing repair resources.

Outcome Broker Oct. 2014 – Dec. 2018

- Led implementation of an integrated housing service delivery system for low and moderate income households by facilitating organizational partnerships, building capacity and providing technical assistance, and developing sustainable funding strategies for programs.
- Managed multi-agency partnership working to expand capacity of Jackson government, non-profit organizations and community groups to address home health hazards, including lead, asthma triggers, and serious injuries by leading training sessions, community outreach activities, and strategic visioning and goal setting events.

Relevant Experience

Housing & Community Development Director, *Midtown Partners, Inc.*
Jackson, MS July 2013 – Oct. 2014

Managed housing and neighborhood development programming for Jackson's Midtown neighborhood, including rental property management, homeownership support, land bank management and property acquisition, and other land use planning and development projects. Responsible for facilitating community meetings to discuss community development proposals.

- Responsible for management and oversight of 48 land parcels and 6 rental properties.
- Administered grant-funded housing development projects valued at almost $10 million annually (Federal Home Loan Bank, HUD, Low Income Housing Tax Credit funds).

Special Projects Officer, *Office of the Mayor, City of Jackson, MS*

-more-

Phone: Ex. 6 - Personal Privacy (PP) | **Email:** clee@ghhi.org | **LinkedIn**: Ex. 6 Personal Privacy (PP)

Jackson, MS Nov. 2011 – June 2013

Supported staff for Mayor Redacted and Chief of Staff/Assistant Chief Administrative Officer; coordinated various projects and initiatives requiring collaboration among administrative departments, led specialized research projects to update public policy priorities and produce economic development strategic plans. Special Projects included City of Jackson Civil Rights Driving Tour, EPA Greening America's Capitals program, policy initiatives for annual budget, estimated economic impact of tax-exempt property in Jackson, public art funding policies, strategic demolition plan for Office of Community Improvement, and the administration's Environmental Sustainability Plan.

Education

Jackson State University Jackson, MS Aug. 2009 – Dec. 2011
Master of Arts, Department of Urban and Regional Planning
Concentration area in Community Development and Housing; focuses of study were in sustainable transportation and land use development, disaster planning, and housing policy analysis.
Thesis Topic: "The Land Use/Transportation Connection: Applying Sustainability Discourse to Transportation System Policies"

University of Tampa Tampa, FL Aug. 2001 – Dec. 2004
Bachelor of Arts, Communication
Coursework focused on critical film studies and graphic design; additional honors coursework concentrated in American Government.

Employment

GREEN & HEALTHY HOMES INITIATIVE (GHHI) *2010 - PRESENT*

Senior Vice President of National Programs

Heading up advocacy, policy analysis, and work on innovative financing and partnerships at GHHI, a national organization with the mission of breaking the link between unhealthy housing and unhealthy families. As the head of national programs, leads projects around the country that are collaborations that include healthy homes and energy efficiency providers, healthcare payers, and healthcare providers, utilizing the impact that housing has on health outcomes as a new funding source for home repair services. He has focused on reimbursement for healthy homes interventions from Medicaid and other health care payers and the return on investment of education and environmental control in combatting asthma, falls, and home-based injuries. He also takes the lessons learned on the ground and formulates policy recommendations or identifies best practices to take to scale. His portfolio includes over thirty projects advancing innovative partnerships with healthcare and social service providers, including some of the first housing programs to be directly funded by a Medicaid managed care organization, and the first outcomes-based financing (pay for success) project with Medicaid as the outcomes payer. The technical assistance work includes asset and gap analysis, healthy homes program design, data analysis, cost-benefit analysis, evaluation design, pilot design, payment structure development, building cross-sector networks, and service delivery support.

Ex. 6 Personal Privacy (PP) advocacy work includes working at the local, state, and federal level on policies that address lead poisoning, asthma, home injuries, and energy efficiency. Ex. 6 Personal Privacy (PP) previously served as VP of Policy and Innovation, and Senior Project Officer on the implementation of the GHHI model, helping dozens of jurisdictions align resources related to lead, healthy homes, and weatherization services and working with HUD to expand the impact of integrated services, leading to 597,000 HUD-associated units receiving integrated interventions since 2010.

TIME SYSTEMS *2009 - 2010*

Lead Analyst

Designed a project management tool using Sharepoint to oversee a multi-million dollar construction project for a northern VA 501(c) organization. Designed and oversaw project schedule using Primavera software and dealt with project subcontractors in the areas of IT, wiring, security, interior design, A/V, and other areas. Also was the project lead in the design, programming, and facilitation of an information management tool for the Research Partnerships Group of the Federal Aviation Administration (FAA).

IBM *2006-2007*

Special Projects Analyst

Conducted billing research for the contracts section of the hardware maintenance division, and was placed as head of a small team of other analysts looking at various projects to optimize billing.

TERRY SANFORD INSTITUTE OF PUBLIC POLICY *2005 - 2006*

Teaching Assistant / Research Assistant

Teaching assistant and research assistant for courses in health policy. Aided Duke undergraduate students in formulating a community health assessment and plan for a health center in Durham. In another course aided in research and writing of articles on the history of American health policy.

PREFERRED NURSES *2002-2003*

Nursing Agent

Nursing agent in charge of marketing and registering new clients with the agency. Handled scheduling nursing clients, client records, receiving and shipping, marketing to area hospitals.

HOFFLUND / POLONE *2000-2001*

Executive Assistant

Executive assistant to a TV/Film producer and manager. In charge of the company script library and financial documents. He handled phones, receiving and shipping, travel arrangements, monetary deposits, scheduling, and client concerns. In addition, he evaluated scripts for development executives.

JOHNS HOPKINS HOSPITAL DEPARTMENT OF NEUROSCIENCE *1999*

Research Assistant

Research assistant under Dr. Benjamin S. Carson. Conducted follow-up interviews and processed and analyzed data for a study on an assistive device for the treatment of positional plagiocephaly. Work published in Journal of Craniofacial Surgery.

JOHNS HOPKINS UNIVERSITY SCHOOL OF PUBLIC HEALTH *1998-1999*

Research Assistant

Research assistant for a project in AIDS research at the Department of Microbiology and Molecular Immunology. Gave weekly reports during lab meetings and acquired knowledge of the cellular processes of HIV infection and the research and development of vaccines.

EXPERIENCE

GREEN & HEALTHY HOMES INITIATIVE | Baltimore, MD
Vice President of Communications | November 2022 – Present
Develops and implements an integrated strategic communications plan to advance GHHI's mission and brand identity, broaden awareness of its programs and priorities, and increase the visibility of its programs across local and national audiences. Oversees the development of all print communications materials and electronic communications including the GHHI website and social media channels.

MONTAGE MARKETING GROUP, LLC | Bethesda, MD and McLean, VA
Vice President, Marketing Communications | April 2021-November 2022
Led, developed, tracked, and oversaw comprehensive communications and marketing strategies across multiple internal and external stakeholders, including the Department of the Air Force, FEMA, NIH, and others. Drove the implementation of strategic marketing plan to enhance Montage's brand awareness, cultivate new business opportunities, and support the integration of diversity, equity, inclusion, and accessibility goals across the enterprise.

ST. JOHN'S EPISCOPAL CHURCH | Royal Oak, MI
Associate Rector | July 2017-April 2021
Co-led all operational, pastoral, and managerial functions of a large Episcopal church in Metro Detroit. Directed adult educational programming focused on progressive theological perspectives to address racism, champion LGBTQ inclusion, and promote intergenerational engagement. Co-directed the implementation of a $1 million capital campaign.

GREEN & HEALTHY HOMES INITIATIVE | Baltimore, MD
Director, Communications & Strategic Development | June 2011-December 2013
Developed and implemented an integrated communications strategy in support of the national launch of an environmental health advocacy organization serving children, families, and seniors in low-income households and communities. Cultivated relationships with philanthropic partners and federal agencies to generate financial and in-kind support. Launched an interactive website and cross-platform magazine, to drive awareness and knowledge sharing among key audiences.

OFFICE OF GOVERNOR JENNIFER M. GRANHOLM | Lansing, MI
Director, Economic Recovery Office | March 2009-December 2010
Directed and assessed the implementation of more than $18 billion in American Recovery and Reinvestment Act (ARRA) programs for the state of Michigan. Co-created organizational systems and processes to improve the effectiveness and efficiency of cross-departmental initiatives. Served as the key liaison between state and federal agencies and the White House.

MICHIGAN STATE UNIVERSITY | East Lansing, MI
Senior Manager, Executive Communications | August 2007-March 2009
Served as a trusted advisor and strategic thought partner for university leadership. Developed and implemented strategic communications initiatives, in collaboration with VP of University Relations, General Counsel, and VP of Governmental Affairs. Crafted institutional responses to issues demanding executive- level intervention, often in real time.

FIRST BOOK | Washington, DC
Vice President, Communications | May 2006-August 2007
Developed and executed the communications strategy and brand marketing efforts for a national literacy nonprofit. Coordinated public relations and media outreach for industry-leading cause marketing campaigns with corporate, publishing, government, and nonprofit partners.

BORDERS GROUP, INC. | Ann Arbor, MI and Columbus, OH | April 1989-May 2006

Public Relations Manager

Fostered relationships with trade media contacts to maximize earned media exposure. Developed strategic partnerships with CARE and First Book to drive awareness and generate funds.

Manager of Training

Led a $1.5 million employee training program for 17,000 employees in 300+ retail locations.

General Manager

Managed all aspects of retail bookstore generating $6.5 million in annual revenue.

EDUCATION

VIRGINIA THEOLOGICAL SEMINARY | Alexandria, VA | Master of Divinity

MICHIGAN STATE UNIVERSITY | East Lansing, MI | Bachelor of Arts

OTHER

EPISCOPAL DIOCESE OF MICHIGAN | Detroit, MI

Chair, Diversity and Inclusion Task Force | August 2017-December 2019

In collaboration and consultation with the Bishop of Michigan, led the efforts of the Diversity and Inclusion Task Force to further the equity and reconciliation goals of the Diocese. Created and delivered training programs for parishes and Deaneries; developed and led D&I program for annual convention that included training opportunities and panel discussion during general session.

STREET REACH | Grand Rapids, MI

Street Chaplain | June 2016-August 2016

Served as a chaplain to homeless individuals and those living in local shelters who had co-occurring mental illness and addiction disorders. Visited makeshift camps to check on safety and well-being of residents; and provided guidance related to housing, health, and food programs.

WASHINGTON, DC JAIL | Washington, DC

Volunteer | 2014-2017

Co-led conversation-based programs with men serving in the re-entry unit of the Washington, DC jail. Served as a volunteer chaplain to men housed in the "status" (solitary and special confinement) units, providing presence and conversation. Led conversation-based program for women in a residential addiction treatment program in the jail. Focused discussions on storytelling and shared experiences.

EDUCATION

MPH, Applied Environmental Health Science — *August 2018*
University of Maryland, College Park

B.S., Environmental Science and Policy – Society and Environmental Issues — *December 2014*
University of Maryland, College Park

WORK EXPERIENCE

Quality Data Analyst — Millersville, MD
The Coordinating Center — *June 2020 - Present*

- Lead quality improvement and data evaluation activities across all population health programs, monitored results, and provided recommendations for enhancement
- Produced Quality Evaluation to analyze performance through compliance measurement, trend analysis, and qualitative reporting
- Supervised team in +4,000 client satisfaction survey and analyzed results with SAS 9.4
- Developed efficient work methods to oversee data management and expanded knowledge of programs to create customized internal reports and enhance performance
- Expanded the collection, reporting and analysis of standardized data for health equity purposes
- Identified areas for improvement and provided education, training and reinforcement in support of quality advancement throughout the organization
- Designed innovative reports and infographics using Microsoft Programs to effectively translate complex data for internal and external reporting

Program Associate — Baltimore, MD
Mosaic Group — *July 2019 - March 2020*

- Managed a large-scale repository of behavioral health data, implemented procedures to improve data collection, and submitted timely and accurate reports to the Maryland Department of Health
- Monitored quality of behavioral health data and implemented procedures to improve data collection
- Prepared monthly progress reports of data quality trends, patterns, and opportunities for improvement
- Utilized a data driven process to construct an analysis of the key health and social determinants of health issues impacting rural areas
- Conducted a qualitative and quantitative analysis for a community health needs assessment and identified trends, patterns and opportunities for improvement in population health
- Developed interactive data visualizations using Tableau, ArcGIS and Excel for community and behavioral health topics
- Composed literature reviews using high-quality resources

Research Analyst — Baltimore, MD
University of Maryland, Baltimore — *July 2018 – July 2019*

- Supported state and federal child welfare reports using statistical applications
- Modernized a monthly Child Welfare Report and designed an executive summary to brief stakeholders on trends
- Reviewed the validity and accuracy of data to ensure compliance with quality control
- Surveyed transitional youth, coded responses, and analyzed differences between cohorts
- Trained staff to utilize data-driven insights to assist with program delivery

Research Intern — Hyattsville, MD
Optimal Solutions Group, LLC. — *Winter 2018*

- Collaborated with team members to survey mental health organizations and code responses
- Created new variables to include in a geo-mapping tool for mental health providers
- Performed quality control of National Assessment of Educational Progress (NAEP) data
- Conducted literature searches and contributed to written reports and proposals

Food Policy Intern — Baltimore, MD
Baltimore Food Policy Initiative — *Summer 2017*

- Examined request for proposals for the Eating Together program to identify methods of good food procurement
- Interviewed leadership at senior congregate sites to identify best practices
- Formulated a financial analysis on the Eating Together program and provided managerial recommendations

- Developed materials for a citywide Food Environment Tour to underscore organizations advancing food security
- Attended Food PAC meetings and took effective notes for speakers

Research Intern — Baltimore, MD
Maryland Department of Health — *Spring 2016*
- Authored a fact sheet with infographics, identifying how existing public policies can serve as a preventative measure for child abuse and neglect
- Produced a standard operating procedure for the Environment Health Bureau (EHB)
- Updated EHB's radon and carbon monoxide web pages to educate and offer accessible methods of prevention
- Finalized three letters of information describing the EHB's position on proposed bills
- Amended the Asthma Friendly Child-Care program to include legislative updates

Case Analyst — Baltimore, MD
CONNOR Environmental Services — *2015 – 2017*
- Summarized expert depositions and prepared a case analysis for pending lead-based paint litigation
- Updated case progress indices with analysis information and frequently reviewed index to prioritize case assignments
- Observed lead paint inspections to accurately report building components, property layout and any pertinent information
- Researched lead-based paint and lead-based paint hazard issues, including federal, state and local regulations

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Green City Force

Address: 630 Flushing Avenue, Mailbox #1

City: Brooklyn

State: NY: New York Zip Code: 11206

B. Unique Entity Identifier (UEI): T1VRXRY85GM5

C. Applicant/Recipient Point of Contact

Name: Florace Alleyne

Phone: Ex. 6 Personal Privacy (PP)

Email: florace@greencityforce.org

Title: Director of People Operations

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Florace Alleyne, Director of People Operations, Ex. 6 Personal Privacy (PP)
florace@greencityforce.org, Ex. 6 Personal Privacy (PP)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Yes, we have this addressed in our employee handbook - Ex. 6 Personal Privacy (PP)
Ex. 6 Personal Privacy (PP)

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Erika Lim	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Re: New York City Housing Authority's Letter of Commitment of Green City Force's Green Workforce Development Program for United States Department of Environmental Protection's Fiscal Year 2023 Environmental Justice Collaborative Problem Solving Program

To Whom it May Concern:

I am writing on behalf of the New York City Housing Authority (NYCHA) to express our commitment of support for the Green City Force (GCF)'s application for U.S. Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving Program (EJCPS) program for their green workforce development program. NYCHA and GCF have a long-standing partnership of over a decade, working together to create economic opportunity for young adult residents and to develop initiatives and approaches to improve the environment for NYCHA residents across our developments. NYCHA previously supported GCF's application for the 2021 EJCPS funding cycle.

NYCHA is North America's largest public housing authority with over 500,000 low- and moderate-income New Yorkers living in NYCHA's 335 developments. GCF's Service Corps benefits NYCHA residents in unique ways: by creating a path to employment for 150 young residents annually aged 18-24, and by mobilizing these young adults to address critical needs related to climate resiliency and green infrastructure in our NYCHA communities as full-time AmeriCorps members.

To support the project and its partners for the three-year duration of this grant, NYCHA commits to the following roles and activities:

- Participating in regular meetings with GCF and other partners to identify the issues related to resident climate resiliency and green infrastructure stewardship in NYCHA developments
- Leverage GCF's existing agreements with NYCHA
- Help contact and involve relevant NYCHA staff across departments and property management
- Contribute expertise as needed, acting as a resource to the teams on the ground
- Work with GCF and partners to prioritize residents who are trained for related employment as opportunities are created

Green City Force is uplifting NYCHA's young residents with the resources, training, and access green jobs – a goal that NYCHA greatly supports. We look forward to partnering with Green City Force as well as New York City's Department of Environmental Protection and Trees NY.

In Service,

Vlada Kenniff, Senior Vice President of Sustainability, Asset & Capital Management Division of New York City Housing Authority

Trees New York
plant preserve protect

April 11, 2023

Mr. Jacob Burney EPA

Dear Mr. Burney,

This letter is to express the commitment of Trees New York as a partner to Green City Force (GCF) on their application to the EPA Environmental Justice Collaborative Problem-Solving Program (EJCPS).

Trees New York's mission is to plant, preserve and protect New York City's urban forest through education and community participation. Trees New York was founded in 1976 as a volunteer response to New York City's devastating cutbacks in forestry and tree-related community services. Trees New York has 46 years of experience in community tree planting, stewardship and education projects. The primary focus of Trees New York's activities is to work with NYC residents to improve their quality of life through tree-related endeavors. Trees New York's core programs include the Citizen Pruner Tree Care Course and Tree Stewardship, Youth Environmental Literacy, Young Urban Forester Summer Internship and Community Tree Plantings. Since its founding, Trees New York has trained over 12,500 Citizen Pruners and 8,000 youth in tree care and stewardship. In the last 10 years, Trees New York has planted over 5,000 trees completely transforming under-served neighborhoods that historically had a low-canopy cover and were burdened by the urban heat island affect along with air, water and noise pollution.

Trees New York in partnership with GCF will assist with the training of 150 frontline young New Yorkers in a cross-section of climate resiliency and green infrastructure training. These efforts will create a skilled workforce to fill the needed forthcoming jobs building NYC's green infrastructure. We will Provide 'train the trainer' capacity-building to GCF's team through our Citizen Pruner training and certification, during the initial planning and preparation phase. Through the planning process, determining with GCF what the priorities are for education and training of GCF's Corps Members and residents during each of the two cohorts that will occur during the grant period, and providing these trainings and/or workshops within the agreed-up budget. We have discussed different options with GCF, which build on the programs that we offer, described below. These options include: Training GCF Corps Members to be citizen pruners, Training NYCHA residents at the sites to be citizen pruners, Providing educational workshops for kids or other targeted groups at the sites.

Leading activities that enable GCF members to gain valuable experience in aspects of tree care as part of their training and professional development.

Below, we describe our general program offerings in more detail. We offer three avenues for training: citizen pruners, tree care training and youth education and internships.

ED_016126_00000895-00002

Citizen Pruners: Stewardship and pruning hugely reduce a tree's vulnerability to common urban threats such as pedestrian and vehicular traffic, drought and storms. In New York City, where there is limited funding for tree maintenance but significant need, Citizen Pruners provide a great asset to our urban environment.

The 12-hour Citizen Pruner Course consists of 5 sessions – 4 in the classroom and 1 field outing.

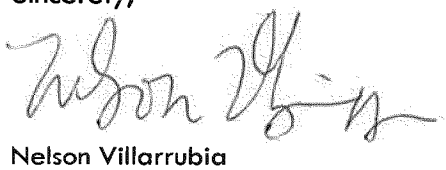
8 hours in the classroom – Students meet for four 2-hour classroom sessions. The comprehensive curriculum includes tree biology, street tree identification, common tree problems and solutions, tree stewardship and pruning.

4 hours in the field – The field outing is designed to provide students with the opportunity to practice pruning with their peers under the tutelage of their teacher.

Upon successful completion of the final exam, students receive a license from Trees New York and NYC Parks to legally prune NYC street trees. Trees New York is the only institution designated to train and license Citizen Pruners in New York City. On average our Citizen Pruners and volunteers help us care for more than 2,500 street trees per year.

Increasing the number of Citizen Pruners that either live or work at NYCHA, guarantees a healthier and safer urban forest and creates a pool of volunteers who are educated, trained and committed to supporting the health of their urban environment. The NYCHA Citizen Pruners will help us remove dead and damaged limbs, and limbs obstructing signs, pedestrian and vehicular traffic. Trees New York will provide ongoing support to optimize volunteers' stewardship efforts. After participating in our workshops, NYHCA volunteers are informed, empowered and engaged and continue to advocate to improve their urban environment. The participants often become community leaders and advocate for increased tree plantings in their neighborhoods, In addition to their stewardship and pruning skills, they learn how to create NYC Parks Service requests which allows them to report empty tree beds, request new street trees and report hazards trees.

Tree Stewardship Training: Trees New York's "learning-while-doing" approach provides our volunteers with the awareness, knowledge and skills needed to ensure that our street trees survive and thrive. Trees New York's Tree Stewardship Training is designed to train and mobilize New Yorkers so that they can play an active role in supporting the health of our urban forest. Trees New York's Environmental Educators teach lessons on the value of a healthy urban forest and the importance of volunteer efforts. Following each lesson, volunteers steward street trees. Trees New York's Environmental Educators work alongside volunteers to guide their stewardship efforts and answer questions. Trees New York works with both youth and adult volunteers and works throughout the five boroughs of New York City.



In addition, we train volunteers to care for trees through activities such as: 1) *Tree bed clean up and soil cultivation* – In addition to being unsightly, compacted soil and litter block the movement of oxygen, water and nutrients to tree roots. Volunteers remove litter and weeds from tree beds and loosen up the surface soil with hand cultivators. 2) *Watering Trees* – New York City street trees live in permanent drought conditions. All trees, especially newly planted trees, need thorough and deep watering during the spring and summer. Volunteers water trees using buckets and hoses. 3) *Mulching* – Mulch conserves water, moderates soil temperatures, improves soil structure and mitigates damage from dogs, people, de-icing salts and cleaning agents. Volunteers mulch trees with mulch or woodchips. 4) *Tree Bed Gardening* – Flowers beautify the streetscape, add enriching organic matter to the soil and help deter people from walking on tree beds.

ED_016126_00000895-00003

Youth Programs: The objective of Trees New York's Youth Environmental Literacy Programs is to raise students' awareness of environmental issues while advancing their reading, language and investigative skills. Students are empowered to become advocates for and stewards of the urban environment through service-learning projects that improve their communities. We also operate a Young Forester Internship Program. The objective of the internship is to expose interns to a range of environmental career opportunities through education, hands-on stewardship, field trips and seminars with professionals. Work-based learning in which students learn technical, academic and employability skills ore critical for better employment outcomes of young and inexperienced workers.

We look forward to working with Green City Force and partners should this project be funded.

Sincerely,

Nelson Villarrubia
Executive Director

United States Environmental Protection Agency
Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program

To Whom it May Concern:

NYCDEP wishes to express support for Green City Force (GCF) on its application to EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

GCF oversees programs designed to uplift youth and young adults living in New York City, helping them develop professional, marketable skills and prepare them for careers in the green service industry. As the lead agency for the NYC Green Infrastructure Program (GI Program), DEP supports the work of organizations like GCF that focus on developing and advancing GI career training.

To date, DEP and partner agencies have constructed over 11,000 GI assets, including rain gardens, porous pavements, subsurface storage systems and green roofs. These assets are managing over 2,000 greened acres, helping to manage stormwater at the source and providing additional benefits such as improved air quality, reduced urban heat island effect, improved aesthetics and more. With thousands more GI assets on the way through public implementation and with promulgation of the Unified Stormwater Rule in 2022, which requires green infrastructure as part of most redevelopment in NYC, the need for a skilled GI workforce has never been greater. Green service training programs like those offered by GCF can help build the workforce necessary to maintain this distributed infrastructure.

GCF is uniquely positioned to align its existing educational framework more closely with the city's green stormwater infrastructure initiatives. With the help of the EJCPS grant, GCF would have the opportunity to upskill its program offerings to better meet the qualifications necessary for those entering the GI and sustainable stormwater management workforce in the city.

We believe that providing opportunities to strengthen the city's green service workforce is essential for the future of GI in NYC. We welcome the resources GCF could offer in helping to achieve the city's goals.

Sincerely,

MEnoch

Melissa Enoch

Mr. Jacob Burney
US EPA Headquarters
William Jefferson Clinton Building
1200 Pennsylvania Avenue, N. W.
Mail Code: 2202A
Washington, DC 2046

Re: 2023 Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program

Dear Mr. Burney,

This letter is to express the commitment of the USDA Forest Service scientists Erika Svendsen, Lindsay Campbell, Michelle Johnson, and Rich Hallett to Green City Force (GCF) on their application to the 2023 EPA Environmental Justice Collaborative Problem-Solving Program (EJCPS). As Forest Service scientists based in New York City, we have a mission to work in partnership with local communities to improve quality of life in urban areas by conducting and supporting research about social-ecological systems and natural resource management. NYCHA campuses are important elements of our urban forest as they include 2,600 acres of open space and are home to approximately 500,000 city residents, including young children and seniors. And GCF is emblematic of the type of trusted program critical to growing a 'green workforce' of young community leaders at the forefront of climate resilience.

We are pleased to build upon our prior collaborations with GCF through this collaborative effort. Previously, we worked with GCF on a redesigned community garden and landscape at NYCHA's Beach 41st Street Houses in Rockaway, NY – a barrier peninsula that was heavily flooded and disrupted during Hurricane Sandy. The landscape and stewardship program were designed to foster social-ecological resilience in the face of climate change and social vulnerability, and lessons learned were shared via national convenings, an edited volume, journal articles, and multi-media outputs. We also worked with GCF as an implementation partner in one of our signature social science research efforts, the Stewardship Mapping and Assessment Project in New York City. We worked with Corps Members to conduct follow-up calls with civic groups to increase their participation in the citywide stewardship survey and to ensure quality control of results provided. Results have been shared in numerous formats including journal articles, book chapters, and technical reports.

Finally and most recently, GCF alumni were critical to the NYCHA tree inventory project that engaged 18 NYCHA campuses citywide. These alumni were trained by Forest Service scientists in state-of-the-art tree inventory, tree health, and social assessment methods and carried out a comprehensive biophysical and social assessment of several NYCHA campuses' urban forests. This data was used to create an important initial report on the state of the urban forest at these sites and to inform future proposals and plans to enhance the sustainability of NYCHA landscapes going forward. In addition to the crucial capacity provided by GCF to implement the inventory, alumni also reported that they experienced learning, exploration, and developed new skills through this work. We see immense opportunity to continue to expand these sorts of community forestry-focused training and employment programs as part of green career ladders.

Our partnership with GCF and NYCHA in this capacity was key to supporting applied research on inventorying the urban tree canopy, fostering resident-based stewardship of grounds and trees, and developing green job skills. NYCHA landscapes and numerous canopy trees are critical biophysical resources that require protection and care in order to maximize ecosystem benefits, such as mitigating the urban heat island effect and improving air quality. GCF is critical to this work as they focus their member recruitment and activities within environmental justice communities and provide access to green jobs, skills-based environmental training, and opportunities for meaningful engagement in environmental stewardship. Research has shown that this type of community-based collaboration and stewardship is both a proven mechanism to foster social cohesion and trust, as well as an onramp to other forms of civic engagement.

Our interest in taking part in this proposal, *GCF Eco-Hubs Building Climate Resiliency and Career Pathways in Urban Forestry and Green Infrastructure for Frontline New Yorkers,* stems from our interest in supporting the creation of an urban forest stewardship plan for NYCHA's community forest that cultivates a green workforce, engages residents, climate and conservation groups, and supports the work of NYCHA maintenance and operation (M&O) staff. This grant would be a welcome opportunity to strengthen the work with GCF as the convener of collaborative problem-solving with stakeholder partners to increase awareness, education, job opportunities and ultimately stewardship of NYCHA's urban forest community. We are committed to:

- Participating in regular meetings with GCF and other partners to share our social and biophysical research expertise, as well as our specific learnings related to tree stewardship issues and workforce issues.
- Working with the team to contribute to the success of EPA's collaborative problem-solving model and effort. Our contribution can include helping the team on consistent methods for research and tracking the progress of this community-led urban forest stewardship effort.
- Contributing expertise as needed, acting as a resource to the GCF teams and residents.
- Serving as speakers during professional development sessions to share job and career paths within the field of urban forestry and the larger US Forest Service.

We look forward to partnering with the EPA, Green City Force, and the other stakeholder partners on this important project to increase the health of residents and trees alike in our city, by working with GCF's unique workforce professionals and talented young adult leaders.

Sincerely,

/s/ electronically by:

Erika S. Svendsen, Team Leader and Research Social Scientist erika.svendsen@usda.gov

April 12, 2023

To Whom it May Concern:

This letter is to express the commitment of The Nature Conservancy's Cities Program in New York as partner to Green City Force (GCF) on their application to the EPA Environmental Justice Collaborative Problem-Solving Program (EJCPS). Our Future Forest NYC initiative advances a clear, coordinated vision and uplifts champions for the NYC urban forest. Green City Force, alongside its partners, is strategically positioned to develop and implement solutions that significantly address environmental and public health issues in communities disproportionately burdened by environmental harms.

New York City Housing Authority (NYCHA) campuses include 2,600 acres of open space and are home to approximately 500,000 city residents, including young children and seniors. We have previously partnered with GCF and NYCHA to support applied research on inventorying their urban tree canopy, fostering resident-based stewardship of grounds and trees, and developing green jobs skills. NYCHA accounts for just over one percent of land in New York City, but for over 2 percent of tree canopy in the city. NYCHA provides some of the scant open space and canopy in some of the most heat vulnerable communities in NYC and has the potential to host more canopy and higher quality green space. Therefore, it plays an outsized role in both current and potential tree canopy in the most heat vulnerable communities.

We would be pleased to build upon our prior collaborations with GCF through this collaborative effort. Recently, GCF alumni were critical the NYCHA tree inventory project completed last year at 18 NYCHA campuses citywide. These alumni were trained in tree inventory, tree health, and social assessment methods and carried out a comprehensive biophysical and social assessment of several NYCHA campuses' urban forests. These data were used to create a comprehensive report on the state of the urban forest at these sites and to inform future proposals and plans to enhance the sustainability of NYCHA landscapes going forward.

Green City Force is also an important partner and member of Forest for All NYC. The Nature Conservancy convenes and is a leading member of Forest for All NYC, a diverse coalition that includes environmental, justice, conservation, non-profit, business and government leaders and organizations committed to creating a healthy, biodiverse, accessible and resilient urban forest that delivers benefits to all New Yorkers justly and equitably. To achieve this vision, the coalition is advancing the ambitious *NYC Urban Forest Agenda* that includes actionable and comprehensive recommendations for how to improve and enhance New York City's urban forest through planning, stewardship and policy; local action by the public; and increased investments in trees across public and private lands. Green City Force is a tremendously important ally in this work, providing expertise on workforce development, and helping scope a potential urban forest master plan for the city.

As a partner, we are committed to:

- Provide technical assistance as needed to interpret and understand tree canopy data relative to NYCHA campuses
- Contribute expertise as needed, acting as a resource to the GCF teams and residents on the ground
- Work with the team to contribute to the success of the collaborative problem-solving effort
- Serve as speakers during professional development sessions to model career paths and share information about potential USDA Forest Service recruitment and career pathways.
- Create opportunities for the project team to share and communicate their work to Forest for All NYC Coalition Members

We look forward to partnering with the EPA, Green City Force, NYCHA, and the other stakeholder partners on this important project to increase the health of residents and trees alike.

Sincerely,

Emily Nobel Maxwell

Emily Nobel Maxwell
Director, Cities Program

fund for public housing

April 12, 2023

United States Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

To Whom it May Concern:

On behalf of the Fund for Public Housing, I would like to express our support for Green City Force' (GCF) application to the U.S. Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving Program (EJCPS) program for their green workforce development program. The mission of the Fund and GCF are well aligned as both of our organizations support residents of public housing in New York City by creating economic opportunity for young adult residents and by working with residents to bring improvements to open spaces in New York City Housing Authority (NYCHA) communities.

With support from the EJCPS program, GCF is planning to partner with New York City's Department of Environmental Protection, NYCHA, and Trees NY to train 150 frontline New Yorkers in a cross section of climate resiliency and green infrastructure training. This program will mobilize young adults to address critical needs related to climate resiliency and green infrastructure in NYCHA communities, filling a critical need in our city's most vulnerable neighborhoods. The Fund for Public Housing fully supports GCF's proposal and ready to support implementation of the program through outreach to public housing communities, by identifying candidates to participate in the program, and support efforts to sustain the program after the grant period.

We look forward to partnering with Green City Force as well as NYCHA and partners to bring this important program to public housing communities and ask the United States Environmental Protection Agency to support this grant request.

Sincerely,

Alex Zablocki
Executive Director

Washington, DC 20460

Re: EPA Environmental Justice Collaborative Problem Solving Grant Letter of Commitment

Dear Mr. Burney:

The New Jersey Board of Public Utilities (NJBPU) supports the Green & Healthy Homes Initiative's (GHHI) grant proposal to the U.S. Environmental Protection Agency for $500,000 in Environmental Justice Collaborative Problem Solving Grant funding. GHHI's development of the national Green and Healthy Homes Initiative model is transforming the approach to housing interventions by comprehensively addressing multiple home-based health hazards that threaten the health of young children, families, and seniors while also reducing the energy consumption and costs that burden families and contribute to climate change. GHHI has a strong record of improving the health and stability of at-risk communities through interventions and education that reduce asthma triggers and lead hazards. GHHI has played a leading role in working to improve lead poisoning and asthma outcomes in Baltimore City and other jurisdictions. We are enthusiastic about partnering with GHHI as it continues to expand preventive intervention services and integrate energy efficiency measures in Trenton that deliver comprehensive Green and Healthy Homes interventions for low-income families and seniors to address historic health disparities and mitigate climate impacts.

With EPA funding, GHHI will provide training and direct technical assistance in working with local community-based organizations, government agencies, and other stakeholders in EPA Region 2 to build local capacity and help scale preventive healthy homes services for environmental assessments, resident education, and housing interventions. Increased services locally will improve the health of low-income families and seniors by reducing asthma triggers and lead hazards, as well as conducting important weatherization and energy efficiency interventions to improve occupant health and reduce energy consumption and carbon emissions for vulnerable families. GHHI will provide local multi-day Boot Camp trainings for community organizations and government agencies on how to implement the comprehensive Green and Healthy Homes intervention model and will help facilitate new cross-sector partnerships and collaboratives in the health, housing, and energy sectors in Trenton and across the state of New Jersey.

ED_016126_00000896-00001

The NJBPU commits to participate in this collaborative by partnering on the grant and providing support to build increased capacity in Trenton and the state that will help create additional lead and healthy homes resources that address the social determinants of health in our communities and help reduce client deferral rates for families applying for energy efficiency interventions. NJBPU will also help to convene stakeholders from the energy sector and other community partners to participate in the grant trainings and capacity building technical assistance. NJBPU is currently working with GHHI and local community partners to complete a Whole House Pilot Program in 100 low-income homes in Trenton where lead hazard reduction and energy efficiency interventions are integrated through a partnership with energy, housing, and health sectors.

By directly building greater local capacity in community-based organizations and teaching stakeholders how to access innovative funding partnerships to scale needed services, low-income owners and residents will be able to access free prevention interventions to reduce lead hazards and asthma triggers and address energy loss in their families' homes. It is also critical that we support efforts to reduce carbon emissions by ensuring that low-income communities have equitable access to electrification and decarbonization resources that improve indoor air quality while reducing carbon emissions that impact climate change. **We ask you to fund this important** Environmental Justice Collaborative Problem Solving Grant **that will serve communities and stakeholders in New Jersey, New York, Puerto Rico, and the US Virgin Islands.**

Re: EPA Environmental Justice Collaborative Problem Solving Grant Letter of Commitment

Dear Mr. Burney:

New Jersey Future supports the Green & Healthy Homes Initiative's (GHHI) grant proposal to the U.S. Environmental Protection Agency for $500,000 in Environmental Justice Collaborative Problem Solving Grant funding to provide technical assistance across the region.. GHHI's national Green and Healthy Homes Initiative is comprehensively addressing multiple home-based health hazards that threaten the health of young children, families and seniors while also reducing the energy consumption and costs that burden families and contribute to climate change. GHHI's work helps to improve the health and stability of at-risk communities through interventions and education that reduce asthma triggers and lead hazards. We are enthused to partner with GHHI as it continues to expand preventive intervention services and integrate energy efficiency measures in New Jersey that deliver comprehensive Green and Healthy Homes interventions for low income families and seniors to address historic health disparities and mitigate climate impacts.

With EPA funding, GHHI will provide training and direct technical assistance in working with local community-based organizations, government agencies and other stakeholders in EPA Region 2 to build local capacity and help scale preventive healthy homes services for environmental assessments, resident education and housing interventions. Increased services locally will improve the health of low income families and seniors by reducing: asthma triggers and lead hazards as well as conducting important weatherization and energy efficiency interventions to improve occupant health and reduce energy consumption and carbon emissions for vulnerable families. GHHI will provide local multi-day Boot Camp trainings for community organizations and government agencies on how to implement the comprehensive Green and Healthy Homes intervention model and will help facilitate new cross sector partnerships and collaboratives across the health, housing and energy sectors across New Jersey, but most particularly in the Lead Free NJ partner locations.

New Jersey Future play the backbone role in support of Lead Free NJ and has considerable policy, advocacy, and organizing expertise. New Jersey Future commits to participate in this collaborative by partnering on the grant and working closely with the local partners and technical assistance providers to expand the reach and depth of assistance and to bring timely and impactful policy assistance, perspective and education to the process to help address the social determinants of health in our communities.

By working through our existing networks and building greater local capacity in community-based organizations and teaching stakeholders how to access innovative funding partnerships to scale needed services, low income owners and residents will be able to access free prevention interventions to reduce lead hazards and asthma triggers and address energy loss in their family's homes. It is also critical that we support efforts to reduce carbon emissions by ensuring that low income communities have equitable access to electrification and decarbonization resources that improve indoor air quality while reducing carbon emissions that impact climate change. We ask you to fund this important Environmental Justice Collaborative Problem Solving Grant that will serve communities and stakeholders in New Jersey, New York, Puerto Rico and the US Virgin Islands.

Sincerely,

Peter Kasabach, Executive Director

Re: EPA Environmental Justice Collaborative Problem Solving Grant Letter of Commitment

Dear Mr. Burney:

Lead-Free NJ supports the Green & Healthy Homes Initiative's (GHHI) grant proposal to the U.S. Environmental Protection Agency for $500,000 in Environmental Justice Collaborative Problem Solving Grant funding to provide technical assistance across EPA Region 2: New Jersey, New York, Puerto Rico, the U.S. Virgin Islands and eight Indian Nations. Nationally, GHHI is comprehensively addressing multiple home-based health hazards that threaten the health of young children, families and seniors while also reducing the energy consumption and costs that burden families and contribute to climate change. GHHI's work helps to improve the health and stability of at-risk communities through interventions and education that reduce asthma triggers and lead hazards. We are enthused to partner with GHHI as it continues to expand preventive intervention services and integrate energy efficiency measures in New Jersey that deliver comprehensive Green and Healthy Homes interventions for low income families and seniors to address historic health disparities and mitigate climate impacts.

With EPA funding, GHHI will provide training and direct technical assistance in working with local community-based organizations, government agencies and other stakeholders in **EPA Region 2** to build local capacity and help scale preventive healthy homes services for environmental assessments, resident education and housing interventions. Increased services locally will improve the health of low-income families and seniors by reducing: asthma triggers and lead hazards as well as conducting important weatherization and energy efficiency interventions to improve occupant health and reduce energy consumption and carbon emissions for vulnerable families. GHHI will provide local multi-day Boot Camp training for community organizations and government agencies on how to implement the comprehensive Green and Healthy Homes intervention model and will help facilitate new cross sector partnerships and collaboratives across the health, housing and energy sectors across New Jersey.

LEAD-FREE NJ

Lead-Free NJ is an inclusive and equitable collaborative focused on removing lead from New Jersey's environment. Lead-Free NJ involves Community Hubs to advance local solutions. Hubs are existing local grassroots organizations that help define the collaborative's yearly objectives, advance long-term goals, and spearhead advocacy projects in their community. GHHI's technical assistance work supports the Lead-Free NJ collaborative by providing backbone staff support to our Housing Policy Table. Additionally, GHHI provides outreach and education on lead hazards and lead poisoning prevention by joining Lead-Free NJ at community events throughout New Jersey.

Lead-Free NJ commits to ensuring its collaborative spaces offer opportunities for GHHI to provide technical assistance and learning from diverse parties.

By working through our existing networks and building greater local capacity in community-based organizations and teaching stakeholders how to access innovative funding partnerships to scale needed services, low-income owners and residents will be able to access free prevention interventions to reduce lead hazards and asthma triggers and address energy loss in their family's homes. We ask you to fund this important Environmental Justice Collaborative Problem Solving Grant that will serve communities and stakeholders in New Jersey, New York, Puerto Rico and the US Virgin Islands.

Sincerely,

The Fund for New Jersey

April 10, 2023

Jacob Burney
Division Director, Grants Management Division
Office of Environmental Justice and External Civil Rights
United States Environmental Protection Agency
1200 Pennsylvania Avenue, NW (Mail Code:2202A)
Washington, DC 20460

Re: EPA Environmental Justice Collaborative Problem Solving Grant Letter of Commitment

Dear Mr. Burney:

The Fund for New Jersey supports the Green & Healthy Homes Initiative's (GHHI) grant proposal to the U.S. Environmental Protection Agency for $500,000 in Environmental Justice Collaborative Problem Solving Grant funding. GHHI's development of the national Green and Healthy Homes Initiative model is transforming the approach to housing interventions by comprehensively addressing multiple home-based health hazards that threaten the health of young children, families and seniors while also reducing the energy consumption and costs that burden families and contribute to climate change. GHHI has a strong record of improving the health and stability of at risk communities through interventions and education that reduce asthma triggers and lead hazards. GHHI has played a leading role in working to improve lead poisoning and asthma outcomes in Baltimore City and other jurisdictions. We are enthused to partner with GHHI as it helps to expand preventive intervention services and integrate energy efficiency measures in New Jersey that deliver comprehensive Green and Healthy Homes interventions for low income families and seniors to address historic health disparities and mitigate climate impacts.

With EPA funding, GHHI will provide training and direct technical assistance in working with local community-based organizations, government agencies and other stakeholders in EPA Region 2 to build local capacity and help scale preventive healthy homes services for environmental assessments, resident education and housing interventions. Increased services locally will improve the health of low income families and seniors by reducing: asthma triggers and lead hazards as well as conducting important weatherization and energy efficiency interventions to improve occupant health and reduce energy consumption and carbon emissions for vulnerable families. GHHI will provide local multi-day Boot Camp trainings for community organizations and government agencies on how to implement the comprehensive Green and Healthy Homes intervention model and will help facilitate new cross sector partnerships and collaboratives across the health, housing and energy sectors in Newark, Trenton and the State of New Jersey.

The Fund for New Jersey commits to participate in this collaborative by supporting the work of GHHI to convene a virtual philanthropic roundtable with community-based organizations in New Jersey to build knowledge of the work of both sectors to support communities to scale the stock of affordable and healthy housing and to introduce the CBOs to philanthropic leaders across the state. Where applicable, The Fund will refer organizations for capacity building, trainings, and boot camps as part of the overarching statewide lead-elimination, healthy housing and equity strategy. The Fund has been working with GHHI for over five years on lead poisoning prevention initiatives statewide in New Jersey.

By directly building greater local capacity in community-based organizations and teaching stakeholders how to access innovative funding partnerships to scale needed services, low income owners and residents will be able to access free prevention interventions to reduce lead hazards and asthma triggers and address energy loss in their family's homes. It is also critical that we support efforts to reduce carbon emissions by ensuring that low income communities have equitable access to electrification and decarbonization resources that improve indoor air quality while reducing carbon emissions that impact climate change. We ask you to fund this important Environmental Justice Collaborative Problem Solving Grant that will serve communities and stakeholders in New Jersey, New York, Puerto Rico and the US Virgin Islands.

Sincerely,

Re: EPA Environmental Justice Collaborative Problem Solving Grant Letter of Commitment

Dear Mr. Burney:

The Puerto Rico Department of Health supports the Green & Healthy Homes Initiative's (GHHI) grant proposal to the U.S. Environmental Protection Agency for $500,000 in Environmental Justice Collaborative Problem Solving Grant funding. GHHI's development of the national Green and Healthy Homes Initiative model is transforming the approach to housing interventions by comprehensively addressing multiple home-based health hazards that threaten the health of young children, families and seniors while also reducing the energy consumption and costs that burden families and contribute to climate change. GHHI has a strong record of improving the health and stability of at-risk communities through interventions and education that reduce asthma triggers and lead hazards. GHHI has played a leading role in working to improve lead poisoning and asthma outcomes in Baltimore City and other jurisdictions. We are enthused to partner with GHHI as it helps to expand preventive intervention services and integrate energy efficiency measures in Puerto Rico that deliver comprehensive Green and Healthy Homes interventions for low-income families and seniors to address historic health disparities and mitigate climate impacts.

With EPA funding, GHHI will provide training and direct technical assistance in working with local community-based organizations, government agencies and other stakeholders in EPA Region 2 to build local capacity and help scale preventive healthy homes services for environmental assessments, resident education, and housing interventions.

Increased services locally will improve the health of low-income families and seniors by reducing asthma triggers and lead hazards as well as conducting important weatherization and energy efficiency interventions to improve occupant health and reduce energy consumption and carbon emissions for vulnerable families. GHHI will provide local multi-day Boot Camp trainings for community organizations and government agencies on how to implement the comprehensive Green and Healthy Homes intervention model and will help facilitate new cross sector partnerships and collaboratives across the health, housing, and energy sectors in San Juan and across Puerto Rico.

The Puerto Rico Department of Health commits to participate in this collaborative by partnering with GHHI on the grant and providing a convenor role of various health and housing stakeholders in Puerto Rico to help address the social determinants of health in our communities. The Health Department will support and promote trainings, technical assistance, and Boot Camps by GHHI with local CBOs and other agencies on

ED_016126_00000896-00012

how to develop cross sector partnerships, greater prevention services capacity and increased funding to reduce lead poisoning and asthma episodes.

By directly building greater local capacity in community-based organizations and teaching stakeholders how to access innovative funding partnerships to scale needed services, low-income owners and residents will be able to access free prevention interventions to reduce lead hazards and asthma triggers and address energy loss in their family's homes. It is also critical that we support efforts to reduce carbon emissions by ensuring that low-income communities have equitable access to electrification and decarbonization resources that improve indoor air quality while reducing carbon emissions that impact climate change. Re: EPA Environmental Justice Collaborative Problem Solving Grant Letter of Commitment

Dear Mr. Burney:

The Affordable Housing Partnership and its collaborative partner the Capital Region Clean Energy Hub supports the Green & Healthy Homes Initiative's (GHHI) grant proposal to the U.S. Environmental Protection Agency for $500,000 in Environmental Justice Collaborative Problem Solving Grant funding. GHHI's development of the national Green and Healthy Homes Initiative model is transforming the approach to housing interventions by comprehensively addressing multiple home-based health hazards that threaten the health of young children, families and seniors while also reducing the energy consumption and costs that burden families and contribute to climate change.

We look forward to a deeper partnership with GHHI as we work to expand preventive intervention services and integrate energy efficiency measures in New York's Capital Region. We share a goal to deliver comprehensive Green and Healthy Homes interventions for low income families and seniors to address historic health disparities and mitigate climate impacts.

We understand that with EPA funding, GHHI will provide training and direct technical assistance in working with organizations such as ours to build local capacity and help scale preventive healthy homes services for environmental assessments, resident education and housing interventions. The Affordable Housing Partnership commits to participate in this collaborative by partnering on the grant and working to help low income Capital Region residents access clean energy technologies. A critical component of resident access to energy efficiency programs is that their homes must have basic health and safety issues addressed first – we look forward to working with our partners to braid resources to take a holistic approach in addressing the social determinants of health in our communities.

We ask you to fund this important Environmental Justice Collaborative Problem Solving Grant that will serve communities and stakeholders in New Jersey, New York, Puerto Rico and the US Virgin Islands.

Sincerely,

Susan Cotner

INDEPENDENT AUDITORS' REPORT

To the Board of Directors of
Green City Force, Inc.

Opinion

We have audited the accompanying financial statements of Green City Force, Inc. ("GCF"), which comprise the statement of financial position as of June 30, 2022, and the related statements of activities, functional expenses, and cash flows for the year then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of GCF as of June 30, 2022, and the changes in net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of GCF and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about GCF's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists.

307 Fifth Avenue, 15th Floor
New York, New York 10016
Tel: Ex. 6 Personal Privacy (PP)
www.schallandashenfarb.com

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users on the basis of these financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of GCF's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about GCF's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Report on Summarized Comparative Information

We have previously audited GCF's June 30, 2021 financial statements, and we expressed an unmodified audit opinion on those audited financial statements in our report dated March 7, 2022. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2021 is consistent, in all material respects, with the audited financial statements from which it has been derived.

ED_016126_00000902-00007

GREEN CITY FORCE, INC.
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2022

Note 1 - Nature of Entity

Green City Force, Inc. ("GCF") is a corporation organized in 2009 as a not-for-profit in the State of New York. GCF's mission is to break the cycle of poverty, preparing urban young adults to succeed in their chosen careers by engaging them in service, training and work experiences related to the clean energy economy. In doing so, GCF encourages them to lead socially and environmentally responsible lives. GCF simultaneously addresses three imperatives: unemployment and the lack of prospects for family-supporting careers among low-income youth, changes to the urban environment that must be made to mitigate climate change, and stimulation of the green economy through awareness-raising and individual behavior change.

GCF is working towards a "Green City" built on principles of sustainability, social, economic, and environmental justice. GCF views urban young adults as the essential force for driving the emergence of the Green City by doing the important work of transforming their own lives, leading community transformation in their own backyards, and promoting the values of a new, sustainable economy. GCF works toward this vision through their model Clean Energy Corps (the "Corps") in New York City. The Corps enlists and trains citizens and workers for an inclusive green economy. Corps members reduce greenhouse gas emissions, develop a passion for sustainability and service, stimulate demand for green services, and get on a path to be able to support a family either through work or higher education.

GCF solicits funds from a wide variety of sources including private foundations, businesses, government agencies, and individuals.

GCF has been notified by the Internal Revenue Service that it is exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code and has not been determined to be a private foundation as defined in Section 509(a).

Note 2 - Summary of Significant Accounting Policies

a. Basis of Accounting
The financial statements of GCF have been prepared using the accrual basis of accounting which is the process of recognizing revenue and expenses when earned or incurred rather than received or paid.

b. Basis of Presentation
GCF reports information regarding its financial position and activities according to the following classes of net assets:

- *Net Assets Without Donor Restrictions* – represents all activity without donor-imposed restrictions.

- *Net Assets With Donor Restrictions* – relates to contributions of cash and other assets with donor stipulations that make clear the assets' restriction, either due to a program nature or by the passage of time.

ED_016126_00000902-00008

c. Revenue Recognition

GCF follows the requirements of the Financial Accounting Standards Board's ("FASB") Accounting Standards Codification ("ASC") 958-606 for recognizing revenue from contracts with customers. GCF receives program service fees, which includes workforce training and social enterprise program service fees, that fall under ASC 958-606. GCF analyzes each source of revenue to determine that it has a contract with the customer that identifies both the performance obligation and the transaction price.

GCF recognizes program service fees revenue in the period in which it satisfies the performance obligations by providing services to program participants. Collection of fees for future trainings or services have been recorded as deferred revenue. Fees earned that have not been collected are reflected as program service fees receivable.

GCF follows the requirements of FASB's ASC 958-605 for recording contributions, which are recognized at the earlier of when cash is received or at the time a pledge becomes unconditional in nature. Contributions are recorded in the net asset classes referred to above depending on the existence and/or nature of any donor-imposed restriction. When a restriction expires, that is, when a stipulated time restriction ends, or purpose restriction is accomplished, net assets with donor restrictions are reclassified to net assets without donor restrictions. If donor restricted contributions are satisfied in the same period they were received, they are classified as without donor restrictions.

Contributions may be subject to conditions which are defined as both a barrier to entitlement and a right of return of payments or release from obligations and are recognized as income once the conditions have been substantially met.

GCF's government grants have been evaluated and are considered to be conditional contributions under ASC 958-605. Revenue from these transactions is recognized when qualifying expenditures are incurred, performance related outcomes are achieved, and other conditions under the agreements are met. Payments received in advance of conditions being met are recorded as deferred revenue.

Pledges that are expected to be received in less than one year are recorded at net realizable value. Those that are due in greater than one year are recorded at fair value, which is calculated using risk adjusted present value techniques. Long-term pledges are treated as time restricted until the period they are due, at which time they will be released from restriction and counted towards operations.

Management has reviewed the collectability of all receivables, factoring judgement about the creditworthiness and age of the receivable, as well as historical experience. Based on that evaluation, management has determined that no reserve for doubtful accounts is warranted.

d. Cash and Cash Equivalents

GCF considers all liquid investments that have an initial maturity of three months or less to be cash and cash equivalents.

ED_016126_00000902-00009

e. Concentration of Credit Risk
Financial instruments which potentially subject GCF to a concentration of credit risk consist of cash and money market accounts which are placed with financial institutions that management deems to be creditworthy. At times and at year end, balances may exceed federally insured limits. GCF has not experienced any losses from these accounts due to bank failure.

f. Fixed Assets
Purchases of computer equipment and leasehold improvements that exceed predetermined levels are capitalized at cost or at fair value if donated. Depreciation is computed using the straight-line method over the estimated useful life of the respective asset as follows:

Leasehold improvements – *Life of lease*
Vehicles – *3 years*
Computer equipment – *3 years*

g. Donated Services
Donated services that create or enhance non-financial assets or require specialized skills, are provided by individuals possessing those skills and would typically need to be purchased if not provided in-kind, are recognized at fair value.

Although GCF receives services from board members and other volunteers, these services do not meet the criteria for recognition as outlined above and have not been recorded.

h. Use of Estimates
The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Actual results could differ from those estimates.

i. Functional Allocation of Expenses
The costs of providing various programs and other activities have been summarized on a functional basis in the financial statements. Accordingly, certain costs have been allocated among the programs and supporting services benefited.

The following costs are allocated using time and effort as the basis:

- Salaries
- Payroll taxes and benefits
- Occupancy
- Insurance
- Depreciation

All other expenses have been charged directly to the applicable program or supporting services.

ED_016126_00000902-00010

j. Summarized Comparative Financial Information
The financial statements include certain prior year summarized comparative information in total but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with accounting principles generally accepted in the United States of America. Accordingly, such information should be read in conjunction with GCF's financial statements for the year ended June 30, 2021, from which the summarized information was derived.

k. Accounting for Uncertainty of Income Taxes
GCF does not believe its financial statements include any material, uncertain tax positions. Tax filings for periods ending June 30, 2019 and later are subject to examination by applicable taxing authorities.

l. New Accounting Pronouncement
FASB issued Accounting Standards Update ("ASU") No. 2016-02, *Leases*. The ASU which becomes effective for the June 30, 2023 year, requires the full obligation of long-term leases to be recorded as a liability with a corresponding "right to use asset" on the statement of financial position.

GCF is in the process of evaluating the impact this standard will have on future financial statements.

Note 3 - Contributions Receivable

Contributions receivable are anticipated to be collected in the following periods:

		6/30/22	6/30/21
Year ending:	June 30, 2022	$0	$292,579
	June 30, 2023	668,567	75,000
	June 30, 2024	383,434	0
	June 30, 2025	4,950	0
	June 30, 2026	4,783	0
	June 30, 2027	4,603	0
	Thereafter	24,601	0
		1,090,938	367,579
Less: present value discount (at a rate of 3.14%)		(18,200)	0
Total		$1,072,738	$367,579

Note 4 - Fixed Assets

Fixed assets can be summarized as follows:

	6/30/22	6/30/21
Leasehold improvements	$71,206	$71,206
Vehicles	10,698	10,698
Computer equipment	45,639	10,989
	127,543	92,893
Less: accumulated depreciation	(94,818)	(92,893)
Total fixed assets. net	$32,725	$0

ED_016126_00000902-00011

Note 5 - Paycheck Protection Program Loan

On April 28, 2020 and March 24, 2021, GCF obtained loans from the U.S. Small Business Administration ("SBA") in the amount of $385,000 and $416,118, respectively, through the Paycheck Protection Program ("PPP"). Terms of the loans indicated that if certain conditions were met, which included maintaining average work forces during periods subsequent to receipt of the loan funds that are greater than pre-determined historical periods, that the loan, or a portion thereof, would be forgiven.

GCF accounts for the PPP loan as a contribution in accordance with FASB ASC 958-605 as it is considered to have traits similar to a conditional contribution. For the first loan, all conditions had been met during the year ended June 30, 2021 and revenue in the amount of $385,000 was recognized during the year then ended. For the second loan, all conditions have been met during the year ended June 30, 2022 and revenue in the amount of $416,118 has been recognized for the year then ended. Full forgiveness was approved by the SBA in April 2021 for the first PPP loan and in December 2021 for the second PPP loan.

Note 6 - Net Assets With Donor Restrictions

The following summarizes the changes in net assets with donor restrictions:

	June 30, 2022			
	Balance 7/1/21	Contributions	Released from Restrictions	Balance 6/30/22
Program/purpose restrictions:				
Urban Agriculture & Farm	$285,020	$250,000	($248,148)	$286,872
Career Pathways & Services	10,000	140,000	(20,365)	129,635
Service Corps	0	225,000	0	225,000
Apprenticeship Program	0	150,000	(4,348)	145,652
Tree Inventory	0	100,000	(57,507)	42,493
Total program/purpose	295,020	865,000	(330,368)	829,652
Time restrictions	225,000	1,268,747	(581,009)	912,738
Total	$520,020	$2,133,747	($911,377)	$1,742,390

	June 30, 2021			
	Balance 7/1/20	Contributions	Released from Restrictions	Balance 6/30/21
Program/purpose restrictions:				
Urban Agriculture & Farm	$588,212	$245,000	($548,192)	$285,020
Career Pathways & Services	0	10,000	0	10,000
Total program/purpose	588,212	255,000	(548,192)	295,020
Time restrictions	550,000	200,000	(525,000)	225,000
Total	$1,138,212	$455,000	($1,073,192)	$520,020

ED_016126_00000902-00012

Note 7 - Commitments

GCF has a lease agreement for office space, which expires on October 31, 2023.

The lease provides for the following annual minimum rental payments:

Year ending:	June 30, 2023	$117,307
	June 30, 2024	39,486
	Total	$156,793

On June 28, 2017, GCF obtained a line of credit in the amount of $100,000. Interest is charged at 2.5% above the prime rate established by the bank. As of June 30, 2022 and 2021, the line of credit was unused.

Note 8 - Retirement Plan

Subsequent to year end on July 15, 2022, GCF began to offer a 403(b) retirement plan. All employees who work in excess of 20 hours per week with a minimum of 1,000 total hours of service are eligible to participate. Employees who participate in the plan may elect to defer a portion of their salary and contribute to this plan up to statutory amounts. GCF can make a discretionary annual employer contribution for each participating employee. As the plan did not commence until after year end, there were no discretionary employer contributions for the years ended June 30, 2022 and 2021.

Note 9 - Availability and Liquidity

GCF maintains cash on hand to be available for its general expenditures, liabilities, and other obligations for on-going operations. GCF operates its programs within a board approved budget. The following reflects GCF's financial assets at June 30, 2022 that are available to meet cash needs for general expenditures within one year:

Financial assets at year-end:		
Cash and cash equivalents	$2,187,265	
Government grants receivable	390,520	
Contributions receivable	1,072,738	
Program service fees receivable	1,246,096	
Total		$4,896,619
Less amounts not available for general expenditures:		
Donor restricted net assets for future programs		(829,652)
Time restricted contributions receivable due in over one year		(422,371)
Financial assets available to meet cash needs for general expenditures within one year		$3,644,596

ED_016126_00000902-00013

Note 10 - Other Matters

On January 30, 2020, the World Health Organization declared the coronavirus outbreak a "Public Health Emergency of International Concern" and on March 10, 2020, declared it to be a pandemic. Actions taken around the world to help mitigate the spread of the coronavirus include restrictions on travel, quarantines in certain areas, and forced closures for certain types of public places and businesses. The coronavirus and actions taken to mitigate it have had and are expected to continue to have an adverse impact on the economies and financial markets of many countries, including the geographical area in which GCF operates. As of the date of these financial statements, many of the travel restrictions and stay at home orders have been lifted; however, supply chains remain impacted. Management continues to monitor the outbreak; however, as of the date of these financial statements, the potential impact cannot be quantified.

Note 11 - Subsequent Events

Subsequent events have been evaluated through December 12, 2022, the date the financial statements were available to be issued. Adjustments and disclosures have been made for all subsequent events that have occurred.

EXPERIENCE

Executive Director September 2020 - Present
Chief Development Officer February 2016 – August 2020
Director of Development July 2014 – January 2016
Green City Force, Brooklyn NY

- Oversee $5M budget
- Lead staff of 23 full-time employees
- Lead strategy and organizational growth in partnership with Board of Directors and Executive Leadership Team
- Partner with Executive Leadership Team, Development Committee Chair, board and staff to chart a course for a sustainable funding model and new sources of revenue
- Increase diversity of funding sources building out major city partnerships for multiple year support and joint fundraising initiatives

Senior Manager for Strategic Projects, Office of Public Private Partnerships
New York City Housing Authority, New York, NY August 2013 – July 2014

- Provide strategic guidance on development and management of public private partnerships between Authority and corporate, foundation, and government entities
- Liaison to Department of Education (DOE) regarding Universal Pre-kindergarten (UPK). Facilitate NYCHA family UPK registration and advise child care providers on their RFP bids for DOE funding to conduct UPK programming in NYCHA facilities
- Project manage Choice Neighborhoods Initiative Mott Haven community transformation plan funded by U.S. Department of Housing and Urban Development
- Collaborate with agency-wide staff to design partnership and coordination plan between Authority, community based organizations, City agencies, settlement houses, and other community stakeholders to implement emergency response services for public housing residents
- Advise executive leadership and train staff on Authority-wide grants management policies and procedures
- Contribute to the design and implementation plan for a new public private partnerships 501(c) 3 entity which later became The Fund for Public Housing

Special Advisor to EVP for Community Programs & Development
New York City Housing Authority, New York, NY March 2012 – July 2013

- Oversaw strategic projects and communication for the Office of the Executive Vice President
- Advised and supported Executive Vice President in the management of 400 staff members and 450 community and senior centers citywide
- Served as liaison to 10 senior staff division heads and thought leaders on economic empowerment, education, health, senior services, community programming, resident engagement, external partnership cultivation, leasing of community spaces, administration, and budget

- Project managed nine month resident services framework assessment to determine new organizational structure and sustainable model for connecting 650,000 public housing and leased housing residents of New York City to high quality programming and resources
- Served as team leader for design of new community space rent pricing and partnership model for NYCHA resident service providers

Senior Program Director
Futures and Options, New York, NY December 2010 – October 2011

- Led high school internship program, middle school career readiness training, and college guidance initiative for 13 – 19 year old youth
- Managed partnerships with Municipal Bond Forum, KIPP Through College, NY Tech Meetup, publishing, advertising, nonprofit, and various other industries

PROFESSIONAL OVERVIEW

Cross sector leader with a passion for leveraging an interdisciplinary toolbox to change systems and commitment to being of service in often underinvested and environmentally vulnerable communities. Experienced working across sectors and building partnerships to develop and operationalize new initiatives and institutions to achieve measurable impact; expertise in holistic place-based economic and community development, stakeholder engagement, environmental and social justice.

CORE LEADERSHIP COMPETENCIES

- Analytical thinker and problem solver
- Grant administration and compliance
- Highly adaptable
- Practitioner of asset-based approach to community development
- Strategic planner
- Strong communicator
- Strong program development and organizational change management
- Strong team builder

PROFESSIONAL EXPERIENCE

GREEN CITY FORCE – NY, NY

Chief Program Officer — June 2021 – Present

- Lead 5 full-time program senior staff members responsible for Green City Force's Service Corps, Support Services, Career Services and Social Enterprise and direct a team of full-time and part-time staff and contractors as well as social work interns, who manage an annual service corps of 100-150 projected members annually as well as 600 alumni.
- Member of Executive Leadership team; working closely with GCF strategic and city agency program partners as well as the Program Committee which includes a number of GCF board members to drive organizational strategic planning and alignment.
- Develop and implement program strategies and design, data design, setting and supporting staff in attaining Program-related metrics and driving towards quality and continuous improvement..
- Leads continuous learning and improvement around youth development practices, opportunity youth, workforce and support service philosophy, and implementation for member retention and success.

NEW YORK RESTORATION PROJECT – NY, NY

Senior Director of Engagement and Programming — January 2017 – June 2021

- Manage all strategic and operational strategies for NYRP programs that are implemented in over 50 community gardens across New York City and 80 acres of parkland in Inwood, Manhattan. Core programs focus on civic engagement, capacity building, community organizing, community led design, environmental education, environmental stewardship, and partnership development. Merged previously siloed programs to improve program delivery and strengthen community impact.
- Lead the development and evaluation of new and existing programs, partners cultivation (academic and community based), board engagement, key stakeholder management – City government and non-profit.
- Assist in the development and implementation of strategies that further strengthen NYRP's mission of supporting and increasing social capital, strengthening food security, and increasing urban agriculture.
- Provide thought leadership and hands-on support on special projects that included AmeriCorps/ Corps Network relationship management, special funding opportunities.

DELANCEY STREET ASSOCIATES – NY, NY

Director of Community Relations, Essex Crossing — July 2014 – May 2015

- Developed and initiated implementation of community benefits agreement, which included workforce development (employment and vocational training opportunities), Minority and Women Owned Business goals, and other economic project-related opportunities.
- Primary community liaison on project design and scope, which consisted of general community outreach and management of communication and collaboration with established community advisory groups.
- Developed engagement and outreach strategy, project performance progress protocol related to community benefits and ancillary opportunities. This included support on housing lottery and managing engagement aspect of project open spaces – community rooftop farm and playground.
- Managed relationships with key stakeholders, internally and externally, including NYC Economic

1. INTRODUCTION

Welcome to Green City Force (GCF)!

I'm excited for you to join the GCF community. As a mission driven organization, we work to provide a holistic, thoughtful and engaging work culture strengthened by the individual contributions that each of our team members bring to the work.

As a new employee, we hope you will find your employment rewarding, stimulating, challenging, and fun. GCF is a community of dedicated problem solvers who affirm the need and value of young people from frontline communities leading the way towards a #futuregreencity.

We expect that you will be a great addition to our staff and look forward to your ongoing contributions to both the young people we serve and to making GCF a vibrant and fulfilling place to work. We are collectively committed to making a meaningful impact on climate change and alleviating poverty in low-income communities in New York City.

At GCF we encourage open, honest communication including suggestions and constructive feedback. We value the creativity and ideas of our employees. Transparency and accountability are core values of our culture.

This Employee Handbook should provide answers to questions you may have about our employment policies, benefit programs, and other related policies and procedures. It is intended to outline GCF's policies and procedures in a straightforward manner. If you have any questions or comments regarding the policies and procedures contained in this handbook, please consult your immediate supervisor, our HR team members, or me directly.

I look forward to your partnership and contributions as a GCF colleague. Thank you for joining us!

In service,

Tonya Gayle
Executive Director

1.1 Mission Statement of Green City Force

We train young leaders to power a green and inclusive economy, through service. Our model corps in New York City enlists and trains young people from low income housing communities for a new and more equitable economy. We equip them with the tools to change the trajectory of their lives and access good jobs. Corps Members develop a passion for sustainability and service through driving large-scale environmental and health initiatives in public housing and other frontline communities. We design service as a path to greater wellbeing and means to enlist young people to become contributors and leaders in the movement to build a greener, fairer and more just world. Graduates go on to jobs or college, directly or through alumni initiatives that build towards sectoral jobs and apprenticeships, via social enterprise contracts or advanced training developed with employers. Our network of alumni, partners and supporters constitutes a growing ecosystem anchored in our corps.

1.2 Purpose of this Handbook

The policies and procedures outlined in this handbook are designed to serve as guidelines for management action. This handbook has been prepared for informational purposes only, to inform employees of GCF's policies and procedures and to establish GCF's expectations. It is intended to familiarize employees with important information about GCF, as well as provide guidelines for your employment experience with us in an effort to foster a safe and healthy work environment. It is not all-inclusive or intended to provide strict interpretations of our policies; rather, it offers an overview of the work environment. This handbook is not a contract, expressed or implied. This handbook and the policies and procedures contained in it are not intended to create any contract or binding agreement between GCF and any employee. This handbook does not guarantee employment for any length of time and is not intended to induce an employee to accept employment with GCF.

The provisions contained herein supersede all prior policies and practices, written or unwritten, except insofar as they contradict any provision of law or written contract, in which event such law or contract shall prevail.

GCF reserves the right to unilaterally revise, suspend, revoke, terminate or change any of its policies, in whole or in part, whether described within this handbook or elsewhere, in its sole discretion. It is obviously not possible to anticipate every situation that may arise in the workplace or to provide information that answers every possible question. Every effort will be made to keep you informed of GCF's policies, however we cannot guarantee that notice of revisions will be provided. Feel free to ask questions about any information within this handbook.

1.3 AmeriCorps

In 1993, President Bill Clinton signed the National and Community Service Trust Act, which established the Corporation for National and Community Service and brought the full range of domestic community service programs under the umbrella of one central organization. This legislation built on the first National Service Act signed by President George H.W. Bush in 1990. It also formally launched AmeriCorps, a network of national service programs that engage Americans in intensive service to meet the nation's critical needs in education, public safety, health and the environment. The newly created AmeriCorps incorporated two existing national service programs: the longstanding VISTA (Volunteers in Service to America) program, created by President Lyndon Johnson in 1964 and the National Civilian Community Corps (NCCC). In September 1994, the first class of AmeriCorps members—20,000 strong—began serving in more than 1,000 communities. On July 3, 2003, President George W. Bush signed the Strengthen AmeriCorps Program Act, which nearly doubled the number of AmeriCorps members. By establishing new accounting guidelines for making Segal AmeriCorps Education Awards from the National Service Trust, the Corporation can now authorize approximately twice as many AmeriCorps positions in all categories. The legislation was the product of extensive, cooperative discussions with the Administration and a sign of the strong bipartisan support for AmeriCorps.
-Information taken from AmeriCorps web page. To learn more about AmeriCorps visit: www.americorps.gov

The Clean Energy Service Corps

The Clean Energy Service Corps is a thematic corps within AmeriCorps, created by the Serve America Act of 2009. GCF was founded to demonstrate the potential impact of this new strand of service in creating pathways to prosperity for urban young adults while engaging them to address critical needs related to fighting climate change and improving community environmental health. The Clean Energy Service Corps grew out of a national collaboration among representatives from service and conservation corps, the labor movement, climate justice activists, academics, advocates for justice reinvestment and leaders in the green jobs movement.

Our goal at GCF is to build a citywide corps in New York City that can serve as a model for the country and is an ally in the broader movement to build an inclusive green economy.

1.4 GCF Corps Member Manual

All employees will receive a copy of the GCF Corps Member Manual when they commence employment with GCF. Employees are expected to read the policies and practices thoroughly, and as appropriate, act in accordance with them at all times.

2. NATURE OF EMPLOYMENT

2.1 Employment At Will

The employment relationship between GCF and each of its employees is employment at-will. No policy or procedure in this handbook is intended to create a contract binding the employee or the employer to an agreement of employment for a specific period of time. You or GCF can terminate your employment at any time, with or without cause, and with or without notice. No representative of GCF, except for the Executive Director, can authorize or sign an employment agreement contrary to the above terms or otherwise make any binding offer of employment for a specific term.

Employees are free to resign at any time for any reason. GCF is free to determine at any time that continued employment of an employee is not in its best interest and to terminate the employment of that employee, with or without notice or cause.

2.2 Introductory Period

The first 90 days of employment are considered a trial period during which an employee's performance is carefully evaluated. Employment with GCF during the introductory period and at all other times is at-will. Just as at any other time, during this 90-day introductory period, an employee may be terminated at any time at GCF's sole discretion. In other words, an employee has no entitlement to a job during or after this introductory period. Although paid time off will begin to accrue from your first day of employment, in the first year of employment, employees may not take paid time off until after completion of the introductory period. Employees taking time off during the introductory period will be unpaid, except for holidays. Each employee will receive a performance appraisal by her/his supervisor upon the completion of the introductory period. The successful completion of the introductory period does not alter in any way the at-will nature of employment at GCF. The introductory period may be shortened at the discretion of the Executive Director.

2.3 Exempt

Exempt employees are salaried employees that are not eligible for overtime compensation under the Fair Labor Standards Act. Executive, administrative, and professional employees are generally exempt from the provisions of the Fair Labor Standards Act. Employees should consult with their supervisor if they have questions regarding their classification as an exempt employee.

2.4 Non-Exempt

Non-exempt employees are subject to the Fair Labor Standards Act. These employees are covered by wage and hour laws regarding minimum wage, overtime pay and hours worked. Non-exempt employees are eligible for overtime pay of not less than 1.5 times the regular hourly rate of pay for all hours worked over 40 per work week. For purposes of computing overtime, the work week is Monday – Sunday. Non-exempt employees must receive permission from their supervisor before working overtime.

Working overtime hours that have not been authorized in advance by a supervisor may result in disciplinary action, up to and including termination of employment. Employees should consult with their supervisor if they have questions regarding their classification as a non-exempt employee.

2.5 Part-Time, Full-Time or Temporary Status

Regular Full-Time: Regular full-time employees are those employees who are not temporary and have successfully completed the introductory period, and are regularly scheduled to work a full time schedule of at least 30 hours a week. These employees receive all legally mandated benefits and are generally eligible for all of GCF's discretionary benefits, subject to the terms, conditions and limitations of each benefit program.

Regular Part-Time: Regular part-time employees are those employees who are not temporary and have successfully completed the introductory period, and are regularly scheduled to work less than the full-time schedule of at least 30 hours a week. Regular part-time employees are eligible for some employee benefits as described in this handbook.

Temporary: Temporary employees are those employees who are hired on a short-term basis to work either part-time or full-time and are generally scheduled to terminate by a certain date or when a project is completed. Temporary employees who remain on duty past the scheduled termination remain classified as temporary. Temporary employees are not eligible for most employment benefits or leave as described in this handbook.

Seasonal: Seasonal employees are those employees who are hired on a seasonal basis to work either part-time or full-time and are generally scheduled to terminate when the season has ended. Seasonal employees are eligible for some employee benefits as described in this handbook.

2.6 Contractors/Consultants

An individual or company providing specific services for a predetermined period of time under the supervision of a GCF staff member is a contractor. Contractors are not staff members, are not eligible for employee benefits or leave and are paid via a 1099 form. Only the Executive Director or her designee may hire a person as a contractor or consultant.

3. EMPLOYMENT RELATIONSHIP

3.1 Standard Office Hours of Operation

GCF's standard office hours of operation are 9:00am to 5:30pm, Monday through Friday. Certain employees may need to work earlier and/or later, and/or from Tuesday through Saturday, depending on the requirements of work. Your supervisor will let you know your regular work schedule. It is the employee's responsibility to notify their supervisor as soon as possible if the employee will be late or unable to report to work. Ideally, employees will provide sufficient notice so that a contingency plan can

ED_016126_00000905-00009

be put in place. Given the nature of the work of GCF, most employees have some degree of latitude in their schedules to complete the variety of tasks encompassed by GCF's mission. All employees are expected to participate in various activities outside the hours of the standard work week to complete projects or assignments, as necessary. In addition, all employees are expected to be available for certain GCF events as their supervisors may direct.

Employees may request flextime. The decision to approve flextime is solely within the discretion of the Executive Director or the approving manager.

3.2 Overtime

To meet GCF's operational needs, it is sometimes necessary for GCF's employees to work beyond their regular work hours. GCF will try to give you reasonable notice in advance of the need for you to work additional hours. If you need to work in excess of 40 hours of work in a week, you may be eligible for additional compensation called "overtime." For purposes of computing "overtime", the work week is defined as Monday – Sunday. Only employees classified as non exempt will be paid overtime.

Non-exempt employees should only work overtime if they have been approved to do so in advance by their supervisor. Meal breaks and approved sick days are not considered hours worked; however, for the purposes of calculating overtime, paid GCF holidays are considered hours worked.

There is no overtime for exempt (salaried) employees. In cases where an exempt employee is required to work an extraordinary number of hours beyond the normal work- week, the Executive Director or approving manager may consider a request for compensatory time off. Compensatory time off is not an entitlement, but is granted at the discretion of the Executive Director or approving manager, and if granted, is not on an hour-by-hour basis and must be requested before being taken.

3.3 Pay Periods

Employees are paid semi-monthly. All required deductions, such as federal, state and local taxes, and all authorized voluntary deductions, will be withheld automatically from your paychecks. Employees are paid by check unless they elect to be paid by, and properly arrange for, direct deposit. Employees should review their paycheck each pay period for accuracy. If an employee discovers an error, they should notify their supervisor and the members of the finance department at finance@greencityforce.org so that it can be investigated, and corrected if it is determined that an error was made.

3.4 Time Sheets

Employees are required to keep accurate records of time worked. The total hours worked in a day should reflect actual hours worked. Time worked should be logged on time sheets on a daily basis. All time sheets must correspond to pay periods. Hours worked are verified by signatures of the employee and

their supervisor. Employees should consult their supervisor if they are unsure whether they need to maintain and submit time sheets.

3.5 Background Check

As an AmeriCorps program, GCF is responsible for complying with the Corporation for National Service's (CNCS) Criminal Record Checks regulations 45 CNR Parts 2510, 2522, 2540, 2551 and 2552. "[All] grantees must conduct at least two-part National Service Criminal History checks on participants and program employees in AmeriCorps, Foster Grandparents, Senior Companions, and any other programs funded by the CNCS under National Service laws. Beginning April 21, 2011, the law required that programs conduct three-part checks – including FBI, statewide repository, and sex offender registry checks – on individuals who will have recurring contact with vulnerable populations."

GCF complies with the CNCS by performing statewide criminal background checks, fingerprint checking against the FBI database as needed and checking the National Sex Offender Public Website for participants and program employees in AmeriCorps. These checks are authorized by candidates as part of the onboarding process and are initiated after the offer has been accepted and no later than the first day of service/work.

3.6 Non-Partisan Organization

GCF is a non-partisan organization and appreciates the support it has received from representatives of all political orientations. GCF does not contribute to, work for, endorse or oppose any political party or any specific elected officials or candidates for public office. Therefore, employees may not engage in political activity while on the job for GCF, while representing GCF or while in GCF uniform.

3.7 Partisan Activities of GCF Staff as Private Citizens

As private citizens, GCF employees and other members, such as board members, may support or oppose the elected officials, political party and candidates of their personal choice, as long as anything said or done is as a private citizen and not as a spokesperson (or implied spokesperson) for the GCF organization. Employees should be aware that even if they do not identify themselves as being with GCF, the media or the public might do so.

While charging time to the AmeriCorps program, accumulating service or training hours, or otherwise performing activities supported by the AmeriCorps program or CNCS, employees and Corps Members will not engage in any AmeriCorps prohibited activities including:

- o Attempting to influence legislation
- o Organizing or engaging in protests, petitions, boycotts or strikes
- o Assisting, promoting or deterring union organizing

ED_016126_00000905-00011

o Impairing existing contracts for services or collective bargaining agreements o Engaging in partisan political activities, or other activities designed to influence the outcome of an election to any public office
o Participating in, or endorsing, events or activities that are likely to include advocacy for or against political parties, political platforms, political candidates, proposed legislation or elected officials
o Engaging in religious instruction, conducting worship services, providing instruction as part of a program that includes mandatory religious instruction or worship, constructing or operating facilities devoted to religious instruction or worship, maintaining facilities primarily or inherently devoted to religious instruction or worship or engaging in any form of religious proselytization Providing a direct benefit to a business organized for profit, a labor union, a partisan political organization, a nonprofit that fails to comply with the restrictions contained in section 501(c)(3) of the Internal Revenue Code of 1986, or an organization engaged in the religious activities described above, unless the CNCS assistance is not used to support those religious activities
o Conducting a voter registration drive or using the CNCS funds to conduct a voter registration drive
o Providing abortion services or referrals for receipt of such services
o Such other activities as the CNCS may prohibit

3.8 Ethical Behavior/Conflicts of Interest

The highest standard of ethical conduct and fair dealing is expected of each employee and all others associated with GCF. It is important for all employees to carry out their responsibilities in an ethical manner and employees must avoid any interest, influence or relationship which might conflict, or appear to conflict, with the best interests of GCF or which might affect their judgment or loyalty.

Employees must avoid any situation in which their loyalty may be divided, and must promptly disclose any situation where an actual or potential conflict may exist. Examples of potential conflict situations include:

o Having a financial interest in any business transaction with GCF, either directly or through a third party
o Accepting gifts, entertainment or other benefit of more than a nominal value from those engaging in a business transaction with GCF

GCF supports the rights of employees to participate in activities outside the organization, provided that these activities do not constitute a conflict with GCF's interests or interfere with the employee's job performance. Employees must consult with the Executive Director or supervisor before accepting assignment to a position within another organization that might be construed as constituting a conflict of interest.

Employees are subject to any conflicts of interest or similar policy applicable to employees of GCF, and this policy does not supersede the terms of any such conflicts of interest or similar policy.

3.9 Fees and Honoraria

Any person employed by GCF, whether regular full-time, regular part-time, temporary or seasonal, who consults, lectures, counsels, advises, writes, publishes or otherwise represents GCF, or outside individuals or organizations on behalf of GCF, must remit all fees, royalties, donations or honoraria to GCF. In the event that an institution is required to write the payment to a specific individual and not an organization, the check may be written to the individual but then must be immediately signed over or, if paid in cash, given to GCF upon receipt. Any exceptions to this policy must be approved in advance, by the Executive Director or, in the case of the Executive Director, by the Board of Directors.

3.10 Immigration Reform and Control Act

The Immigration Reform and Control Act of 1986 requires an employer to certify to the U.S. Government that its employees are legally eligible to work in the United States. To comply with this law, you must provide, and an employer is required to examine and is permitted to copy, all original documents verifying your right to work in the U.S., including your U.S. Passport, Certificate of Citizenship, Social Security Card, Alien Registration Card, Birth Certificate and/or Driver's License. Upon being hired, you must complete the federal and state-required forms for employment, including tax withholdings and the federal Form I-9, Employment Eligibility Verification Form. Form I-9 verifies your identity and eligibility to work in the U.S. This form must be completed within three (3) business days from your date of hire.

3.11 Prohibition Against Violence in the Workplace

GCF strives to create and maintain a safe and productive working environment. Violence in the workplace is strictly prohibited and will not be tolerated. You are expected to comply with this policy, and appropriate disciplinary action will be taken against any individual who violates the policy. Based upon the seriousness of the conduct, disciplinary action may include verbal or written reprimand, suspension or termination.

As a representative of GCF, your conduct reflects not only on you, but also on the organization as a whole. There are some circumstances that, because of their serious, violent and/or destructive nature, cannot be tolerated under any circumstances, and may be grounds for immediate termination of employment. These circumstances include an assault or the verbal or physical abuse of another person or visitor in the workplace or in any work-related setting outside the workplace, including a business-related social function. Further, GCF has a zero-tolerance policy prohibiting weapons of any kind on the premises. If you become aware of the presence of a weapon on the premises, or are the victim or threatened target of abuse, please immediately contact your supervisor. If your supervisor is not available, you should immediately contact the Director of People Operations.

The names of individuals associated with your report and all information relating to your report will be held in confidence as much as possible to protect victims and witnesses against potential retaliation, as

well as to protect those who may be wrongfully accused. Such confidentiality will be maintained except to the extent that disclosure is required to investigate the report and determine its validity.

3.12 Solicitation and Distribution

In order to avoid unnecessary annoyances and work interruptions, solicitation by an employee of another employee is prohibited while either person is on working time. Employee distribution of literature, including handbills, in work areas is prohibited at all times. Trespassing, soliciting or distribution of literature by non-employees on these premises is prohibited at all times.

3.13 Policy on Sexual Harassment Prevention

Introduction:

Green City Force is committed to maintaining a workplace free from sexual harassment. Sexual harassment is a form of workplace discrimination. All employees are required to work in a manner that prevents sexual harassment in the workplace. This Policy is one component of Green City Force's commitment to a discrimination-free work environment. Sexual harassment is against the law [1] and all employees have a legal right to a workplace free from sexual harassment and employees are urged to report sexual harassment by filing a complaint internally with Green City Force. Employees can also file a complaint with a government agency or in court under federal, state or local anti-discrimination laws.

Policy:

1. Green City Force's policy applies to all employees, volunteers, Corps Members, applicants for employment, interns, whether paid or unpaid, contractors and persons conducting business, regardless of immigration status, with Green City Force. In the remainder of this document, the term "employees" refers to this collective group.

2. Sexual harassment will not be tolerated. Any employee or individual covered by this policy who engages in sexual harassment or retaliation will be subject to remedial and/or disciplinary action (e.g., counseling, suspension, termination).

3. Retaliation Prohibition: No person covered by this Policy shall be subject to adverse action because the employee reports an incident of sexual harassment, provides information, or otherwise assists in any investigation of a sexual harassment complaint. Green City Force will not tolerate such retaliation against anyone who, in good faith, reports or provides information about suspected sexual harassment. Any employee of Green City Force who retaliates against anyone involved in a sexual harassment investigation will be subjected to disciplinary action, up to and including termination. All employees, paid or unpaid interns, or non-employees [2] working in the workplace who believe they have been subject to such retaliation should inform a supervisor, manager, HR staff person, or the Executive Director or their designee. All employees, paid or unpaid interns or non-employees who believe they have been a target of such retaliation may also seek relief in other available forums, as explained below in the section on Legal Protections.

4. Sexual harassment is offensive, is a violation of our policies, is unlawful, and may subject Green City Force to liability for harm to targets of sexual harassment. Harassers may also be individually subject to liability. Employees of every level who engage in sexual harassment, including managers and supervisors who engage in sexual harassment or who allow such behavior to continue, will be penalized for such misconduct.

5. Green City Force will conduct a prompt and thorough investigation that ensures due process for all parties, whenever management receives a complaint about sexual harassment, or otherwise knows of

possible sexual harassment occurring. Green City Force will keep the investigation confidential to the extent possible. Effective corrective action will be taken whenever sexual harassment is found to have occurred. All employees, including managers and supervisors, are required to cooperate with any internal investigation of sexual harassment.

- All employees are encouraged to report any harassment or behaviors that violate this policy. Green City Force will provide all employees a complaint form for employees to report harassment and file complaints.
- Managers and supervisors are **required** to report any complaint that they receive, or any harassment that they observe or become aware of, to the Executive Director or their designee.

6. This policy applies to all employees, paid or unpaid interns, and non-employees and all must follow and uphold this policy. This policy must be provided to all employees and should be posted prominently in all work locations to the extent practicable (for example, in a main office, not an offsite work location) and be provided to employees upon hiring.

What Is "Sexual Harassment"?

Sexual harassment is a form of sex discrimination and is unlawful under federal, state, and (where applicable) local law. Sexual harassment includes harassment on the basis of sex, sexual orientation, self-identified or perceived sex, gender expression, gender identity and the status of being transgender.

Sexual harassment includes unwelcome conduct which is either of a sexual nature, or which is directed at an individual because of that individual's sex when:

- Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creating an intimidating, hostile or offensive work environment, even if the reporting individual is not the intended target of the sexual harassment;
- Such conduct is made either explicitly or implicitly a term or condition of employment; or
- Submission to or rejection of such conduct is used as the basis for employment decisions affecting an individual's employment.

A sexually harassing hostile work environment includes, but is not limited to, words, signs, jokes, pranks, intimidation or physical violence which are of a sexual nature, or which are directed at an individual because of that individual's sex. Sexual harassment also consists of any unwanted verbal or physical

advances, sexually explicit derogatory statements or sexually discriminatory remarks made by someone which are offensive or objectionable to the recipient, which cause the recipient discomfort or humiliation, which interfere with the recipient's job performance.

Sexual harassment also occurs when a person in authority tries to trade job benefits for sexual favors. This can include hiring, promotion, continued employment or any other terms, conditions or privileges of employment. This is also called "quid pro quo" harassment.

Any employee who feels harassed should report so that any violation of this policy can be corrected promptly. Any harassing conduct, even a single incident, can be addressed under this policy.

Examples of sexual harassment

The following describes some of the types of acts that may be unlawful sexual harassment and that are strictly prohibited:

- Physical acts of a sexual nature, such as:
  - Touching, pinching, patting, kissing, hugging, grabbing, brushing against another employee's body or poking another employee's body;
  - Rape, sexual battery, molestation or attempts to commit these assaults.

- Unwanted sexual advances or propositions, such as:
  - Requests for sexual favors accompanied by implied or overt threats concerning the target's job performance evaluation, a promotion or other job benefits or detriments;
  - Subtle or obvious pressure for unwelcome sexual activities.

- Sexually oriented gestures, noises, remarks or jokes, or comments about a person's sexuality or sexual experience, which create a hostile work environment.

- Sex stereotyping occurs when conduct or personality traits are considered inappropriate simply because they may not conform to other people's ideas or perceptions about how individuals of a particular sex should act or look.

- Sexual or discriminatory displays or publications anywhere in the workplace, such as:
  - Displaying pictures, posters, calendars, graffiti, objects, promotional material, reading materials or other materials that are sexually demeaning or pornographic. This includes such sexual displays on workplace computers or cell phones and sharing such displays while in the workplace.

- Hostile actions taken against an individual because of that individual's sex, sexual orientation, gender identity and the status of being transgender, such as:
  - Interfering with, destroying or damaging a person's workstation, tools or equipment, or otherwise interfering with the individual's ability to perform the job;

- Sabotaging an individual's work;
- Bullying, yelling, name-calling.

Who can be a target of sexual harassment?

Sexual harassment can occur between any individuals, regardless of their sex or gender. New York Law protects employees, paid or unpaid interns, and non-employees, including independent contractors, and those employed by companies contracting to provide services in the workplace. Harassers can be a superior, a subordinate, a coworker or anyone in the workplace including an independent contractor, contract worker, vendor, client, customer or visitor.

Where can sexual harassment occur?

Unlawful sexual harassment is not limited to the physical workplace itself. It can occur while employees are traveling for business or at employer sponsored events or parties. Calls, texts, emails, and social media usage by employees can constitute unlawful workplace harassment, even if they occur away from the workplace premises, on personal devices or during non-work hours.

Retaliation

Unlawful retaliation can be any action that could discourage a worker from coming forward to make or support a sexual harassment claim. Adverse action need not be job-related or occur in the workplace to constitute unlawful retaliation (e.g., threats of physical violence outside of work hours).

Such retaliation is unlawful under federal, state, and (where applicable) local law. The New York State Human Rights Law protects any individual who has engaged in "protected activity." Protected activity occurs when a person has:

- made a complaint of sexual harassment, either internally or with any anti-discrimination agency;
- testified or assisted in a proceeding involving sexual harassment under the Human Rights Law or other anti-discrimination law;
- opposed sexual harassment by making a verbal or informal complaint to management, or by simply informing a supervisor or manager of harassment;
- reported that another employee has been sexually harassed; or
- encouraged a fellow employee to report harassment.

Even if the alleged harassment does not turn out to rise to the level of a violation of law, the individual is protected from retaliation if the person had a good faith belief that the practices were unlawful. However, the retaliation provision is not intended to protect persons making intentionally false charges of harassment.

Reporting Sexual Harassment

Preventing sexual harassment is everyone's responsibility. Green City Force cannot prevent or remedy sexual harassment unless it knows about it. Any employee, paid or unpaid intern or non-employee who has been subjected to behavior that may constitute sexual harassment is encouraged to report such behavior to a supervisor, manager or the Executive Director or their designee. Anyone who witnesses or becomes aware of potential instances of sexual harassment should report such behavior to a supervisor, manager or the Executive Director or their designee.

Reports of sexual harassment may be made verbally or in writing. A form for submission of a written complaint is attached to this Policy, and all employees are encouraged to use this complaint form.

Employees who are reporting sexual harassment on behalf of other employees should use the complaint form and note that it is on another employee's behalf.

Employees, paid or unpaid interns or non-employees who believe they have been a target of sexual harassment may also seek assistance in other available forums, as explained below in the section on Legal Protections.

Supervisory Responsibilities

All supervisors and managers who receive a complaint or information about suspected sexual harassment, observe what may be sexually harassing behavior or for any reason suspect that sexual harassment is occurring, **are required** to report such suspected sexual harassment to the Executive Director or their designee.

In addition to being subject to discipline if they engaged in sexually harassing conduct themselves, supervisors and managers will be subject to discipline for failing to report suspected sexual harassment or otherwise knowingly allowing sexual harassment to continue.

Supervisors and managers will also be subject to discipline for engaging in any retaliation.

Complaint and Investigation of Sexual Harassment

All complaints or information about sexual harassment will be investigated, whether that information was reported in verbal or written form. Investigations will be conducted in a timely manner, and will be confidential to the extent possible.

An investigation of any complaint, information or knowledge of suspected sexual harassment will be prompt and thorough, commenced immediately and completed as soon as possible. The investigation will be kept confidential to the extent possible. All persons involved, including complainants, witnesses and alleged harassers will be accorded due process, as outlined below, to protect their rights to a fair and impartial investigation.

Any employee may be required to cooperate as needed in an investigation of suspected sexual harassment. Green City Force will not tolerate retaliation against employees who file complaints, support another's complaint or participate in an investigation regarding a violation of this policy.

While the process may vary from case to case, investigations should be done in accordance with the following steps:

- Upon receipt of complaint, the Executive Director or their designee will conduct an immediate review of the allegations, and take any interim actions (e.g., instructing the respondent to refrain from communications with the complainant), as appropriate. If the complaint is verbal, encourage the individual to complete the "Complaint Form" in writing. If he or she refuses, prepare a Complaint Form based on the verbal reporting.
- If documents, emails or phone records are relevant to the investigation, take steps to obtain and preserve them.
- Request and review all relevant documents, including all electronic communications.
- Interview all parties involved, including any relevant witnesses;
- Create a written documentation of the investigation (such as a letter, memo or email), which contains the following:
    - A list of all documents reviewed, along with a detailed summary of relevant documents;
    - A list of names of those interviewed, along with a detailed summary of their statements;
    - A timeline of events;
    - A summary of prior relevant incidents, reported or unreported; and
    - The basis for the decision and final resolution of the complaint, together with any corrective action(s).
- Keep the written documentation and associated documents in a secure and confidential location.
- Promptly notify the individual who reported and the individual(s) about whom the complaint was made of the final determination and implement any corrective actions identified in the written document.
- Inform the individual who made the report of the right to file a complaint or charge externally as outlined in the next section.

Legal Protections And External Remedies

Sexual harassment is not only prohibited by Green City Force but is also prohibited by state, federal, and, where applicable, local law.

Aside from the internal process at Green City Force, employees may also choose to pursue legal remedies with the following governmental entities. While a private attorney is not required to file a complaint with a governmental agency, you may seek the legal advice of an attorney.

In addition to those outlined below, employees in certain industries may have additional legal protections.

State Human Rights Law (HRL)

The Human Rights Law (HRL), codified as N.Y. Executive Law, art. 15, § 290 et seq., applies to all employers in New York State with regard to sexual harassment, and protects employees, paid or unpaid interns and non-employees, regardless of immigration status. A complaint alleging violation of the Human Rights Law may be filed either with the Division of Human Rights (DHR) or in New York State Supreme Court.

Complaints with DHR may be filed any time **within one year** of the harassment. If an individual did not file at DHR, they can sue directly in state court under the HRL, **within three years** of the alleged sexual harassment. An individual may not file with DHR if they have already filed a HRL complaint in state court.

Complaining internally to Green City Force does not extend your time to file with DHR or in court. The one year or three years is counted from the date of the most recent incident of harassment.

You do not need an attorney to file a complaint with DHR, and there is no cost to file with DHR.

DHR will investigate your complaint and determine whether there is probable cause to believe that sexual harassment has occurred. Probable cause cases are forwarded to a public hearing before an administrative law judge. If sexual harassment is found after a hearing, DHR has the power to award relief, which varies but may include requiring your employer to take action to stop the harassment, or redress the damage caused, including paying of monetary damages, attorney's fees and civil fines.

DHR's main office contact information is: NYS Division of Human Rights, One Fordham Plaza, Fourth Floor, Bronx, New York 10458. You may call Ex. 6 - Personal Privacy (PP) or visit: www.dhr.ny.gov.

Contact DHR at Ex. 6 - Personal Privacy (PP) or visit dhr.ny.gov/complaint for more information about filing a complaint. The website has a complaint form that can be downloaded, filled out, notarized and mailed to DHR. The website also contains contact information for DHR's regional offices across New York State.

Civil Rights Act of 1964

The United States Equal Employment Opportunity Commission (EEOC) enforces federal anti-discrimination laws, including Title VII of the 1964 federal Civil Rights Act (codified as 42 U.S.C. § 2000e et seq.). An individual can file a complaint with the EEOC anytime within 300 days from the harassment. There is no cost to file a complaint with the EEOC. The EEOC will investigate the complaint, and determine whether there is reasonable cause to believe that discrimination has occurred, at which point the EEOC will issue a Right to Sue letter permitting the individual to file a complaint in federal court.

The EEOC does not hold hearings or award relief, but may take other action including pursuing cases in federal court on behalf of complaining parties. Federal courts may award remedies if discrimination is found to have occurred. In general, private employers must have at least 15 employees to come within the jurisdiction of the EEOC.

An employee alleging discrimination at work can file a "Charge of Discrimination." The EEOC has district, area, and field offices where complaints can be filed. Contact the EEOC by calling Ex. 6 - Personal Privacy (PP) (TTY: Ex. 6 - Personal Privacy (PP) visiting their website at www.eeoc.gov or via email at info@eeoc.gov.

If an individual filed an administrative complaint with DHR, DHR will file the complaint with the EEOC to preserve the right to proceed in federal court.

Local Protections

Employees who work in New York City may file complaints of sexual harassment with the New York City Commission on Human Rights. Contact their main office at Law Enforcement Bureau of the NYC Commission on Human Rights, 40 Rector Street, 10th Floor, New York, New York; call 311 or Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) or visit www.nyc.gov/html/cchr/html/home/home.shtml.

Contact the Local Police Department

If the harassment involves unwanted physical touching, coerced physical confinement or coerced sex acts, the conduct may constitute a crime. Contact the local police department.

---

[1] While this policy specifically addresses sexual harassment, harassment because of and discrimination against persons of all protected classes is prohibited. In New York State, such classes include age, race, creed, color, national origin, sexual orientation, military status, sex, disability, marital status, domestic violence victim status, gender identity and criminal history.
[2] A non-employee is someone who is (or is employed by) a contractor, subcontractor, vendor, consultant, or anyone providing services in the workplace. Protected non-employees include persons commonly referred to as independent contractors, "gig" workers and temporary workers. Also included are persons providing equipment repair, cleaning services or any other services provided pursuant to a contract with the employer.

Policy adopted on October 9, 2018

4. EMPLOYEE BENEFITS AND LEAVE TIME

Eligible regular full-time, regular part-time, temporary, and seasonal employees may be entitled to receive paid time off, sick leave and other benefits as described in this handbook. Some benefits are provided to eligible employees by law. GCF reserves the right to amend, rescind or terminate discretionary benefits at any time. Direct supervisors and the Director of People Operations can help employees identify programs for which they are eligible. More information can be found below as well as in documents provided separately when employees enroll in the plans.

4.1 Insurance

GCF offers regular full-time employees (working at least 30 hours per week), regular part-time employees (working between 25 and 29 hours), and seasonal employees (either full-time or part-time) medical, dental, vision and life insurance.

Medical Coverage: Eligible immediately upon starting employment. Dental & Vision Coverage: Eligible upon completion of one month of employment. Life Coverage: Eligible upon completion of one month of employment.

4.2 Attendance and Absences

GCF expects employees to be at work during normal working hours contributing to the work of GCF. An employee who is unable to report for work, or who will be late coming to work or will be leaving early, should notify their supervisor as soon as they are aware of the situation so that alternative plans can be made. Regular attendance is required for all employees. Continued lateness or absenteeism will result in disciplinary action, including dismissal.

4.3 Holidays

Regular full-time employees and regular part-time employees working 20 or more hours a week are eligible for holiday pay. Part-time employees will receive pay only for the number of hours they would have regularly worked if the holiday had been a work day.

New Year's Day* (January 1)
Presidents Day (third Monday in February)
Memorial Day (last Monday in May)
Independence Day* (July 4)
Labor Day (first Monday in September)
Indigenous Peoples Day (second Monday in October)
Veterans Day* (November 11)
Thanksgiving Day (fourth Thursday in November)
Day after Thanksgiving

Day before Christmas
Christmas Day*

*If these holidays fall on a Saturday, the preceding Friday will be a paid holiday. If they fall on a Sunday, the following Monday will be a paid holiday.

In addition to the above holidays, GCF has occasional special holidays. Employees who are required to work on a special GCF holiday may receive approval from their supervisor to take another day as a holiday, which must be taken within 30 days of the special holiday. GCF will announce and confirm any such special holidays.

Employees who wish to observe a religious holiday that is not on the schedule of paid holidays can either take the day as paid time off day, or exchange it for another GCF paid holiday, with prior approval from their supervisor to take the religious holiday as a paid day and work through a specified paid holiday.

GCF commemorates Martin Luther King, Jr. Day and Juneteenth as days of service and provides opportunities for employees to serve together to commemorate its legacies in the service of others to work towards positive social change. Thus, Dr. Martin Luther King, Jr. Day and Juneteenth are not GCF paid holidays and are not GCF special holidays.

Winter Holiday Closing
Unless required to work, all GCF worksites will be closed on the days following Christmas Day to the end of the year (December 28 – 31). The closing may be adjusted based on the day of the week each holiday falls on.

4.3.1 Holiday Pay Policy for Temporary Employees

Eligibility
Temporary Employees are eligible for holiday pay if the Temporary Employee:

- Works 20 or more hours per week,
- Worked for Green City Force for at least thirty (30) days,
- Is in good standing with the organization.

For Temporary Employees, good standing in the GCF organization shall mean:

- Meets expectations on their Work Performance Evaluation after their thirty (30) day,
- Has at least 90% on-time attendance track record, and
- Has no written warnings during the month of and the month prior to the holiday

i.e. In order to receive holiday pay for Christmas Day, the temporary employee must not have any written warnings for the months of November and December.

Any holidays that fall within the thirty (30) days will NOT be paid. Additionally, in order to receive holiday pay, the Temporary Employee must work their scheduled shifts before and after the holiday.

4.4 Paid Time Off

GCF recognizes the importance of providing you with time for rest and relaxation. We fully encourage you to get this rest by taking your paid time off (PTO).

Regular full-time employees are eligible to take accrued PTO after completion of their 90- day introductory period. Foreseeable time off should be planned and communicated to your supervisor well in advance so that arrangements can be made to cover your work responsibilities while you are absent. PTO banks are reset every calendar year. No more than 5 PTO days may be carried over to the first quarter of the following calendar year. Employees who take PTO must use the PTO in increments of four (4) hours.

PTO Allowances

Category	Year 1 - 2	Year 3
Executive Management and Directors	25 days	30 days
Salaried, Exempt	20 days	25 days
Salaried, Non-exempt	20 days	25 days

Accrual: Regular full-time employees accrue one-twelfth of their annual PTO at the end of each month of employment. PTO can be taken in advance of accrual (up to the amount an employee is eligible to accrue in a calendar year), with the approval of the employee's supervisor. Any exceptions to the above PTO chart must be approved by the Executive Director in writing. Regular part-time and seasonal employees accrue PTO days according to the same schedule, but it is prorated based on the percentage of a 40-hour work-week that they work.

All employees who begin employment after the start of the calendar year accrue PTO according to the same schedule, but it is prorated based on the portion of the calendar year that they work. Employees will not earn PTO time while they are on suspension or unpaid leave.

4.5 Safe and Sick Leave

GCF is subject to New York City's Paid Safe and Sick Leave Law, which provides employees up to 40 hours of paid leave each calendar year. The Notice of Employee Rights will be given to each employee at the commencement of her/his employment. For regular full-time, part-time and seasonal employees, the PTO allowances in Section 4.4 satisfy the Paid Safe and Sick Leave Law, and therefore encompass sick leave allocation. For temporary employees, the Paid Safe and Sick Leave Law applies.

Temporary employees must provide reasonable advance notice to GCF of the employee's need for safe and sick leave. The employee needs to provide the notice to their supervisor. If the need for safe and sick leave is foreseeable, such as for doctor visits, scheduled surgery or regularly scheduled therapy sessions, then the employee should make the request to their supervisor with as much advance notice as possible. GCF may request documentation if more than three workdays in a row are used.

Accrual

Temporary employees who take safe and sick leave may use safe and sick leave as it is accrued and are **no longer** required to take safe and sick leave in increments of four (4) hours. Paid Safe and Sick Leave is accrued at a rate of 1 hour for every 30 hours worked. Accrual begins from the first 30 hours worked up to a maximum of 40 hours per calendar year. Employees may carryover up to 40 hours of unused safe and sick leave to the following calendar year.

4.6 Bereavement Leave

GCF provides time away from the office in the event an employee suffers the loss of a family member. Full-time employees are provided up to 3 days of Bereavement Leave with pay per calendar year in the event of a death in your immediate family. Part-time employees will receive pay only for the number of hours they would have regularly worked if the bereavement leave day had been a workday.

For the purposes of the Bereavement Leave policy, immediate family is defined as: spouse, domestic partner, partner in a civil union, child, parent, brother, sister, grandchild, grandparent, mother-in-law, father-in-law or a person who is legally acting as one of the above. Any other relative living in your residence at the time of death will also be considered immediate family. Bereavement leave is in addition to all other paid leave time provided to regular employees.

4.7 Procedure for Use of Leave Time

Requests for PTO must be submitted to the employee's supervisor for approval. GCF requests that employees also notify their supervisors in advance of any scheduled sick days or bereavement leave. Employees should ensure their approved PTO, sick or other approved days off are recorded on the PTO Calendar.

Based upon organizational needs, every effort will be made to grant an employee the PTO and sick days on the dates requested. The Executive Director or the employee's approving manager has final approval of PTO and sick leave days, and approval must be granted before days may be taken, in accordance with the policies set forth in this handbook.

4.8 Family/Medical Leave

Employees who have worked at GCF for one year (12 months) and performed a minimum of 1250 hours of work are eligible for up to 12 work weeks of unpaid family and medical leave during a rolling 12-month period for the following reasons:

- o Birth of a child of the employee and in order to care for such child within one year of birth;
- o Placement of a son or daughter with the employee for adoption or foster care; o To care for the employee's spouse, domestic partner, son, daughter or parent who has a serious health condition; or
- o Employee's own serious health condition that renders that employee incapable of performing the functions of their job.

Employees are required to give as much notice as possible when requesting family and medical leave. GCF may deny or delay a request for leave when adequate notice is not given. Employees must apply all accumulated paid leave before using unpaid family and medical leave. After paid leave is expended, GCF will award unpaid leave time to complete the 12- week period. The combination of paid and unpaid family leave may not exceed 12 weeks in any 12- month period. This 12-month period is a rolling period to be measured from the date an employee first commences family and medical leave.

Employees on leave retain previously accumulated benefits while on leave, but will not accrue seniority or additional employment benefits during the period of time they are away on unpaid leave. Employees will be allowed to continue coverage under any group health plan on the same basis as if they continued employment. If the employee normally pays all or part of the premiums for such benefits (including payment via payroll deduction), the employee must make arrangements for continued payment of such premiums during the period of unpaid family and medical leave.

In the case of birth or placement of a child for adoption or foster care, leave must be concluded within 12 months of the child's birth or placement with the employee. In cases where both partners are employed by GCF, their total leave in any 12-month period will be limited to 12 weeks.

An employee's request for leave based on her/his own serious health condition or that of a family member must be supported by the certification of a healthcare provider. Employees returning from family and medical leave taken because of the employee's own serious health condition may be required to provide a fitness-for-duty certification from the employee's health care provider in order to be restored to employment.

An employee may be allowed to take leave on an intermittent or reduced schedule if they have a serious health condition or that of a qualifying family member renders such a schedule medically necessary. If an employee qualifies for intermittent or reduced schedule leave, they may be required to transfer temporarily to an alternative position for which they qualify and which better accommodates the

ED_016126_00000905-00026

required periods of leave than does her/his regular position. If an employee fails to return to work after their leave is exhausted, the employee will be required to repay GCF for benefit payments made on the employee's behalf unless the failure to return is due to circumstances beyond the employee's control.

4.9 Paid Family Leave (PFL)

Overview

The New York Paid Family Leave provides eligible employees with job-protected, paid time off so you can:

- o Bond with a newly born, adopted or fostered child

  New Child: GCF eligible employees can take PFL during the first 12 months following the birth, adoption, or fostering of a child. Expectant mothers cannot take PFL for their own pregnancy before the birth of a child.
- o Care for a close relative with a serious health condition

  Serious Illness: GCF eligible employees can take PFL to care for a close relative with a serious health condition. A close relative includes a spouse, domestic partner, child and stepchild, parent and stepparent, parent-in-law, grandparent, and grandchild. These relatives can live outside of New York State and even outside the country. You may not take PFL for your own health condition.
- o Assist with family situations when a family member is deployed abroad on active military service

  GCF eligible employees can take PFL to assist with family situations arising when your spouse, domestic partner, child, or parent is deployed abroad on active military service or has been notified of an impending military deployment abroad. You may not take PFL for your own qualifying military event.

You can continue your health insurance while on leave and are guaranteed the same or comparable job after your leave ends. If you contribute to the cost of your health insurance, you must continue to pay your portion of the premium cost while on Paid Family Leave

Eligibility

All eligible GCF employees are entitled to participate in Paid Family Leave.

- o Full-time employees: Employees who work a regular schedule of 20 or more hours per week are eligible after 26 consecutive weeks of employment
- o Part-time employees: Employees who work a regular schedule of less than 20 hours per week are eligible after working 175 days, which do not need to be consecutive.

Employees are eligible regardless of citizenship and/or immigration status

Process to Request PFL

You must give your Supervisor and the Director of People Operations 30 days' notice of your intent to use PFL. Please complete the Approval of Request Form, and submit it to your supervisor to be approved. Once approved, you may submit the PFL Application to the Director of People Operations.

The Approval of Request Form and the PFL Application can be obtained from the Director of People Operations.

4.10 Military Leave

You will be granted military leave according to applicable law. Please notify your supervisor of your need for military leave immediately upon receipt of your notice to report to duty. If you wish to return to work at the conclusion of your military leave, you must apply for re-employment upon return from military service. You will not be paid by GCF while you are on military leave. You may, however, use annual leave time to cover the period of your leave.

GCF will grant any employee regularly working an average of twenty (20) hours per week or more whose spouse is a member of the U.S. Armed Forces, National Guard or Reserves who has been deployed during a period of war as declared by the U.S. Congress, or in which a member of the Reserve component of the U.S. Armed Forces is ordered to active duty, to a combat theatre, or to a combat zone, ten (10) days of unpaid leave when the spouse serving in the military is on leave.

GCF will not discriminate in any way against employees who request a leave of absence for this purpose.

4.11 Jury Duty

A leave of absence for jury duty will be granted to any employee who has been notified to serve. GCF will pay its regular full-time and regular part-time employees the difference between their regular pay and their jury pay up to a maximum period of two (2) weeks. If a temporary employee is scheduled to work during any or all of the first three (3) days of jury duty, GCF will pay the employee $40 per day if the employee has been employed by GCF for fewer than 60 calendar days, or the amount GCF expected to pay them for those scheduled work days if the employee has been employed by GCF for 60 days or more. You are required to show your supervisor the jury subpoena as soon as possible prior to the date your jury duty begins. You should also call in daily to report your status and must return to work during any regular office hours when you are excused from jury duty. You will be expected to return to the office when you are dismissed from the jury pool. GCF will not discriminate in any way against employees on account of jury service.

4.12 Voting

Regular full-time employees who do not have sufficient time outside of their regular working hours to vote in an election may request time off to vote. If possible, employees should make their request at least 2 days in advance of the election. Up to 3 hours of paid time off will be provided, at the beginning or end of the employee's regular shift, whichever will allow the most free time for voting and the least time off of work. GCF will not discriminate in any way against employees who request time off for this purpose.

4.13 Right to Express Breast Milk at Work

GCF will provide reasonable unpaid break time or permit female employees to use paid break time each day to express breast milk for their nursing children for up to three (3) years following the birth of each child. GCF will make reasonable efforts to provide a private room or other location, in close proximity to the work area, where female employees can express breast milk for their children. GCF will not discriminate in any way against female employees who exercise their right to express breast milk in the workplace.

4.14 Blood Donation Leave

GCF will provide leave time for the purpose of donating blood. Employees taking leave to donate blood off premises shall be permitted at least one (1) unpaid leave per calendar year of three (3) hours duration during their regular work schedule. GCF requires employees to show either proof of their blood donation or of their good-faith effort at blood donation to be eligible for the leave. GCF will not discriminate in any way against employees who request leave for this purpose.

4.15 Bone Marrow Donation Leave

GCF will provide unpaid leave time for an employee to undergo a medical procedure to donate bone marrow, which leave time will be determined by the employee's physician up to a maximum of twenty-four (24) hours. GCF may require that the employee's physician verify in writing the purpose and duration of each bone marrow donation leave. When a bone marrow donation procedure is scheduled and the employee intends to take leave under this policy for this procedure, the employee must notify their supervisor and the People Administration and Operations department in writing of their intent to take leave as soon as possible, but in no event less than twenty-four (24) hours prior to the day of procedure. In the event of an unscheduled or emergency bone marrow donation procedure for which an employee intends to take leave under this policy, the employee must notify their supervisor and the People Administration and Operations department in writing of their intent to take leave as soon as possible after the employee is notified of the request to donate. GCF will not discriminate in any way against employees who request leave for this purpose.

4.16 Extended Health Care Coverage (COBRA)

GCF employees and other qualified beneficiaries are entitled to temporary extensions of employer-sponsored group health (including dental and vision, if applicable) coverage (called "continuation coverage") at group rates in certain instances where coverage under the plan would otherwise end. A qualified beneficiary includes the employee, the employee's spouse, and the employee's dependent children (including children born or adopted during the continuation coverage period).

This policy is intended to inform employees of their rights and obligations under the law with respect to continuation coverage. Both employees and their covered dependents should take the time to read the following information carefully.

Qualifying Events Employees covered by GCF's health plan have the right to elect continuation coverage if they lose their group health coverage because of a reduction in their hours of employment or the termination of their employment (for reasons other than their gross misconduct).

The spouse or dependent child of an employee covered by GCF's health plan also has the right to elect continuation coverage if they lose group health coverage under GCF's health plan for any of the following reasons:

- o the death of the employee;
- o a voluntary or involuntary termination of the employee's employment (for reasons other than gross misconduct) or reduction of hours worked that renders the employee ineligible for coverage;
- o divorce or legal separation of the employee;
- o the employee becomes enrolled in Medicare; or
- o the dependent child ceases to be a "dependent child" under GCF's health plan.

Notification Procedure Under the law, the employee or spouse must inform the Director of People Operations of a divorce, legal separation, or a child losing dependent status under GCF's health plan within sixty (60) days of the later of (i) the date of the event or (ii) the date on which coverage would end under GCF's health plan because of the event. GCF must notify the various insurance carriers of the employee's death, termination, reduction in hours of employment or Medicare enrollment.

When the Director of People Operations is notified that one of these events has occurred within the time specified, the Director of People Operations will notify the employee or other qualified beneficiaries that they have the right to elect continuation coverage. The employee or qualified beneficiaries have at least sixty (60) days from the date they would lose coverage due to one of the events described above to inform the Director of People Operations of the decision to elect continuation coverage. If an employee or other qualified beneficiary elects continuation coverage within the sixty (60) day period, coverage will be retroactively reinstated to the date coverage was terminated, without penalty, upon payment of the premiums due. The employee or other qualified beneficiary has forty-five (45) days after the election to pay the premiums due.

To obtain coverage for children born or adopted during the continuation coverage period, the employee must complete an enrollment form for the child and submit it to theDirector of People Operations within thirty (30) days of the birth or adoption.

Period of Continuation Coverage: If an employee or other qualified beneficiary elects continuation coverage, GCF is required to provide coverage that is identical to the coverage then provided under its plan to similarly-situated employees or other qualified beneficiaries. The law requires that the employee

or other qualified beneficiary be afforded the opportunity to purchase continuation coverage for up to thirty-six (36) months.

Termination of Continuation Coverage: The law also provides that continuation coverage may be terminated for any of the following reasons:

- o GCF no longer provides group health coverage to any of its employees.
- o The employee or other qualified beneficiary fails to make premium payments on time.
- o The employee or other qualified beneficiary becomes covered under another group health plan that does not contain a valid exclusion or limitation with respect to any preexisting condition they may have. If the employee or other qualified beneficiary becomes covered under another group health plan, they must notify the Director of People Operations immediately.
- o The employee or other qualified beneficiary becomes enrolled in Medicare. The employee's spouse or dependent children who are not enrolled in Medicare may remain enrolled under continuation coverage.

Cost of Continuation Coverage: An employee or other qualified beneficiary is not required to show that they are insurable in order to elect continuation coverage. However, under the law, the employee or other qualified beneficiary must pay the entire premium for continuation coverage.

The cost of the premium will be the same rate GCF pays plus a plan administration fee of 2%. Coverage and premiums are subject to change, reflecting increases or decreases in coverage or premiums for active employees.

Questions about this benefit should be directed to the Director of People Operations. If an employee or other qualified beneficiary experiences a change in marital status or address, they should notify the Director of People Operations.

4.17 Short-Term Disability Insurance

GCF provides a Short-Term Disability Insurance plan to regular full-time employees and regular part-time employees who are unable to work because of a non-work-related injury or illness. Benefits normally begin on the eighth consecutive calendar day of disability and generally are payable for up to a maximum of twenty-six (26) weeks.

Disabilities arising from pregnancy, a pregnancy-related illness or childbirth are covered under the short-term disability insurance plan.

Details of the Short-Term Disability Insurance plan including benefit amounts, when benefits are payable, and limitations, restrictions and other exclusions are described in the documentation provided to eligible employees. Contact the Director of People Operations for more information about short-term disability insurance.

4.18 Workers' Compensation Insurance

All GCF employees are covered by Workers' Compensation Insurance when performing their job duties. Accidents occurring or injuries sustained while on the job at GCF, even if they seem minor at the time, must be reported immediately (within twenty-four (24) hours) to a supervisor, the Director of People Operations so that the appropriate paperwork can be filed with the insurance carrier. The insurance carrier may require examination and treatment by a physician.

4.19 Unemployment Insurance

GCF employees are covered under New York State Unemployment Insurance, for which GCF pays the entire cost. Unemployment Insurance is generally available to employees whose employment with GCF has been terminated or whose hours have been reduced through no fault of their own. To qualify for temporary income benefits under this insurance, an employee must have worked a certain number of hours prior to termination, earned a certain amount of income in covered employment, be ready, willing and able to work, and actively looking for work at the time the employee applies for benefits.

See the claimant handbook for more information on New York State Unemployment Insurance Benefits.

4.20 Social Security and Medicare (FICA)

All GCF employees are covered for Social Security and Medicare under the Federal Insurance Contribution Act ("FICA"). Employee contributions are established by law and automatically deducted from each paycheck, with GCF contribution an equal amount on behalf of each employee. Generally, employees are eligible to receive a monthly income from Social Security when they retire or in the event that they become totally or permanently disabled. Family benefits are also available in the event of a covered employee's death.

4.21 Commuter Benefits

GCF provides all regular full-time and full-time equivalent employees with the option to enroll in GCF's commuter benefits program. Enrollment information is provided to each eligible employee at the beginning of their employment. Contact the Director of People Operations for more information about commuter benefits.

5. EMPLOYEE RESPONSIBILITIES

5.1 Professional Behavior

Employees are expected to demonstrate sound judgment and common sense as professionals in the workplace and while representing GCF in all community settings. The guidelines below describe expected behavioral standards. The following examples are not intended to constitute an all-inclusive list.

- o Adhering to GCF culture, AmeriCorps rules and abiding by all policies outlined in this handbook and, as applicable, in the Corps Member Manual
- o Treating partners, donors, guests, other employees, Corps Members and volunteers of GCF respectfully and courteously
- o Representing GCF in a positive and professional manner at all times

Weapons of any kind are strictly prohibited on GCF premises or service sites. Physical fighting and excessive verbal arguing are prohibited.

If an employee's performance, work habits, overall attitude, conduct or demeanor becomes unsatisfactory in the judgment of GCF, measured in light of the behavioral expectations listed above or any other GCF policies or practices, the employee will be subject to disciplinary action, up to and including termination of employment without prior warning, at the sole discretion of GCF. A record of all violations and disciplinary actions will be placed in the employee's personnel file.

5.2 Dress Code

At all times, employees are expected to present a neat, clean and site-appropriate image and to exercise good judgment in applying the dress code policy. Whenever an employee interacts with donors, other employees, volunteers or outside guests, or represents the organization in a public setting, they should dress appropriately for the standards of the organization they are visiting or the function they are attending.

Any form of clothing that is revealing, unkempt or that carries an offensive message is considered unacceptable attire. If an employee comes to work in unacceptable attire, the supervisor may ask the employee to go home, change clothes and then return to work in acceptable attire.

There are three categories of dress at GCF: the uniform and business-casual attire, and GCF office attire.

1. **<u>The GCF Uniform: Dress Code for GCF Service Sites and Service Outreach Activities</u>**

While engaged in GCF service activities, GCF employees wear the uniform as a public symbol of our organizational commitment to service.

Service staff who work with Corps Members at service sites will receive a standard-issue staff uniform and are expected to wear the full uniform while supervising service activities.

All staff members who are visiting service sites or engaging in outreach/ recruitment activities related to service are expected to wear a GCF top with casual pants- khakis, cargos or other durable fabrics are all appropriate. <u>Jeans are not permitted</u> while participating in/ supporting GCF service and outreach activities.
Additionally:

ED_016126_00000905-00033

- Attire should be clean and pressed for a neat presentation
- GCF T-shirts must be tucked in at all times. GCF polo-shirts, sweatshirts, and hoodies may be worn untucked
- Pants should have no visible tears and must be worn at waist level
- Hats with visible brands/logos (other than AmeriCorps and GCF) are not permitted; plain solid color hats are allowed so long as no logos/brands are visible.
- Remove all headwear (hats, head wraps, and scarves, etc) when indoors (unless worn for religious purposes)
- Necklaces must be tucked into shirts at all times (this is for safety reasons)
- Laces on footwear must be tied,
- No defacing the uniform - staff are responsible for replacing defaced parts

2. Dress Code for Business Casual Attire

Staff members are expected to wear business casual attire while attending meetings with external partners, and when attending training or meetings with Corps Members, such as Green City Academy, where Corps Members are also expected to wear business casual attire.

See guidance below:
Business casual attire:

Yes	No
• Jackets (optional, but not required) • Button-up shirts, polos (short or long sleeve) • Sweaters (crew, turtle, cardigan, V-neck or vests) • Blouses • Skirts (no shorter than 4 inches above the knee) • Dresses (no shorter than 4 inches above the knee) • Trousers • Dress khakis (properly laundered/pressed) • Slip-on or lace-up shoes or boots. Sandals	• Jeans or shorts • Any denim attire (e.g., shirt, pants, jackets, skirts, etc.) • T-shirts, halter tops, spaghetti straps or backless/ revealing clothing • Sweatshirts, sweatpants, leggings or exercise clothing • Running suits/Tracksuits • Wrinkled clothes or clothing with visible tears or holes • Sneakers, running shoes, beach-type sandals • Theme boots (cowboy or motorcycle) • Overly high heels (>4") • Shirts with writing or slogans (except small manufacturers' logos)

3. Dress Code for Working in the GCF Office

Employees are expected to present a neat and tidy appearance when working at the GCF office. They may wear jeans that have no visible holes or tears, and any of the business-casual appropriate tops, such as sweaters, button-down shirts, and blouses, and business-casual appropriate shoes.

5.3 Staff Meetings and Training Events

Regular staff meetings provide the opportunity for employees to come together to learn about each other's projects and accomplishments and to discuss issues of importance to the entire staff. Employees should attend scheduled staff meetings and reschedule all other job duties accordingly.
An employee's supervisor may require the employee to attend training and development sessions, as well as other important GCF events

5.4 Driving

Employees whose position requires driving an automobile are required to have a valid driver's license, provide a copy of it annually to GCF and to have a good driving record. Employees are required to drive the vehicle safely and to prevent the keys from being in Corps Members' or non GCF staffs' possession. Corps Members may not drive vehicles on GCF business. Employees will be reimbursed for all pre-approved GCF related parking expenses such as meters and parking lots. Therefore, parking tickets should be prevented, and employees are personally responsible for paying, within 20 days, any parking tickets or traffic violations they incur while using a vehicle for GCF business.

5.4.1 GCF Automobile Usage Policy

Driver Eligibility:

(1) Only employees with a valid driver's license and good driving record are eligible to operate a GCF vehicle or private vehicle for GCF business purposes.

GCF Corps Members are strictly prohibited from operating any vehicle for GCF business purposes

Vehicle Eligibility:

(2) All vehicles must meet the legal standards for insurance, maintenance, and passenger and driver safety.

Owners of private vehicles are responsible for confirming the safety and operable condition of their vehicle and for submitting all documentation requested by the Director of People Operations.

The Director of People Operations will verify whether GCF drivers and vehicles meet the standards for driver and vehicle eligibility. Requested documentation may includes:

- A valid driver's license
- A copy of driving record/ history
- DMV vehicle inspection history

Use of GCF Vehicles for Business Purposes

(3) Employees may be eligible to drive GCF vehicles for approved business purposes. Approved business purposes include:

- Transporting materials and equipment to and from worksites and event-sites, this includes travel to purchase materials and equipment for work-purposes
- Transportation of staff, Corps Members, and ATEs to approved program activities. For example, an employee may obtain approval to provide transportation to employees attending a GCF-sponsored event. The driver is responsible for confirming that there are enough seatbelts for each passenger.
- Travel required for the servicing and maintenance of GCF vehicles

Approval for Driving GCF Vehicles:

(4) **Employees must be pre-cleared before driving a GCF vehicle.** All employees whose jobs require regular driving of GCF vehicles must submit a copy of their driver's license to the Director of People Operations to be pre-cleared for driving and added to the GCF Automobile Insurance Policy.

(5) Employees are required to inform their supervisors of any changes that may affect their ability to meet the standards of this policy, and may lose their clearance to drive GCF vehicles

Use of Non-GCF Vehicles for Business Purposes

(6) Employees may also request to rent a car for approved business purposes, the cost of the rental must be approved in advance by a supervisor. Supervisors may approve costs for vehicle rentals up to a maximum of $10 per hour and $90 per day for a zipcar, and up to $125 for an overnight car rental.

(7) Employees who wish to use their personal vehicle for approved business purposes must obtain clearance from their supervisor, and may submit a reimbursement form for mileage. Time spent commuting to and from work at the start and end of the day is not eligible for reimbursement.

GCF Safe Driving Requirements

(8) All drivers, whether operating a GCF vehicle, personal vehicle, or rental, are expected to exercise due diligence to drive safely and follow all traffic laws, avoid distractions while driving (such as using cellular telephones), and to maintain the security of the vehicle and its contents.

(9) Employees are responsible for any driving infractions or fines that result from their driving and must report any tickets, citation, and fines to their supervisors.

(10) Employees are not permitted, under any circumstances, to operate a GCF vehicle (GCF rented or owned), or a personal vehicle for GCF business, when any physical or mental impairment causes the employee to be unable to drive safely. This prohibition includes circumstances in which the employee is temporarily unable to operate a vehicle safely or legally because of illness, medication, or intoxication.

Transporting Corps Members

(11) Approved drivers may NOT use GCF, rented, or personal vehicles to provide transportation to Corps Members EXCEPT for approved transportation between worksites.

Parking

(12) Employees using GCF vehicles are responsible for parking the vehicle in a secure location. GCF provides a regular parking location at their 630 Flushing Avenue offices. Employees who choose to park the vehicle in another location are responsible for ensuring the location is secure and that the vehicle is parked legally. Employees will be responsible for fees associated with parking violations.

Repeated parking and driving violations will result in disciplinary action, up to and including employee termination.

Reimbursable Expenses

(13) Employees driving on GCF business may claim reimbursement for parking fees and tolls actually incurred. In addition, employees driving GCF vehicles may claim reimbursement for gasoline and other expenses directly incurred for business purposes. All requests for reimbursement must be approved by the employee's supervisor.

- Parking Fees: up to $25.00 for day rates and $50.00 for overnight parking
- Mileage (includes gas): $0.585 per mile driven for approved work purposes

Reporting Theft or Damage:

(14) Employees must report any accident, theft, damage, breakdown, or mechanical problem involving a GCF vehicle or a personal vehicle used on GCF business to their supervisor and the Finance and Operations Department, regardless of the extent of damage. These reports must be made as soon as possible but no later than twenty-four hours after the incident.

Employees are expected to cooperate fully with authorities in the event of an accident

Tracking Driving Time for Nonexempt Employees:

(15) Time spent by nonexempt employees (those covered by the minimum wage areplacend overtime provisions of the Fair Labor Standards Act) in driving a GCF or personal vehicle on The Corps business during normal working hours is considered hours worked for pay purposes.

Commuting To and From Work Sites

(16) All employees are responsible for arranging their own travel to and from GCF worksites at the start and end of their workday in such a way that they can adhere to the work schedule set forth by the organization. Employees may request travel accommodation under the following circumstances, subject to approval by their supervisor:

- Medical condition or injury, verified by a doctor's note
- The issuance of an official travel advisory due to unsafe travel conditions

All costs for travel between home and GCF worksites are the responsibility of the employee. Commuting time before the start and after the end of the workday is not treated as work time for pay purposes.

5.4.2 Zipcar Policy

Eligibility

All permanent employees, who hold a valid driver's license and have a clean driving record for at least 1 year, are eligible to request the use of a zipcar under the following conditions, and subject to your Managers approval:

- Transport work supplies and materials when the GCF van is in use
- Travel to and from multiple GCF worksites where scheduling or logistics does not allow for the use of public transportation.

ED_016126_00000905-00037

A clean driving record shall mean that the driver should not have been arrested on charges of violating vehicle and traffic laws (e.g.driving under the influence of drugs or alcohol). Clean driving records must be submitted to the Director of People Operations annually. To obtain your NYS DMV record, visit https://dmv.ny.gov/dmv-records/dmv-records.

The GCF Zipcar account may NOT be used to:

- Provide regular transportation to and from worksites as part of a regular commute
- Perform personal errands and non-work related activities
- In lieu of public transportation

GCF retains the right to assign and revoke employee access to the GCF zipcar account, at our discretion. Access may be revoked for the following reasons:

- The driver has failed to comply with Zipcar driving rules
- The driver uses a vehicle for non-approved uses
- Green City Force has exhausted funds available for employee transportation

Requesting Use of Zipcar

- Complete the Zipcar Request Form and submit to your supervisor for their approval and signature. Approving Managers should forward the approved forms to the Director of People Operations at florace@greencityforce.org.
- Approved Zipcar Request forms should be submitted along with the Requester's Driver's License and individuals with expired driver's licenses will not receive approval from People Administration and Operations (PAO).
- After a request has been approved, the Director of Service and/or the Director of People Operations will send the requester "use of zipcar details."

Zipcar Driver Rules

All approved zipcar drivers must adhere to the following:

- Destinations should be confirmed and approved by Approving Managers before traveling in writing
- Drivers must observe and abide by all traffic rules and regulations *i.e. no use of cell phones while driving*
- Zipcars should be locked and secured when parked outside of approved destinations. Zipcar keys, when in route, should never be given to any individual outside of the approved requestor.
- GCF is a drug-free workplace. Smoking and drinking alcohol is prohibited during working hours AND when zipcars are in use.
- Driving expenses should be documented and submitted to your approving manager at the end of the day.
- Damages and injuries should be reported to approving managers and to the Director of People Operations immediately.
- Approved GCF Zipcar drivers are prohibited from granting passengers and/or other individuals access to the zipcars

Personal Use

Approved zipcar drivers are not permitted to use zipcars for personal use. Lunch during working hours is an exception and should be included when completing the Zipcar Request Form. Personal use includes using the zipcar for the personal errands between work activities or using the zipcar beyond approved working hours.

Employees using zipcars for GCF purposes must first be approved and access zipcars through the GCF account. Reimbursement will not be provided to any individual who uses a zipcar through their personal accounts.

5.5 Smoking, Alcohol and Drugs

GCF is a smoke-free office. In keeping with GCF's intent to provide a safe and healthful work environment, smoking and alcohol consumption are prohibited in the GCF office, at all GCF operated program sites and at all sites where an employee is acting as a representative of GCF. GCF strictly prohibits the use of illegal drugs and alcohol in the workplace and prohibits employees from being under the influence of illegal drugs or alcohol while at the workplace. GCF employees will be subject to immediate dismissal if found in possession of or selling or distributing alcohol or illegal drugs on GCF property or while conducting GCF business.

GCF employees are also prohibited from the misuse or abuse of prescription and over- the counter ("OTC") drugs. Employees who are using prescribed or OTC drugs for existing medical conditions must inform the Director of People Operations of such treatment to discuss the necessity of temporary alteration of job duties if, and only if, the drugs (i) may have side effects that could affect job performance or (ii) alter an employee's physical or mental abilities in such a way as to pose an immediate risk of harm to others. Such information will be kept strictly confidential and shall not be disclosed to other parties, including the employee's immediate supervisor, except as necessary to provide the employee with a reasonable accommodation of a disability.

Under the federal Drug-Free Workplace Act, an employee who performs work under a federal government contract or grant must notify GCF of a criminal conviction for drug- related activity occurring in the workplace. This report must be made to the employer within five (5) calendar days of the conviction. GCF is required to notify the appropriate government agency within ten (10) calendar days of receiving notice of the conviction. Appropriate action, including disciplinary action and/or requiring the employee to participate in a drug-abuse assistance or rehabilitation program, may result after GCF receives notice of the conviction.

Nothing in this policy is intended to prohibit the moderate consumption of alcohol at work-related social functions sponsored by GCF or functions attended by GCF employees on GCF's behalf. Moderate consumption of alcohol served at work-related social events is permitted for employees who meet the legal age for consumption of alcohol. Discretion is encouraged where Corps Members are present.

5.6 Confidentiality

GCF Employees will have access to confidential proprietary information and materials related to business, work, projects or investigations of GCF and its donors, employees and Board of Directors. To

protect the interests of GCF, the organizations and the individuals concerned, all employees are required to keep such information and materials confidential at all times, including after termination of employment for any reason, and may not use such information and materials in any manner, except as required in the course of their employment with GCF. These confidential obligations continue and survive the termination of employment with GCF. If an employee has entered into an agreement with GCF with regard to the confidentiality of information and materials, such a Non- Disclosure and Confidentiality Agreement, this policy does not supersede the terms of such agreement.

5.7 Donor Relationships and Privacy

All employee interactions with GCF donors must be consistent with the following principles:

- o GCF respects the privacy of donors and safeguards the confidentiality of information that a donor reasonably would expect to be private.
- o GCF provides donors an opportunity to state that they prefer to remain anonymous and that their names, the amounts of their gifts or other information about the donors not be publicly released.
- o GCF ensures that donors receive appropriate acknowledgment and recognition.
- o GCF honors donor requests to curtail repeated mailings or telephone solicitations from in-house lists.
- o GCF will not sell or rent its mailing list or donor information.
- o Solicitations on behalf of GCF will be free from undue influence or excessive pressure and are respectful of the needs and interests of the donor or potential donor.

5.8 Communication with the Press

Employees may occasionally receive an inquiry from a member of the press or other media regarding GCF activities. Employees should direct the members of the press or other media to the Executive Director of GCF or their designee, and not attempt to respond to such inquiries.

5.9 Property

GCF property must be used in the manner for which it was intended. GCF property, such as equipment, vehicles, telephones, computers and software are intended for business use.

Any communications using GCF's domain name, including email, made via any internal or local area networks, the Internet or the World Wide Web are the property of GCF. All files, records, documents, books, papers, drawings, sketches, communications and similar items and materials, whether written, electronic, digital or other format, accumulated, produced or relating to the operations of GCF are the exclusive property of GCF. All such GCF items should be treated with care and proper attention should be given to all administrative routing, filing and storage systems.

Upon termination or request, employees are required to surrender any GCF property they possess.

All copyrights or other intellectual property resulting from work performed by employees on behalf of GCF belong to GCF and are its property. Employees who perform work that is not GCF-related on their own time may retain copyright and ownership of that work.

5.9.1 Key Control Policy

Purpose

The purpose of the Key Control Policy is to protect the property and privacy of Green City Force, and of employees, CMs, Ecohub and Youth Development Fellows assigned to use the GCF offices and Ecohub sites, by ensuring there is appropriate staff coverage at all times and limiting access to such facilities to assigned individuals and to their Supervisors. The Director of People Operations is responsible for managing the distribution of office and Ecohub site keys.

Scope

This policy applies to all Green City Force employees, Ecohub and youth development fellows, contractors and consultants. It applies to all GCF offices and Ecohub sites.

Eligibility: only permanent employees are eligible to receive a GCF key. There must be a permanent GCF employee on site for all other employees, interns, fellows, contractors and consultants to access the site.

Issuing Keys

Keys to GCF offices and Ecohub sites will be issued to permanent Green City Force employees with the approval of the appropriate Approving Manager, and as part of their official GCF onboarding. Each distributed key will be logged. No key shall be transferred from one person to another without being returned to the Director of People Operations. The employee to whom keys will be issued must pick up and sign for them at the Green City Force office 630 Flushing Avenue Brooklyn NY 11206.

Duplication

All keys referred to in this policy are the property of Green City Force and are not to be duplicated by anyone other than the Director of People Operations. Duplication of a key, or the possession of an unauthorized duplicate, may result in disciplinary action.

Key Retrieval

Upon termination/separation of employment, all keys must be returned immediately to the Director of People Operations. Failure to return keys upon termination/separation may result in holding the individual responsible for the cost to rekey a GCF office or Ecohub site if they do not return their key(s) prior to leaving. Failure to return issued key(s) will result in a maximum of a $50 fee per key, to be deducted from their final paycheck.

Request Procedures

All office and Ecohub site key requests should be included on the Notification of Hire Personnel Action Form and submitted to the Director of People Operations. Personnel Action Forms need final approval from Approving Managers.

Enforcement

All approving managers, along with the Director of People Operations, shall ensure that keys are not issued to unauthorized individuals. The Director of People Operations shall:

- ensure that key requests and all appropriate authorizations have been obtained prior to issuing keys.
- implement and maintain appropriate procedures to ensure that all keys issued are accounted for, and securely deposited in a lock box or Keywatcher unit when not in use.

Lost or Stolen Keys

Lost or stolen keys must be reported to the Director of People Operations within 24 hours of the discovery of the loss or theft. A replacement key may be issued at cost to the individual.

Key Distribution Authorized Approvers

Department	**Approving Manager**
Career Services	Chief Program Officer
Development	Director of Development
Finance	Director of Finance
People Administration and Operations	Chief Administrative Officer
Service / Support Services	Chief Program Officer / Director of Support Services
Social Enterprise	Chief Program Officer / Director of Service

5.10 Technology

Please be advised that as an employee of GCF, you have NO RIGHT TO PRIVACY for any information placed upon GCF's computer system or sent through or to the GCF email system. GCF cell phones, computers, Internet and emails are a privileged resource, and are intended to be used to complete essential job-related functions. Personal use must be kept to a minimum and must not interfere with work responsibilities. Employees are not permitted to download any "pirated" software, files, apps or programs and must receive permission from a supervisor before installing any new software on a GCF computer.

Employees are prohibited from using GCF's systems to conduct any illegal, fraudulent or criminal activity. Employees are prohibited from using GCF's systems to conduct political activity. Files or programs stored on GCF computers may not be copied for personal use. GCF may monitor, access and review any and all information and use it if it deems it appropriate to do so. GCF may also terminate personal use of these communications and office equipment at any time at its discretion.

Good judgment should be used in using GCF's electronic and other communications systems and creating messages that are transmitted over them, as they reflect on our reputation and may have to be produced to the government or others outside the organization. Employees should have no expectation of privacy in their use of GCF computers or other electronic equipment. Employees should assume that any communication might be read or listened to by someone other than the intended recipient, either for legitimate business purposes or inadvertently. Phones are provided for business use. Personal long distance calls are not permitted.

5.11 Social Networking

GCF respects the right of employees to participate in social networking activities or to use or maintain a Twitter, Facebook, Pinterest or other social media account, or to blog, post to wikis or engage in other social media.

However, in order to protect our public image and to protect itself from unauthorized disclosure, GCF requires employees to follow the following guidelines:

- Employees must keep personal social networking separate from social networking on behalf of GCF, and should take care to avoid any implication that GCF has authorized personal communications. Employees are solely responsible for their own personal postings.
- Unless specifically instructed, employees are not authorized and therefore may not speak on behalf of GCF. When an employee is expressing her/his opinion on personal blogs or other social networking sites, the employee should not identify herself/himself as an employee of GCF to avoid being viewed as a spokesperson for GCF. If you refer to the work done by GCF or provide a link to a GCF website, you are required to include a disclaimer in a reasonably prominent place, such as: "The views expressed on this post are mine and do not necessarily reflect the views of Green City Force." If contacted by the media or press, the employee is required to notify the Executive Director immediately.
- Employees may not disclose nonpublic information concerning GCF's employees, Board members, donors, program, structure, financial information or any work- related matters, whether confidential or not, outside company-authorized communications.
- Employees cannot use blogs or social networking sites to harass, threaten, discriminate or disparage against anyone.
- Employees cannot use the Green City Force name or logo, unless for work- related purposes explicitly authorized by GCF. Your postings must respect copyright, privacy, fair use, financial disclosure and other applicable laws.

- o Employees cannot post photographs of other employees, partners, Board members or Corps Members, nor can employees post photographs of persons engaged in GCF business or at GCF activities/events without authorization from the individual involved and the Executive Director or her/his designee.
- o GCF requests that you exercise good judgment in your postings and that you are respectful of GCF, its employees, Corps Members, partners and others. As you participate or use any of these sites, please recognize that anything attributed to you easily enters the public domain and has the potential to be viewed by unintended audiences and reposted on another site out of context. Your postings essentially can last forever.

Any employee found to be in violation of GCF's social networking policy will be subject to disciplinary action up to and including termination. GCF also reserves the right to take legal action where necessary against employees who engage in prohibited or unlawful conduct.

5.12 Modeling Sustainability in the Office & When Representing GCF

GCF supports environmental awareness by encouraging environmental sustainability in our business practices and operating procedures. This support includes a commitment to the purchase, use and disposal of products and materials in a manner that will best utilize natural resources and minimize harmful impact on the earth's environment. The simple act of placing a piece of paper, can or bottle in a recycling container is the first step to reducing demand on the earth's limited resources. Success of this program depends on active participation by all of us. Each employee should consider thoughtfully what practices they could incorporate into their daily lives in order to mitigate climate change and the degradation of our natural resources.

Employees are encouraged to model sustainability through such workplace practices as:

- o Review of information, when available, through the use of the computer network, instead of printing on paper
- o Two-sided printing and photocopying
- o Computerized business forms
- o Reusing office supplies such as paper clips, folders and binders
- o Reusing packing materials
- o Utilizing reusable kitchenware, such as mugs, cups, plates and utensils, instead of one use disposable products
- o Turning off lights when not in use
- o Not running water unnecessarily
- o Unplugging appliances and computers from electrical sockets when not in use o Composting organic materials

6. WORKPLACE POLICIES AND PROCEDURES

6.1 Open Door Policy

GCF has a policy that encourages your participation in decisions that affect you and your daily professional responsibilities. GCF values each employee and strives to provide a positive work experience. If you have job-related concerns or complaints, GCF encourages you to discuss them with your supervisor, or a senior member of management, or the Executive Director.

6.2 Cooperative Dialogue

Green City Force shall engage in cooperative dialogue with all persons requesting accommodation for religious needs; related to a disability; related to pregnancy, childbirth or a related medical condition; or for such a person's needs as a victim of domestic violence, sex offenses or stalking. This means that the organization will engage, in good faith, in a written or oral dialogue concerning a staff member's accommodation needs; potential accommodations that may address the accommodation needs, including alternatives to a requested accommodation; and the difficulties that such potential accommodations may pose for GCF, including whether or not an employee can satisfy the requirements of their position.

Requests for accommodation should be submitted, in writing, to the Director of People Operations (DPO). Once a request is received, the DPO will begin the cooperative dialogue process within a reasonable time frame of no more than five (5) business days. During this process, the employee may be asked to provide documentation to substantiate the request, an example of this would be a doctor's note outlining the condition requiring an accommodation, recommended accommodation types and duration. Once a final determination is made, the employee will be notified in writing.

A determination regarding an accommodation request can only be made after engaging in cooperative dialogue, all of which must be documented in writing.

6.3 Inclement Weather and Emergency Closings

In the event of extreme weather conditions and other emergencies, the Executive Director will determine whether or not to close the GCF office. GCF will attempt to provide email notice of a closure in a timely fashion. Employees sent home or told by GCF not to report to work will be paid if they were expected to work on that day.

Employees are expected to use their best judgment about whether or not they can commute safely to their work location and to notify their supervisor if they will be delayed or unable to travel so that alternative coverage can be planned.

6.4 Reimbursement

Employees will be reimbursed for reasonable and appropriate pre-approved expenses incurred in the course of GCF business. These expenses must be pre-approved by the employee's approving manager and may include, but are not limited to, conference fees, business travel expenses, meals or project supplies. Employees are expected to exercise restraint and good judgment when incurring expenses and should contact their supervisor in advance if any question arises regarding whether an expense will be reimbursed.

Employees will be reimbursed for the following: Round-trip economy airfare, hotel expenses and meals up to $65 per day.

All reservations for business trips must be approved in advance by the employee's approving manager. Any changes to the trip reservations due to work reasons need to be approved by the approving manager. Any fees incurred due to any changes to the trip reservations due to personal reasons will be the responsibility of the employee to pay.

Reimbursable business expenses must be accurately reported and supported by receipts. Those responsible for the handling or disbursing of funds must assure that all transactions are executed as authorized and recorded to permit the preparation of GCF's financial statements. Employees must request reimbursement using an official GCF Expense Reimbursement Form and provide supporting documentation. Such reimbursement will be made no later than 15 days after the date the expense reimbursement request was submitted.

6.5 Personnel Files

GCF maintains a personnel file on each employee. All personnel files are the property of GCF and access to these files is restricted. These files are kept confidential to the extent possible. Employees may review their personnel file upon request.

It is important that personnel files accurately reflect each employee's personal information. Employees are expected to inform GCF of any change in name, address, home phone number, home address, marital status, number of dependents or emergency contact information.

6.6 Hiring of Relatives

In order to avoid conflicts of interest or the perception of favoritism, relatives of persons currently employed by GCF may not be employed to work directly for, or supervise a relative, or occupy a position in the same line of authority within the organization. In other cases where a conflict or the potential for conflict arises, even if there is no supervisory relationship involved, the parties may be separated by reassignment or terminated from employment.

If the relative relationship is established after employment, the individuals concerned will notify management, who will then decide whether a transfer or termination of one of the affected employees is appropriate.

For the purpose of this policy, a relative is any person who is related by blood or marriage, or whose relationship with the employee is similar to that of persons who are related by blood or marriage. Exceptions to these rules may only be modified by the Executive Director with Board of Directors' approval where appropriate.

7. WORK PERFORMANCE AND REVIEW

Employees will receive performance appraisals following their 90-day introductory period and annually thereafter.

The performance appraisal is a formal dialogue between an employee and their supervisor, along with management staff as appropriate. The purpose of the performance appraisal is to:

- o maximize communication between the supervisor and employee about job performance;
- o discuss how the employee is performing on the job;
- o discuss job and performance expectations; and
- o discuss steps for corrective or supportive action, if necessary

Performance appraisals will be conducted using a standardized form. The employee and their supervisor will complete the form and will meet to discuss the appraisal. These discussions will result in a final performance appraisal that becomes part of the employee's personnel records. The Board of Directors of GCF will conduct performance reviews of the Executive Director.

In addition to the formal review process, supervisors and employees are strongly encouraged to discuss job performance and goals informally at any time.

7. 1 Professional Development Staff Training Fund Policy

As a people-powered organization, Green City Force values the continuous development, skill-building, and improvement of our workforce. The organization is committed to providing internal training and professional development opportunities to support the growth of our staff, in addition to dedicating funding for external training and certifications. The Green City Force Staff Training Fund (STF), provides funding up to $1,000 per fiscal year (July 1 - June 30) to be applied toward approved professional development training and certifications.

Supervisors are responsible for assessing and communicating professional development and training needs of individual employees in their direct reporting line, identifying and actively encouraging and supporting appropriate learning experiences. This may happen during the formal performance review, or as needs/ opportunities arise.

Professional development commitments should be planned for in a way that does not interfere with an employee's ability to meet their deliverables or perform key tasks. Employees will still be expected to meet their deadlines and professional commitments.

Eligibility: all Full-Time Permanent Employees who have been with the organization for at least one year are eligible to access the Professional Development and Training Funds.

Funding limits: eligible employees may access up to $1,000 in PD training funds per fiscal year. These funds may be applied toward a single opportunity, or to multiple opportunities, not to exceed $1,000. Fund will expire at the end of the fiscal year and may not be rolled over to the next fiscal year.

Employees will specify how the training will be paid for using this form.

- If the employee is paying for the training and requesting reimbursement from GCF, they must provide confirmation of payment and complete the employee reimbursement form. This form should then be sent to the Finance Department for processing.
- If the employee would like GCF to pay for the training directly, they must understand that GCF will only be able to pay up to $1,000, and they will need to provide payment for any balance leftover.

Regardless of payment format, employees will be responsible for any costs or fees associated with the training that exceed $1,000.

Eligible training:

PAO will provide all employees with a list of potential training that are STF eligible. In addition to the list provided by PAO, employees may request a training that meets the following eligibility criteria:

- Any training is directly connected to an eligible employee's ability to fulfill their job responsibilities and expectations OR that will enhance an eligible employee's ability to advance within Green City Force OR at another organization within their chosen field.* This may include
    - Public speaking and group facilitation
    - Data collection and analysis
    - Software-specific or technical training such as GIS and graphic-design

ED_016126_00000905-00048

- Training that builds on GCF's commitment to Equity, Inclusion and Diversity, including Anti-Racism and Anti-Oppression trainings
- Training related to financial literacy and long-term finance planning

**Employees may occasionally be required to obtain certain certifications in order to be licensed/ eligible to perform their work functions, e.g. BPI certification and SHRM licensing. In these cases, supervisors may recommend that the training costs be covered by the organization, without drawing down on an individual's professional development training funds.*

Requesting Professional Development Training and Schedule Adjustments

Eligible Employees:

- Eligible employees may proactively identify and recommend training opportunities that they believe will address critical skill/ knowledge gaps at any time during the fiscal year.
- Eligible employees are to identify the training, review schedule and pricing, and make an informed request using this form. PAO will collect the forms and send them to the appropriate supervisor and confirm availability of funds with finance.

Supervisor Approvals

- Please provide your supervisor with ample time to make an informed decision, especially if the training requires a schedule change. A best practice is to request at least 1 months notice.
- Upon receiving and reviewing the request for funds from their report, supervisors must confirm their approval with PAO.
- As part of the approval process, supervisors need to plan for and allow appropriate professional development and training activities that occur as part of work-time. Any schedule adjustments to accommodate professional development and training activities must be approved by the supervisor.

Professional development and scheduling for non-exempt employees

- Professional development and training activities outside of and in addition to regular work hours for non-exempt employees require written approval in advance if the activities are to be considered as regular work.
- Whether or not training counts toward hours worked will depend on the training, and is at the discretion of the organization. For example, employees may wish to enroll in a driver's education class. If their job does not explicitly require them to drive as part of the day to day responsibilities of the position, the driving class would not count toward hours worked and they will not be paid for those hours.
- PD opportunities that push regular work hours over 40 hours per week may not be approved, since they will also require overtime payments to the employee.

Professional development and scheduling for non-exempt employees

- Non-exempt employees may track approved training time on their regular timesheet (an updated template will be sent out)
- Non Exempt employees will not be eligible for overtime compensation if their total hours worked, including approved PD, exceeds 40 hours per week.

8. INTERNAL COMPLAINT AND GRIEVANCE POLICY

GCF is committed to providing the best possible working conditions for its employees. Part of this commitment is encouraging employees to bring concerns, problems and grievances to the attention of their supervisor, or if the case may necessitate, to the Director of People Operations.

This process may be superseded by a Grievance Procedure mandated by the New York State Commission for National and Community Service. In such cases, employees will be notified in writing.

GCF will give employees the opportunity to resolve problems and complaints through a fair and impartial process without fear of reprisals. An employee who has a complaint about another employee or her/his supervisor, or a supervisor who has a complaint about an employee, should attempt to resolve the issue within 5 business days of the occurrence giving rise to the complaint. If the complaint is not resolved through informal discussion within 5 business days, the employee or supervisor making the complaint must document the complaint in writing. A copy of the complaint must be submitted to the employee or supervisor who is the subject of the complaint, with a copy given to the Director of People Operations. The Director of People Operations will respond to the written complaint within 10 business days after receipt of the complaint. All parties involved must be copied. If the problem is raised with the Executive Director, her/his decision is final, conclusive and binding. If the complaint is about the Executive Director or the Executive Director initiates the complaint, the Board of Directors will respond.

For procedures with respect to complaints alleging sexual harassment, see GCF's Policy Prohibiting Harassment at Section 3.13 of this Handbook.

For procedures with respect to violations of GCF's Ethics Policy or suspected violations of law or regulations, see GCF's Whistleblower Policy at Appendix C to this Handbook.

9. DISCIPLINE AND TERMINATION

9.1 Discipline Policy

GCF seeks to ensure fair treatment of all employees and that disciplinary actions are prompt, informed and impartial. The major purpose of any disciplinary action is to correct the problem, prevent reoccurrence and prepare the employee for satisfactory service in the future. You are expected to

conform to certain standards of conduct, work performance, attendance and other work rules and regulations (many of which are highlighted in this handbook). If a problem in these areas arises, your supervisor will provide feedback and try to work with you to develop a mutually effective solution. However, if attempts at a mutually effective solution are unacceptable, disciplinary actions may be taken, up to and including termination of employment.

Progressive discipline means that, with respect to most disciplinary problems, these steps will be followed:

1. Verbal Warning
2. Written Warning
3. Suspension with or without pay
4. Termination of employment depending on the severity of the problem and number of occurrences.

There may be circumstances when one or more of the above steps are bypassed when employee actions are serious enough to justify either a suspension or termination of employment without going through the usual progressive discipline steps.

By using progressive discipline, GCF hopes that most employee problems can be corrected at an early stage, benefiting both the employee and GCF. However, GCF reminds employees that their employment is at will and can be terminated at any time, with or without cause. The procedures set forth in this section are not mandatory and do not provide to any employee any contractually enforceable disciplinary procedure.

9.2 Resignation

Any employee voluntarily terminating employment should submit a letter of resignation stating the effective date of their resignation. The letter should be submitted to the Director of People Operations and their supervisor giving GCF advance written notice of their intent to resign as follows: two (2) weeks' notice for non-exempt employees and four (4) weeks' notice for exempt employees.

During the time between the notification of resignation and the employee's leave date, the employee is expected to continue their regular duties and assist in the process of recruiting their replacement, unless otherwise determined by their supervisor.

9.3 Abandonment of Job

Employees who miss work for 3 consecutive business days without notifying their supervisor are considered to have resigned from their jobs.

9.4 Final Pay

Employees who leave GCF for any reason will receive all pay that may be due to them at the time of their separation from employment. Employees will not be paid for any unused accrued PTO days.

9.5 Return of Property

Upon termination of employment for any reason, either by the employee or GCF, employees are required to surrender to GCF any materials containing confidential proprietary information, keys, identification and any other property or information of GCF in their possession.

10. ADDITIONAL POLICIES

Green City Force's policies, information, and forms with regard to Equal Opportunity, Non Discrimination and Affirmative Action; Drug-Free Workplace; Whistleblower and Document Retention, Paid Family Leave and Sexual Harassment are attached as Appendices A, B, C, D, E, and F respectively, to this handbook. Additionally, each employee will be provided with a GCF Corps Member Manual. It is the responsibility of all employees to read, understand and follow these policies.

ED_016126_00000905-00052

Appendix A – Equal Opportunity, Non-Discrimination and Affirmative Action Policy

Green City Force complies with, and expects that those institutions, individuals and organizations with whom it deals will comply with, all applicable federal, state and local laws, policies, orders, rules and regulations which prohibit unlawful discrimination or are designed to implement equal opportunity and affirmative action.

Green City Force is fully committed to equal opportunity and treatment for all employees, applicants for employment, volunteers, beneficiaries and contracting parties of Green City Force programs and services without regard to race, creed, color, national or ethnic origin, sex, religion, age, disability, political beliefs, sexual orientation, gender identity or expression, genetic information, veteran, marital or family status, or any other factor that the law protects from employment discrimination. Green City Force makes decisions concerning employees, applicants, volunteers and beneficiaries based on their qualifications and ability to contribute to the Green City Force mission, programming objectives and institutional needs.

Green City Force strives to foster equal economic opportunity by working with employees, applicants for employment, volunteers, beneficiaries and contracting parties to enable the inclusion of minorities, women and minority- and women-owned business enterprises when possible in the economic opportunities generated by Green City Force's programs and services. Green City Force further strives to treat all members of each community in which it operates with respect, to provide an environment conducive to working as a team, and to ensure equal access to its programs and opportunities. Unless otherwise determined by the Board of Directors, Green City Force's Executive Director or their designate is responsible for ensuring compliance with this policy.

Appendix B – Drug-Free Workplace Policy

Green City Force is firmly committed to the health and safety of its employees, volunteers and the public. Green City Force considers the influence of drugs in the workplace to be detrimental to its employees and volunteers and to its continued growth and future success. The organization is committed to maintaining a drug-free workplace, and, to ensure compliance with the Drug-Free Workplace Act of 1988, adopts the following Drug- Free Workplace rules and regulations:

1. The unlawful manufacture, distribution, dispensation, sale, purchase, use, influence or possession of non-prescribed narcotics, hallucinogenic drugs, marijuana or other non prescribed controlled substances or possession of paraphernalia related to the use of such substances on Green City Force premises, while working or during work hours is prohibited.
2. An employee should report to her/his supervisor her/his use of any substance that could affect the employee's or other's safety or the employee's ability to perform her/his job. The supervisor will attempt to work with the employee to support her/his treatment process.
3. All employees must notify Green City Force of any criminal drug statute conviction within five calendar days after the conviction. Appropriate corrective action will be taken based on the facts of the particular situation.
4. Adherence to the Green City Force Drug-Free Workplace policy is a condition of employment for all employees and volunteer opportunities for all volunteers.
5. If an employee or volunteer engages in conduct in violation of this policy, appropriate disciplinary action, up to and including termination and legal action, including notifying local authorities in order that legal action can be taken against the individual, may be taken immediately.

Appendix C – Whistleblower Policy

Green City Force Inc. ("GCF") requires its directors, officers, employees and Corps Members to observe high standards of business and personal ethics in the conduct of their duties and responsibilities, to practice honesty and integrity in fulfilling their responsibilities, and to comply with all applicable laws and regulations. For the purposes of this Whistleblower Policy, the foregoing sentence shall be referred to as the "GCF Ethics Policy."

Reporting Responsibility

This Whistleblower Policy is intended to encourage and enable directors, officers, employees, volunteers, Corps Members and others to raise serious concerns internally so that GCF can address and correct inappropriate conduct and actions. It is the responsibility of all directors, officers, employees, Corps Members and volunteers to report concerns about violations of GCF's Ethics Policy or suspected violations of law or regulations that govern GCF's operations.

No Retaliation

It is contrary to the values of GCF for anyone to retaliate against any director, officer, employee, Corps Member or volunteer who in good faith reports an ethics violation, or a suspected violation of law, such as a complaint of discrimination, or suspected fraud, or suspected violation of any regulation governing the operations of GCF. Any person who retaliates against someone who has reported a violation in good faith is subject to discipline up to and including termination of employment.

Reporting Procedure

GCF has an open door policy and suggests that Corps Members, employees, officers and volunteers share their questions, concerns, suggestions or complaints with their supervisor. If you are not comfortable speaking with your supervisor or you are not satisfied with your supervisor's response, you are encouraged to speak with GCF's Executive Director. Supervisors and managers are required to report complaints or concerns about suspected ethical and legal violations in writing to GCF's Executive Director, who has the responsibility to investigate all reported complaints. Employees and Corps Members with concerns or complaints may also submit their concerns in writing directly to their supervisor or GCF's Executive Director.

Executive Director

GCF's Executive Director is responsible for ensuring that all complaints about unethical or illegal conduct are investigated and resolved. GCF's Executive Director will advise the Audit Committee of all complaints and their resolution and will report at least annually to the Audit Committee on compliance activity relating to accounting or alleged financial improprieties.

Accounting and Auditing Matters

GCF's Executive Director shall immediately notify the Audit Committee of any concerns or complaint regarding corporate accounting practices, internal controls or auditing and work with the committee until the matter is resolved.

Acting in Good Faith

Anyone filing a written complaint concerning a violation or suspected violation must be acting in good faith and have reasonable grounds for believing the information disclosed indicates a violation. Any allegations that prove not to be substantiated and which prove to have been made maliciously or knowingly to be false will be viewed as a serious disciplinary offense.

Confidentiality

Reports of violations or suspected violations may be submitted on a confidential basis by the complainant. Such reports will be kept confidential to the extent possible, consistent with the need to conduct an adequate investigation.

Handling of Reported Violations

GCF's Executive Director will notify the person who submitted a complaint and acknowledge receipt of the reported violation or suspected violation.

Executive Director Tonya Gayle Green City Force Inc. tonya@greencityforce.org

Violations involving GCF's Executive Director

Notwithstanding anything to the contrary herein, any complaint involving GCF's Executive Director should be submitted to any member of the Audit Committee. Contact information for the Audit Committee is listed on Annex A. The Audit Committee will notify the person who submitted a complaint and acknowledge receipt of the reported violation or suspected violation.

All reports will be promptly investigated and appropriate corrective action will be taken if warranted by the investigation.

Distribution of Whistleblower Policy

GCF will distribute this Whistleblower Policy to all directors, officers, employees, and Corps Members (including to each new staff employee as part of the Employee Handbook) and volunteers who provide substantial services to GCF, and will make it available electronically as well as redistribute it to directors and officers annually in connection with GCF's audit.

Policy approved by the Board of Directors on July 1, 2014.

ED_016126_00000905-00057

Appendix D – Document Retention Policy

There are legal requirements and business reasons to preserve records. For example, state and federal laws may require that any record that is relevant to an actual or reasonably foreseeable litigation, proceeding or investigation must be preserved. Failure to preserve records when legally required to do so can result in civil or criminal penalties and complicate civil matters.

Whether something is a record that needs to be preserved is based on its content, not its physical form. Any record that, in an employee's judgment, there is a legal or business reason to preserve should be maintained.

From time to time Green City Force may establish document retention or destruction policies or schedules for the destruction of specific categories of records in order to ensure legal compliance, and also to accomplish other objectives, such as preserving intellectual property and cost management. Green City Force must also abide by certain document retention policies as described in agreements with AmeriCorps, both federal and state. It is each employee's obligation to be aware of, and abide by, any such policies.

ED_016126_00000905-00058

Appendix E – Paid Family Leave – Frequently Asked Questions

1. How is Paid Family Leave and FMLA different?

	PAID FAMILY LEAVE	FMLA
Benefits	PAID	UNPAID
Coverage	Most private employers Public employers may opt in One or more employees	Public and private employers 50 or more employees in a 75-mile radius
Eligibility	After 26 consecutive weeks of employment if regularly working 20 or more hours per week After 175 days worked if regularly working less than 20 hours per week	12 months of employment 1,250 hours of work in the 12-month period preceding leave
Reason for Leave	Employees cannot use for own serious health condition Can be used to care for a child of any age	Employee can use for own serious health condition Can only be used to care for a child if the child is under 18 years old, or "incapable of self-care because of a mental or physical disability"
Length of Leave	Only in full-day increments	Hourly basis
Paid Time Off	Employers cannot require employees use paid time off while on PFL	Employers can compel an employee to use paid time off while on FMLA

2. Will PTO time count as a qualifying work day/days for eligibility for PFL?

Yes

3. Can I be eligible for both Short-Term Disability Benefits and PFL?

Employees with an injury or illness not related to their job may be eligible for short-term disability benefits. Paid Family Leave does not replace disability benefits coverage.

ED_016126_00000905-00059

After giving birth, new mothers may be eligible for both short-term disability benefits and Paid Family Leave. While the two benefits **cannot be taken at the same time**, eligible employees can choose how they can use both benefits to support the needs of their families.

For example, if a new mother qualifies for short-term disability after giving birth, she can choose to:

- Immediately take all or any portion of her available short-term disability weeks and then take Paid Family Leave at any time within the first 12 months; or,
- Take Paid Family Leave immediately, without taking any short-term disability.

When making these decisions, it may be important to consider that while Paid Family Leave offers job protection, short-term disability does not.

There may be other times when an employee needs to use both short-term disability and Paid Family Leave in the same year for different qualifying events. In all cases, employees cannot take more than 26 weeks of combined short-term disability and Paid Family Leave benefits in a 52-week period.

If an employee plans to use both short-term disability and Paid Family Leave, the employee must complete a separate request for each. These are separate benefits, which cannot be taken at the same time, and require separate documentation from the employee and employer.

Appendix F – Green City Force Mandatory COVID-19 Vaccination Policy

Effective October 25, 2021

Background: *Mayor DeBlasio announced on October 20, 2021 the requirement for city workers to be vaccinated by November 1, 2021. The New York City Health Commissioner issued an order rescinding the Mandatory COVID-19 Vaccination and Testing policy AND implementing a* ***Mandatory Vaccination Policy*** *for NYC workers and agencies AND agencies that contract for human services contracts.* ***Green City Force receives a significant amount of funding from the City of New York and is covered by this requirement.***

The Order of the Commissioner of Health and Mental Hygiene to require COVID-19 Vaccination for City Employees and Certain City Contractors requires that employees and contractors (including employees, subcontractors, and volunteers) of a city agency provide the agency or office where they work (Green City Force) with proof of vaccination (at least one dose) by 5:00pm on October 29, 2021. ***Green City Force receives a significant amount of funding from the City of New York and is covered by this requirement.***

Green City Force's Mandatory COVID-19 Vaccination Policy may be updated periodically to better address the health and safety needs of our employees, contractors, Corps Members, and Eco-Hub fellows, and based on requirements from the City of New York.

Policy:

Effective immediately, all Green City Force Employees, Alumni Temporary Employees, and Eco-Hub Fellows, Corps Members, and volunteers are required to submit proof of the following by October 29, 2021, no later than 5pm:

- they have been fully vaccinated against COVID-19; or
- they have received a single-dose COVID-19 vaccine, even if two weeks have not passed since they received the vaccine; or
- they have received the first dose of a two-dose COVID-19 vaccine series

Any employee, subcontractor, and volunteer who received only the first dose of a two-dose vaccine at the time they provided the proof described above, within 45 days after receipt of the first dose, provide proof that they have received the second dose of vaccine.

Vaccine documentation: All individuals who have received at least one dose of the Johnson and Johnson, Moderna, or Pfizer-BioNTech vaccine must submit proof of their vaccination to the Director of People Operations, Florace Alleyne by emailing COVIDSafe@greencityforce.org. Please include your first and last name and "Proof of Vaccination" in the subject line: Example: *Florace Alleyne Proof of Vaccination*

ACKNOWLEDGMENT FORM

The Green City Force Employee Handbook (the "Handbook") describes important information about GCF. I, _____, acknowledge that I have received the Handbook and that the information contained in the Handbook does not create an employment contract between Green City Force and me.

I understand that it is my responsibility to read the Handbook and consult my supervisor regarding any questions I may have regarding the personnel policies and practices of Green City Force that are not answered in the Handbook. I have entered into my employment/volunteer relationship with Green City Force voluntarily and acknowledge that, unless I have a separate written employment contract with Green City Force that states otherwise, my employment/volunteer term is not specified. Accordingly, subject to any such separate written employment contract, either I or Green City Force can terminate the relationship at-will, with or without cause, at any time.

Because the personnel policies and practices described in the Handbook are subject to change, I acknowledge that revisions to the Handbook may occur at any time. All such changes will be communicated through official notices, and I understand that revised information may supersede, modify or eliminate existing personnel policies and practices. Only the Executive Director or her/his designate has the ability to adopt any revisions to the personnel policies and practices in the Handbook.

I acknowledge that the Handbook is not a contract of employment. No provisions of the Handbook constitute legal or contractual obligations of Green City Force and Green City Force is free to change any provision at any time at its sole discretion. I have received the Handbook and I understand that it is my responsibility to read and comply with the personnel policies and practices contained in the Handbook and any revisions made to it that are communicated to me through official notices.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Groundwork Elizabeth

Address: 205 First Street
c/o Elizabeth Development Company

City: Elizabeth

State: NJ: New Jersey Zip Code: 07206

B. Unique Entity Identifier (UEI): LCKUAJLB5TG8

C. Applicant/Recipient Point of Contact

Name: Jonathan Phillips

Phone: Ex. 6 Personal Privacy (PP)

Email: elizabethnj@groundworkusa.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Jonathan Phillips	Executive Director, Groundwork Elizabeth	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Taxpayer:

We issued you a determination letter in JUNE 2004, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

Our records also indicate you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If a return is required, you must file Form 990, 990-EZ, 990-N, or 990-PF by the 15th day of the fifth month after the end of your annual accounting period. IRC Section 6033(j) provides that, if you don't file a required annual information return or notice for three consecutive years, your exempt status will be automatically revoked on the filing due date of the third required return or notice.

For tax forms, instructions, and publications, visit www.irs.gov or call Ex. 6 Personal Privacy (PP).

If you have questions, call Ex. 6 Personal Privacy (PP) between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific Time).

MOVING FORWARD
FOUNDATION

April 10, 2023

Dear Mr. Phillips,

Please accept this Letter of Collaboration from the Moving NJ Forward Foundation to Groundwork Elizabeth for your grant submission in response to EPA-R-OEJEC R-OCS-23-01. Moving NJ Forward Foundation will proudly join this Community Collaborative.

We are a small, non-profit organization, based in northern, NJ that seeks to harness the caring power of our communities. We organize multi-generational volunteer groups and facilitate project donations to support communities. We have been working with dozens of local organizations to identify resources and provide support to those most in need. Rallying support among friends and colleagues to address pressing community issues. As you know the Elizabeth community carries a heavy environmental burden, complicated further by the lack of resources available.

Our communities deserve better, no child should be sick because of the zip code they live in.

The EPA grant will amplify our communities' voices and provide actionable data back to them, providing the data needed to change behaviors. We need to know what's in our air and how we can remain healthy breathing it every day. Also important is having data to take to our elected officials. Many people have opinions and wants, data will tell us what we truly need.

Per our conversation Moving NJ Forward Foundation agrees to the following:

1. Join environmental justice collaborative focused on air quality.
2. To organize our constituents to participate in monthly community meetings
3. Share Collaborative information via social media and digital communications.
4. Provide leadership and support to the Collaborative.
5. Attend quarterly Collaborative meetings in person/ digitally.
6. Provide translation services for outreach.

We look forward to participating in this community collaboration and are hopeful that the EPA selects your application.

Sincerely,

Fernanda Correia

April 14, 2023

Dear Mr. Phillips,

Thank you for reaching out. Per our conversation we will join the Collaborative and are providing a Letter of Collaboration from the Elizabeth Parent Support Group to Groundwork Elizabeth for your grant submission in response to EPA-R-OEJEC R-OCS-23-01.

The Elizabeth Parent Support Group (EPSG) is a support group that hosts activities and provides resources to parents with children who have special needs to increase inclusion and community engagement.

The EPSG offers:

- Advice and emotional support.
- Connect families with community services.
- Workshops and training for parents.

EPSG is certified for US Youth Soccer TOPSoccer: The Outreach Program for Soccer is a community-based training and team placement program for young athletes with disabilities, organized by youth soccer association volunteers. The program is designed to bring the opportunity of learning and playing soccer to any boy or girl, who has a mental or physical disability. Our organization works to support the mental, physical and financial challenges of parents of children with special needs. We work together to reduce risks for our children. We want to collaborate on this grant and reduce the health impacts caused by pollution and the pollution itself.

Per our conversation Elizabeth Parent Support Group agrees to the following:

1. Join Environmental Justice Collaborative focused on air quality.
2. To organize our constituents to participate in monthly community meetings
3. Share Collaborative information via social media and digital communications.
4. Provide leadership and support to the Collaborative.
5. Attend quarterly Collaborative meetings in person/ digitally.
6. Provide translation services for outreach.

We look forward to participating in this community collaboration and are hopeful that the EPA selects your application.

Sincerely,

Illiana Chevres

Elizabeth, NJ 07206

April 10, 2023

Dear Mr. Phillips,

Please accept this Letter of Collaboration from the NAACP to Groundwork Elizabeth for your grant submission in response to EPA-R-OEJEC R-OCS-23-01. The NAACP welcomes this opportunity to become a part of a collaborative, focused on improving air quality. We look forward to participating in this collaboration.

We envision an inclusive community rooted in liberation where all persons can exercise their civil and human rights without discrimination. We are committed to a world without racism where Black people enjoy equitable opportunities in thriving communities. Our National Board and executive staff believe deeply in our mission and bring decades of experience in advocacy, organizing, and litigation to steer our efforts to secure civil rights and social justice.

The EPA Collaborative Problem Solving grant provides the opportunity to engage our environmentally overburdened communities in the air quality conversation and ultimately will inform our residents in near real-time about the quality of air and behavioral changes that can lead to better health. For too long our communities have shouldered a heavy environmental; burden as a result of industry and transportation. We want to change that. The resulting data and it's analysis will provide valuable insight to our local leaders, business and the community. Together we can advocate for the changes we need to ensure a healthy community.

Per our conversation NAACP agrees to the following:

1. join environmental justice collaborative focused on air quality.
2. To organize our constituents to participate in monthly community meetings
3. Share Collaborative information via social media and digital communications
4. Provide leadership and support to the Collaborative.
5. Attend quarterly Collaborative meetings in person/ digitally.

We look forward to participating in this community collaboration and are hopeful that the EPA selects your application.

Sincerely,

Shawn McClain

RE: Commitment by Groundwork USA to participate as a community partner with Groundwork Elizabeth in the EPA 2023 EJ Collaborative Problem-Solving Cooperative Agreement Program (EJCPS) EPA-R-OEJECR-OCS-23-01.

Dear Mr. Phillips,

I am writing to confirm Groundwork USA's commitment to support Groundwork Elizabeth's application to serve as the administrating organization for the EPA 2023 EJ Collaborative Problem Solving Cooperative Agreement Program. Groundwork USA (GWUSA) is the support organization for a national network of people-centered environmental justice organizations that work to improve the natural and built environment of low-resource communities through resident capacity building and civic engagement.

We understand the challenges faced by communities like Elizabeth, which have been historically marginalized and continue to experience environmental injustice. As part of our Climate Safe Neighborhoods initiative, we have been working with Groundwork Elizabeth since 2018 to explore the relationship between historical race-based housing segregation and the current and predicted impacts of climate change. We believe that this work is critical to addressing the root causes of disinvestment, poverty, and environmental injustice.

Groundwork Elizabeth has been measuring poor air quality in the city for the past five years, with the support of the City of Elizabeth, Union County, Rutgers University, the Housing Authority of the City of Elizabeth, and a network of volunteer and community groups. However, we understand that this work has been slow and that there is a need to improve the process and make the data more accessible to the communities it is intended to serve. The proposed air quality monitoring system and community awareness platform has exciting potential to overcome these challenges.

As part of our long-term plan for the Climate Safe Neighborhoods initiative, Groundwork USA commits to provide technical guidance and expertise to Groundwork Elizabeth as they work with external collaborators to develop and launch their community-centered air quality monitoring map portal. This may involve consulting internally with Groundwork Elizabeth's project leads on best practices and desired outcomes of the map portal, contributing to design conversations with external developers, and/or coordinating with community groups as they learn to use the portal once it is completed. We are in a position to offer this support as we have a devoted full-time GIS professional on our team who has built

numerous environmental justice-focused interactive maps intended for use by the most impacted residents.

We believe that the output of this air quality monitoring data hub will provide vital real-time information to Elizabeth and the surrounding communities, fostering better relationships with partners, and ultimately leading to better health outcomes for the community at large. We are committed to supporting Groundwork Elizabeth in their efforts to address the environmental injustices in their communities and to build climate resilient neighborhoods.

Thank you for considering our support of and commitment of resources for Groundwork Elizabeth's application and work. If you have any questions or would like further information, please do not hesitate to contact me at heather@groundworkusa.org or Ex. 6 - Personal Privacy (PP)

Sincerely,

Heather McMann
Chief Executive Officer
Groundwork USA

My Objective: *To utilize my skills and experience with vision development, resource cultivation, exemplary program and project management, and maintain generative relationships with a wide range of stakeholders to support environmental justice initiatives and promote urban agriculture.*

PROFESSIONAL HISTORY

Director of Urban Agriculture & Environmental Justice, Groundwork Elizabeth (GWE)
October 2010 ~Present - Elizabeth, New Jersey - www.groundworkelizabeth.org

AGRICULTURE: Established the GWE MicroFarm while developing Come Grow With Us! a community agriculture initiative which seeks to increase access to growing space in urban areas, increase the supply of sustainably grown food and provide accompanying education. Today, the initiative provides financial, technical and practical assistance to establish verdant, food producing partner gardens, and MicroFarms + Forests at schools, nonprofits, in partnership with Assemblywoman Annette Quijano (20 Legislative District, D), the Union County Board of County Commissioners, the City of Elizabeth, Elizabeth Public Schools, businesses and residents. *All done to increase access to individual food production in environmentally overburdened communities.*

ENVIRONMENTAL JUSTICE: Identified/obtained funding streams to support ongoing air quality monitoring in Elizabethport, adjoining the Port of Newark - Elizabeth Marine Terminal. Developed a collaboration with the City of Elizabeth, the Housing Authority of the City of Elizabeth, Rutgers Bloustein School and residents to increase monitoring, engage the community, prepare research study to quantify the health risks of exposure, and report results to the community. Funded by an EPA EJ Small Grant, NSF Planning Grant, and EPA Ambient Air Quality Grant. *All done to engage, educate and empower an overburdened community.* Currently serving as the Land Chair on the Environmental Justice Advisory Council of the NJDEP.

Program and Project Management:

- Created the GWE MicroFarm in partnership w/ New Jersey Department of Environmental Protection, Union County Board of County Commissioners, City of Elizabeth, Natural Resources Conservation Service, Sustainable New Jersey, Rutgers Cooperative Extension, Whole Foods, and the Westfield Foundation, among others.
- Led daily operations of the GWE MicroFarm and the Come Grow With Us! Urban Agriculture Initiative with a staff of four and 150+ volunteers to run five garden sites serving 11,000+ residents (GWE MicroFarm, Elmora Community Garden, Vira Verde Hydroponic Greenhouse (2021), E'Port Community Center Garden and Bayway Community Garden at the Elizabeth Housing Authority).
- Raise/manage the $185K annual budget through grants, government, donors and fee-for-service .
- Maintain relationships with 120+ community and school gardens across Union County: City of Elizabeth (6), the Housing Authority of the City of Elizabeth (6), and Elizabeth Board of Education (40).
- Collaborated with Kean University and the School of Environmental and Sustainability Sciences (SESS) to establish the 5-acre Liberty Hall Farm (2014-2016) to engage Kean University students and the general public in hands-on sustainable agriculture and urban environmental studies while providing fresh, organically-grown produce for the Ursino restaurant on campus, with the remainder of produce supporting local feeding programs.
- Spearheaded Union County Board of Commissioners Union "Kids Dig In: A School Garden Grant Program" and the "Union County Means Green Community Garden Grants" resulting in 115+ new gardens in Union County and ongoing practical and technical assistance. (2016 -present, $375,000 investment)
- Pioneered the #EveryoneGetsaGarden concept in partnership with The Victoria Foundation, The Greater Newark Conservancy, The Nature Conservancy and LISC providing 100 Newark and Elizabeth residents with

gardens-to-go, food vouchers, educational support and technical assistance during the Pandemic.

Resource Cultivation:

- Responsible for all fundraising for program work, including resource development strategy, prospect identification, grant writing, reporting, donor cultivation and relationship maintenance, sponsorship management/solicitation, and support for organization-wide fundraising efforts.
- AGRICULTURE: Raised over $1M from local, state and federal governments, foundations, corporate sponsorships, Fee-For-Service projects and special events to support gardening programs, including $300k Fee-For-Service multi-year contract with the Union County Board of Commissioners to administer two community agriculture grant programs, a $250k award from the NJDEP for MORE P.E.A.S. (Permaculture in Agricultural Systems, the development of a MicroFarm,) $75k award from the Natural Resource Conservation Services as a NJ Conservation Innovation Grant (to develop an urban farm conservation showcase), $75k Housing Authority City of Elizabeth, $50k from Community Investment Strategies to build and support gardens in affordable housing developments and $20k from Sustainable Jersey to demonstrate green infrastructure.
- ENVIRONMENTAL JUSTICE: Raised over $650,000 to explore air quality and air quality monitoring, with a focus on community engagement and education, including $75,000 from the EPA Environmental Justice Small Grant, $75,000 NSF Planning Grant (led by Rutgers Bloustein School) and most recently a $500,000 EPA grant - Addressing Ambient Air Pollution at the Housing Authority City of Elizabeth. An Urban Housing Authority Demo Project.

Director of Brand Management & Community Engagement, United Way of Passaic County
May 2010 ~ May 2014 - Paterson, New Jersey - www.unitedwaypasaic.org

- DONOR ENGAGEMENT: Donor Research, Management, Engagement, Solicitation, Reporting.
- BRAND MANAGEMENT: Identity development, Design, Technology, Advertising, Marketing, Special Event Fundraisers and Friendraisers (12+ per year)
- COMMUNICATIONS: Public Relations/Information Dissemination, Printed Materials, Digital Communications
- COMMUNITY ENGAGEMENT: Corporate/Group/Individual Volunteers
- CREATIVE STUDIO: Perform above services for multiple New Jersey United Ways

OBJECTIVE

To utilize experience and skills to develop and deliver successful projects and programming, working with partners in overcoming challenges to deliver sustainable programming positively impacting lives within a community.

EMPLOYMENT

October 2003-Present
Executive Director, Groundwork Elizabeth, Inc.
205 First St., Elizabeth, N.J. 07206

- Oversees operations for 501c3 non-profit organization which builds sustainable and equitable communities in Elizabeth and in Union County, New Jersey. Project areas include Healthy living, Youth Development, Urban Waters including the Elizabeth River, and Green Workforce Career Development.
- Works with government, the private sector, and the community at large including public and private schools in pursuit of its mission. A large portion of its beneficiaries are youth. Since 2017 have worked with Rutgers Environmental and Occupational Health Sciences Institute (EOHSI) on air quality issues in Elizabeth.
- Sample projects include development and oversight of a youth based Green Team, working with the greater community in the construction of the Elizabeth River Trail, development and management of the Come Grow With Us! Union County Community Gardening program, the construction of pocket parks, tree plantings, and gateway traffic restorations, a Climate Safe Initiative program, and service in community based coalitions, i.e. the Shaping Elizabeth Community Health based coalition.
- Coordinates Annual Tour de Elizabeth, now in its 17th year, as a way of fostering health through activity.

October 1985-April 2007
President, Morris Aaron Bicycles and Repairing, Inc.
804 First Ave., Elizabeth, N.J. 07201

- Steward of 103 year old family business.
- Responsibilities included business planning, buying, merchandising, sales, and staffing. Worked with City and County on plans for better cycling opportunities in local roadways and parks. Regularly advocated cycling in the community via helmet seminars, presentations on the importance of alternative modes of healthy transportation, etc.

November 1980 – October 1985
Executive Positions, Polo by Ralph Lauren, 40 W. 55th St., N.Y., N.Y.

- Served as Director of Foreign Licensing October 1983-October 1985, previously as Production Director of Domestic Knits and Woven shirts. Responsibilities included overseeing licensee/licensor relationship and approvals in Foreign Licensing. For Production capacity, projecting and fulfilling the production of units for designer.

August 1975-November 1980

Bloomingdales, 1000 3rd Ave., N.Y., N.Y.

- Worked in management within world famous retailer at NYC Flagship store, Riverside Square Store in Bergen County, in various positions in selling and buying capacities.

EDUCATION

Muhlenberg College, Allentown, Pa., B.A. History
Kean University, Union, N.J.
Additional coursework towards Education Certification
