A. Personal Statement

I am pleased to support Groundwork Elizabeth's application for a USEPA Environmental Justice Small Grant. The focus of my work in on community-engaged, translational research to provide a scientific evidence-basis for policy that improves environmental health conditions in environmental justice communities that are disproportionately impacted by environmental chemical exposures and health risks. I have a major, ongoing, CDC-funded project to study the health effects of PFAS compounds in drinking water in the Paulsboro NJ over the next 5 years. I continue to study the health effects of traffic-related air pollution in ports adjacent communities in New Jersey including impacts on respiratory and cardiovascular disease using community-based participatory research approaches. As Director of Community Engagement for our NIEHS-funded Center for Environmental Exposure and Disease, I work with community partners to translate findings from our work to policy interventions to reduce exposures and to address cumulative impacts of exposure to multiple chemical and nonchemical stressors in New Jersey communities. The overall goal of my research has been to better understand the interactive effects of multiple chemical and nonchemical stressors, and their cumulative impact on health disparities in environmental justice communities. I completed a NIEHS Mentored Clinical Scientist Career Development Award (K08) on interactions between exposure to diesel engine exhaust and acute psychological stress that featured translational science between animal models and humans. I recently completed data collection on a 4-year community-based participatory research project, funded by a USEPA STAR grant, to understand interactions between traffic air pollution and chronic psychosocial stress among children with asthma in the Ironbound Community of Newark, NJ.

B. Positions and Honors

Positions and Employment

1985-1988 Sanitary Inspector, Manalapan and Matawan Regional Health Departments, NJ.
1988-1989 Industrial Hygienist, Lederle Laboratories, Pearl River, NY.
1989-1993 Corporate Safety, Health and Environmental Manager, Cambrex Corp., E. Rutherford, NJ.
1997-2000 Resident, Rutgers-Robert Wood Johnson Family Medicine Residency Program.
1999-2000 Chief Resident, Rutgers-Robert Wood Johnson Family Medicine Residency Program.

Focused dedication and looking to succeed as a pinnacle member of your staff. Committed to high-quality results with little supervision. Fast learner and very self-motivated. I'm currently pursuing a B.S. in environmental science at Kean University.

ACTIVITIES
2012-2015 Judo and Jiu-jitsu, 2006-present Earth Science Club, 2017-Present

Authorized to work in the US for any employer

Work Experience

Director of Youth Initiatives

GroundWork Elizabeth - Elizabeth, NJ
April 2022 to Present

- Oversee established youth programming and implementation of new youth programs when necessary.
- Provide support and resources to youth team leaders to assist with youth team synergy and ensure the completion of projects by deadlines.
- Planning and implementing projects while working alongside government agencies.
- Manage payroll for youth workers.
- Assist Executive Director in federal and non-federal grant applications and writing.
- Continue to maintain partnerships with federal agencies under the U.S. Department of the Interior.
- Handle quarterly and annual reports for ongoing and past projects.

Manager on Duty (MOD)

Goldfish Swim School - Springfield, NJ
September 2020 to March 2022

- Maintain daily and financial operations.
- Train incoming workers and retrain existing team members to ensure the work culture.
- Create and participate in workshops and meetings.
- In charge of opening and closing the facilities.
- Maintain Goldfish sales goals.
- Enforce cleanliness policies according to COVID regulations.

Lifeguard

SAF GUARDING - Piscataway, NJ
November 2019 to March 2020

- Responsible for opening and closing pool areas.
- Maintained a clean pool environment including spa, Sauna, and Steam room and supervised patrons in and out of the pool.
- Checked and recorded water chemical levels.
- Enforced gym and pool policies to maintain a safe and healthy swimming environment.

Sales Associate
KIDS PLACE - Elizabeth, NJ
April 2016 to October 2019

- Work with customers hands on to supply the best costumer service I could offer.
- Took inventory of merchandise we have in order to make a lists of what we will be needing.
- I stock up shelves and make sure that the store is clean.
- I receive deliveries on a daily basis and must organize packages.
- I drive as far as Manhattan,NY to deliver packages.

Lifeguard
SPARKLING POOL SERVICES - Union, NJ
May 2019 to September 2019

- Monitor swimming activities and ensure that patrons swim in a safe and clean environment.
- Maintain the maintenance of swimming pool including but not limited to; skimming the pool, vacuuming the pool floor, scrubbing the pool walls and floor, etc.
- Enforced pool and community rules to ensure a healthy and safe swimming environment.

Student Worker
Kean University - Elizabeth, NJ
January 2018 to July 2018

I worked in the Graduate Admissions office with a small dedicated team. My daily task included filing paperwork, making and receiving phone calls, giving campus tours to potential students and prepare for events abroad or on Kean campus.

Education

Some college in Environmental Science
Kean University - Elizabeth, NJ
September 2017 to Present

High school diploma or GED

Skills

- Microsoft Office (10+ years)
- 50 WPM
- Research (5 years)
- Scheduling
- Filing
- Microsoft Word
- Organizational Skills
- Outlook
- Microsoft
- Data Entry
- Billing

- Inventory
- Pool Maintenance
- Swimming

Certifications and Licenses

Driver's License
April 2017 to March 2020

OSHA Hazard Communication Standard
October 2018 to Present

Certifies that I successfully completed Training in the OSHA Hazard Communication Standard (29 CFR 1910.1200)

Lifeguarding/First Aid/CPR/AED
June 2019 to June 2021

Lifeguard Training

Ex. 6 Personal Privacy (PP) is the Deputy Executive Director for the Housing Authority of the City of Elizabeth (HACE) and has been since 2007. Through her 39 years of service with the Housing Authority , she has held positions as Tenant Interviewer, Senior Account Clerk, Employee Benefits Coordinator, Director of Staff operations, and lastly as Deputy Executive Director. Her responsibilities as Deputy Director are to assist the Executive Director in all facets of Housing Authority Operations including staffing, program implementation and supervision of the Authority's 1600 public housing units and its 1450 Section 8 Rental Assistance Vouchers.

HACE is recognized by the Department of Urban Development as a model agency. This designation is reserved for the "high performing" agencies who efficiently and effectively utilize the funds they were allocated, maintaining low vacancy rates, as well as the overall maintenance and condition of the public housing properties.

With the award of HACE's HOPE VI grant in the amount of $28.9 million dollars, HACE demolished and rebuilt 655 public housing units namely, Pioneer Homes and Migliore Manor. Working collaboratively with the residents of these properties, Ex. 6 Personal Privacy (PP) successfully relocated all eligible families in newly appointed townhouse-style homes with hardwood floors, central AC, and yards.

Recognizing the need to serve the senior population, in 2011, the Housing Authority developed a new Senior building in the Elizabethport, housing 31 units of affordable housing with 4300 square feet of commercial space. The J. Christian Bollwage Towers became the first LEED GOLD CERTIFIED residential affordable housing development in the State of New Jersey. It serves as a testament to the ability of the Housing Authority and its team of residents and staff to build affordable housing that was designed and environmentally conscious of its effect on residents of the surrounding community.

Providing or improving "brick and mortar housing" is one facet of addressing the housing needs of the community. Improving the lives of families living within HACE communities is another. As such, [redacted] has geared new housing programming towards resident health and family self-sufficiency. The Bayway Family Success Center and the E'Port Community Centers in partnership with PREVENTION LINKS are funded with State and federal program dollars to provide a multitude of family strengthening and senior programming furthering this cause. The Mravlag Manor Mobile Market, fostered through SHAPING ELIZABETH and the YMCA collaboration, has provided families with the delivery of fresh produce and vegetables on a monthly basis. The partnership with GROUNDWORK ELIZABETH has enabled HACE to create and foster resident lead initiatives ranging from Community Gardening programs at each of our public housing sites, Youth Environmental Training programs providing young adults opportunities to learn and get paid during summer months, and collaborations with both local Universities, Rutgers and Kean encouraging and creating education environmental awareness particularly in the area of air quality. Nutritional programs have been initiated at all senior properties engaging the seniors to provide helpful food choices and meal preparations. A grant from RUTGERS University has been secured in efforts to study air-quality and the effect of heat-waves in apartments at Mravlag Manor. A healthy relationship program has now progressed to a third semester providing the women of the area surrounding Mravlag Manor with an opportunity to discuss and receive one-on-one counseling. Recently, HACE was awarded a 2.3 million dollar JOBS PLUS PILOT grant through HUD in

effort to support job training, education and employment opportunities for the residents at Mravlag Manor. HACE was one of 9 agencies from across the country to be selected. Since its award in early 2020 HACE and our team has worked to set up an infrastructure of partnerships one that needed to be able to work through the logistics of the pandemic response and one that would provide access to supportive services needed with State, County and local agencies. They include Bridgeway Rehab Services, Union County Office of Social Services, Elizabeth Development Company, Prevention links, Proceed, E'Town Housing and Community Development, Urban League of Union County, Urban League of Union County Young Professionals, Boxwood Learning Center, Investors Bank, Elizabeth Public Library, NJTIP and Mravlag Manor Resident Association.

Through this initiative HACE will better serve our residents and provide work-readiness supports in the form of financial, employment, educational and empowerment services to eligible residents.

Ex. 6 Personal Privacy (PP) grew up in the City of Elizabeth where she attended St. Genevieve's Grammar School, Benedictine Academy High School and received her bachelor of Liberal Arts from Seton Hall University. She currently resides in Wall Township NJ with her husband, Ex. 6 Personal Privacy (PP) of 37 years and their two daughters, Ex. 6 Personal Privacy (PP) and her "Best big Little Men" , grandsons- Ex. 6 Personal Privacy (PP) and not to be outdone, grand twins Ex. 6 Personal Privacy (PP)

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Hispanic Access Foundation

Address: 1030 15th Street NW, Suite B/1 #150

City: Washington

State: DC: District of Columbia Zip Code: 20005

B. Unique Entity Identifier (UEI): EDSNK9AQ7B16

C. Applicant/Recipient Point of Contact

Name: Luke Argleben

Phone: Ex. 6 - Personal Privacy (PP)

Email: development@hispanicaccess.org

Title: Director of Development

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Robert Fanger, Chief Operational Officer
Hispanic Access Foundation, 1030 15th Street NW, Suite B/1 #150, Washington, DC 20005-1503
Tel. Ex. 6 Personal Privacy (PP) Fax. Ex. 6 Personal Privacy (PP)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Yes

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. We determined that you are a public charity under the Code section(s) listed in the heading of this letter.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

Letter 947 (DO/CG)

April 11, 2023

Attn. Christine Tamara, Partnership Engagement Director
Hispanic Access Foundation

Dear Christine,

This letter is to confirm that the American National Red Cross (Red Cross) and Hispanic Access Foundation will be signing a Letter of Cooperation next month. The purpose of the Letter of Cooperation will be to describe the ways in which the Red Cross and Hispanic Access Foundation will cooperate to help their communities prepare for, respond to, and recover from emergencies. The Red Cross and Hispanic Access Foundation will agree to strengthen their relationship and work together on projects and activities consistent with their shared goals. The initial period of cooperation will be for three years with the option to extend the agreement if both parties are amenable.

As part of the Letter of Cooperation, we look forward to formalizing our work together in Puerto Rico. This work may entail: Hispanic Access leaders and network members applying to become Red Cross volunteers; the Red Cross offering disaster preparedness and disaster response presentations; both organizations promoting Latino Conservation Week; collaboration on reducing home fire fatalities and injuries; sharing emergency preparedness information; supporting Latino health by offering Red Cross outreach booths at community events; providing information to Hispanic Leadership Network pastors; partnering to distribute emergency supplies after major disasters; Hispanic Access supporting Red Cross blood drives; and Hispanic Access serving as an introduction to Latino communities for the Red Cross.

The American Red Cross, founded in 1881, is dedicated to helping people in need throughout the United States and, in association with other Red Cross networks, throughout the world. Through its mission, the Red Cross prevents and alleviates human suffering in the face of emergencies by mobilizing the power of volunteers and the generosity of donors. The Red Cross provides services to those in need regardless of citizenship, race, religion, age, sex, national origin, disability, sexual orientation, veteran status or political affiliation.

In Partnership,

Armando Falcon

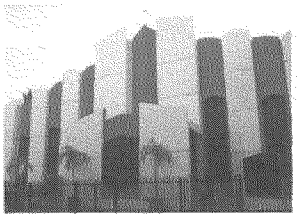
Attn. Maite Arce, President and CEO
Hispanic Access Foundation

April 3, 2023

Dear Maite,



I am pleased to offer this letter of support for your planned Nuestra Costas project. If this project is awarded, I would be delighted to help you recruit more Latino pastors to your faith-based alliance to help lead this project on the ground.

As you know, through my work with Alianza de Ministerios Evangélicos Nacionales (AMEN), I am connected with Latino pastors throughout the country and Puerto Rico. I have been happy over the years to help you build your own faith-based alliance and to recruit pastors to your Hispanic Leadership Network and Por la Creación initiatives. I would certainly be able to help you grow these networks for Nuestras Costas.

Sincerely,

Rev. Dr. Francisco Colop

Ms. Maite Arce
President and CEO
Hispanic Access Foundation

April 4, 2023

Dear Maite:

We, the First Baptist Church of Rio Piedras is happy to learn about your "Nuestras Costas" project. It is an important and worthwhile initiative that can certainly help the people of Puerto Rico.

We would be delighted to support "Nuestras Costas" in any way possible. In our church we can get the word out to our community through the church networks and can also offer the church as a meeting place and organizing resource for community gatherings. We understand that we will host two community events per year over a three-year period and will receive $21,000 in total for this work.

It has been an honor to work with Hispanic Access Foundation over the years, and being a member of your Hispanic Leadership Network has been a great experience and support for us. We know your organization well and know you can do an excellent job in executing this important initiative.

Sincerely,

Zoraida Derieux Irizarry
President
Board of Directors
First Baptist Church of Río Piedras

April 3, 2023

Dear Maite,

Thank you for letting me know about your Nuestras Costas project. I believe it is an important initiative that can do much to support the people of Puerto Rico who are suffering with climate change.

It has been an honor to partner with Hispanic Access Foundation in the past, and I have benefited greatly from being a part of your Hispanic Leadership Network for faith leaders. I would be most happy to help you with the Nuestras Costas project, should it come to fruition. Specifically, I can help to get the word out about the project through my congregation and professional networks. I can also make meeting space available and help organize your community gatherings. I understand that I will host two community events per year over a three-year period and will receive $21,000 in total for this work.

Sincerely,

April 3, 2023

Attn. Maite Arce
President and CEO
Hispanic Access Foundation

Dear Maite Arce,

I am most excited to learn from your staff about your planned initiative to take place here in Puerto Rico, Nuestras Costas. Puerto Rico needs this project. Our citizens are already suffering the consequences of climate change, and these consequences will only worsen over time.

It has been an honor to participate in Hispanic Access Foundation's Hispanic Leadership Network, and I am happy to offer my support to this new initiative. I would be pleased to use my church network to spread the word about Nuestras Costas and also to offer my church as a meeting space and organizing hub for community gatherings. I understand that I will host two community events per year over a three-year period and will receive $21,000 in total for this work.

Thank you again for letting me know about Nuestras Costas.

Sincerely,

Rvdo. Luis Omar Román Arizmendi

Hispanic Access Foundation

April 3, 2023

Dear Maite,

It has been a blessing to me to participate in your Hispanic Leadership Network, and now I am most heartened to learn about your new project to take place in Puerto Rico, Nuestras Costas. The citizens of Puerto Rico very much need any support they can receive to face the changing climate and related challenges that affect us all. I would be delighted to help support the Nuestra Costas project. I would be able to spread the word about this important initiative to the members of my church and to other pastors. I can also offer my church as a meeting and organizing place for community events. I understand that I will host two community events per year over a three-year period and will receive $21,000 in total for this work. Thank you for reaching out to me.

Sincerely,

Pastora Rosa Cepeda

Attn. Shanna Edberg, Director of Conservation Programs
Hispanic Access Foundation
1030 15th St NW, Suite B/1 # 150
Washington DC 20005

April 6, 2023

Dear Shanna,

Thank you for the invitation to contribute to your planned Nuestras Costas/Our Coasts initiative. I am thrilled to be joining the Olas y Acción ocean advisory council and see the Nuestras Costas initiative as another wonderful opportunity to serve the people of Puerto Rico.

In my current role as founder, president and executive director of Conservation Opportunity, a Puerto Rican-based nonprofit organization, I oversee a staff of seven professionals working to connect individuals with paid and volunteer opportunities in the conservation field. We lead outdoor events such as beach clean-ups, restorations of native plants, working on agroforestry farms, and more. This work is a natural outgrowth of my formal education in ecology and evolutionary biology and of my ongoing work with the U.S. Fish and Wildlife Service.

For your planned Nuestras Costas initiative, I would be delighted to serve as a community facilitator and trainer, leading conversations on climate change and climate science and helping communities to plan climate resilience projects.

Sincerely,

Fabiola Torres-Toledo

Attn. Shanna Edberg, Director of Conservation Programs
Hispanic Access Foundation
1030 15th St NW, Suite B/1 # 150
Washington DC 20005

April 7, 2023

Dear Shanna,

This letter is to confirm that, should you receive funding, I will take part in your Nuestra Costas/Our Coasts project. I would be happy to support the Nuestras Costas initiative in multiple ways, including providing climate science trainings and serving as a facilitator for community resilience planning meetings.

As you know, besides serving on the Hispanic Access Foundation Latino Climate Council, I am a Senior Social Scientist for Climate Vulnerability with the Union of Concerned Scientists (UCS). UCS is a national nonprofit organization founded more than 50 years ago by scientists and students at the Massachusetts Institute of Technology. Its mission is to use rigorous, independent science to solve our planet's most pressing problems. Joining with people across the country, UCS combines technical analysis and effective advocacy to create innovative, practical solutions for a healthy, safe, and sustainable future.

UCS's work extends to the realms of climate change and environmental justice, and our organization is well aware that many of America's poorest residents and people of color, including communities in Puerto Rico, are disproportionately affected by rising ocean levels, worsening storms, urban heat islands, and other impacts of climate change. Thank you for reaching out to me about this important project.

Sincerely,

DocuSigned by:
Juan Declet-Barreto 4/7/2023

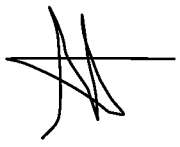
Attn. Shanna Edberg, Director of Conservation Programs
Hispanic Access Foundation
1030 15th St NW, Suite B/1 # 150
Washington DC 20005

April 10, 2023

Dear Shanna

I am delighted to join the ocean advisory board of Hispanic Access Foundation's Olas y Acción. I hereby confirm that I will contribute to your planned Nuestras Costas/Our Coasts initiative should funding for the project be found.

As you know, I currently work as a program manager for the non-profit Surfrider in Puerto Rico. In this position, I help communities and develop campaigns and projects to protect and restore different marine reserves throughout the Puerto Rican archipelago.



I work in the coordination of environmental and social impact activities promoting community self-management as a resilience tool in the face of climate change.

I look forward to using my experience in community organizing to help the Hispanic Access Foundation facilitate public discussions throughout Puerto Rico on disaster preparedness.

Thank you for this invitation.

Sincerely yours,

Hector Varela-Valez

1. PROGRAM OBJECTIVES

A. PROJECT SUMMARY

Project Title: Nuestras Costas (Our Coasts): Improving Climate Disaster Resilience in Puerto Rican Communities

Project Locations: Puerto Rico: Rio Piedras, 00924; Guyama, 00785; Luquillo, 00773; San Juan, 00928.

Applicant Information: Hispanic Access Foundation, 1030 15th Street, NW, Suite B/1 #150, Washington, DC 20005-1503, Tel. Ex. 6 Personal Privacy (PP) Email: development@hispanicaccess.org

Brief Description of Applicant Organization: Hispanic Access' mission is to connect Latinos and others with partners and opportunities to improve lives and create an equitable society. Through our Hispanic Leadership Network, Por La Creación (For Creation) faith-based alliance, Latino Climate Council, and Olas y Acción (Waves and Action) ocean advisory committee, we recruit, train, resource, and learn from Latino community leaders, empowering them to take action on projects of impact to their local communities.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? (No)

Project Abstract: The Nuestras Costas (Our Coasts) project will help Puerto Rican communities to prepare for and mitigate the effects of climate disasters through public listening sessions, trainings on climate science, disaster-preparedness trainings, and facilitated planning sessions and seed money for small-scale disaster resilience projects. Programming will take place at six tier-1 churches throughout the island, and these same tier-1 churches will be resourced and supported to recruit and train an additional six to eight tier-2 churches each to undertake similar public engagement. Through participation in Latino Conservation Week, tier-1 churches will also share project activities and lessons learned with the general Puerto Rican public and with decision-makers. The six tier-1 target churches, their chosen 36-48 tier-2 churches, and the communities these churches serve will experience improved disaster-resilience, to include both disaster preparedness and mental health resilience.

Project Type(s): Public Education and Training

Special Considerations: Climate Change/Disaster Resiliency

Environmental Issues: Climate change: superstorms, hurricanes, flooding, mudslides, climate stress (and mental health).

ED_016126_00000935-00001

List of Project Partners: Red Cross (National NGO); Discípulos de Cristo (faith-based); Primera Iglesia Bautista de Guayama (faith-based); First Baptist Church of Rio Piedras (faith-based); Soy Lino Fino (faith-based); Conservation Opportunity and Surfrider (Puerto Rican NGOs); Union of Concerned Scientists (National NGO).

This project is not required to develop a QAPp.

B. Environmental and Public Health Information

In the United States and its associate territories, 95,471 miles of shoreline separate the land from the waters. In 2016, these coastal shoreline counties contributed 46% of the nation's total gross domestic product and 40% of the nation's total jobs. In this same time period, nearly 127 million people lived along these shorelines, and 23% of them were Latino. (Gonzalez, 2020). Poverty and economic instability, poor health conditions, and reduced access to social and political resources contribute to Latino population vulnerability, attributes that put these individuals among the approximately 40% of coastal county residents who fall into an "elevated coastal hazard risk category" and that define the communities whose vulnerabilities will be impacted by climate change (Gonzalez, 2020).

An island in the Caribbean, the Commonwealth of Puerto Rico has 311 miles of coastline surrounding a 3,515 square-mile land area (World Factbook, 2022). Of the 3.26 million people who live in Puerto Rico (Census 2020), 93.6% live in urban areas that tend to be located along the coast (World Factbook, 2022). This population is 99% Latino, including 75.8% White, 12.4% Black, 8.5% Indigenous or Asian and Pacific Islander, and 3.3% individuals of multiple races (World Factbook, 2022).

Although Puerto Ricans are U.S. citizens, according to the U.S. Census Bureau (2020) their socioeconomic indicators tend to lag behind those of people living on the U.S. mainland in a number of key dimensions. First, Puerto Ricans are significantly poorer than mainland Americans. Although the median household income in the United States is $64,994, the average Puerto Rican enjoys only a $21,058 household income. Median per capita income on the mainland is $35,384, but only $13,318 in Puerto Rico. While 11.6% of mainland residents live in poverty, a startling 40.5% of Puerto Rican residents live in poverty.

Mattei et al report that Puerto Rico is experiencing "an economic and healthcare crisis." Specifically, "self-reported consumption of fruit (44%) and vegetables (76%), and of meeting physical activity guidelines (8%) suggest unhealthy lifestyle behaviors." The researchers add that "disparities in common chronic conditions also exist, with prevalence of 42% in Puerto Rico vs. 31% in U.S. for hypertension; 39% vs. 36% for high cholesterol, 16% vs. 10% for diabetes; and 9% vs. 6% for coronary heart disease or myocardial infarction; additionally, 66% of island residents have self-reported body mass index (BMI) consistent with overweight or obesity. High

prevalence of cardiometabolic conditions and behavioral risk factors were shown in a 2005 probabilistic cross-sectional study of Puerto Ricans aged 21-79 years." (2018)

According to the EPA's EJScreen tool, the entire Puerto Rican coastline is at risk for six-foot level sea rise (2023). The World Factbook reports that Puerto Rico is experiencing soil erosion, droughts and water shortages, and industrial pollution (2022). The county's IT infrastructure also lags behind mainland United States. Only 72.6% of Puerto Rican households have internet, compared with 91.9% of U.S. households. Similarly, only 64.3% of Puerto Rican households have broadband internet, compared with 85.2% of U.S. households. (Census 2020).

Due to its location in the Caribbean, and exacerbated by climate change, Puerto Rico is also in the path of many superstorms and hurricanes. Hurricane Fiona made landfall on the island on September 18, 2022, causing widespread flooding, mudslides, landslides, and power outages (CNN, September 19, 2022). At the same time that Puerto Rico must now respond to Hurricane Fiona, the island is still recuperating from 2017's Hurricane Maria. The New York Times reports, "Hurricane Fiona arrived in Puerto Rico almost exactly five years after Hurricane Maria struck, a devastating storm from which the island never fully recovered." According to the news outlet, "Years on, housing still hadn't been found for tens of thousands of survivors still living under leaky tarps, while others lived in wrecked homes. A grass-roots movement channeling the anger formed, fueling a popular uprising in 2019 that lasted 15 days and led to former Gov. Ricardo A. Rosselló stepping down." (Victor, 2022).

In the aftermath of Hurricane Maria, 66% of residents reported their homes were damaged as a result of the hurricane. Sixty-six percent of residents experienced a three-month or longer power outage, and 53% were worried about the quality of water in their home (Gonzalez, 2020). The hurricane also deeply affected the island's social structure; 68% of Puerto Ricans had close friends or family members move away from the island as a result of the storm, with three-quarters of these individuals planning to emigrate permanently (Gonzalez, 2020). After Hurricane Maria, moreover, USDA reported that Puerto Rico's tropical rainforest, El Yunque, was "completely defoliated" and "might take a century to recover" (Ferre-Sadurni, 2017).

Besides experiencing disruption in mental health services and lack of access to medication following Hurricanes Maria and Fiona, there is evidence that Puerto Rican mental health has suffered in other ways in the wake of these and other disasters. Depression, anxiety, PTSD, and substance abuse have been demonstrably connected with flooding and coastal disaster experiences (Gonzalez, 2020). The National Council for Mental Wellbeing reports "thousands upon thousands" of residents of Puerto Rico experienced PTSD after Hurricane Maria. A San Juan suicide prevention hotline, moreover, reported calls surging from 2,046 in August 2017 before the hurricane to 4,548 in January 2018 after the hurricane (Howard, 2018). Polanco observes that, since 2017, the island has seen "two Category 5 hurricanes, earthquake swarms,

the COVID-19 pandemic, and almost monthly blackouts. These situations have hung a dark cloud above the lives of many Puerto Ricans" (2022).

People of color, it should be noted, have traditionally been excluded from the U.S. environmental movement. For more than a century, for example, initiatives to protect parks, public lands, and other natural places in the United States have been dominated by White people and perspectives (Purdy, 2015). Discrimination and the framing of environmental priorities through this exclusive lens—bolstered by underrepresentation of people of color at the staff and leadership levels of conservation organizations, foundations, and natural resource agencies—mean that U.S. Latinos often lack access to essential services, miss out on decision making, and are particularly vulnerable to the public health consequences of climate hazards and ensuing natural disasters (Taylor, 2020).

In her 2020 study on Latino coastal communities, moreover, Gonzalez reports the following top-line findings: (1) Quality of life and safety: Latinos are less prepared for, less equipped to deal with, and therefore more vulnerable than the general population to flooding and coastal disasters. (2) Health and well-being: Beach and fishery advisories and closure, or lack thereof, have been demonstrated to disproportionately impact Latino communities.

Working with Puerto Rican churches, the Nuestras Costas (Our Coasts) project will bolster disaster resilience in six tier-1 Puerto Rican communities by holding community listening sessions to learn about local concerns, providing trainings on climate science, providing resiliency training on disaster preparedness and response, and providing these same communities with training and seed money to launch resilience projects of their own. Church leaders in the six tier-1 communities, moreover, will be guided to recruit and train an additional six to eight tier-2 churches each to undertake similar public engagement. Through participation in Latino Conservation Week, tier-1 churches will also share project activities and lessons learned with the general Puerto Rican public and with decision-makers. The six tier-1 target churches, their chosen 36-48 tier-2 churches, and the communities these churches serve will experience improved disaster resilience, to include both disaster preparedness and mental health resilience.

C. Organization's Historical Connection to the Underserved Community

Maite Arce, a Mexican immigrant to the United States, established Hispanic Access Foundation in 2010 with the mission to connect Latinos and others with partners and opportunities to improve lives and create an equitable society. Founded by and for Latinos, we envision a future where every Latino individual in America enjoys good physical health and a healthy natural environment, a high-quality education, economic success, and civic engagement in his or her community with the sum of improving the future of our country. Our board of directors and staff are over 80% Latino and are of European, Indigenous, and African descent. These professionals represent the broad U.S. Latino diaspora, tracing their origins to South, Central, and North

ED_016126_00000935-00004

America as well as the Caribbean. A national nonprofit organization, we understand that our work must be deeply rooted in the local communities we serve; we work to recruit, learn from, and catapult emerging Latino leaders into positions of greater influence.

With our Hispanic Leadership Network (HLN), we train Latino clergy, empowering them to take on new leadership positions in the communities they serve. To date, we have worked with six pastors based in Puerto Rico, providing them with training on mental health, planning and evaluation of mission and program work, financial literacy, self-care, and more. We have also provided peer mentoring and professional networking opportunities to these same pastors.

Hispanic Access maintains standing environmental advisory and justice groups. These include our Por la Creación (For Creation) faith-based alliance, our Olas y Acciones (Waves and Actions) ocean advisory council, our Latino Climate Council, and our Forest Service Advisory Council. Currently, eight Puerto Ricans are involved in these groups. These individuals provide guidance and policy recommendations to Hispanic Access which, in turn, informs our programming and public education. This past January, the Latino Climate Council met in San Juan, Puerto Rico to plan climate change solution strategies for Latino communities in 2023. The group also volunteered at a cacao farm and met with local students to discuss the importance of getting involved in a conservation career. Earlier, in response to Hurricane Fiona, this same group put together a resource list and mutual aid list to support victims of the hurricane.

As part of our Cartas de Amor (love letters) public education and advocacy campaign conducted in conjunction with American Rivers, Puerto Rican Fabiola Torres drafted a love letter to El Yunque National Forest and was featured in a video shared with policy-makers calling for greater protections for the only tropical rainforest in the U.S. national forest system.

Latino Conservation Week (LCW), a national annual initiative to foster Latino recreation in and stewardship of the outdoors, sees regular participation in Puerto Rico. In 2021, we spearheaded four events on the island and four again in 2022. These included a “Festival de Dunas” (Dune Festival) which educated local communities on the value and ecological roles of natural barriers such as sand dunes, and a workshop on the invasive Boa constrictor with information on how to identify these large snakes and how to respond to this threat. Project partners included the U.S. Fish and Wildlife Service as well as local church leaders.

Our 2020 whitepaper, Nuestro Océano y la Costa: Latino Connections to the Ocean and Coast, includes information about threats to the oceans and coasts in Puerto Rico; their impacts on Latino communities; Latino communities’ responses; and recommendations for further public education and advocacy.

Through our MANO Project (My Access to Network Opportunities), launched in 2015, Hispanic Access develops Latino and other minority leaders who share a passion for serving and strengthening their communities. With MANO, Hispanic Access brokers partnerships with federal agencies and recruits college students and recent graduates to serve in rigorous federal internships and fellowships with the National Park Service, the Bureau of Reclamation, the Fish and Wildlife Service, or the Forest Service. To date, more than 565 young professionals have participated in MANO—with many either hailing from or serving in Puerto Rico. Projects these interns have undertaken have included planting 1,700 fruit and native trees in the Community Forest of Río Hondo, launching a summer camp program in Vieques National Wildlife Refuge, and supporting recovery and pollution-mitigation efforts following Hurricane Maria.

Since our founding, Hispanic Access has utilized what we call our "proven process" to ensure our programming derives from and is responsive to the needs of our Latino stakeholders. This eight-step method entails (1) listening to the need, (2) building the strategy, (3) understanding whom to reach, (4) knowing how to reach, (5) making the connection, (6) training and supporting, (7) moving people to action, and (8) tracking, reporting, and promoting. Section D below provides more details on how we will apply this proven process to the Nuestras Costas (Our Coasts) project.

D. EJCPS Model

For the Nuestras Costas/Our Coasts project, Hispanic Access will utilize the following elements of the EJCPS model:

(1) Issue Identification, Community Vision and Strategic Goal Setting: In the first round of community meetings, we will host public listening sessions at six churches in Puerto Rico to learn what issues are most affecting local communities and how those affected most feel they need support.

(2) Community Capacity-Building and Leadership Development: In subsequent rounds of community meetings, we will partner with the Red Cross, members of our Latino Climate Council, and members of our Olas y Acción (Waves and Action) ocean advisory council to offer a series of trainings on those issues identified in Round One. These may cover any or all of the following: climate-change science and global warming, mental health, disaster preparedness, disaster response, First Aid, and CPR.

In addition, this project features a train-the-trainer component whereby Hispanic Access will support tier-1 churches in cultivating additional tier-2 church leaders. These tier-2 church leaders will learn about how the tier-1 churches are promoting disaster resilience programming and will learn how to implement similar programming in their own communities.

ED_016126_00000935-00006

Church leaders and volunteers and members of the general public will also have the opportunity to organize events for and participate in Latino Conservation Week, a national initiative to encourage and foster Latino stewardship of the outdoors.

(3) Consensus Building and Dispute Resolution: Hispanic Access staff and facilitators will guide churches and their communities through the decision-making process of determining what projects to undertake with their pass-through seed grants.

(4) Multi-Stakeholder Partnerships and Leveraging of Resources: Hispanic Access will partner with six tier-1 churches in Puerto Rico which will, in turn, work with an additional 36-48 tier-2 churches. In addition, we will partner with the American Red Cross to provide disaster-resilience training. We also work with our standing advisory committees of Latino professionals—-our Olas y Acción ocean advisory council and our Latino Climate Council. Members of these groups representing the Union of Concerned Scientists, and local Puerto Rican environmental groups, Conservation Opportunity and Surfrider, will facilitate public meetings and roundtable discussions and provide training on climate change and climate science. Finally, through Latino Conservation Week, we partner with hundreds organizations each year to offer events throughout the United States and Puerto Rico. These partners may be for-profit corporations such as Patagonia and REI, nonprofit organizations such as Latino Outdoors, faith-based organizations, and public entities such as national parks and refuges.

Besides receiving training and participating in facilitated public meetings, church partners will also receive seed grants to undertake small-scale resilience projects and will receive grantsmanship training on how to secure additional funding.

(5) Constructive Engagement by Relevant Stakeholders: This project will serve the Puerto Rican general public holding public listening sessions, offering disaster resilience training, and establishing small-scale resilience projects (identified by the affected communities) in six congregations. Project facilitators will be Puerto Ricans.

(6) Sound Management and Implementation: Planning of small-scale resilience projects, to take place in Year 3, will entail "future-proofing," that is, planning for how to avoid potential pitfalls, preparedness for different contingencies, and setting up the projects for successful implementation. At the organizational level, Hispanic Access will manage the project using the Entrepreneurial Operating System (EOS) described below.

(7) Evaluation, Lessons Learned and Replication of Best Practices: This project has been designed using Hispanic Access' proven process of community engagement described above; as such the project already replicates numerous similar initiatives which we have spearheaded across the country. The train-the-trainer component of Nuestras Costas (Our Coasts) will allow

for replication of best practices among 36-48 Puerto Rican churches. Pre- and post-surveys of faith leaders and of public meetings will further allow Hispanic Access to evaluate the programming's effectiveness and to learn how to make adjustments for future projects.

E. Project Linkages

As noted above, people of color, including Latinos, have historically been excluded from the mainstream, predominantly White, environmental advocacy movement (Taylor, 2020). Hispanic Access, a Latino-led and Latino-serving organization, works to correct this narrative by creating opportunities for Latino leadership in this movement. Leading advisory committees for this project will be our standing Latino Climate Council and our Olas y Acción (Waves and Action) ocean advisory council. Both of these groups are composed of Latino environmental professionals, and Puerto Rican members of these advisory committees will serve as community facilitators for the project. The project manager, Juan Rosas, is a bilingual bicultural Latino pastor with extensive experience in working with and mobilizing Latino faith-based communities to advocate for environmental justice. Finally, the target audience for this project will also be Latinos—Puerto Ricans in six communities across the island. Through participation in the Our Coasts (Nuestras Costas) project, these local Puerto Rican community members will learn about climate change and disaster resilience, will speak out on the issues that are affecting them in their communities, will participate in Latino Conservation Week, and will be empowered with seed money and training to undertake the resilience projects they identify as most needed in their local communities.

F. Partnerships and Collaborations

Hispanic Access Foundation, a secular national nonprofit organization, will partner with Puerto Rican churches, Latino environmental advisors from the nonprofit and private sectors, and the American Red Cross to work with six tier-1 and 36 to 48 tier-2 local communities in Puerto Rico.

1. American Red Cross: Hispanic Access Foundation recently negotiated an agreement with this national nonprofit to cooperate, at no cost to one another, in helping communities prepare for, respond to, and recover from emergencies. The initial agreement will be piloted over a three-year period in Puerto Rico, Texas, California, and Florida, with plans to continue and expand programming together in future years.

Founded in 1881, the American Red Cross is dedicated to helping people in need throughout the United States and, in association with other Red Cross networks, throughout the world. Through its mission, the Red Cross prevents and alleviates human suffering in the face of emergencies by mobilizing the power of volunteers and the generosity of donors. In formal discussions with

ED_016126_00000935-00008

Hispanic Access Foundation, the Red Cross has shared with us that it has experienced challenges in bringing its programming to Spanish-speaking communities and in recruiting volunteers from these same Spanish-speaking communities.

Hispanic Access will serve as a conduit and introduction to Latino communities for the Red Cross. While our formal agreement will be codified at a signing ceremony at the end of this month, our draft letter of cooperation foresees the following elements to our partnership: Hispanic Access leaders and network members applying to become Red Cross volunteers; the Red Cross offering disaster preparedness and disaster response presentations; both organizations promoting Latino Conservation Week; collaboration on reducing home fire fatalities and injuries; sharing emergency preparedness information; supporting Latino health by offering Red Cross outreach booths at community events; providing information to Hispanic Leadership Network pastors; partnering to distribute emergency supplies after major disasters; Hispanic Access supporting Red Cross blood drives; and Hispanic Access serving as an introduction to Latino communities for the Red Cross.

2. Latino churches: Faith-based organizations, defined as places of worship or congregations, offer extensive reach into neighborhoods through complex social networks (Asomugha et al, 2011). The National Congregations Study (2006–2007) found that 45% of congregations were involved in formal delivery of social services, while another 27% were involved informally (Chaves and Anderson, 2008). At the same time, organized religion holds a central position in Latino culture. According to the Pew Research Center, 77% of Latinos affiliate with a particular Christian denomination (2019). Churchgoing, moreover, constitutes an important family activity within Latino communities. Forty-five percent of Latino families report parents and teens attend services together at least once or twice a month, while 53% of families also attend church together although less frequently (Sciupac, 2020).

Hispanic Access will work with four of our current Puerto Rican church partners to engage with communities in Guyama, Rio Piedras, Cuquillo and San Juan. These churches have chosen to join the project because they recognize the critical need to improve disaster resilience in the communities they serve. In addition, working with our standing faith advisor, Rev. Dr. Francisco Colop, we will identify two additional tier-1 churches; a pastor of pastors, Rev. Dr. Colop represents 13,294 churches in the United States and Puerto Rico. These tier-1 churches, in turn, will identify 36-48 churches to receive train-the-trainer programming. Each tier-1 church will receive consulting fees to participate in Nuestras Costas (Our Coasts) as well as seed money to launch a small-scale resilience project. Tier-1 churches will be responsible for helping to publicize, organize, and host public events.

As part of our strategic plan, Hispanic Access aims to foster a network of 10,000 faith and grassroots Latino leaders throughout the country by 2033 who will be empowered to undertake

projects of importance to their local communities. Hispanic Access taps regularly into our church networks to spearhead not only environmental programming, but also health outreach, financial literacy training, informal STEM education, and more. Once brought into our network, new church partners can expect ongoing opportunities to partner with and to receive training and support from our organization to focus on those issues impacting them locally.

3. *Latino environmentalists:* Drawing from our advisory committees, Hispanic Access will provide consulting fees to representatives of Surfrider, Conservation Opportunity, and the Union of Concerned Scientists to provide training on climate science and coastal resilience and to facilitate public meetings. These Latino professionals work with and lead organizations missioned to support conservation efforts in Puerto Rico; as such, participation in Our Coasts (Nuestras Costas) provides a forum to further their own organizational goals and career development. These standing advisory committees, moreover, are regular and ongoing components of our greater environmental programming and are supported through numerous funding streams. Thus, the committees' work will continue beyond the project period.

2 CFR Part 2 Compliance: No consultants will receive funding above the EPA micro-purchase threshold of $10,000. The six tier-1 churches, as nonprofit organizations, will receive subawards to host community events, recruit tier-2 churches, and undertake resilience project planning.

2.0 Project Activities/ Milestone Schedule

A. Project Activities

Church recruitment: Four tier-1 churches have already been identified. Two additional tier-1 churches will be identified with the assistance of our standing advisor, Rev. Dr. Francisco Colop, who represents 13,294 churches in the U.S. and Puerto Rico. Tier-1 churches, in turn, will each reach out to six to eight churches each to recruit 36-48 tier-2 churches in total.

Community meetings: Two community meetings will be held each year at each of the six tier-1 churches for a total of 36 such meetings. Meetings will be facilitated by Hispanic Access staff and/or consultants. Meetings will begin with public listening sessions where communities discuss their own experiences with climate change and what types of support they need. In subsequent meeting rounds, local NGOs and the Red Cross will provide information on climate change science, disaster preparedness, disaster response, mental health, and more. In the final year of community meetings, facilitators will help six tier-1 churches to identify and plan one small-scale disaster resilience project each of the church's choosing.

Train-the-trainer: Hispanic Access will develop training materials and a curriculum for the 36-48 tier-2 churches. Tier-2 churches will meet annually and will be briefed on the Nuestras Costas

ED_016126_00000935-00010

(Our Coasts) project. Tier-2 churches will learn how to promote disaster preparedness and response in their own communities, will receive introductions to partners such as the Red Cross and local Puerto Rican environmental NGOs, and will receive training from Hispanic Access on how to fundraise for their own programming.

Latino Conservation Week (LCW): Held annually throughout the United States and its territories, LCW will provide an opportunity for participating churches to showcase their project involvement with their broader communities and with local decision-makers, teaching these audiences about climate change and what can be done about it.

Small project resilience planning: Tier-1 churches will receive $5,000 in seed funding each and facilitated guidance to identify and plan resilience projects of their own. Sample projects may take the form of reclaiming small paved areas, tree and/or grass planting, or installing small solar back-up systems to deliver power during storm-related outages. The Nuestras Costas (Our Coasts) project will conclude with the planning of—and before the implementation of—these small-scale projects.

Evaluation: Hispanic Access will use EOS and Ninety software (described below) to establish and track organizational management metrics for the project. In addition, tier-1 pastors will be surveyed at regular intervals to ensure the project is progressing appropriately and meeting their needs. Attendance will be taken at community meetings/trainings, and all such meetings will include the collection of pre- and post-surveys to determine changes in knowledge, attitudes, and beliefs vis a vis the content of the specific gathering; participants will have the option to respond to surveys using their mobile phones or by filling out paper surveys. Numbers of Latino Conservation Week (LCW) activities will be tracked; in addition, and external to the funding for this project, Hispanic Access is bringing on an independent consultant to evaluate the LCW initiative nationally.

B. Milestone Schedule

Year 1: Community Listening and Climate Education

Quarter 1: Two additional tier-1 churches identified. Planning for Latino Conservation Week. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Monthly meetings held with Hispanic Access and church partners. Initial project planning. Reporting to EPA as required.

Quarter 2: Two additional tier-1 churches brought on. Planning for Latino Conservation Week. Tier-1 churches identify tier-2 churches. Train-the-trainer materials developed. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Faith leaders

ED_016126_00000935-00011

complete pre-programming surveys. Community listening and climate science meetings planned, scheduled, and publicized. Monthly meetings held with Hispanic Access and church partners. Evaluation surveys for listening sessions and climate science informational meetings developed. Reporting to EPA as required.

Quarter 3: Community listening sessions held; climate science informational meetings held; attendees pre- and post-surveyed at all events. Latino Conservation Week takes place and metrics collected. Train-the-trainer materials developed. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Trainings with tier-2 churches planned and scheduled. Reporting to EPA as required.

Quarter 4: Community listening sessions held; climate science informational meetings held; attendees pre- and post-surveyed at all events. Training meetings held for tier-2 churches; attendees complete pre- and post-surveys. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Reporting to EPA as required.

Year 2: Disaster Preparedness and Response Training

Quarter 1: Planning for Latino Conservation Week. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Monthly meetings held with Hispanic Access and church partners. Reporting to EPA as required.

Quarter 2: Planning for Latino Conservation Week. Train-the-trainer materials updated. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Red Cross disaster preparation and disaster response training events planned, scheduled, and publicized. Monthly meetings held with Hispanic Access and church partners. Evaluation surveys for disaster training developed. Reporting to EPA as required.

Quarter 3: Disaster preparedness and disaster response public training held; attendees pre- and post-surveyed at all events. Latino Conservation Week takes place and metrics collected. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Training with tier-2 churches planned and scheduled. Reporting to EPA as required.

Quarter 4: Disaster preparedness and disaster response public training held; attendees pre- and post-surveyed at all events. Training meetings held for tier-2 churches; attendees complete pre- and post-surveys. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Reporting to EPA as required.

Year 3: Small Disaster-Resilience Projects Planned

Quarter 1: Planning for Latino Conservation Week. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Monthly meetings held with Hispanic Access and church partners. Reporting to EPA as required.

Quarter 2: Planning for Latino Conservation Week. Train-the-trainer materials updated. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Small-project resilience facilitation sessions planned, scheduled, and publicized. Monthly meetings held with Hispanic Access and church partners. Evaluation surveys for resilience-project meetings developed. Reporting to EPA as required.

Quarter 3: Small disaster-resilience project planning meetings held; attendees pre- and post-surveyed at all events. Latino Conservation Week takes place and metrics collected. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Trainings with tier-2 churches planned and scheduled. Reporting to EPA as required.

Quarter 4: Small disaster-resilience project planning meetings held; attendees pre- and post-surveyed at all events. Training meetings held for tier-2 churches; attendees complete pre- and post-surveys. Latino Climate Council and Olas y Acción ocean advisory council meet every other month. Reporting to EPA as required.

C. Itemized Budget Sheet (submitted as attachment)

3. ENVIRONMENTAL RESULTS

A. Environmental Results. (Logic model is attached.)

B. Performance Measurement Plan

Hispanic Access uses the Entrepreneurial Operating System (EOS) to organize our human energy and to ensure all organizational activities are in alignment with our mission and strategic vision. More than 50,000 companies around the world use EOS, but Hispanic Access has been at the forefront of applying this system in the nonprofit sector to focus our efforts as we "meet, solve problems, plan, prioritize, follow processes, communicate, measure, structure, clarify roles, lead, and manage" (Wickman and Bouwer, 2017).

Using EOS, the Hispanic Access conservation team meets weekly with our senior leadership team to review and discuss ongoing progress and challenges. Activities, goals, milestones, issues, and to-dos are recorded using Ninety project management software to ensure that every task has a deadline, an accountable staff person, and is completed on-time and to quality

ED_016126_00000935-00013

expectations. Issue areas that require special attention and adjustments will be systematically addressed at these same weekly meetings.

The bimonthly meetings of our Latino Climate Council (LCC) and Olas y Acción ocean advisory council (OYA) will help to serve as oversight for the project. LCC and OYA members will be briefed on project progress, accomplishments, and challenges and will provide insight on how to make adjustments to the project as needed. In addition, monthly project meetings will be held with tier-1 churches and with relevant stakeholders.

The project will be evaluated on an ongoing basis, as described above, through regular surveying of tier-1 faith leaders and of all public meetings and by collecting attendance at these meetings. Also described above, Latino Conservation Week will be evaluated nationally by an independent consultant.

C. Sustainability Plan and Community Vision

Various components of the Nuestras Costas (Our Coasts) project will extend beyond the project period: Our Latino Climate Council and Olas y Acción ocean advisory council with their Puerto Rican members are standing committees whose work predates, is funded separately from, and will continue beyond the project period. The same applies to Latino Conservation Week, an annual initiative which began in 2014 and is celebrating its 10th anniversary this year. We fully anticipate that our Puerto Rican partnership with the Red Cross will also continue beyond the project period.

In addition, Hispanic Access has been most successful in funding other conservation projects, as will be noted in the Past Performance section below. We enjoy a robust funding stream from corporate, foundation, and government funders which allows us not only to pursue discrete projects, but also to scale and adapt projects to new venues. Besides funding for our annual initiative, Latino Conservation Week, and our federal internship program, the MANO Project—both of which take place in Puerto Rico—we are also currently pursuing funding from NOAA to develop coastal resilience projects on the island.

By providing seed money and training to the six tier-1 churches, we anticipate that their communities will not only learn permanent, long-term skills for disaster resilience, but that they will also be able to launch self-identified ongoing projects, such as establishing back-up solar systems or reclaiming and greening paved surfaces, which will make a permanent and lasting impact. Finally, through the train-the-trainer component of this project, which will include training in fundraising and which will connect local churches to helpful partners, we hope to sow the seeds for other church communities on the island to launch their own disaster resilience initiatives.

ED_016126_00000935-00014

4. PROGRAMMATIC CAPABILITY

A. Organizational Experience

A multi-issue organization, Hispanic Access' work spans from health outreach to educational opportunity, financial literacy, and environmental justice. Among our many accomplishments, we have created meaningful federal conservation internships for hundreds of young Latino professionals, helped to establish six national monuments protecting more than one million acres of importance to Latino communities, built and trained a network of faith leaders representing more than 150,000 Latino churches in the United States and Puerto Rico, provided free tax preparation and financial literacy trainings to more than 57,000 Latinos, and assisted more than 60,000 Latinos in receiving free health services including cancer screenings and vaccinations. We frame our work through a social justice lens, elevating Latino voices that might otherwise be unheard. Altogether, our work received more than 1,400 media mentions in 2022—on radio, television, and in print—and our CEO was invited to the White House in recognition of our environmental justice efforts.

Hispanic Access' conservation work brings Latino voices to the forefront of conservation policy and stewardship. Latinos consistently poll higher than other demographics in terms of their concern for climate change, support for nature protection, and love of the ocean. Hispanic Access harnesses this potential and activates Latino community leaders as climate and conservation leaders and environmental stewards. We recruit, train, and mobilize Latino community leaders to educate for change in the areas of ocean, public lands, waterways, and climate change. Hispanic Access holds virtual fly-ins and public events; writes op-eds, support and sign-on letters, quotes, and press releases; collects comments; and leads and provides support to joint campaigns and coalitions. Our network members and staff meet regularly with congressional offices and collaborate with the relevant legislative committees and with the Biden administration. Hispanic Access also works to ensure that equity and justice considerations are incorporated into proposed environmental and climate legislation.

Each year, we organize Latino Conservation Week, which connects Latinos to the outdoors through hundreds of recreational events such as bird watching, fishing, and invasive species clean-ups; Latino Advocacy Week, which educates and rallies Latinos across the nation to advocate for environmental protections on Capitol Hill; and Our Heritage, Our Planet film festival, which showcases dozens of environmental films by people of color. Latino Conservation Week 2022 saw Hispanic Access partnering with more than 300 organizations to offer more than 220 public events. For Latino Advocacy Week 2022, more than 450 people attended 11 sessions and events, and our conservation team met with members of congress for discussions on marine sanctuaries, public lands, and historic sites. More than 1,100 filmmakers

submit works annually to our film festival, which then screens 36 of these works for free to the general public.

Hispanic Access' wide array of resources and tools enable Latinos to become stronger, more informed environmental stewards. Each year, we release our Conservation Policy Toolkit and Latino Advocacy Toolkit as well as other reports and white papers. We underwrite environmental films, commission polling on Latinos and the environment, create videos and graphics, tell stories through social media and blogs, and provide guidance on public education and advocacy messaging.

B. Staff Experience

Shanna Edberg, Director of Conservation Programs, will be responsible for the overall direction of the project. Shanna is a longtime conservation advocate and promoter of environmental justice in the U.S. and abroad. She brings to the project an extensive professional background including working in sustainable development at the World Bank and the Global Environment Facility, and in climate policy at the nonprofit Climate Interactive. Prior to that, Shanna worked in Peru to protect forests in the Amazon, researched and published on civil rights in Mexico, and supported city sustainability in Baltimore. She earned her M.A. in Latin American Studies and International Economics from Johns Hopkins University's School of Advanced International Studies (SAIS) and is professionally proficient in Spanish. Shanna has held her current position with Hispanic Access Foundation for over two years, successfully growing our conservation programming and overseeing a staff of five full-time professionals.

Juan Rosas, Program Associate, will oversee the day-to-day management of the project. A bilingual bicultural Latino, Juan has over 15 years of experience as a founder and a director of several nonprofits, including faith-based organizations, in southern California. As the staff leader of Hispanic Access' Por la Creación faith-based alliance, he liaises with a national network of faith leaders and advocates for environmental justice in southern California and nationally. He also serves as co-chair of the California Natural Resource Agency 30x30 Group. Juan, an ordained minister, studied theology, management, and leadership education at Global University. He serves as Lead Pastor for Casa del Rey and as Outreach Pastor for San Jacinto Assembly, two Latino-serving churches. He has held his current staff position with Hispanic Access Foundation for over a year. Previously, he was a member of our Hispanic Leadership Network, a competitive cohort of faith leaders funded by the Lilly Endowment.

C. Expenditure of Awarded Grant Funds

Funds will be expended for each quarter as detailed in the Budget Form SF-424A. Payroll will be expended every two weeks, and consultant fees will be expended monthly. The Director of

ED_016126_00000935-00016

Conservation Programs will submit all project expenditures to Hispanic Access' finance department, led by our Director of Finances, Jesse Rodriguez.

5. Past Performance

USDA Forest Service: $709,163 (Awarded in 2022) The USDA Forest Service award is the latest in an ongoing series of cooperative agreements we have received since 2016. We have met all deliverables and reporting requirements in a timely and successful manner, and continue to receive funding for this project from the USDA Forest Service.

The David and Lucile Packard Foundation: $600,000 (Awarded in 2022) The David and Lucile Packard Foundation award is the latest in a series of conservation and general operating grants we have received from this foundation since 2019. We have met all deliverables and reporting requirements in a timely and successful manner, and continue to receive funding from this foundation.

Environmental Protection Agency: $499,000 (Awarded in 2022) The EPA award is for a project that has yet to be launched, The Air We Breathe (El Aire Que Respiramos) Citizen-Science Air Quality Monitoring.

The Walton Family Foundation: $400,000 (Awarded in 2022) The Walton Family Foundation project was awarded for our freshwater conservation work. While project work has just begun, we have met all deliverables thus far in a timely manner.

U.S. Fish and Wildlife Service: $321,123 (Awarded in 2022) The U.S. Fish and Wildlife Service award is the latest in an ongoing series of cooperative agreements we have received since 2017. We have met all deliverables and reporting requirements in a timely and successful manner, and continue to receive funding for this project from the U.S. Fish & Wildlife Service.

6.0 Quality Assurance Project Plan (QAPP) Information

A public education project, Nuestras Costas (Our Coasts) will not involve the use of existing environmental data or the collection of new data. In reviewing the Appendix F checklist, Hispanic Access has determined that this project does not require a QAPP.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Justice Innovation Inc.

Address: 520 Eighth Avenue, 18th Floor

City: New York

State: NY: New York Zip Code: 10018-6507

B. Unique Entity Identifier (UEI): NBLYKD15UYP5

C. Applicant/Recipient Point of Contact

Name: Alexandrea Lee

Phone: Ex. 6 Personal Privacy (PP)

Email: leea@innovatingjustice.org

Title: Deputy Director, Grants Development & Admin.

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None.

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

N/A

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

N/A

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Alexandrea Lee	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Budget Narrative
11/01/2023 – 10/31/2026

A. Personnel

Program Manager, Youth and Justice Initiatives, Alexis Harbour: Alexis Harbour is the Program Manager of Youth and Justice Initiatives at the Queens Community Justice Center-The Rockaways (QCJC-TR). Ms. Harbour oversees day-to-day operations of QCJC-TR programming and will provide supervision to staff on Rock Solid WMC. Ms. Harbour will be responsible for recruiting and hiring the Program Coordinator.

In Year 1, working at an annual salary of Ex. 6 Personal Privacy (PP), Ms. Harbour will dedicate Ex. 6 Personal Privacy (PP) of her time to the project, for a cost of Ex. 6 Personal Privacy (PP) to be covered by federal grant funds.

In Year 2, working at an annual salary of Ex. 6 Personal Privacy (PP) Ms. Harbour will dedicate Ex. 6 Personal Privacy (PP) of her time to the project, for a cost of Ex. 6 Personal Privacy (PP) to be covered by federal grant funds.

In Year 3, working at an annual salary of Ex. 6 Personal Privacy (PP) , Ms. Harbour will dedicate Ex. 6 Personal Privacy (PP) of her time to the project, for a cost of Ex. 6 Personal Privacy (PP) to be covered by federal grant funds.

Principal Research & Data Associate, Darya Zlochevsky: The Center for Justice Innovation's Data Analytics and Applied Research (DAAR) team works with operating projects to carry out, coordinate, and supervise data management, data analysis, and research. Darya Zlochevsky serves as a Principal Research & Data Associate at the Center and supports the Queens Community Justice Center-The Rockaways.

In Year 1, working at an annual salary of Ex. 6 Personal Privacy (PP), Ms. Zlochevsky will dedicate Ex. 6 Personal Privacy (PP) of her time to the project, for a cost of Ex. 6 Personal Privacy (PP) to be covered by federal grant funds.

In Year 2, working at an annual salary of Ex. 6 Personal Privacy (PP) Ms. Zlochevsky will dedicate 10% of her time to the project, for a cost of Ex. 6 Personal Privacy (PP) to be covered by federal grant funds.

In Year 3, working at an annual salary of Ex. 6 Personal Privacy (PP) Ms. Zlochevsky will dedicate 10% of her time to the project, for a cost of Ex. 6 Personal Privacy (PP) to be covered by federal grant funds.

Program Coordinator, TBH: The to-be-hired Program Coordinator will be responsible for the overall implementation and administration of the program. The Program Coordinator will serve as the primary point of contact between the Justice Center and the professional advisory team. The Program Coordinator will provide supervision and training to the youth advocacy group.

In Year 1, working at an annual salary of $55,000, the to-be-hired Program Coordinator will dedicate 83.40% of their time to the project, for a cost of approximately $45,868, to be covered by federal grant funds.

In Year 2, working at an annual salary of $56,700 (3% increase), the to-be-hired Program Coordinator will dedicate 100% of their time to the project, for a cost of $56,700, to be covered by federal grant funds.

In Year 3, working at an annual salary of $58,500 (3% increase), the to-be-hired Program Coordinator will dedicate 100% of their time to the project, for a cost of $58,500, to be covered by federal grant funds.

Subtotal Year 1 Personnel Costs: $70,268.03
Subtotal Year 2 Personnel Costs: $81,850.00
Subtotal Year 3 Personnel Costs: $84,430.00

Total Personnel Costs: $236,548.03

B. Fringe Benefits

Fringe benefits are calculated at 32% of salaries and wages for all full-time Center employees. This rate is comprised of the following benefits: Pension at 8.33%, FICA at 7.65%, Unemployment Insurance at 1.09%, Disability at 0.80%, Workers Compensation at 0.47%, Life Insurance at 0.20%, Health and Dental Insurance at 11.30%, New York Metropolitan Commuting Tax at 0.34%, Vacation Accruals at 1.73%, and Other Employee Benefit Funds at 0.09%.

In Year 1, the costs of fringe benefits will amount to approximately $22,486, to be covered by federal grant funds.

In Year 2, the costs of fringe benefits will amount to approximately $26,192, to be covered by federal grant funds.

In Year 3, the costs of fringe benefits will amount to approximately $27,018, to be covered by federal grant funds.

Subtotal Year 1 Fringe Benefits Costs: $22,485.77
Subtotal Year 2 Fringe Benefits Costs: $26,192.00
Subtotal Year 3 Fringe Benefits Costs: $27,017.60
Total Fringe Benefits Costs: $75,695.37

Total Personnel and Fringe Benefits Costs: $312,243.40

C. Travel

None

Total Travel Costs: $0

D. Equipment

None

Total Equipment Costs: $0

E. Supplies

Program Supplies: The Center has budgeted to cover the costs of program supplies, including supplies for workshops, creating infographics, and facilitating community clean-ups.

In Year 1, program supplies costs will amount to $7,400 ($750/month x approximately 10 months), to be covered by federal grant funds.

In Year 2, program supplies costs will amount to $9,000 ($750/month x 12 months), to be covered by federal grant funds.

In Year 3, program supplies costs will amount to $9,000 (approximately $750/month x 12 months), to be covered by federal grant funds.

Participant Booklets: The Center has budgeted to cover the costs of purchasing Roots of Success Student Workbooks for 20 participants to use during the four-month environmental literacy and waste management training period.

In Year 1, participant booklets costs will amount to $3,000 ($300/booklet/participant x 10 participants), to be covered by federal grant funds.

In Year 2, participant booklets costs will amount to $3,000 ($300/booklet/participant x 10 participants), to be covered by federal grant funds.

Laptop: The Center has budgeted for the purchase of a laptop for the to-be-hired Program Coordinator, so they are able to carry out their duties efficiently and effectively.

In Year 1, laptop costs will amount to $1,200 ($1,200/laptop/hire x 1 hire), to be covered by federal grant funds.

Subtotal Year 1 Supplies Costs: $11,600
Subtotal Year 2 Supplies Costs: $12,000
Subtotal Year 3 Supplies Costs: $9,000
Total Supplies Costs: $32,600

F. Construction

None

Total Construction Costs: $0

G. Contractual

Roots of Success: Roots of Success is an environmental literacy and jobs training program that strengthens academic and professional skills, increases environmental literacy, increases financial literacy and social entrepreneurship, and prepares participants to work in 100+ jobs in environmental sectors and to improve environmental conditions in their communities and build resilience to climate change. Roots of Success has two customized curricula for high schools and programs working with high schools aged youth. The curriculum and training are being used across the country in high schools, alternative schools, CTE high schools, green academies, juvenile facilities, and community colleges. Roots of Success will train the Program Coordinator to facilitate the curriculum. After completing the training, the Program Coordinator will gain access to ongoing technical support, all of the videos and visuals needed to teach the course, a nationwide network and community of practice, English and Spanish versions of materials, and supplemental materials to deepen students' understanding of issues and keep content current and up to date.

In Year 1, Roots of Success will train and certify the Program Coordinator to facilitate the Roots of Success curriculum, for a cost of $3,800, their standard training fee, to be covered by federal grant funds.

TBD: The Center has budgeted to cover the costs of to-be-determined trainings for participants to be exposed to and learn about relevant expertise in the waste management, civic engagement, advocacy, and environmental justice subject areas.

In Year 1, at a rate of $650/day, the Center has budgeted for three trainings, for an approximate cost of $1,667 ($650/day x 3 days), to be covered by federal grant funds.

In Year 2, at a rate of $650/day, the Center has budgeted for three trainings, for an approximate cost of $1,667 ($650/day x 3 days), to be covered by federal grant funds.

In Year 3, at a rate of $650/day, the Center has budgeted for three trainings, for an approximate cost of $1,667 ($650/day x 3 days), to be covered by federal grant funds.

Subtotal Year 1 Contractual Costs: $5,466.66
Subtotal Year 2 Contractual Costs: $1,666.67
Subtotal Year 3 Contractual Costs: $1,666.67
Total Contractual Costs: $8,800

H. Other Costs

Cellphones for Staff: The Center calculates cell phones at $660 per FTE ($55/month per phone x 12 months). The Center has budgeted for cell phone costs to cover the to-be-hired Program Coordinator.

In Year 1, with approximately 0.83 FTE dedicated to the project by the Program Coordinator, cell phone costs will amount to approximately $550 ($660/FTE x 0.83 FTE), to be covered by federal grant funds.

In Year 2, with 1.00 FTE dedicated to the project by the Program Coordinator, cell phone costs will amount to $660 ($660/FTE x 1.00 FTE), to be covered by federal grant funds.

In Year 3, with 1.00 FTE dedicated to the project by the Program Coordinator, cell phone costs will amount to $660 ($660/FTE x 1.00 FTE), to be covered by federal grant funds.

Recruiting Fees: The Center has budgeted to cover the costs of recruiting fees to hire the to-be-hired Program Coordinator. Based on past experience, the Center budgets recruiting fees for new hires at a rate of $90/new hire.

In Year 1, recruiting fees will amount to $90 ($90/hire x 1 hire), to be covered by federal grant funds.

Participant Support Costs (Stipends): The Center has budgeted to cover the costs of compensating participants for their work as part of the Youth Advocate Team. Participants will be eligible to receive up to $200/month for each 16-month cohort, for a total of $3,200 per participant.

In Year 1, stipend costs will amount to $16,000 ($200/month/participant x 8 months x 10 participants), to be covered by federal grant funds.

In Year 2, compensation costs will amount to $24,000 ($200/month/participant x 12 months x 10 participants), to be covered by federal grant funds.

In Year 3, compensation costs will amount to $24,000 ($200/month/participant x 12 months x 10 participants), to be covered by federal grant funds.

Participant Support Costs (MetroCards): The Center had budgeted to cover the costs of MetroCards for participants to travel to and from program activities to lower the barrier to participation.

In Year 1, MetroCard costs will amount to $1,375 ($2.75/ride x 500 rides), to be covered by federal grant funds.

In Year 1, MetroCard costs will amount to $1,375 ($2.75/ride x 500 rides), to be covered by federal grant funds.

In Year 1, MetroCard costs will amount to $1,375 ($2.75/ride x 500 rides), to be covered by federal grant funds.

Subtotal Year 1 Other Costs: $18,015.42
Subtotal Year 2 Other Costs: $26,035.00

Subtotal Year 3 Other Costs: $26,035.00
Total Other Costs: $70,085.42

I. Indirect Costs

The Center for Justice Innovation charges a federally approved indirect cost rate to all of its projects in order to cover administrative expenses. This amount is calculated at 18% of the total direct costs and covers: fiscal services, including payroll, accounts payable, accounts receivable, audit, grant management, tracking and monitoring; human resources, including personnel and benefits administration; administrative oversight of all programs; general management; risk management; and legal support.

In Year 1, calculated against direct costs, indirect costs will total approximately $23,010, to be covered by federal grant funds.

In Year 2, calculated against direct costs, indirect costs will total approximately $26,594, to be covered by federal grant funds.

In Year 3, calculated against direct costs, indirect costs will total approximately $26,667, to be covered by federal grant funds.

Subtotal Year 1 Indirect Costs: $23,010.46
Subtotal Year 2 Indirect Costs: $26,593.85
Subtotal Year 3 Indirect Costs: $26,666.87
Total Indirect Costs: $76,271.18

Subtotal Year 1 Total Project Costs: $150,846.34
Subtotal Year 2 Total Project Costs: $174,337.53
Subtotal Year 1 Total Project Costs: $174,816.13
TOTAL PROJECT COSTS: $500,000

11/1/2023 - 10/31/2026

Budget Detail Worksheet

A. Personnel -- List each position by title and name of employee, if available. Show the annual salary rate and the percentage of time to be devoted to the project. Compensation paid for employees engaged in grant activities must be consistent with that paid for similar work within the applicant organization.

Position		Computation YR 1	YR 2	YR 3	Year One	Year Two	Year Three	TOTAL
		FTE	FTE	FTE				
Benefits Eligible								
Program Manager, Youth and Justice Initiatives	Harbour, Alexis Palladian	20%	20%	20%				
Principal Research & Data Associate	Zlochevsky, Darya	10%	10%	10%				
Program Coordinator	TBH	83%	100%	100%				
Total	Total FTE	113%	130%	130%	**70,268.03**	**81,850.00**	**84,430.00**	**236,548.03**

B. Fringe Benefits - Fringe benefits should be based on actual known costs or an established formula. Fringe benefits are for the personnel listed in the budget category (A) and only for the percentage of time devoted to the project. Fringe benefits on overtime are limited to FICA, Workman's Compensation, and Unemployment Compensation.

Fringe Benefits are comprised of:	Full Time	Part Time
FICA	7.65%	7.65%
NY Metropolitan Commuting Tax	0.34%	
Health & Dental Insurance	11.30%	
Pension	8.33%	
Unemployment Insurance	1.09%	4.33%
Long and Short-Term Disability	0.80%	0.64%
Workers Compensation	0.47%	0.37%
Life Insurance and AD&D	0.20%	
DCAP/Health Flexible Spending	0.04%	
Employee Benefit Funds (TransitChek)	0.05%	
Vacation Accruals	1.73%	
Total Fringe Benefits Rate	32.00%	12.99%

Budget Detail Worksheet

G. Consultant/Contracts - Indicate whether applicant's formal, written Procurement Policy or the Federal Acquisition Regulations are followed.

Name of Consultant/Contract	Service Provided	Computation									Year One	Year Two	Year Three	TOTAL
		Rate				# Units	YR 1	YR 2	YR 3					
Roots for Success	Training curriculum on illegal dumping, waste management and environmental justice	$3,800	per training				1	-	-		3,800.00	0.00	0.00	3,800.00
TBD	As-needed trainings on illegal dumping, waste management and environmental justice	$650	per day				3	3	3	-	1,666.67	1,666.67	1,666.67	5,000.00
Total							**Subtotal**				**5,466.67**	**1,666.67**	**1,666.67**	**8,800.00**

H. Other Costs - List items (*e.g.*, rent reproduction, telephone, janitorial or security services, and investigative or confidential funds) by major type and the basis of computation. For example, provide the square footage and the cost per square foot for rent, and provide a monthly rental cost and how many months to rent.

Description		Annual Rate/FTE						Annual FTE			Year One	Year Two	Year Three	TOTAL
		YR 1	YR 2	YR 3				YR 1	YR 2	YR 3				
Cellphones for Staff		$660	$660	$660				83%	100%	100%	550.42	660.00	660.00	1,870.42
Recruiting Fees		$90	$90	$90				1.00	0.00	0.00	90.00	0.00	0.00	90.00
Participant Support Costs	Stipends	$200	$200	$200				80.00	120.00	120.00	16,000.00	24,000.00	24,000.00	64,000.00
Participant Support Costs	MetroCards	$2.75	$2.75	$2.75				500.00	500.00	500.00	1,375.00	1,375.00	1,375.00	4,125.00
Total											**18,015.42**	**26,035.00**	**26,035.00**	**70,085.42**

I. Indirect Costs - Indirect costs are allowed only if the applicant has a Federally approved indirect cost rate. A copy of the rate approval (a fully executed, negotiated agreement) must be attached. If the applicant does not have an approved rate, one can be requested by contacting the applicant's cognizant Federal agency, which will review all documentation and approve a rate for the applicant organization, or if the applicant's accounting system permits, costs may be allocated in the direct cost categories.

Description		Computation									Year One	Year Two	Year Three	TOTAL
		YR 1	YR 2	YR 3										
Indirect Costs calculated at 0.18 of all direct project costs		127,836	147,744	148,149			x		18%		23,010.46	26,593.86	26,666.87	76,271.19
90(**Total**											**23,010.46**	**26,593.86**	**26,666.87**	**76,271.19**

	TOTAL PROJECT COSTS	150,846.34	174,337.53	174,816.13	500,000.00

INDIRECT COST NEGOTIATED AGREEMENT

Non-Profit Institutions

Name: Justice Innovation, Inc.
520 Eighth Avenue
New York, New York 10018

Date: March 9, 2022

Filing Ref: This is first negotiated agreement.

The indirect cost rate(s) contained herein is for use in grants and contracts with the Federal Government subject to the conditions contained in Section II.

SECTION I: RATES

OVERHEAD

Type	Effective Period From	To	*Rate	Locations	Applicable to
Provisional	07/01/2022	06/30/2024	18.00%	All	All Programs

***Base**: Modified total direct costs, consisting of all salaries and wages, fringe benefits, materials, supplies, services, travel and sub-grants and sub-contractors up to the first $25,000 of each sub-grant or sub-contract (regardless of the period covered by the sub-grant or sub-contract). Modified total direct costs shall exclude equipment, capital expenditures, charges for patient care, tuition remission, rental costs of off-site facilities, scholarships, fellowships as well as the portion of each sub-grant and sub-contract in excess of $25,000.

***Treatment of Fringe Benefits:** Fringe benefits applicable to indirect salaries and wages are treated as indirect cost.

SECTION II: GENERAL

A. **LIMITATIONS**: Use of the rate(s) contained in this agreement is subject to any statutory or administrative limitations and is applicable to a given grant or contract only to the extent that funds are available. Acceptance of the rate(s) agreed to herein is predicated upon the conditions: (1) that no costs other than those incurred by the grantee/ contractor via an approved Central Service Cost Allocation Plan were included in its indirect cost pool as finally accepted and that such incurred costs are legal obligations of the grantee/contractor and allowable under the governing cost principles; (2) that the same costs have been treated as indirect costs have not been claimed as direct costs; (3) that similar types of costs have been accorded consistent treatment; and (4) that the information provided by the grantee/contractor which was used as a basis for acceptance of the rate(s) agreed to herein is not subsequently found to be materially inaccurate.

B. **ACCOUNTING CHANGES**: The rate(s) contained in this agreement are based on the accounting system in effect at the time the proposal was prepared and the agreement was negotiated. Changes to the method of accounting for costs which affect the amount of reimbursement resulting from the use of this rate(s) require the prior approval of the office responsible for negotiating the rate(s) on behalf of the Government. Such changes include but are not limited to changes in the charging of a particular type of costs from indirect to direct. Failure to obtain such approval may result in subsequent cost disallowances.

C. **REIMBURSEMENT**: Indirect cost reimbursement on all awards will be determined based upon the indirect cost rates established for the fiscal period in which the applicable direct expenditures are incurred.

D. **NOTIFICATION TO FEDERAL AGENCIES**: Copies of this document may be provided to other Federal offices as a means of notifying them of the agreement contained herein.

E. **SPECIAL REMARKS**: Federal programs currently reimbursing indirect costs to this Department/Agency by means other than the rate(s) cited in this agreement should be credited for such costs and the applicable rate cited herein applies to the appropriate base to identify the proper amount of indirect costs allocated to the program.

JUSTICE INNOVATION INC
C/O SUSAN MCCLURE
Ex. 6 Personal Privacy (PP)
NEW YORK, NY 10075

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

We sent a copy of this letter to your representative as indicated in your power of attorney.

Sincerely,

Stephen A. Martin
Director, Exempt Organizations

Experience

Center for Justice Innovation **08/2021-Present**
Project Director, Queens Community Justice Center-The Rockaways **Queens, NY**

- Lead the strategic planning and implementation of all Justice Center programming and services.
- Oversee fundraising and budget management.
- Develop and maintain relationships with funders, government officials and stakeholders.
- Work with local and city-wide stakeholders to expand on placemaking, workforce development, and technology strategies.
- Identify community hot spots and work with staff to create programming that empowers residents, creates civic opportunities for youth, reduces crime and sparks community revitalization.
- Participate in regularly scheduled meetings with staff and partnering agencies to ensure proper referrals and case management for Justice Center participants.
- Work with the Queens Community Justice Center-Jamaica Project Director to ensure seamless cross-site collaborations.
- Approve, develop, maintain and track the social media and marketing materials.
- Prepare grant progress reports and other program reports as needed.
- Supervise senior program staff and develop training and support systems for supervisees and subcontractors while providing support for all staff, interns and volunteers.

Police Athletic League Inc. (PAL) **04/2019-08/2021**
Programs Training & Professional Development Manager **New York, NY**

- Serves as the Program Unit's key advisor on training and professional development implementing strategic OCFS and youth development trainings for optimal program impact.
- Mapping out training plans and schedules, designing and developing training programs both outsourced and internal.
- Research new training initiatives and materials to enhance the agency's training procedures and provide value to staff
- Conduct organization-wide training needs assessments and identify skills or knowledge gaps that need to be addressed.
- Support the Grants, Research and Evaluation and Advancement Departments to devise government funding proposals and ensure contractual requirements.
- Oversee CPR training team, internal training staff and professional development consultants.
- Maintain and create content for the PAL training and professional development website.
- Build relationships with corporate representatives, potential board members, and volunteers to raise awareness of PAL's youth mentoring programs.
- Solicit cash, in-kind donations and sponsorships from individuals, businesses, or government donors.

Police Athletic League Inc. (PAL) **03/2017-04/2019**
Field Director & Girl Talk Program Director **New York, NY**

- Responsible for the management COMPASS elementary school programs, SONYC middle school programs and BEACON after school programs with an annual budget of over $5 million dollars.
- Mentor and supervise site directors and their site staff to ensure program development, implementation and evaluation.
- Oversee centers' compliance with contractual obligations and mandates for the Department of Youth and Community Development, Department of Health (DOH) and Department of Education.
- Ensure program quality through frequent program observations, assessments and individual staff coaching.

Police Athletic League Inc. (PAL) **07/01/2014-03/2017**
Pathways Prep, Center Director **Queens, NY**

- Developed innovative SONYC afterschool and summer day camp programming that meet requirements for PAL and DYCD.
- Hired, trained and evaluated assigned program staff and volunteers; reviewing progress and recommending changes.
- Established relationships with school administration and staff, parents, local community-based organizations and other program stakeholders to promote the agencies mission.
- Ensured program compliance with DYCD and safety compliance with the Department of Health (DOH).
- Managed a program budget of over $350, 000 monitoring expenditures and revenue through sound fiscal control; and making recommendations for future budget appropriations.

Community Mediation Services Inc. (CMS), **07/2012-12/2013**
The Parent Pledge Project, Program Director **New York, NY**

- Collaborated with the Human Resources Administration (HRA), The Office of Child Support Enforcement (OCSE) and NYC Mayor's Office to develop an innovative parenting initiative.
- Created a Program Policies and Procedures Manual to outline values, vision, and goals for The Parent Pledge Project.
- Conducted outreach for organizations like the New York City Housing Authority, Division of Youth and Community Development, The Door, Saint Paul's Community Baptist Church, and The Children's Aid Society.
- Trained community-based partners and government agencies to ensure effective and efficient referral services.
- Recruited and train a panel of mediators on the NYS Child Support Standards Act and Cultural Diversity.
- Wrote Mediator's Manual and supervised mediators to ensure compliance with the program's values, vision, goals, and applicable law.
- Convened and chaired regularly scheduled meetings to review program status and conduct ongoing mediation training.

Community Mediation Services Inc. (CMS), NYC Family Court Mediation Program **10/2008-10/2010**
Mediation Manager/Juvenile Resolution Specialist **New York, NY**

- Built credibility, established rapport, and maintained communication with stakeholders in NYC Family Court
- Managed case progress, tracked upcoming court dates, and maintained all case documentation.
- Coordinated and supervised a panel of paid consultant mediators.

Community Mediation Services Inc., United Way School-Based Programs **3/2006-10/2008**
Educational Support Specialist **Brooklyn, NY**

- Developed attendance improvement strategies and crisis intervention consultations with school personnel.
- Provided feedback and counseling to youth regarding grades, social skills, behavior, and anger management.
- Increased the program's growth by securing new partnerships, consulting engagements and by developing new initiatives.
- Participated in multi-disciplinary teams of teachers, psychologists, social workers, guidance counselors, case managers and school security agents.

JOB DESCRIPTION
Queens Community Justice Center- The Rockaways
Program Coordinator, Rock Solid Waste Management Coalition

The Queens Community Justice Center– The Rockaways seeks a Program Coordinator to oversee the Justice Center's Rock Solid Waste Management Coalition initiative. The Rock Solid Waste Management Coalition will focus on illegal dumping of hazardous and nonhazardous waste on the Far Rockaway peninsula. This initiative will train, educate, and compensate Far Rockaway youth to become researchers, action-takers, and advocates against illegal dumping on the Far Rockaway peninsula.

Reporting to the Program Manager of Youth and Justice Initiatives, the Program Coordinator will be responsible for the development, management, and execution of the program's objectives. The Program Coordinator will work closely with members of the professional advisory team and be responsible for forming the youth advocate team.

Responsibilities include but are not limited to:

- Work closely with the Program Manager of Youth and Justice Initiatives to develop and oversee the implementation of a robust program schedule that includes workshops, trainings, and community events;
- Recruit, train, and manage two cohorts of 10 youth advocates;
- Facilitate and coordinate joint meetings between the professional advisory and youth advocate teams;
- Ensure program data is consistently collected and entered into relevant databases in accordance with internal and/or external program framework and contractual obligations.
- Provide administrative support to the program department team, including assisting with data entry, stipend payments, and contracts.
- Oversee grant implementation, ensuring all reporting requirements and deliverables are met;
- Routinely meet with community stakeholders and staff to provide updates and troubleshoot issues;
- Represent QCJC-TR at community events and meetings, as requested;
- Develop systems and provide oversight for data tracking, reporting, and fiscal operations;
- Complete all required reporting in a timely manner, with support from the Center's Development Department;
- Actively maintain a work culture conducive to innovation and team building;
- Build and maintain relationships with partners and community stakeholders;
- Provide services in a culturally competent manner that is responsive to the needs of

program youth.

Qualifications The ideal candidate will have a bachelor's degree with at least two years of relevant experience working closely with justice-involved youth and families. Candidates should possess knowledge and understanding of environmental justice and sustainability, as well as experience with community organizing and relationship building. The Program Coordinator will be required to have strong team skills, problem solving abilities, excellent written and verbal communication, and an ability to work in a fast-paced, multi-disciplinary environment. Candidates must be comfortable navigating interdisciplinary settings and must be willing to roll up their sleeves and be actively involved in day-to-day operations. Candidate must possess in-depth knowledge of best practices in youth work including leadership development, strengths-based practices, and trauma informed approaches. Additional requirements include:

- A minimum of two years' experience working with youth, specifically in the context of educational and social programs
- Knowledge of program management and development procedures
- Candidate must have administrative experience and experience facilitating group programming and must be committed to using holistic and strengths-based approaches.
- Tech savvy with demonstrated proficiency with: Google Suite and MS Office applications including PowerPoint, Office, and Excel. Knowledge and proficiency of virtual meeting platforms such as Google Meets, Teams, and Zoom.
- Ability to manage multiple priorities simultaneously and adhere to firm timelines
- Ability to facilitate and effectively manage projects and initiatives
- Demonstrated ability to work collaboratively with a variety of community stakeholders and partner agencies
- Experience in community outreach and organizing and must have the ability to work with people from diverse backgrounds in a culturally competent manner.
- In-depth knowledge and familiarity of the Far Rockaway community and the Peninsula at large;
- Fluency in English required; fluency in Spanish highly desired but not necessary

Position Type: Full-time, some nights and weekends are required

PROFESSIONAL EXPERIENCE

Center for Court Innovation, New York, NY
Executive Director
2020–present

The Center for Court Innovation is an award-winning national justice reform organization with an $89 million budget and staff of over 600. The Center seeks to create a fair, effective, and humane justice system by designing and implementing operating programs, performing original research, and providing expert assistance to reformers around the world. The Center's two dozen community and court-based programs reduce incarceration, address underlying needs, repair harm, strengthen neighborhoods, and promote racial and gender justice. Researchers conduct independent evaluations nationally and action research to inform the Center's operating programs. Teams of experts help jurisdictions plan, implement, and evaluate new programs, practices and policy to build a better justice system.

JPMorgan Chase & Co. Global Philanthropy, New York, NY
Region Executive
2017–2020

JPMorgan Chase & Co. Global Philanthropy contributes $350 million annually to non-profit organizations around the world to promote inclusive economic growth in four key areas: jobs and skills, small business expansion, neighborhood revitalization, and financial health. Lead the firm's philanthropy strategy from Boston to Miami, managing a $35 million annual budget and a team of program officers.

SELECT ACCOMPLISHMENT
· Led Second Chance Initiative, a firm-wide commitment to supporting greater economic opportunities for people with criminal convictions by improving hiring efforts, advocating for policy reforms, and investing in community organizations that serve justice-involved residents.

Center for Court Innovation, New York, NY
2008–2017

Staff Director, Independent Commission on New York City Criminal Justice and Incarceration Reform (2016–2017)

Directed multi-agency staff team for the commission chaired by former New York State Chief Judge Jonathan Lippman, which convened in 2016 and issued *A More Just New York City*, a blueprint that successfully argued for closing Rikers Island. Oversaw all Commission activities: policy and data analysis, public engagement, political outreach, communications, and fundraising.

Director, Criminal Justice Programs (2014–2017)

Managed the Center's $20 million criminal justice portfolio. Supervised city-wide programs that employed nearly 200 staff and serve 40,000 clients each year. Cultivated partners in government, private sector, and nonprofit sector to develop, fund, and launch new initiatives. Served as member of senior leadership team.

SELECT ACCOMPLISHMENTS
· Launched ambitious court reform projects that are national models: the Brooklyn Young Adult Court and the Supervised Release Program.
· Led organization-wide strategic planning process, which resulted in priorities related to mission, fundraising, staff development, and management.

Project Director, Midtown Community Court (2009–2014)

Oversaw all operations, managed $2 million annual budget, and developed programming for award-winning community court in Midtown Manhattan, which provides defendants with services, such as drug treatment, mental health counseling, and job training, in lieu of jail.

SELECT ACCOMPLISHMENTS

· Developed and implemented the Center's national training and expert assistance program on prostitution and human trafficking.

· Authored Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP)

· Secured funding for significant expansions: workforce development and fatherhood program, which surpassed outcome targets; and Human Trafficking Intervention and Adolescent Diversion Courts, which significantly reduced incarceration and criminal convictions.

Coordinator, Domestic Violence Programs (2008–2009)

Provided expert assistance to jurisdictions creating domestic violence courts in New York State by convening stakeholders, providing training, and developing strategic and operations plans.

SELECT ACCOMPLISHMENTS

· Built human trafficking initiative by securing federal and private funding.

· Developed statewide judicial training and created pilot program to improve services for battered women charged with crimes.

The Legal Aid Society, Brooklyn, NY
Staff Attorney, Criminal Defense Practice
2005–2008

Represented indigent clients charged with felony and misdemeanor offenses in Kings County Criminal and Supreme Courts. Managed 125+ caseload and all aspects of holistic representation, including criminal court litigation, social service assistance, and coordinating with outside counsel on civil court matters. Conducted several trials and hearings resulting in favorable case outcomes, including acquittal.

National Clearinghouse for the Defense of Battered Women, Philadelphia, PA
Staff Attorney
2004–2005

National advocacy organization that promotes fair and equal justice for battered women charged with crimes connected to their abuse. Conducted legal research and provided consulting to defense teams (private attorneys and appointed counsel, experts and advocates) to build client's defense.

Center for Court Innovation, New York, NY
1998–2001

Mediation Coordinator, Crown Heights Community Mediation Center (2000–2001)
Associate, Community Justice (1998–2000)

EXPERIENCE

Center for Justice Innovation
2022-Current Deputy Director, Grants Development & Administration

- Co-lead development team responsible for $90+ million annual budget comprised of federal, state, city, and private funding.
- Manage the fundraising and grant requirements for a portfolio of Center operating programs, departments, and initiatives.
- Hire, supervise, and develop a multi-level team of Managers and Associates to ensure balanced capacity and ongoing professional growth.
- Conduct regular organization-wide risk analysis to guide strategic planning.
- Responsible for database management: maintaining data; adapting software for evolving needs; tracking and reporting on trends to executive leadership.
- Work with the Director of Development Operations to plan and implement strategies to improve the processes by which the department and other Center staff collaborate on grants and fundraising management.
- Coordinate grants-related processes required for transition to new independent entity.
- Enhance departmental effectiveness through implementation of project management tools; creation of standard processes; and development of all staff training and onboarding materials

2021-22 Associate Director, Grants Development & Administration
2019-21 Development Manager

- Of note: Leader and content creator for annual year-end fundraising campaign, including email blasts, social media, mailings, etc. to expand individual donor base.

2018-19 Development Associate

International Rescue Committee
2016 Case Management Intern

- Persistently advocated for refugees in the face of systemic challenges and personal bias when securing fundamental services.
- Conducted orientations (cultural, language, transportation); accompanied clients to appointments; carried out check-ins.
- Supported case manager responsible for fifty refugee families.

Baltimore Rent Court Study
2015 Researcher

- Evaluated and bettered research and survey.
- Conducted interviews for data collection; cleaned data using excel; analyzed data using STATA, ArcGIS.
- Presented findings to the Maryland Public Justice Center.

April 13th, 2023

Marianne Engelman-Lado
Acting Principal Deputy Assistant Administrator
U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado,

On behalf of Friends of Beach 59th Street Playground Association, I am pleased to provide this Letter of Commitment for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding pursuant to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Request for Applications. Through this initiative, QCJC-TR will train and educate community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping.

A recipient of an Innovations in American Government Award from Harvard University and the Ford Foundation and a Peter F. Drucker Award for nonprofit innovation, the Center for Justice Innovation (formerly the Center for Court Innovation) is a national leader in the development, study, and dissemination of initiatives that address urgent issues related to safety, justice, and community well-being. Bridging the gap between systems and communities, the Center runs more than 30 community-based programs in all New York City boroughs and beyond to co-create safe and vibrant communities alongside residents, court actors, government agencies, elected officials, and other community-based organizations. Most relevantly, the Center designs and operates many successful, results-driven programs for young people, including alternative-to-detention programs, work readiness programs, mentoring programs, and anti-violence programs focused on bettering outcomes for high-risk youth and supporting the development of youth leaders. Center programming also includes several community service and community cleanup initiatives, where staff work with residents and community groups to identify neighborhood projects that respond to local needs.

The Queens Community Justice Center-The Rockaways was launched by the Center in 2021 in Far Rockaway, Queens, to serve as a local hub for alternative-to-incarceration programming, youth development, and community safety initiatives. QCJC-TR invests in residents and provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. QCJC-TR accomplishes this through youth development programming like the Rock Steady Youth Initiative; addressing disinvestment in the Far Rockaway community through the Love Where You Live Program, resident-led placekeeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.

Friends of Beach 59th Street Playground Association is a local community-based organization dedicated to the improvement of the Beach 59th Street Playground that also works to create a safe environment for the

community by educating youth and inspiring them to treat their neighborhood with care. QCJC-TR has partnered with Friends of Beach 59th Street Playground Association to hold a community cleanup on the Rockaway peninsula, from 54th Street to 62nd Streets.

If funding is secured, Friends of Beach 59th Street Playground Association is committed to supporting the Center's Queens Community Justice Center-The Rockaways and its project under the EJCPS program. Friends of Beach 59th Street Playground Association will support with hosting community cleanups, and Director Florence Ferguson will serve on the professional advisory team. The partnership between QCJC-TR and Friends of Beach 59th Street Playground Association is a non-financial relationship, and support will be provided in-kind.

This is an important project that is responsive to community need, and I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Sincerely,

Florence Ferguson

Acting Principal Deputy Assistant Administrator
U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado,

On behalf of the Queens High School for Information, Research, and Technology (QIRT), I am pleased to provide this Letter of Commitment for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding pursuant to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Request for Applications. Through this initiative, QCJC-TR will train and educate youth community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping.

A recipient of an Innovations in American Government Award from Harvard University and the Ford Foundation and a Peter F. Drucker Award for nonprofit innovation, the Center for Justice Innovation (formerly the Center for Court Innovation) is a national leader in the development, study, and dissemination of initiatives that address urgent issues related to safety, justice, and community well-being. Bridging the gap between systems and communities, the Center runs more than 30 community-based programs in all New York City boroughs and beyond to co-create safe and vibrant communities alongside residents, court actors, government agencies, elected officials, and other community-based organizations. Most relevantly, the Center designs and operates many successful, results-driven programs for young people, including alternative-to-detention programs, work readiness programs, mentoring programs, and anti-violence programs focused on bettering outcomes for high-risk youth and supporting the development of youth leaders. Center programming also includes several community service and community cleanup initiatives, where staff work with residents and community groups to identify neighborhood projects that respond to local needs.

The Queens Community Justice Center-The Rockaways was launched by the Center in 2021 in Far Rockaway, Queens, to serve as a local hub for alternative-to-incarceration programming, youth development, and community safety initiatives. QCJC-TR invests in residents and provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. QCJC-TR accomplishes this through youth development programming like the Rock Steady Youth Initiative; addressing disinvestment in the Far Rockaway community through the Love Where You Live Program, resident-led place keeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.

Queens High School for Information, Research, and Technology (QIRT) serves students in grades 9 to 12 in Far Rockaway, Queens, New York. QIRT is committed to enhancing students' academic experience by encouraging and learning through personal discovery.

If funding is secured, QIRT is committed to supporting the Center's Queens Community Justice Center-The Rockaways and its project under the EJCPS program. QIRT will support with outreach and recruitment of youth for the program. QIRT will also recommend administrative staff to sit on the professional advisory team. The partnership between QCJC-TR and the QIRT is a non-financial relationship; QIRT's support will be provided in-kind.

This is an important project that is responsive to community need, and I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

April 11, 2023

Marianne Engelman-Lado
Acting Principal Deputy Assistant Administrator
U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Ms. Engelman-Lado,

I am pleased to provide this letter of support for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding under the EJCPS Cooperative Agreement Program. QCJC-TR proposes to train and educate youth community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping. NYC Parks will support QCJC-TR with hosting cleanups and will provide staff representation on the professional advisory board.

I have had the pleasure of collaborating with the Center for Justice Innovation (formerly Center for Court Innovation) on several initiatives. They are known for their commitment to community-building, seeking equitable solutions and methods, and ensuring that all diverse stakeholders are represented. The Rockaway Peninsula has historically been under-invested and sees considerable disparity in resources and facilities. The Far Rockaway neighborhood in particular faces challenges of equality, geography, access to critical services, and disinvestment. In recent years, the City has moved to reinvest in Far Rockaway and its residents with the Downtown Far Rockaway initiative and other efforts to bolster infrastructure, open space, housing stock, commercial opportunities, and cultural resources. QCJC-TR plays a vital role in providing human services, interventions, and engagement to complement public and private sector investments in hard infrastructure.

If this initiative moves forward, NYC Parks is committed to supporting the QCJC-TR the EJCPS program. We will provide access and support hosting community cleanups at and around the Rockaway Beach and Boardwalk as well as provide staff representation on the professional advisory board. The partnership between QCJC-TR and NYC Parks Rockaway Beach Headquarters is a non-financial relationship, and support will be provided in-kind.

This is an important project that is responsive to community need, and I am confident in QCJC-TR's ability to successfully implement it. Given their expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Sincerely,

Eric Peterson
Rockaway Administrator

QUEENS COLLEGE

Department of Urban Studies

March 30, 2023

Marianne Engelman-Lado
Acting Principal Deputy Assistant Administrator
U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado,

I am pleased to provide this Letter of Commitment for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding pursuant to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Request for Applications. Through this initiative, QCJC-TR will train and educate community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping.

The award-winning Center for Justice Innovation (formerly the Center for Court Innovation) is a national leader in the development, study, and dissemination of initiatives that address urgent issues related to safety, justice, and community well-being. Among its many activities, the Center designs and operates many successful, results-driven programs for young people, as well as several community service and community cleanup initiatives, where staff work with residents and community groups to identify neighborhood projects that respond to local needs. The Urban Studies Department previously partnered with Queens-based CJI programs as part of our service learning internship program.

The Queens Community Justice Center-The Rockaways was launched by the Center in 2021 in Far Rockaway, Queens, to serve as a local hub for alternative-to-incarceration programming, youth development, and community safety initiatives. QCJC-TR provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. Through the Love Where You Live Program, resident-led place-keeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.

If funding is secured, I am committed to supporting the Queens Community Justice Center-The Rockaways and its project under the EJCPS program. I will serve on the professional advisory team, assist with workshops, connect the program with the wider New York City environmental justice network, and potentially connect Queens College interns with the program to support QCJC-TR's work. Our partnership will be non-financial, and I will provide support in-kind.

My own expertise centers on grassroots movements for environmental justice, the politics of urban sustainability, and environmental racism. My most recent book, The Sustainability Myth: Environmental

Gentrification and the Politics of Justice (NYU Press, 2020), won the 2021 book award from the Society for the Anthropology of North America. In addition, my 2005 book, Polluted Promises: Environmental Racism and the Search for Justice in a Southern Town (NYU Press) won the Society for Humanistic Sociology book award. I also co-edited Sustainability in the Global City: Myth and Practice (with Cynthia Isenhour and Gary McDonogh, Cambridge 2015) and Local Actions: Cultural Activism, Power and Public Life (with Maggie Fishman, Columbia U Press, 2004), as well as numerous academic articles, book chapters, and articles for popular magazines and newspapers.

I am pleased to be part of this important project. Not only is it responsive to community needs, but also I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Please feel free to contact me at Ex. 6 - Personal Privacy (PP) or Ex. 6 - Personal Privacy (PP) if you have any questions.

Sincerely,

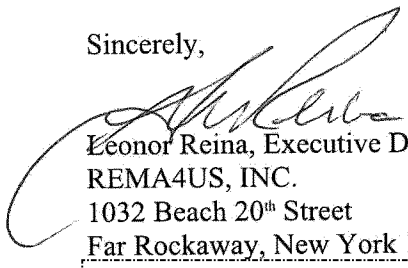
Marianne Engelman-Lado
Acting Principal Deputy Assistant Administrator
U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado,

On behalf of Rockaway East Merchants Association 4 United Synergy, REMA 4 US Inc. (REMA 4 US), I am pleased to provide this Letter of Commitment for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding pursuant to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Request for Applications. Through this initiative, QCJC-TR will train and educate community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping.

A recipient of an Innovations in American Government Award from Harvard University and the Ford Foundation and a Peter F. Drucker Award for nonprofit innovation, the Center for Justice Innovation (formerly the Center for Court Innovation) is a national leader in the development, study, and dissemination of initiatives that address urgent issues related to safety, justice, and community well-being. Bridging the gap between systems and communities, the Center runs more than 30 community-based programs in all New York City boroughs and beyond to co-create safe and vibrant communities alongside residents, court actors, government agencies, elected officials, and other community-based organizations. Most relevantly, the Center designs and operates many successful, results-driven programs for young people, including alternative-to-detention programs, work readiness programs, mentoring programs, and anti-violence programs focused on bettering outcomes for high-risk youth and supporting the development of youth leaders. Center programming also includes several community service and community cleanup initiatives, where staff work with residents and community groups to identify neighborhood projects that respond to local needs.

The Queens Community Justice Center-The Rockaways was launched by the Center in 2021 in Far Rockaway, Queens, to serve as a local hub for alternative-to-incarceration programming, youth development, and community safety initiatives. QCJC-TR invests in residents and provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. QCJC-TR accomplishes this through youth development programming like the Rock Steady Youth Initiative; addressing disinvestment in the Far Rockaway community through the Love Where You Live Program, resident-led placekeeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.



Rockaway East Merchants Association 4 United Synergy, REMA 4 US Inc. (REMA 4 US) seeks to engage in economic development and revitalization in the Rockaway Peninsula. To strengthen our community revitalization programs and community development efforts in the Rockaway Peninsula, REMA 4 US works alongside businesses, civic groups, government agencies, and non-profit organizations. REMA 4 US works to inform the public about opportunities that exist to strengthen the

community, and to create a welcoming and safe environment to help expand economic opportunity in the Rockaway Peninsula.

If funding is secured, REMA 4 US is committed to supporting the Center's Queens Community Justice Center-The Rockaways and its project under the EJCPS program. Rockaway East Merchants Association 4 United Synergy, REMA 4 US Inc. (REMA 4 US) will assist with promoting the initiative to local businesses and to the Far Rockaway community at large, help to identify local community members that have been impacted by illegal dumping, and foster networking to identify space and audiences for the community training events and workshops. Executive Director Leonor Reina will also serve on the professional advisory board. The partnership between QCJC-TR and REMA 4 US is a non-financial relationship, and support will be provided in-kind.

This is an important project that is responsive to community need, and I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Sincerely,

Office of Environmental Justice and External Civil Rights

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado,

I am pleased to provide this Letter of Commitment for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding pursuant to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Request for Applications. Through this initiative, QCJC-TR will train and educate community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping.

A recipient of an Innovations in American Government Award from Harvard University and the Ford Foundation and a Peter F. Drucker Award for nonprofit innovation, the Center for Justice Innovation (formerly the Center for Court Innovation) is a national leader in the development, study, and dissemination of initiatives that address urgent issues related to safety, justice, and community well-being. Bridging the gap between systems and communities, the Center runs more than 30 community-based programs in all New York City boroughs and beyond to co-create safe and vibrant communities alongside residents, court actors, government agencies, elected officials, and other community-based organizations. Most relevantly, the Center designs and operates many successful, results-driven programs for young people, including alternative-to-detention programs, work readiness programs, mentoring programs, and anti-violence programs focused on bettering outcomes for high-risk youth and supporting the development of youth leaders. Center programming also includes several community service and community cleanup initiatives, where staff work with residents and community groups to identify neighborhood projects that respond to local needs.

The Queens Community Justice Center-The Rockaways was launched by the Center in 2021 in Far Rockaway, Queens, to serve as a local hub for alternative-to-incarceration programming, youth development, and community safety initiatives. QCJC-TR invests in residents and provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. QCJC-TR accomplishes this through youth development programming like the Rock Steady Youth Initiative; addressing disinvestment in the Far Rockaway community through the Love Where You Live Program, resident-led placekeeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.

I am Associate Professor of Urban Policy and Planning at Hunter College in New York City, and the author of *Resisting Garbage: The Politics of Waste Management in American Cities.* This book compared the recent history of municipal waste management in Seattle, WA and Boston, MA, ultimately arguing that cities can in fact make better waste policy, but it has more to do with inclusive decision-making, material awareness, and accountable goal setting than recycling rates.

I am currently working on two research projects. The first is a collaborative project documenting and analyzing the city-wide roll out of organics waste management in New York City. The City's new program promises to positively impact both greenhouse gas emissions and environmental injustice, and my research will try to understand how program participants and advocates are considering these critical issues in their decision-making. My second project examines the roll of city governments in the diffusion of plastics in the environment. The project is a historical analysis of urban building codes and solid waste policies in New York City and other cities across the United States, and will result in a book tentatively titled *How the City Became Plastic.* All of my work to date has taught me how crucial an informed citizenry is to advancing better waste and material management policies at the city level. Citizen-advocates can meaningfully impact municipal waste policy, and it is a privilege to have a role in supporting Far Rockaway youth in their inspiring efforts to be New York City's next set of solid waste leaders.

If funding is secured, I am committed to supporting the Center's Queens Community Justice Center-The Rockaways and its project under the EJCPS program. I will serve on the professional advisory team, deliver workshops to the young people, and support the advocacy of the young people in helping to deliver a policy/research component of the program. Our partnership is non-financial, and I will provide support in-kind.

This is an important project that is responsive to community need, and I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Sincerely,

Dr. Lily Baum Pollans
Associate Professor of Urban Policy and Planning

Jamaica Bay – Rockaway Parks Conservancy

April 3, 2023

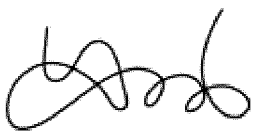
Marianne Engelman-Lado
Acting Principal Deputy Assistant Administrator
U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado,

On behalf of Jamaica Bay-Rockaway Parks Conservancy, Inc. (JBRPC), I am pleased to provide this Letter of Commitment for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding pursuant to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Request for Applications. Through this initiative, QCJC-TR will train and educate community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping.

A recipient of an Innovations in American Government Award from Harvard University and the Ford Foundation and a Peter F. Drucker Award for nonprofit innovation, the Center for Justice Innovation (formerly the Center for Court Innovation) is a national leader in the development, study, and dissemination of initiatives that address urgent issues related to safety, justice, and community well-being. Bridging the gap between systems and communities, the Center runs more than 30 community-based programs in all New York City boroughs and beyond to co-create safe and vibrant communities alongside residents, court actors, government agencies, elected officials, and other community-based organizations. Most relevantly, the Center designs and operates many successful, results-driven programs for young people, including alternative-to-detention programs, work readiness programs, mentoring programs, and anti-violence programs focused on bettering outcomes for high-risk youth and supporting the development of youth leaders. Center programming also includes several community service and community cleanup initiatives, where staff work with residents and community groups to identify neighborhood projects that respond to local needs.

The Queens Community Justice Center-The Rockaways was launched by the Center in 2021 in Far Rockaway, Queens, to serve as a local hub for alternative-to-incarceration programming, youth development, and community safety initiatives. QCJC-TR invests in



residents and provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. QCJC-TR accomplishes this through youth development programming like the Rock Steady Youth Initiative; addressing disinvestment in the Far Rockaway community through the Love Where You Live Program, resident-led placekeeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.

In July 2012, Mayor Michael R. Bloomberg and Secretary of the Interior Ken Salazar signed a cooperative management agreement and announced the formation of the Jamaica Bay-Rockaway Parks Conservancy, Inc. (JBRPC) to support the unique relationship between the City of New York and the National Park Service. JBRPC was formally established in 2013 as a public-private partnership dedicated to improving the 10,000 acres of public parkland throughout Jamaica Bay and the Rockaway peninsula for local residents and visitors alike. JBRPC works to expand public access; increase recreational and educational opportunities; foster citizen stewardship and volunteerism; preserve and restore natural areas, including wetland and wildlife habitat; enhance cultural resources; and ensure the long-term sustainability of the parklands, including the development of the Science and Resilience Institute at Jamaica Bay. The JBRPC is proud to partner with governmental agencies, elected officials, non-profit organizations, the business community, and the public to improve public parkland throughout Jamaica Bay and the Rockaway peninsula.

If funding is secured, JBRPC is committed to supporting the Center's Queens Community Justice Center-The Rockaways and its project under the EJCPS program. JBRPC will support with hosting community cleanups, aid youth in community mapping of illegal dumping, and Assistant Director Elizabeth Stoehr will serve on the professional advisory team. The partnership between QCJC-TR and the JBRPC is a non-financial relationship; JBRPC's support will be provided in-kind.

This is an important project that is responsive to community need, and I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Sincerely,

Terri Carta
Executive Director, Jamaica Bay-Rockaway Parks Conservancy

QCJC-TR invests in residents and provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. QCJC-TR accomplishes this through youth development programming like the Rock Steady Youth Initiative; addressing disinvestment in the Far Rockaway community through the Love Where You Live Program, resident-led placekeeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.

Founded in 1953 as a children's counseling center in Queens, The Child Center of NY has become a powerful community presence throughout the city. With 60 locations and 100 programs in NYC's most under-served communities, our 1,000+ results-oriented professionals make a difference for more than 43,000 children and their families each year. The Child Center of NY offers Cornerstone programs, which are open to the Far Rockaway community and operate in the evenings and on Saturdays.

If funding is secured, the Child Center of NY is committed to supporting the Center's Queens Community Justice Center-The Rockaways and its project under the EJCPS program. The Child Center of NY will support with a dedicate staff member to serve on the professional advisory team, refer high school students as potential program participants, access to community space to present educational workshops, and assist with the promotion of community clean-up events. The partnership between QCJC-TR and the Child Center of NY is a non-financial relationship; the Child Center of NY's support will be provided in-kind.

This is an important project that is responsive to community need, and I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Sincerely,

Rob Closs, MSW
Senior Program Director
The Child Center of NY

April 6, 2023

Marianne Engelman-Lado
Acting Principal Deputy Assistant Administrator
U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado:

On behalf of The Pratt Center for Community Development (Pratt Center), I am pleased to provide this Letter of Commitment for the Queens Community Justice Center-The Rockaways (QCJC-TR), a project of the Center for Justice Innovation (Center), in support of its proposal for funding pursuant to the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Request for Applications. Through this initiative, QCJC-TR will train and educate community members to decrease hazardous and non-hazardous waste and to become researchers and advocate against illegal dumping.

A recipient of an Innovations in American Government Award from Harvard University and the Ford Foundation and a Peter F. Drucker Award for nonprofit innovation, the Center for Justice Innovation (formerly the Center for Court Innovation) is a national leader in the development, study, and dissemination of initiatives that address urgent issues related to safety, justice, and community well-being. Bridging the gap between systems and communities, the Center runs more than 30 community-based programs in all New York City boroughs and beyond to co-create safe and vibrant communities alongside residents, court actors, government agencies, elected officials, and other community-based organizations. Most relevantly, the Center designs and operates many successful, results-driven programs for young people, including alternative-to-detention programs, work readiness programs, mentoring programs, and anti-violence programs focused on bettering outcomes for high-risk youth and supporting the development of youth leaders. Center programming also includes several community service and community cleanup initiatives, where staff work with residents and community groups to identify neighborhood projects that respond to local needs.

The Queens Community Justice Center-The Rockaways was launched by the Center in 2021 in Far Rockaway, Queens, to serve as a local hub for alternative-to-incarceration programming, youth development, and community safety initiatives. QCJC-TR invests in residents and provides services to address public safety, promote healing and mental health, revitalize underutilized public spaces, stimulate economic mobility, and prevent further justice system involvement. QCJC-TR accomplishes this through youth development programming like the Rock Steady Youth Initiative; addressing disinvestment

PRATT CENTER FOR COMMUNITY DEVELOPMENT

in the Far Rockaway community through the Love Where You Live Program, resident-led placekeeping projects, and community service days; and providing reentry support to formerly incarcerated individuals and their families through the Family Healing Project.

Founded in 1963, the Pratt Center for Community Development is the oldest university-based community planning organization in the U.S. As part of Pratt Institute, we leverage professional skills in urban planning, architecture, design and public policy to work on the ground with community-based organizations to challenge systemic inequities and advance sustainable development. Pratt Center works for a more just, equitable, and sustainable New York City in partnership with community-based groups, small businesses, and policymakers.

If funding is secured, the Pratt Center is committed to supporting the Center's Queens Community Justice Center-The Rockaways and its project under the EJCPS program. The Pratt Center will provide mapping expertise and serve on the professional advisory team. The partnership between QCJC-TR and the Pratt Center is a non-financial relationship; the Pratt Center's support will be provided in-kind.

This is an important project that is responsive to community needs, and I am confident in the Queens Community Justice Center-The Rockaways' ability to successfully implement it. Given QCJC-TR's expertise and the Center's long history of providing effective programming for young people and their communities, I encourage your favorable consideration of the QCJC-TR's proposal for this significant project.

Sincerely,

Chante Ramsey

- **Fully fluent in Spanish**

EXPERIENCE

Director of Worker Organizing and Policy, *Make the Road NJ* *July 2022-Present*

- Developed strategy and performed research that led to the passage of a first-in-the-nation law to protect NJ temp workers from abuse and exploitation
- Leads a strategically-innovative campaign to address and correct negative impacts of Amazon on workers and working class communities in NJ
- Represents Make the Road NJ at several coalition tables

Strategic Campaigns Coordinator, *Retail, Wholesale, and Department Store Union* *June 2015- June 2022*

- Worked with university professors, students, and union organizers to develop a comprehensive strategy that got Labor Peace written into CUNY food service RFPs, which will allow more than 450 workers a fair path to unionization.
- Facilitated creation of strategy, structure, and coordination of a NYC coalition of community groups to work with the union to take on Amazon, and represented the union in local, national, and global coalitions focused on Amazon and the future of work.
- Drafted critique of Amazon that garnered impactful media attention, including a comprehensive report on the company's responsibility for providing a platform for hate groups.

Coalition Coordinator/Community Organizer, *People's Climate Movement New York* *November 2014- May 2015*

- Following the 2014 People's Climate March, developed the march Host Committee into a new coalition- PCMNY.
- Organized coalition events, including an initial "Community Leaders" convening that brought together over 400 NYC social justice organization leaders.
- Led all day-to-day organizing and outreach efforts for the coalition.

Constituency and Community Organizer*, People's Climate March, 350.org* *July 2014 - September 2014*

- Facilitated building of NYC constituency and neighborhood-based contingents for the largest climate action in history, the 2014 People's Climate March.
- Interfaced and coordinated with leaders of community groups that led various march affinity groups/contingents.
- Recruited and developed activists into Neighborhood Captains and coordinated Neighborhood Action Centers.

Organizing Lead and Field Research Coordinator*, Change to Win Retail Initiatives* *Intermittent, Nov 2007-June 2014*

- Executed a targeted strategic organizing and field research program for a large-scale campaign that won union organizing rights for thousands of workers in national retail pharmacy chains.
- Built issue-based community coalitions, led rallies, and coordinated press events.
- Collaborated closely with the campaign's Research, Communications, and Legal teams on the development of research and organizing plans that led to campaign victories.
- Created curriculum and held workshops to introduce new staff to organizing and research strategies.

Lead Organizer, *Workers United/ WU NY-NJ Regional Joint Board* *July 2010 - June 2011*

- Built a plan to win with worker- leaders focused on evidence gathering and worker-to-worker organizing that resulted in several hundred food service workers at two New York airports winning their union.
- Contributed crucial field research for a campaign to organize passenger service workers at airports.

Organizer, Worker Resource Center Rep, UNITE HERE/ Service Workers United *January 2006 – November 2007*

- Organized food service workers and industrial laundry workers in seven states.
- Developed templates for bilingual training of leaders that were used campaign-wide.
- Provided support and skills-building for newly organized shop stewards and shop-floor leaders.

- Coordinated grievance-handling with union affiliates and legal counsel.

EDUCATION

Cornell University-ILR Strategic Corporate Research Advanced Program — *September 2017*

Experience

3/2020- Present Make the Road Pennsylvania
Organizing Director

- Leading the organizing team
- Support development and execution of issue based organizing strategy
- Cross base alliance and organizational cohesion
- Organizational building with coalitions and close allies and partners
- Provided support for hiring processes.
- Fundraise for the organization through foundations, individual donors for campaigns or general operating funding for the organizing department.

2/2019- 8/2019 Make the Road family of organizations
Social Justice Independent Consultant

- Provided programmatic and logistical support for the MTR family leaders retreat in Philadelphia and the MTR family gathering at CPD's People's Convention in Detroit.
- Facilitated issue based working groups with staff from all 5 MTRs focused on housing, workers rights and immigration.
- Provided communication and administrative support.
- Provided support for hiring processes.

1/2018-8/2018 WON-Women's Organizing Network, Brooklyn, NY
Interim Coordinator and Program Consultant

- Helped with leadership development and engagement with the Core Leadership Team and active WON members.
- Conducted programming, workshop planning, curriculum revision and development and Leadership Circle cohort facilitation.
- Helped with finances, fundraising and communication.

2/2016-12/2016 Center for Popular Democracy, Brooklyn, NY
Social Justice Independent Consultant

ED_016126_00000954-00001

- Helped with administration and operations, planning and coordinating events, staff meetings, staff and member retreats for the MTR family of organizations.
- Conducted C3/C4 onboarding and helped with payroll processing, recruitment and hiring for MRPA's presidential campaign electoral work.
- Grant writing, research and management.
- Helped with programming, datasource organizing and communications.
- Supported the communication and program execution for CPD's People's Convention in Pittsburgh.

8/2012- 6/2015 CASA-New Settlement, Bronx, NY

Community Organizer for Housing Justice

- Helped form and coordinate a tenant coalition against one of the biggest landlords in the Bronx which owned 90+ multi-dwelling buildings.
- Developed a core committee of tenant leaders who led multiple campaigns.
- Organized and coordinated a citywide coalition of 13 members on the issue of non-rent fees where landlords were adding charges to monthly rent statements. This campaign won public policy changes in the state agency Homes and Community Renewal and tenants won thousands of dollars in overcharge complaints.
- Coordinated and helped to do the research and write two bilingual reports on the issue of non-rent fees. One report was based on data with one landlord, and a report addendum was based on citywide data from tenants of multiple landlords.
- Worked with local and state legislators to write and introduce legislation on the city and state level to prohibit non rent related fees.
- Coordinated and executed multiple direct actions, press conferences, rallies and local marches.
- Mentored new organizers and hired and supervised multiple college interns over the course of three years.

10/2010–11/2011 Northwest Bronx Community & Clergy Coalition Bronx, NY

Housing Community Organizer

- Helped form a tenant coalition that led tenants to obtain a new landlord, have Mayor Bloomberg tour their buildings and have the city-HPD create a new program to prevent buildings to be in such decay and in deplorable conditions.
- Organized and maintained multiple Tenant Associations, held multiple tenant-landlord meetings.
- Organized press conferences outside of tenant buildings and marches to landlord's offices.
- Planned and coordinated multiple Tenant Rights Nights.
- Delegated tasks to interns.
- Worked with the housing team to hold biweekly Housing Committee meetings.
- Wrote reports of campaigns at individual buildings for funding purposes.
- Assisted the organization to raise funds through membership dues and campaign collaboration with other organizations.

ED_016126_00000954-00002

- Participated in citywide and nationwide coalition campaign meetings and trainings.

3/2010–9/2010 Community Voices Heard, East Harlem, NY

Public Housing Organizer Trainee

- Surveyed residents to help identify a common problem within a complex of buildings, ultimately residents obtained NYCHA funding to resolve their issue.
- Recruited residents of Public Housing buildings into CVH's citywide Public Housing Preservation Campaign.
- Developed relationships through weekly one-on-one meetings with newly engaged residents and determine personal motivations.
- Mobilized constituents to attend workshops, trainings, rallies, and marches.
- Participated in phone-banking to engage membership to become dues paying members.

Education and Training

The City College of New York's Center for Worker Education

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

We sent a copy of this letter to your representative as indicated in your power of attorney.

Sincerely,

Stephen A. Martin

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Make the Road States

Address: 301 Grove St.

City: Brooklyn

State: NY: New York Zip Code: 11237

B. Unique Entity Identifier (UEI): YBTZCKM3DSZ7

C. Applicant/Recipient Point of Contact

Name: Arlenis Morel

Phone: Ex. 6 - Personal Privacy (PP)

Email: arlenis.morel@maketheroadstates.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

ARLENIS MOREL	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

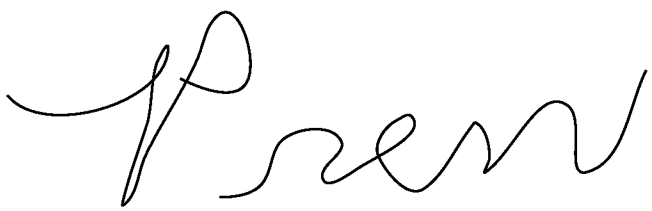
Re: Make the Road States (NV, NJ, PA) Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Application

Dear Office of Environmental Justice and External Civil Rights:



As the Coalition Coordinator, I am writing on behalf of the PA Climate Equity Table to express my support for Make the Road NJ, NV, and PA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program application. The PA Climate Equity table seeks to empower those impacted by environmental and climate injustice. We are striving to make sure that any climate solutions do not leave people behind, especially those who have borne the brunt of the harm while not being responsible for its cause. The PA Climate Equity Table has worked with MRPA in the following projects: Advocating for Whole Home Repairs, expanding the scope of the Environmental Justice Community Definition and passing bills to empower EJ communities, and creating an office of Just Transition. We are happy to support MRNJ, MRNV, and MRPA in their project to Advance Environmental Justice and Build Capacity of Historically Underserved Communities in NJ, NV, and PA.

Make the Road NJ, NV, and PA, projects of Make the Road States, a 501 (c)3 nonprofit organization, are membership organizations that build the power of Latine and working class communities to achieve dignity and justice by integrating four core methodologies: community organizing, policy innovation, transformative education, and the provision of legal, health and survival services. The communities who MRNJ, MRNV, and MRPA serve disproportionately suffer the impacts of climate change, including poor air quality, rising temperatures, and water scarcity. MRNJ, MRNV, and MRPA are experts in peer-to-peer outreach strategies and hold the institutional trust necessary to achieve environmental justice and build the capacity of historically underserved communities to face climate crises.

The PA Climate Equity Table is excited to support this important work. Please do not hesitate to contact me for any further information.

Sincerely,

Prem Rajgopal
Coalition Coordinator

Washington, DC 20460

Re: Make the Road States (NV, NJ, PA) Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Application

Dear Office of Environmental Justice and External Civil Rights:

I am writing to express my support for Make the Road NJ, NV, and PA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program application.

As the founding director of the Nevada Alliance for Student Diversity, I have worked with Make the Road Nevada on community education projects and happy to support them, along with their counterparts in New Jersey and Pennsylvania, in their work to Advance Environmental Justice and Build Capacity of Historically Underserved Communities in NJ, NV, and PA.

Make the Road NJ, NV, and PA, projects of Make the Road States, a 501 (c)3 nonprofit organization, are membership organizations that build the power of Latinx and working class communities to achieve dignity and justice by integrating four core methodologies: community organizing, policy innovation, transformative education, and the provision of legal, health and survival services. The communities who MRNJ, MRNV, and MRPA serve disproportionately suffer the impacts of climate change, including poor air quality, rising temperatures, and water scarcity. MRNJ, MRNV, and MRPA are experts in peer-to-peer outreach strategies and hold the institutional trust necessary to achieve environmental justice and build the capacity of historically underserved communities to face climate crises.

Nevada Alliance for Student Diversity is excited to support this important work. Please do not hesitate to contact me for any further information.

Sincerely,

Laura Hernandez

MAKE THE ROAD

NEW YORK | NEW JERSEY | CONNECTICUT | PENNSYLVANIA | NEVADA

United States Environmental Protection Agency
Office of Environmental Justice and External Civil Rights
Environmental Justice Collaborative Problem-solving Cooperative Agreement
Make the Road States Program Application
Advancing Environmental Justice in Nevada, New Jersey, and Pennsylvania

Applicant Background and Information

Make the Road States is a family of nonprofits that consists of state-level membership organizations that build the power of Latine and working class communities to achieve dignity and justice by integrating four core methodologies: community organizing, policy innovation, transformative education, and the provision of legal, health and survival services. Make the Road New York, our founding state, was launched in 1998. Since 2014, New Jersey, Pennsylvania, Connecticut, and Nevada have launched their own Make the Road organizations focused on local issues faced by their membership.

This application is being submitted by Nevada, New Jersey, and Pennsylvania for our collective Advancing Environmental Justice in NV, NJ, and PA project. The principal objective of the Advancing Environmental Justice in NV, NJ, and PA project is to center Latine, immigrant, and other historically underrepresented communities in conversations that are imperative to their health and wellbeing relating to environmental policies and regulations where they live. We will place a specific focus on areas with high concentrations of people of color, low-income, and working-class communities where we are most likely to see urban heat islands, lack of greenspace and trees, occupational hazards, wage and labor issues, and polluted air. We will engage communities by conducting surveys and focus groups to gather information and experiences directly from our target communities. We will use this information to help impacted community members advocate for policies that will create healthy, livable neighborhoods. Many of the people who will benefit from this project are Spanish-speaking undocumented or part of mixed status families. Many more are first generation immigrants, and nearly all are from low socioeconomic backgrounds. Our team's ability to organize in Spanish will be key to this project's success, as the majority of the work being done at the policy level is done in English which disenfranchises many communities of color.

While gathering data and information we will also undertake a large storybanking endeavor to capture the impact policies have on the real people living in our rapidly heating cities. By taking video and written testimonials we will be able to leverage the lived experience of hard-working, low-income residents. Because of the unique way we engage and relationally organize, Make the Road States is able to reach populations that are otherwise generally left behind in policy

discussions. The trust we have built within our communities, due in large part to the fact that so many of our team come from said communities, gives us an advantage because we have a strong network of members throughout the places in which we organize.

Environmental and Public Health Information of Underserved Communities

This project seeks to address environmental disparities across the the cities we work in in Nevada (Clark and Washoe Counties), Pennsylvania (Reading, Allentown, and Philadelphia), and New Jersey (Elizabeth, Perth Amboy, Newark, and Passaic). This includes issues with clean air and clean water, elevated risk associated with living near landfills, incinerators, brownfields, power plants, and other polluting agents, lead poisoning and other issues created by old housing stock in disrepair, and indoor air quality, wage and labor issues, and sustainable work practices in warehouses and the ways in which all these issues impact the health, safety, and well-being of Black, Brown, immigrant, and working-class communities of color.

Make the Road Nevada works in Clark and Washoe Counties, Nevada. Clark County is located in the southern part of Nevada and includes the city of Las Vegas, has a population of approximately 2.3 million people. According to EJSCREEN, the county has a population that is 47.4% Hispanic/Latino, 11.9% Black or African American, 7.1% Asian, and 0.9% Native American. The county has a poverty rate of 13.9%, and 18.5% of the population lives below 200% of the federal poverty level. In terms of environmental indicators, Clark County has a high percentage of people living within 1 kilometer of a hazardous waste site, a superfund site, or a brownfield site. Additionally, the county is home to several major highways and airports, which can contribute to air pollution and noise pollution, both of which have been linked to adverse health outcomes. Washoe County is located in the northern part of Nevada and includes the city of Reno, has a population of approximately 471,519 people. According to EJSCREEN, the county has a population that is 25.9% Hispanic/Latino, 2.8% Black or African American, 6.4% Asian, and 1.4% Native American. The county has a poverty rate of 10.4%, and 13.5% of the population lives below 200% of the federal poverty level. In terms of environmental indicators, Washoe County has a moderate percentage of people living within 1 kilometer of a hazardous waste site, a superfund site, or a brownfield site.

Multiple sources support the information on life expectancies and the impact of the environment on them in Clark and Washoe Counties. According to a report by the Nevada Public Health Association, the life expectancy in Clark County is lower than the national average, and environmental factors, such as air pollution, can contribute to health disparities and lower life expectancies in certain communities. Exposure to air pollution has been found to increase the

ED_016126_00000968-00002

risk of premature death, particularly from cardiovascular and respiratory diseases, according to a study published in Environmental Health Perspectives. Low-income communities and communities of color in Las Vegas are disproportionately impacted by air pollution, which can contribute to health disparities and lower life expectancies, according to an article in the Las Vegas Sun. Furthermore, the Las Vegas-Henderson metropolitan area, which includes Clark County, has some of the highest levels of ozone pollution in the United States, according to a report by the American Lung Association. A report by the Washoe County Health District found that air pollution is a significant public health concern in Washoe County, particularly near major highways and in certain neighborhoods. These sources all reinforce the idea that environmental factors could be contributing to health disparities and shorter life expectancies in certain communities within these counties, particularly low-income communities and communities of color.

Make the Road Pennsylvania works in Reading, Allentown, and Philadelphia Pennsylvania, all cities that are majority Black and Latine. According to the 2020 census data, Reading is 66.5% Latine and 12.6% Black with 29.3% of the population below the poverty line and 52.9% of the population speaking a language other than English at home. Allentown is 54.5% Latine and 14.1% Black with 23.3% of residents living below the poverty line and 47.5% of residents speaking a language other than English at home. In Philadelphia, 15.4% of residents are Latine and 40.8% of residents are Black with 22.8% of the population below the poverty line and 23.7% of the population speaking a language other than English at home.

According to the EJScreen tool, all three cities are at significant risk for environmental factors such as risk for exposure to lead paint, risk due to air pollution, air toxins cancer risk, and hazardous waste proximity Many of the people we work with are living in areas that fall within the 80-95% in terms of risk of exposure to these environmental hazards. These environmental factors also tie into the health factors that impact our community. In all 3 cities, life expectancy is significantly less than the surrounding suburban areas with neighborhoods where the members of our organization live having life expectancies between 2 and 11 years below the state average. The Public Interest Law Center also noted Pennsylvania as the state with the 2nd highest disparity between people of color and white residents and wealthy and poor residents when it comes to air pollution. The EJScreen tool also reveals that in many of the neighborhoods our members come from the rate of asthma is much higher than in surrounding communities. Lastly, according to an annual report by the PA Department of Health, children across Pennsylvania but especially in Philadelphia, Allentown and Reading, report elevated levels of lead exposure. This is especially bad in Reading where 13% of children tested had elevated lead levels which is several times higher than the national average.

Make the Road New Jersey serves working-class immigrant communities in Union, Passaic, Essex, and Middlesex counties in NJ. These NJ counties are home to a substantial number of communities of color. According to the 2020 U.S. Census, Passaic County's population is over 42.9% Hispanic or Latino and 48.8% of county residents speak a language other than English. Union County is home to a population of 30.1% foreign born, or immigrant residents, with a population of 32.8% Hispanic/Latino, and 44% speak a language other than English. Middlesex County's second largest city, Perth Amboy's population is 78% Hispanic or Latino. Essex County has a population of 797,434, and the racial makeup is diverse. African Americans make up the largest minority group, accounting for 40% of the population. The Hispanic or Latino population is the second-largest minority group, accounting for 22% of the population.

Based on the data provided by the EJSCREEN tool, all of the NJ counties stated have a high percentage of minority and Hispanic residents, who may be more vulnerable to environmental and public health hazards due to factors such as language barriers and discrimination. The Environmental Justice Index (EJI) scores for these counties suggest a higher potential for environmental injustice, with Essex and Passaic counties having the highest EJI scores. Additionally, there are several facilities in each of these counties that may pose environmental risks, including hazardous waste sites, Superfund sites, and Brownfield sites. These findings suggest that there may be a higher risk of exposure to harmful pollutants and contaminants for minority and Hispanic populations living in these counties.

Particularly, immigrant populations working in warehouses in northern New Jersey may face an additional environmental justice issue related to heat exposure. Warehouse work is physically demanding and often occurs in hot and humid conditions, which can lead to heat-related illnesses such as heat exhaustion and heatstroke. Immigrant workers may be particularly vulnerable to these risks if they are not acclimated to the climate or lack access to adequate hydration and cooling measures. Addressing this issue will require strategies such as providing adequate hydration and cooling measures, implementing rest breaks, and ensuring that workers are trained on recognizing the signs and symptoms of heat-related illness. Employers should be held accountable for providing safe working conditions for all workers.

Organization's Historical Connection to Underserved Communities

Each of our organizations has built deep trust in the communities we serve, allowing us to reach the most vulnerable community members who government agencies consider hard to reach. All of the Make the Road family of organizations were founded by and for members of the communities that we work in and organize with centered in the experience of Black, Brown,

immigrant, working class and poor people. When we got started, we did not just decide what the community needed but instead took direction and lead from community members we were talking with on street corners and in community meetings and invited those community members to help us build our organizations. Make the Road Nevada was founded in 2017 and Make the Road Pennsylvania and Make the Road New Jersey were founded in 2014 and each have been building community leadership ever since.

Throughout the programming that we do, community members are centered and are in leadership roles. On the services side of our work, we have developed, refined and replicated a "promotore" model of program delivery. Through this model, we train community members - who speak the language of their neighbors and understand their culture and experiences - to reach their neighbors with important health information, service referrals, and recruit them to participate in our advocacy and organizing initiatives. On the advocacy side of our organization, our members form committees related to specific issues that our members care about and want to see changed in our community. This is the reason that each of our states are engaged in environmental justice issues, because our members wanted our organizations to focus on that work. They determine what issues are most important to them and what campaigns to move forward.

Thanks to our members leadership, Make the Road States has extensive experience in organizing on environmental equity in particular. For example, in Nevada we are currently working with community partners to monitor air quality in East Las Vegas and develop policies to ensure cleaner, healthier neighborhoods for underserved communities across the state. In Pennsylvania, we just passed the Whole Home Repairs Act at the state level that will make available up to $50,000 for low-income homeowners to make repairs and weatherize their homes to address issues such as lead exposure and better prepare their homes for more extreme heat, drought, and flooding caused by climate change. New Jersey leads and is part of multiple state-wide environmental justice coalitions which seek to protect workers, provide clean energy jobs, promote subsidized home weatherization, monitor air quality, and challenge large polluting industries.

MRPA, MRNV, and MRNJ have done outreach and education in our communities on a variety of environmental issues and the impacts they have, ranging from recycling to policy making. This project will build on our existing education and outreach work. We will continue to directly engage our community members on their experiences living with rising temperatures, poor air quality, and water scarcity, and will advocate for policies that improve quality of life for frontline communities more generally.

EJCPS Model

This project will utilize the Environmental Justice Collaborative Problem-Solving Model via the following elements:

- Element 1 - Issue Identification, Community Vision, and Strategic Goal Setting
- Element 2 - Community Capacity-Building and Leadership Development

Element 1 - Issue Identification, Community Vision, and Strategic Goal Setting

- Make the Road's work is based in true grassroots outreach and emphasizes the importance of one-on-one engagement to create large-scale change. Our organizing model blends traditional tactics like taking clipboards to high-concentration Latine & working-class areas and digital organizing via social media. We concentrate on identifying leads, talking to people one-on-one or in small groups, and collecting contact information so we can follow-up with them directly. MRS staff and members will conduct outreach including door knocking, targeted phone calls, peer-to-peer texting, and tabling at events. With the guidance of our seasoned organizing team, our member leaders will leverage their existing connections to conduct relational organizing, a type of outreach that involves leveraging personal connections and trust to relay messaging. Members will work with our expert communications department to develop campaigns that engage community members via social media platforms including Facebook, TikTok, Instagram, Twitter, YouTube, and WhatsApp. Our members will lead an effort to survey the community to assess needs, concerns, and possible solutions to the environmental issues being faced. We will host focus groups and community forums to gather input and testimonials. This input will inform our work and allow us to change course as needed to ensure the strongest and most effective campaign.

Element 2 - Community Capacity-Building and Leadership Development

- Developing strong member leaders is at the very core of Make the Road State's ability to create positive change for our community. Our members set priorities, guide our involvement, and keep our work focused on the community. Our high-touch organizing model allows members to be involved through every step of the process; all the work we do is done collaboratively among members, member leaders, and staff. This ensures that knowledge and intel is distributed throughout the organization, rather than allowing staff to hold the keys. Because of this, our membership has met with members of our Congressional Delegation, hosted town hall meetings, facilitated forums, and led

ED_016126_00000968-00006

outreach activities. They have provided and collected stories for our communications team to use to gain media coverage and bolster our social media presence. Member leaders sit on committees and task forces, give media interviews and quotes, and lead committee and general membership meetings. This empowerment of our members, combined with our commitment to hiring from our base, is what makes us truly reflective of the communities we strive to uplift.

Project Linkages

This project supports the EPA Strategic Plan Goal 2, Objective 2.1 because of the people and communities Make the Road States represents. Our members are people of color, immigrants, and working families who are disproportionately impacted by the systemic racism inherent in our government systems. As both a result and a continuation of this racism, these same groups are far less likely to have the tools to fight back against the systems keeping them down. To stop this feedback loop, MRS is heavily invested in ensuring the voices of those most affected are not just in the room but involved in the decisions being made on their behalf. Make the Road States is a coalition-driven civic engagement and issue-organizing space, with coalitions, alliances, or tables for just about every issue you can think of but rarely populated by directly impacted individuals. The solutions that come out of these groups are too often based on data points rather than actual people and rarely create long-term, sustainable change. MRS flips this narrative by centering our work on the everyday people in Nevada, Pennsylvania, and New Jersey who make up our base, families, workers, immigrants, and people of color fighting for the opportunity to thrive rather than just survive. We are an intentionally disruptive force, fighting to create structures for concrete and long-term solutions to the inequities faced by people of color, immigrants, and low-income communities.

Partner and Collaborations

Make the Road New Jersey, Nevada, and Pennsylvania will be working closely together on this project. While each state may have its own specific local contexts, many of the strategies and tactics we will be using for this program are similar (community outreach and engagement, community education, surveying, etc…). This will allow our organizations to learn from each other during each stage of the project. We plan to have the leaders of the project meet regularly to discuss best practices and challenges that they are facing in order to do the work more effectively. This is a similar approach to one that we used with a recent grant we received from the Robert Wood Johnson Foundation around medicaid access. A representative from each of the states met on a monthly basis to share strategies being used to collect surveys and how they

ED_016126_00000968-00007

overcame challenges and it led to all of our states being able to do their work better. This partnership across states will allow us to do better outreach to reach the goal number of people we want to reach, develop better educational materials and sessions for community members to attend, and evaluate and measure our work in similar ways.

Each of us will also leverage the deep connections we have with organizations locally. In Pennsylvania, we will be working together with the PA Climate Equity Table and the organizations that make up that table. These organizations include Pittsburgh United, Casa, the Center for Coalfield Justice, Pennsylvania Stands Up, Philly Thrive, One PA, and Power. Many of these organizations have a similar constituency to Make the Road PA, Black, brown, working-class and poor people but in different parts of the state. Pittsburgh United works in Pittsburgh, Casa in Southern PA, Power in Central PA, and the Center for Coalfield Justice in more rural parts of PA. We will be presenting the work we are doing as part of this grant at the Climate Table and working with these partner organizations to expand the reach of our educational sessions and communications about climate justice in PA and how we can work together on statewide solutions that may be needed for problems that we identify. Many of these partners are also membership organizations so they bring a diverse group of people and experiences to the table and have large bases of people to get feedback from and send information to. One PA is a statewide organization that has many connections at the state level that we will work with to amplify our message and connect with state leaders on needed changes. As a core member of the Climate Equity Table, Make the Road PA plans to continue to maintain strong relationships with all of these partners as it is the only way our communities will win the changes they need to live in safe and more healthy neighborhoods.

In Nevada, we are Steering Committee members on the Nevada Environmental Justice Committee (NEJC). The NEJC is a collaborative of 13 grassroots organizations fighting to dismantle the structural environmental inequities that our communities face in their day to day lives. As one of the only coalitions led by organizations of color, the NEJC is integral to achieving progressive policies and shifting decision makers' priorities to make meaningful change for directly impacted, vulnerable, and low-income communities of color. Like MRNV, NEJC partners know that sustained change only comes when work is led by those most impacted, which is why we seek to develop a broad base of environmental justice supporters who reflect the real faces of Nevada, as well as identifying, training, and developing leaders from that base to serve as ambassadors to the broader community, spokespeople, and peer-to-peer organizers. The NEJC coordinator position is housed at MRNV, and she ensures NEJC work remains streamlined, focused, and coordinated. Beyond the NEJC, MRNV works with local institutes including the Guinn Center for Public Policy Priorities and the UNLV School of Public

ED_016126_00000968-00008

Health on participatory research to inform on the needs of and impacts to the Latinx and immigrant communities in Southern Nevada. As a part of this effort, MRNV serves on the Advisory Board to guide and inform the work that the The Guinn Center, in partnership with Morrison Institute for Public Policy at Arizona State University (ASU), will be leading of how policies for disaster management and response in the southwest cities of Las Vegas, Nevada and Phoenix, Arizona, and address the vulnerability of people of color to extreme heat, particularly during the COVID-19 pandemic. We are members of the Southern Nevada Blue Ribbon Panel on Social Equity which also includes climate impacts and of the Nevada Hispanic Legislative Caucus' subcommittee on environmental issues.

MRNJ operates community centers in Passaic City, NJ and Elizabeth, and Perth Amboy, NJ and is a trusted partner and go-to resource for immigrant, low income Latinx communities and communities of color in those counties. MRNJ is poised to reach residents with multiple cultural backgrounds by leveraging our existing organizational relationships, outreaching to thousands of community members with COVID-19 mitigation information, and coordinating vaccine clinics in partnership with our network of providers. We have partners in multiple counties. Our current partners in Passaic County include: 4Cs of Passaic County, IACO Immigration & American Citizenship Organization, Inc., Palestinian American Community Center, Paterson Alliance, OASIS, and more. Our current partners in Union County include: Elizabeth Public Schools (where we operate an in house Student Success Center that serves 3,000 students annually in the high schools), Plainfield Public Schools, United Way of Union County, Elizabeth Coalition to House the Homeless, Josephine's Place, Union County Council for Young Children, Legal Services of Central New Jersey, St. Joseph's, Jefferson Park Ministries, Community Access Unlimited, Elizabeth Public Library, PROCEED, Inc., and dozens of faith and small business partners. Lastly, New Jersey partners with dozens of environmental advocacy organizations in Newark, NJ including Ironbound Community Corporation, Southward Environmental Alliance, and Clean Water Action.

Project Activities / Milestone Schedule / Detailed:

This plan outlines a clear and effective strategy to achieve the goals and objectives of the project and provides milestones to measure progress and ensure success.

Activity 1: Conduct Baseline Survey

The first Activity of the project is to conduct a baseline survey to understand the current levels of awareness, knowledge, and participation in environmental impacts among community members.

The survey will be conducted through various methods, such as online surveys, phone surveys, and in-person interviews, to reach a representative sample of the population. The data collected from the survey will be analyzed to identify areas where the public is lacking in knowledge and understanding of the programs, and to develop a more targeted communications plan.

Activity 2: Develop Communications Plan

The second activity of the project is to develop a comprehensive communications plan that will be used to raise awareness about the importance of being informed and educated about the impact of environmental equity on our communities. The plan will include the use of various platforms and strategies, such as social media, community events, newsletters, workshops and seminars, partnerships with schools, and collaborations with community organizations. The goal of the communications plan is to reach the widest possible audience and to educate the public on the benefits of these programs.

Activity 3: Implement Communications Plan

The third activity of the project is to implement the communications plan that was developed in activity 2. The plan will be executed through a combination of tactics, such as social media campaigns, community events, and workshops, to reach the target audience. It will be fully bilingual in English and Spanish.

Activity 4: Offer Educational Workshops and Seminars

The fourth activity of the project is to offer educational workshops and seminars to the public. These workshops and seminars will provide interactive activities to help the community see how they are impacted by environmental equity, as well as what steps they can take to mitigate these factors in the long and short term. The goal of these educational events is to make change by offering accessible and comprehensive information.

Activity 5: Monitor and Measure Success

The fifth activity of the project is to monitor and measure the success of the efforts to raise awareness and encourage taking action. This will be done through regular assessments, surveys, and focus groups to gauge public understanding and participation in the programs. The data collected will be analyzed to determine the effectiveness of the communications plan and educational efforts and make necessary adjustments.

Activity 6: Adjustments to Communications Plan and Educational Efforts

The sixth activity of the project is to make necessary adjustments to the communications plan and educational efforts based on the results of the monitoring and assessments. This may involve modifying the tactics used to reach the target audience, adjusting the content of the educational materials, or refining the approach used in the workshops and seminars. The goal of these adjustments is to ensure maximum impact and achieve the project's goals and objectives.

Milestones:

- Completion of the baseline survey (within the first 4 months of the project)
- Development and implementation of the communications plan (within the first 4 months of the project)
- First set of workshops and seminars (within the first 6 months of the project)
- First round of monitoring and assessment results (within the first 12 months of the project)
- Adjustments made to the communications plan and educational efforts (within the first 18 months of the project)

Time Schedule

This time schedule provides a comprehensive overview of the start and completion dates for each task associated with the project and serves as a roadmap for ensuring that all goals and objectives are met by the project end. By coordinating milestones with important events, such as budget cycles and meetings, the project can be managed efficiently and effectively to achieve maximum impact.

Task 1: Conduct Baseline Survey

- Start Date: Month 1
- Completion Date: Month 4

Task 2: Develop Communications Plan

- Start Date: Month 1
- Completion Date: Month 4

Task 3: Implement Communications Plan

- Start Date: Month 5
- Completion Date: Month 18

Task 4: Offer Educational Workshops and Seminars

- Start Date: Month 6

- Completion Date: Month 18

Task 5: Monitor and Measure Success

- Start Date: Month 12
- Completion Date: Month 18

Task 7: Adjustments to Communications Plan and Educational Efforts

- Start Date: Month 18
- Completion Date: Month 24

Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model):

Make the Road States has access to an automatic dialer that allows us to efficiently target community members in particular geographic locations. ThruTalk is a tool that is typically used for voter outreach but we have taken lessons from our non-partisan voter outreach work and adapted them to general issue outreach, enabling us to reach a targeted universe of community members in a short period of time.

Make the Road States records data using EveryAction, which allows us to pull timely reports and compile data and stories in an easily accessible manner. Our canvassers and organizers will contact members via phone and through canvassing efforts directly in the community to better understand how environmental justice issues are impacting our membership and will use EveryAction to record information and build the data needed to generate reports and information needed to determine issue-focus areas. In addition, Make the Road New Jersey will use their comprehensive Legal Server database and Hustle system to record information. All of these systems have the ability to record quantitative data as well as information in narrative form. We will be tracking the number of people we talk with, the number of qualitative stories collected, and the number of new people we engage in this project through these conversations. This will allow us to easily reach our goals of collecting 600 surveys from community members and having conversations with over 4,500 community members about climate justice issues.

Once all of this data is collected and conversations are completed, we will hold discussions with member leaders in our environmental justice/climate committees about what themes are coming out of our conversations and what next steps we should take based on the experiences community members shared and themes that emerged. This will lead to more public forums and educational efforts both inside our membership and within the wider community where we will track engagement and ideas that are generated in these spaces. Each state will hold at least 6 educational sessions (18 total) and will use our outreach to bring in 50 new members and leaders per state (150 total) that will help regularly participate in and lead our climate justice work.

Climate and clean energy will always be a part of Make the Road States' work because it directly impacts our members on a daily basis, especially via the rising temperature, lack of clean air, and increasingly limited access to water in Southern Nevada, the aging housing stock, exposure to lead and other harmful elements, and lack of clean air and water in the cities of Eastern Pennsylvania, and life threatening heat levels within NJ warehouses. Thanks to our year-round organizing model, MRS has been able to develop a cohort of environmental and energy equity ambassadors out of our membership base in each state that engage the broader community on these issues. We will use the information collected in this project to continue to prioritize centering the voices of those most impacted in our work and are confident that uplifting their voices will lead to long-term solutions at the local, state, and federal policy levels.

Programmatic Capability

Make the Road Nevada (MRNV)

Make the Road Nevada has engaged our membership on climate equity work from our inception, because the environment in which our members live is inherently tied to issues they face in their everyday lives. As a result of this work, we are leaders in the Nevada Environmental Justice Coalition (NEJC), where, along with our partner organizations, we ensure the environmental inequities faced by communities of color are central to the coalition's work. The majority of our members are Latinx working families living in Las Vegas' East and North sides. Higher rates of asthma and obesity can be directly tied to the air quality and increased risk for heat stroke and dehydration are a clear result of more people working outside, living without air conditioning, and being forced to walk to and from poorly placed and inadequately shaded public bus stops. Through weekly meetings and ongoing outreach, we work to educate members on steps they can take in their everyday lives to help stem the effects of rising temperatures for themselves and their families. Along with leading the Nevada Environmental Justice Coalition, Make the Road Nevada regularly partners with local organizations including Chispa, the Progressive Leadership Alliance of Nevada, Make It Work Nevada, and Moms Clean Air Force/EcoMadres. Make the Road is also a member of the Southern Nevada Blue Ribbon Panel on Social Equity and the Nevada Hispanic Legislative Caucus' subcommittee on environmental issues. Make the Road has an existing Environmental Justice committee with a record of developing plans around environmental equity, holding focus groups, leading community planning sessions, and identifying new community members to join in the work.

In Nevada, this project will be led by Jose Rivera, our Environmental Justice Organizer. Jose is responsible for growing and guiding Make the Road Nevada's Environmental Justice Committee. Through this committee, Jose develops new members into strong leaders who take action on the issues most impacting themselves and their families. Jose has extensive experience

ED_016126_00000968-00013

in leading community outreach projects, focus groups, and data collection in underserved communities. Jose will have the support of our dedicated Data Manager and our experienced communications team. Jose will also be able to count on our Organizing Director and Lead Organizer, who bring a combined decade + of experience, as well as our entire senior management team for guidance. Our communications team will be available to create content, place ads, and attract media. Finally, key to the success of this work will be the 12 person outreach team working full time to knock doors, make phone calls, and introduce Nevadans to discussions around climate policy solutions.

Make the Road Pennsylvania (MRPA)

Make the Road Pennsylvania has been canvassing and organizing in Eastern PA since 2014 identifying issues in the community and organizing community members to make change and fight for their rights. Over these nine years we have engaged tens of thousands of people, knocked on hundreds of thousands of doors, and made concrete changes to benefit the lives of Black, brown, Latine, immigrant, working-class and poor people in Allentown, Reading, and Philadelphia. Our organizing model focuses on direct community engagement and leadership within the work that we do. We always start out by asking community members what issues are impacting them on a daily basis and what changes they want to see in their neighborhoods and communities. For example, we recently engaged in a campaign to make changes to housing policies in Pennsylvania because we heard again and again from members about how they could not afford to make needed repairs to their homes or that landlords were keeping homes in disrepair. We worked with several coalition partners and state legislators to implement a new program that set aside $125 million dollars for low-income homeowners and landlords to make needed repairs and weatherization of their homes.

We bring this same community-led process to all of our work including work focused on climate justice. For several years now climate and environmental justice are issues that we have organized and built power around. Make the Road Pennsylvania is one of the lead organizations in our statewide climate table, providing the perspective of Black and brown residents at tables that are many times majority white. Our organizers and canvassers identified many issues related to environmental and climate justice that impact our members including lack of adequate public transportation, elevated asthma rates and lack of clean air, lead exposure and lead poisoning in children, and inadequate weatherization in homes increasingly facing climate extremes. We formed a committee focused on climate justice issues and worked with our members to provide education on the ways in which climate issues were impacting their daily lives and the terminology used within climate justice spaces. We also discussed the ways in which many of our members immigration stories relate to climate catastrophes and changes in their home

countries which led them to migrate to the United States. This gave our members the confidence to speak about the way climate injustice impacts them in coalition spaces that are predominantly white and take leadership in those spaces to demand changes for their communities. As mentioned above, we had a huge victory at the intersection of climate and housing, getting resources to low-income homeowners to address climate related housing issues.

In Pennsylvania, this project will be led by our Policy Fellow who we are in the process of hiring and will be on boarded by the end of May. This staff member will be supported by Patty Torres, our Organizing Director. Patty has over a decade of experience organizing and supporting organizers in completing projects and campaigns similar to this work. Patty began organizing as a teenager in Brooklyn fighting for better schools for herself and her peers and has not stopped since. Patty has overseen successful campaigns for the Whole Home Repairs Act mentioned earlier, the channeling of hundreds of millions of more dollars in education funding to poor school districts across PA, and many other tangible policy victories. This project will also be supported by our field team that consists of 8 full time field organizers who are in the streets and on the phones everyday talking to community members about the issues that impact them. They have thousands of conversations every month and tens of thousands of conversations every year helping us stay rooted and connected to the community. They are also from the community and speak the language of the community ensuring that community members feel comfortable approaching and talking to them.

Make the Road New Jersey (MRNJ)

Make the Road New Jersey supports low income and immigrant communities to achieve dignity and respect through community organizing, the provision of high quality legal and support services, policy innovation and transformative education. MRNJ has deep community roots and runs community centers in Elizabeth, Perth Amboy and Passaic, NJ and satellite organizing hubs and clinics in Newark. Our legal services, support services, health promotoras and adult and youth education programs serve more than 15,000 immigrant families and families of color each year. MRNJ has cultural and linguistic expertise to reach tens of thousands of Latine immigrant families in our communities and is the trusted voice and resource in our communities for immigrant rights issues. We have been leaders in developing, refining and replicating peer-to-peer outreach programs that have enabled many thousands of vulnerable immigrants to improve their health, get to college and enroll in public benefits. MRNJ also leads coalitions with dozens of stakeholders on workplace safety, immigrant rights and access to aid during the pandemic. During the 2020 census, MRNJ led a coalition from 2019-2020 of immigrant organizations to reach hard-to-court individuals across the state. In addition, our non-partisan civic engagement program annually reaches tens of thousands of voters of color.

MRNJ's part in this project will be led by our Director of Worker Organizing and Policy, Garrett O'Connor. Garrett is a graduate of the Friends World Program at Long Island University (LIU-Global) where he engaged in experiential learning, social change, and global change. Garrett has worked building leadership and membership across community organizations in NYC to build participation in the largest climate action in history, the People's Climate March. Throughout his career, Garret has launched several innovative campaigns for worker and environmental justice.

Make the Road States will undertake the following to ensure compliance with the EPA's Pre-award Compliance Review for Nonprofit Organizations:

- Conduct an internal assessment of your organization's environmental practices and policies.
- Identify any areas where you may be out of compliance with EPA regulations.
- Develop an action plan to address any compliance issues.
- Submit required documentation to the EPA.
- Cooperate fully with EPA staff during the review process.
- Implement corrective actions to address any identified compliance issues.
- Maintain ongoing compliance with EPA regulations through regular audits and training for staff.

Past Performance

Make the Road Nevada received $99,600 in funding from Community Catalyst's Vaccine Equity and Accessibility Program in 2021. In our goal to promote vaccination, our organization brought on 4 community health outreach workers, or Promotoras. Of those hired, 4 were vaccinated with both doses of the COVID-19 vaccine and 3 got the third dose. All 4 identified as Latina and were fluent in both English and Spanish. Part of the work in this project included making phone-banking calls to encourage people to get vaccinated. Also, sometimes people could call community health workers to coordinate vaccination appointments with vaccination centers, coordinate transportation, or coordinate vaccination events. Overall, these phone calls helped more than 7,000 Nevadans to coordinate their vaccination against COVID-19. In this way, we promote public health in our communities. Most of the people to whom the vaccine was coordinated fell into one, or usually more, of the following groups: Latinx, low-income, migrant, undocumented, partially documented, outdoor worker. We also directly contacted more than 9,000 residents of Clark County and were able to collect more than 250 surveys around the attitudes toward the vaccine. We met or exceeded each goal undertaken during this grant and provided comprehensive, timely reports.

Make the Road Pennsylvania was part of a collaborative effort across Make the Road States to collect surveys and data related to access to Medicaid. We received $40,000 to conduct 90 surveys and far exceeded our survey goals thanks to our strong canvassing and organizing team talking to community members and supporting them in filling out surveys and collecting data. We also received a $425,000 30 month grant from the Climate and Clean Energy Equity Fund that focused on our climate justice work. The grant included outreach and community education goals including conversations with 1,500 people, regular community meetings, leadership development of members, regular participation in a climate equity table, and participation in training and grant meetings. As an organization we met and exceeded all of these goals, becoming an organizational leader across the state in climate justice issues, talking to thousands more people than before about climate issues and leading conversations at the Climate Equity table around the intersection of race, immigration status, and local and global climate issues. We met all of our reporting requirements and had regular conversations with the funder about our work. We have development and leadership staff dedicated to tracking grant progress and updating funders to ensure that we meet all requirements.

Make the Road New Jersey received an award for $900,000 from the New Jersey Department of Health to build the COVID Community Corps and team of Community Health Workers in the state. MRNJ's project with NJDOH is focused on vaccine outreach and advancing public health equity. MRNJ and NJDOH work collaboratively to build elaborate and sophisticated systems to track the impact of our collective community outreach efforts. Through this partnership, MRNJ has been able to reach over 65,000 low-income and working-class communities to be vaccinated against COVID-19. MRNJ submits quarterly, monthly, and daily outreach reports to the NJDOH, and participates in weekly cohort meetings focused on performing outreach activities across three counties in NJ.

Quality Assurance Project Plan (QAPP) Information

This program will incorporate pre-existing environmental data, but it will also gather social science data from both Make the Road States members and the broader community. The social science data will encompass perceptions regarding health impacts, changes in behavior related to environmental impacts, and usage of information. Make the Road States has a proficient digital media outreach system in place, which will enable the collection and analysis of this data on a monthly basis. However, data collection may need to be conducted more frequently as needed. A quality assurance plan will be developed that includes a data management and data archiving strategy for the social science data.

1.0 PROGRAM OBJECTIVES

1.0 a. Project Summary

Project Title: Building a Healthy Newark: Tackling Lead Poisoning in the East, South, and West Wards of Newark, New Jersey
Project Location: East, South and West Wards of Newark, New Jersey

Primary Applicant: New Jersey Future, 16 West Lafayette Street, Trenton, NJ 08608

New Jersey Future (NJF) is a statewide nonprofit, nonpartisan organization that promotes sensible and equitable growth, redevelopment, and infrastructure investments to foster healthy, strong, resilient communities.

Applying for a Small Set Aside? No

Abstract
This two-year community-driven project will empower vulnerable community members in select wards of Newark, New Jersey to improve their health by building strategic collaborations, educating community members, and finding solutions to reduce lead exposure. Through a partnership between a statewide organization (New Jersey Future) and a community-based organization (Newark Water Coalition), called the "Project Team," community members will develop solutions that improve health and equity. Project Team member Newark Water Coalition (NWC) will interface directly with community members to expand its in-home lead testing and education program within Newark's East, West, and South Wards. Project Team member New Jersey Future will equip community members in these wards with policy advocacy skills and resources to engage with city decision-makers, and will amplify community members' priorities and efforts by integrating them into a statewide policy collaborative. Project Team member New Jersey Future will be the primary applicant and fiscal sponsor. Outputs include: 50 homes tested for lead; 25% of community members trained on lead risks and solutions; 30 community members trained as lead risk assessors; four workshops held on policy advocacy; and eight meetings between community members and city and state decision-makers. Outcomes include: reduced lead poisoning in community members; fewer homes containing lead; Newark in-home lead testing staff to include more community members; increased state and local funding, laws, enforcement, and programs for lead poisoning prevention and remediation; and more community members advocating on environmental justice issues including lead at the city and state levels.

Environmental Issue: Lead Contamination

Project type: Education, training, and technical assistance

Special Consideration: No

List of Project Partners: Project Team members (NGO), Lead-Free NJ (collaborative), Green and Healthy Homes Initiative (national NGO), Environmental and Occupational Health Sciences Institute, Rutgers University (Academic), and St. Stephan's Church (faith-based).
QAPP for your project: Yes

ED_016126_00000969-00001

1.0.b.Environmental and Public Health information of the Underserved Community
Target Community Served by This Project

The Project Team seeks to improve environmental and public health of the East, West, and South Wards of Newark by reducing lead-poisoning. community members in these wards face multiple forms of persistent inequities (ex. food insecurity, poverty), which exacerbate the disproportionate harms and risks caused by lead exposure in particular. Lead is a legacy pollutant derived from multiple sources of contamination that have been exacerbated by food insecurity as well as lack of oversight, political will, and funding.

Community Grassroots Organization: Project Team Member—Newark Water Coalition

Project Team member Newark Water Coalition as a frontline grassroots organization, works directly with an intergenerational population, with people ranging from age 11 to as old as 70 years old. These community members take leadership roles in the organization. The Newark Water Coalition is also a multi-ethnic organization represented by diverse communities such as immigrants (mainly Central and Southern American), non-English-speaking (Spanish and Portuguese-speaking) people, and people identifying as racial minorities (including African American and Hispanic). The Newark Water Coalition is the community group made of community members with a desire to take charge in their local wards, each of which is underserved and an environmental justice zone. The organization runs three water and food distribution sites in Newark that serve neighborhoods with extremely high exposure to lead paint and other inequities. All work and outreach are tailored to the specific needs of the community—such as translating all materials and having people who speak the same language as community members as part of the team.

The Operations of the Newark Water Coalition

The Newark Water Coalition opened its South Ward office March of 2022. Since then, Newark Water Coalition has been able to reach an estimated 6,000 community members directly since opening the office, based in the Clinton Hill section of Newark. The indirect household reach is around 20,000 community members, who do not have access to computers and the Internet. Previous surveys have found that a lot of the community members also do not know how to operate a computer, even if they did have Internet access. The Newark Water Coalition has been able to provide services such as assistance in signing up for housing vouchers and finding legal representation, as well as serving the organization's free food and water program.

The first office of the Newark Water Coalition opened in September of 2021 at St. Stephan's Church in the East Ward of Newark in the Ferry Street Section. This location is only in operation once a week and has been able to directly reach an estimated 6,400 community members so far. The yearly indirect household outreach of the office is over 25,000 community members. This community is home to the immigrant population of Newark, mainly Portuguese-speaking community members. Most of the community members served at the St. Stephan's office are non-English speaking, and many are unemployed or underemployed. The community members are also often underinsured and have a household average of three or more people.

The Newark Water Coalition is in the process of opening its second office location in the South Orange Avenue section of the West Ward of Newark. This is to be the home of the Newark Water Coalition training academy, along with its free food and water program. The organization

operated out of this location once a week, averaging outreach to 1,560 community members yearly. Full time in the location will allow the Newark Water Coalition to serve a predominantly African American community that is also largely underemployed and unemployed.

Community Characteristics Served by This Project

The neighborhoods served by Project Team Member Newark Water Coalition will also be the communities reached via this project. The Environmental Protection Agency's (EPA) EJSCREEN tool provides context around the burdens faced by these environmental and social justice communities:

- Most of the South Ward is in the 80–100th percentile for lead paint levels, 90–100th percentile for unemployment rate, and 90–100th percentile for rate of low life expectancy. (Project Team member Newark Water Coalition's Clinton Hill office is located in the South Ward of Newark).
- The West Ward is between 80–90th percentile for lead paint levels, 95–100th percentile for rate of low-income households, and 95-100th percentile for the rate of people of color in the population. (Project Team member Newark Water Coalition's South Orange Avenue office is located in the West Ward of Newark).
- The heavily populated (as opposed to industrial) sections of the East Ward are in the 70–90th percentile for lead paint levels, 95–100th percentile for rate of low-income households, and 95-100 percentile for rate of limited English-speakers. The St. Stephan's Church office serves this ward.

According to the New Jersey Department of Environmental Protection (NJDEP), census blocks in each of these wards contain a multitude of other environmental stressors (e.g., concentrated area of air pollution, contaminated sites, solid waste facilities, point source of water pollution, lead exposure, and social determinants of health), ranging from a low of 9–11 stressors to a high of 22–25, where 25 is the maximum number of stressors possible.

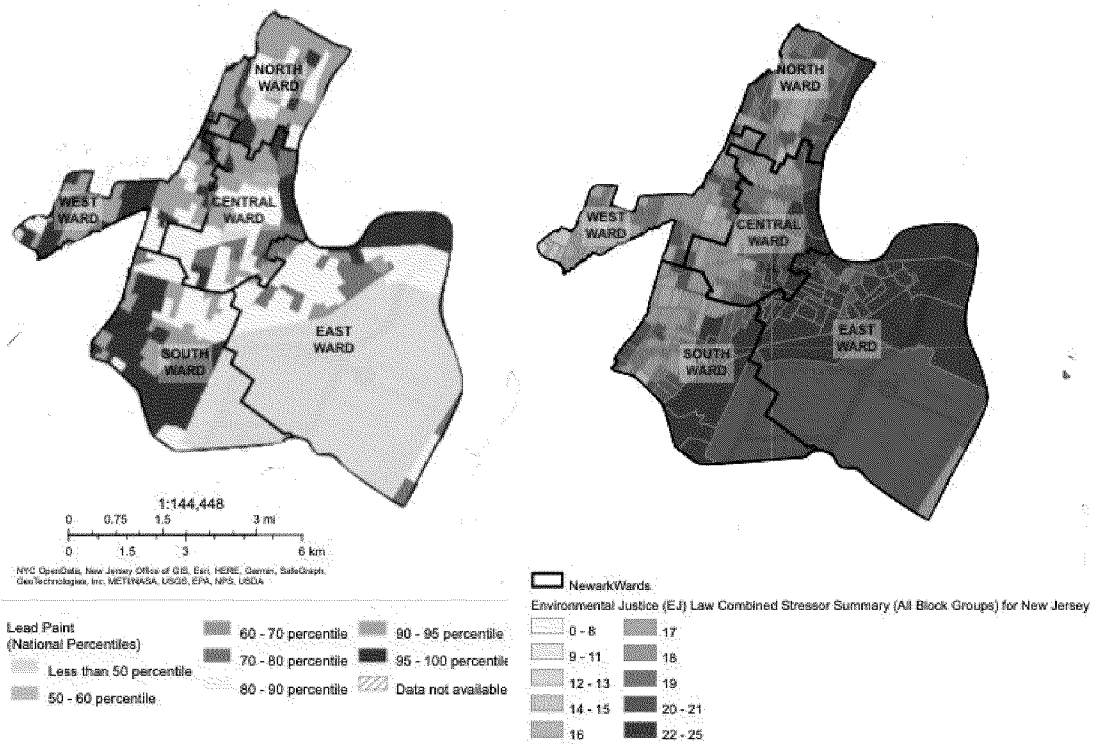

Figure 1: (Left) EPA'S EJSCREEN tool shows the burden of lead paint within each ward in Newark. (Right) New Jersey Department of Environmental Protection's map shows the Combined Stressor Total for each census block group under the New Jersey Environmental Justice Law.

The vast majority of the East (non-industrial portions), West, and South Wards of Newark are characterized by the State of New Jersey as "overburdened communities." Most of the non-industrial sections are considered "Low Income and Minority", some are labeled "Low Income, Minority, and Limited English," some are considered"Limited English," and one is labeled "Low Income." (See the legend below Figure 2 for more details.)

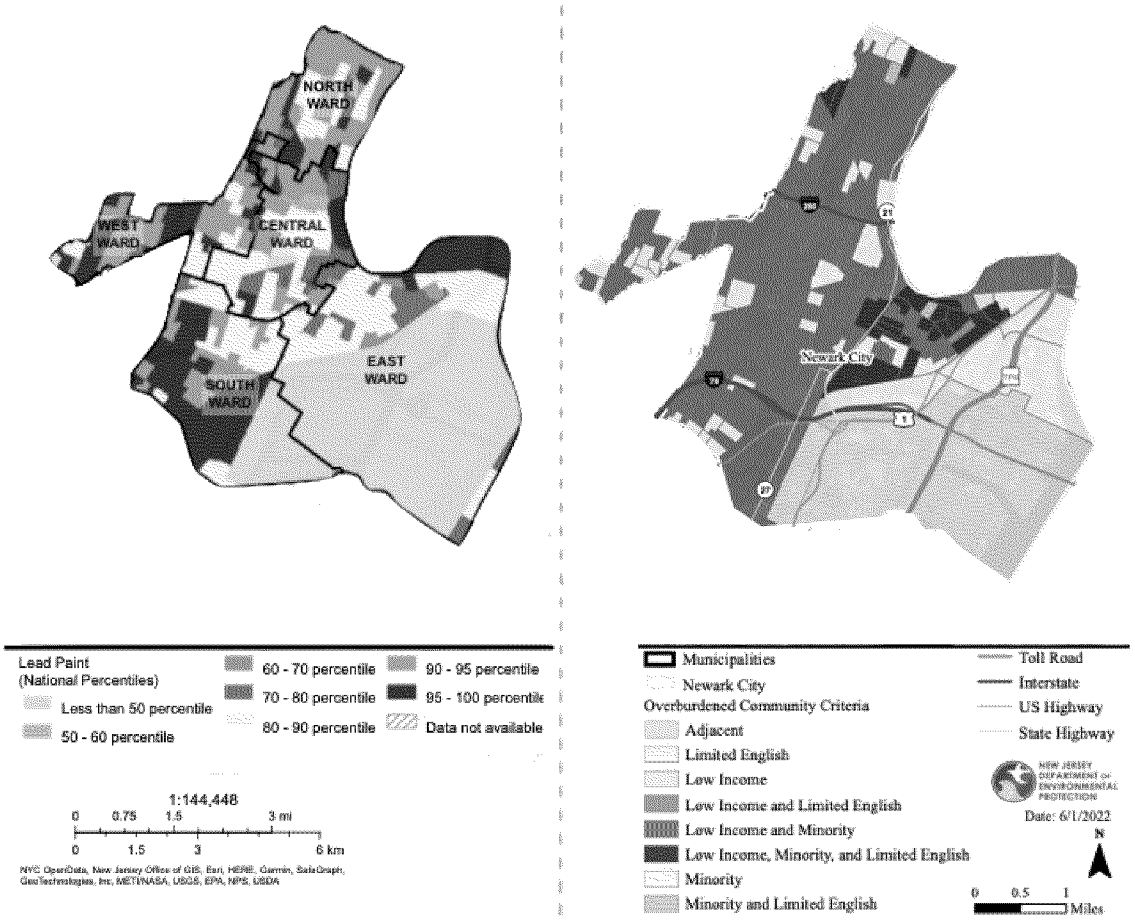

Figure 2: (Left) EJSCREEN Environmental Justice Index for the city of Newark showing the burden of lead paint in each ward in Newark. (Right) Adapted from the NJDEP Overburdened Communities (OBC) under the New Jersey Environmental Justice Law in Newark City in Essex County. An overburdened community is any census block group, as determined in accordance with the most recent United States Census, in which: (1) at least 35% of the households qualify as low-income households; (2) at least 40% of the community members identify as members of a minority or as members of a State-recognized tribal community; or (3) at least 40% of the households have limited English proficiency. Census block groups with zero population and located immediately adjacent to an OBC are labeled as "adjacent."

Local Environmental/Public Health Issue the Project Will Address

The environmental and public health issue that the Project Team will address is lead poisoning, since lead exposure is rooted in systemic structures of oppression. Lead is a toxic metal and even at low exposure levels, it can be harmful to human health when ingested, as lead accumulates in the body over time. Lead poisoning has been an issue for centuries, with exposure originating from lead pipes, lead-based paint, soil, and dust. Congress banned the use of lead pipes and lead-based paint in the 1970s and 1980s, but prior to that, the use of lead was prevalent, particularly in buildings constructed prior to the 1950s. There is a direct relationship between older housing and the prevalence of lead service lines (connecting water mains to homes), lead

internal plumbing, and lead-based paint. Since New Jersey's urban areas have a relatively high proportion of older housing in close proximity to historical industrial sources, these houses also have a high likelihood of containing lead in the soil. Therefore, children in New Jersey cities with older housing stock have consistently high rates of elevated blood lead levels (EBLLs).[1] A 2018 report, the New Jersey Lead Poisoning Prevention Action Plan,[2] found that community members of the City of Newark were disproportionately low-income and people of color compared with the rest of the state, and were more likely to live in a pre-1940 home and/or rental housing.

Newark is in the top 10 large municipalities in New Jersey with children age six and under showing elevated blood lead levels.[3] Though lead levels in the bloodstream may decrease after exposure, lead can stay in the bones of children and release later in life, affecting school performance, or could even cause pregnancy complications in adulthood.[4] Lead exposure may lead to a range of negative health outcomes, such as learning or behavioral problems including hyperactivity, developmental delays, and failure to reach age-appropriate milestones; damage to major organs; hearing and speech problems; and gastrointestinal distress.[5] School age children exposed to lead may experience emotional, behavioral, and learning difficulties that may result in poor performance in class or problems with their peers.

Local Environmental/Public Health Results Project Will Achieve and Benefits

The Project Team seeks to improve environmental and public health of East, West, and South Wards of Newark via a community-driven and community-supported dissemination, education, training, and sharing of lead-poisoning prevention and remediation strategies. Project Team member Newark Water Coalition and community members of East, West, and South Ward of Newark will benefit by building capacity for long term advocacy, support networks, control, and ownership of lead remediation strategies. Project Team member Newark Water Coalition will measure lead exposure in homes across multiple media sources (water, paint, soil, and dust) with a focus on marginalized and overburdened folks at the household level in East, West, and South Newark Wards. The community members are often recruited from the Newark Water Coalition's free food and water program or through word of mouth referral. Project Team member Newark Water Coalition will conduct these at a spatial resolution (household level) much finer than EJSCREEN or other existing datasets, and will provide insight into the pathways, exposure sources, and barriers faced by community members of the East, West, and South Newark Wards. Project Team member Newark Water Coalition will train community members in East, West, and

South Wards of Newark to become trusted qualified lead assessors. Project Team member New Jersey Future will provide training workshops in policy advocacy skills to community members in East, West, and South Wards to support city and state policy change that removes lead from the environment through remediation. Project Team member New Jersey Future will facilitate meaningful engagement between community members and city and state decision-makers via the Lead-Free NJ collaborative. Lead is a systemic burden which needs to be addressed through facilitating opportunities for the communities most affected to have decision-making power in moving forward.

The ultimate result of these efforts will be reduced lead poisoning of community members. Intermediate results include the following outcomes: fewer homes will contain lead; Newark in-home lead testing staff will include more community members; increased state and local funding, laws, enforcement, and programs for lead poisoning prevention and remediation; and more community members will advocate on environmental justice issues including lead at the city and state levels. Individuals and the community as a whole will benefit from having more healthy children and adults, free from the pernicious health and behavioral impacts of lead poisoning.

1.0 c. Organization's Historical Connection to Underserved Community

History of Connection With Community :
Project Team member New Jersey Future has partnered with local community organizations in Newark to tackle environmental issues for nearly a decade. New Jersey Future serves as a "backbone organization" for partnerships such as the Jersey Water Works collaborative working to transform water infrastructure, the Sewage-Free Streets and Rivers campaign working on combined sewer overflow challenges, and Lead-Free NJ (LFNJ), which launched in 2020. Newark community members are well-represented in each of these efforts as top-level leaders, partners, and active members. Lead-Free NJ, is an inclusive and equitable collaborative focused on removing lead from New Jersey's environment. New Jersey Future convenes Lead-Free NJ's 150 multi-sector partners and helps to ensure community voices center every aspect of the collaborative's operations, such as participating in collaborative decision-making, setting advocacy agendas, and ensuring elevation to leadership roles as committee chairs/co-chairs. Community voices and needs drive the agenda, with three community hubs , including Program Team member Newark Water Coalition playing a leadership role. Successes of this diverse collaborative include state policy wins leading to more funding for lead remediation and a new state law requiring lead paint inspection on certain residential rental properties, including upon tenant turnover.

Project Team member Newark Water Coalition is rooted in the communities of Newark with offices in the East, West, and South Wards of Newark. Its leadership and membership are all local community members, allowing the organization to directly serve the most vulnerable of these populations: low-income people, unhoused people, and non-English-speaking people. Over the last four years, a mix of community workshops, on topics including tenants rights and immigration support, workforce placement and development, and youth science, technology, engineering, and math (STEM) engagement programs, have been offered. Some of the programming also includes lead based workshops such as Lead 101, Community Science day on

lead testing, and even training on how to use an X-ray Fluorescence (XRF) gun to source lead in paint and soil. Since 2018, over 150,000 lbs of fresh produce and over 200,000 gallons of clean water has been distributed to community members in these wards and across the city through four community refrigerators and three food distribution centers. In 2022, Newark Water Coalition undertook a community-driven academic research project to test lead in over 300 homes across Newark. This research paper has recently been accepted for publication in a Special Issue (Liberation Science) of a peer-reviewed journal (*Environmental Justice)*. This city-wide project worked in collaboration with University of California, Berkeley to train community members to sample lead in homes and used a combination of field testing equipment (spectrophotometer for water, and XRF gun for soil and paint) and laboratory testing (ICP-MS for dust wipes). The study also surveyed community members to capture household lead exposure prevention behaviors and demographics. Reports were sent back to community members describing the lead concentrations within their homes. The study revealed lead-based paint in many homes built before 1978, as well as alarmingly high levels of lead in the soil.

d. EJCPS Model

The Project Team identifies two Environment Justice Collaborative Problem Solving Model (EJCPS) Elements to be most applicable for this project:

- *Element 2—Community Capacity Building and Leadership Development*
- *Element 4—Multi-stakeholder partnership and leveraging of resources*

EJCPS Element 2—Community Capacity-Building and Leadership Development

Project Team member Newark Water Coalition will build the capacity of communities in the East, West, and South Wards of Newark by educating community members about the problem of lead and involving them in formulating solutions and strategies. Additionally, they will conduct assessments on the scope of lead burden by testing homes and provide training to community members in these wards to become qualified lead assessors. As trusted, trained, qualified lead assessors, these local community leaders will help expand the reach within the community in addressing impacts of lead poisoning.

Project Team member New Jersey Future will expand community members' power and capacity through policy advocacy skills training and connections. Additionally, they will engage partners who have done similar work elsewhere, like the Green and Healthy Homes Initiative and effective New Jersey municipal practitioners, to present options for lead remediation and to support community members in generating their own policy advocacy priorities. The Lead-Free NJ collaborative will then facilitate opportunities for community members in the East, West, and South Wards of Newark to push for local city- and state-level policy changes with the relevant decision-makers.

Historically, the foundation and values of the Project Team member Newark Water Coalition are exemplified in EJCPS Element 2. One of the reasons that Newark Water Coalition has the trust it has in the community is that the organization is composed of community members that have gathered appropriate information and been educating themselves and their neighbors on lead since 2018. Project Team member New Jersey Future embodies the values of EJCPS Element 2

through extensive history of partnering with communities on the ground and centering community capacity-building needs through statewide initiatives such as Jersey Water Works collaborative, the Sewage-Free Streets and Rivers Campaign, and more recently, via the Lead-Free NJ collaborative.

EJCPS Element 4—Multi-Stakeholder Partnership and Leveraging of Resources

Project Team member New Jersey Future's extensive experience convening and leading large multi-stakeholder partnerships on environmental issues through the Jersey Water Works collaborative, the Sewage-Free Streets and Rivers Campaign, and Lead-Free NJ collaborative. Project Team's partnership will leverage Project Team member Newark Water Coalition's personal connections with community members across the city of Newark. The Newark Water Coalition also has extensive partnerships with other local community organizations across Newark.

Project Team member Newark Water Coalition will deepen and strengthen its partnerships through educating community members about lead, testing households for lead, and training community members to become qualified lead assessors. The opportunity to reach more community members through project activities will enable Project Team member Newark Water Coalition to expand its local partnerships around lead by engaging with new community-based organizations. It will strengthen existing partnerships with faith-based organizations such as St. Stephan's Church, which will host lead education workshops in Spanish and Portuguese to meet the needs of historically underserved, non-English-speaking communities.

Project Team member New Jersey Future will leverage their connection with Lead-Free NJ Collaborative's diverse multi-stakeholders to facilitate meaningful engagement between community members on East, West, and South Wards of Newark and city and state decision-makers on issues such as lead paint certificate law implementation, equitable funding for lead remediation, and reducing barriers to become lead assessors. Lead-Free NJ's 150 strong member network includes representation from academia, health, government, non-profits, lead remediation organizations, and community members. Project supporter and partner Green and Healthy Homes Initiative brings deep training and technical expertise in comprehensive lead assessor training, as well as knowledge and expertise in addressing lead issues nationally. Project supporter Environment and Occupational Health Sciences Institute at Rutgers University will lend expertise on scientific research, testing, and data to support the need for local and statewide holistic lead remediation.

Historically, Project Team member Newark Water Coalition's work on the ground drawing on experiences, relationships, and vision of their community and Project Team member New Jersey Future's extensive policy advocacy expertise, diverse state level networks, and work with LFNJ collaborative have been successful in facilitating state level and city policy change that supports lead remediation.

1.0 e.Project Linkages

Support of EPA Strategic Plan Goal 2

This project will support the EPA Strategic Plan Goal 2, Objective 2.1 (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels) through commitments to addressing the disproportionate impact of lead poisoning in East, West, and South Wards of Newark, New Jersey. Project Team member New Jersey Future and Project Team member Newark Water Coalition will through the project activities enable community members to develop solutions that improve health and equity. Project Team member Newark Water Coalition will interface directly with community members to expand its in-home lead testing and education program locally within East, West, and South Wards of Newark. Project Team member New Jersey Future will play the role of fiscal sponsor, equip local community members in these identified wards with policy advocacy skills and resources to engage with local decision-makers, and will integrate local resident priorities and efforts with the multi-stakeholder Lead-Free NJ collaborative's statewide policy work. Project Team members will together facilitate better health, equity, and community-led solutions in the environmental justice communities of East, West, and South Wards of Newark.

1.0 f. Partner and Collaborate

Quality and extent of collaboration

Project Team member New Jersey Future (primary applicant) and Project Team member Newark Water Coalition (sub-awardee) are the main partners for this project. Project Team member Newark Water Coalition represents a community-run and community-based organization, and will be the front-line agency responsible for programmatic expansion to address the public health issue of lead exposure and poisoning in the East, West, and South Wards of Newark. Project Team member Newark Water Coalition has established recruitment strategies, methods, and testing equipment for in-house lead testing, and has staff and structure in place to begin the lead risk assessor training. For the last four years, Project Team member Newark Water Coalition has distributed fresh food and clean water to community members establishing relationships with community-based organizations across Newark. Program Team member New Jersey Future is a statewide non-profit with a history of working with communities at the local level on multiple environmental issues through statewide multi-stakeholder initiatives such as Lead-Free NJ. Project Team member New Jersey Future serves as the "backbone organization" for Lead-Free NJ collaborative, an inclusive, equitable statewide effort to eliminate lead from New Jersey's environment in collaboration with community hubs such as Project Team member Newark Water Coalition. Lead-Free NJ's advocacy and policy committees, steering community meetings, and community meetings provide community stakeholders to engage on lead issues and find solutions to lead remediation. Project Team member New Jersey Future will play the role of a fiscal sponsor and utilize local efforts on lead remediation to expand city- and state-level policy advocacy work through Lead-Free NJ. Project Team member Newark Water Coalition and Project Team member New Jersey Future have a diverse support network spanning multi-stakeholder partnerships, government agencies, religious organizations, policy advocates, and private firms, who will all support the project (see letters of support for details).

Letters of Commitment

Partners supporting this project include the Newark Water Coalition, a project team member and sub-awardee as described above.

Lead-Free New Jersey Collaborative which is a statewide multi-sector partnership of 150 different organizations working towards the shared goals of eliminating lead from New Jersey's environment. Lead-Free New Jersey's mission and goals include holistic lead remediation, equitable policy change and empowered communities. The project objectives align with these goals and will enable integration of local priorities and efforts in statewide policy work on lead. Lead-Free NJ will facilitate meaningful engagement between community members of the East. West and South Wards of Newark and city and state decision-makers via meetings, provide opportunities for community members to submit and be part of Lead-Free NJ testimonials during budget and policy hearings on lead remediation, and integrate learnings to generate city- and state-level policy recommendations on lead remediation issues.

Green and Healthy Homes Initiative, a national organization working in multiple states on lead issues and with deep training and technical expertise in comprehensive lead assessor training. They will enable provision of deep technical expertise in lead assessor training for this project.

Environment and Occupational Health Sciences Institute, Rutgers University, an academic institution whose mission is to advance broad understanding of environmental health effects through graduate training programs, scientific research, testing, and data to support the need for policy change. They will provide scientific expertise and support to this project from utilizing their significant expertise of analysis of lead and working on community-based research projects.

St. Stephan's Church and its pastor has been a pillar in Newark's East Ward on Ferry street for the last 25 years. The Newark Water Coalition has partnered with St. Stephan's Church to host programming around lead and healthy access to food and clean water. The attendance at our weekly distribution ranges from 100 to 175 community members, reaching 1,000 household members. This community is predominantly Spanish-speaking and primarily made up of immigrants. These community members also use the church as a source of information and education. St. Stephan's is able to leverage its standing in the community to provide resources to many people who traditionally are not served because of language barriers.

2.0 Project Activities / Milestone Schedule / Detailed
2.0 a Project Activity:
Activity 1: Expand Newark Water Coalition's in-home lead testing and lead risk assessor training program locally within East, West, and South Wards of Newark. The Newark water coalition seeks to build on the mobile lead testing unit project launched in the second half of 2022. The organization plans on using previous recruitment efforts such as stipends and referral bonuses to test more homes and community members.

Activity 2: Project Team member New Jersey Future to conduct local policy advocacy skills training workshops and facilitate meaningful engagement via Lead-Free NJ Collaborative between community members in East, West, and South Wards of Newark and city and state decision-makers on lead remediation issues. These issues include concerns around the implementation of lead paint certificate law and reducing barriers of entry to become qualified lead assessors.

Anticipated Activity Results:

Activity 1:
- 50 low-income, marginalized community households in East, West, and South Wards receive in-home environmental (water, paint, soil, and dust) lead testing, as well as receive community-led education on healthy living and lead prevention.
- 25% of participants will attend community workshops.
- 30 community members in East, West, and South Wards of Newark will be trained and certified lead risk assessors.

Activity 2:
- Four policy advocacy skills training workshops in East, West, and South Wards
- Eight engagements via Lead-Free NJ between community members of East, West, and South Wards of Newark and city and state decision-makers

Outputs:
Activity 1:
- 300 household specific data on lead soil concentrations.
- Conduct eight home lead testing workshops and events in Q1,Q3,Q5 & Q7
- Conduct 10 lead awareness and knowledge building workshops in Q1,Q3,Q5 & Q7
- Conduct 10 training sessions for lead risk assessor training skills in Q2, Q4,Q6 & Q8.
- Create and provide four community policy advocacy skill training workshops in Q1,Q2, Q5&Q6.

Activity 2:
- Facilitate eight engagements between community members and city and state decision-makers to inform lead remediation issues in Q3, Q4, Q7 & Q8
- Provide eight opportunities for elevating local lead remediation perspectives via statewide LFNJ meetings (including but not limited to steering committee, advocacy, membership) and Lead-Free NJ budget and policy testimonies in Q3&Q7

Short Term Outcomes:
Activity 1:
- Community members of East, West, and South Newark Wards become knowledgeable about lead poisoning causes and protective steps.

Activity 2:
- Community members will engage with decision-makers via Lead-Free NJ on lead issues such as lead paint certificate law implementation, equitable funding, and workforce opportunities to become lead assessors.
- Local and state decision-makers prioritize increase in equitable funding.

Long Term Outcomes:
Community members in East, West, and South Wards of Newark are empowered with knowledge, skills, and network connections needed to engage effectively in local and state decision-making processes on lead issues. Fewer homes in East, West, and South Wards of Newark show lead. Equitable policies on lead remediation at a city- and state-level.

2.0 b. Milestone Schedule

Activity	Year 1				Year 2			
	Q1 11/23 - 1/24	**Q2** 2/24 - 4/24	**Q3** 4/24 - 7/24	**Q4** 8/24 - 10/24	**Q5** 11/24 - 1/25	**Q6** 2/25 - 4/25	**Q7** 5/25 - 7/25	**Q8** 8/25 - 10/25
Grant executed								
Recruitment for lead assessor training								
Lead awareness and knowledge building workshops								
Training for lead assessor skills								
Home visits to assess lead risk								
Policy Advocacy Workshop skills training part 1: basic skills on understanding of the city and state policy process, lead laws, and identification of political decision-makers								
Policy Advocacy Workshop skills training part 2: support identification of city-level policy barriers on lead issues								
Community policy action meetings between statewide policy collaborative Lead-Free NJ Steering Committee and Advocacy members, city and state decision-makers, and community members								
Community members of East, West, and South Wards of Newark participate in statewide policy collaborative Lead-Free NJ testimony at Lead Remediation policy and budget hearings								
Statewide policy collaborative Lead-Free NJ integrates resident priorities into its advocacy goals and provides city- and state-level policy recommendations to aid lead paint certificate law implementation and reduce barriers of entry to become qualified lead assessors								

2.0 c. Itemized Budget Sheet/Budget Narrative—Attached Budget Sheet
The grant budget will be fiscally managed by Project Team member New Jersey Future. Project Team member New Jersey Future uses the accrual basis of accounting in accordance with U.S. generally accepted accounting principles. The total budget for this grant is $500,000 over a two year period, including a two-year, $300,000 subaward to Project Team member Newark Water Coalition for their frontline community engagement. For detailed narrative, see attachment (SF-474A).

3.0 Environmental Results—Outputs, Outcomes, and Performance Measures (Logic Model)

3.0 a. Environmental Results (Logic Model)

The project will achieve the following long term outcomes: community members in East, West, and South Wards of Newark empowered with knowledge, skills, and network connections needed to engage effectively in local and state decision-making processes on lead issues; fewer homes in East, West, and South Wards of Newark containing lead; and equitable policies on lead remediation at city- and state-level. See logic model **attached**

3.0 b. Performance Measurement Plan
The overall performance measurement plan for this project will involve Project Team member New Jersey Future in collaboration with Project Team member Newark Water Coalition to liaison regularly via monthly project calls to monitor and track progress and performance towards project outcomes. The logic model will be utilized to monitor progress, project performance, and serve as a continuous quality improvement tool to make adjustments if needed based on emerging situations. Each outcome will be tracked and assessed in detail as follows:

1. **Output-Conduct eight home lead testing workshops and events.**
    - Attendance will be tracked at the workshop via a survey conducted before and after the workshop/event. After the first workshop, a meeting will be held to determine if the recruitment strategies need to be adjusted, workshop materials need to be changed, and if desired goals of the workshop were met. Each workshop will be iterated accordingly with the goal of increasing participation and understanding of materials. Timeline:**(**Q1,Q3,Q5 & Q7)
2. **Output-Conduct 10 lead awareness and knowledge-building workshops**
    - Attendance will be monitored at each workshop. An incoming and exit survey will be conducted to track attendance, gauge baseline understanding of lead awareness and knowledge, and understand how effective the recruitment strategies were. Recruitment, advertising, and the content of the workshops will be iterated by the program staff after every workshop to expand recruitment strategies and change curriculum. Timeline:**(** Q1,Q3,Q5, Q7)
3. **Output-Conduct 10 training sessions for lead risk assessor training skills**
    - The retention rate of trainees (the number of lead risk assessors who sign up for the course and complete the course) will be monitored by three evaluation surveys. The evaluation survey will also ask questions about accessibility through teaching style, course materials, course examinations, and barriers faced by

ED_016126_00000969-00014

trainees. After each evaluation survey is administered, the course instructors will incorporate feedback into the curriculum. Each of the 10 training sessions will provide an opportunity for instructors to improve the course curriculum to increase retention and accessibility.Timeline:(Q2,4,6 &8).

4. **Output—Create and provide four community policy advocacy skill training workshops in** Q1, Q2,Q5&Q6
    - Recruitment for this will leverage activities such as lead testing workshops and knowledge building workshops and other service programs that Project Team member Newark Water Coalition offers community members. After each workshop, a feedback questionnaire via Google Forms will allow the Project Team to gather feedback on what community members learned and will utilize information to adjust and improve the policy advocacy skills training workshop to increase accessibility and retention. Retention rate for those completing the workshop (number who sign up for the workshop and complete) will be monitored by two evaluation surveys.
5. **Output—Facilitate eight engagements between community members and city/state decision-makers to inform lead remediation issues in** Q2, Q4,Q6 & Q8
    - Community members who have gone through the policy advocacy skills training workshops will be asked to attend these engagements with city/state decision-makers. Community members will be involved in planning and structuring the engagement session. A feedback questionnaire will be utilized to gather perspectives of community members on how the engagement session went and areas for improvement for the next session. The Project Team will keep track of how identified resident policy priorities at city- and state-level progress over the course of two years.
6. **Output—Provide eight opportunities for elevating local lead remediation perspectives via statewide LFNJ meetings (including but not limited to: Steering Committee, Advocacy Coordinating Committee, membership meetings) and Lead-Free NJ budget and policy testimonies in** Q4 &Q8
    - The community members who participate in the policy advocacy skills training or are part of the workshop and events on lead awareness will be invited to participate in LFNJ meetings. Community members who take advantage of this opportunity will be contacted afterwards to gather feedback on areas for improvement that can inform how the Project Team structures future opportunities.

3.0 c. Sustainability Plan and Community Vision

This project and the partnership approach to project activities enables long-term sustainability as it aligns with community goals and will be rooted in the community it benefits. Over the last four years, Project Team member Newark Water Coalition has grown from a grassroots organization centered around the lead in drinking water crisis in Newark, as well as meeting multiple basic needs of the community including distributing healthy fresh food, workforce development programs, legal support for tenants and immigrants, and youth education workshops. The Newark Water Coalition recognizes lead exposure is rooted in systemic structures of oppression and that water is not the only form of lead poisoning. Last year, the Newark Water Coalition embarked on a city-wide holistic lead testing research project alongside the University of

California, Berkeley. Through the research project (June 2022 to November 2022), the Newark Water Coalition measured lead in 315 homes in Newark, surveyed community members about health and demographics, and held a community data sharing session. The findings of the study are under review for a peer-reviewed academic publication, and the results—along with two short films on the findings and process—will be presented back to local and statewide advocacy groups, government agencies, and other community-based organizations. Project Team members aim to always share their work, best practices, and insights with other communities leveraging their partnerships and networks both at local- and state-level. The funding to increase the services and expand the testing program, not only in the quantity of homes but also by purchasing the equipment to expand their data sets in houses without the need to rely on others and institutions. One of the biggest challenges prior to getting their XRF gun was outsourcing the work to labs and costs reaching upwards of $16,000 in order to get the data that the Newark Water Coalition needed to report back to the community. Purchasing an ICP-MS machine allows the organization to continue to process samples and provide our community with verified data. At the same time, the organization would be able to take on more projects and help other communities with their research projects.

4.0 Programmatic Capability

4.0.a Organizational Experience

Project Team member New Jersey Future is a statewide nonprofit that has extensive experience partnering with community organizations in Newark on environmental issues for nearly a decade, including through the Jersey Water Works collaborative, the Sewage-Free Streets and Rivers campaign, and most recently Lead-Free NJ, which launched in 2020. Project Team member New Jersey Future serves as the " backbone organization" for Lead-Free NJ collaborative, an inclusive, equitable statewide effort to eliminate lead from New Jersey's environment in collaboration with community hubs such as Project Team member Newark Water Coalition. Project Team member Newark Water Coalition is a frontline grassroots community-based organization centered on meeting the basic needs of the community, which has been working on lead issues since 2018. The organization has expanded from just educating community members to doing research and collecting data using tools such as XRF guns and ICP-MS with university partners. Project Team member Newark Water Coalition has successfully executed various projects related to lead in the East, West, and South Wards of New Jersey. including those related to being a community hub for the statewide policy network Lead-Free NJ Collaborative, and this project only builds off of these previous achievements.

4.0.b. Staff Experience/Qualifications of Project Manager (PM)

Project Team member New Jersey Future program staff includes Jyoti Venketraman, director of Collaborations and Organizational Equity with the primary responsibility for overseeing the Lead-Free NJ collaborative. She has experience in program management, program evaluation, policy research, public health, and holds a Master's degree in Public Administration. Program staff Heather Sorge, LFNJ's program manager oversees day to day operations for the LFNJ Collaborative. She has over 10 years of leadership, advocacy, community organizing experience, and a degree in accounting finance. Program staff members Sabrina Rodriguez-Vicenty and Deandrah Cameron will provide advocacy and policy expertise that will support this project's

expansion of city and statewide lead policy work, and Director of Finance and Administration Ron Dukes will provide fiscal and reporting oversight.

Project Team member Newark Water Coalition program staff includes Anthony Diaz, the Executive Director of Newark Water Coalition, who has primary responsibility for overseeing all programmatic activities. The Newark Water Coalition has program staff in place with experience running a grassroots organization, three offices, multiple food and water distribution sites across Newark, and recently, a community-driven academic research project (see their Letter of Support for details about the organizations' structure and experience). Program staff Ravin Ramsaran, office manager, mainly manages and oversees the activities of the office including planning and hosting public events, facilitating projects, or distributing water. Ramsaran has experience in canvassing, leadership, event planning, community organizing and risk assessment for lead. He is currently completing his degree in biomedical engineering. Ramsaran would move into the program manager role if awarded this grant.Program staff Aoi Morel, director of Finance and Operations implements policies and procedures to ensure Newark community members receive clean, safe, lead-free water. She also oversees budgeting and financial compliance with NWC's fiscal sponsor. She brings knowledge of urban water issues, a B.S. in Finance, a passion for addressing these problems, and professional background to make a difference locally.. Program staff Bavisha Kalyan, grants coordinator, co-coordinated the 2022 NWC Mobile Lead Testing Unit as a part of her dissertation work at University of California, Berkeley. She has experience running multi-stakeholder projects in low resource settings. Kalyan completed her Bachelors and Master's degrees in civil and environmental engineering, and is currently completing her doctoral degree with a focus on conducting community-driven research when remediating urban infrastructure systems. Program staff Walter Diaz, director of Training, has five years of occupational health and safety training experience. His career has been focused on advocacy, community engagement, and organizing. Diaz will support the training and expansion of the NWC lead testing and training program.

4.0.c. Expenditure of Awarded Grant Funds, and plan for compliance with EPA's Pre-award Compliance Review for Nonprofit Organizations

Project Team member New Jersey Future as a primary applicant has a strong history of managing millions of dollars of grant funds effectively, and efficiently meeting its financial, operational, and compliance requirements. Such financial, operational, and compliance functions are led by the Director of Finance and Administration, Ronald Dukes. He is a certified public accountant (CPA) and certified information systems auditor (CISA) who brings over ten years of experience (including Big Four audit firm experience) working with Fortune 500 and not-for-profit organizations on designing and implementing effective and efficient internal controls, policies, and procedures. Project Team member New Jersey Future, with the director of Finance and Administration's leadership in these functions, is confident that the organization has the adequate financial controls systems, and procedures in place to comply with EPAs' Pre-Award Compliance Review for Nonprofit Organizations. Project Team member New Jersey Future is able to demonstrate this preparedness, upon request, by submitting EPA's Administrative Capability Questionnaire.

5.0 Past Performance

Project Team member New Jersey Future (NJF), the primary applicant and fiscal sponsor, has worked with several funders including the following:

Robert Wood Johnson Foundation

- Grant term: 8/1/2020–7/31/2022 ($270,000/yr): This funding supported the creation and implementation of the Lead-Free NJ program and collaborative with the outputs and outcomes successfully completed and reported in required narrative and/or financial reports submitted by deadlines in September 2021 and September 2022.
- Grant term: 11/01/2022–10/31/2023 ($730,000/yr): This funding supports multiple programs integrated to change policy, practice, and financing to improve New Jersey's water infrastructure, holistic lead remediation and community health. That work is progressing on target with monthly update calls held with the funder. The first formal progress report due to the funder is in December 2023.

The Geraldine R. Dodge Foundation

- Grant terms: 4/18/2018–3/31/2025 ($300,000-$334,000/yr): Annual grants renewed each year to support the Jersey Water Works program and collaborative with a focus on transforming New Jersey's aging water infrastructure. Current grant is multi-year and extends into March 2025. Work progressed through each grant term on target with formal narrative reports provided on time at the end of each grant period.

The Henry and Marilyn Taub Foundation

- Grant terms: 1/1/2017–12/31/2024 ($90,000/yr): Two-year grants which have renewed consistently funding the Creating Places to Age program. Work progressed, including outputs and outcomes, on target for each grant period including planning and implementation guides for municipalities. Both mid-project and final reports have been submitted on time to the funder.

The Kresge Foundation

- Grant terms: 7/1/2019–6/30/2024 ($150,000/yr): Three grants from this funder have been received during this period. The first was a two-year grant, the second was one-year and the current grant is two years. This funding supports the Sewage-Free Streets and Rivers program and campaign that is focused on addressing combined sewer overflow issues in select New Jersey municipalities. Work has progressed on target for each grant with outputs and outcomes attained. All mid-project and final reports were supported on time to the funder.

William Penn Foundation

- Grant terms: 7/1/2017–7/31/2024 ($290,000–$385,000/yr): The funding from this funder supports the ongoing programmatic work in mainstreaming green infrastructure as a critical tool for addressing water quality and flooding issues. These have been multi-year grants (two to three year terms). All outputs and outcomes have been achieved including two websites created providing technical information for municipalities and developers respectively and a printed implementation guide for developers. All interim and final reports have been submitted to the funder on time.

6.0 Quality Assurance Project Plan (QAPP) Information (If applicable)

The project will need a QAPP.

CONFIRMATION: Registration Submitted for NEW JERSEY FUTURE, INC. / EQVJPH4BTLN3 in the U.S. Government's System for Award Management (SAM)

1 message

donotreply@sam.gov <donotreply@sam.gov> Tue, Mar 7, 2023 at 4:57 PM
To: rdukes@njfuture.org

This email was sent by an automated administrator. Please do not reply to this message.

Dear Ronald Dukes,

You successfully submitted the entity registration for NEW JERSEY FUTURE, INC. / EQVJPH4BTLN3 in the U.S. federal government's System for Award Management (SAM). This registration record will remain in Submitted status until all external validations are complete.

What happens next?

1. If you provided a Taxpayer Identification Number (TIN), the Internal Revenue Service (IRS) will conduct a validation of your TIN and Taxpayer Name. This step can take two business days. You will get an email from SAM.gov when that review is complete.

2. Your registration will then be sent to the Defense Logistics Agency (DLA) Commercial and Government Entity (CAGE) Code system for assignment or validation of your CAGE Code. This step averages two business days, but the DLA CAGE team can take up to ten business days, or longer, in peak periods. You will get an email from SAM.gov when that review is complete.

3. If the DLA CAGE team has any questions, they will contact the individual you listed as the Government Business Point of Contact (POC) via email. The email will come from a dla.mil address. Please tell your Government Business POC to respond right away to any requests from a dla.mil email. If a timely response is not received, your registration will be returned to SAM and your registration status changed to Work in Progress. You will have to resubmit and provide the requested information to DLA CAGE to continue.

4. You will get an email from SAM.gov when your registration passes these external validations and becomes Active. Until then, use the Check Registration Status link at SAM.gov to see where your registration is in the review process.

5. If you have not previously submitted a notarized letter formally designating the Entity Administrator for your entity, you must do so now. Failure to do so within 60 days of activation may result in the registration no longer being active. NOTE: You are not required to provide a notarized letter for a federal entity registration.

Remember, this process is entirely FREE to you. It is FREE to register and maintain your registration in SAM. It is FREE to get help with your registration from the Federal Service Desk at www.fsd.gov or by telephone at Ex. 6 - Personal Privacy (PP) (toll free) or Ex. 6 - Personal Privacy (PP) (internationally).

In addition, if you are located in the U.S. and its outlying areas, you can get FREE support from your local Procurement Technical Assistance Center (PTAC), an official resource for government contracting assistance. Go to http://www.aptac-us.org/ to find your closest PTAC.

Thank you,
The System for Award Management (SAM) Administrator

This email was sent by an automated administrator. Please do not reply to this message.

Dear Ronald Dukes,

Your entity registration in the U.S. federal government's System for Award Management (SAM) passed the Internal Revenue Service (IRS) validation of your Taxpayer Identification Number (TIN) and Taxpayer Name, known as the IRS TIN Match process.

This is one step in the overall registration process. If you have not already done so, you must complete and submit your registration. It will then be sent to the Defense Logistics Agency (DLA) Commercial and Government Entity (CAGE) Code system for assignment or validation of your CAGE Code.

You can check your registration status at any time. Go to the SAM homepage at https://www.sam.gov and select Entity Registration, then Check Status. Enter your Unique Entity ID or CAGE Code to quickly check your progress. If your status is not Submitted, you need to complete and submit your registration.

1. Go to the SAM website at https://www.sam.gov and log in
2. In your Workspace, select the Entity Management link
3. On the next page, locate or search for the Work in Progress entity you need to submit. Note that the registration status is displayed.
4. Select the Action icon to the right that has three vertical dots
5. Select Update and complete the registration. Review every page in the registration to submit. Start at the beginning, review, or update the content as required, and select Save and Continue on each page. At the end, be sure to select Submit. You will see a confirmation message when you successfully submit your registration.

Remember, this process is entirely FREE to you. It is FREE to register in SAM. It is FREE to get help with your registration from our supporting Federal Service Desk at www.fsd.gov or by telephone at Ex. 6 - Personal Privacy (PP) (toll free) or Ex. 6 Personal Privacy (PP) (internationally).

In addition, if you are located in the U.S. and its outlying areas, you can get FREE support from your local Procurement Technical Assistance Center (PTAC), an official resource for government contracting assistance. Go to http://www.aptac-us.org/ to find your closest PTAC.

Thank you,
The System for Award Management (SAM) Administrator

Cc: Ex. 6 - Personal Privacy (PP)

DISCLAIMER: CAGE email letters are auto-generated every time your registration is sent from SAM to our system. Previous responses are not stored in our system until the registration is accepted for final processing. Please answer each of the questions below. Failure to do so will delay your registration process.

PLEASE RESPOND TO THIS EMAIL WITH THE REQUESTED INFORMATION WITHIN 3 BUSINESS DAYS AND RETAIN THE SUBJECT LINE FOR TRACKING PURPOSES WITH UEI EQVJPH4BTLN3

PETER KASABACH,

Your System for Award Management (SAM) registration was forwarded to the CAGE code office for the purpose of assigning a new CAGE code or renewing an existing CAGE code with updated information. We have identified a discrepancy that must be addressed and verified before the request can be processed.

SECRETARY OF STATE DOCUMENTS NEEDED

The information CAGE received from SAM for your legal business name is: NEW JERSEY FUTURE, INC. located at 16 W. LAFAYETTE STREET, TRENTON, NJ 08608

RECEIPT OF CURRENT DATED LEGAL BUSINESS NAME DOCUMENTATION REQUIRED

In order for CAGE to process your registration you must provide the following legal documentation and answer the listed questions below when you reply back to our office:

• We are unable to determine the status of your legal business name from the Secretary of State (SOS) where you indicate your business is physically located according to the address accepted within SAM. Please provide either a current statement of good standing, current Articles of Organization/Incorporation dated within the last 12 months, or a screen shot of the status obtained from the SOS. If your company is incorporated within another state, then please provide the current legal business name documentation from that state that shows your company status is active and/or in good standing.

Please provide a response within 3 business days by replying to this email and CC-ing Ex. 6 - Personal Privacy (PP) If no response is received your vendor registration will be returned to SAM and your registration will not be processed.

Thank you,

Commercial and Government Entity (CAGE)
Enterprise Sourcing, Medical, Contingency (ACH)
Defense Logistics Agency (DLA)

Hello Peter,

Thank you for your reply.

CAGE code Ex. 6 Personal Privacy (PP) is currently assigned with UEI G392UN6PHTY8 in the CAGE system. The vendor must take the required action in SAM to deactivate the discontinued or erroneous UEI, as well as ensure that SAM has removed the UEI from the duplicate CAGE.

Instructions to deactivate a UEI are provided at https://www.fsd.gov. Go to the Home menu and input the following article number underneath the Search Knowledge Base: KB0016402

If your SAM user account is not linked to the UEI registration that needs deactivated, please go to the next paragraph to read how to get access to that UEI to complete this process or contact the Federal Service Desk at Ex. 6 - Personal Privacy (PP) for further assistance.

Instructions on how to become a new administrator are provided at https://www.fsd.gov. Go to the Home menu and input the following article number underneath the Search Knowledge Base: KB0016652

The letter must be notarized, scanned and attached to an open service ticket submitted to the Federal Service Desk (www.fsd.gov). The new Entity Administrator must have an individual SAM User Account created with the e-mail address provided in the notarized letter.

Thank you,

Kylee Shuckerow

To: Peter Kasabach <pkasabach@njfuture.org>

Hello Peter,

The reason you need to follow the below steps is because CAGE only allows one CAGE code to exist per entity. Per your confirmation, there is already an existing CAGE code in the system for your registration. Instead of updating the address on your previously established CAGE code in SAM, you have created a whole new registration/CAGE code. I can combine the two into one for you, which is what will need to be done so that moving forward you only have one code, however I need you to complete the below steps first before I have access to doing so.

An official website of the United States government
Here's how you know

duplicate uei

6d ago • Additional comments

Greetings,

The UEI that you have listed as the duplicate, is in inactive status.
An inactive UEI cannot be removed by tier 2. If you need to do away with this UEI you will need to deactivate that.
You must be the administrator to deactivate a UEI and I can see that there is no administrator for that UEI.
With that being said, you will need to submit a notarized letter to the helpdesk so that they can assign you the role of administrator and then you will need to deactivate that UEI.
Below are the steps for both.

Letter:

SAM.gov requires a notarized letter to give access to Entity Administrators on existing registrations where there is no existing administrator to approve your role request. Letters must be submitted to the Federal Service Desk (FSD.gov). Your notarized letter needs to:

Be on one of the templates provided below
Be on your company/organization letterhead, and be signed by your company President, CEO, or other authorized signature authority
Contain your company/organization Unique Entity ID
Contain the new Entity Administrator's name, phone number, and email address and match exactly how its displayed on your sam.gov individual account
Provide a justification for the change
Note: Letters omitting either third-party authorization or denial will be considered unacceptable.

Live Chat

Notarized Letter Templates

The following notarized letter templates are available to assist with creating your notarized letter:

Template 1 - Single Entity
A single, domestic entity located in the U.S. or its outlying areas, or a single, domestic entity located in the U.S. or its outlying areas, or a single, international entity that uses banking information from a U.S. financial institution in their SAM entity registration.
Template 2 - Multiple Domestic Entities
Multiple, domestic entities located in the U.S. or its outlying areas, or multiple, international entities that use banking information from U.S. financial institutions in their SAM entity registrations
Template 3 - International Entity (No US Banking Info)
A single international entity only if your entity does not use banking information from a U.S. financial institution in your SAM entity registration.

Steps to Complete Notarized Letter Process

Complete the appropriate template. Fill in the blanks. Enter the highlighted information on the next two pages.
Print the letter on your entity's letterhead. If you don't have letterhead, enter your entity's legal business name and physical address at the top of the letter before printing.
Sign the completed letter in the presence of the notary. Make sure the person who signs the letter is someone with signatory authority, i.e. who can make commitments on behalf of the entity like an executive, officer, partner, or other authorized signatory. The notary will confirm the signatory's identity in accordance with your state's notary procedures.
Send the completed, signed, notarized letter. (Follow steps under "How to Submit a Notarized Letter to Federal Service Desk" heading below)

How to Submit a Notarized Letter to Federal Service Desk

The letter must be notarized, scanned, and submitted to the Federal Service Desk (FSD.gov).

Note: The new Entity Administrator must have an individual SAM.gov user account created with the e-mail address provided in the notarized letter for the FSD to process your request.

Follow the steps below to submit the scanned notarized letter to FSD.gov:

Sign in to FSD.gov

Scroll to the bottom of the page and select "Create an Incident".
Select System for Award Management (SAM) in the "System Name" field.
Select SAM: Notarized Letter in the "Issue Type" field.
Fill out all remaining fields.
Select the "Paperclip" icon (attachments button) and attach your scanned notarized letter.
Once you have filled out all required information and attached your notarized letter, click "Submit".

You can access this knowledge article, with the templates included, if you login to FSD.gov using your SAM credentials. Simply copy and paste KB0016652 into the search bar on the home screen.

To deactivate your entity registration:

Sign in to SAM.gov.
Select the "Workspace" tab.
Navigate to the "Entities" widget and select the number above the "Active" bubble to open up a list of your active entity registrations.
Locate the entity registration that you wish to deactivate from the list, and select the three dots (the "Actions" menu).
Select "Deactivate."
On the "Confirm Deactivation" page, select "Yes" for the confirmation question. When you deactivate a registration:
It is no longer searchable in SAM.gov.
All users lose their roles with that entity.
The CAGE code will be available for reuse with a new Unique Entity ID the next business day.
To reactivate your entity, you will need to register your entity as a new registration.
Once you have confirmed that you would like to deactivate the registration, select "Submit." The deactivation is now complete.

Thank you,
Nicole

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: New York City and Lower Hudson Valley Clean Communities, Inc

Address: 55 Water Street, 6th Floor

City: New York

State: NY: New York Zip Code: 10041

B. Unique Entity Identifier (UEI): G4UMDMCD2DM4

C. Applicant/Recipient Point of Contact

Name: Joy Gardner

Phone: Ex. 6 - Personal Privacy (PP)

Email: joy@empirecleancities.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None.

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Not applicable.

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Not applicable.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Joy Gardner	Executive Director	04/13/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

A. Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Civil Rights Grievance Procedure

This Grievance Procedure is established to meet the requirements of the Civil Rights requirement under 40 CFR 5.140 and 7.95. It may be used by anyone who wishes to file a complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability in the provision of services, activities, programs, or benefits by New Jersey Future, Inc. New Jersey Future's Employee Handbook governs employment-related complaints of discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem, as included on the electronically available form. Alternative means of filing complaints or receiving the grievance procedure in an alternative format, such as, large print, braille, personal interviews or a tape recording of the complaint will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or his/her designee as soon as possible, but no later than 60 calendar days after the alleged violation to:

Ronald Dukes
Director of Finance and Administration
New Jersey Future, Inc.
16 W Lafayette Street
Trenton, NJ 08608

Within 15 calendar days after receipt of the complaint, the Director of Finance and Administration or their designee will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, they will respond in writing, and where appropriate, in format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of New Jersey Future, Inc. and offer options for substantive resolution of the complaint.

If the response by the Director of Finance and Administration or their designee does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to New Jersey Future Inc.'s Executive Director or their designee.

Within 30 calendar days after receipt of the appeal, the Executive Director or their designee will discuss the complaint and possible resolutions. Within 15 calendar days after the discussion, the Executive Director or their designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by the Director of Finance and Administration or their designee, appeals to the Executive Director or their designee, and responses from these two offices will be retained by New Jersey Future, Inc. for at least three years.

Approval expires 06/30/2024

Appendix A

EPA Administrative Capability Questionnaire

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 4 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

The Environmental Protection Agency (EPA) uses the standards set forth in the Code of Federal Regulations, Title 2, Parts 200 and 1500, "Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards" to assess the adequacy of administrative management systems. These regulations can be found by searching the Electronic Code of Federal Regulations by Title and Part at: http://www.ecfr.gov/.

If your organization is being recommended for an EPA grant, and your organizational policies and procedures do not fully cover the areas outlined in the questionnaire, revised or new policies may be necessary to comply with Federal financial management standards.

PART I - GENERAL

1.	**Legal Name of the Organization**	New Jersey Future, Inc.
2.	**Other Organizational Names or Acronyms Used**	NJF
2a	**Please Identify any affiliated organizations**	None
3.	**Unique Entity Identifier Number**	EQVJPH4BTLN3
4.	**Is your accounting system accrual based or cash based?**	Accrual
5.	**Is your accounting system manual, automated or combination?**	Combination
6.	**Has an audit been performed on the organization's financial statement?**	Yes
7.	**What was the audit opinion?**	Unmodified
8.	**If the organization has expended more than $750,000 in federal grant funds within a year, has an Single audit been performed?**	Not applicable. No federal grant funds have been expended in excess of $750,000.
9.	**If yes, were there any major findings?**	Not applicable
10.	**Does the organization have an approved indirect cost rate with the Federal government?**	No, we are in the process of preparing an indirect rate proposal.
11.	**Has the organization filed any certification/questionnaire regarding its financial managements systems to other Federal agencies? If yes, please list and provide a copy.**	No, this is the first federal grant to which we are applying.

PART II - ADMINISTRATIVE CAPABILITY

	Instructions: Check the appropriate box to the right for each item. If your organization has written policies/procedures that meet the requirement, check the box under the "Yes"column. If your organization does not have written policies/procedures that meet the requirement described under this column, check (/) the box under the "No" column and explain in the box or in an attachment. Please provide EPA a copy (electronic is preferable) of the following items: 1) Most recent audit of financial statements and management letter, 2) procurement and property policies, 3) personnel policies and 4) travel policy. EPA will evaluate your responses against these items.	**Yes**	**No (explain)**
STANDARDS FOR FINANCIAL MANAGEMENT SYSTEMS			
1.	Does your accounting and financial management system(s) follow Generally Accepted Accounting Principles? (2 CFR 200.403)	/	
2.	Is your financial management system(s) able to relate financial data to performance data and develop unit cost information? (2 CFR 200.301)	/	
3.	Can your financial management system(s) provide accurate, current and complete disclosure of the financial results of each federally-sponsored project or program in accordance with the financial reporting requirements (2 CFR 200.327? These are the Financial Status Report and Report of Federal Cash Transactions. (2 CFR 200.302(b)(2))	/	
4.	Can your financial management system(s) provide records that adequately identify the source and application of funds for federally-sponsored activities? Information to be included is: authorizations, obligations, unliquidated obligations, assets, outlays, income and interest. (2 CFR 200.302(b)(3))	/	
5.	Does your financial management system(s) provide for effective control over and accountability for all funds, property and other assets, including ensuring that all such assets are used solely for authorized purposes? (2 CFR 200.302(b)(4))	/	
6.	Can your financial management system(s) provide for a comparison of outlays with budget amounts for each award, including, where appropriate, information related to performance and unit cost? (2 CFR 200.302(b)(5))	/	
7.	Does your financial management system(s) provide written procedures to minimize the time elapsing between the transfer of funds to the recipient from the U.S. Treasury and the issuance or redemption of checks, warrants or payments by other means for the purposes of the program? (2 CFR 200.302(b)(6))		/ - procedures are in place but not written.
8.	Does your financial management system(s) provide written procedures for determining the reasonableness, allocability and allowability of costs in accordance with 2 CFR 200.302(b)(7)?		/ - procedures are in place, but not written.
9.	Does your financial management system(s) provide accounting records which include cost accounting records supported by source documentation? (2 CFR 200.302(b)(3))	/	
10.	If applicable, does your financial management system(s) provide procedures for conducting an audit in accordance with 2 CFR 200 Subpart F? Currently, single audits are required for recipients expending $750,000 or more in federal funds during the fiscal year. (2 CFR 200.501)		/ - procedures are in place, but not written.
11.	Does your financial management system(s) provide or describe existing or planned indirect cost rates? C(2 CFR 200 Subpart E)	/ - 10% de minimis rate	
PROPERTY AND PROCUREMENT STANDARDS			

	Instructions: Check the appropriate box to the right for each item. If your organization has written policies/procedures that meet the requirement, check the box under the "Yes"column. If your organization does not have written policies/procedures that meet the requirement described under this column, check (/) the box under the "No" column and explain in the box or in an attachment. Please provide EPA a copy (electronic is preferable) of the following items: 1) Most recent audit of financial statements and management letter, 2) procurement and property policies, 3) personnel policies and 4) travel policy. EPA will evaluate your responses against these items.	**Yes**	**No (explain)**
1.	Does your property management system(s) provide for maintaining: (1) a description of the equipment; (2) an identification number; (3) source of the property, including the award number; (4) where title vests; (5) acquisition date; (6) federal share of property cost; (7) location and condition of the property; (8) acquisition cost; (9) ultimate disposition information? (2 CFR 200.313(d)(1))	/	
2.	Does your property management system(s) provide for a physical inventory and reconciliation of property at least every two years? (2 CFR 200.313(d)(2))	/	
3.	Does your property management system(s) provide controls to insure safeguards against loss, damage or theft of the property? (2 CFR 200.313(d)(3))	/	
4.	Does your property management system(s) provide for adequate maintenance of the property? (2 CFR 200.313(d)(4))	/	
5.	Does your organization maintain written procurement procedures which (1) avoid unnecessary purchases; (2) provide an analysis of lease and purchase alternatives; and (3) provide a process for soliciting goods and services? (2 CFR 200.318)		/ - procedures are in place, but not written.
6.	Does your procurement system provide for the conduct and documentation of cost or price analysis for each procurement action? (2 CFR 200.318))	/	
7.	Does your organization maintain written standards of conduct governing the performance of your employees engaged in the award and administration of contract (i.e., conflict of interest) and does it provide for disciplinary actions? (2 CFR 200.318(c)(1) and (c)(2)) **PERSONNEL AND TRAVEL**	/	
1.	Does your organization maintain a personnel system(s) which provides monthly reports on the activities of each employee whose compensation is charged to the assistance agreement? (2 CFR 200.430)	/	
2.	Does your organization maintain a standard travel policy? (2 CFR 200.474)	/	

PART III - CERTIFICATION AND SUBMISSION

CERTIFICATION OF APPLICANT'S AUTHORIZED REPRESENTATIVE (REQUIRED):

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.

Name Ronald E. Dukes
Title Director of Finance and Administration
Signature Ronald E. Dukes Digitally signed by Ronald E. Dukes Date: 2023.04.10 15:07:33 -04'00'
Date 4/13/2023

SUBMISSION INSTRUCTIONS:

Submit questionnaire with documentation at least 60 days prior to your proposed project start date to [EPA EMAIL ADDRESS]. If you do not have internet access, mail the questionnaire and supporting documentation to the following address:

US Environmental Protection Agency (EPA)

Independent Auditor's Report

To: The Board of Directors
New Jersey Future, Inc.
Trenton, New Jersey

Opinion

We have audited the accompanying financial statements of ***New Jersey Future, Inc.*** (a non-profit organization), which comprise the statements of financial position as of December 31, 2022 and 2021, and the related statements of activities, functional expenses and cash flows for the years then ended, and the related notes to the financial statements

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of ***New Jersey Future, Inc.*** as of December 31, 2022 and 2021, and the changes in its net assets and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America ("GAAS"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of ***New Jersey Future, Inc.*** and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about ***New Jersey Future, Inc.'s*** ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of ***New Jersey Future, Inc.'s*** internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about ***New Jersey Future, Inc.'s*** ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Net increase in cash and cash equivalents	911,629	121,567
Cash and cash equivalents, beginning of year	1,384,138	1,262,571
Cash and cash equivalents, end of year	$ 2,295,767	$ 1,384,138

The accompanying notes are an integral part of this statement.

ED_016126_00000976-00024

NEW JERSEY FUTURE, INC.
NOTES TO THE FINANCIAL STATEMENTS
AS OF DECEMBER 31, 2022 AND 2021

1. NATURE OF ACTIVITIES

New Jersey Future, Inc. (the "Organization") is a non-profit organization incorporated under the laws of the State of New Jersey and commenced operations on January 1, 1988. The Organization's primary purpose is to foster public action and promote creation of a balanced strategy for growth management in the State of New Jersey.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation
The financial statements of the Organization are presented on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles, which require the Organization to report information regarding its financial position and activities according to the following net asset classifications:

Net assets without donor restrictions - Net assets that are not subject to donor-imposed restrictions and may be expended for any purpose in performing the primary objectives of the Organization. These net assets may be used at the discretion of the Organization's management and Board of Directors.

Net assets with donor restrictions - Net assets subject to stipulations imposed by donors and grantors. Some donor restrictions are temporary in nature; those restrictions will be met by actions of the Organization or by the passage of time.

Donor-restricted contributions are reported as increases in net assets with donor restrictions. When a restriction expires, net assets are reclassified from net assets with donor restrictions to net assets without donor restrictions in the statement of activities. There were $1,329,199 and $821,436 in net assets with donor restrictions at December 31, 2022 and 2021, respectively.

Board Designated Net Assets Without Donor Restriction
It is the policy of the Board of Trustees to review its plan for future projects and to designate appropriate sums of unrestricted net assets to assure adequate funding for such projects.

Measure of Operations
The statements of activities report all changes in net assets, including changes in net assets from operating and nonoperating activities. Operating activities consist of those items attributable to the Organization's ongoing program services and interest and dividends earned on investments. Nonoperating activities are limited to resources that generate return from investments and other activities considered to be of a more unusual or nonrecurring nature.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

Use of Estimates
The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Cash and Cash Equivalents
Cash and cash equivalents represent cash in bank and short-term certificates of deposit. For purposes of the statement of cash flows, management considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

Accounts and Pledges Receivable
Accounts and pledges receivable are recorded at the undiscounted, unconditional pledged contribution amount. Total accounts and pledges receivable, net of allowance, were $337,689 and $158,536 as of December 31, 2022 and 2021, respectively. We have also found that any discounting of accounts receivable to present value at December 31, 2022 would be immaterial.

Multi-year unconditional grants are recorded as revenue in their entirety in the year they are awarded. Due to the nature of these grants, significant increases and decreases in net assets may occur. Significant fluctuations can arise as grants are recognized as support in the fiscal period in which they are awarded, but the expenses incurred with such grants occur in a different fiscal period. This may create the impression of large and volatile swings in the Organization's financial position. To better interpret this situation and get a sense of the Organization's financial health, it is important for reviewers of the financial statements to evaluate the net assets without donor restrictions in the statement of activities.

Investments
The Organization carries investments in marketable securities with readily determinable fair values and all investments in debt securities at their fair value. Unrealized gains and losses are included in the statement of activities. The Organization uses specific identification of basis to determine realized gains or losses on sales. Interest and dividend income are recognized when earned.

Land, Building, and Equipment
Property and equipment are stated at cost. Depreciation is provided over the estimated useful lives of the related assets using the straight-line method. The Organization capitalizes all equipment expenditures over $1,000. Major renewals and betterments are charged to the capital accounts while maintenance and repairs which do not improve or extend the life of the respective assets are expensed.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

Contributions and Revenue

Contributions are recognized when the donor makes a promise to give to the Organization that is, in substance, unconditional. Contributions that are restricted by the donor are reported as increases in net assets without donor restrictions if the restrictions expire in the fiscal year in which the contributions are recognized. All other donor-restricted contributions are reported as increases in net assets with donor restrictions.

Revenues from governmental agencies are generally reported as exchange transactions when qualifying expenses are incurred under the agreement.

Income Taxes

The Organization is exempt from federal income taxes under Section 501(c)(3) of the Internal Revenue Code.

Management has reviewed tax positions taken in filings with federal and state jurisdictions and believes those positions would be sustained should the filings be examined by the relevant taxing authority. These tax filings are subject to examination, generally for three years after they are filed.

Should settlement of an examination or other event result in a change in management's evaluation of a tax position taken or expected to be taken in filings that have not been closed by statute or examination, any interest and penalties related to the unrecognized tax benefit as a result of the uncertain tax position would be included in interest expense and administrative expenses, respectively.

Credit and Market Risk

Financial instruments which subject the Organization to concentrations of credit and market risk consist principally of cash and receivables. From time to time, the Organization may have amounts on deposit in excess of the federally insured deposit limit at one bank. The Organization places its cash with high quality financial institutions. Receivables are subject to the risk that donors might renege on their commitments. The Organization periodically reminds donors of their commitments.

Allocation of Functional Expenses

Directly identifiable expenses are charged to programs, supporting services and fundraising. Any expenditures not directly chargeable have been allocated among program and supporting services on the basis of employees' time records and estimates made by the Organization's management. Management and general expenses include those expenses that are not directly identifiable with any other specific function but provide for the overall support and direction of the Organization.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

Contributed Services

Contributed services are reported as contributions at their fair value if such services create or enhance non-financial assets, would have been purchased if not provided by contribution, require specialized skills, and are provided by individuals possessing such specialized skills. The Organization did not recognize any donated services as revenue in the years ended December 31, 2022 and 2021. In addition, many individuals volunteer their time and perform a variety of tasks that assist the Organization in fulfilling its mission.

Compensated Absences

Employees of the Organization are entitled to paid vacations. The Organization estimates the amount of compensation for future absences and accrues the liability.

3. LIQUIDITY AND AVAILABILITY

	2022	2021
Total current financial assets	$ 3,279,926	$ 2,305,494
Donor-imposed restrictions:		
Restricted funds	(1,329,199)	(821,436)
Financial assets available to meet cash needs for general expenditures within one year	$ 1,950,727	$ 1,484,058

The Organization manages its liquidity by operating within a prudent range of financial soundness and stability and maintaining adequate liquid assets to fund near-term operating needs. The Organization also maintains a $200,000 line of credit should it need to draw upon it in order to meet short term cash needs. In addition to these available financial assets, a significant portion of the Organization's annual expenditures will be funded by current year operating revenues including contributions, grants, and contract and other income.

For the years ended December 31, 2022 and 2021, the full amount was available to be drawn upon. During the years ended December 31, 2022 and 2021, the Organization has been able to meet cash needs for general expenditures within each respective year.

4. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following tables set forth by level, within the fair value hierarchy, the Organization's financial assets and liabilities at fair value as of December 31, 2022 and 2021:

4. FAIR VALUE OF FINANCIAL INSTRUMENTS (CONT'D)

	Fair Value as of December 31, 2022 using the following inputs			
	Total	Level 1	Level 2	Level 3
Investments:				
Mutual funds	$ 96,565	$ 96,565	$ -	$ -
Beneficial interest in assets held by community foundation	549,905	-	-	549,905
	$ 646,470	$ 96,565	$ -	$ 549,905

	Fair Value as of December 31, 2021 using the following inputs			
	Total	Level 1	Level 2	Level 3
Investments:				
Mutual funds	$ 115,691	$ 115,691	$ -	$ -
Beneficial interest in assets held by community foundation	631,879	-	-	631,879
	$ 747,570	$ 115,691	$ -	$ 631,879

FASB ASC Topic 820, Fair Value Measurements, establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels:

Level 1
Quoted prices in active markets for identical assets or liabilities. The Organization's investments in mutual funds at PNC Investments are valued at the net asset value of the shares held by the Organization at year end in an active market, which is a Level 1 input.

Level 2
Observable inputs, other than Level 1 prices, that are observable for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market date for substantially the full term of the assets or liabilities.

4. FAIR VALUE OF FINANCIAL INSTRUMENTS (CONT'D)

Level 3 – Community Foundation of New Jersey

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. The investments in the New Jersey Future Fund at the Community Foundation of New Jersey (the "Foundation") are considered Level 3 inputs since the fair value is based upon underlying investments. The investments with the Foundation are unrestricted and consist of operating and Board-designated funds. Of the total amount with the Foundation, $25,000 requires Board approval to access and spend. Income generated by Foundation funds can be used for operating activities since there are no restrictions on the use of investment earnings.

Investments with the Foundation are comprised of domestic and international equity funds, publicly traded securities, corporate bond funds, limited partnerships, alternate investments and cash. Investments with the Foundation are assigned a certain unit value, and the Organization's ownership interest is based on the allocation of the fair value of Foundation fund's units to the total fair value of the investment pool. Fair value is provided by the Foundation based upon the underlying valuation of each fund within the portfolio. The pool is revalued monthly, and income and gains or losses are allocated to each fund based on its units.

The change in Level 3 assets for the year ended December 31, 2022 is as follows:

Beginning of year	$ 631,879
Contributions	-
Interest and dividends	11,625
Realized and unrealized loss	(88,942)
Administrative and investment fees	(4,657)
End of year	$ 549,905

5. LAND, BUILDING, AND EQUIPMENT

Land, building, and equipment at December 31 consists of the following:

	2022	2021
Land	$ 60,000	$ 60,000
Building and improvements	449,848	449,848
Computers and office equipment	65,749	62,270
Automobile	12,345	12,345
	587,942	584,463
Less: accumulated depreciation	(145,762)	(133,311)
Land, building and equipment, net	$ 442,180	$ 451,152

5. LAND, BUILDING, AND EQUIPMENT (CONT'D)

Depreciation expense for the years ended December 31, 2022 and 2021 was $19,388 and $20,669, respectively.

6. LINE OF CREDIT, BANK

The Organization entered into a $200,000 line of credit with a local bank. Borrowings under this line bore interest at a variable rate equal to the bank prime lending rate plus 0.5%, which was 8.0% at December 31, 2022. The line can be renewed annually and is secured by a mortgage on the Organization's building. There were no borrowings outstanding under this line at December 31, 2022.

7. COMMITMENTS AND CONTINGENCIES

In December 2020, the Organization entered into a photocopier operating lease for a minimum of $190/month over five years and three months starting January 2021, with no payments until April 2021. In accordance with the new leasing standard (ASU 2016-02), the operating leases have been capitalized as right-of-use assets and operating lease obligations on the statement of financial position. Both the right-of-use assets and the lease liabilities were initially valued at the net present value of the leases based on the risk-free rate of return.

Future minimum lease payments are as follows for the years ending December 31:

2023	$ 2,283
2024	2,283
2025	2,283
2026	571
Total minimum lease payments	$ 7,420
Less: amount representing interest	(421)
Present value of minimum lease payments	$ 6,999

8. NET ASSETS WITH DONOR RESTRICTIONS

Net assets with donor restrictions were committed to the following purposes:

	2022	2021
Smart Growth Policy programs	$ 1,329,199	$ 821,436

9. DEFERRED COMPENSATION PLANS

The Organization offers its employees a 403(b) retirement plan. The plan permits participants to defer a portion of their salary until future years. Amounts deferred under the plan are not available to employees until termination, death, or an unforeseeable emergency. The plan does not provide for employer matching contributions because it is a deferral-only plan.

Beginning January 1, 2022, the Organization began offering its employees a 401(k) retirement plan in addition to the 403(b) plan. There is no requirement for enrollees in the 403(b) plan to switch to the 401(k) plan instead. Eligible employees can make a salary reduction contribution up to the limit set by the Internal Revenue Service for each calendar year. For the year ended December 31, 2022, the Organization matched the first $100 of each employee's contributions at a rate of five-to-one, capping employer matching at $500. Effective January 1, 2023, the Organization will match each employee's contributions at a rate of one-to-one, capping employer matching at $1,500. The contribution for the year ended December 31, 2022 was $9,500.

10. SUBSEQUENT EVENTS

In preparing these financial statements, management of the Organization has evaluated events and transactions for potential recognition or disclosure through March 20, 2023, the date the financial statements were available to be issued. The Organization had no significant or material subsequent events through March 20, 2023.

March 31, 2023

To: The Board of Directors
New Jersey Future, Inc.

We have audited the financial statements *of* ***New Jersey Future, Inc.*** (the "Organization") for the year ended December 31, 2022 and have issued our report thereon dated March 20, 2023. As a result of our audit, we have prepared the following report that includes information required by Statements on Auditing Standards, issued by the Auditing Standards Board:

Required Communication

This consists of a required communication to those charged with governance that addresses the responsibilities of an auditor and other required items.

We would like to express our gratitude toward Pete Kasabach, Ronald Dukes, Marianne Jann, and all the staff for the cooperation we received during our audit of ***New Jersey Future, Inc.*** for the year ended December 31, 2022.

This information is intended solely for the use of the Board, management and others within ***New Jersey Future, Inc.*** and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Edward A. Suarez, CPA, MBA
Renzi, Bernardi, Suarez & Co.

Required Communication

Our Responsibility Under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated November 1, 2022, professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, as well as certain information related to the planned scope and timing of our audit.

Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Findings

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by the Organization are described in Note 2 to the financial statements. The application of existing policies was not changed during the year ended December 31, 2022.

We noted no transactions entered into by the Organization during the year for which there is a lack of authoritative guidance or consensus.

All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were the allocation of functional expenses, the useful lives of fixed assets, and the net present value of the Organization's operating lease under the new leasing standard. We evaluated the key factors and assumptions used to develop these estimates in determining that they are reasonable in relation to the financial statements taken as a whole.

The disclosures in the financial statements are neutral, consistent and clear. Certain financial statement disclosures are particularly sensitive because of their significance to financial statement users. The most sensitive disclosures affecting the financial statements were in Note 3, which provides information regarding the Organization's liquidity and availability of funds; Note 4, which provides information regarding the Organization's investment account activity; and Note 9, which provides information regarding the Organization's two deferred compensation plans.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. There were no corrected or uncorrected misstatements identified.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated March 20, 2023.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the Organization's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management prior to retention as its auditors. However, these discussions will occur in the normal course of our professional relationship and we do not anticipate that our responses will be a condition to our retention.

EPA KEY CONTACTS FORM

OMB Control No. 2030-0020
Approval expires 06/30/2024

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 0.5 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

NEW JERSEY FUTURE INC
P O BOX 2485
TRENTON, NJ 08607

Dear Applicant:

Based on information supplied, and assuming your operations will be as stated in your application for recognition of exemption, we have determined you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code.

We have further determined that you are not a private foundation within the meaning of section 509(a) of the Code, because you are an organization described in sections 509(a)(1) and 170(b)(1)(A)(vi).

If your sources of support, or your purposes, character, or method of operation change, please let us know so we can consider the effect of the change on your exempt status and foundation status. In the case of an amendment to your organizational document or bylaws, please send us a copy of the amended document or bylaws. Also, you should inform us of all changes in your name or address.

As of January 1, 1984, you are liable for taxes under the Federal Insurance Contributions Act (social security taxes) on remuneration of $100 or more you pay to each of your employees during a calendar year. You are not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Since you are not a private foundation, you are not subject to the excise taxes under Chapter 42 of the Code. However, you are not automatically exempt from other Federal excise taxes. If you have any questions about excise, employment, or other Federal taxes, please let us know.

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of Code sections 2055, 2106, and 2522.

The heading of this letter indicates whether you must file Form 990, Return of Organization Exempt from Income Tax. If Yes is indicated, you are required to file Form 990 only if your gross receipts each year are normally more than $25,000. If a return is required, it must be filed by the 15th day

ED_016126_00000976-00038

of the fifth month after the end of your annual accounting period. The law imposes a penalty of $10 a day, up to a maximum of $5,000, when a return is filed late, unless there is reasonable cause for the delay.

You are not required to file Federal income tax returns unless you are subject to the tax on unrelated business income under section 511 of the Code. If you are subject to this tax, you must file an income tax return on Form 990-T, Exempt Organization Business Income Tax Return. In this letter, we are not determining whether any of your present or proposed activities are unrelated trade or business as defined in section 513 of the Code.

You need an employer identification number even if you have no employees. If an employer identification number was not entered on your application, a number will be assigned to you and you will be advised of it. Please use that number on all returns you file and in all correspondence with the Internal Revenue Service.

If the heading of this letter indicates that a caveat applies, the caveat below or on the enclosure is an integral part of this letter.

Because this letter could help resolve any questions about your exempt status and foundation status, you should keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown in the heading of this letter.

Sincerely yours,

Phil Brand

District Director

Dear Applicant:

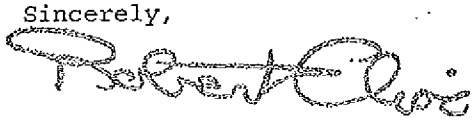
We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. During your advance ruling period, you will be treated as a public charity. Your advance ruling period begins with the effective date of your exemption and ends with advance ruling ending date shown in the heading of the letter.

Shortly before the end of your advance ruling period, we will send you Form 8734, Support Schedule for Advance Ruling Period. You will have 90 days after the end of your advance ruling period to return the completed form. We will then notify you, in writing, about your public charity status.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

If you distribute funds to other organizations, your records must show whether they are exempt under section 501(c)(3). In cases where the recipient



ED_016126_00000981-00001

organization is not exempt under section 501(c)(3), you must have evidence the funds will be used for section 501(c)(3) purposes.

If you distribute funds to individuals, you should keep case histories showing the recipient's name and address; the purpose of the award; the manner of selection; and the relationship of the recipient to any of your officers, directors, trustees, members, or major contributors.

We have sent a copy of this letter to your representative as indicated in your power of attorney.

Sincerely,

Robert Choi
Director, Exempt Organizations

ED_016126_00000981-00002

Part IX Public Charity Status (Continued)

e 509(a)(4)—an organization organized and operated exclusively for testing for public safety. ☐

f 509(a)(1) and 170(b)(1)(A)(iv)—an organization operated for the benefit of a college or university that is owned or operated by a governmental unit. ☐

g 509(a)(1) and 170(b)(1)(A)(vi)—an organization that receives a substantial part of its financial support in the form of contributions from publicly supported organizations, from a governmental unit, or from the general public. ☐

h 509(a)(2)—an organization that normally receives not more than one-third of its financial support from gross investment income and receives more than one-third of its financial support from contributions, membership fees, and gross receipts from activities related to its exempt functions (subject to certain exceptions). ☐

i A publicly supported organization, but unsure if it is described in 5g or 5h. The organization would like the IRS to decide the correct status. ☑

6 If you checked box g, h, or i in question 5 above, you must request either an advance or a definitive ruling by selecting one of the boxes below. Refer to the instructions to determine which type of ruling you are eligible to receive.

a **Request for Advance Ruling:** By checking this box and signing the consent, pursuant to section 6501(c)(4) of the Code you request an advance ruling and agree to extend the statute of limitations on the assessment of excise tax under section 4940 of the Code. The tax will apply only if you do not establish public support status at the end of the 5-year advance ruling period. The assessment period will be extended for the 5 advance ruling years to 8 years, 4 months, and 15 days beyond the end of the first year. You have the right to refuse or limit the extension to a mutually agreed-upon period of time or issue(s). Publication 1035, *Extending the Tax Assessment Period*, provides a more detailed explanation of your rights and the consequences of the choices you make. You may obtain Publication 1035 free of charge from the IRS web site at *www.irs.gov* or by calling toll-free Ex. 6 - Personal Privacy (PP) Signing this consent will not deprive you of any appeal rights to which you would otherwise be entitled. If you decide not to extend the statute of limitations, you are not eligible for an advance ruling. ☑

Consent Fixing Period of Limitations Upon Assessment of Tax Under Section 4940 of the Internal Revenue Code

For Organization

Louis Caloagno — Louis Caloagno — 6/26/07

(Signature of Officer, Director, Trustee, or other authorized official) (Type or print name of signer) (Date)

Louis Caloagno, Acting President

(Type or print title or authority of signer)

For IRS Use Only

Robert Choi — OCT 22 2007

IRS Director, Exempt Organizations (Date)

b **Request for Definitive Ruling:** Check this box if you have completed one tax year of at least 8 full months and you are requesting a definitive ruling. To confirm your public support status, answer line 6b(i) if you checked box g in line 5 above. Answer line 6b(ii) if you checked box h in line 5 above. If you checked box i in line 5 above, answer both lines 6b(i) and (ii). ☐

(i) (a) Enter 2% of line 8, column (e) on Part IX-A, Statement of Revenues and Expenses. _____

(b) Attach a list showing the name and amount contributed by each person, company, or organization whose gifts totaled more than the 2% amount. If the answer is "None," check this box. ☐

(ii) (a) For each year amounts are included on lines 1, 2, and 9 of Part IX-A, Statement of Revenues and Expenses, attach a list showing the name of and amount received from each disqualified person. If the answer is "None," check this box. ☐

(b) For each year amounts are included on line 9 of Part IX-A, Statement of Revenues and Expenses, attach a list showing the name of and amount received from each payer, other than a disqualified person, whose payments were more than the larger of (1) 1% of line 10, Part IX-A, Statement of Revenues and Expenses, or (2) $5,000. If the answer is "None," check this box. ☐

7 Did you receive any unusual grants during any of the years shown on Part IX-A, Statement of Revenues and Expenses? If "Yes," attach a list including the name of the contributor, the date and amount of the grant, a brief description of the grant, and explain why it is unusual. ☐ Yes ☐ No

WORK EXPERIENCE

EMPIRE CLEAN CITIES - 2018 TO PRESENT

EXECUTIVE DIRECTOR & U.S. DEPARTMENT OF ENERGY CLEAN CITIES COALITION DIRECTOR

Oversee public and privately funded projects aimed at increasing alternative fueled vehicles, which operate on electricity, compressed natural gas, hydrogen, and biofuel in the City of New York and Hudson Valley. Liaise with government, elected officials, private companies, vehicle manufacturers and dealers, utility companies, interest groups, media and consultants to develop projects that "green" vehicle fleets. Implement policies and long-range organizational goals, while managing operations of a stakeholder driven organization, including managing various projects while administering organization's fiscal budget, facilitating the executive board, and supervising staff. Plan and implement multiple industry and public-facing events, as well as represent the organization at meetings, conferences and media events.

PUBLIC HEALTH SOLUTIONS - 2016 TO 2018

CONTRACT MANAGER

Managed a diverse portfolio of 15 health equity contracts with community based not-for-profit organizations that received over $3 million dollars in government funding. Provided capacity-building and technical assistance for new funding recipients on program development, budget management, internal policies and procedure development, and organizational sustainability.

GIRL RISING - 2012 TO 2016

PROGRAM OFFICER

Managed a 3-year $3.5 million international girls' education campaign public-private partnership funded by U.S. Agency for International Development (USAID). Managed aspects of programmatic design, communications and subcontract management. Led all project partner coordination across three countries. Developed advocacy toolkits, corporate sponsor outreach, and volunteer management system. Directly supervised data collection, research and program milestone monitoring throughout the course of the program.

THE SALVATION ARMY - 2006 TO 2009

DIRECTOR, DONOR MANAGEMENT

Served as the head of the Donor Management Department for Northern California and Nevada, raising over $7.5 Million dollars annually. Strategically planned and implemented 30 annual fundraising and marketing campaigns which included robust integrated media strategies. Directly managed database of over 400,000 individuals and performed regular detailed analysis of data integrity, as well as campaign performances and trends.

PROFESSIONAL EXPERIENCE

Empire Clean Cities, New York, NY **March 2023 – Present**

Communications & Outreach Coordinator .

- Manage Empire Clean Cities' relationships with its members and partners
- Coordinate events and webinars
- Produced content for internal and external use in close partnership with the communications teams to maintain up to date website, social media and press releases

US Business Council for Sustainable Development, Houston, TX **June 2021 – January 2023**

Policy Analyst

- Led program management for Gulf Coast Carbon Collaborative and Great Lakes Carbon Collaborative member engagement, internal operations, tracking program progress, producing performance review reports and processing proposals, reports, grants, contracts, and invoices/reimbursements
- Assisted in the launch of Great Lakes Carbon Collaborative program by managing member recruitment through scoping research, introductory calls and creating a membership pipeline to expand membership from 8 founding members to 36 active members within the first quarter
- Managed daily operations of the organization by scheduling meetings, coordinating organizational calendar, lead website management using Squarespace, keep track of membership data of over 300 contacts with Excel and prepare presentations for stakeholder meetings
- Produced content for internal and external use in close partnership with the communications teams to maintain up to date website, social media and press releases

United Nations, New York, NY **March 2021 – September 2021**

Publications Intern

- Drafted, formatted, edited and produced original web site content, news stories and social media content to provide effective messaging through 2-3 weekly earned media campaigns
- Served as a liaison between the marketing team and publishing partners and built working relationships with more than 50 international partners
- Assisted in strategizing and initiating campaigns for UN merchandise on the UN Bookshop to generate website traffic and improve search engine optimization

Be Positive Foundation, New York, NY **May 2020 – May 2021**

New York Dance Marathon Team Director

- Mobilized and motivated a team of 110 members to actively fundraise throughout the course of the year to support cancer research
- Drafted and edited original social media content to provide effective messaging through 2-3 weekly earned media campaigns while graphic designing templates package for team member's campaigns
- Organized and led weekly events across the community and led communication efforts
- Built a database on Excel to track donor information and to effectively fundraise

Earth Day Network, Washington, DC **September 2019 – December 2019** *Intern*

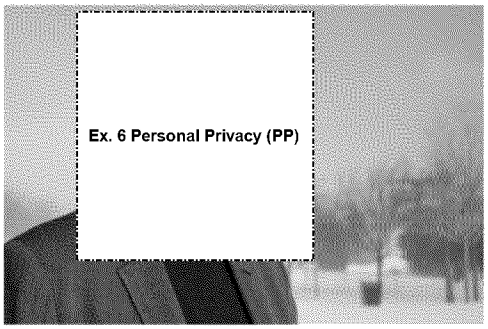
- Independently created content for volunteers both in English and French to mobilize events in Africa
- Helped the organization transition into a new database (Nationbuilder) and maintained the database through coordinating between various internal teams

ADDITIONAL EXPERIENCE

North Carolina Democratic Party, *Campaign Fellow* September 2020 – November 2020
New York University *Office Assistant* January 2020 – May 2020
Green Building Worldwide, Research Fellow February 2019 – June 2019
New York University *Office Assistant* January 2019 – May 2019
World Wildlife Fund, *Research Intern* June 2018 – August 2018

EDUCATION

New York University, Gallatin School of Individualized Study, New York, NY



Bachelor of Arts in Individualized Study on Climate Change and International Affairs

- Graduated with Departmental Honors and Cum Laude with GPA:3.85/4.0

SKILLS

- *Languages*: English (native), French (Fluent: DALF C1), Turkish (native)
- *Technical*: Microsoft Office (Word, Excel, Outlook, PowerPoint), Google Drive, HTML, WordPress, Square-space, Salesforce (CRM), Photoshop
- *Additional Skills:*Strong research, writing and editing skills; exceptional organizational skills and ability to multi-task; time management; teamwork; flexibility; grant writing

Educa1on

1987
Bachelor of Arts
Brown University
Providence, RI

Work Experience

2004 - 2011
Chief of Staff
Office of Rep. Jose E. Serrano
The Bronx, NY/Washington, DC

1994 – 2004
Co-Founder & Execu1ve Director
The Point Community Development
Corp. The Bronx, NY

1988 – 2004
Program Director
The Seneca Center
The Bronx, NY

Ex. 6 Personal Privacy (PP) is an urban solu1ons consultant and community development prac11oner with a specializa1on in food systems, renewables, and clean transporta1on solu1ons for metropolitan areas. He currently advises a number of anchor ins1tu1ons, community development organiza1ons, and firms in the clean tech sector, each with projects posi1oned at the interface of public policy and market development in these spaces.

Barre_o Bay's recent clients have included a na1onal developer of affordable housing pursuing a strategy of industrial job crea1on in a new $300 million mixed-use development; the owner of a former shipyard exploring industrial redevelopment strategies for a site that once employed 50,000 shipbuilders; an offshore wind developer seeking a fabrica1on and logis1cs hub in NY harbor; the owner of a 9 acre brownfield working to a_ract tenants to a new regional food campus; and a global architecture firm that successfully competed for a share of federal "Rebuild By Design" funding to revitalize the world's largest food distribu1on center. Barre_o Bay has advised two NYS Brownfield Opportunity Area studies and has successfully developed and deployed strategies for a_rac1ng new businesses to industrial brownfield sites.

From 2004 – 2011, Ex. 6 Personal Privacy (PP) served as Chief of Staff to Congressman Jose E. Serrano (NY-16), an 11-term Democrat and senior appropriator from The Bronx, NY. In 2009, Ex. 6 Personal Privacy (PP) served as principal author of The American Electric Vehicle Manufacturing Act (HR 4399), a bill introduced with bi-par1san support and aimed at scaling up the domes1c electric vehicle industry.

Earlier in his career, Ex. 6 Personal Privacy (PP) founded and led The Point Community Development Corpora1on, a pioneering CDC based in the Hunts Point sec1on of The Bronx and ac1ve in the sustainability sector. The organiza1on launched the South Bronx Greenway, ini1ated the revitaliza1on of 8 acres of sca_er-site brownfields, redeveloped two significant industrial parcels, launched a crea1ve sector business incubator in the historic American Banknote Building, and led local community consensus-building around land use and waterfront issues in the South Bronx.

Community Development Leader with 20 years of experience across the CDFI sector, developing strategies and creating products and programs, addressing the financial needs of LMI communities. Expertise in managing coalitions and nurturing partnerships with key players in CDFI sector.
Committed to working towards poverty alleviation and financial inclusion, with a special focus on women, minorities and immigrants. Areas of expertise and key strengths include:

- **Program design & product development**
- **Strategic planning**
- **Market research, impact measurement & data analytics**
- **Business development & partnership building**
- **Grants management/**
- **CRA expertise**
- **Public speaking/presentations**
- **Proven entrepreneurial drive**

Professional Experience

Director, Consumer Lending & Community Reinvestment Officer
2014-Present

Spring Bank, Bronx, New York

Leading initiatives and building strategies for unique double bottom line CDFI and B Corp

- Managed the banks community reinvestment responsibilities including oversight of CRA exam resulting in a 2018 outstanding rating and management of CRA committee and Community Advisory Board.
- Upgraded data collection and analysis for CRA purposes.
- Created model new consumer loan program, developing a portfolio of products to serve LMI consumers and underserved communities. Completed strategic planning and business plans to assess the consumer banking needs of customers and local communities and to determine the viability of products. Successfully introduced a mission-based small dollar loan program including three unique products: The Employee Opportunity Loan; E-Bike Loan NYC and Credit Builder Loan. Program on target to process over 1000 loans per year, insuring thousands of consumers avoid predatory products and build credit.
- Partnered with a technology startup to build platform for New York City-wide access to loan products, financial capability tools, credit counseling plus the integration of a model cash flow based alternative credit scoring and underwriting model.
- Worked across all bank divisions including marketing, operations, IT, compliance and all bank stakeholders including the Board of Directors to insure the successful integration and deployment of products.
- Oversaw marketing and public relations.
- Created and strengthened community partnerships to further the reach of consumer products.
- Analyzed data and generated reports on impact of products and programs
- Bank Liaison to city, state and federal agencies including regulatory agencies.
- Coordinated the certification of the bank as New York's first B Corp Bank and spearheaded the creation of a Banking Development District in the South Bronx.

Senior Program Officer
2010-2014

National Federation of Community Development Credit Unions, New York

Key Accomplishments:

- Implemented initiatives and designed products for credit unions nationwide to provide responsible loans and asset building opportunities for consumers.
- Reviewed programs and projects for regulatory and compliance purposes.
- Successful grant writing and grant management and overseeing of investor and funder relations, compliance and outreach to banks, foundations and social investors.
- Liaison to city, state and federal agencies including regulatory agencies.

Selected Initiatives:

- Better Directions: designed a national initiative to enhance economic security for low-income seniors through integration of credit union products with social service delivery, funded by the Atlantic Philanthropies
- The Small Dollar Loan initiative: Promoted nationally affordable alternatives to payday loans at credit unions, funded by the Ford Foundation

- U.S. Treasury Community Development Financial Institution Fund (CDFI) Capacity Building Initiative on Scaling Microfinance. Managed credit union training and technical assistance as part of a national CDFI Fund

capacity building contract. Mentoring credit union working group on cross sector partnerships and collaborations.

Director, New York State CDFI Coalition 2010-2013

Key Accomplishments:

- Coordinated activities of the New York CDFI Coalition, the nation's largest state coalition of CDFIs, including loans funds, credit unions and community development banks. Successfully advocated for state funding and fostered collaborations and partnerships to leverage resources and maximize impact. Managed annual statewide conference of CDFIs. Invited to make presentations nationwide on CDFI coalition building.

Assistant Director, Community Development Investments

Key Accomplishments: 2008-2010

- Successfully raised new sources of funds for secondary capital investments in credit unions serving LMI communities nationwide, working with investors such as Deutsche Bank on program-related investments, loans and deposits.
- Managed portfolio of loan and grant programs strengthening the ability of credit unions to lend in low-income communities.

Director, Small Business Lending 2004-2008

Community Capital New York, Westchester-Based CDFI Covering Seven NYS Counties

Key Accomplishments:

- Built loan program to address funding needs of small businesses unable to source traditional bank financing resulting in the deployment of much needed capital and technical assistance in underserved communities.
- Managed microfinance program and loan portfolio with additional responsibility for fundraising, building and maintaining relationships with government, state and local agencies and bank and foundation funders
- Administered state and nationally funded loan program in support of minority and women-owned businesses and the Small Business Administration Microloan program
- Built partnerships with banksfor CRA investments, local municipalities and small business technical assistance providers
- Created model peer lending program

Vice Chair, Board of Directors 1994-2000

New Rochelle Economic Development Corporation

Key Accomplishments:

- Established EDC to help revitalize and promote the city's downtown. Spearheaded initiatives including a loan program for women and minority-owned businesses, a business retention program designed to keep existing businesses in New Rochelle and Culture Builds Communities, a program promoting the arts

Additional Experience

- Lower East Side Tenement Museum, New York, NY, Business Development Consultant
- Riverside Housewares, Inc., Vice President/Co-Owner
- Anti-Defamation League of B'nai B'rith, New York State, Regional Director

Other Current Activities

- Vice Chair, South Bronx Overall Economic Development Corporation, Certified Development Corporation
- Board Member, New York state CDFI Coalition
- Advisory Board Member, Bronx Women's Business Center
- Volunteer with HIAS (a refugee Relief Organization) on the development of financial capability programs

Work Experience

Transportation Alternatives, New York, NY — February 2020 - Present

Deputy Director (April 2022 - present)

- Oversee fundraising, finance, operations, and human resource functions for a team of 35. Responsible for developing and retaining a cohesive and diverse staff, as well as creating and implementing financial and operational systems that position the organization for success.

Director of Development (February 2020 – March 2022)

- Managed $4M annual fundraising portfolio and supervised a development team of five.

Neighborhood Housing Services of New York City, New York, NY — March 2019 - February 2020

Director of Resource Development

- Managed an annual fundraising portfolio of $1.4M and led donor engagement and stewardship. Responsibilities included: building annual budget and funder pipeline; developing 65+ grant applications for public and private funders; implementing a $370K annual gala; and managing two board committees.

Girl Rising, New York, NY — May 2018 - March 2019

Development Manager

- Streamlined development procedures for a newly-launched nonprofit. Responsibilities included: building a new CRM database; implementing a $250K annual gala; and managing donor and stakeholder events in New York, Los Angeles, and Washington, DC.

Regional Plan Association, New York, NY — May 2014 – May 2018

Manager, Special Events & Individual Giving (July 2017 – May 2018)

- Designed and managed an annual special events program. Highlights included: an annual 1,000+ person fundraising conference; events for two endowment campaigns; and donor cultivation lectures and dinners.
- Supervised a team of two to maintain a CRM database, manage annual fundraising campaigns, design marketing and communication materials, and support calendar and projects of the executive office.

Operations & Strategy Associate (February 2017 – June 2017)

- Managed a $250K office relocation; oversaw design process for 9,000-sf of raw office space, managed vendor contracts, and directed move logistics.

Senior Executive Administrator, Office of the President (August 2015 – January 2017)

- Supported the management of a 90-person board of directors and six board committees.
- Supervised the implementation and reporting of community engagement efforts for a $1M multi-year project on public health in low-income minority communities in the tri-state region.

Research Associate & Executive Assistant (May 2014 – July 2015)

- Managed executive office projects including: launching a 50-person advisory committee for a $3M research project and organizing an international transit agency summit hosted in London.

Governors Island Alliance, New York, NY — September 2012 – May 2014

Interim Director, Public Programs (July 2013 – May 2014)
Public Programs Associate (September 2012 – June 2013)

Education

Barnard College, Columbia University, New York, NY — Class of 2013

Bachelor of Arts, Urban Studies. Minor: Environmental Science. Magna cum laude.

SUMMARY

Accomplished nonprofit executive and lawyer with 30 years of experience in developing and implementing sustainable public policy and projects in complex urban settings through public-private partnerships, community organizing, fundraising, non-profit advocacy, and government.

Special Expertise: Environmental sustainability • Innovative public policy • Nonprofit management • Waterfront, park, and open space development, management, and finance • Green infrastructure • Organizational and political fundraising • Government strategy and finance • Federal, state, and city government relations

PROFESSIONAL EXPERIENCE

NEW YORK UNIVERSITY, STERN SCHOOL OF BUSINESS, CENTER FOR SUSTAINABLE BUSINESS Senior Research Scholar, January 2016 to present

- Director, *Invest NYC SDG,* an CSB initiative to support NYC's sustainable development goals and drive private engagement and investment in tangible NYC projects and help achieve the UN Sustainable Development Goals.
- Led a partnership with NRDC and NYC DEP to develop an innovative private green infrastructure incentive program in DEP's $2.4 billion stormwater management plan, as detailed in "Catalyzing Green Infrastructure on Private Property: Recommendations for a Green, Equitable, and Sustainable New York City."

NYC ENVIRONMENTAL PROTECTION (DEP)

Senior Advisor to the Commissioner, June 2014 to July 2015; **Consultant to DEP**, July 2015 to January 2016
Advised Commissioner on green infrastructure policy and partnerships in a $2.4 billion stormwater management program. Designed a DEP-Parks collaboration, adding $36.3 million in green infrastructure funding to 35 community parks. Created the first NRDC-DEP partnership to develop a private market for green infrastructure.

THE TRUST FOR PUBLIC LAND

Senior Fellow, October 2012 to May 2014

Developed a national initiative to support using urban parks as green stormwater infrastructure as part of the anticipated $200 billion green infrastructure spending to comply with the Clean Water Act. Organized a Harvard University colloquium and helped secure a $450,000 grant to launch the TPL effort.

NON-PROFIT STRATEGY AND DEVELOPMENT CONSULTANT, September 2009 to June 2012

- **Bard Prison Initiative -- Bard College, Senior Consultant** (January 2011-June 2012)
  Developed and implemented BPI's first communications and development program -- print, web, video, newsletter, donor database, and special events -- supported by Open Society Foundations, leveraging *60 Minutes*, *New York Times*, *PBS*, and *NPR* coverage.
- **Other consulting**: Helped create a new nonprofit conservancy organization for **Washington Square Park**; Advised **Youth Communication**, an NYC nonprofit that helps marginalized teens to write and publish for other at-risk teenagers, on development strategies.

BROOKLYN BRIDGE PARK CONSERVANCY, Brooklyn, New York

President, September 1999 to June 2009; **Deputy Director,** March 1999 to September 1999

Directed all aspects of a nonprofit citizens' organization, growing it from an original budget of $10,000 to $1.35 million annually, building a 26-member board of directors and staff of 11, and successfully helped to develop

government and public-private partnerships to win the political and financial support for construction of a new $500 million waterfront park in New York City. Responsibilities and accomplishments included:

Broad-based Citywide Advocacy

- Designed and managed a multi-year successful advocacy effort for Brooklyn Bridge Park. Engaged elected officials, civic, community, and environmental leaders, and media, resulting in more than $280 million in capital construction funds and organizational support. Today, more than 90% of the Park is built.

- Developed and implemented two major strategic plans, working with board, community, and consultants, to guide the organization's vision and growth, and its long-term programming partnership role and budgets. Led board in an organizational branding process, working with consultants and stakeholders.

- Raised more than $10 million over 10 years from a balanced and diverse funding base of government support, earned income, and private contributions; recruited and engaged the board, growing it from 5 to 26; recruited and managed a staff that grew 500% and attracted hundreds of volunteers.

Public Programming

- Developed and managed free educational, recreational, stewardship, and cultural programming that attracted more than 500,000 people from 1999 through 2009. Highlights included *The Floating Pool and Brooklyn Bridge Park Beach* in 2007 (71,000 visitors in 9 weeks), *Summer '08 at Pier One* (192,000 visitors in 13 weeks), and *Movies With A View*, drawing more than 100,000 people over 9 summers -- generating national and international media attention for the beginnings of Brooklyn Bridge Park (including prompting a New Yorker magazine cover).

Communications, Marketing, and External Affairs

- Crafted all media strategies; served as the organization spokesperson in all media relations, including print, TV, cable, radio, and social media; managed organization newsletter, website, member database, and all e-communications; supervised the creation of all marketing materials for the organization.

EXPERIENCE

Chief Development and Evaluation Officer • The HOPE Program • 2011 - Present

Organizational Growth

- Spearhead all revenue acquisition to grow HOPE from $2 million to $9 million annually
- Launched and grew HOPE's signature fundraising gala which has raised over $1.5 million in unrestricted funds and achieved an efficiency rate of 90% each year
- Achieved two government grants which marked the largest investments in HOPE in organizational history: $1.8 (3 years) from the Office of the Manhattan District Attorney to build HOPE's social enterprise and $1.5 (2 years) in a highly competitive federal Department of Labor YouthBuild grant
- Engaged with elected officials to grow HOPE's discretionary funding by a factor of 10
- Successfully launched innovative fundraising strategies to ensure continued organizational viability during COVID-19

Strategy and Planning

- Spearheaded 2015 acquisition of Sustainable South Bronx, marking the boldest phase of growth in HOPE's 30-year history, alongside Executive Director and board leadership
- Served on committees of key staff and board members in developing 2 organization-wide strategic plans
- Leading the ground-up implementation of a new, custom Salesforce.com database to meet needs across program, development, and finance teams
- Serve on a cross-departmental team to improve HOPE's Diversity, Equity, Inclusion, and Accessibility practices

Media and Communications

- Serve as lead media contact to secure press coverage such as: NY Times & Bronx News 12
- Deliver compelling remarks to over 400 donors and partners annually at fundraiser
- Represented HOPE at an international conference on workforce development, hosted by The Organisation for Economic Co-operation and Development

Staff Management and Cultivation

- Meet the varying needs of staff at all levels, from recent graduates of HOPE's job training program to highly-experienced, Masters-level fundraisers to position them for personal growth and team success
- Develop, communicate, and support the implementation of key policies, ensuring continued success across all teams, particularly in a rapidly evolving work environment Introduce
- innovative staff benefits such as a sabbatical policy

Board Chair • College and Community Fellowship • 2021-Present

- Unanimously voted by fellow Board members to serve as Board Chair, managing the first Board Chair succession in organizational history
- Spearheading a high-level Executive Search
- Increasing Board engagement and accountability by establishing Board leadership meetings, committee reports at quarterly meetings, individual Board member outreach, etc.
- Continuous service on CCF's Board of Directors since 2004

Enthusiastic leader with demonstrated achievements in
Management, Capital Projects, Economic Development & Urban Policy

January 2016 - Present **URBAN HEALTH PLAN, INC.**
Bronx NY **Senior Director for Planning, Capital Projects & Community Development**
Executive Director, Greater Hunts Point Economic Development Corporation
Executive for a network of federally qualified health centers with responsibility for capital projects, planning, grants & contracts, and initiatives that link community development and health. Urban Health Plan is a $130 million organization with over 20 sites in the Bronx, Manhattan and Queens. Executive Director of UHP's community development affiliate – The Greater Hunts Point Economic Development Corporation.

August 2013 – November 2015 **BRIDGE STREET DEVELOPMENT CORPORATION**
Brooklyn NY **Chief Operating Officer**
Executive, planning and project leadership for an affordable housing and economic development organization focused on Central Brooklyn. Significant accomplishments: Created internal legal and contract capacity; *Kings Covenant* scattered-site TPT project increased affordable housing portfolio by nearly 30%; cultivated real estate development pipeline with public, private & faith-based partners; led new initiatives to increase return on portfolio commercial real estate and enhance neighborhood economic development.

July 2008 - February 2013 **CITY OF BRIDGEPORT**
Bridgeport CT
July 2012 - Feb 2013 **Director – Bridgeport Economic Development Corporation**
July 2008 - July 2012 **Director – Office of Planning & Economic Development**
Head of the City department responsible for economic and community development, housing, city planning, land use & zoning, neighborhood revitalization, historic districts, and building permits in Connecticut's largest city. Member of the Bridgeport Port Authority's Board of Directors and the Mayor's Cabinet. Significant accomplishments: Completed city -wide new *Master Plan of Conservation & Development* and revised *Code of Zoning Regulations*; generated $2 million from the sale of unused dilapidated City-owned commercial property; fostered a new development scheme for the City's 50-acre mixed-use *Steel Pointe Harbor*; oversaw doubling of the downtown residential population; $250 million in downtown projects in first 4 years, attracting several dozen new businesses; devised strategy and RFP for redeveloping 6 blocks of City-owned property in the downtown central business district; created the Business Development Loan, Storefront Improvement Grant and Bridgeport ArtsFest.

Jan 2004 - Sept 2007 **PROVIDENCE ECONOMIC DEVELOPMENT PARTNERSHIP, INC.**
Providence, RI **President**
CEO of the economic development corporation for Rhode Island's capital city. Managed a $13 million commercial loan portfolio, provided technical assistance to start-up and existing businesses, advised the city's political leadership on economic development strategy, and, served as city's primary liaison to the business and banking community. Significant accomplishments: $9 million in small business and economic development loans, financed 500,000 sq. ft. of residential/commercial/industrial real estate, created/retained over 1300 jobs.

2002 - 2003 **BRONX OVERALL ECONOMIC DEVELOPMENT CORPORATION**
New York City **Director - Workforce & Business Development**
Member of the senior management team for the economic development corporation for Bronx County. Responsible for new business development, relocations, technical assistance, and initiatives for employment &

training. Significant accomplishments: developed and implemented a federally-funded workforce development program to assist workers displaced by the post-9/11 economic downturn.

2001 - 2002 **BOARD OF EDUCATION OF THE CITY OF NEW YORK, OFFICE OF CHARTER SCHOOLS**
New York City **Director - Operations, Strategic Planning & Governance**
Responsible for policy, planning and facility operations for New York City's charter schools. Significant accomplishments: drafted and implemented the standard Operating Agreement between charter schools and the Board of Education for funding, services and fiscal/management/educational accountability.

1995 - 1998 **NYC DEPARTMENT OF CULTURAL AFFAIRS**
New York City **General Counsel**
Chief legal officer for a $200 million municipal agency responsible for promoting arts and culture in New York City, with oversight of 34 City-owned museums and cultural facilities.

ADDITIONAL EXPERIENCE: Corporate Attorney for the Consolidated Edison Company; Owner/Principal Attorney for the Law Office of Donald C. Eversley (contracts, intellectual property, arts, entertainment and branded products); founded Chatoyer Arts & Media, a performing arts management consultancy and South Atlantic Communications, a world music distribution firm; founding Executive Director of the Black Rock Coalition, a national performing arts nonprofit organization.

April 11, 2023

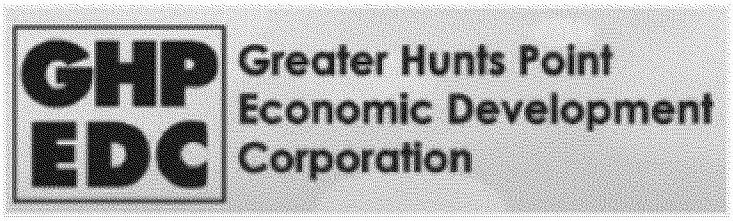
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
1200 Pennsylvania Ave, N.W.
Washington, DC 20460

Dear EJCPS Selection Committee,

I am writing this letter to express the NYC DOT's commitment to coordinating with Empire Clean Cities and the rest of the Equitable Commute Project (ECP) on its electric bike (e-bike) Accelerator Program. We have been advising the ECP team since 2020, and support their mission to increase access to UL-certified e-bikes for lower-income New Yorkers.

E-bikes provide low-emission, space-efficient, and affordable transportation that allows New Yorkers to move through our city while advancing Mayor Adams' climate agenda. With approximately 68% of car trips in NYC under five miles, e-bikes hold promise for helping the City reach its decongestion and decarbonization goals. However, high quality e-bikes remain out of reach for many, in particular lower-income workers. Reducing the barriers to purchasing these devices makes street safer, advancing NYC DOT's Vison Zero agenda while promoting active transportation alternatives. To support ECP, the NYC DOT commits to the following:

- **Collaborate on public outreach.** We will coordinate with the ECP on public events to spread awareness about the benefits and safe use of e-bikes.
- **Advise on policy research.** We will advise ECP on their research to increase relevance in a policy setting. We will continue meeting with the team on a quarterly basis to align efforts.
- **Provide program guidance and exchange lessons learned.** We will continue to engage with the ECP to ensure integration with the DOT's efforts to expand bike infrastructure and encourage safe e-bike use.



We believe the implementation of ECP's programs would have a meaningful impact increasing access to affordable, sustainable transportation in New York City's underserved communities. If you have any questions concerning our work with ECP and support of this project, please do not hesitate to contact me.

Sincerely,

Ydanis Rodríguez
Commissioner

NYC Department of Transportation Office of the Commissioner

Washington, DC 20460

Subject: Letter of Commitment for The Equitable Commute Project's *EPA's Environmental Justice Collaborative Problem Solving Program* application

To Whom It May Concern,

The Greater Hunts Point EDC (GHPEDC) is proud to be a partner in The Equitable Commute Project and will support outreach and community engagement efforts related to e-bike financing opportunities, workforce development, and safety education. GHPEDC strives to positively impact the quality of life for residents of the South Bronx by expanding opportunity, bridging gaps between the residential and business communities in our area, and strengthening the capacity of small enterprises and organizations to manage change and overcome challenges. As a partner in the ECP's application for the Environmental Justice Collaborative Problem Solving Program (EJCPS), GHPEDC will draw on our deep relationships within the community to address long standing transportation equity challenges facing residents of the South Bronx.

The South Bronx is an environmental justice community with high levels of unemployment, asthma, and limited access to public transportation. GHPEDC functions as an important support organization to Bronx small businesses and organizations, facilitating training, technical assistance, and networking opportunities to enhance the vitality of our shared community. As such, GHPEDC will support the ECP by sharing information about e-bike safety, workforce development opportunities, and Spring Bank's low-interest e-bike loan. This outreach will not only make e-bikes more accessible to residents, but will also impact public health and air quality, access to job opportunities, and help people build credit.

GHPEDC is committed to serving small businesses, community-based nonprofits, leaders, and workers in the South Bronx and is ready to leverage our skills, relationships, and our event calendar to promote equitable transportation and improve public health in the South Bronx. If you have any questions, please do not hesitate to contact me.

Sincerely,

Donald Eversley

THE HOPE PROGRAM THE HOPE PROGRAM

April 12, 2023

Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
1200 Pennsylvania Ave, N.W.
Washington, DC 20460

To Whom it May Concern:

I am writing on behalf of The HOPE Program (HOPE), a nonprofit organization that empowers New Yorkers to build sustainable futures through comprehensive training, jobs, advancement and lifelong career support, with a focus on opportunities in the green economy. We commit to working with Empire Clean Cities on The Equitable Commute Project (ECP). To support the project and its partners, HOPE commits to:

- Refining our recently-developed e-bike maintenance, repair, and lithium ion battery handling curriculum to prepare participants for micromobility careers
- Recruiting and training 15-20 candidates in our pilot cohort, and providing comprehensive wraparound services to support their success in the program
- Connecting trainees with e-bike shops for potential employment, providing formal retention and advancement services for one year post-hire

HOPE has successfully connected low-income New Yorkers with over 5,000 jobs since its founding in 1984, and has specifically focused on green jobs in the Bronx since 2015. We are a founding member of the Equitable Commute Project and have been a key player in its e-bike distribution programming and partnership development to date.

The HOPE Program is a fundamental partner in the ECP, ensuring that the Bronx has the local workforce needed to support expanded micromobility use, advancing lithium-ion battery safety education, and connecting low-income New Yorkers with equitable access to a sustainable transportation alternative.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Irene Branche

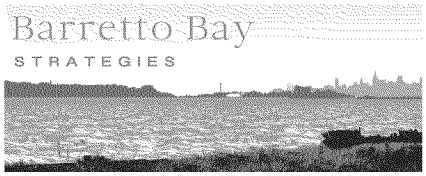
1200 Pennsylvania Ave, N.W.
Washington, DC 20460

To Whom It May Concern,

I am writing on behalf of the Center for Sustainable Business at the New York University Stern School of Business, whose Invest NYC SDG Initiative seeks to design and implement projects that create a more sustainable, inclusive, and resilient New York City. We commit to working with Empire Clean Cities on The Equitable Commute Project. To support the project and its partners, NYU CSB commits to:



- Supporting outreach to employers eligible to participate in Spring Bank's innovative low cost lending programs
- Leading data collection and evaluation for program impact and ridership • Supporting stakeholder outreach through presentations, meetings, and/or convenings

NYU CSB's involvement will catalyze the collection and dissemination of high-profile data and findings with the potential to inform e-bike uptake at the local, national, and international levels. As a world-leading academic institution, NYU is well positioned to magnify the impact of the Equitable Commute Project by tapping into the skills of our students, researchers, and faculty across affiliated research centers.

Sincerely,

Divya Subramanian

Associate Director, Invest NYC SDG Initiative, NYU CSB

Washington, DC 20460

To whom it may concern,

I am writing on behalf of **Barretto Bay Strategies**, an urban solutions consulting firm that provides strategic advising to municipal governments, anchor institutions, development organizations, and start-ups in the areas of clean energy, low-carbon logistics, and neighborhood revitalization. Its Clean Transportation practice helps animate markets for emergent technologies and disruptive business models, typically positioned at the interface of public policy and market development.

Our firm commits to working with Empire Clean Cities on **The Equitable Commute Project**. To support the project and its partners, Barretto Bay commits to:

- Building and strengthening relationships with Bronx-based organizations and leaders
- Advising on local economic development strategies
- Guiding and supporting engagement activities

Barretto Bay's long history in the borough and wealth of experience with local organizations ideally positions our firm to assist ECP's efforts to build a robust network of community partners in The Bronx. We look forward to working closely with all ECP's stakeholders to bring greater equity to commutation and mobility in our borough.
Sincerely,

Paul Lipson

Washington, DC 20460

To whom it may concern,

I am writing on behalf of **Transportation Alternatives (TA)**, an organization committed to reclaiming New York City from cars, transforming our streets into safe, sustainable, and equitable places to walk, bike, take transit, gather and thrive. In keeping with the substantial pro automobile development that the USA has undertaken at large, New York City followed the same model, sacrificing overall wellbeing in the process, and hurting the personal relationship of citizens with their own city. We commit to working with **Empire Clean Cities** on **The Equitable Commute Project**. To support the project and its partners, TA will

1. Support community and stakeholder outreach efforts and the planning and execution of events and advocacy.
2. Mobilize New Yorkers across NYC to advance change through grassroots organizing. TA amplifies the needs and voices of all residents, particularly those underrepresented in urban planning processes and underserved by existing transportation systems.
3. Continue to partner with ECP to advance sustainable and innovative e-micromobility policy, infrastructure investments, and access and opportunity in NYC. TA is the city's lead advocate for better and safer walking, biking, and public transit. We have led campaigns that brought citywide bikeshare, the first protected bike lanes, and the world's largest automated speed safety camera system to NYC. TA played a pivotal role in the 2020 legalization of e-micromobility in NYC – a policy win that was the culmination of years of advocacy fueled by TA activists and coalition partners.

Sincerely,

Christine Hsu
Deputy Director

Washington, DC 20460

To whom it may concern,

I am writing on behalf of Brightside Strategies, a Brooklyn-based consultancy specializing in micromobility. Our mission is to support companies, governments, and organizations to reduce car dependence with micromobility. We have a broad network of relationships across the micromobility industry, from e-bike manufacturers to lithium-ion battery recyclers.

We are a co-founder of the Equitable Commute Project, and commit to working with Empire Clean Cities on the ECP Accelerator program. To support the project and its partners, Brightside commits to leading marketing, communications, and policy efforts for the program. Brightside will use its expertise and connections to develop compelling outreach materials, enroll e-bike manufacturers in the program and secure discounted e-bikes, and support engagement of businesses to spur e-bike uptake.

Electric micromobility offers the opportunity to expand mobility access while lowering carbon emissions. Our team believes wholeheartedly in this program and commits to working with Empire Clean Cities to ensure its success.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Melinda Hanson

United States Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Re: New York City Housing Authority's Letter of Commitment of Equitable Commute Project's Accelerator Program for United States Department of Environmental Protection's Fiscal Year 2023 Environmental Justice Collaborative Problem Solving Program

To Whom it May Concern:

I am writing on behalf of the New York City Housing Authority (NYCHA) to express our commitment of support for the Equitable Commute Project (ECP)'s application for U.S. Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving Program (EJCPS) program for their Accelerator Program with Empire Clean Cities. NYCHA and ECP have been coordinating since Summer of 2022 on micromobility topics related to low- to moderate-income New Yorkers. NYCHA supports their mission to increase access to high-quality, UL-certified e-bikes for lower-income New Yorkers.

NYCHA is North America's largest public housing authority with over 500,000 low- and moderate-income New Yorkers living in NYCHA's 335 developments. Many NYCHA residents rely on electric micromobility devices including many who use e-bikes to earn a living as delivery workers.

To support the project and its partners, the NYCHA commits to the following:

- Advise on policy research – NYCHA's Sustainability department will advise the team on their quantitative and qualitative research to increase relevance in a policy setting
- Provide program guidance and exchange lessons learned – NYCHA's Sustainability department will continue to work with ECP on micromobility topics and share information regarding NYCHA's demonstration project with Con Edison

NYCHA is supportive of ECP's commitment to provide NYCHA residents with the resources to make knowledgeable decisions about these devices. ECP's Accelerator Program would work well in tandem in NYCHA's Micromobility Plan, which plans to provide outdoor charging and storage for electric micromobility devices.

Sincerely,

Siobhan Watson
Deputy Director of Sustainability Programs
Sustainability Department, Asset & Capital Management Division

The below table provides an overview of the ECP's engagement with target stakeholders.

Stakeholder engaged 2020-2023

TARGET STAKEHOLDER	GOAL OF ENGAGEMENT	ENGAGEMENT COMPLETED*	INFLUENCE ON ECP'S VISION
Prospective riders	Proof of concept; gather feedback to refine ECP approach	Example: Pilot distribution and training event matched 15 participants with e-bikes; follow-up interviews with participants	Improved understanding of the program's potential benefits, barriers to use, and areas for improvement
Employers/ distribution partners	Build employer buy-in and interest in ECP; gauge current mobility preferences, interest in e-bikes, and potential concerns with e-bikes	Example: E-bike demo and surveying at the Greater Hunts Point Economic Development Corporation's Spring Mingle event	Improved understanding of employee health and/or financial stress or lateness caused by commuting challenges. Helped identify program factors that require more clarification
E-bike vendors	Identify inventory of quality e-bikes; confirm supply will meet demand; confirm discounts and supportive services for ECP participants	Example:Discussions with e-bike shops and manufacturers including Mr C's, Rad Power, RidePanda, and VanMoof	Inspired requirement of certified e-bikes and helped ECP shape a more streamlined approach to e-bike inventory, distribution strategy, and supportive services
NYC NGOs/ community groups	Gauge interest and potential uptake of ECP offerings to diverse constituent groups; gauge mobility preferences, interest in e-bikes, and concerns with e-bikes	Example: Focus group and community survey with the staff and Hunts Point community members at The Point CDC's annual town hall	Helped gauge potential uptake of e-bikes in our target communities, ascertain interest in the subsidy and affordable financing, and identify the most common barriers to e-bike use
City agencies	Build buy-in from City partners who play significant roles in cycling infrastructure investments and policy in NYC; secure programmatic and policy support for ECP implementation	Example: Strategy discussions with NYC Economic Development Corporation and NYC Department of Transportation	Strengthened the ECP's safety education approach, informed our infrastructure advocacy, and honed our geographic focus areas
Utilities and supportive infrastructure providers	Build buy-in from utility providers and cycling infrastructure companies in target communities; secure programmatic and policy support for ECP implementation	Example: Check-ins with ConEd, Oonee (bike parking solutions), and Swiftmile (e-bike charging) regarding the need for supportive cycling/e-bike infrastructure in the Bronx and Brooklyn	Provided insight into what supportive infrastructure was currently available, planned, or missing in ECP communities. Helped to shape ECP advocacy priorities for equitable infrastructure supporting e-bike users
Curriculum experts	Gain guidance from leaders in bike education and workforce training; identify and secure partners for relevant curriculum development	Example: Calls with Brown Bike Girl and Bike New York focused on best practices for e-bike safety training. Calls with Worker Transportation Cooperative focused on e-bike technician curriculum development	Enabled ECP to develop informed initial scopes for e-bike ridership education and safety training, as well as e-bike maintenance curriculum

Elected officials	Build buy-in from elected leaders who could champion cycling infrastructure investments and policy in NYC; secure programmatic and policy support for ECP implementation	Example:Presentations to Council and Assembly Members and, when possible, ECP distribution events and e-bike community discussions with participation by Council Members	Emphasized the importance of consistent and persistent education on the many benefits of e-bikes and the necessity of advocacy for better and safer physical infrastructure to support ridership
National and international NGOs	Gain national and international learnings regarding best practices to grow e-bike ownership/ridership and the successes and challenges of existing e-bike subsidy programs around the world.	Example: Meetings with organizations including National Association of City Transportation Officials, People for Bikes, World Resources Institute, Onward Oregon, World Business Council for Sustainable Business, the United Nations, and the World Economic Forum (among others)	Provided insight into global trends for e-bike utilization, policy and infrastructure needed to effectively spur uptake and sustain and positive perception. Informed ECP's policy + communications strategy

1.A. Project Summary Page

Project Title: Equitable Commute Project Accelerator (**ECP Accelerator**)

Project Location: ECP Accelerator will focus on the Bronx, New York neighborhoods of Hunts Point, Longwood, Melrose, Morrisania, Mott Haven, and Soundview.

Applicant Information: New York City and Lower Hudson Valley Clean Communities, Inc. (D/B/A: Empire Clean Cities); **Point of Contact:** Joy Gardner, Executive Director
55 Water Street, 6th Floor NY, NY 10041 | Ex. 6 - Personal Privacy (PP) | joy@empirecleancities.org

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No
Project Types: Public education, transportation equity, and workforce training
Special Considerations: Climate Change/Disaster resiliency
Environmental Issue: Air quality
Will you need to develop a QAPP for your project? Yes

Applicant Organization: Empire Clean Cities is a 501(c)(3) organization working to reduce transportation emissions while advancing economic opportunity. Since 2007, ECC has provided education and outreach, technical assistance, community engagement, and technology deployment support to NY State and local municipal agencies, fleets, transportation and infrastructure industry partners, and community-based organizations.

Project Abstract: ECP Accelerator will address the need for equitable and sustainable mobility by expanding e-bike access in South Bronx communities that have been disproportionately impacted by environmental pollution and underinvestment, thereby improving air quality, promoting wellness, and dramatically reducing commute times. ECP Accelerator will increase awareness, demand, and safe adoption of e-micromobility through **(i)** conducting community and workplace outreach, **(ii)** connecting lower income New Yorkers to an accessible, credit-building loan, and **(iii)** advancing lithium-ion battery education in workforce training programs. We will partner with employers, bike shops, and NYC-DOT and NYCHA to offer test rides, safety education, and a concierge service to connect Bronx residents with high-quality, affordable e-bikes. We will support access to funding to e-bikes, including the Spring Bank's credit-building Green Mobility Loan, a program that is open to all, regardless of credit history. And we will recruit and train job seekers for the micromobility workforce in lithium-ion battery handling, in a pilot to fill NYC's strong need for this expertise.

Project Partners:

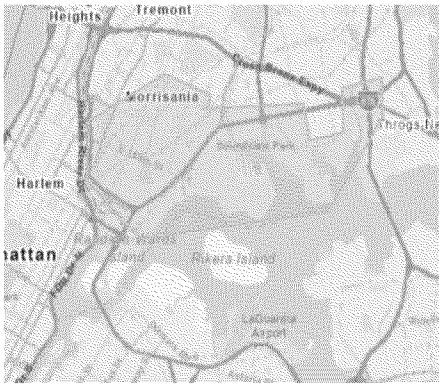
- The HOPE Program (HOPE), Bronx-based CBO
- Greater Hunts Point Economic Development Corporation (GHPEDC), Bronx-based CBO
- Transportation Alternatives (TA), sustainable transportation CBO
- Spring Bank, Bronx-based Community Development Financial Institution (CDFI), B-Corp
- New York University Stern School of Business Center for Sustainable Business (NYU), academic partner
- Brightside, micromobility industry partner
- Barretto Bay Strategies (BBA) economic development consultancy
- New York City Department of Transportation (NYC DOT), government/municipal partner
- New York City Housing Authority (NYCHA), government/municipal partner

1.0 PROGRAM OBJECTIVES

1.B. Environmental and Public Health Information of the Underserved Community

The ECP Accelerator will address environmental injustices in the South Bronx neighborhoods of Hunts Point, Longwood, Melrose, Morrisania, Mott Haven, and Soundview. These communities have a population of over 730,000 diverse residents, where 98% are non-white or of Hispanic/Latinx origin. The South Bronx has a vibrant history and is home to diverse cultural movements and a wide range of immigrant communities. These communities have faced decades of underinvestment and neglect, as described below.

1.B.1. The South Bronx's history of disproportionate environmental injustices



The ECP Accelerator communities have long been subjected to disproportionate levels of air toxicity from vehicle emissions. The construction of the Cross Bronx Expressway and other federal highway projects in the mid-20th century led to the bisecting of South Bronx neighborhoods, displacing over 60,000 people, inviting high levels of traffic pollution, and limiting economic access for residents. The South Bronx is also home to one of the largest food distribution sites in the country, contributing to significant daily diesel truck traffic. Finally, residents have experienced consistent underinvestment in green spaces, with zoning resolutions favoring industrial development over parks and bike lanes.

The impact of these policies can be seen in disproportionate levels of air pollution, including particulate matter (PM), ozone, and diesel particulate matter, as well as other intersectional impacts. According to the Climate and Economic Justice Screening Tool (CEJST), the South Bronx neighborhoods included in the proposed ECP Accelerator meet Justice40 criteria in six categories including transportation, health, housing, legacy pollution, water and wastewater, and workforce development.

(i) The heavy traffic crisscrossing the South Bronx contributes to poor air quality and high levels of emission-related illnesses. According to the EJ Screen tool, these neighborhoods have up to 96% higher concentration of fine particulate matter (PM 2.5) than the statewide average, resulting in high rates of respiratory disease. Asthma-related ER visits among children are nearly double the citywide rate in Hunts Point, Longwood, Morrisania, and Soundview, while rates in Mott Haven and Melrose are three times the citywide rate. Beyond respiratory illness, the impact on human health from breathing diesel emissions leads to an elevated risk of cardiovascular disease: the Bronx has a heart disease mortality rate 42% higher than Manhattan.

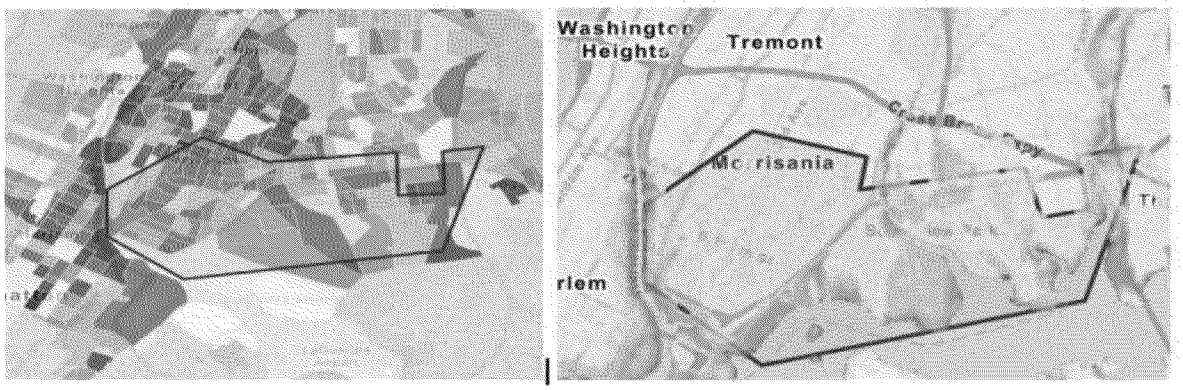
(ii) Systemic under-investment has limited economic opportunity, resulting in disproportionate levels of poverty. According to EJ Screen, 59% of South Bronx residents are low income. Public housing is concentrated in the South Bronx and makes up almost 10% of all housing units–the highest rate in the five boroughs. Around 11% of the population is unemployed, and almost 40% are below the Federal Poverty Line.

IMAGE 1.1: THE SOUTH BRONX (SHOWN AT LEFT) AND ASSOCIATED EJ INDEXES COMPARED TO NYS AND THE US

Selected Variables	State Percentile	USA Percentile
Environmental Justice Indexes		
Particulate Matter 2.5 EJ index	96	91
Ozone EJ index	91	88
Diesel Particulate Matter EJ index*	97	99
Air Toxics Cancer Risk EJ index*	95	98
Air Toxics Respiratory HI EJ index*	96	98
Traffic Proximity EJ index	91	94
Lead Paint EJ index	76	93
Superfund Proximity EJ index	87	95
RMP Facility Proximity EJ index	94	91
Hazardous Waste Proximity EJ index	96	99
Underground Storage Tanks EJ index	95	98
Wastewater Discharge EJ index	83	84

(iii) Long commutes and lack of access to reliable and affordable sustainable transport limit economic opportunity and contribute to carbon pollution and financial stress. Although NYC is home to the nation's largest public transit network, many low-wage workers in the Bronx live in transit deserts and face long, complex, and unreliable commutes. While the national average commute is 28 minutes, the average commute time for South Bronx residents is almost one hour each way. Long commutes negatively affect long-term economic prospects: the longer a commute, the lower the chances of lower-income families moving up the economic ladder. Unreliable transit pushes people into car ownership and predatory loans: as of March 2023, the severe delinquency rate on auto loans is the highest it has been in 17 years. Finally, long and unpredictable commutes lead to higher levels of stress, exhaustion, and decreased focus.

(iv) The ECP Accelerator communities face a heightened risk of coastal flooding, as they include a significant percentage of coastal and low-lying tracts. Lower-income communities in the South Bronx are particularly vulnerable to flooding. Increasing the number of transportation options increases community resilience: New Yorkers have turned to bikes and e-bikes in the wake of Hurricane Sandy and COVID-19. By diversifying transportation options through e-bikes, we relieve the burdens on our community's highways and transit systems, mitigating traffic and improving the community's ability to move in the face of a potential environmental disaster. Further, reducing car emissions, in part through a transition to e-bikes, can help to slow sea level rise, reducing the risk of coastal flooding.



1.B.2. ECP Accelerator will reduce air pollution while expanding access economic opportunity

The ECP Accelerator aims improve air quality and economic access by expanding access to reliable, zero-emission transportation options. As described in section 1.B.1, air pollution in the Bronx is primarily due to transportation emissions, while poor transportation access compounds the inequity many Bronx residents confront daily, eroding health, well-being and impeding wealth creation.

Surveys conducted by our ECP partners found that 82% of respondents in the Bronx are interested in trying an e-bike for commuting, but cost and lack of familiarity with electric micromobility are limiting uptake. ECP Accelerator will address this barrier by creating pathways to overcome financial and social barriers to uptake through (i) community and employer outreach and (ii) expanding access to a low cost, credit-building loan. Our workforce development initiative

(iii) will help to create green jobs, while growing expertise in the proper handling and disposal of lithium-ion batteries.

IMAGE 1.2: THE SOUTH BRONX FACES DISPROPORTIONATELY HIGH RATES OF ASTHMA (L) AND FLOOD RISK (R)

1.B.3. Benefits and results of ECP Accelerator

ENVIRONMENTAL BENEFITS

(i) Reduce car trips by expanding access to zero-emission mobility options. As of 2018, 40% of Bronx households owned cars. This figure has increased even more in recent years, with new car registration jumping 37% citywide between August and October 2020. In 2018, more than 68% of users of for-hire vehicles in the South Bronx said that services such as Uber, replaced transit trips that were otherwise long, onerous, or inaccessible. This continues to add to significant traffic congestion, compounding vehicle emissions in an already overburdened community. Over the two years of the program, we expect to directly connect at least 500 individuals to e-bikes directly and reach at least 3,000 through outreach and education. E-bikes are the most efficient form of motorized transportation, with even fewer carbon emissions than NYC's buses and subways. An early pilot conducted by our ECP parents in the Bronx has shown the power of e-bikes to reduce car trips. For example, Pamela Martinez, a Bronx-based teacher assistant, and mother of two, reports that her ECP e-bike has saved one hour of commuting time each workday and eliminated the need for 4-6 weekly costly Uber trips. **RESULTS:** By shifting transportation modes of residents served by this program, we expect to mitigate an average of 2,500lbs of carbon emissions for every new e-bike on the road. The Bronx communities will directly benefit from this reduction in emissions through improved air quality.

(ii) Expand access to e-bikes increases community resilience. In the wake of Hurricane Sandy and the COVID-19 pandemic, tens of thousands of New Yorkers turned to bikes to get to work and for basic transportation needs. East River bike crossings doubled after Sandy. Increasing transport options is key to improving community resilience. **RESULTS:** By expanding mobility options, each ECP participant will increase their transportation resilience and support a vital network in the event of any emergency.

ECONOMIC BENEFITS

(iii) Reduce commute time and expand access to opportunity. With subway and commuter rail lines running north-south, east-west commutes in the Bronx are particularly arduous. For

example, the 4.5-mile commute from Soundview to the main campus of Montefiore Medical Center (the borough's largest employer) is a multi-modal odyssey that typically lasts more than one hour and requires a subway ride and two bus transfers. On an e-bike, that one-hour commute is reduced to a 20-minute ride, returning valuable personal time to the commuter without increase emissions. **RESULTS:** Based on findings from ECP partners, the ECP expects to save 250 hours of commute time per year for each e-bike purchased while doubling the number of accessible job opportunities.

(iv) Expand mobility options while reducing the financial burden of car ownership. With rising loan rates and higher vehicle prices, the average cost of a new car is $47,680, and the average car loan payment is $730/month–not including insurance, maintenance, and parking costs. Surveys reveal lower income families are likely to pay a higher purchase price than higher income families buying comparable cars, receive a higher interest rate to finance the purchase, and pay more for insurance. Micromobility provides an affordable, sustainable option, freeing lower income New Yorkers from the burden of unaffordable automobile costs. **RESULTS:** ECP Accelerator will save participants $7,500 each year, as compared to car ownership, and an estimated $3,000 each year for frequent Taxi/Uber users.

(v) Support participants in building a positive credit history. Spring Bank's credit-building e-bike loan will help individuals without credit history to establish and grow their credit score, improving overall financial access. **RESULTS:** ECP Accelerator will directly help an estimated 300 people to build credit and enroll at least ten more employer institutions in Spring Bank's Employee Opportunity Loan program.

1.C. ECC's Historical Connection to Underserved Community

1.C.1. Empire Clean Cities and ECP team's history of involvement with the Bronx community

Since 2007, ECC has employed a community-engaged design approach to improve air quality, mitigate vehicle emissions, and address environmental justice issues impacting the health and wellness of South Bronx residents. With an active Board of Directors made up of local environmental advocates, government officials, and transportation experts, ECC has helped fleet owners in the South Bronx transition away from diesel powered technology, connected, and collaborated with local community partners to shape and implement projects, and supported outreach campaigns that engage the community and maximize project impacts. Specific projects and collaborations are described in Section 1.C.2.

In 2020, ECC joined The Equitable Commute Project (ECP) and began to work with a coalition of partners to expand access to micromobility options through community engagement, workforce development, and policy research and communications. ECP partners have decades of experience working in the South Bronx, with strong ties to local businesses and community members. For example, ECP project partner The HOPE Program has facilities in the South Bronx where they provide workforce training for green jobs, while Barretto Bay Strategies has forty years of experience advancing clean transportation projects in the community. Spring Bank has been serving businesses and individuals in the Bronx since 2007, and Transportation Alternatives has been organizing in the Bronx for almost 50 years.

1.C.2. ECC'S work with Bronx communities to address environmental issues

Empire Clean Cities (ECC) has a long history of working on a variety of projects alongside Bronx communities to address local environmental issues, including participating in the Equitable Commute Project to support the shift to zero-emission micromobilty transportation. In 2021, ECC was awarded an EPA Diesel Emission Reduction Act (DERA) grant to replace 19 diesel Transport Refrigeration Units (TRUs) with fully electric TRUs powered by the grid and solar electricity in South Bronx's Hunts Point Produce Market. There are over 200 old diesel TRUs that idle for hours each day, contributing to poor air quality and related public health impacts in the community. ECC is collaborating with two South Bronx-based TRU fleet owners, government stakeholders, and community partners to host workshops and demonstration events to replace the old TRUs, as well as support project replication. This project is estimated to reduce 28.074 tons per year (tpy) of PM2.5, 31.37 tpy of NOx and 68.121 tpy of CO emissions each year and will serve as a model for other urban food distribution sites.

ECC is also an outreach partner for the New York State Energy Research and Development Authority's (NYSERDA) Truck Voucher Incentive Program (TVIP) and NYC DOT's Clean Trucks Program. The goal of these programs is to help fleets transition from diesel-powered medium and heavy-duty vehicles through incentives, including point-of-sale vouchers that reduce the cost of all-electric and alternative fuel trucks and buses, thereby reducing emissions in the neighborhoods impacted by truck routes. ECC provides outreach support to connect fleets and stakeholders in the Bronx and beyond with these programs.

ECC is currently partnering with three NYSERDA New York Clean Transportation Prize (CTP) winners to enhance clean transportation in the Bronx, improve mobility options, and reduce harmful emissions in disadvantaged communities. Projects include (i) **Freight Electrification-as-a-Service for Transformation (FEaST),** which seeks to tackle barriers to electric truck adoption and deploy heavy duty electric trucks, infrastructure, and workforce training in and around the South Bronx. ECC is partnering with local community based organization, South Bronx United (SBU), to support community and fleet outreach for this project; (ii) **The Bronx is Breathing,** which will deploy electric trucks and develop a public fast charging hub for medium and heavy duty electric vehicles in Hunts Point, as well as provide workforce development training and access to zero-emission trucks for Bronx-based nonprofit City Harvest; and (iii) **Accelerating New York Fuel Cell Bus & Hydrogen Infrastructure Deployments,** which will support the MTA to pilot two hydrogen fuel cell buses along Bronx routes in underserved communities. ECC is working with the MTA to conduct community lessoning sessions/townhalls with two South Bronx CBOs.

In addition to grant funded initiatives, ECC supports outreach and education about clean transportation in partnership with the NYC Department of Transportations' Public Space Programming Initiative. ECC hosts clean transportation festivals at open street events, promoting electric vehicles, anti-idling campaigns, and multilingual educational activities. These events are free to attend and give ECC the opportunity to build relationships in South Bronx communities and engage in conversations about issues effecting residents, including traffic noise and

emissions, clean mobility options, and gather feedback about the community's transportation needs and priorities, all of which has helped to inform the ECP Accelerator.

1.C.3. ECP Accelerator was shaped through community-driven participation

The proposed project, the ECP Accelerator, has been shaped through almost three years of research and community engagement with our project partners. During this time, the ECP team has organized more than 35 meetings and community events to better understand barriers to e-bike ownership, ideal program offerings, and interest levels in communities across NYC. These efforts have included a pilot distribution event in 2021, focus groups with local employers and community organizations, and surveys with South Bronx residents about commute challenges and preferred solutions. The ECP team has successfully matched 20 low-income New Yorkers with subsidized e-bikes and organized an e-bike technical training workshop. Community engagement has ensured that our approach addresses the needs of our target constituency, remains respectful of diverse perspectives, values, and local contexts, and takes into account both potential indirect impacts and unintended burdens.

Surveys and interviews with pilot participants showed an overwhelming interest in e-bikes, but a lack of access to affordable, quality e-bikes. Eighty percent of the pilot ECP bike-match participants said they were "unlikely" to have been able to purchase an e-bike without the program, while the others said they would have purchased a lower-quality e-bike. The pilot also found that participants reduced their commute times by 50% on average, reported higher commute satisfaction, and took fewer car trips, demonstrating that e-bikes can reduce carbon emissions from transportation, increase access to employment, and improve quality of life. Several participants in the e-bike technical training workshop expressed a desire to learn how to repair an e-bike and considered it an essential life skill.

These continued outreach and engagement efforts have shaped and refined our vision. We have kept in touch with pilot participants and continue to use their feedback to continue evolving the program. The ECP Accelerator will continue to follow this approach, continuously incorporating community feedback, addressing obstacles as they arise, and adjusting outreach and engagement activities when necessary to properly address the community's needs.

1.D. ECP Accelerator will focus on steps three through seven of the EJCPS Model

Since the ECP partnership launched in July 2020, it has continued to evolve based on community input. We have engaged more than 35 organizations, government agencies, and businesses at the forefront of community finance, workforce development, transportation advocacy, social services, micromobility policy, and micromobility innovation and technology. The Letters of Commitment and Community Partners (Attachment 3) lists groups we have engaged, while the table below summarizes our progress using the EJCPS model.

EJCPS Element	Status	Notes

ED_016126_00000985-00007

1. Issue identification + community vision	Complete	The ECP has evolved since its start in summer 2020. Through community engagement and pilot programs, we have further developed our understanding of the challenges of commuting in the Bronx. We have collectively identified that e-bikes are a desirable mobility solution for up to 82% of individuals surveyed, and that cost and lack of information are key barriers to e-bike access.
2. Community capacity building + leadership development	Ongoing	The ECP-Accelerator model focuses on partnering with local employers and community groups to promote large-scale access to e-bikes and safety training. Further, through our proposed workforce development program, we are building capacity for increased e-bike use in the Bronx by establishing the workforce required to safely maintain e-bikes.
3. Consensus building + dispute resolution	Ongoing	The ECP continues to engage community groups, anchor institutions, bike shops, and other stakeholders to gather feedback on our approach and find ways to support them in connecting their constituents to e-bikes. Stakeholder feedback, data collection and analysis, and program assessments will be used to address potential conflicts and course correct, as needed.
4. Multi-stakeholder partnerships + leveraging resources	Priority for the EJCPS grant	With funding from EJCPS, we will deepen ties with Bronx bike shops and e-bike manufacturers to negotiate discounts for ECP participants. We will also develop an e-bike "concierge" program, engaging members of the community to support those interested in an e-bike to find and purchase the right one.
5. Constructive engagement by relevant stakeholders	Priority for the EJCPS grant	With support from the EJCPS program, we will facilitate engagement between cyclists and the NYC agencies (NYC DOT and NYCHA) by surveying participants to understand their experience biking in the city, collecting stories about the real-world impact of e-bikes in supporting economic access and supporting ECP participants to engage in DOT and NYCHA feedback sessions to ensure their voices are heard around new bike infrastructure projects.
6. Sound management + implementation	Priority for the EJCPS grant	With support from the EJCPS program, we will leverage the community's abilities and talents by designing feedback mechanisms that facilitate stakeholder input, assess program messaging, and incorporate community feedback in program assessments and design recommendations.
7. Evaluation, lessons learned + replication of best practices	Priority for the EJCPS grant	With support from the EJCPS, we will institute feedback mechanisms to ensure we are soliciting input from key stakeholders, evaluating progress quarterly, and documenting and sharing information on success.

1.E. Project Linkages: ECP Accelerator supports EPA's Goal 2, Objective 2.1

ECP Accelerator will support EPA's strategic plan (goal 2, objective 2.1) through **(i)** building capacity and climate resilience and maximizing benefits to underserved communities and **(ii)** engaging and supporting state and local governments.

(i) Building capacity and climate resilience and maximizing benefits to underserved communities. By connecting underserved communities with affordable and sustainable transportation and providing workforce training, we are supporting reliable access to economic opportunity and expanding community resilience. Bikes have repeatedly shown their value as a resilience tool. For example, in 2012, in the aftermath of Hurricane Sandy, many New Yorkers turned to bikes to get to work and run errands. A bike boom also occurred during the COVID pandemic, when New Yorkers were wary of public transit. Through our workforce development

ED_016126_00000985-00008

program, we are building capacity to ensure overburdened communities are first in line for jobs in the $300 billion micromobility industry.

(ii) Engaging and supporting state and local governments. Through our partnership with the New York City DOT and New York City Housing Authority (NYCHA), we are supporting community engagement to inform and advance clean transportation programs and priorities. ECP Accelerator will ensure underserved communities have a seat at the table and that they are actively involved in decision-making about bike lanes, safe street design, and other issues that impact their communities.

1.F. Partner and Collaborate

1.F.1. ECC will accomplish its goals through partnerships with multiple stakeholder groups

Partnership collaboration is at the core of The ECP Accelerator. Over the past 3 years, Empire Clean Cities has partnered with Transportation Alternatives (TA), an advocacy nonprofit; Greater Hunts Point Economic Development Corporation (GHPEDC), an economic development non-profit; Barretto Bay Strategies, an economic development consultancy; Brightside, a micromobility industry consultancy; and academic institution New York University (NYU), NYC Department of Transportation, and Spring Bank to identify the solution to the transportation and pollution issues in the South Bronx. By partnering with a wide-range of stakeholder groups, with deep roots in the South Bronx and micromobility industry, we are able to work at address mutli-barriers to e-bike adoption and leverage our collective resources, networks, and technical expertise to accomplish our project goals.

1.F.2. ECP Accelerator Includes Nine Core Partners

The ECP team includes representation from CBOs, academia, government, financial institutions, and the private sector. The below table summarizes roles and responsibilities, resources brought to the project, and the organization's vested interest in the Bronx neighborhood we will serve. Attachment 3 includes letters of commitment from each organization.

Partner/Stake-holder Group	Role and responsibilities	Resources brought to the project	Vested interest in partnership
Empire Clean Cities (Clean Transportation Nonprofit and U.S. Department of Energy Clean Cities Coalition)	Serve as the PM and oversee grant management, budget, and stakeholder coordination. ECC will also support community outreach.	Experienced supporting clean transportation projects in EJ communities through education and outreach, collaboration with public and private stakeholders, and technical and logistical assistance.	ECC's mission is to reduce transportation emissions, while carrying out the Justice40 commitment to invest in communities that are marginalized, underserved, and overburdened by pollution.
NYC DOT (Government partner)	Advise on program guidance, policy research, and ensure the program aligns with municipal micromobility programs. As well as collaborate on events and outreach.	The NYC DOT staff bring decades of experience working in the Bronx to support micromobility. This project will collaborate with existing e-bike programs, events, and policies to maximize our reach in South Bronx communities.	NYC DOT and Mayor Adams are committed to expanding equitable access to transportation alternatives, such as e-bikes. The City currently has plans to expand bike lanes and promote access to high-quality micromobility options.

The HOPE Program (Workforce development CBO)	Oversee workforce development, lithium-ion battery charging training, participant recruitment, and job placement. Specifically, they will train one pilot cohort of 15-20 jobseekers.	Proven job training, placement, retention, and advancement programming (including a tenured staff); experience with successfully recruiting jobseekers and working with employers to ensure job placement and career success	HOPE trains job seekers for careers in the green economy. The expansion of e-mobility brings new opportunities for sustainable careers for our target population. Further, HOPE is interested in making green commuting options more accessible to their working clients who live in transit deserts.
Greater Hunts Point Economic Development Corporation (CBO)	Institutional outreach, small business outreach, employer outreach	Vast network of organizational and community-based collaborators, including its parent organization, Urban Health Plan, a large federally qualified health care network	GHPEDC seeks to improve the quality of life and the climate for small business in the South Bronx. Enhanced mobility and friction-less commutation are key quality of life indicators for both employers and workers in those communities
Transportation Alternatives (Sustainable transport CBO)	Support community and stakeholder outreach efforts and the planning and execution of events and advocacy.	TA mobilizes a network of resident activists across NYC, and effects change through grassroots organizing that amplify the voices of New Yorkers, particularly those underrepresented in urban planning processes and underserved by existing transportation systems.	TA is NYC's lead advocate for better and safer walking, biking, and public transit. We have led campaigns that brought bikeshare, the first protected bike lanes, and the world's largest automated speed safety camera system to NYC. TA played a pivotal role in the 2020 legaliza-tion of e-micromobility in NYC.
Spring Bank (CDFI and B-Corp)	Fund, promote and administer its credit-building green mobility loan, making finance accessible regardless of credit history.	Spring Bank has funding in hand from the bank's equity as well as grants from the US Treasury CDFI Fund for loan capital and to administer its e-bike loan.	Spring Bank is based in the Bronx, and a majority of its corporate and individual clients are Bronx-based
NYU Stern (Academic partner)	Support business outreach for e-bike uptake, stakeholder engagement, and tracking program effectiveness, as well as promoting the Spring Bank lending program across financial institutions.	NYU brings a global academic reputation and a community of students, faculty, and researchers whose will support data collection and evaluation. NYU has proven expertise on issues including transportation, smart cities, and sustainable urban economies.	The Invest NYC SDG Initiative at the NYU Stern Center for Sustainable Business (CSB) seeks to catalyze projects that create a more sustainable, resilient, and equitable New York City. The CSB is a founding member of the ECP.
Brightside (Industry partner)	Responsible for project marketing, media relations, and strategic partnerships with e-bike vendors.	Brightside brings a technical understanding of the micromobility industry, as well as industry connections to bolster ECP and increase its impact.	Brightside is committed to advancing equitable climate solutions in underserved communities across its consulting practice. The firm is a founding member of the ECP.
Barretto Bay Strategies (Business partner)	Responsible for outreach and engagement with Bronx anchor institutions.	BBS brings an extensive network of personal and professional connections from across the Bronx.	40 year track record of advancing economic development & sustain-able transport projects in the Bronx.
New York City Housing Authority (NYCHA)	Advise on policy research and provide program guidance. The program will also	NYCHA brings technical expertise, as well as stablished relationships with Bronx residents living in public	NYCHA is the largest public housing authority in the U.S. and many residents rely on e-micromobility to earn a living.

(Government partner)	coordinate outreach activities with NYCHA residents.	housing. By partnering with NYCHA, the ECP can ensure alignment with existing and upcoming municipal policies and initiatives.	This project aligns with NYCHA's Micromobility Plan, which plans to provide outdoor e-bike charging and storage for residents.

1.F.2.A Maintaining and sustaining partner relationships into the future

The ECP partnership came together in 2020, inspired by a shared goal of advancing environmental justice, public health, and access to green jobs through micromobility. Partner organizations are fully aligned in their deep commitment to serving communities in the South Bronx. In the nearly three years since, the core partners have met weekly to develop and implement community engagement strategies, cultivate bike shop partners, compete for funding opportunities, pilot e-bike distribution, and much more. To date, these services have been provided in-kind by each partner organization. An investment from EJCPS will further catalyze these partnerships and enable us to establish formal working agreements to sustain the work through the length of a cooperative agreement and beyond.

To sustain these partnerships, we will 1) ensure that each partner is represented by two or more staff people, ensuring continuity through staff transitions; 2) continue to meet weekly (with potential subcommittee meetings as the program ramps up); 3) formalize working agreements to ensure clarity among partners; 4) establish transparent mechanisms to monitor progress toward goals of each partner and troubleshoot collaboratively toward solutions; and 5) ensure equitable recognition across all partners to celebrate each organization's investment in a healthier and more economically sustainable South Bronx.

1.F.2.B. Compliance with EPA's Subaward Policy + Participant Support Costs

Empire Clean Cities employs a Fiscal Policies and Procedure Manual (FPPM) to ensure that financial statements conform to generally accepted accounting principles; assets are safeguarded; regulations or guidelines of grantors and donors are followed; and that finances are managed with accuracy, efficiency, and transparency. The FPPM was approved by the United States Environmental Protection Agency (US EPA) and a pre-award assessment in September 2022 and complies with the EPA's subaward policies.

As outlined in our FPPM, ECC uses Quickbooks Online to manage organization and grant budgets and finances. ECC's Executive Director will serve as Project Manager for the life of the project and will be responsible for executing subawards with each project partner, and implementing a cost management plan that will be incorporated into the overall project management plan. The Executive Director will present and review the project's cost performance during monthly meetings. She will also be responsible for accounting for any projected cost deviations and for presenting these anticipated changes to both the project team and the assigned EPA Program Manager. All budget authority and decisions, including reporting and accounting, will reside with the ECC. Finally, ECC will provide oversight for all procurement activities under this project and provide detailed guidelines on associated CFR Part 200 in each subaward agreement. ECC will oversee vendor selection to ensure transparency, price competitiveness, product safety, and service quality. ECC will also evaluate vendor performance and communicate its findings in its quarterly reporting and other communications with the EPA.

2. PROJECT ACTIVITIES / MILESTONE SCHEDULE

2.A. Project Activities

ECP Accelerator will increase awareness, demand, and safe adoption of e-micromobility in lower income South Bronx neighborhoods through (i) community and workplace outreach, (ii) connecting New Yorkers to an accessible, credit-building loan, and (iii) advancing lithium-ion battery education in workforce training programs.

(i) Build demand for e-bikes through outreach, strategic marketing, and high-leverage partnerships. The ECP will build demand for e-bikes through collaboration with employers, unions, social justice coalitions, NYCDOT, and NYCHA, as well as bike shops and manufacturers that sell UL-certified e-bikes. We will promote uptake and build rider confidence through e-bike demonstration and training events that "bring the bikes to the people." Events will introduce participants to e-bikes, foster safe and respectful riding skills, and nurture community among riders. The ECP team will capture rider stories as well as data about rider trends and program impact, including carbon emissions and air quality benefits, collected through tracking tools such as the National Renewable Energy Laboratory's "e-mission" smartphone app, which is currently being used to track e-bike impacts in Colorado. The ECP team will spread these learnings via social media, the press, and aligned advocacy groups. Finally, we will provide regular briefings to government agencies and elected officials working on e-bike legislation and policy. **RESULTS:** More e-bike users in South Bronx communities, new partnerships with bike shops and other distribution partners, support for e-bikes through city and state legislation and policies. For details on milestones and deliverables, see table in Section 2.B.

(ii) Improve financial access by connecting South Bronx residents to low-interest financing and other available incentives. The ECP will increase financial access to e-bike ownership by connecting participants to Spring Bank's credit-building loan program, as well as government incentives (if/when they are adopted) and employer incentives (e.g., commuter benefits that may be used for e-bikes). The ECP will conduct outreach and strategic marketing to build awareness of the loan (see initiative i, above), and build new partnerships between Spring Bank and South Bronx employers such as Montefiore Medical Center and Bronx Works. **RESULTS:** New employers onboarded into Spring Bank's employee loan program, more individuals signed up for Spring Bank's stand-alone e-bike loan, and greater access to e-bikes in program area communities. For details on milestones and deliverables, see table in Section 2.B.

(iii) Upskill New Yorkers for green jobs in the rapidly growing micromobility industry through The HOPE Program's workforce development training. Lithium-ion battery handling and maintenance is an emerging career sector, aligned with local and federal environmental goals, and one which will provide family-sustaining wages to individuals without college degrees. Expanding this skilled workforce will ensure safety in a rapidly expanding market: the micromobility industry is expected to grow to $300-500 billion by 2030. The HOPE Program, a workforce development organization with a 40-year track record of preparing New Yorkers with barriers to employment for lasting careers, will provide 1) access to individuals in transit deserts who would benefit from participation in the loan program and 2) ongoing training, placement,

and support for New Yorkers to support this industry. **RESULTS:** Greater access to workforce training in program area communities, individuals upskilled and/or placed in green jobs in the micromobility industry. For details on milestones and deliverables, see table in Section 2.B.

2.B. Milestone schedule for two-year ECP Accelerator program

Year	Milestone	Associated Deliverable	Anticipated Deadline
(i) Build demand for e-bikes through outreach, strategic marketing and high-leverage partnerships			
Y1	Execute Award with EPA	Executed Award Agreement	November 2023
Y1	Execute Subawards with Partners	Executed Subcontracts	December 2023
Y1	Finalize outreach and events strategy	Priority outreach list and initial event calendar completed	Jan. 2024
Y1	Finalize strategic marketing and policy strategy, including concierge program	Marketing and policy strategy work plan finalized	Jan. 2024
Y1	Finalize rider safety + maintenance training materials	Finalized materials	Feb. 2024
Y1	Implement calendar of rider safety and maintenance training events for e-bike users in collaboration with bike shops	Training sign-ups and feedback	Mar. - Nov. 2024
Y1	Plan and execute calendar of group rides in collaboration with employers and bike shops and community events	Event registration and post-event surveys	Mar. - Nov. 2024
Y1	Develop research strategy, and surveys, and other data collection tools	Finalized research strategy and tools	Mar. 2024
Y2	Distribute, collect, and analyze rider stories data and data participant surveys	Results used in marketing and policy materials as well as in annual summary of findings completed research reports	Mar. 2024 - Dec. 2025
Y1 + Y2	Organize and hold meetings and events with policymakers to update on progress and share findings	New partnerships formed New programs and policies shaped	June 2024 - Dec. 2025
(ii) Improve Financial Access By Connecting Bronx Residents to Low-Interest Financing and Other Available Incentives			
Y1	Develop materials to support outreach/enrollment for employers and loan candidates	Materials and websites updated	By Jan. 2024
Y1	Engage Bronx-based institutions to develop partnerships with Spring Bank's employee loan program	Meetings scheduled and outreach conducted	Jan. - Nov. 2024
Y1	Enroll 10 new institutions in Spring Bank's e-bike employee opportunity loan program	Finalized enrollments with Spring Bank	June 2025
Y1	Recruit and onboard at least five UL-certified	Agreements with bike shops	Jan. - Dec. 2024

	bike shops to offer the loan		
Y1	Distribute materials and train bike shop staff on the loan	Certificates of completion for 15 staff members	Apr.2024-Dec. 2024
(iii) Upskill under and unemployed New Yorkers through The HOPE Program's workforce development training			
Y1	Finalize micromobility workforce development curriculum	Finalized curriculum	By April 2024
Y1	Host workforce training cohort for 15-20 jobseekers and provide job placement assistance	Post-training surveys, job placements secured (with a 75% placement rate)	Jan. - Dec. 2024
Y1 + Y2	Provide retention and advancement assistance to placed participants	90-day job retention rate of at least 90%, employees advanced	June 2024-Dec. 2025

2.C. Itemized Budget Sheet / Budget Narrative: See Attachment 1: Budget

3. ENVIRONMENTAL RESULTS + LOGIC MODEL

3.A. Environmental Results (Logic Model): All environmental results and included in attachment 2: Logic Model.

3.B. Performance Measurement Plan

Empire Clean Cities will be responsible for ensuring that milestones and reporting requirements are met. In collaboration with the ECP partners, the team will monitor project progress throughout the grant period, using metrics to course-correct as needed. Key project touchpoints will include a project initiation meeting, weekly all-team update meetings, data and impact tracking by activity, and community feedback collection at events. Methods are detailed below.

Touchpoint	Frequency	Tracking Mode/Method	Partner Org Responsible
Project Kickoff	One-time	Meeting Notes and Project Management Plan (PMP)	ECC
Check-in meetings	Weekly	Agendas/Action Items	Brightside
Tracking e-bike adoption and distribution.	Ongoing	Google spreadsheet to track coupons, sales and maintenance requests from bike shops to keep up with demand and address distribution issues as they arise	Spring Bank
Update meetings, including status reports, enrollment data from Spring Bank loan programs	Monthly	Data pulled from Spring Bank loan monitoring system	Spring Bank
Tracking rider stories, trends, and	Quarterly	• Participant surveys and interviews	NYU Stern

impact data		• National Renewable Energy Laboratory (NREL) "e- mission" smartphone app	
Tracking indirect (non-loan program) e-bike uptake through survey and outreach data	Quarterly	Data reports	Greater Hunts Point EDC
Evaluating participant and partner surveys from training and ride events to ensure accessibility, clear communication, and address obstacles to participation	Following relevant events	Spreadsheet with survey results	HOPE Program, Transportation Alternatives, ECC

3.C. Sustainability Plan and Community Vision

ECP Accelerator will advance transportation, environmental, and economic justice by creating broad access to e-bike ownership for disadvantaged New Yorkers in the South Bronx and building demand for e-bike uptake. By doing so, the ECP will create a powerful constituency for equitable and sustainable mobility in NYC, New York State, and nationwide. Success will empower New Yorkers in these communities to overcome the impact of living in transportation deserts that have contributed to increased transportation emissions, hindered economic advancement, and elevated rates of chronic disease. The program will help ensure EJ communities benefit from the micromobility revolution, and create a model for broader uptake.

The ECP Accelerator team's knowledge of the history, needs, challenges, and opportunities of the South Bronx comes from decades of direct experience. Spring Bank understands local financial challenges and opportunities: headquartered in the South Bronx, the Bank has helped over 3,000 borrowers establish or improve credit, expanding financial opportunities and bringing mortgages and loans within reach. Transportation Alternatives understands local demand for alternative transportation options, as demonstrated through its management of a mutual aid program that connects New Yorkers to donated bikes. The program has uncovered high demand for access to cycling and helped 500+ frontline workers access bikes. The HOPE Program understands opportunities for job creation, especially within the green economy, in ECP priority communities: HOPE has connected New Yorkers with nearly 4,000 jobs over the past decade and consistently achieves 75-80% one year retention. Barretto Bay Strategies has 40 years of work experience in the South Bronx, including curbside EVSE planning throughout the area for Con Ed and NYCDOT; freight ferry planning and implementation in association with NYCEDC; and medium duty electric truck deployment with a South Bronx wholesaler.

The ECP has engaged dozens of organizations at the forefront of community finance, workforce development, organizing and advocacy, social services, and micromobility policy. Over the grant period, ECP will continue to organize planning sessions, presentations, focus groups, and surveys to ensure the program approach addresses the long-term needs of our communities.

The ECP team will also ensure that this work will have a lasting impact beyond the grant period. In addition to attracting new riders and establishing safe riding habits, the program will help to

catalyze new lending and additional financial mechanisms, government-funded e-bike incentive programs, and expanded workforce initiatives to help grow the overall micromobility ecosystem. For example, ECP-partner Spring Bank has received $80M in low-cost capital from the US treasury to support "deep impact" lending, including the Bank's e-bike loan. The ECP team has already begun engaging other banks through the New York State CDFI Coalition, which will build statewide innovative lending interest and capacity. Robust e-bike lending programs in NYS will also depend on strong demand. An existing statewide network of bike shop retailers and active cycling advocacy organizations will provide the impetus to drive that demand, including advocacy efforts to improve bike infrastructure that welcomes and supports new riders. The HOPE Program's lithium-ion battery training program will ensure that our community retains the workforce needed to address e-bike maintenance and safety issues as the industry grows.

The underserved communities which the ECP serves are representative of many across New York State and the country, making lessons replicable. Throughout the US, lower income communities of color have long suffered from poor access to public transportation and long commutes. While affordable housing has increasingly been pushed outside the urban core where transit is limited or unreliable, more than 60% of US car trips still are under 10 miles, highlighting the potential for e-bikes to bridge transit gaps without harming air quality or adding to already congested roadways. The ECP team has already advised on the development and launch of 10 e-bike equity programs, from Denver, CO to Melbourne, Australia, and will amplify these efforts with EPA funding.

4.0 PROGRAMMATIC CAPABILITY

4.A. ECC and partners have the right experience to implement ECP Accelerator

ECC has over a decade of experience managing vehicle technology and infrastructure planning grants, collaborating with diverse stakeholders, and participating in community-engaged project design processes in New York City. In addition to providing technical assistance to fleets and decision-makers trying to adopt zero and near-zero emission technologies and reduce their emissions, ECC also shares unbiased information about the benefits of clean transportation to communities and the public through educational events, webinars, and in-person meetings with community-based organizations and local leaders. Annual, public events include a Clean Vehicle Festival in Union Square, Manhattan and an Annual Stakeholder Meeting in Flushing Meadows, Corona Park, Queens, held in conjunction with New York City's Vehicle and Equipment Show.

4.B. Staff Experience and Qualifications

4.B.1. Project Manager and associated staff's qualifications to undertake the project

Joy Gardner has served as the Executive Director of Empire Clean Cities since 2018 and has led the organization in the execution of public and privately funded initiatives to increase the adoption of clean vehicles and infrastructure. Each year, ECC has helped its stakeholders to reduce greenhouse gas emissions by nearly 100,000 tons and reduce petroleum consumption by 18 million gallons in the New York City and Hudson Valley region. Ms. Gardner holds a Master's degree in Nonprofit Management from the New School for Public Engagement and has 15 years of experience in program management, federal grants compliance, and community organizing.

ED_016126_00000985-00016

Joy is eager to continue to collaborate with ECC's partners and local communities to work towards achieving zero-emission mobility options for all New Yorkers.

Prior to joining ECC in 2021, Lauren Kesner O'Brien, the Policy and Partnerships Manager, worked with diverse coalitions on environmental justice, climate policy, and school integration in New York City. In 2022, Kesner O'Brien was accepted into the *Clean Cities Energy and Environmental Justice Initiative* (CCEEJI) hosted by Argonne National Laboratory, where she participated in a deep dive into the history of redlining and transportation planning, learned mapping and community engagement tools, and engaged with pioneering minority entrepreneurs and transportation equity experts. Kesner O'Brien is responsible for ongoing communication with elected officials and community organizations in NYC. Ms. Kesner holds a Master's degree in International Affairs from Columbia University's School of International and Public Affairs and has 16 years of experience in project management, community outreach, and communications.

4.B.2. PM's ties/historical connection to the community and the applicant organization

Since 2007, Empire Clean Cities has collaborated with South Bronx businesses and community groups to advance clean transportation technologies, equitable mobility, and innovation. Our network of trusted organizations, local businesses, and elected leaders in the South Bronx are central to ECC's approach to understanding and meeting the transportation needs of communities that have been overburdened by industrial development, traffic emissions, and environmental hazards. As previously discussed, ECC engages in regular meetings with community partners to solicit feedback about local transportation programs and policies, and evaluate project implementation to course correct, address obstacles when they come up, and ensure that clean transportation incentives reach as many fleets and stakeholders as possible.

Throughout our work in the South Bronx, ECC strives to center the needs and priorities of the tight-knit community, while also recognizing the enduring challenges of environmental inequity and economic insecurity, that impact health outcomes and well-being and have yielded undercapitalized small businesses, a disadvantaged labor force, and households with disproportionately high healthcare needs. ECP is the culmination of community conversations, agenda-setting, and a vision of zero-emission mobility that is accessible to all, that also addresses the neighborhood's poor air quality, limited economic opportunity, and isolation.

4.C. Expenditure and Compliance Plan for EPA Funds

ECC will provide comprehensive project management and administer project funds, in accordance with the EPA's pre-award Compliance Review for Nonprofit Organizations. ECC staff has extensive experience managing both incentive and demonstration projects. ECC's highly technical staff has the resources and expertise necessary to successfully implement the proposed project, including drafting a contract with appropriate terms and conditions, detailed task descriptions, and payment schedules tied to milestones to ensure all required tasks have been satisfied before any funds are paid out. In addition, ECC will closely monitor the progress of the project via telephone calls, e-mails, meetings, and site visits as well as quarterly progress reports provided by the contractors. Invoices are generally processed and paid out within 30 days of the receipt by ECC to ensure projects are not negatively affected by delayed reimbursements.

5. PAST PERFORMANCE

Empire Clean Cities is an officially designated as a US DOE Clean Cities Coalition and has over 15 years of experience managing federally and non-federal grants. Projects have included assisting fleet owners, government agencies, and community leaders implement emissions reduction strategies and promote the use of clean vehicle technologies in transportation. ECC will manage the overall project implementation and will leverage the coalition's expertise in outreach and education to document and share best practices resulting from the project. The ECC and ECP partner organizations have experience implementing both state and federal grant-funded projects, as well as the skills, network, and experience to undertake this project and produce results that will meet EPA standards.

Examples of current and past federally funded assistance agreements:

Project Title: **Clean Cities Outreach, Education and Performance Tracking**
Award #: Ex. 6 Personal Privacy (PP) | CFDA: **81.086** | Funding Agency: **US Department of Energy**
ECC provides technical assistance and targeted outreach to raise awareness and foster a greater understanding of alternative fuels and advanced vehicle technologies to increase the market and decrease petroleum dependence. Additionally, the project tracks, validates, analyzes, and reports critical information and performance metrics necessary to gauge consumer acceptance and track the growth/adoption of petroleum reduction technologies and practices in the marketplace. Reporting history: ECC provides the USDOE with quarterly technical and financial reports, as well as an annual project management plan and annual report on stakeholder's reduction in petroleum and greenhouse gas emissions in a timely manner.

Project Title: **EV WATTS**
Award #: Ex. 6 Personal Privacy (PP) | CFDA: **81.086** | Funding Agency: **US Department of Energy**
EV-WATTS collects plug-in electric vehicle (PEV) and electric vehicle supply equipment (EVSE) data, validates and anonymizes the data, and provides the dataset to the National Laboratories for evaluation, analysis, and publication of summary results. Empire Clean Cities helps to identify data partners, secure data commitments, assist in regularly collecting data, and gather supplemental information during the project. Reporting history: ECC submits quarterly data reports to the prime recipient.

Project Title: **Zero-emission Transport Refrigeration Units Replacement in Hunts Point**
Award #: Ex. 6 Personal Privacy (PP) | CFDA: **81.086** | Funding Agency: **Environmental Protection Agency**
ECC is working with two fleets and community partners to replace 19 TRUs located in the Hunts Point Produce Market of the South Bronx. The TRUs will be replaced with fully electric alternatives, powered entirely by the grid and solar electricity. Reporting history: ECC provides quarterly project updates and an annual MBE/WBE report.

6.0 QUALITY ASSURANCE PROJECT PLAN (QAPP) INFORMATION

The ECP Accelerator will collect and analyze data about e-bike awareness, ridership, and environmental and economic impact in the South Bronx. In accordance with EPA guidance, we will develop a Quality Assurance Project Plan if our project is selected for funding.

New Jersey Future, Inc.
EJCPS Detailed Budget

	Description	Total
Personnel	• Program Director @ $80,000 annual salary x 7.5% x 2 years • Community Support Organizer @ $48,000 annual salary x 100% x 2 years • Policy Manager @ $60,000 annual salary x 5% x 2 years • Advocacy Manager @ $60,000 annual salary x 6.67% 2 years	$122,000
Fringe Benefits	• Includes medical, dental, life insurance, disability, vision, health reimbursement, retirement plan match, which totals approx. 23% of personnel salaries above.	27,545
Travel	• Local mileage for personnel for partner and community engagement meetings 1,526 miles @ $0.655/mile (over 2 years)	1,000
Equipment	• A laptop computer for the Program Director and Community Support Organizer (2 @ $1,000 each)	2,000
Supplies	• 50 reams of copy paper @ $5.00 for recruitment and training materials = $150 • Miscellaneous supplies (including stationery such as writing instruments, flipcharts, markers for training workshop,. meeting refreshments, etc.) for staff on this project = $1,850	2,000
Contractual	• No contractual expenditures expected	0
Construction	• No construction expenditures expected	0
Indirect Costs	• 10% de minimis rate x direct costs ($454,940 x 10%)	45,455
Other	• Subaward to Newark Water Coalition to interface directly with residents to expand its in-home lead testing and education program within Newark's East, West and South Wards.	300,000
		$500,000

Logic Model

Building a Healthy Newark: Tackling lead poisoning in the East, South and West Wards of Newark, New Jersey

Resources/ Inputs	**Activities**	**Outputs (deliverables)**	**Audience**	**Short-term Outcomes (results)** (6-12 months)	**Intermediate Outcomes (Results)** (12-24 months)	**Long-term Outcomes (results)** (2+ years)
Staff time of Project Team NJF Program team, Finance Team and Project Team Member NWC Program team and Project manager **Funding** of $500,000 **Materials** **Curriculum** on policy advocacy skills training Research **Equipment** Lead testing supplies,Inductively Coupled Plasma – Mass Spectrometry Machine, laptops	▪ In-home media lead level testing in East, West and South Wards of Newark ▪ Workshops on awareness of lead impacts and solutions ▪Trainings for community members of east, west and south wards of Newark to become qualified lead testers ▪ Workshops on policy advocacy skill building in East, West and South Wards of Newark	▪ Conduct 8 number of home lead testing workshops and events ▪Conduct 10 number of lead awareness and knowledge building workshops - Conduct 10 trainings for lead assessor skills ▪ Provide 8 opportunities for elevating local lead remediation perspectives via statewide LFNJ meetings (Steering committee, advocacy, membership)	▪ Community members of East, West and South Wards of Newark ▪ Newark City, Essex County and New Jersey state level decision makers ▪ City, county and state partner agencies	Community members of East, West and South Wards in Newark build awareness of lead impacts and solutions Community members of East, West and South Wards in Newark increase knowledge of policy advocacy skills	▪ Increase in in-home media lead level testing by 50 homes in East, west and South Wards of Newark 300 community members in east, west and south wards of Newark build knowledge to understand impacts of lead and solutions 30 community members in east, west and south wards of Newark trained to be lead testers	Fewer homes in East, West and South Wards of Newark show lead in water,paint or soil Reduction in lead poisoning for children under the age of 5 via drop in blood lead levels Increased and more equitable funding for lead remediation programs at city level and state level

Training & Meeting spaces **Technology** (zoom, email, google suite) **Partners** NJF, NWC, LFNJ, GHHI, EOSHI Rutgers and St Stephans Church	Meetings between community members in East, West, and South Wards of Newark and city and state decision makers	Create and provide 4 community policy advocacy skill trainings for community members in East, West, and South Ward of Newark to support city policy advocacy change Facilitate 8 number of engagements between local advocates and city/state decision makers to inform lead remediation issues.		▪ Community members of East, West and South Wards of Newark engage with decision makers on lead issues such as lead paint certificate law implementation, equitable funding and workforce opportunities to become lead assessors. Local and state decision makers prioritize increase in equitable funding for EJ communities on lead remediation	Increase by 20 % in resident advocates of East, West and South Wards of NEwark participating in city and state decision making processes on lead issues.	Equitable policies on lead remediation at city level and state level that reflects EJ community needs

NEWARK WATER COALITION

LETTER OF COMMITMENT

This letter of commitment is for the Project title: Building a Healthy Newark: Tackling Lead Poisoning in the East, South and West Wards of Newark, New Jersey for primary applicant New Jersey Future as a sub awardee.

KEY PERSONNEL (RESUMES ATTACHED)

Anthony Diaz

Ex. 6 - Personal Privacy (PP)

Ex. 6 - Personal Privacy (PP)

Anthony Diaz who is the Executive Director of Newark Water Coalition with primary responsible for overseeing all programmatic activities.

Aoi Morel

Ex. 6 - Personal Privacy (PP)

Ex. 6 - Personal Privacy (PP)

Program Staff Aoi Morel, Director of Finance and Operations implements policies and procedures to ensure Newark, NJ residents receive clean, safe, lead-free water. She also oversees budgeting and financial compliance with NWC's fiscal sponsor. She brings knowledge of urban water issues, a B.S. in Finance, a passion for addressing these problems, and professional background to make a difference locally.

Program staff Bavisha Kalyan ,Grants Coordinator, co-coordinated the 2022 NWC Mobile Lead Testing Unit as a part of her dissertation work at University of California, Berkeley. She has experience running multi-stakeholder projects in low resource settings. After completing her bachelors and master's degrees Civil and Environmental Engineering, she is currently completing her doctoral degree with a focus on conducting community-driven research when remediating urban infrastructure systems.

WORKPLAN

Timeline for Execution: 11/23 to 10/25

- Recruitment for lead assessor training using current food and water distributions and current Newark Water Coalition programming. The Newark Water Coalition will also use dedicated Lead workshops, social media and email blasts
- The Newark Water Coalition will update current Lead awareness and knowledge building workshops to present to community members.
- The Newark Water Coalition will train community members for lead assessor skills.
- The Newark Water Coalition will conduct home visits to assess lead risk.
- The Newark Water Coalition will host in conjunction New Jersey Future policy advocacy workshop skills training.
- The Newark Water Coalition will support a policy advocacy workshop skills training part 2 to support identification of city level policy barriers on lead issues
- The Newark Water Coalition will help host community policy action meetings between statewide policy collaborative Lead Free NJ Steering Committee and Advocacy members, city and state decision makers and residents
- The Newark Water Coalition will promote residents of East, West and South Wards of Newark participate in statewide policy collaborative Lead Free NJ testimony at Lead Remediation policy and budget hearings

OUTPUTS

- 50 homes tested for lead
- 25% percent of community members directly reached trained on lead risks and solutions
- 30 residents trained as lead risk assessors
- 4 workshops on policy advocacy
- 8 meetings of residents with city/ state decision-makers

OUTCOMES

- Reduced lead poisoning of residents;
- Fewer homes containing lead;
- Newark in-home lead testing staff include more residents;
- Increased state and local funding, laws, enforcement and programs for lead poisoning prevention and remediation
- More residents advocate on environmental justice issues including lead at the city/state levels

BUDGET JUSTIFICATION

The total cost for NWC services on this project will be $280,000. A staff promotion to dedicate a 100% of their time to this project as well as funds for supplies, equipment, contracts, and other costs related to the project.

Newark Water Coalition (All Amounts are over 2 years)	
Personnel: Total salaries allocated for this project is to promote Ravin Ramsaran to full time dedicate staff on this project. $100,000 over 2 years.	$100,000
Fringe benefits for Ravin Ramsaran equal $17,790	$17,790
Travel: Travel assumes all milage for workshops, community events, and research projects. 100 miles at the federal rate of .65 per mile. An estimated 100 miles were budgeted over the 2 years of the grant.	$6,500
Contractual: Contract with EPA certified lab to periodically calibrate and confirm lead risk assessment methods @$50*100 samples	$5,000
Supplies: 50 reams of copy paper @ $5.00 for recruitment and training materials = $150 ● Copy machine supplies @ $100 per month = $1,200 ● Miscellaneous lead risk assessor testing supplies (ziploc bags, centrifuge types, gloves, masks) = $2,500 ● Fume Hood @ $1,000 ● Jerrican - 2 1/2 Gallon, Blue 250 @ $10 = $2,500 ● EZ-Pour F-Style Jugs Bulk Pack - 1 Gallon 50/case 1000 @ $2.10 = 2,100 ● Milk Jugs Skid Lot - 1 Gallon 432/skid 864 @ 0.91 = $786 ● Industrial Test Systems eXact LEADQuick 486901 Water Reagent Set for Lead Testing, 6 Tests @ $79 = $474	$10,710
Equipment: ICP-MS Machine $85,000 and consumables are $20,000	$105,000
Other: $5,000 for stipends for community members for 100 community members. $20,000 for St. Stephans Church for East Ward headquarters	$25,000
Indirect Costs: Newark Water Coalition is using the indirect rate of 10% for a total of $30,000	$30,000
Total	**$300,000**

St. Stephan's Grace Community - Letter of Commitment

This letter of commitment is for the Project title: Building a Healthy Newark: Tackling Lead Poisoning in the East, South, and West Wards of Newark, New Jersey for primary applicant New Jersey Future. As a subawardee, St. Stephan's Grace Community will act as the East Ward hub for the project. St. Stephan's church has a long history in Ironbound district of Newark. It serves all residents, but the population in the East Ward around the church consists of members who are low-income, immigrants (mainly Brazilian and South and Central American), non-English speaking (Portuguese and Spanish). St Stephan's church opens its doors by providing space and resources to community-based organizations working to support and develop community health, wellbeing, homes, and security. St. Stephan's has served as the food and water distribution site for the Newark Water Coalition over the last three years, acting as a site for community to gather, housing a food pantry, and supporting youth-driven efforts for service work.

KEY PERSONNEL

Pastor Moacir Weirich

OVERALL PROJECT WORK PLAN WITH ST. STEPHAN'S CHURCH CONTRIBUTIONS HIGHLIGHTED

- **Site for recruitment** for lead assessor training
- **Site for recruitment** for lead awareness and knowledge building workshops
- Training for lead assessor skills
- Home visits to assess lead risk **including residents who come to Newark Water Coalition food and water distribution at St. Stephan's Grace Community**
- Policy Advocacy Workshop skills training part 1 – basic skills on understanding city and state policy processes, lead laws, and identification of political decision makers.
- Policy Advocacy Workshop skills training part 2 – supports identification of city-level policy barriers on lead issues.
- Community policy action meetings between statewide policy collaborative Lead Free NJ Steering Committee and Advocacy members, city and state decision makers and residents. **St. Stephan's leadership will be invited to advocacy meetings.**
- Residents of East, West and South Wards of Newark participate in statewide policy collaborative Lead-Free NJ testimony at Lead Remediation policy and budget hearings. **These same residents are served by the church and suffer food insecurity.**
- Statewide policy collaborative Lead Free NJ integrates resident priorities into its advocacy goals and provides city and state level policy recommendations to aid lead paint certificate law implementation and reduce barriers of entry to become qualified lead assessors. **St Stephan's and its members will serve as consultants on how to reduce barriers for entry.**

PROJECT OUTPUTS

50 homes tested for lead; 25% of community members trained on lead risks and solutions: Thirty residents trained as lead risk assessors; Four workshops on policy advocacy; and eight meetings of residents with city/ state decision-makers.

Environmental Protection Agency
Office of Environmental Justice and External Civil Rights
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Burney Jacob and Burrell Omari,

Lead-Free NJ Steering Committee and Advocacy Committee Chairs are pleased to voice our support for the joint application submitted by the Newark Water Coalition (NWC) and New Jersey Future (NJF) for funding under the U.S. Environmental Protection Agency (EPA)'s Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program, Funding No- EPA-R-OEJECR-OCS-23-01. Their proposed project will build collaborations for residents in local communities within Newark, to improve their health by reducing lead exposure.

Lead-Free NJ is an inclusive and equitable collaborative focused on removing lead from New Jersey's environment. The vision of the joint NWC and NJF project aligns with our mission and goals by increasing the capacity of NWC to pursue holistic lead remediation, equitable policy change, and community involvement at the community level in Newark, NJ. This grant will expand the reach, partnerships, and goals of the Lead-Free NJ collaborative.

We are excited about the potential of a EJCPS award to a partnership between a local community-based organization (NWC) and a statewide organization (NJF), so that residents can develop solutions that improve health and equity. As part of this project, NWC will interface directly with residents to expand its in-home lead testing and education program locally within East, West and South Wards of Newark. NJF will integrate local efforts to inform and expand the Lead-Free NJ collaborative's state-level and local city level policy work in lead remediation and training to equip local residents with policy advocacy skills for local change.

Thank you for your consideration of this proposal. We are pleased to be partners with NWC and NJF to advance healthy and resilient communities in New Jersey.

Jacob Burney
Division Director, Grants Management Division
Office of Environmental Justice and External Civil Rights
United States Environmental Protection Agency
1200 Pennsylvania Avenue, NW (Mail Code:2202A)
Washington, DC 20460

Dear Mr. Burney:

Green & Healthy Homes Initiative (GHHI) is pleased to voice our support for the joint application submitted by the Newark Water Coalition (NWC) and New Jersey Future (NJF) for funding under the U.S. Environmental Protection Agency (EPA)'s Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program, Funding No-EPA-R-OEJECR-OCS-23-01. Their proposed project will build collaborations for residents in local communities within Newark, to improve their health by reducing lead exposure.

GHHI is dedicated to addressing the social determinants of health, opportunity, and racial equity through the creation of healthy homes and communities. We are on the White House Get the Lead Out Partnership as well as the Steering Committee of Lead Free New Jersey. The vision of the joint NWC and NJF project aligns with our mission and goals by aiming to eradicate childhood lead poisoning through exposure and source control.

We are excited about the potential of a EJCPS award to a partnership between a local community-based organization (NWC) and a statewide organization (NJF), so that residents can develop solutions that improve health and equity. As part of this project, NWC will interface directly with residents to expand its in-home lead testing and education program locally within East, West and South Wards of Newark. NJF will integrate local efforts to inform and expand the Lead-Free NJ collaborative's state-level and local city level policy work in lead remediation and training to equip local residents with policy advocacy skills for local change.

We are pleased to be partners with NWC and NJF to advance healthy and resilient communities in New Jersey. Thank you for your consideration of this proposal.

Sincerely,

Ruth Ann Norton
President & CEO

Director, Environmental and Occupational Health Sciences Institute
Director, NIEHS Center for Environmental Exposures and Disease
Chair and Professor of Toxicology,
Department of Environmental and Occupational Health and Justice
Research Dean.

April 10, 2023

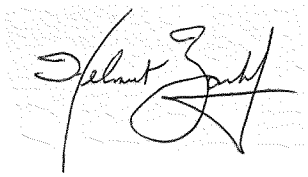
Dear Burney Jacob and Burrell Omari,

The Environmental and Occupational Health Sciences Institute is pleased support the joint application submitted by the Newark Water Coalition (NWC) and New Jersey Future (NJF) for funding under the U.S. Environmental Protection Agency (EPA)'s Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program (EPA-R-OEJECR-OCS-23-01). The proposed project will build collaborations for residents in local communities within Newark, to improve their health by reducing lead exposure. EOHSI has a long history of community-engaged research including in the area of lead (Pb) contamination in water, soil, household dust, etc. We have significant experience and state-of-the art instrumentation for analysis of lead in biological samples (blood, urine, hair and teeth), and therefore can provide expert support to the proposed project.

Our institute promotes broad understanding of health effects associated with environmental and occupational chemical exposures and psychosocial stressors, including racism, the built environment, environmental injustice. Through its six Divisions, EOHSI supports basic and clinical research that strive to mitigate risk and improve environmental health. The mission of CEED is to promote health and reduce environmental diseases by identifying and modifying interactions between the host, environmental toxicants, psychosocial stressors, and social constructs, as well as accelerators and amplifiers (e.g., climate change, microbiome, etc.) that may increase resilience or exacerbate adverse health effects in vulnerable populations. To accomplish this mission, Institute scientists detect and measure exposures of concern, perform risk assessments to determine which exposure poses health risks, use toxicology to determine the mechanisms hat underly toxicity. We then use this knowledge to develop mechanistically based intervention and prevention strategies to reduce and mitigate risks.
Most importantly, we perform our research through community engaged research that includes members of the affected communities in all phases of research. We also help communicate our finding to affected populations, advocacy groups, policy makers, regulators and legislators, providing knowledge empower their ability to advocate for change that improves the health of affects populations and communities.

EOHSI also provides graduate training programs for Ph.D. and postdoctoral students and Occupational Medical residents, supports an environmental and occupational medicine clinic, provides educational programs for various professional and non-professional groups, outreach to affected communities, and the development of public health policies related to environmental issues.

The vision of the joint NWC and NJF project aligns with our mission and goals by:



Working with the lead impacted neighborhoods in Newark

Educating residents and community-based organizations on the need for lead testing and remediation
Developing and expanding state and local environmental health policy

We are fully supportive of the potential of an EJCPS award to a partnership that invlves a local community-based organization (NWC) and a statewide organization (NJF), In addition, EOHSI will make our scientists available as advisors and potential research partners moving forward. so that residents can develop solutions that improve health and equity.

Thank you for your consideration of this proposal. We are pleased to be partners with NWC and NJF to advance healthy and resilient communities in New Jersey.

Yours sincerely,

Helmut Zarbl, PhD, ATS Fellow

OBJECTIVE: To utilize my organizing skills, contacts, legislative knowledge and experience to continue advocating for the health and safety of NJ children and families.

EXPERIENCE

Program Manager, Lead-Free NJ, New Jersey Future **March 2021 – Present**
Currently, I am the Program Manager for Lead-Free NJ (LFNJ) a statewide collaborative that works to ensure that New Jersey's children are free from lead poisoning and that our environment is lead-safe by advocating for changes to state and local policy alongside lead affected community groups and residents.

Organizer, Healthy Schools Now, NJ WEC, Trenton, NJ **October 2018 – March 2021**
I served as the organizer for Healthy Schools Now (HSN), a coalition of over 80 organizations representing a diverse set of stakeholders including public school advocates, parents, social justice leaders, faith leaders, and environmentalists dedicated to ensuring all New Jersey children and school employees learn and work in safe, healthy, modernized school buildings. My work included addressing issues such as NJ SDA reauthorization, lead in paint and water, temperature control in schools, mercury in flooring, mold, asbestos, and most recently Covid-19, through legislation.

Secretary, Holland Township Municipal Agricultural Committee **March 2016 – March 2020**
As the secretary, it was my responsibility to attend monthly meetings for the Holland Township Agricultural Committee. Our committee focused mainly on farmland preservation and opposing the PennEast pipeline. I took minutes and submitted them to the Holland Township Committee. Once approved, I posted approved minutes to the municipal website. Additional responsibilities included updating municipal records, filing necessary paperwork, and notifying committee members of meetings and important documents.

PT Organizational Development Consultant, NJEA, Trenton, NJ **June 2017 – October 2018**
As a part time OD Consultant, I was assigned to assist with many types of organizing projects. Some of these projects included work around anti-privatization efforts, school health and safety, campaign promotions, organizing rallies, electoral training, data collection, and developing and facilitating trainings to members at the state, local, and national level.

Regional Lead, NJEA Fellow Program, Bridgewater NJ **July 2017 – August 2017**
I was responsible for working with a team of over 25 NJEA Summer Fellow colleagues as we continued our efforts for a second year, this time to reach members on electing Ambassador Phil Murphy, who was NJEA's Political Action Committee (PAC) endorsed candidate for governor, and Fran Grenier, their PAC endorsed candidate who was challenging Senate President Steve Sweeney in the Third Legislative District (LD 3.) I utilized VAN to create phone bank lists and canvass areas as well as participate in these activities. I also worked with our team to organize events to hold 1:1 conversations and recruit over 250 volunteers.

Regional Lead, NJEA Fellow Program, Stanhope, NJ **July 2016 – August 2016**
This was a part-time, temporary position created to assist NJEA with getting SCR-2 on the ballot to obtain fair, quarterly pension payments. The job direction changed to one of voter awareness, after
Senator Sweeny failed to keep his promise and post the bill. I was responsible for a team of over 30 full time and part time fellows in the NJEA Stanhope Regional Office as we phone banked, canvassed, and wrote postcards to members. Our team also organized three successful rallies and multiple events during this time.

Paraprofessional, Holland Township BOE, Milford, NJ **September 2008 - October 2018**
I taught phonics lessons to students in kindergarten using the Wilson Reading Program and Fundations program who were identified by their teacher as needing extra support. Over my ten years of service, I also worked with Preschool – 8th grade students where I provided 1:1 aide support, in-class support, and worked in the autistic classroom. My duties were to assist each student as needed and make sure that they were safe at all times.

Trenton NJ, 08618 | Ex. 6 - Personal Privacy (PP) | dcameron@njfuture.org

Policy Manager and Public health practitioner with a specialization in Lead in Drinking Water Hazards. Experienced team leader and public speaker. Background in community organizing and legislative advocacy.

EMPLOYMENT HISTORY

Policy Manger, New Jersey Future- Trenton, NJ
Jan. 2022 —Present

- Policy development: Craft effective solutions that center equity and racial and economic justice for lead in drinking water (primarily), green infrastructure, and other policies that affect health, water infrastructure, and redevelopment.
- Create recommendations for programmatic, regulatory, and legislative change based on analysis, stakeholder consultation, and best practice research.
- Prepare clear and convincing policy briefs, white papers, testimony, fact sheets, case studies, recommendation reports, and blog posts.
- Educate and build consensus among stakeholders, decision-makers, and potential collaborators through activities ranging from small group meetings to public speaking engagements.
- Facilitate a 30-member task force on lead in drinking water that works to identify practical, politically feasible policy solutions.
- Act as a liaison between the task force and two affiliated initiatives: Lead-Free NJ, which focuses on advocacy, and Jersey Water Works, which brings together hundreds of water practitioners.
  Prepare grant reports and proposals, with supervision from the Policy Director

Case Investigator and Contact Tracer, Monmouth County Health Department-Freehold, NJ
Oct. 2020 — Dec. 2021

- Assisted with emergency health responses to Covid-19 outbreaks
- Obtained and review patient demographic, location, laboratory, clinical, and risk information in health
- Entered data and monitored case and contact data in department
- Surveillance systems
- Determined investigation priorities, per local and statewide protocols
- Confirmed patient receipt of test results and/or diagnosis of COVID-19
- Initiated prompt communication with patients diagnosed with COVID-19 through text, phone calls, email, and other communication platforms as necessary
- Elicited social support for patients in need of food medicine or safe place to isolate

Project Development Coordinator, Prodigal Sons and Daughter Redirection Services Inc.,
Aug. 2020 — Aug. 2021

- Expanded efforts to aid in substance abuse and mental health services by proposing the use of new systems to secure funding
- Worked with the overall mission of the company in mind and sought to effectively convey and promote the company's true brand
- Worked in collaboration with the senior project manager to define project goals and establish a timeline and plan to achieve them
- Worked well independently and also with others
- Managed sourcing, screening, interviewing, and placing of candidates.

Army Food Service Specialist (MOS 92G), Bristol Armed Forces Reserve Center- Bristol, PA
Oct. 2012 — Oct. 2020

- Ensure food protection and sanitation measures are followed both in the field and in the garrison
- Receive and store food items from suppliers
- Operate, maintain and clean field kitchen equipment
- Perform preventive maintenance on garrison and field kitchen equipment to keep the kitchen running and soldiers fed

Office Assistant, Rutgers RBHS Financial Aid -Piscataway, NJ
May 2020 — May 2021

- Welcomed guests in person and on phone; answer and direct inquiries to designated offices
- Assisted students with questions and financial aid requests, log data, copy, fax, and scan documents
- Always handled sensitive information in a confidential and respectful manner
- Accurately verified information and updated information databases as necessary

INTERNSHIPS

New Jersey Health Initiatives (NJHI) | Robert Wood Johnson Foundation-Camden, NJ
Sep 2019 — Jan 2019

- Reviewed grant submissions for completeness and validity
- Camden, NJ
- **Verified applicant's potential for Policy System and Environmental change in proposed** projects
- Evaluate the quality and feasibility of healthy eating and active living school and workplace-based programs for each application

Rutgers -American Association of University Professors, New Brunswick, NJ
Apr 2019 — May 2019

- Organized statewide campaign to restore and expand funding for Educational Opportunity Fund Program
- Coordinated and attended meetings with NJ legislators from the State Assembly and Senate supporting votes for to budget cuts and partnered with Statewide organizations to expand state aid for DACA students

COMMUNITY SERVICE

Project Director, Covid-19 Literacy Relief Project-New Brunswick, NJ
Aug 2020
Lead a team of 3 to organize, collect and distribute 2,300 books to low income families in Middlesex County NJ
Raised $15,000 in funding through a crowd funding competition through the Clinton global initiative University

Volunteer-Support Staff, NJ for Haiti- Cité Soleil, Haiti
Aug 2018 — Aug 2019

EDUCATION

Master of Public Health, Rutgers School of Public Health
Sep 2018 — May 2020 Health Systems and Policy, (MPH), Public Health Nutrition (Graduate Certificate)

Bachelor of Science, Rutgers School of Arts and Sciences & Edward J. Bloustein School of Planning and Public Policy Jan 2014 — Aug 2018, Public Health (Major), Sociology (Minor)

HONORS/AWARDS

Rutgers School of Public Health, Bernard D. Goldstein Academic Excellence Award
May 2020
Associate Alumnae of Douglass College (AADC) - Edith Newsome Estarabadi Graduate Fellowship
Sep. 2021
UNITED STATES ARMY RESERVES, Army Achievement Medal (AAM) Feb. 2016

SUMMARY

Recently acquired a Master in Public Policy at the Edward J. Bloustein School of Policy and Planning at Rutgers University, with a strong focus and interest in evidence based policymaking, experience and background on program and project management, data collection and analysis and strong administrative skills. Experience at all levels of government and nonprofit.

Core Competencies

- Strong writing and analytical skills
- Program Management
- Program Evaluation

Language: Spanish (Native), English (Second language), French (intermediate level)

Computer Literacy:

- Software: R-Studio, STATA, NVIVO,
- Microsoft Office Suite
- Qualtrics, EmailMeForm, Survey Monkey, and Google Forms

EDUCATION

Edward J. Bloustein School of Policy and Planning, Rutgers University, New Brunswick, *Graduated May 2022*

- **Major:** Public Policy
- **Concentration:** Evidence based policymaking

University of Puerto Rico, Rio Piedras Campus, San Juan, PR *Graduated May 2019*

- **Major:** Political Science **/ Concentration:** International Relations

Relevant Coursework: Program Evaluation, Policy Formation, Cost-Benefit Analysis, Public Policy Advocacy

Honors/Awards/Role:

- Bloustein Dean's Tuition Scholarship (2020-2022)
- Member of Pi Alpha Alpha the global public policy, public administration and public affairs honor society
- **Selected as NJ ASPA Public Administration Student of the Year 2022**
- Spring 2022 Teaching Assistant for Applied Multivariate Methods in R at Rutgers University

Publication:

Redacted (2021). Securing the Safety Net: Lessons From Nonprofit Organizations on TANF Access During COVID-19. *Families in Society*. https://doi.org/10.1177/10443894211029596

Minority Graduate Placement Program, San Juan, PR *June 2019 – August 2020*

- MIGAP is a program sponsored by the American Political Science Association
- Methods training in: NVIVO, R-Studio, LaTex and STATA

Texas A&M Data Workshop, College Station, Texas *January 2020*

- Accepted to a two day sponsored Political Science Data Workshop
- Methods training in STATA, recode and visualize data, run regressions and asses model fit

GOVERNMENT AND RESEARCH EXPERIENCE

Social Policy and Family-Well Being Research Lab, New Brunswick, NJ

Graduate Research Assistant *September 2020 – May 2022*

- Conducted applied policy research on social welfare programs and policies, with a strong focus on means-tested, human service, and income support policies.
- Researched what barriers do families face in accessing and receiving Temporary Assistance for Needy Families (TANF) and how do these barriers differ by individual, family, agency, or county characteristics

Senate of the Commonwealth of Puerto Rico, San Juan, PR
Intern in the office of independent Senator José "Chaco" Vargas Vidot *January 2019 – May 2019*
Legislative Assistant in the office of independent Senator José Vargas Vidot *December 2019-August 2020*

- Researched different policy issue areas, legislation, and bills for the Senator and his staff
- Worked on public policy analysis and wrote legislation pieces

NONPROFIT EXPERIENCE

New Jersey Future, Trenton, NJ
Advocacy and Government Affairs Manager *January 2023 – Present*

- Coordinates and manages the organization's advocacy agenda
- Implements the organization's government affairs program by influencing and implementing state policy
- Facilitates community-oriented partnership campaigns that bridge local engagement with state policy change

Sembrando Sentido, San Juan, PR
Summer Intern *May 2021 – August 2021*

- Evaluated over 400 government contracts, created metrics for a transparency analysis of such contracts and explored statistics on equity in contracting
- Co-authored a published report on the status of funding distribution and common practices within CDBG contracting

Grupo Guayacán, San Juan, PR
Program Associate *June 2019 – August 2020*

- Mentored and coached start-up businesses
- Organized weekly business development workshops
- Prepared metrics for weekly reports on entrepreneurial growth in Puerto Rico for this nonprofit

Fundación Mochileando 100x35, San Juan, PR *Fall 2017 – Fall 2019*
Director of Educational Projects

- Co-founder of "Jóvenes Por Puerto Rico" program that offers mentorship and stipend for public school students making a difference in their communities
- Developed short and long-term projects focused on youth and adult educational support, for economically disadvantaged students

INTERNSHIPS

U.S House of Representatives, Washington, DC
Intern at Congressman José E. Serrano's office (New York 15th District) *September 2018 – December 2018*

- Researched different issue areas, legislation and bills for the Congressman and his staff
- Received constituent visits or calls and aided their needs and requests for services

Baltasar Corrada del Río Internship, San Juan, PR *June 2018 – August 2018*
Intern at Department of State in Board of Examinations office

- Assisted the director of the Board of Examinations administratively
- Received constituent visits or calls and aided their needs and requests for services from the Board

Name: Redacted
Position Title and Institution: Executive Director, Newark Water Coalition

Technical Capabilities/Subject Matter Expertise:

- Organizer for over 16 years from high school to college and professionally on multiple issues centred on water, food, and housing justice
- Serve as the Community Hub representative on the Lead-Free New Jersey, State-wide Steering committee, working alongside multiple stakeholders to advance holistic lead services, remediation, and abatement from the grassroots to state policies
- Longstanding advocacy and community work to provide basic needs and resources to the diverse populations across Newark

Experience with Similar Projects:

- Collaborated with academic institutions to organize and conducted community-science grassroots driven project to collect primary data across 300 homes in Newark capturing environmental lead sources
- Successfully managed teams of 30-50 community members and planned numerous protests and events in various cities across New Jersey.

Appointments (3 most recent):

Years	Position Title and Organization
4	Co-Founder and Executive Director, Newark Water Coalition
1	Data and Technology Manager of Bronx Prep HS/MS, Democracy Prep Public Schools
1	Bay Plaza General Store Manager, Model's Sporting Goods

Professional Preparation:

Degree	Area of Study	Years	Institution
Associates	Environmental Justice and Community Driven Research	3	Middlesex County College

Most Relevant Publications:

Textbook Chapters Due for Publication: Redacted "Engineering, Environmental Justice, and Data Science in Solidarity", Mitigating Bias in Machine Learning, McGraw Hill

Poster Presentations: : Redacted "*Machine (Un)learning as a tool for lead remediation: the missing link towards just and equitable water access*", Association of Environmental Engineering and Science Professors, June 2022.

Ravin Ramsaran

Employee
Newark, NJ
Ex. 6 - Personal Privacy (PP)
Ex. 6 - Personal Privacy (PP)

I am a college student looking for any and all opportunities to help further myself. I have a wide variety of skills and am willing to pick up and learn anything as best I can.

Work Experience

Office Manager
Newark Water Coaltion - Newark, NJ
October 2022 to Present

Scheduling meetings and appointments, making office supplies arrangements, greeting visitors and providing general administrative support to our employees.

Lead Inspector
Newark Water Coalition - Newark, NJ
August 2022 to Present

I coordinated with a team in order to test houses for lead in its various forms; ie: water, paint, dust and soil.

Lab Analyst
Newark Water Coalition - Newark, NJ
September 2022 to December 2022

I analyzed, studied and recorded data on Lead samples.

Internship
Newark Water Coalition/Humanity's Action Lab - Newark, NJ
June 2022 to August 2022

An internship to help develop video production, networking and interviewing skills.

Education

High school diploma in Cyber Security
Technology High School - Newark, NJ
September 2017 to June 2021

Skills

- Computer Science
- Cybersecurity
- Java

- Leadership (1 year)
- Communication skills
- Community Organizing (1 year)
- Laboratory experience
- Research

Awards

BDPA NCC
July 2019

An award given to me for my skills and knowledge in The BDPA National coding competition.

Hard Work and Dedication
December 2022

I was awarded this for my continuous hard work on the clock and off the clock.

Certifications and Licenses

Certified Coding Associate
March 2016 to Present

After working and competing in coding completion and passing the certification exam.

Rutgers Mini-Med Graduate
November 2020 to Present

I Completed a medical course that educates and informs students basic life saving techniques in addition to information on the medical world.

Cybersecurity Certified
June 2021 to Present

Completion of a 3 year course and passing certification exams.

Name: Redacted

Position Title and Institution: PhD Candidate, University of California, Berkeley

Technical Capabilities/Subject Matter Expertise:

- Datascience and analysis, specifically machine learning for predictive environmental toxins such as lead and arsenic contamination of drinking water systems
- Experience using mixed quantitively and qualitative methods to address research questions.
- Formed strong community-academic partnerships with multi-level stakehodlers

Experience with Similar Projects:

- Organized and conducted a community-science grassroots driven project to collect primary data across 300 homes in Newark capturing environmental lead sources
- Participant in Berkeley's D-Lab Workshop: Data Science for Social Justice

Appointments (3 most recent):

Years	Position Title and Organization
5	PhD student, University of California, Berkeley Dept. of Civil and Environmental Engineering
2	MS student, University of California, Berkeley Dept. of Civil and Environmental Engineering, Energy Civil Infrastructure and Climate

Skills and Expertise

- Possess excellent analytical and writing skills
- Flexible, open to feedback, and committed to continuous learning
- Hone the power of building relationships with diverse stakeholders
- Highly organized and possess excellent project management skills

Professional Experience

New Jersey Future Funding Navigator Program Manager 2023 - Present

- Proactively contact and recruit water utilities that could benefit from the Funding Navigator program and review of materials used to encourage decision-makers (e.g., utility managers) to apply for funds
- Assess each utility's problems and help identify solutions, including:
  - Developing relationships with technical assistance and professional service providers, rural water associations, community-based, and other nonprofit organizations dedicated to enhancing water quality
  - Identifying short-term and long-term barriers that may need to be addressed before a successful application can be submitted
  - Preparing scopes of work, requests for proposals, and memos of understanding
  - Reviewing and helping to shape funding applications, including financing options, prior to submission
  - Creating communication strategies and tools including tool kits webinars, and next steps for utilities to use
- Help find and match technical assistance providers with utilities, including supporting utilities, community organizations, and technical assistance providers during pre-development work and tracking utilities' progress in meeting pre-development deadlines
- Track engagements and assistance provided to utilities, including documenting types of technical assistance provided and tracking data from the Water Bank. Recommend state or local policy changes that are needed to allow more under-resourced communities to successfully obtain water infrastructure funding
- Creatively supporting the FN program by identifying solutions, offering ideas for improved systems, assisting in preparation of program budget and expenses, continuing education, and completing special projects as needed and assigned

Nonprofit Finance Fund New Markets Tax Credit Specialist / Finance Associate 2021 - 2023

- Serviced 24 NMTC Loans, including loan data management, interest, fee and tax payments
- Monitored monthly payments to investors and ensure compliance with legal agreements and tax credit regulations
- Prepared all required accounting and financial reporting with third-party; coordinating and preparing work papers for annual financial audits, tax department and annual tax filings; and overseeing investor reporting
- Managed over 24 portfolios totaling QLICIs over $165 million and maintained portfolios in compliance under CDFI Fund
- Completed 26 filings for multiple state LLC status maintenance (filing fees/taxes) and corporate agent representation

Qatar Airways 2009 - 2021

Sr Sales Support Executive (2016 to 2021), Airport Services Supervisor (2011 to 2016), Airport Services Agent (2009 to 2011)

- Performed operational trade management and front-line trade support in dispute/resolution of customer discrepancies including collection efforts/chargebacks and aging debit memos with sales totaling over USD 308 million annually
- Facilitated payment and collections for over 500 accounts in North America. Ensured credit and A/R policies are followed
- Trained and onboarded new hires in applications and systems pertaining to their job roles to maximum efficiency
- Managed 25 person team for smooth airport operations in compliance with local authorities (Port Authority, DOT, FAA, & CBP)
- Managed over 150 trade accounts, over 75 back-end incentives, and over 100 front-end commission contracts
- Assisted in the opening of 7 airport stations in 4 countries; created Local Operating Procedures for all stations

Education

Kean University, Union, NJ Jan 2020

B.S. in Finance, Magna cum laude, ΛΑΣ LAMBDA ALPHA SIGMA - Academic Honors of Kean University

Leadership & Service Roles

Newark Water Coalition, Newark, NJ Director of Finance and Operations 2018 - Present

- Ensuring maintenance of the Water Boxes including testing water to ensure clean/safe water is provided to residents
- Train and onboard new volunteers for projects including the history of NWC, its mission, and operations
- Coordinate weekly food distributions to ~100 families in the Ironbound district
- Co-managed a team of 15 people to test lead exposure in 300 residents home across Newark
- Participated in a community-engaged research project with University of California, Berkeley to increase equity in decision-making processes for lead remediation services. Findings to be published in peer-reviewed journals.
- Manage accounts and grants over $700K to ensure in compliance with the fiscal sponsor

Member of the Board – 2008 – 2010

Conference on Congregational Ministries – NJ Synod – ELCA
Workshop on Immigration – Presenter

Workshops and Adult Forums on Immigration – NJ Synod Congregations
Workshop presenter.

Community Gardens – Active coordinator at St. Stephan's Community Garden.

Newark Environmental Commission – Past member

Languages

Portuguese, English, Spanish and German

Debbie Mans Bio
Lead-Free NJ Steering Committee Co-Chair

Debbie most recently served as the Deputy Commissioner at the NJ Department of Environmental Protection, where she provided leadership and direction for many of the Department's climate change, renewable energy, and environmental justice efforts. Previously, Debbie served as Baykeeper of the NY/NJ Baykeeper, as well as an environmental and energy policy adviser to former governor Jon S. Corzine. She is the former chair of the New Jersey League of Conservation Voters, former trustee of New Jersey Future, and current member of the Borough Council in Glen Ridge. Debbie earned a certification from the International Association for Public Participation in Foundations in Public Participation.

Rashan Prailow Bio
Lead-Free NJ Steering Committee Co-Chair

Rashan Prailow is a finance consultant, speaker, community servant, and founder of consulting agency THINK Group. Formerly, Rashan served in the White House during the Obama Administration within the Office of Management & Budget and the Presidential Personnel Office. Through his community service efforts, Rashan has collaborated with the New Jersey Department of Education, New Jersey Juvenile Justice Commission, and New Jersey Courts to name a few. Rashan holds an associate degree from Camden County College, bachelor's degree from the University of Pennsylvania and a master of finance degree from Georgetown's McDonough School of Business.

Ruth Ann Norton
PRESIDENT & CEO
GREEN & HEALTHY HOMES INITIATIVE

Ruth Ann Norton is President & CEO of the Green & Healthy Homes Initiative, a nonprofit organization that is dedicated to advancing racial and health equity and opportunity through healthy housing. A national expert and advocate on green and healthy homes, she directs GHHI's groundbreaking work across the United States where 65 cities, counties and states are using housing as a platform for improved health and social outcomes. Through the implementation of the GHHI comprehensive housing intervention model and its best practices Toolbox that she helped develop, cities are improving the ability of children to arrive in the classroom healthy and ready to learn and to stay in school through reduced asthma related absences.

The architect of the State of Maryland's 99% reduction in childhood lead poisoning, Ms. Norton has developed over 45 pieces of successful healthy housing legislation that focus on reducing health disparities. Through its current feasibility and development work with healthcare partners and jurisdictions nationally, she heads a GHHI technical assistance team that is creating sustainable models for Medicaid reimbursement for preventive asthma and household injury services.

Ms. Norton serves as a member of the: EPA Children's Health Protection Advisory Committee, National Leadership Academy for the Public's Health (NLAPH), National Council of State Housing Agencies' National Advisory Group, Ohio Asthma Council, and Maryland Lead Poisoning Prevention Commission, and was previously a federally appointed liaison to the CDC's Advisory Committee on Childhood Lead Poisoning Prevention. A founding member of the NEWHAB Advisory Board, she provides a leading voice to articulate the significant health and social benefits of weatherization investments through her advisory role with Energy Efficiency for All (EEFA) and has authored research publications on the non-energy benefits of energy efficiency.

Ms. Norton is a Robert Wood Johnson Foundation Community Health Leader, a Weinberg Foundation Fellow, a WE ACT Environmental and Social Justice awardee, and received the Tony Woods Award for Excellence from the Building Performance Industry in 2016 for her efforts to integrate energy efficiency upgrades with healthy homes interventions on a national scale. Under her leadership, GHHI has been awarded the HUD Secretary's Award for Healthy Homes and the EPA's National Environmental Leadership Award in Asthma Management for its innovative programs.

Biographical Info

Dr. Zarbl serves as the Director of the NIEHS sponsored Center for Environmental Exposures and Disease. He is also the Associate Director For Public Health Sciences at the Cancer Institute of New Jersey. He serves on numerous national research review and advisory panels, and editorial panels.. Dr. Zarbl is known for his work in areas of toxicogenomics, and mechanisms of and genetic susceptibility to chemical carcinogenesis, mechanisms of mutagenesis and toxicity, and technology development. These research efforts have to date resulted in over 70 scientific papers and book chapters.

Research Areas

Research has focused largely on toxicogenomics and functional genomics, carcinogenesis, molecular and cellular biology, and toxicology. Specifically this has included work understand to molecular mechanisms of chemical carcinogenesis and the genetic basis for differential susceptibility to mammary carcinogenesis using animal and in vitro model systems, and then translating the findings to human breast cancer.

Research Highlights

Studies in the rat model have included analysis of oncogene activation, mechanisms of signal transduction, and genetic linkage analysis to identify mammary tumor suppressor genes. He has also used toxicogenomics to dissect mechanisms of mechanism carcinogenesis, tumor progression and chemoprevention. His studies in the area of toxicogenomics include the development and application of standards for DNA microarray experiments, and phenotypic anchoring of response of human cells, model organisms (yeast) and target organs (rodents) to toxicants, providing insights into dose and temporal responses, as well as mechanisms of action. He is also actively involved in technology development for functional genomics and biomarker screening.

(Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☒ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☐ Yes ☒ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

CARMEN R. VALENTIN, EXECUTIVE DIRECTOR, CRVALENTIN@OPASPR.ORG

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

COPY OF PROCEDURES IS ATTACHED.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Carmen Valentin	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

PROFESSIONAL SUMMARY

Marine Biologist with a Master in Management of Non Profit Organizations and over 8 years of experience with a 501C(3) environmental organization as Administrative Assistant/Office Manager and recently as Executive Director. Possess strong multi-tasking skills, with the ability to simultaneously work on various projects. Working continuously on professional development expect to share budget and resources management knowledge, analytical thinking, teamwork, and other skills. Experience in Federal Grant Cycle, including Pre award processes, financial and performing monitoring, request for reimbursement, close out, and audits. Moderate knowledge in Public Assistance.

PROFESSIONAL EXPERIENCE

Organización Pro Ambiente Sustentable
Executive Director
March 2022 – present

- Plan, coordinate, and carry out the necessary daily task to keep programs and the organization on track.
- Serve as the main liaison for Blue Flag Program at both the Government level and the private sector to further the program's strategy and requirements.
- Develop and carry out programs to achieve the Organization's mission and values.
- Develop the organizational culture and promote transparency and collaboration throughout the organization.
- Identify, recruit, train and develop a talented team of employees who can lead critical departments and manage strategic business functions.
- Monitor Corporation operations and ensure employees and organization practices comply with regulatory and legal requirements.
- Develop partnerships with company stakeholders, shareholders, industry regulators, and other relevant parties.
- Identify potential risks and opportunities within the organization and its environment to protect organization interests.
- Identify potential sources of investment and organize fundraising efforts.
- Represent the company at social, community, and corporate events in ways that strengthen the brand and communicate the company's message.
- Develop strategic collaborative alliances with leaders of communities, agencies, and other organizations.
- Leads development processes, which include but are not limited to grants, foundations, individuals, and corporations' donations, including cultivations, stewardship, proposal

development, and compliance.

- In charge of the management of private, state and federal funds (restricted and unrestricted) following federal and state regulations, Office of Management and Budget (OMB) policies, and Award documentation, including budgeting, award submission, financial and programmatic management, documentation, compliance, closeout and post-award processes.

San Juan Bay Estuary Program, San Juan PR Office
Manager / Managerial Assistant December
2013 – February 2022

- Support the management of the private, state, and federal funds (restricted and unrestricted) in following federal and state regulations, Office of Management and Budget (OMB) policies, and Award documentation, including budgeting, expenditure monitoring, documentation, general compliance, and post-award processes.
- Knowledge of 2 CFR Part 200- Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.
- Prepare and manage reimbursement documentation for State Revolving Funds.
- Analyze quotes from vendors and service providers, support price negotiations, and verify the availability, allocability, and allowability for management review.
- Process purchases orders on goods and services, prepare requisitions, and documentation
  for payments from the appropriate fund source and assist with any discrepancies on invoices or delivery from the approved purchase order.
- Maintain contractual and financial records for acquisitions and payments as established by the Corporation policies and procedures to comply with periodic audits.
- Develop office procedures and systems for personnel, including accounts payable purchases, payroll, and office equipment used to allocate all charges appropriately among all funds and grants.
- Support the mission of the San Juan Bay Estuary Program and the implementation of its Comprehensive Conservation Management Plan (CCMP) to complete the
  annual work plan activities including field activities, education, and others as needed.
- Organize and coordinate office administration and procedures to ensure organizational effectiveness, efficiency, and safety.

RR Electric Motor Corp,
Canóvanas Manager
April 2013 – December 2013

- In charge of management procedures including bookkeeping, payroll, purchasing, payments, and compliance with state and local agencies.
- In charge of 10 employees and human resources procedures.
- Provided support to customer service and sales department.

24 de octubre de 2022

Saludos cordiales.

Es con entusiasmo que envío mi resumé para la convocatoria de Coordinadora de Programa Eco Escuelas. Poseo maestría en Currículo y Enseñanza y una certificación graduada en Educación Ambiental; con experiencia como educadora y especialista en currículo, aplicando diversas metodologías y estrategias de aprendizaje, estoy convencida de que poseo las competencias profesionales, valores y experiencia que se requieren para el puesto. Entre mis fortalezas se encuentran:

- Actividades programáticas, enlaces con la comunidad, evaluación, mentoría y supervisión.
- Diseño de propuestas, desarrollo de planes de trabajo, administración de fondos otorgados y rendición de cuentas.
- Creación de contenido, materiales y actividades en diversos formatos mediante la selección de estrategias y métodos educativos pertinentes
- Aplicar variadas metodologías de enseñanza en el currículo: inteligencias múltiples, prácticas apropiadas, currículo integrado, aprendizaje cooperativo y aprendizaje basado en proyectos.
- Promover que se reflejen los fundamentos curriculares y éticos de cada materia, que se mejoren las destrezas académicas de los estudiantes a la vez que se satisfagan sus necesidades y aptitudes individuales.
- Integrar la tecnología al currículo como medio de fomentar el deseo de investigación y responsabilidad ante el uso de los diversos medios de información.
- Establecer relaciones cordiales con los miembros de la comunidad escolar para lograr establecer un enlace positivo entre sus componentes.
- Asistir puntualmente y con regularidad, demostrando un alto compromiso con la educación de los estudiantes.

El resumé adjunto provee información acerca de mi educación, experiencia y logros profesionales, que han servido para fortalecer mis competencias profesionales. Apreciaré la oportunidad de discutir personalmente el mismo con usted, dialogar para entender mejor sus necesidades y sobre cómo puedo realizar una contribución valiosa.

Gracias por su tiempo y atención para con el mismo.

Sinceramente,

VISIÓN EDUCATIVA

Educadora y Diseñadora Curricular entusiasta y comprometida con experiencia demostrada en la obtención de resultados que redunden en el desarrollo integral de los estudiantes. Enfocada en desarrollar estrategias y contenido educativo efectivos en beneficios de nuestros niños, jóvenes y adultos. Dominio del diseño de programas de estudios, basados en la investigación, creatividad e innovación promoviendo el desarrollo del pensamiento crítico y aumentando el aprovechamiento académico de los estudiantes.

EXPERIENCIA PROFESIONAL

ESPECIALISTA EN EDUCACIÓN COMUNITARIA | 2018-presente
FIDEICOMISO PARA CIENCIA, TECNOLOGÍA E INVESTIGACIÓN

- Llevar a cabo el plan estratégico educativo mediante visitas informativas, llamadas telefónicas y presentaciones a organizaciones educativas, sin fines de lucro y privadas.
- Diseñar e implementar talleres de capacitación para maestros y personal de salud pública.
- Construcción de evaluaciones para charlas educativas y actividades interactivas ofrecidas a estudiantes y público en general.
- Evaluar, gestionar y monitorear la evaluación formativa y sumativa de las intervenciones ofrecidas en el Programa.
- Redacción de propuestas, informes de uso fiscal y programático por el uso de fondos otorgados.
- Diseño curricular de contenido y activades para el manual de intervención de entomología a implementar en instituciones educativas K-12 alineado con la visión de la Unidad de Control de Vectores y los estándares del Departamento de Educación de Puerto Rico.
- Colaborar con el diseñador gráfico en la creación y selección de contenido educativo pertinente y atractivo (videos, evaluaciones, infografías y actividades).
- Crear, revisar o editar variedad de textos educativos: El mosquito; cuento dirigido a niños de edad preescolar; Libros de actividades Achú 1 y 2, dirigido a niños de primaria para aumentar el conocimiento del virus del COVID; El día que la Tierra tembló; El mosquito *Aedes aegypti*, libro de actividades para estudiantes de escuela intermedia.
- Revisión y edición de módulos interactivos en línea: Biología, control de vectores y prevención de enfermedades arbovirales dirigido a estudiantes.
- Diseño, Redacción e implementación de contenido y laboratorios para el manual: Aprendizaje Basado en Proyectos de la Unidad de Control de Vectores de Puerto Rico dirigido a profesionales STEM, educadores y maestros.
- Diseño. Redacción y edición de contenido de la Guía de intervención: Biología, ecología y control del mosquito *Aedes aegypti.*
- Creación del contenido del boletín mensual de la Unidad de Control de Vectores

Maestra Elemental (4to-6to) |DEPR

Especialista en Currículo| DEPR

Directora Escolar K-12|DEPR

Certificación STEM |AMGEN

National Geographic Certificate Educator

Certificación Heartsaver First Aid

Certificado Maestra Cooperadora

EXPERIENCIA PROFESIONAL

PROFESORA ARTES DEL LENGUAJE | 2017-2018
CEDIN ESCUELA LABORATORIO - UNIVERSIDAD INTERAMERICANA

- Diseñar e implementar materiales y experiencias educativas de corte constructivista, permitiendo a los estudiantes explorar y construir su conocimiento. Desarrollar una comunidad de aprendices en la sala de clases, fomentando la colaboración.
- Diseñar e implementar planificación integrada de español y estudios sociales, de acuerdo con los principios de desarrollo y las prácticas apropiadas, de forma emergente e integrada.
- Asistir en la coordinación de actividades académicas y extracuriculares.
- Diseño y revisión de Secuencia curricular, alineada a estándares y expectativas del DEPR.
- Diseñar instrumentos de avalúo y evaluaciones apropiadas para determinar el desarrollo del estudiante.
- Mantener actualizados los registros electrónicos y documentos requeridos.
- Realizar tareas afines al rol de Escuela Laboratorio, tales como la supervisión de estudiantes practicantes y aquellos que realizan experiencias clínicas.
- Llevar a cabo reuniones periódicas con padres, tutores, orientador y administradores para dirigir y resolver situaciones de conducta o académicas.
- Asistir a talleres de desarrollo profesional y pertenecer a organizaciones educativas con el fin de aumentar el conocimiento en estrategias innovadoras de enseñanza – aprendizaje.

DIRECTORA ESCOLAR | 2011-2016
ACADEMIA SALLY OLSEN, GUAYNABO

- Liderar áreas de aspectos académicos, administrativos, evaluación y servicios estudiantiles, acorde con el modelo, visión, misión y valores institucionales.
- Seleccionar textos y materiales educativos de acuerdo con el grado y los estándares y expectativas del Departamento de Educación de Puerto Rico.
- Dirigir el comité de revisión curricular de Preescolar a Sexto grado.
- Asistir a la facultad en la implementación de nuevas tecnologías en su planificación diaria.
- Revisar y editar pruebas, evaluaciones y avalúo ofrecidos a los estudiantes.
- Proveer retroalimentación a la facultad basada en el aprovechamiento de sus estudiantes, las observaciones de clase y los planes educativos.
- Establecer expectativas del contenido curricular a cubrir durante el año escolar.
- Colaborar en el diseño del **Proyecto Escuela Verde** para concienciar a los estudiantes sobre la conservación y embellecimiento del medio ambiente.
- Proporcionar liderazgo educativo, orientación y adiestramiento a docentes.
- Encargada de reclutar, coordinar, supervisar y dar seguimiento al desarrollo de actividades docentes y de servicios complementarios.
- Introducir el Programa de Integración de la Tecnología e identificar programas educativos apropiados para la edad ampliando los objetivos curriculares.
- Desarrollo de propuestas para el desarrollo profesional docente tales como: Titulo II.

LOGROS Y DISTINCIONES

- Coordinadora de Actividades del Nivel Elemental
- Recipiente 2020 y 2022 de fondos para el desarrollo de Proyecto Educativo- Entomología (Sociedad Entomológica de América Chrysalis Fund)
- Coordinadora Periódico Escolar
- Coordinadora del Departamento de Ciencias y Español
- Moderadora del Consejo de Estudiantes
- Miembro del Comité de Asuntos Académicos
- Miembro del Comité de Revisión Curricular
- Miembro del Comité de Ciencias y Tecnologías (Middle States Association)

EDUCACION

Re: **EJ4Climate Grant Letter of Support**

To whom it may concern,

The National Wildlife Federation is pleased to submit this letter of support for *Organización Pro Ambiente Sustentable's (OPAS)* EJ4Climate grant proposal, *Resilient Schools Consortium: Transforming Puerto Rico's Schools into Hubs for Climate Resilience Education and Solutions*.

The National Wildlife Federation (NWF), a conservation and environmental education leader and the sole U.S. host of the international Eco-Schools program in the United States, has been collaborating with OPAS – which manages Eco-Schools in Puerto Rico - since 2006. NWF and OPAS have worked together with their parent organization, the Foundation for Environmental Education, to expand and strengthen the Eco-Schools program.

NWF has implemented and managed the nationally and internationally recognized Resilient Schools Consortium (RiSC) program in the U.S. since 2016 (see www.riscnyc.org). The RiSC program, and place-based curriculum, engages middle and high school students in project-based learning about climate science, impacts, justice, and resilience solutions. Through school and community-based vulnerability assessments, shoreline field trips, hands-on coastal restoration projects, and oral history projects that connect students and local residents, the program empowers youth to help build social and ecological resilience where they live. NWF staff has also developed teacher trainings that introduce educators to the curriculum, tools and activities.

RiSC has been adapted in Texas, New Jersey, and the U.S. Virgin Islands, which was slammed by category 5 Hurricane Irma in 2017. According to a USVI teacher who implemented the adapted RiSC program there, "the students learned ways to incorporate green infrastructure into their community and the importance of being resilient in the face of climate change" (see https://bit.ly/3DZw1m8).

NWF's goal is to bring RiSC to frontline/EJ communities that have been hit first and worst by extreme climate-fueled weather events and lack climate and resilience education, so that current and future generations can learn to adapt and prepare for increasingly challenging climate impacts.

Though Puerto Rico has been battered by numerous hurricanes and tropical storms, is vulnerable to extreme wind, flooding, heat and drought, and threats to its water, power and food supplies, climate, resilience and emergency preparedness education is absent from the island's educational programming and curricula. Puerto Rico's frontline communities are even more vulnerable to these impacts and have few resources with which to cope, recover, rebuild and prepare.

A newly added section (23) to Puerto Rico's Mitigation, Adaptation and Resilience Act (0033-2019) directs the Secretary of Education to "Add the subjects of Climate Change, Mitigation, Adaptation, and Resilience to the school curricula at all levels." This provides NWF and OPAS with the perfect opportunity to make a difference, especially for Puerto Rico's frontline communities.

NWF is committed to traveling to Puerto Rico, and working with OPAS on site to help them adapt the RiSC program so that it is culturally appropriate to Puerto Rico's population, history, geography, ecology, and economy. We will support local translators working with OPAS to translate the existing RiSC curriculum from English into Spanish, and will support OPAS in their efforts to see that the curriculum is adopted by the local Department of Education, thereby making it accessible to all middle and high school students on the island.

As well, we will work with OPAS to ensure that the program and curriculum can be used by schools located in frontline/EJ communities with little or no access to technology, that teacher training in these communities is culturally responsive, and that the program can continue past the grant's expiration.

The United Nations has asked all countries to include climate education in their curricula by 2025. We have no time to lose in preparing youth in vulnerable communities to become climate literate and resilient to future climate impacts.

Sincerely,

Kim Martinez

Climate Change and Resilience at Schools

Submitted on April 14, 2023

Submitted by Organización Pro Ambiente Sustentable

1.0 PROGRAM OBJECTIVES

a. Project Summary

i, Project Title: Climate Change and Resilience at Schools

ii. Project Location: Puerto Rico

iii. Applicant information: Organización Pro Ambiente Sustentable Inc. (OPAS)

PO Box 270440 San Juan PR 00928
Ex. 6 - Personal Privacy (PP)
Main contact: Carmen Valentin, Executive Director
crvalentin@opaspr.org

iv. Description of Applicant Organization

Organización Pro Ambiente Sustentable (OPAS) is a 501(c)3 nonprofit organization fully dedicated to environmental conservation and education since 2005. OPAS is the representative in Puerto Rico of the international organization, Foundation for Environmental Education (FEE), and its program Eco-Schools, Young Reporters for the Environment and Blue Flag. Our Vision is to provide communities with the knowledge to facilitate their effective integration into the analysis and finding solutions to environmental problems. Our Mission is to promote good environmental practices based on sustainable actions.

v. Are you applying for the Samll CBO Set Aside Track for $150,000 projects? No

vi. Project Abstract

In the last five years, Puerto Rico has been hit by a series of major hurricanes (Irma, Maria (2017), Fiona (2022)), related flooding and landslides, and earthquakes. These disasters have destroyed the island's power grid and critical infrastructure, caused thousands of deaths, billions of dollars in damages, and lasting post-traumatic stress. Despite these catastrophic events, and the fact that schools unaffected by hurricanes are often used to shelter the displaced, there is no climate and resilience education in Puerto Rico's K-12 schools to help students understand the root causes of climate-fueled extreme weather events, cope with the physical and psychological aftermath of such disasters, prepare for future natural hazard events, or learn about mitigation, adaptation and resilience solutions. In addition, a 2017 study by Herman et. al revealed an urgent need to increase Puerto Rico's secondary teachers' climate literacy. Among other concerning findings, 82% of the Puerto Rico science teachers surveyed erroneously thought that the depletion of the ozone layer is a primary cause of climate change, and they neglect the social, political and economic dimensions of the crisis.

Currently, Puerto Rico is experiencing one of the worst fiscal and economic crises in its history, fueled by climate disasters and – many say – dire governance. These realities have caused a massive exodus of Puerto Rican families, mainly to the continental United States, and with it,

a flight of K-12 students and professionals in search of better education and job opportunities. Since 2017, hundreds of elementary and middle schools have been abandoned, mostly in the island's rural areas (65%) relative to urban areas (35%). According to the Teachers Association of Puerto Rico, at the start of the 2022-23 school year, five years after Hurricane Maria and the earthquakes of 2020, the physical conditions of 240 public schools (out of 849) still remain critical. Although the populations of both public and private school families have been declining for years, in recent months, Puerto Rico has seen a sharp decline in student enrollment. At the same time, emigration has continued to increase - a situation that continues to decrease the availability of human capital with specialized skills on the island. There is a critical need to restore faith in the island's education system and invest in climate and sustainability education to empower the island's youth to become future leaders and professionals who will develop contingency plans and solutions to intensified climate-fueled natural disasters.

Climate change has increased the development of more severe atmospheric phenomena. The lack of climate literacy and resilience practices and behaviors at young ages creates disadvantages that put at risk some basic needs such as clean water, food, and safe housing during disasters.

On May 22, 2019, the government of Puerto Rico published Act No.33-2019 related to climate mitigation, adaptation and resilience. Article 23 (on p.49 of the Act) describes adding an amendment to the Puerto Rico Education Reform Law (Act No. 85-2018). The Article directs the Secretary of Education to "Add the subjects of Climate Change Mitigation, Adaptation, and Resilience to the school curricula at all levels." This new directive creates the perfect opportunity for OPAS to launch the RiSC program model in Puerto Rico and promote the Eco-Schools Methodology through the education public system. The RiSC program and curriculum, which focuses on hands-on projects and real-world problem-solving, was originally developed in 2017 for NYC., Since then, it has been adapted in Texas, New Jersey, and the U.S. Virgin Islands, which – like Puerto Rico - was battered by hurricanes Irma and Maria in 2017. Through OPAS' and its partners, the RiSC curriculum will be translated into Spanish and adapted to Puerto Rico's geography and community needs using two pilot vulnerable schools at Loiza Municipality thanks to the support of the Commission of Environmental Cooperation's EJ4Climate Grant during the next 2 years. Using an adapted RiSC Coastal Vulnerability Assessment, students and their teachers will audit their school buildings, neighborhoods, and critical infrastructure, to assess their school buildings, neighborhoods and communities vulnerability to extreme weather events, such as storm surge and coastal flooding, brought on by climate change. Through EPA EJCPS, OPAS will incorporate additional pilot schools to enrich the adaptation process of the RiSC Curriculum with other resiliency needs using additional social, geographics, and demographic characteristics. The final result should be a more comprehensive tool to be presented to the Department of Education for curriculum integration about climate change and resiliency.

vii. Project Type(s): Education, capacity building

viii. Special Considerations: Climate Change/Disaster Resiliency

ix. Environmental Issue: Climate Change, Disaster, Resilience

x. List of Project Partners: National Wildlife Federation, Puerto Rico State Office for Emergency Management.

xi. Will you need to develop a QAPP for your project? No

b. Environmental and Public Health information of the Underserved Community

In the last five years, Puerto Rico has been hit by a series of major hurricanes (Irma, Maria (2017), Fiona (2022)), related flooding and landslides, and earthquakes. These disasters have destroyed the island's power grid and critical infrastructure, caused thousands of deaths, billions of dollars in damages, and lasting post-traumatic stress. Despite these catastrophic events, and the fact that schools unaffected by hurricanes are often used to shelter the displaced, there is no climate and resilience education in Puerto Rico's K-12 schools to help students understand the root causes of climate-fueled extreme weather events, cope with the physical and psychological aftermath of such disasters, prepare for future natural hazard events, or learn about mitigation, adaptation and resilience solutions. In addition, a 2017 study by Herman et. al revealed an urgent need to increase Puerto Rico's secondary teachers' climate literacy. Among other concerning findings, 82% of the Puerto Rico science teachers surveyed erroneously thought that the depletion of the ozone layer is a primary cause of climate change, and they neglected the social, political and economic dimensions of the crisis.

Currently, Puerto Rico is experiencing one of the worst fiscal and economic crises in its history, fueled by climate disasters and – many say – dire governance. These realities have caused a massive exodus of Puerto Rican families, mainly to the continental United States, and with it, a flight of K-12 students and professionals in search of better education and job opportunities. Since 2017, hundreds of elementary and middle schools have been abandoned, mostly in the island's rural areas (65%) relative to urban areas (35%). According to the Teachers Association of Puerto Rico, at the start of the 2022-23 school year, five years after Hurricane Maria and the earthquakes of 2020, the physical conditions of 240 public schools (out of 849) still remain critical. Although the populations of both public and private school families have been declining for years, in recent months, Puerto Rico has seen a sharp decline in student enrollment. At the same time, emigration has continued to increase - a situation that continues to decrease the availability of human capital with specialized skills on the island. There is a critical need to restore faith in the island's education system and invest in climate and sustainability education to empower the island's youth to become future leaders and professionals who will develop contingency plans and solutions to intensified climate-fueled natural disasters.

Climate change has increased the development of more severe atmospheric phenomena. The lack of climate literacy and resilience practices and behaviors at young ages creates disadvantages that put at risk some basic needs such as clean water, food, and safe housing during disasters.

On May 22, 2019, the government of Puerto Rico published Act No.33-2019 related to climate mitigation, adaptation and resilience. Article 23 (on p.49 of the Act) describes the addition of an amendment to the Puerto Rico Education Reform Law (Act No. 85-2018). The Article directs the Secretary of Education to "Add the subjects of Climate Change Mitigation, Adaptation, and Resilience to the school curricula at all levels." This new directive creates the perfect opportunity for OPAS to launch the RiSC program model in Puerto Rico and promote the Eco-Schools Methodology through the education public system. The RiSC program and curriculum, which focuses on hands-on projects and real-world problem-solving, was originally developed in 2017 for NYC., Since then, it has been adapted in Texas, New Jersey, and the U.S. Virgin Islands, which – like Puerto Rico - was battered by hurricanes Irma and Maria in 2017. Through OPAS' and its partners, the RiSC curriculum will be translated into Spanish and adapted to Puerto Rico's geography and community needs using two pilot vulnerable schools at Loiza Municipality thanks to the support of the Commission of Environmental Cooperation's EJ4Climate Grant during the next 2 years. Using an adapted RiSC Coastal Vulnerability Assessment, students and their teachers will audit their school buildings, neighborhoods, and critical infrastructure, to assess their school buildings, neighborhoods and communities' vulnerability to extreme weather events, such as storm surge and coastal flooding, brought on by climate change. In doing so, RiSC teams will gather data on projected local impacts of flooding, storm surge and sea level rise, and increase their understanding and awareness of how extreme weather impacts their local areas. Student RiSC teams will learn about green and grey infrastructure and resilient and adaptive design solutions. Through EPA EJCPS, OPAS will incorporate additional pilot schools to enrich the adaptation process of the RiSC Curriculum with other resiliency needs using additional social, geographics, and demographic characteristics. The final result should be a more comprehensive tool to be presented to the Department of Education for curriculum integration about climate change and resiliency.

c. Organization's Historical Connection to Underserved Community

The Organización Pro Ambiente Sustentable (OPAS) Inc. is a non-profit organization in San Juan, Puerto Rico. Since 2005, OPAS has been running The Eco-School, Blue Flag, Young Reporters for the Environment, and Reef Check International programs, along with other initiatives aimed at educating people on sustainability and the protection of the environment. The Eco-Schools Program exposes more than 10,000 children, youth, teachers, and non-teaching staff annually to identify, analyze and solve environmental and social problems to promote sustainable development in their campus, community, and country since 2006 in Puerto Rico. Eco-Schools encourage young people to engage in their environment by allowing them the opportunity to protect it actively. It starts in the classroom, it expands to the school, and eventually, fosters change in the community at large. After evaluating their campuses, students make decisions and actions to reduce the carbon footprint of their campus. These actions may include waste reduction and/or diversion projects such as recycling, composting, material collection (glasses, clothing, electronics, etc.); biodiversity projects such as gardens, butterfly farms, and apiaries; garden projects; power projects; water projects, among others. The current network includes 24 active schools in Puerto Rico.

After hurricane Maria, OPAS joined forces with participants Eco-Schools and entities from all sectors to meet the critical needs of the population by promoting and providing sustainable aid alternatives to affected communities in the recovery process. Among others, eco-friendly water filters and solar flashlights and chargers were distributed island-wide. Seeds were also donated to help organic farmers whose crops were destroyed and for Eco-Schools to rebuild their school gardens. This helped to identify the skills needed to be developed to promote resiliency at school levels.

Eco School is a well-structured program that combines learning with hands-on experiences through an all-inclusive, participatory approach involving students, teachers, and the local community at large. This provides a platform to work on the themes and pathways of climate change and resilience, serving as a tool for the adaptation and testing of the RiSC curriculum, where the main actors are the students and teachers. The participation of students through the support of EJ4Climate, which will start in May, will provide a base for adapting the curriculum. The participation of additional schools through the EJCPS Collaborative Agreement will enrich the content making it more relevant to schools across the island and improving the final product to be presented to the Department of Education.

d. EJCPS Model:

Eco-Schools program was developed by the Foundation for Environmental Education (FEE) as a response to the needs identified at the United Nations Conference on Environment and Development in 1992. It started in Europe and became a global model for environmental education and sustainability at the international level. Eco-School was designed with a seven-step change framework for continuous improvement that incorporates the main elements of the EJCPS Model. The methods involve a wide diversity of individuals from the school community, with students playing a primary role. These seven steps are not linear and can be crossed over and revised through the cycle that usually lasts one scholar year. These steps are:

1. **Forming an Eco Committee.** The Eco-Schools Committee is the driving force behind the Eco-Schools process and represents the ideas of the whole school. It includes students, teachers, parents, and other community members. The similarity of EJCPS Model: Build upon existing leadership and experience in the community, involve students, teachers, and community members, identify partners, and build plans and goals.
2. **Environmental Review.** This is a series of audits that help the school to identify its current environmental impact and highlight areas for improvement. The similarity of EJCPS Model: Element 1- identify problems to build plans and goals. Element 2 - Gather appropriate information about issues, and conduct assessments regarding the causes of a potential solution to problems.
3. **Action Plan.** Results from the environmental review are used to design the Action Plan, forming the core of student action. The similarity of EJCPS Model: Element 2 – Identify resources that can provide technical assistance and capacities to meet goals. Educate students and teachers about the problem and involve them in formulating solutions. Element 3- Help the eco committee develop agreements. Element 4 - Establish dialogues that lead to possible partnerships, develop workplans.

4. **Monitor & Evaluate.** This is carried out to find out if the targets set by the action plan are being achieved. The similarity of EJCPS Model: Element 7- Use lessons learnend as the project proceeds, describe measures of success, periodically evaluate progress, document and share information.
5. **Curriculum Work.** Eco-Schools activities are linked to the curriculum, ensuring Eco-Schools is truly integrated within the school community. Element 3- Uses techniques for problems solution or goals achievement. Promote the dev
6. **Inform & Involve.** This involves getting everyone on board! Actions are not solely confined to the school community but are encouraged to engage community members and parents, for example. The similarity of EJCPS Model: Element 5 – Identify and engage the community and stakeholders. Identify partners to address the resources needs. Element 6 – Use strengths of partners.
7. **Eco Code.** Students collaborate to devise a statement that represents the school's commitment to the environment. The similarity of EJCPS Model: Element 4- Create common vision, goals and objectives. Element 6- Clarity commitments and plans.

e. Project Linkages

(1)Supports EPA Strategic Plan Goal 2 (Take Decisive Action to Advance Environmental Justice and Civil Rights), Objective 2.1, (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels).

This project's main target is to develop capacity building and climate within school communities. While Eco-School develops the capacity to tackle the climate crisis, the RiSC adapted curriculum and their pilot resilience hubs will provide a new model for climate resilience education in Puerto Rico, helping to build stronger communities prepared for the future challenges.

f. Partner and Collaborate

For the adaptation of the RiSC Curriculum and two first pilot projects, OPAS has made partnerships with the National Wildlife Federation and Puerto Rico State Office of Emergency Management under the EJ4Climate Grant from the Commission for Environmental Collaboration. The National Wildlife Federation will provide the RiSC curriculum and the technical support, knowledge, and professional development to OPAS's curriculum developers to facilitate its adaptation to Puerto Rico's reality. The State Office of Emergency Management will provide free Community Response Emergency Team (CERT) certification workshops for teachers and students. The CERT also will be provided to additional participants under the EJCPS Cooperative Agreement.

OPAS is developing additional collaboration agreements with Taller Salud, a community-based non-profit organization based in Loiza. They will serve as community liaisons supporting the recruitment and coordinating activities.

OPAS expects to have collaboration with Municipalities, Schools administrators, the Department of Education, and community-based nonprofits around participants' schools

and other entities and stakeholders as key partners to improve the implementation of this project and promote sustainability and autonomy.

2.0 Project Activities / Milestone Schedule / Detailed Budget Narrative

Activity 1. Resilient School Consortium Curriculum - additional pilots

Objectives:
Launch RiSC curriculum at one additional school during the curriculum adaptation process with participants under EJ4Climate Grant until March 2025.
Launch RiSC curriculum at two new schools during the school year 2024-25.
Design a Climate Resilience Education Guidelines to present to the Department of Education of Puerto Rico along the RiSC curriculum.

Description:

The Resilient Schools Consortium (RiSC), is a nationally and internationally recognized climate and resilience education program and curriculum that educates middle and high school students about climate science, climate impacts, climate justice and resilience solutions and provides teacher professional development. The program has been implemented in climate vulnerable communities in New York City (NYC), Texas, and New Jersey and adapted in the U.S. Virgin Islands. Puerto Rico – an island community of more than 3 million people - has been battered by climate-fueled storms and yet has no climate and resilience education programming for its 300,000 public secondary school students. An amendment to the Puerto Rico Education Reform Law directs the Secretary of Education to "add the subjects of Climate Change Mitigation, Adaptation, and Resilience to the school curricula at all levels." This creates the perfect opportunity to launch the RiSC program in Puerto Rico.

Led by *Organizacion Pro-Ambiente Sustentable* (OPAS), in partnership with two pilot schools on the Island, the State Office of Emergency Management of Puerto Rico (PR), and the National Wildlife Federation, - a RiSC program and teacher training modules will be adapted for Puerto Rico and the curriculum translated into Spanish thanks to the support of the Commission for Environmental Cooperation granted on March 2023. Students will be part of the adaptation process and will test it by executing small-scale resilience projects and sharing their newfound knowledge with students at other schools. These school-based resilience hubs will provide a new model for climate resilience education in Puerto Rico, helping to build stronger communities that are prepared for future challenges.

Through EJCPS Cooperative Agreement, one school will be added for the curriculum adaptation process during the first year to add a different perspective on social, cultural, and ecological realities. The curriculum includes lessons, activities, workshops, and/or field trips related to climate change, climate vulnerability, climate adaptation, and emergency preparedness and resilience.

On September 2024, two additional schools from different social, geographics, and needs will be added to pilot the curriculum to identify additional adaptation needs before presenting the final product and guidelines to the Department of Education.

Outputs/Deliverables

- Recruitment of one (1) additional pilot for year one.
- Recruitment of two (2) pilot schools for year two.
- Six (6) professional workshops for teachers at the pilot projects
- Six (6) field trips to sustainable community projects.
- Three (3) small-scale resilience projects at pilot school.
- Three (3) CERT certification workshops.
- One (1) Education Guidelines for RiSC Curriculum implementation.

Outcomes:

Short-term: Climate change and resilience curriculum adapted for Puerto Rico schools. Three additional resilient schools.

Intermediate: Increased school climate resilience. Better resources for integrating climate change and resilience curriculum at schools.

Long-term: Community members adapted and prepared for future climate challenges.

Milestones

1st Quarter Year 1: Completion of the recruitment for pilot project school and teachers. First professional workshop for teachers. First lessons from the curriculum launch.
2nd Quarter Year 1: Curriculum activities, workshops, field trips and implementing work plan actions.
3rd Quarter Year 1: Curriculum activities, workshops, field trips, sustainable projects and implementing work plan actions.
4th Quarter Year 1: Preliminary guidelines and evaluations. Recruitment of pilots for second year.
1st Quarter Year 2: Professional workshops for teachers, curriculum activities, workshops, fieldtrips and implementing work plan actions.
2nd Quarter Year 2: Curriculum activities, workshops, fieldtrips and implementing workplan actions.
3rd Quarter Year 2: Curriculum activities, workshops, field trips, sustainable projects and implementing work plan actions.
4th Quarter Year 2: Developing guidelines and evaluations. Final reporting.

Estimated Budget: $68,400

Budget detail:

Product or service	Cost	Category	Description
Field trips to sustainable community projects Transportation Workshop fee	 $3,600 $1,800	 Other Other	 $600 per field trip for bus transportation $300 aprox. per workshop
3 Small-scale resilient project stipends	$3,000	Other	$1,000 for each school as stipend to use for the development of a small scale project such as solar, water or agricultural project.
Teacher stipend	$24,000	Other	$2,000 per teacher per year (One pilot project: $2,000x 3 teachers x 2 years= $12,000) (Two pilot project: $2,000 x 6 teachers x 1 year- $12,000)
Project supplies	$5,000	Supplies	$3,5000 for Supplies for materials such as paper, binders, tape, markers, hand sanitizer and similar materials for workshops and training and educational outlets such water bottle, cap, or reusable bags. $1,500 for snacks and light refreshments for workshops, training and field trips (aprox. $100 per activity)
Curriculum developer	$5,000	Contractual	Final review and editing of RiSC curriculum and guidelines.
Design of education guidelines	$3,000	Contractual	Graphic design of guideline for the curriculum
Printing of education guidelines for RiSC Curriculum	$3,000	Other	Print of final guidance for RiSC Curriculum
Community Liaison Stipend	$20,000	Other	$5,000 Stipend for community liaison per school per year. (First year – 1 school, Second year = 3 Schools) It could be a community member or organization._

Activity 2. Tackling Climate Change and developing resilience

Objectives:
Recruit 10 vulnerable, disadvantaged or rural schools for Eco School program for the years 2023-2025.
Have an increase of 15% of climate change awareness and/or knowledge on pre/post-test among students, teachers and Eco-School community during 2023-2025.
Expose 150 students to sustainable projects such as sustainable agriculture and/or renewable energy during 2023-2025.
Expose 200 elementary school students to climate change, sustainability, and adaptation topics during 2023-2025.
Expose 20 vulnerable, disadvantaged, or rural schools to climate change, sustainability, and adaptation topics during 2023-2025.

Description:

It is necessary to advance climate change literacy among schools, especially starting at the early stages of the educational system. The education coordinator and the Eco-Schools coordinator will lead the education efforts to reach as many schools as possible during the next two years. These educational initiatives provide initial exposure to students while a formal curriculum is developed and implemented. This educational program includes activities such as field trip workshops and other activities to expand community tools to face future climate challenges.

Eco-Schools

The Eco-Schools program is an international program that engages K -12 students in finding and implementing solutions for local environmental challenges, focusing on reducing their carbon footprint at their schools and surrounding communities. The program was developed in 1994 by the Foundation for Environmental Education (FEE) in response to the United Nations (UN) Agenda regarding sustainable development goals (SDG). The program is an all-inclusive participatory approach involving students, teachers, and the local community by combining learning with hands-on experiences. The Eco-School will be able to present its work at the Eco-School Congress.

Educational Field trips

These educational field trips will provide students and teachers an experiential contact with sustainable projects. Some field trips will introduce sustainable agriculture, including urban methods and new technologies and/or solar or waste management projects.

Workshops and curricular lessons

The facilitation of workshops will provide knowledge about sustainability, climate change, and other resilience topics to students and teachers of different levels.

Outputs/Deliverables

- Recruitment of ten (10) Eco-Schools in vulnerable or rural areas.
- 10 field trips to sustainable projects
- 200 elementary students impacted by education.
- 20 vulnerable schools impacted by education.
- One Eco-Schools Congress

Outcomes:

Short-term: OPAS expects to impact 1,000 students and teachers through the Eco-School program and additional 500 students with educational initiatives.

Intermediate: Increased school climate resilience. Better resources for integrating climate change and resilience curriculum at schools.

Long-term: Community members adapted and prepared for future climate challenges.

Milestones

1st Quarter Year 1: Completion of the recruitment for Eco-school. Coordination for implementation.
2nd Quarter Year 1: 25% Curriculum activities, workshops, field trips, and implementing work plan actions.
3rd Quarter Year 1: Curriculum activities, workshops, field trips, sustainable projects, and implementing work plan actions.
4th Quarter Year 1: 50% of Curriculum activities, workshops, field trips, sustainable projects, and implementing work plan actions.
1st Quarter Year 2: Professional workshops for teachers, curriculum activities, workshops, field trips, and implementing work plan actions.
2nd Quarter Year 2: 75% Curriculum activities, workshops, field trips, and implementing work plan actions.
3rd Quarter Year 2: Eco-Schools Congress. Curriculum activities, workshops, field trips, sustainable projects, and implementing work plan actions.
4th Quarter Year 2. Final reporting.

Estimated Budget: $126,600

Budget detail:

Product or service	Cost	Category	Description
Eco-School Coordinator	$41,600	Contractual	$16/ hour for 1,300 hours per year
Field trips to sustainable community projects			
Transportation	$6,000	Other	$600 per field trip for bus transportation
Workshop fee	$3,000	Other	$300 aprox. per workshop

4 Small-scale sustainable project stipends	$2,000	Other	$500 for each school as a stipend for the development of a small-scale project such as a solar, water, or agricultural project.
Eco-Schools Congress	$10,000 $6,000	Other Supplies	$3,000 for rent of venue, chairs or audio.$2,000 for light lunch for students. Per Year $3,000 for educational outlets such as water bottle or reusable bag or similar per year.
Project supplies	$10,000	Supplies	$3,500 per year for Supplies for materials such as paper, binders, tape, markers, educational models, and other educational materials for workshops and training and educational outlets such water bottles, caps, or reusable bags. $1,500 per year for snacks and light refreshments for workshops, training and field trips (aprox. $100 per activity)
Education Coordinator	$48,000	Contractual	$24,000 at $16/hour for 1,500 hoursper year.

Activity 3. Long Range Communications

Objectives:
Increase and share knowledge about resiliency and climate change.

Description:

The communication strategies are fundamentals to disseminate the efforts of OPAS. Interaction with the media and social platforms is important to spread awareness and our messages. Communication efforts include researching, writing and monitoring the media, developing content for social platforms and supporting OPAS in developing our messaging and storytelling.

Outputs/Deliverables

- Two (2) communication pieces about climate change and resilience.
- Two (2) press releases about the RiSC curriculum.
- Social media presence throughout the grant life.
- One (1) communication piece about Eco-Schools.
- 10 educational videos or Facebook Lives of 30s to 3min to inform the public about the initiatives.
- Maintain OPAS website working effectively with relevant content.

Outcomes:

Short-term: Relevant content abour OPAS initiatives.

Intermediate: Increased 20% of actual social media interactions.

Long-term: Strengthen public awareness and engagement.

Milestones

The communication strategies will be constantly implemented throughout the Grant Period.

Estimated Budget: $82,000

Budget detail:

Product or service	Cost	Category	Description
Communication Specialist	$60,000	Contractual	$50/hour for a total of 1,200 hours for two years.
Maintenance of the website www.opaspr.org	$10,000	Contractual	$5,000 per year for updates, content edits and service as needed.
Social media and communication assistant	$12,000	Contractual	$15/hour for 800 hours for two years.

3.0 Environmental Results – Outcomes, Outputs and Performance Measures

Please refer to attachment logic model.

4.0 Programmatic Capability

Organizational Experience

OPAS has been developing and leading sustainable and environmental education among the general public and schools since 2015. Our Vision is to provide communities with the knowledge to facilitate their effective integration into the analysis and finding solutions to environmental problems. Our Mission is to promote good environmental practices based on sustainable actions. The Puerto Rico Department of Education endorses OPAS to offer environmental education services to the educational system The Eco-Schools Program exposes more than 10,000 children, youth, teachers, and non-teaching staff annually to identify, analyze and solve environmental and social problems to promote sustainable development in their campus, community, and country since 2006 in Puerto Rico.

Staff Experience / Qualifications of Project Manager

Executive Director: Carmen R. Valentín is a marine biologist with a master's in Management of Non-profit Organizations and eight years of experience working previously at the San Juan Bay Estuary Program, a Federal Funded Environmental Organization. Valentín is a member of the

National Grant Manager Association (NGMA), which provides continued education related to Grant Management topics. She also is pursuing being certified by NGMA as Certified Grant Manager and as a project manager professional this year. Valentin possesses experience and knowledge working closely with financials, technical reports, and every step of the grant cycle for projects funded by EPA.

Eco-Schools Manager: Alice Colón Sanabria is a committed educator and curriculum designer with proven experience in obtaining results that result in the comprehensive development of students. Colón has a master's in the Art of Education with a specialty in curriculum and teaching and is certified in Environmental Education and Educational Administration and Supervision.

Expenditure of Awarded Grang Funds, and plan for compliance with EPA's Pre award Compliance Review for Non Profit.

Last February, OPAS completed a policy and procedure review to ensure compliance following the Federal guidance. OPAS has in place the necessary controls and procedures for managing the award and is ready to submit any information requested. OPAS is training the administrative personnel about federal fund management, compliance topics, and other aspects to assure compliance.

5.0 Past Performance

Past performance:

2019-2023 Fundación Segarra Boerman: Eco School support
2021-22 Fundación Angel Ramos: Eco School support
2021-23 Fondos Legislativos: Eco School support
2015-2023 Annual Cooperative Agreement with PR Tourism Company: Blue Flag
2023-2025 Commission for Environmental Cooperation: RiSC Curriculum adaptation

OPAS does not have any federal past experience. The first federal funds were requested on February 2023 and were not awarded or denied.

All local funded projects of OPAS have been finished and reported in compliance as proposed and agreed with the funding sources.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Open Door Mission, Inc.

Address: 156 N Plymouth Ave

City: Rochester

State: NY: New York Zip Code: 14608-1834

B. Unique Entity Identifier (UEI): LA7EPJ1XK643

C. Applicant/Recipient Point of Contact

Name: Anna Valeria-Iseman

Phone: Ex. 6 - Personal Privacy (PP)

Email: Ex. 6 - Personal Privacy (PP)

Title: CEO

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

NA

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☐ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☒ Yes	☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

N/A

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

N/A

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Anna Valeria-Iseman	CEO	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Climate Change and Resilience at Schools

Submitted on April 14, 2023

Submitted by Organización Pro Ambiente Sustentable

1.0 PROGRAM OBJECTIVES

a. Project Summary

i, Project Title: Climate Change and Resilience at Schools

ii. Project Location: Puerto Rico

iii. Applicant information: Organización Pro Ambiente Sustentable Inc. (OPAS)

PO Box 270440 San Juan PR 00928
Ex. 6 - Personal Privacy (PP)
Main contact: Carmen Valentin, Executive Director
crvalentin@opaspr.org

iv. Description of Applicant Organization

Organización Pro Ambiente Sustentable (OPAS) is a 501(c)3 nonprofit organization fully dedicated to environmental conservation and education since 2005. OPAS is the representative in Puerto Rico of the international organization, Foundation for Environmental Education (FEE), and its program Eco-Schools, Young Reporters for the Environment and Blue Flag. Our Vision is to provide communities with the knowledge to facilitate their effective integration into the analysis and finding solutions to environmental problems. Our Mission is to promote good environmental practices based on sustainable actions.

v. Are you applying for the Samll CBO Set Aside Track for $150,000 projects? No

vi. Project Abstract

In the last five years, Puerto Rico has been hit by a series of major hurricanes (Irma, Maria (2017), Fiona (2022)), related flooding and landslides, and earthquakes. These disasters have destroyed the island's power grid and critical infrastructure, caused thousands of deaths, billions of dollars in damages, and lasting post-traumatic stress. Despite these catastrophic events, and the fact that schools unaffected by hurricanes are often used to shelter the displaced, there is no climate and resilience education in Puerto Rico's K-12 schools to help students understand the root causes of climate-fueled extreme weather events, cope with the physical and psychological aftermath of such disasters, prepare for future natural hazard events, or learn about mitigation, adaptation and resilience solutions. In addition, a 2017 study by Herman et. al revealed an urgent need to increase Puerto Rico's secondary teachers' climate literacy. Among other concerning findings, 82% of the Puerto Rico science teachers surveyed erroneously thought that the depletion of the ozone layer is a primary cause of climate change, and they neglect the social, political and economic dimensions of the crisis.

Currently, Puerto Rico is experiencing one of the worst fiscal and economic crises in its history, fueled by climate disasters and – many say – dire governance. These realities have caused a massive exodus of Puerto Rican families, mainly to the continental United States, and with it,

a flight of K-12 students and professionals in search of better education and job opportunities. Since 2017, hundreds of elementary and middle schools have been abandoned, mostly in the island's rural areas (65%) relative to urban areas (35%). According to the Teachers Association of Puerto Rico, at the start of the 2022-23 school year, five years after Hurricane Maria and the earthquakes of 2020, the physical conditions of 240 public schools (out of 849) still remain critical. Although the populations of both public and private school families have been declining for years, in recent months, Puerto Rico has seen a sharp decline in student enrollment. At the same time, emigration has continued to increase - a situation that continues to decrease the availability of human capital with specialized skills on the island. There is a critical need to restore faith in the island's education system and invest in climate and sustainability education to empower the island's youth to become future leaders and professionals who will develop contingency plans and solutions to intensified climate-fueled natural disasters.

Climate change has increased the development of more severe atmospheric phenomena. The lack of climate literacy and resilience practices and behaviors at young ages creates disadvantages that put at risk some basic needs such as clean water, food, and safe housing during disasters.

On May 22, 2019, the government of Puerto Rico published Act No.33-2019 related to climate mitigation, adaptation and resilience. Article 23 (on p.49 of the Act) describes adding an amendment to the Puerto Rico Education Reform Law (Act No. 85-2018). The Article directs the Secretary of Education to "Add the subjects of Climate Change Mitigation, Adaptation, and Resilience to the school curricula at all levels." This new directive creates the perfect opportunity for OPAS to launch the RiSC program model in Puerto Rico and promote the Eco-Schools Methodology through the education public system. The RiSC program and curriculum, which focuses on hands-on projects and real-world problem-solving, was originally developed in 2017 for NYC., Since then, it has been adapted in Texas, New Jersey, and the U.S. Virgin Islands, which – like Puerto Rico - was battered by hurricanes Irma and Maria in 2017. Through OPAS' and its partners, the RiSC curriculum will be translated into Spanish and adapted to Puerto Rico's geography and community needs using two pilot vulnerable schools at Loiza Municipality thanks to the support of the Commission of Environmental Cooperation's EJ4Climate Grant during the next 2 years. Using an adapted RiSC Coastal Vulnerability Assessment, students and their teachers will audit their school buildings, neighborhoods, and critical infrastructure, to assess their school buildings, neighborhoods and communities vulnerability to extreme weather events, such as storm surge and coastal flooding, brought on by climate change. Through EPA EJCPS, OPAS will incorporate additional pilot schools to enrich the adaptation process of the RiSC Curriculum with other resiliency needs using additional social, geographics, and demographic characteristics. The final result should be a more comprehensive tool to be presented to the Department of Education for curriculum integration about climate change and resiliency.

vii. Project Type(s): Education, capacity building

viii. Special Considerations: Climate Change/Disaster Resiliency

ix. Environmental Issue: Climate Change, Disaster, Resilience

x. List of Project Partners: National Wildlife Federation, Puerto Rico State Office for Emergency Management.

xi. Will you need to develop a QAPP for your project? No

b. Environmental and Public Health information of the Underserved Community

In the last five years, Puerto Rico has been hit by a series of major hurricanes (Irma, Maria (2017), Fiona (2022)), related flooding and landslides, and earthquakes. These disasters have destroyed the island's power grid and critical infrastructure, caused thousands of deaths, billions of dollars in damages, and lasting post-traumatic stress. Despite these catastrophic events, and the fact that schools unaffected by hurricanes are often used to shelter the displaced, there is no climate and resilience education in Puerto Rico's K-12 schools to help students understand the root causes of climate-fueled extreme weather events, cope with the physical and psychological aftermath of such disasters, prepare for future natural hazard events, or learn about mitigation, adaptation and resilience solutions. In addition, a 2017 study by Herman et. al revealed an urgent need to increase Puerto Rico's secondary teachers' climate literacy. Among other concerning findings, 82% of the Puerto Rico science teachers surveyed erroneously thought that the depletion of the ozone layer is a primary cause of climate change, and they neglected the social, political and economic dimensions of the crisis.

Currently, Puerto Rico is experiencing one of the worst fiscal and economic crises in its history, fueled by climate disasters and – many say – dire governance. These realities have caused a massive exodus of Puerto Rican families, mainly to the continental United States, and with it, a flight of K-12 students and professionals in search of better education and job opportunities. Since 2017, hundreds of elementary and middle schools have been abandoned, mostly in the island's rural areas (65%) relative to urban areas (35%). According to the Teachers Association of Puerto Rico, at the start of the 2022-23 school year, five years after Hurricane Maria and the earthquakes of 2020, the physical conditions of 240 public schools (out of 849) still remain critical. Although the populations of both public and private school families have been declining for years, in recent months, Puerto Rico has seen a sharp decline in student enrollment. At the same time, emigration has continued to increase - a situation that continues to decrease the availability of human capital with specialized skills on the island. There is a critical need to restore faith in the island's education system and invest in climate and sustainability education to empower the island's youth to become future leaders and professionals who will develop contingency plans and solutions to intensified climate-fueled natural disasters.

Climate change has increased the development of more severe atmospheric phenomena. The lack of climate literacy and resilience practices and behaviors at young ages creates disadvantages that put at risk some basic needs such as clean water, food, and safe housing during disasters.

On May 22, 2019, the government of Puerto Rico published Act No.33-2019 related to climate mitigation, adaptation and resilience. Article 23 (on p.49 of the Act) describes the addition of an amendment to the Puerto Rico Education Reform Law (Act No. 85-2018). The Article directs the Secretary of Education to "Add the subjects of Climate Change Mitigation, Adaptation, and Resilience to the school curricula at all levels." This new directive creates the perfect opportunity for OPAS to launch the RiSC program model in Puerto Rico and promote the Eco-Schools Methodology through the education public system. The RiSC program and curriculum, which focuses on hands-on projects and real-world problem-solving, was originally developed in 2017 for NYC., Since then, it has been adapted in Texas, New Jersey, and the U.S. Virgin Islands, which – like Puerto Rico - was battered by hurricanes Irma and Maria in 2017. Through OPAS' and its partners, the RiSC curriculum will be translated into Spanish and adapted to Puerto Rico's geography and community needs using two pilot vulnerable schools at Loiza Municipality thanks to the support of the Commission of Environmental Cooperation's EJ4Climate Grant during the next 2 years. Using an adapted RiSC Coastal Vulnerability Assessment, students and their teachers will audit their school buildings, neighborhoods, and critical infrastructure, to assess their school buildings, neighborhoods and communities' vulnerability to extreme weather events, such as storm surge and coastal flooding, brought on by climate change. In doing so, RiSC teams will gather data on projected local impacts of flooding, storm surge and sea level rise, and increase their understanding and awareness of how extreme weather impacts their local areas. Student RiSC teams will learn about green and grey infrastructure and resilient and adaptive design solutions. Through EPA EJCPS, OPAS will incorporate additional pilot schools to enrich the adaptation process of the RiSC Curriculum with other resiliency needs using additional social, geographics, and demographic characteristics. The final result should be a more comprehensive tool to be presented to the Department of Education for curriculum integration about climate change and resiliency.

c. Organization's Historical Connection to Underserved Community

The Organización Pro Ambiente Sustentable (OPAS) Inc. is a non-profit organization in San Juan, Puerto Rico. Since 2005, OPAS has been running The Eco-School, Blue Flag, Young Reporters for the Environment, and Reef Check International programs, along with other initiatives aimed at educating people on sustainability and the protection of the environment. The Eco-Schools Program exposes more than 10,000 children, youth, teachers, and non-teaching staff annually to identify, analyze and solve environmental and social problems to promote sustainable development in their campus, community, and country since 2006 in Puerto Rico. Eco-Schools encourage young people to engage in their environment by allowing them the opportunity to protect it actively. It starts in the classroom, it expands to the school, and eventually, fosters change in the community at large. After evaluating their campuses, students make decisions and actions to reduce the carbon footprint of their campus. These actions may include waste reduction and/or diversion projects such as recycling, composting, material collection (glasses, clothing, electronics, etc.); biodiversity projects such as gardens, butterfly farms, and apiaries; garden projects; power projects; water projects, among others. The current network includes 24 active schools in Puerto Rico.

After hurricane Maria, OPAS joined forces with participants Eco-Schools and entities from all sectors to meet the critical needs of the population by promoting and providing sustainable aid alternatives to affected communities in the recovery process. Among others, eco-friendly water filters and solar flashlights and chargers were distributed island-wide. Seeds were also donated to help organic farmers whose crops were destroyed and for Eco-Schools to rebuild their school gardens. This helped to identify the skills needed to be developed to promote resiliency at school levels.

Eco School is a well-structured program that combines learning with hands-on experiences through an all-inclusive, participatory approach involving students, teachers, and the local community at large. This provides a platform to work on the themes and pathways of climate change and resilience, serving as a tool for the adaptation and testing of the RiSC curriculum, where the main actors are the students and teachers. The participation of students through the support of EJ4Climate, which will start in May, will provide a base for adapting the curriculum. The participation of additional schools through the EJCPS Collaborative Agreement will enrich the content making it more relevant to schools across the island and improving the final product to be presented to the Department of Education.

d. EJCPS Model:

Eco-Schools program was developed by the Foundation for Environmental Education (FEE) as a response to the needs identified at the United Nations Conference on Environment and Development in 1992. It started in Europe and became a global model for environmental education and sustainability at the international level. Eco-School was designed with a seven-step change framework for continuous improvement that incorporates the main elements of the EJCPS Model. The methods involve a wide diversity of individuals from the school community, with students playing a primary role. These seven steps are not linear and can be crossed over and revised through the cycle that usually lasts one scholar year. These steps are:

1. **Forming an Eco Committee.** The Eco-Schools Committee is the driving force behind the Eco-Schools process and represents the ideas of the whole school. It includes students, teachers, parents, and other community members. The similarity of EJCPS Model: Build upon existing leadership and experience in the community, involve students, teachers, and community members, identify partners, and build plans and goals.
2. **Environmental Review.** This is a series of audits that help the school to identify its current environmental impact and highlight areas for improvement. The similarity of EJCPS Model: Element 1- identify problems to build plans and goals. Element 2 - Gather appropriate information about issues, and conduct assessments regarding the causes of a potential solution to problems.
3. **Action Plan.** Results from the environmental review are used to design the Action Plan, forming the core of student action. The similarity of EJCPS Model: Element 2 – Identify resources that can provide technical assistance and capacities to meet goals. Educate students and teachers about the problem and involve them in formulating solutions. Element 3- Help the eco committee develop agreements. Element 4 - Establish dialogues that lead to possible partnerships, develop workplans.

4. **Monitor & Evaluate.** This is carried out to find out if the targets set by the action plan are being achieved. The similarity of EJCPS Model: Element 7- Use lessons learnend as the project proceeds, describe measures of success, periodically evaluate progress, document and share information.
5. **Curriculum Work.** Eco-Schools activities are linked to the curriculum, ensuring Eco-Schools is truly integrated within the school community. Element 3- Uses techniques for problems solution or goals achievement. Promote the dev
6. **Inform & Involve.** This involves getting everyone on board! Actions are not solely confined to the school community but are encouraged to engage community members and parents, for example. The similarity of EJCPS Model: Element 5 – Identify and engage the community and stakeholders. Identify partners to address the resources needs. Element 6 – Use strengths of partners.
7. **Eco Code.** Students collaborate to devise a statement that represents the school's commitment to the environment. The similarity of EJCPS Model: Element 4- Create common vision, goals and objectives. Element 6- Clarity commitments and plans.

e. Project Linkages

(1)Supports EPA Strategic Plan Goal 2 (Take Decisive Action to Advance Environmental Justice and Civil Rights), Objective 2.1, (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels).

This project's main target is to develop capacity building and climate within school communities. While Eco-School develops the capacity to tackle the climate crisis, the RiSC adapted curriculum and their pilot resilience hubs will provide a new model for climate resilience education in Puerto Rico, helping to build stronger communities prepared for the future challenges.

f. Partner and Collaborate

For the adaptation of the RiSC Curriculum and two first pilot projects, OPAS has made partnerships with the National Wildlife Federation and Puerto Rico State Office of Emergency Management under the EJ4Climate Grant from the Commission for Environmental Collaboration. The National Wildlife Federation will provide the RiSC curriculum and the technical support, knowledge, and professional development to OPAS's curriculum developers to facilitate its adaptation to Puerto Rico's reality. The State Office of Emergency Management will provide free Community Response Emergency Team (CERT) certification workshops for teachers and students. The CERT also will be provided to additional participants under the EJCPS Cooperative Agreement.

OPAS is developing additional collaboration agreements with Taller Salud, a community-based non-profit organization based in Loiza. They will serve as community liaisons supporting the recruitment and coordinating activities.

OPAS expects to have collaboration with Municipalities, Schools administrators, the Department of Education, and community-based nonprofits around participants' schools

and other entities and stakeholders as key partners to improve the implementation of this project and promote sustainability and autonomy.

2.0 Project Activities / Milestone Schedule / Detailed Budget Narrative

Activity 1. Resilient School Consortium Curriculum - additional pilots

Objectives:
Launch RiSC curriculum at one additional school during the curriculum adaptation process with participants under EJ4Climate Grant until March 2025.
Launch RiSC curriculum at two new schools during the school year 2024-25.
Design a Climate Resilience Education Guidelines to present to the Department of Education of Puerto Rico along the RiSC curriculum.

Description:

The Resilient Schools Consortium (RiSC), is a nationally and internationally recognized climate and resilience education program and curriculum that educates middle and high school students about climate science, climate impacts, climate justice and resilience solutions and provides teacher professional development. The program has been implemented in climate vulnerable communities in New York City (NYC), Texas, and New Jersey and adapted in the U.S. Virgin Islands. Puerto Rico – an island community of more than 3 million people - has been battered by climate-fueled storms and yet has no climate and resilience education programming for its 300,000 public secondary school students. An amendment to the Puerto Rico Education Reform Law directs the Secretary of Education to "add the subjects of Climate Change Mitigation, Adaptation, and Resilience to the school curricula at all levels." This creates the perfect opportunity to launch the RiSC program in Puerto Rico.

Led by *Organizacion Pro-Ambiente Sustentable* (OPAS), in partnership with two pilot schools on the Island, the State Office of Emergency Management of Puerto Rico (PR), and the National Wildlife Federation, - a RiSC program and teacher training modules will be adapted for Puerto Rico and the curriculum translated into Spanish thanks to the support of the Commission for Environmental Cooperation granted on March 2023. Students will be part of the adaptation process and will test it by executing small-scale resilience projects and sharing their newfound knowledge with students at other schools. These school-based resilience hubs will provide a new model for climate resilience education in Puerto Rico, helping to build stronger communities that are prepared for future challenges.

Through EJCPS Cooperative Agreement, one school will be added for the curriculum adaptation process during the first year to add a different perspective on social, cultural, and ecological realities. The curriculum includes lessons, activities, workshops, and/or field trips related to climate change, climate vulnerability, climate adaptation, and emergency preparedness and resilience.

On September 2024, two additional schools from different social, geographics, and needs will be added to pilot the curriculum to identify additional adaptation needs before presenting the final product and guidelines to the Department of Education.

Outputs/Deliverables

- Recruitment of one (1) additional pilot for year one.
- Recruitment of two (2) pilot schools for year two.
- Six (6) professional workshops for teachers at the pilot projects
- Six (6) field trips to sustainable community projects.
- Three (3) small-scale resilience projects at pilot school.
- Three (3) CERT certification workshops.
- One (1) Education Guidelines for RiSC Curriculum implementation.

Outcomes:

Short-term: Climate change and resilience curriculum adapted for Puerto Rico schools. Three additional resilient schools.

Intermediate: Increased school climate resilience. Better resources for integrating climate change and resilience curriculum at schools.

Long-term: Community members adapted and prepared for future climate challenges.

Milestones

1st Quarter Year 1: Completion of the recruitment for pilot project school and teachers. First professional workshop for teachers. First lessons from the curriculum launch.
2nd Quarter Year 1: Curriculum activities, workshops, field trips and implementing work plan actions.
3rd Quarter Year 1: Curriculum activities, workshops, field trips, sustainable projects and implementing work plan actions.
4th Quarter Year 1: Preliminary guidelines and evaluations. Recruitment of pilots for second year.
1st Quarter Year 2: Professional workshops for teachers, curriculum activities, workshops, fieldtrips and implementing work plan actions.
2nd Quarter Year 2: Curriculum activities, workshops, fieldtrips and implementing workplan actions.
3rd Quarter Year 2: Curriculum activities, workshops, field trips, sustainable projects and implementing work plan actions.
4th Quarter Year 2: Developing guidelines and evaluations. Final reporting.

Estimated Budget: $68,400

Budget detail:

Product or service	Cost	Category	Description
Field trips to sustainable community projects Transportation Workshop fee	 $3,600 $1,800	 Other Other	 $600 per field trip for bus transportation $300 aprox. per workshop
3 Small-scale resilient project stipends	$3,000	Other	$1,000 for each school as stipend to use for the development of a small scale project such as solar, water or agricultural project.
Teacher stipend	$24,000	Other	$2,000 per teacher per year (One pilot project: $2,000x 3 teachers x 2 years= $12,000) (Two pilot project: $2,000 x 6 teachers x 1 year- $12,000)
Project supplies	$5,000	Supplies	$3,5000 for Supplies for materials such as paper, binders, tape, markers, hand sanitizer and similar materials for workshops and training and educational outlets such water bottle, cap, or reusable bags. $1,500 for snacks and light refreshments for workshops, training and field trips (aprox. $100 per activity)
Curriculum developer	$5,000	Contractual	Final review and editing of RiSC curriculum and guidelines.
Design of education guidelines	$3,000	Contractual	Graphic design of guideline for the curriculum
Printing of education guidelines for RiSC Curriculum	$3,000	Other	Print of final guidance for RiSC Curriculum
Community Liaison Stipend	$20,000	Other	$5,000 Stipend for community liaison per school per year. (First year – 1 school, Second year = 3 Schools) It could be a community member or organization._

Activity 2. Tackling Climate Change and developing resilience

Objectives:
Recruit 10 vulnerable, disadvantaged or rural schools for Eco School program for the years 2023-2025.
Have an increase of 15% of climate change awareness and/or knowledge on pre/post-test among students, teachers and Eco-School community during 2023-2025.
Expose 150 students to sustainable projects such as sustainable agriculture and/or renewable energy during 2023-2025.
Expose 200 elementary school students to climate change, sustainability, and adaptation topics during 2023-2025.
Expose 20 vulnerable, disadvantaged, or rural schools to climate change, sustainability, and adaptation topics during 2023-2025.

Description:

It is necessary to advance climate change literacy among schools, especially starting at the early stages of the educational system. The education coordinator and the Eco-Schools coordinator will lead the education efforts to reach as many schools as possible during the next two years. These educational initiatives provide initial exposure to students while a formal curriculum is developed and implemented. This educational program includes activities such as field trip workshops and other activities to expand community tools to face future climate challenges.

Eco-Schools

The Eco-Schools program is an international program that engages K -12 students in finding and implementing solutions for local environmental challenges, focusing on reducing their carbon footprint at their schools and surrounding communities. The program was developed in 1994 by the Foundation for Environmental Education (FEE) in response to the United Nations (UN) Agenda regarding sustainable development goals (SDG). The program is an all-inclusive participatory approach involving students, teachers, and the local community by combining learning with hands-on experiences. The Eco-School will be able to present its work at the Eco-School Congress.

Educational Field trips

These educational field trips will provide students and teachers an experiential contact with sustainable projects. Some field trips will introduce sustainable agriculture, including urban methods and new technologies and/or solar or waste management projects.

Workshops and curricular lessons

The facilitation of workshops will provide knowledge about sustainability, climate change, and other resilience topics to students and teachers of different levels.

Outputs/Deliverables

- Recruitment of ten (10) Eco-Schools in vulnerable or rural areas.
- 10 field trips to sustainable projects
- 200 elementary students impacted by education.
- 20 vulnerable schools impacted by education.
- One Eco-Schools Congress

Outcomes:

Short-term: OPAS expects to impact 1,000 students and teachers through the Eco-School program and additional 500 students with educational initiatives.

Intermediate: Increased school climate resilience. Better resources for integrating climate change and resilience curriculum at schools.

Long-term: Community members adapted and prepared for future climate challenges.

Milestones

1st Quarter Year 1: Completion of the recruitment for Eco-school. Coordination for implementation.
2nd Quarter Year 1: 25% Curriculum activities, workshops, field trips, and implementing work plan actions.
3rd Quarter Year 1: Curriculum activities, workshops, field trips, sustainable projects, and implementing work plan actions.
4th Quarter Year 1: 50% of Curriculum activities, workshops, field trips, sustainable projects, and implementing work plan actions.
1st Quarter Year 2: Professional workshops for teachers, curriculum activities, workshops, field trips, and implementing work plan actions.
2nd Quarter Year 2: 75% Curriculum activities, workshops, field trips, and implementing work plan actions.
3rd Quarter Year 2: Eco-Schools Congress. Curriculum activities, workshops, field trips, sustainable projects, and implementing work plan actions.
4th Quarter Year 2. Final reporting.

Estimated Budget: $123,100

Budget detail:

Product or service	Cost	Category	Description
Eco-School Coordinator	$41,600	Contractual	$16/ hour for 1,300 hours per year
Field trips to sustainable community projects			
Transportation	$6,000	Other	$600 per field trip for bus transportation
Workshop fee	$3,000	Other	$300 aprox. per workshop

4 Small-scale sustainable project stipends	$2,000	Other	$500 for each school as a stipend for the development of a small-scale project such as a solar, water, or agricultural project.
Eco-Schools Congress	$10,000 $6,000	Other Supplies	$3,000 for rent of venue, chairs or audio.$2,000 for light lunch for students. Per Year $3,000 for educational outlets such as water bottle or reusable bag or similar per year.
Project supplies	$6,500	Supplies	$5, 000 for Supplies for materials such as paper, binders, tape, markers, educational models, and other educational materials for workshops and training and educational outlets such water bottles, caps, or reusable bags. $1,500 for snacks and light refreshments for workshops, training and field trips (aprox. $100 per activity)
Education Coordinator	$48,000	Contractual	$24,000 at $16/hour for 1,500 hoursper year.

Activity 3. Long Range Communications

Objectives:
Increase and share knowledge about resiliency and climate change.

Description:

The communication strategies are fundamentals to disseminate the efforts of OPAS. Interaction with the media and social platforms is important to spread awareness and our messages. Communication efforts include researching, writing and monitoring the media, developing content for social platforms and supporting OPAS in developing our messaging and storytelling.

Outputs/Deliverables

- Two (2) communication pieces about climate change and resilience.
- Two (2) press releases about the RiSC curriculum.
- Social media presence throughout the grant life.
- One (1) communication piece about Eco-Schools.
- 10 educational videos or Facebook Lives of 30s to 3min to inform the public about the initiatives.
- Maintain OPAS website working effectively with relevant content.

Outcomes:

Short-term: Relevant content abour OPAS initiatives.

Intermediate: Increased 20% of actual social media interactions.

Long-term: Strengthen public awareness and engagement.

Milestones

The communication strategies will be constantly implemented throughout the Grant Period.

Estimated Budget: $82,000

Budget detail:

Product or service	Cost	Category	Description
Communication Specialist	$60,000	Contractual	$50/hour for a total of 1,200 hours for two years.
Maintenance of the website www.opaspr.org	$10,000	Contractual	$5,000 per year for updates, content edits and service as needed.
Social media and communication assistant	$12,000	Contractual	$15/hour for 800 hours for two years.

3.0 Environmental Results – Outcomes, Outputs and Performance Measures

Please refer to attachment logic model.

4.0 Programmatic Capability

Organizational Experience

OPAS has been developing and leading sustainable and environmental education among the general public and schools since 2015. Our Vision is to provide communities with the knowledge to facilitate their effective integration into the analysis and finding solutions to environmental problems. Our Mission is to promote good environmental practices based on sustainable actions. The Puerto Rico Department of Education endorses OPAS to offer environmental education services to the educational system The Eco-Schools Program exposes more than 10,000 children, youth, teachers, and non-teaching staff annually to identify, analyze and solve environmental and social problems to promote sustainable development in their campus, community, and country since 2006 in Puerto Rico.

Staff Experience / Qualifications of Project Manager

Executive Director: Carmen R. Valentín is a marine biologist with a master's in Management of Non-profit Organizations and eight years of experience working previously at the San Juan Bay Estuary Program, a Federal Funded Environmental Organization. Valentín is a member of the

National Grant Manager Association (NGMA), which provides continued education related to Grant Management topics. She also is pursuing being certified by NGMA as Certified Grant Manager and as a project manager professional this year. Valentin possesses experience and knowledge working closely with financials, technical reports, and every step of the grant cycle for projects funded by EPA.

Eco-Schools Manager: Alice Colón Sanabria is a committed educator and curriculum designer with proven experience in obtaining results that result in the comprehensive development of students. Colón has a master's in the Art of Education with a specialty in curriculum and teaching and is certified in Environmental Education and Educational Administration and Supervision.

Expenditure of Awarded Grang Funds, and plan for compliance with EPA's Pre award Compliance Review for Non Profit.

Last February, OPAS completed a policy and procedure review to ensure compliance following the Federal guidance. OPAS has in place the necessary controls and procedures for managing the award and is ready to submit any information requested. OPAS is training the administrative personnel about federal fund management, compliance topics, and other aspects to assure compliance.

5.0 Past Performance

Past performance:

2019-2023 Fundación Segarra Boerman: Eco School support
2021-22 Fundación Angel Ramos: Eco School support
2021-23 Fondos Legislativos: Eco School support
2015-2023 Annual Cooperative Agreement with PR Tourism Company: Blue Flag
2023-2025 Commission for Environmental Cooperation: RiSC Curriculum adaptation

OPAS does not have any federal past experience. The first federal funds were requested on February 2023 and were not awarded or denied.

All local funded projects of OPAS have been finished and reported in compliance as proposed and agreed with the funding sources.

COMMISSION FOR ENVIRONMENTAL COOPERATION | COMISIÓN PARA LA COOPERACIÓN AMBIENTAL | COMMISSION DE COOPÉRATION ENVIRONNEMENTALE

Carmen Rosa Valentin
Executive Director
Organización Pro Ambiente Sustentable
PO Box 270440
San Juan, Puerto Rico 00928
United States

March 6th, 2023

Dear Ms. Valentin:

It is my pleasure to inform you that the CEC has selected your project to receive support under the CEC's EJ4Climate: Environmental Justice and Climate Resilience program.

Accordingly, a grant in the amount of C$ 199,592 has been approved for the project "Resilient Schools Consortium: Transforming Puerto Rico's Schools into Hubs for Climate Resilience Education and Solutions".

The CEC will be announcing publicly all the selected grantees the week of March 13th, 2023. We would kindly ask you not to disclose this information until the announcement.

We thank you for your commitment and look forward to working with you on our shared efforts to conserve, protect and enhance the North American environment.

Sincerely yours,

Jorge Daniel Taillant
Executive Director

November 8, 2022

Lourdes Díaz Colón
Organización Pro-Ambiente Sustentable (OPAS)
San Juan, Puerto Rico

RE: Support Letter

Dear Mrs. Díaz:

We are delighted to express our support for your EJ4Climate Proposal: The Resilient Schools Consortium (RiSC) A Pilot Program to Transform Puerto Rico's Schools into Hubs for Climate and Resilience Education, Hurricane Preparedness, and Local Resilience Solutions.

Our agency oversees all emergency activities in Puerto Rico. Its mission is to coordinate all the resources of the government of Puerto Rico to administer all the phases of emergency management (mitigation, preparation, recovery, and response) in the case of natural or technological disaster while preventing and minimizing all damage to life and property.

The agency also coordinates similar functions with the federal government of the United States and foreign countries, as well as offering help and cooperation with the private sector. We are also responsible for The **Community Emergency Response Team (CERT)** program that educates volunteers about disaster preparedness for the hazards that may impact their area and trains them in basic disaster response skills, such as fire safety, light search and rescue, team organization, and disaster medical operations.

CERT offers a consistent, nationwide approach to volunteer training and organization that professional responders can rely on during disaster situations, which allows them to focus on more complex tasks. Through CERT, the capabilities to prepare for, respond to and recover from disasters is built and enhanced.

We are happy to be a partner and provide our expertise and CERT programs to the teachers, students, and community members of the participating schools once the proposal is approved.

Cordially.

Nino Correa Filomeno
Commissioner

Malik D. Evans
Mayor

Friday, April 14, 2023

Environmental Protection Agency
Office of Grants and Debarment (Mail Code: 3901)
1200 Pennsylvania Avenue
N.W. Washington, D.C. 20460

I am writing to express my support for the Open Door Mission's Energy Storage for Social Equity (ES4SE) Initiative grant application on behalf of the City of Rochester. This initiative is critical in improving community resilience, reducing fossil fuel emissions, and promoting equitable justice.

The project aims to install a 2.05 MWh lithium-ion battery, a 31-kW rooftop solar array, and a 20-kW carport with dual-port EV charging stations connected to the battery system. Transitioning away from diesel or fossil generators will significantly reduce the health impacts on vulnerable community members, particularly women's shelter residents. Additionally, battery storage will reduce hyper-local air and noise pollution, promoting a cleaner and healthier environment. In a disaster, the project will provide critical resilience to ensure the continuity of essential services, particularly for the Mission's food bank efforts. All of this will significantly impact Rochester's environmental and public health outcomes, especially in communities that have historically been excluded from decision-making processes.

The requested grant funding of $500,000 would support the installation of the proposed energy storage and EV charging infrastructure and workforce development and job training initiatives in collaboration with the Open Door Mission. This grant would be instrumental in advancing the ES4SE initiative and achieving the City's goals of improving environmental and public health outcomes, promoting resilience, and creating new job opportunities in the clean energy sector while advancing equitable justice for all.

Thank you for considering this grant application and your continued support in advancing environmental justice, sustainability, and equitable justice in our community.

Sincerely,

Malik D. Evans, Mayor

Gardener

Profile

Community Engagement Leader with a passion for growing a greener world while creating opportunities for environmental and economic justice through net zero sustainable community-based projects. Collaborating with community leaders and politicians from the local, state, and federal level to create and bring awareness to the opportunities for environmental and economic equity in the renewables industry.

Experience

July 2019—Present

Solar Ambassador/Climate Justice Advocate – Unity Renewables LLC

Independent Contractor acquiring customers for Solar Farms located in New York State. Performing the entire sales and marketing process with a focus in disadvantaged communities. Attending business networking events, cold sales calls, festival and events, and canvassing both residential and commercial prospects. Continuous advocacy for better community engagement and involvement in the renewables industry by empowering community groups through awareness and education of the industry.

September 2015—Present

Owner/Business Development Manager – BEAN Insurance Agency and Aaryn Maharaj State Farm Agency

Business Development Manager/Owner for two family-owned Insurance Agencies. Generate sales using several different methods to include cold calling, networking events, business meetings, internet lead calling. Managing the full day to day operations of a small business.

May 2005 - September 2015

IT Project Management– Network and Systems Administrator with IT Project Management

Lead several large technology infrastructure upgrade projects for PriceWaterhouseCoopers, The Pike Company and the YMCA of Greater Rochester. Lead internal staff and vendors in delivering cost effective solutions that met each milestone while providing the most optimum solutions.

Community

Urban District YMCA Board of the Directors
Chairman – Serving the community's needs through programs that help build a solid base for our youth to become successful members of society.

Coalition of Northeast Area Neighborhoods
Board Member – Advocating for and improving the quality of life for residents in our neighborhoods through several different grassroots community initiatives.

Color Your Community Green – Irondequoit and Penfield
Committee Member – Assist the local town to achieve their CEC and CEC goals.

Dear Environmental Protection Agency,

We are writing to submit a grant application on behalf of the Open Door Mission's Energy Storage for Social Equity (ES4SE) Initiative. We are committed to advancing environmental justice, sustainability, and equitable justice in our community. We are interested in this project to improve local environmental and public health outcomes, enhance community resilience, and promote clean energy job creation in Rochester.

Unity Renewables is a minority owned and operated business with a passion for growing a greener world while creating opportunities for environmental and economic justice through net zero sustainable community-based projects. Collaborating with community leaders, politicians at the local, state, and federal level, to create and bring awareness to the opportunities for environmental and economic equity in the renewables industry.

Our mission is to provide fair, and equitable access to renewable power, fair and equitable access to careers in the renewables industry and fair and equitable access to business creation opportunities. Unification of low to moderate income households into the renewables market would incentivize the private sector through workforce development (that leads to long term careers and business opportunities) to ensure that marginalized communities are included.

The Open Door Mission Solar Plus Battery Storage Project addresses climate change, disaster resiliency, and emergency preparedness in several ways:
1. Climate Change: By implementing a solar plus storage system.
2. Disaster Resiliency: The Battery Energy Storage System (BESS) ensures that essential community services, such as emergency shelters and hot meal provisions, shall continue uninterrupted during power outages and/or severe weather events.
3. Emergency Preparedness: The project's focus on clean energy resilience helps the Mission prepare for emergencies that may result from climate change-induced events.

Outcomes include the creation of local jobs, workforce development opportunities, training programs, and fostering a model for clean energy solutions in Rochester. This innovative project will serve as an inspiration for addressing environmental justice issues and building a brighter, healthier future for the local community.

As a local Rochester company specializing in renewable energy solutions and workforce development, Unity Renewables has been working on this project with Open Door Mission, Pacific Northwest National Laboratory, and other partners since its inception to ensure the technology solutions meet the project's equity objectives.

Unity Renewables will collaborate with the Open Door Mission to create training opportunities for local community members, helping them develop the skills necessary to participate in the growing renewable energy sector.
It will also provide project management support and work closely with project partners to deploy the energy system to vision.

Unity Renewables is committed to working with Open Door Mission and supporting the Solar Plus Battery Storage Project for several reasons:

Local impact: As a Rochester-based company, we are deeply committed to supporting projects that benefit our community, promote environmental sustainability, and create local jobs.

Shared values: We share Open Door Mission's commitment to addressing environmental and social challenges through innovative solutions, making this partnership a natural fit.

Long-term relationships: Our collaboration with Open Door Mission will help build a strong foundation for future partnerships and joint initiatives, further strengthening our presence and impact in the local community.

The requested grant funding of $500,000 would support the installation of the proposed energy storage and EV charging infrastructure, as well as workforce development and job training initiatives. This grant would be instrumental in advancing the Open Door Mission's Energy Storage for Social Equity (ES4SE) Initiative and achieving our shared goals of improving environmental and public health outcomes, promoting resilience, and creating new job opportunities in the clean energy sector while advancing equitable justice for all.

Thank you for considering this grant application.

Sincerely,

Brandon Maharaj

To Whom This May Concern:

As a State Senator representing the City of Rochester, I am writing to support a grant application on behalf of the **Open Door Mission's Energy Storage for Social Equity (ES4SE) Initiative**. I am committed to advancing environmental justice, sustainability, and equitable justice in our community. As an elected leader, I believe this project will improve local environmental and public health outcomes, enhance community resilience, and promote clean energy job creation in Rochester.

This project, located in my district, aims to improve community resilience, reduce fossil fuel emissions, and promote equitable justice through the installation of a 2.05 MWh lithium-ion battery, a 31-kW rooftop solar array, and a 20-kW carport with dual-port EV charging stations connected to the battery system. The Open Door Mission project has the potential to make a significant impact on environmental and public health outcomes in Rochester, particularly in neighborhoods that have historically been excluded from decision-making processes. Our city experiences disproportionately high asthma rates, and limited access to healthcare services that exacerbates this issue. By transitioning away from diesel or fossil generators, the project would significantly reduce the health impacts on vulnerable community members, particularly shelter residents. The battery storage would also reduce hyper-local air and noise pollution, promoting a cleaner and healthier environment.

In addition to the environmental benefits, the Open Door Mission project would provide critical resilience in potential disaster events, ensuring the continuity of critical services, particularly for the Mission's food bank efforts. Backup power would also maintain the refrigeration of food and supplies during outages, avoiding significant losses. Moreover, the project would create new job opportunities in the clean energy sector and prioritize the hiring of local workers and the provision of training for system maintenance.

This grant would be instrumental in advancing the Open Door Mission's Energy Storage for Social Equity (ES4SE) Initiative and achieving our shared goals of improving environmental and public health outcomes, promoting resilience, and creating new job opportunities in the clean energy sector while advancing equitable justice for all.

Thank you for considering this grant application, and please contact me if I can provide additional information to support at Ex. 6 - Personal Privacy (PP)

Sincerely,

Jeremy A. Cooney
New York State Senator

SUMMARY

1. **Innovative, result-oriented, motivated businessman and attorney**
2. **Tested advocate, skilled negotiator, trial attorney, trusted advisor and has advised and assisted multiple clients navigate through bet-the-company litigation and related critical issues**
3. **Serving in various capacities including board level positions in community organizations such as Open Door Mission, Faith Heritage School, Development of Indo-Asian Leaders (DIAL), Boys and Girls Club, Young Entrepreneurs Academy**

EXPERIENCE

Unity Renewables LLC — ROCHESTER, NY
VP OF STRATEGY AND GENERAL COUNSEL — JANUARY 2023--PRESENT

- Advocating for LMI Consumers, strategizing legal issues, and ensuing access to renewables for non-profits and other underserved.

VAST Enterprise Solutions LLC — ROCHESTER, NY
PRESIDENT OWNER/OPERATOR — JUNE 2020-PRESENT

- Focusing on providing client-focused solutions including light aluminum manufacturing and working with electrical technologies including LED Lighting.

Vivek Thiagarajan Esq. — ROCHESTER, NY
BUSINESS AND COMMERCIAL ATTORNEY/COACH — AUGUST 2020- PRESENT

- Strategically advising corporate, individuals, and non-profit clients through litigation, COVID-19 business transitions, contract review and other related matters.
- Coaching Executive Directors of multiple organizations through transitions, COVID-19, and other specific targeted needs

MORGENSTERN DEVOESICK PLLC — ROCHESTER, NY
BUSINESS AND COMMERCIAL ATTORNEY — MAY 2013- AUGUST 2020

- Argued, briefed, and analyzed multiple complex appeals to the Fourth Department Appellate Court of New York, submitted appeals to the Court of Appeals
- Analyzed, argued, briefed, and tried multiple complex bet-the-company litigation to verdict, negotiated favorable settlements, handled numerous dispositive and motions, and handled extensive discovery .
- Handled and recovered significant amounts in complex bankruptcy and breach of contract actions, analyzing the implications of 21-year bankruptcy case, arguing in the State and Bankruptcy Court, negotiating settlements, strategizing potential organizational takeover, and developing innovative client-oriented solutions
- Examined approximately 30 witnesses in trials, arbitrations, estate proceedings, and administrative hearings
- Advised and negotiated high-C level employment contracts, company exits, and related company issues

HARRIS BEACH PLLC — ROCHESTER, NY
BUSINESS AND COMMERCIAL LITIGATION ASSOCIATE, SUMMER ASSOCIATE — JUNE 2007–MAY 2013

- Investigating accident sites, interviewing injured parties, preserving evidence, interviewing witnesses, including police officers and firefighters, assisting clients in official statements, requesting FOIL disclosures, issuing advisory letters, preparing witnesses, appearing in administrative hearing, tracking criminal trial, and negotiating $1,000,000 settlement
- Drafting, editing, and arguing motions, including summary judgment and discovery motions in various courts
- Preparing, conducting, and defending plaintiff, defendant, and third-party depositions throughout New York State, including in Buffalo, Rochester, and New York City
- Interviewing 30 fact witnesses regarding potential criminal activity, compiling evidence, researching potential criminal violations, and collaborating with New York State Police and Federal Bureau of Investigation

FINGERLAKES OF THE GOODWILL — ROCHESTER, NY
BOARD OF DIRECTORS, PLANNING BOARD COMMITTEE MEMBER — 2022-Present

- Strategizing, developing, and assisting the CEO and lead through POST-COVID transition and operations

Director of Strategy

Joule Assets, Katonah NY

- Led engagement with federal agencies and a national non-profit to further opportunities for the Community Choice Aggregation (CCA) industry
- Won technical assistance for a joint battery storage project with Open Door Mission, an emergency housing and shelter in Rochester NY, as the first phase of the Department of Energy's Energy Storage for Social Equity Initiative
- Directed the offering of a new product supporting municipalities to originate their own community solar and storage
- Investigated municipal sustainability actions that can be paired with CCA and the business models of add-ons

2021-01 - 2021-12

Regulatory Affairs and R&D Manager

Joule Assets , Brussels / Katonah NY

- Led the Energy Efficiency Financial Institutions Group (EEFIG) subgroup to report on buildings for the European Commission
- Tracked regulatory and market developments related to renewable energy markets and CCA in New York and engaged industry stakeholders on current issues to interface with state agencies (NYSERDA)
- Managed a small team and supported professional growth

2019-08 - 2021-01

Strategic Analyst

Joule Assets Europe, Brussels

- Market research and analysis to support European Horizon 2020 projects on financing of energy efficiency
- Led consulting and research engagements for regulatory bodies in the EU and U.S.

2017-06 - 2018-10

Consultant

Compass Renewable Energy Consulting, Toronto, ON

- Supported clients through project capacity feasibility of solar net metering and battery storage systems, financial modelling and valuation of solar/energy storage solutions

2014-05 - 2015-04

Engineering Assistant

Regional Municipality of York, Newmarket, ON

- Business and sustainability planning of energy management for municipal water and wastewater infrastructure
- Responsible for licensing of 28 solar photovoltaic projects as part of the Feed-in Tariff Program.

Education

2018-10 - 2019-05

Master in Global Energy Transition And Governance

Centre International De Formation Européenne - Nice And Berlin
Research methodology, drafting policy and strategy papers. Soft skills include negotiation, team work in international and multicultural environments, and communication.
Awarded a research grant from the EDF Comité d'histoire de l'électricité et de l'énergie

2011-09 - 2016-05

Bachelor of Applied Science: Materials Science and Engineering

University of Toronto
Design of Appropriate Technologies for Global Development, Energy Policy

Certifications and Affiliations

Women in Renewable Energy (WiRE)
Financial Modeling & Valuation Analyst (FMVA) Certification In Progress

Open Door Mission Solar Plus Battery Storage Application Workplan

1.0 PROGRAM OBJECTIVES

a) Project Summary Page

Project Title: Open Door Mission Solar Plus Battery Storage Project in Rochester
Project Location: 156 N Plymouth Ave, Rochester, NY 14608, USA
Applicant Information:
Open Door Mission, Inc.
156 N Plymouth Ave, Rochester, NY 14608, USA
Main Contact:
Anna Valeria-Iseman
Ex. 6 - Personal Privacy (PP)
Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization:
Established in 1952, The Open Door Mission is a 501(c)(3) non-profit Christian Rescue Mission founded to provide for the spiritual and physical needs of the impoverished and homeless men, women, and children of Rochester, New York by restoring hope and changing lives.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No

Project Abstract: The Open Door Mission Solar Plus Battery Storage Project is a collaboration with stakeholders in Rochester New York aimed at strengthening the resilience and cost-effectiveness of vital community services, while addressing environmental justice concerns. Focused on the 156 Plymouth Avenue North facility, the project will ensure the continuity of essential services like emergency shelter, warming and cooling facilities for the homeless, and hot meal provisions during power outages and severe weather events.

By implementing a Battery Energy Storage System (BESS) and solar power, the project will reduce reliance on fossil-fuel-powered generators thereby minimizing noise pollution, poor air quality, and health issues. The initiative addresses multiple challenges faced by the local community, such as limited healthcare access, high crime rates, low transportation access, persistent poverty, and insufficient homeless shelter capacity in Rochester.

Key activities include the installation of a 2.05 MWh lithium-ion battery, a 31 kW rooftop solar array, and a 20 kW carport with dual-port EV charging stations, promoting clean

transportation and encouraging affordable car-sharing initiatives. The project's outputs encompass enhanced community resilience during climate-related events, reduced electricity costs for the Mission, and expanded service reach and impact.

Outcomes include the creation of local jobs, workforce development opportunities, training programs, and fostering a model for clean energy solutions in Rochester. This innovative project will serve as an inspiration for addressing environmental justice issues and building a brighter, healthier future for the local community.

Project Type(s): Small scale construction

Special Considerations: Yes - Projects addressing Climate Change, Disaster Resiliency, and/or Emergency Preparedness

Environmental Issue: Air Quality

List of Project Partners:
Open Door Mission – CBO
Unity Renewables – Local Company
Pacific Northwest National Laboratory – Academic
City of Rochester – Local Government

Will you need to develop a QAPP for your project? No

b. Environmental and Public Health information of the Underserved Community

The underserved community directly impacted by disproportionate environmental and public health harms and risks in downtown Rochester comprises individuals facing the following challenges: poverty, low educational attainment, high unemployment, and inadequate access to healthcare. This underserved community is predominantly concentrated in areas with high census tract poverty and low-income status. They experience health disparities, such as elevated adult asthma rates in the 90th percentile, and are medically underserved.

What are the environmental/public health issue(s) that the project seeks to address?

The environmental and public health issues that the Open Door Mission Solar Plus Battery Storage Project seeks to address include reliance on fossil-fuel-powered generators during power outages and severe weather events, which contribute to noise pollution, poor air quality, and health problems. Additionally, the community faces high

energy burdens due to unemployment, poverty, and discriminatory hiring practices, which exacerbate existing challenges.

What are the environmental/public health results the project seeks to achieve and how will the underserved community benefit from those results?

The project aims to achieve the following environmental and public health results:

1. Enhanced community resilience during climate-related events by ensuring the continuity of essential services, such as emergency shelters and hot meal provisions.
2. Reduced reliance on fossil-fuel-powered generators, resulting in decreased noise pollution, improved air quality, and minimized health issues, particularly benefiting those with asthma.
3. Increased access to clean transportation through the adoption of EV charging infrastructure, promoting affordable car-sharing initiatives, and reducing transportation-related emissions.

The underserved community will benefit from these results by experiencing improved environmental conditions, better public health outcomes, and reduced energy burdens. Additionally, the project will create local jobs, workforce development opportunities, and training programs, addressing unemployment and hiring discrimination issues. By fostering a model for clean energy solutions and prioritizing local workforce development, the project will empower the community and contribute to a brighter, healthier future for downtown Rochester.

The Open Door Mission Solar Plus Battery Storage Project addresses climate change, disaster resiliency, and emergency preparedness in several ways:

1. Climate Change: By implementing a solar plus storage system, the project promotes clean energy generation and reduces greenhouse gas emissions associated with fossil-fuel-powered generators. This transition to renewable energy sources directly contributes to climate change mitigation efforts.
2. Disaster Resiliency: The Battery Energy Storage System (BESS) ensures that essential community services, such as emergency shelters and hot meal provisions, shall continue uninterrupted during power outages and/or severe weather events. By maintaining these critical services, the project enhances the community's ability to respond and adapt to disasters and extreme weather conditions, improving overall resiliency. Additionally, due the fact that the Mission serves those most vulnerable, during a disaster event increasing the resiliency

prevents others from committing crimes and other actions if they do not have access to necessary food, water, and shelter.

3. Emergency Preparedness: The project's focus on clean energy resilience helps the Mission prepare for emergencies that may result from climate change-induced events. The BESS guarantees that the Mission remains operational during disasters, providing essential services to vulnerable populations when they are needed most. Additionally, the inclusion of EV charging infrastructure promotes clean transportation options, further supporting emergency preparedness by ensuring access to fast chargers and encouraging affordable car-sharing initiatives.

Overall, the Open Door Mission Solar Plus Battery Storage Project contributes to climate change mitigation, enhances disaster resiliency, and improves emergency preparedness in the Rochester community. By addressing these interrelated issues, the project demonstrates a comprehensive approach to environmental sustainability and community well-being.

c. Organization's Historical Connection to Underserved Community

Our organization, the Open Door Mission, has a strong historical connection to the underserved community in Rochester. We were founded in 1952 to provide food and shelter to the homeless, and since then, we have expanded our services to include job training, addiction recovery, and women and children's programs. Recently we have developed low income housing programs for those who have graduated from our programs where we can provide additional supportive services.

Our staff and volunteers are from the community, and we work closely with other organizations that serve the underserved community. Currently, we are the only location in Monroe County that is a recognized warming shelter which is where the homeless or others who do not have a place to go come to us during the day. We have over 50 emergency beds and can keep almost 100 people overnight and have had near capacity during the Code Blue (cold winter days). Additionally, we have men and women who are in our other programs including the women and children's programs.

We are committed to community-driven participation, and we involve community residents and organizations in our decision-making process. Our board of directors is made up of community members, and we hold regular community meetings to get feedback from residents and share information about our work. We also work closely with community residents to develop and implement programs that meet their needs.

In terms of addressing local environmental and public health issues, we have worked with the underserved community in a variety of ways. For example, we provide food to people in need, including fresh produce from our community gardens. We also advocate for policies that support the underserved community, such as affordable housing and

healthcare. Additionally, we work with other agencies to provide services that address the root causes of poverty and homelessness, such as job training and addiction recovery.

Overall, our organization has a deep and longstanding commitment to serving the underserved community in Rochester. We have a strong historical connection to the community, and we work closely with community residents and organizations to address local environmental and public health issues.

We are dedicated to community-driven participation and involving the community in our decision-making process, and for this grant we have spent significant time, resources, and energy working with other individuals and organizations to develop this plan to add additional resiliency.

d. EJCPS Model

For the Open Door Mission Solar Plus Battery Storage Project, several elements of the EJCPS Model will be undertaken, with some elements already accomplished or in progress:

1. Issue Identification, Community Vision, and Strategic Goal Setting: The project addresses the issue of clean energy resilience and aims to provide uninterrupted essential services during power outages and severe weather events. The community vision is to promote a clean and sustainable energy future while improving disaster resiliency and emergency preparedness. The strategic goals include the installation of a solar plus storage system, enhanced community capacity, and the establishment of multi-stakeholder partnerships.
2. Community Capacity-Building and Leadership Development: The project will involve capacity-building through community education and awareness programs on renewable energy and disaster preparedness. The project will also aim to identify and mobilize individuals and organizations that can provide technical assistance and resources.
3. Consensus Building and Dispute Resolution: The project will engage stakeholders in a consensus-building process to ensure that diverse perspectives are considered and that disagreements are resolved effectively.
4. Multi-Stakeholder Partnerships and Leveraging of Resources: Partnerships with local government agencies like the City of Rochester, businesses such as Unity Renewables, academia represented by Pacific Northwest National Laboratory, and civic organizations will be established to access resources and expertise, facilitate coordination and communication, and ensure the project's successful implementation.
5. Constructive Engagement by Relevant Stakeholders: Active involvement and support from businesses, academia, civic organizations, and government

agencies will be sought to ensure the successful implementation of the project, facilitate coordination, and provide resources.

6. Sound Management and Implementation: The project will have clear goals, timelines, and responsibilities to ensure proper management and implementation. Strong leadership and decision-making processes will be established within each stakeholder group to ensure smooth execution.
7. Evaluation, Lessons Learned, and Replication of Best Practices: From the beginning, the project will incorporate evaluation processes to assess its effectiveness, learn from experience, and make necessary adjustments. Best practices and lessons learned will be shared with the community and other stakeholders for replication in similar projects.

Some elements, such as Issue Identification, Community Vision, and Strategic Goal Setting, have already been accomplished or are in progress. As the project progresses, the other elements will be implemented to ensure its success and long-term sustainability.

e. Project Linkages

The Open Door Mission Solar Plus Battery Storage Project supports EPA Strategic Plan Goal 2, Objective 2.1 by promoting environmental justice and civil rights at federal, tribal, state, and local levels. This is achieved through the following strategies:

1. Building capacity, climate resilience, and maximizing benefits to overburdened and underserved communities: The project provides clean and sustainable energy to a vulnerable population, improving their access to essential services during power outages and severe weather events. It also enhances community capacity through education and awareness programs on renewable energy and disaster preparedness, in which Unity Renewables plays a significant role as a project participant, with the support of Pacific Northwest National Laboratory.
2. Engaging and supporting federal, state, and local governments to achieve results in communities: The project involves a multi-stakeholder partnership, including the City of Rochester, which demonstrates the collaboration between government agencies, businesses, academia, and civic organizations. The City of Rochester plays a vital role in sponsoring the project and ensuring its successful implementation.

By addressing clean energy resilience, the project not only contributes to environmental justice but also empowers and builds the capacity of underserved and overburdened communities. It aligns with the EPA's commitment to integrate equity throughout its programs and provide direct benefits to communities with environmental justice concerns. Furthermore, the project supports communities adapting to and recovering from climate change by promoting clean energy solutions and enhancing disaster preparedness. This

commitment aligns with E.O. 13985, advancing equity in all EPA policies, programs, and activities.

Through the Open Door Mission Solar Plus Battery Storage Project, EPA can demonstrate its commitment to supporting the efforts of community members and organizations while meaningfully engaging government programs. By integrating environmental justice and civil rights into policies and activities, the project sets a strong example for collaboration between federal, state, and local partners to achieve beneficial changes for communities.

f. Partner and Collaborate

Project promotes collaboration with partners from multiple stakeholder groups to develop solutions addressing environmental and public health issues. The project will accomplish its goals through diverse partnerships, leveraging the unique strengths and resources of each partner.
Partners involved in the project:

1. Open Door Mission: Non-profit organization (Stakeholder group: Community service)
    - Role: Project lead, managing overall project implementation and coordination
    - Contribution: Providing the project site and access to the community they serve
    - Resources: Existing facilities, staff, and community connections
    - Vested interest: Enhancing their capacity to support vulnerable populations during power outages and severe weather events
    - Relationship maintenance: Regular communication and progress reporting, engaging in the planning and evaluation process
2. Unity Renewables: Local Rochester company (Stakeholder group: Industry/Business)
    - Role: Workforce development, coordinating training and job opportunities related to the project
    - Contribution: Expertise in renewable energy and workforce development
    - Resources: Technical know-how, equipment, and skilled personnel
    - Vested interest: Strengthening their local presence, corporate social responsibility, and enhancing their reputation
    - Relationship maintenance: Collaboration in planning, implementation, and evaluation of workforce development activities, sharing resources and expertise

3. Pacific Northwest National Laboratory (PNNL) through the Department of Energy's Energy Storage Social Equity (ES4SE) Program: Academic partner (Stakeholder group: Academia)
    - Role: Research, evaluation, and technical assistance
    - Contribution: Expertise in renewable energy technologies, energy storage, and system integration
    - Resources: Research infrastructure, knowledge, and technical expertise
    - Vested interest: Advancing research, contributing to community resilience, and promoting environmental sustainability
    - Relationship maintenance: Active engagement in project development, implementation, and evaluation, sharing research findings and best practices
4. City of Rochester: Local government sponsor (Stakeholder group: Government)
    - Role: Project sponsorship, regulatory support, and coordination with other local initiatives
    - Contribution: Funding, policy support, and facilitating necessary permits and approvals
    - Resources: Financial resources, connections with other local initiatives, and policy expertise
    - Vested interest: Improving local environmental and public health outcomes, enhancing community resilience, and promoting clean energy
    - Relationship maintenance: Regular communication, progress reporting, and active involvement in project planning, implementation, and evaluation

The applicant organization plans to maintain and sustain these relationships through regular communication, progress reporting, joint decision-making, and active engagement in project planning, implementation, and evaluation.

2.0 Project Activities / Milestone Schedule

a. Project Activities

1. Project Planning and Design:
    - Conduct a comprehensive feasibility study to assess the site's potential for solar and battery storage installation.
    - Develop a detailed project plan, including timelines, budget, and resource allocation.
    - Milestone 1: Open Door Mission board approval of system design (Deliverable: Board approval)
    - Engage stakeholders and partners in the project planning process to ensure alignment of goals and expectations.

2. Community Engagement:
    - Organize community meetings and workshops to raise awareness about the project, gather input, and address concerns.
    - Establish a community advisory board to ensure ongoing communication and collaboration throughout the project's implementation.
3. Workforce Development and Training:
    - Partner with Unity Renewables to develop a comprehensive training program for local residents in solar panel installation, battery storage systems, and maintenance.
    - Conduct workshops and training sessions to build the capacity of the local workforce.
4. Solar Panel and Battery Storage Installation:
    - Milestone 2: City of Rochester integrates available credits in CCA program.
    - Milestone 3: Develop Request for Proposal (RFP) (Deliverable: Completed RFP ready for bids)
    - Milestone 4: Design Completion (Deliverable: Construction-ready drawings)
    - Milestone 5: Submit Interconnection Application (Deliverable: Completed application with confirmation that it is in the interconnection queue)
    - Procure and install solar panels and battery storage systems at the Open Door Mission site.
    - Implement energy efficiency measures and optimize system performance to maximize energy generation and storage capacity.
    - Milestone 6: City sign off for permits if required (Deliverable: Municipal permits depending on BESS location)
    - Milestone 7: Ground-breaking Ceremony (Deliverable: Ground-breaking event)
5. Monitoring and Evaluation:
    - Regularly monitor the project's progress, energy generation, and system performance.
    - Evaluate the project's impact on energy savings, greenhouse gas emissions reduction, and community resilience.
    - Share results and best practices with stakeholders and partners to inform future projects and improvements.
6. Outreach and Dissemination:
    - Develop communication materials, such as case studies, reports, and presentations, to share the project's successes and lessons learned with a broader audience.
    - Present the project's results at conferences, workshops, and other relevant events to promote knowledge sharing and replication of the model in other communities.

7. Project Completion:
    - Milestone 8: Equipment Delivery (Deliverable: BESS and PV array delivered to staging area)
    - Milestone 9: System Commissioning (Deliverable: Baseline operational parameters recorded)
    - Milestone 10: Utility Interconnection (Deliverable: Utility approval for system operation)

b. Milestone Schedule

Milestone and Description	Anticipated Completion
Milestone 1: Open Door Mission board to approve finalize project, location, estimated costs and any other required information	September 2023
Milestone 2: Coordinate with the City of Rochester to obtain available funds for workforce development training associated with installation and champion the project in its Green Economy working group	October 2023
Milestone 3: Engage Sandia National Laboratory (SNL) through the Energy Storage for Social Equity Program to assist with technical aspects of RFP development and receive SNL concurrence that RFP is ready to solicit bid proposal(s)	November 2023
Milestone 4: Evaluate received bid proposal(s) and select vendor, Review vendor design drawings at pre-determined intervals, i.e., 30%, 60%, and 90%	January 2024
Milestone 5: Gather system drawings and other information required for Utility Interconnection Application, Submit application, respond to utility requests for any additional information	February 2024
Milestone 6: If required, obtain city permits based on BESS placement	March 2024
Milestone 7: Plan community event to include all stakeholders, local representatives, community members, and press to a ground breaking ceremony	April 2024
Milestone 8: Monitor beginning stages of construction activities to include equipment being delivered to site	May 2024
Milestone 9: Documentation of system checks to gather a baseline assessment of whether all components function properly individually and together as a system	June 2024
Milestone 10: Place system into operation	June 2024

3.0 Environmental Results

a. Environmental Results (Logic Model) – Submitted as an attachment.

b. Performance Measurement

To effectively track and monitor project performance and progress throughout the project period, a comprehensive plan involving both quantitative and qualitative assessments is necessary. In this case, there are multiple KPIs, including training opportunities created, emissions avoided, resilience provided, jobs created/sustained, renewable energy generated, energy cost savings, energy storage capacity, EV charging instances, community engagement and outreach, and system reliability and performance. This plan can be broken down into five key steps:

1. Establish Key Performance Indicators (KPIs): Determine the critical KPIs for the project, encompassing various aspects of project objectives and desired outcomes. These KPIs should cover workforce development, environmental impact, economic benefits, and community engagement.
2. Develop a Monitoring and Evaluation (M&E) Framework: Create an M&E framework outlining the data collection methods, frequency, and tools needed to measure the established KPIs. This framework should also define the roles and responsibilities of project team members in relation to data collection, monitoring, and evaluation. The framework should be tailored to each KPI, as different indicators may require different data collection methods and tools.
3. Implement Data Collection Systems: Establish data collection systems and tools, such as project management software, spreadsheets, or online surveys, to gather quantitative and qualitative data on each KPI. Train project team members on the use of these systems and ensure they understand their roles in data collection and reporting.
4. Regular Reporting and Reviews: Schedule regular reporting and review sessions with the project team and stakeholders to discuss project progress, performance against KPIs, and any necessary adjustments to the project plan. These sessions can be held monthly or quarterly, depending on the project's timeline and complexity. Use these meetings to assess the effectiveness of the M&E framework and adjust it as needed.
5. Continuous Improvement and Lessons Learned: Analyze the data collected through the M&E framework to identify trends, patterns, and areas for improvement across all KPIs. Use this information to make data-driven decisions and adjustments to the project plan as needed. Document lessons learned throughout the project and share them with the project team and stakeholders to inform future projects and initiatives.

c. Sustainability Plan and Community Vision

The Open Door Mission can utilize the results and momentum of the proposed Solar Plus Battery Storage Project to come closer to achieving the community's goals and objectives in several ways:

1. Resilience and Reliability: The project will enhance the community's energy resilience and grid reliability, ensuring that essential services continue to operate during power outages or other emergencies. By promoting the project's benefits in this area, the Open Door Mission can encourage local government and businesses to invest in similar initiatives to strengthen community resilience while offering a resilience hub to those most vulnerable.
2. Energy Cost Savings: The Battery Storage Plus Solar Project will lead to energy cost savings for the Open Door Mission. By redirecting money otherwise spent on energy costs, the Open Door Mission can expand the reach and impact of its core programs and services for the community.
3. Job Creation and Training Opportunities: The project's collaboration with Unity Renewables will develop training and employment opportunities for community members, which will help reduce unemployment rates and contribute to local economic growth. By continuing to collaborate with local businesses and organizations, the Open Door Mission can create even more opportunities for workforce development and community empowerment.
4. Environmental Benefits: The renewable energy generated by the solar and storage system in addition to avoided fossil fuels from EV charging will result in reduced greenhouse gas emissions. By sharing the project's environmental successes with the community, the Open Door Mission can encourage residents and businesses to adopt sustainable practices and support other green initiatives.
5. Community Engagement and Outreach: The project offers an opportunity for the Open Door Mission to engage with the community through outreach related to the project. By building strong relationships with community members and involving them in the project's development and operation, it can foster community ownership and commitment to the project's long-term success.

The community has a vested interest in sustaining the project's momentum because it aligns with its goals and objectives in several key areas, such as economic development, environmental sustainability, energy resilience, and community empowerment. By demonstrating the project's positive impacts, the Open Door Mission can showcase what is possible for similar initiatives in the future. Additionally, the tangible benefits of the project, such as job creation, cost savings, and increased resilience of critical infrastructure, will directly impact the community's quality of life, further reinforcing their commitment to the project's long-term success.

4.0 Programmatic Capability

Organizational Experience and Infrastructure: The program management team will be conducted with Unity Renewables with the Open Door Mission. The Open Door Mission has a proven track record of successfully implementing community-based projects, including a recently created affordable housing program, women and children's shelter, and other related projects. Unity Renewables team members have demonstrated their commitment to sustainability and environmental justice through previous initiatives, and their infrastructure is well-suited for the proposed project.

Staff Experience and Qualifications of Project Manager: The proposed Project Manager, Brandon Maharaj, has extensive experience in community engagement and sustainability initiatives. He has collaborated with community leaders and politicians at various levels to promote environmental and economic equity in the renewables industry. Brandon's experience in community engagement, as well as his experience working at construction companies and developing and monitoring IT projects provide him the ability to oversee the implementation of the project--both from the construction and technology side.

Unity Renewables Co-Founder Vivek Thiagarajan, an attorney and community leader, brings additional expertise to the project. He has a demonstrated commitment to community development, serving as the past Chairman of the board for the Open Door Mission and a current board member for the Goodwill of the Finger Lakes. Vivek's involvement in local boards and organizations has given him connections and insights into the community's needs and interests. His perspective will be valuable in ensuring that the proposed project is developed with the community's best interests in mind.

Divia Hobson brings valuable experience in the renewable energy industry from her expertise on the finance and regulatory side. She has extensive experience in battery projects and has taught on related matters. Focused most recently on community solar and storage in New York, she has led project origination directly with municipalities, supported community solar campaign adoption in Community Choice Aggregation programs and managed consulting engagements for NYSERDA on topics related to the economic impact and job potential of solar and storage deployment.

Overall, the proposed Project Managers provide the necessary expertise to successfully implement the project.

c. Expenditure of Awarded Grant Funds

As recipient of significant federal funding, Open Door Mission has a system in place to monitor and review financial controls regularly. If awarded this EPA grant, the Mission will adapt its review and update financial controls, systems, and procedures to ensure they remain effective and compliant with EPA requirements.

5.0 Past Performance Submit

HHAP Funding for Coldwater- $2M
HHAP funding for Miller Building-- $6M
Foreclosure Prevention Dollars-
DOE Energy Storage for Social Equity Participant (Technical Assistance from PNNL)

6.0 Quality Assurance Project Plan (QAPP) Information

N/A

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Puerto Rico Public and Applied Social Sciences Workshop Inc.

Address: 8 Simon Madera

City: San Juan

State: PR: Puerto Rico Zip Code: 00924-0000

B. Unique Entity Identifier (UEI): LPZGE294CC29

C. Applicant/Recipient Point of Contact

Name: James O'Malley

Phone: Ex. 6 - Personal Privacy (PP)

Email: jomalley@prpassworkshop.org

Title: Director of Services

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☒ Yes	☐ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☒ Yes	☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
James A OMalley	Director of Services	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Estimado Sr. O'Malley

Como director de la Oficina de Planificación, Ambiente, Desarrollo y Urbanismo (OPADU) del Municipio Autónomo de Manatí, me complace expresar mi apoyo al proyecto de Comunidades Unidas en Investigación y Defensa Ambiental (CUIDA, CARE-EJ, por sus siglas en inglés) liderado por PR PASS. Reconocemos la importancia de abordar los problemas críticos de calidad del agua, conservación y sostenibilidad en nuestra comunidad y apreciamos la dedicación de su organización a esta causa.

Entendemos que el proyecto CARE-EJ tiene como objetivo empoderar a los miembros de la comunidad al construir su capacidad y conocimiento para abordar los desafíos ambientales que afectan sus vidas. El enfoque del proyecto en educación, colaboración e iniciativas impulsadas por la comunidad se alinea con la visión de nuestra ciudad de promover la justicia ambiental, la resiliencia y la sostenibilidad a largo plazo.

En apoyo al proyecto CARE-EJ, nuestra oficina OPADU del Municipio Autónomo de Manatí se compromete a colaborar con PR PASS y otros actores involucrados en diversas capacidades. Ayudaremos a promover las sesiones educativas, talleres y eventos del proyecto para garantizar la máxima participación de la comunidad. Además, facilitaremos el acceso a recursos y espacios relevantes, como centros comunitarios e instalaciones públicas, para las actividades del proyecto.

Creemos que el proyecto CARE-EJ tiene el potencial de crear un impacto duradero y positivo en las comunidades a las que servimos. Esperamos trabajar en estrecha colaboración con PR PASS y otros socios para garantizar el éxito del proyecto en Manatí.

No dude en ponerse en contacto con mi oficina si necesita más información o asistencia. Estamos comprometidos en apoyar el proyecto CARE-EJ y a trabajar juntos hacia un futuro más sostenible y equitativo para nuestra comunidad.

Atentamente,

Víctor M. González Narváez, MP, PPL, GISP
Director OPADU
Municipio Autónomo de Manatí

Estimado Sr. O'Malley

Como representante de Acción Comunitaria Cialitos, Inc, le escribo para expresar nuestro firme apoyo y compromiso de colaborar con el proyecto de Investigación y Educación en Acción Comunitaria para la Justicia Ambiental (CARE-EJ). Nuestra organización comparte la misma pasión por la justicia ambiental y la gestión sostenible de los recursos hídricos que el proyecto CARE-EJ. Estamos ansiosos por aportar nuestra experiencia, recursos y redes para ayudar a alcanzar los objetivos y metas del proyecto.

Entendemos la importancia de las actividades del proyecto CARE-EJ en abordar los problemas de calidad del agua, crear conciencia y empoderar a las comunidades en Manatí, Ciales y otras áreas de Puerto Rico. Nuestra organización está preparada para colaborar de las siguientes maneras:

1. Participar en sesiones educativas comunitarias, talleres y reuniones para compartir nuestro conocimiento y experiencias en pruebas de agua, conservación y sostenibilidad.
2. Apoyar las actividades de pruebas de agua proporcionando asistencia técnica, equipo y recursos cuando sea necesario.
3. Colaborar en la recogida de basura y disposición adecuada para prevenir la contaminación del agua en las comunidades objetivo.
4. Promover el sistema de registro de incidentes en línea del proyecto a nuestras redes y fomentar la denuncia de incidentes ambientales y preocupaciones sobre la calidad del agua.
5. Contribuir al Plan de Medición del Desempeño del proyecto proporcionando comentarios, datos e información para ayudar a evaluar el progreso y la efectividad del proyecto.

Creemos que nuestra colaboración con el proyecto CARE-EJ resultará en un impacto significativo y positivo en las comunidades involucradas, así como en la contribución a los objetivos más amplios de justicia ambiental y gestión sostenible del agua en Puerto Rico.

Esperamos trabajar junto con el equipo del proyecto CARE-EJ y otros interesados en lograr la visión compartida de recursos hídricos limpios, seguros y sostenibles para todos.

Atentamente,

Yolitza [illegible], Presidente, ACC

Dear Mr. O'Malley

As the representative of Acción Comunitaria Cialitos, Inc, I am writing to express our strong support and commitment to collaborate with the Community-based Action Research and Education in Environmental Justice (CARE-EJ) project. Our organization shares the same passion for environmental justice and the sustainable management of water resources as the CARE-EJ project. We are eager to contribute our expertise, resources, and networks to help achieve the project's goals and objectives.

We understand the importance of the CARE-EJ project's activities in addressing water quality issues, raising awareness, and empowering communities in Manatí, Ciales, and other areas of Puerto Rico. Our organization is prepared to collaborate in the following ways:

1. Participate in community educational sessions, workshops, and meetings to share our knowledge and experiences in water testing, conservation, and sustainability.
2. Support the water testing activities by providing technical assistance, equipment, and resources when needed.
3. Assist in organizing trash pickup and proper disposal initiatives to prevent water pollution in the target communities.
4. Promote the project's online incident registration system to our networks and encourage the reporting of environmental incidents and water quality concerns.
5. Contribute to the project's Performance Measurement Plan by providing feedback, data, and insights to help evaluate the project's progress and effectiveness.

We believe that our collaboration with the CARE-EJ project will lead to significant positive impacts on the communities involved, as well as contribute to the broader goals of environmental justice and sustainable water management in Puerto Rico.

We are looking forward to working together with the CARE-EJ project team and other stakeholders in achieving the shared vision of clean, safe, and sustainable water resources for all.

Sincerely,

Yelitza Garcia De Jesús, Presidenta ACC

Estimado Sr. O'Malley;

Como Alcalde del Municipio de Ciales, me complace expresar mi apoyo al proyecto de Comunidades Unidas en Investigación y Defensa Ambiental (CUIDA, CARE-EJ, por sus siglas en inglés) liderado por PR PASS. Reconocemos la importancia de abordar los problemas críticos de calidad del agua, conservación y sostenibilidad en nuestra comunidad y apreciamos la dedicación de su organización a esta causa.

Entendemos que el proyecto CARE-EJ tiene como objetivo empoderar a los miembros de la comunidad al construir su capacidad y conocimiento para abordar los desafíos ambientales que afectan sus vidas. El enfoque del proyecto en educación, colaboración e iniciativas impulsadas por la comunidad se alinea con la visión de nuestra ciudad de promover la justicia ambiental, la resiliencia y la sostenibilidad a largo plazo.

En apoyo al proyecto CARE-EJ, la Alcaldía del Municipio de Ciales se compromete a colaborar con PR PASS y otros actores involucrados en diversas capacidades. Ayudaremos a promover las sesiones educativas, talleres y eventos del proyecto para garantizar la máxima participación de la comunidad. Además, facilitaremos el acceso a recursos y espacios relevantes, como centros comunitarios e instalaciones públicas, para las actividades del proyecto.

Creemos que el proyecto CARE-EJ tiene el potencial de crear un impacto duradero y positivo en las comunidades a las que servimos. Esperamos trabajar en estrecha colaboración con PR PASS y otros socios para garantizar el éxito del proyecto en Manatí.

No dude en ponerse en contacto con mi oficina si necesita más información o asistencia. Estamos comprometidos a apoyar el proyecto CARE-EJ y a trabajar juntos hacia un futuro más sostenible y equitativo para nuestra comunidad.

Atentamente,

Hon. Alexander Burgos Otero

Dear Mr. O'Malley

As the Mayor of the Municipality of Ciales, I am pleased to express my support for the Community-based Action Research and Education in Environmental Justice (CARE-EJ) project led by PR PASS. We recognize the importance of addressing the critical issues of water quality, conservation, and sustainability in our community and appreciate your organization's dedication to this cause.

We understand that the CARE-EJ project aims to empower community members by building their capacity and knowledge to address environmental challenges affecting their lives. The project's focus on education, collaboration, and community-driven initiatives aligns with our city's vision of promoting environmental justice, resilience, and long-term sustainability.

In support of the CARE-EJ project, the Mayor's Office of the Municipality of Ciales commits to collaborating with PR PASS and other involved stakeholders in various capacities. We will assist in promoting the project's educational sessions, workshops, and events to ensure maximum community participation. Additionally, we will facilitate access to relevant resources and spaces, such as community centers and public facilities, for the project's activities.

We believe that the CARE-EJ project has the potential to create a lasting, positive impact on the communities we serve. We look forward to working closely with PR PASS and other partners to ensure the project's success in Manatí.

Please feel free to reach out to my office if you require any further information or assistance. We are committed to supporting the CARE-EJ project and working together towards a more sustainable and equitable future for our community.

Sincerely,

Hon. Alexander Burgos Otero

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

You're treated as a U.S. domestic organization for purposes of IRC Sections 507-509 and Chapter 42, and thus are subject to these provisions.

You can receive contributions deductible by U.S. citizens and residents for U.S. income tax purposes under IRC Section 170.

You can receive transfers deductible by U.S. citizens and residents for U.S. estate and gift tax purposes to the extent allowable under IRC Sections 2055 and 2522.

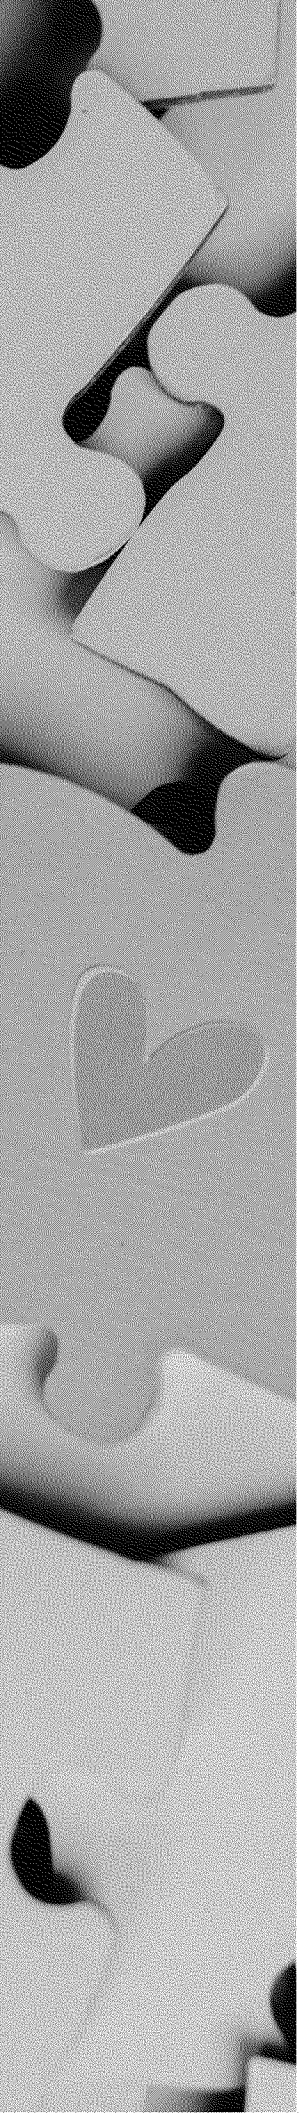
If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ). If you don't normally have more than $50,000 in annual gross receipts from sources within the U.S., and you don't engage in significant activity in the U.S. (other than investment activity), you may submit the Form 990-N, e-Postcard, annually instead of Form 990 or 990-EZ. If you don't file a required return or notice for three consecutive years, your exempt status will automatically be revoked. For more information on filing requirements, see Revenue Procedure 2011-15, 2011-3 I.R.B. 322.

Letter 5048

PUERTO RICO PUBLIC AND APPLIED

You're subject to unrelated business income tax under IRC Section 511 on your unrelated business taxable income derived from sources within the U.S. or effectively connected with the conduct of a trade or business within the U.S. (whether or not such income is derived from sources within the U.S.). For purposes of these rules, the "U.S." includes only the fify states and the District of Columbia. See Publication 598, Tax on Unrelated Business Income of Exempt Organizations, for more information.

If you have employees in the U.S. (whether they are U.S. residents or not) you may be liable for federal employment taxes, including the withholding of tax. See Publication 15, (Circular E), Employer's Tax Guide, and Publication 515, Withholding of Tax on Nonresident Aliens and Foreign Entities, for more information.



For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities and search "4221-PC" to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for information on your recordkeeping, reporting, and disclosure requirements as a public charity.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

Sincerely,

Stephen A. Martin

1.0 Program Objectives

a. Project Summary

Title: Community-based Action Research and Education in Environmental Justice (CARE-EJ) and Comunidades Unidas en Investigación y Defensa Ambiental (CUIDA) locally.

Location: Manatí and Ciales, Puerto Rico 009XX

Applicant Information: Puerto Rico Public and Applied Social Sciences Workshop Inc.; 8 Simon Madera; San Juan, PR 00924

Telephone: Ex. 6 - Personal Privacy (PP)

Email: contact@prpassworkshop.org

Applicant Organization: The Puerto Rico Public and Applied Social Sciences Workshop is non-profit, philanthropic organization organized exclusively for charitable, educational and scientific purposes, founded in, and serving Puerto Rico.

Our mission: Advance the cause of greater social justice, quality of life and sustainable economic development through the broader appreciation and application of the social sciences.

Our purpose: Contribute to the knowledge-base and capacity building of entities serving the public welfare and develop educational programs that enhance public awareness of cultural studies, social sciences and humanities research and their applied benefits. To these ends, every project is structured so as to incorporate or enable participatory action research and contribute to the dissemination and use of local data-driven insights.

Brief Description of Applicant Organization: PR PASS works with communities and other non-profits to foment sustainable and participatory practices for a wide variety of projects, including, but not limited to: affordable housing, adult education programs, digital data management and workflow, administration, and program evaluation among others. Please see the PR PASS website for more information about the organization.

Project Abstract: Community empowerment is a central axis advancing environmental justice. Impacted communities must be able to advocate for their rights to safe water and participate meaningfully in decision-making processes that manage, inform, and shape access to water resources. The Community-based Action Research and Education in Environmental Justice (CARE-EJ) is a three-year program in Puerto Rico, focusing on Manatí and Ciales. With a $500,000 investment, it aims to empower residents and organizations through water quality testing, conservation, and sustainability. In response to the ongoing threat of natural hazards and high distrust in the disaster recovery process, the CARE-EJ is designed to also

foster regional networks which add resilience to communities and provide a path to reestablishing relationships of trust. The program involves collaboration with local communities, government agencies, and schools, as well as creating a digital platform for recording water quality and environmental incidents.

The target audience are individuals and families living in disadvantaged communities that have been marginalized from disaster recovery efforts, are under-served, and overburdened by the health and economic impact of climate change.. Key activities include participatory definition of a study that will include discussion of environmental policies and programs, research capacity building, educational sessions, water testing, trash pickup, and incident reporting. Outputs consist of workshops, training materials, videos, press announcements, publications, an online water quality system, and environmental data collection.Short-term outcomes include increased awareness of water quality, reduced consumption, improved health, and enhanced social capital. Immediate outcomes involve empowered access to government, clean water, reduced pollution, and increased community trust. Long-term outcomes aim for improved local water resources, enhanced commitment to conservation, and increased environmental justice through lasting governmental and institutional change.

Recent research on the post-Hurricane María recovery process in Puerto Rico has highlighted a growing distrust of government (Chopel, Fernos-Sagebien, & Gorbea, 2021; Saum-Manning, 2021; Haverhals, 2022). Building on the lessons of Flint, Michigan's Flint Development Center community laboratory, CARE-EJ will provide individuals and families the ability to verify water quality in their homes and communities, rebuilding trust through action and evidence. CARE-EJ is expected to contribute to the field a pathway to environmental justice that combines community empowerment, strengthens regional social networks, and re-establishing trust in government.

Project Types: Monitoring water quality, Public Education

Environmental Issue: Tap and surface water quality

List of Project Partners:

1. Autonomous Municipality of Manatí, Puerto Rico.
2. Municipality of Ciales, Puerto Rico.
3. Acción Comunitaria Cialitos, Inc.

Will you need to develop a QAPP for your project? We believe we will be required to develop a Quality Assurance Project Plan (QAPP), as we will be conducting tests on surface and tap water and compiling a data base of these results.

b. Environmental and Public Health information of the Underserved Community

According to the most recent data from the U.S. Census Bureau (2022), the combined population of Manatí and Ciales is 55,493, with over 50% living below the federal poverty

level, 15% having a disability under the age of 65, and less than 20% having a bachelor's degree.

Tap water safety in Puerto Rico has been a chronic concern and in recent years, particularly after the devastation caused by Hurricane Maria in 2017. In the aftermath of the hurricane, many communities were left without access to clean water, and some areas continue to face issues with water quality and safety.

According to the Environmental Working Group (EWG), which analyzed data from the Environmental Protection Agency (EPA), Puerto Rico had the highest contamination rate of any state or territory in the U.S. for two consecutive years (2015-2016) in terms of the presence of the chemical compound chromium-6 in drinking water. Chromium-6 is a known carcinogen and has been linked to an increased risk of cancer (EWG, 2015).

According to a study done by the Natural Resources Defense Council, nearly all tap water in Puerto Rico violates federal safety standards (NRDC, 2018).

In terms of specific municipalities, Manati and Ciales have both faced issues with water safety in recent years. In 2019, it was reported that the water system in Manati had tested positive for high levels of lead, a neurotoxin that can cause developmental issues in children and other health problems. Similarly, in 2018, the water system in Ciales was found to have high levels of the bacteria E. coli, which can cause illness and in severe cases, kidney failure.

In Puerto Rico, access to clean and sustainable water remains a critical issue, particularly in the wake of Hurricane Maria, which exacerbated the island's water infrastructure vulnerabilities. In rural and vulnerable areas, these challenges are even more pronounced, with families often lacking access to clean and safe drinking water.

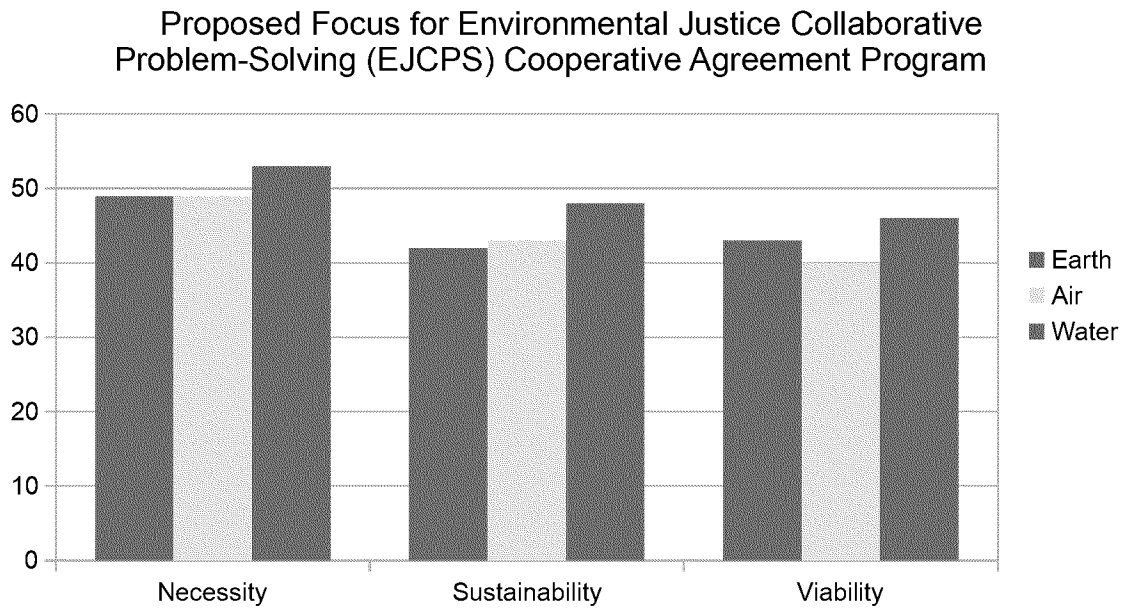
- https://www.wbur.org/

c. Organization's Historical Connection to Under-served Community

PR PASS was established in Puerto Rico by a group of dedicated individuals who share deep-rooted connections to the island.

In 2021, PR PASS provided logistical and field support to scientist that documented the growing distrust in under-served communities. In 2021, PR PASS invited communities in Ciales and Manatí to collaborate as comparison sites (not beneficiaries) of the Habitat for Humanity Recovery Program Impact Evaluation. This collaboration continued over the past two years. Our growing awareness of regional challenges, informs our commitment to establishing dialog between the community and government, **actively working together to build transparent, effective, and sustainable solutions.**



d. EJCPS Model

EJCPS Model Element 1 – Issue Identification, Visioning, and Strategic Goal-Setting: PR PASS has already begun the collaborative process by convening a focus group (Cafe Ambiental - Environmental Coffee Break) in February with students from UPR

Aguadilla and the InterAmerican Univerisity in Arecibo, members from Acción Comunitaria Cialitos, Inc., and Go to Ciales, and residents from Barrio Sabana Seca in Manatí, and Río Piedras. In addition, the mayoral offices of Manatí and Toa Baja, provided us with information on their ongoing environmental projects and interest in collaborating.

The nineteen community members present created an overview of their community's needs, providing ideas, experiences, and knowledge to develop three corresponding logic models. Based on their input, we then focused on the following areas of concern: earth, air, and water. From there we presented an online survey (in Spanish) based on three metrics: necessity, sustainability, and viability.

Figure 1: Environmental justice focus group voting results

This initial collaborative process identified water safety as the most urgent area of focus.. The activities suggested for a water-focused project also ranked the highest in their appreciation of viability and sustainability. . Comprehensive research and literature on Puerto Rico's water safety challenges highlight the pressing nature of this concern. The proactive involvement of municipalities and community members demonstrates a strong commitment to collaborate and engage in finding solutions.

EJCPS Model Element 2 – Community Capacity-Building and Leadership Development:

1. Community information sessions will be conducted by local leaders (government and organizations both public and private) to discuss water testing and conservation efforts.

2. Citizen engagement and reporting: Members of the community will self-select and engage in a capacity building process that guides them through a research questions that addresses water safety and uses water monitoring. Encouraging citizens to report

environmental incidents and tap water quality allows community members to take an active, trustworthy, and powerful role in addressing their concerns. This involvement nurtures a sense of responsibility and leadership within the community.

3. Participant feedback community meetings: These meetings provide an opportunity for community members and leaders to share their insights and use data to reflect and answer their initial concerns. This dialogue helps develop local leaders who can use data to advocate for environmental justice.

4. Immediate and long-term outcomes: The community based research process outcomes, will inform an action plan for improving access to clean water. In the short term, the community increases social capital by developing citizen scientists and gathering data in support of advocacy..

EJCPS Model Element 3 – Development of Multi-Stakeholder Partnerships and Leveraging of Resources:

1. Collaborating with local government bodies: By involving the Manatí and Ciales municipal governments, the project establishes partnerships with key decision-makers and ensures that CARE-EJ activities bring awareness and discussion of environmental and water focused municipal initiatives already in progress.

2. Engaging local community organizations: CARE-EJ proposes that participants from one community action-research process share their experience with another neighboring community and school. This peer to peer community engagement is expected to strengthen regional relationships and increase research, data collection and knowledge sharing activities.

3. Participating families: Involving families in the project not only fosters a sense of ownership and responsibility but also encourages inter-generational learning and collaboration, leading to a more sustainable and resilient community.

4. Online incident registration system: The project gathers data from water monitoring kits in an online platform. This facilitates data driven communication among various stakeholders.

5. Multi-stakeholder activities: After each initial community based research is completed, the project's knowledge sharing and change focused activities will promote multi-stakeholder engagement in community educational sessions, water testing, and trash pickup, involve collaboration. The collaborating in an activity will advance a sense of shared responsibility for environmental justice.

6. Public communication and outreach: At the end of every year of operation, CARE-EJ will hold an community workshop where the different communities are invited to share with a broader audience the knowledge and work they have performed. The audience of this event will include local residents, and representatives from private and public sectors and school communities. Press announcements, community testimonials

to each other, publications, and online presence of the project help to raise awareness and generate interest among other stakeholders, potentially attracting new partners and resources to support the project's goals.

EJCPS Model Element 4 – Consensus Building and Dispute Resolution:

1. Collaborative design of work practice: During each community onboarding meeting, those present collaborate on identifying the shared values and cross-cutting themes that will guide the groups research and action work.

2. Participatory decision-making: When joining the project, each new community goes through a process of participatory decision-making capacity building and practice as they collaborate in defining a question and giving direction to their study and resulting activities.This approach fosters a sense of shared ownership, helps build consensus around project goals, and reduces the likelihood of disputes arising from perceived exclusion or lack of representation.

3. Transparent communication: Transparency is key to building trust and practicing equitable access to information across stakeholders.The project's community workshops, press announcements, community testimonials, and publications, ensures that stakeholders stay informed. Communication products will be shared in an online portal. Community participants furthermore will have access to information shared or generated among them in a private cloud environment.

4. Online incident registration system: The creation of an online platform for reporting environmental incidents and water quality allows stakeholders to use data to discuss concerns, identify opportunities and plan next steps.

EJCPS Model Element 5 – Constructive Engagement with Other Stakeholders:

1. Inclusive participation: Equity and inclusion are key values that will be discussed at each community onboarding meeting when we guide them through a process of defining shared values and practices that build on the diverse and inclusive participation. This early development sets a tone that welcomes various perspectives as a foundation for scientific inquiry.

2. Open dialogue and communication: By organizing community meetings and educational workshops, the CARE-EJ project provides a platform for dialogue and discussion among community members, local organizations, and government bodies. These events allow stakeholders to share their perspectives, identify common goals, and work together to address environmental justice issues.

3. Online incident registration system: In addition to tracking water quality data, the system will register and report concerns regarding perceived environmental incidents and water quality concerns. Reports will provide a common point of reference for both identifying concerns and collaborating on solutions by providing data constructive dialogue and decision-making.

EJCPS Model Element 6 – Sound Management and Implementation:

1. Well-defined goals and objectives: The project has clearly outlined short-term, immediate, and long-term outcomes, which provide a solid foundation for planning, implementing, and evaluating the project's activities and impacts.

2. Adequate resources and funding: $500,000 invested by the EPA will be used to acquire necessary supplies, such as water testing equipment, develop an online platform for incident registration, secure the human resources necessary bring the project to fruition, and support other project activities.

3. Monitoring and evaluation: The CARE-EJ project will use initial pre-participation socio-demographic and health assessment survey. As community meetings and activities start up, participant attendance, feedback during community meetings, event evaluation forms, and analysis of data from the online incident registration system will be mechanisms for regular monitoring of its progress and alignment. As the research engagement and initial post-research actions occur in each community, participants will be asked to volunteer in a collection of Most Significant Change stories (Davies & Dart, 2005).

4. The project will count with key individuals who have education and experience managing research and evaluation, field-work, social work administration, and non-profit management.

5. Clear roles and responsibilities: The project engages various stakeholders, such as PR PASS (administration and coordination), local government bodies, community organizations, environmental scientists, health and community engagement specialists and participating families, each with specific roles and responsibilities. See letters of commitment in attached documents for more specific roles and responsibilities.

EJCPS Model Element 7 – Evaluation:

1. Monitoring progress: The project regularly monitors its progress through various data sources, such as attendance, access or use of materials, participant feedback community meetings, community event evaluations, and data from the online incident registration system. This ongoing monitoring helps track the project's performance and informs decision-making.

2. Feedback mechanisms: Participants will be informed in the first community meeting of the general contact number they can contact if they wish to provide specific feedback and the protocol used to share and address feedback. The CARE-EJ project management system has a feedback tracking mechanism that documents each incident and facilitates sharing with the project manager. When the feedback has been satisfactorily addressed, the status can be changed to "closed."

3. Collaboration in evaluation: During the first annual community workshop, PR PASS will invite interested representatives from the various communities and CARE-EJ

stakeholders to collaborate in a participatory evaluation of the project's impact. The impact evaluation will also include a community-sourced Health Impact Assessment.

4. Knowledge sharing and learning: CARE-EJ is committed to activating communities in the process of gathering data and generating local knowledge about the environment. The project promotes immediate community-to-community sharing of insights and community-wide reporting in the once a year community workshop. The design of the impact evaluation will be presented for discussion and validation at the second community workshop. Preliminary results will be shared for discussion in the third and final community workshop. The final report and other knowledge products will be shared in the project portal, thereafter.

e. Project Linkages

Addressing EPA Strategic Plan Goal 2, Objective 2.1 (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels):

1. Empowering communities: The project focuses on building agency, capacity, and knowledge among community members, enabling them to advocate for their rights and address environmental issues affecting their lives.

2. Strengthening multi-stakeholder partnerships: By engaging various stakeholders, including government bodies, local organizations, and public schools, the project fosters collaboration and resource-sharing, amplifying the collective impact on environmental justice and civil rights.

3. Raising awareness: The project grows awareness about environmental justice and water safety and management through community-based research. During the research phase and in annual community workshops, the project creates opportunities for government bodies to discuss water related policies and initiatives. Community organized activities broaden the awareness of locally sourced knowledge.

4. Promoting equitable access to resources: The project aims to reduce disparities in access clean water by funding and facilitating efforts to understand and enact change in each community.

5. Supporting community-led initiatives: The CARE-EJ project promotes environmental justice from the ground up. The project encourages communities to engage in constructive dialogue generating a research question regarding water quality and management and collect data monitoring water safety. Thereafter, the project sponsors the initial activities that are informed by the research. Finally, communities are invited to share their experiences with another community and with a larger audience once a year.

6. Influencing policy and decision-making: By demonstrating the effectiveness of community-based action and collaboration, the project can inform policy and decision-making processes at the federal, state, and local levels, contributing to the advancement of environmental justice and civil rights.

f. Partner and Collaborate

How will each partner contribute to the project CARE-EJ has a Steering Committee comprised of individuals that participated in the Café Ambiental and representatives of each municipal government. This group includes participants from communities who share a common interest in the focus and success of CARE-EJ.

An Advisory Committee comprised of 7-11 local scientists that are willing to collaborate providing timely information to each community as they define their research, analyze data and plan their course of action will be convened in response to the needs expressed.

Municipalities The municipal representatives of both Manatí and Ciales will be present to discuss municipal policies and initiatives regarding water quality at the beginning of each new community based research project in their municipalities. They will also have the option to be involved in the dissemination of testing kits and serve as host for community workshops and meetings.

Acción Comunitaria Cialitos, Inc., (ACC) is an established local community organization founded in 2013. ACC participated in the Café Ambiental. It has since expressed interest in participating consistently throughout the project (see Other Attachments for Letters of Collaboration). ACC will have representation in the Steering Committee and participate in the initial design consultation for the water monitoring and incident reporting system and in the development of monitoring protocols and participatory impact evaluation. They will also be the first community in Ciales to engage in the pilot community based action research project.

Not all communities have duly formed representative organizations. This is the case with Barrio Sabana Seca, Manatí. In these cases, a community leader will convene residents and the interested participants. Once the community participants are convened, the project runs with self-nominated participants for the tasks that emerge.

Go to Ciales is a tourism startup in Ciales, concerned with sustainability and environmental justice in their community. In addition to local trust, Go to Ciales, has deep organizational knowledge of their area and its inhabitants. They will be invaluable for field testing surface water, designing the online incident reporting system, reporting environmental incidents in the countryside, and educating the community on water conservation.

2.0 Project Activities / Milestone Schedule / Detailed

a. Project Activities

Distribution of Water Testing Kits:

CARE-EJ will provide an estimated 500 home tap water testing kits. We estimate community led action research projects will distribute between 300-400 of these.. The remainder of the kits will be provided ad hoc throughout the year through offices of our municipal stakeholders..

Project Kickoff and Stakeholder Engagement: The project will begin with a kickoff meeting involving all relevant stakeholders, including community members, local government

representatives, partnering organizations, and project team members. This meeting will serve to establish roles, responsibilities, and a shared understanding of the project objectives and activities for the Steering Committee

Community Onboarding Sessions (12 total, occurring in different communities, at the beginning of each school semester): The project team will organize and deliver community an onboarding session where the project focus on water, goals for research and action and participatory process are explained .

Community-based Research Activities:

Each semester 2 communities will begin an action-research cycle comprised of 8 concrete steps: (1) Onboarding - community participants discuss shared interests, values and practices as well as community concerns, (2) Theoretical Framework Development - government stakeholders and academic resources participate in clarifying theories and concepts, (3) Identifying a Research Question (4) Review of Data Collection Methodology, (5) Data Party - Analyzing the data, (6) Summary of Results - Outline a poster board of the project process and findings, (7) Define Action Plan (8) Initial Review of Research-Informed Activity - Includes the collection of Most Significant Change Stories.

Water Testing and Monitoring Activities: The project will carry out tap water testing and surface water testing in the target communities. The project team will work closely with participating families and local organizations to collect water samples, analyze them using water testing equipment, and report the through the online incident reporting system.

Trash Pickup and Proper Disposal Initiatives: Among the anticipated, research informed activities CARE-EJ are community-organized trash pickup events, disaster mitigation and environmental protection education fairs or other activities promoting or advancing proper waste disposal practices to prevent water pollution. The team will collaborate with local organizations and businesses to ensure the sustainability of these initiatives beyond the project's duration.

Online Incident Registration System Development and Implementation: Develop and implement an online incident registration system to facilitate the reporting of environmental incidents and water quality concerns. The system will be user-friendly and accessible, allowing community members to report issues easily and track the progress of their concerns.

Performance Measurement and Evaluation: Establish a performance measurement plan using CiviCRM as a tracking and case management software. This plan will include clear indicators, targets, and time-frames for achieving expected outputs and outcomes (see Table 1 for a more detailed breakdown). The project team will continuously monitor, evaluate, and report on progress towards these goals through an online portal which will be openly available to the public.

Steering Committee Review of Feedback and Progress (6 total - twice per year): The Steering Committee will hold meetings once a semester to review program monitoring data, feedback on project activities, discuss the findings from water testing, and address any concerns. This feedback will be incorporated into the project's ongoing implementation and future planning.

Annual Community Workshop - Formal Dissemination of Results and Knowledge Sharing (once per year, 3 in total): This is a space where communities can come together to share their knowledge and action plans. In preparation for this event, communities and the project team will produce various communication materials, including videos, publications, and case studies, to share the project's findings and successes. The collaborators will also engage with media outlets and social media platforms to ensure widespread dissemination of the project's outcomes and lessons learned. The community workshop is also the venue where the participants are able to collaborate and provide input in the participatory impact evaluation.

b. Milestone Schedule

Table 1: Significant milestones/events

Milestone	Description	Start Date	End Date	Responsible Party
Project Kickoff	Initial project meeting and planning session	11/01/23	11/15/23	Project Manager
Allocate subwards to partnering CBOs	Finalize workplan and allocate subaward	2/01/24	3/1/24	Community Outreach Coordinator
Purchase water testing kits	Purchase tap water testing kits to municipalities and community based organizations	2/01/24	3/01/24	Project Manager
Hire Project Staff	Recruit and hire project staff	11/01/23	1/01/24	Project Manager
Finalize online tap water quality reporting tool	Have preliminary tool for reporting tap water results. This is a blocker, and is high priority before tap water testing kits are distributed	11/1/2023	2/1/2024	Programmer /Integrator
Develop Educational Content	Create educational materials for workshops and meetings	11/01/23	2/01/24	Environmental Educator

Milestone	Description	Start Date	End Date	Responsible Party
Conduct Workshops	Host workshops on water quality and conservation	11/01/23	7/01/26	Environmental Educator
Water Testing (16 kits/month)	Perform water quality tests in community (50% completion, or 250 kits distributed)	02/01/24	5/31/25	Participants
Water Testing (16 kits/month)	Perform water quality tests in community (100% completion, or 500 kits distributed)	6/1/25	9/29/26	Participants
Data Collection & Analysis	Gather and analyze data from water tests and community input (minimum 250 water tests completed)	2/01/24	5/31/25	Project Manager
Data Collection & Analysis	Gather and analyze data from water tests and community input (minimum 500 water tests completed)	6/01/24	9/29/26	Project Manager
Progress Reporting	Submit required progress reports	12/01/23	10/30/26	Project Manager
Final Report & Evaluation	Prepare and submit the final project report and evaluation	6/01/26	7/01/26	Project Manager

c. Itemized Budget Sheet / Budget Narrative

See Other Attachments.

3.0 Environmental Results

a. Environmental Results (Logic Model)

See Other Attachments.

b. Performance Measurement Plan

1. Performance Indicators and Targets To effectively measure the project's performance, the PMP will include the following key performance indicators (KPIs) and their respective targets:

   (a) Outputs:

i. Number of community action-research sessions conducted
ii. Number of water testing activities performed
iii. Number of environmental incidents reported by citizens
iv. Number of trash pickup events conducted

(b) Outcomes:

i. Increase in awareness of water quality issues
ii. Reduction in water consumption and waste in homes and public areas
iii. Improvement in physical health due to consumption of clean and safe water
iv. Increase in social capital and environmental justice

2. Data Collection and Monitoring The project team will collect data using CiviCRM to track progress towards achieving the set KPIs. Data sources will include:

(a) Attendance records for community educational sessions, workshops, and meetings
(b) Water testing results from tap and surface water testing activities
(c) Incident reports submitted by citizens through the online platform
(d) Records of trash pickup and disposal activities

3. Evaluation and Reporting- The project team will conduct periodic evaluations of the collected data to measure progress towards achieving the set targets. Formative evaluations will be performed at the end of every semester.. Results will be shared with the Steering Committee and included in the topics of the Annual Community Workshop. Summary of Monitoring and Evaluation findings will be made available to funding agencies.

4. Continuous Improvement- The project team and Steering Committee will use the insights from the evaluations to identify areas where improvements can be made and to adjust project strategies and activities as needed. This process will ensure that the project remains responsive to the needs of the community and that it continuously improves its effectiveness in achieving the desired outcomes.

5. Capacity Building and Training- To ensure the successful implementation of the PMP, the project team will provide training and support to all staff members and volunteers on using CiviCRM and following the established data collection and monitoring processes. This will ensure that everyone involved in the project is well-equipped to contribute to the project's performance measurement efforts.

In conclusion, the Performance Measurement Plan for the CARE-EJ project aims to ensure that the project effectively tracks its progress towards achieving its goals and that it continuously improves its strategies and activities to maximize the positive impact on the target communities. By utilizing CiviCRM as the primary tool for tracking and case management, the project will maintain a comprehensive and accessible record of its performance, allowing for informed decision-making and increased accountability.

c. Sustainability Plan and Community Vision

Sustainability Plan:

1. Partnerships: Establish and maintain strong partnerships with local government entities and other community organizations, schools, and businesses. These partnerships will facilitate ongoing collaboration, resource sharing, and support for water management and environmental initiatives. Once the value of these community tools becomes apparent, we hope to secure funding to continue with the reporting system or facilitate transferring CARE-EJ to a private CBO or municipal entity.

2. Online Incident Registration System: Develop, test, and implement an online platform for registering water-related incidents and concerns. This system will enable continuous monitoring of water quality and facilitate community engagement in identifying and addressing issues. In addition, the entirety of the online reporting system including its source code, project files, etc will be made available freely to the public. We want other at-risk communities to take advantage of the project's publicly funded products.

3. Educational Materials: Develop a comprehensive set of educational materials on how to engage communities in action-research that advances water quality, conservation, and sustainability presenting select case studies from the project. These materials will be made available to the community, schools, and local organizations, ensuring long-term access to information and resources.

Community Vision:

The vision for the communities in Manatí, Ciales, and other areas of the northern and central region of Puerto Rico is to achieve a future where:

1. Clean and sustainable water resources are accessible to all residents, ensuring improved health and well-being.

2. Community members are empowered with knowledge and resources to actively advocate for their rights, better water quality, and conservation.

3. Local organizations, schools, and businesses collaborate to address environmental challenges and promote sustainable practices.

4. An increase in social capital and resilience is nurtured through community engagement and collaboration.

5. Generational commitment to environmental stewardship and sustainable water management practices are embedded in the values and actions of community members.

d. Impact Evaluation

PR PASS will facilitate a participatory impact evaluation of the CARE-EJ program that includes a community-sourced Health Impact Assessment. The objective of this impact assessment will be to understand the social and health impact the project has had and,

if and how, it has advanced the overarching aim of promoting community empowerment, strengthening regional networks and building trust. In order to facilitate the measurement of impact, the Steering Committee will proactively develop a participant sign-up form that gathers socio-demographic data and perception of access to safe water, community empowerment and social trust in the generation of change that benefits access to safe water.

e. Engaged Research

PR PASS is committed to community engaged practices in the social sciences. The design of the CARE-EJ Program is an example of this commitment. The focus and many of the activities cited in this proposal first arose in the Café Ambiental- event held in Manatí with the participation of residents from Manatí and Ciales. The CARE-EJ Steering Committee includes representatives from other communities that are not being immediately impacted but that agreed with the urgency of the topic and relevance of activities suggested. We are confident that the and case studies developed will provide a roadmap that can be replicated by other communities and funding agencies.

4.0 Programmatic Capability

a. Organizational Experience related to the proposed project and their infrastructure as it relates to their ability to successfully implement the proposed project.

PR PASS has conducted significant fieldwork in the communities of Puerto Rico, and while our organization (PR PASS) may not have direct grant administration experience, our team members and partners bring valuable experience. Our team has participated in rapid research projects funded by the Natural Hazards Center, focusing on disaster impacts on vulnerable communities, conducted evaluation research for organizations like Habitat for Humanity, and managed grant-funded projects for other organizations (Hogar de Ayuda el Refugio, Inc.). This wealth of experience positions PR PASS to effectively undertake projects that benefit the communities we serve.

Over the past 3 years, we have successfully implemented numerous projects focused on disaster recovery, housing, homelessness, community engagement, and research.

Some of our key accomplishments include:

1. Completed February 2023: Three-year contract with Habitat for Humanity of Puerto Rico and Habitat for Humanity LLC, we successfully completed a digital workflow transformation. The digital transformation established a case and contact management system (CiviCRM) and various data intake and reporting tools (Drupal) for their multiple programs. Information that was once scattered throughout the organization is now accessible from a unified dashboard. *Completed on time and budget.*

2. Completes October 2023: Three-year contract with Habitat for Humanity International PR, LLC. We provided program monitoring, developmental evaluation, institutional learning, and conducted an impact evaluation of a $50 million disaster recovery program

that included home repair, home building, community capacity building, construction training, and legal aid for home titles. Our participatory evaluation process involved participants and comparison communities in defining terms, study design, instrument development and validation, data collection and analysis, and knowledge sharing.

Our organization's infrastructure and personnel are well-equipped to support the successful implementation of the proposed project. We have a dedicated team of professionals with expertise in social work administration, information systems, community outreach, field work, participatory research, and non-profit management. Additionally, we have established partnerships with local stakeholders and organizations, which enable us to effectively engage with the target community and leverage resources for the project's success.

Our team members' experience with contracts for grant-funded projects has allowed us to develop strong financial management and reporting systems, ensuring accountability and transparency in the use of project funds. Furthermore, our organization is committed to ongoing monitoring and evaluation to track project progress and adapt our strategies as needed, guaranteeing the project's continued relevance and effectiveness.

b. Staff Experience / Qualifications of Project Manager (PM)

James O'Malley, MSW: Mr. O'Malley specializes in designing and developing services for non-profit organizations and public agencies in social services. In recent years he has worked with community based organizations like La Fondita de Jesús (homeless services) and Fondos Unidos de Puerto Rico (United Way). He excels in capacity-building seminars and providing resources for underserved communities. He brings a system thinking approach, a background in mechanical engineering, deep knowledge of information systems, and experience collaborating across disciplines.

He holds a Masters in Social Work Administration from the Interamerican University and Bachelors in Science from Washington University.

As a technical lead at Altamente LLC., he has managed information systems for various organizations, including developing fundraising platforms for groups like Habitat for Humanity of Puerto Rico and CienciaPR. With a B.S in mechanical engineering from Washington University in St. Louis, MO, he has the technical ability to contribute to environmental science projects.

Mr. O'Malley's dedication to social justice includes an eight-year tenure as a mentor in the juvenile prison system in Puerto Rico. His commitment, project management skills, and technical expertise make him an ideal candidate to lead this program.

Laura Gorbea, PhD: Dr. Gorbea will be providing the project with support in project management, community engagement and participatory evaluation. Her approach to environmental justice is rooted in transformative and engaged practices. Gorbea's experience as an applied anthropologist has crossed public and private sectors in a variety of fields including education, economic development, public health, manufacturing, construction, innovation, technology, nonprofit development, cooperatives and community-based engagements. This diversity has made her an effective translator and mediator in multisector engagements and facilitator in the co-generation of knowledge products.

As Executive Director of PR PASS Workshop, she manages operations and ensures that projects are advance the organization's vision. She also is responsible for creating capacity building opportunities for students and community collaborators, alike.

Dr. Gorbea holds a PhD in Anthropology from Stanford University, as well as a BA in Anthropology, and a BFA in Fine Arts from Washington University in St. Louis. She is a regular contributor at the Society for Applied Anthropology, the Natural Hazards Center and has recently co-authored a peer reviewed article on the use of RAPID methodology in a post-disaster setting.

c. Expenditure of Awarded Grant Funds, and plan for compliance with EPA's Pre-award Compliance Review for Nonprofit Organizations

PR PASS has an established 3 year history of working on projects with non-profit organizations. We use sound financial controls, information management, reporting, and accounting systems.

We address any pre-award concerns in the following manner:

1. Review the EPA's pre-award compliance requirements and guidelines to ensure a thorough understanding of the expectations and obligations for recipients of EPA grant funding.

2. Maintain accurate financial records and accounting systems that clearly differentiate between direct and indirect costs, as well as expenses related to specific grant awards.

3. Implement strong internal controls, such as segregation of duties, proper authorization, and regular financial reviews, to minimize the risk of errors, fraud, or misuse of grant funds.

4. Develop and implement procurement policies and procedures that adhere to federal regulations and promote open, competitive, and fair procurement processes.

5. Ensure that all staff members involved in the project are aware of the grant's terms and conditions, as well as their individual responsibilities to ensure compliance with EPA regulations and requirements.

6. Regularly monitor project progress, financial expenditures, and compliance with grant requirements, addressing any issues or concerns as they arise.

7. Submit all required financial and progress reports to the EPA in a timely manner, providing accurate and complete information on the use of grant funds and the progress of the project.

8. Cooperate with EPA officials during audits, site visits, or other forms of oversight, providing access to financial records, project documentation, and other relevant information as needed.

5.0 Past Performance

Our organization (PR PASS) has no past grants experience.

6.0 Quality Assurance Project Plan (QAPP) Information

We believe we will be required to develop a Quality Assurance Project Plan (QAPP), as we will be conducting tests on surface and tap water and compiling a data base of these results.

Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: The HOPE Program

Address: 1360 Garrison Avenue

City: Bronx

State: NY: New York Zip Code: 10474

B. Unique Entity Identifier (UEI): Q8TJKKDLTJ64

C. Applicant/Recipient Point of Contact

Name: Irene Branche

Phone: Ex. 6 - Personal Privacy (PP)

Email: ibranche@thehopeprogram.org

Title: Chief Development and Evaluation Officer

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Gianina Kesselman; HR Manager; 1 Smith Street, 4th Floor, Brooklyn, NY 11201; gkesselman@thehopeperogram.org; Ex. 6 Personal Privacy (PP) (F); Ex. 6 - Personal Privacy (PP) (P)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

HOPE has a policy that meets all standards, including a process for informing management or the Board of Directors and a directive to provide a resolution within 5 days.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Gentian Haxhillari	Chief Development and Evaluation Officer	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Hope Program, Inc.
1 Smith St
Brooklyn, NY 11201

Dear Sir or Madam:

This letter is in response to your telephone request of May 30, 2002, for a copy of your organization's determination letter. This letter will take the place of the copy you requested. We have also updated our records to reflect your new address as indicated above.

Our records indicate that a determination letter issued in July 1985 granted your organization exemption from federal income tax under section 501(c)(3) of the Internal Revenue Code. That letter is still in effect.

Based on information subsequently submitted, we classified your organization as one that is not a private foundation within the meaning of section 509(a) of the Code because it is an organization described in sections 509(a)(1) and 170(b)(1)(A)(vi).

This classification was based on the assumption that your organization's operations would continue as stated in the application. If your organization's sources of support, or its character, method of operations, or purposes have changed, please let us know so we can consider the effect of the change on the exempt status and foundation status of your organization.

Your organization is required to file Form 990, Return of Organization Exempt from Income Tax, only if its gross receipts each year are normally more than $25,000. If a return is required, it must be filed by the 15th day of the fifth month after the end of the organization's annual accounting period. The law imposes a penalty of $20 a day, up to a maximum of $10,000, when a return is filed late, unless there is reasonable cause for the delay.

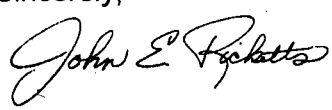
All exempt organizations (unless specifically excluded) are liable for taxes under the Federal Insurance Contributions Act (social security taxes) on remuneration of $100 or more paid to each employee during a calendar year. Your organization is not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Organizations that are not private foundations are not subject to the excise taxes under Chapter 42 of the Code. However, these organizations are not automatically exempt from other federal excise taxes.

Donors may deduct contributions to your organization as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to your organization or for its use are deductible for federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Hope Program, Inc.
13-3268539

Your organization is not required to file federal income tax returns unless it is subject to the tax on unrelated business income under section 511 of the Code. If your organization is subject to this tax, it must file an income tax return on the Form 990-T, Exempt Organization Business Income Tax Return. In this letter, we are not determining whether any of your organization's present or proposed activities are unrelated trade or business as defined in section 513 of the Code.



The law requires you to make your organization's annual return available for public inspection without charge for three years after the due date of the return. If your organization had a copy of its application for recognition of exemption on July 15, 1987, it is also required to make available for public inspection a copy of the exemption application, any supporting documents and the exemption letter to any individual who requests such documents in person or in writing. You can charge only a reasonable fee for reproduction and actual postage costs for the copied materials. The law does not require you to provide copies of public inspection documents that are widely available, such as by posting them on the Internet (World Wide Web). You may be liable for a penalty of $20 a day for each day you do not make these documents available for public inspection (up to a maximum of $10,000 in the case of an annual return).

Because this letter could help resolve any questions about your organization's exempt status and foundation status, you should keep it with the organization's permanent records.

If you have any questions, please call us at the telephone number shown in the heading of this letter.

This letter affirms your organization's exempt status.

Sincerely,

John E. Ricketts, Director, TE/GE

United States Office of Environmental Justice
Environmental Protection Agency [Mail Code 2201A]
1200 Pennsylvania Avenue, NW
Washington D.C., 20460

Dear United States Office of Environmental Justice:

I am pleased to write in support of The HOPE Program's proposal for U.S. EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

The HOPE Program's NYC °CoolRoofs initiative is a unique, innovative climate change innovation strategy that benefits communities like the South Bronx that are particularly heat vulnerable. I commit to providing HOPE, °CoolRoofs trainees, and volunteers with access to our building's rooftop in the South Bronx to cover it in a reflective coating that will increase our energy efficiency, cool the building, and reduce emissions in our community. We are incredibly grateful for this partnership opportunity and wholeheartedly support HOPE's proposal for funding.

If you have any further questions, please feel free to contact me at Ex. 6 - Personal Privacy (PP) or email me at Ex. 6 - Personal Privacy (PP)

Sincerely,

Phillip Grant, P.E., CEO

United States Office of Environmental Justice
Environmental Protection Agency [Mail Code 2201A]
1200 Pennsylvania Avenue, NW
Washington D.C., 20460

Dear United States Office of Environmental Justice:

I am pleased to write in support of The HOPE Program's proposal for U.S. EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

This initiative will build on the track record of The HOPE Program and Sustainable South Bronx to provide hands-on environmental job training to individuals from the South Bronx and surrounding communities while simultaneously completing an innovative project proven to mitigate the urban heat island effect within a community that is especially vulnerable to the effects of climate change.

I have been a proud supporter of HOPE's implementation of the NYC °CoolRoofs program through green jobs training, which has supported hundreds in my community across the Bronx in preparing for tomorrow's green economy. I commit to advocating on behalf of The HOPE Program and introducing them to property owners in my district who may benefit from their rooftop coating services wherever possible through this project. I wholeheartedly support HOPE in this effort to reduce City Council District 17's carbon footprint and look forward to continued partnership. I hope you will too.

Sincerely,

Council Member Rafael Salamanca, Jr.
17th District, The Bronx

Ex. 6 Personal Privacy (PP)
Bronx, NY
Ex. 6 - Personal Privacy (PP) | Ex. 6 - Personal Privacy (PP)
Ex. 6 Personal Privacy (PP)

Summary of Qualifications:

- Highly motivated project manager and community organizer with 10+ years' experience focusing on project management, data tracking system, excellent communication, and organization.
- Strong data analysis, training in advanced mathematical and statistical software skill set.
- Computer skills including G Suite apps, email, Internet, remote work, Microsoft Office Suite, SPSS, HTML

Professional Experience:

The HOPE Program — Brooklyn, NY
Project Manager — 11/2020 – Present

- Plan and execute outreach efforts and communication to engage and contract with diverse stakeholders.
- Update and maintain NYC CoolRoofs data tracking systems by utilizing analytic and data visualization tools for climate sustainability and GHG (greenhouse gas) emissions reductions.
- Integrate sustainability programs, and weather-related scheduling adjustments.
- Schedule site visits and inspections, confirm completion, and update data tracking report.

J T Hicks Associates — New York, NY
Office Engineer — 01/2020 - 06/2020

- Scheduled and monitored projects activities and site visits with teams, airfield operations, and facilities maintenance.
- Organized and maintained accurate and detailed project records including weekly and monthly project status reports.
- Coordinated between consultants, external agencies, contractors, property owners and other utility services.
- Prepared reports, maps, schedules, estimates, data collection, documents and agreements as needed.
- Inspected work sites, monitored project budget, scheduled, and checked project plans and drawings to verify authenticity.

Amazing Home Care — Bronx, NY
Assistant Care Person (ACP) — 12/2018 - 01/2020

- Created plans to help shorten patient's recovery period by 10% and work with doctors to develop steps to support dietary needs to lower cholesterol, blood pressure and monitored diabetic conditions.
- Provided and scheduled medical appointments and medication management; coordinated in-home therapies and services, and therapeutic recreation.

SUNY North Bronx Career Counseling and Outreach Center — Bronx, NY
Coordinator/Volunteer — 08/2017 - 07/2018

- Worked with high school students and unemployed adults to achieve certification leading to gainful employment in nursing assistance, childcare, and Microsoft Office
- Performed administrative duties by collecting and maintaining students' record databases, including student status updates and public assistance.
- Engaged the public through job fairs and community outreach activities.

JADE Multi Family Circle Center — Bronx, NY
Program Coordinator/Assistant Teacher — 12/2014 - 08/2017

- Developed and implemented policies for the administration ensuring compliance with city requirements.
- Authored graphic and written media to highlight programs, services and resources to parents and community members.
- Served as agency liaison at all mandated meetings and trainings; organized all internal trainings for staff and students.
- Planned and coordinated outreach programs to engage parents, stakeholders, and partners in collaboration efforts.
- Prepared and maintained databases, forms, and tracking systems to monitored daily functions.

University of Mysore — Mysore, India
Research Associate, Department of Environmental Science — 10/2010 - 04/2015

- Planned and executed project timelines and deliverables, objectives, budget, schedules, promotional media and reports.
- Performed site visits following detailed protocol for recording and processing of data; collected and analyzed data.
- Led public health campaigns focusing on schools, market vendors and consumers, and the residents in targeted areas addressing waste disposal and recycling.
- Conducted community outreach programs encouraging residents to become involved in the development of their neighborhoods; resulted in expansion, construction, and maintenance of buildings and public space.

Education & Training:

The HOPE Program — Brooklyn, NY
Career Enhancement Training — 08/2020 - Present

- Courses in customer service skills and principles, conflict resolution, problem solving, written and interpersonal communications, public speaking, time management, teamwork principles, and project-based learning.
- Computer literacy: Google Suite, Google Docs, email and Internet, remote learning, OSHA 10 General Industry

University of Mysore — Mysore, India
Master of Science and Professional Doctorate, Environmental Science

- Equivalent to U.S. Ph.D.; U.S. master's degree in the field from an accredited institution according to World Education Services, New York, 2015. Proof of evaluation available upon request.

1. Program Objectives

a. Project Summary Page

Project Title: Air Pollution Mitigation through Rooftop Coating and Transitional Employment

Project Location: Hunts Point, Bronx, NY 10474

Applicant Information: The HOPE Program, 1360 Garrison Ave, Bronx, NY 10474
Irene Branche, ibranche@thehopeprogram.org, Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization: HOPE empowers New Yorkers to build sustainable futures through training, jobs, advancement and lifelong career support. We currently operate one general career readiness program (HOPE*works*) and five green jobs training programs (Sustainable South Bronx, Intervine, YouthBuild, HVAC, and NYC CoolRoofs) to ensure that New Yorkers facing significant barriers to employment have the skills and confidence to succeed in the emerging green collar industry. Participants receive training in soft skills, hard skills, digital literacy, financial literacy, work wellness, industry certifications, on-the-job experience, and job search and retention support, as well as a wide range of wraparound services.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No.

Project Abstract: This project will build upon HOPE's existing implementation of the NYC CoolRoofs program, which provides a training and transitional employment opportunities with supportive career services for 70 New Yorkers annually across two cohorts, while simultaneously reducing emissions of nitrogen dioxide and particulate matter by painting rooftops with a reflective coating that improves buildings' energy efficiency. The project will allow us to coat an additional 150,000 square feet of rooftops on industrial buildings in the South Bronx, an area facing a particularly heavy environmental burden, and to expand our community engagement by hosting community-based organizations, leaders, and residents at our work sites.

Project Type: Environmental Job Training

Special Considerations: None

Environmental Issue: Air

Project Partners: Hunts Point Produce Market (business/industry), New York City Mayor's Office of Climate and Environmental Justice (government agency), Office of New York City Council Member Rafael Salamanca

Will you need to develop a QAPP for your project? No.

ED_016126_00001068-00001

b. Environmental and Public Health Information of the Underserved Community

The HOPE Program seeks to continue our innovative expansion of a critical rooftop cooling program to Hunts Point, a South Bronx neighborhood which is significantly impacted by the urban heat island effect and related community health risks.

This predominantly Black and Hispanic community, which faces a poverty rate of 39.6% overall, a shocking 23 percentage points that New York City overall[1], is also burdened with disproportionate environmental risks. Due to its proximity to the bustling Bruckner Expressway; the Hunts Point Food Market, which transports 60% of New York City's produce consumption every year; and the Hunts Point Wastewater Treatment Plant, this community ranks in the 90th to 100th percentile on the United States Environmental Protection Agency's air toxins respiratory hazards (EJSCREEN). In addition to degraded air quality, the Hunts Point industrial area and associated trucking contributes to locally higher temperatures, which are a health hazard on their own. These factors combine with a lack of green space to yield one of the highest heat vulnerability indices in New York City, according to the New York City Department of Health and Mental Hygiene. These environmental justice issues, alongside other factors, contribute to significant health disparities: asthma-related ER visits among children are nearly double the citywide rate in Hunts Point and the Bronx has a heart disease mortality rate which is 42% higher than Manhattan. The community we propose to serve aligns with Justice40 criteria in six categories including transportation, health, housing, legacy pollution, water and wastewater, and workforce development.

The map (left), courtesy of the New York City Economic Development Corporation, highlights how the environmental impact of the industrial area and food distribution center directly impacts residents of Hunts Point.

[1] NYU Furman Center, 2019

This urban heat island effect causes many problems for residents of the communities most impacted. As the United States Environmental Protection Agency reports, increased temperatures lead to:

- An estimated 5-10% increase in energy consumption, typically in low-income communities with few extra resources to cover these costs
- Increased use of electricity, which emits sulfur dioxide, nitrogen oxides, particulate matter and other air pollutants
- Impaired water quality
- Above average mortality rates

Fortunately, there are efforts to address these environmental impacts. The New York City Department of Environmental Protection announced in summer 2018 a $67 million investment in energy efficient upgrades to the wastewater treatment plant. More recently, the Hunts Point Produce Market received a historic investment from the federal Infrastructure and Investment Jobs Act (IIJA) to modernize and renovate its facility with a focus on cutting carbon emissions. Despite these efforts, large industrial polluters continue to degrade quality of life in the community.

In 2020, HOPE proposed a community-based solution to engage the industrial polluters in Hunts Point in joining these environmental solutions. HOPE is currently the sole operator of the NYC CoolRoofs program. New York City maximizes city funding and resources towards supporting and prioritizing non-profit and affordable housing buildings by offering no-cost cool roof installations to them, while private and for-profit organizations are generally responsible for the cost of the materials, but not the labor to install the coating. These costs have historically excluded private owners/operators from this vital solution, even when private industrial buildings are often the biggest contributors to decreased air quality, particularly in Hunts Point. Through funding from a 2021 EJCPS grant, HOPE leveraged the local labor provided by the NYC CoolRoofs program to cover the cost of coating 100,000 square feet of industrial rooftop in Hunts Point. We are seeking additional funds to coat an additional 150,000 square feet over the three year period of performance between the Hunts Point Produce Market and other local industrial buildings. By engaging job training participants in this paid transitional work opportunity, this model ensures that those most impacted by the environmental injustice earn wages and develop skills while serving as part of the solution. Further, this will serve as a demonstration project to engage industrial buildings in the CoolRoofs program at the subsidized cost offered by the city.

c. Organization's Historical Connection to Underserved Community

Sustainable South Bronx (SSBx) was founded in 2001 to address the environmental challenges facing this community. Located in Hunts Point, SSBx joined forces with The

Point Community Development Corporation, and other community stakeholders to transform a former illegal dumping ground into 1.4 acres of greenspace now known as Hunts Point Riverside Park. This legacy of partnership to transform our local community continues to inform our work today.

As SSBx continued to advocate for increased environmental features in this community, its leadership recognized the simultaneous need for job training for local residents to compete for the jobs coming out of their advocacy and across the growing green collar sector. Over time Sustainable South Bronx transitioned to a green job training organization, always remaining close to the community where it was launched.

In 2015, SSBx joined forces with The HOPE Program, one of New York City's leading workforce development organizations, and is now a wholly incorporated part of our organization. Since that time, we have expanded to launch four additional green jobs programs:

- CoolRoofs, as described above
- Intervine, a social enterprise which secures contracts to green the local community and hires jobseekers in our programs to conduct the work while earning a paycheck and continuing to develop skills for lasting careers
- YouthBuild, which provides high school equivalency preparation and hands-on job training for young adults in green construction and horticulture
- Green & Clean HVAC Training, a program that prepares jobseekers for careers in high-efficiency HVAC installation and maintenance through emerging technologies

Specific recent projects conducted through these programs include:

- Hunts Point Produce Market - 100,000 sq ft coated from the 800,000 sq ft. of coatable roof in fall 2022
- Ongoing maintenance of 14 environmental assets such as rain gardens in Soundview and West Farms to support watershed communities, leveraging paid training opportunities for local residents to complete the projects
- Planting and maintenance of a bioswale in partnership with The Point in the Hunts Point section of the Bronx

Further, we are partnering on solar installation projects, leveraging our jobseekers to clean up local parks, planting and counting trees, building green infrastructure in Concrete Plant Park in nearby Longwood and undertaking additional projects to improve the quality of life in Hunts Point and the surrounding communities. These projects are often conducted in partnership with community leaders, such as The Point CDC, Bronx River Alliance, our local New York State Assembly and New York City Council representatives and many

others.

Across all HOPE programs, approximately 20% of our full-time permanent staff are graduates of our programs or representatives of impacted communities, ensuring that at all times our programs and operations are informed by the individuals we serve. These include our CoolRoofs Crew Supervisor, who is a CoolRoofs graduate now serving in a management role, and our CoolRoofs Assistant Supervisor, who is also a graduate of the program. Both are positioned to serve as leaders in the program and mentors to program participants.

d. EJCPS Model

Rooftop coating at industrial buildings in Hunts Point began in 2021 thanks in part to funding from the EPA. Our approach leverages elements 1, 2, 4, 6 and 7 of the EPA's Environmental Justice Collaborative Problem-Solving Model.

1. Issue Identification, Community Vision and Strategic Goal Setting (Complete): Our proposed solution of providing rooftop coating to improve the energy efficiency of local industrial buildings is informed by local community groups, researchers from the City University of New York (CUNY) as well as New York City environmental policy. Specifically, the Food Policy Center at Hunter College has identified the environmental degradation that results from the 15,000 thousand trucks coming in and out of Hunts Point each day. While the Food Policy Center offers larger-scale solutions, such as the development of maritime delivery mechanisms, our proposed solution leverages local labor in a cost effective manner to contribute to improved air quality in the community.

While the challenge is hyper-local, we are proposing a solution that has a strong connection with New York City government. As previously described, we are proposing an expansion of the existing NYC CoolRoofs program, an initiative that we implement in close partnership with the New York City Department of Small Business Services and the Mayor's Office of Climate and Environmental Justice. It is a City initiative that provides local jobseekers with training and work experience installing energy-saving reflective rooftops to support the City's goal to reduce carbon emissions 80% by 2050. New York City estimates that every 2,500 square feet of rooftop coated yields a one-ton reduction in emissions. Further, this approach has been replicated in California, Florida, and many other communities across the country.

2. Community Capacity-Building and Leadership Development (ongoing): Our proposed solution empowers the individuals most impacted by the effects of climate change to deliver immediate change. In fact, the CoolRoofs model provides paid transitional employment, industry-recognized certifications, and supportive wraparound services to unemployed community residents seeking to build employability skills. Further, crew supervisors, and

frequently, permanent HOPE staff who oversee CoolRoofs implementation are often hired from within the CoolRoofs crews, ensuring that we are developing local leadership and buy-in for the expanded CoolRoofs program. We have further built local ownership over this program by inviting local leaders to visit and share coated rooftops, highlighting the partnership of private industrial buildings and celebrating deep partnership toward improved sustainability, and will continue to do so.

4. Multi-Stakeholder Partnerships and Leveraging of Resources (ongoing): We demonstrated commitment to this priority early in the planning for this project by engaging local elected officials, community groups, and sustainability experts. We are leveraging the expertise and relationship of these partners to identify future building partners. Further, we are leveraging the resources of the New York City Department of Small Business Services, which provides labor for cool roof installation for private buildings as long as the coating materials are covered. This ensures that the EPA's investment is well-leveraged and has a deeper impact than standalone funding.

5. Sound Management and Implementation (ongoing): As the sole implementation partner of the NYC CoolRoofs program since 2015, HOPE has significant experience in successfully implementing this model, including developing lines of communication with business partners, engaging community leaders such as elected officials in CoolRoofs, deploying local labor to earn competitive wages and access to leadership opportunities, training key stakeholders, setting achievable goals, and reporting impact to key stakeholders.

7. *Evaluation, Lessons Learned, and Replication of Best Practices (ongoing):* HOPE has a strong track record of evaluation and reflection. In fact, following each large-scale event or project that we implement, we gather staff from across departments and levels to offer feedback on what worked and opportunities for improvement. Further, we have developed systems to track progress toward goals and course correct as necessary. We will continue to leverage these tools, as well as ongoing communication with the EPA as a key stakeholder and other partners to continuously evaluate our progress and deepen the impact of this work for maximum benefit to our business partners and the residents of Hunts Point.

Specifically, and as described in reports to EPA for our previous EJCPS agreement, we have learned that industrial buildings often do not have stair access to rooftops or rooftop parapets, which is different from our experience with affordable housing and nonprofit partners. These are critical installations to transport the coating material to the rooftop and to meet safety guidelines. We were fortunate that the Hunts Point Produce Market covered the costs to install temporary parapets to make our collaboration possible. As a solution, we are proposing and increased budget to cover these costs and achieve the goal of our proposed EJCPS project, which is to ensure seamless engagement in CoolRoofs for our industrial building partners.

ED_016126_00001068-00006

e. Project Linkages

HOPE's proposed program directly aligns with the EPA Strategic Plan Goal 2, Objective 2.2. Specifically, the objective identifies the need for increased public participation, which CoolRoofs achieves in hiring and employing local residents to implement the program, with a focus on vulnerable and low-income communities, as described in the strategic plan. Further, the impact of this initiative will be to improve air quality and reduce the negative public health impact of the urban heat island effect, thereby improving public health for residents of Hunts Point and surrounding communities. Finally, this initiative addresses the EPA's focus on cross-agency collaboration by leveraging New York City resources alongside a federal grant to make changes in our local community.

Our proposed program also aligns with the federal Clean Air Act. As described above, the initiative reduces cooling needs, subsequently reducing the presence of criteria pollutants in the air, specifically nitrogen dioxide and particulate matter.

f. Partner and Collaborate.

The NYC CoolRoofs program is, at its core, rooted in collaboration between local government, nonprofit organizations, local buildings, and community residents. Through our collaborative model, we not only provide the community with training and education regarding environmental issues within the community, but also with opportunities for economic advancement, leadership, volunteerism, and an effective tool to reduce local energy outputs and air pollution. We will specifically collaborate with the following partners on this project:

Partner (stakeholder group)	Roles and Responsibilities	Resources brought to the project	Vested interest in partnership
The HOPE Program (workforce development CBO)			
Hunts Point Produce Market (business/ industry)		Rooftop access	Hunts Point Produce Market seeks to improve their own energy efficiency through cool roof coating
Office of New York City Councilmember	The Councilmember will leverage his	Community partnerships	

Rafael Salamanca	role to make introductions to HOPE to industrial buildings to participate in the program		
Mayor's Office of Climate and Environmental Justice	Lead City agency partner in the implementation of CoolRoofs, alongside the New York City Department of Small Business Services	As a lead partner, MOCEJ's support and buy-in for expansion to industrial buildings is foundational to our ability to implement the project; MOCEJ is authorizing the use of existing CoolRoofs resources for this project.	

2. Project Activities, Milestone Schedule, Detailed Budget

a. Project Activities:

The HOPE Program proposes to cover approximately 150,000 square feet over three years of industrial rooftop with a coating that reflects heat and improves the energy efficiency of the buildings, contributing to improved air quality in Hunts Point. According to previous estimates from New York City, which provides these services for nonprofit and affordable housing buildings at no-cost, 150,000 square feet of coating will divert 60 tons of emissions for this environmental justice community. Project activities are outlined, along with estimated timelines, in the Milestone Schedule table below.

b. Milestone Schedule:

Timeframe	**Activity**	**Goal**
September - October 2023	Convene community stakeholders to identify local buildings to target for outreach and to build awareness	Engage 5-10 community partners, including those identified in the project planning and additional stakeholders, as well as 25 individual community members

November 2023 - March 2024	Conduct outreach to buildings for spring and fall coating season	Secure contracts with 1-3 buildings to provide 50,000 square feet of rooftop for coating
April - July 2024	Spring coating season	Complete 50% of year 1 square footage target while providing essential paid transitional employment and workforce development services to local community members
August - October 2024	Fall coating season	Complete additional 50% of year 1 square footage target while providing essential paid transitional employment and workforce development services to local community members
October 2024	Fall convening	Bring together approximately 25 community stakeholders to reflect on year one of the grant, generate recommendations for year 2, and identify a pipeline

c. **Itemized budget Sheet/Budget Narrative:** Our budget sheet and budget narrative are included as an attachment.

3. Environmental Results - Outputs, Outcomes and Performance Measures (Logic Model)

a. Our **Logic Model** is included as an attachment.

b. **Performance Measurement Plan**

HOPE employs a custom Salesforce database to successfully manage all programmatic outputs and outcomes. We track detailed demographic details of enrollees, ongoing participation in our programs, job placement data, including initial wages, access to benefits, and full-time vs. part-time placements, time employed, subsequent jobs, career advancement and much more. We have recently deployed a new feature in Salesforce specifically to track progress against rooftop coating goals (previously tracked in spreadsheets). This new system will provide transparency and accountability across the organization to support this agreement.

We have a dedicated Salesforce Administrator to maintain data quality across all programs. This Administrator works closely with our Government Grants team to ensure accurate and timely reporting to public contractors. We will continue to follow these

practices of timely, accurate, and holistic data entry and analysis to monitor performance and progress throughout the project period. Specifically, we anticipate meeting our output goal of 1,000,000 square feet coated within two years. We also anticipate that 90% of participants will complete the eleven-week program. Finally, we will engage 25 new community members each fall coating season of the grant.

c. Sustainability Plan and Community Vision

As an environmental justice community with a largely low-income population, Hunts Point has long been a prime neighborhood for sustainability projects. And given the extent of the degradation, all of these efforts are critical to building a cleaner and more livable neighborhood for residents. As described previously, Hunts Point has enjoyed the development of new park space and there are large-scale efforts to transform the wastewater plant, both of which contribute to improved air quality in Hunts Point. This project builds on those efforts and leverages local talent to implement a community-based solution. Further, this initiative brings to Hunts Point a proven sustainability approach that, because of existing funding streams, has not historically been available in this high-need community prior to 2021.

4. Programmatic Capability

a. Organizational Experience: The HOPE Program's ability to successfully implement this grant is reflected in our highly experienced and dedicated staff, engaged board, robust infrastructure, financial processes, and track record of successful partnership. HOPE has a staff of approximately 60 FTEs, 20% of whom are graduates of our training programs or representatives of impacted communities. Over half of our staff have advanced degrees, several in mental health counseling and other highly relevant areas.

We operate from two locations, one in Downtown Brooklyn and another in the Hunts Point section of the Bronx, each readily accessible by public transportation. Both locations include classroom, office facilities, and mobile computer learning labs where participants will be able to develop their resumes and pursue post-program employment opportunities. The classroom spaces are equipped with projectors and other technologies to support training and community engagement.

HOPE uses FundEZ accounting software, and our systems ensure that assets are safeguarded, financial statements are prepared in conformity with GAAP, and that finances are managed with responsible stewardship. FundEZ also has robust reporting capabilities allowing users to perform detailed analysis of source data. Our finances are maintained by a full-time staff member, a seasoned non-profit financial analyst overseen by our Chief Financial and Operating Officer. Our board conducts financial reviews six times a year. We consistently achieve clean audits from our external auditor, CBIZ.

We use a custom Salesforce database to record and track client data for all programs, generating reports for public and private funders and to monitor progress towards programmatic goals. Participant demographic and personal data collected during the hiring process will be captured, as well as program progress and achievements, and employment outcomes. We have a dedicated Salesforce System Administrator to create comprehensive outcome reporting to ensure high data quality and analysis. We have been recognized as a leader in the field of data collection, and have been invited by leading funders to support peer organizations as they develop robust data systems.

b. **Staff Experience/Qualifications of Project Manager:** The Project Manager for this initiative will be Nichola Ramchurjee (resume included as an attachment). Nichola is uniquely positioned to manage this program as she holds a PhD from Mysore University in Environmental Sciences, and as a new American who struggled to connect with the workforce, completed HOPE's job training programs. She recently became a Registered Environmental Professional through the National Registry of Environmental Professionals. Nichola has led the team in successfully meeting CoolRoofs targets since November 2020, and played a key role in the prior implementation of our EJCPS agreement.

   The CoolRoofs program is overseen by HOPE's Chief Program Officer, Ana Chapman. Ana joined HOPE in 2021 and is responsible for the program design and implementation of HOPE's training programs. She also supports integration of these programs with best practices in career readiness, employer engagement and work-based learning, and wellness to ensure meaningful employment and advancement outcomes for the HOPE community. Ana has over 20 years of experience leading workforce development programs prior to her work at HOPE, including at the Queens Library, Hudson County Community College, and CUNY School of Professional Studies. Ana holds an MA in Individualized Study from NYU and a BA in Liberal Arts from The New School, and she is a graduate of the Workforce Professionals Training Institute Leadership Program. She is also currently working toward an EdD in General Education with an emphasis on the Efficacy of Workforce Development Programs at NorthCentral University.

c. **Expenditure of Awarded Grant Funds, and Plan for Compliance with EPA's Pre-Award Compliance Review for Nonprofit Organizations:** Based on our long track record of successfully managing public and private grants, HOPE has strong systems and processes in place to ensure proper expenditure, tracking and reporting of awarded grant funds. We employ a dedicated Government Grants Manager and Government Grants Associate who report to a Senior Finance Manager and a Chief Financial and Operations Officer. Together, this team prepares monthly financial reports for management and the Board of Directors, completes required grant reports, collaborates with our program teams to develop strategies that align spending with programmatic goals. When specific grants require it, we conduct monthly meetings of the Finance and Program departments

to track progress toward goal, specify remaining funding and programmatic metrics, and strategize continued work on the grant. Further, we maintain several funding relationships through which we collaborate directly with the funding to track these outcomes, as is expected within this opportunity. We will leverage these proven strategies to properly manage funding of an EPA EJCPS award. We successfully spent down our prior EJCPS award and met performance targets.

5. Past Performance

A list of current and former federal contracts held by HOPE is below. We successfully spent down our previous EPA EJCPS grant.

- EPA contract # EC96248620 - Collaborative
- EPA contract # JT96242921 - Brownfields
- DOL contract # Ex. 6 Personal Privacy (PP)
- DOL contract #

ED_016126_00001068-00012

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: The New York Committee for Occupational Safety and Health

Address: 14 Wall St
Suite 5A

City: New york

State: NY: New York Zip Code: 10005

B. Unique Entity Identifier (UEI): NH6DNJL3AZQ5

C. Applicant/Recipient Point of Contact

Name: Charlene Obernauer

Phone: Ex. 6 - Personal Privacy (PP)

Email: charlene@nycosh.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

NA

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☐ Yes ☒ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☐ Yes ☒ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Charlene Obernauer, Executive Director
14 Wall Street #5A, New York NY 10005
Ex. 6 - Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

Charlene Obernauer, Executive Director
14 Wall Street #5A, New York NY 10005
Ex. 6 - Personal Privacy (PP)

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

THE UNIVERSITY OF THE STATE OF NEW YORK
THE STATE EDUCATION DEPARTMENT
ALBANY, NEW YORK 12234

COUNSEL
AND
DEPUTY COMMISSIONER FOR LEGAL AFFAIRS

10/12/79

TO: Department of State
Division of Corporations

FROM: Office of Counsel and
Deputy Commissioner for Legal Affairs

By: Mary Dingman
Legal Assistant

SUBJECT: THE NEW YORK COMMITTEE FOR OCCUPATIONAL SAFETY AND HEALTH, INC.

REFERENCE: Proposed Certificate of Incorporation

462048S

The attached document was submitted to this office for review to determine whether the provisions of section 216 of the Education Law require the consent of the Commissioner of Education to its filing with the Department of State, or whether the Education Department would have any objections to its filing.

After review it is the opinion of this office that there is no necessity for the Commissioner to consent to filing, and that we have no objection to such filing.

This waiver of consent to filing is granted with the understanding and upon the conditions set forth on the reverse side of this memorandum.

Att.

ED_016126_00001077-00001

This waiver of consent to filing is granted with the understanding that nothing contained in the annexed document shall be construed as authorizing the corporation to engage in the practice of law, except as provided by subdivision 5 of section 495 of the Judiciary Law, or of any of the professions designated in Title VIII of the Education Law, or to use any title restricted by such law, or to conduct a school for any such profession, or to hold itself out to the public as offering professional services.

This waiver of consent to filing is granted with the further understanding that nothing contained in the annexed document shall be construed as authorizing the corporation to operate a nursery school, kindergarten, elementary school, secondary school, institution of higher education, cable television facility, educational television station pursuant to section 236 of the Education Law, library, museum, or historical society, or to maintain an historic site.

This waiver of consent to filing shall not be deemed to be or to take the place of registration for the operation of a private business school in accordance with the provisions of section 5002 of the Education Law, nor shall it be deemed to be, or to take the place of, a license granted by the Board of Regents pursuant to the provisions of section 5001 of the Education Law, a license granted by the Commissioner of Motor Vehicles pursuant to the provisions of section 394 of the Vehicle and Traffic Law, a license as an employment agency granted pursuant to section 172 of the General Business Law, or any other license, certificate, registration, or approval required by law.

ED_016126_00001077-00002

CERTIFICATE OF INCORPORATION

OF

THE NEW YORK COMMITTEE FOR OCCUPATIONAL

SAFETY AND HEALTH, INC.

Under Section 402 of the Not-For-Profit Corporation Law

THE UNDERSIGNED, for the purpose of forming a corporation under Section 402 of the Not-For-Profit Corporation Law, does hereby make, subscribe and file this Certificate for that purpose and certifies as follows:

FIRST: The name of the Corporation is THE NEW YORK COMMITTEE FOR OCCUPATIONAL SAFETY AND HEALTH, INC.

SECOND: The Corporation is a corporation as defined in Section 102(a)(5) of the Not-For-Profit Corporation Law, pursuant to which the Corporation's purposes shall not be for pecuniary profit or financial gain.

THIRD: Pursuant to Section 201(b) of the Not-For-Profit Corporation Law, the Corporation shall be a Type B Corporation.

FOURTH: The purposes for which the Corporation is formed are:

(a) To provide the public, industry and government with an awareness of occupational safety and health problems;

(b) To assist workers in the exercise of their human and civil rights as secured by law;

(c) To promote communication between these sectors on such issues;

(d) To establish and maintain a clearinghouse of materials on health and safety, and make the same available to workers, unions, industry, government and the public;

3

ED_016126_00001077-00003

(e) To conduct, sponsor and encourage research and inquiry into various facets of safety and health and to disseminate the results of such research to workers, unions, government, industry, professionals in various fields of interest and members of the general public;

(f) To organize, conduct, forster and encourage the organization of conferences, forums, seminars, concerts and lectures regarding issues of substantive and technical interest, importance and currency for persons interested in safety and health questions as well as for the general public, and to disseminate the results thereof;

(g) To publish periodic journals or other publications which discuss, report on and carry features concerning subjects described in (a) through (f) of this Paragraph as well as to prepare, produce and distribute materials including but not limited to books, pamphlets, and audio-visuals, in order to disseminate information as described in (a) through (f) of this Paragraph;

(h) To solicit, receive and maintain, invest and re-invest funds of real and personal property and to contribute its income and so much of the principal, in and as deemed advisable, for the purposes provided in (a) through (g) above.

FIFTH: (a) No part of the income of the Corporation shall inure to the benefit of any member, trustee, director, officer of the Corporation, or any private individual (except that a

ED_016126_00001077-00004

reasonable compensation may be paid for services rendered to or for the Corporation affecting one or more of its purposes), and no member, trustee, officer of the Corporation or any private individual shall be entitled to share in the distribution of any of the Corporate assets on dissolution of the Corporation.

(b) No substantial part of the activities of the Corporation shall be carrying on propaganda, or otherwise attempting to influence legislation, or participating in, or intervening in (including the publication or distribution of statements), a political campaign on behalf of any candidate for public office, except as permitted by Section 501 (h) of the Internal Revenue Code of 1954 as ammended.

(c) In the event of dissolution, pursuant to a plan adopted by the Directors, all of the remaining assets and property of the Corporation shall after necessary expenses thereof be distributed to such organizations as shall qualify under Section 501 (c)(3) of the Internal Revenue Code of 1954, as ammended, subject to an order of a Justice of the Supreme Court of the State of New York.

(d) In any year in which the Corporation shall be classified as a private foundation, the following shall apply: The Corporation shall distribute its income for each taxable year at such time and in such manner as not to subject it to tax under Section 4942 of the Internal Revenue Code of 1954, as ammended, and the Corporation shall not (a) engage in any act of self-dealing as defined in Section 4941(d) of the Code; (b) retain any excess business holdings as defined in Section 4943 (c) of the Code; (c) make any investments in such manner as to subject the Corporation to tax under Section 4944 of the Code; or (d) make any taxable exepnditure as defined in Section 4945 (d) of the Code.

(e) Nothing herein shall authorize this Corporation

ED_016126_00001077-00005

to engage in or include among its purposes any of the activities mentioned in the Not-For-Profit Corporation Law Section 404 (b) through (t), or Judiciary Law Section 495.

(f) Nothing herein shall authorize the Corporation to engage in the practice of the profession of law or any other profession required to be licensed by Title VIII of the Education Law.

(g) The Corporation will solicit funds from the public consistent with the purposes of the Corporation.

SIXTH: Notwithstanding any other provision of these articles, the Corporation is organized exclusively for one or more of the following purposes: religious, charitable, scientific, testing for public safety, literary or educational purposes, or to foster national or international amateur sports competition (but only if no part of its activities involves the provision of athletic facilities or equipment), or for the prevention of cruelty to children or animals, as specified in Section 501(c)(3) of the Internal Revenue Code of 1954, and shall not carry on any activities not permitted to be carried on by a corporation exempt from Federal income tax under Section 501(c)(3) of the Internal Revenue Code of 1954.

SEVENTH: The Corporation shall have all the powers of a corporation specified in Section 202 of the Not-For-Profit Corporation Law, together with the power to solicit grants and contributions for corporate purposes.

EIGHTH: The principal office of the Corporation is the City, County and State of New York, but the Corporation shall have the power to conduct operations elsewhere in furtherance of its corporate purposes. The territory in which the Corporation's operations will principally be conducted is the City, County and State of New York, but as noted above, the Corporation shall have the power to conduct operations elsewhere in furtherance of its corporate purposes.

ED_016126_00001077-00006

NINTH: The initial Directors of the Corporation, all of whom are at least nineteen (19) years of age or older, and their addresses are as follows:

Gentlemen:

This modifies our letter of the above date in which we stated that you would be treated as an organization which is not a private foundation until the expiration of your advance ruling period.

Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Internal Revenue Code, because you are an organization of the type described in section 509(a)(2). Your exempt status under section 501(c)(3) of the code is still in effect.

Grantors and contributors may rely on this determination until the Internal Revenue Service publishes notice to the contrary. However, a grantor or a contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act that resulted in your loss of section 509(a)(2) status, or acquired knowledge that the Internal Revenue Service had given notice that you would be removed from classification as a section 509(a)(2) organization.

Because this letter could help resolve any questions about your private foundation status, please keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above.

cc: Franklin Siegel, Esq.
56 Thomas Street
New York, New York 10038

Sincerely yours,

District Director

District Director, Manhattan District

Letter 1050 (DO) (7-77)

ED_016126_00001078-00001

La Colmena
774 Port Richmond Avenue
Staten Island, NY 10301

April 12th, 2023

To Whom It May Concern:

We are writing to provide a letter of commitment from La Colmena as a partner of the New York Committee for Occupational Safety and Health (NYCOSH) in their application for EPA funding through RFA #EPA-R-OEJECR-OCS-23-01.

La Colmena is a nonprofit community-based organization founded in 2014, working to empower day laborers, domestic workers, and other low-wage immigrant workers in Staten Island through organizing, education, culture, and economic development. We are committed to providing the tools they need to become leaders who can speak and advocate for themselves and their communities. We serve a varied population of individuals and families from Mexico, Guatemala, Honduras, and Peru, among other places. Our members speak a range of indigenous languages and have different levels of literacy.

NYCOSH is a non-profit, membership organization of workers, unions, community-based organizations, workers' rights activists, and health and safety professionals founded in 1979 on the principle that workplace injuries, illnesses and deaths are preventable. The environmental and public health issues of focus for this grant proposal are temperature stress and workplace resiliency; the communities served will be outdoor workers, including day laborers, agricultural workers, and truck drivers. This funding will allow NYCOSH Safety & Health Specialists to provide trainings for workers across industries on temperature stress, the impact of climate change on worker industries, and developing resiliency; the program will focus on utilizing the hierarchy of hazard controls to protect workers on a job site. The funding will also provide the necessary resources to refine and cater curricula on these topics to specific industries. As the primary contractor, NYCOSH will oversee the administrative and fiscal components of the grant, as well as partnership subcontracts.

La Colmena is excited to partner with NYCOSH to reach immigrant construction workers on Staten Island, who frequently work in extreme temperatures. We hear from workers around the clock who are working outdoors in sweltering heat or in the freezing cold and are all too familiar with temperature-related fatalities; we know first hand the importance of protecting workers from this exposure.

Under this grant, La Colemena will receive a sub-award via NYCOSH for $75,000 to conduct the following activities:

1. Contribute to the project by conducting outreach and telling workers about the project.
2. Conduct outreach to at least 800 immigrant workers in person, virtually, and by phone to participate in trainings.
3. Ensure that members are responsive to NYCOSH evaluations so that accurate data is collected on membership.

ED_016126_00001080-00001

4. Assign approximately 20% of outreach staff time to this project.
5. Provide access to our training space on Staten Island when needed.

La Colmena has a valuable partnership with NYCOSH and fully supports this project. We look forward to working together with the goal of protecting immigrant construction workers on Staten Island.

We thank you for your consideration.

Sincerely,

Yesenia Mata
Executive Director
La Colmena

EDUCATION

CUNY SCHOOL OF PUBLIC HEALTH AND HEALTH POLICY, New York, NY — August 2015—December 2017
Master of Public Health, concentration in Environmental and Occupational Health Science
Capstone: "Industrial Hygiene in the Brewing Industry: A Case Study of a New York Regional Brewery"

ST. GEORGE'S UNIVERSITY, St. George, Grenada, W.I. — January 2013—March 2014
Completed three semesters of combined MD/MPH coursework

STONY BROOK UNIVERSITY, Stony Brook, NY — August 2005—May 2009
Bachelor of Arts in Political Science, 2009

EXPERIENCE

NEW YORK COMMITTEE FOR OCCUPATIONAL SAFETY AND HEALTH, New York, NY — December 2017—Present
Industrial Hygienist
Provide on-site industrial hygiene services, including site inspections, risk identification and management, and hazard remediation recommendations. Provide technical assistance to individuals and organizations and respond to inquiries regarding workplace hazards. Work with unions and community-based organizations to develop safety and health training programs. Develop training materials, including curricula, fact sheets, and other resources based on best safety practices and in compliance with federal, state, and local regulations. Conduct safety and health training sessions for unions and community organizations. Collaborated with partner organizations to provide technical information for the development of a national COVID-19 policy guidance document and the NY HERO Act.

THE CITY UNIVERSITY OF NEW YORK – SCHOOL OF LABOR & URBAN STUDIES, New York, NY — January 2021—May 2021
Adjunct Lecturer
Taught graduate and undergraduate mixed level Occupational Safety and Health course at the Department of Labor Studies during the Spring 2021 semester.

NEWYORK-PRESBYTERIAN HOSPITAL, New York, NY — November 2016—December 2017
Specialist, Environment of Care Compliance
Ensured the health and safety of Facilities Operations employees by conducting safety audits of work areas, investigating workplace accidents to determine root cause, and organizing safety directives and trainings. Managed and coordinated enterprise-wide water safety program. Conducted compliance audits and document reviews of inspection, testing, and maintenance records for fire alarm systems, water based fire protection systems, emergency power supply systems, and medical gas systems. Reviewed and updated hospital-wide policies as necessary. Ensured compliance with federal and state regulations, including OSHA, EPA, DEP, FDNY, NFPA Life Safety Code, and The Joint Commission Elements of Performance.

BUREAU VERITAS NORTH AMERICA, INC., Edison, NJ — May 2014—November 2016
Junior Industrial Hygienist, Health, Safety, and Environmental Services
Managed three major *Legionella* risk exposure control projects to evaluate the efficacy of water management practices in place. Performed a variety of field surveys and exposure assessments, including noise, carbon dioxide, carbon monoxide, respirable and total particulate, hexavalent chromium, heat stress, nano-compounds, and indoor air quality, in accordance with NIOSH and OSHA sampling methodologies. Performed facility audits to verify compliance with federal, state, and local regulations and internal policies. Performed monitoring and risk assessment during emergency response actions for a railroad service. Performed asbestos inspections at commercial and manufacturing sites within US and Canada, including an international beverage corporaton. Performed quantitative respirator fit testing using a TSI, Inc. Portacount Plus. Assisted clients in improving control methods and hygiene procedures, including personal protective equipment. Produced written reports and other deliverables for clients. Evaluated functionality of sampling equipment, and sent for repair and calibration as needed. Maintained necessary qualifications and training certificates.

STONY BROOK UNIVERSITY HOSPITAL, Stony Brook, NY — June 2010—January 2013
Research Assistant, Obstetrics and Gynecology Department
Screened and recruited patients for research studies. Managed data of enrolled patients and ensured all projects were in accordance with IRB requirements; submitted projects for renewal as needed. Collected and processed tissue samples from patients scheduled for Caesarean sections. Used Optical Coherence Tomography to obtain images of fetal membranes. Reviewed literature pertinent to research studies. Coordinated with research team members outside of department. Assisted in writing and reviewing two manuscripts for publication.

Work experience

2006- Present New York Committee for Occupational Safety and Health – NYC, NY
Safety and Health Specialist II

Train, advocate and provide technical assistance to law wage immigrant workers on safety and health issues and on their rights. Assist with Health promoter Program providing train the trainer sections; co- facilitating Safety & Health trainings with health promoters and helping develop Health Promoter Curriculum; Facilitate Nail Salon worker trainings on a weekly basis and help develop nail Salon curriculum. Have trained around 500 nail salon workers who have successfully graduated from our Nail Salon School and who are on their road to get their Nail Salon Permanent License with the State. Developed Train The Trainer curriculum and co-facilitated training to a group of community leaders so that they can continue helping nail salon workers achieved their dreams and get their permanent state license. Focus efforts on the development of public policy issues of importance to the most vulnerable workers by monitoring and analysis of immigrant worker injuries, illnesses and death. In addition, by activating regional and national coalitions with immigrant advocates religious groups, public and legal health advocates and other allies, to focus efforts with safety organizations and ethnic media to disseminate public service announcements, poster and other educational materials for immigrants on their rights to safety and health on the job. Provide hundreds of 10 and 30 hour OSHA construction/ Industrial certification to Immigrant workers. Have trained and certified hundreds of workers on the mandatory 10 hour Site Safety Training by the Departments of Buildings in NYC. Developed Disaster Preparedness curriculum and have trained workers and organizations on Workplace Disaster Preparedness.

2016- Present United Steel Workers (USW) & Tony Mazzocchi Center (TMC)

Specialized Emergency Response Trainer (SERT) and a USW Tony Mazzocchi Center (TMC) worker-trainer. Had responded to Disaster sites in North Carolina; Puerto Rico; California and NY to train Immigrant workers, community based organizations; union members; faith based; worker centers; city, state and government agencies on how to respond safety to a disaster

2011- 2012 Consortium for Workers Education – NYC, NY

Safety and Health Specialist Educator

Identified community based organizations and workers centers organizing immigrant workers. Developed a working rapport with the organizations and trained hundreds of immigrant workers addressing issues of worker health and safety; immigrant workers rights; wages and hours laws; organizing strategies; capacity building and advocacy.

2011-2012 Center for Financial Services Innovation – NYC, NY

Field Researcher for the Financial Diaries

Conducted research using an in-depth 16 month research technique which involved twice-monthly interviews to Latino families (referred by community partners) on how working families living in low-income communities actually made ends meet on a daily, weekly, monthly, or yearly basis; cataloging their struggles and studying their survival strategies, and from there determining which tools and support systems they do, and don't, need.

The goal of the research was to identify and publicize lessons about how working families manage their finances, and to better understand the condition of poverty, including how problems like poor health, low skills, social isolation, and limited access to markets affect family finances hoping that firms find value in research to create more useful products; that policymakers will be aided in crafting laws and regulations; and that nonprofit service providers gain insight into program design. Ultimately, the aim was to reduce the barriers to financial well-being currently faced by working families.

2004-2006 Latin American Integration Center – Queens, NY

Occupational Safety and Health Project Coordinator

Coordinate and conduct Occupational Safety and Health workshops educating the immigrant community at different sites expanding beyond the workplace and targeting community-based organizations, industries, consulates, churches, libraries, schools, community boards, health fairs, police prencints, park and street events. Distribute appropriate material and make referrals. Serve as a bridge between immigrant workers and those organizations. Advocate for those in need of legal assistance

Immigrant Workers Health Van Campaign Project Coordinator

Outreach and identify immigrant workers performing high risk jobs who may be developing occupational health problems; refer them for medical examinations at Elmhurst Hospital Van Campaign; distribute Occupational Safety and Health and workers rights pamphlets , booklets and material . Provide counseling and referral on immigrant rights on site. Educate labor workers on how to begin organizing among themselves to demand their rights at the workplace. Follow up on workers health and on services they receive at Elmhurst Hospital

September 11 Medical Monitoring Program

Conduct outreach events to identify September 11 workers in need of medical monitoring assistance and enroll them in the program. Establish a working relationship with local newspapers, radio and television channels and partnership with them to better distribute the information on the program. Conduct workshops on the effects of the aftermath of September 11

Participated in investigation of psycho physiological components of weeping. Administered an interpreted text. Participated in design of questionnaire. Co-authored article on subject. Explored differences in emergences and course of social smiling between pre-term and full-term infants. Assisted in development of scale, which was used to diagnose affective disorders in infants. Administered and interpreted texts. Entered data in computer.

Certification

OSHA Authorized Outreach Trainer 10 & 30 Hour Construction & General Industrial Trainer;
Scaffolding Safety and Health Authorized Trainer;
Silica Safety and Health Authorized Trainer;
hazard Communication/ GHS Safety and Health Authorized Trainer;
Material Handling Safety and Health Authorized Trainer;
Personal Protective Equipment Authorized Trainer;
Nail Salon Safety and Health Authorized Instructor;
15- Hour Disaster Site Workers Safety & Health;
USWTMC Train- The –Trainer; OSHA 7600; Incident Command System (ICS) ; infectious Disease Trainer
SST Worker Trainer

PROFESSIONAL EXPERIENCE

NEW YORK COMMITTEE FOR OCCUPATIONAL SAFETY AND HEALTH (NYCOSH) — **March 2020 - Present**
ASSOCIATE DIRECTOR

- Participate in development, planning and grant-writing.
- Administer grant planning and reporting activities for upwards of 14 grants.
- Supervise six Safety and Health Specialists in planning, coordinating, and delivering trainings to thousands of workers yearly.
- Develop new curricula on an ongoing basis to suit the needs of a diverse range of workers.
- Coordinate New York Healthy Nail Salons Project in training and education work with partners.
- Represent NYCOSH in media and public engagements.

NYC DEPARTMENT OF HEALTH AND MENTAL HYGIENE (DOHMH) — **November 2017 – March 2019**
OVERDOSE EDUCATION AND NALOXONE MANAGER

- Manage 20 contracts with community based organizations awarded as a result of Requests for Proposals (RFPs) related to expanding naloxone distribution through targeted outreach strategies.
- Develop strategic plan for naloxone distribution by setting annual targets, identifying organizations in areas of greatest need, and defining an outreach plan to expand naloxone to new populations.
- Oversee implementation of strategic plan through the development of training curricula related to overdose prevention, recruitment of Opioid Overdose Prevention Programs (OOPPs) to dispense naloxone, and the provision of technical assistance to high-priority OOPPs.
- Provide management, organizational, and strategic direction to unit of seven people tasked with overseeing citywide naloxone distribution, including direct supervision of three individuals.
- Oversee $11 million in annual spending related to naloxone distribution activities.
- Manage Bureau's monthly city-wide naloxone data collection system, which collects data from over 200 OOPPs city-wide and receives over 6,000 data forms per month.
- Summarize naloxone distribution data and prepare reports and publications for internal and external distribution.

NYC DEPARTMENT OF HEALTH AND MENTAL HYGIENE (DOHMH) — **March 2016 – November 2017**
OVERDOSE PREVENTION COORDINATOR

- Planned and implemented naloxone distribution expansion strategies for at risk populations, with the goal of preventing overdose deaths in New York City.
- Developed citywide naloxone data collection system to support evaluation of the city's naloxone program with the support of internal collaborators and stakeholder organizations. Designed collection tools and policies, and created training materials to support OOPPs use of the new system.

Ex. 6 Personal Privacy (PP)
BROOKLYN, NY | Ex. 6 - Personal Privacy (PP) • Ex. 6 - Personal Privacy (PP)

- Developed and maintained training documents, presentations, protocols and other technical assistance materials for OOPPs to support expanded organizational capacity for naloxone dispensing.
- Recruited primary care programs, emergency departments, drug treatment and housing providers to sustainably integrate naloxone distribution into organizational workflows.
- Developed five RFPs, reviewed proposals, and awarded 20 contracts to community-based organizations to expand naloxone dispensing through targeted outreach.
- Delivered overdose prevention trainings in a variety of settings, including as community naloxone dispensing to laypeople and workplace trainings. Conducted Training of Dispenser courses to further expand naloxone distribution.

NYC DEPARTMENT OF HEALTH AND MENTAL HYGIENE (DOHMH) **July 2014**
SPECIAL ASSISTANT TO THE ASSISTANT COMMISSIONER **– March 2016**

- Wrote internal and external reports, briefings, proposals, position statements and talking points on topics related to substance use, harm reduction, naloxone, judicious opioid prescribing, and medication-assisted treatment in NYC.
- Conducted research and quantitative data analysis, and prepared presentations on issues and special projects as required by the Assistant Commissioner (AC).
- Special projects included:
  - **Naloxone Saturation in Neighborhoods with Highest Overdose Mortality Rates**
    - Co-facilitated workgroup meetings and inter-agency communication, and developed protocols, timelines, and implementation plans.
  - **Evaluation of Rikers Island Visit House Overdose Prevention Program**
    - Developed quantitative survey, trained staff in survey adminstration, enrolled individuals into study, analyzed data, and drafted manuscript for publication.

NYC DEPARTMENT OF HEALTH AND MENTAL HYGIENE (DOHMH) **April 2013**
HEALTH RESEARCH TRAINING PROGRAM INTERN **– July 2014**

- **Overdose Prevention Evaluation:** developed and administered quantitative survey, tracked participants, and conducted data management and analysis.
- **Quality of Life Evaluation:** designed qualitative questionnaire, conducted in depth interviews and focus groups, coded transcripts, and conducted data analysis.
- **Overdose Prevention at Rikers Island Visit House, Pilot:** Collaboratively planned and conducted trainings for trainers of Overdose Prevention, acted as point person and guide for trainers at Rikers, and streamlined training processes.

Professional Profile

Collaborative non-profit executive with twelve years of conceptualizing and growing innovative programs to build healthy and sustainable social justice organizations. Experience in strategizing with expert partners and board members on campaign and organizational development, diverse fundraising with a focus on events and grant writing, and public speaking to large groups and media organizations. Strengths in policy and advocacy to pass state and city legislation, strategic and creative thinking to inspire new and effective ideas, compassionate program and people management, and issues related to healthy and equitable employment. Experience in education, coaching and advising executive leadership, and community organizing.

Professional Experience

Executive Director ***New York, New York***
New York Committee for Occupational Safety and Health (NYCOSH) **January 2014-Present**
Develop and execute strategic and visionary strategic plans and provide organizational thought leadership on NYCOSH's vision and mission. Establish and run programs, innovate partnerships and collaborations. Manage team of four and a $3M annual budget. Oversee fundraising program including grant writing, membership, events. Report and manage board of directors. Manage the organization's operations, budget, and development.

- Completed NYCOSH's 5-year strategic plan, doubling NYCOSH's annual budget in seven years, from $1.4 to $3M.
- Won policy victories such as the posting of a multi-lingual "Workers' Bill of Rights" in every nail salon in New York State as a result of co-founding of the New York Healthy Nail Salons Coalition.
- Pioneered innovative programs to gain visibility for NYCOSH, leading to placement in *The New York Times* on seven occasions, *The Wall Street Journal* on two occasions, and two interviews on *WNYC's* "The Brian Lehrer Show."
- Wrote and passed legislation related to construction worker injuries and deaths in New York City via successful legislative strategy to establish forty hours of construction training.
- Passed legislation to create a searchable New York State registry of workplace fatalities.
- Supported nearly 800 manicurists to receive their NYS licenses since 2016 as founder and director of New York Healthy Nail Salons School.
- Increased budget by 50% with effective grant writing, new fundraising projects, and a diversification of grant funding.
- Awarded a $1.6M dollar grant with the Manhattan District Attorney's office to fight employer crimes against New York workers.
- Received highest grant of more than $400,000 annually for the NYS Hazard Abatement Board funding program from 2014-2021.
- Serve as chief negotiator for organization's collective bargaining agreement, establishing just wages and working conditions while also managing the financial realities and organizational needs of NYCOSH.

Adjunct Professor ***New York, NY***
SUNY Harry Van Arsdale Labor Center **Spring 2018 – Present**
Successfully created and designed a new, popular-education based curriculum for the course.

- Adjunct Professor for Occupational Safety and Health (OSH) and the Environment, which introduces students to the basics of OSH and climate change, and the impact of climate change on our society.

Executive Director — ***Long Island, NY***
Long Island Jobs with Justice — **September 2009 – December 2013**
Led organization's strategy and operations for nearly five years. Manage and supervise a team of professional staff, but also serve as a manager and mentor to workers and people new to the working world. Managed organization's fundraising with a particular focus in grant writing for foundations.

- Doubled the organization's nascent budget in four years' time as director, from just $50,000 to nearly $300,000.
- Won campaigns against fare hikes and against the cutting of Nassau County bus routes by founding the Long Island Bus Riders' Union.

Organizer — ***Long Island, NY***
Long Island Jobs with Justice — **April 2007 – September 2009**
Developed and implemented educational and programmatic materials for campaigns to support undocumented youth applying to college. Organized base in support of various policy campaigns including the DREAM Act.

- Secured support from key Congress members for the legislation, including Long Island Republican Congressman Peter King, a notoriously conservative member of the legislature.

Board of Directors Experience

New Immigrant Community Empowerment — ***Queens, New York***
Co-Chair — **January 2015 – Present**
Presided over the Board during the organization's growth from a small non-profit with a $300K budget in 2015 to a $2M budget for 2021

- Helped secure City Council Initiative for day laborers resulting in more than $1M of funding annually.

Volunteer Experience

Volunteer — ***New York, New York***
Community Farmworker Alliance — **January 2005 – April 2010**
Founded a New York City-based volunteer organization in solidarity with the Coalition of Immokalee Workers to support living wages for farmworkers in Southern Florida that spearheaded and organized a campaign to get the *Trader Joes* company to buy fair trade tomatoes, re-directing tens of millions of dollars in tomato purchases to just growers.

Additional Experience

- Experienced public speaker. Highlights include presentations at national and international conferences including Groundswell Fund, Jobs with Justice, the American Public Health Association, and the National Institute for Environmental Health Sciences.
- Live appearances with *MSNBC, WNYC (The Brian Lehrer Show), NY1, News12, ABC News, Fox News, Democracy Now, Noticias, FiOS,* etc.
- Former columnist with *Living Out* magazine, a Long Island LGBT publication.

Education

CUNY Graduate Center — ***New York, New York***
Master's in Liberal Studies
Thesis on "The Right to Run"—women's fight to combat sexism and run for public office.

Stony Brook University (SUNY) — ***Stony Brook, New York***

Major: Women and Gender Studies, Minor: Theology

Universidad Autónoma Metropolitana Xochimilco ***Chiapas, Mexico***
Mexican Social Movements and Spanish Language

Empire State College, New York

International Business, BS
UNAPEC, Dominican Republic

Professional Summary

Resourceful professional with over five years of experience in optimizing client experience and satisfaction. Dedicated to improving the access to quality health and social services for NYC communities and families in need. Strategic with exceptional leadership and problem-solving skills.

Work Experience

Finance and Operations Associate 03/23 - Present
NYCOSH, New York

- Supports with monthly Finance vouchers and invoices, finance narratives for government grants, and various other financial requests.
- Creates return on investment reports on earned income and other activities, as required.
- Works with external accountants to maintain accurate records and financials.
- Develops finance and finance-related grant reports and supports contract development.
- Supports maintenance of the NYCOSH database, track and process memberships and donations, sends corresponding invoices and/or materials as necessary.
- Creates and maintains file systems as required, and other duties as necessary.

Administrative Assistant 09/21 - 03/23
NYCOSH, New York

- Assists setting up and preparing materials for meetings and events, as assigned.
- Creates and maintains file systems.
- Supports staff by assisting with training materials, reports, and other tasks as need-ed.
- Keeps staff apprised of important events, news and messages.
- Supports maintenance of the NYCOSH database, tracks and process membership forms and donations.
- Sends and obtains corresponding invoices and materials.
- Performs other office duties as needed.

Health Homes Care Manager 10/20 - 09/21
Community Health Care Network, New York

- Screen for patient eligibility and regularly conduct assessments of patients' needs including medical, mental health, substance use, financial, housing and support needs.
- Provide crisis intervention and health education services as needed. Work with the medical staff to develop, implement, and coordinate the care plan for patients with chronic diseases.
- Coordinates patient services with internal and external service providers through care conferencing. Assist patients in applying for different city benefits.
- Serve as a liaison between enrolled patients/families and their respective medical providers and support services such as pharmacies, home attendant agencies, and insurance companies.
- Participate in patient's appointments with Primary Care Providers, and/or other specialties.

Patient Navigator - High Impact Prevention Program 11/19 - 10/20
Community Health Care Network, New York

- Worked with providers to identify PEP/PrEP patients, and assisted with intakes/pro-gram enrollment, service navigation, education and follow ups.
- Educated and helped patients accessing benefits and/or resources such as Food assistance, Medicaid/Insurance, medication assistance programs and shelter/hous-ing.
- Provided in-site and community education and awareness for HIV positive individuals, and PrEP/PEP for those at high risk of HIV infection.
- Identified patients diagnosed with HIV and ensured their access to medical care, partner, and prevention services.

Peer Educator - Retention & Adherence Program 05/19 - 11/19
Community Health Care Network, New York

- Provided individual support and education to patients to identify and develop pa-tient-centered treatment plan goals and monitored achievements of such.
- Provided referrals to necessary health and support services in the community.
- Worked collaboratively with Primary Care and Case Management staff to identify newly diagnosed/unsuppressed patients who could benefit from the program.
- Escorted patients to appointments with Primary Care Providers and other specialists as needed.

AMAZON LABOR UNION

AMAZON LABOR UNION

900 South Avenue, Suite 100
Staten Island New York, 10314

Amazon Labor Union
900 South Ave.
Suite 100
Staten Island, NY 10314

April 4th, 2023

To Whom It May Concern:

We are writing to provide a letter of commitment from the Amazon Labor Union (ALU) as a partner of the New York Committee for Occupational Safety and Health (NYCOSH) in their application for EPA funding through RFA #EPA-R-OEJECR-OCS-23-01. ALU is an independent labor union that fights for better working conditions for Amazon workers across the country. We currently represent workers at the JFK8 fulfillment center, which employs over 8,000 people.

NYCOSH is a non-profit, membership organization of workers, unions, community-based organizations, workers' rights activists, and health and safety professionals founded in 1979 on the principle that workplace injuries, illnesses and deaths are preventable. The environmental and public health issues of focus for this grant proposal are temperature stress and workplace resiliency; the communities served will be outdoor workers, including day laborers, agricultural workers, and truck drivers. **This funding will allow NYCOSH Safety & Health Specialists to provide trainings for workers across industries on temperature stress, the impact of climate change on worker industries, and developing resiliency; the program will focus on utilizing the hierarchy of hazard controls to protect workers on a job site.** The funding will also provide the necessary resources to refine and cater curricula on these topics to specific industries. As the primary contractor, NYCOSH will oversee the administrative and fiscal components of the grant, as well as partnership subcontracts.

ALU will partner with NYCOSH to reach workers who work outdoors, as well as indoors without air conditioning and/or heat. ALU signed on to NYCOSH's campaign around education related to temperature stress because of reports of temperature-related health issues from workers. The need to protect workers from extreme temperatures and develop climate resiliency is well established among worker-focused organizations in NYS; every year, New York city has high numbers of heat-related emergency department visits, hospital admissions, and deaths as found and declared by the NY state legislature. According to the New York City Office of the Mayor, each year there are an estimated 450 heat-related ED visits, 150 heat-related hospital admissions, 10 heat stroke deaths, and 350 heat-exacerbated deaths caused by heat-worsening existing chronic conditions.

ALU has a vested interest in educating workers on the hazards of temperature stress and climate change because their members are routinely exposed to extreme temperatures on the job. Under this grant, ALU will receive a sub-award via NYCOSH for $75,000 for the following activities:

1. Contribute to the project by conducting outreach to worker-members and recruiting workers to trainings.
2. Provide access to 830 workers during the contract years.

AMAZON
LABOR
UNION

AMAZON LABOR UNION

900 South Avenue, Suite 100
Staten Island New York, 10314

3. Amazon Labor Union will provide NYCOSH with a venue to conduct trainings, technical assistance in creating and disseminating trainings, promotion of trainings through direct worker outreach and social media, as well as access to printing fliers and materials for trainings. Assign approximately 25% of five staff organizers time to this project to conduct outreach. Organizing staff have the capability to conduct meaningful conversations and make asks of union members, utilize their time on the job to build relationships with members, and harness those relationships into conducting outreach for this program.
4. Amazon Labor Union highest priority is the health and safety of our members. We have a vested interest in ensuring the education of Amazon workers on safe temperature guidelines and how to protect themselves from irregular temperatures. We have had several instances of members fainting or needing to leave work due to unsafe temperature stress and lack of standards.
5. Amazon Labor Union will sustain our relationship with NYCOSH by having regular communication and bi-monthly meetings (once every other month) to make sure we are on target. ALU will use NYCOSH as a resource for future safety and health issues among members.

We thank you for your consideration.

Christian Smalls

NICE | NEW IMMIGRANT COMMUNITY EMPOWERMENT

Apr 10, 2023

To Whom It May Concern:

We are writing to provide a letter of commitment from New Immigrant Community Empowerment (NICE) as a partner of the New York Committee for Occupational Safety and Health (NYCOSH) in their application for EPA funding through The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

New Immigrant Community Empowerment (NICE) is a nonprofit organization that has 23+ years of experience improving the lives of immigrant workers in New York, with a focus on day laborers, domestic workers, construction workers, asylees, and long-time immigrant New Yorkers. We offer an extensive set of workforce development services, worker rights protection, and community organizing. Since its inception, NICE has worked with immigrant workers and families from Latin America, with 18,000+ members currently registered. We are located in the heart of immigrant-rich Jackson Heights. NICE works in New York City neighborhoods that have seen the highest amount of devastation due to the pandemic and economic landscape but have received the least amount of relief and access to workforce development services. The majority of the immigrant population we work with are essential workers, providing critical services on the frontlines and putting themselves at risk on a daily basis. Unsafe temperature exposure is something the vast majority of the immigrant workers we serve face. We see the effects of that in the higher incidence of temperature-related workplace issues and illness among immigrant workers.

NYCOSH is a non-profit, membership organization of workers, unions, community-based organizations, workers' rights activists, and health and safety professionals founded in 1979 on the principle that workplace injuries, illnesses and deaths are preventable. The environmental and public health issues of focus for this grant proposal are temperature stress and workplace resiliency; the communities served will be outdoor workers, including day laborers, agricultural workers, and truck drivers. This funding will allow NYCOSH Safety & Health Specialists to provide trainings for workers across industries on temperature stress, the impact of climate change on worker industries, and developing resiliency; the program will focus on utilizing the hierarchy of hazard controls to protect workers on a job site. The funding will also provide the necessary resources to refine and cater curricula on these topics to specific industries. As the primary contractor, NYCOSH will oversee the administrative and fiscal components of the grant, as well as partnership subcontracts.

Under this grant, NICE will receive a sub-award via NYCOSH for $75,000 to support the outreach and awareness of the project and draw immigrant workers who are exposed to hazardous temperatures and climate-related conditions.

71-29 Roosevelt Ave, 2nd Fl, Jackson Heights, NY, 11372 | www.nynice.org | Ex. 6 - Personal Privacy (PP)

NICE | NEW IMMIGRANT COMMUNITY EMPOWERMENT

NICE is prepared to support NYCOSH by conducting extensive outreach to immigrant workers, including domestic/cleaning/construction workers, to inform them of this project, the benefits of participating, and assisting them through the outreach process. Specifically, NICE will:

- Conduct outreach to at least 500 immigrant workers (flyers, calls, texts, and other channels)
- Distribute flyers and other materials with key information
- Support NYCOSH with the collection of information on exposure to temperature hazards
- Conduct in-person outreach at our Worker Centers, our places of congregation for immigrant workers; OSHA training and others
- Refer workers to NYCOSH virtual and in person 2-hour long training.

There is a significant need for training and education on temperature stress and the impact of climate change at the workplace among the community we serve. NICE is well-positioned to contribute positively to this project and serve hundreds of immigrant workers as they navigate hazardous work conditions.

If you have any questions or need additional information, please do not hesitate to contact me at nilbia@nynice.org.

Sincerely,

Nilbia Coyote
Executive Director
New Immigrant Community Empowerment

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: The Opportunity League

Address: 11 West Broad Street

City: BURLINGTON

State: NJ: New Jersey Zip Code: 08016

B. Unique Entity Identifier (UEI): LX56KJCDJM91

C. Applicant/Recipient Point of Contact

Name: Seigha I Omuso

Phone: Ex. 6 Personal Privacy (PP)

Email: somuso@theoleague.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☒ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☐ Yes	☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

N/a

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

N/a

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Seigha Omuso	Executive Director	04/07/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. We determined that you are a public charity under the Code section(s) listed in the heading of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Sincerely,

Tamera Ripperda

Summary

"It's the little details that are vital. Little things make big things happen." - John Wooden

After 5 years of award-winning corporate marketing at Canon Inc. I changed careers.

I became the Executive Director for The Opportunity League a 501c3 nonprofit organization focused on community development through sports and education. I was able to develop the organization to meet county and state programing standards expanding the organization from a dozen participants to serving 200 households annually.

Over the years, I have developed and implemented athletic, academic, leadership, college prep, and career pathway programming for 3rd to 12th, as well as, undergraduate and non-college bound learners. I have been recognized for our successful programming by the Burlington County Times as a "40 under 40" award recipient and received the "Legacy Award" from Southern Burlington County NAACP. I have also been named a Career Ambassador for non-college bound learners by the New Jersey School Boards Association.

Currently, I am a member of the Burlington County Partnership for Youth Success, Burlington County Youth Services Advisory Council, Burlington County Youth Investment Council (WFD), Burlington City Community Heart & Soul Partnership, and Burlington County Nonprofits Organization. These initiatives bridge gaps of communication in the community and develop employer/ employee relationships for youth and young adult career pathways.

Experience

Executive Director

The Opportunity League

Aug 2009 - Present (13 years 2 months +)

Resilience coach, motivational mentor, program developer, and community leader.

- Utilize an innovative approach to establish collaborative partnerships and expand funding
- Develop academic and athletic programs for youth and young adults that are designed to increase community involvement, awareness and personal growth
- Oversee 25-30 member team in executing organizational mission, vision & strategic plan

Selected Accomplishments:

- 100% acceptance rate to 2- & 4- year colleges for students in Next Steps College Prep Program
- Increase in STEAM program participants from 6 in 2017 to 42 students in 2019
- 100% placement rate for interns into major-related career 2011-2019
- Division 1 athletes: 6 / Division 2 athletes: 22 / Division 3 athletes: 17

Youth Council Member

Burlington County Workforce Investment Board

Nov 2012 - Present (9 years 11 months +)

The primary responsibility of the WIB is to serve as an alliance of the public and private sector for the purpose of coordinating planning, policy guidance and oversight of employment and training activities in Burlington County. In partnership with the Board of Chosen Freeholders, the overall goal is to develop and sustain a unified; labor market-driven system that can deliver needed services to job seekers and employers in an effective and cost efficient manner.

Head Basketball Coach

Rowan College at Burlington County

Aug 2016 - Jun 2021 (4 years 11 months)

- Managing a roster of 15 men and a coaching staff of 4 assistants.
- Responsible for the athletic and academic development and retention of student-athletes.
- Responsible for the administrative tasks of the team including but not limited to; scheduling, transportation, annual reporting, daily reporting, statistics and data analysis, recruitment, and community/ public representation.
- Public speaker and advocate

Selected Accomplishments:

- Conference runner ups in 2016-17 season. Conference final 4 in 2018-19.
- Student-athlete retention; 14 of 19 eligible graduates, 91% retention rate from fall to spring semester based on academic eligibility

Assistant Coach Varsity / Head Coach Junior Varsity

Doane Academy

Nov 2008 - Mar 2015 (6 years 5 months)

www.DoaneAcademy.org

Mens / Womens Basketball Coach

DeVry University

Jul 2010 - Jul 2012 (2 years 1 month)

Marketing Specialist

Canon Inc.

Jan 2007 - Mar 2012 (5 years 3 months)

- Responsible for new hire and termination maintenance in Sales, Service and Administration divisions
- Responsible for collecting company data for acquisitions and mergers to determine corporate strategy.
- Trained several individuals simultaneously at a national level for integrated systems conversions, policy and procedure
- Diverse knowledge of internal corporate sales, marketing, advertising, and events

Selected Accomplishments:

- Managed nationwide integrated systems group
- Promotional processing; saving the company an estimated $16 million annually

- Corporate Climate and Employee Morale Committee, Chairperson 2012

Advisory Board Member
YMCA of the USA (National Resource Office)
Dec 2009 - Dec 2010 (1 year 1 month)
The YMCA Advisory Board helps create and support the branch's strategic direction by providing local leadership. Staff and volunteers work together to impact the communities we serve.

Education

Cabrini University
B.S., Business Marketing
2002 - 2006

BARRY W. CONAWAY
Mayor

April 3, 2023

Seigha Omuso
Executive Director
The Opportunity League of Burlington City
11 West Broad Street
Burlington City, NJ 08016

Re: Letter of Commitment for the Greening Burlington City Initiative

Dear Mr. Omuso:

I am writing on behalf of the City of Burlington to express the City's commitment to the Greening Burlington City initiative, and specifically to the tasks set out in the application for the EPA Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for this initiative.

The Opportunity League (TOL) is a vital part of our City's efforts to serve the needs of our residents and improve the quality of life in all our diverse neighborhoods. The City views TOL as a partner and appreciates the value its programs bring to our youth and adults through job training, education support, access to healthy food, local business development and, now, flood control and stormwater management projects.

The City recognizes that our underserved neighborhoods need better green infrastructure to manage stormwater and beautify our streetscapes. Greening Burlington City will make our streets and homes cooler on hot days and improve the quality of water flowing through the City and into the Delaware River. Through the market gardens, this project will help overcome the lack of nearby sources for healthy produce, and will create a new source of needed income to resident urban farmers. By teaching skills and organizing volunteers, this project will help our residents bring their skills and energy to lifting up their neighborhoods.

Burlington City supports the proposed activities and commits to work with The Opportunity League and community members to identify potential and priority sites for these installations; and to use the City's communications avenues to tell City residents about the initiative and how they can get involved.

ED_016126_00001100-00001

We look forward to working with the Opportunity League and your partners on this project.

Sincerely,

Barry W. Conaway

Executive Director
The Opportunity League of Burlington City
11 West Broad Street
Burlington City, NJ 08016

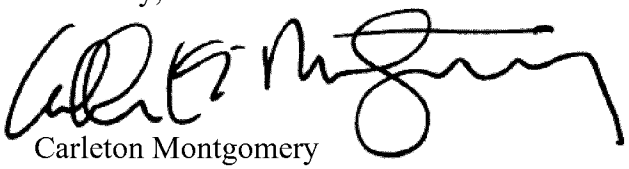
Re: Letter of Commitment for the Greening Burlington City Initiative

Dear Mr. Omuso:

I am writing on behalf of the Pinelands Preservation Alliance (PPA) and Rancocas Creek Farm (CRF) to express our commitment to supporting The Opportunity League (TOL) in carrying out the Green Burlington City project. PPA and RCF have reviewed and endorse the proposal TOL is submitting to EPA's Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for the Greening Burlington City initiative, and we commit to the activities set out in the proposal for PPA and RCF.

PPA is an environmental organization dedicated to preserving the natural and cultural resources of the Pinelands region for the benefit and enjoyment of all. We recognize we will only succeed if we build a growing constituency of people throughout our state and region who are connected through a range of nature-based activities at home and in public open spaces. We see partnering with TOL as a way to reach people with whom we have not yet connected, to support their efforts to improve the environments in which they live, and in turn to value the Pinelands as a precious natural resource within the wider landscape of our region.

PPA brings significant experience and expertise in managing and carrying out green infrastructure projects through the Landscape Makeover Program. Since PPA launched Landscape Makeover in 2017, the project is continuing to grow in scope and scale. So far, the program has resulted in the planting of 76 rain gardens in 16 towns, and 26 education programs in which 1,123 public employees and private residents have participated, both within and outside the boundaries of the Pinelands National Reserve. Landscape Makeover succeeds through a network of partnership, which PPA manages, with local governments, schools, nonprofits, and residents. PPA works with the Rutgers Cooperative Extension Water Resources Program for the design and installation of rain gardens.



PPA also brings experience and expertise in farming and produce marketing through Rancocas Creek Farm, which is wholly-owned and operated by PPA. RCF grows produce and pigs, manages habitats and stormwater controls, and practices regenerative methods on 72 acres of farmland at PPA's headquarters in Southampton, NJ. Since 2021, RCF has been working with

TOL to train interns in farming and support the creation of a market garden at the Villages Marketplace in Burlington City.

For Green Burlington City, PPA and RCF commit to participate in the community planning meetings that TOL will organize; oversee the design and installation of rain gardens, street tree plantings and market gardens, working with the Rutgers Water Resources Program and community residents; support TOL and the other partners in the identification, prioritization and selection of sites for installations; provide trainings in rain garden and tree planting, in conjunction with Rutgers, for TOL staff and volunteers; create evaluation forms for each type of installation for TOL approval and use; carry out quarterly evaluations after installations; support TOL in setting up the pricing, payment and logistics system for purchase and sale of produce from the market gardeners; and contribute to the comprehensive report at the end of the grant period.

Please let me know if you require any additional information.

Sincerely,

Carleton Montgomery

Re: Letter of Commitment for the Greening Burlington City Initiative

Dear Mr. Omuso:

I am writing on behalf of the City of Burlington Public Schools express the Schools' commitment to participating in the Greening Burlington City initiative, and specifically to the activities described below. The schools believe this project will provide our students great opportunities for learning, developing skills and competencies, and contributing to the community.

The Burlington City Schools encompasses pre-school through high school education for our City's residents. We have valuable partnerships with The Opportunity League for the supplemental learning and job training opportunities that the Opportunity League provides to our youth. We are eager to expand these partnerships to participate in Greening Burlington City.

The School District will communicate with parents and students about the project and the various activities it includes through our regular means of communication. We will look to The Opportunity League to provide content which we can provide to our families. In addition, the Schools will encourage our teachers and students to participate as volunteers in the planning and installation projects at the heart of this initiative.

We look forward to working with the Opportunity League and your partners on this project.

Sincerely,

John Russell, Ed.D.

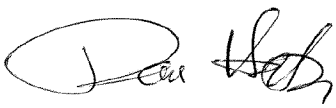
Re: Letter of Commitment for the Greening Burlington City Initiative



Dear Mr. Omuso:

I am writing on behalf of Hopeworks Camden to express our commitment to the Greening Burlington City initiative, and specifically to the tasks set out in the application for the EPA Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for this initiative.

Hopeworks is a 501(c)3 charitable organization that uses technology, healing, and entrepreneurship to transform lives. Hopeworks develops web sites and GIS products for clients, both for-profit businesses and nonprofits. Through these real-world projects, its trainees learn to produce social media and GIS products that meet the high standards demanded by major businesses. Hopeworks has expertise in producing web sites that integrate online, interactive mapping and accessibility tools of the kind this project requires. Its unique trauma-informed approach, combined with high-demand, high wage technical training and paid work experience helps build young people who can not only get jobs, but keep them.

For Greening Burlington City, Hopeworks will create an interactive online map to guide, record and help evaluate the installation of green infrastructure, and will train at least two city residents in GIS technology through this effort. Hopeworks staff and trainees will participate in community planning meetings for the project as needed to obtain information and ideas for the map tool design, train residents in how to use the tool, and obtain feedback for improvements and corrections from project partners and residents based on their experiences using the tool.
We look forward to working with the Opportunity League and your partners on this exciting project.

Sincerely,

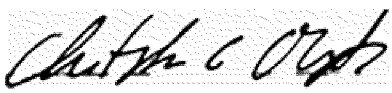
Re: Green Burlington City Initiative – Letter of Commitment

Dear Mr. Omuso:



The Rutgers Cooperative Extension (RCE) Water Resources Program is pleased to partner with The Opportunity League (TOL) and Pinelands Preservation Alliance (PPA) to carry out the Greening Burlington City Initiative. For the last several years, the RCE Water Resources Program has worked closely with PPA to design and install green stormwater infrastructure and implement a rain garden rebate program in Southern New Jersey through the Landscape Makeover initiative that PPA manages. We continue to work with PPA on these projects. We now wish to express our commitment to supporting the Greening Burlington City project set out in TOL's proposal to the EPA Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program and to the roles described for the RCE Water Resources Program.

It is an exciting time as communities are beginning to embrace green infrastructure, and programming has started to create an upwelling of behavior change. We are happy to see the people of Burlington City propose a program that will improve the quality of life for the city's residents, and especially for those living in its most underserved neighborhoods, through engaging the community, installing rain gardens and street trees, and creating urban market gardens.

For this project, the RCE Water Resources Program commits to deliver the rain garden designs, support PPA in providing training to TOL and its volunteers, and support PPA in overseeing the installation of the rain gardens. These are the tasks we have performed many times for PPA and the Landscape Makeover Program, and for numerous similar projects throughout New Jersey.

This proposal will empower communities to action. This project has great potential to promote behavior change among the residents and businesses. These projects will help continue to raise the visibility of green infrastructure in South Jersey along with the nonprofit groups that are promoting these types of stormwater management practices.

Sincerely,

Christopher C. Obropta, Ph.D., P.E.
Extension Specialist in Water Resources

Principal Contact: Seigha Omuso, Executive Director, somuso@theoleague.org

Brief Description of The Opportunity League (TOL): TOL was founded in 2009 to build community health for the residents of Burlington City and surrounding towns. Our initiatives arise from deep engagement with the community and build on the unique assets of our neighborhoods. TOL provides after-school programs, career training and placement, athletics, and, beginning this year, a community market and urban farm to bring fresh, locally-grown produce to our food-desert neighborhoods. TOL works across sectors of health, economic development, education and food systems. This initiative will add new avenues to empowering our community by greening neighborhoods that have long suffered from air and water pollution and developing economically viable market gardens for healthy food.

CBO Set Aside: TOL is not applying for the Small CBO Set Aside Track for $150,000 projects.

Project Abstract: TOL and its partners will install rain gardens, street trees and urban market gardens in Burlington City in order to improve air quality, control and cleanse stormwater, strengthen hyper-local food sovereignty, raise community understanding of the natural systems affecting their lives, provide skills training for residents of the city, and empower residents to improve their neighborhoods.

Collaboration across sectors and the urban/rural divide is essential to this project. TOL will lead the project and organize the community decision making process to prioritize installation sites and recruit participants. Pinelands Preservation Alliance (PPA) and the Rutgers Water Resources Program will oversee the installation of rain gardens and tree plantings according to the community decisions; train residents in the selection, installation and maintenance of rain gardens; and partner with TOL to provide environmental education programs based on these installations. Rancocas Creek Farm will help TOL establish successful, economically viable market gardens. Burlington City will assist in identifying locations, obtaining permissions and constructing rain gardens and tree plantings, and in obtaining access to city-controlled parcels for market gardens. Main Street Burlington and the City schools will help spread the word and recruit resident engagement. Burlington City Garden Club will bring the gardening experience of generations to bear in assisting in the installation and ongoing maintenance of the rain gardens and street tree plantings. Hopeworks will create and train residents in Geographic Information Systems (GIS) tools to advance, record and evaluate the project.

We believe this project will require that we develop a QAPP.

b. Environmental and Public Health information of Burlington City

Burlington City has major health and environmental vulnerabilities, exacerbated by climate change, that this project will address.

According to the EPA EJScreen, Burlington City residents face exceptional environmental risks. For example, the City's block group with the highest minority status shows as being in the 89th percentile people of color and 98th for low-income, while also ranking in the 95th percentile or higher in all EJ Indices except wastewater discharge. Six of the City's block groups show EJ Indices for most risks that are in the 60th percentile and above.

Similarly, the Centers for Disease Control's Social Vulnerability Index identifies two of the four Census tracts in Burlington City, representing more than half the population, as highly vulnerable to natural and other emergencies. Looking specifically at the Summary theme, one tract ranks at 0.9508 (meaning it is more vulnerable than 95% of Census tracts in America) and one at 0.6427.

FEMA's Risk Mapping and Planning Map shows large portions of the City as high and very high flood risk areas, including much of the City's most low-income neighborhoods. The National Flood Hazard Layers (NFHL) show that 72% of the City is in the AE zone subject to inundation by the 1-percent-annual-chance flood event and 15% in the X (shaded) zone. (Excluding the largely unpopulated island within the City boundary, the numbers are 71% and 14%, respectively.) Consistent with these designations, Burlington County's Hazard Mitigation Plan notes that "[r]iverine and tidal flooding impact the City of Burlington and has caused heavy flooding damage in the area of U.S. Route 130, combined with the effects from the Delaware River."

The New Jersey Department of Environmental Protection (DEP) identifies Burlington City as an environmentally "overburdened community" under the state's Environmental Justice Law, N.J.S.A. 13:1D-157, due to a similar mix of demographic and environmental factors as drive the EPA mapping. The New Jersey Economic Development Authority identifies Burlington City as a "food desert" due to the lack of local grocery stores and food sources.

Burlington City also has exceptionally low tree canopy. While iTree.org's landscape tool reports Burlington City as a whole has a 17% canopy cover, the vast majority of this cover is on the uninhabited Burlington Island in the Delaware River, not where people actually live. Counting only the block groups without the island, the canopy cover falls to 6.8% of the inhabited areas.

The most vulnerable neighborhoods identified through these mapping criteria are also predominantly Black and Hispanic. These data show that Burlington City residents, and especially those in certain neighborhoods with lower income and higher Black and Hispanic populations, are disproportionately vulnerable to flooding, air pollution, heat, and poor access to healthy food. The consequences of these conditions can be seen in the ongoing housing segregation, low-income and educational achievement, and relatively poor housing stock affecting those neighborhoods. While we lack local-scale comparative health outcomes data, the various mapping programs cited above are all premised on research showing that the demographic and environmental factors they use for their rankings have demonstrable, negative effects on residents' health and life prospects. The CDC's Local Data for Better Health modeling provides a consistent picture for Burlington City.

This project aims to engage the entire City in beginning to address the pollution, flood risk, food access and poor prospects that so many residents face through greening the City's most afflicted neighborhoods. These greening projects will also train residents in marketable skills and educate the community about environmental and food systems that affect their quality of life. Increasing green infrastructure in our intensively-developed City will mitigate climate change impacts such as flooding and heat exposure. Local market gardens will bring the added benefits of locally grown food for sale through local markets, generating further job skills and paid employment. The results will be a healthier physical environment, better nutrition for families, and new avenues for growing employment and prosperity in the City. By involving residents in the planning and execution of this project, the initiative will increase inclusion and empowerment among residents who have felt excluded from the decisions that shape their neighborhoods.

c. Organization's Historical Connection to Underserved Community:

Deep involvement with its underserved community has been the core of The Opportunity League's identity, mission and program since TOL was founded in 2009 in response to the limited number of opportunities for youth in Burlington City in education, sports, and employment. These needs were substantiated in 2015 with the development of the Childhood Opportunity Index by Diversity Data Kids. Compared to averages in the state, the indicator of childhood opportunities in education received values of low, and received very low indices in social, economic, health, and environment opportunities for most of the City's neighborhoods. In response, TOL committed to work with our residents to create opportunities that close the equity gap for traditionally underrepresented and overlooked residents. TOL provides training programs and mentoring for traditionally underserved populations, programs that remove barriers to employment and engagement in civic life, and supportive services for communities such as STEM educational enrichment and entrepreneurship for youth (including those with disabilities), college readiness, ESL, senior citizen job training, workforce development/ certifications, cross-cultural/international athletic programs. Our community participates in making decisions and gives feedback on programs and services to ensure their needs are met, and we draw upon the active support of our town's business community, city government and sister civic organizations.

As we strived to prioritize the needs of our neighbors, we heard that one of the greatest needs for Burlington City, a designated food desert, is a sustainable solution to food security. Residents were invited to the table and empowered as decision-makers in devising, planning, developing, and now implementing the initiative we call the Villages Community Marketplace (VCM) as part of a cross-sector collaboration of the Burlington City Food Access Network (BC-FAN) in 2021. VCM will open this year as a bricks and mortar store providing fresh produce, prepared foods, job training, a community center for young and old, an on-site market garden, and a center of collaboration with partners like Rancocas Creek Farm and the Pinelands Preservation Alliance to promote food sovereignty through sustainable, regenerative local food systems.

The Opportunity League currently leads the BC-FAN as we tackle food security issues in the city. BC-FAN includes residents, the police department, the County Health Department, churches,

the school district, the municipality, New Jersey universities, industry experts, and small and large businesses and non-profit organizations. Members of the community have utilized their time, talents, and expertise to coordinate special events, add to indoor/outdoor renovations, teach youth in the culinary arts and community gardening, support social media campaigns, and participate in food drives, food deliveries and hot meal distribution for immediate food access needs.

Since October 2021, residents and cross-sector partners have met weekly to work together on the Villages Community Marketplace project. Meetings feature interactive activities that build connection, rapport, and unity among members. Decisions are made as a group, engaging residents as co-creators and decision-makers in the process. As the lead organization, TOL serves as facilitator, database/resource manager, and organizer of activities and meetings. Tasks are implemented by community participants and reported weekly using various project management tools. Their active engagement ensures accountability, and that participants can see the progress we are making together. Residents show up as decision-makers and leaders in the facility design and the services VCM will offer, our farm-to-table training programs, local product merchant and entrepreneurship initiatives, the local farmers market, community gardening, food justice and policy reform strategizing, and creating jobs and new products within the marketplace. We have made tremendous progress in developing the project because the VCM model empowers community members to play an active role in decision-making, multiplies the capacity of TOL staff, and creates solutions tailored to our hyperlocal communities.

TOL sees the Greening Burlington City initiative as a logical and necessary extension of our existing programs. We can now build on years of collaborative work in our own community and beyond to ensure this program is both resident-driven and successful in achieving the outcomes we propose.

d. EJCPS Model: The EJCPS Logic Model for this project is attached as a separate document.

e. Project Linkages:

The most vulnerable neighborhoods of Burlington City are predominantly Black and Hispanic. These neighborhoods suffer inequities because they are overburdened by the environmental impacts summarized above. The core approach of greening the city through rain gardens, street tree plantings and urban farms speaks to mitigating the impacts of climate change on this vulnerable community, because these measures reduce the risks to residents from flooding, contaminated stormwater, and high heat events. While being a food desert may not be considered an "environmental justice" issue, it arises from the same factors of racial segregation, bias and income disparities that drive core environmental justice issues of air and water pollution. This project will advance environmental justice by improving environmental conditions in these neighborhoods through collective action, increase residents' access to locally grown fresh produce, and train residents in marketable skills that include farming, landscaping with native plants, and Geographic Information Systems (GIS) technology. Each of these activities will take place through community organizing and inclusive planning that will help to empower neighborhoods to improve their quality of life.

The initiative will build the community's capacity in several ways. It will foster and deepen collaborations among residents and between Burlington City and organizations outside the city. It will enlarge the network of individuals with skills in growing plants and raising food. It will build wealth by creating new employment opportunities and enabling residents to sell the food they grow in new market gardens. And it will improve the built environment that does so much to influence the quality of life and the City's business vitality.

f. Partnerships and Collaboration:

The Pinelands Preservation Alliance (PPA) is a 501(c)3 charity and a leading regional environmental organization based in Southampton, NJ. PPA launched and manages the Landscape Makeover Program, a multiyear project that marshals the assets of public agencies, the Rutgers University Water Resources Program, environmental nonprofits and volunteers to install rain gardens on public properties, help residents create rain gardens for their homes, and restore water bodies harmed by stormwater runoff across South Jersey. PPA will bring its extensive experience managing green infrastructure projects to participate in community planning and oversee the installation of rain gardens and tree plantings. PPA will train residents in the selection, installation and maintenance of rain gardens and partner with TOL to provide environmental education programs based on these installations. PPA sees its growing partnership with TOL as advancing its mission by promoting environmental understanding, connecting new constituencies with the resources of the Pinelands and broader region, and expanding sustainable farming. PPA will be a subawardee and enter a formal agreement with TOL.

Rancocas Creek Farm (RCF), a regenerative farm at PPA's headquarters, will bring its expertise in growing and selling food and training farmers to help TOL establish market gardens in the city and ensure their economic viability. RCF is an initiative of PPA. RCF is already committed to supplying TOL's Villages Community Marketplace by providing RCF produce to supplement food grown in the urban farms, in order to ensure there is sufficient variety and volume for the smaller urban farms to successfully market their produce locally. RCF's effort will be funded through the subaward to PPA.

Rutgers University Cooperative Extension's Water Resources Program designs and supports the installation of green stormwater infrastructure, particularly rain gardens, throughout the state of New Jersey through partnerships with nonprofits and public institutions. The Water Resources Program is a core partner for PPA in the Landscape Makeover Program and is a subawardee of grants that fund that program. The Program will support TOL and PPA in evaluating and prioritizing sites, will design the rain gardens, will oversee installation of the rain gardens and street trees, and will participate in the community education events. Rutgers will be a subawardee in Greening Burlington City and will enter a formal agreement with TOL.

Burlington City brings its knowledge of the city, its control of various parcels and facilities, and its municipal works assets to the project. The City will participate in the community planning process, and it will assist in identifying locations, in obtaining permissions and constructing rain gardens and tree plantings, and in obtaining access to city-controlled parcels for market gardens. Burlington City will contribute its effort.

Main Street Burlington is a 501 (c)(3) non-profit corporation whose goal is to generate economic activity and encourage investment in the City through a variety of events and services for current and potential businesses, as well as residents and visitors. Main Street sees this project as aligned with the fundamental approach of the Main Street America movement, which is built on a 4-point model for transformation focused on economic vitality, downtown aesthetics, downtown promotion, and a vibrant organization of volunteers networked into the community and its organizations. They see that this project promotes community leadership through neighborhood meetings, environmental preservation and beautification, and economic development. Main Street will draw on its relationships with local businesses and civic organizations to promote the initiative to residents and businesses through its active social media channels and events, as well as seeking ways to integrate the program into its Farmer's Market initiative, and participating in community planning meetings that TOL will organize. Main Street will contribute its efforts.

The Burlington City school system is responsible for pre-K through high school education for our residents. The schools will support this project by using their establishing methods to communicate with their families about the initiative and how families can get involved, and by encouraging teachers to participate in class activities, such as helping with plantings, based on information TOL provides. The school system will contribute its effort.

Burlington City Garden Club is a local volunteer group that will bring the gardening experience of generations to bear in assisting in the installation and ongoing maintenance of the rain gardens and street tree plantings. Led by and made up of residents, the Garden Club is focused on and committed to Burlington City. The Garden Club will contribute its effort.

Hopeworks is a 501(c)3 charitable organization that uses technology, healing, and entrepreneurship to transform lives. Hopeworks develops web sites and GIS products for clients, both for-profit businesses and nonprofits. Through these real-world projects, its trainees learn to produce social media and GIS products that meet the high standards demanded by major businesses. Hopeworks has expertise in producing web sites that integrate online, interactive mapping and accessibility tools of the kind this project requires. Its unique trauma-informed approach, combined with high-demand, high wage technical training and paid work experience helps build young people who can not only get jobs, but keep them. Hopeworks will create an interactive online map to guide, record and help evaluate the installation of green infrastructure, and will train at least two city residents in GIS technology through this effort. Hopeworks will be a subawardee and enter a formal agreement with TOL.

2. Project Activities and Milestone Schedule:

This project includes the following activities:

(a) Launch and sustain a community-based planning process.

i. TOL will advertise and convene a regular monthly meeting or forum for residents and partners to launch, plan and oversee the initiative.

ii. TOL will advertise and explain the project through at least monthly posts via Facebook, Instagram and email, and will distribute at least two flyers during the

grant period to all City residences, describing the project and opportunities to get involved.

iii. TOL will keep track of interested parties, create the agenda for each meeting, and communicate with participants through an email list and social media throughout the planning process.

(b) Use community knowledge and GIS tools to identify and map potential sites for rain gardens, market gardens and tree planting.

i. Hopeworks will create an interactive online map to collect and display candidate sites and relevant information about each in context with other geographic, demographic and analytical features of the City.

ii. The identification and characterization of candidate sites will take place in the community-based planning meetings and will be managed by TOL with support from the partners.

(c) Prioritize the potential sites for rain gardens, market gardens and tree plantings based on factors agreed in the planning process.

i. Prioritization will take place through the community planning meetings to ensure resident engagement and incorporation of local knowledge.

ii. Factors will include the size of available space, the location's likely impact, and the landowner in each case. Residents may propose additional factors.

iii. TOL will manage this process and keep the official priority lists.

(d) Hold at least 8 community education and training programs reaching at least 80 residents about rain gardens and tree plantings.

i. TOL will schedule and advertise the programs to residents through at least 2 flyers and monthly social media posts, and word of mouth, with the aim of reaching all City residents with the information.

ii. PPA and Rutgers Water Resources Program will design and deliver the programs in consultation with the Garden Club, whose members will participate in the programs as teachers and ambassadors.

iii. TOL will track participation and lessons learned in the training sessions.

(e) Rain Gardens:

i. Create installation, training and maintenance plans for at least 8 rain gardens. PPA will develop these plans for review, revision and approval through the planning process. Each plan will address methods of installation, plant materials, irrigation, installation and training staff, and ongoing maintenance needs. As gardens are planted, the relevant plan will be tailored to each site.

ii. Design rain gardens for priority sites. PPA will develop the designs in collaboration with the Rutgers Cooperative Extension, using the same process that has worked successfully in the Landscape Makeover initiative. The design

will include species selection, any additional materials required, planting patterns, and methods of installation tailored to each site.

iii. Install at least 8 rain gardens of approximately 800 square feet. PPA will manage the installations, acquire plants and organize equipment and tools. TOL will organize volunteers from the community, the Garden Club members will participate in the plantings, and Burlington City will contribute assistance by the city's works department.

iv. Use the design and installation process to train residents in the skills of evaluating a site, selecting appropriate plants, planting the garden, and maintaining the garden over time. TOL, PPA and Garden Club members will provide the instruction as we install the rain gardens. In addition to the installation days, TOL will schedule at least quarterly meetings at each site to review their progress and provide instruction in maintenance.

(f) Street Trees:

i. Create installation, training and maintenance plans for the tree plantings. PPA will develop these plans for review, revision and approval through the planning process. Each plan will address methods of installation, tree species, irrigation, installation and training staff, and ongoing maintenance needs.

i. TOL will obtain required permissions from the City for the selected locations.

ii. TOL will organize volunteers from the community, the Garden Club members will participate in the plantings, and Burlington City will contribute assistance by the city's works department.

iii. PPA will oversee the installation of at least 100 street trees.

iv. Use the design and installation process to train residents in the skills of evaluating a site, preparing the site, selecting appropriate tree species and sizes, planting the trees, and maintaining the trees over time. TOL, PPA and Garden Club members will provide the instruction as we install the trees. In addition to the installation days, TOL will schedule at least quarterly meetings at each site to review the trees' health and provide instruction in maintenance.

(g) Market Gardens:

i. Create installation, training and maintenance plans for the market gardens. PPA will develop these plans for review, revision and approval through the planning process. Each plan will address methods of installation, plant materials, irrigation, installation and training staff, and ongoing maintenance needs. As the market gardens are launched, the relevant plan will be tailored to each site.

i. TOL will obtain long-term agreements for use of the land, or acquire the land in fee, for at least two new market gardens.

ii. TOL will recruit residents to manage each market garden on a day-to-day basis, with the intention that the farmers will sell produce they raise to the Village

Marketplace, a stand at Burlington City's weekly farmers market, or potentially other wholesale purchasers located in and around Burlington City. TOL, PPA and Rancocas Creek Farm will work with resident farmers to create agreements between growers and TOL setting out the terms for residents to participate as farmers.

iii. Through consultation with the residents taking responsibility for each garden, Rancocas Creek Farm and TOL's farm staff will design the beds and create planting, maintenance and harvest schedules for each, ensuring each element is responsive to the residents' goals and capacities.

iv. Create the market gardens. TOL will schedule and oversee the installations and plantings to create the market gardens with participation of the resident growers, Rancocas Creek Farm and the Garden Club.

v. TOL and Rancocas Creek Farm will acquire essential equipment for the market gardens, such as hand tools and access to water for irrigation and washing produce. The tools and equipment will be owned by TOL.

vi. Establish pricing and sales procedures for sale of produce, payment of expenses, and returns to farmers. The principal purchasers will be TOL's Village Marketplace and Burlington City's weekly farmers market. PPA and Rancocas Creek Farm will bring their produce sales experience to help TOL manage these procedures.

vii. TOL will continue to have overall responsibility for managing the market gardens to ensure they remain in production for the benefit of the community.

(h) Communications

i. TOL will produce initial advertising of the program to the community via social media, email and a print flyer sent to all City residences.

ii. TOL will produce monthly communications via social media, email and at least one additional flyer.

iii. TOL will provide a report to the community at the close of grant period via its web site, social media and email posts, and the planning committee.

(i) Evaluate and Report on the Project

i. Maintain an online map of all project installations and provide at least quarterly updates for each site within the map. Hopeworks will maintain the online map and ensure data is entered correctly. TOL will ensure the site information is updated quarterly. PPA, Rancocas Creek Farm and the Garden Club will participate in the quarterly visits and reporting.

ii. Produce a final report on the initiative. TOL will draft and curate the report. The community participants and the partner organizations will review drafts and publicize the final report through their various neighborhood and social media avenues.

The Milestone Schedule:

		Start	Complete	Mos.
a.	Launch and sustain a community-based forum to serve as the planning process.	10/2/2023	Ongoing	36
b.	Identify and map potential sites for rain gardens, market gardens and tree planting	2/1/2024	8/31/2024	7
c.	Create the online map tool	1/2/2024	5/31/2024	5
d.	Prioritize the potential sites	9/3/2024	11/29/2024	2
e.	**Rain Gardens**			
i.	Create installation, training and maintenance plans	12/2/2024	6/28/2024	7
ii.	Design rain gardens for priority sites.	12/2/2024	6/28/2024	7
iii.	Install the rain gardens	7/1/2024	11/29/2024	4
iii.	Train residents	5/1/2024	11/29/2024	7
f.	**Street Trees**			
i.	Create installation, trainings and maintenance plan	12/2/2024	4/30/2024	5
ii.	Obtain required permissions	9/3/2024	3/31/2025	4
iii.	Organize volunteers	9/3/2024	3/31/2025	6
iv.	Install the trees	4/1/2025	11/28/2025	7
v.	Train residents	4/1/2025	11/28/2025	7
g.	**Market Gardens**			
i.	Create installation, training and maintenance plans	12/2/2024	6/30/2024	7
ii.	Obtain long-term agreements for use of the land	12/2/2024	10/31/2024	10

iii.	Recruit and train residents to manage each market garden	12/2/2024	10/31/2024	11
iv.	Design the beds and create planting, maintenance and harvest schedules	11/4/2024	3/31/2025	4
v.	Create the market gardens	4/1/2025	11/30/2025	7
vi.	Acquire essential equipment	1/2/2025	3/31/2025	3
vii.	Ongoing oversight of the market gardens	12/1/2025	ongoing	13
h.	**Communications**			
i.	Initial advertising of the program to the community via social media, email and print flyer	10/2/2023	5/1/2024	7
ii.	Monthly communications via social media, email and at least one additional flyer	1/2/2024	8/28/2026	32
iii.	Report to the community at close of grant period	9/2/2026	9/30/2026	1
i.	**Evaluate and Report**			
i.	Create, review and finalize evaluation forms	2/2/2024	1/25/2025	12
ii.	Quarterly on-site evaluations of each site	1/2/2025	ongoing	21
iii.	Final report on the initiative	9/2/2026	9/30/2026	1

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

a. *Environmental Results (Logic Model):* Please see the attached logic model.

b. Performance Measurement Plan:

TOL will track performance against the detailed project schedule and provide written monthly reports to the project partners and community planning forum. The performance reports will address qualitative progress (such as the ideas and points of consensus arising from the planning forum) and numerical measures (such number of volunteers participating in each activity and rain garden installations, sizes and costs).

Once quarterly on-site evaluations of installed sites and trees begin, these evaluations will use forms for the rain gardens, market gardens, and street trees to be provided by PPA and Rutgers Extension based on their extensive experience in green infrastructure projects and input from the planning forum participants. The forms will evaluate the health of the installations and the

systems in place for care and maintenance. The evaluation form for the market gardens will also include the economic elements of sales of produce, costs of ongoing inputs, and returns to the farmers.

The monthly status reports and quarterly site evaluations will provide the data for a final report describing the project's processes, actions, community engagement, education activities, partner roles, performance of the installations through the end of the grant period, and capacity and prospects for sustaining the installations.

c. Sustainability Plan and Community Vision:

A core objective of the project is to create expertise among people who live in the community and work for Burlington City government and nonprofits on planting and maintaining rain gardens and street trees, and on urban farming, for both maintenance of this first round of installations and new future installations. The rain gardens and street trees represent different required skills and levels of commitment on the part of staff and community members as compared to the market gardens, so they also require TOL to establish different structures for sustaining each part of the endeavor. Through this project, TOL will create the staff capacity to manage both elements of the ongoing work as well as the relationships with organizations like PPA, Rancocas Creek Farm and Rutgers Extension.

TOL's new staff capacity will enable it and the City to identify, design, fund, install and maintain additional rain gardens and street trees over time. Through TOL's ongoing community organizing and education work, it will be able to recruit new residents to participate in the activities that best meet their interests, talents and availability.

Making market gardens successful is clearly a greater challenge. They require continuing inputs of plants and supplies, greater growing and business skills, effective marketing, pricing and payment systems, and fairly intensive labor during the growing season. Through the Villages Community Marketplace and similar projects, such as the Roots To Prevention program in the nearby City of Camden, TOL, PPA and RCF staff will bring extensive experience in training individuals in the key skills, managing the pricing and other logistics around marketing small-scale production, and overseeing the work of resident farmers to ensure the farms are productive, economically viable, and meet all relevant regulatory standards.

4.0 Programmatic Capability:

While developing green stormwater infrastructure is a new project for The Opportunity League, TOL has extensive experience in community organizing and partnerships to carry out innovative programs, and has recruited partners for this project which bring vast experience in this work. TOL has consistently been awarded the NJ Office of Faith-Based Initiatives College Readiness Grant since 2019 because of our success year to year meeting target program goals and assisting students and families successfully transition from high school to college. To date, we have a 100% college acceptance rate, our partnerships have doubled every grant year, 97% of graduating students remain in college, and we have raised over $500,000 in college scholarships.

ED_016126_00001108-00012

In 2021, TOL was awarded an Asset Based Community Development Grant by Data Across Health Sectors (DASH) for the Villages Community Marketplace project. TOL received this grant based on its ability to engage community members and leverage the strengths of the community, including individual, institutional, business, cultural, and physical assets, to create change. Highlights demonstrating TOL's effective management of this grant include: TOL won additional funding beyond the grant period for our community garden building as a way to continue engaging community members in the project. TOL established weekly, consistent meetings with 18-25 residents that enabled us to derive granular data points on resident engagement in areas such as variance in attendance, project management strategies, and best modes of communication to move project goals forward and connect meaningfully. We have established and maintained relationships with organizations across the country to share resources, challenges, and successes around utilizing data to drive decision-making around equity and accountability. TOL collaborated with residents to develop surveys, and empowered residents to administer surveys, to collect data in a manner that builds trust and values resident input on the development of the Villages project. And TOL is developing a Villages app that supports health equity strategies and aids us in understanding the needs of our community, and how resources are best allocated around food access. The input we receive is allowing us to better understand the spending habits among low-to-moderate-income and minority individuals, and the barriers they face in making healthy food choices in the prevention of chronic disease.

Pinelands Preservation Alliance (PPA), Rancocas Creek Farm (RCF), and Rutgers Cooperative Extension Water Resources Program are the lead partners with technical expertise in the green infrastructure and farming elements of this project.

PPA has significant experience and expertise in managing and carrying out green infrastructure projects through the Landscape Makeover Program. Since PPA launched Landscape Makeover in 2017, the project is continuing to grow in scope and scale. So far, the program has resulted in the planting of 76 rain gardens in 16 towns, and 26 education programs in which 1,123 public employees and private residents have participated, both within and outside the boundaries of the Pinelands National Reserve. Landscape Makeover succeeds through a network of partnership, which PPA manages, with local governments, schools, nonprofits, and residents. PPA works with the Rutgers Cooperative Extension Water Resources Program for the design and installation of these rain gardens.

Rutgers' Water Resources Program works across the state of New Jersey designing and overseeing or providing support for the installation of green stormwater infrastructure, including but not limited to rain gardens. The Water Resources Program was launched in 2002 and has developed into an award-winning state-wide program dedicated to solving New Jersey's water resources issues. Through competitive grants secured from local, state, and national entities, the program now supports several full-time staff, part-time community outreach specialists, and undergraduate students. The diversity of backgrounds of this staff reflects the variety of needs to be addressed and the holistic approach needed to solve New Jersey's water resources issues. With engineers, scientists, educators, landscape architects, and other design professionals, the team routinely approaches each project and program from a multidisciplinary point of view. The mission of the Water Resources Program is to identify and

address water resources issues by engaging and empowering communities to employ practical science-based solutions to help create a more equitable and sustainable New Jersey. This is accomplished through research, project development, assessment and extension, and through the collaborative efforts of our many regional, national, and international partners. The Program engages with local residents and partners, and it works on the philosophy expressed in ancient proverb that if you give a man a fish, you feed him for a day, but teach him how to fish and you feed him for his lifetime. We are now in the business of teaching people to fish.

PPA also brings experience and expertise in farming and produce marketing through RCF, which is wholly-owned and operated by PPA. RCF grows produce and pigs, manages habitats and stormwater controls, and practices regenerative methods on 72 acres of farmland at PPA's headquarters in Southampton, NJ. Since 2021, RCF has been working with TOL to train interns in farming and support the creation of the market garden currently in development to begin production in the summer of 2023 at the Villages Marketplace. RCF and the Villages Marketplace are teaming to sell produce we are growing at the weekly Burlington City farmers market. PPA and RCF are also teaming with Roots to Prevention in growing market relationships that will sustain urban market gardens in the City of Camden.

5.0 Past Performance

Grants Received	Amount
Data Across Sectors for Health Grant	$27,000
New Jersey Health Initiatives Grant	$50,000
NJ Office of Faith-Based Initiative Grants for Community Supported Agriculture/ Community Garden	$30,000
Healthy Places by Design Grant	$17,000
NJ Office of Faith-Based Initiatives College Readiness Grant	$65,000
Amazon Donation	$75,000
NJ Senator Troy Singleton's Office Donation	$5,000
National Youth Leadership Council Grant for Farm to Table Youth Internship	$1,000
T- Mobile National Hometown Grant	$50,000
NJ Office of Faith-Based Initiatives Social Enterprise Grant	$15,000

TOTAL	**$335, 000**

The following examples demonstrate TOL's effective management of grants.

Collaborative planning and tracking progress: TOL's effort for the New Jersey Health Initiatives/Robert Wood Johnson Foundation grant for addressing food insecurity in Burlington City included establishing and updating a detailed plan and timeline with goals, objectives, timelines, and budget allocations through an inclusive process with all stakeholders, including the grant maker.

Implementing a complex project: The Villages Community Marketplace (VCM) Project has received support from a number of funders. This project is an innovative and sustainable approach to address negative health outcomes around poverty, food access, crime, unemployment, limited community engagement, low educational attainment and chronic disease in Burlington City. Over the course of three years, we have overcome many challenges and progressed through the projected timeline towards the opening the Marketplace in the summer of 2023.

Assigning clear responsibilities to individuals or teams to ensure that everyone is aware of their duties and will help to prevent any confusion or duplication of effort: The VCM project has included numerous moving parts – constituency building and recruitment of partners, land acquisition, building renovations, store layout and inventory planning, setting up and staffing a commercial kitchen, designing the onsite market garden, and creating a responsible, credible financial plan that will serve the community's needs at prices residents can afford. These tasks each required engaging experts in their fields and ensuring all the moving parts fit together seamlessly. We required partners from the private sector (such as Amazon, which has contributed funding and volunteer work), the public sector (such as the Burlington County Health Department, which as contributed code enforcement, health resources and data support), and other nonprofits (such as Pinelands Preservation Alliance and Rancocas Creek Farm, which are contributing farming expertise and training opportunities).

Utilizing measures to demonstrate accountability, assess impact, identify best practices, improve project design, and ensure sustainability: TOL collaborates with residents to develop and deliver the surveys mentioned above. These surveys enable us to design our programs to meet the real, rather than just assumed, needs of residents, while empowering them through their ability to drive the projects and building trust. In the case of the VCM, the surveys are enabling us to design the most desired community education topics, set hours of operation, select the products that community members most want, develop events that will attract residents, and identify the barriers to healthier nutrition for families in our community.

Monitoring progress and reported regularly to stakeholders to ensure that the project stayed on track and met the grant's objectives: Documenting plans, tasks and accomplishments using

project management software has been essential to TOL for effective grant management of such a complex project as VCM. We document project plans, quarterly progress reports, and budget/expense information for each aspect of the project, and we use this information to report to each funder according to their requirements.

Communicating with grant makers: All grant makers expect to be informed about the projects they fund, and each has different reporting expectations. TOL has maintained good relationships with each of our funders by meeting those expectations as part of our practice of communicating with all stakeholders, including the grant making organization, partners, and the community. Our ability to document progress has enabled TOL to prove the value of this project and raise over $200,000 so far to support the Villages Community Marketplace, from an initial seed grant of $50,000 in 2021.

6.0 Quality Assurance Project Plan (QAPP) Information:

We believe we will need to create a QAPP.

Min, Qilong v. State University of New York, University at Albany; Equal Employment Opportunity Commission Case No. 525-2021-01639 – Pending.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. **If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).**

☐ Yes ☐ No

b. **If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.**

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes ☐ No
a.	**Do the methods of notice accommodate those with impaired vision or hearing?**	☒ Yes ☐ No
b.	**Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?**	☒ Yes ☐ No
c.	**Does the notice identify a designated civil rights coordinator?**	☒ Yes ☐ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes ☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Samuel Caldwell, MBA, Chief Diversity Officer and Assistant Vice President for Diversity and Inclusion; University Hall 207, 1400 Washington Avenue, Albany, NY 12222-0100, Ex. 6 - Personal Privacy (PP) Ex. 6 - Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Christine McCrary	Director, Pre-Award Services	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

1. Program objectives

1a. Project Summary Page

- Project Title: **Monitoring and reduction of indoor air toxics, bioaerosols and emerging contaminants in urban and rural underserved neighborhoods in New York State**
- Project Locations: **Capital District**: South End, Albany, NY 12202; Schenectady, NY 12303, Cohoes, NY 12047, Hoosick Falls, NY, 12090; Petersburgh, NY, 12138; **North Country**: Fort Drum, NY, 13602; St. Regis Mohawk Reservation, Akwesasne, NY 13655; **Hudson Valley Region**: Kingston, NY 12401; Poughkeepsie, NY 12601; Newburgh, NY 12550; Catskill, NY, 12414; Ellenville, NY, 12128.
- Applicant Information: Project Manager (PM) and PI: Md. Aynul Bari, Department of Environmental & Sustainable Engineering, University at Albany; Co-PI: Elias Dueker, Bard College; Applicant organization: The Research Foundation for SUNY, University at Albany; 1400 Washington Avenue, MSC 100A, Albany, NY 12222; main contact: Christine McCrary, Ex. 6 Personal Privacy (PP)
- Brief Description of Applicant Organization: The SUNY Research Foundation (RF) is the largest comprehensive university-connected research foundation in the country and supports a vibrant research ecosystem that cultivates innovation and entrepreneurship across multiple key areas including Artificial Intelligence, Clean Energy, Biotechnology, Longevity, Substance Addiction, Nextgen Quantum Computing, Environmental Health, and Resiliency. Our mission is to provide talent, services, and technology that empower SUNY to research, innovate, and transfer discoveries that transform the world's knowledge economy.
- Set-aside: no set-aside
- Project Abstract: The overarching goal of this three-year project is to improve indoor air quality and public health across underserved neighborhoods in New York State (NYS) by establishing a community-driven air quality network platform. The specific objectives are to: 1) determine heterogeneity in indoor and outdoor concentrations of air toxics, bioaerosols and emerging contaminants at residential neighborhoods, 2) determine pollution hotspots and exposure disparities across neighborhoods, 3) identify indoor-generated and near-field outdoor sources, 4) determine heterogeneity in health risks associated with indoor and outdoor exposure, and 5) reduce indoor exposure to air pollutants. Key approaches include 1) measuring weekly indoor and outdoor (backyard) air concentrations at urban and rural neighborhoods over a 2-year period in at least 85 homes, 2) cost-effective time-integrated indoor and outdoor sampling for air toxics and emerging contaminants, 3) determining pollution hotspots through high precision mobile measurements of air toxics and methane across communities, 4) applying receptor model to identify indoor and outdoor sources, and 5) conducting intervention measures to reduce indoor air pollution. Expected outputs include 1) high precision data of air toxics and methane from indoor and mobile measurements, 2) time-integrated dataset for air toxics/VOCs and emerging contaminants. Expected outcomes include, 1) increased knowledge and understanding of indoor air quality problems, 2) enhanced understanding of sources of indoor air pollutants and reduction of human health risk, 3) increased community action to reduce indoor air pollution.
- Project type: monitoring, Special considerations: Rural Areas, Environmental Issue- Air
- List of Project Partners: 1) Academic: Bard College Community Sciences lab, 2) Industry: Entangle Technologies Inc., 3. Non-profit organizations: i) Hudson Valley Air Quality Coalition/ Citizens for Local Power, ii) Mid Hudson Energy Transition-MHET, iii) AVillage Inc., iv) St. Regis Mohawk Reservation (partnership under development)
- Need to develop QAPP for this project: Yes

ED_016126_00001117-00001

1b. Environmental and Public Health Information of the Underserved Community

Table 1 and 2 show EJ indexes and socioeconomic indicators of selected urban and rural communities including underserved neighborhoods in the study regions retrieved from the EPA's EJSCREEN tool.

Table 1. Characterization of selected urban communities (%tile in State versus %tile in USA)

Variables	South End, Albany	Cohoes	Schenectady	Kingston	Poughkeepsie	City of Newburgh
EJ Index-air toxics cancer risk	65 (71)	42 (30)	57 (47)	61 (64)	73 (82)	66 (62)

Demographic Index	39 (36)	22 (19)	59 (60)	63 (65)	63 (65)	66 (69)
People of color	14 (13)	17 (16)	56 (59)	69 (75)	47 (49)	61 (65)
Low Income	73 (63)	48 (41)	66 (60)	38 (32)	85 (81)	74 (69)

Several urban communities are marked as low-income ones being affected by Superfund and RMP facility proximity with the national percentiles over 80%. Several local environmental problems exist among neighborhood communities in the selected study region. Albany South is a major hub for trains carrying crude oil from the Bakken formation to the east coast. Albany South End neighborhood with a population of ~5,000 is located near the Port of Albany and the Port of Rensselaer having several facilities for transferring and storing petroleum, gasoline, and ethanol. There has been growing public health concerns among residents living in the South End communities e.g., Ezra Prentice neighborhood. In recent years, there is also heightened concern among residents of Cohoes about possible impacts of Norlite's former incineration of fire-fighting foam and potential contamination of PFAS. Drinking water contamination by PFAS was discovered in a rural community in the U.S. superfund site (Hoosick Falls) in winter 2016, in a town of Petersburg in February 2016, in an urban community City of Newburgh in May 2016, and Fort Drum Army installation in 2019, spurring a potential concern about industrial contamination of air quality across neighborhoods.

On the other hand, the Hudson River Valley region is an agricultural and industrial hub and is known for it's poor air quality in NYS. Wintertime residential wood burning is a known issue in the Hudson Valley communities such as Kingston (population ~24,000). In addition to known PFAS water contamination issue, residents living in the City of Newburgh (population ~28,000) have potential concerns about poor air quality from industrial operations e.g., Danskammer Generating Station.

ED_016126_00001117-00002

The proposed study will seek to address indoor and near-field outdoor exposure and public health risk across urban and rural communities. The project will provide benefits to these communities by using near real-time air toxics data, time-integrated air toxics, and emerging contaminants as well as bioaerosols and share information through knowledge translation activities to engage them in education and trust building. Through indoor air quality monitoring with intervention measures (two-time visits before and after intervention) in at least 65 homes (out of 85) among communities, the study will ensure their meaningful participation with respect to design, planning and performance of the project. The underserved community will benefit from study results, improve their knowledge, raise awareness and become empowered to take actions to reduce exposure from indoor air pollutants and reduce health care costs by improving indoor air quality and health.

1c. Organization's Historical Connection to Underserved Community

UAlbany has a long history serving underserved communities. UAlbany's Institute of History and Public Engagement worked with the Capital District YCMA under the Healthy Historic Walking Path project in 2014 and developed a series of self-guided walking tours through a number of Albany neighborhoods - including the underserved community South End. The School of Social Welfare supported at-risk members of the community and explored critical social issues including violence, substance abuse, youth opportunity and minority health disparities including mental health interventions in underserved populations. The School of Public Health (SPH) has a strong historical connection to underserved community through addressing disparities in health and mental health outcomes for underserved populations. SPH's recent efforts under the Health Resources and Services Administration (HRSA) grant enhance the public health workforce, with a special focus on preparing individuals to address health disparities and social determinants of health, especially in underserved populations. To incorporate diversity and inclusion in innovative ways in research, teaching and learning, UAlbany's Department of Environmental and Sustainable Engineering (PI Bari) carried out an exploratory study (July 2021–June 2023) under Strategic Allocation of Resources (StAR) program to improve indoor and outdoor air quality in diverse communities including Environmental Justice neighborhoods in the Capital District and Hudson Valley Region. In a recently funded EPA's Enhanced Air Quality Monitoring for Communities' (Bari et al., 2023; start: June 1, 2023), the PIs will work with Environmental Justice communities and promote sustainable air quality in NYS Capital District, Hudson Valley Region, and New York City in and near underserved neighborhoods.

The proposed study will facilitate the community-driven participation to monitor indoor air quality across urban and rural areas including underserved neighborhoods. The underserved community's residents and/or non-profit organizations will be involved in developing the project plan e.g., assist in planning and designing indoor/outdoor air monitoring, home recruitment, provide community data and resources to help researchers interpret with the community context, assist in arranging community meetings/webinars for educating the community and raising awareness about air quality issues.

Bard College's Community Sciences Lab has been conducting community-based air quality science with communities in Ulster and Dutchess Counties for the past 3 years. They have partnered with Hudson Valley Air Quality Coalition and the Kingston Emergency Food Collaborative to provide indoor air quality and water quality testing and short-term interventions in 20 living spaces in emergency and subsidized housing to date. This work is conducted in full

ED_016126_00001117-00003

partnership with residents and community leaders, and has resulted in the Bard CSL streamlining testing and reporting as part of its research process.

1d. EJCPS Model

The project will utilize at least five out of seven elements of the EJCPS model (Fig. 1) to improve indoor air quality across underserved neighborhoods. To date, the PIs have measured indoor air quality in at least 50 homes in urban and rural areas including underserved neighborhoods and have already accomplished several EJCPS model elements in the study regions e.g.,

1. Issue identification, community vision and strategic goal-setting
2. Community capacity building and leadership development
3. Multi-stake holder partnership and leveraging of resources

Under the recently funded EPA's Enhanced Air Quality Monitoring for Communities' project (Bari et al., 2023) starting from June 1, 2023, the PIs will also implement following other elements e.g.,

4. Constructive engagement with other stakeholders.

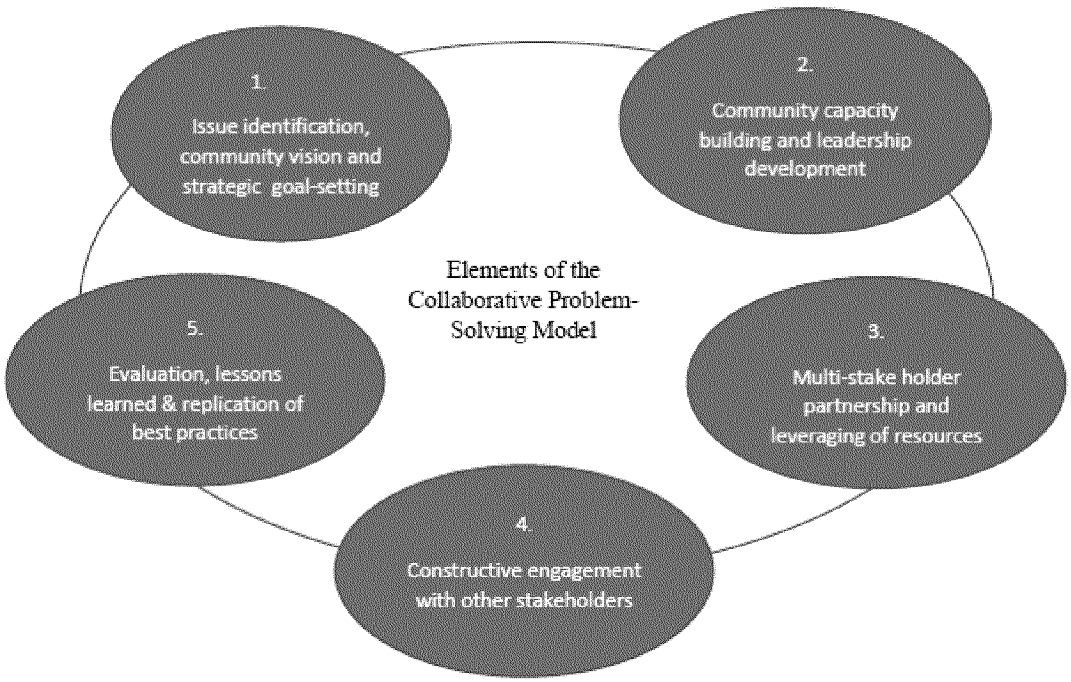

Fig. 1. Elements of the EJCPS model

1e. Project Linkages

The major goal of the proposed study is to improve indoor and outdoor air quality in diverse communities and neighborhoods in the Capital District, North Country including one tribal land and Hudson Valley Region in New York State with a view to having the right for general public to inhale clean air, irrespective of race, ethnicity, and socio-economic status. The project will therefore support EPA Strategic Plan Goal 2, Objective 2.1 to promote Environmental Justice and Civil Rights particularly at the State, tribal and local levels.

ED_016126_00001117-00004

1f. Partner and Collaborate

Under the EPA's Enhanced Air Quality Monitoring for Communities' project (Bari et al., 2023), the PIs have already made partnerships with different community organizations, city government and Conservation Advisory Councils to promote sustainable air quality among underserved communities in the study region. For this Environmental Justice Collaborative Problem-Solving (EJCPS) project, the PIs will continue to make and strengthen diverse partnerships at the community level to achieve the project's goals and objectives.

List of Project Partners: The project will accomplish its goals through use of appropriate and diverse partnerships from multiple stakeholder groups as follows:

1. Academic: Bard College Community Sciences lab
2. Industry: Entanglement Technologies Inc.
3. Non-profit organizations
   i) Hudson Valley Air Quality Coalition (HVAQ)/Citizens for Local Power (CLP)
   ii) Mid Hudson Energy Transition-MHET
   iii) AVillage Inc.
4. Tribe: St. Regis Mohawk Reservation (partnership under development)

Planned roles and activities of each partner:

Bard College:

Through the Community Sciences Lab, which is part of the Center for Environmental Sciences and Humanities (CESH), Bard College will perform the following tasks as part of this proposal:

- At all locations, support and interpret bioaerosol sampling (bacterial and fungal).
- In partnership with the Hudson Valley Air Quality Coalition (HVAQ), assist in neighborhood selection/home recruitment in the Hudson Valley.
- In the Hudson Valley (Kingston, Newburgh, Poughkeepsie, Catskill, Ellenville), conduct intervention study (as outlined in the section 2. Project Activities) with 50 site visits (25 houses visited before and after intervention).
- Involve undergraduate student interns in microscopic observations of aerosol particles in Hudson Valley homes.
- Support data collection and help researchers to interpret with a clear community context (in partnership with HVAQ).
- Assist in educating the community and raising awareness about indoor and outdoor air quality issues.

Entanglement Technologies Inc.:

Entanglement Technologies will support this project by providing the requisite equipment AROMA-VOC analyzer for monitoring air toxics and methane at indoor homes and for mobile hotspot identification across underserved neighborhoods throughout the duration of the project. They will also provide support to guide data management and processing and assist with data analysis for the indoor and mobile monitoring study in order to facilitate the successful execution of the research goals.

Community partners (non-profit organizations):

- Assist in conducting questionnaire surveys and to understand community needs and concerns and conducting polls for feedback to understand community priorities
- Assist in planning and designing indoor air quality monitoring, home recruitment
- Provide community data and resources to help researchers interpret with the community context

ED_016126_00001117-00005

- Assist in arranging community meetings/webinars for educating the community and raising awareness about air quality issues
- Assist in measuring performance of the project

The subawardee Bard College has a vested interest in working with this partnership with the RFSUNY at UAlbany. Indoor air quality is a pressing issue in the Hudson Valley Region, particularly in communities with older buildings and increasing dampness due to flooding, climate change, and other building structural issues. For the past three years, the Bard Community Sciences Lab has been working in tandem with community groups (Hudson Valley Air Quality Coalition, Communities for Local Power, Mid-Hudson Energy Transition) and community and elected leaders to address growing concerns about indoor air quality in Hudson Valley housing (both urban and rural). Starting in emergency housing (motels) in Ulster County, Bard College partnered with Kingston Emergency Food Collaborative to support residents in understanding their air quality and managing their often moldy and close conditions with air purifiers. Bard College has since expanded their work into subsidized housing and low-income rental units, and partnered with SUNY-Albany researcher (PI Bari) to more deeply investigate the chemical and biological challenges to air quality in housing throughout the Hudson Valley and Capital Region of New York. The funding from the EPA with this proposal would help take this collaborative research further, in that it would be possible to continue the study beyond the protective measures, to be able to return to the home and sample after those measures have been taking to ensure that air quality has been mitigated, at least in the short-term. Additionally, Bard College is crafting a partnership with organization like Communities for Local Power and Mid-Hudson Energy Transition who will then work to connect residents with air quality issues to funds/efforts to maintain and sustain these relationships and to remediate degraded housing conditions for long-term benefit. The PIs will plan to maintain and sustain these relationships into the future through attending monthly meetings of the community organizations to get updates and community concerns and potential future citizen science monitoring across underserved neighborhoods.

Fig. 2. Shows community engagement plan to understand how we engage with and develop partnership with identified and targeted communities to effectively perform the project.

Increasing levels of engagement

Variable	Definition	Activities
Shared leadership	formed strong partnership structures and final decision-making is at the community level	- create forums to bring community leaders together to consider air quality issues - enable and empower community leaders to make a decision
Collaborate	increased community involvement, bi-directional communication and formation of partnership with community on each aspect of project from development to solution	- use web-based engagement processes (facebook, twitter) to exchange views - conduct knowledge translation activities (monthly/quarterly meeting with community partners) to engage community towards trust building - co-design and plan ideas and solutions with community members - organize online/in-person training workshops for discussions and facilitate deliberation
Involvement	better community involvement with participatory form of communication	- provide opportunities for community scholars and citizen science researchers by deploying sensors - collect data and analyze them with regards to community context - discuss and review findings with community members to help them make informed decisions
Consultation	more community involvement to seek answer and get feedbacks from the community	- conduct questionnaire surveys to better understand community needs and concerns - conduct polls for feedback to understand community priorities - leverage community partner tools and select the champions from community
Outreach	limited community involvement to provide information to community	- reaching out to underserved community champions, leaders, faith-based leaders, federal, state and local agencies, advocates and concerned residents to increase awareness about air pollution.

Fig. 2. Community engagement continuum

ED_016126_00001117-00006

2. Project Activities/Milestone Schedule

2a. Project activities

The following section outlines the research design, methods and techniques that have been proposed to meet the objectives stated above.

2.1. Determine heterogeneity in indoor and outdoor air toxics at urban and rural neighborhoods

To enhance understanding of community-specific near-field air quality exposure (indoors: living room, outdoors: home backyard/porch), a community indoor and outdoor air quality monitoring will be performed in urban and rural communities including underserved neighborhoods in NYS Capital District, North Country and the Hudson Valley Region (Fig. 3). At residential neighborhoods, indoor and outdoor sampling will be conducted in 4-6 homes and/or apartments in each neighborhood to collect data from at least 85 homes (Capital District and North Country= 60 homes; Hudson Valley Region= 25 homes) over a 2-year period across neighborhoods including underserved communities. An intervention study will be performed, where two visits (before and after intervention measures with air purifiers) are planned at least 40 homes in the Capital Region and North Country and 25 homes in the Hudson Valley Region. Based on environmental and public health concerns (e.g., PFAS contamination, wood burning, mold issue), some urban and rural communities were selected in the Capital Region (Albany South End, Cohoes, Schenectady, Voorheesville, Hoosick Falls, Petersburgh), North Country (Fort Drum, St. Regis Mohawk Reservation). and in the Hudson Valley Region (Kingston, Poughkeepsie, City of Newburgh, Catskill, Ellenville).

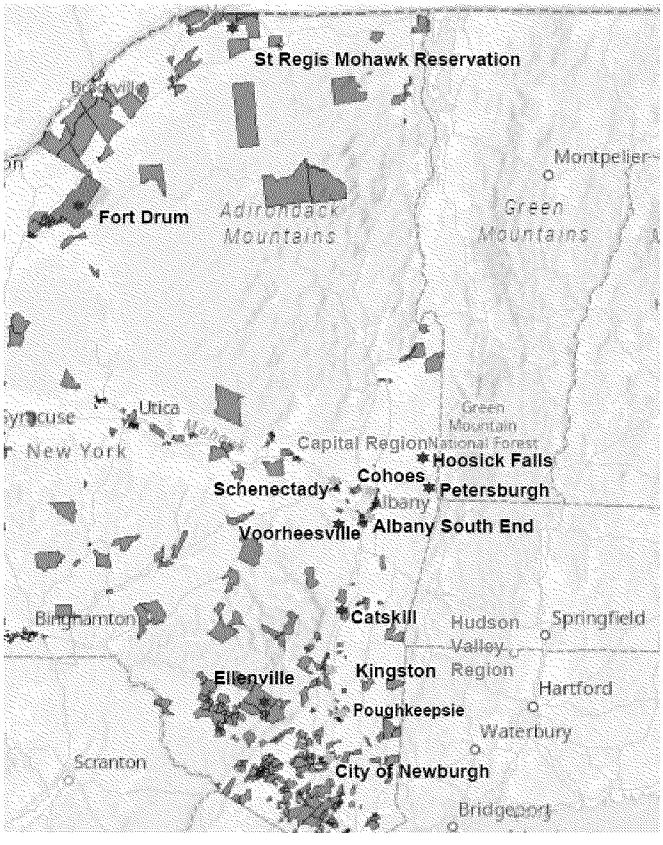

Fig. 3. Some selected neighborhoods in the Capital District, North Country and the Hudson Valley Region (urban: orange star, rural: red star, shaded areas are Environmental Justice neighborhoods)

The homes will be selected randomly based on a priori hypothesis that age of home would impair the indoor air quality. A single stage stratified sample design (USEPA, 2002) will be used for the study by selecting neighborhoods with different average age of housing stock and socioeconomic status. Indoor measurements will be taken at a breathing height of approximately 1.5 m within the family or living room. Outdoor sampling will be performed in the backyard (where available) and as far away from any combustion sources e.g., barbeques, automobiles, and other localized outdoor sources as possible.

Data on air exchange rate, relative humidity, temperature, and questionnaire-based housing characteristics, and occupants' activities will be collected at each home. To identify potential sources of indoor residential exposure and factors that may influence pollutant concentrations, two

ED_016126_00001117-00007

different types of questionnaires will be completed. A baseline questionnaire will be administered to the participants to obtain information on housing characteristics such as age and type of home, cooking system, ventilation system, renovations etc. A daily questionnaire will be completed by all home participants for every corresponding measurement period to obtain information on daily activities such as cleaning and cooking, opening of windows, use of exhaust fan, use of air conditioning, presence of pets etc. Air exchange rate, AER (h^{-1}) will be determined in the living room of each home/apartment using CO_2 as a tracer gas (Cui et al., 2015).

2.1.1. High resolution sampling of air toxics and methane

To measure real-time indoor and outdoor concentrations of hazardous air pollutants or air toxics, a recently developed precision chemical vapor analyzer AROMA-VOC (Entanglement Technologies, San Bruno, CA) will be used through speciated analysis mode (in ppt sensitivity, Table 3). The analyzer is a combined thermal desorption unit and cavity ringdown spectrometer (CRDS). The project will also measure real-time concentrations of methane (CH_4, measurement range: 2 ppb-20 ppm), through rapid scan mode in ppb sensitivity using CDRS. AROMA-VOC analyzer has been recently used for ambient air toxics measurements in North Carlina (Bhandari et al., 2022) and kitchen pollutants study in California and Australia to measure VOC emissions from indoor sources of natural gas (PSE Healthy Energy, 2023; Tay, 2022). A LiFeBlue Battery (300AH, Model LB12300D) will be used to run the analyzer for at least 6-8 hours per day during the sampling week.

Table 3. List of species to be measured using AROMA-VOC analyzer

Pollutants/parameters	Residence time	Limit of detection
Speciated analysis mode		
Benzene	10-min	< 10 pptv (0.03 µg/m^3)
Toluene	10-min	< 50 pptv (0.15 µg/m^3)
Ethylbenzene	10-min	< 100 pptv (0.45 µg/m^3)
Xylenes	10-min	< 100 pptv (0.45 µg/m^3)
1,3-butadiene	10-min	< 200 pptv (0.55 µg/m^3)
Styrene	10-min	< 500 pptv (0.21 µg/m^3)
Trichloroethylene (TCE)	10-min	< 50 pptv (0.10 µg/m^3)
1,1-dichloroethylene	10-min	< 500 pptv (2.0 µg/m^3)
1,1,2-trichloroethane	10-min	< 500 pptv (2.7 µg/m^3)
Chlorobenzene	10-min	< 500 pptv (2.3 µg/m^3)
Acrolein	10-min	< 200 pptv (0.55 µg/m^3)
Isoprene	10-min	< 100 pptv (0.30 µg/m^3)
1,2-cis-Dichloroethylene	10-min	< 100 pptv (0.40 µg/m^3)
Rapid scan mode		
Ethylene Oxide	5-sec	10 ppb
Methane (CH_4)	5-sec	2 ppb

Fig. 4. AROMA-VOC analyzer (18" w x20" h x 23" d)

In this study, VOC air sampling will be performed at least for 1-hr in 4-6 homes in each neighborhood before and after intervention measures. Data on meteorological parameters e.g., wind speed, wind direction will be also collected at each neighborhood using 3D Ultrasonic Anemometer (Young 81000).

ED_016126_00001117-00008

2.1.2. Cost-effective passive VOC sampling

The study will use passive sampling approach and conduct 24-h VOC sampling using SKC 575 passive samplers indoors at each neighborhoods (4-6 homes) in the study regions and follow the schedule of the EPA VOC/air toxics monitoring network for urban areas. Both indoor and outdoor 24-h sampling will be also conducted at least one home in each neighborhood. This will assist in understanding the extent of neighborhood air toxics levels compared to urban exposure. The study will analyze at least 46 speciated VOCs (Table 4), which includes important volatile chemical products (VCPs) such as ethanol, methyl-t-butyl ether (MTBE), methyl ethyl ketone (MEK), ethyl acetate, methyl isobutyl ketone (MIBK), and n-butyl acetate. Recent findings from the National Oceanic Atmospheric Administration (NOAA) have identified VCPs from residential sectors including pesticides, coatings, adhesives, cleaning agents, etc. are emerging as a major source of vapor emissions in the U.S. cities, contributing 78% of anthropogenic VOC emissions in NYC during 2018 and attribute to summertime ozone (O_3) and secondary organic aerosol (SOA) formation (McDonald et al., 2018; Ghatzelis et al., 2021). The indoor and outdoor measurements of VCPs will further assist in understanding the contribution of VCP-related sources from residential sectors in NYS.

Table 4. A suite of 46 VOC species (including 20 HAPs) for passive VOC analysis

No.	List of groups and species	No.	List of groups and species
	Aromatics		**Halogenated VOCs**
1	Benzene*	31	Dichloromethane*
2	Toluene*	31	Chloroform*
3	Ethylbenzene*	32	Carbon tetrachloride*
4	(m+p)-Xylene*	33	1,2-Dichloroethane*
5	o-Xylene	34	Trichloroethylene (TCE)*
6	Styrene*	35	Tetrachloroethylene*
7	1,3,5-Trimethylbenzene	36	Cumene (isopropylbenzene)*
8	1,2,4-Trimethylbenzene	37	1,1,2,2-Tetrachloroethane*
9	1,2,4-Trichlorobenzene	38	Pentachloroethane
10	Naphthalene*	39	1,3-Dichlorobenzene
	Alkanes	40	1,4-Dichlorobenzene*
11	Pentane	41	1,3-Diethylbenzene
12	Hexane*	42	Hexachloroethane*
13	Heptane	43	1,2,3-Trichlorobenzene
14	Octane		**Terpenes**
15	Decane	44	α-Pinene
16	Dodecane	46	d-Limonene
17	Tetradecane	46	p-Cymene
18	Hexadecane		
19	2,2-Dimethylbutane		
20	2-Methylhexane		
21	2-Methylheptane		
22	2,2,4-Trimethylpentane*		
	Oxygenated VOCs		
23	Ethanol		
24	iso-Propyl alcohol (IPA)		
25	Methyl ethyl ketone		
26	Methyl t-butyl ether (MTBE)*		
27	Methyl isobutyl ketone (MIBK)*		
28	Ethyl acetate		
29	n-Butyl acetate		

*EPA hazardous air pollutants or air toxics

ED_016126_00001117-00009

Several statistical approaches e.g., non-parametric tests such as, Wilcoxon Signed Ranks test, Kruskal-Wallis ANOVA on Ranks), correlation coefficient, and coefficient of divergence (COD) will be used to determine spatial heterogeneity in indoor and outdoor air toxics among different neighborhoods in the Capital Region, North Country and the Hudson Valley Region. An interpolation method, inverse distance weighting (IDW) will be also applied to measured air pollutants to elucidate the spatial variation and distribution of pollutant concentrations. This will further assist in determining the areas impacted by the specific pollutants across residential neighborhoods in the study regions.

2.2. Measure bioaerosols at urban and rural neighborhoods

2.2.1. Hudson Valley Region

In the Hudson Valley Region, mold is a known issue across communities. Decaying building materials, including fiberglass, gypsum, plaster, and wood shed aerosol particles that can build up in high concentrations inside homes. Mold and bacteria can proliferate in damp conditions, and may give off particles (spores, endotoxins, beta-glucans) that increase respiratory inflammation and exacerbate chronic asthma.

While we are conducting research that will be globally relevant, we are involving the local community and residents in these homes directly in the assessment of chemical and biological air quality hazards. The residents who invite us to assess their homes and participate in our research often are our best source of new study recruits and important environmental and health-related context. While most research studies deploy instruments, gather data, and then leave, with report-backs to participants being sparse or sometimes non-existent, using our unique tools for sampling and analysis in the lab we are able to report back to residents within days, allowing them to take protective measures (install air purifiers, notify landlords, report to doctors).

Details for our proposed work are as follows:

1. Outreach and screening: through our community partnerships, interested residents reach out to the Community Sciences Lab (CSL). CSL staff connect with them in person, go over the research study we are conducting, all IRB-required documents, and sign consent forms, schedules a date for Visit 1.
2. Visit 1:
   a. Residents fill out a questionnaire (health and building observations, etc.)
   b. Research team takes air quality measurements ($PM_{2.5}$, RH, Temperature) throughout the home, also use bioslides to take samples from potential aerosol particle sources.
   c. Building Inspector checks all safety aspects, including gas connections, CO outlets, VOC's, structural integrity, dampness and moisture
   d. Air samples (300 lpm, 30 mins vacuum sampling into sterile water) are taken in 2-3 high-traffic areas of the house (including any rooms that are identified by the resident as "problematic" for respiratory issues
   e. To evaluate comprehensive mold and bacterial aerosols in the home, as per Meklin et al. 2007), dust samples are collected from throughout the home using a swiffer cloth.
   f. If mold or other air quality challenges are identified on-site, these are addressed (e.g. calling gas company to fix leaks, writing up information about faulty CO intrusions),
   g. After sampling is complete, air purifiers are deployed, and if mold has been identified through visual inspection, plans are made to bring in professional cleaning service.
   h. Air samples are taken outside simultaneously ($PM_{2.5}$, RH, Temperature, vacuum sampler)

ED_016126_00001117-00010

3. In the lab
   a. Aliquots from the vacuum samples are analyzed for endotoxins (eu/m3 air) and beta-glucans (pg/m^3 air) using the Endosafe-PTS Charles River system.
   b. Aliquots from the vacuum samples are run through a FlowCam imager, producing imagery from every particle above ~2 um from air sampler.
   c. Staff and trained students inspect, characterize, and capture imagery from the bioslides for later identification and comparison with FlowCam imagery.
   d. Dust samples are processed for service lab analyses of mold and bacterial presence and identification. This qPCR method uses the MS-qPCR approach, as established by the EPA (Vesper et al, 2011).
   e. A report outlining findings is created by lab staff and sent to residents within 30 days of Visit 1.
4. Visit 2 (60 days after Visit 1):
   a. All measurements from Visit 1 are repeated and compared to Visit 1 findings.
   b. Another report is issued to the resident, alternative plans are made if no change.
   c. In all cases, long-term remediation, if needed, is explored through partnerships with organizations like HVAQ and MHET

2.2.2. Capital Region and North Country

The study will also perform bioaerosol monitoring (endotoxin and glucan) across underserved communities in the Capital Region and North Country. Sampling will be done during the visit 1 (day 1 of the sampling week) before the intervention. After sampling, participants (40 out of 60 homes) will be asked to run air purifiers for a week. Sampling will be also done during the visit 2 (day 7 of the sampling week) to find any changes due to intervention measures.

2.3. Determine heterogeneity in indoor and outdoor emerging contaminants

To characterize spatial variation of emerging contaminants such as per- and poly-fluoroalkyl substances (PFAS), time-integrated weekly air samples will be collected on glass fibre filters indoors in at least 4 homes of each neighborhood using Harvard Impactors (Air Diagnostics and Engineering, Inc.) and SKC Leland Legacy pumps (SKC, Inc.). Outdoor air samples will be also collected from at least one home in each community. Dust samples will be collected from all homes (before and after intervention measures) using a Eureka Mighty Mite (Model 3670) vacuum cleaner. Collected air and dust samples will be analyzed for at least 41 PFAS compounds using LC-MS-MS (Agilent 6470 triple quadrupole MS coupled with 1290 UHPLC) at UAlbany lab.

2.4. Determine plume tracking and pollution hotspots across communities

Air pollutants are ubiquitous in both indoor and outdoor environments and indoor air quality can be highly affected by outdoor air pollution. Outdoor air pollutants can infiltrate into buildings through open doors, open windows, ventilation systems, and cracks in structures. This highlights the importance of assessing outdoor air quality exposure across underserved neighborhoods. In recent years, the use of mobile monitoring approaches with high precision analyzers has shown a great promise for high spatial resolution for determining air toxics and methane emissions in urban areas and oil and gas development as well as in landfill sites (Ars et al., 2020; Jakober et al., 2015). Mobile monitoring is increasingly used to determine fine-scale high resolution pollution mapping

ED_016126_00001117-00011

for identification of unexpected sources of exposure disparity across communities (Kumar et al., 2021).

In this study, a mobile measurement platform will be developed on a mini-van or pick-up truck by outfitting with a suite of research grade instrumentation (Table 3) and low-cost sensors (Table 5, available in PI Bari's lab) to collect measurements of HAPs or air toxics (10 min resolution), climate forcing agents e.g., CH_4 (5-sec resolution), black carbon, CO_2 and other pollutants as well as meteorological parameters and global position information at 2-sec resolution. The calibration and validation of low-cost sensors have been done in our other studies (Bari et al., 2022; Miller et al., 2022).

Table 5. Target pollutants and sensors to be used for mobile monitoring

Type of sensor unit	Target sensors	Manufacturer and part number	Method	Sampling frequency	Limit of detection
Multipollutant monitor (MPM)	PM_1, $PM_{2.5}$, PM_{10}	Plantower PMSA003	Optical particle counter	2-sec	1 µg/m^3
	O_3	Alphasense OX-A431	4-electrode electrochemical	2-sec	1 ppb
	NO_2	Alphasense NO2-A43F	4-electrode electrochemical	2-sec	1 ppb
	CH_4	Figaro TGS 2600	Metal oxide resistance	2-sec	*
	H_2S	Alphasense H2S-A4	4-electrode electrochemical	2-sec	5 ppb
	SO_2	Alphasense SO2-A4	4-electrode electrochemical	2-sec	15 ppb
	CO_2	Alphasense IRC-A1	Infrared, pyroelectric	2-sec	*
	RH, T	Sensirion SHT25	Infrared, pyroelectric	2-sec	0-100%, 0-120°C
DUET sensor (TelosAir)	TVOC	sgp30	Metal oxide resistance	2-sec	1 ppb
	CO	Alphasense CO-A4	4-electrode electrochemical	2-sec	20 ppb
	RH, T	Sensirion SHT25	Infrared, pyroelectric	2-sec	0-100%, 0-120°C
Black carbon detector (ObservAir, DST)	Black carbon	ObervAir (DST)	aerosol absorption	2-sec	0.05 µg/m^3
	O_3	Alphasense OX-B431	4-electrode electrochemical	2-sec	15 ppb
	NO_2	Alphasense NO2-B43F	4-electrode electrochemical	2-sec	15 ppb
	RH, T	Sensirion SHT3x	Infrared, pyroelectric	2-sec	0-100%, 0-120°C

*below background concentrations

We will perform mobile monitoring of air toxics, CH_4, ethylene oxide, and other air pollutants for two weeks in Winter, two weeks in Summer and one week each in Spring and Fall over 1-year period to get an overview of seasonal variability in air concentrations across underserved neighborhoods. The mobile measurement platform will be used for "plume-tracking" to identify areas of elevated concentrations of air toxics/VOCs, climate forcing agents, and other air pollutants in the vicinity of known emission sources across communities. At first the mobile van/truck will be stationed at a location upwind of the emission sources to collect the measurement of background concentrations of air pollutants. A suitable stationary downwind location will be also selected based on the highest concentrations observed, and instruments will be operated for several hours to obtain quantitative data for comparison. To identify potential influences by emission sources, mobile vehicle will be also driven at a minimum speed within 5-10 km surrounding the known emission facilities.

To investigate spatial variation in pollution exposure at hyperlocal (~100 m), local (~1 km), and between neighborhoods (> 5 km), we will also conduct mobile monitoring as complementary measures during the indoor/outdoor monitoring period across neighborhoods in the study regions through driving along neighborhood streets, block-by-block, and across communities. The study will identify pollution hotspots and assess disparities in outdoor air pollution exposure among residents of different races and ethnic groups by measuring high-resolution observations of air

ED_016126_00001117-00012

pollutants. Both relatively low-cost and research grade monitors (existing in PI's lab) for indoor microenvironments will be used to monitor black carbon (ObservAir, MicroAeth), ultrafine particles (P-Trak Ultrafine particle counter, model 8525, TSI), nanoparticles (Partectors, Naneos), $PM_{2.5}$ (p-DR 1500), CO/CO_2 (Q-Trak Indoor Air Quality Monitor, model 7575, TSI), O_3 (Aeroqual S500) and TVOC (DUET, TelosAir). Air pollution exposure and in-car environmental parameters (ventilation rate, temperature, relative humidity) will be evaluated under different ventilation settings e.g., windows open, air conditioning on ambient air intake mode and air conditioning on recirculation mode. Measurements will be taken at each selected underserved neighborhoods at different times of the day (morning, afternoon, evening), week (weekday/weekend), and seasons to capture the temporal variation. The dataset will be analyzed to characterize the spatiotemporal variations in pollutant concentrations, inter-pollutant correlations, determine pollution hotspots and racial/ethnic exposure disparities across neighborhoods.

2.5. Identify indoor-generated and near-field outdoor sources

A multivariate receptor model positive matrix factorization (PMF) model, USEPA version EPAPMF 5.0 will be applied to identify and apportion sources of VOCs including air toxics and PFAS. PMF model will be applied separately to passive VOC data and time-integrated weekly PFAS air samples to identify indoor sources of VOC and PFAS in neighborhood communities. The combined dataset of before and after intervention measures will be used to understand the effects of intervention study. In this study, a combined dataset of VOCs species from 24-h passive sampling and 1-hr real-time measurements (AROMA-VOC) and CH_4 will be used as the input data for the PMF analyses, which can aid in enhanced understanding of the extent of sources in the study regions. Kuwayama et al. (2019) used a similar approach of combining datasets of CH_4, CO_2 and VOC species in PMF model for source apportionment of ambient methane enhancements in Los Angeles, California.

2.6. Identify local source impacts

To test the hypothesis that outdoor air toxics and emerging contaminants have strong signal from local nearby sources, a source directional tool, conditional bivariate probability function (CBPF) (Uria-telelaetxe and Carslaw, 2014) will be applied. This approach can provide information on the nature of local emission sources and potentially identify contributions from different source types through their wind speed dependence.

2.7 Determine health risks of indoor air toxics and emerging contaminants

To assess the potential public health risk posed by exposure to VOCs and PFAS and associated sources, a deterministic screening human health risk assessment will be performed using both of the inhalation and ingestion exposure pathways. For assessing public health risks associated with long-term (chronic) and short-term (acute) inhalation exposures, dose-response criteria of the United States regulatory agencies have been used in several studies to screen ambient concentrations of hazardous air pollutants (e.g., Bari et al., 2017) Source-specific risk estimates may add valuable information for understanding potential control strategies for particular sources (Liao et al., 2015).

ED_016126_00001117-00013

2. b. Milestones schedule

Table 6. Timeline and milestones of the proposed project

Milestones/Quarter	Year 1				Year 2				Year 3			
	1	2	3	4	5	6	7	8	9	10	11	12
Milestone 1 Determine heterogeneity in indoor air toxics												
Capital District/North Country												
Hudson Valley Region												
Milestone 2 Community engagement												
Community meetings												
Milestone 3. Bioaerosol monitoring												
Milestone 4 Determine heterogeneity in emerging contaminants												
Milestone 5 Determine plume tracking and pollution hotspots												
Milestone 6 Source apportionment-receptor modeling												
Milestone 7 Determine local source impacts												
Milestone 8 Screening health risk assessment												
Milestone 9 Final Report												
Milestone 10 Journal manuscripts												

2. c. Itemized Budget Sheet / Budget Narrative (see section 7)

3. Environmental Results – Outcomes, Outputs and Performance Measures

3a. Environmental results (logic model) (see section 7)

Table 7. Outputs and outcomes of the proposed project

Resources/ inputs	Activities	Outputs	Audience	Short-term Outcomes (6-12 months)	Intermediate Outcomes (12-24 months)	Long-term Outcomes (2+ years)
• Staff time • Graduate and undergraduate students • Community partners • Industry • Volunteers	• Determine heterogeneity in indoor and outdoor air toxics at urban and rural neighborhoods • Measure bioaerosols at urban and rural neighborhoods • Determine heterogeneity in indoor and outdoor emerging contaminants • Determine plume tracking and pollution hotspots across communities • Identify indoor-generated and near-field outdoor sources • Identify local source impacts • Determine health risks of indoor air toxics and emerging contaminants	• At least 6 urban and 6 rural community assessments will be performed. • At least 85 homes (two visits in 65 homes before and after intervention) will be reached. • At least 25 homes will be assessed for mold issues. • high precision real-time data of air toxics (10-min) and methane (5-sec) from indoor and mobile monitoring • 155 bioaerosol (endotoxin, glucan) samples, 130 passive VOC 24-h samples, 85 weekly PFAS air samples, 170 PFAS dust samples • 85 resident participants in a survey to identify community needs • Community participants' report to 85 individuals • Promotion of community engagement	• Community residents • Community organizations • Industry • City, state, local government • universities	• Increased in number of residents aware of indoor air quality issues • Increased trust and working relationship • Increased access to information and tools for understanding reduction of indoor air pollution and public health risks • Increased knowledge and understanding of near-field (indoors, outdoors) air pollution sources • Increase in number of local stakeholders committed to project and addressing communities indoor air quality issues	• Increased critical thinking ability and decision making about air quality issues • Community neighborhoods start making decisions to improve air quality • Specific actions and/or practices are adopted by communities to improve air quality • Assessment of actions to improve indoor air quality • Increase in number of residents that use air purifiers to reduce indoor air toxics and other pollutants	• Improved understanding of outdoor and indoor air quality issues • Improved environmental stewardship and community action to reduce air emissions • Reduction of indoor air concentrations and human exposure to certain pollutants. • Reduction in asthma-related hospital visits due to intervention measures. • Reduction of asthma rates among community residents

ED_016126_00001117-00014

3b. Performance Measures and Plan

The PIs plan to initiate a number of approaches to increase the likelihood that the project will proceed on schedule and ensure the timely and efficient expenditure of grant funds.

Setting up clear expectations for performance

- Make sure about contract detail e.g., performance timelines, interim milestone, expected short-term, medium-term and long-term project outcomes.
- Set up expectations for reporting and accounting with partners
- Provide suggestions and share best practices to help partners administer and implement their activities efficiently.

Monitoring project implementation and spending

- Check from time to time to oversee overall program spending.
- Evaluate progress by reporting on spending at project/stakeholder meetings.
- Develop expenditure schedules, review them quarterly and follow up on discrepancies.
- Monitor partners' performance and progress and provide technical assistance if needed.
- Explain subawardee about the importance of timely performance and how their spending contributes to the PI's overall performance.

3c. Sustainability Plan and Community Vision

The PIs plan to utilize the findings of this project to achieve community's goals and objectives. For example, different activities and initiatives including community reporting will benefit general people to gain 1) increased knowledge and understanding of indoor air quality issues, 2) increased community awareness, 3) increased accessed to information, 4) enhanced understanding of sources of indoor and outdoor air pollution and reduction of human health risk, 5) increased environmental stewardship and community action to reduce air emissions, and 6) reduction of indoor air concentrations and human exposure to certain air pollutants.

The PIs will plan to maintain and sustain these relationships into the future through attending monthly/quarterly meetings of the community organizations to get updates and community concerns and potential future citizen science monitoring across underserved neighborhoods. Through the project activities, the PIs will will bring together residents of different neighborhoods in the Capital Region, North Country and the Hudson Valley Region including urban and rural Environmental Justice (EJ) communities, to develop a community indoor air quality program which will serve as a model for other U.S. States and can be applied to other U.S. neighborhoods.

This proposal is in direct response to community needs, questions, and demands regarding access to clean air. PI Bari's research lab and Bard Community Sciences Lab have been in direct communication with low-income and lower middle-class communities for the past 2 years through previous research. We have built community trust and supported community leadership development while also providing desperately-needed information and scientific support as residents attempt to navigate indoor and outdoor air quality issues. This community-based research record has created a strong foundation on which to build the proposed research. With ongoing collaborations with community partners such as AVillage, Outdoor Promise, HVAQ, etc, the research accomplished will result in long-term change – out science will inform future policy for organizations and state institutions working to better the health of communities in general. In NY State, clean air and water is considered a basic right. Our research will immediately plug into the infrastructure in NY State to realize this for all.

For instance, MHET is interested in incorporating indoor air quality testing before deployment of energy efficiency subsidies in Hudson Valley homes. They are very interested in learning more

ED_016126_00001117-00015

from the work proposed here to ascertain the best ways to both detect and mitigated (both short-term and long-term) air quality issues in homes. This constitutes a unique collaboration combining energy efficiency, climate change adaptation, and health enhancements for residents. For landlords and home owners, this research will allow for science-based decision-making regarding upgrades and climate retrofitting of properties that are otherwise deteriorating.

4. Programmatic Capability

4a. Organization Experience:

UAlbany has long experience and infrastructure related to the proposed project. UAlbany's Department of Geography and Planning, the School of Social Welfare and School of Public Health have experience in working with underserved communities to focus on community air quality, health disparities and social determinants of health. Under the Strategic Allocation of Resources (StAR) program, the Department of Environmental and Sustainable Engineering (PI Bari) has conducting an exploratory study (July 2021–June 2023) to improve indoor and outdoor air quality in diverse communities including Environmental Justice neighborhoods in the Capital District and Hudson Valley Region. In a recently funded EPA's EPA's Enhanced Air Quality Monitoring for Communities' (Bari et al., 2023; start: June 1, 2023), the PIs will work with Environmental Justice communities and promote sustainable air quality in NYS Capital District, Hudson Valley Region, and New York City in and near underserved neighborhoods.

4b. Staff Experience/Qualification of Project Manager (PM):

The Project Manager and PI Bari has more than 12 years of experience in assessing air quality issues in urban, suburban and rural areas at numerous locations across Canada (Alberta, Ontario) Europe (Germany, Cyprus), and the United States (New York). He was a leading researcher in the Health Canada funded indoor air quality study conducted in the Capital Region of Alberta (Edmonton) and investigated indoor and outdoor (backyard) air quality exposure among residential neighborhoods. He has undertaken long-term air quality trend analysis, multivariate receptor modeling (e.g., positive matrix factorization-PMF) and used a variety of advanced statistical approaches for interpreting and understanding characteristics and sources of air pollutants and associated public health risk over the past 12 years. The PI is currently leading indoor and outdoor air quality study (2021-2023, funded by UAlbany) for the Capital District and the Hudson Valley Region, where PI has built ties and connections with communities. PI is serving as a co-PI (PI Scott Miller) of a recently awarded project by the New York State Energy Research and Development Authority (NYSERDA) to design and deploy low-cost multipollutant air quality sensors at 37 sites in the New York City metropolitan area. The PI is also leading another recently awarded project by the U.S.EPA to promote sustainable air quality at underserved neighborhoods in New York State through low-cost sensor monitoring, integrated measurement, and community engagement. The PI is also serving as a co-PI (PI Jie Zhang) for another EPA project to build Capital District communities air quality measurement network across five schools using low-cost sensors and mobile measurements.

Co-PI Elias Dueker is an environmental microbiologist whose research focuses on microbial connections between water and air. This work has become key to supporting climate-associated scientific questions that communities are struggling with in real-time: are air and water quality linked? What happens when polluted waterways flood into homes? How do these flood events impact indoor and outdoor air quality once the waters recede? Eli has worked with Hudson Valley communities to support science-based management of air and water for the past 9 years. In 2014 he co-founded the Saw Kill Watershed Community, a science-based, water quality-focused

ED_016126_00001117-00016

community group which has shepherded local education and policy-making to protect access to clean water. This group has been monitoring water quality and climate influences with Bard College's Community Sciences Lab (CSL) continuously since 2015. In 2019, the CSL, under Eli's leadership, partnered with the City of Kingston to install a particulate monitoring station near City Hall as part of the Kingston Air Quality Initiative. In 2021, Eli and the staff of the CSL became founding members of the Hudson Valley Air Quality Coalition, which brings Community leaders together regularly to discuss indoor and outdoor air quality issues.

4c. Expenditure of Awarded Grant Funds:

The PI will monitor project implementation and spending through various ways:

- Check with finance manager time to time to oversee overall program spending.
- Evaluate progress by reporting on spending at project meetings.
- Develop expenditure schedules, review them quarterly and follow up on discrepancies.
- Establish a system for payment processing including timelines for processing invoice
- Monitor partners' performance and progress and provide technical assistance if needed.
- Pay attention to how the timeliness calculation works to determine timely funds expenditure.
- Explain subawardee about the importance of timely performance and how their spending contributes to the PI's overall performance.

The PIs and all partners will work together to make sure that funds are well-managed and spend in a timely manner to successfully achieve the goals and objectives of the project.

5. Past Performance

The PI Bari is an early career researcher, and he has no prior past performance information and/or reporting history under Federal agency assistance agreements.

The PI recently started NSF-IRES (International Research Experiences for Students) project (September 1, 2022-August 2025) - entitled "IRES Track I: U.S.-Bangladesh collaboration to improve air quality: Application of low-cost sensor technologies and satellite remote sensing" from September 1st, 2022 and no reporting information is available yet.

6. Quality Assurance Project Plan (QAPP) Information

The project will involve the collection of new data for air toxics, bioaerosols and emerging contaminants across urban and rural underserved communities in NYS. The project will require to develop a Quality Assurance Project Plan (QAPP) if selected for funding.

ED_016126_00001117-00018

1. **Other Attachments Forms**
   i. **Itemized Budget Sheet:**

Personnel – **Md. Aynul Bari**, PhD, Department of Environmental and Sustainable Engineering (ESE), University at Albany, State University of New York, is the Principal Investigator and he will supervise and lead all aspects of the project. Dr. Bari will devote Ex. 6 Personal Privacy (PP) of effort during the summer of each year of the project. In addition to overall project responsibility, the PI will supervise one gradate and one undergraduate student, and contribute to data analysis and interpretation, as well as dissemination of results and reporting. Dr. Bari's annual salary is projected at Ex. 6 Personal Privacy (PP) and the salary rate increases 2% each year. The total salary request is Ex. 6 Personal Privacy (PP)

Other Personnel – The budget includes one **graduate assistant (GA)** throughout all three years of the project during the academic year of each year ($63,718). The GA will work with the PI and devote 50% of time (20 hours per week) throughout all three years of the project. The GA will assist in conducting weekly field campaign for indoor air quality monitoring at urban and rural underserved neighborhoods, analyzing air toxics data and performing lab analysis of collected filters for emerging contaminants. The budget also includes one **undergraduate research assistant (URA)** during the academic year (10 hours per week) and the summer of Year 1 for 10 hours per week ($11,701). The undergraduate student will work closely with the PI and the GA to assist in indoor air quality monitoring and data screening and processing.

- **Fringe Benefits** – The proposed federally negotiated fringe benefit rates for The Research Foundation for The State University of New York, University at Albany are as follows: 14% in Years 1, 14.17% (weighted average of FY24 and FY25) in Year 2, and 14.5% in in Year 3 for faculty summer salary; 13% in Years 1, 13.50% (weighted average of FY24 and FY25) in Year 2, and 14.67% (weighted average of FY25 and FY26) in Year 3 for the graduate assistant; and 6% for all three years of the project for the undergraduate assistant. The fringe benefits include medical and dental insurance, retirement, workers compensation, disability insurance, and PTO.
- **Travel** – Travel costs of $11,398 are requested for domestic travel (Year 1: $5,350, Year 2: $3,524, Year 3: $2,524) for the entire project duration (three years). In Years 2 and 3, the PI or the graduate student will attend one domestic conference such as AGU Fall Meeting or AAAR (American Association for Aerosol Research ($2,524/person/trip: Airfare, $600; Registration, $585; Ground transportation, parking, and incidentals, $100; Lodging, $134 x 6 days = $804; M&IE, $79 x 4 days, $59.25 x 2 days = $434.50) to present research and establish future collaboration. Funds of $5,350 are requested to cover mobile monitoring and local travel. For mobile monitoring (5 weeks in total: 2 weeks in Winter and 1 week in each Spring, Summer and Fall), $4,150 are allocated for local mileage ($0.55 X 600 miles X 5 weeks) and mini-van/truck rental ($500/week) for real-time VOCs and methane measurements across neighborhoods using AROMA-VOC. For local transport, $1,000 are allocated in year 1 and 2 for indoor quality air monitoring for homes and community outreach efforts. A 2% increase for the travel costs are included in Years 2 and 3 to allow for inflation.
- **Equipment** – Funds of $107,100 are requested in Year 1 to purchase a recently developed real-time measurement technique AROMA-VOC (Entanglement Technologies, Inc., list price $126,000, 15% discount for academic research) for VOCs including hazardous air pollutants or air toxics and methane. This equipment will be used for indoor VOC monitoring and mobile hotspot identification across neighborhoods.

ED_016126_00001118-00001

- **Supplies** – Funds of $24,194 are requested in Year 1 to purchase endotoxin and glucan cartridges for bioaerosol monitoring, air purifiers, laptop, PFAS/VOC chemicals, vacuum cleaner with dust bags, glass fibre filters and copy papers as shown the Table below.

Item	Number	Unit cost	Total
Endotoxin cartridges	105	$40	$4,200
glucan cartridges	105	$45	$4,725
Air purifiers	50	$100	$5,000
Laptop	1	$1,500	$1,500
PFAS chemicals and lab supplies	-	-	$8,000
Vacuum cleaner	2	$82	$164
Dust bags	150		$200
Glass fibre filters	200		$200
Copy papers	30	$4	$120
Total supplies			$24,109

- **Contractual -** $15,000 is included to pay for the involvement of community partners. Funds of $18,980 are also requested for contract with labs to conduct tests for passive VOC samples (SKC 375 passive VOC samplers with lab analysis, @$146*130 = $18,980).
- **Other Direct Costs**

  Subawards: **Bard College** will participate in this project as a subawardee, and their total budget is $65,881. Through the community Sciences Lab in the Center for Environmental Sciences and Humanities (CESH), Bard College will provide technical and analytical support for the Hudson Valley communities (e.g., Kingston, Red Hook, Annandale-on-Hudson, Newburgh, Poughkeepsie), support bioaerosol (bacteria, fungal) sampling, conduct intervention study with 50 site visits (25 houses visited before and after intervention).

  Community meeting logistics: $3,600 is included ($1,200 in each year) to pay for community meeting logistics, which is necessary to identify and engage communities.

  Participants support: Upon completion of the study, the PI plans to provide $40 gift cards to 75 home participants, total cost of $6,000 for 75 homes, $3,000 in each of the first two years), to cover the power supply used and survey/questionnaires completed.

  Shipping: A total fund of $1,000 is allocated for shipping costs for supplies needed.

  Tuition: Tuition of $35,361 is included for one graduate student. Tuition covers 18 credits (9 credits per semester) at the out-of-state tuition rate with a 3% increase each year.
- **Direct Costs** – The total direct costs of this project are $385,643.
- **Indirect Costs** – Facilities and administrative costs of 56.5% in Year 1 to 3 are calculated on a Modified Total Direct Cost base in accordance with our Department of Health and Human Services federally negotiated indirect cost rate agreement dated March 25, 2021. In accordance with this agreement, tuition and Equipment are excluded when calculating the total direct cost base. The indirect cost base is $202,301 and the total indirect costs for this project are $114,300.

Total Amount Requested – The sum of the direct and indirect costs of this project is $499,946.

Expenditure of Awarded Funds – The RFSUNY's post-award administration will manage all aspects e.g., review of grant expenditures to ensure compliance, payment of vendor invoices, financial reporting and billing to sponsors, distribution of payroll charges, and documentation of cost sharing. The PI Bari will ensure the external partner expended the grant fund in a timely and efficient manner.

ED_016126_00001118-00002

EJCPS Detailed Budget

	Description	Total
Personnel	• Project Manager and Principal Investigator, Dr. Aynul Bari @ Ex. 6 Personal Privacy (PP) summer months = $11,272 for three years • Graduate student @$20,820 annual salary X 50% of time on project = $63,718 for three years • Undergraduate student @$15,912 annual salary X 25% of time in year 1 and summer in year 2= $11,701	$86,691
Fringe Benefits	• Project Manager 14% of salary = $1,616 for three years • Graduate student 13% of salary = $8,283 for three years • Undergraduate student 6% annual salary = $702	$10,601
Travel	• AGU Fall Meeting/AAAR Conference Roundtrip per person (Airfare, $600; Registration, $585; Ground transportation, parking, and incidentals, $100; Lodging, $134 x 6 days = $804; M&IE, $79 x 4 days, $59.25 x 2 days = $434.50) = $2,524 • Local mileage for mobile monitoring: 600 miles @ $0.55/mi. X 5 weeks) = $4,150 • Mini-van/truck rental for mobile monitoring: @$500/week X 5 weeks = $2,500 • Local transport, $1,000 per year (@$100/month) homes monitoring and community outreach efforts= $3,000	$11,398
Equipment	AROMA-VOC (Entanglement Technologies, Inc.)	$107,100
Supplies	• 105 Endotoxin (@$40) and glucan cartridges(@$40 = $8,400 • 50 air purifiers @$100 = $5,000 • 1 laptop for home monitoring, community $1,500 • PFAS/VOC chemicals and lab supplies, $8,000 • Vacuum cleaner with dust bags, $364 • 200 glass fibre filters $200 and 30 reams of copy papers $120	$24,109
Contractual	• Micropurchases - community partners @$500 = $15,000 • Contract with Lab for VOC analysis @$146*130 = $18,980	$42,100
Construction		$0
Indirect Costs	Federal Indirect Cost Rate x Personnel = Indirect Costs (Federal Negotiated Indirect Cost Rate)	$114,300
Other	• Subawards to Bard College for bioaerosol monitoring = $65,881 • Community meeting logistics @$1,200/year = $3,600 • Participant Support Costs ($40 gift cards to 75 home participants for each visitX 150 visits = $6,000 • Shipping = $1,000 • Tuition for one graduate student = $35,361	
		$499,944

ED_016126_00001118-00003

ii. Environmental Results / Logic Model:

Resources/ inputs	**Activities**	**Outputs**	**Audience**	**Short-term Outcomes** (6-12 months)	**Intermediate Outcomes** (12-24 months)	**Long-term Outcomes** (2+ years)
• Staff time • Graduate and undergraduate students • Community partners • Industry • Volunteers	• Determine heterogeneity in indoor and outdoor air toxics at urban and rural neighborhoods • Measure bioaerosols at urban and rural neighborhoods • Determine heterogeneity in indoor and outdoor emerging contaminants • Determine plume tracking and pollution hotspots across communities • Identify indoor-generated and near-field outdoor sources • Identify local source impacts • Determine health risks of indoor air toxics and emerging contaminants	• At least 6 urban and 6 rural community assessments will be performed. • At least 85 homes (two visits in 65 homes before and after intervention) will be reached. • At least 25 homes will be assessed for mold issues. • high precision real-time data of air toxics (10-min) and methane (5-sec) from indoor and mobile monitoring • 155 bioaerosol (endotoxin, glucan) samples, 130 passive VOC 24-h samples, 85 weekly PFAS air samples, 170 PFAS dust samples • 85 resident participants in a survey to identify community needs • Community participants' report to 85 individuals • Promotion of community engagement	• Community residents • Community organizations • Industry • City, state, local government • universities	• Increased in number of residents aware of indoor air quality issues • Increased trust and working relationship • Increased access to information and tools for understanding reduction of indoor air pollution and public health risks • Increased knowledge and understanding of near-field (indoors, outdoors) air pollution sources • Increase in number of local stakeholders committed to project and addressing communities indoor air quality issues	• Increased critical thinking ability and decision making about air quality issues • Community neighborhoods start making decisions to improve air quality • Specific actions and/or practices are adopted by communities to improve air quality • Assessment of actions to improve indoor air quality • Increase in number of residents that use air purifiers to reduce indoor air toxics and other pollutants	• Improved understanding of outdoor and indoor air quality issues • Improved environmental stewardship and community action to reduce air emissions • Reduction of indoor air concentrations and human exposure to certain pollutants. • Reduction in asthma-related hospital visits due to intervention measures. • Reduction of asthma rates among community residents

ED_016126_00001118-00004

iii. Letters of Commitment from Partners:
Subawardee (Academic): Bard College, Dr. Elias Dueker

BARD

A College of the Liberal Arts and Sciences *Division of Science, Mathematics, and Computing*

The Research Foundation for SUNY

Redacted

March 22, 2023

RE: Partnership letter of Commitment for the Environmental Justice Collaborative Problem-solving (EJCPS) Cooperative Agreement Program (RFA Number: EPA-R-OEJECR-OCS-23-01)

Dear Aynul,

If the proposal submitted by the Research Foundation for SUNY, entitled **"Monitoring and reduction of indoor air toxics, bioaerosols and emerging contaminants in urban and rural underserved neighborhoods in New York State"** is selected for funding by the EPA, Bard's Community Sciences Lab, as part of the Center for Environmental Science and Humanities, will collaborate and commit resources as outlined in the Project Description of the proposal.

Specifically, our role would be to:

- At all locations, support and interpret bioaerosol sampling (bacterial and fungal).
- In partnership with the Hudson Valley Air Quality Coalition (HVAQ), assist in neighborhood selection/home recruitment in the Hudson Valley.
- In the Hudson Valley (Kingston, Red Hook, Annandale-on-Hudson, Newburgh, Poughkeepsie), conduct intervention study (as outlined in the proposal) with 50 site visits (25 houses visited before and after intervention).
- Involve undergraduate student interns in microscopic observations of aerosol particles in Hudson Valley homes.
- Support data collection and help researchers to interpret with a clear community context (in partnership with HVAQ).
- Assist in educating the community and raising awareness about indoor and outdoor air quality issues.

Additionally, we will provide $3,000 in cost-share with the grant funds to 4 student interns (as outlined in the proposal details) in being trained on and performing microscopic observations and analyses of aerosol samples from Hudson Valley homes.

We are excited about the potential outcomes of this EPA project and look forward to working with the Research Foundation for SUNY on this and other air quality-focused projects in the future.

Sincerely,

M Elias Dueker

M. Elias Dueker

RE: Partnership letter of Commitment for the Environmental Justice Collaborative Problem-solving (EJCPS) Cooperative Agreement Program (RFA Number: EPA-R-OEJECR-OCS-23-01)

Dear Dr. Bari,

I'm writing on behalf of Entanglement Technologies, Inc. in support of your proposal, titled "**Monitoring and reduction of indoor air toxics, bioaerosols and emerging contaminants in urban and rural underserved neighborhoods in New York State**" for the EPA's Environmental Justice Collaborative Problem-solving (EJCPS) Cooperative Agreement Program.

Entanglement Technologies intends to support this work through the use of our AROMA-VOC analyzer for monitoring air toxics and methane at indoor homes and for mobile hotspot identification across underserved neighborhoods throughout the duration of the project. We will be available to answer any questions that arise and assist with data analysis for the indoor and mobile monitoring study.

We look forward to working with you to provide rapid and sensitive hazardous air pollutant measurements to better understand air toxics exposure across underserved neighborhoods in New York. Please let me know if you have any specific questions at amarcotte@entanglementtech.com.

Thank you.

Sincerely,

Aurelie Marcotte, Ph.D.
Director of Sales and Business Development

Community partners

Hudson Valley Air Quality Coalition (HVAQ):

March 31, 2023

The Research Foundation for SUNY
University at Albany
1400 Washington Avenue, Albany, NY 12222

RE: **Partnership letter of Commitment for the Environmental Justice Collaborative Problem-solving (EJCPS) Cooperative Agreement Program** (RFA Number: EPA-R-OEJECR-OCS-23-01)

Dear Aynul:

Here at the Hudson Valley Air Quality Coalition (HVAQ), we are a small coalition of building scientists, environmental scientists, community organizers and leaders focused on addressing the pressing environmental justice issue of indoor and outdoor air pollution. We are very happy to support and participate in the important work of SUNY Albany and Bard College to gain greater knowledge of neighborhood-scale indoor and outdoor air quality in the Hudson Valley.

If the proposal submitted by the Research Foundation for SUNY, entitled "**Monitoring and reduction of indoor air toxics, bioaerosols and emerging contaminants in urban and rural underserved neighborhoods in New York State**" is selected for funding by the EPA, it is our intent to collaborate as outlined in the Project Description of the proposal.

Specifically, our role would be to:

- Assist in conducting questionnaire surveys to understand community needs and concerns and conducting polls for feedback to understand community priorities
- Assist in planning and designing outdoor/indoor air monitoring at community neighborhoods
- Assist in neighborhood selection and home recruitment for both outdoor and indoor air quality monitoring
- Support data collection and help researchers to interpret with the community context
- Assist in arranging community meetings/webinars for educating the community and raising awareness about air quality issues
- Assist in measuring performance of the project

In return, as a member of this partnership, we look forward to increasing community awareness through communicating the data collected through this research project, which will include a deeper understanding of pollutants levels, an identification of local sources and reduction measures for certain air pollutants, and promoting environmental stewardship to improve air quality and the health of residents in our community. We look forward to working with you on this important project for our community and the rest of the Hudson Valley. Thank you!

Sincerely,

Founding Members of HVAQ:
Ana Texeira, Community Leader and Organizer
Desiree Lyle, Building Scientist
Judith Karpova, Building Scientist
Lorraine Farina, Community Leader and Organizer
Eli Dueker, Environmental Microbiologist

RE: Partnership letter of Commitment for the Environmental Justice Collaborative Problem-solving (EJCPS) Cooperative Agreement Program (RFA Number: EPA-R-OEJECR-OCS-23-01)

April 4, 2023

To whom it may concern:
We are happy to support the important work of the Hudson Valley Air Quality Coalition and SUNY Albany and its partners to gain greater knowledge of neighborhood-scale indoor and outdoor air quality in the Hudson Valley. If the proposal submitted by the Research Foundation for SUNY, entitled "Monitoring and reduction of indoor air toxics, bioaerosols and emerging contaminants in urban and rural underserved neighborhoods in New York State" is selected for funding by the EPA, we will be serving as fiscal sponsor for HVAQ's $10,000 stipend as they fulfill their role (outreach, public education, air quality studies), as outlined in the Project Description of the proposal.

We look forward to working with you on this important project for our community and the rest of the Hudson Valley.

Thank you!

Sincerely,

Jess Mullen

RE: Partnership letter of Commitment for the Environmental Justice Collaborative Problem-solving (EJCPS) Cooperative Agreement Program (RFA Number: EPA-R-OEJECR-OCS-23-01)

To whom it may concern:

Mid-Hudson Energy Transition is happy to support the important work of the Hudson Valley Air Quality Coalition and SUNY Albany and its partners to gain greater knowledge of neighborhood-scale indoor and outdoor air quality in the Hudson Valley. If the proposal submitted by the Research Foundation for SUNY, entitled "Promoting sustainable air quality at underserved neighborhoods in New York State through low-cost sensor monitoring, integrated measurement and community engagement" is selected for funding by the EPA, we will be working cooperatively with HVAQ to implement the terms of the grant as outlined in the Project Description of the proposal.

Mid-Hudson Energy Transition is a 501(c)3 organization dedicated to empowering municipalities, their residents, and businesses to own and share renewable energy, create healthier buildings, and strengthen the resilience of the Hudson Valley in the face of climate change. MHET serves as the Administrator for the Community Choice Aggregation program of the City of Kingston, "Kingston Community Energy." KCE is realizing an advanced version of CCA that looks beyond the provision of electrical service to include opt-out community solar for *all* residents, including low and middle income residents of historically marginalized communities, and that places special emphasis on the critical importance of helping these communities improve the energy efficiency of their buildings – a process in which it is essential to first address any existing indoor air quality problems, which will otherwise be exacerbated by energy efficiency measures to the detriment and endangerment of their occupants.

We are excited about the potential outcomes of this EPA project and look forward to supporting HVAQ's work and that of the Research Foundation for SUNY on this and other air quality-focused projects in the future. We look forward to working with you on this important project for our community and the rest of the Hudson Valley.

Sincerely,

Jasmine Graham

Re: The Research Foundation of State University of New York
Confirmation of IRC 501(c)(3) Tax Exempt Status

To Whom It May Concern:

The Research Foundation for The State University of New York (the "Foundation") is a private, non-profit corporation and is an organization described in Internal Revenue Code Section 501(c)(3). Enclosed for your information is the April 11, 2008, determination letter in which the Internal Revenue Service concluded the Foundation qualified for exemption from federal income taxes. As of the date of this letter, the determination remains unchanged.

The Foundation has been a tax-exempt organization under Internal Revenue Code since its inception in 1951.

The Foundation's public charity status is identified as an organization exempt from Federal Income Tax under Internal Revenue Code Section 509(a)(1) of the code.

If you have further questions concerning this subject, please do not hesitate to contact me at Ex. 6 Personal Privacy (PP)

Sincerely,

DocuSigned by:
C1D6611B11C8408

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Unified Vailsburg Services Organization (UVSO)

Address: 1044 South Orange Avenue

City: Newark

State: NJ: New Jersey Zip Code: 07106-1723

B. Unique Entity Identifier (UEI): Ex. 6 Personal Privacy (PP)

C. Applicant/Recipient Point of Contact

Name: SanDonna Jones

Phone: Ex. 6 - Personal Privacy (PP)

Email: sbjones@uvso.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NONE

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NONE

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

NONE

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
SanDonna B Jones	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

BUDGET JUSTIFICATION FOR UVSO

PERSONNEL
Senior Personnel

SanDonna Jones, Executive Director will charge Ex. 6 Personal Privacy (PP) of her time per year to the project, with the remainder of time provided in-kind. Her role would be overall program management which includes: partner coordination with Columbia University, the City of Newark, La Casa de Don Pedro and others; as well as delegation of UVSO staff to be engaged in the project.

Michael Morrison, Community Engagement Manager will devote a minimum of Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) of his time per year to the project, with any additional time provided in-kind. He will directly oversee the two (2) Lead Safety Organizers (LSOs) and help coordinate the series of community meetings.

Other Personnel

TBH, Lead Safety Organizers (LSOs) will devote 100% ($55,000/year X 2 persons) of their time to co-facilitate the community meetings as well as contact all medical offices, clinics, and hospitals where pregnant women from Vailsburg are likely to obtain prenatal care, most of them located outside Vailsburg but in surrounding areas. They will train residents on the Lumetallix kits as well as deploy Viken Pb200i x-ray fluorescence (XRF) analyzers to verify lead detection results.

Total Salaries is $151,776/year for a total of $303,552.

FRINGE BENEFITS
The current fringe benefit rate for our organization is 20% to be accessed on all salaries at $25,296/year for a total of $50,592. This includes: FICA and related payroll costs, health, and dental benefits.

EQUIPMENT
XRF Analyzers (2):
A total of $35,590 in Year 1 to purchase two (2) XRF Analyzers to verify the results of the Lumetallix testing by residents.

PARTICICIPANT SUPPORT COSTS
Incentives (tokens of appreciation) will be purchased for residents for their participation. A total of $6,090 for an estimated 1,000 participants ($3,000 in Year 1 & $3,090 in Year 2) will be allocated.

SUPPLIES
A total of 1,000 tabletop vacuum cleaners (one for each participant) will be purchased so that residents can collect dust particles that would be subsequently tested for the presence of lead. This totals $15,000 ($15 each).

CONTRACTUAL
A total of $99,452 to be allocated (subcontracted) to academic partner Columbia University. A total of $53,099 in Year 1 and $46,353 in Year 2 to perform the following research activities:

- Training of Lead Safety Organizers (LSOs): Academic partner Columbia University will train the two LSOs hired by UVSO to use the Lumetallix kit for testing lead in paint and dust and collecting samples for laboratory comparisons.
- Laboratory confirmation: Paint and house dust samples provided by the LSOs will be digested and analyzed in the laboratory by inductively-coupled plasma mass spectroscopy after acid digestion at Columbia University.
- Blood-lead data analysis: Columbia University will compare Vailsburg blood-level data starting in 2016 to that of surrounding zip code areas to test for any potential change in response to the lead testing by members of the Vailsburg neighborhood.

The itemized budget and budget justification for Columbia University are attached.

OTHER DIRECT COSTS

Professional Development
Two (2) Lead Safety Organizers will enroll in the Rutgers University School of Public Health's New Jersey Lead Inspector and Risk Assessor Certification Course. This allocation includes $850 each for two (2) participants (totaling $1,700).

Following the Rutgers certification course, the two (2) LSOs will take the New Jersey Lead Certification exam ($150 for 2 participants) (totaling $300).

Printing and Production:
Collateral for the initiative will be designed and printed so that residents have pertinent information regarding the project's goals and objectives, importance of their participation, and expansive community benefits. A total of $3,570 will be allocated.

Direct costs are $264,035 in Year 1 and $201,219 in Year 2 for a total of $465,254.

INDIRECT COSTS
Indirect costs are calculated at the de minimis rate of 10% on Modified Total Direct Costs (*MTDC). **The totals are $19,891 in Year 1 and $15,504 in Year 2 for a total of $35,395**.

The total (Direct Costs + Indirect Costs) of this request is $499,997: $283,600 in Year 1 and $216,396 in Year 2.

**Modified Total Direct Cost (MTDC) - MTDC means all direct salaries and wages, applicable fringe benefits, materials and supplies, services, travel, and up to the first $25,000 of each*

subaward (regardless of the period of performance of the subawards under the award). MTDC excludes equipment, capital expenditures, charges for patient care, rental costs, tuition remission, scholarships and fellowships, participant support costs and the portion of each subaward in excess of $25,000. Other items may only be excluded when necessary to avoid a serious inequity in the distribution of indirect costs, and with the approval of the cognizant agency for indirect costs.

Budget Justification – Columbia University

Salaries:

Senior Personnel

Alexander van Geen, Lamont Research Professor, PI: a researcher at Columbia University's Lamont-Doherty Earth Observatory will serve as PI at no cost to the project.

Brendan O'Flaherty, Professor, PI: a professor at Columbia University's Department of Economics will serve as PI at no cost to the project.

Pam Factor-Litvak, Professor, PI: a professor at Columbia University's Mailman School of Public Health will serve as PI at no cost to the project.

Other Personnel

TBH, Staff Associate: Support is requested to cover the salary of an experienced laboratory assistant for 2.5 months in Year 1 2.0 months in Year 2 of the project. This person will be responsible for preparing the field kits and supplying the labeled sample bags needed for collecting paint chips, house dust, and soil. Most of these materials will be analyzed by the UVSO-hired LSO's by X-ray fluorescence but a subset will be digested for comparison with measurements by inductively-coupled plasma mass spectrometry at Columbia University. Including 29.3% in fringe benefits, the total salary request amounts to $24,647 and $20,309 in Year 1 and Year 2, respectively.

There is an estimated 3% increase per year on salaries.

Columbia University's fiscal year is from July 1 to June 30.

Fringe Benefits

Fringe benefits are budgeted at Columbia University's government-negotiated rate of 29.3% for regular full-time employees effective July 1, 2022 and are accessed on all the salaries (with the exception of the GRA stipend which is exempt from Fringe) listed above based on position.

Other Direct Costs

Materials and Supplies:

In each of Year 1 and Year 2, we request a total of $9,500 per year for materials and supplies costs. This includes a total of $7,500 per year to purchase 500 Lumetallix kits ($7,500 for 500 kits at $15 ea.) and $2,000 per year for miscellaneous laboratory supplies including ultra-clean acids and NIST reference materials.

Facilities & Administrative Costs

Indirect Costs:

Sponsored Projects Administration certifies that the Primary Places of Performance at Lamont-Doherty Earth Observatory for the proposed research supported by a subaward from the EPA grant to UVSO will occur at 61 Route 9W P. O. Box 1000 Palisades, NY 10964, at the Comer Geochemistry Building Rooms 131 and B12, located on the LDEO campus, and that the appropriate F&A rate is 55.5%.

Total Budget: $53,099 in Year 1, $46,353 in Year 2, total for both years of $99,452.

CITY OF NEWARK

April 13, 2023

SanDonna B. Jones
Executive Director
Unified Vailsburg Services Organization
1044 South Orange Avenue
Newark, New Jersey 07106

Dear Mrs. Jones:

On behalf of the Newark Department of Health and Community Wellness, I am writing to express our commitment to partner with Unified Vailsburg Services Organization (UVSO) and other partners to enhance the childhood lead poison prevention efforts in Newark, particularly as part of the proposed pilot in the Vailsburg community of the West Ward.

For over 20 years, the Department of Health has been the recipient of Federal and, now, State grants that provide funding to screen children for lead exposure. The Health Department conduct home inspections for lead paint hazards, provide nurse case management for children with elevated blood lead levels, and to complete home abatements to eliminate lead hazards in residential units throughout the City of Newark.

If the proposal submitted by UVSO to the EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program it's funded, it is my intent to collaborate as detailed in the proposal. Specifically, my department will follow-up on requests for inspection and, where needed, mitigate lead hazards in Vailsburg residents' homes relayed through your organization. Additionally, we will coordinate with UVSO to obtain the necessary sets of paired x-ray fluorescence (XRF) and lead kit measurements to evaluate the reliability of the kit. Furthermore, the Department of Health commit to provide aggregated (de- identified) data or EBLL results for Vailsburg and surrounding zip code areas for 2016-2025.

We are committed to this work and look forward to improving the health and wellness of our residents and families.

Respectfully,

Ketlen Baptiste Alsbrook, Director and CEO
Department of Health and Community Wellness

SanDonna B. Jones, Executive Director
Unified Vailsburg Services Organization
1044 South Orange Avenue
Newark, NJ 07106 US

Dear Ms. Jones,

I am writing to express Columbia University's commitment to support the "Initiatives to Reduce Childhood Lead Exposure (CIRCLE)" project that your organization has submitted to EPA's Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. The project fits squarely within an university-wide initiative, which I direct, Columbia World Projects, that aims to forge a closer and more useful connection between Columbia University's vast research capabilities and the needs of the world.

As a health scientist, I understand the serious public health challenge that childhood lead exposure presents for many communities in the US, particularly those with low socioeconomic status and large populations of migrants and minorities. Despite the phasing out of leaded gasoline and the banning of lead-based paint, many children are still at risk due to poor housing, proximity to major roadways, and outdated lead-pipe-based water supplies.

Columbia University has a team of interdisciplinary experts who are ideally suited to partner with you on this project. Professors Pam Factor-Litvak from the Mailman School of Public Health, Brendan O'Flaherty from the Department of Economics, and Alexander van Geen from the Lamont-Doherty Earth Observatory are uniquely suited to support Unified Vailsburg Services Organization in addressing the issue of lead exposure in an underserved community.

Your project's focus on distributing a field kit to test paint and house dust for lead in pregnant women is innovative. If blood-lead levels in children in the intervention areas decline more rapidly over time relative to surrounding areas, your approach could become a model for greater community participation in addressing environmental issues throughout the country.

We look forward to working with Unified Vailsburg Services Organization on this important project and making a positive impact on the health of children in underserved communities.

Sincerely,

Wafaa El-Sadr, MD, MPH, MPA
Executive Vice President, Columbia Global
University Professor of Epidemiology and Medicine
Mathilde Krim-amfAR Chair of Global Health
Director, ICAP at Columbia University

April 10, 2023

Dear Ms. Jones,

I write to express my support for the proposal to the EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program entitled "Community Initiatives to Reduce Childhood Lead Exposure (CIRCLE)" led by Unified Vailsburg Services Organization (UVSO) to enhance the childhood lead poison prevention efforts in Newark, particularly in the city's Vailsburg neighborhood.

The Newark Environmental Commission is made up of Newark residents who serve in a volunteer capacity. The Commission is charged to advise the Mayor and the Municipal Council on issues of the environment and sustainability. Members are nominated or can apply to open positions and are appointed by the Municipal Council. They meet monthly and provide recommendations to the City of Newark about environmental, sustainability, and quality of life issues relevant to the City of Newark.

The Commission is proud to have worked with environmental justice groups throughout New Jersey to gain passage of Newark's Environmental Justice and Cumulative Impacts Ordinance, the first of its kind in the United States. This ground-breaking law requires companies and other applicants that want to work in Newark to prove they are not adding to Newark's existing pollution. The law highlights the fact that Newark has long been subject to extreme levels of industrial pollution that is harmful to the health of those who live and work here.

If the proposal submitted by UVSO with partners to EPA is funded, it is my intent to maximize its impact by bringing it to the attention of my fellow Commissioners and, if they agree, encourage you to refer to our endorsement at community meetings and on flyers distributed in the Vailsburg neighborhood to encourage participation. The Commission is well aware that exposure of children to lead in the Vailsburg neighborhood is higher than in surrounding areas and that such exposure has lifelong implications.

We very much hope that this project is funded as it is bound to benefit residents and families of Newark.

Sincerely,

WFVH

SanDonna B. Jones
Executive Director
Unified Vailsburg Services Organization
1044 South Orange Avenue
Newark, New Jersey 07106

Dear SanDonna:

On behalf of La Casa de Don Pedro, I am writing to express our commitment to collaborate with Unified Vailsburg Services Organization (UVSO) and other partners to enhance the childhood lead poison prevention efforts in Newark, particularly as part of the proposed pilot in the Vailsburg community of the West Ward.

As you know, La Casa is a multi-service community development corporation that serves thousands of children and families daily through its various programs and services. We are a grantee of the New Jersey Department of Community Affairs' (DCA) Lead-Safe Home Remediation and HUD Lead-Based Paint Hazard Reduction Programs. Although La Casa is based in the North Ward of Newark, we are one of the designated DCA providers serving Essex County. The purpose of the program is to identify and remediate lead-based paint hazards via interim controls and lead abatement to prevent elevated blood lead levels in children and pregnant women. The program targets municipalities in New Jersey with high reported incidences of elevated blood lead levels in children under age six. Needless to say, the Vailsburg neighborhood that UVSO serves has recorded one of the highest blood lead levels in the Tri-State area.

If the proposal submitted by UVSO, in collaboration with Columbia University, to the EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program is funded, it is La Casa's intent to collaborate however needed in the remediation of eligible homes.

We remain committed to this work and look forward to possibly working with UVSO in improving the health and wellness of our residents and families.

Respectfully,

Peter Rosario

Subject: Letter of Support for LumetalliX and UVSO Project Collaboration

Dear Ms. Jones,

We are pleased to express our enthusiasm for collaborating with Unified Vailsburg Services Organization (UVSO) in the fight against Lead poisoning in Newark. This initiative was brought to our attention by Lex van Geen at Columbia University, with whom we have been working on previous projects to empower local communities to protect their health through accessible Lead testing.

LumetalliX offers the most user-friendly, rapid, and reliable Lead-test on the market. Considering that 1 in 3 children worldwide have elevated blood Lead levels, it is evident that the key to addressing this crisis is enabling individuals to perform self-testing with a reliable yet affordable test. Our Lead detection solution accomplishes this by making Lead directly observable to the naked eye, glowing bright green upon detection.

The key components of the LumetalliX test kit are a harmless spray and a specialized flashlight designed for easy and safe application by the general public. Users can simply spray on paint, dust, plastic, ceramics, and other surfaces to see potential Lead light up.

Our mission is to make Lead testing available to everyone, which aligns seamlessly with UVSO's efforts to empower communities to safeguard themselves and create a healthier future for their children. We are eager to support this project in any way we can, offering test kits at an 80% discount and providing scientific and technical expertise at no extra cost.

We wish UVSO the best of luck in securing funding for this project and eagerly anticipate our collaboration in creating safer homes with reduced Lead exposure.

Warm regards,

Lukas Helmbrecht
CEO & Co-Founder

Unified Vailsburg Services
40-42 Richelieu Ter.
Newark, NJ 07106-1634

Dear Sir or Madam:

This letter is in response to your request for a copy of your organization's determination letter. This letter will take the place of the copy you requested.

Our records indicate that a determination letter issued in August 1973 granted your organization exemption from federal income tax under section 501(c)(3) of the Internal Revenue Code. That letter is still in effect.

Based on information subsequently submitted, we classified your organization as one that is not a private foundation within the meaning of section 509(a) of the Code because it is an organization described in section 509(a)(1) and 170(b)(1)(A)(vi).

This classification was based on the assumption that your organization's operations would continue as stated in the application. If your organization's sources of support, or its character, method of operations, or purposes have changed, please let us know so we can consider the effect of the change on the exempt status and foundation status of your organization.

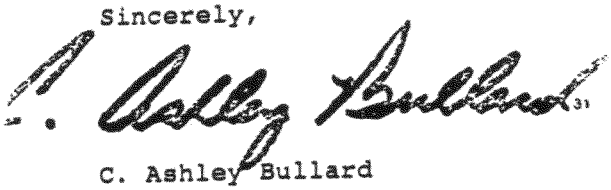
Your organization is required to file Form 990, Return of Organization Exempt from Income Tax, only if its gross receipts each year are normally more than $25,000. If a return is required, it must be filed by the 15th day of the fifth month after the end of the organization's annual accounting period. The law imposes a penalty of $10 a day, up to a maximum of $5,000, when a return is filed late, unless there is reasonable cause for the delay.

All exempt organizations (unless specifically excluded) are liable for taxes under the Federal Insurance Contributions Act (social security taxes) on remuneration of $100 or more paid to each employee during a calendar year. Your organization is not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Organizations that are not private foundations are not subject to the excise taxes under Chapter 42 of the Code. However, these organizations are not automatically exempt from other federal excise taxes.

Unified Vailsburg Services
23-7304852

Donors may deduct contributions to your organization as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to your organization or for its use are deductible for federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.



Your organization is not required to file federal income tax returns unless it is subject to the tax on unrelated business income under section 511 of the Code. If your organization is subject to this tax, it must file an income tax return on the Form 990-T, Exempt Organization Business Income Tax Return. In this letter, we are not determining whether any of your organization's present or proposed activities are unrelated trade or business as defined in section 513 of the Code.

Because this letter could help resolve any questions about your organization's exempt status and foundation status, you should keep it with the organization's permanent records.

Please direct any questions to the person identified in the letterhead above.

This letter affirms your organization's exempt status.

Sincerely,

C. Ashley Bullard
District Director

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Urban Green Council

Address: 55 Broad Street 9th floor

City: NEW YORK

State: NY: New York Zip Code: 10004

B. Unique Entity Identifier (UEI): N8JJYV1PJZ56

C. Applicant/Recipient Point of Contact

Name: Christina Anjesky

Phone: Ex. 6 Personal Privacy (PP)

Email: ca@urbangreencouncil.org

Title: Senior Director, Strategy

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

none

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

none

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

none

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☒ Yes	☐ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☐ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☐ Yes	☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

not applicable

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

not applicable

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Christina Anjesky	Senior Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

APPLICATION WORK PLAN

1.0 Program Objectives

a. Project Summary Page

Project Title: Community Initiatives to Reduce Childhood Lead Exposure (CIRCLE)

Project Location: Vailsburg neighborhood, Newark, NJ 070106

Applicant information: Unified Vailsburg Services Organization Ex. 6 - Personal Privacy (PP)
1044 South Orange Avenue Newark, NJ 07106 US
SanDonna B. Jones, Executive Director, Ex. 6 - Personal Privacy (PP)

Description of community-based organization (CBO):

Unified Vailsburg Services Organization (UVSO) was founded as an ecumenical coalition with a mission to stabilize the neighborhood in 1972 and now serves an average of 1,200 Vailsburg residents every day through a wide range of programs. These include: two (2) preschool centers, two (2) Early Head Start centers, two (2) public school-based after-school programs, a teen center, community organizing, neighborhood planning, affordable housing management, and a variety of extracurricular activities at no cost to participating families. This application is not intended for the Small CBO Set Aside Track.

Project Abstract

Background: Half a million US children, often living in low socio-economic status communities, still ingest lead in the form of paint chips, dust, soil, or water.

Main Objective: The goal of this project is to evaluate if engaging impacted households and communities directly in testing paint and house dust using a kit helps reduce lead exposure.

Activities: We will evaluate this approach in the Vailsburg neighborhood (pop. 35,000) of Newark, New Jersey, where lead exposure has historically been high. UVSO will offer a kit for testing lead and house dust to all women who give birth in Vailsburg over the study period. Follow-up will be provided to interpret kit results, along with X-ray fluorescence spectroscopy verification by certified lead inspectors and facilitation of City of Newark financing of lead remediation.

Outputs: We aim for participation of a majority of the ~500 women giving birth in Vailsburg over a 12-month period and expect a similar number of requests from families with small children. Assuming an average of 10 tests per home, the project will yield up to 10,000 kit measurements, with follow-up required by City of Newark inspectors in an estimated 10% of homes.

Outcomes: We expect average blood-lead levels reported by pediatricians and hospitals in Vailsburg to decline to the average of neighboring areas over the study period. If confirmed by analysis with our academic partner, such an outcome will provide an argument for expanding community-based testing for lead-based paint and dust throughout the US.

Special Consideration: The project will lead to a Health Impact Assessment of the intervention.

Environmental issue: Child exposure to lead-based paint in disproportionately impacted area.

Project Type: Training, technical evaluation, citizen science, and health impact assessment.

List of Project Partners: Unified Vailsburg Services Organization, City of Newark Department of Health and Community Wellness, Newark Environmental Commission, La Casa de Don Pedro, and Columbia University.

Quality Assurance Project Plan: This will be required as new data will be collected.

b. Environmental and Public Health information of the Underserved Community

Vailsburg was annexed by Newark in 1905 as an independent suburb, and is now the westernmost neighborhood within the city, separated from the rest of Newark by the Garden State Parkway and the former Pabst brewery. There is a large stock of single-family and two-family housing units, including many Dutch Colonial and Victorian inspired homes, as well as the Ivy Hill Park Apartments, New Jersey's largest rental complex. Vailsburg has some abandoned properties and other signs of urban decay, but there are also many well-maintained homes and streets. Much of Vailsburg's current population are immigrants from West Africa and West Indies, with many Haitian, Guyanese and Jamaican establishments. There is also a growing population of immigrants from Ghana, Nigeria and Liberia in the neighborhood, as well as Ukrainians. There are several charter schools and four (4) elementary (K-8) schools serving Vailsburg, which include Ivy Hill Elementary School, Lincoln Elementary School, Mount Vernon Elementary School, and Speedway Academies, but no high school.

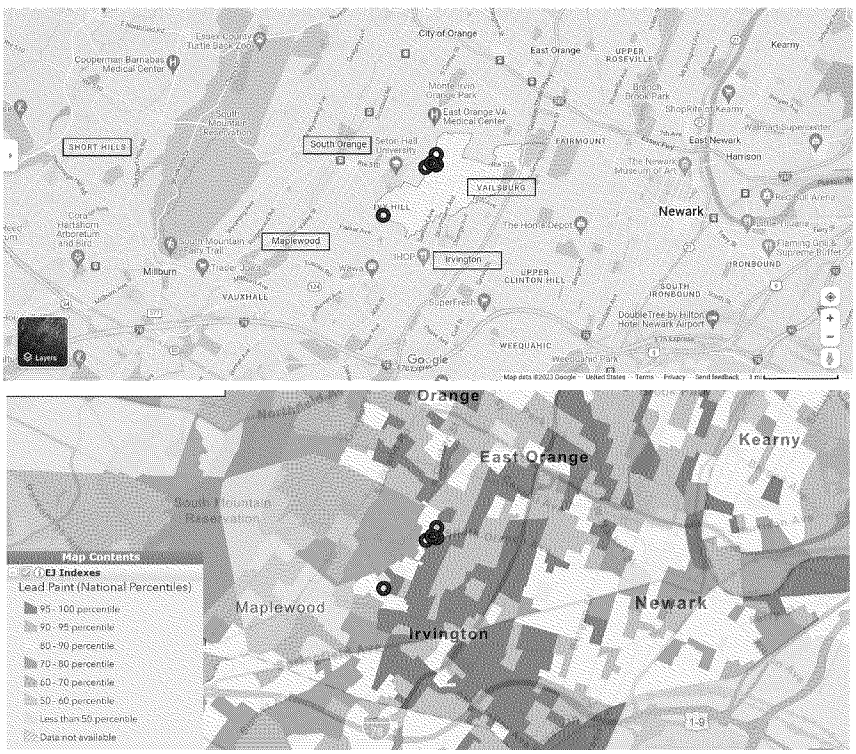

Figure 1. (a) Google Map of Newark, New Jersey, centered on the Vailsburg neighborhood, outlined in red. The towns of Irvington, South Orange, Maplewood, and Short Hills referred to later in the text and Figure 2 are also shown here. (b) Occurrence of lead paint, as displayed by the EPA EJScreen Mapping Tool. The location of UVSO facilities is shown by red circles.

<u>History of child exposure to lead in the US and in Vailsburg specifically:</u>

The US banned sales of lead-based paint for residential use in 1978 and subsequently phased out the addition of lead to gasoline until its complete ban in 1996. As a result of both these interventions, the proportion of children under six with blood-lead concentrations >5 µg/dL in the US declined dramatically from >99% to <1% in 40 years (Pirkle et al., 1994; Tsoi et al., 2016). This is good news because early-life exposure to lead is now clearly implicated in diminished intellectual function in children, learning and behavioral difficulties at school, juvenile detention, as well as reduced income and increased hypertension and cardiovascular disease later in life (Grosse et al., 2002; Navas-Acien et al., 2007; Tsoi et al., 2016; Roberts et al., 2017; Aizer and Curry, 2019).

The dramatic decline does not mean children's lead exposure has ended everywhere in the

country. One example is the neighborhood of Vailsburg (zip code 07106) in Newark, New Jersey, where UVSO is based and which is the focus of this project (Fig. 1). Despite the dramatic reduction in lead exposure recorded throughout the US including Vailsburg, a plateau was reached around 2012 (Fig. 2). As recently as 2015, the proportion of children with blood levels >5 µg/dL in Vailsburg and one adjacent zip code area to the south (Irvington, 07111) was 8%, twice as high as the 4% proportion in the two adjacent wealthier zip code areas (South Orange, 07079; Maplewood, 07040, Fig. 2). In 2015 and several previous years, not one child similarly exposed to lead was recorded in nearby Short Hills (zip code 07078), one of the wealthiest areas in the US. The spatial contrast in child lead exposure may be even more pronounced as the proportion of children whose blood is tested in Vailsburg is lower than in other parts of Newark. In 2015, the proportion in Vailsburg was 40% (ACNJ, 2018), compared to 70% in the adjacent Clinton Hill neighborhood (zip code 07108) which has a similar proportion of people of color.

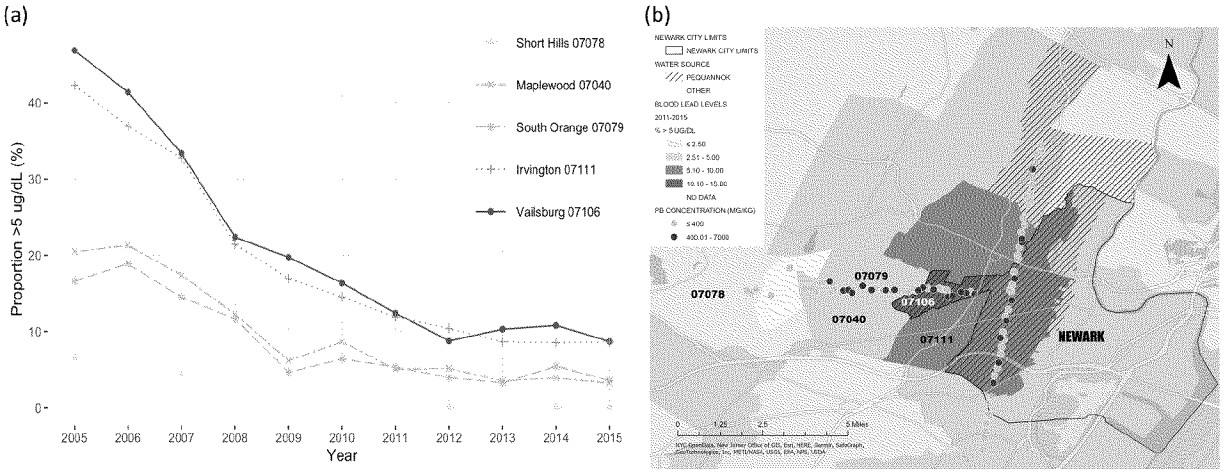

Figure 2. (a) Time series showing a declining proportion of children under six with blood-lead levels >5 µg/dL in Vailsburg, New Jersey, and 3 additional zip code areas. (b) Map of Vailsburg and surrounding areas showing the proportion of children under six exposed to lead. Also shown are soil-lead data obtained by our academic partner relative to the EPA standard of 400 ppm for bare soil in residential areas where children play. Diagonal hatching shows the area served by the Pequannock municipal water treatment plant (CDM Smith, 2018).

According to the Centers for Disease Control and Prevention (CDC), about 500,000 children in the US, often living in low socio-economic status neighborhoods, still ingest chips of old lead-based paint, play in areas where soil is contaminated with legacy lead from gasoline and other sources, or drink water supplied by lead pipes. Since no level of exposure to lead is safe, the CDC introduced in 2012 a blood-lead "reference value" corresponding to the 97.5th percentile of blood-lead values among US children under six. This reference level was lowered in 2021 from 5 to 3.5 µg/dL to reflect an overall decline in lead exposure in the US population.

Based on data from 21 states which responded to FOIA requests filed by Reuters in their investigation into the ongoing problem of lead exposure, the Reuters team identified a total of 2,606 census tracts and 278 zip code areas where the proportion of children with blood-lead levels over 5 µg/dL was greater than 5% between 2005-15 (Pell and Schneyer, 2016). There are still hundreds of communities around the country that are hot spots of childhood lead exposure similar to Vailsburg.

The main sources of continuing lead exposure are broadly known but the specifics vary

considerably across regions, towns, and even from one household to the next (Landrigan et al., 2018). The importance of preventing infants from ingesting lead-based paint chips and dust has long been recognized but still occurs frequently in pre-1978 housing (Lanphear et al. 1998). Elevated lead levels in tap water point to another potentially significant and highly variable source (Pieper et al., 2017), as documented in a number of US cities such as Washington DC, Flint, Michigan, and more recently Newark, New Jersey. Vailsburg is served by the Pequannock water supply system that failed to maintain a sufficiently high pH in 2016-18 and, as a result, exposed a large number of residents to elevated levels of lead released by corroding pipes, including a large proportion of lead service lines. This temporary failure has been linked to an increase in underweight births in the Pequannock service area relative to other surrounding service areas (Dave and Yan, 2022). With the massive replacement of lead service lines recently completed throughout Newark, this source of lead exposure to Vailsburg and more generally Newark residents may no longer be significant.

Figure 3. Maps of a portion of the state of New Jersey extending from Newark to Paterson. (a) Proportion of children under six tested in 2005-15 with blood-lead levels >5 µg/dL, the CDC reference value until it was lowered to 3.5 µg/dL in 2021. Compiled by investigative reporters from Reuters. Also shown are soil-lead data obtained by this proposal's academic partner, Columbia University, relative to the EPA standard for bare soil in play areas of 400 mg/kg (ppm) lead. (b) US Census Bureau's American Community Survey 5-year summary estimates of the proportion of individuals other than non-Hispanic white-alone individuals.From EJScreen.

There is also considerable evidence of a link between child lead exposure and playing in contaminated soil and/or dust from soil, although this is less frequently recognized (Lanphear et al., 1998; Mielke et al., 1999; Filippelli et al., 2018). Superfund research conducted at the Bunker Hill site in Idaho and elsewhere has shown that contaminated soil can be tracked into homes and remains a source of exposure even if the main source, such as the stacks from a smelter, has been eliminated (von Lindern et al, 2003). Motivated by this potential association, academic partner Columbia University collected close to 200 surface soil samples from public areas such parks and tree pits in Vailsburg and surrounding areas and analyzed them by X-ray fluorescence. The soil lead data show that a greater frequency of samples in Vailsburg and the nearby zip codes with elevated blood lead levels have concentrations that exceed the 400 ppm EPA standard for bare residential soil in areas where children play (Fig. 2b). To explore this association further, the transect of soil samples was recently extended to Paterson, New Jersey, another high lead

exposure town to the north of Newark. Here too, the frequency of high lead soil increases in areas with a higher proportion of people of color (Fig. 3). It is important to note that the data indicate an association and not necessarily that elevated soil lead is the cause of high child exposure. These low-income areas could, for instance, have lingering industrial pollution recorded in the soil and also contain a high proportion of dilapidated pre-1978 homes (Fig. 1b). What is clear is that lead exposure persists in such communities and that it needs to be addressed.

Goal of the project and benefits to the Vailsburg community:

This project aims to increase the effectiveness of ongoing state and city efforts to reduce child exposure to lead from the ingestion of lead-based paint and house dust. We propose using a novel approach that will directly involve the impacted community in screening for lead to identify risks at home. UVSO will distribute a new and much improved field kit to screen for lead in paint and dust at home to all women expecting a child in the Vailsburg neighborhood over a period of 12 months (Fig. 4a). If, for whatever reason, the new kit does not perform as expected during the pilot phase, the widely available 3M Lead Check kit (Fig. 4b) will be offered to participants instead. The kit will be presented at a series of community meetings and distributed during group training sessions, with individual home training as needed. In those homes where residents have identified areas of concern, UVSO will call in City of Newark certified lead inspectors equipped with X-ray fluorescence analyzers to verify the results.

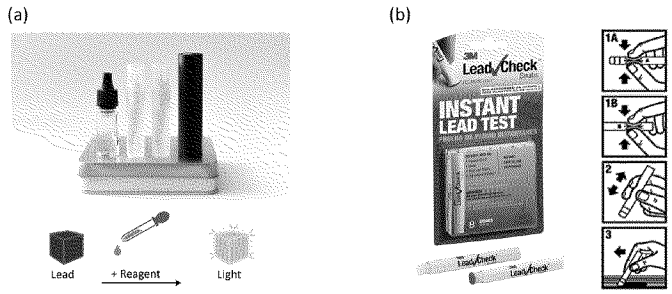

Figure 4. (a) LumetalliX kit containing a dropper dispenser, two spray bottles, and a UV flashlight. See Fig. 5 for recent application in Vailsburg. (b) 3MLead Check swabs for paint testing.

Academic partner, Columbia University, will systematically compare the kit and XRF results early in the project to ensure that the kit is not producing incorrect information. In housing where areas of concern have been confirmed by city inspectors and assessors, UVSO will ensure that participating households are aware of all lead remediation financing options available to eligible households. As a result of this intervention, we anticipate a decline in blood-lead levels for the entire Vailsburg neighborhood to the point of parity with surrounding areas that have lower exposure. Once backed by a rigorous assessment of the latest child blood-lead results from Vailsburg and surrounding zip code areas obtained from the state by academic partner, Columbia University, this outcome will provide a strong argument for expanding this new participatory approach to lead testing to dozens of impacted communities in New Jersey and hundreds more throughout the country. For example, in Paterson, New Jersey, the proportion of children with blood-lead >5 μg/dL is also greater than in surrounding areas and the proportion of people of color is also high according to the EPA Environmental Justice Screening and Mapping Tool (Fig. 2).

Health Impact Assessment

The design of this intervention sets the stage for a Health Impact Assessment at little to no additional cost because blood-lead levels are routinely measured throughout the state of New Jersey, including the Vailsburg neighborhood and surrounding zip code areas. As indicated in

New Jersey's 2020 Annual Childhood Lead Report, healthcare providers in the state are required to screen all children for lead at both 12 and 24 months of age. Children three years of age or older must be tested at least once before their sixth birthday if they had not already been screened at age one and two years. Laboratories are required to report all blood-lead tests to New Jersey's Department of Health. 78% of children born in New Jersey who turned three in 2020 received at least one blood-lead test in their lifetime. According to the New Jersey state report, the percentage of children less than six years of age with a blood-lead level that is elevated (>5 µg/dL, according to the state's definition) decreased from 2.5 to 2.1% between 2018 and 2020. In 2020, the municipalities with the highest percentage of children less than six years of age with a blood-lead level at or above 5 µg/dL include two urban centers in Essex County and are as follows: East Orange (7.1%), Trenton (6.3%), Irvington (5.7%), South Brunswick (5.0%) and Plainfield (4.5%). East Orange and Irvington are the two municipalities immediately north and south of the Vailsburg neighborhood of Newark (where blood-lead data are reported for the entirety of Newark).

Health impacts will be evaluated by comparing outcomes (below) in the period prior to the intervention to the period during and following the intervention, as well as by comparing the time trends in Vailsburg to surrounding communities, namely East Orange, Irvington, South Orange, Maplewood and Millburn/Short Hills. Health impacts to be evaluated include the following: (a) proportion of children under age 6 years with blood-lead concentrations < 5µg/dL (old CDC reference level), (b) proportion of children under age 6 years with blood-lead concentrations < 3.5 µg/dL (new CDC reference level), and (c) proportion of children who received blood-lead testing.

c. Organization's Historical Connection to Underserved Community

UVSO was founded in 1972 as a coalition of churches and youth groups. The organization's mission at the time was to stabilize the neighborhood during a large demographic shift and now serves an average of 1,200 Vailsburg residents every day through a wide range of programs. These include two (2) preschool centers, two (2) Early Head Start centers, two (2) public school-based after-school programs, a teen center, community organizing, neighborhood planning, affordable housing management, and extracurricular activities at no cost to families.

UVSO has, over the past 50 years, worked hand-in-hand with the community (i.e. residents, small businesses, faith leaders, schools, and cross-sectoral stakeholders) to coordinate programming and services that address the neighborhood's ever-evolving needs. Whether it be the provision of affordable housing, access to quality early childhood education, provision of senior services, food distribution, and engagement in neighborhood planning, UVSO has served as a trusted institution in the Vailsburg community capable of bringing people together to address a myriad of quality of life issues. Even though UVSO has now professionalized its operations and is fairly large, it maintains its roots in the community by mandating majority participation of residents and resident business owners in the organization's governance process. It remains in close contact with neighborhood concerns, and all long-range strategic planning initiatives are developed with considerable community input. For example, UVSO interviewed four mothers of young children to assess awareness of lead exposure issues in the Vailsburg community, and found varying degrees of awareness about lead but unanimous interest in learning more about lead testing. This was true even in cases when the family lived in newer housing less at risk for lead exposure. One mother mentioned an interest in remediation even if costs were involved. Input such as this could be obtained because of UVSO's historical connection to the community.

d. EJCPS Model

All seven elements of the EJCPS model will be utilized at least partially for the proposed intervention. Element (1) *Issue Identification, Community Vision & Strategic Goal Setting* has essentially been addressed because childhood lead exposure is a well-established toxicant with multiple ramifications and existing data show that the Vailsburg neighborhood is particularly affected. At the same time, early community discussions at the pilot stage will undoubtedly affect the distribution of kits and training. The hiring of 2 full-time Lead Safety Organizers (LSOs) from the Vailsburg neighborhood and training them to become certified inspectors is at the core of Element (2) *Community Capacity-Building & Leadership Development*. UVSO's Community Engagement Manager, who is from the neighborhood, will support the logistics of the project, such as distributing kits and responding to questions from users. Element (3) *Consensus Building & Dispute Resolution* will focus on helping renting families convince their landlord to participate and seek help from the city when remediation is needed. Element (4) *Multi-Stakeholder Partnerships & Leveraging of Resources* is key for the project as the City of Newark will use its Housing and Urban Development (HUD) grant to finance remediation for eligible families, i.e. families at or below 80% Area Median Income. Element (5) *Constructive Engagement by Relevant Stakeholders* will be important but is somewhat redundant with Elements (3) and (4) in the context of this project. Due to UVSO's long history of success in carrying out projects of benefit to the Vailsburg neighborhood, along with its leadership in this project, Element (6) *Sound Management & Implementation* is safely expected to be satisfied. The Health Impact Assessment scheduled for the last phase of the project, along with the project's commitment to expand community-centered lead testing in New Jersey and other areas, addresses the final Element (7) *Evaluation, Lessons Learned, and Replication of Best Practices*.

e. Project Linkages

This project, if it is successful in the sense that (1) the kit results compare well with X-ray fluorescence data and (2) blood-lead levels in Vailsburg attain or even improve upon levels of exposure in surrounding areas, could influence the way the EPA engages with communities disproportionately impacted by environmental toxicants. The project could lead to the kit being deployed by thousands of community-based organizations and schools across the country and create a precedent for community organizations to be more directly involved in mapping lead and other toxicants. The hope is that such participation will be seen as a benefit to all stakeholders, instead of putting policy makers and elected officials on the defensive. Our expectation is that community engagement in generating data will be paired with engagement in the remediation process as well. For all these reasons, we believe this project fits squarely within EPA's Strategic Plan to protect "human health and the environment for all people, with an emphasis on historically overburdened and underserved communities."

f. Partner and Collaborate

City of Newark Department of Health and Community Well Being:

The project has been discussed extensively with the City of Newark Department of Health and Community Wellbeing (see letter). According to the 2020 Annual Childhood Lead Report for New Jersey, state law requires local health departments to investigate reported cases of blood-lead levels $\geq$5 μg/dL and to order the abatement of lead hazards identified in the course of an investigation. The procedures for conducting environmental investigations include an inspection of the child's primary residence and any secondary addresses, such as a child care center. The environmental inspection includes a determination of the presence of lead-based paint and leaded dust; the identification of locations where that paint is in a hazardous condition, such as peeling, chipping, or flaking; and, as appropriate, the presence of lead on the dwelling's exterior or soil. The licensed lead inspector/risk assessor, along with a public health nurse acting as case manager, speaks to the child's parent/guardian and completes a questionnaire to help determine any other potential sources of exposure to lead, such as water or consumer products.

In 2020, across the City of Newark (pop. 307,000 in 2021), which includes the Vailsburg neighborhood, 118 cases of elevated blood-lead levels were marked for investigation. Of these, 89 investigations were conducted with 63 of 66 cases completing the required abatement (2020 Annual Childhood Lead Report, the last year data are available). In East Orange (pop. 69,000), 40 cases of elevated blood-lead levels were determined to need investigation in 2020, with 37 investigations conducted. Abatement was required in 28 of these East Orange cases (twice as many compared to Newark when taking into account population) and completed in 27 instances. In Irvington (pop. 60,000), 44 cases of elevated blood-lead levels had to be investigated in 2020, with 27 investigations conducted (a number similar to Newark adjusting for population) and 5 of 7 cases completing the required abatement. Assuming that East Orange is more representative of the Vailsburg neighborhood than Irvington, and taking into account Vailsburg's population of 35,000, perhaps a dozen cases of abatement are required in Vailsburg in a typical year. Given that about 500 children are born each year in Vailsburg, we expect the number of required abatements to increase by several fold in response to our intervention, as more pregnant women or families with young children test their home with a kit before their child is born.

The City of Newark is the recipient of several federal HUD grants specifically for the remediation of lead hazards at home. This program is undersubscribed and should have the capacity to handle increased demand generated by community testing in Vailsburg. After

verification of a lead hazard by an LSO, UVSO will encourage the participant to contact the Department of Health for an official inspection. Whenever needed, the LSO will also facilitate discussion of remediation options.

Several recent peer-reviewed publications and unpublished reports demonstrate Columbia University's long-standing interest in lead mitigation through community participation. Geochemist Prof. Alexander van Geen worked with mothers of young children in several Peruvian mining towns and deployed a kit for screening soil for lead-contaminated mine tailings (van Geen et al., 2010; Landes et al., 2019). Another project collaborated with high school students from Westchester County, New York, in testing their and their classmates' homes for lead in paint, soil, and water (Sefchick et al., 2021). Additional projects include sampling and coring soil to map lead contamination near the site of a former smelter in the Red Hook neighborhood of Brooklyn, New York, as well as analyzing pre- and post-filter water for lead during the Newark water crisis from samples collected by viewers of the local Spanish-language TV station Univision. Columbia University also played a key role in identifying lead-based paint as a major hazard on several US military bases in collaboration with the reporters from Reuters that produced a nationwide map of historical blood-lead data.

During the 6-month preparatory stage, Columbia scientists will work with the LSOs hired by UVSO to compare field measurements that use the established 3M kit and the new LumetalliX kit. The LumetalliX kit has a lower threshold of detection (~1000 ppm) for lead than the 3M kit (5,000 ppm) (Filippelli et al., 2020) and a recent test of the LumetalliX kit at the UVSO teen center in Vailsburg showed that the LumetalliX kit is easier to use, more sensitive, and more consistent with XRF measurements on paint and house dust. Of particular interest is that the LumetalliX kit identified high lead particles in floor dust collected with a small table-top vacuum cleaner at the UVSO teen center, whereas the 3M kit did not (Fig. 4). However, wider sampling is needed before committing to the LumetalliX kit. Using X-ray fluorescence, testing of the two kits on a set of paint samples put together by Reuters containing varying lead concentrations show a comparable performance. The backup for this project will be the 3M kit, which has been evaluated (not certified) by EPA and has been sold throughout the country for over a decade.

As the academic partner for this project, Columbia University will also contribute the expertise of Prof. Brendan O'Flaherty in urban economics and Prof. Pam Factor-Litvak in public health and epidemiology. Brendan O'Flaherty is professor of economics at Columbia University and author of many papers and several books about urban economics, homelessness and housing, and race. His books include *Making Room: The Economics of Homelessness* (1996), *City Economics* (2005), *The Economics of Race in the United States* (2015), and *Shadows of Doubt* (2019, Harvard University Press). He has also served in many roles, both official and unofficial, in the City of Newark including aide to the mayor and acting chief financial officer. He grew up in Vailsburg, lived there most of his life, and has been a member of the board of directors of UVSO since 1992 and is currently treasurer of UVSO.

Pam Factor-Litvak is a professor of epidemiology at the Mailman School of Public Health, Columbia University, where she also serves as vice chair of the department of epidemiology and associate dean for research resources. She is an established environmental and life course epidemiologist who has spent over 35 years evaluating neurotoxicity in children. Beginning with her dissertation research, which took place alongside the Yugoslavia Study of Lead Exposure, Pregnancy Outcomes and Child Development, she has evaluated the long term associations between early life exposure to lead (and more recently endocrine disruptors) and child development; she has been continuously funded by NIH for this work. Most recently, she has

worked in the urban slums in low- and middle-income countries evaluating living conditions, air pollution and other modifiable environmental exposures and childhood developmental outcomes.

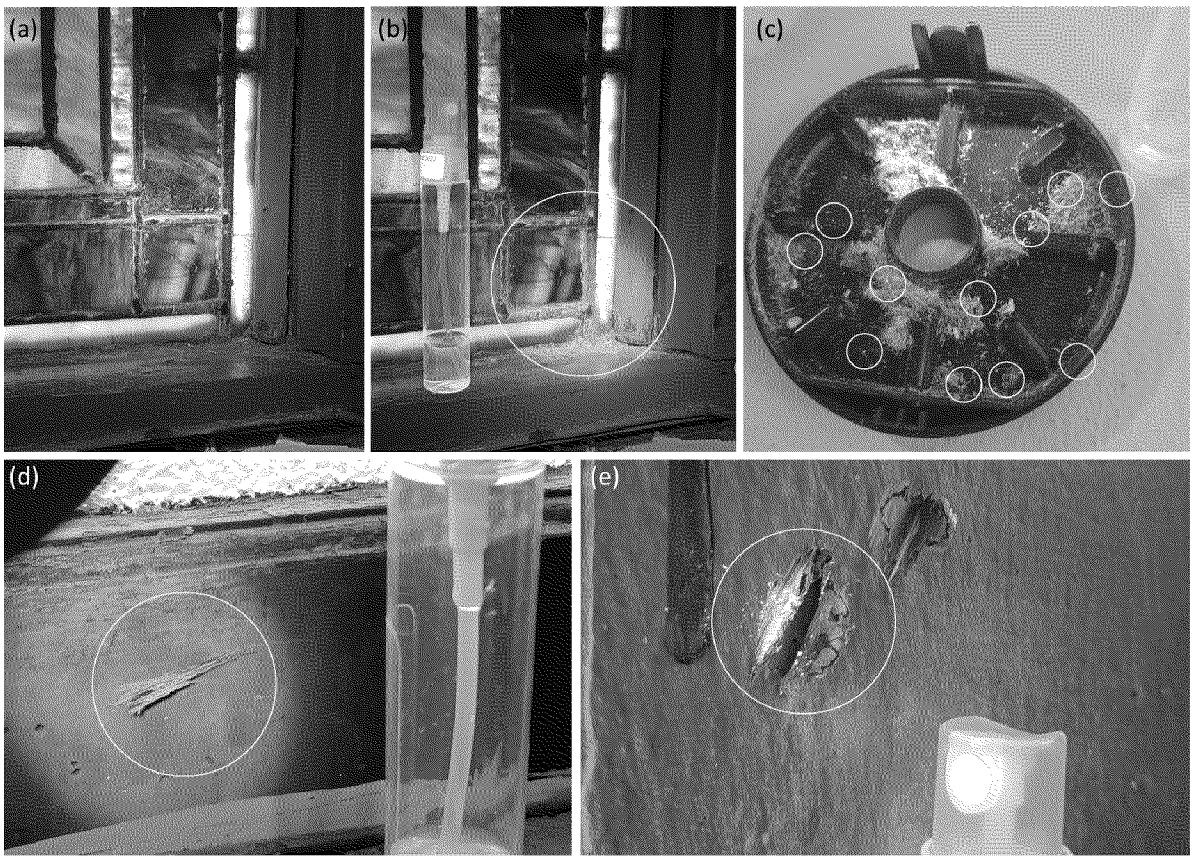

Figure 4. Photos illustrating the outcome of using the LumetalliX kit at the UVSO Teen Center, a former church that has stained glass windows encased in metallic lead. Shining the UV flashlight in a corner of one of these windows shows (a) no/(b) strong green fluorescence before/after spraying the reagent. Dust collected with a small vacuum cleaner in the same room shows (c) green fluorescent particles after spraying the LumetalliX reagent. Windows in the basement of the Teen Center were painted with lead-based paint at some point but have been painted over since, as shown by spraying the LumetalliX over two gashes (d-e) through the layers. The fluorescence is more visible by eye than in the photos.

Partner LumetalliX has developed an innovative lead test that renders lead visible to the naked eye by emitting light. This offers a possibility to reduce lead poisoning by engaging those affected by lead exposure the most to test and protect themselves and their children. The technology behind LumetalliX was invented at the Dutch national research institute AMOLF by Prof. Dr. Noorduin and Dr. Helmbrecht. The scientific principle underpinning this test involves converting lead into a semiconductor, which emits a bright green light when exposed to UV light. LumetalliX has developed a proprietary reagent capable of converting lead in any

oxidation state into the same semiconductor. While conversion reactions typically depend on controlled laboratory conditions, the LumetalliX reagent can perform this reaction in real-world settings. The technology is particularly effective for detecting lead-based paints. Users can simply spray the reagent onto paint or potential lead-contaminated dust to see the lead light up.

Since its invention, the technology has been validated through over ten thousand tests in both laboratory and real-world environments. The initial phase involved screening numerous compounds with and without lead to confirm the absence of false positives and false negatives. Currently, the technology is being trialed in Ivory Coast, where lead-based paint is still sold today. The goal of this collaboration between Ivorian and French partners with Columbia is to enable pregnant women to test their homes for lead in order to protect their unborn children.

The volunteer Newark Environmental Commission advises the Mayor and the Municipal Council on issues of the environment and sustainability. The Commission worked with environmental justice groups throughout New Jersey to gain passage of Newark's Environmental Justice and Cumulative Impacts Ordinance, the first of its kind in the United States. This ground-breaking law requires companies and other applicants that want to work in Newark to prove they are not adding to Newark's existing pollution. The law highlights the fact that Newark has long been subject to extreme levels of industrial pollution that is harmful to the health of those who live and work here. Lead exposure has been a historical challenge in the City of Newark and the Commission will help to increase awareness among residents and policymakers.

La Casa de Don Pedro is a multi-service community development corporation that serves thousands of children and families daily through its various programs and services. They are a grantee of the New Jersey Department of Community Affairs' (DCA) Lead-Safe Home Remediation and HUD Lead-Based Paint Hazard Reduction Programs. Although La Casa is based in the North Ward of Newark, they are one of the designated DCA providers serving the entirety of Essex County, which includes Vailsburg. The Vailsburg neighborhood would be an eligible area for La Casa to serve because of its particularly high blood-lead levels.

2.0 Project Activities/Milestone Schedule/Detailed Budget Narrative

a. Project Activities

(1) Hiring of Lead-Safety Organizers (LSOs): UVSO will widely advertise the creation of two full-time positions that will be central to carrying out the project and will span 2 years. Preference will be given to female applicants from the Vailsburg community or a neighboring community with similar socio-economic characteristics. Requirements will include a demonstrated interest in community involvement as well as an aptitude for grasping and communicating basic scientific concepts such as toxicant concentrations, spatial heterogeneity, and dose-response relationships.

(2) Training of LSOs: Academic partner Columbia University will train the two LSOs hired by UVSO to use the LumetalliX kit for testing lead in paint and dust and collecting samples for laboratory comparisons. The LSOs will also register for a course at Rutgers University School of Public Health to become certified lead inspectors and assessors.

(3) Ethics approval: A detailed protocol for the study will be submitted for ethics review of human subjects research, including Columbia University's Institutional Review Board and other competent authorities.

(4) Community meetings: The LSOs will hold public meetings twice a month at UVSO and other local centers to raise awareness of the risk posed by lead-based paint and lead-based paint in dust and how the risk can be reduced. Eligible participants will be encouraged to participate in

the testing program.

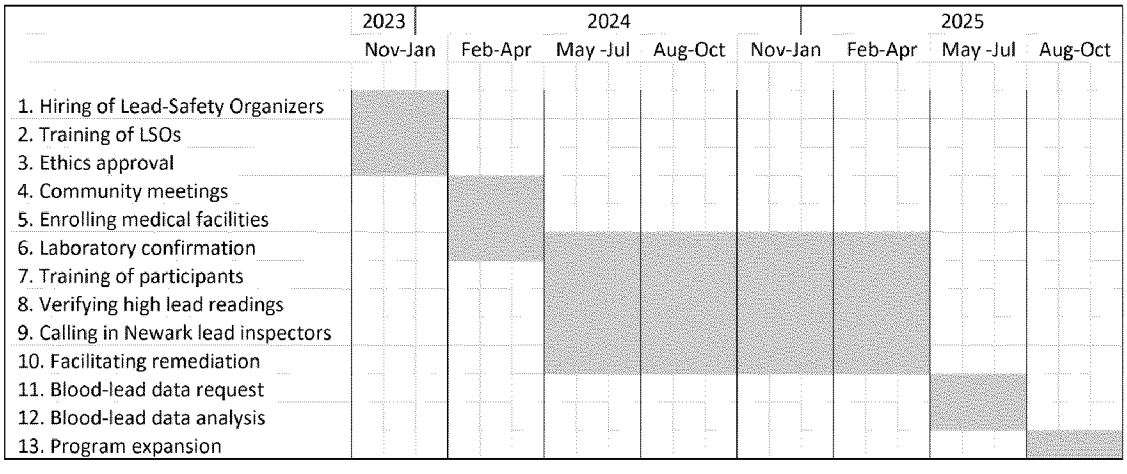
(5) Enrolling medical facilities: LSOs will make appointments to visit all medical offices, clinics, and hospitals, including a Veterans Administration facility, that could potentially be visited for prenatal care by pregnant women from the Vailsburg neighborhood. Most of these will be located in surrounding areas rather than Vailsburg. Flyers will be provided for recruitment.

(6) Laboratory confirmation: Paint and house dust samples provided by the LSOs will be digested and analyzed in the laboratory by inductively-coupled plasma mass spectroscopy after acid digestion at Columbia University.

(7) Training of participants: LSOs will follow-up with any member of the Vailsburg neighborhood expressing an interest in testing their home. No Vailsburg resident will be turned away but women expecting a child and households with small children will be prioritized if the demand for kits exceeds capacity.

(8) Verifying high lead readings: LSOs will visit households where high lead levels were detected in paint or house dust to verify the findings by XRF. Especially during the early phase of the project, paint and house dust samples will be collected to confirm analysis at Columbia.

(9) Calling in Newark lead inspectors: LSOs will facilitate setting up an appointment for an inspection of any homes with high lead results by the Newark Department of Health. If requested by the participant, one LSO will try to be present during the inspection.



(10) Facilitating remediation: LSOs will remain in touch with participants whose lead risks were confirmed by Newark inspectors until arrangements have been made for remediation.

(11) Blood-lead data request: The City of Newark Department of Health and Community Wellness will request blood-lead data from the state Department of Health starting in 2016, the first year not covered by the Reuters data, through 2025. No identifying information beyond the zip code area will be requested.

(12) Blood-lead data analysis: Columbia University will compare Vailsburg blood-level data starting in 2016 to that of surrounding zip code areas to test for any potential change in response to the lead testing by members of the Vailsburg neighborhood.

(13) Program expansion: If blood-lead data indicate that the intervention had a positive impact relative to neighboring areas, UVSO and its partners will publicize their findings through publications and other means to encourage other communities to follow suit.

b. Milestone Schedule

c. Budget Narrative

Unified Vailsburg Services Organization (UVSO):

PERSONNEL

Senior Personnel

SanDonna Jones, Executive Director will charge 3% ($4,080/year) of her time per year to the project, with the remainder of time provided in-kind. Her role would be overall program management, including partner coordination with Columbia University, the City of Newark, La Casa de Don Pedro and others; and delegation of UVSO staff for engagement in the project.

Michael Morrison, Community Engagement Manager will devote a minimum of 20% ($12,400/year) of his time per year to the project, with any additional time provided in-kind. He will oversee the two (2) LSOs and coordinate community meetings.

Other Personnel

TBH, Lead Safety Organizers (LSOs) will devote 100% ($55,000/year X 2 persons) of their time to co-facilitate the community meetings as well as contact all medical offices, clinics, and hospitals where pregnant women from Vailsburg are likely to obtain prenatal care, most of them located outside Vailsburg but in surrounding areas. They will train residents on the LumetalliX kits as well as deploy Viken Pb200i X-ray fluorescence (XRF) analyzers to verify kit results.

Total Salaries are $151,776/year for a total of $303,552.

FRINGE BENEFITS

The current fringe benefit rate for UVSO is 20% to be accessed on all salaries at $25,296/year for a total of $50,592. This includes: FICA and related payroll costs, health, and dental benefits.

EQUIPMENT

XRF Analyzers (2):

A total of $35,590 in Year 1 to purchase two (2) XRF Analyzers to verify LumetalliX results.

PARTICIPANT SUPPORT COSTS

Incentives (tokens of appreciation) will be purchased for residents for their participation. A total of $6,090 for an estimated 1,000 participants ($3,000 in Year 1 & $3,090 in Year 2) is allocated.

SUPPLIES

A total of 1,000 tabletop vacuum cleaners (one for each participant) will be purchased so that residents can collect dust particles that are tested for lead. This totals $15,000 ($15 each).

CONTRACTUAL

A total of $99,452 to be allocated (subcontracted) to academic partner Columbia University. A total of $53,099 in Year 1 and $46,353 in Year 2 to perform the following research activities:

Training of Lead Safety Organizers (LSOs): Academic partner Columbia University will train the two LSOs hired by UVSO to use the LumetalliX kit for testing lead in paint and dust and collecting samples for laboratory comparisons.

Laboratory confirmation: Paint and house dust samples provided by the LSOs will be digested and analyzed in the laboratory by inductively-coupled plasma mass spectroscopy after acid digestion at Columbia University.

Blood-lead data analysis: Columbia University will compare Vailsburg blood-level data starting

in 2016 to that of surrounding zip code areas to test for any potential change in response to the lead testing by members of the Vailsburg neighborhood.

The itemized budget and budget justification for Columbia University are listed below.

OTHER DIRECT COSTS

Professional Development

Two (2) LSOs will enroll in the Rutgers University School of Public Health's New Jersey Lead Inspector and Risk Assessor Certification Course. This allocation includes $850 each for two (2) participants (totaling $1,700).

Following the Rutgers certification course, the two (2) LSOs will take the New Jersey Lead Certification exam ($150 for 2 participants) (totaling $300).

Printing and Production:

Collateral for the initiative will be designed and printed so that residents have pertinent information regarding the project's goals and objectives, importance of their participation, and expansive community benefits. A total of $3,570 will be allocated.

Direct costs are $264,035 in Year 1 and $201,219 in Year 2 for a total of $465,254.

INDIRECT COSTS

Indirect costs are calculated at the de minimis rate of 10% on Modified Total Direct Costs (*MTDC). The totals are $19,891 in Year 1 and $15,504 in Year 2 for a total of $35,395.

The total (Direct Costs + Indirect Costs) of this request is $499,997: $283,600 in Year 1 and $216,396 in Year 2.

**Modified Total Direct Cost (MTDC) - MTDC means all direct salaries and wages, applicable fringe benefits, materials and supplies, services, travel, and up to the first $25,000 of each subaward (regardless of the period of performance of the subawards under the award). MTDC excludes equipment, capital expenditures, charges for patient care, rental costs, tuition remission, scholarships and fellowships, participant support costs and the portion of each subaward in excess of $25,000. Other items may only be excluded when necessary to avoid a serious inequity in the distribution of indirect costs, and with the approval of the cognizant agency for indirect costs.*

<u>Columbia University:</u>

PERSONNEL

Senior Personnel

Alexander van Geen, Lamont Research Professor*, PI: a researcher at Columbia University's Lamont-Doherty Earth Observatory will devote 10% of his time in Year 1 and Year 2 at no cost to the project.

*Lamont Research Professors (LRPs) have 9-month appointments, compatible with the instructional faculty. However, LRPs are expected to raise their salary by securing external funding for their research. Lamont-Doherty Earth Observatory provides endowment-supported salary funding if necessary. Similar to instructional faculty positions, LRPs have the opportunity to receive a further 3 months of summer salary if they can raise additional funds from outside sources (dependent of course upon Federal agency guidelines for the granting of summer salary).

Brendan O'Flaherty, Professor, co-PI: a professor at Columbia University's Department of Economics will devote 5% of his time in Year 1 and Year 2 at no cost to the project.

Pam Factor-Litvak, Professor, co-PI: a professor at Columbia University's Mailman School of Public Health will devote 5% of her time in Year 1 and Year 2 at no cost to the project.

Other Personnel

TBH, Staff Associate: Support is requested to cover the salary of an experienced laboratory assistant for 2.5 months in Year 1 and 2.0 months in Year 2 of the project. This person will be responsible for preparing the field kits and supplying the labeled sample bags needed for collecting paint chips, house dust, and soil. Most of these materials will be analyzed by the UVSO-hired LSOs by X-ray fluorescence but a subset will be digested for comparison with measurements by inductively-coupled plasma mass spectrometry at Columbia University. Including 29.3% in fringe benefits, the total salary request amounts to $24,647 and $25,387 in Year 1 and Year 2 respectively. There is an estimated 3% increase per year on salaries. Columbia University's fiscal year is from July 1 to June 30.

FRINGE BENEFITS

Fringe benefits are budgeted at Columbia University's government-negotiated rate of 29.3% for regular full-time employees effective July 1, 2022 and are accessed on all the salaries (with the exception of the GRA stipend which is exempt from Fringe) listed above based on position.

OTHER DIRECT COSTS

Materials and Supplies

In Year 1 and Year 2, $9,500 in support is requested to purchase 500 LumetalliX kits ($5,000 at $15 ea.) and $2,000 in miscellaneous laboratory supplies including.

INDIRECT COSTS

Sponsored Projects Administration certifies that the Primary Places of Performance at Lamont-Doherty Earth Observatory for the proposed research supported by a subaward from the EPA grant to UVSO will occur at 61 Route 9W P. O. Box 1000 Palisades, NY 10964, at the Comer Geochemistry Building Rooms 131 and B12, located on the LDEO campus, and that the appropriate F&A rate is 55.5%.

Total Budget: $53,099 in Year 1, $46,353 in Year 2, total for both years of $99,452.

3.0 Environmental Results - Outputs, Outcomes, and Performance Measures (Logic Model)

a. Environmental Results - Outputs/Outcomes

A graphical version of the content of this paragraph is included with this proposal under Other Attachments. The resources brought to bear on this project include EPA funding of 2 full-time LSOs, preferably female, recruited from the Vailsburg neighborhood by UVSO, the cost of 2 XRF analyzers for deployment by the LSOs, and the cost of up 1,000 lead kits for distribution in the community. Activities included early in the project include training of both LSOs during a 3-day lead safety inspector and assessor course regularly offered by the Center for Public Health Workforce Development at the Rutger School of Public Health in Somerset, New Jersey. After certification, the LSOs will be able to deploy two Viken Pb200i X-ray fluorescence analyzers purchased by UVSO. In parallel, the LSOs will hold a series of well-publicized community meetings throughout Vailsburg, the primary audience of the project, and contact all medical offices, clinics, and hospitals where pregnant women from Vailsburg are likely to obtain prenatal care, most of them located outside Vailsburg but in surrounding areas. This state of preparation is anticipated over the first 6 months of the project and is expected to lead to increased awareness of the risks of lead exposure, one of the project's first outputs. Among activities over the next 12

months, LSOs will conduct regular group training sessions for kit users at UVSO or deliver kits and training at home individually when participants cannot come to these sessions. About 2-4 new participants per day are expected to be recruited over 12 months. Whenever a lead hazard has been identified by participants, a short-term outcome will be a follow-up with verification by XRF by a LSO. Throughout the project, UVSO will be the communication hub with the other partners of the project and its Community Engagement Manager will serve in this role.

The City of Newark Department of Health and Community Wellness, a partner in the project but also part of this project's audience, has committed to respond to requests for lead inspection by certified personnel in the short-term and, where needed, for support of lead remediation for eligible households using existing Housing and Urban Development grants to the city in the medium term (see letter). Contributions in-kind will include substantial amounts of time dedicated to the project by Columbia University faculty with expertise in environmental chemistry, urban economics, and environmental epidemiology. UVSO will coordinate activities among all three partners to raise awareness of lead hazards that are avoidable throughout the Vailsburg community, provide kits and training to eligible participants, trigger inspections based on the kit and, where needed, interventions to remediate the hazard by the city. UVSO will also encourage mothers of newborns in particular to have their child's blood tested for lead. The City of Newark will request childhood blood-lead data for years relevant to the project from the state Department of Health on behalf of the project. The data will then be analyzed by the academic partner to determine the impact of the intervention and the interpretation communicated to all partners, a key intermediate outcome of the project. Towards the end of the EPA-supported phase of the project, UVSO will hold a public meeting to disseminate these findings. With its partners, UVSO will consider ways of scaling up the intervention if it has been a success as measured by the number of kits used by the community and, eventually, an accelerated drop in blood-lead levels. This would be a significant long-term impact of the project, including the resulting improved health, higher educational achievement, and higher earnings for underserved communities throughout the country.

b. Performance Measurement Plan

Performance of the project will be tracked at several levels throughout the project. The first will be the (1) number of community meetings held and how well attended these meetings are. The next will be the (2) number of kits distributed and the proportion of well-documented kit results returned via a data collection app (SurveyCTO) on the participant's phone. For the subset of participants where a lead hazard has been identified in paint or house dust, one measure of performance will be how soon one of (3) the UVSO certified inspectors can verify the results and (4) how soon in turn City of Newark's certified lead inspectors conduct their testing and complete their assessment. Another measure of performance will be any potential (5) increase in the proportion of children from Vailsburg whose blood is tested at least once before they turn two. The ultimate measure of success will be any (6) decline in child blood-lead concentrations and proportion of children with blood-lead levels >3.5 μg/dL relative to the neighboring zip code areas.

c. Sustainability Plan and Environmental Justice Integration (4/100)

If the blood-lead levels in Vailsburg decline more rapidly following the use of field kits by members of the community, this will constitute a strong argument for greater participation in lead testing by impacted communities, and also for testing beyond lead, e.g. $PM_{2.5}$. It is the intention of this partnership to expand the scope of the kit testing by contacting and helping nearby

impacted communities in New Jersey (Paterson, Trenton) and New York (Newburgh, Albany, Rochester, Buffalo) that are easily identified using the Reuters map. Through EPA and HUD, we will also bring our findings to policymakers at the federal level as a way of promoting more community participation in environmental testing throughout the country.

4.0 Programmatic Capability

a. Organizational Experience

In its coordination with the Heart of Vailsburg Block Club Coalition, UVSO developed an Accountability Tool which is a form that allows residents to articulate their specific concerns (e.g. lighting, municipal services, environmental waste, code enforcement, etc.). This tool sends information to appropriate departments within the City and enables UVSO and/or block association leaders to follow-up if action is not taken. This is one example of UVSO helping to empower residents in a manner that is constructive, i.e. resolution-seeking rather than only complaint-oriented. Through years of neighborhood planning, UVSO has also helped residents and stakeholders to articulate their long-term vision of the community by convening a series of neighborhood meetings and charrettes. This new project will benefit from the residents' trust in UVSO and UVSO's long-standing working relationship with the City of Newark.

As a previous grant recipient of the EPA's Environmental Justice Small Grants Program, UVSO's project, "#GetMAD! Motivated and Doing: Solid Waste & Illegal Dumping Awareness" was a public education and awareness campaign delivered through youth publicists, journalists, and community organizers trained in the UVSO Public Relations Apprenticeship Program (PRAP) curriculum. PRAP's goal was to teach working-age youth to conduct research, investigate, produce creative content, and organize engagement activities to ignite action and reinforce behaviors that increase the quality of life in Vailsburg. The PRAP exposed environmental injustices in Vailsburg from illegal dumping and improper hazardous waste disposal.

UVSO worked with the City of Newark's Department of Neighborhood Services to host a City-Wide Clean-Up. The Vailsburg residents and community members participated and retrieved resources and information on recycling and garbage pick-up schedules. As a part of heightened awareness, a poll was issued to address garbage collection schedules. Residents decided to have garbage pick-up overnight to avoid traffic jams and ensure clean streets for students who walk to school. Project partners included the City of Newark Summer Youth Employment Program, the Office of Community Engagement of Newark Public Schools, the GEM Project, and Brown70Films, which provided students with an intensive several-week knowledge-based and technical hands-on training in photography and video.

Outputs included the facilitation of community meetings, youth-conducted research, recording and reporting on the landscape and health effects of dumping and litter, engagement of illegal dumping mitigation best-practice ambassadors; development of messaging and promotional content/materials to communicate public health concerns and best practices.

b. Staff Experience/Qualifications of Program Manager

UVSO's Executive Director will serve as the overall Program Manager. She will blend her 28+ years of experience in resource development, strategic planning, partnership-building, and overall operations. Having always worked in the civic (non-profit) sector, she is well-versed in community engagement, cross-sectoral collaboration, including community-university partnerships, and data collection. Having attended Yale University undergrad, she honed her skills at the Columbia School of Business' Institute for Non-Profit Management and learned more about housing development and preservation at the Harvard Institute on Affordable

Housing. Previous professional roles include: principal of SBJ Consulting (working with a myriad of non-profit entities); an Entrepreneurial Training Institute (ETI) Facilitator for the New Jersey Economic Development Authority (NJEDA) wherein, through the Seton Hall University Institute on Work, she mentored non-profit participants as they developed business plans for revenue-generating enterprises; Coordinator of the Newark Community Development Network (NCDN) – a coalition of community development corporations; and work with the Regional Plan Association (New Jersey Office) – an urban and transportation planning firm. These roles required project management and stakeholder engagement and training.

UVSO's Executive Director was a primary author of the "Neighborhoods" section of the City of Newark's Comprehensive Economic Development Strategy (formerly the Overall Economic Development Program) (reports published 1997, 2001, 2006). She also assisted in the community outreach and participation process of the City of Newark's master planning process – specifically the revision of the land use component (as part of the Master Plan Working Group) and beginning the revision of the overall zoning ordinance (1997 – 2001). All of these efforts required convening a broad base of stakeholders, inclusive of input from residents.

UVSO's Community Engagement Manager will support the project by overseeing the two (2) LSOs to be hired. His experience in project management and event coordination in school settings – including as a special education paraprofessional is relevant. As a Race, Equity and Inclusion Leader, he has coordinated campaigns to advocate community involvement.

Additional staff, such as Family Workers from UVSO's early childhood education centers, would support the project at no cost by interfacing daily with 400+ families with young children and have trusted relationships with parents.

c. Expenditure of Awarded Grant Funds.

UVSO has procedures and controls in place to ensure that awarded grant funds are expended in a timely and efficient manner and will be prepared to submit EPA's Administrative Capability Questionnaire (EPA Form 6600-09) before funds are awarded.

5.0 Past Performance

UVSO was previously funded under EPA's Environmental Justice Small Grant Program for the project entitled "#GetMAD! Motivated and Doing: Solid Waste & Illegal Dumping Awareness." Project outcomes have included (a) an increase in resident awareness of health effects of illegal dumping and improper solid waste disposal that was sustained via social media and UVSO website visits, (b) an increase in resident participation in quality of life renewal efforts, sustained via on-going digital communications with residents, (c) an increase in illegal dumping reporting and convictions along with an decrease in dumping incidents, (d) an increase in resident cross-over to environmentally-friendly consumer products and disposal practices, and (e) a series of youth-produced public service announcements that discussed the implications of littering as well as solid waste and illegal dumping. Interim and final reports were submitted (program narrative and federal financial report). A no-cost extension was granted which enabled UVSO to create strategies that allowed youth to achieve expanded community awareness and help facilitate residents' change in behavior.

6.0 Quality Assurance Project Plan (QAPP) Information

This project will generate new data and a systematic QAPP which covers recruitment, participation, kit results, laboratory verification, and blood-lead data interpretation will therefore be required if the project is selected for funding.

GRANT13861280

April 13th, 2023

Mr. Jacob Burney
Office of Environmental
Justice and External Civil Rights
Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Mr. Burney,

New York Communities for Change (NYCC) brings neighbors together to build power and improve lives and communities. We use direct action, legislative advocacy, and community organizing and engagement to fight for a safe and healthy New York. Given our mission, we are excited to be a partner with Urban Green Council on Equitable Cooling and Extreme Heat: Collaborative Pathways to a Max Indoor Temperature in NYC, and will be participating in a number of ways:

- Community and stakeholder engagement on the regulatory landscape around summer indoor air temperatures;
- Engaging NYCC members and partner organizations through a community survey on summer heat in their homes;
- Collaborative convening on barriers and solutions to setting a maximum indoor air temperature in environmental justice communities to drive future city policies;
- Community outreach and education on short- and long-term solutions to extreme indoor
heat in NYC.

We will engage our leadership and members through our 8 chapters throughout New York City. to design and execute these program components in collaboration with Urban Green and other participants, and will receive funding for these activities.

Safe and healthy communities, including green housing, is a core tenet of NYCC, and this project directly supports this goal. We sincerely hope you will fund this critical initiative.

Sincerely,

Olivia Leirer
Co-Executive Director

Dear Applicant:

Our letter dated January 2003, stated you would be exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code, and you would be treated as a public charity, rather than as a private foundation, during an advance ruling period.

Based on the information you submitted, you are classified as a public charity under the Code section listed in the heading of this letter. Since your exempt status was not under consideration, you continue to be classified as an organization exempt from Federal income tax under section 501(c)(3) of the Code.

Publication 557, Tax-Exempt Status for Your Organization, provides detailed information about your rights and responsibilities as an exempt organization. You may request a copy by calling the toll-free number for forms, Ex. 6 Personal Privacy (PP). Information is also available on our Internet Web Site at www.irs.gov.

If you have general questions about exempt organizations, please call our toll-free number shown in the heading.

Please keep this letter in your permanent records.

We have sent a copy of this letter to your representative as indicated in your power of attorney.

Sincerely yours,

Lois G. Lerner
Director, Exempt Organizations

April 11, 2023

Mr. Jacob Burney
Office of Environmental Justice and External Civil Rights
Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Mr. Burney,

Since its inception, RiseBoro Community Partnership has collaborated with community leaders, government agencies, and private investors in an effort to serve as a comprehensive housing, health, and services agency for poor communities that have suffered from years of disinvestment in its housing stock and human capital. With a housing department staff of over 150 employees and an agency staff of nearly 2,000, we have grown from a small community-based organization to one of the largest nonprofits in Brooklyn.

RiseBoro has been responsible for the development of several thousand units of affordable housing, ranging from single-family homes to scattered site rehabs to large mixed-use developments. Additionally, RiseBoro provides property management of units that offer permanent housing for low to moderate-income families, senior citizens, and a host of special needs populations including formerly homeless families, veterans, physically disabled, and victims of domestic violence.

We are excited to be a part of ***Equitable Cooling and Extreme Heat: Collaborative Pathways to a Max Indoor Temperature in NYC,*** as sustainability is a central component of RiseBoro Community Partnership's approach to affordable housing development, and we have successfully collaborated with Urban Green Council in the past. In support of this project we will provide technical analysis of building data- including indoor summer temperatures and installation of sensors to assess the quality of cooling residents currently receive. In addition, we will lead tenant engagement and education efforts. RiseBoro will receive funding for these activities under this RFA.

Respectfully,

Josh Shaffer, Energy Manager

cc: Christopher Halfnight, Urban Green Council

Redacted Senior Director, Research & Policy | Urban Green Council

EXPERIENCE

Urban Green Council, New York, NY
Senior Director, Research & Policy, 2016 – Present
Lead the Research and Policy teams for environmental nonprofit; develop and manage studies, convenings and advocacy initiatives that advance energy efficiency, building decarbonization and resilience. Relevant experience includes:

- Advising NYC government on development and implementation of building performance standard (Local Law 97) and zero-emissions new construction law (Local Law 154)
- Managed stakeholder engagement group for NYC Mayor's Office of Climate and Environmental Justice study of carbon trading under Local Law 97
- Co-led stakeholder convening, analysis and writing for *Going Electric* study on retrofits in multifamily housing
- Managed 70-expert convening on NYC's building performance law, developing *Blueprint for Efficiency*
- Extensive research and policy development on green building best practices, energy and carbon management, green codes development, and clean tech innovation
- Extensive convening and facilitation experience with wide range of stakeholders
- Hired as Policy Manager; promoted to Associate Director in 2018; promoted to current position in 2022

Natural Resources Defense Council (NRDC), New York, NY
Consultant, 2015
Researched and drafted policy analysis on the economic benefits of offshore wind energy and authored comments for federal regulatory proceedings.

Yale Center for Environmental Law & Policy, New Haven, CT
Graduate Research Assistant, 2013 – 2015
Led research and analysis to develop local government tools to manage 35 impacts of fracking. Collaborated with small team to coordinate two workshops with public and private sector experts in the field.

Urban Ecology & Design Lab, New Haven, CT
Graduate Research Assistant, 2013 – 2014
Developed legal and policy strategies for changes in land use to inform a coastal resilience plan for Guilford, CT.

Shapiro, Arato & Isserles LLP, New York, NY
Attorney (Contract), 2012 – 2013
Conducted legal research, drafting, and discovery in international commercial fraud dispute.

Shearman & Sterling LLP, New York, NY
Associate, 2007 – 2011
Drafted trial motions and collaborated with nonprofit for successful pro bono Clean Water Act citizen suit. Performed extensive legal research, analysis, and writing in diverse litigation and capital markets practice.

EDUCATION

Yale University, School of Forestry & Environmental Studies, New Haven, CT
Master of Environmental Management

McGill University, Faculty of Law, Montreal, Canada
J.D. and B.C.L. (with Great Distinction)

McGill University, Faculty of Arts, Montreal, Canada
B.A. (Honors English, with First Class Honors)

ADDITIONAL

Admitted to Bar in New York State, Southern District of New York, Eastern District of New York, Law Society of Upper Canada

Redacted | **Senior Director, Education | Urban Green Council**

EXPERIENCE

Urban Green Council, New York, NY
Senior Director, Education, 2010 – Present

- Responsible for creating Urban Green's signature educational programs including *GPRO*, a national green building certificate program, 2020's *Crushing the Energy Code* in NY State and *Coop/Condo Energy 101 Workshop* for residents and board members of multifamily buildings.
- Creates engaging curriculum for workers from all sectors of the building design, construction and operations industries that demystify complex topics and provide participants actionable ways to begin improving their buildings' performance. Over 15,000 workers have participated in these courses.

Ellen Honigstock Architect PC, Brooklyn, NY
Principal, 1999 – 2010

- Managed architectural practice focused on residential and commercial alterations, including multifamily, daycare centers, medical facilities, advertising offices and retail shops.
- From 2004, the firm concentrated on energy audits, benchmarking and creating sustainable design strategies for existing buildings that included solar photovoltaic systems, solar thermal energy systems, and rainwater harvesting.

SEIU Local 32BJ Thomas Shortman Training Fund, New York, NY
Instructor
Taught courses related to sustainable building operations: *Building Science, Building Envelope, Water Conservation, Indoor Environmental Quality, Quantifying Energy, Green Building Plan; BPI Energy Efficient Building Operator; Multi-Family Building Analyst*

Sustainable Kensington Windsor Terrace; Brooklyn, NY
Founder, Chief Organizer, 2009 – Present

- Developed the original Solarize Brooklyn, the first community solar program in NYC. Solarize Brooklyn doubled the number of solar installations in the targeted neighborhoods, accounting for 10% of all residential solar projects in Brooklyn at the time.
- Convened the Advisory Committee, worked closely with Solar One to design program details and coordinated neighborhood outreach and press.

NYC Green Codes Task Force, New York, NY
Co-Chair of the Homes Subcommittee, Member of Construction Practices Subcommittee

Stephen Wanta Architect, New York, NY, 1996-1999
Project Architect

Darius Toraby RA, PC, New York, NY, 1986-1996
Project Manager / Project Architect

EDUCATION

Columbia University, Graduate School of Architecture, Planning and Preservation, New York, NY
Masters of Architecture, 1992

University of Virginia, Charlottesville, VA
Bachelor of Arts, Architecture 1985 – 1988

Rutgers University, New Brunswick, NJ, *Major: Physics; Minor: Philosophy, 1983-1985*

REGISTRATIONS AND CERTIFICATIONS

Registered Architect: NY, NJ, CT

LEED AP: O&M

BPI Certified: Building Analyst, Envelope, Multi-Family BA, Energy Efficient Building Operator

Redacted | **Senior Advisor | Urban Green Council**

EXPERIENCE

Urban Green Council, New York, NY
Senior Advisor, formerly Director of Research, July 2008 – present

- Directed and wrote much of Urban Green's *90 by 50* report, which determined the energy efficiency measures necessary to reduce NYC greenhouse gas emissions 90% by 2050.
- Provide technical oversight and expertise to a range of Urban Green projects for the City of New York, including annual Benchmarking analyses, the Green Codes Task Force, and the Building Resiliency Project.
- Prepared teaching materials for GPRO, Urban Green's sustainability training program for trades and contractors.
- Directed other research projects including *There are Holes in Our Walls*, an analysis of window AC units, and the *Cost of Green in New York*.

Pratt Institute, Dept of Mathematics and Science, Brooklyn, NY
Visiting Professor, 1998-present

- Develops and teaches courses such as Climate Change Science, Green Building Science, and Urban Energy Management (Graduate seminar).

Community Environmental Center, Long Island City, NY
Senior Engineer & Director of Engineering Services Division, 2001-2008

- Directed energy assessments in Multifamily Performance Program (MPP) and the New Construction Program, both funded by NYSERDA. Defined, directed and oversaw building energy assessments and oversaw implementation.
- Provided technical leadership for NYSERDA's Assisted Multifamily Program statewide, 2001-2006. Major role in program implementation: prepared and maintained AMP audit guidelines and equipment and installation standards, oversaw technical service providers, a group of seven to ten engineering firms across New York State.

Consulting Engineer, 1987-2001
Sample Clients: AES/New Energy (New York, NY & Los Angeles, CA); Analytical Solutions/Anylec Research (Bayport, NY); Joseph Technologies, Inc. (Woodcliff Lake, NJ); Brookhaven National Laboratory. Typical Tasks:

- Assessment of CHP projects including technical characterization and utility rate analysis.
- Assessments and/or systems analysis of major power projects, U.S. and abroad.

Brookhaven National Laboratory
Senior Research Associate, 1994-1996
Associate Scientist, 1977-1987

- Development and standardized testing of innovative energy efficiency technologies, including solar thermal collectors, absorption chillers, ice makers, and CHP systems.

EDUCATION

Ph.D. Physics, Columbia University
B.A. Physics, Oberlin College

Licenses
NYS Professional Engineer (Mechanical)
LEED Accredited Professional

Redacted | **Manager, Research | Urban Green Council**

EXPERIENCE

Urban Green Council, New York, NY
Manager, Research, 2019 – Present
Manages research initiatives for a leading NYC environmental nonprofit; executes data analysis and content on industry trends.

- Lead the research, geospatial analysis and writing for the Exploring Equitable Electrification research brief. This included utilizing NYC's Environmental Justice Area maps and combining them with Urban Green's Grid Ready geospatial dataset
- Developed an interactive visualization for the Grid Ready Report. This included conducting market and user research; utilizing agile project management methods to coordinate web development; and designing an accessible and intuitive UI/UX.
- Conducted data analysis for the last two publications of the NYC Energy and Water Report (2019 and 2020). This included trend analysis of the GHG emissions and site EUIs for NYC's largest buildings over the past 10 years.
- Wrote a series of data-driven blogs in support of NYSERDA's Buildings of Excellence Competition.
- Developed custom data visualizations for the Going Electric Report that demonstrated foundational concepts of building electrification in NYC, including heat pump performance and retrofit targets.
- Facilitated communication and research for the Advancing Electrification convening.
- Conducted extensive research on building decarbonization strategies, environmental justice priorities and GHG tracking.
- Hired as Research Coordinator; promoted to current position in 2021

True Health New Mexico, Albuquerque, NM
Business Operations Specialist, 2015 – 2018
Executed state and federal regulatory activities for a major region health plan; collaborated with critical vendors to deliver essential services to members. Relevant experience includes:

- Strategized to determine optimal health insurance premiums based on actuarial guidelines, local market dynamics and expected effect of government policy.
- Managed annual product fillings allowing company to sell health insurance in local and federal Healthcar.gov market.
- Lead regular meetings with external vendors that provided fulfillment, technological and actuarial services.

EDUCATION

The New School for Social Research, New York, NY
Master of Arts in Economics

University of Oregon, Eugene, OR
Bachelor of Science in Mathematics and Economics

Redacted | Senior Director, Development and Communications | Urban Green Council

EXPERIENCE

Urban Green Council, New York, NY
Senior Director, Development and Communications, January 2017 – Present
Lead the fundraising activities and communications for a nonprofit that tackles climate change by decarbonizing buildings to create healthier and more resilient communities.

- Manages all major publications and communications projects, including copy, design, schedule and budget, in collaboration with program staff across multiple platforms including print, web, video, and social media.
- Designs and implements strategies to build community, increase membership, and raise awareness around key sustainability issues.
- Positions Urban Green as a thought-leader in the NYC energy and building sustainability communities.
- Achieved record media engagement and helped feature the organization in over 200 publications, including the New York Times, Wall Street Journal, Forbes, Huffington Post, U.S. News and World Report, and Inside Climate News.
- Strategize and strengthen Urban Green's online presence (website, social media, and email marketing).

Wildlife Alliance, New York, NY
Development Officer & Manager of U.S. Operations, April 2016 – January 2017
Responsible for raising full $4 million organizational budget, supervising team of four in all fundraising, communications and marketing initiatives for an international wildlife conservation organization.

- U.S. liaison to international project managers, ensuring flow of reporting and communication.
- Wrote foundation and corporate grant proposals; drafted partnership contracts.
- Composed and coordinated individual direct mail and digital appeals.
- Prepared all documents, data and materials for strategic planning process, putting forth suggested strategies to the Strategic Planning Committee for organization's future.

Assistant Director of Communications, May 2015 – March 2016
Developed and implemented multi-platform communications strategy and cause-based fundraising campaigns.

- Redesigned and upgraded website to match recent trends and appeal to a broader audience.
- Streamlined conservation message and modernized online visuals to achieve brand cohesion.
- Created and designed all email and digital marketing communications.
- Grew website traffic by over 60 percent and social media audience by 166 percent.
- Developed SEO strategies and monitored website and digital campaigns.

Development & Communications Associate, November 2012 – April 2015
More than doubled our social media and website traffic. Implemented focused campaign style fundraising, and introduced online advertising using Google Adwords and Facebook cost per click evaluation.

Clean Air Force of Central Texas, Austin, TX
Community Education and Outreach Associate, 2010

Colorado River Foundation Austin, TX
Environmental Education Intern, 2009-2010

EDUCATION

Duke University, Durham, NC
Master of Environmental Management

University of California, San Diego La Jolla, CA
Bachelor of Science in Biology

Redacted | Manager, Policy | Urban Green Council

EXPERIENCE

Urban Green Council, New York, NY
Manager, Policy; 2019 – Present
Manages Urban Green's policy initiatives in New York City and New York State through writing, policy analysis, stakeholder interaction, and meeting facilitation.

- Coordinates with external stakeholders, NYC government staff, key knowledge experts, and Urban Green staff to convene, research, and develop innovative policy solutions for buildings and climate change, including those related to energy efficiency, electrification, benchmarking, zoning, equity and environmental justice, efficient codes and standards, renewable energy, resiliency, and other decarbonization efforts.
- Leads and contributes to the development of Urban Green's research and policy analysis, including reports, blogs, policy briefs, public comments, and written testimony, including Local Law 97, Exploring Equitable Electrification, PACE, Carbon Trading and Local Law 154.
- Tracks key NYS policy developments on climate and energy, including the implementation of the NYS CLCPA process, relevant PSC proceedings, and state laws, and contributes to Urban Green recommendations.
- Represents Urban Green's work externally at public hearings, webinars, and events.

Center for Climate Systems Research (CCSR); The Earth Institute, Columbia University, New York, NY
Staff Associate Officer of Research, 2015 – 2019; Graduate Research Assistant, 2013-2015
Researched and communicated local climate science to guide resiliency and adaptation planning, with focus on NYC region.

- Project Manager, *New York City Panel on Climate Change (NPCC) Third Report 2019*, detailing climate risks to the region for use in adaptation policy and planning by NYC Mayors Office and City Council. Co-authored two NPCC 2019 chapters. Facilitated meetings among stakeholders, scientists, and city government. Presented NYC climate science at conferences, in interviews, and at legislative hearings.
- Published research based on co-generated, downscaled climate information with local and national governments and stakeholders, including analyzing and visualizing data outputs. Partnered with World Wildlife Fund to provide tailored climate risk information for projects in Myanmar, Asia's High Mountain region, and Paraguay, and with C40 and Acclimatise to assess climate risks to global cities in the 2018 *The Future We Don't Want* report.
- Supported research of Dr. Cynthia Rosenzweig and Dr. Radley Horton on New York State *2014 ClimAID Report*, the *NPCC 2015 Second Report*, and the NOAA-funded RISA Consortium for Climate Risk in the Urban Northeast. Contributed to 2014 research on Con Edison's Climate Vulnerability Study assessing future extreme heat impacts to equipment and energy services.

U.S. AmeriCorps, Host Site: Earth Spirit Educational Services, Inc., Buffalo, NY
Environmental Educator, 2012
Full-time AmeriCorps teacher, reaching over 5,000 children ages Pre-K to 12th grade.

Buffalo Niagara RiverKeeper, Buffalo, NY
Water Quality Monitoring Intern, 2011
Performed EPA funded water quality monitoring and data collection for Niagara and Buffalo River watersheds as part of the 2011 Riverwatch Monitoring Program. Contributed to federally funded research reporting.

GrowWNY.org / Community Foundation for Greater Buffalo, Buffalo, NY
Community Engagement Manager, Independent Contractor, 2010-2011
Engaged the Western New York community on hyper-local website partnering 80+ local environmental non-profits.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Urban Justice Center

Address: 40 Rector Street, 9th Floor

City: New York

State: NY: New York Zip Code: 10006

B. Unique Entity Identifier (UEI): VEFNNYCJNMP9

C. Applicant/Recipient Point of Contact

Name: Mohamed Attia

Phone: Ex. 6 - Personal Privacy (PP)

Email: mattia@urbanjustice.org

Title: Managing Director - Street Vendor Project

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☒ Yes ☐ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Kristin Jamberdino
Chief Operating Officer and General Counsel
Urban Justice Center
40 Rector Street, 9th Floor
New York, NY 10006
E-mail: kjamberdino@urbanjustice.org
Ex. 6 - Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

Urban Justice Center has enclosed a copy of its adopted grievance procedures under "Other Attachments" as part of the application.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Rachel Aimee	Development Director, Street Vendor Project	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Budget Narrative

Introduction:

SVP has budgeted out a $574,811 cost to execute the scope described above, and seeks $500,000 in support from EPA EJCPS. SVP will rely on a general operating support from the Urban Justice Center as well as general unrestricted fundraising and donations to the Street Vendor Project as part of UJC in order to account for the additional ~$74,811 in funding required to execute the work.

Below, SVP narrates assumptions behind budget line items.

Personnel

- Mohamed Attia will serve [redacted] of his time on the EJVV project to direct all aspects of the scope work, oversee the fulltime EJVV project manager, manage relationships with subcontractors and subawardees, and interact with EPA program staff.
- The SVP development director will allocate 5% of her time to the EJVV project to complete training and reporting required by the EPA.
- A fulltime EJVV Project Manager, to be recruited and onboarded prior to the start of work on Nov 1 2023, will allocate 100% of their time to the project for the three years.

*SVP assumed a 3% annual escalation of salary rates year 2 and year 3.

Fringe

SVP uses a 34.5% fringe rate inclusive of benefits for personnel and can provide a breakdown of personnel benefits that account for the fringe rate upon request by EPA.

Travel

SVP has estimated subway costs associated with EJVV-related travel at 30 days of travel per month (~$125/month) for the equivalent of ten months per year ($1,250) to cover travel costs incurred by the EJVV Project Director, the EJVV Project Manager, and EJVV Part-Time Coordinators.

***SVP has allocated travel line item costs to non-federal costs (provided by the applicant).*

Equipment: N/A

Supplies

- SVP anticipates purchasing up to three research-grade air quality monitors (AQM) to be affixed to vending carts or worn by vendors at an estimated amount of up to $2,500 per AQM. ($7,500)
- SVP anticipates purchasing up to three wifi stations at an estimated amount of up to $175 per station to enable a constant internet connection between AQM and the internet to enable live or periodic upload of data to the cloud for retention and analysis. ($525)

Contractual

- SVP will procure a private technical engineering expert to provide in depth guidance and electrical engineering expertise to team of prototype development participants composed of up to two manufacturers, up to two vendors, a commissary owner, the Center for Zero Waste Design, and the EJVV Project Manager. SVP will hold a competitive procurement for engineering services, including outreach to federally certified DBEs, under an expected cost cap of $30,000.
- SVP will hire up to two part-time contractors that provide multilingual assistance to vendors participating in AQM processes for an amount not to exceed $32,000 in total, not inclusive of travel costs allocated to the Travel category.

*SVP has allocated the first $25,000 in each of the contractual categories above to Modified Total Direct Costs (MTDC), totaling $50,000 in Year 1.

**SVP allocated one part-time 1099 EJVV project coordinator under federal costs ($16,000) in addition to associated indirect costs. SVP allocated contractual costs for the technical engineering expert and one of the two part-time coordinators ($46,000)—as well as associated indirect costs—to non-federal costs provided by the applicant.*

Construction: N/A

Other: Subawards:

- SVP has reserved $35,000 in costs to provide a subaward to a non-profit community-based organization (CBO) or university to provide advisory services and implementation support with AQM.

- SVP has allocated a $38,005 subaward to the Tri-State Transportation Campaign to provide facilitation services rooted in sustainable transportation and public realm infrastructure planning described above in "Partner and Collaborate."
- SVP has allocated a $11,420 subaward to the Center for Zero Waste Design to provide facilitation services and expertise in sustainable waste management as described above in "Partner and Collaborate."

*SVP has allocated the first $25,000 in each of the contractual categories above to Modified Total Direct Costs (MTDC), totaling $35,000 in Year 1 and $25,000 in Year 2.

Other: Participant Support Costs:
SVP has allocated $10,000 in participant support costs to incentivize:

1. Up to two (2) cart manufacturers $4,000 to meaningfully participate in the prototype design process by attending several meetings in a year with the participants and sharing their expertise on current cart specifications.
2. Smaller stipends of up to $500 each to up to two (2) vendors who provide insight on vendor needs and commentary on evolving prototype designs.

*SVP has allocated these PSCs across Years 1 and Years 2; however, SVP may need to pay the entirety of stipends earlier in Year 1 in order to increase the accessibility of participation to all participants.

***SVP has allocated PSCs to non-federal costs provided by the applicant.*

Indirect Costs:
SVP used the 10% de minimis indirect cost allocation rate. SVP calculated MTDC as defined in 2 CFR.

***SVP capped indirect costs so that total direct and indirect costs allocated to federal funding did not exceed $500,000. SVP reallocated the balance of indirect costs to non-federal.*

Environmental Results Logic Model

CPS = Collaborative Problem Solving

Resources/ Inputs	**Activities**	**Outputs**	**Audience**	**Short-term Outcomes** (6-12 months)	**Intermediate Outcomes** (12-24 months)	**Long-term Outcomes** (2+ years)
• EJVV Project Director, Project Manager time • EJVV Coalition Volunteers • 3 testable rechargeable batteries (obtained 2022-2023) • Partner organizations (CfZWD, TSTC, Nixon Peabody) • Air quality monitoring expert, equipment • Technical engineering expert • Additional grants as available	<u>Task 1: Collaborative Prototyping</u> • Review existing tech and pathway to vendor IP. • Identify, convene, guide partners through prototype design. • Receive feedback on prototype. • Refine prototype. • Implementa-tion plan for functioning cart based on design. • Craft vendor educational materials.	• 12+ EJVV Coalition meetings • Target 50% growth in EJVV membership (~10 → 20 volunteer members) • Target 5 prototype designers. • 1 adaptable prototype design for battery-powered cart. • At least 3 air quality monitors used over 6-12 months of testing • 1 HIA report with proposals and plan to	• At least 5,000 licensed street food vendors in NYC, and up to 9,500 in next 10 years. • Street vendors in other U.S. contexts. • Clean power and battery industry • Local and nationwide academics interested in building on vending-related air quality monitoring, health sciences, engineering, climate science.	• Increase in stakeholders committed to EJVV project. • Reduction in GHGs and noise pollution among carts participating in HIA assessment of batteries on hand.	• Increase in stakeholders committed to EJVV project. • Reduction in GHGs and noise pollution among carts participating in HIA assessment. • Creation of a prototype design. • Vendors begin to elect to replace generators with batteries to improve their health outcomes.	• Lasting increase in stakeholders committed to EJVV project. • Decrease in asthma-related hospitalization among vending population. • Increase in life expectancy among vending population. • Reduction in GHGs and noise pollution from vendors citywide. • Implementa-tion of tangible, functioning cart for operating vendors.

Center for Zero Waste Design

96 Sterling Street, #1, Brooklyn NY 11225
clare@centerforzerowastedesign.org Ex. 6 - Personal Privacy (PP)

April 11th, 2023

We are writing to express our strong support for and partnership behind the Street Vendor Project's "Environmental Justice Collaborative Problem-Solving" grant application to the U.S. Environmental Protection Agency, to advance a long-term effort focused on equitable street vending cart electrification to support the health of vendors and all New Yorkers.

The Center for Zero Waste Design fully supports this initiative and believes it is critical for New York City to take action to reduce greenhouse gas emissions and improve air quality, especially for the workers who power the street food vending industry. We understand that the Street Vendor Project has a proven track record of working collaboratively with communities and with the City to address environmental justice issues, and we are confident that this project will be a success.

In addition to our established organizational support of the Environmental Justice for Vendors, by Vendors Project, we look forward to expanding our partnership by:

- Participating and presenting updates at the quarterly Environmental Justice for Vendors, by Vendors Coalition meetings
- Advising prototype design participants on incorporating best practice waste management design
- Developing recommendations for the design of waste stations and standard operating procedures to support better waste management – both on street carts and in vending commissaries.
- Outlining vendor education materials to be posted in commissaries or other areas frequented by street vendors that communicate sustainable waste management principles and behaviors.
- Ensuring that Street Vendors can participate in reusable food service ware programs, by identifying discount programs used elsewhere, and reviewing any health code rule changes necessary. Consider additional equipment within commissaries to enable vendors to reduce and better manage waste.

Thank you for considering our letter of support and partnership, and we look forward to seeing the positive impact of this project in New York City, both for vendors, and our fellow New Yorkers.

Sincerely

Clare Miflin
Executive Director
Center for Zero Waste Design, a project of the Fund for the City of New York (501c3)

TRI-STATE TRANSPORTATION CAMPAIGN

Mobilizing the Region

April 15, 2023

RE: Urban Justice Center: Street Vendor Project EPA EJCPS Grant Application Partnership

Tri-State Transportation Campaign (TSTC) is writing to express our strong support for and partnership behind the Street Vendor Project's "Environmental Justice Collaborative Problem-Solving" grant application to the U.S. Environmental Protection Agency, to advance a long-term effort focused on equitable street vending cart electrification to support the health of vendors and all New Yorkers.

Tri-State Transportation Campaign is a 501(c)(3) non-profit organization dedicated to promoting sustainable transportation, equitable planning policies and practices, and strong communities in the New York City metro area. TSTC uses data and policy analysis, along with strategic media outreach, to influence decision-making throughout the metropolitan region. Since it was founded in 1993, TSTC has become a leading voice in the region for transportation and land use policy reform and has enjoyed a strong record of accomplishment. TSTC's board of directors consists of senior staff from non-profit organizations and representatives from the transportation industry. The organization's staff bring various technical, policy, legal, environmental, campaign, and planning expertise to their work across the region. TSTC is headquartered in New York City and has a satellite office in Trenton, New Jersey.

TSTC had the opportunity to engage SVP in 2021, and submit a collaborative grant proposal. This precursor project has now been strengthened to establish a multi-phased approach that we believe will lead to the development of a successful model for the design, policy adoption, project implementation, and replication of clean food carts. This initiative will pave the way to improve the public health conditions for our network street cart vendors, who provide essential food service. As part of this project TSTC will utilize our expertise in advocacy to:

- **Design and facilitate** a long-term problem-solving forum to establish vendors' on-street and in-commissary electrification needs, profile existing constraints and barriers to electrification, and define shared standards for accessible and just infrastructure electrification. The forum will involve a variety of stakeholders, including stakeholders who advocate for, bring expertise in, are responsible for, or have decision-making roles related to transportation and public realm infrastructure in NYC.
- **Strengthen networking efforts** by connecting SVP with environmental air quality monitoring practitioners or academic groups.
- **Advize on strategic and inclusive outreach** to participants in the expanded, EPA-funded Environmental Justice for Vendors, by Vendors process–specifically participants in prototype design, participants in a quarterly Coalition that provides feedback on the overall 3-year project, and participants in the problem-solving forum.

RE: Urban Justice Center: Street Vendor Project EPA EJCPS Grant Application Partnership

Dear Administrator Regan:

Nixon Peabody LLP writes to express its strong support for and partnership behind the Street Vendor Project's "Environmental Justice Collaborative Problem-Solving" grant application to the U.S. Environmental Protection Agency, to advance a long-term effort focused on equitable street vending cart electrification to support the health of vendors and all New Yorkers.

Nixon Peabody is a full-service law firm with 15 locations throughout the United States and in international markets. Our diverse platform offers clients the right combination of local resources and international experience. We deliver sophisticated legal services to our clients and our communities by combining high performance, entrepreneurial spirit, deep engagement, and an unwavering commitment to a culture of collaboration, diversity, and humanity. Through Kristin Jamberdino, COO and General Counsel for the Urban Justice Center and former Nixon Peabody partner, we learned about the Street Vendor Project and the important work it is doing to empower NYC small businesspeople.

If the grant were awarded, our firm would be glad to support Street Vendor Project on the following patent related issues.

- Review existing patents for battery-powered or electrified carts to understand the state of the field and help SVP and prototype design participants avoid potential intellectual property conflicts.
    - *(1-2 months Nov-Dec 2024.)*
- Work with prototype design participants to chart a pathway to protect and share intellectual property ownership among prototype design participants. The goal is to make vendor economic empowerment and IP ownership central to the process of mitigating harmful emissions from generators.
    - *(2-3 meetings 2025 with potential concentrated work at end of 2025 design process.)*

We understand that the Street Vendor Project has a proven track record of working collaboratively with communities and with the City to address environmental justice issues, and we are confident that this project will advance positive health and economic outcomes for the currently underserved population of vendors in New York City.

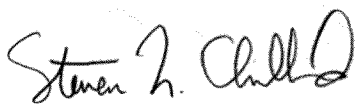
MAR

COLUMBIA CLIMATE SCHOOL
LAMONT-DOHERTY EARTH OBSERVATORY

RE: Urban Justice Center: Street Vendor Project EPA EJCPS Grant Application Partnership April 15, 2023



As a Lamont Research Professor at the Lamont-Doherty Earth Observatory of Columbia University's Climate School, I am writing to express my strong support for the Street Vendor Project's "Environmental Justice Collaborative Problem-Solving" grant application to the U.S. Environmental Protection Agency. The Street Vendor Project, as part of the Urban Justice Center, seeks funding to continue a long-term effort focused on equitable street vending cart electrification to support the health of vendors and all New Yorkers.

My formal training was in geochemistry and focused on analytical chemistry of environmental samples and understanding the fate and transport of particle-associated contaminants in the environment. I have become an expert in exposure assessment to air pollutants with an established track record of developing and managing analytical facilities and sampling equipment and overseeing field work in support of public health research in airborne contaminants. I have been the Director of the Exposure Assessment Core Facility of Columbia's Center for Environmental Health in Northern Manhattan since 2011 and was co-Director prior to that for another 10 years. This Core Facility supports a wide array of air pollution projects and pilots in settings in NYC and around the world. I am also an active member of Columbia's CleanAir Toolbox, a collaboration of 20 research groups across the Columbia Climate School focused on solutions-oriented work to improve air quality in cities across the Global South. In addition, I teach courses at Columbia's School of International and Public Affairs and the School of Professional Studies.

After a conversation with the Street Vendor Project, I am interested in their focus on Street vendors as an underserved population that are exposed to high levels of heat, noise and air polution. In this proposal their approach is to focus on using air quality monitoring techniques to understand rates of chronic exposure to airborne contaminants among vendors, and members of the public, within and around street carts in New York City. My prior work includes publications that show that street carts can be very high sources of air pollutants to both workers and the public that stand out even in cities with very high ambient air pollution levels. I am enthusiastic about the prospect of remaining in contact with the Street Vendor Project and potentially advising on their approach and analysis if funding is in place.

Thank you for reviewing my letter of support. I look forward to the prospect of this project having a positive impact on vendors and New Yorkers.

Sincerely,

Steven N. Chillrud

RE: Urban Justice Center: Street Vendor Project EPA EJCPS Grant Application Partnership

Dear Administrator Regan,

I write to request fair and due consideration of Street Vendor Project's grant application to the U.S. Environmental Protection Agency's (EPA) Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement. I understand that as part of the Urban Justice Center, Street Vendor Project has a proven track record of working hand in hand with street vendors, cart manufacturers, commissary owners, fellow non-profit organizations, universities, private industry, and New York City and State agency officials and lawmakers to improve working conditions and economic opportunity for as many as 20,000 street vendors in New York City.

The EJCPS grant from EPA will allow for the further development of the "Environmental Justice for Vendors, by Vendors" project (EJVV), an effort Street Vendor Project began in 2021. Having focused on equitable street vending cart electrification and sustainable waste management to support the health of New York vendors and their customers, I understand that Street Vendor Project is ready to commence piloting safe rechargeable batteries in food carts across the City. Additional funding will enable the Street Vendor Project to expand on and accelerate this work by quantifying the health benefits at stake in a large-scale shift among vendors from generators to batteries and collaborating with diverse stakeholders, including City and State leaders, to craft plans to support just and inclusive electrification in the interests of reduced greenhouse gas emissions and public health.

The goals of EJVV are an important part of an integrated approach to mitigating climate change in a way that leaves no one behind. The environmental justice mission of the Street Vendor Project aligns with our office's own long-standing commitments to equitable economic empowerment linked with climate action. Thank you for your full and fair consideration of the Street Vendor Project's grant application. I am enthusiastic about the prospect of this project resulting in positive environmental, health, and economic outcomes for vendors and all New Yorkers.

Alexandria Ocasio-Cortez, Member of Congress

EJVV Project Manager Resume

Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP) | Managing Director

Ex. 6 Personal Privacy (PP) leads the Street Vendor Project's Environmental Justice for Vendors, by Vendors program since its launch in 2021. He began his work with SVP in 2012, when he joined as a member. After ten years of operating and managing several food carts and trucks in New York City, he was elected to the Street Vendor Project's Leadership Board in 2014. His focus turned to organizing other street vendors, attending policy and legislative meetings, and serving as a spokesman for the organization. Since 2019, Ex. 6 Personal Privacy (PP) has managed SVP's efforts to expand its membership, lead legislative campaigns, and build support among elected officials for the betterment of conditions for street vendors throughout New York City. Ex. 6 Personal Privacy (PP) is fluent in English and Standard Arabic.

PROFESSIONAL EXPERIENCE

2019 – Present | Managing Director | Street Vendor Project - Urban Justice Center
Manages project staff and operations and leads strategy to improve the conditions of its members. Engages members and other street vendors in the organization's mission, and represents that mission in a variety of events and platforms. Ongoing activities include building and maintaining productive relationships with elected officials, growing the organization's funding streams, building its membership base, and initiating and leading advocacy strategies.

2018 – 2019 | Co-Director of Advocacy & Organizing | Street Vendor Project - Urban Justice Center
Led the efforts of the organizing team to conduct outreach, initiate and mobilize public demonstrations and actions to gather political rights for street vendors in New York City. Conducted outreach to street vendors to understand their needs, organized their participation in legislative and administrative forums, and campaigned for policy changes aligned with these outreach priorities.

2014 – 2018 | Leadership Board Member | Street Vendor Project - Urban Justice Center
Joined board leadership to advance SVP's organizing actions. Led meetings with vendors and other community members, planned and executed public events and civic demonstrations, and served as a spokesman for the organization.

2008 - 2018 | Street Vendor | Various Operations in NYC
Operated and managed several food carts and trucks throughout New York City. Navigated the complex bureaucracy of permits and licensing, and ensured compliance with appropriate laws and regulations governing street vending.

2006 - 2008 | Teaching Assistant | Alexandria, Egypt
Prepared and taught lessons to middle school students, supported the teacher in the development of annual curriculum, and tutored students in mathematics.

EDUCATION

2016 - 2017 | New York Worker Center Federation, NYC | Delfino Leadership Institute

2004 - 2008 | Alexandria University, Alexandria, Egypt | Diploma in Mathematics Education

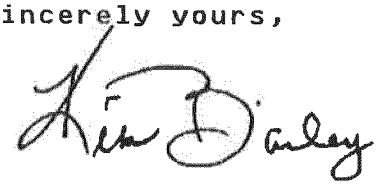
Dear Taxpayer:

This is in response to your Oct. 21, 2014, request for information regarding your tax-exempt status.

Our records indicate that you were recognized as exempt under section 501(c)(03) of the Internal Revenue Code in a determination letter issued in November 1991.

Our records also indicate that you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.



Please refer to our website www.irs.gov/eo for information regarding filing requirements. Specifically, section 6033(j) of the Code provides that failure to file an annual information return for three consecutive years results in revocation of tax-exempt status as of the filing due date of the third return for organizations required to file. We will publish a list of organizations whose tax-exempt status was revoked under section 6033(j) of the Code on our website beginning in early 2011.

Policy on Nondiscrimination in Programs Receiving Federal Assistance from the U.S. Environmental Protection Agency

Title 40 of the Code of Federal Regulations (CFR), Part 7, Nondiscrimination in Programs or Activities Receiving Federal Assistance from the Environmental Protection Agency, prohibits discrimination on the basis of race, color, national origin, age, sex, or disability in programs or activities receiving federal assistance from the U.S. Environmental Protection Agency (U.S. EPA). It requires recipients of federal assistance from the U.S. EPA to:

- Collect, maintain, and provide information showing compliance with 40 CFR, Part 7;
- Designate a person to be the Nondiscrimination Compliance Coordinator ("NCC") to coordinate efforts to comply with 40 CFR, Part 7;
- Adopt grievance procedures that assure the prompt and fair resolution of discrimination complaints alleging violations of 40 CFR, Part 7; and
- Provide continuing and prominent public notice of nondiscrimination on the basis of race, color, national origin, age, sex, or disability, and of the identity and contact information for the NCC.

It is Urban Justice Center's ("UJC") policy not to discriminate on the basis of numerous factors, including those set forth in 40 CFR, Part 7. UJC adopts the following procedures to implement the requirements of 40 CFR, Part 7.

a. Compliance

UJC shall collect, maintain, and on request of the U.S. EPA, Office of Civil Rights (OCR), provide the following information to show compliance with 40 CFR, Part 7:

- A brief description of any lawsuits pending against UJC that allege discrimination which 40 CFR, Part 7, prohibits;
- Racial/ethnic, national origin, age, sex, and disability data, or EPA Form 700-4 information submitted with UJC applications for U.S. EPA assistance;
- A log of discrimination complaints that identifies the complaint, the date it was filed, the date UJC's investigation was completed, the disposition, and the date of disposition;
- Reports of any compliance reviews conducted by any other agencies;
- Additional data and information specific to certain UJC programs or activities to determine compliance where there is reason to believe that discrimination may exist in

a UJC program or activity or to investigate a complaint alleging discrimination in a UJC program or activity.

- When preparing compliance information, UJC shall use the classifications set forth in 40 CFR, Section 7.25, in determining categories of race, color, or national origin.

- UJC shall keep records of the compliance information identified in the paragraphs above for at least three years after completing a project for which UJC was a recipient of U.S. EPA assistance. When any complaint or other action for alleged failure by UJC to comply with 40 CFR, Part 7, is brought before the three-year period ends, UJC shall keep records until the complaint is resolved.

UJC shall:

- Give OCR access during normal business hours to its books, records, accounts, and other sources of information, including its facilities, as may be pertinent to ascertain compliance with 40 CFR, Part 7;

- Make compliance information available to the public upon request; and

- Assist in obtaining other required information that is in the possession of other state agencies, institutions, or persons not under UJC's control. If such party refuses to release that information, UJC shall inform the OCR and explain its efforts to obtain the information.

b. Nondiscrimination Compliance Coordinator (NCC)

The Executive Director of UJC designates the person holding the position of Chief Operating Officer as UJC's NCC responsible to coordinate UJC's efforts to comply with its obligations under 40 CFR, Part 7.

c. Grievance Procedure

UJC adopts the following grievance procedures in order to assure the prompt and fair resolution of complaints that allege a violation by UJC of 40 CFR, Part 7:

In order to have a complaint submittal considered for investigation under this procedure, the complainant shall file the complaint no later than 180 calendar days after the date(s) of the alleged act(s) of discrimination.

The complaint shall be in writing and signed by the complainant or the complainant's representative and shall include contact information for the complainant or their representative.
The complaint shall specify with as much detail as possible:

- The actions or inactions by UJC that support an alleged violation of 40 CFR, Part 7;
- The alleged discrimination that did or will result from such actions or inactions;
- The identity of the person(s) harmed or potentially harmed by the alleged discrimination; and
- The section of 40 CFR, Part 7, that UJC allegedly violated.

UJC may request additional information from the complainant if needed to assist with meeting the complaint requirements listed above. Appropriate assistance shall be provided to individuals with disabilities and individuals with limited English proficiency. Also, complaints in alternate formats shall be accepted from individuals with disabilities, for example, complaints filed on computer disks, on audio tape, or in Braille.

All complaint submittals should be mailed (or e-mailed) to the NCC at the following address:

Chief Operating Officer
Urban Justice Center
40 Rector Street, 9th Floor
New York, NY 10006
E-mail: kjamberdino@urbanjustice.org

All allegations of discrimination, harassment, and retaliation will be promptly investigated ensuring due process for all parties. The investigation may include individual interviews with the parties involved and, when necessary, with individuals who may have observed the alleged conduct or may have other relevant knowledge. If an employee refuses to participate in an UJC inquiry, UJC will base its conclusions on the other information gathered during the inquiry, and inferences drawn from all of the credible evidence.

UJC will endeavor to maintain confidentiality throughout the investigatory process to the extent practical and appropriate under the circumstances. UJC, however, has a legal obligation to act on all information it receives if it believes an individual may be engaging in wrongful conduct or violating the law. Individuals involved in the investigation process are expected to provide their full cooperation and to maintain confidentiality.

At the conclusion of the investigation, UJC will advise any individual who has made a complaint under this policy that the investigation has concluded and share other information as may be appropriate under the circumstances.

EPA KEY CONTACTS FORM

OMB Control No. 2030-0020
Approval expires 06/30/2024

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 0.5 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☐ Yes ☒ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☐ Yes ☒ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

N/A

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/recipient's website address for, or a copy of, the procedures.**

N/A

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

Tinece Payne	Executive Director	03/30/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Tinece Payne

Address: 5504 Estate Bordeaux

City: St. Thomas

State: VI: Virgin Islands Zip Code: 00802

B. Unique Entity Identifier (UEI): WPM9AAP323T9

C. Applicant/Recipient Point of Contact

Name: Tinece Payne

Phone: Ex. 6 - Personal Privacy (PP)

Email: Ex. 6 - Personal Privacy (PP)

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☐ Yes ☒ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☐ Yes ☒ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

N/A

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/recipient's website address for, or a copy of, the procedures.**

N/A

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

EPA KEY CONTACTS FORM

OMB Control No. 2030-0020
Approval expires 06/30/2024

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 0.5 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

Experience

President and CEO

Waterfront Alliance, New York, NY

August 2020 - Current

- Craft and oversee campaign to ensure New York City progress in climate resilience through mayoral commitments and legislation
- Oversee policy and coalition strategy for the Rise to Resilience climate coalition for federal, state, and municipal outcomes
- More than doubled Waterfront Alliance press, social media, op-ed, and speaker placements in one year
- Developed and led program content for 2021 Waterfront Conference attracting national participation, media coverage, and increased revenues
- Lead and oversee all strategic, programmatic, development and fundraising initiatives exceeding all revenue goals to date
- Spearheaded increase verification of coastal projects for climate resilience through WEDG program
- Establish focus and priority for grassroots community organizing and community development priorities in current programming

Senior Regional Director, Northeast

National Parks Conservation Association, New York, NY

January 2014 - August 2020

- Pioneered and led national campaign for Stonewall National Monument, resulting in 2016 designation by President Obama
- Led region covering 8 states, staff, interns, consultants, volunteers, advisory board and national team members
- Raised over 2.5M for programs and operational expenses, including all operational expenses for 5 years. With team raised 3M capital campaign anchor donation
- Set national standard for fundraising materials and relationship-based donor cultivation. Donor cultivation strategy increased mid-level donor participation and Gala participation
- Positioned NPCA for newfound influence over National Park Service, local decision makers, and community partners in 6 subregions
- Strategic planning process met needs of other departments, fostered collaboration and policy development across departments for the first time
- Voice and face of national parks stewardship and partnership model for national parks from New Jersey to Maine
- Led master planning, visioning and stakeholder process for national park visitors center and ranger contact station
- Developed and co-executed conservation strategy for business and local economic partnerships in rural Delaware River national park communities heavily dependent on tourism

and Public Affairs
1999-2000

BA Environmental Policy
Biology minor
Mount Holyoke College
1990

- Revitalized sustainability program for carbon neutrality and developed detailed carbon emissions calculator for national travel
- Attracted over 10,000+ new supporters of NPCA in the Northeast, over 2,000 locally through regional park protection programs
- Regional strategist and national team member for diversity, equity and inclusion (DEI) initiative
- Operational efficiency implemented through new budget controls, consulting RFPs, RFEIs, contracts, invoicing, expense controls, and bookkeeping systems for multiple programs and region

Chief Operating Officer

Waterfront Alliance, New York, NY

January 2009 - January 2014

- As first Chief Operating Officer with CEO tripled organization and staff size, and increased board recruitment
- Co-created highly successful fundraising strategy that allowed emergence of independent nonprofit through the 2008 recession. Increased foundation, corporate and individual revenues by nearly 50 percent
- Established waterfront regulatory reform program that catalyzed change at New York State Department of Environmental Conservation Region 2
- Co-architect of NY-NJ Harbor Coalition - coalition of 10 leading environmental organizations. Coordinated collaboration of 12 executive directors and staff
- Led operations and internal policy implementation for new strategic plan
- Event Director for major one-day public event attracting over 17,000 visitors each year 2009 - 2013 and all other events

Organizational Consultant

Delaware Department of Natural Resources & Environmental Control, Dover, DE

2003-2005

- Established a new nonprofit organization for watershed protection in Delaware's fastest developing watershed
- Designed over 15 original projects and long-term strategies for complying with environmental regulations. Strategies were later adopted by county government to fulfill MS4 Phase I and Phase II permit requirements and address voluntary storm water controls for new suburban development

Environmental Specialist

CH2M Hill, Atlanta, GA

1997 - 1999

- Private Sector: Lead facilitator and convener of teams of engineers, scientists, and clients for structural and non-structural point source control-based watershed projects and Phase II storm water regulations

Southeast Regional Manager

Blymyer Engineers, Inc., Alameda, CA

1993 - 1997

- Directed program leading to compliance with storm water regulations in 50 states for over 300 transportation facilities

EDUCATION

Columbia College | Columbia University, New York, NY (cum laude) *Graduated:* May 2019

Bachelor of Arts in Political Science (Pi Sigma Alpha) with a minor in East Asian Studies

U.S. State Department Critical Language Scholarship (CLS) in Chinese, Suzhou, China *May - Aug. 2017*

WORK EXPERIENCE

***Paralegal,* New York Legal Assistance Group, Tenants' Rights Unit,** New York, NY *Oct. 2020 - present*

- Manage a caseload of over 180 clients in nonpayment and holdover proceedings in Manhattan Housing Court, assisting a growing team of 30 staff attorneys
- Conduct thorough client intakes using a trauma-informed approach, remotely and in court
- Prepare advocacy packets for clients applying to obtain rental arrears assistance from multiple government agencies and organizations, totaling over $250,000 to date
- Provide oral and written translation for Spanish-speaking and Mandarin-speaking clients, virtually and in person
- Complete home visits to clients' apartments, often photographing evidence and observing inspections
- Work with tenant organizers and the Right to Counsel network, including a multi-year building-wide case involving five families
- Train new paralegals and attorneys on the intake process, client advocacy, and public benefits
- Interview candidates for all unit positions and evaluate language ability in Spanish and Mandarin Chinese

***English Teaching Assistant,* Fulbright Scholarship Program,** Yilan, Taiwan *Aug. 2019 - July 2020*

- Co-taught grades 1 - 7 in English at three Taiwanese public schools, working with five Taiwanese English teachers and over 100 students
- Developed curriculum for teaching American history and culture to Taiwanese elementary school students
- Volunteered at Taiwan Tongzhi Hotline Association, oldest existing LGBTQ advocacy organization in Taiwan

Ticket and Information Center (TIC), Columbia University Arts Initiative, New York, NY

Assistant Manager *Sept. 2018- May 2019*

Sales Associate *Sept. 2017 - Sept. 2018*

- Supervised a team of 12 sales associates, facilitating shift changes, managing weekly schedules, and opening and closing the TIC office
- Entered sales data daily into spreadsheets and reviewed sales associate reports
- Organized and maintained cash inventory as well as physical tickets for on and off-campus events and productions

***Equality CA Fellow,* Office of CA State Assemblymember Kamlager-Dove**, Sacramento, CA *June - July 2018*

- Briefed the assemblymember on upcoming legislation, providing analysis of the support and opposition
- Attended State Assembly and Senate committee hearings
- Managed the reception desk, answered phones, and performed other organizational tasks

***Intern,* East Bay Sanctuary Covenant,** Berkeley, CA *June 2016 - Aug. 2016*

- Prepared work permit and Social Security application packets for EBSC clients
- Conducted intakes of new clients seeking asylum and answered phones in Spanish

LEADERSHIP POSITIONS (elected)

***President,* Proud Colors**, New York, NY *Aug. 2017 - May. 2019*

- Planned and facilitated student and administrator-led meetings for club membership
- Organized student events that involved catering, keynote speakers, performing artists and alumni

Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant

Volunteer In Your Community Inc.'s (VIYC) mission is to assist people living in poverty in the USA. We help provide volunteers, resources, and events that empower adults and youth with the knowledge and tools they need to avoid poverty and live better lives. We promote and support healthy living, energy efficiency, an eco-friendly environment, and clean air initiatives. We give education, classes, workshops, retreats, and free mental health care. VIYC creates and adapts systems and self-sufficient solutions for communities to sustain them. Our programs help encourage sustainability, reduce waste, and protect our natural resources.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? Yes. We are applying for the Small CBO Set Aside Track for $150,000 projects. See Employee Roster.

Project Type(s) This project fits the following example listed in Section F in the RFA: "Cleanup of nonhazardous trash (e.g., scrap tires, construction debris) in underserved communities, especially where illegal dumping is an ongoing concern."

Special Considerations - *If applicable to your project, which special considerations do you believe your project qualifies for? (Climate Change/Disaster Resiliency, Rural Areas, Health Impact Assessments, and/or other factors identified in Section V).* We believe Special Considerations are applicable for this project because St. Thomas, USVI is a Rural Area because its population is less than 50,000. According to the 2020 US Census, the population on St. Thomas Island is 42,261.

Environmental Issue –The environmental issue of concern on this project is "Waste/Waste Management".

List of Project Partners

- University of the Virgin Islands (Academic)
- Elevate Wi (CBO)
- Nagatent Temple (Faith-based organization)

Will you need to develop a QAPP for your project? No. We do not plan to develop a Quality Assurance Project Plan for this project. Our answer was "No" to all questions in Appendix H.

Work Plan

1.0 Program Objectives

Project Abstract

The U.S. Virgin Islands is known for its friendly people, authentic Caribbean food, cultural traditions, and beautiful beaches. These features attract countless visitors each year. The influx of people, coupled with other social, geographic, and economic factors, contributes to the degradation of the Islands' environment. Hundreds of thousands of debris have been removed from USVI shorelines in recent years (USVI Marine Debris Action Plan, 2021). Although the population of St. Thomas is rural, with only 42,000 people (US Census, 2020), nearly 2 million tourists visit the island each year. This increase in population means that tons of trash are created, consumed, improperly disposed of, and illicitly burned. The waste infrastructure, or lack thereof, on St. Thomas puts those on the island at a significant disadvantage.

The main objectives are to facilitate the engagement of this vulnerable and disadvantaged community through on-the-ground activities, such as litter cleanup, and hold workshops for community organizing. The goal of the community organizing effort being proposed is to carry out the recommendations made in the 2021 Marine Debris report, including addressing a misalignment of data and policy with those who are working to reduce litter in the territory. Project outputs include (1.) the removal of litter from several miles on the island and subsequent diversion of debris into the surrounding Caribbean Sea, as well as (2.) the training of many residents on engagement with local government public processes. Outcomes include decreased pressure on the island's coral reef from marine debris, as well as the creation of additional public policies that reduce the downstream effects of litter.

1.1. Environmental Justice Characterization

St. Thomas is a mountainous 32-square mile island that is an unincorporated US territory. Their location in the Caribbean Sea makes them susceptible to severe tropical storms and has them on the frontlines in the battle against climate change. St. Thomas is comprised of 7 subdistricts that range in size from 182 people in the Water Island subdistrict to over 18,000 in the Charlotte Amalie capital district (Census, 2020). According to the US Census, there was a loss in population on the island of approximately 9,000 people between 2010 and 2020. The majority of households are of low and moderate income (US Census, 2020). While several environmental screening tools have been developed that are used to characterize the disadvantages communities face and to illustrate the disproportionate exposure that exists in many places, it should be noted that to-date, these tools have limited coverage for the USVI. Although this project focuses on municipal solid waste, we were curious to see the distribution of the exposure to hazardous waste on the island. A map from EJScreen version 2.1 showing the hazardous waste proximity at the census tract level is provided in Exhibit 1.

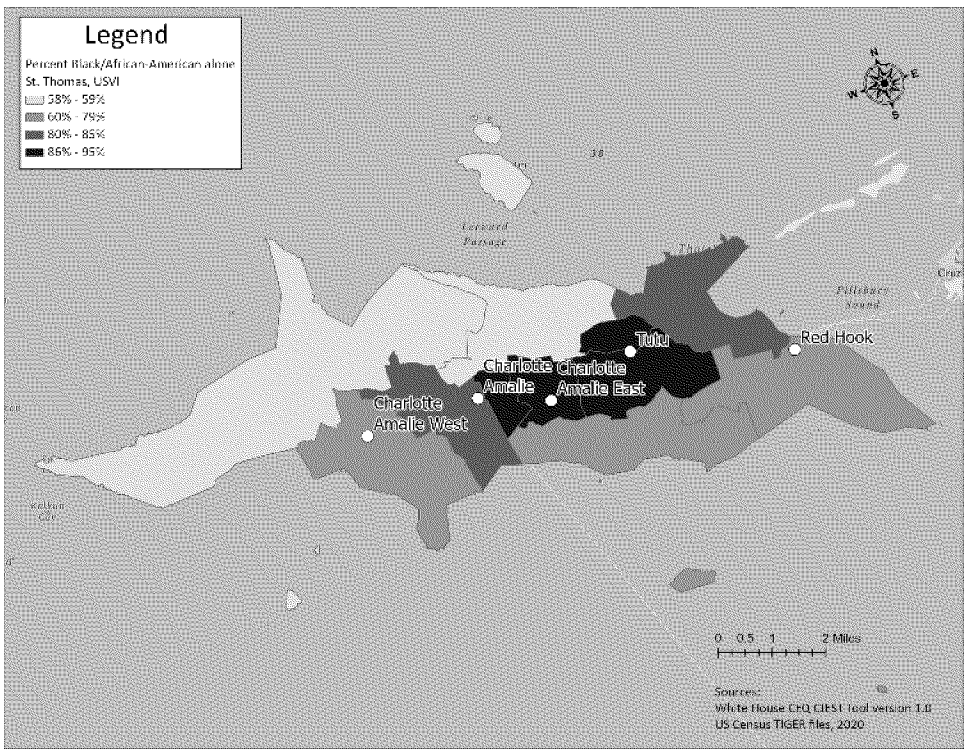

Exhibit 1. Map of the hazardous waste proximity from EJScreen on St. Thomas

The White House Council on Environmental Quality's Climate and Economic Justice Screening (CJEST) tool does provide data by race for the island territories, and a map showing the percentage of black residents, who are the largest population group on the island, is provided in Exhibit 2. The data indicate that there are some overlapping tracts that have high percentages of black population and a high percentile of proximity to hazardous waste.

Exhibit 2. Map of St. Thomas showing the 2020 black population by census tract

The history of racism and environmental injustices against the citizens of the Virgin Islands has been well documented (Gillum, 2018; Samuel, 2021; Harden, 2022). Their inability to fully control their political governance has made them susceptible to environmental abuse, inordinate burdens, and polluted air and water (University of Vermont, 2021). Since the USVI receives fewer

federal dollars because they are territories and not states, many of their systems (electricity, transportation, housing, and education) are subpar and tourism is their primary economic driver.

The waste infrastructure, or lack thereof, on St. Thomas puts those on the island at a significant disadvantage. The territory has a small number of trash collection trucks, landfills are at capacity, and there is not a comprehensive recycling program (USVI Marine Debris Action Plan, 2021).

1.2 Environmental/public health issue(s) to be addressed

This project seeks to address the environmental issues associated with litter and debris along the landscape of St. Thomas. Although the population of St. Thomas is rural, with only 42,000 people (US Census, 2020), nearly 2 million tourists visit the island each year. This increase in population means that tons of trash are created, consumed, illegally disposed of, and illicitly burned. Analyses conducted by Roper, 2020, showed that 90% of beach cleanup data collected by volunteers in the USVI comes from land-based sources. The debris composition of most items found on the island consists of SUPs, glass bottles, beverage cans, and bottle caps (USVI Marine Debris Action Plan, 2021). Jericho and Patrick, two life-long residents on St. Thomas, complained about "lack of infrastructure for cleanliness, recycling, and disposal" of trash.

The waste infrastructure, or lack thereof, on St. Thomas puts those on the island at a significant disadvantage. The island easily becomes overwhelmed with consumer goods. The territory has a small number of trash collection trucks, landfills are at capacity, and there is not a comprehensive recycling program (USVI Marine Debris Action Plan, 2021). Additionally, residents feel that the water is unsafe to drink, due in part to previous testing which showed unacceptable ranges for *e. coli*. As a result, many people buy their drinking water, which results in large amounts of SUPs across the island. While the environmental burden of this community will persist, and the environmental threat of litter to the marine life around the island will not be eliminated, our project aims to reduce the exposure of consumer waste and degradation of this community's resources.

Exhibit 3. Picture of trash taken in February 2023 on the applicant's farm in Bordeaux in St. Thomas

1.3 Environmental/public health results and community benefits

The purpose of the project being proposed is to conduct small-scale clean-ups of SUPs and other debris found on the island of St. Thomas. Our anticipated results are two-fold, (1.) the removal, and proper disposal, of hundreds of pounds of litter from the island of St. Thomas. (2.) community building and

leadership development among youth and others, to reduce waste and become engaged in public processes.

Community members and organizations, including those who are collaborating on this effort, have been involved litter clean ups since at least the 1960s (USVI Marine Debris Action Plan, 2021). Our project will expand those efforts to include a stakeholder engagement component so that residents are trained on effective ways to engage with local government.

1.4 Demonstration of the strong connection between our organization and the underserved community

Being a resident of St. Thomas Island for the past two years, I experience the issues each day that results from the lack of waste infrastructure. My neighbors and I have no way to dispose of the trash. Most people burn it, which releases fumes and causes air pollution. Everybody must take their garbage to a center since there is no organized pick-up. For those who don't have transportation, they don't do anything with the trash. It just stays where it is, and this contributes to odor nuisances and some of it eventually ends up in the ocean.

Community Driven Participation

For this CLEAR STREETS effort, we have discussed our plan and approach with several community members and students at the University of the Virgin Islands. Our organization has been volunteering with community members and other organizations, including one that is a partner in this effort (Elevate Wi), and providing education and information in various avenues on the island. I have observed an increase in awareness of environmental issues here, as well as an increase in people wanting to work together and help each other. I have noticed how people are becoming more active about wanting to become more active in public engagement and solve the environmental problems that exist here.

1.5 EJ Collaborative Problem-Solving Model

Exhibit 4 illustrates our Collaborative Problem-Solving Model (CPS). We will utilize the EJCPS Model in our collaborative efforts to build community capacity, consensus building, engagement with stakeholders, implement sound management, and evaluation of our project's activities.

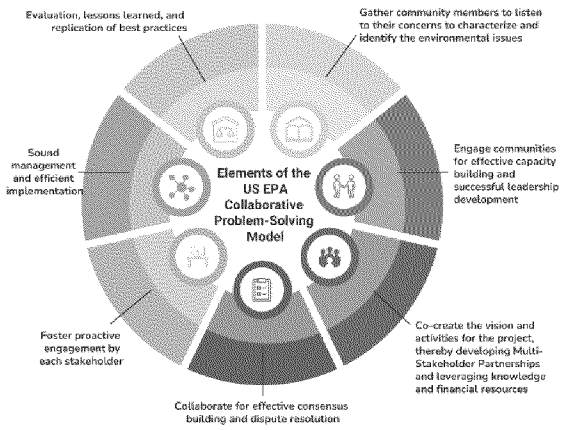

Exhibit 4. Collaborative Problem-Solving Model (CPS)

1. Issue Identification, Visioning, and Strategic Goal setting

Issue identification has already occurred. As stated previously, litter has been visible for as long as anyone remembers, and clean-up efforts have been happening for many decades. Strategic legislation has also already occurred to limit waste. In 2017, single-use plastic bags were banned and in 2019, plastic straws also became prohibited on the island (USVI Marine Debris Action Plan, 2021). The USVI Marine Debris Action Plan, 2021 has also set several strategic goals, but we will build upon leadership in the community to identify and set additional goals.

2. Community Capacity-Building and Leadership Development

The priorities for the second element are to educate, empower, and develop community members. We will hold community organizing forums where we will listen to the community to ensure that we collect from the locations where the environmental problem is most severe and places that they think will have the most impact. We want to avoid starting our efforts in places that the community views as lower priority. We will also have educational workshops where we engage youth, and any other interested persons, about environmental degradation caused by pollution and litter. We will also have seminars and trainings to empower the community so that they become educated about effective ways to engage with local government policy making. During our interactions with residents and collaboration with our partners, we will seek community champions who can serve as leaders and continue the waste reduction and engagement efforts that we are executing with this project.

3. Development of Multi-Stakeholder Partnerships and Leveraging of Resources

Each of the four organizations who are working on this project will develop a vision at the outset to strengthen our collaborative. We will also create a plan to identify and engage with partners in other sectors (government, industry, etc). Once identified, we will integrate their input to refine our vision, create additional objectives, and allow them to share their time and material resources and expertise in the execution of this work. During strategy sessions with both our small team and our larger group with multiple stakeholders, we will work to strengthen our work plan, solidify our vision for cleaning up the island, and outline goals to sustain the efforts we're undertaking.

4. Consensus Building and Dispute Resolution

The activities carried out in this project will involve building consensus among each collaborating organization to determine key actions such as where to perform clean ups, how often, who to engage, and how use our efforts to affect policy changes. It is important that the input from each group is understood and valued so that a common set of goals can be created. We will make every effort to hold meetings and activities at times that are most convenient for everyone so that no one's viewpoint is excluded. Given the availability of internet connectivity in rural places like St. Thomas, we will also strive to hold planning sessions and workshops using platforms that are ideal to achieve the greatest engagement.

When multiple entities work together, there is potential for intra-conflict to arise, even if everyone shares the same goal. When additional stakeholders are introduced into the work plan, there is greater likelihood that disputes may arise. If conflicts develop, we will look for neutral members of the community to help come to resolutions that are accepted to each party. We will also review the strategies employed by entities who have resolved disputes, including the successes of ReGenesis and

Rhodia, Inc. We will use their conflict assessment and facilitated dialogue techniques as guides for resolving any of our issues. We will work with neutral parties to create contingency conditions to help ensure the agreed upon resolutions are followed.

5. Constructive Engagement with Other Stakeholders

Listed below is our strategy to foster proactive engagement by each stakeholder:

a. Draw on the connections that exist with community-rooted organizations

One of our partners for this project, Elevate Wi, creates positive spaces for youth and adults to gather and socialize. We will use their connection to residents on the island to assemble them so we can learn more about their EJ concerns, raise awareness about the goals and planned activities of our EJCPS project, and help mobilize the community to assist with clean ups.

b. Utilize the Expertise of scholars at the University of the Virgin Islands

Another project partner, Howard Forbes, is the Coordinator for the Virgin Islands Marine Advisory Service at the University of the Virgin Islands. His technical background and indigenous knowledge about debris on the island will be invaluable for many of the project's aspects, ranging from strategic goal setting, environmental education, and community engagement. However, we will work with him to identify professors in other departments who can provide other types of technical assistance, particularly in the areas of public policy development and community capacity building for engagement with local government officials.

c. Seek External Resources

We will engage with community members, university officials, and perform research online to identify external funding sources that could enhance our efforts to achieve additional positive outcomes, particularly beyond our one-year period of performance. This could include outreach to philanthropic organizations and private foundations to seek funding to clean up extra sites, or to gather more money so that our volunteers can be paid incentives for their assistance.

d. Government Engagement

When necessary, we will work with local officials and our federal government EPA project officer to assist with project activities such as project validation, meeting facilitation, technical assistance, stakeholder coordination, publicization of the project, and dissemination of its successes.

6. Sound Management and Implementation

Although small-scale cleanups may seem to be easy to carry out, a lot of thought has gone into how to strategically perform these kinds of activities and attain the greatest impact. The 2021 USVI Marine Debris Action Plan is evidence of this. Multiple small successes were obtained through the work that have undoubtedly contributed to litter reduction on the island. We will build upon the work outlined in that Plan to address activities that weren't realized, while integrating input collected equitably from our project partners and stakeholders.

Our aim is to conduct the activities outlined in this work plan efficiently, within a 1-year time frame. Upon further engagement with the community during the forums we will hold, it may be deemed that

the work should last longer or can be completed faster. If, and when needed, we will adjust our plans, but make sure that our project is complete within 3 years of the award and within the $150,000 budget we've requested.

7. *Evaluation*

It is critical that we work collaboratively to develop well-formulated action plans, schedules, and communication materials from the beginning of the project. We will perform quarterly evaluations to review our performance towards meeting our anticipated outputs and long-term outcomes. We will confront our challenges, seek additional support and guidance from our project officer when needed, and determine what changes need to be made. We will make recommendations that are grounded in the collective experiences created on this project.

We plan to disseminate our approach to successfully completing an EPA CPS project outside of the continental United States through various forums, which may include virtual and in-person workshops, a project website, and contributions to the scientific literature. The focus of dissemination will be to offer strategies for gaining community engagement and participation to characterize and address an environmental concern, lessons learned about how to collaborate with a variety of stakeholders who have varying expertise, how to train communities to build capacity for engagement with government officials, and how to reduce the environmental burden experience by a community with EJ concerns.

1.6 How the project supports EPA Strategic Plan Goal 2, Objective 2.1 (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels)

The USVI is a classic example of an overburdened and underserved community that is experiencing environmental racism. 76% of the people living in the Virgin Islands are of African descent and the energy and environmental injustices experienced by the island communities is overtly disproportionate. Analyses have shown that their water is unsafe to drink. When hurricanes hit the island, their infrastructure is slow to be rebuilt and many people have remained without power for exceptionally long periods of time. Their waste management systems are antiquated. They do not have enough trash trucks, there's no recycling program on the island, and the unlined landfill exceeds capacity.

We know that Virgin Islanders are a resilient people. Despite all of the challenges they experience, including discrimination from industries and their own government, they welcome tourists to their beautiful beaches, and their hospitality is unmatched. However, the 2020 US Census data indicates that the island is losing population. The environmental injustices and inequitable conditions on the island are undoubtedly contributing to this reduction.

This project supports EPA Strategic Plan Goal #2, Objective 2.1 because it centers the perspectives of communities. The community's role as an authentic partner will allow for capacity building of a community with EJ concerns to engage with local government officials, to not only improve their environment, but also to develop progress towards outcomes that helps them become more resilient against the environmental challenges they face.

This project also integrates EJ principles into our proposed activities. The community's voice is uplifted. We let the community define the actions we take (where to clean up, how often to clean up, etc). We also collaborate with grassroots organizations and community leaders, (who live in and are accountable

to the community whose concerns we're working to address) to promote environmental justice and guide the work.

This US territory has been left behind by many of the environmental, technological, and economic advances that are found in the states. This territory is on the front line in the battle against climate change and it is time for the federal government to invest more attention and resources into the Virgin Islands.

1.7 Partnerships

This project's goals will be accomplished using appropriate and diverse partnerships from multiple stakeholder groups, representing community-rooted organizations, academia, and a faith-based organization. All of these organizations will be sub awardees. The primary contact from each organization comes from a disadvantaged, underprivileged background and each one has overcome those challenges to build successful careers and help others, many of whom are less fortunate, in our communities. We will maintain and sustain the relationships created in this project into the future by continuing our programs to keep the island clear of debris, as much as possible. After our period of performance ends, we will continue working with the University of the Virgin Islands and Elevate Wi to recruit and train students for our clean-up programs. We currently have a "Young Urban Farmers" group and plan to create a "Young Urban Environmentalists" group in St. Thomas who will continue the CLEAR STREETS work using the approach we develop with this project. Each organization's role is described in Table 1.

Table 1. Sub awardee/partner organizations and their associated contributions to the project

Organization	Stakeholder group the partner represents	The project activities each partner will be responsible for	How each partner will contribute to the project	What resources each partner brings to the partnership	How the partner has a vested interest in working with this partnership
Volunteer in Your Community	CBO	Project Management; Community Coordination and Organizing; Project Reporting; Participate in Litter Clean-up activities	Prime Awardee; Project Manager; Develop project strategy for on-the-ground community engagement; design and direct activities for the project; develop workshops; develop and submit reports for EPA; coordinate meetings with EPA client	Leadership; Community organizing; Event planning	We plan to sustain the programs with partnerships with local schools and educational professionals at the University of The Virgin Islands. We are also in weekly discussion and problem-solving meetings with a focus team on St. Thomas. With our current connections and partnerships, we will continue the work steadily building relationships with the student organizations focused on

					sustainability and environmental issues.
Virgin Islands Marine Advisory Service, University of the Virgin Islands	Academia	Assist with Project Management, Community Coordination/ Organizing, and Project Reporting; Environmental education; Identify neutral parties for conflict resolution, if needed	Assist with project visioning, strategic development to maximize community engagement; perform consensus building, and dispute resolution when applicable; help facilitate workshops and provide training on effective ways to engage in the policy-making process with local government officials.	Knowledge about environmental science; marine debris waste reduction	Our partner at UVI was born and raised in St. Thomas. He also received his college degrees from the UVI. He and his family still live on the island. Many in his family rely on bottled water because they feel the tap water is unsafe to drink.
Elevate Wi	CBO	Community Engagement Organizing for workshops and litter clean up; Participate in Litter Clean-up activities	Carry out community engagement activities; community organizing; community empowerment to generate interest in the clean-up tasks	Community organizing and grassroots engagement; teaching and leadership	This group is natively connected to the St. Thomas community (youth and adults).
Nagatent Temple	Faith-based organization	Technical Assistance with workshops	Workshop delivery	Educator who will be involved with demonstrating new and innovative solutions for how to use recycled, reused, and repurposed materials	This faith-based organization's founder has a passion for raising awareness and giving a solution to future problems, as well as teaching, building, creating, and sharing engineering technologies to better peoples' lives.

2.0 Project Activities / Milestone Schedule

We propose four tasks to meet the program objectives and execute the project. Our approach blends community engagement with technical expertise and local solutions, thereby creating bridges between community and science. Through outreach, we will build capacity and empower the community for public participation. This project will build partnerships that link more localized solutions to help reduce and reuse solid waste.

Task 1. Coordination among partners for the successful execution of EPA's Environmental Justice Collaborative Problem-Solving Model (EJCPS)

Without proper coordination on goal setting between collaborators, the project will face challenges. Our first step will be to assemble the necessary stakeholders for participation on the project. We then gather as a team to outline and prepare for the execution of the CPS steps described in Section 1.5.

Deliverable: We will have a roadmap that outlines the components of the CPS model and our approach to carrying out each part of the process.

Anticipated Results: This activity will reinforce relationships among collaborators, ensure everyone is appropriately engaged in discussions on project commitments to CLEAR STREETS. Completing this step at the beginning of the project will lead to successful completion of the work and lead to expanded partner ecosystem. After an analysis of the activities carried out with the CPS model, we will have determined how to track progress, developed methods for communicating and engaging with the St. Thomas community, and identified the best approaches for carrying out future work to reduce the cumulative impacts resulting from a lack of waste infrastructure, a littered landscape, and unclean drinking water.

Task 2. Execution of an Environmental education, Capacity building, and Empowerment (ECE) Action Plan for Public Participation

Task 2 involves engaging and empowering youth and the public for participation in CLEAR STREETS. We will conduct a minimum of four workshops ranging from one to four hours in length, offered in-person in a meeting room at the University of the Virgin Islands, and with an option to join virtually. We will begin by listening to residents about their concerns regarding litter on the island. This will provide guidance that we can use in Task 3 to determine where on the island should we focus our clean-up efforts and the best way to track our progress. During the planned workshops, we will inform residents about improper disposal of, and provide ways to reduce the use of, SUPs. As part of the capacity building and empowerment process, we will provide ways that residents can use their voice and ideas to contribute to local policy changes, rulemakings, and other public processes that can lead to enhancing their quality of life and reducing aquatic and environmental degradation.

Deliverable: We will capture key information from partnership meetings and community workshops and create a summary report as a key deliverable for this task.

Anticipated Results: We anticipated that there will be more coordinated efforts by residents to participate in island-wide decision-making processes. This will help them effectively coordinate actions to help maintain CLEAR STREETS on St. Thomas, further maximizing improved impacts for the environment.

Task 3. Clean-up Litter, Extraction, and Reduction (CLEAR) Strategy Deployment

The deployment of our CLEAR strategy involves four stages, to be carried out on a quarterly basis. Once our community champions and leaders are identified in Task 1, and CLEAR sites are prioritized in Task 2, we will begin the extraction process. Execution of the clean-up will occur in 4-mile increments and once per quarter. We will conduct these activities at the same place each time to compare the degree to which the problem persists. We will also add one new 4-mile site per quarter. In quarter 1, one 4-mile site will be cleaned. In quarter 2, that same 4-mile site will be cleaned, along with a new one. In quarter 3, a third new 4-mile site is CLEARed. The sites cleaned up in quarters 1 and 2 will be visited again, to ascertain the level of litter that gets added in between the cleanup activities. In the fourth quarter, each site visited during the first three quarters will be visited, along with a new, fourth site.

Between site clean-ups, we will conduct workshops to educate youth and adults on the environmental degradation caused by litter, as well as water filtration techniques that can be employed for enhancing water quality.

Deliverable: At the end of this task, we will provide EPA a final report that characterizes our experience with the CPS model, highlights the areas on the island that were CLEARed, quantifies (in miles) the degree to which the island was CLEARed, describes the community engagement activities that were conducted, and provide ideas for future public participation efforts to address litter and local pollution.

Anticipated Results: The result of this task will include a cleaner landscape, with four sites CLEARed. There will also be knowledge gained by youth and residents about the importance of keeping the island as litter-free as is feasible.

2.1 Milestone Schedule

We proposed to perform the aforementioned tasks over a period of 12 months. Table 2 outlines the project's timeline, along with dates for deliverables. Three deliverables will be submitted over the course of the project, on a quarterly basis.

Table 2. Gantt Chart for the Project Timeline

	Year 1											
Month:	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
Task 1-EJCPS Kick-off and Coordination												
Deliverable 1: Roadmap												
Task 2-Education & Empowerment												
Deliverable 2: Interim Summary Report												
Task 3-CLEAR Strategy Deployment												
Deliverable 3: Final Report												

2.2 Itemized Budget Sheet / Budget Narrative

See Other Attachments section and Form SF424-A

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

See Other Attachments section.

The attached Logic Model shows key inputs (people, funding, and resources) that are used to support CLEAR STREETS activities, along with the resulting outputs and outcomes.

3.2. Performance Measurement Plan

Our team will meet no less than quarterly to quantify outputs and track progress toward our outcomes. During these meetings, we will evaluate where we are with respect to our project goals and plan our next steps to achieve them. Each partner will coordinate closely to ensure that lessons learned are collected and disseminated.

3.3. Sustainability Plan and Community Vision

Through our community organizing and engagement with the local government, our vision is that a recycling program will be implemented in the future on the island. Other aspects of our vision are to reduce the burden for recycling and for people to be able to receive small incentives for recycling glass

and/or plastic. These activities will contribute to the sustainability of the efforts we will carry out with this project.

4.0 Programmatic Capability

Volunteer In Your Community Inc.'s mission is to assist people in poverty in the USA. We enhance the lives of people by providing food, education, and literacy at no cost. We help provide volunteers, resources, and events that empower people with the knowledge and tools they need. We promote and support healthy living, energy efficiency, an eco-friendly environment, and clean air initiatives. We have done collaborated with youth and other community-rooted organizations to perform community cleanup events in the past. To achieve our goals, we work in accordance with existing non-profit agencies, small businesses, corporations, and community leaders to connect impoverished people to the resources and opportunities already available, as well as create programs to assist the community. Our connection to the community forms the basis for our infrastructure. We have a volunteer base and have built partnerships and networks with people in St. Thomas.

Staff Experience / Qualifications of Project Manager (PM)

The project manager, Tinece Payne, has more than 15 years of experience in leadership with community organizing and volunteering. Her work also involves designing, developing, and implementing strategic plans for her non-profit. She is Six-Sigma certified for program solving and has built networks and women's collectives through relationship development and community involvement. She is also on the advisory board of other organizations, including the Sustainable Hive Mind. She has a proven track record in staff management, event planning, and engagement with public officials.

The project manager is the owner of Feel Free Farm, which is located in Bordeaux on St. Thomas Island. Being a black farmer in St. Thomas has allowed her build connections with the fellow farmers and students on the island. She is known as a community advocate and one who is a steward for the earth and its natural resources.

Our organization has performed beach cleanups, community organizing, and held classes on sustainability. We have trained people on the island about how to reduce pests/mosquitoes and reuse items to reduce waste.

Expenditure of Awarded Grant Funds

The CLEAR STREETS team collectively brings decades of experience working on government grants, cooperative agreements, and contracts. Our team is well-versed in the requirements, obligations, and restrictions of government procurement, including government-wide and individual agency regulations, policies, and procedures. By adhering to the milestone schedule, we will be certain to expend the funds in a timely manner. The funding received for this grant will be stored in a separate and exclusive business account. Our accountant will manage the draws and disbursements to our partners, and we will only draw funds when there is an immediate cash need. We will expend the money drawn within 5 business days. Quickbooks™ will be used to track expenses, and documentation will be maintained for all purchases.

5.0 Past Performance

Table 3 contains the federal and non-federal grants we've received in the past three years. We were able to successful complete each of them by following the outline established in the beginning, as well as the plans set by the grant. Using an effective team-based approach, we were able to implement all tasks and execute our project goals. This was achieved by holding monthly meetings and weekly exercises with the team and clients. During our monthly meetings we filled each other in on our individual progress and ways to support one another.

Table 3. Past Performance

Grant	Years	Amount	Submitted Acceptable Final Technical Reports	Adequate & Timely Reporting of Progress	Achievements/ Accomplishments
EcoLab	2020	$4000	Yes	Yes	Recruited youth for the young Urban Farmers group and carried out farmer outreach tasks
Vegfund	2019-2022	$9000	Yes	Yes	Organized educational events; collaborated with multiple small businesses to promote a peaceful world where people do not exploit other sentient beings
Conservation Makes Wellness	2021	$25000	Yes	Yes	Helped to establish 4 non-profits by providing training and capacity building support
A WellFed word	2022	$4000	No	Yes	Helped feed and educate people at community events

6.0 Quality Assurance Project Plan (QAPP) Information

We do not plan to develop a Quality Assurance Project Plan (QAPP).

Itemized Budget and Narrative

Category	Description	Total
Personnel	• Project Director @ $60,000 annual salary x 100% of time on project = $60,000 for one year • Assistant to PD @ $35,000 annual salary x 25% of time on project = $8,750 for one year	$68,750
Fringe Benefits	• Project Director 15% of salary (includes medical, dental, life insurance) = $7,500 for one year	$7,500
Travel	• Local mileage for Project Director for partner meetings: 10 miles @ $0.655/mi x 36 meetings = $236 • Travel for Assistant to the Project Manager for partner meetings: 10 miles @ $0.655/mi x 36 meetings = $236	$475
Equipment (for purchases greater than $5,000 per unit)	• Trash bags:40 boxes@$50/box = $2000 • Trash grabbing tools: 50 @ $30 = $1500	$3,500
Supplies	• Laptop computer for use during community meetings = $1,500 • Printer = $350 • Projector = $400 • Projector Screen = $100 • Miscellaneous office supplies for staff = $1,500 • 10 reams of copy paper @ $5.00 for outreach materials = $50 • Web cam for meetings with EPA staff = $100 • Zoom Pro license = $150	$4,150
Contractual	• Environmental/Grants Management consultant = $12,000 • Bookkeeper: $20/hr @ 3 hr/week @ 52 weeks = $3,120 • Certified Public Accountant for tax filing: $2,000	$17,120
Indirect Costs	• IDC Rate Agreement of 10% of Salaries and Wages ($68,750 x 10%)	$6,875
Other ($38,630 left over)	• Sub-award to University of Virgin Islands = $16,810 • Sub-award to Elevate Wi = $13,000 • Sub-award to Nagatent Temple = $6,820 (Two 4-hour workshops + workshop materials* $250 hourly rate = $2,000) + Travel to island (Flight = $800 + 750 hotel + 360 per diem) *2 trips = $3,820) • Participant Support Costs (food/drinks/thank-you gift bags at community meetings and clean-up activities) = $5,000	$41,630
Total Budget		**$150,000**

Budget Narrative

Overview

The purpose of this budget narrative is to explain the basis for our proposed costs. The budget for the CLEAR STREETS project is presented in Fixed Price format. This 12-month budget reflects the funds needed to conduct our proposed collaborative problem- solving project in St. Thomas. The total budget, including fees for sub awardees, is $150,000.

Explanations for each Budget Category

Personnel

The personnel category includes the salary for the Project Director (PD) and an assistant to the Director. The Project Director will spend 100% of their time on the project 100% and the assistant will spend 25% of their time on the project.

Fringe Benefits

Fringe Benefits are only calculated for Project Director, not assistant. Fringe is calculated at 15% to cover medical and life insurance.

Travel

The Travel expense includes vehicular mileage calculated at the 2023 government rate.

Equipment

We do not anticipate needing any equipment that costs more than $5,000 per unit but are including a fee for miscellaneous items such as trash bags and trash grabbing tools.

Supplies

Costs for computer equipment and ancillary supplies are provided.

Contractual

The contractual category includes fees for an environmental consultant, bookkeeper, and certified public accountant.

Indirect Costs

The indirect costs include a 10% rate agreement for the salaries of the PD and PD's assistant.

Other costs

Other costs represent the second greatest cost. It includes the subawards to three partner organizations and miscellaneous costs to cover expenses for the community engagement events.

Proposed Timeline and Forecasted Payment Schedule

	Year 1											
Month:	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
Task 1-EJCPS Kick-off and Coordination												
Deliverable 1: Roadmap												
Task 2-Education & Empowerment												
Deliverable 2: Interim Summary Report												
Task 3-CLEAR Strategy Deployment												
Deliverable 3: Final Report												

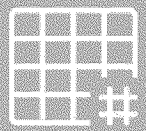
Quarter 1 (December 2023): $41,650
Post award kick-off meeting, project coordination, and Roadmap:
Quarter 2 (March 2024): $37,500
Project roadmap
Quarter 3 (June 2024): $37,500
Interim Summary Report
Quarter 4 (September 2024): $37,500
Final report

Total Fixed Price: $150,000

Logic Model

LOGIC MODEL FOR CLEAR STREETS

RESOURCES



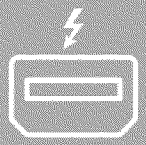
Staff from each collaborator

US EPA Project Officer

Community members

Financial Resources (grant funds)

Litter collection tools



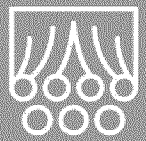
ACTIVITIES

Strategic planning among partners

Workshops (pollution prevention, public participation)

Litter pick up and disposal

Basic characterization and quantification of litter



OUTPUTS

Site selection and prioritization

Outreach, education, and training on litter collection

Litter extracted from 16 miles on the island

AUDIENCE

Workshop participants

Community residents

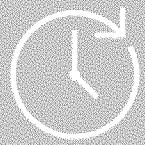
Community youth

Local decision makers

US EPA regulators

SHORT-TERM OUTCOMES

Residents are engaged in the clean-up process



Decreased litter on the landscape

INTER-MEDIATE OUTCOMES

Increased knowledge about engagement in the public decision-making process

Increased awareness and understanding of the impacts of litter on the landscape

LONG TERM OUTCOMES

Increased stakeholder participation

Decreased pressure on coral reef from litter

Reduction of trash burning

Policy development to improve waste management on the island

Letters of Committment

University of the Virgin Islands

March 28, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

Subject: Subaward Agreement and Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Volunteer in Your Community, Inc

Dear EPA:

This letter confirms that the Virgin Islands Marine Advisory Service (VIMAS) commits to be in a paid collaborative partnership with Volunteer in Your Community, Inc on the US EPA Environmental Justice Collaborative Problem Solving Project (EJCPS). As the Director of the Virgin Islands Marine Advisory Service for St. Thomas, I work to educate and provide awareness to the Virgin Islands community about marine-related concerns. This also entails providing educational opportunities for students to learn more about their environment. This occurs at the University of the Virgin Islands or elsewhere. I also work alongside politicians and other decision-makers on issues centered around the management of our natural resources.

During our contract period for the EJCPS project, I will:

- Assist with project visioning
- Strategic development to maximize community engagement
- Perform consensus building and dispute resolution when applicable
- Help facilitate workshops and provide training on effective ways to engage in the policy-making process with local government officials

VIMAS has a long history of working to raise awareness about our island's natural resources and foster environmental stewardship. The largest effort we completed most recently was the USVI Marine Debris Action Plan. We look forward to joining this effort and applying what we learned during the Marine Debris Action Plan.

Should you have any additional questions about VIMAS's role or commitment to this project, please feel free to contact me.

Sincerely,

Howard Forbes Jr.

ELEVATEWI

Doing life together

March 28, 2023

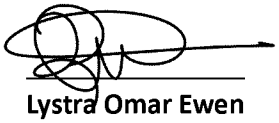
U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

Subject: Sub-award Agreement and Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Volunteer in Your Community, Inc

Dear EPA:

This letter confirms that ElevateWi Inc commits to be in a paid collaborative partnership with Volunteer in Your Community, Inc on the US EPA Environmental Justice Collaborative Problem Solving Project (EJCPS). ElevateWi is an independent, nonprofit that engages with families and caregivers, providing spaces that facilitate support of youth by their families and greater communities while growing in their creative pursuits. Youth engaged in our programs develop a sense of belonging and community, build improved coping skills, nurture mental health, develop high self-esteem and confidence, as well as have an outlet and opportunities to express their creative abilities and envision and take action on the pathway to their creative goals.

During our contract period for the EJCPS project, ElevateWi will:



- Connect Volunteer in Your Community, Inc with volunteers
- Assist with community engagement activities in St. Thomas
- Create community empowerment messaging through artistic expression to generate interest in the clean-up tasks
- Hold workshops so that youth can express their creativity by creating art from litter

ElevateWi has previously partnered with Volunteer in Your Community, Inc with community engagement activities in St. Thomas. We have discussed the goals of this project and explored strategies for carrying out the work. ElevateWi is excited to work with VIYC again to solve a critically important environmental problem for many of us in the Caribbean.

6149 ANNAS RETREAT ST THOMAS VI 00802 | Ex. 6 Personal Privacy (PP) | Ex. 6 - Personal Privacy (PP)

Should you have any additional questions about ElevateWi's role or commitment to this project, please feel free to contact me.

Sincerely,

Lystra Omar Ewen
Founder and President

NAGATENT TEMPLE

March 28, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

Subject: Subaward Agreement and Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Volunteer in Your Community, Inc

Dear EPA:

This letter confirms that Nagatent Temple commits to be in a paid collaborative partnership with Volunteer in Your Community, Inc on the US EPA Environmental Justice Collaborative Problem Solving Project (EJCPS). Nagatent Temple is a faith-based organization that Discover and Create new and innovative ways to give solutions for recycled, reused, and repurposed materials for building self-sustainable creative structures to help maintain and preserve the natural environment for communal use and cultural design acceptance.

During their contract period for the EJCPS project, Nagatent Temple will:
- Provide technical assistance during workshops in mentoring and Training the Trainers Technical Assistance of Project Performance and Maintenance.
- Assist with workshop delivery water filtration for clean water for farmers crops, and building a Plastic Pyrolysis Process System to help remedy plastic waist in key areas for sea life and main lands to thrive.

Nagatent Temple has previously partnered with Volunteer in Your Community in the erection and building of a 20 feet Eco Dome in Greensboro NC. The Eco Dome was built to provide local fresh produce for the people in the area, and a Center for people to come and receive alternative medical services for health related issues. We are excited to work with you again to help improve environmental conditions and protect human health with funding from the US EPA.

Should you have any additional questions about RTI's role or commitment to this project, please feel free to contact me.

Sincerely,

Ra Naman El
Spiritual Mentor

Master of Science (MSc)	***Marine and Environmental Sciences*** Natural Resource Management Track University of the Virgin Islands St. Thomas, US Virgin Islands	2012-2014
Bachelor of Science (BS)	***Biology Magna Cum Laude*** University of the Virgin Islands St. Thomas, US Virgin Islands	2006-2010

Employment History:

Virgin Islands Marine and Advisory Service Territorial Director Sept. 2022 - Present
University of the Virgin Islands, St. Thomas, US Virgin Islands

Scope of work: As the territorial director for The Virgin Islands Marine Advisory Service (VIMAS), my primary duties include completing VIMAS objectives for the USVI territory (St. Thomas, St. John, and St. Croix) as outlined in our subaward agreement with the University of Puerto Rico's Sea Grant College Program part of the University of Puerto Rico's Sea Grant College Program, establish and maintain research partnerships with researchers both within the University of the Virgin Islands and abroad, secure external funding to bolster existing VIMAS projects as well as develop new projects that align with VIMAS' mission, and maintain the online presences of both VIMAS and CMES through the use of social media and website updates.

Virgin Islands Marine and Advisory Service Coordinator Sept. 2014-Sept. 2022
University of the Virgin Islands, St. Thomas, US Virgin Islands

Scope of work: As the coordinator for The Virgin Islands Marine Advisory Service (VIMAS), my primary duties include completing VIMAS objectives for St. Thomas and St. John as outlined in our subaward agreement with the University of Puerto Rico's Sea Grant College Program part of the University of Puerto Rico's Sea Grant College Program, establish and maintain research partnerships with researchers both within the University of the Virgin Islands and abroad, secure external funding to bolster existing VIMAS projects as well as develop new projects that align with VIMAS' mission, and maintain the online presences of both VIMAS and CMES through the use of social media and website updates.

Thesis and Graduate Researcher June 2013-May 2014
Center for Marine and Environmental Sciences, University of the Virgin Islands, St. Thomas, US Virgin Islands

Scope of work: This work focused on assessing the health of three *Rhizophora mangle* (Red mangrove) forests on the island of St. Thomas, US Virgin Islands utilizing biophysical and biochemical techniques. At each study site, random plots were established and monitored for three months; within each plot, the height and diameter at breast height (dbh) of each red mangrove tree was measured and recorded. Approximately 100 g of red mangrove leaves were collected and also assessed for the presence and absence of plant specific primary and secondary metabolites.

CONTACT: Ex. 6 - Personal Privacy (PP) | Ex. 6 - Personal Privacy (PP)

Education:

The Academy of Modern Applied Psychology - Life Coaching Practitioner Diploma

Center for Sacred Dialogue - Apprenticeship Training in psychotherapy, holistic development and spirituality. (Ongoing)

University of the West Indies - Teacher Training Program

The Vocal Corner Store Los Angeles - Vocal training/coaching and artist/musical development with creative director Nicholas Cooper.

Church of God International - Ministerial/Leadership Certification.

Leadercast - Annual workshops/leadership training.

Qualifications:

Leadership & Youth Development

Mt. Zion Music/Media Department - Served as director of music and media from 2010- 2021 creating electrifying musical atmospheres for worshippers at this local assembly and around the region. Transformed a traditional worship ministry into a more structured and modernized music and media production, engaging younger demographics, producing a new generation of passionate performing arts and media production professionals.

Men of Valor - Designed and lead a mentorship program for young men in the in the Annas Retreat community, providing counseling and coaching helping each participant to better navigate life in the areas of social interaction, conflict resolution, academics, career choice and personal and professional development.

Mt. Zion Youth Department - Help to develop and lead youth mentorship programs/activities as the assistant youth director from 2010 - 2015, then as the youth director from 2019 - 2021, modernizing the youth department bringing much needed change to the methods of reaching the younger generation, shifting from super spiritual to a more practical and relatable approach.

Community Development

ElevateJa - Created this outreach organization to help alleviate some of the social ills affecting Jamaican communities. The kings Meet Up, one of ElevateJa's prize projects has provided a space where young adult men gather and address issues affecting them in a very relatable environment. Using a group therapy/masterminds approach, participating men have been able to work through past traumas and come up with practical action plans for achieving their individual life goals.

ElevateWi - Founder and president of this outreach geared towards creating safe spaces for young adults to express freely and artistically while finding support among each other. Through various programs and events this organization continuously create opportunities for personal & professional development in the VI community and beyond through a very connected online network.

Other Work/Leadership Experience:

Teacher - Education Department of the Government of Anguilla-2000-2003
Radio Show Host - Grace fm-2000-2009
Banker- Caribbean Commercial Bank- 2004 - 2008
Event Promoter - Anguilla & US Virgin Islands - 2003 - Present
Villa Manager - Seven Star Villa Ocho Rios Jamaica - 2016 - 2020
Community Intervention Officer - Ashe Company/USAID Jamaica - 2018 - 2019
Business Owner and Manager - ARTSYL Ltd Jamaica - 2018 - Present
Community Theater Development Venue Director - St. Thomas USVI - 2021
Media/Social Media Presenter - 2000 - Present
Singer/Musical Performer - Present
Spiritual Counsellor - Continuum Care Hospice - 2022

SKILLS:
Gifted Singer and Musician
Excellent leadership and interpersonal/communication skills
Detail oriented with a keen eye for excellence.
Motivational/Inspirational Speaker and Spiritual/Thought Leader
Excellent networking and team building skills.
Trained in first aid and first response - St. Thomas Rescue (USVI)

OTHER TRAINING:
Continuously attend leadership and professional/personal development workshops and seminars.
Attended several teacher training/development workshops from 2000-2003

Interests:

Singing, listening to and creating music. Outdoor nature activities and water sports. Holistic wellness, youth mentorship specifically for our young men. Traveling and planning social/recreational events. Meeting and interacting with fellow human beings, embracing and learning from our differences and similarities.

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. We determined that you are a public charity under the Code section(s) listed in the heading of this letter.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

Summary

- Results-focused professional with 15+ years of program development, launch and management experience and 10+ years of academic and professional experience in the areas of renewable energy, climate change and non-profit management focused on advocacy, mobilization and community engagement
- Extensive experience in managing high performing teams of up to one-hundred individuals, comprised of both employees and community-based volunteers across both flat and matrix organization structures

Education

E-Cornell University — Remote
Climate Change Leadership Certificate — Date of Completion: July 2022

ImperialX College London — Remote
Clean Power Professional Certificate — Date of Completion: December 2021

Columbia University — New York, NY
School of International and Public Affairs — Graduation: 2009
Master of Public Administration
Concentration: International Energy Management and Policy

Institute of Ismaili Studies — London, UK
Graduate Program in Islamic Studies and the Humanities — Graduation: 2007
Concentration: Development in Muslim Contexts — Cumulative GPA: 3.94/4.33

Drexel University — Philadelphia, PA
Bachelor of Science in Chemical Engineering — Graduation: 2003
Minor: Business Administration — Cumulative GPA: 3.7/4.0

Experience

WCAPS – Climate Change Working Group (CCWG) — *Remote*
Lead Events Coordinator — *2022 – Present*

Overview: *Part of the senior leadership startup team for the Women of Color Advancing Peace and Security, creating a space for women of color (WOC) in climate-related discussions and initiatives, while building a network where organizations and experts in the field work hand in hand to advocate for and share solutions on how best to address issues of climate change and climate justice for the most vulnerable and marginalized*

- Developed a 3-year startup strategy to provide platforms for WOC to amplify their work in the climate change space, and created a set of metrics to ensure strong engagement
- Enabled climate change advocacy both within the WCAPS community, as well as within academia, policy and for-profit actors, through leading high-profile events focused on topics such as: Climate Refugees, Intersections between Gender and Climate Change, and Food Security

Ismaili Tariqah and Religious Education Board for USA — *Remote*
Portfolio Manager, Board Member — *2015-Present*

Overview: *Responsible for strategy development, implementation, and management of a youth focused portfolio, with an operating budget of over $300K, mandated to support community engagement, youth mobilization and quality of life for over 10,000 Muslim young adults across the US. Responsible for the management and oversight of 10 teams comprising of over 100 volunteers and 5 paid staff*

- Created trending, impactful virtual learning spaces, engaging over 15,000 participants in religious education and community engagement, and completing over 220 sessions in under 20 months. Topics included: a history of Islam in America, climate change, intersectionality, race in America, immigration, refugee settlement, social justice, arts and culture, history, mental health, etc.
- Working collaboratively with 4 adjacent youth facing institutions, formulated, developed and implemented a 36-week holistic religious education system (content and delivery channel) for 100+ teachers, 15 teacher educators, 25 instructional coaches serving 1,000 11th and 12th grade students across the US, with a curriculum focused on religious identity, college readiness, physical & mental health, civic engagement and financial literacy.
- Drove ~200% annual growth in target segment served since 2015. Strategy and programs developed and implemented included:
  - 300+ on campus sessions at over 60 universities; engaging 50+ scholars discussing Islamic studies, culture, identity, history, and society.
  - 18, three-day, residential overnight retreats; training 50+ facilitators/faculty in content and facilitation skills.

- 4, two-week, residential overnight academic programs exploring concepts of history of America, identity, culture and society.
- 2, two-week, experiential road-trips exploring the contemporary, intersectional identities by road trip through 5 cities across the USA

- Built a comprehensive strategy, team and infrastructure from the ground up for the board to sustainability serve the youth segment:
  - Recruited, on-boarded, trained and managed 10 teams comprising of over 100 volunteer program management staff.
  - Managed teams focused on content development, logistics, budgets, and sustainability / scaling of the multiple projects.

Aga Khan Council for USA – Youth and Sports Board *Remote*

Portfolio Manager, Board Member *2009-2015*

Overview: *Managed the operations of a matrix body of 14 volunteer board members with a budget of over $200K, mandated to support positive physical, social and emotional development approaches for over 15,000 youth from adolescence to adulthood*

- Developed and implemented an annual 4-day, overnight, residential program for youth to productively utilize school breaks (winter/spring) supporting civil society initiatives such as rehabilitation work in disaster affected areas, building houses for economically disadvantaged families, creating gardens in food deserts, providing essential support services at homeless shelters, etc.
- Managed a team of 12 volunteers to develop policies/strategies and implemented programs and assessments related to positive youth development.
- Developed and implemented a sports strategy for over 3,000 youth, which included sports clinics, regional and national tournaments.

London Economics International *Boston, MA, New York, NY*

Consultant *2008 - 2011*

Overview: *Provided global, financial and strategic consultancy services for private and public sector institutions as well as sovereigns on environment, energy, water and infrastructure. Advised on privatization, asset valuation, deregulation, tariff design, market power, and strategy in deregulated markets worldwide.*

- Completed extensive research and analysis for several projects, including:
  - Developing and enhancing the Middle East renewable energy portfolio.
  - Electricity policy analysis for participating countries in the South-East Europe Regional Energy Market.

Selected projects:

- Advised the Government of Rwanda in its evaluation of options for the development of the Nyaborongo and Rukarara hydropower Projects (combined 45 MW) through developing a macroeconomic model and analysis on the impact of alternative project financing approaches on several macroeconomic parameters. Prepared an additional analysis detailing the development impacts at a micro level.
- Analyzed prospects of the development and purchase of generating assets using renewable energy sources in Europe. Provided insight into the supply and demand balance, electricity regulatory environment, policies regarding renewable generation and strategies of key power producers of all European Union countries.
- Completed a renewable policy analysis in the European Union of energy policies, directives and legislation in the arena of renewable energy for electrical generation.

Columbia University, Center for Energy *New York, NY*

Program Assistant *2008 – 2009*

Overview: *Provided oversight and administration of 2 concentrations, and 10 courses comprising over 500 students at Columbia that include: urban energy, energy and development, climate change, global energy governance, and marine transportation.*

- Supported the Director of the Center for Energy with managing the faculty, students and alumni of the Energy concentration and with the development of the curriculum for this concentration at the School of International and Public Affairs.

Pamir Energy *Khorog, Tajikistan*

Engineer *2007*

Overview: *Provided rehabilitation services for a 50MW power plant located in Khorog, Tajikistan serving 100,000 people in the Gorno-Badakshan region of Central Asia. Supported a rehabilitation team for a hydroelectric power plant, located in a remote region of Central Asia, in areas such as: procurement management; devising contracts for IFC; engineering consulting and design.*

Public Service Enterprise Group (PSEG) *Newark, NJ*

Engineer *2003-2005*

Overview: *Completed a two-year management rotational program at PSEG, a major unregulated, independent power producer in the United States, with a portfolio of natural gas, coal and oil-fired electric generating stations.*

- Supervised a team of 12 union employees in the operation of two gas-fired combined-cycle (gas/oil) plants and one combustion turbine (gas) (combined generating capacity: 1242 MW). Planned and implemented a six-month on-site overhaul of a simple-cycle turbine. Supervised 20 employees; coordinated the contractors and suppliers; managed the budget and delivery timetable.

- Lead day-to-day climate policy and advocacy development.
- Spearhead, maintain, and manage stakeholder relationships with Alliance and Rise to Resilience Coalition partners.
- Represent Waterfront Alliance publicly as leader in climate resilience, advocacy, and policy.

Federal Emergency Management Agency (FEMA), *Environmental Floodplain Specialist* — New York, NY

July 2021 – Jan. 2022

- Served as a technical specialist on floodplains and wetlands, providing advice and assistance to FEMA program staff, state emergency management staff, Tribal, state, local governments.

National Parks Conservation Association, *Urban and Coastal Resiliency Associate* — New York, NY

January 2020 – Jan. 2022

- Co-Authored *"Parks on the Edge: A Northeast Coastal National Parks Climate Report."*
- Advanced internal regional and national climate change strategies, with focus on coastal adaptation.
- Organized round-table event with National Park Service Superintendents to address climate change at northeast national parks.

New York City Department of Parks & Recreation, *Stormwater Management Intern* — New York, NY

May 2019 – August 2019

- Assisted in on-site field verification, assessments, and mapping of stormwater infrastructure.
- Experienced hands-on intergovernmental coordination with local, state and federal agencies.

EDUCATION

Columbia University, *Master of Science in Sustainability Management* — New York, NY

December 2019

- Concentration: Sustainable Water Management

Baylor University, *Bachelor of Business Administration in Marketing and Environmental Science* — Waco, TX

May 2018

- Concentration: Non-Profit Business Management

James Cook University, *Sustainability Study Abroad* — Queensland, Australia

June 2017

- Courses in Ecology, Natural Resource Management & Environmental Preservation

Iceland School of Energy, *Renewable Energy Study Abroad* — Reykjavík, Iceland

May 2015

- Courses in Renewable Energy, specifically geothermal, hydroelectric, & solar.

CERTIFICATIONS

- Waterfront Alliance: *Waterfront Edge Design Guidelines (WEGD)* — 2022
- U.S Green Building Council (USGBC): *LEED Green Associate* — 2019
- New York City Department of Environmental Protection: *Stormwater Pollution Prevention & Good Housekeeping* — 2019
- Federal Emergency Management Agency (FEMA): *Environmental and Historic Preservation Certification* — 2019
- National Center for Disaster Preparedness: *Transitioning Disaster Survivors from Temporary to Permanent Housing* — 2019
- Baylor University: *Non-Profit Outstanding Student of the Year* — 2018
- The Meadows Center for Water and the Environment: *Water Quality Testing Certification* — 2016

RE: Waterfront Alliance Application for EPA EJCPS Grant Application (EPA-R-OEJECR-OCS-23-01)

Dear Mr. Burney,

I am writing on behalf of Coney Island Beautification Project (CIBP) to express our formal commitment to partnering with the Waterfront Alliance on the EPA EJCPS Grant Application for the project titled, Climate Informed Communities: Collaborative Climate Resilience Solutions for New York City. Please consider this letter as our official endorsement of the project and its objectives, as well as a commitment for CIBP to complete the project activities and responsibilities outlined below.

The goal of this project is to ensure local communities and neighborhoods grow to (1) better learn and understand the risks they will face from climate impacts before major infrastructure and retrofitting for green infrastructure come online, and (2) are able to influence and advocate for local climate resilient projects for their communities.

As a partner in this project, Coney Island Beautification Project is committed to carrying out the following activities:

- Work in partnership with Waterfront Alliance to disseminate information about climate readiness;
- Waterfront Alliance and partner to provide materials, presenting at meetings, holding one-on-one discussions in coordination with our partners about climate readiness;
- Identification of community members and nonformal organizations within communities that the partner and/or Waterfront Alliance will prioritize to work with first.

The Waterfront Alliance will provide a subaward to Coney Island Beautification Project for this work in the amount of $15,000. The Waterfront Alliance has agreed to pay out the subaward to CIBP upon receipt of the grant award.

We are proud to contribute to this important project and believe that it aligns well with the Coney Island Beautification Project's work to promote resiliency and sustainability of public spaces and the waterfront.

Thank you for considering our commitment to this project. Please let us know if you require any further information or support.

Sincerely,

Pamela Pettyjohn

RE: Waterfront Alliance Application for EPA EJCPS Grant Application (EPA-R-OEJECR-OCS-23-01)

Dear Mr. Burney,

I am writing on behalf of the Science and Resilience Institute at Jamaica Bay (SRIJB) to express our formal commitment to partnering with the Waterfront Alliance on the EPA EJCPS Grant Application for the project titled, Climate Informed Communities: Collaborative Climate Resilience Solutions for New York City. The Science and Resilience Institute at Jamaica Bay is an institute of the City University of New York hosted at Brooklyn College and created through a partnership with the City of New York and the National Park Service. Please consider this letter as our official endorsement of the project and its objectives, as well as a commitment for SRIJB to complete the project activities and responsibilities outlined below.

The goal of this project is to ensure local communities and neighborhoods grow to (1) better learn and understand the risks they will face from climate impacts before major infrastructure and retrofitting for green infrastructure come online, and (2) are able to influence and advocate for local climate resilient projects for their communities.

As a partner in this project, SRIJB is committed to carrying out the following activities:

- Data sharing regarding local climate impacts;
- Assistance in interpreting science that is helpful to community preparedness and decision making;
- Identification of most impacted communities.

The Waterfront Alliance will provide a subaward to SRIJB for this work in the amount of $10,000. The Waterfront Alliance has agreed to pay out the subaward to SRIJB upon receipt of the grant award.

We are proud to contribute to this important project and believe that it aligns well with SRIJB's mission to bring a new model of collaboration to critical environmental challenges and produce

integrated knowledge that increases biodiversity, well-being, and adaptive capacity in coastal communities and waters surrounding Jamaica Bay and New York City.

Thank you for considering our commitment to this project. Please let us know if you require any further information or support.

Sincerely,

Brett Branco
Executive Director
Science and Resilience Institute at Jamaica Bay
Brooklyn College

1.0 PROGRAM OBJECTIVES

a. Project Summary Page (1 page):

Project Title: Climate Informed Communities: Collaborative Climate Resilience Solutions for New York City (CIC)

Project Location: 1) Coney Island, Brooklyn, NY 11224, 11235, 11223, 11214; 2) Red Hook, Brooklyn, NY 11231; 3) Flushing, Queens, NY 11368, 11374, 11375, 11367, 11355; 4) Far Rockaway, Queens, NY 11691, 11559; 5) North Shore of Staten Island, Staten Island, NY 10303, 10314, 10310, 10301; and 6) South Bronx, Bronx, NY 10455, 10451, 10474.

Applicant Information: Waterfront Alliance, 256 W 36th Street, 11th Floor New York, NY 10018; Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization: Waterfront Alliance brings together a diverse coalition of more than 1,100 Alliance Partners dedicated to economically vibrant, resilient, revitalized, and accessible waterfronts for all communities. We elevate environmental justice and frontline communities, community-level preparedness, community-driven design, and planning for climate resilience. We put powerful tools directly in the hands of people whose lives and livelihoods are threatened by climate change.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No

Project Abstract: Responding to needs expressed by environmental justice (EJ) community members in Flushing, Far Rockaway, Coney Island, Red Hook, the North Shore of Staten Island, and the South Bronx, Waterfront Alliance developed the Climate Informed Communities (CIC) program and partnership. We will work directly with EJ communities facing the greatest burdens of climate change— least prepared to recover after major impacts—to ensure they have the tools needed for disaster preparation, and to ensure their voices are elevated to readily participate in climate resilience infrastructure projects and planning.

The collaborative partnership (seven community-based organizations, two academic institutions, one local government agency) will work with communities to help utilize readily available climate resilience and preparedness tools for heat, flooding, and extreme weather. Additionally, the partnership will work directly with community members to build tools and skills to influence infrastructure outcomes for projects in their communities. This work will result in EJ communities being more prepared for future disasters; community assets better protected; individuals confidently contributing to neighborhood-level plans for resilience infrastructure; and communities better positioned to receive government funding for climate resilience projects.

Project Type(s): Training; public education; engaging disadvantaged communities in local, state, and federal public processes; community revitalization planning in support of climate resilience and adaptation; development of disaster preparedness plans.

Special Considerations: Climate Change/Disaster Resiliency

ED_016126_00001199-00001

1.0 PROGRAM OBJECTIVES (cont.)

b. Environmental and Public Health information of the Underserved Community

The entire Coney Island neighborhood is considered a disadvantaged community by the Justice40 (CEJST) map in EPA's EJScreen tool. A community member in Coney Island explains that Hurricane Sandy in 2012 was a life changing event from which many people are still rebuilding and in debt, with very little new government investment since. This leaves many Coney Island residents experiencing vulnerability and anxiety. People report that insurance companies don't want to pay, and recovery programs that are available to other communities are not available in theirs. Information about existing resources feels scarce or too complicated to access, even for those few people with the technology and time to do so. Pamela Pettyjohn, president and founder of the Coney Island Beautification Project (CIBP), said, "Most of us feel a lot of fear that builds every June, when hurricane season starts. We're afraid of losing everything—not just our possessions but our lives. We can't afford to rebuild if we flood again. But we also know we have to live with the water, we can't just wall it up. We hope that Coney Island could become a model for coastal communities and climate resilience." Ms. Pettyjohn and CIBP participated in their first City of Water Day in 2014 (a day annually organized by the Waterfront Alliance) and have been partners with Waterfront Alliance ever since, saying that "Waterfront Alliance spoke up for communities when other organizations weren't."

The North Shore of Staten Island has a population of about 79,171. According to EPA's EJScreen tool, 74 percent of the population are people of color, 36 percent speak English as a second language, and 40 percent have a household income of less than $50,000. The region is particularly vulnerable to sea level rise, storm surge, and flooding. Hurricane Sandy left a devastating impact on the community, which has spurred a need for community action. Kelly Vilar, founder and CEO of the Staten Island Urban Center told us, "There aren't enough people in our borough fighting for resiliency or adaptation. We are at the baby stages of organizing around environmental justice, around our waterfront. There are so many things we need to lift our voice about. We need to find elected officials that are going to fight for us, that even believe in climate change." Ms. Vilar and Staten Island Urban Center will be critical partners with us as we work in Staten Island to better prepare for storms and climate change. Staten Island residents point out the difference between storms in the past and storms from Hurricane Sandy to today. A resident who grew up in the community and raised her family here, said "Back then, it was four to six inches in my home. This time it was close to six feet." Many residents agree that leaving people in an area that will always flood is not appropriate, especially as extreme weather becomes more prevalent. There are calls to build back with extreme attention to climate resilience, and make sure there's an ample green buffer to protect those who still live in the area.

According to New York State and EPA's EJScreen tool, the Rockaways are considered environmental justice communities. The Rockaways have a population of 123,398 people, 69 percent of which are people of color, 32 percent speak English as second language, and 48 percent of household earn an income below $50,000. Further, the Rockaways rank above the 75th USA percentile for Environmental Justice indexes like Ozone, Diesel Particulate Matter Superfund Proximity, and more. These EJ indexes combined with the region's vulnerability to storms leaves the region in great need for preparation. The Rockaways is a region intimately familiar with the potential devastation for sea level rise, climate change, and increasingly intense storms. In 2012, Hurricane Sandy destroyed more than 1,000 structures and 10 feet of storm

surge flooded the region. Residents in the Rockaway lived for months without heat and with mold growing from the water damage. Just over a decade later, residents are still traumatized and fearful of future storms. "It was truly a terrible experience for our communities, and we can still feel the effects of the storm to this day," state Senator Joseph Addabbo said. "...we are working to implement storm mitigation measures in our waters so that when the next storm hits we are prepared." But more, there is still significant work to do. Community members point to their ability to rally around each other and come back even stronger, showing the human aspect of resilience in the face of a changing climate.

The South Bronx is a disadvantaged community as defined in the Justice40 (CEJST) map. There are approximately 55,000 people living in this region, 97 percent of whom are people of color, 40 percent did not graduate high school, and 74 percent disclose a household income of less than $50,000. In the eyes of some community members, South Bronx feels "written off," which leaves people disheartened and frightened—as well as angry. People comment that proposed flood walls and other measures were not created to get rid of risk to the community and in fact may be putting people more at risk. Additionally, some people are concerned that resilience planners are not looking at social vulnerability and environmental justice; at what those communities need and deserve." Equally important, as noted by a local environmental justice advocate, "They're so focused on storm surge, that they're going to miss the mark and not actually protect the region from all of the threats that it faces in terms of coastal resilience," She urges planners to use fewer physical, concrete barriers, and instead provide multi-benefit nature-based solutions, like marshes and wetlands, that protect properties while reducing heat islands and improving air quality and people's emotional and physical well-being.

Red Hook is a disadvantaged community as defined in the Justice40 (CEJST) map in EPA's EJScreen tool. According to EJScreen, Red Hook's population is about 11,008 people, 81 percent of whom are people of color, 28 percent have not finished high school, and 64 percent disclose a household income of under $50,000. As a coastal community, Red Hook is also vulnerable to severe storms and flooding. Waterfront Alliance Board member and business owner in Red Hook, Mike Stamatis, recently recounted his experience during Hurricane Sandy and of the need for far more investment in resilience. "We're still in the same position that we were ten years ago. If there is another Sandy, God forbid, nothing has been done. The same thing would happen. I've seen minor things done in the community for flood protection, but nowhere near what needs to happen. I've seen plans to make major investments for flood protection—but it's all happening too slow and it may not be here in time. But at the end of the day, no matter what happens, we'll still be here. I know this community will pull together.".

Flushing Bay and Flushing Creek—which community members call Flushing Waterways—includes several communities that partner organizations quantify as "high need." People living here are in areas rated 95 percent for air toxicity. More than half don't speak English at home, and many are first-generation immigrants. Further, this region is considered a disadvantaged community as defined by Justice40 data in EPA's EJScreen tool. People living here suffered from inland flooding during Hurricane Ida; in Flushing and East Elmhurst many people died in their basements. Community members report conversations about managed retreat and buyouts, and at the same time fear the threat of being displaced by unchecked development. The

community is inundated with water following every storm, and air toxicity will only get worse with increased heat and pollution.

What are the environmental/public health issue(s) that the project seeks to address?
According to the Centers for Disease Control, people on the frontlines of climate change will be affected by disruptions of physical, biological, and ecological systems. Direct health effects include increased respiratory and heart disease, infectious diseases, injuries and premature death from extreme impacts, and threats to mental health among others.

People living in the coastal and EJ communities of Flushing, Far Rockaway, Coney Island, Red Hook, North Shore of Staten Island, and the South Bronx, are at the frontline of the climate crisis and are living with these public health effects exacerbated by the consequences of systemic underinvestment. Community members report that their day-to-day lives are affected by worries about extreme heat and flooding. They express they are already paying the costs of more extreme storms and heat—in power outages, train and road closures, flood damage and repairs, rising insurance premiums, and limits to where they can live (even if people do not identify all these impacts as directly related to climate). Without the ability to prepare for and respond to climate risks, people will face even more harm as storms intensify and heat waves get longer and hotter.

What are the environmental/public health results the project seeks to achieve and how will the underserved community benefit from those results?
Climate Informed Communities (CIC) will greatly help communities prepare for and respond to climate risks. The communities will be better protected—both as individuals and as neighborhoods—from the impacts of climate change through existing disaster preparedness resources. This includes ensuring dissemination and uptake of disaster preparedness resources that will help members gain access to cooling centers and free air conditioning programs, prepare their properties for flood events, know when to evacuate, take advantage of flood insurance, and protect their valuables. These methods of disaster preparedness help reduce the risks of death, extensive property damage, asset losses, and recovery times.

As we and our partners work to build community capacity to engage in infrastructure decision making, capacity will be built for communities to strongly amplify their voices during the wide range of neighborhood planning and community engagement processes that are coming to neighborhoods. Climate resilience infrastructure is one of the most powerful methods of protecting communities. The widest range of health results are possible from major infrastructure projects—such as cooling centers and air conditioning options that are widely and publicly available, communities less susceptible to, or free from, flooding impacts, and storm surges prevented from devastating properties, local transportation, and energy systems.

c. Organization's Historical Connection to Underserved Community
For sixteen years, the Waterfront Alliance has been dedicated to ensuring changes along waterfronts and coastlines meet the needs of the most under-resourced local communities. This includes serving under-resourced schools, communities and youth through free, STEM-based estuary education programs and shaping climate-resilient planning, and infrastructure for the most vulnerable and under-resourced communities.

Waterfront Alliance's historical climate resilience commitment to underserved communities is grounded in our leadership of the Rise to Resilience Coalition. The Rise to Resilience Coalition is dedicated to resilience for all communities, with an emphasis on historic disinvestment, calling for making climate resilience an urgent priority. Principles that guide Rise to Resilience include: (1) Infrastructure and housing must be safe and resilient to future conditions; (2) Information needs to be transparent and accessible—we all have the right to know our climate risk; (3) Adaptation strategies must be based in science and community-driven; (4) Public and private investments in resilience must flow to all, but especially those at greatest risk: low-income communities and communities of color; (5) Well-paying, locally hired, long-term green jobs are the basis of a resilient economy for all; and (6) Solutions need to address both human needs and protect and restore wildlife and their habitats.

We pay special attention to welcoming and elevating voices often excluded from resilience planning and information in the spaces where we work, such as environmental justice, community, and labor groups. We review and develop policies through a lens that acknowledges and is informed by the intersectional crises of climate, racism, and affordable and safe housing, and prioritizes those that are hit first and worst by the climate crisis. This work—the network and partnership that we have fostered for many years—form the basis of our ability to execute. The CIC program and partnership was developed with our partners, Rise to Resilience Coalition members, and experts, all of whom realized we are at a crossroads in the climate crisis and take on more holistic solutions to climate resilience.

More specific examples include Waterfront Alliance's work in Coney Island during Hurricane Sandy in 2012 via direct collaboration with Coney Island Beautification Project (CIBP). We continue to support CIBP by providing organizational capacity to their work through funding and operational and administrative support. Additionally, CIBP president, Pamela Pettyjohn, serves on the Waterfront Alliance board of trustees and provides strategic advice and guidance to our work as it relates to Coney Island and EJ more broadly.

Our work in the North Shore of Staten Island started in 2020, with conversations around lack of waterfront access, a problem further exacerbated by Hurricane Sandy and the Covid-19 pandemic. In 2021, Waterfront Alliance published a study that drew on interviews with 30 stakeholders and a public workshop with more than 70 participants and provided context and recommendations to promote waterfront access and community centered planning. We continue to work with community groups like Staten Island Kayak and the Staten Island Urban Center to develop plans to increase waterfront access and resilience for the North Shore of Staten Island. Lastly, for many years we have provided direct STEM-based environmental education for various public schools including IS 49 Berta A. Dreyfus and PS 59 The Harbor View School.

Our work in Far Rockaway started with expanding recreational opportunities in and around Jamaica Bay for residents on the Rockaway Peninsula. We have also supported efforts to better preserve, maintain, and expand the wetlands and native vegetation surrounding the Rockaways. Additionally, Waterfront Alliance spearheaded the campaign to bring back the citywide ferry service to New York City. In 2017, the Rockaway ferry landing became operational after nearly two decades without ferryboat transportation in the region – offering residents of the Rockaways a transportation alternative across boroughs. Most recently, our work has expanded significantly

in Far Rockaway when several community groups, like Regional Ready Rockaway and Far Rockaway Arverne Nonprofit Coalition (FRANC) joined the Rise to Resilience Coalition.

Waterfront Alliance continues to serve as a staunch advocate for Red Hook's local economy by supporting the historical presence of the maritime industry in the neighborhood, including Red Hook Terminals, which provides jobs to local community members. Additionally, we are engaged in Red Hook through our education program, Estuary Explorers. In 2021, we hosted a teacher training workshop in Louis Valentino Park where dozens of teachers joined us from various Brooklyn-based schools to learn how to incorporate Waterfront Alliance's coastal resilience education toolkit into their curriculums.

Our work in Flushing started a few years ago when the community identified two issue areas: 1) the proposed LaGuardia AirTrain project, and 2) the constant flooding of Flushing Meadows Corona Park. In response, Waterfront Alliance has been a strong advocate for transportation alternatives to the LaGuardia AirTrain, like ferry service, and, with support facilitated by Congressmember Grace Meng of Queens, we are now investing more than $500,000 in the development of a community-led climate resilience plan for Flushing Meadows Corona Park.

Similar to the North Shore of Staten Island, our work in South Bronx started a few years ago in collaboration with South Bronx Unite, to address a lack of waterfront access—just one of the many environmental justice concerns in the neighborhood. We worked with South Bronx Unite to develop a community vision and action plan to open a waterfront site for recreational use. We further engaged the community by distributing surveys to community members about the waterfront site action plan, through which we learned there was a strong interest in helping with volunteer efforts, and a special interest in waterfront recreation.

These relationships and historical partnerships will be critical to the collaborative problem-solving program proposed here, Climate Informed Communities (CIC). Each of the partners described above have played a direct role in informing CIC and guiding the project's work plan.

d. EJCPS Model

Each of the seven elements of the EJCPS Model will be undertaken in this project. As the proposed work has been ongoing for several years now, Waterfront Alliance and our partners have made significant progress on a few of the elements, while just beginning on others. Below is a brief description of how the partners will incorporate each element and the progress to date.

CPS Element 1 (Issue Identification, Community Vision, and Strategic Goal Setting): Communities have been and will continue to be directly engaged in issue identification, project envisioning, and strategic goal setting. Each partner in the collaboration has specific ties to their respective neighborhoods, and these community-based partners will provide connections to community leaders and centers to engage community members in the initial planning process. Work of the Waterfront Alliance with the CPS Model Element 1 has been ongoing for several years, during which time we have regularly met with community leaders and groups to identify major issue areas, including extreme heat, flooding, evacuation planning, and extreme storms. We have also directly heard from communities about their vision for the future, and we have

developed project goals and outcomes with that vision in mind. As the project moves forward, the partnership will continue to work with members of the community on strategic goal setting.

CPS Element 2 (Community Capacity-Building and Leadership Development): CPS Element 2 is at the heart of this project and is also central to the Waterfront Alliance's mission and programs. We will integrate community capacity-building and leadership development into each project activity. Progress on CPS Element 2 thus far has included educating ourselves on identified issues such as extreme flooding and heat, identifying partners who can provide technical expertise (e.g., MOCEJ), and launching community education and awareness efforts (e.g., community tabling events, Rise to Resilience Coalition meetings, and disseminating emergency preparedness resources, information regarding existing relief and support programs, and extreme weather fact sheets). Most of the project activities will fall into the CPS Element 2 category and will focus on enabling community members to participate in collaborative problem-solving processes, providing them with training, resources, and technical assistance, building trust, and working together to identify additional issue areas or program gaps.

CPS Element 3 (Consensus Building and Dispute Resolution): CPS Element 3 will be initiated at the very start of the project, as outlined in the project work plan. The Waterfront Alliance will organize a project kick-off meeting, which will involve all project partners. The agenda will include establishing a decision-making framework for the partnership, determining shared values and commitments to diversity, equity, and inclusion, and discussing dispute resolution strategies to be utilized throughout the project. Waterfront Alliance has extensive experience in this area because of our role as a convener for the Rise to Resilience Coalition and Alliance Partners.

CPS Element 4 (Multi-Stakeholder Partnerships and Leveraging of Resources): We have made initial progress on CPS Element 4. Waterfront Alliance has engaged in discussions with potential partners to assess alignment and potential concerns, invited partners to share resources that would be helpful for this project, and sought out new partners that address the issues we aim to tackle. The remaining aspects of CPS Element 4, such as creating a shared vision, establishing goals and objectives among partners, and developing a clear work plan, will be completed after the announcement of the EPA grant award and the initial project kick-off meeting. The Rise to Resilience Coalition was incubated, developed, and launched in this manner.

CPS Element 5 (Constructive Engagement by Relevant Stakeholders): We utilized CPS Element 5 as we began conceptualizing this project. In identifying potential partners, we carefully considered which government entities could provide technical and financial assistance, as well as which other stakeholder groups could offer additional support. As the project progresses, we will continue to seek support and cooperation from additional stakeholder groups, exploring new partnership opportunities as they arise. The Rise to Resilience Coalition embraces a collective, community-based approach to action, identity, and leadership. In this sense, the Coalition is a community of practice to ensure its efforts are more than the sum of its parts.

CPS Element 6 (Sound Management and Implementation): At the beginning of the project, the project manager will lead the implementation of CPS Element 6. They will work with the partners to solidify the project work plan and outline each partner's agreed-upon commitment, project plans, and timeline. After these initial plans are agreed upon, the project manager will

continue to implement sound management techniques throughout the project, including regular communication, setting deadlines for project deliverables, celebrating successes, and utilizing partner resources to maximize the project's capacity.

CPS Element 7 (Evaluation, Lessons Learned, and Replication of Best Practices): CPS Element 7 will be integrated into the work plan proposed here. The plan will include regular progress evaluations, clear metrics to measure success, procedures for documenting progress and success, and a process for incorporating lessons learned into future project activities. CPS Element 7 will be incorporated throughout the duration of the project. Final meetings will be held to reflect on the project and evaluate overall success and lessons learned.

e. Project Linkages

This project strongly leverages and enhances existing city, state, and federal resilience projects and reinforces the work through an equitable lens. Collaboration is centered around environmental justice communities that have been historically left out of disaster recovery and climate resilience infrastructure planning and funding and as a result face deeper impacts of climate change. Partners will support people living in coastal communities to become climate informed as they pursue a more clear and actionable understanding of the resilience and adaptation transformations needed to better protect their neighborhoods and livelihoods, immediately and as future threats loom. This work directly relates to two strategies in Objective 2.1: Building capacity and climate resilience and maximizing benefits to overburdened and underserved communities; and engaging and supporting federal, state, and local governments to achieve results in communities. Through this project, target communities will have the knowledge and resources to effectively weigh in on, engage with, and provide feedback on all federal and state projects, including EPA programs. This project will also further EPA's objective 2.2 to ensure that all federal and state projects are community-driven, coordinated and collaborative, and support equitable and resilient community development.

f. Partner and Collaborate

This grant seeks to address, in part, the siloed nature of how local government disseminates climate and disaster related information. The local government has vast resources to share with communities but when Waterfront Alliance is on the ground in various neighborhoods, we continue to hear that the government is not there, disaster preparedness information is not known, or that there are major gaps in services. For example, New York City's Home Energy Assistance Program (HEAP), which provides free air conditioning units to renters in need, runs a surplus of air conditioning units year after year, even though chronic heat exposure continues to claim the lives of New Yorkers, with Black/African American people accounting for more than 50 percent of these deaths. We know that people have been unaware of the program or do not have information on when and how to apply for free air conditioning units. Through this grant, we will connect people to resources like HEAP, and other resources like deployable sandbags, to make sure that the information and resources that the government has readily available actually get into the homes of community members who face the greatest climate and disaster impacts.

Waterfront Alliance (non-profit sector partner/CBO) will work with the NYC Mayor's Office of Climate and Environmental Justice/MOCEJ (government sector partner), the six neighborhood-based non-profit organizations that are listed below (non-profit sector partner/CBO), Science and

Resilience Institute at Jamaica Bay/SRIJB (academia sector partner), and the Harbor Middle School (academia sector partner). Together these partners represent ten different groups from three different stakeholder groups working with a shared vision: to provide tools, resources, and knowledge that helps people living in climate-vulnerable New York neighborhoods understand, prepare for, respond to, and recover from a changing climate.

Identify and describe all partners involved, including those partnerships that may be under development.

The government partnership with NYC Mayor's Office of Climate and Environmental Justice (MOCEJ), will provide direct services and resources to target communities through their Climate Strong Communities (CSC) Program, which helps local governments take action to reduce greenhouse gas emissions and adapt to a changing climate, and also offers grants, rebates for electric vehicles, and free technical assistance. The CBO partners will bring deep knowledge and connectivity to their respective neighborhoods. Their contributions include hosting community meetings, providing connections to community leaders, and giving insight on service gaps faced by communities. The academic partners, including the Harbor Middle School and the Science and Resilience Institute at Jamaica Bay, will provide a forum to educate teachers and provide technical expertise and knowledge sharing. Lastly, Waterfront Alliance will lead the initiative, acting as a project manager for the partners while conducting direct education and community outreach to help prepare people living in the target communities for the worst effects of climate change. The specific project activities to be led by Waterfront Alliance are included in the project activities section below.

1. NYC Mayor's Office of Climate and Environmental Justice (Government): Prioritizing City resources and action in low-income and communities of color most vulnerable to climate change so they reap the benefits of a climate adapted future, including augmenting social service programs and community partnerships to create robust support networks. Activities include:
   - Provide strategic guidance, interagency coordination, and other advisory support.
   - Identify City resources and programs that need more robust community engagement.
2. Waterfront Alliance (Community based organization): Working to build, transform, revitalize, and protect accessible waterfronts for all communities. Activities include:
   - Lead and project manage each task and commitments to meeting project goals.
   - Work in partnership with CBOs to disseminate information about climate readiness.
   - Provide materials, present at meetings, hold one-on-one discussions in coordination with partners about climate readiness.
   - Maintain database, communications materials, and project resources.
   - Conduct processes to measure progress and improve processes as needed.
3. Harbor Middle School (Academic): A public middle school in Red Hook that focuses on maritime and STEAM curriculum. Activities include:
   - Work with Waterfront Alliance to host teacher trainings focused on extreme weather preparedness through lessons such as how to find shelter during a hurricane or flood and how to prepare a go bag.
   - Offer Continuing Teaching and Leader Education (CTLE) credits to teachers participating in the trainings.

- Distribute education materials such as Waterfront Alliance's Climate Resilience Literacy Handbook and Extreme Weather Fact Sheet.

4. Science and Resilience Institute at Jamaica Bay/SRIJB(Academic): Producing integrated knowledge that increases biodiversity, well-being, and adaptive capacity in coastal communities and waters surrounding Jamaica Bay and New York City. Activities include:
   - Share data regarding local climate impacts.
   - Interpreting science that is helpful for community preparedness and decision making.
   - Identify the most impacted communities.
5. Guardians of Flushing Bay (Community based organization): Striving to place community and ecological needs at the forefront of our work by collaboratively envisioning socially and ecologically just futures with Flushing Waterways communities.
6. Coney Island Beautification Project (Community based organization): A civic organization dedicated to the resilience and sustainability of public spaces and the waterfront.
7. Red Hook Initiative (Community based organization): Giving young people and residents the tools, resources and opportunities they need to interrupt the systems and barriers that perpetuate historic inequities for the Red Hook community.
8. Far Rockaway Arverne Nonprofit Coalition/FRANC(Community based organization): A project under the Fund for The City of New York that leverages the power of collaboration to create an environment conducive to progress. The organizations that members of the coalition service young people and conduct work within the Rockaways.
9. Staten Island Urban Center (Community Based Organization): Inspiring and educating multi-generational and multiethnic stakeholders as we build our own healthy neighborhoods and to elevate community voices through activism and art.
10. South Bronx Unite (Community Based Organization): Brings together neighborhood residents, community organizations, academic institutions, and allies to improve and protect the social, environmental, and economic future of Mott Haven and Port Morris.

The Community Based Organization partners listed in numbers 5-10, will complete the following activities for their respective communities:

- Disseminate information about climate readiness.
- Provide materials, present at meetings, hold one-on-one discussions about climate readiness.
- Identify community members and nonformal organizations within community that the partner and/or Waterfront Alliance will prioritize to work with first.

What resources does each partner bring to the partnership?
Each partner in this project brings a valuable set of skills and resources to the proposed work and a long-standing commitment to people living in the identified communities, as well experience working on environmental justice and/or climate change initiatives.

As the lead partner on this grant, Waterfront Alliance will bring its long track record of convening and its experience bringing together diverse stakeholders to the project. The NYC Mayor's Office of Climate and Environmental Justice has access to resources that can support community members in climate change preparedness and disaster recovery, as well as an understanding of how New York City will move forward with climate infrastructure projects. Guardians of Flushing Bay has a strong community presence in Flushing and an extensive

network of community members who can contribute to the partnership's efforts. Coney Island Beautification Project brings extensive knowledge on community concerns around hurricane preparedness and climate resilience projects and is a trusted community convener. Red Hook Initiative brings its extensive experience in youth development and community outreach. The Far Rockaway Arverne Nonprofit Coalition has a deep understanding of the local community and the urgent need for disaster recovery. Staten Island Urban Center brings their expertise in engaging multi-generational and multiethnic stakeholders around shared community concerns and issues. South Bronx Unite has extensive experience in community-based research, and a deep understanding of the social and environmental impacts of climate change on vulnerable populations. Harbor Middle School has experience in education and engaging students in sustainability efforts. Finally, the Science and Resilience Institute at Jamaica Bay brings a strong academic and scientific background and expertise in coastal resiliency planning.

How have the partners developed or shown a vested interest in working with this partnership?

The partnership established for this grant project has demonstrated a vested interest in working together beyond just receiving funding through a subaward and signing a letter of commitment. Partners have shown their commitment through active participation in planning, implementation, and evaluation meetings. We have met one on one with each partner to discuss and strategize the project vision, strategy and partner roles and responsibilities. Additionally, partners have already started sharing resources, highlighting their willingness to collaborate and work towards shared goals. The partnership has also sought mutual benefits, promoting the partnership to their networks and introducing potential new partners to join the project.

With a long-term perspective in mind, the partners are invested in the sustainability of the partnership beyond the grant cycle. Conversations have already strengthened relationships, increased engagement for other Waterfront Alliance programs, including the Rise to Resilience Coalition and Estuary Explorers, and produced new opportunities for collaboration. Finally, the partnership has been willing to explore new ideas and solutions to achieve their common goals, showing a willingness to take risks and experiment. Overall, the partnership for this grant project has demonstrated the qualities of a strong and sustainable partnership through active participation, resource sharing, seeking mutual benefits, a long-term perspective, and innovation.

How does the applicant organization plan to maintain and sustain these relationships on into the future?

Relationships will largely be sustained through the Rise to Resilience Coalition, which was launched by the Waterfront Alliance after years of planning with climate-impacted communities, environmental justice leaders, and nonprofits activists. The Rise to Resilience Coalition focuses on systems change and is centered on leveraging the power of local and regional organizations to reduce climate change risks and ensure our region is resilient for generations to come.

The Rise to Resilience Coalition consists of more than 100 organizations, including many of the partners in this proposed project. The Coalition embraces a collective, community-based approach to action, identity, and leadership. It is recognized as a forum for cutting edge discussions around climate resilience policy, programs, and initiatives.

The coalition's three working groups—New York City/New York State, New Jersey, and Federal—meet monthly with dozens of active participants. Moderated by Waterfront Alliance staff and rotating co-chairs from partner organizations, the meetings are rooted in participation and provide opportunities to learn, share updates, request support, and offer perspective. Meeting agendas prioritize strategizing and planning community engagement efforts based on Coalition member feedback and what they are experiencing real time on the ground. This iterative approach allows for thoughtful, holistic collaborative partnership building that is informed by member expertise and experience.

The sharing of knowledge also enables skills-based learning and opportunities for members to further their leadership practice. Coalition members build strong connections with city agencies and other entities, and take lessons learned back to their communities and organizations. Together, these Rise to Resilience Coalition activities will allow for the relationships developed in this project to be sustained long past the grant end date.

Additionally, Climate Informed Communities will continue to be a fundamental program at the Waterfront Alliance and thus the work outlined in this proposal will continue past EPA funding. The Waterfront Alliance's organizational budget now incorporates the Climate Informed Communities program on an annual basis; though EPA funding will allow us to jump start this program, sustained funding is anticipated. The continuation of the Climate Informed Communities program past this grant date will ensure that the partnerships developed throughout the timeframe of this project will be sustained.

Compliance with 2 CFR Part 200 on Competitive Procurement and EPA Subaward Policy
Waterfront Alliance will provide subawards to most of the project partners, as outlined in their respective letters of commitment. These financial transactions comply with the EPA's subaward policy and ensure that no partner is profiting off the EPA grant funded subaward.

2.0 PROJECT ACTIVITIES/MILESTONE SCHEDULE

a. Project Activities

Waterfront Alliance will take a phased approach to execute the CIC program and partnership.

Phase 1 - Complete identification of most impacted communities and neighborhoods: The final identification and confirmation of the communities and neighborhoods most impacted by climate hazards—including criteria that identify those with the least amount of physical, economic and social resources —will be accomplished by working directly with our community partners; obtaining data sets from SRIJB and MOCEJ; utilizing Waterfront Alliance's previous analysis; using data from the Centers for Disease Control Social Vulnerability Index (CDC SVI), EPA's EJScreen, the Opportunity Atlas Data set, and NYC Planning Community District Profiles; and by capturing the on the ground experiences and best practices with partners.

Phase 2 - Understanding the community needs and gaps in services: We will refine our and partners' understanding of community needs as well as gaps in resources and services. This includes identifying key community members and working with nonformal organizations to conduct one-on-one meetings, leveraging existing informal/formal structures and gatherings, and

conducting workshops/meetings/surveys to document more about the community climate resiliency needs and current gaps of knowledge and services.

Phase 3 - Identification and finalization of tools and services available to build climate resilience: We will identify and finalize the suite of community-based climate resilience tools and services that exist that can be helpful and effective for communities and individuals. We will accomplish this by coordinating with MOCEJ, FEMA, New York State, and others to finalize a set of readily available resources for the pre-identified communities.

Phase 4 - Building an awareness of tools and services within the most impacted communities: Working with all partners, we will build and leverage a customized vision plan and implementation strategy customized for each community to develop the most effective methods to disseminate the set of climate resiliency tools and services. This includes coordinating with insurance associations in the identified communities to develop the full set of flood protection options available.

Phase 5 - Building long term community climate resilience: We will engage in a continuous feedback loop from evaluations of previously conducted community engagements and will result in an iterated vision plan. Utilizing a revised vision plan, regular, continuous community engagements will provide a platform to learn about any proposals for large scale infrastructure projects in their communities and provide comments and feedback. Our Climate Resilience Handbook will form the basis of climate education we will engage in including infrastructure options and solutions, the how's and why's of each option. We will work with communities, targeted to receive climate resilient infrastructure, to develop community level plans for long term infrastructure solutions.

Major components of the resources we will work with include:

- Using Rainfall Ready NYC, we ensure that community members know how to prepare for intense storms, including getting flood insurance, monitoring conditions before storms using New York City's notifications systems, monitoring conditions during storms, and recovering rapidly after storms.
- We will help educate people living in these communities about existing resources they can use. Many of the numerous resources available are new and minimally known now.
- We will push for increased participation in the Home Energy Assistance Program (HEAP) Cooling Assistance. Currently, the program is not publicized effectively—ensure that community members are made aware how to obtain free air conditioning units.
- We will distribute Waterfront Alliance and other educational materials, including *Climate Resilience Literacy Handbook* and *Extreme Weather Fact Sheet,* on how to prepare and protect homes, people, and communities against extreme weather and potential disasters.

b. Milestone Schedule

Timeframe *(from project start date)*	***Major Milestones and Activities***

	Phase 1: Complete identification of most impacted communities and neighborhoods
5 months	Work with SRIJB and MOCEJ to obtain data on past and projected local climate hazards, particularly from flooding and intense heat.
5 months	Evaluate the data to finalize the neighborhoods that are most impacted
5 months	Incorporate Centers for Disease Control Social Vulnerability Index (CDC SVI); the Opportunity Atlas Data set; and NYC Planning Community District Profiles to compare against neighborhood results
ongoing	Capture the on the ground experiences, learnings, best practices from partners

	Phase 2: Understanding the needs of the community and gaps in services
2 months	Complete a project kick-off meeting, establish a decision-making framework for the partnership, shared values, diversity, equity, and inclusion, dispute resolution
2 months	Waterfront Alliance will coordinate with CBOs to identify community members and nonformal organizations
8 months	Conduct outreach to community members and nonformal organizations in each of the identified communities to understand disaster prep needs
	• Complete surveys of community members / non formal organizations
	• Complete 1-2 focus groups in each of the identified communities
	• Complete 5-10 one-on-one meetings with community members
	• Attend 3-5 existing events within each of the identified communities, including formal and informal gatherings, houses of worship, etc.
12 months	Complete a facilitated workshop in each identified community to brainstorm ways to connect and disseminate information to the community

	Phase 3: Identification and finalization of tools and services available to build climate resilience
8 months	Finalize Climate Resilience Handbook information to aid in interpreting science that is helpful to community preparedness and decision making
8 months	Coordinate with New York City agencies to understand the landscape of public services available to build awareness and support during climate hazards, such as Rainfall Ready, Home Energy Assistance Program, cash assistance after extreme flooding, etc.
8 months	Utilize Waterfront Alliance research on resources that are available from FEMA and the state that build resiliency that include: disaster preparedness, safety during an extreme weather event and finding support for after the event.
8 months	Coordinate with insurance associations in the identified communities to develop the full set of flood protection options available.

	Phase 4: Building awareness of services and tools available to identified communities

8 to 12 months	Coordinate with the CBOs and MOCEJ's Climate Strong Communities to identify and leverage a set of community leaders who are engaged in existing community efforts
12 to 24 months and ongoing	Identify platforms such as facilitated workshops, social media campaigns, townhalls, community tabling events, one-on-one campaigning, existing events (formal and informal gatherings, houses of worship, etc.) etc.
18 months	For each identified community, coordinate with CBOs and identified community leaders to create a visioning plan on mapping short term needs to resources and services available in each community to become climate ready and to understand the long term infrastructure needs
12 months	Develop an implementation strategy for the vision plan that is contextual to each community
12-24 months	Implement each strategy (this continues past project completion)
Ongoing	Complete a series of evaluation meetings with all partners to reflect on the project and evaluate overall success and lessons learned

	Phase 5: Building long term climate resilience
8 to 24 months	Through quarterly townhalls, meet with the community leaders on large-scale solutions / projects for climate resilience and adaptation: provide an update on what is being planned and what needs to be planned
8 to 24 months	Utilize existing events (formal and informal gatherings, houses of worship, etc.) to bring awareness of the large-scale infrastructure needs/projects to the community and receive comments, concerns and questions.
8 to 24 months	Incorporate community concerns and questions into education materials to improve familiarity and knowledge of topics of long-term climate resilience
24 months - ongoing	Complete a series of evaluation meetings with all partners to reflect on the project and evaluate overall success and lessons learned

c. Itemized Budget Sheet / Budget Narrative
In Attachments

3.0 ENVIRONMENTAL RESULTS: OUTPUTS, OUTCOMES, AND PERFORMANCE MEASURES
a. Environmental Results (Logic Model)
In Attachments

b. Performance Measurement Plan
The progress, expected outputs, outcomes, and associated timeframes program will be measured and reported using Waterfront Alliance's performance metrics standard. Evaluation of the described work consists of developing and monitoring annual program plans, outlining qualitative and quantitative goals, and tracking specific metrics in alignment with project outcomes and activities. The campaign plans form the backbone of our program evaluation and a launching point for the next year's work plans and goals. Each plan consists of explicit goals, often including specific quantitative metrics, intended outcomes, timeline, program partners, specific tactical strategies, and more. Throughout the year the program team both meet to

develop goals, objectives, and plans to further the organization's mission and to refer to these campaign plans to gauge progress and success. Specific measures of success include:

1. Short term measures: people signing up for Notify NYC; number of downloads of the extreme weather factsheet and toolkit; people opening the newsletter; people reached in a workshop/session/tabling event/informal gathering; views/engagement in social media; and properties getting insurance.
2. Long term measures: properties damaged in a storm / lives impact from a storm; number of heat deaths; communities that have done visioning about long term solutions; and communities that have final plans for climate resilient infrastructure.
3. Community involvement measures: community members/community-based organizations engaged in pushing for a plan; community-based plans funded; organized workshops around a particular issue (city or community-based); and community members engaged.

c. Sustainability Plan and Community Vision

New York City is slowly building out its climate resilience plans, and this project is designed to help communities and our partners leverage all possible forward momentum for communities most in need. This project will fill gaps between existing disaster preparation resources and their uptake by local communities and it will fill gaps between the time when infrastructure is planned and built. This program works directly with New York City's Mayor's Office of Climate and Environmental Justice and in parallel with New York City's Climate Strong Communities, which will bring the most basic and greatly needed climate resilience and preparedness tools, information, and resources to frontline communities for the next two decades or more.

Waterfront Alliance is dedicated to the work described in this proposal in perpetuity. It is central to our mission to work together with multiple partners to protect under-resources, EJ communities from the impacts of climate change. Our partners and their communities have a strong vested interest in sustaining and building this program because so little has been done to actively work with EJ communities in preparing for the impacts of climate change. Each of our partners is committed to this work locally and through the Rise to Resilience Coalition.

Our approach for Climate Informed Communities is highly replicable across a diverse range of geographies. Given Waterfront Alliance's role as an alliance and convener, we aim to expand this program beyond the neighborhoods and partnerships developed in this application. Our extensive partnerships with community-based organizations, academic partners, and government agencies positions Waterfront Alliance to build on the success of the Climate Informed Communities workplan and bring it to additional neighborhoods and geographies in New York City and beyond. All achievements and tasks we have accomplished and demonstrated in this proposal have been replicated in the state of New Jersey. We plan to continue to expand this work throughout the northeast as our capacity increases over time.

4.0 PROGRAMMATIC CAPABILITY

a. Organizational Experience

This project builds on Waterfront Alliance's 16-year history of impactful coalition-building, stakeholder relations, and conducting robust workshops to engage diverse voices for New York City. This includes our work to bring five borough ferry service to the City, establishing and opening Brooklyn Bridge Beach for public access, and educating thousands of New York City

youth through Estuary Explorers. We will bring the same collaborative, partnership-based, EJ-centered, energetic, thoughtful, and equity-committed approach to the work outlined in this proposal. Through our Rise to Resilience Coalition and our strategies ranging from community outreach and education, grassroots organizing, to digital media, we continue to drive systemic change and promote equity for the region's most climate-vulnerable communities. The Waterfront Alliance's effective track record speaks to our ability to deliver on our goals.

In addition to our ability to lead and successfully implement programs, Waterfront Alliance has a robust administrative capacity and a growing team to ensure our work is carried out effectively. We have a strong track record in grant management and maintain financial stability, as demonstrated by our good standing with the IRS for tax filings. Further, we recently expanded our team to include a Director of Programs and Climate Initiatives and a Community Organizer. These two individuals will play vital roles in the project.

Lastly, and in addition to the Waterfront Alliance's organizational capacity and experience, the partners in this collaboration bring a wealth of experience that is directly relevant to the work proposed here. Each partner has worked closely with communities for years, hosting workshops, meetings, and forums to discuss climate and weather-related issues. By collaborating, and relying on our collective history of work, we can ensure that our partnership is a recognizable name within the communities we serve. When we host a meeting or provide training, community members will recognize us as a trusted source of information. This diverse partnership ensures that our collaborators are not seen as outsiders swooping in to save the day. Instead, we are deeply connected to the issues we are solving, the rights-holders involved, and the areas where we will work.

b. Staff Experience / Qualifications of Project Manager (PM)

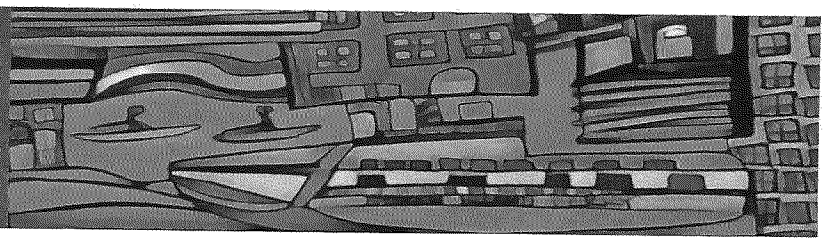
The Project Manager will be Furhana Husani, Waterfront Alliance director of programs and climate initiatives. Furhana brings more than 15 years of program development, launch, and management experience and more than 10 years of academic and professional experience in the areas of renewable energy, climate change, and non-profit management focused on convening, mobilization, and community engagement. Furhana has extensive experience in managing high performing teams of up to one hundred individuals, comprised of both employees and community-based volunteers across both flat and matrix organization structures. Furhana will start the project with a deep sense of familiarity to our partner groups and the community leaders we will work with in target neighborhoods.

Other key Waterfront Alliance personnel on this project include president and CEO, Cortney Koenig Worrall; senior manager for climate policy, Tyler Taba; and community organizer, Ben Regas. Cortney has more than 20 years of expertise in climate resilience policy, campaign planning, community outreach, and public participation processes. Tyler is trained in climate science and brings more than four years of experience working in the climate and resilience space in communities throughout the five boroughs of New York City. Lastly, Ben will play a critical role in the direct community work bringing his years of experience working directly with tenants and community members in New York City. Resumes for these staff members are uploaded.

c. Expenditure of Awarded Grant Funds

The Waterfront Alliance program, development, and operation teams work in tandem to manage grant awards. As an experienced grantee, Waterfront Alliance has a system of procedures and controls in place to ensure awarded grant funds are managed and spent properly and as agreed upon with the grantor. For example, the Waterfront Alliance's accounting system can track revenue and expenditures separately by program and revenue source, account, receipts, and disbursements. It is also standard procedure to retain records of all payments, and file them in a system that allows for quick reference if necessary. Further, grant budgets are living documents and are updated throughout the project to allow for quick financial snapshots and timely and efficient expenditure of all funds. Lastly the Waterfront Alliance goes through annual audits to ensure fiscal health and responsibility for the organization.

5.0 PAST PERFORMANCE



The Waterfront Alliance has a substantial track record of successfully managing and completing large and complex six figure grants. Waterfront Alliance has a capable administrative team who manages multiple government contracts and private sector grants. The grant operations team has recently gone through the process of a federal grant contracting with the National Oceanic and Atmospheric Administration (NOAA) and is prepared to take on the next federal grant. The organizational capacity has led to Waterfront Alliance's successful management of all grants, including submitting progress and final reports on time, fulfilling proposed project activities, and achieving expected outcomes. The Waterfront Alliance has never had to default on grant commitments. The Waterfront Alliance has not received a grant from the EPA in the last three years but a list of completed federal and non-federal funded assistance agreements is included below. Please note this is not a comprehensive list of Waterfront Alliance grants; rather it represents grants that we anticipate are similar to the EPA grant both in scale and project scope.

1. National Oceanic and Atmospheric Administration (awarded $531,000 on March 2022)
    a. Project Title: Flushing Meadows Corona Park: A Hub for Climate Resilience
    b. Status: Contracting completed, project underway
2. NorthLight Foundation (awarded $130,000 on July 2022)
    a. Project Title: Resilient, Revitalized, and Accessible Coastlines
    b. Status: Closed out successfully
3. New York City Council FY22 Discretionary Grants (awarded $204,500 on August 2021)
    a. Project Title: Estuary Explorers: STEM Education for Underserved Communities
    b. Status: Closed out successfully
4. Bernard F. & Alva B. Gimbel Foundation (awarded $250,000 on June 2022)
    a. Project Title: Coastal Resilience Community Organizing
    b. Status: In final year of multi-year grant; have met all reporting and project requirements to date
5. New York State Department of Environmental Conservation 2022 Grant (awarded $65,241 on October 2022)
    a. Project Title: Opening Underutilized New York City Owned Sites along the Hudson River Estuary for Waterfront Recreation and Access
    b. Status: Contracting completed, project underway

RE: Waterfront Alliance Application for EPA EJCPS Grant Application (EPA-R-OEJECR-OCS-23-01)

Board of Directors

Deborah Quinones, Chair
Roxanne Mustafa
Leslie Colon
Sarah Vilar
Olga Ayala
Armando Sandy Caries

Kelly Vilar, CEO

Rev. Dr. Alfonso Wyatt,
Hon. Advisory Chair

Dear Mr. Burney,

I am writing on behalf of Staten Island Urban Center to express our formal commitment to partnering with the Waterfront Alliance on the EPA EJCPS Grant Application for the project titled, Climate Informed Communities: Collaborative Climate Resilience Solutions for New York City. Please consider this letter as our official endorsement of the project and its objectives, as well as a commitment for Staten Island Urban Center to complete the project activities and responsibilities outlined below.

The goal of this project is to ensure local communities and neighborhoods grow to (1) better learn and understand the risks they will face from climate impacts before major infrastructure and retrofitting for green infrastructure come online, and (2) are able to influence and advocate for local climate resilient projects for their communities.

As a partner in this project, Staten Island Urban Center is committed to carrying out the following activities:

- Work in partnership with Waterfront Alliance to disseminate information about climate readiness;
- Waterfront Alliance and partner to provide materials, presenting at meetings, holding one-on-one discussions in coordination with our partners about climate readiness;
- Identification of community members and grassroots organizations within communities that along with the Waterfront Alliance prioritizes as communities of color in the highest need of climate justice

208 Bay Street 2nd Floor, Staten Island, NY 10301 • info@siurbancenter.org • Ex. 6 - Personal Privacy (PP)

Website: www.siurbancenter.org

ED_016126_00001201-00001

The Waterfront Alliance will provide a sub-award to Staten Island Urban Center for this work in the amount of $15,000. The Waterfront Alliance has agreed to pay out the sub-award to Staten Island Urban Center upon receipt of the grant award. We are proud to contribute to this important project and believe that it aligns well with the Staten Island Urban Center's mission to advocate for healthy and equitably accessible waterways along Staten Island.

Thank you for considering our commitment to this project. Please let us know if you require any further information or support.
Sincerely,

Kelly Vilar, CEO

About Staten Island Urban Center:
Staten Island Urban Center is a community development through community involvement organization whose mission is to lift the voices of Staten Island's most marginalized communities on issues concerning social and environmental justice. Their community centered work is grounded in helping communities pursue cultural equity, practice self-determination by making space for marginalized communities to speak for themselves, and to achieve independence, working toward thrivability.

Dear Taxpayer:

This is in response to your Sep. 09, 2015, request for information regarding your tax-exempt status.

Our records indicate that you were recognized as exempt under section 501(c)(3) of the Internal Revenue Code in a determination letter issued in November 2007.

Our records also indicate that you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Please refer to our website www.irs.gov/eo for information regarding filing requirements. Specifically, section 6033(j) of the Code provides that failure to file an annual information return for three consecutive years results in revocation of tax-exempt status as of the filing due date of the third return for organizations required to file. We will publish a list of organizations whose tax-exempt status was revoked under section 6033(j) of the Code on our website beginning in early 2011.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: West Harlem Environmental Action, Inc.

Address: 1854 Amsterdam Ave. 2nd Floor

City: New York

State: NY: New York Zip Code: 10031

B. Unique Entity Identifier (UEI): PB8TKKTU3AG3

C. Applicant/Recipient Point of Contact

Name: Peggy Shepard

Phone: Ex. 6 - Personal Privacy (PP)

Email: peggy_shepard@weact.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☒ Yes ☐ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

David Stewart Hudson, Human Resources Director, 1854 Amsterdam Ave. 2nd Floor New York, NY 10031, david.hudson@weact.org, Ex. 6 - Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/recipient's website address for, or a copy of, the procedures.

Grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7, ADP TotalSource: Basic Employment Policies, pp. 5-6

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

A. Personal Statement

I am co-founder and executive director of West Harlem Environmental Action known as WE ACT for Environmental Justice. Founded in 1988, WE ACT is a Northern Manhattan community-based organization whose mission is to build healthy communities by ensuring that people of color and/or low income participate meaningfully in the creation of sound and fair environmental health and protection policies and practices. For the past 21 years, I have served as co-director of the COEC in the NIEHS Center for Environmental Health in Northern Manhattan at Columbia University. I also serve as a Co-PI of the Columbia Center for Children's Environmental Health for the past 20 years.
I have served as PI on several NIEHS grants: Environmental Justice through Communications and Ethics of Research. I am co-PI of a recently completed grant, Assessing and Strengthening Post-Storm Resilience in NYC High-Rise Public Housing where I worked with our COEC to conduct focus groups to assess the impact of Hurricane Sandy on the health and resilience of public housing residents. I have carried out numerous community-based participatory research projects to assess air quality and its impacts on community children, I have served as a member of the National Advisory Environmental Health Sciences Council of NIH, and as a member of the National Research Council of the National Academies Committee on America's Climate Choices. I have received the Dean's Distinguished Service Award from the Mailman School of Public Health, and an Honorary Doctor of Science from Smith College.

B. POSITIONS AND HONORS

Positions and Employment

1969 – 1971 Reporter & Home Furnishings Editor, Indianapolis News
1971 – 1973 Text & Photo Researcher, Time-Life Books, Inc.
1974 – 1976 Copy Editor, The San Juan Star, Scripps Howard Co.
1976 – 1977 Associate Editor, Redbook Magazine, Charter Publ. Co.
1978 – 1980 Consumer Affairs Specialist, New York State Division of Housing & Community Renewal
1980 – 1983 Consumer Affairs Director, New York State Division of Housing & Community Renewal

Ongoing Research Support

NYC Dept. of Health and Mental Hygiene Ex. 6 Personal Privacy (PP) (Principal Investigator) 5/1/2007-ongoing
Environmental Health Surveillance and Policy Program to develop and implement a research plan to characterize neighborhood and street level air quality in NYC.
Role: Principal Investigator

City of Philadelphia—Dept. of Health-AMS Ex. 6 Personal Privacy (PP) (Consultant) 2/1/2018-ongoing
Consultant for AMS to assist in the design and implementation of the Philadelphia Air Quality Survey (PAQS).

Ex. 6 Personal Privacy (PP)

Affiliation: Associate professor of Environmental Health Sciences at Columbia University Medical Center, Mailman School of Public Health

Expertise: Health effects of household air pollution exposure and policy frameworks for clean household energy transitions.

Education:
06/2006 - PhD in Public Policy, Harvard Kennedy School
06/1997 - BA in Economics and Biology, Williams College

Research and Professional Experience:

2018+	Associate Professor at CUMC, Environmental Health Sciences, Columbia University School of Public Health, New York, NY
2009-2018	Assistant Professor, Environmental Health Sciences, Columbia University School of Public Health, New York, NY
2008-2009	Associate research scientist, Columbia University School of Public Health, New York, NY
2006-2008	Earth Institute Post-doctoral Fellow, Columbia University, New York NY
2003-2006	Pre-doctoral Research Fellow, Center for International Development at Harvard
2001-2006	Teaching Fellow, Faculty of Arts and Sciences, Harvard University
2001-2006	Pre-doctoral Fellow, Environmental Economics Program at Harvard University
1999-2001	Project Manager, CFix LLC, Bellingham, WA and Punta Arenas, Chile
1998-1999	Project Manager, The Mountain Institute, Huaraz, Peru
1997-1998	Fellow, Thomas J. Watson Foundation (Guatemala, Costa Rica, Chile, Bolivia)

Experience summary: Ex. 6 Personal Privacy (PP) is an Associate Professor of Environmental Health Sciences with 15 years of teaching and research experience on air pollution and health and on policy frameworks for clean household energy transitions. He developed and now co-leads a birth cohort in Ghana that is tracking respiratory and cardiovascular health outcomes linked to early lif e air pollution exposures in a group of ~700 children (currently age 9). He has also worked with the Government of Ghana on program evaluation and other policy related research linked to energy transitions and air pollution exposure. He has also worked on air pollution exposures and policy transitions in India and Ecuador, and is currently engaged in related research in Ethiopia, Kenya and Uganda. Ex. 6 Personal Privacy (PP) has been part of the NIH Clean Cooking Implementation Science Network since its founding in 2016.

Panel experience: Ex. 6 Personal Privacy (PP) was a member of the Steering Committee for the 2022 Clean Cooking Alliance State of the Evidence workshop (held in Accra, Ghana). He has participated in numerous NIEHS Study Sections and participated in an EPA STAR review panel in 2011.

Princeton University, Princeton, New Jersey	Fellow	07/2017	Associate Research Scholar

A. Personal Statement. I am a public health ecologist. My research aims to understand how ecology, social determinants of health, environmental racism, Climate Change, and demography intersect to shape health and disease. Over the past 12 years I have deconstruct epidemics and seasonal phenomena in humans including: disease seasonality, seasonal fertility, and seasonal rhythms in human physiology. My traditional training in biology, coupled with my research in applied mathematics, statistical inference, and clinical research has allowed me to develop my unique expertise: leveraging epidemiological and clinical data to unmask population-level processes. My ongoing research falls into five themes: (1) social justice and human health, (2) maternal and infant health, (3) environmental impacts on biological rhythms, (4) the realized effects of vaccines, and (5) seasonal disease transmission. During the pandemic, I began working on how environmental racism and social inequities manifest COVID-19 health disparities, with particular emphasis on Black and Latinx communities in New York City. I have disseminated my findings widely to the public and scientific community via news interviews, peer-reviewed publications, and presentations. I have trained undergraduates, Master of Public Health students, and postdoctoral scholars. An important aspect of my work is training the future generation of public health ecologists and advocates. I aim to foster research interest in Climate, environmental, and reproductive health justice, especially among minority and first-generation college students, and progress policy action to protect health as a civil right.

B. Positions and Scientific Appointments (since 2010)

2023 - Director of Environmental Health, WE ACT for Environmental Justice, New York, NY
2021 - Assistant Professor, Emory University, Atlanta, GA
2021 - Adjunct Assistant Professor, Columbia University, Mailman School of Public Health, New York, NY
2018 - Visiting Researcher, University of Surrey, Faculty of Health and Medical Sciences, Guildford
2017 - 2021 Assistant Professor, Columbia University, Mailman School of Public Health, New York, NY
2016 - 2017 Associate Research Scholar, Department of Ecology and Evolutionary Biology, Princeton University, Princeton, NJ
2015 - 2016 Postdoctoral Research Fellow, Department of Ecology and Evolutionary Biology, Princeton, NJ
2010 - 2015 Graduate Research Fellow, Department of Ecology and Evolutionary Biology, University of Michigan, Ann Arbor, MI

C. Abbreviated Honors

2016 - 2022 NIH Director's Early Independence Award, NIH
2015 - 2017 Postdoctoral Fellowship in Biology, NSF
2010 - 2015 National Science Foundation Graduate Research Fellowship Program, NSF

Senior Director of Operations & Finance, WE ACT for Environmental Justice (2021-Present)

- Manage all financial and operational functions for a 33-person environmental justice non-profit organization. Responsible for over $14,000,000 in financial transactions including annual budgets, expenditures, invoices, accounts payables, receivables, and annual audit.
- Oversees WE ACT's Human Resources Director on all HR functions.
- Processes payroll using ADP Software and EZ Labor time management system.
- Oversees all subcontracts with academic institutions and external parties.
- Oversee the organization's supplies, building maintenance, and facilities.
- Responsible for coordination of organization's special events, including the United Nation's COP27.
- Responsible for travel coordination, including pre-payment, tracking expenditures, and reimbursement submissions.

Director of Administration & Human Resources, WE ACT for Environmental Justice (08/2008 – 2021)

- Manage all administrative and financial functions for 15-20-person non-profit organization. Responsible for $2 million in financial transactions including annual budgets, expenditures, invoices, accounts payables, receivables and annual audit
- Manage hiring of staff, maintaining records, and HR requests.
- Process payroll using ADP Software and EZ Labor time management system
- Oversee all subcontracts with academic institutions and external parties
- Responsible for travel coordination, including pre-payment, tracking expenditures, and reimbursement submissions.
- Responsible for coordination of organization's special events, including conferences, retreats, and board meetings
- Supervise IT personnel and upgrades of computer software and hardware
- Manage calendar and scheduling for the Executive Director and Deputy Director
- Oversee the organization's supplies, building maintenance, and facilities

Executive Assistant/Program Associate, Abyssinian Development Corporation (12/2006 – 08/2008)

- Responsible for assisting the Vice President of Social Services
- Scheduled meetings and appointments, general calendar appointments
- Maintained accounts payable and receivable for ongoing projects
- Recording minutes for department meetings and board committee meetings
- Developed tracking systems, generating data reports and PowerPoint presentations
- Assisted in curriculum development for family strengthening project

Administrative Assistant, Columbia University Mailman School of Public Health, Community Research Group (10/1998- 12/2006)

- Responsible for general office management, financial functions such as accounts payable and receivable for ongoing projects, financial reports
- Prepared grant proposals and IRB applications
- Oversaw hiring, clerical staff supervision

- Supervised production of media, including posters, films, books, and other educational products.

Coordinator/Facilitator, Columbia University, Mailman School of Public Health, CRG Family to Family Program (1998-2006)

- Organized and coordinated all aspects of family strengthening program
- Assisted program director in recruiting, maintaining and monitoring program participants
- Assisted in data collection activities and acted as liaison to community
- Facilitated parent support groups at Lincoln Recovery Center

Recruiter/Educator, Columbia University, Department of Environmental Health Sciences (07/2000 – 11/2001)

- Led reducing indoor allergens study by recruiting and screening subjects for eligibility for participation in an intervention study, conducting questionnaires in English and Spanish, and maintaining records of all data collected.

Consulting

Finance Manager, New York University School of Medicine, Redacted (08/2009 – 7/2011)

- Responsible for management of all financial matters related to a $1 million NIH and foundation funded grants portfolio as well as institutional funding
- Oversaw financial reporting, reconciliation and grants closeout with NIH
- Managed timesheet processing for community health workers

AIDS Alliance for Family and Children (10/2006 – 07/2008)

- Collected data via focus group and observations of Consumer Leadership Training Program for the purpose of evaluation

Columbia Children's Center for Environmental Health (10/2004-8/2005)

- Led focus groups in English and Spanish. Transcribed the focus group tapes for research purposes, translating when necessary. Assisted in the development of materials for study participants and the community

New York State Office of Mental Health Family Psychoeducation (08/2004 – 06/205)

- Conducted focus groups in English and Spanish, compiled summary data, and analyzed documents

Education

American Business Institute, 1984-1985
South Dade Senior High School, 1981
Columbia University Training Certificates:

- Certificate for HIPAA – Health Insurance Portability Accountability Act Training Course
- Certificate for Good Clinical Practices, February 2001

Skills: Bilingual in English/Spanish, MS Office, Fund EZ Financial software, ADP EZ Labor (Employee Time keeping), ADP TotalSource (Payroll, benefits), QuickBooks Online

ASSOCIATION FOR
ENERGY AFFORDABILITY INC.
105 Bruckner Boulevard, Bronx, NY 10454 • Phone: Ex. 6 - Personal Privacy (PP)

Peggy Shepard
Executive Director
WE ACT for Environmental Justice
1854 Amsterdam Avenue, 2nd Floor
New York, NY 10031

April 10, 2023

Dear Ms. Shepard,

I am writing to support your proposal to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EPA-R-OEJECR-OCS-23-01), funded by the U.S. Environmental Protection Agency. I believe that as a community-based organization with strong community roots and a deep understanding of the public health needs of disadvantaged communities regarding indoor air quality and building electrification, WE ACT for Environmental Justice is uniquely qualified to lead the proposed project: *Assessing Indoor Air Quality Impacts of Building Electrification for Multifamily Housing in an Environmental Justice Community*. WE ACT will be able to successfully implement a research project that collects groundbreaking data on the effects of building electrification on indoor air quality through conducting a stove replacement project in multifamily housing stock in the South Bronx, and monitoring changes in NO2 pollution levels and health impacts before and after electrification.

The Association for Energy Affordability, Inc. (AEA) is dedicated to achieving energy efficiency in new and existing buildings in order to foster and maintain affordable and healthy housing and communities, especially those of low-income. AEA representatives engage in a broad range of educational, technical, and construction management activities and services to promote this mission and develop the industry that advances and sustains it. Since the early 1990s, AEA has provided training, program design, and implementation services for weatherization, utility, and NYSERDA-funded energy efficiency programs in New York City, including serving as both a technical services provider and direct services subgrantee for the Weatherization Assistance Program in New York State. AEA specializes in delivering energy efficiency to multifamily properties, including affordable housing.

In support of this project, AEA will work with WE ACT to recruit households for participation in this study. The households will be recruited from the pool of households for which AEA is doing gas-to-induction stove swap outs. AEA will introduce WE ACT staff to households scheduled for stove replacements, with the target of recruiting 30-100 households (with a minimum of 30 households to be recruited). AEA's role in this study will be to help WE ACT staff identify households and appropriately coordinate WE ACT's indoor air monitoring with AEA's construction timeline, if possible. As incentives, WE ACT has agreed to provide households with cookware and cooking classes- AEA will provide the space and stove to host the cooking classes, and WE ACT will provide the cooking instructor. AEA is excited to collaborate with WE ACT on this project to further our understanding of the potential health benefits of transitioning to induction stoves. Per the subaward agreement, AEA will receive $100,000 to complete the proposed project activities.

Sincerely,

Francis Rodriguez
Weatherization Director

Letter of collaboration

11 April 2023

Peggy Shepard
West Harlem Environmental Action (WE ACT)
1854 Amsterdam Avenue
New York NY

Dear Peggy,

It is a great pleasure to collaborate with you and your team on this proposal titled "Out of Gas Phase II". This builds on a successful collaboration in Phase I of the Out of Gas work, in which your team led ground-breaking work transitioning NYCHA residents from gas to electric cooking and heating. I stand ready again work with your team to ensure the success of Phase II. Specifically, I will collaborate with WE ACT on the following tasks:

- Advise on study design and protocol development.
- Assist with development of quality assurance/quality control procedures for study data.
- Advise on data analysis.
- Collaborate on development of policy memos, scientific manuscripts, and other dissemination materials.

Thank you for giving me the opportunity to participate in this important work.

Warm regards,

Darby Jack

South Bronx Unite

Peggy Shepard
Executive Director
WE ACT for Environmental Justice
1854 Amsterdam Avenue, 2nd Floor
New York, NY 10031

April 12, 2023

Dear Ms. Shepard,

I am writing to support your proposal to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EPA-R-OEJECR-OCS-23-01), funded by the U.S. Environmental Protection Agency. I believe that as a community-based organization with strong community roots and a deep understanding of the public health needs of disadvantaged communities regarding indoor air quality and building electrification, WE ACT for Environmental Justice is uniquely qualified to lead the proposed project: *Assessing Indoor Air Quality Impacts of Building Electrification for Multifamily Housing in an Environmental Justice Community*. WE ACT will be able to successfully implement a research project that collects groundbreaking data on the effects of building electrification on indoor air quality through conducting a stove replacement project in multifamily housing stock in the South Bronx, and monitoring changes in NO2 pollution levels and health impacts before and after electrification.

South Bronx Unite (SBU) is a community-based organization working to bring together neighborhood residents, community organizations, academic institutions, and allies to improve and protect the social, environmental and economic future of Mott Haven and Port Morris. We envision a South Bronx where everyone has equitable access to clean air, nutritious food, truly affordable and quality housing, good health care, resource to advance our contributions to arts and culture, community centers, open green spaces, good schools, jobs with livable wages, a transformative justice approach to public safety, and participatory decision-making for public policies and community development. We work to achieve this through community organizing and advocacy; public policy & legislative organizing; workshops and trainings; and studies and collaborations.

In support of this project, SBU will work with WE ACT to host educational sessions to South Bronx community members participating in this study. In partnership with WE ACT, SBU will host 3-5 educational events, targeting at least 15-20 community members per event. The events will cover a range of educational topics, including sources and effects of indoor air pollution (including gas stoves), demonstration of indoor air monitoring equipment, and culturally-relevant

South Bronx Unite

cooking demonstrations with induction stoves. As part of this work, SBU will also assist in the distribution of pots and pans for induction stoves to program participants. SBU is excited to collaborate with WE ACT on this project to increase environmental health and community awareness in the South Bronx. Per the subaward agreement, SBU will receive $30,000 to complete the proposed project activities.

Sincerely,

Arif Ullah
Executive Director

April 7, 2023

Dear Ms. Shepard,

I am pleased to write in support of your proposal, *Assessing Indoor Air Quality Benefits of Building Electrification for Multifamily Housing in an Environmental Justice Community* for funding under EPA's Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. WE ACT's experience and commitment to the public health needs of disadvantaged communities regarding indoor air quality and building electrification, makes your organization uniquely qualified to lead the proposed project. The project will provide groundbreaking data on the effects of building electrification on indoor air quality through conducting a stove replacement project in multifamily housing stock in the South Bronx and monitoring changes in indoor pollution levels of Nitrogen Dioxide (NO_2) and health impacts before and after electrification.

The Barry Commoner Center, in its role as a large and preeminent center for environmental and occupational health at Queens College of the City University of New York, will be happy to provide feedback on project plans, monitoring strategies and study findings. Moreover, the Commoner Center will ensure availability of lab facilities, relevant equipment, and NYCCAS data to your team and the community. I look forward to our continued collaboration.

Sincerely,

Holger Eisl, PhD, MS, MRP

March 23, 2023

To Whom It May Concern,

The Air Quality Program (AQP) in the New York City Department of Health and Mental Hygiene (DOHMH) is pleased to support We Act for Environmental Justice (WeAct) in their application for funding from the U.S. EPA's Environmental Justice Collaborative Problem Solving Program to implement the project **Assessing Indoor Air Quality Benefits of Building Electrification for Multifamily Housing in an Environmental Justice Community**. The project goals include replacing gas stoves with induction stoves and monitoring indoor air quality in a variety of types of housing using a Community Science approach.

Encouraging polices and programs that reduce health impacts from air pollution, both outdoor and indoor, is an important part of the AQP's work within DOHMH and with other city agencies. Indoor air quality (IAQ) is an important driver of asthma and other respiratory health outcomes. IAQ varies greatly between buildings and even between apartments within buildings in part due to their location relative to pollution sources, construction type, ventilation, maintenance and resident behavior. There are few sources of IAQ data in New York City, a gap that this study will help to fill. In addition, it will provide insight into what barriers may exist for the replacement of gas stoves on a wider scale, specifically limitations due to building electrical infrastructure and increases in electricity costs.

DOHMH has experience executing air quality-related Community Science projects, including question development, data collection strategies, and data analysis and interpretation. We look forward to working with WeAct on this program, including providing guidance around Community Science project planning and the application of findings to current and future health equity-focused policy efforts across city agencies.

Sincerely,

Sarah Johnson

April 12, 2023

Dear Ms. Shepard,

I am writing to commit my services, should they be necessary, as a conflict resolution mediator for WE ACT's proposal to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EPA-R-OEJECR-OCS-23-01), funded by the U.S. Environmental Protection Agency.

I am a scientist with experience in public health and grassroots organizing, and would serve as an independent, third-party mediator between WE ACT and their collaborators should conflict arise during the collaboration process. My role is not a permanent one on the project, but a potential role should meditation be necessary.

Sincerely,

Swati Durga Gayatri Rayasam, MS

No

Dear Applicant:

This modifies our letter of the above date in which we stated that you would be treated as an organization that is not a private foundation until the expiration of your advance ruling period.

Your exempt status under section 501(a) of the Internal Revenue Code as an organization described in section 501(c)(3) is still in effect. Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Code because you are an organization of the type described in section 509(a)(1) and 170(b)(1)(A)(VI).

Grantors and contributors may rely on this determination unless the Internal Revenue Service publishes notice to the contrary. However, if you lose your section 509(a)(1) status, a grantor or contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act, or the substantial or material change on the part of the organization that resulted in your loss of such status, or if he or she acquired knowledge that the Internal Revenue Service had given notice that you would no longer be classified as a section 509(a)(1) organization.

You are required to make your annual information return, Form 990 or Form 990-EZ, available for public inspection for three years after the later of the due date of the return or the date the return is filed. You are also required to make available for public inspection your exemption application, any supporting documents, and your exemption letter. Copies of these documents are also required to be provided to any individual upon written or in person request without charge other than reasonable fees for copying and postage. You may fulfill this requirement by placing these documents on the Internet. Penalties may be imposed for failure to comply with these requirements. Additional information is available in Publication 557, Tax-Exempt Status for Your Organization, or you may call our toll free number shown above.

If we have indicated in the heading of this letter that an addendum applies, the addendum enclosed is an integral part of this letter.

Letter 1050 (DO/CG)

WEST HARLEM ENVIRONMENTAL ACTION

Because this letter could help resolve any questions about your private foundation status, please keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above.

Sincerely yours,

Steven T. Miller

Dear Taxpayer:

This is in response to your Jan. 19, 2011, request for information regarding your tax-exempt status.

Our records indicate that you were recognized as exempt under section 501(c)(3) of the Internal Revenue Code in a determination letter issued in November 2011.

Our records also indicate that you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Please refer to our website www.irs.gov/eo for information regarding filing requirements. Specifically, section 6033(j) of the Code provides that failure to file an annual information return for three consecutive years results in revocation of tax-exempt status as of the filing due date of the third return for organizations required to file. We will publish a list of organizations whose tax-exempt status was revoked under section 6033(j) of the Code on our website beginning in early 2011.

d. Brief Description of Applicant Organization

WE ACT for Environmental Justice is a community-based organization with headquarters in West Harlem and a Federal Policy Office in Washington D.C. Our mission is to build healthy communities by ensuring that people of color and/or low income residents participate meaningfully in the creation of sound and fair environmental health and protection policies and practices. Our current ongoing activities include advocacy campaigns to promote decarbonization and reduce the presence of toxic chemicals in our communities; air-monitoring research projects in Northern Manhattan; and community organizing campaigns to increase disaster resiliency and civic engagement in Northern Manhattan.

We are ***not*** *applying for the Small CBO Set Aside Track for $150,000 projects.*

e. Project Abstract

WE ACT for Environmental Justice proposes an indoor air monitoring study on the impacts of electrification for public health in environmental justice communities. The main objective is to increase public health in environmental justice communities by collecting data on the public health impacts of gas stoves in multifamily housing in New York City and Nationally. Project activities include: 1) Program Recruitment and Outreach; 2) Educational Workshops; 3) Air-Quality Monitoring for Nitrogen Dioxide Pollution; 4) Stove Swap Out; 5) Health Impacts Assessment; 6) Reporting Findings to Participants; and 7) Evaluation and Dissemination of Findings, Reports, and Manuscripts. The project will take place in Northern Manhattan and the South Bronx, and expected project outputs include: 1 IRB-approved survey on the health impacts of gas stove replacement; 1 published study report; 30-100 households are transitioned from a gas stove to an electric induction stove; and 30-100 households have increased environmental health awareness and experience reductions in negative outcomes associated with asthma related to indoor air pollution. Project outcomes include 1) increased community knowledge about the contribution of gas stoves to indoor air pollution in Northern Manhattan and the South Bronx, 2) reduced rates of asthma attacks and other negative health outcomes related to indoor air pollution associated with gas stoves; and 3) increased local, State, and Federal government resources to support community-driven solutions to reduce exposure to Nitrogen Dioxide in environmental justice communities.

f. Project Type
WE ACT for Environmental Justice is proposing an indoor air-monitoring and public health study on Nitrogen Dioxide levels in apartment units with gas stoves.

g. Special Considerations
Our project qualifies for special considerations under the Health Impact Assessment category, as it aims to protect and promote health and to reduce inequities in health by examining the effect of gas stoves on indoor air quality, and potential impacts on individuals with asthma in New York City environmental justice neighborhoods.

h. Environmental Issue - *Air*

i. List of Project Partners
Association for Energy Affordability (AEA) - Community-Development Organization
South Bronx Unite (SBU) - Community-Based Organization
The Mailman School of Public Health at Columbia University - Academic
The Barry Commoner Center for Health and the Environment at Queens College, City University of New York - Academic
New York City Department of Health and Mental Hygiene- Government

j. QAPP Requirement
We believe we need to develop a QAPP for our project. We will incorporate a QAPP into our work plan, and develop the QAPP guided by the EPA's available resources for Ambient Air Monitoring Quality Assurance. The QAPP will be completed and approved prior to any air monitoring taking place.

Environmental and Public Health Information of the Underserved Community:
WE ACT is headquartered in West Harlem, and serves the constituents of Northern Manhattan, including West Harlem, Central Harlem, East Harlem, and Washington Heights/Inwood, which encompass the following zip codes: 10026, 10027, 10029, 10030, 10031, 10032, 10033, 10034, 10035, 10037, 10039, 10040. Northern Manhattan communities are overwhelmingly Brown and Black, and each neighborhood has its own unique makeup of populations. For example, Central Harlem is 56.14% Black and only 22.88% Hispanic, whereas East Harlem is only 27.32% Black, but 46.49% Hispanic, and Washington Heights is only 7.04% Black, but nearly 70% Hispanic, with a foreign-born population of 46%. According to the EJ Screening tool, compared to national percentiles, these zip codes rank in the 86th percentile for residents of color, and the 90th percentile for limited English speaking.

According to data compiled by New York City's Department of Health and Mental Hygiene, these neighborhoods experience disproportionate rates of poverty and unemployment, and with lower homeownership rates than the rest of New York City, and higher rates of childhood asthma and infant mortality. The neighborhoods of West Harlem, East Harlem, and Central Harlem experience poverty rates of 19.99%, 31.11% and 25.12% respectively, and have unemployment rates of 4.44%, 6.74, and 5.34% respectively. Washington Heights and Inwood have a poverty rate of 18.4% and an unemployment rate of 8.27%. According to the EJ Screening tool, these

neighborhoods rank in the 81st percentile for unemployment rates; the 85th percentile for less than High School education; and the 77th percentile for low-income residents.

Homeownership rates in these neighborhoods vary from 7.59% to up to 16.74%, but stay well below Manhattan's 23.96% rate, and the City's average of 32.75%. Children in Northern Manhattan are also disproportionately at risk from negative health effects, with rates of Child Asthma ER visits in East Harlem and Central Harlem reaching 580 and 545 visits per 10,000 children, more than double Manhattan's rate (264 visits per 10,000) and New York City's rate (223 visits per 10,000 children). Northern Manhattan neighborhood infant mortality rates are also higher than Manhattan and City averages, reaching up to 7.2 deaths per 1,000 live births in Central Harlem.

Our catchment area of Northern Manhattan contains by far the majority of disadvantaged tracts found in EJScreen. Issues faced by the majority of Northern Manhattan tracts fall under the following categories: Health; Housing; Legacy pollution; Transportation; Water and wastewater; and Workforce development**.** Threats and burdens highlighted in EJScreen for these neighborhoods include: very high diesel particulate matter exposure (often 0.99), high asthma in adults over 18 (0.97), high percent pre-1960s housing (0.84), and diagnosed diabetes among adults over 18 (0.83).

The South Bronx neighborhoods of Mott Haven and Port Morris experience similarly disproportionate rates of air quality and other pollution threats. According to the EJ Screening tool, the South Bronx ranks in the 95th-100th percentile for Diesel Particulate Matter, Air Toxics Cancer Risk, Hazardous Waste Proximity, Underground Storage Tanks, Traffic Proximity, and Waste Water Discharge. The South Bronx is a historically underserved community of color, ranking in the 94th percentile for people of color; the 92nd for low income residents; the 87th for unemployment rates; the 94th for limited English speaking; and the 96th for less than High School education.

Our project seeks to address the environmental and public health issue of Nitrogen Dioxide pollution emissions from gas stoves in affordable housing units in environmental justice communities, which contribute to disproportionately elevated rates of asthma among residents. We believe that this project can point the way to tangible improvements that can be made to existing multifamily housing stock in disadvantaged communities in order to reduce exposure to Nitrogen Dioxide.

Organization's Historical Connection to Underserved Community:
WE ACT for Environmental Justice is a community-based organization headquartered in Northern Manhattan that was established in 1988. WE ACT was founded as a result of a community organizing campaign, in which 100 Harlem activists came together to protest the North River Sewage Treatment Plant, which was degrading the air quality in Northern Manhattan. Peggy Shepard, WE ACT's Co-Founder and Executive Director, was one of those activists, and has led WE ACT in numerous successful environmental justice campaigns in Northern Manhattan since then. WE ACT's mission is to build healthy communities by ensuring that people of color and/or low income residents participate meaningfully in the creation of sound and fair environmental health and protection policies and practices. We achieve our

mission through community organizing, advocacy, education, and research. Our work currently focuses on the following priority issue areas: clean energy, toxic exposures, green jobs workforce development, and equitable decarbonization.

WE ACT's theory of change begins by developing and sharing knowledge with environmental justice constituencies. We then assist these constituencies in building capacity and alliances that they need in order to carry out effective advocacy leading to policy change. We support the Northern Manhattan community in a variety of ways, including providing worker training opportunities to community members, providing educational programming for youth and adults, connecting community members to key decisionmakers, empowering community members to serve as leaders through testimony and advocacy days, and leading groundbreaking environmental health research projects.

WE ACT has a membership made up of Northern Manhattan residents, consisting of 1,100 residents from across Northern Manhattan. WE ACT is in constant communication with our membership through various mediums. We hold monthly membership meetings, averaging 150-200 attendees per month. These meetings cover a range of different topics, such as voter engagement, important policy and legislative updates, environmental health updates, and more. Our membership meetings serve to not only raise awareness about environmental justice issues in Northern Manhattan, but also allow us to hear from our members around what concerns they may have regarding their communities. WE ACT also facilitates several smaller monthly meetings through our Working Groups, that focus on specific environmental justice issues such as toxic beauty products, healthy homes and indoor environments, and climate justice. Our working groups include the Climate Justice Working Group, the Healthy Homes Working Group, Civic Engagement Working Group, and the Beauty Inside Out Working Group. The working groups are made up of community members working together to address these issues and implement equitable community-based solutions at the New York City, State, and Federal levels.

In addition to our membership and working groups meetings, we send out weekly newsletters to over 15,600 subscribers. These newsletters keep subscribers up to date on events happening in the community, as well as policy wins and resources to help disadvantaged residents combat extreme weather and other climate justice issues. WE ACT is also active on Facebook, Twitter, and Instagram. WE ACT organizers also contact community members directly through phone banking, and through door-to-door organizing. In addition, we hold tabling events in-person across Northern Manhattan, in an effort to reach residents that do not have access to the internet.

Over the 35 years that we have been active, WE ACT has been successful at implementing community-driven solutions to environmental justice issues in Northern Manhattan. WE ACT's long history of organizing within the community has allowed us to develop and implement several solutions to various environmental justice issues over the course of our time operating in Northern Manhattan. One example of this is the successful renovation of the Mother Clara Hale Bus Depot in Central Harlem. Before renovations, the bus depot was responsible for toxic emissions and other pollution that endangered the physical health of the people living in the neighborhood. To address this issue, WE ACT joined forces with the Mother Clara Hale Community Task Force (a task force made up of neighborhood residents) and worked with the Metropolitan Transit Authority to create a cooperative vision for the rebuilding of the station. As

a result of this organizing work, the depot was renovated with sustainable technology that greatly reduced the amount of toxic pollution being produced and distributed in the neighborhood, improving the quality of life for neighboring residents.

Another priority identified by Northern Manhattan communities has been the increase in extreme heat waves. Heat waves have increased in both frequency and temperature over the last several years, and Northern Manhattan residents are disproportionately at risk of the negative health effects that can occur as a result. According to data from 2017[1], in New York City there are about 13 heatstroke deaths per year, over 100 deaths from natural causes exacerbated by heat, and over 450 heat-related emergency department visits. 50% or the heat-related deaths in New York City are Black people, even though they make up only 25% of the City's population. 72% of households in Northern Manhattan are cost-burdened or lack access to air conditioning, and at least a third live in homes with issues such as leaks, cracks, or holes. These factors make it difficult to avoid the heat and cool the home, and make it difficult to prepare for extreme heat. To address this climate justice issue, WE ACT coordinated with several community members to develop a policy implementation plan to secure better cooling and policy resources for community members affected by extreme heat. As a result of this plan, we were able to coordinate with City agencies to ensure that 22,000 air conditioning units were distributed to NYCHA residents. We also coordinated with New York City agencies to audit and provide recommendations for their cooling center program, to increase its effectiveness in providing life-saving cooling resources to vulnerable community members. We have worked to secure additional funding for energy programs to aid low-income and/or energy-burdened households in cooling their homes. Additionally, we conduct on-the-ground community outreach to energy-burdened residents to help them sign up for energy assistance programs to protect their households from utility burden and shutoff.

Another key concern of many Northern Manhattan residents is access to healthy, affordable housing. About 10% of WE ACT's membership base are New York City Housing Authority (NYCHA) residents. Due to a history of chronic underfunding and mismanagement, NYCHA residents experience disproportionate rates of environmental health and safety issues in their housing. To address these issues, WE ACT has been working with NYCHA residents through our Healthy Homes Working Group, as well as our broader membership meetings, to identify systemic health issues across NYCHA developments, and to develop community-based solutions to these issues. One way we have been addressing the issues is by bringing attention to them through our non-partisan candidates forum. Leading up to the general elections of both 2021 and 2022, we have brought NYCHA issues to the forefront of candidates forums to ensure that incoming City Electives are committed to ensuring safe, affordable housing to all New Yorkers.

WE ACT has an extensive history of multi-stakeholder community engagement around local environmental and public health issues. In 2015, WE ACT worked alongside hundreds of Northern Manhattan residents to develop the Northern Manhattan Climate Action (NMCA) Plan, in a process that included seven public workshops and dozens of meetings with partners and city agencies, along with countless interactions with our membership base. The NMCA includes recommendations for policy changes and informal local actions that are designed to mitigate environmental impacts while also addressing the systemic inequality that has led to a disparity in

[1] https://www.nyc.gov/assets/orr/pdf/Cool_Neighborhoods_NYC_Report.pdf

political power for poor and working-class communities confronting the advancing effects of climate change in Northern Manhattan. One of the most impactful results of the NMCA Plan was the passage of the Climate Leadership and Community Protection Act (CLCPA) in New York State in 2019, one of the most ambitious climate laws in the nation.

WE ACT also facilitated the Inwood Climate Change & Health Project, another collaborative community-based initiative that engaged Inwood members on how climate change is present and impacting health in their neighborhood. WE ACT worked with Inwood community members to identify pressing climate-change related issues, identifying extreme heat and poor air quality as priority areas, and then worked with the members to create an action plan to address these priority issues. Since then, WE ACT has coordinated a Heat, Health, and Equity Initiative (HHEI) throughout Northern Manhattan, an initiative dedicated to finding solutions to extreme heat. Through the HHEI, WE ACT works to ensure that Northern Manhattan community members are aware of the impacts of extreme heat, and the resources available to them to mitigate the dangerous health effects of extreme heat waves. As part of the HHEI, WE ACT is also working to pursue state policy changes to allow HEAP (Home Energy Assistance Program) funds to be used towards weatherization efforts and cooling costs of extreme heat mitigation. Through this initiative, WE ACT has also collaborated with New York City agencies to improve the City's Cooling Center Program.

One of WE ACT's most recent major undertakings was a groundbreaking pilot program called "Out of Gas, In with Justice," which was designed to study the effect of gas stoves on indoor air quality in affordable housing units in New York City Housing Authority (NYCHA) developments. WE ACT partnered with two of our current partners for the proposed project – Association for Energy Affordability (AEA) and Columbia University's Mailman School of Public Health – along with Berkeley Air Monitoring, to design and implement this study, which was the first of its kind in the United States.

The pilot study was conducted at 1471 Watson Ave at a NYCHA development in the Bronx. WE ACT collaborated with AEA to recruit 20 households to participate in the study- 10 as experimental units and 10 as control units. Once households were identified and recruited, WE ACT and AEA replaced the gas stoves in the experimental units with electric induction stoves, and installed air monitors in all 20 participating household units. From there, we spent the next 10 months monitoring the fluctuation in pollutant levels in the participating apartments.

At the conclusion of our study, we found that households with induction stoves experienced a 35% reduction in daily nitrogen dioxide concentrations compared to those using gas stoves, when controlling for temperature and apartment-level factors. Additionally, 24-hour averages of carbon monoxide for households with gas stoves reach concentrations of 1.4 parts per million (ppm) whereas households with induction stoves had a 24-hour average of 0.8 ppm, a significant decrease. Finally, when cooking a standardized meal for the controlled cook test on both a gas and induction stove in the NYCHA development, NO2 concentrations in kitchens with gas stoves were on average 190 percent higher than in kitchens with induction stoves.

Our proposed project is an extension of this pilot study with a modified project structure, looking to monitor Nitrogen Dioxide with more sensitive sensors and to make up for discrepancies found

in the first study. While the Out of Gas, In with Justice pilot project successfully demonstrated a reduction in NO2 pollution levels when replacing gas stoves with electric induction stoves, the presence of Nitrogen Dioxide from outside factors including seasonal variations and pollution from neighboring units, created discrepancies when analyzing the data. The proposed project will build upon the lessons learned from Out of Gas, In with Justice to get more accurate data on NO2 pollution from gas stoves, and the effects of this pollution on public health. One lesson we have incorporated into the proposed project has been to conduct the study in a fully-electrified building, rather than electrifying individual units in a building still powered by natural gas. In doing so, we hope to remove one of the external contributors of NO2- resulting in more accurate data on NO2 fluctuations before and after gas stove replacement.

Additionally, the proposed project will take into account fluctuations in NO2 levels due to seasonal conditions such as open windows, heating, and cooling. During the original pilot project, baseline air monitoring and experimental air monitoring were conducted at different points in the year, possibly resulting in fluctuations of NO2 levels in the apartment units. To control this variable, WE ACT has developed a series of seasonal cohorts for project participants- one for each season. This ensures that air monitoring after stove replacement is done during the same season that baseline air monitoring was originally conducted, removing the potential for discrepancies in project results due to outside factors.

Environmental Justice Collaborative Problem-Solving Model
The proposed project addresses all seven elements of the EJCPS Model.

1. **Issue Identification, Community Vision, & Strategic Goal Setting**

This element of the EJCPS Model has already begun. Indoor air quality in Northern Manhattan homes, especially affordable housing, has been a primary concern of WE ACT and our membership for several years. WE ACT has worked closely with Northern Manhattan community members through our Healthy Homes Working Group to identify systemic health risks from environmental conditions, and develop an action plan to address the environmental justice issue of indoor air quality in affordable housing in New York City. The Out of Gas, In with Justice pilot project was a result of this collaboration, and the proposed project is designed to work in collaboration with the residents- building on existing leadership and relationships within the communities to successfully implement the research project. This project fits into larger community goals by contributing to larger efforts to decarbonize New York City, and Northern Manhattan specifically. Equitable decarbonization has been identified as a priority for Northern Manhattan residents, as seen through the development of the Northern Manhattan Climate Action (NMCA) Plan which was the result of a six-month planning process led by WE ACT, in partnership with community members and other local stakeholders such as community organizations, environmental non-profit organizations, local businesses, and government agencies. NMCA Plan identified energy democracy and decarbonization as a primary focus, outlining the following goals: 1) The construction of green energy infrastructure that can improve public health, and 2) Equitable green energy projects that provide direct economic and environmental benefits to low-income residents, ensuring that cost-savings are passed down to renters, and not absorbed by property owners or for-profit businesses. WE ACT's commitment to equitable decarbonization in New York is seen through our decarbonization campaign, Better

Buildings New York, which worked in partnership with several state and local organizations to secure the passage of GasFreeNYC, or Local Law 154, which bans gas hookups in new construction and gut renovations in New York City. Our pilot decarbonization and air-monitoring project, Out of Gas, In with Justice, was developed as part of this decarbonization campaign to collect evidence to demonstrate the need for and feasibility of decarbonization in the building sector, and to gain information about the economic ramifications of electrification for people with low incomes.

WE ACT also participated in issue identification and community visioning through our Inwood Climate Change & Health Project, a collaborative community-based initiative that engaged Inwood members on climate change resiliency. The Inwood Climate Change & Health Project identified air quality as a priority for Northern Manhattan residents. As a result, one of the policy recommendations developed by the community was the need for an air-quality monitoring program in Inwood to study the effects of air pollution on community health.

2. **Community Capacity-Building & Leadership Development**

This project addresses community capacity-building and leadership development by gathering data on indoor air quality in environmental justice neighborhoods, and educating residents on the importance of decarbonization and the effects of air quality on resident health. Part of our capacity-building work has already begun, through a preliminary study on gas-stove decarbonization and indoor air quality, and through the identification of project partners to provide technical assistance in the air monitoring for the proposed project. We have also begun educating Northern Manhattan residents on the importance of indoor air quality and decarbonization through our Healthy Homes Working Group and our Climate Justice Working Group.

If granted funding, we would hold community education workshops to ensure community members and project participants are properly educated on both the progress and impact of the study and the larger context of air quality monitoring in environmental justice communities. Workshops would be held in partnership with the New York City Department of Health and Mental Hygiene, and AEA, and would cover a range of topics including sources of indoor air pollution, demonstration of indoor air quality monitoring equipment, and cooking demonstrations with induction stoves. These topics build on previous workshops with the Healthy Homes Working related to air quality monitoring efforts in New York City, and would empower residents with the knowledge and skills to educate their family, friends, and neighbors about the importance of indoor air quality and building electrification.

3. **Consensus Building & Dispute Resolution**

The project team intends to make decisions through a consensus model. WE ACT is experienced at both consensus building and dispute resolution through decades of work in community engagement and in coalitions at the city, state, and local level. Consensus is critical to ongoing collaboration and to achieving outcomes that genuinely benefit the majority of community members and stakeholders.

To support effective collaboration in the proposed project, one of our initial workplan steps would be to develop a dispute resolution plan, ratified by the steering committee participants (consisting of the key personnel on this proposal), that will guide successful resolutions of any disputes that arise.

WE ACT has also identified an independent third party, Swati Rayasam- a scientist with public health and grassroots organizing experience, to work as a mediator of conflict should arise.

4. Multi-Stakeholder Partnerships & Leveraging of Resources

We are currently in the process of developing multi-stakeholder partnerships and leveraging resources to successfully complete the proposed project. We have already begun conversations with project partners and have secured partnership commitments from partners from multiple stakeholders, including local community-based non-profits, academic institutions, and government agencies. We will leverage AEA's existing relationship with the South Bronx community and knowledge of building retrofits to select a building in which to conduct the study and recruit program participants. Columbia University has been identified as a technical advisor to aid in the collection and analysis of data. The New York City Department of Health and Mental Hygiene will serve as technical consultants as we develop the air monitoring study more closely with Columbia University. Working with these partners, we have developed a workplan to outline our project plan for indoor air monitoring. As our project plan continues to develop we will continue to look for new partners to address issues as they arise.

5. Constructive Engagement by Relevant Stakeholders

WE ACT has already begun the process of creating constructive engagement by all relevant stakeholders. WE ACT has identified policy recommendations for addressing air quality concerns at the New York City and New York State government levels through our community engagement work on the NMCA Plan and the Inwood Climate Change & Health Project, described above, and have begun engaging government stakeholders on these recommendations. In addition to engaging government stakeholders, we have also begun the process of engaging other stakeholders, namely another community based organization to help with community outreach and project implementation, and an academic institution to provide technical assistance for project research and analysis.

The goal of the proposed project is to collect data on the impacts of Nitrogen Dioxide pollution, to be used as evidence to support community-based solutions to reduce exposure to Nitrogen Dioxide in environmental justice communities. As part of the project, WE ACT will engage local environmental justice communities, namely Northern Manhattan and the South Bronx, through educational events to increase community awareness of and gain insight on indoor air quality issues in these neighborhoods. These outreach events will help inform policy recommendations when engaging government stakeholders once the study is finished. Additionally, WE ACT will be working closely with the New York City Department of Health and Mental Hygiene throughout the funding period. This collaboration will provide important insight on 1) what data to emphasize when conducting air quality monitoring and the Health Impacts Assessment and 2) how best to leverage the data collected to effectively advocate for policy change once the study

is completed.

In addition to engaging with our collaborators on this proposal, WE ACT has also consistently engaged our Northern Manhattan community members on decision-making and issue-identification on all environmental justice campaigns over the years, and will continue to do so throughout the funding period. WE ACT continues to have close relationships with our membership base, and uses monthly working groups (listed above), to provide important community input on solutions for climate and environmental justice concerns in Northern Manhattan. The community input collected through these working groups is used to develop policy recommendations, and community members are able to engage directly with decisionmakers and government agencies through advocacy days and other WE ACT events.

6. Sound Management & Implementation

The proposed project will be led by WE ACT's Director of Environmental Health, Micaela Martinez, with oversight from the Project Manager, Peggy Shepard (Executive Director and Co-Founder of WE ACT). Both Peggy and Micaela have significant experience in environmental health and community-based research. WE ACT has also secured written commitments on project partners on their scope of work in the project. The project partners named in this proposal will form a steering committee to provide oversight and expertise on the study development and implementation. The steering committee will make decisions by consensus, ensuring the project is meeting milestones as expected. As part of our work to ensure sound management and implementation of the proposed project, WE ACT has developed a detailed milstone schedule and logic model, which will serve as the basis for the project development and implementation.

In addition to the programmatic goals for the project, WE ACT also has strong financial controls, led by our Senior Director of Operations & Finance, Evelyn Joseph, who has extensive experience in financial management. Evelyn works with oversight from a CPA, Patricia Terry, who provides additional expertise on financial management.

7. Evaluation, Lessons Learned & Replication of Best Practices

WE ACT has developed the proposed project based on lessons learned and best practices from a previous air monitoring project, and will continue to document best practices and lessons learned over the course of the funding period to be incorporated into subsequent studies.

The project Steering Committee will meet throughout the course of the project to evaluate progress as well as lessons learned and best practices to replicate. WE ACT and project partners will measure our success based on our ability to successfully meet expected outputs (listed in the **Environmental Results: Outputs, Outcomes, and Performance Measures** section of the workplan) and milestones laid out in the milestone schedule.

As demonstrated in our milestone schedule and logic model, we have currently planned to document and share information learned from the study not only with program participants but also with wider audiences, including government agencies and other community stakeholders. Working with our project partners, WE ACT will develop and publish a written report on the

findings of this project, and will disseminate the report through online and traditional media, including a planned press release.

Project Linkages

Goal 2: Our project supports EPA Strategic Plan Goal 2, Objective, 2.1 by working to increase public health through an indoor air-monitoring program tracking pollution levels in households impacted by environmental racism. The EPA's efforts, as part of a government-wide effort to address environmental, public health, and energy challenges affecting communities, and specifically those adversely and disproportionately affected by environmental, climate, and human health harms and risks; Executive Order 13985; and Executive Order 140008 – all contribute to the potential for a significant increase in advancing environmental justice and civil rights. For this potential to be realized, there needs to be increased data available on the public health impacts of decarbonization and electrification, to be leveraged as evidence to support equitable decarbonization initiatives. Data on indoor air quality is imperative to improving public health, as there are currently no standards for indoor air quality. Because natural gas is a cheaper alternative to electricity, affordable housing and multifamily rental housing stock are disproportionately powered by natural gas, causing disproportionate health effects in low-income communities of color. Increased community awareness around the impacts of indoor air pollution is needed to effectively combat this environmental justice issue.

Objective 2.1: As discussed above, the proposed project directly contributes to promoting environmental justice and civil rights at the Federal, Tribal, State, and Local levels by increasing indoor air quality in the households participating in the proposed project. The proposed project will also contribute to broader environmental justice and civil rights initiatives by collecting critical data on indoor air quality to be used as evidence to support decarbonization policies and regulations at the local, State, and Federal levels.

Partner and Collaborate

The proposed project promotes collaborations with partners from three stakeholder groups: 1) community-based organizations, 2) academia, and 3) government. WE ACT will work with these stakeholders to develop and implement a collaborative air-monitoring project studying the effect of Nitrogen Dioxide pollution on residents in environmental justice communities, including a health assessment on the project participants. This project addresses both environmental concerns and public health issues by contributing valuable data to support decarbonization incentives in New York City and New York State, reducing greenhouse gas emissions while protecting the health of environmental justice residents.

WE ACT has carefully selected partners representing a range of different skillsets and resources to help us achieve the goals of our proposed project and ensure the best results at all aspects of project implementation. To ensure this air-monitoring study is benefiting historically marginalized and underserved communities, WE ACT has developed two financial partnerships with organizations from the South Bronx: the Association for Energy Affordability (AEA) and South Bronx Unite (SBU). AEA represents the local community development stakeholder group, and SBU is another local community-based non-profit organization.

AEA has a long history of working with environmental justice residents from the South Bronx,

and has extensive experience retrofitting affordable housing buildings to increase energy efficiency for environmental justice residents. AEA will be responsible for securing a building in which to do the study, and for the construction necessary for retrofitting apartments for stove replacement. AEA will also conduct outreach to building residents to recruit participants, and will work with WE ACT during working group meetings to educate program participants on the study and importance of decarbonization. AEA will also host cooking classes and provide the stoves to be used for the cooking demonstrations (although WE ACT will provide the cooking instructor). This partnership benefits AEA by allowing them to continue the energy retrofitting work they are currently doing in the South Bronx. Additionally, the outcomes of this project could result in increased electrification incentives for landlords in New York City, creating more resources for AEA's work.

SBU also has extensive experience working with South Bronx residents, and has spent years developing a trusted relationship with South Bronx community members. SBU will work with WE ACT and AEA to host educational sessions to South Bronx community members participating in the proposed project. In partnership with WE ACT and AEA, SBU will host 3-5 educational events, targeting at least 15-20 community members per event. The educational events will cover a range of topics, including sources and effects of indoor air pollution (including gas stoves), demonstrations of indoor air monitoring equipment, and culturally-relevant cooking demonstrations with induction stoves. As part of this work, SBU will also assist in the distribution of pots and pans for induction stoves to program participants. This partnership benefits SBU by increasing environmental health and awareness in their home neighborhood of the South Bronx. It also enables SBU to gain experience in indoor air monitoring projects, increasing their organizational capacity for future air monitoring projects.

WE ACT has developed two non-financial partnerships from the academia stakeholder group: Columbia University and Queens College, of the City University of New York. WE ACT is leveraging partnerships from academia to ensure this research project is efficiently and accurately collecting data on the effects of gas stove replacement on public health, and to ensure the credibility of the project results. Both partners will provide important technical assistance and expertise during the research and air-monitoring process. Researchers from Queens College will provide expertise on the development and structure of the research project, and will provide technical assistance in the form of calibration of the air sensors, and in the analysis of the data collected. Columbia University will also provide technical expertise in the development and design of the proposed project, along with providing expertise in the development of the Health Impacts Assessment (HIA), and will assist WE ACT in securing IRB approval for the HIA survey. In addition, researchers from Columbia University will leverage their technical and intellectual expertise by conducting a health impacts assessment on project participants, analyzing the physical and mental effects of gas stove replacement. The results of this study will provide groundbreaking context for decarbonization initiatives, and is one of the first of its kind to be undertaken. Both Columbia University and Queens College have vested interests in the results of this project, as both institutions are involved in current community air-monitoring projects, which would be impacted by the results of the proposed project.

Finally, WE ACT has also developed a non-financial partnership with the New York City Department of Health and Mental Hygiene (DOHMH) - a member of the government

stakeholder group. WE ACT is leveraging this partnership to secure insight on program structure and how to best use the project results to work with government agencies to secure decarbonization incentives in New York City and State. The NYC DOHMH will provide expertise and consultation, and will assist with educational workshops for program participants. As a public agency, the NYC DOHMH has a vested interest in the results of this project due to the implications they may have for public health and climate resiliency in New York City.

WE ACT has longstanding working relationships with all project collaborators, and will continue to collaborate with our project partners based on the findings of the proposed project, in order to work together to seek solutions to community-identified issues such as air quality.

The proposed financial transactions for this project comply with the applicable requirements in 2 CFR part 200, as the identified partners will serve as pass-through entities, and not procurement contractors. They will receive funding to carry out a portion of the project, which serves a public purpose, and will not profit from the partnership.

Project Activities:
1) Recruitment and Outreach: Work in partnership with AEA to identify a building in the South Bronx undergoing decarbonization and electrification retrofitting process from which to recruit program participants. Once program participants have been recruited, they will be divided into smaller cohorts of 12 households per cohort to facilitate air-monitoring and stove replacement.
2) Educational Workshops: Once program participants have been recruited, WE ACT, AEA, and the NYC DOHMH will host 3-5 one-day Healthy Homes workshops on sources of indoor air pollution (including gas stoves), demonstration of indoor air quality monitoring equipment, and culturally relevant cooking demonstrations with induction stoves. As part of this outreach, WE ACT will distribute pots and pans for induction stoves to program participants, and will ensure that program participants are familiar with the air monitoring equipment.
3) Air-Quality Monitoring for Nitrogen Dioxide Pollution: WE ACT will rent four "Home Health Boxes" air monitoring sensors from Access Sensor Technologies to conduct the project air monitoring. WE ACT's institutional partners at Queens College will conduct initial calibration of air-sensors in preparation for baseline monitoring. Once calibration is completed, air sensors will be distributed to program participants for the first round of baseline air-monitoring. WE ACT staff will ensure that air sensors are installed in the home correctly, and are prepared for baseline air monitoring. WE ACT has decided to use a stepped wedge model for this program. Air monitoring will take place over two week periods, using the four air sensors from Access Sensor Technology. While we have currently settled on these air sensors, we understand the field is rapidly changing, and will continue to work with our partners to monitor the technology as new options may emerge over the course of the grant period.

We will conduct air-monitoring in 4-6 households per month, starting with a 2-week baseline air-monitoring period in apartment units before stove replacement. Following the stepped wedge model, we will use a tiered-approach to stove replacement swapping out stoves in cohorts of 12 households at a time. Once the stove replacement has begun, we will begin 2-week air-monitoring periods in households that have undergone stove retrofitting, while continuing to collect baseline data for households that have yet to receive a new stove. This will enable us to collect simultaneous data on NO2 levels before and after stove replacement, increasing the

accuracy of the data.
4) Stove Swap Out: Using a phased approach, WE ACT and AEA will facilitate the swap-out of gas stoves for electric induction stoves in 60 households from an AEA-selected building in the South Bronx, prioritizing households where one or more individuals has asthma.
5) Health Impacts Assessment: Working in partnership with our research partners at Columbia University, WE ACT will conduct an assessment of changes in acute respiratory and mental health symptoms among the 60 households who participated in the gas stove transition. WE ACT will work with Columbia University to develop an IRB-approved survey to use for the health impacts assessment, and will conduct a pre-assessment on program participants before stove replacement. Once the stoves have been replaced, Columbia University researchers will conduct a health assessment using the survey to analyze the impact of electrification on physical and mental health. Researchers will then analyze the health impacts assessment results and develop a written report based on the findings.
6) Report Findings to Participants: We will develop individualized reports regarding the contribution of gas stoves on indoor air quality among study participants' homes for each household participating in the study, and will share these findings through written reports and educational workshops. We will host 3-5 half-day workshops to explain summary reports and disseminate household reports.
7) Evaluation, Disseminate Findings, Reports, and Manuscripts: WE ACT will conduct and share a formal evaluation of the study, including the development of recommendations for policy and further research. In partnership with Columbia University, Queens College, and the New York City Department of Health and Mental Hygiene, we will develop and publish a final report featuring the analysis of household indoor air quality data, including recommendations for policy and further research. We will disseminate this report through a press conference, as well as by making it available online on our Website and through virtual communications such as emails and newsletters.

WE ACT EJ Collaborative Air-Monitoring Milestone Schedule

Title: Assessing Indoor Air Quality Benefits of Building Electrification for Multifamily Housing in an Environmental Justice Community

WE ACT for Environmental Justice

0.1	Develop and Complete QAPP																																							
0.2	Develop a Dispute Resolution Plan																																							
0.3	Form Steering Committee and finalize project implementation plan																																							
1	**Recruitment and Outreach**																																							
1.1	Identify building in which to conduct the project																																							
1.2	Recruit Program Participants																																							
1.3	Separate participants into cohorts for stove replacement																																							
1.4	Host 3-5 one-day Healthy Homes Educational Workshops																																							
1.5	Distribute Pots and Pans to program participants																																							
2	**Baseline Air Monitoring**																																							
2.1	Calibration of Air Sensors																																							
2.2	Distribution of air sensors to first round of participants																																							
2.3	Baseline Air Monitoring Begins																																							
3	**Stove Replacement**																																							
3.1	Identify and prepare apartment units for stove replacement based on existing cohorts																																							
3.2	Replace gas-stoves with electric induction stoves using a tiered-approach																																							
4	**Air Monitoring**																																							
4.1	Conduct air monitoring after stove replacement																																							
4.2	Work with researchers at Queens College to analyze air-monitoring data																																							
4.3	Develop written report based on data analysis																																							
5	**Health Impacts Assessment**																																							
5.1	In partnership with Columbia University, develop IRB-approved survey to use for health impacts assessment																																							
5.2	Conduct health impacts pre-assessment before stove replacement																																							
5.3	Conduct health impact assessment throughout the air-monitoring period																																							
5.4	Analyze health impact assessment results and develop written report based on the findings																																							
6	**Report Findings to Participants**																																							
6.1	Develop individualized reports for each household participating in the project																																							
6.2	Host 3-5 half-day workshops to explain summary reports and disseminate household reports																																							
7	**Evaluation & Dissemination of Reports**																																							
7.1	In partnership with project partners, develop and publish a final report on study findings, including recommendations for policy and further research																																							
7.2	Hold press conference with relevant stakeholders to announce study release and share findings																																							

Environmental Results: Outputs, Outcomes, and Performance Measures:
Tracking and measuring progress will be led by the Project Manager, Peggy Shepard. Peggy will coordinate with all of our partners and technical assistance providers to ensure uniform reporting and measurement methods and data quality. We will work with our technical assistance providers to ensure that data is properly collected and stored. Data will be stored in CSV data files and analyzed in R: A language and environment for statistical computing. All data, metadata, and code will be made publicly available at the time of publication.

Expected Early Outputs:

- 1 building identified for retrofitting and air monitoring
- 30-100 building residents recruited as program participants
- 3-5 one-day workshops, each attended by 15-20 community members living in the South Bronx.
- Distribution of pots and pans for induction stoves to 30-100 households
- 30-100 households receive induction stoves as a replacement for the gas stove in their homes
- 1 IRB-approved survey on the health impacts of gas stove replacement
- 30-100 households participate in an assessment of acute respiratory and mental health symptoms BEFORE induction stove swap out

We will also track the following longer-term Outputs:

- 30-100 households receive testing for indoor levels of NO_2 to measure reductions associated with an induction stove swap out.
- 30-100 households experience measured reductions in indoor levels of NO_2
- 30-100 households participate in an assessment of acute respiratory and mental health symptoms AFTER induction stove swap out
- 30-100 summary reports for indoor air quality data from each household
- Host 3-5 half-day workshops, each attended by 15-20 study participants to explain summary reports
- Formal evaluation process has begun, using the indoor air quality data and surveys on negative outcomes associated with asthma and relevant mental health outcomes from 30-100 households.
- Publication of study report on WE ACT's website and in relevant newsletters.
- Press conference held to announce the study release and share findings.

Outcomes:

- 30-100 Community members have increased environmental health awareness through increased knowledge about sources of air quality and how to reduce their exposure.
- 30-100 households are familiar with indoor air quality monitoring methods and express interest in community based participatory research related to indoor air quality
- 30-100 households are confident in their ability to use induction stoves to perform their usual cooking tasks, and are sharing knowledge with their families and neighbors about the benefits of electrifying household appliances.
- 30-100 households are expected to experience reductions in negative outcomes associated with asthma and/or relevant mental health outcomes related to indoor air pollution

- 30-100 households are taking steps to reduce their exposure to indoor air pollution, sharing knowledge with their families and neighbors, and leading change in their community
- Northern Manhattan residents are knowledgeable about the contribution of gas stoves to indoor air pollution in their homes
- New York and other states are providing resources to support buildings in the transition to induction stoves.

Sustainability Plan and Community Vision

WE ACT plans to use the result of this study to support the community goals identified in the NMCA Plan: 1). The construction of green energy infrastructure that can improve public health, and 2). Equitable green energy projects that provide direct economic and environmental benefits to low-income residents, ensuring that cost-savings are passed down to renters, and not absorbed by property owners or middlemen. By conducting this study, we hope to show the feasibility and necessity of electrification to improve public health, especially in environmental justice neighborhoods. The project in itself will improve the health of program participants, and enable them to access the environmental benefits of electrification. On a larger scale, WE ACT and our partners hope to leverage the results of this study to create broader decarbonization and electrification incentives in New York City, and across the country.

Programmatic Capability

WE ACT's experience related to performing the eligible services is demonstrated by our track record, our mission, and our current efforts. WE ACT has a demonstrated ability to meaningfully engage environmental justice community members on a range of environmental justice and climate justice issues and environmental health concerns, and has spent the last 35 years fostering trust and strengthening relationships with Northern Manhattan community members. In addition to our strong ties to the community, WE ACT also has long-standing relationships with our project partners, based on years of working relationships around environmental justice and research campaigns in New York City. These strong working relationships contribute to WE ACT's infrastructure and capacity to successfully implement the proposed project. This is demonstrated by our successful development and implementation of our pilot gas stove replacement project: "Out of Gas, In with Justice", as highlighted earlier in the narrative. We have a wealth of knowledge and resources available to us as a result of piloting the original study, and will leverage these resources to ensure the proposed project collects accurate and useful data.

Further, as outlined throughout this proposal, WE ACT has demonstrated expertise in facilitating meetings and engagements with diverse stakeholders and decision makers; research and analysis of environmental justice and environmental health threats; data collection and dissemination; and culturally-relevant environmental education. Peggy Shepard, Executive Director and Co-Founder of WE ACT, will serve as the Project Manager for the proposed project. Peggy has led WE ACT since its founding in 1988, and has a demonstrated ability to successfully lead community organizing, educational, research, and policy advocacy campaigns. She is a long-time resident of Northern Manhattan and a respected leader in the environmental justice movement at the local and national levels, and has spent the last 35 years curating a trust-based relationship with her

fellow neighbors and advocating for environmental health and justice for all. Her successful projects and accomplishments include: 1) suing the New York City Department of Environmental Protection for operating the North River Sewage Treatment Plant as a public and private nuisance; 2) a major public awareness campaign urging the New York Metropolitan Transportation Authority (MTA) to commit to modifying bus depots and to invest in clean-fuel only buses, and consequently filing a Title VI Complaint with the United States Department of Transportation (DOT) charging the MTA with violating the civil rights of Northern Manhattan residents; 3) Developing a ground-breaking Environmental Health and Justice Leadership Training (EHJLT) program- the first of its kind- and overseeing the training of over 1,000 adults and youth from environmental justice neighborhoods; 4) the implementation of a pilot project study on indoor air quality in affordable housing units in the Bronx, the first in the United States to monitor indoor air quality with residents in-place in affordable housing; and 5) Being named co-Chair of the first ever White House Environmental Justice Advisory Council.

Peggy will oversee WE ACT's Director of Environmental Health, Micaela Martinez, throughout project implementation. Micaela has extensive research experience covering topics including environmental health, environmental racism, Climate Change, and social justice and human health. Additionally, WE ACT's academic partners, Darby Jack and Holger Eisl, bring a wealth of knowledge and extensive research experience to the project. Darby worked with WE ACT on the Out of Gas, In with Justice project, and successfully oversaw the air monitoring and data analysis of the project. Holger Eisl currently manages the New York City Community Air Survey, in partnership with the New York City Department of Health and Mental Hygiene, assisting with air monitoring data collection and analysis from about 100 locations around New York City. Both Darby and Holger are well-positioned to support WE ACT in this project, and their expertise and input on the project development will ensure that data collection is both accurate and efficient.

Expenditure of Awarded Grant Funds:

Our system, Quickbooks online, is adequate to report Federal awards used in compliance with Federal statutes, and terms & conditions of the award. We have implemented effective control over, and accountability for, all funds, property, and other assets. We confirm that our organization has written procedures in place to implement the requirements of **§75.305**. We confirm that our organization has written procedures in place for determining the allowability of costs in accordance with the terms and conditions of the Federal award.

Past Performance:

We do not have any available past performance related to federal or non-federal grants.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Atma Connect

Address: 220 Avenida Domenich, PMB 299

City: San Juan

State: PR: Puerto Rico Zip Code: 00918

B. Unique Entity Identifier (UEI): Y3L2J4N45124

C. Applicant/Recipient Point of Contact

Name: Meena Palaniappan

Phone: Ex. 6 Personal Privacy (PP)

Email: meena@atmaconnect.org

Title: CEO

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

We do not have more that 15 employees

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

We do not have more that 15 employees

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

Meena Palaniappan	CEO	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

INDEPENDENT ACCOUNTANTS' REVIEW REPORT

Board of Directors
Atma Connect
Oakland, California

We have reviewed the accompanying financial statements of Atma Connect (the Organization), which comprise the statement of financial position as of December 31, 2020, and the related statements of activities, cash flows and functional expenses for the year then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of Organization management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

Accountants' Responsibility

Our responsibility is to conduct the review engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the American Institute of Certified Public Accountants. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Accountants' Conclusion

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

Report on Summarized Comparative Information

The accompanying summarized comparative information as of and for the year ended December 31, 2019 is derived from financials that were previously reviewed by us and we stated that we were not aware of any material modifications that should be made to those financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America in our report dated September 10, 2020. We have not performed procedures in connection with that review engagement since that date.

ED_016126_00001226-00007

NOTE 1: NATURE OF ACTIVITIES

Atma Connect (the Organization) is a nonprofit organization started to build resilience in low-income vulnerable communities. Founded in 2014 and based in Oakland, California, we are a nonprofit public benefit technology company that creates solutions to empower users. We envision a world where neighbors help neighbors prepare for disasters, improve access to basic needs, and overcome chronic challenges.

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (GAAP).

Net Assets

The financial statements report net assets and changes in net assets in two classes that are based upon the existence or absence of restrictions on use that are placed by its donors, as follows:

Net assets without donor restrictions – are resources available to support operations. The only limits on the use of the net assets are the broad limits resulting from the nature of the Organization, the environment in which it operates, the purposes specified in its corporate documents and its application for tax-exempt status, and any limits resulting from contractual agreements with creditors and others that are entered into in the course of its operations.

Net assets with donor restrictions – are resources that are restricted by a donor for use for a particular purpose or in a particular period. Some donor-imposed restrictions are temporary in nature, and the restriction will expire when the resources are used in accordance with the donor's instructions or when the stipulated time has passed. Other donor-imposed restrictions are perpetual in nature; the Organization must continue to use the resources in accordance with the donor's instructions.

When a donor's restriction is satisfied, either by using the resources in the manner specified by the donor or by the passage of time, the expiration of the restriction is reported in the financial statements by reclassifying the net assets from net assets with donor restrictions to net assets without donor restrictions. Net assets restricted for acquisition of building or equipment (or less commonly, the contribution of those net assets directly) are reported as net assets with donor restrictions until the specified asset is placed in service by the Organization, unless the donor provides more specific directions about the period of its use.

Classification of Transactions

All revenues and net gains are reported as increases in net assets without donor restrictions in the statement of activities unless the donor specified the use of the related resources for a particular purpose or in a future period. All expenses and net losses are reported as decreases in net assets without donor restrictions.

ED_016126_00001226-00008

Accounting for Contributions

Contributions, including unconditional promises to give, are recognized when received. All contributions are reported as increases in net assets without donor restrictions unless the contributed assets are specifically restricted by the donor. Amounts received that are restricted by the donor to use in future periods or for specific purposes are reported as increases in net assets with donor restrictions. Unconditional promises with payments due in future years have an implied restriction to be used in the year the payment is due, and therefore are reported as restricted until payment is due, unless the contribution is clearly intended to support activities of the current fiscal year. Conditional promises are not recognized until they become unconditional, that is, until all conditions on which they depend are substantially met.

Program Service Fees

Program service fees consist of consulting services charged for conducting human-centered design interviews and community needs assessment. The Organization recognizes such revenue over time as related performance obligations are satisfied or hourly rates are billed.

Income Taxes

The Internal Revenue Service and the California Franchise Tax Board have determined that the Organization is exempt from federal and state income taxes under IRC 501(c)(3) and California RTC 23701(d). The Organization has evaluated its current tax positions as of December 31, 2020 and is not aware of any significant uncertain tax positions for which a reserve would be necessary. The Organization's tax returns are generally subject to examination by federal and state taxing authorities for three and four years, respectively, after they are filed.

Contributed Services

Contributed services are reflected in the financial statements at the fair value of the services received only if the services (a) create or enhance nonfinancial assets or (b) require specialized skills, are performed by people with those skills, and would otherwise be purchased by the Organization.

Contributions Receivable

Contributions receivable including pledges and grants receivable are unconditional promises to give that are recognized as contributions when the promise is received. Contributions receivable that are expected to be collected in less than one year are reported at net realizable value. Contributions receivable that are expected to be collected in more than one year are recorded at fair value at the date of promise. That fair value is computed using a present value technique applied to anticipated cash flows. The Organization has evaluated the value of the discount and concluded that it was not material for recognition. The Organization considers all contributions receivable to be fully collectible at December 31, 2020. Accordingly, no allowance for doubtful accounts was deemed necessary. If amounts become uncollectible, they are charged to expense in the period in which that determination is made.

ED_016126_00001226-00009

Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results could differ from those estimates.

Cash Equivalents

For purposes of the statement of cash flows, the Organization considers all money market funds and other highly liquid investments with original maturities of three months or less when purchased to be cash equivalents. Cash and cash equivalents held in investments accounts for investment purposes, if any, are treated as part of investment balances for purposes of the statement of cash flows.

Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Organization determines the fair values of its assets and liabilities based on a fair value hierarchy that includes three levels of inputs that may be used to measure fair value.

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Organization has the ability to access at the measurement date.

Level 2 - Inputs other than quoted market prices that are observable for the asset or liability, either directly or indirectly.

Level 3 - Unobservable inputs for the assets or liability.

The Organization had no assets or liabilities recorded at fair value on December 31, 2020.

Property and Equipment

All acquisitions of property and equipment in excess of $5,000 and all expenditures for repairs and maintenance, renewals, and betterments that materially prolong the useful lives of assets are capitalized. Property and equipment are stated at cost or, if donated, at the approximate fair value at the date of donation. Depreciation is computed using the straight-line method over the estimated useful lives on the property and equipment. Certain software development costs for externally marketed software may be capitalized if the Organization expects to generate revenue through the sale or lease of such software. The Organization accounts for expenditures and contributions to open source software solutions as program expenses when incurred. The Organization had no property and equipment that met this capitalization policy at December 31, 2020.

Expense Recognition and Allocation

The cost of providing the Organization's programs and other activities is summarized on a functional basis in the statement of activities and statement of functional expenses.

ED_016126_00001226-00010

The functional classification of expenses involves grouping natural expense classifications by functions, such as program, administrative, and fundraising activities. Functional classification tells why an expense is incurred. The columns of the Functional Expense Statement used by the Organization are the functional categories while the rows are the natural classification.

Program expenses include all expenses from activities carried out to fulfill the Organization's mission or purpose. The Organization only reports one major program. Fundraising expenses are costs related to activities that involve inducing potential donors to contribute assets, services, or time. Management and general activities relate to the overall direction of the Organization which are not identifiable with any program and fundraising activity but are indispensable to the conduct of those activities and are essential to the Organization.

The Organization accumulates functional expense information based on its service efforts. It uses two methods in determining functions of expenses: (a) direct identification of expenses and (b) percentage allocation.

As much as practical, whenever an expense can be directly identified with a specific function, it will be assigned or charged to that function. This will mean that the expense is coded to that function when the expense is entered into the accounting system.

Percentage allocation is used whenever direct identification is not practical and the expense relates to more than one function. The following steps are done when percentage allocation is used:

1. Identify the natural expense classifications
2. Determine the allocation bases to be used for each identified expense
3. Assemble the required data for each allocation bases
4. Perform the allocation computation

The percentage allocation is computed and documented in the Functional Expense Worksheet. The allocation bases applicable are identified below:

Natural Expense Classification	Allocation Base
Salaries & Benefits	Staff's time allocation
Payroll Taxes	
Rentals	
General Office Supplies and Subscriptions	
Travels, meals and events	
Security and Utilities

Changes in Accounting Principles

The Organization adopted *ASU 2014-09 – Revenue from Contracts with Customers (Topic 606)* during the year ended December 31, 2020. This guidance requires an entity to recognize revenue to depict the transfer of promised goods and services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The adoption of ASU 2014-09 did not result in a material change to timing of when revenue is recognized.

Prior Year Summarized Information

The financial statements include certain prior year summarized comparative information in total but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with GAAP. Accordingly, such information should be read in conjunction with the Organization's financial statements for the year ended December 31, 2019, from which the summarized information was derived.

Reclassifications

Certain accounts in the prior year's summarized information have been reclassified for comparative purposes to conform with the presentation in the current-year financial statements.

NOTE 3: PAYCHECK PROTECTION PROGRAM LOAN

The Organization received a $63,900 paycheck protection program (PPP) loan bearing interest of 1% and maturing May 2022 which it accounts for under FASB 470. Based on the guidance in FASB ASC 405-20-40-1, the proceeds from the loan will remain recorded as a liability until either (1) the loan is, in part or wholly, forgiven and the Organization has been "legally released" or (2) the Organization pays off the loan. As further described in Note 9, this loan has been forgiven subsequent to December 31, 2020.

NOTE 4: CONTINGENCIES

Compliance with Donor Restrictions

Grant awards require the fulfillment of certain conditions as set forth in the provisions of the grants. Failure to fulfill the conditions could result in the return of the funds to the grantors. The Organization deems this contingency remote since by accepting the grants and their terms, it has accommodated the objectives of the Organization to the provisions of the grants. The Organization's management is of the opinion that the Organization has complied with the terms of all grants.

Flexible PTO Policy

The Organization offers staff a flexible PTO policy with no accrual cap, paid time off balance or defined rate of accrual. It is possible that staff will take paid time off after the end of the fiscal year as a result of work performed prior to fiscal year. No reasonable estimate of the potential liability for such time off was available.

ED_016126_00001226-00012

NOTE 5: NET ASSETS WITH DONOR RESTRICTIONS

Net assets with donor restrictions were available as follows as of December 31:

	2020	2019
Puerto Rico projects	$ 25,000	$ -
Future periods	-	120,269
Total	$ 25,000	$ 120,269

NOTE 6: IN-KIND SUPPORT

In-kind support consisted of the following for the years ended December 31:

	2020	2019
Legal counsel	$ 117,561	$ 61,851
Other services	26,000	-
Hosting / software / training	55,927	-
Total	$ 199,488	$ 61,851

Legal Services

The Organization received the benefit of 259 and 118 hours of donated in-kind corporate, licensing, and trademark counsel valued at an average of $454 per hour and $460 per hour during the years ended December 31, 2020 and 2019, respectively.

NOTE 7: CONCENTRATIONS

Revenue and Support
