Re: Lunt Neighborhood Epidemiological Study and Action Plan

Dear Mr. Burney:
It is with pleasure that I write this partner commitment letter for the Lunt Neighborhood Epidemiological Study and Action Plan proposal that is being submitted to the by the Lunt Neighborhood Action Group to the EJCPS grant program.

The Franklin Regional Council of Governments is a regional municipal organization that is the successor to County Government. In addition to our work in planning for emergencies, health improvement, land use and sustainability, wee are the host of the Western Massachusetts Health and Medical Coalition, a local health department serving 15 towns. Our Community Services Department provides public health capacity building and training opportunities to local health departments across the Western MA region. We also serve as the Local Public Health Field Training Hub for Franklin and Hampshire Counties.

We are happy to host an information session for other communities to learn about the model of citizen/scientist/health department collaboration on research proposed in this grant.

Sincerely,

Phoebe Walker

Phoebe Walker
Director of Community Services
Franklin Regional Council of Governments
12 Olive Street, Suite 2, Greenfield MA 01301

Appendix C
Budget

Personnel	• Susan Worgaftik, Co-coordinator @10 hours per week @ Ex. 6 Personal Privacy (PP) in kind • Glen Ayers, Co-coordinator @ 10 hours per week @ Ex. 6 Personal Privacy (PP) in kind	$0
Supplies	• Digital survey tools @ $500 • Miscellaneous supplies @ $500 • 300 $25 gift cards for survey participants=$7500	$8500
Contractual	• Jack Sullivan—epidemiological data; 500 hours @ Ex. 6 Personal Privacy (PP) • Jennifer Hoffman—research supervision 1500 hours @ • Jennifer Siegel—researcher and research coordinator 2500 hours@ Ex. 6 Personal Privacy (PP) • Slingshot—develop 300 1-2 page presentations outlining health impacts and health options for residents; presentation/workshop tailored to Greenfield residents regarding Lunt facility and health impacts; 2-3 large community meetings of 50 or more residents; hold up to 20 small group meetings with families in target area=$13,600 • Bookkeeper 195 hours@ Ex. 6 Personal Privacy (PP) • Speakers for educational programs 5 x 2 hours@ Ex. 6 Personal Privacy (PP)	$133,500

Other	Co-payments for participant for testing averaging $40/visit x 200 visits Franklin Regional Council of Governments Presentations $0	$8,000
Total		$150,000

APPENDIX D

Logic Model

Lunt Neighborhood Epidemiological Study and Action Plan

Resources /Inputs	Activities	Outputs	Audience	Short-Term Outcomes (6-12 months)	Intermediate Outcomes (12-24 months)	Long-Term Outcomes (2+ years)
*In-kind contributions *Volunteers *Partnering Organizations	*Identify partners and establish roles and timelines for work *Identify target area *Statistical analysis of TCE related disease in the target area *Conduct online and mail survey to residents regarding TCE related health issues *Conduct door to door follow-up based upon online and mail survey *Generate report based upon findings	*Quarterly meetings of partners to establish needs, concerns for effective study *300-500 residents reached through online survey, mail-in survey and door to door efforts *350 residents receive results of surveys and door to door efforts through online or in person educational programs *200 residents provided follow-up small group supports and co-payment assistance *Create report from the survey results and online and written materials relating this information *300-500 residents receive the results of the survey information via community meetings online or in person or via written material *Create final report analyzing both the data found and the methodology used to establish that data *26 municipalities of Franklin County Massachusetts receive final report involving data and methodology through region-wide	*Target area residents *Residents of Greenfield, MA *City officials *Regional municipal leaders *Healthcare providers	*Establish the incidence of health concern engendered by the contamination on the Lunt Silversmith site *Establish mechanisms to educate the community in the target area and at large about the findings of the survey and analysis	*Increase understanding of target area residents of the level of health danger that TCE and other related chemicals from the Lunt plant provide to them *Increase understanding of the City of Greenfield, residents of the city, and health providers of the health concerns related to the Lunt contamination	*Support residents of the target are in getting health testing as Required *Report findings and methodology to 26 municipalities of Franklin County Massachusetts

ED_016126_00000216-00045

	of surveys and online follow-up *Generate educational materials (written and online) based upon report *Large group educational programming about general findings of the statistical analysis and the survey information in person and online *Small group /individual meetings based upon the survey and report and resident needs *Target area-wide campaign to	meeting if municipal leaders				

	encourage those who require medical testing to get those tests *Gather aggregate information based upon work done in years 1 and 2 to provide a final report *Provide information to other communities in the region on project methodology and results for their use.					

APPENDIX E

Office of Environmental Justice and External Civil Rights Quality Assurance Project Plan Requirement (QAPP)

Check Yes or No for each of the items provided below as it applies to your specific project. If you answered **YES** to any of the items listed above, you are **REQUIRED TO SUBMIT** a Quality Assurance Project Plan in accordance with EPA Requirements and an approved QAPP must be in place ***prior*** to the initiation of activities.

You will be contacted with information on how to prepare your QAPP. In the meantime, please visit the website https://www.epa.gov/sites/default/files/2015-06/documents/g5-final.pdf which provides guidance on what must be submitted for grants/cooperative agreements.

1. Your project will involve the collection of groundwater, soil, sediment, surface water, air, biota or fauna samples for chemical or biological analysis. Yes _No x
2. Your project will use existing computer databases containing analytical data or personal information previously collected. Yes x _No _
3. Your project will use existing historical research pertaining to this project or application. Yes x _No _
4. Your project will implement deed searches for current property or site. Yes _No x _
5. Your project will conduct medical records search for the population covered in the grant. Yes _No _
6. Your project will compile meteorological data to determine weather trends or air mixing trends. Yes _No x _
7. Your project will use existing statistical studies or will conduct these studies as part of the project. Yes x _No _
8. Your project will create a new database based on the information gathered. Yes x _No _
9. Your project will use this information for litigation purposes. Yes _No x _
10. Your project will use this information to make reservations on environmental decisions Yes x _No

EPA KEY CONTACTS FORM

OMB Control No. 2030-0020
Approval expires 06/30/2024

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 0.5 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

Employer Identification Number:
88-1566070

Form: SS-4

Number of this notice: CP 575 E

LUNT NEIGHBORHOOD ACTION GROUP
Ex. 6 Personal Privacy (PP)
GREENFIELD, MA 01301

For assistance you may call us at:
Ex. 6 - Personal Privacy (PP)

IF YOU WRITE, ATTACH THE
STUB AT THE END OF THIS NOTICE.

WE ASSIGNED YOU AN EMPLOYER IDENTIFICATION NUMBER

Thank you for applying for an Employer Identification Number (EIN). We assigned you EIN 88-1566070. This EIN will identify your entity, accounts, tax returns, tax returns, and documents, even if you have no employees. Please keep this notice in your permanent records.

Taxpayers request an EIN for business and tax purposes. Some taxpayers receive CP575 notices when another person has stolen their identity and are operating using their information. If you did **not** apply for this EIN, please contact us at the phone number or address listed on the top of this notice.

When filing tax documents, making payments, or replying to any related correspondence, it is very important that you use your EIN and complete name and address exactly as shown above. Any variation may cause a delay in processing, result in incorrect information in your account, or even cause you to be assigned more than one EIN. If the information is not correct as shown above, please make the correction using the attached tear-off stub and return it to us.

When you submitted your application for an EIN, you checked the box indicating you are a non-profit organization. Assigning an EIN does not grant tax-exempt status to non-profit organizations. Publication 557, Tax-Exempt Status for Your organization, has details on the application process, as well as information on returns you may need to file. To apply for recognition of tax-exempt status, organizations must complete an application on one of the following forms: Form 1023, Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code; Form 1023-EZ, Streamlined Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code; Form 1024, Application for Recognition Under Section 501(a); or Form 1024-A, Application for Recognition of Exemption Under Section 501(c)(4) of the Internal Revenue Code.

Nearly all organizations claiming tax-exempt status must file a Form 990-series annual information return (Form 990, 990-EZ, or 990-PF) or notice (Form 990-N) beginning with the year they legally form, even if they have not yet applied for or received recognition of tax-exempt status.

If you become tax-exempt, you will lose tax-exempt status if you fail to file a required return or notice for three consecutive years, unless a filing exception applies to you (search www.irs.gov for Annual Exempt Organization Return: Who Must File). We start calculating this three-year period from the tax year we assigned the EIN to you. If that first tax year isn't a full twelve months, you're still responsible for submitting a return for that year. If you didn't legally form in the same tax year in which you obtained your EIN, contact us at the phone number or address listed at the top of this letter. For the most current information on your filing requirements and other important information, visit www.irs.gov/charities.

(IRS USE ONLY) 575E 04-04-2022 LUNT O 9999999999 SS-4

IMPORTANT REMINDERS:

* Keep a copy of this notice in your permanent records. This notice is issued only one time and the IRS will not be able to generate a duplicate copy for you. You may give a copy of this document to anyone asking for proof of your EIN.

* Use this EIN and your name exactly as they appear at the top of this notice on all your federal tax forms.

* Refer to this EIN on your tax-related correspondence and documents.

* Provide future officers of your organization with a copy of this notice.

Your name control associated with this EIN is LUNT. You will need to provide this information along with your EIN, if you file your returns electronically.

Safeguard your EIN by referring to Publication 4557, Safeguarding Taxpayer Data: A Guide for Your Business.

You can get any of the forms or publications mentioned in this letter by visiting our website at www.irs.gov/forms-pubs or by calling Ex. 6 Personal Privacy (PP) Ex. 6 - Personal Privacy (PP)

If you have questions about your EIN, you can contact us at the phone number or address listed at the top of this notice. If you write, please tear off the stub at the bottom of this notice and include it with your letter.

Thank you for your cooperation.

Keep this part for your records. CP 575 E (Rev. 7-2007)

Return this part with any correspondence so we may identify your account. Please correct any errors in your name or address.

PERSONAL PASSIONS

Sleeping in the woods, running, hiking, reading, skijoring, and anything outside with my husband, 2 daughters, and dog.

Ex. 6 Personal Privacy (PP) Otisfield, Maine, Ex. 6 Personal Privacy (PP) @ecologbasedeconomy.org

Work Experience

Founding Executive Director, Center for an Ecology-Based Economy (CEBE) 2013-present

- Leading a 501c3 organization with six full-and part-time staff to mount a community-driven response to climate instability, resource depletion, and food insecurity. Primary grant-writer and fundraiser. Budget for 2022/23 FY of over $300,000
- Co-creating innovative, climate related projects including a Regional EV charging network, community food forest, bulk ordering of supplies for local growers, community solar and affordable housing cooperatives, and countless sustainability related workshops and gatherings.
- A founding Board member of Maine Climate Action *NOW!* (MCAN) of which CEBE is a Core Member

Co-Coordinator, Maine Network of Community Food Councils, (MNCFC) 2019-2021

- Facilitate monthly information sharing sessions between the growing network of Maine's Community Food Councils
- Represent MNCFC in the Maine Food Convergence Project, partnering with Maine Food Strategy, Maine Gleaning Network, Maine Farm to Institution, and Maine Climate Action *NOW!*. Chair of Regional Dialogues Work Group.

Board of Directors, Oxford Hills Technical School, 2020-Present

- Joined on the invitation of the Director. Goal is to implement programs to prepare students for opportunities in the emerging green economy, including the regenerative agriculture and renewable energy sectors.

Co-founder and Semiotics Director, Moose Pond Arts+Ecology (MPA+E) 1999–2013

- Helped build and manage a small Maine-based marketing and design firm with a core team of six employees and numerous contractors. Annual revenues exceeded $500,000 in peak years.
- Provided strategy, writing, photography, and permaculture design services to national and local ecologically and community focused, businesses, organizations, publications, and individuals.
- MPA+E designed, produced, and mailed seasonal gardening catalogs for Seeds of Change Organic Seeds from 2001 through 2011 with press runs nearing a million copies annually. Increased sales over 500% in ten years.

Photography and Writing, 1989 – 2013

- Photographed for several food system and shelter related books, including **Ex. 6 Personal Privacy (PP)** **Ex. 6 Personal Privacy (PP)** Ex. 6 Personal Privacy (PP)
- Freelance writing and photography for national and regional publications on subjects such as Maine's grain renaissance, alternative crops for northern climates, electric vehicles and solar energy.

Public Speaking and Teaching 1984- Present

- Teaches and lectures widely on Permaculture, seed saving, and the relationship between the food system and climate.
- Recent public speaking engagements include: Mitchell Center Sustainability and Water Conference, Alternative Economies Conference, Maine Network of Community Food Councils Summit, Sierra Club Climate Conference, AVCOG Annual Planners Meeting, Sustainable Living Center, Fairfield Iowa, Colby's Maine College Climate Conference, Cobscook Institute, the Principle 6 Conference, Oxford County Soil and Water District Annual Meeting,
- Adjunct Faculty in the Sustainable Living Department at Maharishi University from 2017-2019. Taught three, month-long Permaculture Designer's Courses and an Applied Permaculture class for college credit.
- Regular engagement with Students from Oxford Hills Middle School, Hebron, and Gould Academies

Education

- University of New Mexico, Master of Fine Arts, Photography, 1997
- University of New Mexico, Master of Arts, Minor in Art History, 1990
- Portland School of Art Bachelor of Fine Arts, Photography, 1984
- Unity College, Environmental Science, 1976

Ex. 6 Personal Privacy (PP)@ecologybasedeconomy.org | Ex. 6 Personal Privacy (PP)

EXPERIENCE

Center for an Ecology-Based Economy, Norway, ME
Climate Resiliency Program Manager **June 2022-Present**

- Coordinates with municipalities to complete enrollment materials for Maine's Community Resilience Partnership
- Plans, promotes, and facilitates public engagement meetings in small towns to discuss climate change and prioritize resilience projects
- Collaborates with town officials, CEBE staff, and contractors to write resilience grants

Environmental Policy, Planning, and Sustainability Lab, Durham, NH
Graduate Student Researcher **September 2020-Present**

- Synthesized literature reviews on just climate adaptation and environmental justice mapping
- Developed research design to study the development and use of environmental justice mapping tools at state, regional, and local levels in the United States
- Collects and analyzes data through surveys, interviews, and search-based database of tools

Natural Resources and the Environment, University of New Hampshire, Durham, NH
Teaching Assistant **August 2020-May 2022**

- Taught three courses: Natural Resources and Environmental Policy, a writing intensive course with weekly discussion sections; Introduction to GIS, a computer lab-based course; and Contemporary Conservation Issues, a 160-person general education course
- Helped design and lead lectures, activities, and group discussions on topics such as climate anxiety, food systems, and environmental justice
- Tracked progress and supported a range of 25 to 160 students in class, during office hours, and over email

Inch and Meter, PC, Philadelphia, PA
Environmental Professional **September 2019-May 2022**

- Assisted with writing and led design of Philadelphia's 2019 GHG Inventory Summary
- Conducted technical research and data entry for clients and project proposals
- Designed company website, proposal templates, business cards, and other graphic materials

New Hampshire Coastal Adaptation Workgroup, Durham, NH
Intern, UNH Cooperative Extension Internship Program **May-September 2021**

- Developed social media plan to guide the volunteer social media team and future interns
- Participated in workgroup meetings on topics such as regional capacity-building, local climate vulnerability, and resilience planning

Klein Global Opportunities, Philadelphia, PA
Program Assistant **August 2018-May 2020**

- Advised students and promoted study abroad programs through class presentations, walk-in hours, and email correspondence
- Managed team of four Peer Advisors and provided feedback on graphics, blog posts, program research, and other projects
- Researched in-location activities and lodging to plan future study away programs

Temple University Office of Sustainability, Philadelphia, PA
Digital Media Marketer **August 2017-December 2019**

- Oversaw all social media communication, including content creation and responses to individual inquiries on topics ranging from climate action to waste reduction
- Synthesized observations of other accounts, secondary research, and account analytics to create communication strategy guidebook
- Participated in event planning and execution to increase sustainability awareness on campus

The Public Interest Network, Philadelphia, PA
Video for Social Change Intern **May-August 2019**

- Edited videos on various sustainability and public health topics for use by national network of organizations
- Conducted photo research for use on social media, newsletters, and mailers
- Filmed promotional content for PennEnvironment, the local branch of the network

Work Experience

The Friendly Ewe
Owner-Operator (January 2017-present)
Duties: Built a local sheep dairy and wool enterprise from the ground up. Navigated licensing, managing sheep, milking, building infrastructure, developing product, marketing, website and social media, and record-keeping.

Center for an Ecology-Based Economy
Communications and Project Coordinator (March 2020-present)
Supervisor: Ex. 6 - Personal Privacy (PP)
Norway, ME
Duties: Managed all aspects of communications for a small nonprofit, including weekly newsletter, social media, press releases, website content, flyers, advertising, and outreach. Performed all bookkeeping and banking tasks and filed taxes. Maintained donor management system and managed donor relationships. Maintained office space, physically and virtually, including all applications for financial management, online collaboration, and event hosting. Facilitated meetings and worked in coalition with partner organizations. Assisted with event and workshop planning and execution. Coordinated volunteers and managed projects related to food, transportation, and energy. Collaborated with staff on grant writing and fundraising campaigns.

Big Brothers Big Sisters of Mid-Maine
Community-Based Manager (January 2018-February 2020)
Supervisor: Ex. 6 - Personal Privacy (PP)
Augusta, ME
Duties: Managed a caseload of 25 or more pairs of volunteers and youth facing adversity. Presented public information sessions to recruit new volunteers. Screened, interviewed, and trained volunteers and families. Supported matches, provided coaching to deepen relationships, monitored safety. Facilitated introductions, conflict resolution, and match closures. Trained new staff. Developed monthly newsletter, child development resources, and data tracking systems. Managed social media presence.

Outward Bound USA
Freelance Writer (2017-2022)
Editor: Ex. 6 - Personal Privacy (PP)
Duties: Wrote blog posts on assigned topics and consistently met deadlines, generated new content ideas, and created content for Facebook, Instagram, and Twitter posts.

Voyageur Outward Bound School
Lead Instructor and Staff Trainer (May-August 2012-2017), **Assistant Instructor** (May-August 2011), **Intern** (June-August 2010)
Supervisor: Ex. 6 - Personal Privacy (PP)
Ely, MN
Duties: Led multi-week canoe expeditions for young adults, teenagers, and youth at risk in the Boundary Waters Canoe Area Wilderness. Taught lessons, facilitated group dynamics, planned route, packed food and equipment, supervised canoeing, backpacking, high ropes course, rock climbing, kayaking, service projects. Led training sessions and trips for incoming staff, trained assistant instructors and interns through daily mentorship and feedback. Wrote blog posts, edited staff writing and program manual.

The Progress Center
Behavioral Health Professional (January 2017-March 2018)
Supervisor: Ex. 6 - Personal Privacy (PP)
Norway, ME
Duties: Worked one-on-one with teenagers with disabilities to teach life skills. Recorded data from each shift as part of a treatment plan.

A Wrinkle In Thyme Farm
Farm Hand (January 2014-April 2017)
Supervisor: Ex. 6 - Personal Privacy (PP)
Sumner, ME
Duties: Cared for 30 sheep, chickens, and a draft horse. Gained experience with lambing, maple sugaring, clearing pasture, processing wool, and milking sheep. Managed marketing, online sales, website, social media. Assisted with customer service, volunteer management, and farm events. Sold products at farmers' markets and fairs. Performed routine maintenance and basic carpentry.

University of Maine 4-H Camp and Learning Center at Bryant Pond
Wilderness Instructor (Sept 2015 and 2016, and Jan 2015) and **Field Teacher** (Sept-Nov 2014)
Supervisor: Ex. 6 - Personal Privacy (PP)
Bryant Pond, ME
Duties: Led day and overnight programming for high school students focused on team building, ecology, low and high ropes, canoeing, and survival skills. Led week-long canoeing, backpacking, and snowshoeing expeditions for struggling young adults and trained new instructors. Served as camp medic during school programming.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Laura Brion

Address: Ex. 6 Personal Privacy (PP)

City: Providence

State: RI: Rhode Island Zip Code: 02909

B. Unique Entity Identifier (UEI): W7MEUZQ1MY37

C. Applicant/Recipient Point of Contact

Name: Laura

Phone: Ex. 6 - Personal Privacy (PP)

Email: laura@leadsafekids.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

none

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

none

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

none

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

n/a

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

n/a

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Laura Brion	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Mayor of Providence

Brett P. Smiley

April 6, 2023

Laura Brion
Childhood Lead Action Project
1192 Westminster Street
Providence, RI 02909

Dear Laura Brion,

On behalf of the City of Providence, I offer this letter of commitment and strong support for the Childhood Lead Action Project's EPA EJ CPS grant application.

The following city entities will contribute the most resources and participate the most actively in this project:

• Providence Department of Inspection and Standards (DIS). DIS promotes the general health, safety, and welfare of the citizens of Providence through the enforcement of adopted City, State, and Federal codes relating to buildings and properties. We conduct this work to assure safe structures, adequate housing, and elimination of blight. Enforcement of lead safety requirements for rental properties and work on pre-1978 homes and child-occupied facilities is an important component of this work.

• Providence Division of Housing & Community Development (HCD) supports the creation of quality places through the strategic deployment of Federal funding provided by the U.S. Department of Housing and Urban Development. In partnership with local community organizations and agencies, the Division of Housing & Community Development seeks to improve the lives and living conditions of the City's low- and moderate-income residents. HCD's Lead Safe Providence Program provides fully forgivable loans to help make properties lead-safe at no out-of-pocket expense to homeowners or tenants. Loans for owner-occupied homes are forgivable after 5 years; loans for non-owner-occupied properties are forgivable after 10 years.

We commit to the following activities, in partnership with the Childhood Lead Action Project and other stakeholders:

• Continue to participate in ongoing quarterly lead poisoning prevention stakeholder coordination meetings bringing together community, nonprofit, and government partners to report on progress, set and evaluate benchmarks for success, and work together using a collaborative problem-solving model to improve lead poisoning prevention outcomes. (DIS, HCD)

City Hall, 25 Dorrance Street, Providence, RI 02903
Phone Ex. 6 - Personal Privacy (PP) Fax Ex. 6 - Personal Privacy (PP)

Mayor of Providence

Brett P. Smiley

• Housing code inspectors will respond to complaints about unsafe housing (such as rental properties with no history of lead compliance, or rental properties with expired lead certificates) and enforce the requirement for lead safety certificates in pre-1978 rental housing. (DIS)

• Provide lead abatement to eligible low/mod-income families, including steps to address lead in paint, soil, and water, in some cases. (HCD program in existence for several decades, contingent on triennial HUD funding renewal)

• Share data about city lead-related program outcomes (lead abatement, housing code enforcement) with community members and partner agencies. (DIS, HCD)

• Work with partners to implement a coordinated education, assistance & enforcement plan using existing staff and resources to bring property owners into compliance and protect tenants. (DIS, HCD)

• Help recruit participants for the Childhood Lead Action Project's Lead Paint Renovation, Repair, and Painting (RRP) trainings. Recruitment activities will include sharing flyers with building permit applicants and property owners cited for housing code violations, and displaying materials in the office. (DIS)

We strongly urge EPA to fully fund your proposal and look forward to our continued work together to ensure that all children and families in Providence are protected from indoor environmental hazards.

Sincerely,

Brett P. Smiley

04/12/2023

Laura Brion, Executive Director

Childhood Lead Action Project
1192 Westminster Street
Providence, RI 02909

Dear Laura,

I am very pleased to offer this letter of commitment to continue the Rhode Island Department of Health (RIDOH) Childhood Lead Poisoning Prevention Program (CLPPP) partnership with the Childhood Lead Action Project and to voice our strong support for your EPA Environmental Justice Collaborative Problem Solving grant.

This program provides an important opportunity to fund our joint strategy of addressing health inequity and reducing lead exposure through community-level leadership development and education; multi-stakeholder collaboration including enforcement, community, and funding agencies; and improved compliance with lead safety regulatory requirements for both renovation contractors and rental property owners.

The mission of CLPPP is to protect the health and safety of children, workers, and the general public by identifying and decreasing environmental lead hazards. We work to ensure that children under 6 years of age are screened for lead poisoning; collect blood level test results for children younger than 6 years of age to evaluate screening and lead poisoning trends; coordinate intervention services for children with blood lead levels above the reference level (such as case management and in-home education services); and offer comprehensive environmental inspection of homes of children younger than 6 years of age with significant blood lead levels. Additionally, we license lead inspectors, enforce lead-safe work practices laws, and conduct outreach and education about the dangers of lead poisoning in partnership with the community.

Our work is directly aligned with the Childhood Lead Action Project's innovative and highly successful efforts to eliminate childhood lead poisoning in Rhode Island through community-based education, parent support, and advocacy. Our work together dates back to the earliest days of both programs, and it is vitally important that we identify financial resources to sustain and build on our proven models for lead poisoning prevention, especially in bringing together community members to work together to reduce lead hazards at the community level, and in the development of highly effective multi-stakeholder partnerships to make the most of limited community resources and ensure strategic enforcement of lead safety laws.

We look forward to partnering with you on this project in the following ways:

- Participate in quarterly Providence Lead Poisoning Prevention Stakeholder coordination meetings and related activities
- Provide data on lead poisoning and lead safety risks to help guide planning, implementation, and evaluation of the project
- Provide outreach materials and technical assistance related to lead, data analysis, and other environmental health hazards to project partners and directly to community members
- Participate in planning process as city-level stakeholders and community members create a priority list of pre-1978 rental properties that have never complied with proactive lead safety laws
- Assist city-level stakeholders in implementing the next stages of a shared workflow plan for targeting long-term noncompliant property/landlord list through coordinated education, assistance, and enforcement

This issue is urgent and important, as there is no lower threshold for harm to due lead exposure, and the damage lead does to the developing brain is permanent. Due to the COVID-19 pandemic, the incidence of childhood lead poisoning increased statewide in recent years, and we are working urgently to reverse that trend. With the implementation of the updated childhood lead poisoning reference value advised by the CDC in 2021 (reduction from 5 to 3.5 mcg/dL), we have also seen the percentage of children diagnosed with lead poisoning more than double, with our core cities including Providence the hardest hit. It is particularly unacceptable that we see low-income communities and communities of color affected the most year after year. Your work to engage families directly affected by this injustice in working towards collaborative solutions for their own communities is essential.

As you know, this specific strategy is a top priority for our program. We have directly provided over $250,000 in the past four years to the Childhood Lead Action Project to fund earlier stages of this highly effective project and partnered actively on your current EPA EJ CPS grant. Further EPA funding at this time would allow your organization and the partners you have brought together to take the next steps urgently needed to expand these efforts and build on the foundation already created, with community needs at the forefront and addressing the patterns of greatest injustice a priority.

Thank you for all your organization does to keep RI children safe from lead exposure, especially among our state's most vulnerable communities. We strongly urge the U.S. EPA any other potential funders to support this important initiative.

Sincerely,

Michelle Almeida

Michelle Almeida; RIDOH Health Program Administrator for the Center for Healthy Ho

April 12, 2023
Laura Brion, Executive Director
Childhood Lead Action Project
1192 Westminster Street
Providence, RI 02909

Dear Laura,

I am very pleased to offer this letter of commitment to continue the partnership between the Rhode Island Department of Health's Office of Family Visiting (OFV) and the Childhood Lead Action Project (CLAP) and participate in your project proposed to the EPA for Environmental Justice Collaborative Problem-Solving funding.

As you know, the mission of the RI Department of Health (RIDOH) is to prevent disease and protect and promote the health and safety of the people of Rhode Island. Our leading priorities are to address the socioeconomic and environmental determinants of health; eliminate health disparities and promote health equity and ensure access to quality health services for all Rhode Islanders, including the state's vulnerable populations. This strongly aligns with the Childhood Lead Action Project's mission to eliminate childhood lead poisoning in RI and your application for EPA funds to specifically address environmental injustice through grassroots-level community work and multi-stakeholder partnerships.

The Office of Family Visiting works to provide evidence-based home visiting to mitigate or prevent poor health and developmental outcomes. Client eligibility ranges from prenatal to families with children up to age four, with a focus on the critical years of birth to 3. Our Family Visitors (FVs) are community health workers who provide prenatal support and services for infants and toddlers, personalized attention for parents and babies, and tips to support early childhood growth and development. This work is carried out by a vast network of staff placed at numerous social service and community-based organizations in our largest city of Providence and other areas of need statewide. We oversee and coordinate professional development for all major FHV programs in the state: First Connections; Healthy Families America; Nurse-Family Partnership; and Parents as Teachers.

Working in the home and developing parent trust and a rapport over time, our FHVs are in an ideal position to help vulnerable families with young children identify lead hazards and connect with resources to prevention poisoning before it happens, with compassion, cultural competency, and in the context of the family's overall needs. Lead safety education provided by the Childhood Lead Action Project for key staff at agencies serving Providence families can have a positive ripple effect many times over, within agency staff, families served, and the community at large. Lead poisoning prevention is an important

ED_016126_00000238-00005

issue for us because of the focus on early childhood development, preventable disease, and health equity directly.

The Childhood Lead Action Project's excellent "train the trainer"-style curriculum on lead safety for FHVs, originally developed with a RIDOH mini-grant to train community health workers serving refugees, has enabled us to put this theory into practice with multiple cohorts of "lead champion" FHVs trained in recent years. We are eager to continue this partnership and ensure that FHVs serving families in our highest-risk areas are trained to recognize lead danger signs, guide families to access help, teach families basic research skills to identify environmental hazards and data themselves, and connect residents to opportunities for further training on environmental health and advocacy opportunities at the Childhood Lead Action Project.

We look forward to partnering with you on this project in the following ways:

- Coordinate with CLAP to schedule lead safety trainings for FVs as part of the OFV annual calendar, maximizing opportunities for FHVs to build a variety of social service and health equity skills
- Promote training opportunities to family visitors as part of comprehensive training and support strategy coordinated by Family Visiting Professional Development Coordinator
- Recruit and enroll Family Home Visitors/Community Health Workers serving low/mod-income and at-risk families with children under age 6 in Providence, RI, prioritizing those in the best position to serve as a model and long-term lead safety resource for their peers and clients
- Provide logistical support for training sessions to ensure maximum turnout and program quality, including reminders, attendance monitoring, and technical assistance with pre/posttest evaluation

We strongly urge EPA to fund the Childhood Lead Action Project's proposal and look forward to our continued partnership to help all children and families in Rhode Island thrive in the healthy environment they deserve.

Sincerely,

Sara Remington
Manager
Office of Family Visiting

April 6, 2023

Laura Brion
Childhood Lead Action Project
1192 Westminster St
Providence, RI 02909

Dear Ms. Brion:

I am pleased to provide this **letter of commitment** to the Childhood Lead Action Project on behalf of Rhode Island College's Zvart Onanian School of Nursing.

As you know, Rhode Island College's Zvart Onanian School of Nursing is consistently recognized for providing the highest quality undergraduate and graduate nursing education in Rhode Island at an affordable cost. Our highly competitive programs foster the finest in intellectual development, personal growth and professional collaboration. We train our students using state-of-the-art technology and simulated clinical experiences, and our faculty are committed to excellence in teaching both in the classroom and in the clinical setting.

Our **strong partnership** with the Childhood Lead Action Project goes back over 20 years, demonstrating our commitment to partnering with community-based organizations to address **environmental health injustice** in Providence, RI in both a healthcare and community setting. Multiple faculty members have served on community-based project steering committees and the organization's Board of Directors, providing medical expertise and support in many forms. Undergraduate and graduate students have chosen clinical placements with the Childhood Lead Action Project and assisted with community outreach, health policy research, and advocacy. We have endorsed multiple successful state-level policy reform campaigns spearheaded by your group, and regularly feature your staff as guest speakers to educate nursing students about environmental justice, community organizing, and nonprofit management best practices.

We strongly support the Childhood Lead Action Project's application to EPA for an Environmental Justice Collaborative Problem-Solving Grant and urge EPA to provide full funding.

ED_016126_00000238-00007

RHODE ISLAND COLLEGE

Zvart Onanian School of Nursing

We commit to do the following, all of which represents a continuation of past partnership activities:

- Recruit one or more nursing students to intern at the Childhood Lead Action Project for clinical hours, to support policy and outreach activities related to this project
- Faculty and/or student participation in quarterly project steering committee meetings with staff, community members, and other project partners
- Provide technical assistance to staff, community members, and other project partners related to the health effects of lead exposure, interpreting health data, and similar topics
- Host project staff as guest speakers at health policy seminar or similar venue to report out on project activities, successes, and lessons learned

April 12, 2023

Laura Brion
Childhood Lead Action Project
1192 Westminster St
Providence, RI 02909

Dear Laura,

On behalf of the Rhode Island Center for Justice, I offer this letter of commitment to work with the Childhood Lead Action Project on your EPA Environmental Justice Collaborative Problem-Solving project.

As you know, the Rhode Island Center for Justice is a non-profit public interest law center that partners with community groups to strengthen existing advocacy and service provision with legal representation and strategy. Our legal practice areas—including housing, immigration, workers' rights, criminal justice, education, and utility shutoffs—reflect the most pressing needs of low-income people in our state.

Partnerships with community-based organizations such as the Childhood Lead Action Project are central to our mission and theory of change at CFJ. We have partnered with your organization since our founding because we recognize that despite significant progress over the years, lead poisoning remains one of the most serious environmental injustices affecting children in Rhode Island – especially in our largest city, Providence. Far too many of our clients struggle with lead hazards and unsafe housing, often on top of other health and economic challenges.

Specific partnership commitments for the EPA EJCPS Project, all of which represent a continuation of our partnership supporting your current EJCPS grant:

- Participate in community strategy meetings at a city level
- Provide technical assistance to community members, nonprofit partners, and government agency officials
- Encourage former clients with lead-related experiences to participate in steering committee activities, so that families who have been directly affected by lead play a meaningful role in addressing the problem on a larger scale
- Provide legal consultation to community members concerned about lead hazards and other housing conditions issues

By taking part in this process, CFJ is taking action to stop the injustice of lead poisoning on both an individual and systems level. We look forward to continuing our work together and strongly urge EPA to support this proposal.

Sincerely,

Jennifer L. Wood
Executive Director

2023 EPA Environmental Justice Community Problem Solving Cooperative Agreement Program

1.0 Program Objectives

a) Project Summary Page

Project Title: Community-Based Lead Poisoning Prevention Project

Project Location: Providence, Rhode Island primary neighborhood focus areas: West End, South Side, Elmwood, Federal Hill, Olneyville zip codes: 02905, 02907, 02908, 02909

Applicant Information: Childhood Lead Action Project, 1192 Westminster St, Providence, RI 02909, Contact: Laura Brion, Executive Director, laura@leadsafekids.org, Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization: Founded in Providence in 1992, the Childhood Lead Action Project (Project) is a nonprofit community-based organization working to eliminate childhood lead poisoning in Rhode Island through education, parent support and advocacy. The Project is the only organization in the state devoted primarily to this critical issue and has been a major catalyst for a significant decline in lead poisoning in RI over the last three decades. With directly affected parents on staff, board, and committees, we are a key grassroots-level resource for local families and agencies. We coordinate vital community-based education campaigns and mobilizing people to work for environmental justice.

Are you applying for the Small CBO Set Aside Track? No

Project Abstract: The aim of the Childhood Lead Action Project's Community-Based Lead Poisoning Prevention Project is to work strategically in Providence, RI to reduce the incidence of childhood lead poisoning, improve the safety of rental housing, and increase the capacity of residents, government regulators, housing funding agencies, and other stakeholders to work together to address the lead issue on a local level. Providence has a high incidence of lead poisoning and is home to substantial low-income/minority populations. The activities in this proposal were proposed by residents and allied stakeholders as next steps to build on to our current EJ CPS funded work, including continued meaningful involvement and direction provided by local community members already engaged in leadership roles; a multi-stakeholder group with previously established relationships, trust, mutual goals, and responsibilities agreed to aimed at bringing unsafe rental properties into compliance with lead laws through outreach, financial assistance, and enforcement; a pathway for further community member environmental learning and leadership development through accessible training opportunities in English and Spanish, lead safety and environmental advocacy training for community health workers, and more worker safety (RRP) training. By the end of this project, families living in Providence will have a stronger representation in lead prevention efforts and a deeper commitment to environmental improvements in the parts of the city hardest hit by this environmental injustice.

Project type: training, public education, capacity-building

Environmental Issue: Lead (air, water, toxics)

Project Partners: 1) City of Providence – Housing Code Enforcement & Planning Department (local government w/ enforcement and lead abatement funding resources); 2) RI Department of Health (state government agency w/ enforcement, data, and educational resources); 3) Rhode Island College Zvart Onanian School of Nursing (academic); 4) RI Center for Justice (service provider).

QAPP needed? No

b) Environmental and Public Health Information of the Underserved Community

Description and characterization: The community targeted in this proposal, the City of Providence, has the most significant lead poisoning problem in Rhode Island. City-level data released by the RI Department of Health (more recent than EJSCREEN) shows that over 200 Providence children were lead poisoned for the first time in 2021 – nearly half a

the entire state's poisoning cases and at almost twice the rate (3.35% PVD vs 1.89% statewide). With census data showing that Providence is one of the most racially/ethnically diverse communities of the state (50% people of color, with substantial immigrant and refugee populations), one of the highest poverty rates (30%),

and 1 in 3 residents speaking a language other than English at home, the clearly disproportionate lead problem in Providence is both of the greatest scope statewide and of significant environmental injustice. Although lead poisoning is a problem citywide, the degree to which this burden falls disproportionately on the lower-income neighborhoods in Providence is significant. The most recently available neighborhood-level data analyzed by the Providence Plan shows that during the 2014-2015 school year, 1 in 10 kindergartners started school with a history of elevated blood lead levels in the affluent East Side communities of Wayland and Blackstone; worse yet, in a low-income neighborhood - the West End - this ratio jumped to 1 in 3.

Environmental health issues this project seeks to address: This project seeks to address the serious threat of childhood lead poisoning due to deteriorating paint on old homes; soil contaminated by decades of air pollution (primarily leaded gasoline) and local industry; and drinking water contaminated by lead pipes. Although progress is being made, lead
poisoning continues to be a serious health threat in Rhode Island communities with high concentrations of older homes containing lead paint. It is an environmental injustice affecting low-income and minority children at much higher rates than white, suburban children, as reflected in the most recently produced RI Department of Health maps showing the disproportionate distribution of lead poisoning cases in RI (worst in Providence) and even within the city (worst in the lowest-income neighborhoods where the majority of people of color live – who also represent a majority overall). After ingesting lead from paint dust, contaminated soil, or drinking water, children can experience a range of negative effects, many of which are irreversible and impede success in school, decrease earning potential and increase the likelihood of committing violent crime as a young adult. Put most simply, lead poisoning causes brain damage, with increasing severity due to length and degree of exposure. Research reveals a strong relationship between even slightly elevated blood lead levels in young children and lower standardized test scores (National Center for Healthy Housing).

What environmental health results do we seek to achieve and how will the underserved community benefit: The most important environmental health result we seek to achieve is a reduction in the rate of childhood lead poisoning in Providence, RI. This will directly benefit the underserved community members whose children are likely to be poisoned in the future if effort is not made now to address widely prevalent lead hazards in soil, through tenant education, homeowner financial assistance, and landlord lead safety law enforcement that our partners are capable of doing and have agreed to coordinate through this project. Residents at the greatest risk will both participate in steering the direction of the project and benefit in multiple ways from its outcomes.

c) Organization's Historical Connection to the Underserved Community

Brief history and description.

The Childhood Lead Action Project (Project) is a nonprofit organization founded in 1992 to eliminate childhood lead poisoning in Rhode Island through education, parent support and advocacy. Founded in the capital city of Providence (the underserved community engaged in this proposal) by parents of lead poisoned children, medical professionals, social justice activists, and other community members, we remain the only organization in the state devoted primarily to this critical children's environmental health issue. Of all the communities in which we work, our staff and volunteer base has the deepest roots in Providence personally and professionally. The staff and board members whose families served as the most visible “poster children” of lead in the 1990s and 2000s raised their children here and are still involved. Our Providence network includes family, friends, colleagues, and long-term partner community-based organizations throughout the entire city. Our office is located in one of the neighborhoods most disproportionately affected by lead over the years; although these streets have gentrified around us in recent years, it remains highly accessible and on/within a few blocks of most of the major bus routes used widely by the low-income populations most directly affected by lead in Providence (one which continues on to the majority Spanish-speaking neighborhood, the other one of which connects to the majority Black areas). Although more awareness-raising must be done with every new generation of families and especially for newcomers such as refugees and immigrants, we are widely known as a community resource and word-of-mouth referrals are our strongest marketing tool.

The Project currently coordinates 4 municipal-level community lead poisoning prevention coalitions, including the one in Providence which will play a major role in this project. These are broad-based coalitions of environmental, housing, health, and social service organizations, and parents of lead poisoned children working together to promote lead prevention. We also conduct innovative, effective, and unique lead poisoning prevention training and education in English and Spanish, as well as other languages such as Arabic, Swahili, and Somali (with the assistance of interpreters). These trainings include a 3-hr state-certified Lead Hazard Awareness Seminar for landlords (with excerpts turned into a DVD with prior EPA funding); the 8hr EPA-mandated Lead Paint Renovation, Repair, and Painting (RRP) training; a 3-hr lead enforcement training for city housing code officials (developed with prior EPA funding), a 5-session, 10-hour lead poisoning prevention resource training for community health workers; a 1.5-hour lead safety resource training for direct service providers; short “Lead 101” Q&A sessions for parents; tupperware-style “Lead-Safe House Parties” tailored for the needs of tight-knit, hard-to-reach groups such as refugees; a special English Language Learner lead safety curriculum presented to intermediate and advanced speakers in ESL classes; and a special low/no-literacy lead safety curriculum using pictorial handouts and the demonstration of hazards and prevention methods. In many cases, an individual with personal experience with lead poisoning conducts the training or participates in its facilitation.

Community work and results.

Our work has been a catalyst for a significant decrease in childhood lead poisoning in Rhode Island over the last two decades. The Project's accomplishments have earned us local and national awards. The Ocean State often turns to us to provide leadership on important initiatives such as the Attorney General’s Advisory Commission on Lead Paint and the State’s strategic plan on eliminating childhood lead poisoning. Some of our achievements are:

- Passage of the 1991 Lead Poisoning Prevention Act (those involved went on to found the organization), establishing the state DOH lead poisoning prevention program including a universal lead screening requirement resulting in an 80% lead testing rate (among the highest in the country) for young children
- Educating over 30,000 parents, immigrants and refugees, tenants, health workers, homeowners, and professionals in high-risk communities about lead dangers and resources.
- Coordinating lead hazard awareness campaigns in Providence, Pawtucket, Central Falls, East Providence, and Woonsocket.
- Since 2004, providing technical training to over 12,700 people on lead prevention and mitigation, and lead-safe work practices through in-person classes, our online RI Lead Hazard Awareness Seminar and a DVD used as an English and Spanish language training tool in lead safety classes, and the EPA Renovation, Repair, and Painting (RRP) class, of which we were one of the first Rhode Island-based organizations to become EPA-certified to offer. We are the only Spanish-language RRP trainer in RI.
- Convincing the Providence Department of Inspection and Standards to enforce RI’s Lead Hazard Mitigation Act - the first municipality in the State to do so - and require compliance with the Renovation, Repair and Painting Rule for contractors applying for a permit to work on pre-1978 homes. The RI Department of Health issued a press release announcing that this was the most likely reason for a subsequent 25% drop in the childhood lead poisoning rate in Providence, a previously unprecedented rate of progress (following the first full year of enforcement procedures fully implemented). Since then, we have assisted the neighboring cities of Pawtucket and Central Falls with similar policy implementation and community engagement and seen progress that mirrors this.
- With a currently in progress EPA EJ CPS grant, created a new model for collaborative lead safety compliance: first, identified a target list of 100 high-risk unsafe rental properties using qualitative and quantitative data from members of community leadership team including residents, City code enforcement staff, state health officials, and staff knowledge; and collaboratively created and implemented an innovative work plan to educate both landlords and tenants about hazards/requirements, offer financial assistance for lead abatement to landlords, and take enforcement action if necessary (all carried out by partners with appropriate resources and authority).

Community-driven participation.
The Project coordinates community-based education campaigns for urban communities seriously affected by lead poisoning while mobilizing residents to work for environmental justice through a community organizing model for change. Our staff, board, and volunteers represent the community in multiple ways, and affected community members hold meaningful leadership roles at all levels of the organization, alongside others with a relatively greater experience of privilege (such as white privilege and education privilege). This includes the following forms of community representation: parents of lead poisoned children, people of color, immigrants, fluent/native speakers of Spanish, renters, low-income people. We work intentionally to stay rooted in the community as a class-diverse, multi-racial organization where the voices and experiences of those most directly affected by lead are prioritized, with the close support, expertise, and resources of other partners such as medical professionals, legal experts, academia/policy analysts, housing funders/lead abatement programs, city government, and state government. In many cases, people wear multiple hats and are strongly motivated to work together for both personal and professional reasons (for example: lead experts who went into their fields after their own child was poisoned, city officials with significant lived experience as part of an EJ community). In the EPA EJ CPS this proposal builds on, a group of residents (some longterm volunteers, others new) met regularly with city officials to assess progress towards shared goals and commitments and also met separately to speak freely and make decisions about the direction our work should go in and what needs and requests should be brought to other partners for support. This model is essential for our work to address lead from an environmental justice perspective and is built into this project. The new activities added to this project proposal are based on feedback and decisions made by residents about what work is needed and valuable (such as: identifying second target list of noncompliant properties to work in partnership with service/funding/enforcement agencies to bring into compliance with lead safety laws; expand Spanish-language RRP training; expand CHW lead safety/advocacy training). Decisions about what neighborhoods to target outreach in, what needs/concerns to bring to officials, and similar things are all made by community members.

d) EJCPS Model

EJCPS model elements already begun/accomplished with our group as a CBO and government, academic, service provider, and other partners:

1) Issue Identification

- Organization founded in 1992 by community members and partners including medical, environmental, social service to eliminate childhood lead poisoning through parent support, education, and advocacy;
- Community coalition decision to focus on noncompliant landlords/tenant rights, coordination of free lead abatement and housing code enforcement resources as EJ priority.

2) Community Capacity-Building

- Ongoing activities of organization to recruit, train, and support directly affected community leaders, raise community awareness through many grassroots networks.

3) Consensus-Building and Dispute Resolution

- Advocated successfully for increased resources and policy change, including state law requiring lead safety in rental housing (2004) and city enforcement of the law in Providence (2011), overcoming lack of consensus through effective messaging and partner recruitment.

4) Multi-Stakeholder Partnerships and Leveraging of Resources

- 2018 establishment of new multi-stakeholder city lead poisoning prevention coordination committee including project partners and community members using CPS model (promoted and discussed by city at first meeting) and responding to community needs/group/progress described above.

5) Constructive Engagement by Relevant Stakeholders

- Current stakeholders at table regularly include enforcement officials, data analysts, community members, health officials, housing rehab program, environmental policy office;
- Focus chosen collaboratively during meetings to track overall lead safety data to assess community progress;

- Group agreed to report and assess specific contributions/outputs of group members including homes certified as lead-safe due to free lead abatement program (City), children poisoned (DOH), homes certified lead-safe due to housing code enforcement;
- Group identified long-term noncompliant landlords as the next major problem they want to tackle; steps identified in this project proposal directly reflect the plans agreed to by CPS group, with strongest voice at the table catalyzing plans from the parent of a lead poisoned child/representative of our community leadership team;
- Group agreed to cross-promote resources and share data to leverage resources such as free lead abatement program for homeowners and housing code enforcement of lead requirements (carrot and stick approach), with DOH contributing evaluation (ensuring sound assessment of impact).

6) Sound Management and Implementation

- Partner RIDOH created comprehensive list of Providence rental properties not in compliance with RI lead laws, using tax assessor data provided by the City of Providence, and lead certificate data. (Part of current EJ CPS grant)
- Identified a target list of 100 properties using qualitative and quantitative data from members of community leadership team, City code enforcement staff, and staff knowledge. (EJ CPS-funded activity)
- Created workflow plan and timeline in collaboration with City code enforcement, home abatement program, RIDOH, and other stakeholders to begin proactive enforcement of RI lead law requirements for pre-1978 rental housing, starting with 100 target properties, with plan to expand to more properties. Began implementation of work plan in 2022-23. (EJ CPS-funded activity)
- To be undertaken for this project (most directly significant activities, milestone and timeline (see entire activities section for details)
    - 10 stakeholder meetings by end of project
    - Creation of noncompliant landlord target list w/ 100+ more properties using community knowledge, data-sharing, and technical expertise (by mo. 12; new list for this grant, follow up to/next step from 100 property list in previous CPS grant)
    - Updates to timeline for existing group work flow chart utilizing partner and community resources to connect w/ noncompliant priority properties to educate about lead hazards, landlord responsibilities, free lead abatement resource; with enforcement consequences to address worst cases (by mo. 9)
    - Implementation of landlord targeting work plan (mos. 12-36)
    - Community leaders supported and engaged (5 new by month 12, 10 by month 24)

7) Evaluation, Lessons Learned, Replication of Best Practices

- CPS group/partners have participated in evaluation of progress and outcomes at all stages and will continue to do so on quarterly basis

e) Project Linkages

The project supports EPA Strategic Plan Goal 2, Objective 2.1 (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels) by increasing the capacity of members of overburdened and underserved communities to lead environmental justice work by engaging them in environmental learning and planning meetings with city and state officials, and by conducting community-driven public education, training, and info-gathering related to lead hazards resulting in improved environmental understanding, awareness, and measurable outcomes on a community level.

f) Partner and Collaborate

Our 4 project partners represent a diverse and powerful set of stakeholders who have already come to the table using the CPS model with us as a community-based organization to build trust, establish shared goals, and take action together to address lead poisoning on many initiatives in the past. All 4 have provided detailed commitment letters, attached. As a CBO ourselves, with deep community roots and strong partnerships with many other CBOs throughout the city, we mobilize community residents to engage directly with these stakeholders and others. We currently meet quarterly and the activities of this project come directly from community member ideas and CPS meeting decisions. These stakeholder types include city government

(including: enforcement officials, lead abatement funding/rehab program), a state agency (public health enforcement, monitoring, policy, and community health worker/home visitor training program), academic institution, and direct (legal) service agency.

City of Providence. Providence city government is our most significant partner on this project and has made commitments on behalf of 2 critical agencies to participate actively (1 LOC from Mayor). These agencies are:

- Providence Department of Inspection and Standards (DIS). DIS promotes general health, safety, and welfare of the citizens of Providence through enforcement of adopted City, State, and Federal codes relating to buildings and properties. Enforcement of lead safety requirements for rental properties and work on pre-1978 homes and child-occupied facilities is an important component of this work.
- Providence Division of Housing & Community Development (HCD) supports the creation of quality places through the strategic deployment of Federal funding provided by the U.S. Department of Housing and Urban Development. In partnership with local community organizations and agencies, they seek to improve the lives and living conditions of the City's low- and moderate income residents. HCD's Lead Safe Providence Program provides fully forgivable loans to help make properties lead-safe at no out-of-pocket expense to homeowners or tenants. Loans for owner-occupied homes are forgivable after 5 years; loans for non-owner-occupied properties are forgivable after 10 years.

We have worked closely with DIS and HCD on multiple projects going back to the 90s, including a current, long-term funded partnership with HCD (they fund our work to conduct community outreach about lead hazards, RRP training, and recruit property owners to enroll in the lead hazard reduction program in Providence). HCD and DIS participate in quarterly lead poisoning prevention coordination meetings with us, bringing together community, nonprofit, and city/state government partners (including DIS and HCD) to share updates, coordinate activities, and tackle problems collaboratively.

DIS and HCD will be engaged in every activity in our workplan. Their responsibilities will include:

- CPS stakeholder group participation, and regular data sharing.
- Coordination of offer of abatement resources and enforcement with other CPS partners to respond to community needs.
- Data to help identify landlords noncompliant w/ lead laws putting community at risk to address 15-year unmet high priority need/systems gap putting residents at risk, and to help to create 100 noncompliant property list used for project.
- Assistance with compliance plan creation, including commitments to certain steps in workflow plan, and help with evaluation.
- Referral of new community members to join community leadership meetings.
- Contribution of materials for updated door-to-door lead safety resource packet.
- Promotion of RRP training at City housing and building code office, where contractors seeking permits will be required by the city to show compliance with RRP.

Both HCD and DIS have a vested interest in a reduction in lead hazards and increase in safe housing due to: mission of both agencies to improve housing quality/environmental outcomes; high special education costs exacerbated by the effects of lead poisoning; political priorities as expressed by mayor; legal obligation to enforce housing and building code; and lead abatement program deliverables to report to federal funders (complementary activities, not duplicative of this effort).

Rhode Island Department of Health (DOH - 2 LOCs, each for a different office/program). The RI Department of Health will be an essential partner in this initiative. This includes 2 programs:

- The RIDOH Environmental Lead Program serves as the hub for all lead poisoning surveillance, intervention, and prevention activity in Rhode Island, DOH will play a critically important role in the project. For the proposed initiative, DOH will provide data on childhood lead poisoning, lead safety risks, and lead law compliance in Providence, RI, during the planning, implementation, and evaluation stages. Additionally, they will make lead prevention materials and technical assistance available to partners and

community members for education and outreach purposes. Lastly, they will participate directly in other meetings and trainings to meet community needs.

- The Office of Family Visiting oversees and coordinates professional development for all major family home visiting programs in the state, including: First Connections; Healthy Families America; Nurse-Family Partnership; and Parents as Teachers. Family Visitors are community health workers who provide in-home support and services to support early growth and development for children under age 6/prenatal. This work is carried out by a vast network of staff funded by RIDOH and placed at numerous social service and community-based organizations. DOH is responsible for ensuring that home visitors receive in-depth, high-quality training on a variety of topics related to child development and family resources. This includes contracting with qualified trainers, assessing training quality, working with CBOs to enroll their home visiting staff in trainings, providing training turnout/attendance monitoring, and assisting with pre and post testing to assess how well learning goals were achieved. This office has arranged for the Childhood Lead Action Project to provide a "train the trainer" intensive multi-week 10hr lead safety training for CHWs conducting family home visiting for 3 years in a row. The training has been highly successful and we hit our maximum enrollment and learning goals every time.

Our strong partnership with DOH goes back decades, including close partnership on our current EJ CPS project and other EPA grants and the delivery of training to a variety of audiences statewide. DOH is an active participant and a current funder of our efforts to convene city enforcement/abatement/education coordination meetings in multiple EJ communities in RI.

DOH brings resources including housing and poisoning data, technical expertise, lead educational materials, and will be engaged in multiple project activities. Responsibilities will include:

- Participation in CPS stakeholder group
- Providing data on local poisoning to help target efforts where they are most needed and uncover details of environmental injustice
- Providing accurate, free, multilingual educational materials to use for educational outreach.
- Providing technical assistance to help develop accurate 100 target property list and collaborative work plan bringing together educational, financial, and enforcement resources of those sitting at the table to get high-risk homes fixed up and families protected from lead.
- Recruitment, enrollment, administration, follow-up for training series described above.

DOH has a vested interest in reduction in lead hazards, improved partnerships, and improved environmental health outcomes due to: mission of agency; state cost of providing emergency intervention services for families with lead poisoned children; commitments made in federal grants to work collaboratively with local partners to improve lead law compliance (complementary activities, not duplicative of this effort). The Office of Home Visiting has approached us to repeatedly request the training described above in the past, showing strong internal motivation/interest in the success of this activity. It helps them meet required learning goals for a complex state and federally funded program and demonstrates support for a strong department-wide focus on health equity and social and environmental determinants of health.

RI College School of Nursing (RIC). Based in Providence, RIC is consistently recognized for providing high quality undergraduate and graduate nursing education in RI. RIC nursing faculty and students are already regular participants in both our community leadership development meetings and City coordination meetings, providing technical expertise on health and health policy to support the effort and volunteer time for community outreach. This strong partnership with RIC goes back over 20 years. Multiple faculty members, including several with a strong personal as well as professional connection to our issue and community, have served on community-based project steering committees and the organization's Board of Directors, providing medical expertise and support in many forms. Undergraduate and graduate students have chosen clinical placements with the Childhood Lead Action Project and assisted with community outreach, health policy research, and advocacy.

RIC will participate in various project activities. Their responsibilities will include:

- Participation in CPS stakeholder group.
- Participation in community leadership group, providing training to community members.
- Provide technical assistance to staff, community members, and other project partners related to the health effects of lead exposure, interpreting health data, and similar topics.
- Recruitment of new community members for community leadership group.
- Assistance w/ community outreach and education initiatives.

Other contributions will include:

- Recruit one or more nursing students to intern at the Childhood Lead Action Project for clinical hours, to support policy and outreach activities related to this project
- Host project staff as guest speakers at health policy seminar or similar venue to report out on project activities, successes, and lessons learned.

RIC has a vested interest in this project because their mission is to improve the health of the RI community, and partnering with CBOs like the Project increases the way they are able to achieve that mission. They also need high quality clinical placement sites for students that increase the diversity of opportunities for students, which we provide.

The Rhode Island Center for Justice (CFJ). CFJ is a non-profit public interest law center that partners with community groups to strengthen existing advocacy and service provision with legal representation and strategy. Their legal practice areas—including housing, immigration, workers' rights, criminal justice, education, and utility shutoffs—reflect the most pressing needs of low-income people in our state. They provide free legal advice and representation to families in the context of community organizing and policy advocacy efforts, combining individual action with systems-level change. CFJ is already a regular participant in our community leadership development meetings and meetings with City officials and will play an essential role in providing legal assistance to families in need and training and technical assistance for community members. We have partnered with CFJ as an organization since they were founded, and with their current Executive Director for even longer (since early 00s), in multiple previous roles related to public health and social justice.

CFJ brings resources including legal expertise, availability of free legal services, policy/systems analysis experience, and direct connections to residents directly affected by unsafe indoor environment. They will participate in various project activities, and their responsibilities will include:

- Participation in community leadership meetings, and help to provide legal training to resident leaders/leaders in development.
- Participation in CPS stakeholder group meetings.
- Provide technical expertise to strengthen work plan and data analysis component of target property compliance project.
- Recruiting former clients with lead-related experiences to participate in community leadership activities and trainings, so that families who have been directly affected by lead play a meaningful role in addressing the problem on a larger scale.

Other contributions include:

- Providing other technical assistance to community members, nonprofit partners, and government agency officials.
- Providing legal consultation to community members concerned about lead hazards and other housing conditions issues, identified during community education and outreach.

CFJ has a vested interest in a reduction in lead hazards and community empowerment/better health outcomes due to: social justice mission of organization; opportunity cost of providing legal services to tenants with lead/housing conditions issues (resources could be directed elsewhere to address unmet needs). Additionally, CFJ is working on a long-term project to develop a policy proposal for a rental registry ordinance with broad interest among a larger group of stakeholders. Our EJCPS project activity focused on identifying rental property owners using tax assessor data will inform their work, primarily by providing them with a data

set they need to show the proposed scope and geographic impact of their proposed policy. CFJ has a strong interest in helping us to make sure this is done in a timely and accurate manner.

This partnership strategy for community empowerment and environmental change combining community leadership, financial assistance for homeowners, legal assistance for tenants, effective community education, and housing code enforcement is our top priority project to sustain as an organization in the long term. EJ CPS funding to take our current project to the next level is essential. The CPS stakeholder group that will drive this project has nearly 5 years behind us already, 2 of which were supported by a current EJ CPS grant, and with a recently renewed commitment from a newly elected mayor who assigned his Chief Operating Officer as our point person for all issues related to the CPS group to ensure ongoing responsiveness from all departments involved. With 3 more years of accomplishments and trust-building supported by this grant, we will be very optimistic about the longterm viability of this group and the relationships that make it up. The city will need very little money to sustain the group itself as long as the key partners continue to exist, but will reap significant outcomes from the power of coordinated, strategic deployment of resources – education, information, funding/housing rehab program, and enforcement. As an organization, we are also strongly committed to continuing to participate and ensure community participation.

2.0 Project Activities/ Milestone Schedule/ Detailed Budget Narrative

a) Project Activities

Activity #1 Meet quarterly with CPS stakeholder group including community members, housing code enforcement officials, to coordinate lead poisoning prevention activities and continue implementation of plan to bring 100 more long-term noncompliant rental properties into compliance with RI lead laws.

Supported by our current EPA EJ CPS Grant, we have worked with the City of Providence over the past few years to launch a series of quarterly meetings of key lead-related stakeholders on a local level. This group meets every 3 months and will form the the heart of this CPS project going forward. Current partners include: City of Providence Housing Code (project partner), City of Providence Housing and Community Development – lead abatement program (project partner), RI Department of Health Lead Program (project partner), the RI Center for Justice (project partner), the Rhode Island College School of Nursing (project partner) and other nonprofits, city agencies, and service providers. Our role is to bring community participation, needs, and knowledge to the table. Since starting out a few years ago, group members have agreed to the following practices and goals: meet quarterly; report out in detail on (enforcement, homes w/ lead hazards fixed, poisoning cases/data); coordinate activities. Group members agreed to large-scale benchmarks to measure our success overall: rate of lead poisoning in Providence (with attention to neighborhood/racial/income disparities), and # of housing units certified as lead-safe.

The group has recently identified a new systems-level challenge as a priority to tackle in the coming year: the majority of pre-1978 rental properties that have never come into compliance with the state lead safety certificate requirement, that consistently fly under the radar. RIDOH (project partner) identified these properties through a review of city tax assessor records, which show both property and owner addresses, and statewide data showing which properties have obtained lead certificates. We then identified a list of 100 target properties from this list with which to start a pilot proactive enforcement project. The next step is to identify a second target list of 100 noncompliant properties, evaluate steps taken in pilot project, tweak those steps and engage in a second round of proactive support and enforcement of lead certificate compliance. Both city and state partners (PVD, DOH) have agreed to assist with this analysis and report back during group meetings, and the community members engaged in the committee are eager to contribute community knowledge about patterns of landlord noncompliance and retaliation. Collaboration from academic and service provider partners (RIC, CFJ) will help provide support and retaliation protection for tenants living in those noncompliant properties. We expect this project to result in a greater supply of lead-safe housing in Providence by bringing units into compliance with RI lead laws through technical support, financial assistance, and housing code enforcement efforts. Based on success of pilot version of this project so far, we anticipate at least 25 units brought into compliance, as shown by lead safety certificates issued to properties on target list after intervention. Working

on this together will not only address a problem that has challenged the city for over 15 years, but will create a template for action that can be repeated in the future throughout the state and beyond.

Activity will be carried out by Project Coordinator Elizabeth Soriano, assisted by Project Manager Laura Brion, and Project staff Sojaili Gomez.

Tasks will include:

1. CPS group will meet quarterly (at least 10 times during project period) to share updates and information and work collaboratively.
2. CPS group will develop target list of at least 100 long-term noncompliant rental properties.
3. CPS group will create plan to bring properties into compliance through tenant/landlord education, offer of financial assistance through city lead abatement program, and enforcement to be carried out by. This will be shown by an updated timeline/work flow chart identifying activities, responsible partners, and timeline (much of which has already been committed to in meetings/letters of commitment for this grant).
4. CPS group will carry out and evaluate plan, with a target of bringing 25 housing units into compliance w/ lead laws, as shown by state-issued lead safety certificates.

Activity #2 Strengthen community leadership on lead poisoning prevention and participation in decision-making and community education.

In addition to participating in the coordination meetings with the city, we facilitate an ongoing committee of residents and allies to provide guidance to our organizational activities overall and ensure we always have a venue where honest reflection on community participation in environmental decision-making and activities can happen. Currently, we have around 10 members who have recently participated in full group meetings every 2-3 months and/or other recent education/outreach activities, 3 of whom participate in the CPS meetings and share updates with the larger group. Expanding this group as a place for environmental learning, EJ outcome/output reflection, and leadership development is an essential next step for this project.

Activity will be carried out by Project Coordinator Elizabeth Soriano, assisted by Project staff Sojaili Gomez.

During this project period, we will carry out the following tasks:

1. Hold quarterly community leadership training/support meetings (10 during project period)
2. Engage 20 community members in these meetings, including at least 10 experienced/currently engaged community leaders and 10 new community members. New members will be recruited through additional education/outreach activities described, and current member/staff/board networking, partner agency referrals.
3. Provide training activities and Q&A sessions during meetings on the following key topics and others identified by the group, with assistance from project partners including RI Center for Justice, RI College School of Nursing, and RI Department of Health: lead hazard identification, understanding lead/housing/environmental data, understanding lead poisoning prevention law/policy, environmental education and outreach methods.
4. Ensure that 10 community members participate as leaders during CPS meetings in activity described above or as community educators/speakers during door-to-door outreach or community health worker workshops (described in following activity).

Activity #3 Raise awareness among parents, tenants, homeowners, and other community members at risk for lead poisoning by carrying out linguistically and culturally appropriate door-to-door outreach and education.

For door to door outreach targeting 100 properties identified by CPS group and community members, we will update a multilingual resident education packet of existing materials available from DOH and knock on doors in multilingual teams of 2 to distribute materials and engage residents in conversations about lead hazards, prevention resources, and free legal services to protect tenants (retaliation is a key concern of current

committee members). Interested community members will be given the opportunity to volunteer in both educational tactics and receive training on community outreach methods.

We will also conduct 2 annual "train the trainer" series of lead safety workshops (10 hrs/5 sessions/series, for a total of 10 sessions) with a target of educating 16 community health workers conducting family home visits for low-income parents of children <6 yrs in Providence. RIDOH (project partner) will recruit and enroll participants from their network of supported CBOs employing community members as CHWs doing family home visiting. RIDOH is responsible for directing professional development for this set of CBO staff, and have requested this training from us multiple times in recent years on a statewide level. RIDOH will provide ongoing logistical support before, during, and after the workshops, including helping with turnout, assisting with pre- and post-tests, followup with participants.

We developed our innovative and interactive CHW/FHV curriculum for use with groups of refugees, and have expanded it for CHWs doing home visiting in other local communities. Topics will include how to ID lead hazards in paint, soil, water, and dust, prevention skills and resources for tenants, parents and homeowners, short-term methods such as lead-safe cleaning and interim controls, lead-safe work practices, and opportunities to get involved in our community effort to address lead. Our curriculum has been approved by RIDOH for credit hours towards RIDOH's CHW certification program and uses pre/post tests to measure knowledge gained. Participants will learn to access environmental data and use tools and resources to increase their own lead safety and that of their communities, and will benefit from our collaborative community teaching model that provides opportunities for participants to share resources and lived experience with each other. Participants will be able to use lessons learned to help their own families and spread lead safety information and resources to their larger community networks, including the families they serve.

Trainings will function as a pipeline to our community leadership group: participants will learn about history of organizing and advocacy around lead poisoning prevention in RI, and have the opportunity to create and participate in future community leadership activities, and recruit their clients to do the same. Similar trainings have been our most successful recruitment strategy in recent years, and targeting a training to community health workers in Providence has been suggested by our community members as the next step for local community engagement.

Activity will be carried out by Project Coordinator Elizabeth Soriano, assisted by Project Manager Laura Brion, and Project staff Sojaili Gomez.

Tasks for community education will include:

1. Update door to door multilingual lead safety resource packet using existing materials on landlord & tenant rights, responsibilities and resources, with input from community leadership group.
2. Staff/volunteers in multilingual groups of 2 conduct door-to-door community education about lead hazard, prevention resources, and legal protection against retaliation targeting tenants in 100 noncompliant rental property list
3. Update CHW curriculum w/ info about any new or changed community resources.
4. Recruit and enroll 16 community health workers for training series (project partner RIDOH will do).
5. Schedule and carry out 2 series of trainings (5 sessions/10 hr total each yr, for total of 10 sessions/20 hours), including administering pre- and post-tests to all participants to measure knowledge gained.

Activity #4 Lead-Safe Work Practices Training and Worker Safety

To go hand in hand with education for community health workers and parents and tenants engaged in our steering committee, CLAP will also engage those directly responsible for maintaining lead-safe homes and early childhood education facilities. Using our highly experienced bilingual trainers, the Childhood Lead Action Project will conduct 6 Spanish-language EPA Lead Paint Renovation, Repair, and Painting Rule (RRP) classes for 40 workers, with a continued specific focus on reaching the Latino contractor community, a population that has been underserved in lead safety training. We will recruit trainees through project partners, minority-serving organizations, media outlets/social media, and flyer distribution in venues which construction and home remodeling specialists frequent. After a dip during the COVID-19 pandemic shutdown, demand for this class

has rebounded and we now hit our maximum capacity for monthly classes, showing the viability and need for funding to provide more. We are the only licensed RRP training provider for Spanish language classes in the state, and scaling up our free class offerings is urgently needed from an environmental justice perspective.

Activity will be carried out by Project Coordinator Elizabeth Soriano, assisted by Project staff Sojaili Gomez.

Tasks include:

1. Update existing flyer to market RRP trainings
2. Conduct outreach to local businesses, professional associations, and other community venues serving DIY homeowners and contractors and secure agreements from 10 to display flyer. Project partner the City of Providence has agreed to promote the free training at its housing and building code office, where contractors seeking permits will be required by the city to show compliance with RRP.
3. Schedule and prep materials for 6 trainings.
4. Carry out and conduct followup tasks for 6 trainings, including issuing certificates of completion to 40 participants who successfully complete training activities and pass test.

b) Milestone schedule

Task	Start date	End date	Milestones
Activity #1: Meet quarterly with CPS stakeholder group including community members, housing code enforcement officials, RIC, DOH to coordinate lead poisoning prevention activities and continue implementation of plan to bring 100 more long-term noncompliant rental properties into compliance with RI lead laws.			
Task #1: CPS group meet approx. quarterly	Month 1	Month 34	10 meetings (4 by month 12, 7 by month 24, 10 by month 34)
Task #2: CPS group develop new 100 target property list	Month 3	Month 12	100 target property list (created by month 12)
Task #3: CPS group update plan to bring properties into compliance through education, offer of financial assistance, enforcement	Month 3	Month 9	Updated timeline/work flow plan (done by month 9)
Task #4: CPS group carry out and evaluate plan	Month 10	Month 36	25 housing units issued lead safety certificates (15 units by month 24; 10 units by month 36)
Activity #2: Strengthen community leadership on lead poisoning prevention and participation in decision-making and community education.			
Task #1: Hold quarterly community leadership training/support meetings	Month 1	Month 34	10 meetings held (4 by month 12, 7 by month 24, 10 by month 34)
Task #2: Engage community members in meetings, incl. already engaged and new members	Month 1	Month 36	20 members engaged (5 new, 10 returning by month 12; 5 more new by month 24)
Task #4: Community members participate as leaders during CPS meetings and/or other	Month 3	Month 34	10 members participate (5 by month 18; 5 by month 36)

outreach/education activities			
Activity #3 Raise awareness among parents, tenants, homeowners, and other community members at risk for lead poisoning by carrying out linguistically and culturally appropriate door-to-door outreach and education.			
Task #1: Update door to door multilingual lead safety resource packet	Month 3	Month 6	Updated resource packet
Task #2: Staff/volunteers in conduct door-to-door targeting tenants in 100 noncompliant rental property list	Month 6	Month 36	100 properties visited (50 by month 18; 50 by month 36)
Task #3: Update CHW training curriculum	Month 6	Month 9	Updated curriculum
Task #4: Recruit and enroll training participants (DOH)	Month 3	Month 24	16 participants enrolled (8 by month 12; 8 by month 24)
Task #5: Schedule and carry out 2 series of trainings (each 5 sessions/10 hours)	Month 12	Month 27	2 training series (each 5 sessions/10 hours) (Series #1 by month 15; Series #2 by month 27)
#4 Lead-Safe Work Practices Training and Worker Safety.			
Tasks #1 & 2: Raise awareness of EPA Lead Paint Renovation, Repair, and Painting (RRP) trainings among local contractors and DIY homeowners in EJ areas	Month 3	Month 24	Update existing flyer, outreach to 10 businesses/venues who agree to display flyer (flyer by month 6; 5 businesses/ venues by month 12; 5 by month 24)
Tasks #3 and 4: Prepare for, conduct, and followup from RRP classes, and issue certificates of completion to participants	Month 6	Month 36	6 classes held, 40 certificates issued to participants (2 classes and 15 certificates by month 12; 2 classes and 15 certificates by month 24; 2 classes and 10 certificates by month 36)

c) Itemized Budget Sheet/Budget Narrative

As detailed in the attached budget detail and shown in the required budget form, this initiative's total cost is $500,000. Please note that all expenses are clearly itemized on individual lines, with precise unit costs, units needed, reason for need/connection to work plan activities, timeline and all other context needed to show exactly how total cost was calculated and reasonableness. Notes about what activities the expenses are needed to support show why they are needed as well as that we have planned to include all expenses necessary to accomplish our goals. These numbers are provided in sufficient detail in the attachment to show they are reasonable and allowable by EPA. The total project expenses include **personnel (total $321,516.00)** to oversee and carry out project activities including FT Community Educator #1 w/ 10 yrs experience ($134,752.80 for 3yr period), FT Community Educator #2 w/ over 20 yrs experience (149,385.60 for 3yr period), 23% of FT Executive Director's time/salary w/ 15 yrs experience (37,377.60 for 3yr period) - most significant investment needed), **fringe benefits (total $112,530.60)** for staff at 35% of salaries, **travel (total**

$1,855.38) necessary for committee coordination, training delivery, other meetings (mileage reimbursement at federal rate - 1,634.88), and public transport for 3 staff to multiple required EPA meetings ($220.50); **supplies (total $5,513.43)** needed for RRP trainings (40 manuals $615.60, 96 lead check swabs $570.45, 2 rolls caution tape $18.42, 1 box/100 disposable booties $17.25, 1 box/100 disposable gloves $28.50, 42 N100 masks $618.24, 2 rolls 20*50 6 mil poly plastic sheeting $74.88, 3 rolls tape $26.91, 48 swiffer pads $15.98, 50 tyvek suits $399.98, 40 manila envelopes to mail RRP certificates 12.02) and office/meeting activities (36 pens $25.56, 36 note pads $31.59, 3 cartons printer paper $248.94, 3 packs lined post-it notes $46.14) 2 laptop computers for 2 FT staff working 100% on project who will need new computers during project period for community meetings/trainings and communication $1,660.00 (800/ea), projector for showing educational slides and video for RRP and community trainings/meetings ($899.99), 2 big easel pads for meeting agendas/notes/group brainstorming activities (99.98), portable projector for meetings/trainings (103.00); **other expenses (total $13,130.04)** including an RRP trainer to conduct six classes (3,000.00), language interpreting/translation for meetings/outreach (2,400.00), printing/copying for outreach/meeting materials (1,440.00), printing for door to door outreach informational door hanger (1,500.00), child care for meetings so parents can take part (2,400.00), google voice phone/text service for FT staff to communicate with project participants and other community members effectively (1,800.00), postage for mailing RRP certificates (50.40), and zoom license for meeting accessibility (539.64); and **indirect costs ($45,454.55)** calculated at 10% of total project direct costs. This project requires a 0.23 FTE executive director who will participate, and two 100% FTE Community Educators (each 35 hrs/wk). Note: ED is FT at organization (just 23% time on this project; involved directly in some project activities in addition to project oversight, planning, and reporting) and remainder of salary is already partially raised for next fiscal year. We do not require EPA funds for other reusable supplies the organization already has and will use for this project, such as a computer for our Project Manager, reusable RRP training supplies such as a swiffer, and bags and clipboards for outreach. Indirect expenses will cover a portion of normal overhead costs such as rent, utilities, insurance policies, and accounting. No equipment costs are needed in the budget.

3.0 Environmental Results - Outputs, Outcomes, and Performance Measures

a) Environmental Results - Outputs/Outcomes

See attached logic model for more context to show that we have the resources necessary to produce these outputs and that they will lead to these measurable environmental outcomes.

Anticipated Outcomes:

1. A decrease in the incidence of lead poisoning among children under 6 in Providence;
2. Multi-stakeholder partnerships among community members and local entities with resources and power to improve environmental conditions strengthened;
3. Increased capacity among Providence parents, tenants and homeowners to decrease lead hazards at home through use of lead-safe cleaning methods and interim controls and by accessing existing lead abatement assistance programs;
4. Improved compliance with state EPA lead-safe work practices training requirements by contractors and others undertaking home or child care facility renovations;
5. A greater supply of lead-safe housing for Providence residents.

Anticipated Outputs:

We expect to generate and track the following broad categories of outputs and targets:

1. CPS stakeholder group coordinates education, assistance, and enforcement activities and identifies list of 100 rental properties noncompliant to target together to bring into compliance with lead safety requirements (Targets: 10 meetings held, 1 list of properties generated, 1 work flow chart updated).
2. Community residents develop environmental knowledge and skills (Targets: 10 training/support meetings held, 20 community members participate incl. 10 new members, 10 community members participate as leaders in additional CPS stakeholder meetings and/or community outreach/education).

3. Families and tenants at high risk for exposure to lead hazards, and community members who serve them educated about lead prevention resources and tenants rights through door-to-door outreach, and community health worker workshops (Targets: 1 resource packet updated, 100 homes visited, 50 conversations held, 150 info packets distributed, 16 community health workers educated/pre-post tests show knowledge gained, 2 workshop series (5 sessions each) held).
4. Latino renovation and repair specialists receive training on the EPA Lead Paint Renovation, Repair and Painting Rule and lead-safe work practices (Targets: 1 updated promotional flyer, 10 businesses/venues display flyer, 6 RRP classes held, 40 completion certificates issued to participants).
5. Local homes made lead-safe due to coordinated multi-stakeholder outreach, assistance programs, and enforcement, as guided by community members (25 housing units on target property list issued lead safety certificates).

The Project will track expected results by analyzing records of committee recruitment and member engagement; examining the results of workshops,door-to-door outreach, contractor trainings and meetings with city officials; evaluating outcomes and shifts in lead certificates issued to local homes by licensed lead inspectors; assessing partner data showing completion of noncompliant property workplan steps; and reviewing RI Dept. of Health lead poisoning data to ascertain decreases in the rate of lead poisoning. We expect that these plans will lead to long-term changes - particularly with renovation and repair specialists (who will closely follow RRP lead-safe work practices and take steps to keep themselves safe from lead exposure on the job), tenants (who will access services and resources offered by community health workers and the City when lead hazards are suspected at home) and property owners (who will be motivated to maintain lead-safe homes for their tenants following city-level lead law enforcement). This project should have a strong potential for replication beyond the initial target area, particularly in Rhode Island communities that have only recently begun to enforce lead safety laws.

b) Performance Measurement Plan

Evaluation is an essential component of this project, built into the tasks and activities, with community member and project partner input and accountability ensured. Our process evaluation will ask important questions, such as: are we involving the number and types of parents, tenants and other stakeholders that we originally intended? Is our committee
work generating the improvements in lead-safety enforcement activity and housing conditions that we predicted would occur? Do the high-risk populations reached through workshops demonstrate a growing knowledge and concern about lead poisoning and available resources? These questions will be discussed quarterly by project staff, our project partners, and committee members. Our discussions will guide a revision of our workplan, if necessary. Any changes needed will be documented in quarterly reports. Our outcome evaluation process is outlined in the output and outcome timeline outline above and in our previously included milestone chart. In each report, we will reflect on progress toward outcomes and indicate which targets have been met and to what degree. After the project ends, we will gather all available data and perform our final evaluation. Evaluation results will be presented in a final report, which will be made available to EPA, project participants, and other interested organizations. Academic project partner RIC has requested that staff present on the project to students during and after the project period.

c) Sustainability Plan and Community Vision

As an organization founded by families of lead-poisoned children, it is essential for us that our work be rooted in a larger movement for social and environmental justice and that we work to support related, large-scale efforts for change. This project meshes well within a citywide movement for environmental justice, especially related to ongoing calls for more attention to the ways that air pollution from our highways and waterfront industry (not a wealthy waterfront but an imposition on low-income neighborhoods already burdened by lead) combine with industrial legacy toxics and the threat of gentrification to put unfair pressure on our EJ neighborhoods on multiple levels. Partners committed to this project, as well as our current volunteers, staff, and board see this project as an essential part of this larger effort and are committed to raising funds and

recruiting supporters to keep this going well into the future. We also believe that our success in working with city partners will help to build an improved pattern of city accountability to community needs that city officials can learn from and replicate in the future, and which will give community members hope that this level of partnership is possible in the right circumstances. We are deeply committed to this particular project because it is a top priority for our base and because no other initiative has produced an increase in lead-safe rental housing to benefit tenants at risk as quickly as partnering with enforcement officials has.

4.0 Programmatic Capability

a) Organizational Experience.

Our organization is the right group to lead a program of this nature. The Project's past success with similar EPA-funded community based lead prevention initiatives shows that our organization has the capacity and experience to be successful in this endeavor. EPA support has helped us grow to the point where we are a mature CBO with the right internal practices and community roots to do this, including Healthy Communities grants, Environmental Justice Small Grants, and one current Environmental Justice Collaborative Problem-Solving Grant. No other organization has devoted as much effort to ensure the environmental health and safety of Rhode Island's most underserved children. Our lean but remarkably experienced staff has created an efficient organizational infrastructure that utilizes collaborations and outside resources to coordinate intensive projects. The Childhood Lead Action Project successfully completed federally-funded programs similar in size and scope, including an EJ CPS grant ending 8/31/23 this project would build on. We have met all reporting requirements for recent assistance agreements and submitted acceptable final reports.

b) Staff Experience and Qualifications of Project Manager

The Project has a lean but highly skilled staff that has successfully completed over 15 EPA-funded projects since our inception 31 years ago. The project will utilize three of our most highly qualified lead prevention experts, all with strong community connections. Executive Director Laura Brion will oversee the effort as Project Manager. A Providence resident since 2000, she has been with the Childhood Lead Action Project since 2008 and is responsible for much of the organization's community-building and policy development victories in recent years. Her successful coordination of grassroots environmental health efforts in Providence and on a state level earned her the National Safe and Healthy Housing Coalition's Dennis Livingston Memorial Award for Exceptional Organizing in 2014.

Community Educator Elizabeth Soriano will serve as the Project Coordinator. Born in the Dominican Republic, Elizabeth moved to Providence in the 1990s and raised her children here before going back to work as a community health worker conducting home visits in all of Providence's highest-risk neighborhoods for lead. She is fluent in English and Spanish and has over a decade of experience in lead poisoning education specifically, tailoring her message effectively to parents, tenants, landlords, and workers. Community Educator Sojaili Gomez will also participate actively in this project. Sojaili first joined the Childhood Lead Action Project in 2000. Raised in Providence after immigrating to the United States as a child, Sojaili is fluent in both English and Spanish and has decades of experience using well-developed outreach and communication strategies that bring our lead poisoning prevention message to a diverse range of audiences. Sojaili also has expertise as a property owner and a realtor and will play a critical role in our outreach to both tenants and homeowners alike. Lalani Mora (contractor, Mora Construction) is a bilingual (English/Spanish), highly experienced lead abatement
specialist and serves as our principal RRP trainer. In addition to our classes, he is in high demand with local HUD-funded lead programs.Volunteers, interns, and board members are available to play a key role, especially in connecting us with specific ethnic/language communities in Providence, such as Liberian and Haitian (board members), among others.

c) Expenditure of Awarded Grant Funds

The Project has organizational procedures in place that will ensure quality assurance and sound fiscal oversight of this award. The Executive Director will closely oversee the staff and interns supporting the project

through regular supervision meetings and written work updates as needed. Project benchmarks will be reviewed by staff monthly, and, on a quarterly
basis, the project will be evaluated for adherence to the proposed plan and outcome achievement. Reports required by the EPA will be prepared with and reviewed by the parties involved in project delivery. Additionally, our organization has sound internal controls to govern the management of Project funds (for example, two signatures are required for checks
over $1,000, time sheets and expense reimbursements must be signed by the Executive Director, and separate cost centers are kept for individual grants). A CPA firm prepares quarterly and annual financial statements and the IRS Form 990, which are all reviewed by our board of directors. We also seek the lowest reasonable price on all purchases.

To ensure that we will be able to comply with EPA's Pre-award Compliance Review for Nonprofit Organizations and submit an acceptable Administrative Capability Questionnaire (EPA Form6600-09) showing all necessary controls are in place if selected for this grant, our Board of Directors has allocated funds in the current fiscal year budget (not EPA project budget) for extra help from our highly qualified CPA firm to prepare. We have scheduled a series of weekly meetings with the firm in May 2023 to do a comprehensive review of our current fiscal policy and EPA requirements, identify any needs for our policies and procedures to be strengthened, and prepare a revised policy and implementation plan ready for board review and potential adoption at a meeting to be held in June. If changes to policy and practice require more staff time to be dedicated to fiscal management, we can use already secured grant funding from the United Way of RI to be used at our discretion for activities including organizational development (current balance $15,000).

5.0 Past Performance

Below is a list of five federally funded assistance agreements that the Childhood Lead Action Project performed within the last three years and their results.

EPA Environmental Justice Collaborative Problem-Solving
Community Lead Safety Collaborative Project (EC – 00A00721) 9/1/20-8/31/23

The Childhood Lead Action Project was awarded $120,000 to prevent lead poisoning, improve the safety of rental housing, and increase the capacity of residents, government regulators, housing funding agencies, and other stakeholders to work together to address the lead issue on a local level. We have successfully managed the agreement and are on track to meet or exceed all deliverables by the end date. We have fully met all reporting requirements to date and adequately and timely reported on progress. Point of contact: Casey Abel

EPA Healthy Communities
Central Falls Lead Safety Project (HC - 00A00979) 10/1/22-9/30/23

The Childhood Lead Action Project was awarded $30,000 to engage families at high risk for lead poisoning in Central Falls, RI in lead safety workshops and a steering committee; conduct lead-safe work practices trainings for contractors; and engage lead remediation funders, enforcement officials, community partners, and state officials in coordinating resources to bring 50+ unsafe rental housing units into compliance with lead safety laws to protect tenants. We have successfully managed the agreement and are on track to meet or exceed all deliverables by the end date. We have fully met all reporting requirements to date and adequately and timely reported on progress. Point of contact: Kayla King

EPA Healthy Communities
Providence Lead Compliance Project (HC - 00A00603) 10/1/19-9/30/22

The Childhood Lead Action Project was awarded $25,000 to engage community members, daycare providers, home repair professionals, and government officials to work together to address the problem of lead poisoning in Providence, RI.We successfully managed and completed the agreement. We fully met all reporting requirements through timely and adequate reporting on progress, including the submission of acceptable final narrative and fiscal reports. Point of contact: Kayla King

EPA Healthy Communities

Blackstone Valley Compliance Project (HC00A00722) 10/1/20-9/30/22

The Childhood Lead Action Project was awarded $35,000 to Iengage families at high risk for lead poisoning in Pawtucket and Central Falls, RI in lead safety workshops and a steering committee to guide the project; provide enforcement recommendations to officials; conduct lead safety workshops for parents; conduct lead-safe work practices trainings for contractors; engage lead remediation funders, enforcement officials, community partners,and state officials in coordinating resources; and develop a new, multi-stakeholder lead certificate renewal system designed to keep landlords in compliance with lead safety laws. We successfully managed and completed the agreement. We fully met all reporting requirements through timely and adequate reporting on progress, including the submission of acceptable final narrative and fiscal reports. Point of contact: Kayla King

EPA Environmental Justice Small Grants Program

Lead-Safe Blackstone Valley (EQ-00A00374) October 1, 2017- March 31, 2020

The Childhood Lead Action Project received $30,000 to work in three of Rhode Island's highest-risk communities to reduce the incidence of childhood lead poisoning, improve the safety of rental housing, and increase the capacity of Central Falls, Pawtucket, and Woonsocket residents to address lead issues. Project activities include convening community member committees to provide leadership and direction to the project, holding Lead 101 and worker safety workshops, and training and technical assistance for city officials. All three cities have a very high incidence of lead poisoning and are home to substantial low-income and minority populations. We successfully managed and completed the agreement. We fully met all reporting requirements through timely and adequate reporting on progress, including the submission of acceptable final narrative and fiscal reports. Point of contact: Kayla King

6.0 Quality Assurance Project Plan (QAPP) Information - If selected for funding, we do not believe the the project will use data that requires a QAPP. This project expands on a current EPA-funded project that has similar activities and has been determined to not need a QAPP.

INTERNAL REVENUE SERVICE
DISTRICT DIRECTOR

Contact Person:
LORI WEBB
Contact Telephone Number:
Ex. 6 Personal Privacy (PP)
Our Letter Dated:
October 1992
Addendum Applies:
No

Dear Applicant:

This modifies our letter of the above date in which we stated that you would be treated as an organization that is not a private foundation until the expiration of your advance ruling period.

Your exempt status under section 501(a) of the Internal Revenue Code as an organization described in section 501(c)(3) is still in effect. Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Code because you are an organization of the type described in section 509(a)(1) and 170(b)(1)(A)(vi).

Grantors and contributors may rely on this determination unless the Internal Revenue Service publishes notice to the contrary. However, if you lose your section 509(a)(1) status, a grantor or contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act, or the substantial or material change on the part of the organization that resulted in your loss of such status, or if he or she acquired knowledge that the Internal Revenue Service had given notice that you would no longer be classified as a section 509(a)(1) organization.

As of January 1, 1984, you are liable for taxes under the Federal Insurance Contributions Act (social security taxes) on remuneration of $100 or more you pay to each of your employees during a calendar year. You are not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

You are required to file Form 990 only if your gross receipts each year are normally more than $25,000. For guidance in determining whether your gross receipts are "normally" more than $25,000, see the instructions for Form 990. If a return is required, it must be filed by the 15th day of the fifth month after the end of your annual accounting period. A penalty of $10 a day is charged when a return is filed late, unless there is reasonable cause for the delay. However, the maximum penalty charged cannot exceed $5,000 or 5 percent of your gross receipts for the year, whichever is less. This penalty may also be charged if a return is not complete, so please be sure your return is complete before you file it.

If we have indicated in the heading of this letter that an addendum applies, the addendum enclosed is an integral part of this letter.

Dear Sir or Madam:

This is in response to the amendment to your organization's Articles of Incorporation filed with the state on June 6, 2003. We have updated our records to reflect the name change as indicated above.

In May 1996 we issued a determination letter that recognized your organization as exempt from federal income tax. Our records indicate that your organization is currently exempt under section 501(c)(3) of the Internal Revenue Code.

Based on information subsequently submitted, we classified your organization as one that is not a private foundation within the meaning of section 509(a) of the Code because it is an organization described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

This classification was based on the assumption that your organization's operations would continue as stated in the application. If your organization's sources of support, or its character, method of operations, or purposes have changed, please let us know so we can consider the effect of the change on the exempt status and foundation status of your organization.

Your organization is required to file Form 990, Return of Organization Exempt from Income Tax, only if its gross receipts each year are normally more than $25,000. If a return is required, it must be filed by the 15th day of the fifth month after the end of the organization's annual accounting period. The law imposes a penalty of $20 a day, up to a maximum of $10,000, when a return is filed late, unless there is reasonable cause for the delay.

All exempt organizations (unless specifically excluded) are liable for taxes under the Federal Insurance Contributions Act (social security taxes) on remuneration of $100 or more paid to each employee during a calendar year. Your organization is not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Organizations that are not private foundations are not subject to the excise taxes under Chapter 42 of the Code. However, these organizations are not automatically exempt from other federal excise taxes.

Donors may deduct contributions to your organization as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to your organization or for its use are deductible for federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Gulf of Maine Research Institute
01-0504905

Your organization is not required to file federal income tax returns unless it is subject to the tax on unrelated business income under section 511 of the Code. If your organization is subject to this tax, it must file an income tax return on the Form 990-T, Exempt Organization Business Income Tax Return. In this letter, we are not determining whether any of your organization's present or proposed activities are unrelated trade or business as defined in section 513 of the Code.

Section 6104 of the Internal Revenue Code requires you to make your organization's annual return available for public inspection without charge for three years after the due date of the return. The law also requires organizations that received recognition of exemption on July 15, 1987, or later, to make available for public inspection a copy of the exemption application, any supporting documents and the exemption letter to any individual who requests such documents in person or in writing. Organizations that received recognition of exemption before July 15, 1987, and had a copy of their exemption application on July 15, 1987, are also required to make available for public inspection a copy of the exemption application, any supporting documents and the exemption letter to any individual who requests such documents in person or in writing. For additional information on disclosure requirements, please refer to Internal Revenue Bulletin 1999 - 17.

Because this letter could help resolve any questions about your organization's exempt status and foundation status, you should keep it with the organization's permanent records.

If you have any questions, please call us at the telephone number shown in the heading of this letter.

This letter affirms your organization's exempt status.

Sincerely,

John E. Ricketts, Director, TE/GE
Customer Account Services

CURRICULUM VITAE

Ex. 6 Personal Privacy (PP)

PERSONAL:

Gulf of Maine Research Institute
350 Commercial Street
Portland, ME 04101

E-mail: Ex. 6 Personal Privacy (PP) @gmri.org

PROFESSIONAL INTERESTS:

Climate-Ecosystem science. Ecosystem effects on fisheries dynamics. Fisheries oceanography. Fish early life history. Recruitment. Feeding and growth. Trophic interactions. Habitat use. Marine and estuarine ecology.

EDUCATION:

Ph.D., March 1996, Marine Studies. University of Delaware, Graduate College of Marine Studies, Sussex County, Lewes, DE.

B.S., June 1990, Biology. Lafayette College, Northampton County, Easton, PA.

PROFESSIONAL EMPLOYMENT:

2022-present: Chief Scientific Officer, Gulf of Maine Research Institute, Portland, ME

2014-2022: Supervisory Research Fisheries Biologist, NOAA/Alaska Fisheries Science Center, Recruitment Processes/EcoFOCI Program, Seattle, WA

2013-2021: Affiliate Assistant Professor, Oregon State University, Department of Fisheries and Wildlife. Corvallis, OR.

2004-2021: Affiliate Assistant Professor, University of Washington, School of Aquatic and Fishery Sciences. Seattle, WA.

2001-2014: Research Fisheries Biologist, NOAA/Alaska Fisheries Science Center, Seattle, WA.

1999-2001: Postdoctoral Research Associate, University of Washington/JISAO; NOAA/NMFS Alaska Fisheries Science Center, Seattle, WA.

1996-1999: Postdoctoral Research Fellow, Rutgers University, Tuckerton, NJ.

1996-1998: Adjunct Professor, University of Delaware, Newark, DE.

LEADERSHIP: (recent, selected)

- 2023-present: NAS Standing Committee on Offshore Wind
- 2022-present: NERACOOS. Board of Directors.
- 2020-2022: DFO-NMFS Climate and Fisheries Collaboration Network, Arctic Lead

ED_016126_00000251-00001

- 2016-2021: Bering Sea Team Lead
- 2012-present: Steering Committee Chair, International Flatfish Symposium
- 2013-2022: Lead, Ecosystems and Fisheries Oceanography Coordinated Investigations

FISHERIES MANAGEMENT EXPERIENCE:

- **NOAA Fisheries:** Routinely coordinate with, contribute to, present to, respond to, stock assessors (single, multispecies), Ecosystem Status Reports, Ecosystem Socio-economic Profiles, Plan Teams, Science and Statistical Committee, North Pacific Fishery Management Council, NOAA Fisheries HQ

- **AK State Fisheries:** Coordinate with State colleagues on issues such as bycatch, conservation, field work, data (collection, reporting, analyses)

- **ME State Fisheries:** Coordinate with State colleagues on issues such as offshore wind, aquaculture, field work, data (collection, reporting, analyses)

- **Stakeholders:** Communication and transparency with industry partners, local communities, native communities and tribal governments, NGOs, international treaty bodies (esp. arctic)

HONORS AND AWARDS: (selected)

2022: NOAA/AFSC – Dept. of Commerce Bronze Medal, Scientific Achievement
2022: NOAA/AFSC – Dept. of Commerce Administrator's Award, Service to the Nation
2021: PICES – Ocean Monitoring Award, Observational Science Excellence
2015: NOAA/AFSC – Dept. of Commerce Gold Medal, Scientific Achievement
2002: NOAA/AFSC – Dept. of Commerce Bronze Medal, Scientific Achievement

A. Professional Preparation

Williams College	Williamstown, MA	BA, History	1985
Yale University	New Haven, CT	MEM	1990

B. Appointments

2012 – to present **Gulf of Maine Research Institute,** **Portland, Maine**
Chief Community Officer
- Guide all aspects of GMRI's Community Department, including a staff of 10, with 6 direct-reports, and combined annual budget of $2.5 million.
- Serve as a member of GMRI's senior management team.
- Set strategic direction for GMRI's community programming.
- Develop and oversee GMRI's aquaculture program.
- Convene fishing community leaders, peer nonprofits, and NOAA Fisheries leadership around contentious fisheries management issues.

2009 – 2012 **Gulf of Maine Research Institute,** **Portland, Maine**
Fisheries Technical Assistance Program Manager
- Provided technical assistance to New England's groundfish industry during a period transformative change, engaging harvesters in complex resource management decisions.
- Managed program staff of 3 - including hiring and evaluation.
- Maintained professional connections with industry representatives, state and federal agencies, and nonprofit partners.
- Oversaw all program components, including budgeting, grant-writing, reporting, communications, and planning.
- Convened industry and regulatory representatives to build consensus on fisheries management procedures and protocols.
- Maintained GMRI's neutral position in an extremely polarized atmosphere.

2005 – 2009 **Maine Coast Heritage Trust,** Director of Development **Topsham, Maine**
- Oversaw and coordinated all aspects of fundraising, including major gifts, annual fund, membership, capital needs, restricted giving, donor stewardship, and gift tracking.
- Administered MCHT's planned giving program, drafting planned gift documents, educating donors, and meeting attorneys.
- Managed department of 6 staff - including hiring and evaluation.
- Served on MCHT's senior management team.
- Ran major donor program, including coordinating strategy, arranging cultivation and solicitation visits, and directing donor stewardship.
- Attended outreach functions and represented MCHT at conferences, meetings, and receptions.

2001 – 2005 **Maine Coast Heritage Trust,** Campaign Director **Topsham, Maine**
- Oversaw all aspects of MCHT's successful $100 million capital campaign.
- Worked with president and board to cultivate donors and solicit capital gifts.
- Coordinated project-specific campaigns, working with community members and project staff to develop materials, outline strategies, write grants, and solicit gifts.
- Researched prospects for cultivation and solicitation.
- Organized donor outreach events in Maine and in Boston, New York, and Washington.

1998 – 2001 **Maine Coast Heritage Trust,** Project Manager **Brunswick, Maine**
- Responsible for MCHT's conservation activity in mid-coast region.
- Worked in conjunction with local land trusts, state, and federal agencies to conserve land.
- Advised landowners and their families on planning for conservation.
- Secured public funding from state and federal sources through grant applications.
- Negotiated land transactions including donations, bargain sales, and acquisitions.

1991 – 1998 **Quebec-Labrador Foundation/ Atlantic Center for the Environment, Program Director** **Ipswich, Massachusetts**
- Directed community conservation projects in New England and eastern Canada.
- Engaged with communities throughout the region in natural resource issues, including land conservation, watershed protection, cultural heritage, and marine conservation.
- Managed marine research grant program.

1990 **Island Institute, Ecological Services Intern** **Rockland, Maine**
Mapped land cover using satellite imagery and aerial photography.

1985 – 1988 **McClave & Philbrick, Boatbuilder** **Stonington, Connecticut**
Restored classic sailing yachts in a small boat shop.

EDUCATION

University of Rhode Island — May 2022
Master of Environmental Science and Management
Certificates: Science Writing and Rhetoric; Diversity and Inclusion — **GPA: 4.0**

Michigan State University | Honors College — May 2018
Bachelor of Science in Earth Science
Minors: Marine Ecosystem Management; Environmental Studies and Sustainability — **GPA: 3.69**

RESEARCH & PUBLIC ENGAGEMENT

Fisheries Technical Assistance Program Project Manager — May 2022 – Present
Gulf of Maine Research Institute, Portland, ME
- Managing the operation of the Maximized Retention Electronic Monitoring program
- Coordinating data collection, transfer, and review with all stakeholders and project partners
- Facilitating collaborative research to improve seafood quality with small-scale fishermen

Sanctuary Advisory Council Member - Research Seat — Mar 2023 – Present
NOAA Stellwagen Bank National Marine Sanctuary, Scituate, MA

Associate | Facilitator
Consensus Building Institute, Boston, MA — Feb 2022 – June 2022
- Supported the planning and facilitation for BOEM's Gulf of Maine Intergovernmental Renewable Energy Task Force meeting

Research Associate | Shipwreck Avoidance Program Manager
NOAA Stellwagen Bank National Marine Sanctuary, Scituate, MA — Dec 2020 – May 2022
- Facilitated stakeholder engagement and public comment periods for management plan
- Coordinated working groups for strategic development, research, and management
- Lead design, management, and communications of Shipwreck Avoidance Program

Graduate Assistant
University of Rhode Island Marine Affairs Department, Kingston, RI — Nov 2020 – May 2022
- Designed institutional review board approved ethnographic study and finalized report
- Conducted 81 surveys with Gulf of Maine fishermen to identify behavior, experience, and opinions on shipwreck protection efforts

Communications Fellow — Sep 2020 – May 2022
University of Rhode Island College of the Environment and Life Sciences, North Kingstown, RI
- Managed external communications through writing 12 monthly articles, daily social media posts, and website management reaching an audience over 10,000 monthly viewers
- Trained and managed a team of four students in writing and science communication skills

Education Specialist — Nov 2018 – Sep 2020
NOAA Office of National Marine Sanctuaries, Silver Spring, MD
- Facilitated three week-long programs brining in 45 regional educators and 25 graduate scholars for communication, engagement, and professional development training
- Led national live ocean exploration programs, *Sanctuaries Live,* and virtual reality resources, *Sanctuaries 360°* engaging over 100,000 viewers

- Supported stakeholder engagement at national conferences and trade shows

Youth Leadership Council Coordinator — Feb 2016 – Dec 2018
EarthEcho International, East Lansing, MI
- Managed network of over 80 youth members to develop environmental campaigns in their local communities
- Organized and coordinated logistics for two multi-day leadership summits and trainings in Washington, D.C. for 70 international youth ambassadors

Economic Impact Research Specialist — Aug 2018 – Nov 2018
NOAA Thunder Bay National Marine Sanctuary, Alpena, MI
- Collected and organized economic assessment through over 400 visitor evaluations

Michigan Policy Fellow
Institute for Public Policy and Social Research at Michigan State University, East Lansing, MI — Aug 2017 – May 2018
- Researched environmental policy and societal effects in Michigan
- Wrote summarized environmental policy briefings to inform state policy makers

NOAA Hollings Scholar — May 2017 – Aug 2017
NOAA Olympic Coast National Marine Sanctuary, Port Angeles, WA
- Developed three week-long marine science programs for over 60 local youth using inquiry-based lessons focused on Pacific Northwest ecosystems
- Supported community engagement and educational programs with coastal treaty tribes

Sea Turtle Research Intern — June 2015 – Aug 2015
Cape Eleuthera Institute, Eleuthera, The Bahamas
- Conducted and analyzed abundance surveys on sea turtles, predators, and sea grasses
- Facilitated educational programs for high school students to teach research techniques

Education

University of Maine 2020-2022
Degrees Earned: MS in Ecology and Environmental Sciences, Master's in Business Administration (MBA)

University of Vermont 2009-2013
Degree Earned: BA in Psychology, Minor in Ecological Agriculture

Professional Experiences

Gulf of Maine Research Institute *Portland, ME* September 2022-Present
Business Climate Action Program Manager
- Engaging with businesses on climate change mitigation and adaptation
- Designing and implementing a program plan that addresses the needs and vulnerabilities of regional blue economy businesses

Topsham Energy Committee *Topsham, ME* May 2021-Present
Committee Member (Volunteer)
- Work with the Town Board of Selectmen and staff to increase the towns energy efficiency and facilitate the towns transition towards cleaner energy sources

Maine Business School *Portland, ME* May 2022-August 2022
Graduate Intern
- Worked with the Maine Resource Recovery Association to promote reusable packaging in Maine restaurants
- Created promotional materials and logos, conducted outreach to stakeholders, and explored funding avenues for starting a pilot program

University of Maine *Orono, ME* May 2022-July 2022
Graduate Specialist
- Worked with officials in Bar Harbor, Maine to understand the towns municipal waste system
- Designed and conducted a waste audit for Bar Harbor and created an audit report

University of Maine *Orono, ME* — May 2021-May 2022
Graduate Researcher

- Designed and implemented a research project to understand alternative packaging choices for restaurants
- Convened with and engaged key stakeholders through interviews, workshops, and survey's

Peninsula Tomorrow *Blue Hill, ME* — February 2022-June 2022
Assistant Coordinator

- Conducted listening sessions focused on climate change and resilience planning in Maine's Blue Hill Region
- Prepared documents, letters of support, and project budgets to assist municipalities as they applied for federal and state funding opportunities

Governors Office of Policy Innovation and the Future *Augusta, ME* — February 2021-May 2021
Graduate Intern

- Researched innovative green energy projects launched by Maine Municipalities
- Interviewed stakeholders and collected data from the municipal entities involved
- Created a report on each energy project and presented the findings to representatives of Maine's Energy Office and members of the state's house and senate

Maine Small Business Development Center *Portland, ME* — November 2020-May 2021
Graduate Intern

- Created outreach materials and designed webinars to assist small businesses affected by COVID-19 related shutdowns
- Created a tool to help new entrepreneurs navigate the different types of licenses and permits needed to start a business in Maine
- Worked with advisors to provide consulting services to small business owners

University of Maine *Orono, ME* — September 2020-May 2021
Assistant Researchers

- Assisted members of the Materials Management Research Group identify research opportunities, design projects, and maintain research schedules

PROFESSIONAL SUMMARY

Facilitator, strategic advisor, project manager, and community outreach consultant, with extensive marine policy and coastal environment experience and a focus on building collaboration among diverse interests.

SELECT CLIENT LIST

National Marine Fisheries Service, New England Fisheries Management Council, ME Department of Marine Resources, ME Governor's Energy Office, The Nature Conservancy, ME Lobstermen's Association, ME Aquaculture Association, ME Coast Fishermen's Association, Island Institute, UNH Sea Grant, ME Sea Grant, and Consensus Building Institute.

EXPERIENCE

2009-Present SAMBAS Consulting LLC — Cumberland Foreside, ME
Founder and Principal

Contracted by a broad array of clients to perform facilitation, meeting management and organizational development services with a focus on strategic planning and collaboration building.

2006-2009 Gulf of Maine Research Institute — Portland, ME
Chief Convening Officer

Designed and managed GMRI's Community Programs from inception. Member of GMRI leadership team during period of rapid growth and strategic organizational development.

2001-2006 Gulf of Maine Research Institute — Portland, ME
Director of Collaborative Research

Developed and led program assisting fishermen and scientists in collaborative research project proposal development and execution. Served as liaison between fishing community and scientific community to facilitate collaborative research efforts and promote development of new initiatives.

1997-2001 Maine Department of Marine Resources — Augusta, ME
Special Assistant to the Commissioner

Provided strategic policy advice to commissioner and executed state policy as it relates to local governance of Maine's marine fisheries. Directed work to explore

new approaches to fisheries management, focused on industry participation, collaboration and stewardship.

1994 -1997 Maine State Planning Office, Maine Coastal Program Augusta, ME
Senior Planner

Managed and administered $4 million Coastal Zone Management grant for the State Coastal Program.

EDUCATION

1992-1994 Duke University, (Nicholas) School of the Environment Durham, NC
Master of Coastal Environmental Management (MEM)

Areas of focus: International marine fisheries, marine policy, shellfish management, natural resource economics, and ecosystem management

1986-1990 Trinity College Hartford, CT
B.S. in Psychology & Biology

Sea Education Association, Woods Hole, MA, Fall 1988 and Summer 1989
Courses in oceanography, nautical science, maritime studies. Conducted three months of oceanographic research aboard the *SSV Corwith Cramer*.

1990-1991 Thomas J. Watson Fellow Malta, Barbados and Western Samoa

Secured fellowship to study international marine pollution and regulation on small island nations. Designed and executed independent project including budget, planning, implementation and analysis.

SELECTED PROJECTS

Maine Offshore Wind Research Consortium Development and Implementation, May 2022 – current. Working in partnership with Carbon Trust Advisory, conducted interviews, researched organizational structures and assisted in development of a proposed structure and governance model for a state-initiated consortium to better understand the local and regional impacts of floating offshore wind power projects in the Gulf of Maine. Currently serving as interim Program Manager for initial start-up of organization through Governor's Energy Office.

Maine Offshore Wind Initiative, 2020 - 2023. Co-designed and facilitated the work of the Maine Offshore Wind Roadmap, a multi-stakeholder initiative led by the Governor's Energy Office to create an economic development plan for the offshore wind industry in Maine.

NH Coastal Roundtable, 2021 – 2022. Designed and facilitated a series of workshops to envision how current partnerships on coastal resilience efforts could evolve to more effectively work together in meeting the future needs of New Hampshire.

Mr. Donald W. Perkins
President/CEO
Gulf of Maine Research Institute
350 Commercial Street
Portland, Maine 04101

Dear Don:

The Maine Lobstermen's Association (MLA) is writing to confirm our interest in serving as a lobster industry advisor to the Gulf of Maine Research Institute's (GMRI) proposal to the EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program for *Building Capacity for Disadvantaged Working Waterfront Communities to Engage Constructively in Offshore Wind Development in the Gulf of Maine*.

MLA works to sustain both the lobster industry and the lobster resource. Representing over 1,200 members, MLA is currently the oldest and largest fishing industry association on the East Coast. MLA strives to be proactive on issues affecting the lobster industry and is active in the management process at the state, regional and federal levels. For more than 60 years, the MLA has provided a credible voice for the lobster industry on important issues like offshore wind. MLA is highly regarded by both the fishing industry and the management community.

As lobstermen depend on access to a healthy Gulf of Maine ecosystem to earn our livelihoods, it is critical that our industry has access to independent, objective, incisive information about the ocean wind development process, the potential impact of ocean wind on our ecosystem, and the potential shoreside impact of ocean wind on fishing communities and supply chain infrastructure. We look forward to working with GMRI to advise them about specific lobster industry concerns and desires for information on emerging issues related to ocean wind and to share information produced by GMRI with our industry network.

Sincerely,

Patrice McCarron

Patrice McCarron
Policy Director

New England Fishery Management Council
50 WATER STREET | NEWBURYPORT, MASSACHUSETTS 01950 | PHONE [redacted] | FAX [redacted]
Eric Reid, *Chair* | Thomas A. Nies, *Executive Director*

April 4, 2023

Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program
U.S. Environmental Protection Agency

To Whom it May Concern:

I am writing to express our intent to serve as a community partner on the Gulf of Maine Research Institute's (GMRI) project "Fostering Capacity for Fishing Communities to Engage Effectively and Constructively in Offshore Wind Development in the Gulf of Maine", in support GMRI's application to EPA's 2023 EJ Collaborative Problem-Solving Cooperative Agreement Program.

The New England Fishery Management Council (Council) has primary management jurisdiction for 28 marine species in federal waters and is composed of members from Connecticut to Maine. The Council supports policies for U.S. wind energy development and operations that will sustain the health of marine ecosystems and fisheries resources. Marine fisheries in the region are profoundly important to the social and economic well-being of coastal communities and provide numerous benefits to the nation, including domestic food security. The Council has been deeply engaged in offshore wind development and planning efforts throughout the northeast region, and our members and staff have developed substantial expertise that we would be pleased to contribute to GMRI's engagement efforts.

The Council and GMRI have partnered previously on communication and outreach issues, including the Marine Resource Education Program, and we recognize GMRI's capacity to effectively communicate scientific and management issues to diverse audiences, including fishermen. The Council process, including meetings of our committees and advisory panels, serves as a convening space for discussions around offshore wind. We plan to use our meetings and other outreach channels to share information and build awareness about GMRI's project and disseminate any educational resources developed. We can also support GMRI in identifying information needs and opportunities for engagement with the fishing industry. As needed, we can also provide guidance as GMRI plans workshops or other events that will engage the fishing community in efforts to mitigate the impacts of offshore wind.

Please contact me if you have any questions.

Sincerely,

Thomas A. Nies

Thomas Nies
Executive Director

ED_016126_00000252-00002

March 30, 2023

Dear Environmental Protection Agency,

I am writing to express my support for the Gulf of Maine Research Institute's proposal to foster capacity building for fishing communities to constructively engage in offshore wind development in the Gulf of Maine.

Fishing communities will be one of the most impacted by the development of offshore wind in the Gulf of Maine. It is critical that these stakeholders, who are most vulnerable to the impacts of offshore wind, have a voice in the process to ensure equity. Maine Coast Fishermen's Association works to enhance the sustainability of Maine's fisheries by advocating for the needs of community-based fishermen in the Gulf of Maine. There is a clear need to build the capacity of local fishermen so they have a seat at the table. We see this proposal as a way to strengthen the avenue of engagement for fishermen to participate in the offshore wind development process.

Maine Coast Fishermen's Association will support this project by helping identify strategic advisors to guide the work, identifying information and resource needs through listening to the needs of our community, and by sharing assets and resources created during this project with our network that reaches over 500 fishermen along the coast of Maine

As an industry-based organization, our partnership with the Gulf of Maine Research Institute on this project will amplify the reach and ensure that the project deliverables are reaching the target audience of fishing communities.

This project is based on the needs of the community to empower fishing communities to engage in the offshore wind development process and aligns with our mission. Findings from this project would be useful to add to our collection of resources to strengthen and inform our fishermen on the offshore wind process and science as leasing and development occurs in the Gulf of Maine.

Sincerely,
Ben Martens

Ben Martens
Executive Director

TOGETHER,
WE PERSEVERE.
mainecoastfishermen.org

Massachusetts Lobstermen's Association
8 Otis Place ~ Scituate, MA 02066
Ex. 6 Personal Privacy (PP)

Department of Environmental Protection Agency,

I am writing to state Massachusetts Lobstermen's Association's support and partnership with the Gulf of Maine Research Institute's proposal to build capacity for fishing and disadvantaged communities to engage effectively in offshore wind development in the Gulf of Maine.

The lobster industry faces many challenges in the Gulf of Maine with offshore wind development coming front and center. Offshore wind will not be a solution to climate change if the needs and concerns of marine resource users, like lobstermen, aren't considered in the process. To realize an equitable approach to offshore wind development we believe the industry needs to have a seat at the table in the decision-making process.

Massachusetts Lobstermen's Association is a member-driven organization that works to maintain both the conservation of lobster and the economic sustainability of the industry. We have been actively engaged in offshore wind development in southern New England for over a decade and will continue to engage in offshore wind development in the Gulf of Maine. As we strive to be proactive on issues that the lobster industry faces, we see this project as a bridge for our community to be empowered with the tools and resources they need to constructively engage.

As one of the leading commercial fishing industry associations in New England, we will support this project by informing GMRI of informational and resource needs through listening to our members; helping identify project strategic advisors; and sharing resources from GMRI with our 1,800 members. We communicate with our members through a monthly newspaper, weekly email, social media, and industry meetings. Project deliverables, like translated science, information on upcoming meetings, and training on how to engage in the process, will be useful to share with our membership. As a trustworthy voice for the industry on important issues - like offshore wind - our support for this project will leverage and enhance GMRI's work.

Sincerely,

Beth Casoni

Executive Director
Massachusetts Lobstermen's Association

April 10, 2023

Mr. Donald W. Perkins
President/CEO
Gulf of Maine Research Institute
350 Commercial Street
Portland, Maine 04101

Dear Environmental Protection Agency:

Ready Seafood is writing to confirm our interest in working with the Gulf of Maine Research Institute (GMRI) on your proposed project *Building Capacity for Disadvantaged Working Waterfront Communities to Engage Constructively in Offshore Wind Development in the Gulf of Maine.*

Ready Seafood is committed to sustaining the lobster fishing industry and preserving its resources through industry stewardship and research. All of our products begin with live lobster caught by independent harvesters in the cold clean waters of Maine and Canada. Our direct-from-the-boat supply chain, proprietary handling techniques, cutting edge facilities and efficient shipping options mean our customers always receive the very freshest, highest quality lobster.

We appreciate GMRI's effort to build capacity to provide our fishing industry and coastal communities with independent, incisive information about the ocean wind development process, the evolving science about the ecosystem impact of ocean wind development and operations, the potential use conflicts between ocean wind development and traditional maritime activities, and the potential economic impact of ocean wind development on our shoreside infrastructure.

Our involvement on this project will leverage our education, outreach and sustainability programs to ensure that our community of lobstermen and our supply chain peers have the information they need to engage in the offshore wind development process. We will work with GMRI to identify our industry's evolving concerns about ocean wind, particularly around siting, access, and shoreside infrastructure impact. In turn, we will share GMRI information resources and engagement opportunities directly to our industry network to expand the reach of this important work.

Sincerely,

Curt Brown
Marine Biologist
Ready Seafood

April 10, 2023

Dear Environmental Protection Agency:

Red's Best fully supports and sees great demand for the Gulf of Maine Research Institute's proposed work to build capacity in New England for working waterfront communities to engage in offshore wind development. As the offshore wind development process has unfolded, we see a lack of engagement with seafood supply chain stakeholders and see this project as an opportunity to enable our network to engage in the process.

Red's Best works with over 1,000 fishermen who are responsibly harvesting sustainable seafood to ensure that there are markets available for all their catch, even the underutilized species. We are a service provider for fishermen that supports the industry in navigating the seafood marketplace and helps consumers understand where their fish is coming from.

While there is often a focus on how offshore wind development will impact the marine resources and areas where lease areas will be placed, it is often overlooked how it will impact the shoreside infrastructure and waterfront communities. As a seafood processor and distributor, we have shoreside infrastructure throughout New England. This project would create the resources and partnerships for us to constructively engage in the process. GMRI has success in translating complex science to seafood industry members like myself and the fishing community to create a well-informed and productive community.

As a partner in this project, we will work with GMRI to identify evolving concerns about ocean wind, particularly around the impact on shoreside infrastructure and long-term impacts on the supply chain. We will support GMRI in identifying strategic advisors and participate in workshops to co-create solutions for community benefit agreements. We will share GMRI information resources and engagement opportunities with our network of concerned fishermen and processors to expand the reach of this important work.

Sincerely,

Jared Auerbach
Red's Best

OMB Number: 2030-0020

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Health Resources in Action

Address: 2 Boylston St. 4th Floor

City: Boston

State: MA: Massachusetts Zip Code: 02116

B. Unique Entity Identifier (UEI): FPD3JRJ61WJ2

C. Applicant/Recipient Point of Contact

Name: Stacey Chacker

Phone: Ex. 6 - Personal Privacy (PP)

Email: schacker@hria.org

Title: Project Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Mitzi Fennel, Chief Financial Officer
2 Boylston St. 4th Floor, Boston, MA 02116
mfennel@hria.org
Ex. 6 - Personal Privacy (PP)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

HEALTH RESOURCES IN ACTION

Director, Policy and Practice
2008-Present

Environmental Health Partnership Management & Capacity Building:

- Directs the Massachusetts Asthma Action Partnership (MAAP), a statewide coalition which promotes education, best practices, and policies, with an aim to eliminate exposures to environmental triggers in homes, schools, and the broader community, as well as increase access to culturally competent and quality clinical care to support asthma management. This currently includes directing two special projects, funded by the EPA - Healthy Environments Advance Learning: Building Capacity for Resilient Schools in Massachusetts and the MA Healthy Air Network.
- Directs the Asthma Regional Council of New England to build/promote capacity, collaboration and sustainability to address the environmental aspects of asthma.
- Leading efforts to develop new version for the CDC BRACE Framework – Building Resistance Again Climate Effects -- with U. Mass Prevention Center.
- Manage grant budgets, reporting, and resource development.

Technical Assistance, Assessments and Engagement

- Completes assessments, interviews, focus groups on a breadth of public health topics – from Medicaid payment, sodium reduction, asthma interventions, Community Health Workers (CHWs), environmental health, food access, lead in drinking water, climate justice, etc. Synthesize findings into actionable reports.

Public Health/Health Care Integration: Community Health Workers (CHW's):

- Established and directed the New Jersey In-home Asthma Intervention Pilot Project, aimed at improving asthma outcomes and reducing healthcare costs in children on Medicaid. Convened stakeholders, including healthcare systems, Medicaid payers, state officials; defined evidence-based intervention delivered by CHWs.
- Directed and served as co-PI for the New England Asthma Innovation Collaborative, a $4.2 million project funded by the Center for Medicare and Medicaid Innovation to establish and support a multi-state, multi-sector partnership health care focused on delivering CHW-led asthma home visiting services.

RELEVANT EXPERIENCE

Director, Community Building and Environment Department
1997-2008

- Raised over $3.5 million and organizing projects for community-led brownfield and schoolyard redevelopment and civic engagement projects, as well annual department budget with multiple funding streams.
- Launched and built programs focused on youth organizing and development; community planning; educational and recreational programs; and building political power within the Latino community.

ED_016126_00000263-00001

Community Organizer
1990-1996
Neighborhood of Affordable Housing
East Boston, MA

- Directed public policy advocacy on a range of issues (e.g. Community Stabilization, Community Preservation, In-State Tuition, Environmental Justice, etc.).
- Organized tenants in HUD-assisted developments to maintain affordable housing.
- Coordinated business peer-lending program in Spanish and English
- Recruited, hired, trained and/or supervised staff, VISTA, interns, and volunteers.
- Developed and managed partnership budgets, and capital and program budgets.

Community Health Development Coordinator
1985-1988
U.S Peace Corps

- Designed training materials, instructed traditional midwives and conducted community meetings on health-related issues; all work conducted in Central African Republic (CAR). All work conducted in Sango and French.
- Conducted evaluation and produced report (in French) for CAR Health Department.

HEALTH RESOURCES IN ACTION

Senior Program Manager
2023-Present

Program Manager
2021-2023

- Manages and supports a cohort of 20+ grassroots community and faith-based organizations throughout MA under a CDC grant to perform COVID-19 educational and vaccination outreach efforts through technical and capacity building assistance
- Collaborates with the MA Department of Public Health Vaccine Equity Initiative team to promote outreach and engagement
- Supports the Massachusetts Asthma Action Partnership (MAAP), a statewide coalition which promotes education, best practices, and policies, with an aim to eliminate exposures to environmental triggers in homes, schools, and the broader community, as well as increase access to culturally competent and quality clinical care to support asthma management. This currently includes supporting two special projects, funded by the EPA; Healthy Environments Advance Learning: Building Capacity for Resilient Schools in Massachusetts and the MA Healthy Air Network.
- Provides technical assistance and capacity building support to promote the planning of environmental health policies and practices to public schools in Massachusetts through the EPA-funded project, Healthy Environments Advance Learning (HEAL)
- Co-supervises two AMERICORPS Climate Justice volunteers assigned to two community-based organizations in Massachusetts

RELEVANT EXPERIENCE

Practicum Student
2021
Massachusetts Reform Law Institute
Boston, MA

- Assisted Boston-area legal aid organizations such as City Life/ Vida Urbana, Greater Boston Legal Services & others on eviction and housing-related legal cases & supporting the Manufactured Homes Commission on housing and health issues affecting the manufactured home communities of MA
- Performed residential housing inspections, including making recommendations for remediation, and providing assistance with legal strategy in tenant eviction cases
- Led a COVID-19 project with the Department of Public Health to increase vaccine access and resources to manufactured homes communities in MA

Research Study Assistant
2021
Framingham Heart Study
Framingham, MA

- Supported a multigenerational & multi-ethnic, longitudinal human subjects research study identifying the common factors or characteristics that contribute to cardiovascular disease (CVD) among 6,000+ participants in Framingham, MA
- Coordinated all outreach, translation, and cultural sensitivity in retention efforts for Spanish-speaking participants, including administering health questionnaires

Research Assistant
2019-2021
iSmile Research Study, Boston University
Boston, MA

- Supported an NIH-funded randomized control trial to test the efficacy of a parent-targeted text message-based intervention program on caries incidence and oral health behaviors among 750+ caregivers and children
- Directly enrolled over 100 participants across 4 clinical sites into the study within 9 months, specifically among Spanish-speakers
- Conducted in-person pediatric dental exams across 4 clinical sites and during at-home visits

External Affairs Associate
2018-2019

Senior Clinical Outreach Associate
2016-2018

OpenBiome
Boston, MA

As External Affairs Associate:

- Developed, designed, and authored materials for patient and clinical education, including translation of patient documents into Spanish and designed and updated our website content
- Assisted in media relations work, including interfacing with journalists, sharing website and media content about current research, and contributing to our social media presence
- Organized presence at external events including national conferences and science festivals, and hosted external visitors at our offices and labs

As Senior Clinical Outreach Associate:

- Led training and onboarding responsibilities with new hires
- Managed relationships with over 500 existing clinical partners including clinical education and trainings on Fecal Microbiota Transplant
- Managed data collection projects for partners, including a partner online tool for easier clinical data submission
- Helped devise improvement tools and strategies for partner engagement, including designing surveys and partner education material
- Participated in external scientific events for donor recruitment and public engagement

HEALTH RESOURCES IN ACTION

Public Health Associate funded by the Centers for Disease Control and Prevention
2021-Present

- The Centers for Disease Control and Prevention (CDC) Public Health Associate Program (PHAP) is a competitive fellowship designed to train early-career public health professionals who have an interest in public service and public health. Throughout the two-year training program, associates gain hands-on experience that will serve as a foundation for their public health careers.
- Provides capacity-building support for the Massachusetts Asthma Action Program (MAAP) and all projects connected to it, including the Healthy Environments Advance Learning (HEAL) program, the Asthma Regional Council of New England, and a learning community for community health workers.
- Produces communication products for MAAP and its projects, such as quarterly newsletters and website content.
- Supports logistics for MAAP's coalition-building efforts by coordinating healthy housing and healthy school committees, MAAP summit, and other in-person events.
- Supports grant writing and proposal development for new projects related to environmental health and asthma.

RELEVANT EXPERIENCE

Director of Education
2020-2021
University Blood Initiative
Boston, MA

- Developed department policies, best practices, and internal organization structures.
- Supervised 16 virtually based staff. Directed health communications, advocacy efforts, and training development activities for chapters and the public.
- Managed full recruitment cycle within department.
- Established partnerships to collaborate on educational campaigns.
- Oversaw the creation and progress of health advocacy blood donation campaigns intersecting with racial and sexual justice.

Research Assistant
2021
Scaling Up Early Childhood Development
Boston, MA

- Research project examining early childhood development in Zambia.
- Coded integrated data infrastructure (IDI) and focus group (FGD) transcripts based on pre-determined and emerging themes in NVIVO 12 Pro.
- Conducted a preliminary analysis of coding results and wrote summary of findings.
- Contributed to completion of a successful request for additional funding.

Clinical Intern
2020-2021
South End Community Health Center
Boston, MA

- Contributed to assessing over 500 persons' health needs in order to provide best means of care which included distributing food and clothing, and referrals to community health workers (CHW) to assist with rent and heating subsidies
- Used medical record system to record patient encounters and complete referrals; collected patient information through interviews and contribute to detailed record-keeping for Fitness in the City grant fulfillment
- Counseled parents on implementing healthy-eating and exercising interventions in their family lives, working with a dietician to guide them on nutrition, and encouraging their progress as they take on healthier lifestyles
- Supported Junior Chefs program, encouraging home cooking by providing families healthy, easy, and affordable recipes; hosted session for Spanish-speaking families

Research Assistant
2019-2020
Eviction Project at Boston University School of Public Health
Boston, MA

- Extracted, organized, and compiled data from online court records about eviction cases from 2017 in which defendants filed counterclaims
- Cross-referenced information obtained from online and physical court records, aimed at reviewing the outcomes of these cases and investigating how filing a counterclaim affected the defendants
- Assisted in housing safety and hygiene inspections in Greater Boston under Ethan Mascoop to collect evidence for conditions on behalf of tenants in eviction cases

Research Assistant
2019
Utility Letter Study, Boston Medical Center
Boston, MA

- Performed univariate and frequential analyses in R to characterize patients requesting Utility Shut-off Certificates
- Wrote and published research letter in aim of alerting medical providers who write utility shut-off certificates of key trends observed in patients at risk of having utilities disconnected, so they may better anticipate these patients' needs

EDUCATION

Boston University
Boston, MA
May 2021

Bachelor of Arts

- Major: Biology, Specialization in in Cell Biology, Molecular Biology, & Genetics
- Minor: Public Health

Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Hitchcock Center for the Environment

Address: Ex. 6 Personal Privacy (PP)

City: Amherst

State: MA: Massachusetts Zip Code: 01002-3363

B. Unique Entity Identifier (UEI): JZN1YESH54G9

C. Applicant/Recipient Point of Contact

Name: William Spitzer

Phone: Ex. 6 Personal Privacy (PP)

Email: billy@hitchcockcenter.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None.

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☒ Yes ☐ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Jennifer Unkles, Financial Manager, Hitchcock Center for the Environment, 845 West St, Amherst, MA 01002-3363, accounting@hitchcockcenter.org, Ex. 6 - Personal Privacy (PP) phone, Ex. 6 - Personal Privacy (PP) fax.

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

When an employee believes that policies, procedures, and practices have been improperly, inadequately or unfairly applied, s/he is encouraged to express her or his concern to the Executive Director in an attempt to resolve the problem through discussion. If the resolution of the problem at this level is unsatisfactory to the employee s/he may discuss the situation with a Board-appointed Ombudsperson who will act as fact finder and/or mediator to explore ways of resolving the dispute constructively and informally. If the employee is not satisfied with the outcome of the informal procedure, s/he may initiate the formal grievance procedure. The employee will state in writing her or his grievance and present that written document to the Executive Director, who will transmit it to the Board's Executive Committee. The Executive Committee and the Ombudsperson will review the case with the employee and their decision on the issue will be final.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
William Spitzer	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

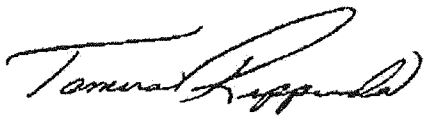
Dear Taxpayer:

This is in response to your Apr. 14, 2014, request for information regarding your tax-exempt status.

Our records indicate that you were recognized as exempt under section 501(c)(03) of the Internal Revenue Code in a determination letter issued in October 1957.

Our records also indicate that you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.



Please refer to our website www.irs.gov/eo for information regarding filing requirements. Specifically, section 6033(j) of the Code provides that failure to file an annual information return for three consecutive years results in revocation of tax-exempt status as of the filing due date of the third return for organizations required to file. We will publish a list of organizations whose tax-exempt status was revoked under section 6033(j) of the Code on our website beginning in early 2011.

Policy on Nondiscrimination in Programs Receiving Federal Assistance from the U.S. Environmental Protection Agency

Introduction

Title 40 of the Code of Federal Regulations (CFR), Part 7, Nondiscrimination in Programs or Activities Receiving Federal Assistance from the Environmental Protection Agency, prohibits discrimination on the basis of race, color, national origin, age, sex, or handicap in programs or activities receiving federal assistance from the U.S. Environmental Protection Agency (U.S. EPA). It requires recipients of federal assistance from the U.S. EPA to:

- Collect, maintain, and provide information showing compliance with 40 CFR, Part 7;
- Designate a person to be the Nondiscrimination Compliance Coordinator (NCC) to coordinate efforts to comply with 40 CFR, Part 7;
- Adopt grievance procedures that assure the prompt and fair resolution of discrimination complaints alleging violations of 40 CFR, Part 7; and
- Provide continuing and prominent public notice of nondiscrimination on the basis of race, color, national origin, age, sex, or handicap, and of the identity and contact information for the NCC.

As set forth below, it is the Health Resource in Action's (HRIA) policy not to discriminate on the basis of several factors, including those in 40 CFR, Part 7. In addition, HRiA adopts the following procedures to implement the requirements of 40 CFR, Part 7.

Procedures to Implement the Requirements of 40 CFR, Part 7

Compliance Information

HRiA shall collect, maintain, and on request of the U.S. EPA, Office of Civil Rights (OCR), provide the following information to show compliance with 40 CFR, Part 7:

- A brief description of any lawsuits pending against HRiA that allege discrimination which 40 CFR, Part 7, prohibits;
- Racial/ethnic, national origin, age, sex, handicap, and disability data, or EPA Form 4700-4 information submitted with HRIA applications for U.S. EPA assistance;
- A log of discrimination complaints that identifies the complaint, the date it was filed, the date HRiA's investigation was completed, the disposition, and the date of disposition;
- Reports of any compliance reviews conducted by any other agencies;
- Additional data and information specific to certain HRIA programs or activities to determine compliance where there is reason to believe that discrimination may exist in a

HRIA program or activity or to investigate a complaint alleging discrimination in a HRIA program or activity;

When preparing compliance information, HRiA shall use the racial classifications set forth in 40 CFR, Section 7.25, in determining categories of race, color, or national origin;

HRiA shall keep records of the compliance information identified in paragraphs (1)(a) and (1)(b), above, for at least three years after completing a project for which HRiA was a recipient of U.S. EPA assistance. When any complaint or other action for alleged failure by HRiA to comply with 40 CFR, Part 7, is brought before the three- year period ends, HRiA shall keep records until the complaint is resolved; and

HRiA shall:

- Give OCR access during normal business hours to its books, records, accounts, and other sources of information, including its facilities, as may be pertinent to ascertain compliance with 40 CFR, Part 7;

- Make compliance information available to the public upon request; and

- Assist in obtaining other required information that is in the possession of other state agencies, institutions, or persons not under HRiA's control. If such party refuses to release that information, HRiA shall inform the OCR and explain its efforts to obtain the information.

Nondiscrimination Compliance Coordinator (NCC)

The President of HRIA designates the person holding the position of Chief Operating Officer as HRiA NCC responsible to coordinate HRiA's efforts to comply with its obligations under 40 CFR, Part 7.

Grievance Procedures

HRiA adopts the following grievance procedures in order to assure the prompt and fair resolution of complaints that allege a violation by HRIA of 40 CFR, Part 7:

Step	Who	Does What
1	Complainant	**Submittal of Complaint:** In order to have a complaint submittal considered for investigation under this procedure, the complainant shall file the complaint no later than 180 calendar days after the date(s) of the alleged act(s) of discrimination. The complaint shall be in writing and signed by the complainant or the complainant's representative and shall include contact information for the complainant or their representative. The complaint shall specify with as much detail as possible: • The actions or inactions by HRiA that support an alleged violation of 40 CFR, Part 7; • The alleged discrimination that did or will result from such actions or inactions; • The identity of the person(s) harmed or potentially harmed by the alleged discrimination; and • The section of 40 CFR, Part 7, that HRiA allegedly violated. HRiA may request additional information from the complainant if needed to assist with meeting the complaint requirements listed above. Appropriate assistance shall be provided to individuals with disabilities and individuals with limited English proficiency. Also, complaints in alternate formats shall be accepted from individuals with disabilities, for example, complaints filed on computer disks, on audio tape, or in Braille. All complaint submittals should be mailed (or e-mailed) to the NCC at the following address: Chief Operating Officer Health Resources in Action 2 Boylston St Boston, MA 02116 E-mail: mfennel@hria.org

Step	Who	Does What
2	NCC	**Logging of Complaint Submittals:** All complaint submittals are to be logged. The NCC shall retain a copy of all documents on file in accordance with the records retention schedule. The NCC shall also notify the relevant program manager(s). The following are examples of what will not be logged as a complaint submittal: • Anonymous submittals; • Submittals too vague to reasonably determine the allegations of discriminatory conduct; • Submittals not sufficiently identifying the person(s) harmed or potentially harmed by the alleged discrimination; • Inquiries seeking advice or information; • Courtesy copies of court pleadings; • Courtesy copies of complaints addressed to other local, state, or federal agencies; • Newspaper articles; • Web-based media sources such as YouTube videos, e-mail strings, blogposts, comments strings, or Web pages; • Courtesy copies of internal grievances; and • Voice mail messages, phone calls, or in-person conversations.
3	NCC	**Initial Review of Complaint Submittals:** Upon receipt of a complaint and any additional information supporting or otherwise associated with the complaint, a case file shall be established containing all documents and information pertaining to the complaint and an initial review of the case shall be conducted.

Step	Who	Does What
4	NCC	**Determination if Complaint Warrants Further Investigation:** The NCC, based on information in the complaint submittal and other information available, shall determine if: • HRIA has jurisdiction to pursue the matter; and • The complaint submittal contains sufficient merit to warrant further investigation. A complaint shall warrant further investigation unless: • It clearly appears on its face to be frivolous or trivial; • Within the time allotted for making the determination of jurisdiction and investigative merit, HRIA reaches an agreed resolution with the complainant; • Within the time allotted for making the determination of jurisdiction and investigative merit, the complainant withdraws the complaint; or • The complaint was not submitted within the time limit established in Step 1. Within 14 calendar days of receipt of the complaint submittal, the NCC shall inform the complainant if the complaint has or has not been accepted for further investigation. If it is determined that further investigation is not warranted, the reason for such determination shall be recorded in the case file.
5	NCC	**Further Investigation of Complaint:** If the NCC determines the complaint submittal warrants further investigation, the NCC shall review the alleged facts to determine the course of the investigation. The investigation may include interviews of HRIA employees, other relevant witnesses, or others named in the complaint. Relevant HRIA employees shall make themselves available as necessary.
6	NCC	**Report and Determination:** The NCC shall issue a report and determination on whether HRiA violated 40 CFR, Part 7. The NCC shall prepare a written report of the investigation that shall include a narrative of the incident, an identification of individuals interviewed and evidence reviewed, and findings and a determination. The report and determination shall be placed in the complaint file. Within 180 calendar days of receiving the complaint that warranted investigation, the NCC shall notify the complainant in writing of the findings of the investigation and the recommendations for resolution.

Step	Who	Does What
7	Complainant	**Appeal:** The person submitting the complaint may appeal the decision of the NCC by writing to HRiA President within 30 calendar days of receiving the NCC's decision. HRiA President shall issue a written decision in response to the appeal no later than 30 calendar days after its filing.

Notice of Nondiscrimination

HRiA shall provide continuing notice that it does not discriminate on the basis of race, sex, religion, age, national origin, color, marital status, handicap, disability, political beliefs, height, weight, genetic information, or sexual orientation in any of its programs or activities. Methods of notice shall accommodate those with impaired vision or hearing. At a minimum, this notice shall be posted in a prominent place in HRiA's offices or facilities. Methods of notice may also include publishing in newspapers and magazines and placing notices in HRIA's publications.

Where appropriate or upon request, such notice shall be in a language or languages other than English. The notice shall identify the current HRIA NCC as the responsible HRIA employee designated to coordinate HRIA's efforts to comply with its obligations under 40 CFR, Part 7. The text of the notice to be provided under this policy shall read as follows:

> It is the policy of HRiA not to discriminate on the basis of race, sex, religion, age, national origin, color, marital status, handicap, disability, political beliefs, height, weight, genetic information, or sexual orientation. In compliance with Title 40 of the Code of Federal Regulations (CFR), Part 7, HRiA has adopted an internal grievance procedure providing for prompt and equitable resolution of complaints alleging a violation of 40 CFR, Part 7. HRiA Director has designated the Chief Operating Officer as HRiA Nondiscrimination Compliance Coordinator (NCC). Laws and regulations related to this policy may be examined in the NCC's office.

1.0 PROGRAM OBJECTIVES

a. Project Title: Building on HEAL (Healthy Environments Advance Learning)

Project Location: Priority focus will be two to three school districts in MA environmental justice (EJ) communities. All MA public school districts, as well as targeted districts from EJ communities in other New England states, will be invited to participate in Learning Network activities (webinars and Summit) and have access to educational resources.

Applicant Information: Health Resources in Action (HRiA); 2 Boylston St. Boston, MA 02116

Main Contact: Stacey Chacker schacker@hria.org; Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization: HRiA is a national 501(c)3 non-profit public health organization with a mission to help people live healthier lives and create healthy communities through prevention, health promotion, policy, and research. HRiA has extensive expertise and deep relationships in asthma prevention and control, specifically in convening and facilitating the MA Asthma Action Partnership (MAAP) and the Asthma Regional Council of New England.

Are you applying for the Small CBO Set Aside Track for $150,000 projects NO

Project Abstract: *Building on HEAL* is an expansion of HRiA/MAAP's current efforts to build knowledge and capacity to improve environmental health conditions within MA schools, optimizing outcomes related to healthy childhood development, particularly for districts where students are most burdened by asthma and extreme heat. This project expands on HRiA/MAAP's current EPA funded project – *HEAL: Building Capacity for Resilient Schools in MA* – by providing more in-depth capacity building, education, wrap around technical assistance (TA), implementation assistance and $60,000 - $100,000/district to two to three high need schools in MA's most ethnically and racially diverse communities. Partner school communities will identify specific projects that are appropriate and attainable based on school (district) environment, identified priorities, and funding. *Building on HEAL* will also provide educational webinars on topics such as installing a cool roof, decarbonization of school buildings, state and federal funding, etc., as well as an Environmental Health in Schools Summit. Both will be open to any school district in MA, targeting specifically those in EJ communities, and open to districts in EJ communities across New England. *Building on HEAL* has the potential to directly impact at least 1,500 students, and to have long-term benefit to schools and communities across MA to address environmental conditions in schools.

Project Type(s): Public education and small project implementation

Special Considerations: N/A

Environmental Issue: Air, Climate/Heat

List of Project Partners: Metropolitan Area Planning Council (MAPC), MA Department of Public Health (MDPH), Public Health Institute of Western MA (PHIWM), Undaunted K-12, Yale School of Public Health - Dr. Krystal Pollitt, and Northeastern University School Health Academy at the School of Nursing.

Will you need to develop a QAPP for your project? No QAPP is needed unless a partner school chooses to conduct an indoor air quality monitoring project, in which case a QAPP will be developed as further explained in section 6.

ED_016126_00000267-00001

b. <u>Environmental and Public Health information of the Underserved Community</u>: *Building on HEAL* is an expansion of HRiA/MAAP's current efforts to build knowledge and capacity to improve environmental health conditions within MA schools, optimizing outcomes related to healthy childhood development, particularly for districts where students are most burdened by asthma and extreme heat. Participating school districts will be selected from those engaged in *HEAL: Building Capacity for Resilient Schools in MA*, HRiA's current project funded by the EPA (00A004 0 CH), to be completed by December 2024. It will also provide educational webinars and an Environmental Health in Schools Summit open to school stakeholders across MA and New England, targeting those from EJ communities.

Table 1 lists the priority communities and metrics indicating the need for investment in these communities. Based on 2017 data, proposed focus communities experience 2-4 times higher rates of emergency room (ER) visits due to uncontrolled asthma and have pediatric asthma prevalence rates that are significantly higher than the state average. They are socio-demographically diverse, with each community far exceeding the state average percentage of census block groups that meet one of the three EJ criteria.[1]

The school districts serving these communities also experience disproportionately poor outcomes related to educational achievement. These districts are more racially and ethnically diverse, have lower income, have student populations with higher needs than state averages, and have significantly higher dropout rates. Based on 2022 data, students in these eleven communities performed below the state average on the MA Comprehensive Assessment System tests for all grades tested and across all subjects.[2] Finally, and while reportable data are limited due to small numbers, ER visits related to heat stress were more than double the state rate in Brockton and significantly higher in Lawrence, New Bedford, and Springfield.[3] Worcester, Springfield, Holyoke, and Lowell school districts were among the few in MA that had early dismissal during a heat wave in June 2021.

Environmental/Public Health Issues: Compounded effects of COVID-19 and extreme weather events laid bare the health inequities experienced by communities of color, particularly EJ communities in MA. Low-income children of color experience cumulative and disproportionate environmental health burdens resulting from decades of public disinvestment and policy choices which has allowed for the concentration of polluting facilities in the neighborhoods where they live and attend school. Asthma, a chronic lifelong lung disease, affects school-age children and is one of the leading reasons for school absenteeism.[11] In 2020, approximately

ED_016126_00000267-00003

7.8% children in MA currently had asthma, with African Americans and Puerto Ricans carrying a disproportionate burden of cases.[12] In MA, asthma-related hospitalizations are almost three times as high among Blacks as Whites.[13] Nationally, Black individuals are about three times more likely to die from asthma than Hispanic or white individuals.[14]

Exposure to certain indoor and outdoor environmental factors, including pollutants that are exacerbated by extreme heat and climate change, can make asthma worse and in some cases cause asthma for both students and school staff. Hot school days disproportionately affect academic performance among students of color and low-income students.[15]

As part of the Environmental Public Health Tracking Program, MDPH has conducted indoor air quality testing and pediatric asthma surveillance in schools across MA. One report observed a statistically significant association between the presence of mold and moisture problems in schools and the prevalence of childhood asthma in the community.[16]

Environmental/public health results: The proposed project, *Building on HEAL*, seeks to expand upon existing efforts to educate, engage, and reduce exposure to environmental hazards and improve the environmental health in two to three selected school districts from the list above. The project will also provide capacity building around environmental health in schools for districts across the state. School districts are focused on education, and often lack the expertise and knowledge needed to identify environmental hazards. Even when hazards are detected, there is a lack of awareness of funding opportunities or other resources, and/or capacity to leverage and manage these resources to support building or schoolyard upgrades. School staff and students are often not properly trained in policies and procedures, and thus are unlikely to adhere to a plan. Finally, facilities planners and clean energy practitioners are not incentivized or prepared to recognize and correctly implement opportunities to promote health outcomes.

Awarded school districts will receive capacity building, training, wrap around TA, and funding, enabling school stakeholders (parents, students, nurses, custodians, teachers, community members, and/or administrators) to select and implement projects and/or design plans to reduce hazards and improve environmental health conditions. They will serve as case studies demonstrating how capacity building, collaborative problem solving, TA, and financial resources can help schools to address critical environmental health issues. *Building on Heal* has the potential to directly improve conditions for at least 1,500 students and their teachers in the two to three districts. Indirectly, through capacity building from webinars and the Environmental

Health in Schools Summit, the project will impact at least 60,000 students and 7,000 teachers throughout MA.

c. **Organization's Historical Connection to Underserved Community:** HRiA, through its MAAP program, has extensive experience and commitment to a coordinated approach for promoting healthy learning environments and applying a health and racial equity lens to programs that address asthma inequities across MA. Established in 2009, with on-going support from MDPH, MAAP consists of over 100 members and coordinates with representatives from state and city public health and housing agencies, schools, health care providers, community-based organizations, community health workers, local asthma coalitions, and occupational health and safety organizations. MAAP has subject matter expertise around asthma and over 14 years of experience in stakeholder engagement, including convening and facilitating asthma learning communities, summits, and trainings, as well as expertise in school-based asthma control through its Healthy Schools Committee. In 2019, HRiA/MAAP, in collaboration with MDPH, developed Clearing the Air: An Asthma Toolkit for Healthy Schools (Asthma Toolkit), an interactive toolkit providing policies, practices, and procedures, including links to other tools and resources to build capacity amongst diverse stakeholders around such strategies as safe cleaning and disinfecting, IPM, and ventilation. MAAP, MDPH, and partners disseminated the Asthma Toolkit broadly via social media, newsletters, and webinars, all of which advance student health.

In 2020, in collaboration with the MDPH, MAAP engaged over 60 MA stakeholders in a five-month process to develop the Strategic Plan for Asthma in MA: 2022- 2026. This plan leads with promoting health and racial equity – prioritizing the MA cities cited above with the greatest population of people of color; highest rates of poverty and economic hardship; and that are most burdened by asthma, COVID-19, air toxic cancer risk, and other chronic health conditions. It outlines broad goals and strategies focused on: schools, housing, outdoor air quality (AQ), and clinical care and linkages. The plan is still under review by MDPH (a review of the process is available in a MAAP newsletter here). Healthy Schools has been a priority since MAAP's inception, and there are currently over 20 members on MAAP's Healthy Schools Committee from a variety of sectors representing school health, community-based organizations, academia, regional planning, and state and local government.

To help advance our goal for healthy schools, HRIA/MAAP, with partners, applied for and was awarded a $200,000 EPA grant (00A004 0 CH) for *HEAL: Building Capacity for Resilient Schools in MA*. Through this project, we are expanding the Asthma Toolkit with additional resources focused on extreme heat and ventilation, and will be providing training and TA on policies and practices to address environmental asthma triggers, extreme heat, and ventilation to 5-7 school districts from the list above, as well as $5,000 to $7,000/district for a mini-project (we are releasing a simple application in April 2023, for engagement during the 2023-2024 academic year). We are also working to disseminate these new resources via webinars, newsletters, and listservs, to all MA public school districts and across New England. Our proposed project to the EJCPS Program, *Building on HEAL* will leverage these relationships and expand on the work from

our current project, and will provide more substantial financial resources, capacity building, wrap around TA, and in-depth learning to selected districts.

HRiA/MAAP is also helping to advance the goal of improved outdoor air quality via another project funded by the EPA: Enhanced Air Quality Monitoring for Communities Program. The Healthy Air Network is a project of HRiA/MAAP, the Public Health Institute of Western MA (PHIWM), Krystal Pollitt, PhD, P. Engineering, Yale School of Public Health (Yale), and others. It builds on the collaboration led by PHIWM, Yale, and community partners and resident advisors in Western MA, with the goal of expanding across MA and New England. The Healthy Air Network's website will serve as a universal platform to provide real-time, easily accessible, actionable data for any interested community across MA and New England monitoring for PM2.5 (and O_3 (ozone) where applicable) – with a focus and financial resources for community-based organizations in three EJ communities. To learn more – see this Fact Sheet.

Previously, HRiA managed the Boston Healthy Homes and Schools Collaborative (BHHSC); Boston Healthy Head Start Initiative; and Creating a Healthy Home and Managing Asthma training and certification program for home-based childcare providers. We are no longer running these grant funded programs. HRiA also collaborated with Boston Public Schools to support the Boston Healthy Schools Taskforce. Since 2020, HRiA has also managed the COVID-19 Community Grants Program, providing funding and TA and facilitating a learning/networking community to 90 community and faith-based organizations across MA working to reduce COVID-19 infections, morbidity, and mortality among Asian, Black, Indigenous, Latinx, and other people of color. In July 2023, the COVID-19 grant program will retain its model, but shift focus to supporting funded organizations through other public health priorities in their communities. Through this program, HRiA is working with organizations in each of the eleven prioritized communities for *HEAL*.

Building on HEAL will expand on and deepen our current work with schools, and leverage HRiA/MAAP's past work and relationships. It will be community-driven, enabling a range of stakeholders from individual schools/districts to select and develop more significant projects that will benefit their school communities.

d. EJCPS Model: *Building on HEAL* will utilize several elements of the EJCPS Model, most notably:

Element 1: Issue Identification, Community Vision, and Strategic Goal Setting: HRiA has led community-wide efforts to identify environmental challenges, envision solutions, and set goals in collaboration with community residents and other partners in multiple settings. We have led three processes to develop MA five-year plans in collaboration with MDPH – the latest for the Strategic Plan for Asthma in MA: 2022-2026 (as noted above, currently under final review with MDPH). Over 60 MAAP members from a range of sectors participated in a five-month process to develop the plan, which provides guidance and inspiration focused on asthma prevention and control. The Schools Goal is: *Establish healthy school environments that address asthma inequities through evidence-based asthma prevention and control policies and practices. Building on HEAL* seeks to address the following objectives under this goal: 1) *Improve indoor*

air quality to reduce asthma triggers in school settings; and 2) *Improve access to professional nursing education opportunities in areas of prevention and control of asthma for school nurses.* Selected school districts will identify issues, develop a vision, and select a project to work on to improve environmental conditions in one or more of their schools.

Element 2. Community Capacity-Building and Leadership Development: *Building on HEAL* will further develop and expand knowledge, community capacity, and leadership in selected school districts to implement a school-led project. It will build on the work of HRiA's current *HEAL* project offering more in-depth wrap around TA and more significant resources (a total of $200,000 will be distributed to two or three districts). We will encourage districts to build in stipends for parents, teachers, students, nurses, and others to support equitable engagement. We will also directly provide stipends/gift cards to support EJ communities' participation at our Environmental Health in Schools Summit – particulalry for parents or students. Finally, we will provide Continuing Nurse Education (CNE) credits and Professional Development Points (PDP) for teachers.

Element 4. Development of Multi-Stakeholder Partnerships and Leveraging of Resources: Schools will be at the center of *Building on Heal.* We will engage academia, community/non-profit organizations, and government to assist with capacity building, outreach, education, and TA. We will also solicit services from our Region One EJ Thriving Communities Technical Assistance Center, funded by the EPA. Partner organizations and community stakeholders will serve as advisors, and will be engaged in planning the Environmental Health in Schools Summit. See more details on partners in section f below.

Element 7. Evaluation, Lessons Learned, and Replication of Best Practices: We will reflect on lessons learned from both a process and outcomes perspective. We will document these in at least two case studies that will be shared widely across MA and New England to inspire project replication. We will also showcase the HEAL Champions (the participating district teams) and outcomes at the Environmental Health in Schools Summit, through workshops, webinars or publications through our partners, such as Metropolitan Area Planning Council and Undaunted, and will submit abstracts to present at conferences such those held by the American Public Health Association, MDPH, National Network of Public Health Institutes and/or the MA School Nurse Organization.

e. **Project Linkages:** *Building on Heal* supports EPA Strategic Plan Goal 2, Objective 2.1 by supporting capacity-building among school community stakeholders to address environmental asthma triggers and health conditions (poor indoor air quality and extreme heat), with a focus on low-income and ethnically and racially diverse districts where students are most burdened by asthma and extreme heat. The project promotes EJ by empowering communities at the school level to better understand risk factors, and how to mitigate risk by designing and implementing their own project, supported by TA and financial resources provided through *Building on HEAL*.

f. **Partner and Collaborate:** *Building on HEAL* involves partnerships with a range of stakeholders

ED_016126_00000267-00007

to support our goal of generating increased community-wide awareness of and capacity to address environmental risk factors. Below is a list of confirmed partners (they have provided letters of commitment):

- Metropolitan Area Planning Council (MAPC) is an independent state agency and the regional planning authority for the Greater Boston area, and a partner in our current *HEAL* project. MAPC will serve as the main project partner, assisting HRiA in providing wrap around TA to schools (anywhere in the state), identifying and recruiting subject matter experts to support school projects, and helping to plan webinars and the Environmental Health in Schools Summit. MAPC will also disseminate materials through their website, digital media, and communications networks with municipal staff, elected officials, and residents. Finally, they will help to engage, as needed, associations such as – the MA School Building Authority, MA Association of Health Boards, etc. MAPC supports capacity building to advance climate mitigation and adaption, has developed tools such as the Net Zero Playbook, and provides TA to municipalities to implement energy efficiency and renewable energy projects, including within school facilities. MAPC also led a process, Building Resilience to Climate Driven Heat – Metro Mayors Coalition Climate Task Force Plan, to develop a regional extreme heat preparedness plan for the Metro Boston Area centering public health and equity. MAPC participated in the planning for MA Strategic Plan for Asthma and serves on the MAAP Healthy Schools Committee. HRiA will provide a $44,000 subaward to MAPC, in compliance with EPA's Subaward Policy.

- MDPH, Asthma Prevention and Control Program will serve as an advisor for the Environmental Health in Schools Summit and will provide TA to the selected schools. They will also promote webinars and disseminate materials and information to community partners and to internal partners within MDPH. They have provided annual operating funding to MAAP since its inception in 2009 (currently approximately $45,000/year). They facilitate connections between MAAP, other MDPH departments, and other state agencies. MDPH was a key partner in creating the MA Strategic Plan for Asthma. They will not receive funding through *Building on Heal.*

- Northeastern University School Health Academy (NEUSHA) at the School of Nursing, will serve as an advisor on the project, will provide CNEs and PDPs for participants of webinars, the Environmental Health in Schools Summit, and for eligible HEAL Champions, and will help to promote the Summit. NEUSHA provides engaging, professional learning opportunities that benefit the health, safety, and achievement of all youth. NEUSHA supports school nurses and other school personnel in their efforts to provide evidence-based prevention and management practices to increasingly diverse school communities. NEUSHA has collaborated with HRiA/MAAP in the past to promote the Asthma Toolkit. HRiA will provide a $5,000 subaward to (NEUSHA), in compliance with EPA's Subaward Policy.

- Public Health Institute of Western MA (PHIWM), a community-based organization, will serve as an advisor on the project. This will include disseminating materials through their website, newsletters, and social media. If partner school districts choose to conduct air

ED_016126_00000267-00008

quality monitoring within schools, PHIWM will help facilitate the expansion of the Healthy Air Network to share data on air quality within schools. PHIWM convenes the Pioneer Valley Asthma Coalition and has a long history of working with local schools on improving asthma management and indoor air quality. Also, PHIWM has been an active member of MAAP for over ten years, participated in the planning for the MA Strategic Plan for Asthma, and serves on the Steering Committee and on the Healthy Schools Committee. HRiA will provide a $7,500 subaward to PHIWM, in compliance with EPA's Subaward Policy.

- Undaunted K-12 is a is a national nonprofit focused on supporting public schools to make an equitable transition to healthy zero carbon operation while preparing youth to build sustainable futures in a rapidly changing climate. They will serve as a content expert on accessing federal funds and as a connector to TA to retrofit existing school buildings for healthy zero carbon operation, present on a webinar or at the Environmental Health in Schools Summit, and collaborate, as a subcontracting advisor, if any of the selected communities chooses to work on healthy decarbonization of existing school buildings. HRiA will provide a $1,000 subaward to PHIWM, in compliance with EPA's Subaward Policy. This will increase, via school funding, if they are selected as a sub-contractor.

- Dr. Krystal Pollitt at Yale University School of Public Health will serve as a content expert and will help to plan the Environmental Health in Schools Summit. If a participating school district chooses to conduct indoor air quality monitoring, Dr. Pollitt will serve as a subcontractor to provide direction in installing low-cost air sensors, calibrating and maintaining a network, developing a web page focused on indoor air quality monitoring in schools, and adding to the Healthy Air Network. Dr. Pollitt's current research is focused on the health effects of indoor and outdoor pollutants using novel sensor technology. Dr. Pollitt is a lead partner in HRiA's MA Healthy Air Network, funded by the EPA, and has presented at MAAP and Asthma Regional Council of New England (ARC) meetings. HRiA will provide a $9,000 subaward in compliance with EPA's Subaward Policy. This will increase, via school funding, if they are selected as a sub-contractor.

Other potential partners include: MA School Nurses Organization (MSNO) and MA Parent Teacher Association to promote and/or cosponsor the Environmental Health in Schools Summit; MA Coalition for Occupational Safety and Health; (MassCOSH); University of MA Amherst Clean Energy Extension to provide TA to address indoor air quality and decarbonization; Dr. Patricia Fabian at Boston University School of Health as an advisor for planning the Environmental Health in Schools Conference; and Dr. Shanyn A Toulouse, Northeast Regional School Nurse Consultant, MDPH.

2.0 Project Activities / Milestone Schedule

a. **Project Activities**: *Building on HEAL* will expand on our current project; *HEAL: Building Capacity for Resilient Schools in MA* by continuing to foster knowledge and develop/support capacity to improve environmental health conditions within MA schools, optimizing outcomes for low-income, ethnically, and racially diverse districts where students are most burdened by

ED_016126_00000267-00009

environmental challenges like asthma and extreme heat. Below are the three main components of *Building on HEAL's* multi-pronged approach:

1) **Support and Build - HEAL Champions:** HRiA will select two to three school districts (of those participating in HRiA's current HEAL Ambassadors program) through a competitive application process to identify, plan, and implement an environmental health project that would benefit their school. HRiA and MAPC will provide and/or coordinate wraparound TA and capacity building services and will provide project funding (there will be $200,000 available jointly to the selected schools). Each school will engage parents, students, teachers, school health, facilities, administration, local community organizations, boards of health, and other stakeholders to select a project that promotes climate resiliency and/or improves indoor air quality. Examples of eligible projects include tree planting, creation of shade gardens, installation of cool roofs, development of maintenance manuals and plans for HVAC systems, and plans for larger decarbonization projects. Part of the TA support will include identifying state or federal funding sources that could be used to further support such projects – either as supplementary funding, for replication in additional schools, or for implementation of a larger plan. Schools will be required to include stipends or honorariums to promote equitable engagement of parents, teachers, nurses, and other constituents.

2) **Learning Network and Environmental Health in Schools Summit:** This will include a) Webinars on topics pertaining to potential environmental improvement projects, such as cool roofs, decarbonization, and federal funding opportunities for schools. When possible, we may leverage existing resources (such as CEU recordings from the Center for Green Schools) to provide these educational sessions; and b) The Environmental Health in Schools Summit designed to educate stakeholders from the K-12 school system on a variety of topics. The target audience for both the webinars and the summit will be MA school and district representatives (including teachers, nurses, facilities management/custodial services, parents, students and/or administrators), community-based organizations, municipal facilities planners, state government agencies, and other interested parties. Though the target audience will be school communities in EJ and Gateway cities in MA, HRiA will promote these opportunities across New England. We will leverage existing listservs and networks for outreach. To support participation from EJ communities, we will offer stipends for individual team members from prioritized school districts. We will also seek to provide CNEs for nurses, and CEUs for teachers. The idea for the Environmental Health in Schools Summit came from Dr. Shanyn Toulouse, School Nurse Consultant, inspired by an EPA conference she attended over a decade ago in D.C. focused on indoor air quality.

3) **Dissemination Campaign:** The campaign will make resources widely available to community members and schools, using diverse communication channels such as websites, social media, and the MAAP newsletter. As part of the campaign, HRiA will promote *Building on HEAL* at annual MAAP summits, providing a forum for representatives from participating schools to report on their progress. HRiA will also write 2-3 case studies on the projects, for broad dissemination.

ED_016126_00000267-00010

To accomplish the above goals and engagement, HRiA will carry out the following tasks:

Task 1: Identify and engage advisors/potential TA providers with expertise on program design, content, implementation, and/or outreach. In addition to the MAAP Healthy Schools Committee and project partners/advisors already named, HRiA and MAPC will identify advisors on a variety of topics as needed (e.g. expertise on cool roofs, HVAC maintenance, electrification of school buses, landscape architects, engineers, etc.). If possible, we will coordinate with the Region One EJ Thriving Communities Technical Assistance Center. HRiA will convene the MAAP Healthy Housing Committee five to six times/year and will convene and/or meet individually with other advisors on an as needed basis throughout the project. *Outputs: list of advisors and potential TA providers, meeting agendas and/or summaries/findings/advice.*

Task 2: Identify existing resources to support the project and to be included on website. For example: K12-InflationReductionAct-Final-Screen.pdf; HVAC Choices Report; Vent in Schools Report Jan 2023.pdf, etc. *Outputs: resources inventory.*

Task 3: Support and Build - HEAL Champions: HRiA will develop an invitation-only application process targeting school districts that have participated in the HEAL Ambassadors Learning Community. We will provide opportunities for one-on-one informational discussions about the opportunity. Applicant districts will be required to identify their lead champions – including representatives from school wellness committees, other school health staff, and/or representatives from facilities, and will be strongly encouraged to include school-based staff such as teachers, administration, other nurses, other wellness staff, custodians, as well as parents/guardian or student representatives. They will also be required to submit a signed agreement from the superintendent. As stated above, selected districts will receive capacity building assistance, specialized TA, and $60,000 to $100,000 to support engagement, including stipends for champions and for up to four other participants (including at least one parent/guardian or student representative).

Once two to three districts are selected, HRiA will lead Champions and other committee members through three to four virtual interactive workshops to provide information about potential projects and will hold individual meetings to provide TA to support them in developing goals, identifying professionals to work with them, developing scopes of work for services, and other components of action/implementation plans. HRiA will leverage HEAL Champion experiences as case studies for successful implementation of environmental health projects. These case studies will demonstrate that through our project model, school-led, environmental health interventions can be scalable across Massachusetts public schools. *Outputs: Two – three schools/districts participating, meeting agendas, webinar slides, summary of minutes, grant funding expended, and one project/district implemented. Projects will serve as pilots to demonstrate to other districts.*

Task 4: Implement Learning Network: HRiA will organize a minimum of four interactive

ED_016126_00000267-00011

virtual workshops on prevention/mitigation interventions for schools (e.g., shade gardens, impervious pavements, cool roofs, decarbonization of schools, federal funding opportunities for schools). These will be open sessions geared towards school stakeholders (teachers, nurses, parents, students), coalitions, associations, and officials, as well as municipal staff and officials engaged in facilities planning and decision-making. *Outputs: At least four workshops with at least 20 participants per workshop, workshop recordings and materials posted on-line and promoted, post-workshop survey results.*

Task 5: Environmental Health in Schools Summit: HRiA will organize this Summit – in person and live streamed - designed to educate K-12 Stakeholders on a variety of topics. Potential topics include: a) Air quality: how to interpret monitoring results, what results indicate the presence of harmful pollutants, and what practical steps can be taken to address concerning results; b) HVAC: how to maintain systems for optimal indoor air quality; c) Projects to address extreme heat such as, the benefits of a cool roof; and d) Leveraging state and federal resources for specific projects. The HEAL Champions will also present their work, sharing the impact of capacity building, process, plans and accomplishments to educate and inspire other districts. This summit is intended to spur learning and generate collaboration among school decision makers, parents, students, local government, and other advocates. Attendees will come away with ideas for strategies and resources for addressing environmental conditions, including air quality and extreme heat. HRiA will provide stipends to participants from EJ school districts, particularly parents/guardians, students and/or other community members. The goal of the summit will be to provide attendees with deeper and practical understanding of health risks related to environmental hazards, and what steps can be taken to mitigate risks. *Outputs: Summit invitation, 60 – 100 participants, meeting agenda, slides, and materials posted on-line and promoted, as well as recording of the Summit, and post-summit survey results.*

Task 6: Dissemination Campaign: HRiA will disseminate tools, workshop recordings, and information about professional development and TA opportunities using diverse communication networks and methods, including via HRiA's networks in MA (and beyond MA via ARC), EPA's Asthma Community Network, Childhood Asthma Leadership Coalition, and National Network of Public Health Institutes (NNPHI). HRiA will also regularly update the MAAP Healthy Schools webpage and newsletter; develop case studies from HEAL Champions, and promote *Building on HEAL* project work at a MAAP Summit and a MAPC Public Forum during Heat Prep Week, at national and state conferences (e.g. APHA, NNPHI Annual Conference, MDPH's Ounce of Prevention, MSNO Annual Conference, Superintendents and School Committee Annual Meeting). *Outputs: Updated MAAP Healthy Schools webpage with linked resources, two to three case studies – distributed through MAAP and partners, and via New England, and presentation at a minimum of two convenings.*

b. Milestone Schedule

Table 2: Activities, Timeline, and Milestones

Project Activities	Timeline	**Milestones**

ED_016126_00000267-00012

1.1 Consult with MAAP Healthy Schools Committee and advisors – via group meetings, individual consultations and/or key informant interviews. Up to four times/year, as needed.	Q1 - 11	Agendas, attendance, lists of meetings, summary of finding/advice, etc. Focus will be on getting feedback for: school application, content experts for presentations and/or to serve as sub-contractors to provide TA to schools, identify resources to be used throughout the project, and planning the Environmental Health for Schools Summit.
2.1 Identify existing resources to be used throughout the project and shared with participants and/or posted on MAAP website.	Q1 - 12	Resource inventory, and evidence shared – either via email, MAAP newsletter, or on MAAP website.
3.1 Develop simple HEAL Champions application for and template agreement letter for superintendent	Q1 – 2	Application & agreement letter completed.
3.2 Solicit applications from eligible School districts through targeted communication, MAAP newsletter and informational calls.	Q1- 2	Targeted communication materials disseminated, outreach and informational calls completed, applications received.
3.3 Review applications and select two to three districts. Develop formal contracts.	Q2 - 3	Contracts for 2- 3 Ambassador districts completed.
3.4 Project kick-off with grantees (Champions and others).	Q3-5	Meeting agenda, slide deck, list of attendees.
3.5 Provide and/or coordinate wrap around TA and capacity building services to committees of two or three school districts focused on selecting and carrying out projects.	Q3 - 12	TA documented (and providers if subcontractors), school district committees identified, developed plan and/or project to be implemented. Funding provided to school districts to carry out projects. Projects implemented. Intention is to provide CNEs and PDPs for engagement/project planning and implementation.
4.1 Develop and/or identify content for interactive virtual sessions on a variety of prevention/mitigation interventions for schools, and/or resources, and promote.	Q3-8	Promotional materials, agendas, and slides for four (or more) sessions.

ED_016126_00000267-00013

4.2 Recruit workshop participants and host four sessions.	Q3–8	Attendee lists (at least 20 participants/session), workshop materials and recordings, post session survey results. CNEs and PDPs offered to participants.
5.1 Plan Environmental Health in Schools Summit.	Q7 -9	Speaker list, location secured, promotional materials.
5.2 Hold Environmental Health in Schools Summit (in person and livestreamed)	Q9, 10, or 11 TBD	Agenda, slide decks, attendance list (60 – 100), post summit survey results, meeting materials posted on MAAP website and EPA's Asthma Community Network.
6.1 Develop case studies, based on the HEAL Champion Projects.	Q10, 11, 12	Two to three case studies – based on learnings, successes, and challenges from two to three districts.
6.2 Disseminate: Update MAAP's Healthy Schools webpage/portal and promote via MAAP newsletter, social media, and partners' communication platforms and websites.	Q2 –12	Case studies, recorded sessions, and relevant materials posted in MAAP newsletter, on MAAP website, promoted via partners' websites, newsletters, and to asthma programs in other New England states (in addition to what is described above). Also – when relevant, shared via the (national) Childhood Asthma Leadership Coalition and the EPA's Asthma Community Network.
7.1 Meet with EPA Program Officer and submit reports.	Q1-Q12	Meet with Program Officer monthly or as requested, submit reports semi-annually.

c. Itemized Budget Sheet / Budget Narrative: See attached.

3.0 <u>Environmental Results – Outputs, Outcomes, and Performance Measures</u>

a. **Environmental Results:** See attached logic model.

b. Performance Measurement Plan: *Building on HEAL* will monitor project performance though the following metrics: number of 1) Schools reached through all communication pathways and number of participants/school; 2) Participants in webinar and Summit; 3) Projects implemented and/or plans developed by HEAL Champions with grant funding; 4) Students impacted by projects once implemented; 5) Case studies developed; 6) Log of posts or earned media around

the *Building on HEAL* program, environmental hazards, and asthma in schools. Additionally, HRiA will develop and implement post-workshop surveys and key informant interviews to a) assess participant knowledge gained; b) action that participants intend to take or intent to take; c) identify additional training or TA needs; and d) adapt project activities based on participant feedback at key intervals.

c. **Sustainability Plan and Community Vision** HRiA is well-equipped to sustain the project and ensure long-term impact. HRiA has a long history working with schools, school districts, and childcare providers on environmental health programs through coalitions and partnerships focused on asthma, specifically through MAAP, since 2009. MAPC has worked with municipal and school administration to implement clean energy projects in school buildings and on municipally owned property. MAPC has also aided in procurement of equipment used in schools, including HEPA air filters and PPE during the COVID-19 pandemic. Existing partners listservs reach thousands of contacts and include strong localized coalitions working on public health and climate issues. *Building on HEAL* will help build capacity across MA and ensure that the impacts continue after the grant period. HRiA/MAAP will support districts institutionalizing best practices through the formal adoption of policies or procedures to reduce environmental hazards, as well as identifying opportunities to continue to provide TA to schools and districts on these issues – via use of our Asthma Toolkit and experiences from *Building on HEAL.* The case studies from the HEAL Champion projects will exist beyond the project period and will help make lessons learned and best practices accessible to those in MA and across the country. Through our case studies and our project model (wrap-around TA support, accessing existing state and federal funding, peer learning) we will demonstrate the scalability of school-led, environmental health-focused interventions across Massachusetts public schools and beyond. Finally, we will help to make the case for resources for the HEAL Champion districts and other districts in EJ communities to improve environmental conditions in schools.

4.0 <u>Programmatic Capability:</u>

a. **Organizational Experience:** *Building on HEAL* will leverage HRiA's extensive experience providing training and TA in the asthma prevention and control space, as well as community grantmaking. Founded in 1957, HRiA is a Boston-based national 501(c)3 non-profit organization with expertise in developing, implementing, and evaluating solutions for clients who share a vision of improving population health. HRiA's core services include capacity building assistance (e.g., training, technical assistance, and strategic planning); research and evaluation (e.g., assessment, research, and program evaluation); and grantmaking for biomedical research and community health initiatives. Across these core services, HRiA is dedicated to advancing racial justice and health equity. HRiA has gained deep expertise in asthma prevention and control through the management of MAAP, a network of diverse stakeholders committed to implementing policies and practices that address environmental conditions to reduce inequities in asthma outcomes and ARC. Other HRiA asthma-related projects have included participating in the Boston Healthy Homes and Schools Collaborative (BHHSC), Boston Healthy Head Start Initiative, delivery of our Creating a Healthy Home and Managing Asthma training and certification program for home-based childcare providers, our New England Asthma

Innovations Collaborative, a $4.2 million contract with the Centers for Medicare and Medicaid Innovation program to support community-health worker (CHW) led asthma home visiting across New England, and it's replication project – the New Jersey In-Home Asthma Intervention Pilot Project. The latter project has led to the spread and replication of CHW asthma home visiting programs, and coverage for CHWs by Medicaid in both MA and NJ.

b. **Staff Experience / Qualifications of Project Manager (PM)**

Stacey Chacker, HRiA's Director, Policy and Practice has over thirty years of experience providing strategic leadership on policy, advocacy, program planning/partnership development, and research on environmental health/justice issues at the community and governmental levels. She has led HRiA's asthma and environmental health work for 14 years, including directing MAAP and ARC, and the New England Asthma Innovation Collaborative, which was awarded an EPA National Environmental Leadership Award in Asthma Management in 2016. Prior to HRiA, Stacey worked in East Boston MA for 18 years, leading a community organizing department focused on EJ and community development, youth development, and engagement and implementation of projects. This included six community-driven projects to redevelop Boston Public Schoolyards (BPS), the first serving as a model for the Boston Schoolyard Initiative that supported the transformation of most of the Boston Public Schools into dynamic centers for recreation, outdoor classrooms/learning, and community, and the redevelopment of a brownfield into a four-acre passive park. She is proficient in Spanish and French, and parent of previous BPS student. Stacey will serve as the PM for *Building on HEAL.*

Geraldine Medina, Senior Program Manager, HRiA is skilled at providing TA and capacity building to community and faith-based organizations related to public health, including COVID-19, indoor and outdoor Air Quality, asthma, and climate and health. Prior to HRiA, Geri worked in clinical research, including a Boston University (BU) study using a text-based application to address pediatric dental health disparities, and at the Framingham Heart Study. She also worked for a nonprofit that provides FMT treatments for microbiome-mediated diseases and conducts microbiome research. Geri obtained her MPH at BU School of Public Health, with a focus on Environmental Health. Through her studies, she has participated in AQ and water quality monitoring in schools in MA EJ communities, and home inspections for environmental health hazards. She serves on the board of Groundwork Somerville, and in 2020 ran a mutual aid association in Boston. She is fluent in Spanish and attended BPS.

Paula Giraldo is Public Health Associate at HRiA, sponsored by the Center for Disease Control's Public Health Associate Program. In October 2023, she will transition to a HRiA employee. Paula has worked on all MAAP projects, including our current *HEAL* project – contributing to outreach, research, communications, and organizing. Paula holds a B.S. from BU in Biology, minor in Public Health. Previously, she taught Boston high school students and served as Director of Education & Advocacy at the University Blood Initiative. She is fluent in Spanish.

c. **Expenditure of Awarded Grant Funds**: HRiA has over 60 years of experience working with federal, state, and local government, as well as nonprofit community-based organizations and

ED_016126_00000267-00016

philanthropy. HRiA's reach and impact is supported by an Administration and Finance staff with expertise in contracts and budget management and human resources. In Fiscal Year 2022, HRiA had a budget of approximately $48 million, with over 200 active projects. HRiA adheres to GAAP and FASB guidelines for non-profit and government grant accounting. HRiA is audited annually, in compliance with OMB Circular A-133 by an independent auditing firm. HRiA's independent auditors' review of our FY2021 financial records and fiscal policies and procedures found no material weaknesses or significant deficiencies. HRiA qualifies as a "low risk" auditee under OMB standards. Revenue and expenses for all programs are tracked at the project or grant level to ensure against over-spending or inappropriate billing. Each program has an annual budget and monthly monitoring reports are generated by the fiscal office. The Project Manager will meet regularly with fiscal staff to review project revenue and expenses and ensure that the project is being carried out on time and on budget. She will also be responsible for communicating regularly with EPA contacts to ensure that project expectations are being met and required reporting is being carried out.

5.0 Past Performance: HRiA has successfully managed the federal and non-federal grants / cooperative agreements listed below during the past three years. We also hold contracts with each of the New England states to support MAAP and ARC. Table 3 offers a summary of our past grant management experience.

Table 3: HRiA Past Grant Management Experience

Funded Assistance Agreements	Funding Agency	Funding Amount	Completed	Successful completion & management?	History of on-time reporting?
HEAL: Building Capacity for Resilient Schools in MA	EPA – 00A004 0 CH	$200,000	To be completed 02/29/24 (NCE requested – as we did not receive our contract until May and started in 6/1/22)	Will successfully complete by 12/31/24 (with NCE). Our timeline is impacted by the school calendar – and the best times to outreach.	Yes
Asthma and COVID-19 – Lessons, Challenges, and Opportunities; Grant ID Number:	EPA HC00A007760	$30,000	To be completed 5/31/23	Will successfully complete by 5/31/23	Yes

ED_016126_00000267-00017

Narrowing the Gap: Promoting Racial and Health Equity in Asthma Across New England	EPA Region One HC 00A00524-0	$25,000	Completed 9/30/21	Yes	Yes
LEAH Knox Scholars Biomedical Research Program	NIH Secondary Education Partnership Award	$1,200,000	To be completed 8/31/2023	Will successfully complete by 8/31/2023	Yes
The NJ In-Home Asthma Intervention Pilot Project	The Nicholson Foundation	$400,000	6/1/21	Yes	Yes

6.0 Quality Assurance Project Plan (QAPP) Information: If any school district chooses to conduct indoor air quality monitoring as their project, then *Building on HEAL* will need a QAAP. If this is the case, we will work with Dr. Krystal Pollitt to modify the QAAP that we are developing for the EPA funded project, the MA Healthy Air Network. Otherwise, we do not anticipate the need for a QAAP.

EPA Form 5700-54 (Rev 4-02)

MAPC
METROPOLITAN AREA PLANNING COUNCIL

SMART GROWTH AND REGIONAL COLLABORATION

March 22, 2022

Stacey Chacker
Director, Policy and Practice
Health Resources in Action
Ex. 6 Personal Privacy (PP)

Dear Ms. Chacker,

On behalf of the Metropolitan Area Planning Council (MAPC), I am pleased to provide a letter of support and commitment to Health Resources in Action (HRiA)/Massachusetts Asthma Action Partnership (MAAP) for your application to the Environmental Protection Agency (EPA) in response to Funding Opportunity Number: EPA-R-OEJECR-OCS-23-01, Environmental Justice Collaborative Problem Solving Cooperative Agreement Program for the Building on HEAL (Healthy Environments Advance Learning) Project.

MAPC is the Regional Planning Authority for the Greater Boston region. MAPC is committed to equity, and that commitment is a principal focus in our projects and in our community engagement efforts. Through our work we have emphasized the need for more transparency and resources around local air quality for our residents, particularly as it impacts their respiratory and cardiovascular health. For this reason, we participated in the development of the 2022-2026 Strategic Plan for Asthma in MA and actively contribute to implementation of the plan, including the currently EPA-funded Healthy Environments Advance Learning: Building Capacity for Resilient Schools in MA Project (HEAL).

We support HRiA/MAAP's new proposed project, Building on HEAL. This award will allow MAAP to further support building of community capability and leadership to address environmental health issues in schools. Moreover, the project will work to optimize outcomes particularly for low-income, ethnically and racially diverse districts where students are most burdened by asthma and extreme heat.

MAPC commits to participate in this project by:

- Serving as a content expert on municipal planning and operations, local public health services, and public officials
- Assisting in the provision and/or coordination of technical assistance for selected districts and engagement public officials and community stakeholders
- Presenting either on a webinar or at the Environmental Health in Schools Summit
- Collaborating, as a subcontractor, if any of the selected schools chooses to implement HEAL interventions

We applaud your application to engage multiple school districts, including parents, teachers, students, school nurses, facility managers, community members and/or administrators in districts, in order to identify, plan and implement projects that will improve environmental health in these

Stacey Chacker
Director, Policy and Practice
Health Resources in Action
Ex. 6 Personal Privacy (PP)

Dear Ms. Chacker,

On behalf of the Asthma Prevention and Control Program (APCP) at the MA Department of Public Health, I am pleased to provide a letter of support and commitment to Health Resources in Action (HRiA)/Massachusetts Asthma Action Partnership (MAAP) for your application to the Environmental Protection Agency (EPA) in response to Funding Opportunity Number: EPA-R-OEJECR-OCS-23-01, Environmental Justice Collaborative Problem Solving Cooperative Agreement Program for the Building on HEAL (Healthy Environments Advance Learning) Project.

The APCP is committed to addressing asthma triggers including outdoor air pollution. Our Strategic Plan for Asthma in Massachusetts calls for increased air quality monitoring and education on impacts of poor air quality on asthma. Working with organizations such as yours, and your cooperating partners, we are able to leverage the state's investment in Asthma programming.

The APCP supports HRiA/MAAP's new proposed project, Building on HEAL. This award will allow MAAP to will further engage and support community capacity building and leadership to address environmental health issues in schools -- working to optimize outcomes particularly for low-income, ethnically and racially diverse districts where students are most burdened by asthma and extreme heat. The APCP commits to participate in this project by:

- Serving as a content expert on Asthma Prevention and Control
- Presenting either on a webinar or at the Environmental Health in Schools Summit
- Providing Technical Assistance to selected schools chooses

The APCP applauds the purpose of your application to engage two to three school districts– including parents, teachers, students, school nurses, facility managers, community members and/or administrators in districts – to identify, plan and implement a project to improve environmental health in their selected school(s), and more broadly to build knowledge and capacity to take action across school districts.

We look forward to hearing about the success of your proposal and collaborating on this project. If you have any questions, please contact me at michelle.warner@mass.gov

Sincerely,

Michelle Warner

Michelle Warner, MPH
Director, Asthma Prevention and Control Program

PUBLIC HEALTH INSTITUTE OF WESTERN MASSACHUSETTS

PARTNERS FOR HEALTH EQUITY

Pioneer Valley Asthma Coalition

March 27, 2023

Stacey Chacker, Director, Policy and Practice
Health Resources in Action

Ex. 6 Personal Privacy (PP)

Dear Ms. Chacker,

On behalf of the Public Health Institute of Western MA, I am pleased to provide a letter of commitment to Health Resources in Action (HRiA) in support of your proposal for the Building on HEAL (Healthy Environments Advance Learning) in response to the Environmental Protection Agency (EPA) Funding Opportunity Number: EPA-R-OEJECR-OCS-23-01, Environmental Justice Collaborative Problem Solving Cooperative Agreement Program.

The Public Health Institute of Western Massachusetts convenes the Pioneer Valley Asthma Coalition. We have a long history of working with local schools on improving asthma management and indoor air quality. Currently are working with schools in Holyoke and Springfield to monitor outdoor air Pollution, as part of our joint Healthy Air Network (HRIA/MA Asthma Action Partnership (MAAP) is a new partner). We are a member of MAAP's Healthy Schools Committee and participated in the planning process to develop the 2021-2026 Strategic Plan for Asthma in MA.

We support HRiA/MAAP's new proposed project, Building on HEAL – which will further engage school districts and schools on environmental health issues – working to optimize outcomes particularly for low-income, ethnically and racially diverse districts where students are most burdened by asthma and extreme heat. Their plan to invest further and significant funding in schools for planning and/or implementation, will help to set the groundwork for more significant changes. The goals of this program align with our organizational priorities, and we are committed to supporting this project by:

- Continuing to act in an advisory role for the project
- If any schools choose to conduct indoor air quality (AQ) monitoring, expanding what will soon be our joint statewide/New England region Healthy Air Network to include a section on indoor AQ
- Disseminate materials developed through our website, newsletters or social media.

We look forward to hearing about the success of your proposal and collaborating on this project. If you have any questions please contact me at shudson@publichealthwm.org or Ex. 6 Personal Privacy (PP)

Sincerely,

Sarita Hudson
Senior Director of Programs & Development/Pioneer Valley Asthma Coalition

UNDAUNTEDK12
Climate-resilient schools. Future-ready students.

Letter Of Commitment

April 5, 2023

From: Sara Ross
Co-founder, UndauntedK12
Ex. 6 Personal Privacy (PP)

To: Stacey Chacker
Director, Policy and Practice
Health Resources in Action
Ex. 6 Personal Privacy (PP)

Dear Ms. Chacker,

On behalf of UndauntedK12, I am pleased to provide a letter of support and commitment to Health Resources in Action (HRiA)/Massachusetts Asthma Action Partnership (MAAP) for your application to the Environmental Protection Agency (EPA) in response to Funding Opportunity Number: EPA-R-OEJECR-OCS-23-01, Environmental Justice Collaborative Problem Solving Cooperative Agreement Program for the Building on HEAL (Healthy Environments Advance Learning) Project.

UndauntedK12 is a national nonprofit focused on supporting America's public schools to make an equitable transition to healthy climate-resilient decarbonized operation. Many schools in Massachusetts have inadequate (or zero) cooling or ventilation, along with older gas and oil heating systems. We are working to enable Massachusetts communities to take advantage of Inflation Reduction Act funds to upgrade our schools for lower-cost healthier climate-resilient operation, for better student health and lower operating costs today and so we're better prepared for the next pandemic or extreme heat wave.

We support HRiA/MAAP's new proposed project, Building on HEAL. This award will allow MAAP to will further engage and support community capacity building and leadership to address environmental health issues in schools -- working to optimize outcomes particularly for low-income, ethnically and racially diverse districts where students are most burdened by asthma and extreme heat.

UNDAUNTEDK12
Climate-resilient schools. Future-ready students.

We commit to participate in this project by:

- Serving as a content expert on accessing federal funds and as a connector to technical support to retrofit existing school buildings for healthy zero carbon operation.
- Presenting either on a webinar or at the Environmental Health in Schools Summit
- Collaborating, as a subcontracting advisor, if any of the selected communities chooses to work on healthy decarbonization of existing school buildings

We applaud the purpose of your application to engage two to three school districts– including parents, teachers, students, school nurses, facility managers, community members and/or administrators in districts – to identify, plan and implement a project to improve environmental health in their selected school(s), and more broadly to build knowledge and capacity to take action across school districts.

We look forward to hearing about the success of your proposal and collaborating on this project. If you have any questions, please contact me at sara@undauntedk12.org.

Sincerely,

Sara Ross, co-founder, UndauntedK12

About UndauntedK12

UndauntedK12 is a national nonprofit focused on supporting America's public schools to make an equitable transition to healthy zero carbon operation while preparing youth to build sustainable futures in a rapidly changing climate.

New Haven CT 06520

Dear Ms. Chacker,

I am pleased to provide this letter of commitment to Health Resources in Action (HRiA)/ Massachusetts Asthma Action Partnership (MAAP) for your application to the Environmental Protection Agency (EPA) in response to Funding Opportunity Number: EPA-R-OEJECR-OCS-23-01, Environmental Justice Collaborative Problem Solving Cooperative Agreement Program for the Building on HEAL (Healthy Environments Advance Learning) Project.

I am an Associate Professor in the Department of Environmental Health Sciences at the Yale School of Public Health and hold a cross-appointment in the Department of Chemical and Environmental Engineering. My PhD explored the impact of short-term air pollutant exposure on cardiorespiratory health as part a collaborative project with King's College London, University of Birmingham, Utrecht University and the Dutch National Institute for Public Health and the Environment. I was subsequently awarded a Canadian Thoracic Society Postdoctoral Research Fellowship focused on characterizing personal exposure to complex environmental exposures and their impact on respiratory health. My current research combines my interests and expertise in exposure science and analytical chemistry and aims to understand the health effects of indoor and outdoor pollutants using novel sensor technology.

I support HRiA/MAAP's new proposed project, Building on HEAL. This award will allow MAAP to will further engage and support community capacity building and leadership to address environmental health issues in schools - working to optimize outcomes particularly for low-income, ethnically, and racially diverse districts where students are most burdened by asthma and extreme heat. I commit to participate in this project by:

- Serving as an advisor broadly and by helping to plan content and identify speakers for the Environmental Health in Schools Summit for K-12 Stakeholders.

- Collaborating, as a subcontractor, if any of the selected schools chooses to conduct indoor air quality monitoring as their selected project. This would include directing them how to install low-cost air sensors, calibrating and maintaining the network, developing a page focused on indoor air quality monitoring in schools – adding to our Healthy Air Network, etc.

Thank you for the opportunity to express my support and commitment to this project. I applaud the purpose of your application to engage two to three school districts– including parents, teachers, students, school nurses, facility managers, community members and/or administrators in districts – to identify, plan and implement a project to improve environmental health in their selected school(s), and more broadly to build knowledge and capacity to take action across school districts. I look forward to continuing our successful and productive work together.

I look forward to hearing about the success of your proposal and collaborating on this project. If you have any questions, please contact me at Ex. 6 - Personal Privacy (PP)

Sincerely,

Krystal Pollitt, Ph.D., P.Eng.
Associate Professor
Yale School of Public Health
Yale School of Engineering and Applied Science

Northeastern University
Bouvé College of Health Sciences
School of Nursing, School Health Academy

April 12, 2023

Stacey Chacker
Director, Policy and Practice
Health Resources in Action
Ex. 6 Personal Privacy (PP)

Dear Ms. Chacker,

As Co-Directors of the Northeastern University School Health Academy (NEUSHA), we are pleased to provide a letter of support and commitment to Health Resources in Action (HRiA)/Massachusetts Asthma Action Partnership (MAAP) for your application to the Environmental Protection Agency (EPA) in response to Funding Opportunity Number: EPA-R-OEJECR-OCS-23-01, Environmental Justice Collaborative Problem Solving Cooperative Agreement Program for the Building on HEAL (Healthy Environments Advance Learning) Project.

NEUSHA offers continuing education to school nurses and school health personnel in MA as well as all 50 states. As part of the Northeastern University's School of Nursing, accredited by the American Nurses Credentialing Center (ANCC), we provide nursing continuing professional development (NCPD) and contact hours and PDP's to school health personnel.

- We are participating, by acting as the accredited provider of NCPD for HRiA/MAAP's current Healthy Environments Advance Learning (HEAL), and would be happy to participate in this next project.
- We disseminate materials developed through our website www.neusha.org (e.g. weekly e-newsletters, posting on relevant platforms and/or networks)
- We help to identify and strengthen connections and relationships with school districts/schools with the highest needs in low-income and minority communities.

We support HRiA/MAAP's new proposed project, Building on HEAL – which will further engage school districts and schools on environmental health issues – working to optimize outcomes, particularly for low-income, ethnically and racially diverse districts where students are most burdened by asthma and extreme heat, as well as to organize a statewide summit focused on environmental health in schools. Their plan to invest further and significant funding in schools for planning and/or implementation will help to set the groundwork for more significant changes. The goals of this program align with our organizational priorities, and we are committed to supporting this project by:

- Serving as an advisor role for the project overall, and assisting with planning the summit focused on environmental health in schools.
- Disseminate materials developed through our website (e.g. weekly e-newsletters, in relevant platforms and/or networks)

We clearly understand that the purpose of the EPA **Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement** application is to build community capacity, leadership, and collaboration on air quality, climate resilience, environmental justice, and health equity in order to address air pollution and improve health outcomes.

We applaud the purpose of the EPA **Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement** application to ensure that community residents have a voice in project planning and implementation, advocacy and decision-making around air quality and climate resilience activities.
We look forward to hearing about the success of your proposal and collaborating on this project. If you have any questions, please contact us at Ex. 6 - Personal Privacy (PP) or Ex. 6 - Personal Privacy (PP)

Sincerely,

Ex. 6 Personal Privacy (PP), EX. 6 - Personal Privacy (PP) phone, EX. 6 - Personal Privacy (PP) fax.
When an employee believes that policies, procedures, and practices have been improperly, inadequately

or unfairly applied, s/he is encouraged to express her or his concern to the Executive Director in an attempt to resolve the problem through discussion. If the resolution of the problem at this level is unsatisfactory to the employee s/he may discuss the situation with a Board-appointed Ombudsperson who will act as fact finder and/or mediator to explore ways of resolving the dispute constructively and informally. If the employee is not satisfied with the outcome of the informal procedure, s/he may initiate the formal grievance procedure. The employee will state in writing her or his grievance and present that written document to the Executive Director, who will transmit it to the Board's Executive Committee. The Executive Committee and the Ombudsperson will review the case with the employee and their decision on the issue will be final.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: The Nature Conservancy

Address: Ex. 6 Personal Privacy (PP)

City: Providence

State: Ex. 6 Personal Privacy (PP) Zip Code: 02906

B. Unique Entity Identifier (UEI): THG1JDUEQKQ8

C. Applicant/Recipient Point of Contact

Name: Scott Comings

Phone: Ex. 6 - Personal Privacy (PP)

Email: scomings@tnc.org

Title: Associate State Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☐ Yes	☒ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☐ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☐ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☐ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☐ Yes	☒ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☐ Yes	☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Compliance with the Civil Rights Act is jointly addressed by staff from Human Resources, Legal, Ethics and Compliance, and the various Business Units implementing programs and activities.

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

Complaints are managed through the Ethics and Compliance Helpline. The Nature Conservancy Ethics & Compliance Helpline (convercent.com) Other requests have been managed at the location in which the request was made. TNC is reviewing its procedures to ensure that all actions are appropriately handled and conform with TNC's obligations under the Act.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Sara M Swan	Grants Specialist	04/13/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

April 7, 2023

Dear John,

The City of Providence Parks Department Forestry Division enthusiastically supports the *Collaborating for Tree Equity in Providence RI* proposal to the U.S. EPA Environmental Justice Collaborative Problem Solving RFA.

This proposal aligns directly with our mission to trees to create an equitable urban forest to maximize its many benefits, as well as to ensure that these benefits are equitably shared throughout Providence.

The City of Providence Parks Department Forestry Division looks forward to partnering with you in this work by providing technical support and guidance, as will be detailed in our subaward. I look forward to providing coordination with my counterparts in other City departments, including Planning, Public Works, Parks Sustainability and Policy which have all been engaged in various aspects of the development of the PVD Tree Plan and will be essential for our successful implementation of the plan.

Our budget for the project will include $10,000 for the City Forester's time, and we will provide $10,000 in in-kind contributions.

The City of Providence Parks Department Forestry Division could not be more excited about this collaboration. The opportunity to join forces and collaborate with local organizations that share our mission of developing an equitable and healthy urban forest in Providence that will grow and support the community in countless ways for generations of residents.

Sincerely,

A. J. Elton

April 7, 2023

Dear John,

On behalf of Movement Education Outdoors, I would like to extend our enthusiastic support for the proposed project *Collaborating for Tree Equity in Providence RI* proposal to the U.S. EPA Environmental Justice Collaborative Problem Solving RFA.

This project aligns directly with MEO's mission which works to create equity in health across Providence, especially through ensuring healthy air and accessible green spaces for all. Our work leads with engaging Rhode Island youth from communities of color and low-income communities who historically and disproportionately suffer from harms and risks to their environmental health. With youth leading the way, MEO cultivates ways of being in relation to the land air, water, and soil that acknowledge our deep connection to our environment, honor our Black and Indigenous ancestors who cared for the environment before us, and center frontline communities in how we shape the future.

Movement Education Outdoors looks forward to partnering with you in this work by recruiting and onboarding additional community representatives to the steering committee, identify and train community PVD Tree Ambassadors and begin community outreach, as will be detailed in our subaward.

The last couple of years of being in community with PVD Tree members and steering committee as a project coordinator has brought hope and faith that all communities can and will receive equitable access to air, water and soil for food sustainability. The continued collaboration, leadership and ongoing implementation of creative ways for equity in land conservation from The Nature Conservancy has been a very supportive and intentional. MEO wholeheartedly supports *Collaborating for Tree Equity in Providence RI.*

Sincerely,
Joann Ayuso

PROVIDENCE
NEIGHBORHOOD
PLANTING
PROGRAM

John Torgan
Rhode Island Director
The Nature Conservancy
159 Waterman Street
Providence RI 02906

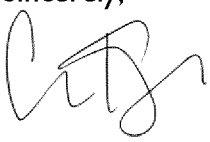
April 7th, 2023

Dear John,

Providence Neighborhood Planting Program (PNPP) looks forward to partnering with The Nature Conservancy to implement the *Collaborating for Tree Equity in Providence RI* proposal to the U.S. EPA Environmental Justice Collaborative Problem Solving RFA.

This proposal aligns directly with our mission to engage communities in planting and stewarding trees in order to create a healthier and more equitable urban forest in Providence.

PNPP will partner in this work in the following ways, as will be further detailed in our subaward:



- Providing Project Management for all implementation aspects of the proposed project.
- Hiring, training and supervising the PVD Tree Plan Coordinator.
- Organizing the Community Tree Planning Forums, managing the Community Tree Ambassadors, developing collateral materials, and integrating the relevant planting programs into the process. (Role of the PVD Tree Plan Coordinator).
- Designing and implementing the residential yard tree planting pilot.
- Coordinating the companion right-of-way and public-space plantings via our Neighborhood Street Tree Award program, to be shaped and located by the community-identified priorities.

P.O. Box 5897 Providence, RI 02903 • Ex. 6 Personal Privacy (PP) • Ex. 6 Personal Privacy (PP)

To support this work, PNPP will provide our technical expertise in tree planting and maintenance, as well as our skills and experience in collaborative and community-engaged urban forest management approaches. Our budget for the project will include $180,000 for PNPP staff salaries over 3 years: $60,000 for the 30% FTE Project Manager role, and $120,000 for the 50% FTE PVD Tree Plan Coordinator position. We will also provide $125,000 in matching funds to conduct the tree plantings on streets and in public spaces, as guided by the planting priorities identified by residents through the Community Tree Planning Forums.

This project represents the critical next steps in implementing the recommendations of the community-created PVD Tree Plan, and in developing an approach to managing Providence's urban forest that is rooted in collaborative governance and guided by the needs of those most impacted by the burdens of tree inequity and environmental injustice. We believe this work will serve as a valuable model within our city, across Rhode Island, and beyond, and we are delighted to partner with The Nature Conservancy to make it a reality.

Sincerely,

Cassie Tharinger
Executive Director, PNPP

PROFESSIONAL EXPERIENCE

Providence Neighborhood Planting Program (PNPP), Executive Director - Fall 2015 - Present

- Oversees all aspects of PNPP's programming, personnel and administrative work.
- Plans and coordinates twice yearly community-driven street tree plantings across Providence involving hundreds of neighborhood organizations and volunteers.
- Develops equity-focused community engagement strategies to expand programmatic reach into low-tree-canopy neighborhoods.
- Created and continues to oversee "Providence Community Tree Keepers" Program, training residents in structural pruning and maintenance of young urban trees.
- Identifies and implements partnership opportunities to cultivate and enhance community-based tree planting, stewardship, and education activities for youth and adults.
- Initiated and continues as a project lead for the PVD Tree Plan--a public-private collaborative initiative to create a citywide equity-focused strategic plan for Providence's urban forest.

Mount Hope Farmers Market, Manager - April 2012 - September 2017

- Founding manager of weekly year-round Farmers Market on Historic Farm Trust.
- Built market infrastructure; contracted & coordinated 20 + regular vendors; conduct advertising and outreach to the community regarding local food and markets, coordinated market volunteers.
- Oversaw programming for farm and market related events and activities (music, farming/cooking demonstrations, fundraisers, family/youth-focused activities).
- Coordinated Market Volunteers and built market infrastructure.
- Worked with other RI Farmers Markets to establish and coordinate RI Farmers Market Collaborative
- Incorporated SNAP/WIC and Farm Fresh RI's newly created Bonus Bucks program into market, to make healthy and local food in the East Bay more affordable and accessible.

Snake Den Farm, Farm Manager - 2013 - 2014

- Manager of newly formed nonprofit incubator farm in Rhode Island.
- Lived on site, supported and coordinated general maintenance of farm property.
- Developed program models and mechanisms for recruiting, selecting and supporting new farmers.

Assistant Orchard Manager/Apprentice to John Bunker, Fruit Tree Historian & Orchardist, 2009 – 2011

- Managed test/research orchard in Palermo, ME.
- Conducted outreach & education related to identifying and cultivating heirloom fruit varieties.

Fedco Tree Nursery, Nursery Staff - 2009 – 2010

- Detail-oriented and physically demanding work organizing supplier deliveries and customer orders, and maintaining live plant stock.
- Assisting and educating customers during in-house sales events.
- Researched and documented plant and tree varieties for Fedco tree catalog.

Out on a Limb Apple CSA - Co-Founder/Coordinator, 2009 – 2010

- Established and administered Out on a Limb Apple CSA, in Portland ME; a subscription-based delivery of rare and heirloom apples sourced from small local orchards to over 50 customers.

RI State Council on the Arts, Individual Artist Program Asst & Gallery Manager - 2006 – 2009

- Administrated Statewide Artist Fellowship Granting Program.
- Advised and supported Rhode Island artists and craftspeople in grant applications and project design.
- Managed rotating community gallery in State Dept of Administration office building.
- Conducted outreach, organization and setup for annual Fellowship Artist Exhibition.

OTHER EXPERIENCE

Rhode Island State Forest Conservation Commission, Board Member - 2022 - Present

Reclaim RI, Board Member - 2020 - 2022

- On leadership team of all-volunteer community-organizing group working on campaigns for economic and racial justice in Rhode Island.

Urban Greens Co-op Market, Founding Board Member - 2004 - 2020

- Worked collaboratively to develop a small buying club into consumer-owned cooperative, opening an 8,500 sq ft retail grocery store in Providence RI in 2019, which currently has over 2,000 member-owners
- Acted as Volunteer Coordinator, Local Food Order Coordinator, Urban Greens Buying Club, 2004-2009

Hill Orchards, Red Planet Vegetables & Super Chilly Farm, Volunteer/Work Trade - 2004 – 2020

- Work planting, cultivating, harvesting, pruning and end-sales on several small-scale farms and orchards in RI and ME.

Manton Ave Community Garden & Bridgham Street Garden, Co-founder/Gardner - 2005 – 2009

- Worked, in collaboration with neighborhood associations, nonprofits and community members to start two community gardens in the Olneyville and West End neighborhoods of Providence.
- Built raised beds, signs, fences, organized youth gardening programming, crafted garden guidelines and structures, and participated as a gardener.

Dirt Palace Art Collective, Artist in Residence - 2004 – 2006

- Participated in running a window gallery, library, and multiple studio facilities housed in the Dirt Palace; conducted physical maintenance and improvement on space, served as Dirt Palace representative to the Olneyville Neighborhood Collaborative.

EDUCATION:

2005 **Brown University,** Providence, RI. *A.B., Art Semiotics*. (Courses in Film, Culture & Visual Media Theory, and Video Production. Minor fields: American Studies, Environmental Literature.)

2003 **University College Cork,** Cork, Ireland. Study Abroad. (Courses in Film History & Theory and Irish Studies.)

Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) Providence, RI 02908 · Ex. 6 - Personal Privacy (PP) · Ex. 6 - Personal Privacy (PP)

EXPERIENCE

The Nature Conservancy — **Director Climate and Cities Programs / Providence Metro Program Manager**
Providence, R.I. — April 2016 – present

- Lead programs to position the State of Rhode Island to address climate change through ambitious greenhouse gas reduction policies, facilitating rapid deployment of properly sited renewable energy, and increasing the use of nature-based strategies to improve resilience. Through fundraising and contract partnerships, grew the staff of one to now 4.5 FTEs for climate and energy policy, municipal resilience, and climate justice.
- Oversee The Nature Conservancy's Rhode Island urban environmental program to develop and implement nature-based solutions to address environmental challenges and promote social equity.
- Coordinate state and federal government relations to promote public policy and funding to achieve conservation results.
- Administration and coordination of the PVD Tree Plan process to develop community-led strategies for tree equity in Providence. Raised $280,000 budget from private philanthropy to support engaging community members and consultants over a 2-year period.
- Founding member of the Providence Stormwater Innovation Center to showcase natural stormwater solutions, elevate the industry community of practice across public and private sectors.
- As a founding partner of Climate Jobs Rhode Island, helped develop the framework to unite environmental and labor leaders to accelerate state action on climate change and build a just transition to our clean energy future.
- As Chair of the state Executive Climate Change Coordinating Council Advisory Board, develop recommendations for a state climate dashboard and gather community feedback on the state's climate justice priorities.
- Co-facilitated Urban Sustainability Directors Network Equity Foundations training for 42 Rhode Island environmental advocates.

City of Providence — **Director of Policy / Acting Director of Policy**
Providence, R.I. — April 2014 – March 2016

- Tracked policy at the local, state and federal level and executed programs to advance the Mayor's positions related to education, economic development, health, financial management, housing, sustainability, and public safety.
- Supervised the Office of Healthy Communities, the Director of Intergovernmental Affairs, the Office of Sustainability, the Director of Partnerships and Development, and policy office staff and coordinated cross-departmental Policy Team.
- Successfully managed the grant proposal and site visit for the National Resource Network to earn their second largest technical assistance grant of $225,000 to engage stakeholders in developing a ten-year financial model for City finances.
- Managed research and preparation for, community leader participation in, and reports from the Summer Learning Task Force, Career and Technical Education Task Force, and the Mayor's Advisory Council to Reduce Gun Violence
- Coordinated consultants for and City participation in the Upper Narragansett Bay Regional Stormwater Management District Feasibility Study across two administrations.

City of Providence — **Director of Sustainability**
Providence, R.I. — December 2011 – January 2015

- Coordinated grant proposals generating $325,000 and launched the feasibility study for six municipalities in the Upper Narragansett Bay region to develop a regional solution to funding and managing stormwater.
- Coordinated programs to analyze the City's energy expenses and reduce consumption through efficiency and other cost saving measures and initiated feasibility studies for renewable energy on City-owned properties.
- Engaged City employees and more than 100 community leaders in the creation of Providence's first comprehensive sustainability action plan, Sustainable Providence, with goals and metrics for energy, food, water, waste, land use and transportation.
- Developed and implemented communication, education, enforcement, and infrastructure strategies to transition Providence residents to the new RecycleTogether program.
- In response to community-identified need, developed Lots of Hope urban agriculture program to lease City-owned properties to farmers and build an urban greenhouse to extend the growing season.

- Developed and implemented the Providence Composts! pilot project for residential food waste composting for 105 families.
- Coordinated across departments to prepare for the purchase and retrofit of 17,000 streetlights to reduce City energy consumption and costs by $2 million per year.

Clean Water Action — **New England Co-director / Rhode Island Director**
Providence, R.I. — December 2000 – November 2011

- Directed New England programs and projects including supervising staff and developing and managing budgets.
- Cultivated new donors, wrote grant proposals and direct mail appeals, and organized events to raise $175,000 toward annual budget for Rhode Island office. Raised additional funds to support solid waste campaigns in Connecticut and Massachusetts.
- Raised over $500,000 in grants while coordinating the New England Zero Mercury Campaign. The Rhode Island campaign won first-in-the-nation policies to phase out products that contain mercury. New England state legislation to restrict the sale of mercury-containing products prevented 14 tons of mercury from entering the environment from 2000-2006.
- As Multi-state Mercury Products Campaign coordinator, developed grant proposals and reports and provided campaign support for 20 state campaigns to phase out the sale of mercury containing products and promote their collection and recycling.
- Provided campaign materials and policy development for states promoting e-waste producer responsibility laws as policy co-chair of the national Electronics TakeBack Campaign.
- Coordinated campaign plans to promote sustainable transportation funding as co-chair of the Rhode Island Coalition for Transportation Choices, an alliance of 47 environment, public health, labor, business, senior and youth organizations.
- Coordinated the 17 Rhode Island member organizations of the Coalition for Water Security to campaign for successful passage of the Water Use and Efficiency Act of 2009.
- As coordinator of the Rhode Island Climate Coalition, built grassroots and business support for the Renewable Energy Standard Act passed in 2004.
- Assisted strategy development and implementation for the community-based Lead Pipe Initiative to prevent exposure to lead in drinking water by stopping the Providence Water Supply Board's partial replacement of lead service lines and encouraging the full replacement of lead pipes.

Peace Action — **Organizing Director / Field Director / Field Organizer**
Washington, D.C. — April 1997 – November 2000

- Designed and implemented national and regional campaign and organizational development trainings for campaigns and coordinated national strategy meetings for local organizers from 27 states.
- Mobilized state affiliates to engage in national campaigns and coordinated media strategy to increase national visibility.
- Oversaw telephone membership outreach program generating $280,000 in revenue, supervised 97,000-piece direct mail membership renewal and acquisition program, launched door-to-door membership canvass operation generating 1,400 new members, and designed membership newsletter with circulation of 30,000 and other campaign materials.
- Participated in management team to coordinate all national office functions.
- Participated in development of national office gender caucus to promote women's leadership and gender justice.

Physicians for Social Responsibility / Maine Chapter — **Executive Director**
Portland, ME — June 1993 – April 1997

- Coordinated media events and materials for nuclear disarmament and domestic violence prevention programs.
- Coordinated annual giving and membership renewal program, maintained membership database, and wrote and published newsletter.

Peace Action Maine — **Interim Director / Program Director / Associate Director**
Portland, ME — June 1993 – April 1997

- Coordinated statewide activist skills trainings for network of 75 volunteers; supervised Peace Voter campaign staff.
- Oversaw writing, production, and distribution of newsletter, brochures, and outreach materials, and coordinated media releases.
- Managed membership renewal and recruitment programs and developed annual budget plans with committee chairs and implemented major donor fundraising program to increase annual budget by 15%.

Connecticut Public Interest Research Group **Citizen Outreach Director**
Hartford, CT May 1990 – September 1991

- Coordinated fundraising, advocacy and public education drive for the National Campaign Against Toxics.
- Managed three assistant directors to recruit and train a citizen outreach staff of up to 60 people, and planned and implemented letter writing campaigns and petition drives in key legislative districts.

WORK HISTORY

City Forester and Director of the Forestry Division *June 2022 – Present*

City of Providence, Rhode Island

- Manages the Forestry Division within the City's Parks Department, and guides the vision, protection, and expansion of the urban forest to promote public health, environmental equity and sustainability, and quality of life.
- Manages an inventory of over 27,400 trees, 13 union tree workers, a fleet of 15 vehicles/equipment, annual budget of over $1.2 million, $500,000 in annual contractor tree maintenance and planting.
- Establishes citywide tree policy, enforces ordinance regulations, establishes tree management priorities and best practices.
- Works directly with other City department personnel, elected officials, not-for-profit organizations, community groups, and State and Federal agencies on tree issues and work that support the City's forestry program.
- Reviews development plans with other City Departments for conformance with the City Code of Ordinances.
- Enforces the public tree regulations contained in the City Code of Ordinances. Includes inspection and approval for the removal of "significant trees" on private property.
- Leads tree-related emergency storm efforts and manages in-house and contractor crews during storm events. Works with Parks Department Directors and other City officials on storm preparedness and response.
- Determines training needs for Forestry Division personnel and schedules trainings to promote staff development, best practices, and crew safety.
- Prepares specifications and bids for contract work related to City trees; manages, inspects, and approves contractor work; and processes contractor invoices. Includes contracts for tree planting, block pruning, young tree maintenance, emergency storm work, and treatment for pests/diseases.
- Coordinates with local utilities on tree pruning standards, work scheduling, and public awareness.
- Manages tree inventory using Davey Resource Group TreeKeeper and collaborates with other divisions to schedule work orders with Asset Essentials.

Research and Teaching Assistantship *January 2020 – May 2022*

University of Massachusetts Amherst, Department of Environmental Conservation, Amherst, Massachusetts

- Research: UMass Urban Forestry Lab research assistant
- Teaching: Natural Resource Conservation Human Dimensions of Natural Resources course 2020, 2021, 2022

Arborist *April 2015 – April 2017*

City of Richmond Department of Public Works, Forestry Division, Richmond, Virginia

- Managed an inventory of over 65,000 trees, 120,000 planting locations, 8 tree workers, a fleet of 30 vehicles/equipment, annual budget of over $3.5 million, $1.2 million in annual contractor tree maintenance and planting.
- Coordinated tree maintenance and plantings with Richmond Tree Stewards volunteers.
- Maintained Davey Resource Tree Keeper inventory of street trees.
- Approved tree maintenance and planting permits; reviewed plans for new development within the city; consulted on all aspects of trees to city agencies.
- Served as city liaison for community volunteer service day projects.

ED_016126_00000383-00001

- Wrote and managed a $5,600 grant to the VA Department of Forestry for tree planting at a city elementary school that had fallen into disrepair - fall 2015.

Project Manager *May 2014 – April 2015*

Messer Contracting, Glen Allen, Virginia

- Managed installation of commercial and government landscape, hardscape, and irrigation systems.
- Managed a staff of 6-10 employees.

Consulting Arborist and Plant Health Care Manager *April 2012 – May 2014*

Arborscapes LLC, Richmond, Virginia

- Managed the Plant Health Care Department which annually grossed $400,000+.
- Trained and scheduled seasonally appropriate arboriculture tasks for 15 staff, consisting of both ISA Certified Arborists and VNLA Certified Horticulturists.
- Consulted with residential and commercial clientele on tree and shrub health and structure, offering treatment options to maintain plant health.
- Maintained treatment and service records in ArborGold database software.
- Managed purchasing of pesticides and equipment.
- Regularly presented lectures on horticulture and arboriculture related topics for professional and public audiences of all ages.
- Managed contracts and relationships with service providers such as stump grinding, crane work, traffic control, Dominion power, Miss Utility, and wholesale nurseries.

Integrated Pest Management Technician *March 2010 – April 2012*

Bartlett Tree Experts, Springfield, Virginia

- Responsible for monitoring, evaluating, and providing plant health care needs for clients' property using sustainable integrated pest management techniques.
- Performed all required ground and climbing duties of pruning and removing trees and shrubs for health and structure.

Committee Clerk *December 2009 – March 2010*

Virginia House of Delegates, Richmond, Virginia

- Served as Committee Clerk for Commerce and Labor, Finance, Science and Technology, Health, Welfare and Institutions, and Counties, Cities, and Towns.
- Worked with Committee Chairman to prepare meeting dockets.
- Performed general administrative work such as preparing dockets for committee members and providing necessary materials for committee meetings.
- Responsible for ensuring all constitutional, statutory, and policy requirements were followed while Delegates were in committee.

Maintenance and Operations Technician *June 2008 – December 2009*

Parks and Recreation, Mecklenburg, North Carolina

- Maintained positive public contact- addressed questions about the parks, greenways and its plants and animals.
- Built and repaired trails, bridges and related greenway infrastructure.
- Pruned and removed dead or declining trees.

Arborist *April 2005 – June 2008*

North Carolina Zoological Park, Asheboro, North Carolina

- Planted, climbed, removed, and pruned trees according to industry standards.
- Utilized integrated pest management techniques for plant health care.
- Managed tree database records.

Horticulturist *March 2004 – April 2005*

North Carolina Zoological Park, Asheboro, North Carolina

- Managed North American continent zone of property; including planting, weeding, pruning, watering, fertilizing.
- Designed and installed landscapes including native plant collections and Sonoran Desert plant collections.
- Instructed Environmental Science high school classes in outdoor laboratory exercises to study forest health on zoo property.

Arborist *June 2003 – February 2004*

Tech Tree Experts, Blacksburg, Virginia

- Managed ground tasks involved in the pruning and removal of trees.
- Pruned trees to improve their health and structure.

Landscape Assistant *May 2002 – September 2002*

Montgomery County Parks and Recreation, Montgomery, Virginia

- Maintained turf in county parks and facilities.
- Chalked baseball fields.

Student Intern *May 2001 – August 2001*

Marie Selby Botanical Garden, Sarasota, Florida

- Led programs for Environmental Science high school classes.
- Studied plants and landscape design.
- Maintained landscapes; including planting, weeding, pruning, watering, fertilizing.
- Maintained tropical plants, orchids, and other epiphyte collections; including repotting, watering, and staging blooming plants for display house.

Nursery Assistant *April 2000 – August 2000*

Watkins Nursery, Chesterfield, Virginia

- Structurally pruned young nursery trees.
- Propagated and planted nursery stock.
- Maintained greenhouse plants; including transplanting, watering, weeding, and fertilizing.
- Installed main line irrigation systems for field grown nursery operation.

EDUCATION

Master of Science, University of Massachusetts, Amherst *Expected Graduation 2022*

Amherst, Massachusetts

- Major: Environmental Conservation
- Focus: Forest Resources and Arboriculture
- Thesis: Exploring Urban Forestry Non-Governmental Organizations in the Temperate Forest Region of the United States

Bachelor of Science, University of Massachusetts, Amherst *Graduated 2020*

Amherst, Massachusetts

- Major: Natural Resource Conservation
- Focus: Urban Forestry and Arboriculture

Municipal Forestry Institute, Society of Municipal Arborists *Graduated 2017*

- Leadership and managerial aspects of urban forestry
- Leadership and management tools of program administration, coalition building, strategic thinking, program planning, and public relations

Associate of Agriculture, Virginia Polytechnic and State University *Graduated 2002*

Blacksburg, Virginia

- Major: Agricultural Technology
- Focus: Landscape Design and Turfgrass Management

Founding Director

Results focused, quality driven professional with extensive training in exceptional communication, demonstrating consistent achievement of objectives, strong multi-tasking, service skills, and dedication to organizational goals.

Core knowledge and Skills Areas:

- Facilitation
- Outdoor Leader/ Advocate for green spaces
- Communicates effectively orally and in writing
- Fluent in American Sign Language and Spanish
- Train and mentor colleagues and employees
- Curriculum and Program Development
- Develop and implement strategies
- Mindfulness - Fostering self-awareness

Education

Master in Science in Rehabilitation Science
California University of Pennsylvania July 2014

Bachelor of Science in Exercise Physiology
University of Massachusetts - Boston Massachusetts 2003

Associate in Science in Physical Therapy Assistance
Becker College - Worcester Massachusetts 1997

Professional Experience

Movement Education Outdoors

Founder, Executive Director **September 2018 -current**

Attention to detail, strong collaborative skills, integrous

- Planning and operation of project budget
- Establishing procedures for all functions and for the day-to-day operation of the organization
- Establish and maintain relationships with various organizations throughout the state and utilize those relationships to strategically enhance MEO's Mission
- Oversee marketing and other communications efforts including encouraging participation via newsletters, social media, and other means to stimulate program interest
- Review and approve contracts for services
- Supervise and works with other volunteers as a team member to plan, organize, develop, schedule, run and evaluate programs and specials events including but not limited to: Outdoor experiences, Environmental Education programs, multiple special events, and other programs
- Provides support for overall comprehensive outdoor activities program for children, family, and adult populations
- Provide Lead facilitation on Outdoor activities including mindfulness and is a primary contact for clients and staff on day of event

Roger Williams University/ School of Continuing Studies – Providence RI

Admission Counselor **October 2016 –September 2018**

Positive energy, exceptional communication skills, creativity, and enthusiasm

- Initiates contact with prospective students, parents, counselors and communicates specifics about academic programs
- Encourages prospective students to apply and attend: explains the admissions and financial aid process
- Visits and provide information session to prospective high school students and community-based organizations
- Develops and implements specific recruitment projects and management tasks as assigned
- Telephones and or e-mails prospective students, exhibiting a consistent effort to contact them
- Maintains a steady flow of communication with prospective students via e-mail, social media and phone calls
- Provide employment and job market statistics to prospective students
- Assist students in identifying their personal and professional goals through a tailored enrollment coaching that aligns to student career and professional goals

Restore Fitness – Providence, RI

Founder- Owner In-Home Personal Trainer **June 2015 – October 2016**

Good interpersonal skills, works well with others, motivates and encourages

- Created promotional materials to advertise and promote growth
- Developed and maintained an evening community boot camp for donations to go towards LGBTQ homeless adults
- Fitness assessments including functional movement, strength, flexibility and cardiovascular functions
- Developed an exercise program for the participant based on fitness assessment results and the participant's personal goals
- Instructed participants one-on-one using safe and proper techniques
- Conducted follow-up phone calls and follow-up fitness assessments
- Maintained appropriate records, inventories, reports and information
- Manage payroll, office procedures and administrative tasks, established contacts with new client

Momentum Fitness- Providence RI

Personal Trainer/ Health coach **August 2012 - July 2015**

Results driven, logical and methodical approach to achieving task and objectives

- Fitness assessments including body fat composition, strength, flexibility and cardiovascular functions
- Developed an exercise program for the participant based on fitness assessment results and the participant's personal goals
- Instructed participants one-on-one using safe and proper techniques
- Conducted follow-up phone calls and follow-up fitness assessments
- Maintained appropriate records, inventories, reports and information

Military Experience- Fort Devens MA

Army Reserve 94th Infantry Division **June 1989- July 1996**

76 Papa Accounting and Inventory Specialist E-4

- Stock control and accounting specialist processes the diskettes and print a materiel release order for repair parts
- Establishes and maintains stock records and other documents such as inventory, materiel control, accounting and supply reports
- Establishes and maintains automated and manual accounting records, posts receipts and turn-ins
- Performs dues-ins and dues-outs accounting

Professional Development

- Trauma Informed Mindfulness Holistic Life Foundation 2019
- Mindful Schools Training 2018
- Radical Dharma Workshop 2018
- Outdoor Leadership Training with YOP/AMC 2018
- Army Leadership Training 1995

Form 990 required: Yes

Dear Taxpayer:

We're responding to your request dated Mar. 05, 2021, about your tax-exempt status.

We issued you a determination letter in March 1954, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

We also show you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If you're required to file a return, you must file one of the following by the 15th day of the 5th month after the end of your annual accounting period:

- Form 990, Return of Organization Exempt From Income Tax
- Form 990EZ, Short Form Return of Organization Exempt From Income Tax
- Form 990-N, Electronic Notice (e-Postcard) for Tax-Exempt Organizations Not Required to File Form 990 or Form 990-EZ
- Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation

According to IRC Section 6033(j), if you don't file a required annual information return or notice for 3 consecutive years, we'll revoke your tax-exempt status on the due date of the 3rd required return or notice.

You can get IRS forms or publications you need from our website at www.irs.gov/forms-pubs or by calling Ex. 6 Personal Privacy (PP) Ex. 6 - Personal Privacy (PP)

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m.,

United States Department of the Interior

OFFICE OF THE SECRETARY
Washington, DC 20240

Nonprofit Organization
Indirect Cost Negotiation Agreement

EIN: 53-0242652

Date: 07/11/2022

Organization:

The Nature Conservancy
4245 North Fairfax Drive, Suite 100
Arlington, VA 22203

Report Number: 2022-0240

Filing Ref.:
Last Negotiation Agreement
dated: 05/10/2021

The indirect cost rates contained herein are for use on grants, contracts, and other agreements with the Federal Government to which Public Law 93-638 and/or 2 CFR Part 200 apply subject to the limitations contained in Section II.A. of this agreement. The rates were negotiated by the U.S. Department of the Interior, Interior Business Center, and the subject organization in accordance with the authority contained in applicable regulations.

Section I: Rate

Start Date	End Date	Rate Type	Name	Rate	Base	Location	Applicable To
07/01/2022	06/30/2023	Fixed Carryforward	Indirect	22.40 %	(A)	All	All Programs
			Fringe Benefits	44.75 %	(B)	All	Regular Salaries
			Fringe Benefits	13.00 %	(C)	All	Short-Term Salaries
			Fringe Benefits	13.25 %	(D)	All	Foreign Salaries

(A) Base: Total direct costs, less external transfers and the value of land sold or donated to government agencies and other conservation organizations. Equipment costs valued between $5,000 and $50,000 are included in the base limited to the first year of capitalization. **All subawards, regardless of dollar amount, are included in the direct cost base for purposes of computing the indirect cost rate.**

(B) Base: Total salaries and wages for regular employees.

(C) Base: Total salaries and wages for short-term employees.

(D) Base: Total salaries and wages for foreign employees.

Note: The foreign salaries fringe benefit rates refer to benefits that are paid centrally by The Nature Conservancy's (TNC) headquarters. Additional benefits are paid locally by TNC's foreign locations which are charged directly to government awards

DocuSign Envelope ID: 046AA751-08AA-4EC5-9921-CED5C3AEDC40

Section I: Rate (continued)

Treatment of fringe benefits: Fringe benefits applicable to direct salaries and wages are treated as direct costs; fringe benefits applicable to indirect salaries and wages are treated as indirect costs.

Treatment of paid absences: (a) For employees paid on TNC's U.S. payroll, the costs of vacation, holiday and sick leave pay are included in the organization's fringe benefit rate and are not included in the direct costs of salaries and wages. Claims for direct salaries and wages must exclude those amounts paid or accrued to employees for periods when they are on vacation, holiday or sick leave. Other paid absences are billed directly. (b) For employees paid on local payrolls in other country programs, paid absences are billed directly.

DocuSign Envelope ID: 046AA751-08AA-4EC5-9921-CED5C3AEDC40

Section II: General

A. **Limitations:** Use of the rate(s) contained in this agreement is subject to any applicable statutory limitations. Acceptance of the rate(s) agreed to herein is predicated upon these conditions: (1) no costs other than those incurred by the subject organization were included in its indirect cost rate proposal, (2) all such costs are the legal obligations of the grantee/contractor, (3) similar types of costs have been accorded consistent treatment, and (4) the same costs that have been treated as indirect costs have not been claimed as direct costs (for example, supplies can be charged directly to a program or activity as long as these costs are not part of the supply costs included in the indirect cost pool for central administration).

B. **Audit:** All costs (direct and indirect, federal and non-federal) are subject to audit. Adjustments to amounts resulting from audit of the cost allocation plan or indirect cost rate proposal upon which the negotiation of this agreement was based will be compensated for in a subsequent negotiation.

C. **Changes:** The rate(s) contained in this agreement are based on the accounting system in effect at the time the proposal was submitted. Changes in the method of accounting for costs which affect the amount of reimbursement resulting from use of the rate(s) in this agreement may require the prior approval of the cognizant agency. Failure to obtain such approval may result in subsequent audit disallowance.

D. **Rate Type:**

1. Fixed Carryforward Rate: The fixed carryforward rate is based on an estimate of the costs that will be incurred during the period for which the rate applies. When the actual costs for such period have been determined, an adjustment will be made to the rate for a future period, if necessary, to compensate for the difference between the costs used to establish the fixed rate and the actual costs.

2. Provisional/Final Rate: Within six (6) months after year end, a final indirect cost rate proposal must be submitted based on actual costs. Billings and charges to contracts and grants must be adjusted if the final rate varies from the provisional rate. If the final rate is greater than the provisional rate and there are no funds available to cover the additional indirect costs, the organization may not recover all indirect costs. Conversely, if the final rate is less than the provisional rate, the organization will be required to pay back the difference to the funding agency.

3. Predetermined Rate: A predetermined rate is an indirect cost rate applicable to a specified current or future period, usually the organization's fiscal year. The rate is based on an estimate of the costs to be incurred during the period. A predetermined rate is not subject to adjustment.

E. **Rate Extension:** Only final and predetermined rates may be eligible for consideration of rate extensions. Requests for rate extensions of a current rate will be reviewed on a case-by-case basis. If an extension is granted, the non-Federal entity may not request a rate review until the extension period ends. In the last year of a rate extension period, the non-Federal entity must submit a new rate proposal for the next fiscal period.

F. **Agency Notification:** Copies of this document may be provided to other federal offices as a means of notifying them of the agreement contained herein.

G. **Record Keeping:** Organizations must maintain accounting records that demonstrate that each type of cost has been treated consistently either as a direct cost or an indirect cost. Records pertaining to the costs of program administration, such as salaries, travel, and related costs, should be kept on an annual basis.

H. **Reimbursement Ceilings:** Grantee/contractor program agreements providing for ceilings on indirect cost rates or reimbursement amounts are subject to the ceilings stipulated in the contract or grant agreements. If the ceiling rate is higher than the negotiated rate in Section I of this agreement, the negotiated rate will be used to determine the maximum allowable indirect cost.

I. **Use of Other Rates:** If any federal programs are reimbursing indirect costs to this grantee/contractor by a measure other than the approved rate(s) in this agreement, the grantee/contractor should credit such costs to the

DocuSign Envelope ID: 046AA751-08AA-4EC5-9921-CED5C3AEDC40

affected programs, and the approved rate(s) should be used to identify the maximum amount of indirect cost allocable to these programs.

J. **Other:**

1. The purpose of an indirect cost rate is to facilitate the allocation and billing of indirect costs. Approval of the indirect cost rate does not mean that an organization can recover more than the actual costs of a particular program or activity.

2. Programs received or initiated by the organization subsequent to the negotiation of this agreement are subject to the approved indirect cost rate(s) if the programs receive administrative support from the indirect cost pool. It should be noted that this could result in an adjustment to a future rate.

3. This Negotiation Agreement is entered into under the terms of an Interagency Agreement between the U.S. Department of the Interior and the cognizant agency. No presumption of federal cognizance over audits or indirect cost negotiations arises as a result of this Agreement.

4. Organizations that have previously established indirect cost rates—exclusive of the 10% *de minimis* rate—must submit a new indirect cost proposal to the cognizant agency for indirect costs within six (6) months after the close of each fiscal year.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: United Charitable

Address: 44921 George Washington Blvd Suite 230

City: ASHBURN

State: VA: Virginia Zip Code: 20147-6320

B. Unique Entity Identifier (UEI): S8ZHQ9CRZFT3

C. Applicant/Recipient Point of Contact

Name: Isaac Leeth

Phone: Ex. 6 Personal Privacy (PP)

Email: fsp@unitedcharitable.org

Title: Compliance Manager

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☒ Yes ☐ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Richard Hodges, Program Manager, Ex. 6 Personal Privacy (PP), NH 03227, richard@retreeus.org, Ex. 6 - Personal Privacy (PP)
Stacy Summitt, Controller, Ex. 6 Personal Privacy (PP), Edinburg, VA 22824, stacy@unitedcharitable.org Ex. 6 - Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

United Charitable Employee Handbook. Available via United Charitable upon request

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

Isaac Leeth	Compliance Manager	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

GRANT13861713

Collaborating for Tree Equity in Providence, Rhode Island

Project Location: Providence, Rhode Island
Zip codes: 02860, 02903, 02904, 02905, 02906, 02907, 02908, 02909, 02910, 02911, 02912, 02919, 02920
While we will partner with the City of Providence and develop city-wide approaches, the project will focus on 33 census blocks with a score less than 80 on the Tree Equity Score Analyzer. The blocks are in the following neighborhoods: Charles, Downtown, Elmwood, Federal Hill, Fox Point, Hartford, Lower South Providence, Mount Hope, Olneyville, Reservoir, Smith Hill, Upper South Providence, Valley, Wanskuck, Washington Park, and the West End.

Applicant Information: The Nature Conservancy, 159 Waterman Street, Providence, RI 02906
Catherine Campbell, Associate Director of Philanthropy, catherine_campbell@tnc.org, Ex. 6 - Personal Privacy (PP)

Applicant Organization: The Nature Conservancy's mission is to protect the land and water on which all life depends. The Rhode Island Chapter leads programs to address climate change through mitigation policies, nature-based adaptation solutions that advance social equity. Our coastal and inland water programs monitor and improve water quality and habitat. We have protected more than 35,000 acres of land with partners and maintain more than 80 miles of public trails on 25 preserves.

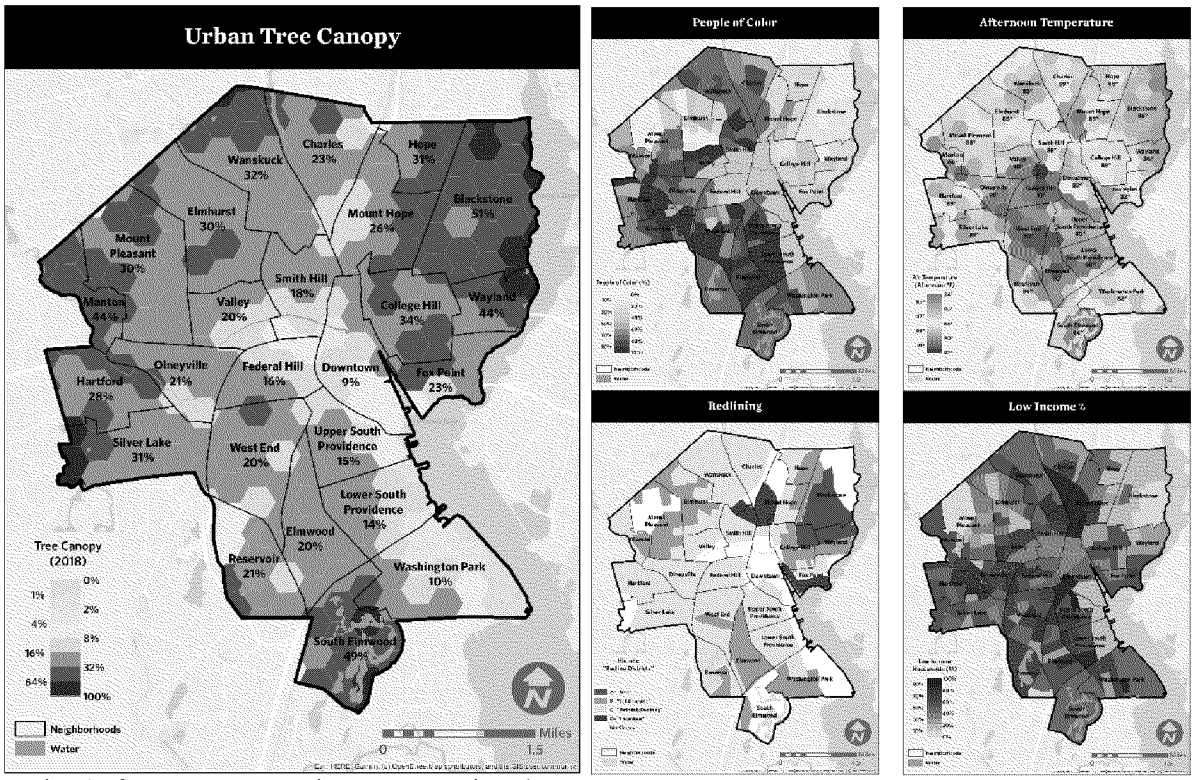
Are you applying for the Small CBO Set Aside Track for $150,000 projects? No

Project Abstract: *Collaborating for Tree Equity in Providence, Rhode Island* builds from the 3-year PVD Tree Plan process. We will develop community-led approaches to build the capacity to implement the plan's goal to add 30,000 new trees in low canopy, environmental justice neighborhoods. Using the EJCPS model we will create community-responsive residential and public tree planting and care pilot programs. We will plant 1,000 trees and create the foundation for growing an equitable urban forest and ensuring the benefits are equitably shared across Providence. Thoughtful and intentional management of Providence's urban forest is needed to ensure that it can thrive in a way that serves frontline communities and does not lead to displacement. Community Representatives will guide the Steering Committee, and Tree Ambassadors will lead deep community-wide education and engagement. In some communities, this means building capacity for stewardship and a greater understanding of the values of trees. In others, this means building an understanding of the disproportionate impacts of environmental issues and developing program, policy and funding mechanisms for allocating resources equitably. Through the planning process, we have developed a shared understanding of the issues, created a community vision, and established strategic goals. With this proposal we seek EPA's support to build collaborative partnerships and community capacity to create a network of mutual accountability to address barriers to sustain long-term plan implementation. We will bring structure to multi-stakeholder partnerships and leverage resources among community organizations, the City, and institutions to establish the path for constructive engagement by relevant stakeholders.

Project Types: Urban forestry to address tree inequity, heat islands, and stormwater management.

Special Considerations: Climate Change and Disaster Resiliency

Environmental Issues: Air quality, water quality, climate justice, and urban heat islands.

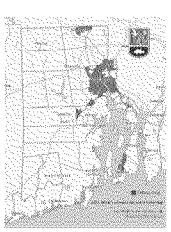


Project Partners: City of Providence Division of Forestry (local government) Providence Neighborhood Planting Program (street tree planting non-profit); Movement Education Outdoors (BIPOC youth environmental education non-profit); Groundwork Rhode Island (youth and young adult workforce development non-profit)

Will you need to develop a QAPP for your project? No.

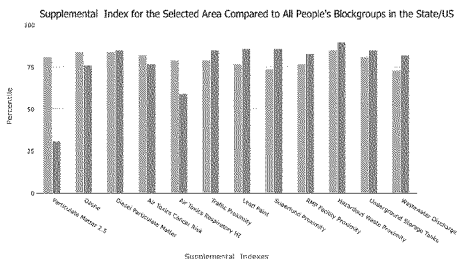
ED_016126_00000395-00001

b. Environmental and Public Health information of the Underserved Community

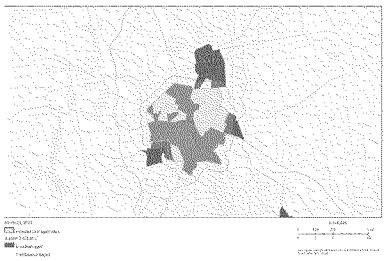


The maps below portray a trend that is familiar to Providence residents. Currently, Providence's tree canopy coverage is not equitably distributed with coverage in Providence neighborhoods ranging from less than 10% to more than 50%. That can have real health consequences on high heat days. The low canopy neighborhoods can be 20 degrees hotter than those with generous tree coverage. That difference can exacerbate asthma and other health conditions and put outdoor workers at risk. Our neighborhoods with a high percentage of people of color and with low incomes have lower tree canopy coverage, and some of the highest asthma rates in the state. These patterns also track to the historic redlining map.

With our project's focus on tree equity, we are using the Tree Equity Score Analyzer developed by American Forests to capture the characteristics of the focus areas for our project. The tool has identified the 33 census blocks in Providence RI that have a disproportionately low tree equity score. We have chosen to prioritize the areas with a Tree Equity Score lower than 80.



Here are the demographic statistics looking at each of the 33 census blocks:

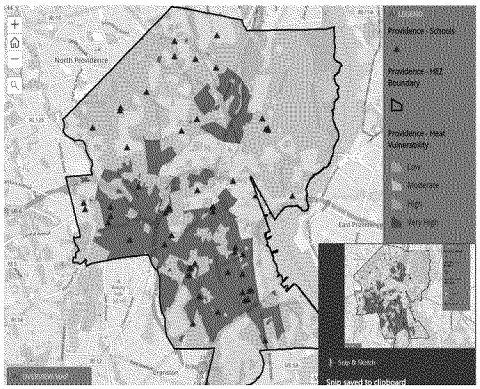


- The mean percentage of the population below 200% of the poverty line is 58%. The blocks range from 15% to 93%.
- The mean percentage of people of color is 72%. The range is 34% to 100%.
- The mean percentage of children ages 0-17 is 22% and the range is 0% to 41%.

The state Department of Environmental Protection considers the vast majority of the city of Providence to be an Environmental Justice Area. The only neighborhoods excluded are the highest tree canopy and highest income areas in the northeast corner.

The EJ Screen Tool corroborates and further details the trends we have found. A map including a half mile radius around our focus census blocks especially illustrated disproportionately high exposure to particulate matter (PM 2.5) in these areas as shown in the chart and map below.

What are the environmental/public health issue(s) that the project seeks to address?
Collaborating for Tree Equity in Providence will address issues of air quality, urban heat islands, water quality, and climate justice. In Providence, the most substantial impacts of climate change are more significant high heat days and more frequent intense storms. Both of these impacts are felt much more intensely and with greater consequences in our environmental justice neighborhoods that have less trees to provide cooling and less green space to soak up water from storms.



Air Quality
Providence's canopy coverage is not equitably distributed across neighborhoods. Low-income neighborhoods in Providence have lower canopy coverage, and some of the highest asthma rates in the state.

A 2013 USDA Forest Service study of 10 U.S. cities found that urban trees remove enough particulate matter to reduce annual health impacts significantly, with reductions in health impacts ranging of $1.1 million (Syracuse) to $60.1 million (New York). Trees can also reduce ground-level ozone concentrations, by directly absorbing ozone and decreasing ozone formation.

In 2016, The Nature Conservancy conducted a pilot program in Louisville, KY, considered the asthma capital of the United States, to plant mature trees and a vegetated buffer near a heavily trafficked roadway and measure its effects. Initial analysis of the air monitoring data and blood and urine samples showed that the vegetative buffer had an impact. Under certain conditions, levels of particulate matter were 60% lower behind the buffer. Among the health study participants, immune system function increased and inflammation levels decreased after planting (p.6 of enclosed *Funding Trees for Health*). This study is ongoing.

Urban Heat Islands
A 2021 report on tree cover and temperature disparity in US urbanized areas has also informed our priorities for this work. TNC Lead Scientist for Nature Based Solutions, Rob McDonald conducted a meta-analysis of nearly 6,000 US cities analyzing the correlations between tree canopy distribution, wealth inequality and heat islands. It was not a surprise that the analysis found the Providence Metropolitan Area to be among the 92% of U.S. communities where low-income blocks have less tree cover than high-income blocks. Overall, the greatest difference between low- and high-income blocks was found in communities in the Northeast of the United States, where low-income blocks in some communities have 30% less tree cover and are significantly hotter. Notably however, Providence ranked in the top ten worst metro areas for tree inequality with a summer land surface temperature difference of more than 40 degrees Fahrenheit between rich and poor neighborhoods. The Rhode Island Department of Health's Healthy Equity Zone analysis of extreme heat impacts finds that heat-related illnesses, like heat exhaustion or heat stroke, happen when the body is not able to properly cool itself. It can cause damage to the brain and other vital organs. Higher

temperatures also can increase summer peak energy demands, air conditioning costs, air pollution, and greenhouse gas emissions. The Heat Vulnerability Map (right) tracks with our focus neighborhoods.

The Health Department suggests trees as one important solution: "Trees and vegetation can lower surface and air temperatures. Shaded surfaces can be 20-40 degrees cooler than those in direct sun. Evapotranspiration from trees can also reduce peak summer temperatures. Trees should be planted in strategic locations to shade buildings and parking lots. This will also reduce the need for air conditioning."

Water Quality

Stormwater pollution is the largest unaddressed threat to water quality in the waterways of Providence and the Upper Narragansett Bay. The significant investments to reduce combined sewer overflows in recent decades have made substantial improvements to the Bay's water quality. However, unabated polluted stormwater run-off continues to cause the closure of shellfishing waters and beaches, impacting the economy and quality of life for residents throughout the state. Polluted runoff also contributes to cyanobacteria blooms which cause recreational use of our lakes and ponds to be restricted. Further exacerbating the problem, much of the stormwater infrastructure in the city is 75-100 years old and under-sized for current climate conditions. With 60% impervious cover across the city, traditional gray infrastructure approaches to managing stormwater, are no longer adequate on their own. Providence has been looking to nature-based solutions to capture rain where it falls, to increase treatment effectiveness and capacity, and provide multiple ecosystem benefits, such as increasing biodiversity, reducing heat islands and creating welcoming spaces.

Climate Justice

In 2019, the City of Providence adopted a Climate Justice Plan to meet their goal to become carbon neutral by 2050. The plan was developed by the BIPOC community-led Racial and Environmental Justice Committee through an equity-centered process that focused on the concerns and needs of frontline communities of color. These communities are the most burdened by environmental issues and are the most at risk if we do nothing to address the climate crisis. The Plan addresses air quality, asthma, collaborative governance, Energy Democracy, housing affordability, and other issues critical for the health and wellbeing of some of Providence's most disenfranchised communities. The plan is also an effort to ensure that the "greening" of Providence does not lead to the displacement of low-income, communities of color and includes a strategy to "Expand and improve green spaces" which states, "Prioritize tree plantings in low-canopy areas where heat island index is high, and residents can experience the cooling (electricity savings), air pollution, and water filtration benefits." This strategy was highlighted as a priority by frontline communities.

What are the environmental/public health results the project seeks to achieve and how will the underserved community benefit from those results?

Trees embody many of the environmental issues in Providence. They provide a tangible mechanism to understand the connections between health, climate change, and racism. This connection is a focus of the partners in this project. The creative collaborative engagement process outlined in this proposal will continue to shed light on and address environmental racism in Providence and, given the set of partners engaged in this effort, across the state.

The PVD Tree Plan was developed to guide the City of Providence, the public, and other key stewards of our urban forest in proactively managing and cultivating this priceless resource. The plan process combined meaningful community-led decision making, an equitable and inclusive engagement process, rigorous data analysis, multi-stakeholder dialogue and partnerships, and expertise from urban forestry and equity professionals at the top of their field.

With this Environmental Justice Collaborative Problem Solving Cooperative Agreement, we seek to move into the next phase to cultivate the community infrastructure and support to fully implement the plan to achieve tree equity.

The primary benefits to our focus communities will be cleaner air and water and relief from high heat days. Beyond those significant effects, the collaboration process will shift decision making power to communities with the lowest tree canopy, highest risk to extreme heat, and highest rates of asthma and other environmental burdens as we seek to better prepare the city residents and ecosystems for the impacts of climate change.

c. Organization's Historical Connection to Underserved Community -
The Nature Conservancy Rhode Island Chapter launched our urban conservation program in 2016. Before we launched our urban program, we hired a consultant to survey community members and stakeholders to determine where The Nature Conservancy could add value and not duplicate efforts. The community interviews strongly urged TNC to engage in promoting nature-based solutions for stormwater management and climate resiliency. Our goal is that, by partnering with local communities to restore nature, we can prevent flooding, improve water quality, reduce air pollution and heat islands, and help promote social equity. We are a lead partner in the Rhode Island Green Infrastructure Coalition to promote nature-based solutions and sustainable funding mechanisms for stormwater management. Our projects have included the creation of the Providence Stormwater Innovation Center in collaboration with the City and the Audubon Society of Rhode Island to showcase best practices, improve the industry community of practice on stormwater management, and engage the public in participatory science.

In 2019, the local street tree planting organization, and current project partner, the Providence Neighborhood Planting Program invited TNC to help in creating a community-led process to develop an urban forest equity plan for the City of Providence. PNPP holds significant expertise in tree management and community collaboration as well as a 30-year partnership with the City's Division of Forestry. TNC contributed in project and administrative management, and policy and government expertise. Both organizations shared in grant writing and seeking philanthropic support to raise the project budget and TNC served as the fiscal manager of the project.

A community-driven, equitable process necessarily takes time and having community partners at the table before the specifics of that strategy are developed is essential to crafting a genuinely participatory, equity-based and inclusive process. TNC issued RFPs to contract with both local equity and community engagement consultant partners and an urban forestry plan (UFP) technical consultant. Current project partner, Movement Education Outdoors was a member of the equity and community engagement team selected.

The first phase of the project aligned partners including the Providence City Forester, and consultants around a shared vision and framework for the planning process. Through orientations, mutual-learning sessions, trainings, and discussions, project partners acquired tools, skills and a common understanding of the fundamentals of inclusive engagement, racial and environmental justice, and the management of Providence's urban forest.

In the process of developing the charter, we determined that the project Steering Committee should include a majority of people of color, particularly from low tree canopy neighborhoods. Movement Education Outdoors coordinated the recruitment of the racially diverse, multi-generational team who became the community representatives on the Steering Committee. These representatives are paid a quarterly stipend for their expertise and participation in meetings. Forming this group was among the most impactful aspects of our process to date. The community representatives have expanded their roles to become community spokespeople engaging their networks in the community survey and planning process and providing insightful analysis.

The project coordination team, and the community representatives on the Steering Committee developed and implemented a wide range of strategies to engage people who live and work in Providence with a focus on those in our top priority areas, the low canopy neighborhoods. The launch event in November 2021 featured performances from local artists, high school youth presentations, interactive booths with tree-related crafts and activities, and opportunities to learn and share ideas about Providence's urban forest. The community engagement survey on PVDTreePlan.org offered the survey in the nine most common languages used in Providence. The survey was promoted through paid advertising on two local Spanish language radio stations and through social media. Direct outreach at public events, weekend soccer games, and other community gathering spaces helped generate survey responses and useful interviews for broader context about community priorities. Raffle prizes for respondents helped generate enthusiasm for participation.

In all, more than 760 residents responded to the survey. Of the respondents, 45% identify as something other than white or of European descent. The next largest groups were 22% Latinx, 13% Black or African American, and 5% African. 365 respondents live in our focus neighborhoods. While the vast majority of respondents chose the English language version, 172 replied in Spanish and 59 chose another language.

Meanwhile our technical consultants provided significant insights into change and trends in Providence's tree canopy and best practices from successful programs. The new data from the City of Providence's street tree inventory and the University of Vermont Spatial Analysis Laboratory LiDAR analysis revealed several key findings about Providence's current tree canopy:

- Between 2011 and 2018, Providence has seen an increase in both the total number of street trees and in its overall citywide canopy percentage.
- There are a large number of young trees along public rights-of-way, which bodes well for the city's future street tree canopy.
- The greatest amount of plantable area in the city, with the biggest potential for tree canopy increase, is on privately-owned residential property. However, residential property is also where the most canopy loss occurred between 2011 and 2018.
- There is also a significant opportunity to expand canopy on educational institutions' property.
- Tree inequity (the uneven distribution of trees across the city) cuts along racial and economic divides and is still the most persistent and significant barrier to equitably sharing the benefits of Providence's urban forest with its residents.

To dig deeper into the opportunities to address tree inequity, we used American Forests' Tree Equity Score Analyzer. TESA is a tool for cities and states that want to dive deep into equity-based decision-making using the framework of Tree Equity Scores. Using the platform, we determined how targeted tree canopy protection and expansion can improve health and well-being in neighborhoods and communities.

Providence has a city-wide Tree Equity Score of 89 out of 100. But looking more closely at the census blocks shows the disparity that 11 have a score of 50-70. A total of 33 blocks score 80 or lower. Bringing the 33 lowest scoring census blocks to a minimum Tree Equity Score of 80 would require the planting of 30,357 medium-sized trees and would result in 488 acres of new canopy, or approximately 4% increase

ED_016126_00000395-00006

city-wide. Current programs and policies result in approximately 1,000 new trees being planted per year. To achieve that goal in the coming decade, we will need to triple program capacity for tree planting, care and maintenance, and new engagement strategies will need to be employed in the focus census blocks.

The combination of the enthusiastic participation in the community survey and the detailed canopy spatial analysis and tree equity opportunity mapping gave us an incredibly robust combination of data sets to understand residents' priorities related to our tree canopy, programs and practices and to develop the recommendations that became the PVD Tree Plan.

This proposal is the vision developed through that community engagement process and builds on the foundation of years of intensive relationship and trust building to create a successful partnership. We feel both strong support from an engaged community and deep accountability to deliver the next phase of bringing the vision to life.

d. EJCPS Model

At this point, our partnership is deep into the development of CPS Element 1 **Issue Identification, Community Vision, and Strategic Goal Setting**. The issue of tree inequity was identified as a priority issue to address by multiple entities including the Racial Environmental Justice Committee in the Providence Climate Justice Plan and the Providence Neighborhood Planting Program through its strategic planning process, and the issue was confirmed and refined with both robust community engagement and spatial analysis.

Through the development of the PVD Tree Plan, our partnership has developed a shared community vision for the next significant steps required to address tree inequity. The Plan includes a suite of recommendations that include tree planting, maintenance, workforce development, policy and planning, funding and financing, as well as community engagement, leadership and governance.

We propose to use the Collaborative Problem Solving Model to focus specifically on that last strategy of developing deeper community engagement, leadership dispersed throughout the community, and a governance model that lets neighborhoods set priorities for the most effective way to achieve tree equity.

The first step will be CPS Element 2 **Community Capacity Building and Leadership Development** in which we shift the Steering Committee led by community representatives from a planning body into the team ready to oversee the implementation of the plan. We will also cultivate a team of neighborhood and community ambassadors with a train-the-trainer model to share out the results of the PVD Tree Plan and gather community feedback.

By broadening our circle of leadership and deepening community engagement, we expect we will be presented with multiple opportunities for **CPS Element 3 Consensus Building**, and the related need for Dispute Resolution. We will attend to ensuring partner organizations and community members are treated fairly and that our decision-making structures remain responsive to changing dynamics. As a Steering Committee currently, we are attuned to the fact that we currently have a high level of trust across the existing team that has worked together for two years. We will need to be intentional to onboard new participants in a way that is inclusive and builds from our success.

In the course of developing the plan, we have identified numerous relevant stakeholders to be engaged in order to successfully implement the plan's goals ranging from practitioners in the non-profit and for-profit tree care industry, to public utilities, to major health and academic institutions. While several early conversations have shown promising potential and shared interests, we will still have substantial work to establish common goals and objectives in **CPS Element 4 Multi-Stakeholder Partnerships** before we expand to **CPS Element 5 Constructive Engagement by Relevant Stakeholders.**

e. Project Linkages

The project directly aligns with and supports EPA's goal to build community capacity and climate resilience and maximize benefits to overburdened and underserved communities. This project will actively engage and support the communities most burdened by environmental injustices and inequitable tree canopy. In partnership, we will build programs and policies to ensure that these communities receive the maximum benefits and minimized burdens of an expanded tree canopy.

f. Partners and Collaborators -

- City of Providence: **AJ Elton is the City Forester and Director of the Forestry Division of the Providence Parks Department.** He previously served as an urban forester and arborist for the city of Richmond, VA and for Mecklenburg County, NC. AJ has an M.S. in Environmental conservation and a BS in Natural Resources Conservation and Urban Forestry both from UMass Amherst. Under AJ's supervision, the Forestry Division manages the city's 27,400 street trees, as well as all trees in city parks and on public property. The division also works in close partnership with the Providence Neighborhood Planting Program (PNPP) on tree planting and stewardship initiatives, oversees inventory of its street trees and assessment of the tree canopy, and has been an active partner in the development of the PVD Tree Plan.
- Movement Education Outdoors Movement Education Outdoors was founded in 2018 to provide multiple access points for BIPOC and low-income youth in Rhode Island to connect to the land they live on and the communities they live in. They offer out-of-school land-based learning experiences that center the knowledge, joy, healing, and liberation of people of color, grounded in our four educational pillars: Environmental Justice, Black & Indigenous History, Mindfulness, and Leadership. With MEO, young people develop the tools to become leaders in their communities for transformative change towards environmental and racial justice. **Founder and Executive Director Jo Ayuso** has been working as a self-care educator for 21 years and holds an MS in Exercise Science and Physiology. Working in health care, fitness, education, and within prison systems has shaped her communication as well as her desire to work in community with Black and Brown farmers and youth. Jo spends her days organizing Movement and Education Outdoors, a youth outdoor experience program, supporting community-based organizations in understanding inclusion and equity, and uniting with educators and leaders of color to increase access to health and wellness in the education system for low-income, Black, and brown students in Rhode Island. Jo will serve as **Project Coordinator** for maintaining robust engagement with community representatives.
- Providence Neighborhood Planting Program (PNPP) plants, stewards, and advocates for trees in Providence through a close partnership with the City of Providence's Forestry Division. They utilize a community-driven program model that gives residents and community members agency to decide where they want trees, and opportunities to engage with and learn about the urban forest. **Cassie Tharinger, Executive Director,** has overseen PNPP's planting and stewardship programs for over 7 years, and has played a lead role coordinating the development of the PVD Tree Plan. Cassie has worked for over 19 years with community groups and nonprofits in Rhode Island, and has extensive experience with project management, communications, community engagement, and grassroots organizing. Cassie will serve as the **Project Manager** and manage the overall flow of the planning process.
- The Nature Conservancy: **Sheila Dormody, Director of Climate and Cities Programs** launched TNC's Rhode Island urban environmental program in spring 2016 to develop nature-based solutions to address environmental challenges and promote social equity. Sheila has over 30 years of non-profit advocacy and organizing experience. She previously served as the Providence's director of policy and was the first director of sustainability for the City of Providence. Sheila will serve as **Administrative Coordinator** overseeing contract and fiscal management for the process. The Nature Conservancy is one of the leading conservation organizations working around the world and has the administrative and scientific capacity and expertise to assist in multi-partner project management.

The Nature Conservancy's mission is to protect the land and water on which all life depends. TNC was brought in early to the initial scoping phase of the project development by the Providence Neighborhood Planting Program and community partners. TNC will approach this project similarly to our other programs and work: we bring significant issue expertise to bear from across the Conservancy; we provide project management and oversight for on-time and on-budget deliverables; we engage issue and skill experts from the field to address particular needs; and we partner with relevant community leaders and organizations to ensure on-the-ground relevance of the project design and implementation.

2.0 Project Activities / Milestone Schedule / Detailed Please describe the following:

a. Project Activities

With this proposal, we are seeking funding for the first phase of implementation of the PVD Tree Plan for tree equity in Providence. As the implementation of the Plan unfolds over the coming decade, our partner organizations will need to scale up capacity significantly to add the 30,000 new trees required to advance tree equity in Providence and make sure they thrive. The work will be coordinated in three phases:

- During Phase One of years 1-3, we will create community partnerships, pilot implementation programs, establish funding mechanisms, and build the base for later rapid scaling.
- During Phase Two, years 4-7, we will execute programs deemed successful in Phase One and significantly escalate the pace of tree planting.
- Planting will continue in years 7-10 in Phase Three, and we will expand and institutionalize community tree care and maintenance programs to ensure long term viability.

As we look to identify and pilot the new programs and initiatives that are responsive to the needs of frontline communities and residents in low-canopy environmental justice neighborhoods, a few key related needs are emerging:

- Testing-out formats and structures that allow community members in low-canopy neighborhoods to identify the specific place-based tree-related interventions they most want to see in their neighborhoods. In addition, the PVD Tree Plan focuses on identifying the overall and structural needs, priorities, solutions, challenges that residents have related to trees across the city.
- Beginning to develop a residential yard tree program that is responsive and tailored to the needs of residents in low-canopy, environmental justice neighborhoods.

At the start of this project, we will utilize the expertise of the PVD Tree Plan Steering Committee to inform the hiring of part-time coordination staff, and development of the neighborhood-level tree planning formats, as well as to guide the initial design of a yard tree pilot program and insure it aligns with the equity goals and strategies and recommendations of the PVD Tree Plan. The PVD Tree Plan's decision-making body is by design composed of a majority BIPOC community representatives.

Collaboration Coordinator

An initial step will be to hire part-time staff to coordinate the implementation of the plan. The Coordinator will convene and interface with neighborhood-level ambassadors, and representatives of partner organizations. They will coordinate implementation of the plan by establishing systems related to tree monitoring, tracking, and planting across practitioner organizations. And they will coordinate the partner organizations' communications with other community groups as well as other stakeholders including those from the non-profit and for-profit tree care industry, public utilities, health and academic institutions.

Cultivating Community Capacity and Leadership

Over the course of the 3-year grant period, we will grow to have a team of 20 PVD Tree Ambassadors. These community members will be selected for their connections to the communities in our focus neighborhoods and will receive a quarterly stipend. The Coordinator and project partners will provide training, leadership development and supervision for the Ambassadors to effectively engage in executing the goals of the PVD Tree Plan at the micro-neighborhood level. The Ambassadors will start by serving as

ED_016126_00000395-00009

tree planting leaders to identify where residents want trees planted. With more experience, the Ambassadors will grow to a higher level of engagement and responsibility to provide two-way communication from neighborhoods to the coalition and City leaders, and back. Ambassadors will coordinate neighborhood-level consensus decision making activities for PVD Tree Plan implementation. This micro-neighborhood level of organization will allow for the development of approaches that are most relevant and appropriate for specific neighborhoods and communities. Strategies for engagement may include door knocking, presentations to neighborhood groups, schools and churches, or block parties.

The community convening work that the Ambassadors do will identify opportunities for organizational collaborations and structures to support implementing the wide-ranging priorities for the PVD Tree Plan.

In addition to the PVD Tree Ambassadors, we will continue the successful Steering Committee model formed to create the PVD Tree Plan. In addition to members of the project partner organizations, the Steering Committee will continue to be majority BIPOC Providence community representatives from low-canopy neighborhoods. We will expand from the current 8 community representatives to a total of 12 members to oversee all aspects of plan implementation. The community representatives will receive a quarterly stipend for sharing their expertise. The project partners and current committee members will provide training and background to support the onboarding and involvement of new members. The expansion of membership and the development of the training program will help ensure the long-term sustainability of the plan.

Community Tree Planning Forums: Working through existing community networks and anchor institutions such as churches and mosques, cultural or civic groups, schools, neighborhood associations, CDCs, and businesses, we will convene a series of "Community Tree Planning" meetings in the priority neighborhoods where residents, stakeholders and community leaders are invited to participate in planning conversations and to identify specific current tree-related needs and focus areas within their neighborhood.

Project partners would then coordinate to deploy and leverage relevant existing programs and resources in order to meet as many of the identified needs and priorities as possible in the focus areas. For instance, if street or public space tree plantings in a specific area are identified as a need, PNPP would work with residents to organize a Neighborhood Street Tree Planting there. The Tree Planning meetings would also serve as an opportunity to identify priority areas for yard tree planting recruitment, and to begin outreach for that program.

The Community Tree Planning Forums will be a combination of in person and virtual events as necessary to meet the needs of each gathering group. They will primarily serve as facilitated listening meetings and opportunities for residents and community leaders to share and discuss their needs related to trees and green infrastructure in the immediate neighborhood, and to develop some collective priorities. Themes that have emerged from the PVD Tree Plan development have included desire for more fruit trees; trees at particular schools, playgrounds or other community-hubs; and increased canopy or tree maintenance in particular areas. Spanish language interpretation will be available.

The goal of these meetings would be for our partners to center and listen to community needs and priorities, and to test out a process for identifying specific, actionable community tree priorities within a geographic area. While information about the benefits of trees and about opportunities to receive free trees would be made available, the primary purpose of these events would not be to educate or inform, but rather to receive and synthesize information.

Yard Tree Planting Pilot: Despite the fact that the majority of Providence's current urban forest and its potential plantable space falls on private property, there is effectively no program mechanism for Providence residents to receive free trees for their yards. The state-run yard tree giveaway program is

limited in supply, statewide in scope, and inaccessible to residents in urban low-canopy communities. Residents in wealthier neighborhoods are able to deploy the resources and technical expertise required to plant and maintain trees on private property, further exacerbating the canopy inequity across neighborhoods.

PVD Tree Ambassadors will conduct on-the-ground outreach to promote and recruit yard tree program participants. This project will help forge community connections, provide critical momentum for future work, and allow us to impact tree equity in the neighborhood well beyond the scope of this grant.

Project partners and the Steering Committee will work collaboratively to develop the specifications and parameters for the yard tree planting program, informed by a pilot project Groundwork RI has recently completed in a nearby city, but the initial outline is this:

- PNPP Staff will plan and oversee the outreach to residents as potential yard tree recipients.
- PNPP will directly coordinate with the Tree Ambassadors, who will be doing much of the on-the-ground outreach and promotion.
- PNPP Staff will be responsible for all site visits, surveying, coordinating and final communications with tree recipients.
- The tenant or property-owners may sign-up to participate and steward or plant a tree. PNPP will be responsible for connecting with property owners to secure permission for non-owner-occupied properties.
- Tree plantings will be scheduled individually, and PNPP staff will be responsible for planting the trees. Residents who are able to participate in planting the trees will do so, but it will not be a requirement for receiving a tree.
- PNPP will offer technical support and follow-up to all tree recipients over the following 2 years to ensure resources to steward the trees are in place.
- Yard-trees will be watered by the residents who sign up for trees, with training and ongoing technical support to be provided by PNPP and by Providence Community Tree Keeper (PCTK) program participants. Interested residents and community members will also be encouraged to participate in the PCTK program.
- The program will establish appropriate stewardship programs for trees planted at public or community sites. The young trees will be watered and pruned through local youth programs to provide paid environmental learning and stewardship activities in their communities.

Neighborhood Street Tree Award program: To complement the yard tree plantings that emerge out of this project and to help deliver outcomes for other planting-related needs that emerge out of community planning processes, PNPP and City Forestry will also coordinate companion right-of-way and public-space plantings via our Neighborhood Street Tree Award program, to be shaped and located by the community-identified priorities. The Neighborhood Street Tree Plantings rely on community volunteers to do the actual tree planting, and these social, educational, and family-friendly planting events, which take place primarily on Saturdays in April and October, will serve as opportunities to build community connection through a collective planting and stewardship activity, and to build momentum and awareness in the neighborhood around community urban forestry initiatives.

b. Milestone Schedule

Milestones	Who	Year 1	Year 2	Year 3
		November 2023-December 2024	January-December 2025	January-October 2026
Hire and train part time Collaboration Coordinator	PNPP	November - December 2023		
Recruit and onboard additional community representatives to Steering Committee	MEO, Steering Committee Community Representatives	November - February	As needed to maintain full cohort	As needed to maintain full cohort
Design Community Tree Planning Forum plan	Steering Committee	November - December	Review and revise as needed	Review and revise as needed
Develop initial outline and design for free yard tree program	PNPP with Steering Committee Review	November - December	Review and revise as needed based on community feedback	Review and revise as needed based on community feedback
Identify and train community PVD Tree Ambassadors and begin community outreach	MEO, Steering Committee Community Representatives	January	January	January
Neighborhood outreach to recruit residents to participate in Yard Tree plantings and Community Tree Planning forums	Ambassadors	February-April July-September	February-April July-September	February-April July-September
Hold 1-2 Community Tree Planning Forums	Coordinator, Ambassadors	March and July	March and July	March and July
Community and Volunteer Street Tree Planting Events	All Project Partners	April and October	April and October	April and October
Plant resident yard trees and train residents in tree care	PNPP, residents, Ambassadors	May-June and October-November	May-June and October-November	May-June and October-November
Conduct post planting season review of lessons learned, adjust programs and strategies as appropriate	Steering Committee and Ambassadors	July and December	July and December	July and December
Document stories to capture and share impacts and activities of the project	Ambassadors, all project partners	year round but focused in December	year round but focused in December	year round but focused in October
Conduct follow up visits with tree recipients and provide assistance as needed	Ambassadors	In the fall for spring plantings; in the Spring for fall plantings	In the fall for spring plantings; in the Spring for fall plantings	In the fall for spring plantings; in the Spring for fall plantings
Conduct project review: - Assessment of program impacts, successes and challenges - Determine feasibility of program expansion/ continuation - Secure funding streams for Phase 2	Steering Committee and Ambassadors with community feedback	Annual review in Fall	Annual review in fall	Final Review August-October 2026

Budget Narrative (Itemized Budget Sheet - See Attachment)

Income

Collaborating for Tree Equity in Providence, RI seeks $500,000 in support from the U.S. EPA over three years. We have secured match from project partners including $125,000 from the Providence Neighborhood Planting Program and $17,838 from The Nature Conservancy. The City of Providence will provide an additional $10,000 of in-kind contribution of the City Forester's staff time.

The PVD Tree Plan which inspired this proposal was developed with generous support from private foundations. We will seek their support for this project to implement the plan including a request to the RI Foundation for $75,000 and to the Helen Walker Raleigh Tree Care Trust for $50,000.

Expenses

Personnel

Sheila Dormody, RI Director of Climate and Cities Programs for The Nature Conservancy in Rhode Island will serve as the overall project administrator and provide fiscal management for the grant. Sheila will also serve on the PVD Tree Plan Project Coordination Team and on the Steering Committee with a focus on supporting development of policy strategies. Personnel costs are based on 20% FTE for 3-year project with a 44.75% fringe rate. Match will be provided from TNC private funding sources.

Supplies

- Our project builds upon Providence Neighborhood Planting Program's 30 years of successful community planting of street trees. PNPP will provide $125,000 in match for street tree plantings which will be used as community building events, trainings, and outreach. The match will cover staff coordination, training, purchase of trees, site prep, and planting events. The Community Tree Planning forums will inform the placement of 275 street trees per year for each of the three years for a total of 825 street trees planted.
- As we create the new residential property tree planting program, we seek $11,920 for 125 trees for our pilot project. The choice of using one of the 105 younger, smaller caliper trees at a cost of $125 each and 20 more mature trees at $180 each will be decided by the requirements of the planting location. The newly depaved areas will require more mature trees. We are seeking matching funds from the Helen Walker Raleigh Tree Care Trust. Each resident tree recipient household will also receive $15 worth of materials to help them care for their tree including an instruction and reminder magnet, watering bucket, and buttons or stickers to encourage promotion of the program to their community networks. The total cost of the trees and resident education kits will be $20,175. We are seeking $8,255 from the Helen Walker Raleigh Tree Care Trust as a match.
- Additional collateral to promote program participation will include the design, translation and printing of flyers, yard signs, banners, door-hangers for a total cost of $3,000. TNC will provide $500 of this with in-house printing.
- To create a community atmosphere and encourage community participation we will provide refreshments and incentives such as door prizes at the Community Tree Planning Forums. $3,000 will cover the expense for 6-12 forums over the three-year period.

Contractual

- We will contract with local workforce development programs to provide site prep for the residential tree planting program. Pervious yard sites will cost $125 each for a total of $13,125. We anticipate 105 pervious sites and an additional 20 that need more saw cutting, excavation and replacement of soil. The labor and materials for depaving and preparing the impervious sites will cost $190 each for a total of $3800. Cost estimates are based on past project experience. The total contractual cost will be $16,925. We are seeking match from Helen Walker Raleigh Tree Care Trust for $4,645 of that expense.

ED_016126_00000395-00013

- We are seeking additional match from Helen Walker Raleigh Tree Care Trust of $12,100 to provide young tree care including pruning and watering through the same local workforce development programs to ensure both the yard trees and street trees thrive.

Other

- A.J. Elton, City Forester and Director of the Forestry Division for the City of Providence will serve on the PVD Tree Plan Steering Committee to provide technical support and guidance for all aspects of tree planting and tree care as well. In addition, A.J. will provide coordination across City departments including Planning, Public Works, Parks, Sustainability, and Policy which have all been engaged in various aspects of the development of the PVD Tree Plan. The City of Providence also provides matching costs to PNPP's street tree planting program. We are not counting that toward our budget, but it is a one-to-one match.
- Cassie Tharinger, Executive Director of the Providence Neighborhood Planting Program will serve as the overall Project Manager for all aspects of the implementation of this proposal. $60,000 will cover salary and fringe costs for 30% FTE over the 3-year period.
- Critical to the success of the project will be adding the capacity of a 50% FTE PVD Tree Plan Coordinator to organize Community Tree Planning Forums, manage the PVD Community Tree Ambassadors, and develop collateral materials. Salary and fringe will be $45,000 per year for three years for a total cost of $135,000. We are seeking Rhode Island Foundation support to provide $15,000 in match to $120,000 from the U.S. EPA.
- Jo Ayuso, Director of Movement Education Outdoors will serve as Project Coordinator for maintaining robust engagement with community representatives. $60,000 will cover salary and fringe costs for 25% FTE over the 3-year period.
- A team of 10 Community Representatives will serve on the Steering Committee and will receive a quarterly stipend of $500 for 3 years for serving year-round with approximately 4 hours per week engagement in oversight and planning.
- PVD Community Tree Ambassadors will lead the neighborhood outreach efforts during 6 months of the year. They will receive a $2000 stipend. We anticipate this program will ramp up with 10 ambassadors in the first year, 15 in the second and 20 in the third year. The full cost of the program will be $120,000. We are seeking $60,000 match from the Rhode Island Foundation.
- To ensure successful participation in the Community Tree Planning Forums and planting events, we will provide childcare, translated materials, and interpretation services. We anticipate these will cost a total of $8,000 based on previous events planned.
- Transportation of trees for residential planting events will cost $600 per week for 9 weeks for a total cost of $5,400.
- Capturing the story of the project will be essential to building and maintaining momentum both during this building phase and to carry the PVD Tree Plan to full implementation. The Nature Conservancy will provide $1,300 for photo and video documentation.

Negotiated Indirect Cost Rate: TNC's Fiscal Year 2023 Indirect cost rate of 22.40% is in effect from July 1, 2022 through June 30, 2023 and is approved each year by our Cognizant Agency, the Department of Interior. TNC is opting to cap indirect on all direct costs at 6.16% and record the remaining 16.24% as unrecovered indirect costs to match. TNC's Fiscal Year 2023 NICRA can be found in Other Attachments.

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

a. Environmental Results (Logic Model): See Attachment

b. Performance Measurement Plan.

Providence has a wealth of baseline data about our urban forest.

- The City conducted a street tree inventory in 2017.
- The University of Vermont just completed a full spatial analysis of the urban canopy based on 2018 data this year.

- The City conducted an i-Tree eco-assessment statistical sampling in 2014 to measure the ecological benefits of the canopy.
- The Rhode Island Tree Equity Score Analyzer provides data detailed to the parcel level on Providence's urban forest.

The priority areas for planting with this project will be informed by the combined analysis of all of these data sets. The data show the persistence of inequitable distribution of tree canopy across the city. Canopy coverage ranges from less than 10% to more than 50% in different neighborhoods. The data also show that over the past decade, both the most substantial gains and losses in the tree canopy have been in residential zones.

The Tree Equity Score Analyzer (TESA) will allow us to calculate projected benefits from various planting scenarios.

Our metrics will include:
- Community ambassadors engaged
- Community forums organized
- Number of trees planted in focus neighborhoods
- Carbon benefits of new trees planted
- Adjusted Tree Equity Score for priority Block Groups
- TESA Impact Report metrics including new canopy, $C0_2$ stored (tons per year), and rain interception
- Qualitative feedback from ambassadors and community members
- Resident participation in sharing their tree care activities on a new public platform tool
- Number of PVD Tree Plan recommendations directly addressed

c. Sustainability Plan and Community Vision

This project builds from and will inform several ongoing initiatives:
- The Rhode Island Urban Forests for Climate and Health initiative has created tools for analyzing tree equity and informing appropriate planting for climate resilience, which will inform this project.
- The Providence Climate Justice Plan established the Racial and Environmental Justice Framework for sustainability efforts, and identified tree-planting in these neighborhoods as an overall community priority.
- The PVD Tree Plan completed in 2023 identified the broad priorities, needs and preferred strategies of residents across low-canopy neighborhoods.

Providence is now poised to be a role model for other urban areas of Rhode Island as the first municipality to integrate the data and analysis into a broad community conversation to determine priority actions and a shared vision. Implementing a data-informed, equity-centered and community responsive strategic urban forest plan at this moment will enable us to effectively harness and leverage that valuable data towards the effective long-term management of the urban forest.

With expanded capacity for community engagement and urban tree care, the strategies employed in Providence have a high likelihood of being able to successfully expand across municipal boundaries to other urban areas of the state. The State's climate action plan prioritizes urban forestry as a key strategy. Providence will provide a role model for the state to support in other municipalities. Additionally, some of our existing approach builds from lessons in neighboring Pawtucket and Central Falls as well as from equity centered urban forest approaches from across the country including Philadelphia, Cleveland, Washington, DC and Syracuse. We expect that our contribution to this body of work will similarly inspire work in other places where we are connected through the urban forestry movement.

4.0 Programmatic Capability

a. Organizational Experience related to the proposed project and their infrastructure as it relates to their ability to successfully implement the proposed project.

- The Providence Neighborhood Planting Program was established in 1988 as a match-cost partnership between the Mary Elizabeth Sharpe PNPP Endowment and the City of Providence to ensure consistent private/public funding for the planting of street trees in Providence. PNPP has played a key role in supporting Providence's urban forest over the past 35 years: advocating for the creation of the forestry division and the adoption of the City's first tree ordinance, collaborating on tree canopy inventories and assessments, and spearheading strategic planning efforts such as the PVD Tree Plan. PNPP's Neighborhood Street Tree Planting program, which engages residents and community groups each spring and fall in planting and caring for young trees, is the primary way that trees are added along the public right-of-way in Providence. PNPP's decades-long track record of working collaboratively with a broad range of stakeholders and communities in Providence to plant, steward and advocate for trees means they are perfectly positioned to implement this project.
- Movement Education Outdoors programs engage over 200 RI youth of color every year, cultivating the leadership of youth of color in Rhode Island's environmental justice movements. MEO is deeply embedded in the network of community organizations working towards environmental justice in Providence and RI, working in direct collaboration with over 30 other local grassroots organizations and serving as an organizational member of the Ocean State Environmental Justice Alliance. MEO, which is led by people of color with lived experiences of environmental justice impacts, is also deeply rooted in the frontline EJ communities that this project is designed to serve. For the past three years, MEO has served as a key partner in the development of the PVD Tree Plan. Its role in this process has included recruiting BIPOC steering committee members from low-canopy frontline neighborhoods, developing and implementing neighborhood-level community engagement strategies, and providing ongoing advising on equity, justice, and inclusion. Given its role in Providence's environmental justice communities and its history of involvement with the PVD Tree Plan, MEO is ideally situated to lead community engagement efforts through the project's implementation phases.
- The Nature Conservancy (TNC) has served as the fiscal manager and project coordinator for the PVD Tree Plan and will serve in the same role for this project. The Conservancy is recognized for project management and administrative as well as scientific capacity and expertise to assist in partnerships to further the protection and management of the terrestrial, marine, and freshwater resources of Rhode Island. TNC has the public and private grants management capacity and reporting to effectively serve this multi-year, community driven project and meet EPA requirements.

b. Staff Experience / Qualifications of Project Manager (PM)

Cassie Tharinger has overseen PNPP's community-driven tree planting and stewardship programs since 2015. Before joining the world of urban and community forestry, Cassie worked for over a decade with community groups, cooperatives, and nonprofits in Rhode Island in both the arts and local food system sectors, as well as at small scale holistically-managed fruit tree orchards and nurseries in Rhode Island, Vermont, and Maine. She has guided PNPP through strategic planning, organizational development, and helping build a more equitable and robust urban forest in Providence. Cassie designed the strategy for the PVD Tree Plan to be led by residents of Providence's low canopy neighborhoods and to center equity and justice throughout the process of design, development and implementation.

***c.* Expenditure of Awarded Grant Funds**

The Nature Conservancy (TNC) has internal controls, procedures, and systems in place to accurately account for, manage, and report on public funds. TNC will be prepared to complete the Pre-Award Compliance for Non-Profit Organizations as necessary.

ED_016126_00000395-00016

5.0 Past Performance

Agreement Number 02D19322 – Mapping Bayou la Batre Stormwater for Community Resilience
Award Term: 1/1/2022 – 12/31/2024
Total Project Period Cost: $499,993.00
Summary and Outcomes: The 2016 Mobile County Hazard Mitigation Plan and the 2018 Bayou la Batre Watershed Management Plan identified the need for stormwater management improvements to alleviate flooding impacts to the City of Bayou la Batre and to reduce stormwater loads to coastal waters. To identify potential improvements, this project involves mapping existing stormwater features to identifying flood-prone areas and remedial actions, monitoring and modeling stormwater flow, and water quality monitoring of nonpoint source bacteria, sediment, nutrients, and organic matter concentrations to calculate flow and load reductions. The project outputs will lay the groundwork for a future stormwater management plan.
Reporting Requirements: Award is still active and all reporting requirements have been met to date and acceptable per the EPA.

Agreement Number 02D19222 – Building the Northern Gulf's Transportation Hub Resilience
Award Term: 1/1/2022 – 12/31/2024
Total Project Period Cost: $499,914.00
Summary and Outcomes: This project will investigate the use of green stormwater infrastructure improvements to improve water quality and manage flooding at the downtown Mobile airport, a transportation epicenter of the Northern Gulf of Mexico and vital community asset to the region's growing economy. The Nature Conservancy will conduct stormwater mapping and construct a bioswale demonstration project to reconnect stream headwaters on the property to the Dog River watershed of Mobile Bay. This effort will demonstrate ways to reduce nonpoint source pollution from the airport and update legacy infrastructure to increase resilience of the airport complex.
Reporting Requirements: Award is still active and all reporting requirements have been met to date and acceptable per the EPA.

Agreement Number 00D92119 – Forest Management and Restoration in Apalachicola, Florida
Award Term: 12/1/2019 – 11/30/2022
Total Project Period Cost: $500,000.00
Summary and Outcomes: This grant had several aspects to it. It provided support to the Ecosystem Restoration Team to continue to progress prescribed fire within the region, as well as longleaf and groundcover restoration. It also funded a cogon grass strike team, which included a component of private landowner and county government outreach. It supported training in the form of NWCG wildland fire training courses and outreach to a local school's environmental science courses, as well as an internship program in land management that placed priority on underserved minority communities in the region. I believe that we're considering this project to be successful. All goals were met and the two interns funded through this will be wrapping up this spring.
Reporting Requirements: All reporting requirements were met and acceptable per the EPA.

Agreement Number 00E01448 – Accelerating Outcome-Based Ag Conservation in Saginaw Bay
Award Term: 2/23/2015 – 9/30/2020
Original Project Period Cost: $2,558,853.00
Total Project Period Cost After Modifications: $1,002,093.00
Summary and Outcomes: This five-year EPA grant was from GLRI funds (administered through the Great Lakes National Program Office). It provided TNC direct funding to develop a new "pay for performance" framework for incentivizing new agricultural BMP adoption, as well as the performance fund itself (~$240k). We had three sub awardees to help us develop and analyze this framework, including a local Conservation District that administered the payments and contracts directly with farmers. The project enrolled over 30 farms, treated over 7,300 acres, and effectively reduced 1,132 tons of sediment and 3,512 lbs. of phosphorus. This project allowed TNC the unique opportunity to refine and perfect our pay for

performance approach (including payments and methods). As a result, at the conclusion of the project we were able to roll out this proven concept to new (private funder) partners. In this way, this EPA grant helped us develop a "turnkey" program that continued to exist, via the backing of three different corporate partners, three years after the initial EPA funding ended. However, it should be noted that even though we met all of our originally proposed deliverables in the end—we did sustain a funding cut from EPA halfway through the project. They were not happy with our initial slow rate of spending (due to limited farmer payments being spent out in the first 2 years) and decided to amend our contract and reduce our overall funding amount by ~$800k. TNC primarily absorbed these cuts by terminating the agreements with 2 of the three sub awardees and doing more of the work ourselves. The farmer funding was kept intact, which allowed us to meet all of our intended environmental deliverables.
Reporting Requirements: All reporting requirements were met and acceptable per the EPA.

Agreement Number 00D80221 – Calcasieu Lake and Sabine National Wildlife Refuge Oyster Reef Restoration Project
Award Term: 12/1/2021 – 11/30/2023
Total Project Period Cost: $500,000.00
Summary and Outcomes: Self-sustaining oyster reefs are important green infrastructure that provide a full suite of ecosystem services, such as filtering water and cycling nutrients to improve water quality, and abating wave energy and slowing shoreline retreat. Protecting this portion of Sabine National Wildlife Refuge (Sabine NWR) is not only significant for wildlife habitat in the Gulf of Mexico but is a critical area protecting Highway 27 from inundation and loss during storms, as it is a major evacuation route for local communities. Finally, oyster reefs may be able to keep pace with sea level rise and reduce the impacts of flooding and storms. The Nature Conservancy in Louisiana will partner with the U.S. Fish and Wildlife Service to restore oyster reef habitat along rapidly eroding shorelines in Calcasieu Lake along Sabine NWR, a priority landscape on the Gulf of Mexico. This project will build vertical oyster reef structure, which in turn will protect critical coastal marsh and priority areas of Sabine NWR which supports a high diversity of fish and wildlife populations; create fisheries habitat; improve estuary water quality; slow shoreline retreat by abating wave energy; and increase the resiliency of nearby coastal communities. The Nature Conservancy in Louisiana will partner with the U.S. Fish and Wildlife Service to restore oyster reef habitat along rapidly eroding shorelines in Calcasieu Lake along Sabine NWR, a priority landscape on the Gulf of Mexico.
Reporting Requirements: Award is still active and all reporting requirements have been met to date and acceptable per the EPA.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Alaska Forum, Inc

Address: PO Box 212409

City: Anchorage

State: AK: Alaska Zip Code: 99521-2409

B. Unique Entity Identifier (UEI): MT8MLXVJLHL3

C. Applicant/Recipient Point of Contact

Name: Kurt Eilo

Phone: Ex. 6 Personal Privacy (PP)

Email: keilo@akforum.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

Eilo

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Kurt A Eilo, Executive Director, PO Box 212409, Anchorage AK 99521 keilo@akforum.org Ex. 6 Personal Privacy (PP)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

yes

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Kurt A Eilo	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Part III Statement of Program Service Accomplishments

Check if Schedule O contains a response or note to any line in this Part III X

1 Briefly describe the organization's mission:
TO GROW AND SUPPORT EACH CHARITABLE JOURNEY BY PROVIDING SIMPLE CUSTOMIZED VEHICLES THAT FULFILL YOUR PHILANTHROPIC ENDEAVORS BY ADMINISTERING DONOR-ADVISED FUNDS AND FISCALLY SPONSORED PROGRAMS.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? ..... ☐ Yes ☒ No
If "Yes," describe these new services on Schedule O.

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? ..... ☐ Yes ☒ No
If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a (Code:) (Expenses $ 1,779,037. including grants of $) (Revenue $ 30,000.)
THE FOUNDATION AGAINST INTOLERANCE AND RACISM (FAIR) IS A NON-PARTISAN ORGANIZATION DEDICATED TO ADVANCING CIVIL RIGHTS AND LIBERTIES FOR ALL AMERICANS, AND PROMOTING A COMMON CULTURE BASED ON FAIRNESS, UNDERSTANDING AND HUMANITY. CHARITABLE ACTIVITIES TO CARRY OUT THEIR MISSION INCLUDE DEFENDING CIVIL LIBERTIES AND RIGHTS THAT ARE GUARANTEED TO EACH INDIVIDUAL REGARDLESS OF SKIN COLOR, ACESTRY, OR OTHER IMMUTABLE CHARACTERISTICS. THEIR FUNDRAISING TECHNIQUES CONSIST OF DONATIONS FROM SUPPORTING INDIVIDUALS, CAMPAIGNS, EVENTS, PRIVATE GRANTS, AND DONOR ADVISED FUNDS.

4b (Code:) (Expenses $ 383,536. including grants of $ 42,148.) (Revenue $)
WATCHLIST ON CHILDREN AND ARMED CONFLICT IS A FISCALLY SPONSORED PROGRAM THAT STRIVES TO END VIOLATIONS AGAINST CHILDREN IN ARMED CONFLICTS AND GUARANTEE CHILDREN THEIR RIGHTS. THE PROGRAM DEDICATES ITSELF TO PROTECTING THE SECURITY AND RIGHTS OFCHILDREN GLOBALLY. AS A GLOBAL NETWORK, WATCHLIST BUILDS PARTNERSHIPS AMONG LOCAL, NATIONAL, AND INTERNATIONAL NON-GOVERNMENTAL ORGANIZATIONS, ENHANCING MUTUAL CAPACITIES AND STRENGTHS. WORKING TOGETHER, THE PROGRAM AND ITS PARTNERS COLLECT AND DISSEMINATE INFORMATION ON VIOLATIONS AGAINST CHILDREN IN CONFLICT ZONES IN ORDER TO INFLUENCE KEY DECISION-MAKERS TO CREATE AND IMPLEMENT PROGRAMS AND POLICIES THAT EFFECTIVELY PROTECT CHILDREN.

4c (Code:) (Expenses $ 167,333. including grants of $ 46,000.) (Revenue $)
DEARTOMORROW'S MISSION IS TO PROVIDE AN EASY TOOL, IN THE FORM OF A DIGITAL AND ARCHIVE SYSTEM, THAT ALLOWS PEOPLE TO PERSONALLY CONNECT WITH THE ISSUE OF CLIMATE CHANGE AND ENCOURAGE TAKING STRONGER ACTION BY SHARING PERSONAL STORIES WITH FRIENDS, FAMILIES AND THEIR SOCIAL NETWORKS. PARTICIPANTS SUBMIT LETTERS, VIDEOS AND PHOTOS DEDICATED TO THEIR CHILDREN, FAMILY, OR THEMSELVES ABOUT CLIMATE CHANGE, WHICH ARE THEN SHARED PUBLICLY ON THEIR WEBSITE AND PARTICIPANT'S SOCIAL NETWORKS. DEARTOMORROW ALSO PARTICIPATES IN GLOBAL EVENTS HELD BY THE UN AND OTHER INTERNATIONAL ORGANIZATIONS. THEIR FUNDRAISING TECHNIQUES FOCUS ON DONATIONS FROM INDIVIDUALS, CAMPAIGNS, PRIVATE GRANTS, AS WELL AS LARGE INTERNATIONAL GRANTS FROM ORGANIZATIONS THAT STRONGLY SUPPORT THEIR MISSION.

4d Other program services (Describe on Schedule O.)
(Expenses $ 7,007,116. including grants of $ 5,894,977.) (Revenue $ 321,149.)

4e Total program service expenses ▶ 9,337,022.

Part IV Checklist of Required Schedules

			Yes	No
1	Is the organization described in section 501(c)(3) or 4947(a)(1) (other than a private foundation)? *If "Yes," complete Schedule A*	1	X	
2	Is the organization required to complete *Schedule B, Schedule of Contributors*? See instructions	2	X	
3	Did the organization engage in direct or indirect political campaign activities on behalf of or in opposition to candidates for public office? *If "Yes," complete Schedule C, Part I*	3		X
4	**Section 501(c)(3) organizations.** Did the organization engage in lobbying activities, or have a section 501(h) election in effect during the tax year? *If "Yes," complete Schedule C, Part II*	4		X
5	Is the organization a section 501(c)(4), 501(c)(5), or 501(c)(6) organization that receives membership dues, assessments, or similar amounts as defined in Rev. Proc. 98-19? *If "Yes," complete Schedule C, Part III*	5		X
6	Did the organization maintain any donor advised funds or any similar funds or accounts for which donors have the right to provide advice on the distribution or investment of amounts in such funds or accounts? *If "Yes," complete Schedule D, Part I*	6	X	
7	Did the organization receive or hold a conservation easement, including easements to preserve open space, the environment, historic land areas, or historic structures? *If "Yes," complete Schedule D, Part II*	7		X
8	Did the organization maintain collections of works of art, historical treasures, or other similar assets? *If "Yes," complete Schedule D, Part III*	8		X
9	Did the organization report an amount in Part X, line 21, for escrow or custodial account liability, serve as a custodian for amounts not listed in Part X; or provide credit counseling, debt management, credit repair, or debt negotiation services? *If "Yes," complete Schedule D, Part IV*	9		X
10	Did the organization, directly or through a related organization, hold assets in donor-restricted endowments or in quasi endowments? *If "Yes," complete Schedule D, Part V*	10		X
11	If the organization's answer to any of the following questions is "Yes," then complete Schedule D, Parts VI, VII, VIII, IX, or X, as applicable.			
a	Did the organization report an amount for land, buildings, and equipment in Part X, line 10? *If "Yes," complete Schedule D, Part VI*	11a	X	
b	Did the organization report an amount for investments - other securities in Part X, line 12, that is 5% or more of its total assets reported in Part X, line 16? *If "Yes," complete Schedule D, Part VII*	11b	X	
c	Did the organization report an amount for investments - program related in Part X, line 13, that is 5% or more of its total assets reported in Part X, line 16? *If "Yes," complete Schedule D, Part VIII*	11c		X
d	Did the organization report an amount for other assets in Part X, line 15, that is 5% or more of its total assets reported in Part X, line 16? *If "Yes," complete Schedule D, Part IX*	11d		X
e	Did the organization report an amount for other liabilities in Part X, line 25? *If "Yes," complete Schedule D, Part X*	11e		X
f	Did the organization's separate or consolidated financial statements for the tax year include a footnote that addresses the organization's liability for uncertain tax positions under FIN 48 (ASC 740)? *If "Yes," complete Schedule D, Part X*	11f	X	
12a	Did the organization obtain separate, independent audited financial statements for the tax year? *If "Yes," complete Schedule D, Parts XI and XII*	12a	X	
b	Was the organization included in consolidated, independent audited financial statements for the tax year? *If "Yes," and if the organization answered "No" to line 12a, then completing Schedule D, Parts XI and XII is optional*	12b		X
13	Is the organization a school described in section 170(b)(1)(A)(ii)? *If "Yes," complete Schedule E*	13		X
14a	Did the organization maintain an office, employees, or agents outside of the United States?	14a		X
b	Did the organization have aggregate revenues or expenses of more than $10,000 from grantmaking, fundraising, business, investment, and program service activities outside the United States, or aggregate foreign investments valued at $100,000 or more? *If "Yes," complete Schedule F, Parts I and IV*	14b	X	
15	Did the organization report on Part IX, column (A), line 3, more than $5,000 of grants or other assistance to or for any foreign organization? *If "Yes," complete Schedule F, Parts II and IV*	15	X	
16	Did the organization report on Part IX, column (A), line 3, more than $5,000 of aggregate grants or other assistance to or for foreign individuals? *If "Yes," complete Schedule F, Parts III and IV*	16		X
17	Did the organization report a total of more than $15,000 of expenses for professional fundraising services on Part IX, column (A), lines 6 and 11e? *If "Yes," complete Schedule G, Part I.* See instructions	17		X
18	Did the organization report more than $15,000 total of fundraising event gross income and contributions on Part VIII, lines 1c and 8a? *If "Yes," complete Schedule G, Part II*	18	X	
19	Did the organization report more than $15,000 of gross income from gaming activities on Part VIII, line 9a? *If "Yes," complete Schedule G, Part III*	19		X
20a	Did the organization operate one or more hospital facilities? *If "Yes," complete Schedule H*	20a		X
b	If "Yes" to line 20a, did the organization attach a copy of its audited financial statements to this return?	20b		
21	Did the organization report more than $5,000 of grants or other assistance to any domestic organization or domestic government on Part IX, column (A), line 1? *If "Yes," complete Schedule I, Parts I and II*	21	X	

Part IV Checklist of Required Schedules *(continued)*

			Yes	No
22	Did the organization report more than $5,000 of grants or other assistance to or for domestic individuals on Part IX, column (A), line 2? *If "Yes," complete Schedule I, Parts I and III*	22	X	
23	Did the organization answer "Yes" to Part VII, Section A, line 3, 4, or 5, about compensation of the organization's current and former officers, directors, trustees, key employees, and highest compensated employees? *If "Yes," complete Schedule J*	23	X	
24a	Did the organization have a tax-exempt bond issue with an outstanding principal amount of more than $100,000 as of the last day of the year, that was issued after December 31, 2002? *If "Yes," answer lines 24b through 24d and complete Schedule K. If "No," go to line 25a*	24a		X
b	Did the organization invest any proceeds of tax-exempt bonds beyond a temporary period exception?	24b		
c	Did the organization maintain an escrow account other than a refunding escrow at any time during the year to defease any tax-exempt bonds?	24c		
d	Did the organization act as an "on behalf of" issuer for bonds outstanding at any time during the year?	24d		
25a	**Section 501(c)(3), 501(c)(4), and 501(c)(29) organizations.** Did the organization engage in an excess benefit transaction with a disqualified person during the year? *If "Yes," complete Schedule L, Part I*	25a		X
b	Is the organization aware that it engaged in an excess benefit transaction with a disqualified person in a prior year, and that the transaction has not been reported on any of the organization's prior Forms 990 or 990-EZ? *If "Yes," complete Schedule L, Part I*	25b		X
26	Did the organization report any amount on Part X, line 5 or 22, for receivables from or payables to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor, or 35% controlled entity or family member of any of these persons? *If "Yes," complete Schedule L, Part II*	26		X
27	Did the organization provide a grant or other assistance to any current or former officer, director, trustee, key employee, creator or founder, substantial contributor or employee thereof, a grant selection committee member, or to a 35% controlled entity (including an employee thereof) or family member of any of these persons? *If "Yes," complete Schedule L, Part III*	27		X
28	Was the organization a party to a business transaction with one of the following parties (see the Schedule L, Part IV, instructions for applicable filing thresholds, conditions, and exceptions):			
a	A current or former officer, director, trustee, key employee, creator or founder, or substantial contributor? *If "Yes," complete Schedule L, Part IV*	28a		X
b	A family member of any individual described in line 28a? *If "Yes," complete Schedule L, Part IV*	28b		X
c	A 35% controlled entity of one or more individuals and/or organizations described in line 28a or 28b? *If "Yes," complete Schedule L, Part IV*	28c		X
29	Did the organization receive more than $25,000 in non-cash contributions? *If "Yes," complete Schedule M*	29	X	
30	Did the organization receive contributions of art, historical treasures, or other similar assets, or qualified conservation contributions? *If "Yes," complete Schedule M*	30		X
31	Did the organization liquidate, terminate, or dissolve and cease operations? *If "Yes," complete Schedule N, Part I*	31		X
32	Did the organization sell, exchange, dispose of, or transfer more than 25% of its net assets? *If "Yes," complete Schedule N, Part II*	32		X
33	Did the organization own 100% of an entity disregarded as separate from the organization under Regulations sections 301.7701-2 and 301.7701-3? *If "Yes," complete Schedule R, Part I*	33		X
34	Was the organization related to any tax-exempt or taxable entity? *If "Yes," complete Schedule R, Part II, III, or IV, and Part V, line 1*	34	X	
35a	Did the organization have a controlled entity within the meaning of section 512(b)(13)?	35a	X	
b	If "Yes" to line 35a, did the organization receive any payment from or engage in any transaction with a controlled entity within the meaning of section 512(b)(13)? *If "Yes," complete Schedule R, Part V, line 2*	35b	X	
36	**Section 501(c)(3) organizations.** Did the organization make any transfers to an exempt non-charitable related organization? *If "Yes," complete Schedule R, Part V, line 2*	36		X
37	Did the organization conduct more than 5% of its activities through an entity that is not a related organization and that is treated as a partnership for federal income tax purposes? *If "Yes," complete Schedule R, Part VI*	37		X
38	Did the organization complete Schedule O and provide explanations on Schedule O for Part VI, lines 11b and 19? **Note:** All Form 990 filers are required to complete Schedule O	38	X	

Part V Statements Regarding Other IRS Filings and Tax Compliance

Check if Schedule O contains a response or note to any line in this Part V ☐

				Yes	No
1a	Enter the number reported in box 3 of Form 1096. Enter -0- if not applicable	1a	134		
b	Enter the number of Forms W-2G included on line 1a. Enter -0- if not applicable	1b	0		
c	Did the organization comply with backup withholding rules for reportable payments to vendors and reportable gaming (gambling) winnings to prize winners?	1c		X	

Part V Statements Regarding Other IRS Filings and Tax Compliance *(continued)*

				Yes	No
2a	Enter the number of employees reported on Form W-3, Transmittal of Wage and Tax Statements, filed for the calendar year ending with or within the year covered by this return	2a	46		
b	If at least one is reported on line 2a, did the organization file all required federal employment tax returns?	2b		X	
	Note: If the sum of lines 1a and 2a is greater than 250, you may be required to *e-file.* See instructions.				
3a	Did the organization have unrelated business gross income of $1,000 or more during the year?	3a			X
b	If "Yes," has it filed a Form 990-T for this year? *If "No" to line 3b, provide an explanation on Schedule O*	3b			
4a	At any time during the calendar year, did the organization have an interest in, or a signature or other authority over, a financial account in a foreign country (such as a bank account, securities account, or other financial account)?	4a			X
b	If "Yes," enter the name of the foreign country ▶ _____ See instructions for filing requirements for FinCEN Form 114, Report of Foreign Bank and Financial Accounts (FBAR).				
5a	Was the organization a party to a prohibited tax shelter transaction at any time during the tax year?	5a			X
b	Did any taxable party notify the organization that it was or is a party to a prohibited tax shelter transaction?	5b			X
c	If "Yes" to line 5a or 5b, did the organization file Form 8886-T?	5c			
6a	Does the organization have annual gross receipts that are normally greater than $100,000, and did the organization solicit any contributions that were not tax deductible as charitable contributions?	6a			X
b	If "Yes," did the organization include with every solicitation an express statement that such contributions or gifts were not tax deductible?	6b			
7	**Organizations that may receive deductible contributions under section 170(c).**				
a	Did the organization receive a payment in excess of $75 made partly as a contribution and partly for goods and services provided to the payor?	7a		X	
b	If "Yes," did the organization notify the donor of the value of the goods or services provided?	7b		X	
c	Did the organization sell, exchange, or otherwise dispose of tangible personal property for which it was required to file Form 8282?	7c			X
d	If "Yes," indicate the number of Forms 8282 filed during the year	7d			
e	Did the organization receive any funds, directly or indirectly, to pay premiums on a personal benefit contract?	7e			X
f	Did the organization, during the year, pay premiums, directly or indirectly, on a personal benefit contract?	7f			X
g	If the organization received a contribution of qualified intellectual property, did the organization file Form 8899 as required?	7g			
h	If the organization received a contribution of cars, boats, airplanes, or other vehicles, did the organization file a Form 1098-C?	7h			
8	**Sponsoring organizations maintaining donor advised funds.** Did a donor advised fund maintained by the sponsoring organization have excess business holdings at any time during the year?	8			
9	**Sponsoring organizations maintaining donor advised funds.**				
a	Did the sponsoring organization make any taxable distributions under section 4966?	9a			
b	Did the sponsoring organization make a distribution to a donor, donor advisor, or related person?	9b			
10	**Section 501(c)(7) organizations.** Enter:				
a	Initiation fees and capital contributions included on Part VIII, line 12	10a			
b	Gross receipts, included on Form 990, Part VIII, line 12, for public use of club facilities	10b			
11	**Section 501(c)(12) organizations.** Enter:				
a	Gross income from members or shareholders	11a			
b	Gross income from other sources. (Do not net amounts due or paid to other sources against amounts due or received from them.)	11b			
12a	**Section 4947(a)(1) non-exempt charitable trusts.** Is the organization filing Form 990 in lieu of Form 1041?	12a			
b	If "Yes," enter the amount of tax-exempt interest received or accrued during the year	12b			
13	**Section 501(c)(29) qualified nonprofit health insurance issuers.**				
a	Is the organization licensed to issue qualified health plans in more than one state? **Note:** See the instructions for additional information the organization must report on Schedule O.	13a			
b	Enter the amount of reserves the organization is required to maintain by the states in which the organization is licensed to issue qualified health plans	13b			
c	Enter the amount of reserves on hand	13c			
14a	Did the organization receive any payments for indoor tanning services during the tax year?	14a			X
b	If "Yes," has it filed a Form 720 to report these payments? *If "No," provide an explanation on Schedule O*	14b			
15	Is the organization subject to the section 4960 tax on payment(s) of more than $1,000,000 in remuneration or excess parachute payment(s) during the year? If "Yes," see the instructions and file Form 4720, Schedule N.	15			X
16	Is the organization an educational institution subject to the section 4968 excise tax on net investment income? If "Yes," complete Form 4720, Schedule O.	16			X
17	**Section 501(c)(21) organizations.** Did the trust, any disqualified person, or mine operator engage in any activities that would result in the imposition of an excise tax under section 4951, 4952 or 4953? If "Yes," complete Form 6069.	17			

Part VI Governance, Management, and Disclosure. *For each "Yes" response to lines 2 through 7b below, and for a "No" response to line 8a, 8b, or 10b below, describe the circumstances, processes, or changes on Schedule O. See instructions.*

Check if Schedule O contains a response or note to any line in this Part VI X

Section A. Governing Body and Management

				Yes	No
1a	Enter the number of voting members of the governing body at the end of the tax year	1a	10		
	If there are material differences in voting rights among members of the governing body, or if the governing body delegated broad authority to an executive committee or similar committee, explain on Schedule O.				
b	Enter the number of voting members included on line 1a, above, who are independent	1b	9		
2	Did any officer, director, trustee, or key employee have a family relationship or a business relationship with any other officer, director, trustee, or key employee?	2			X
3	Did the organization delegate control over management duties customarily performed by or under the direct supervision of officers, directors, trustees, or key employees to a management company or other person?	3			X
4	Did the organization make any significant changes to its governing documents since the prior Form 990 was filed?	4			X
5	Did the organization become aware during the year of a significant diversion of the organization's assets?	5			X
6	Did the organization have members or stockholders?	6			X
7a	Did the organization have members, stockholders, or other persons who had the power to elect or appoint one or more members of the governing body?	7a			X
b	Are any governance decisions of the organization reserved to (or subject to approval by) members, stockholders, or persons other than the governing body?	7b			X
8	Did the organization contemporaneously document the meetings held or written actions undertaken during the year by the following:				
a	The governing body?	8a		X	
b	Each committee with authority to act on behalf of the governing body?	8b		X	
9	Is there any officer, director, trustee, or key employee listed in Part VII, Section A, who cannot be reached at the organization's mailing address? *If "Yes," provide the names and addresses on Schedule O*	9			X

Section B. Policies *(This Section B requests information about policies not required by the Internal Revenue Code.)*

			Yes	No
10a	Did the organization have local chapters, branches, or affiliates?	10a		X
b	If "Yes," did the organization have written policies and procedures governing the activities of such chapters, affiliates, and branches to ensure their operations are consistent with the organization's exempt purposes?	10b		
11a	Has the organization provided a complete copy of this Form 990 to all members of its governing body before filing the form?	11a	X	
b	Describe on Schedule O the process, if any, used by the organization to review this Form 990.			
12a	Did the organization have a written conflict of interest policy? *If "No," go to line 13*	12a	X	
b	Were officers, directors, or trustees, and key employees required to disclose annually interests that could give rise to conflicts?	12b	X	
c	Did the organization regularly and consistently monitor and enforce compliance with the policy? *If "Yes," describe on Schedule O how this was done*	12c	X	
13	Did the organization have a written whistleblower policy?	13	X	
14	Did the organization have a written document retention and destruction policy?	14	X	
15	Did the process for determining compensation of the following persons include a review and approval by independent persons, comparability data, and contemporaneous substantiation of the deliberation and decision?			
a	The organization's CEO, Executive Director, or top management official	15a	X	
b	Other officers or key employees of the organization	15b	X	
	If "Yes" to line 15a or 15b, describe the process on Schedule O. See instructions.			
16a	Did the organization invest in, contribute assets to, or participate in a joint venture or similar arrangement with a taxable entity during the year?	16a		X
b	If "Yes," did the organization follow a written policy or procedure requiring the organization to evaluate its participation in joint venture arrangements under applicable federal tax law, and take steps to safeguard the organization's exempt status with respect to such arrangements?	16b		

Section C. Disclosure

17 List the states with which a copy of this Form 990 is required to be filed ▶AL,AR,CA,FL,GA,IL,KS,KY,MD,MA,MI,MS

18 Section 6104 requires an organization to make its Forms 1023 (1024 or 1024-A, if applicable), 990, and 990-T (section 501(c)(3)s only) available for public inspection. Indicate how you made these available. Check all that apply.

[X] Own website [X] Another's website [X] Upon request [ ] Other *(explain on Schedule O)*

19 Describe on Schedule O whether (and if so, how) the organization made its governing documents, conflict of interest policy, and financial statements available to the public during the tax year.

20 State the name, address, and telephone number of the person who possesses the organization's books and records ▶

THE ORGANIZATION - Ex. 6 Personal Privacy (PP)

44921 GEORGE WASHINGTON BLVD , 230, ASHBURN, VA 20147

Part VII Compensation of Officers, Directors, Trustees, Key Employees, Highest Compensated Employees, and Independent Contractors

Check if Schedule O contains a response or note to any line in this Part VII ☐

Section A. Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees

1a Complete this table for all persons required to be listed. Report compensation for the calendar year ending with or within the organization's tax year.

- List all of the organization's **current** officers, directors, trustees (whether individuals or organizations), regardless of amount of compensation. Enter -0- in columns (D), (E), and (F) if no compensation was paid.
- List all of the organization's **current** key employees, if any. See the instructions for definition of "key employee."
- List the organization's five **current** highest compensated employees (other than an officer, director, trustee, or key employee) who received reportable compensation (box 5 of Form W-2, Form 1099-MISC, and/or box 1 of Form 1099-NEC) of more than $100,000 from the organization and any related organizations.
- List all of the organization's **former** officers, key employees, and highest compensated employees who received more than $100,000 of reportable compensation from the organization and any related organizations.
- List all of the organization's **former directors or trustees** that received, in the capacity as a former director or trustee of the organization, more than $10,000 of reportable compensation from the organization and any related organizations.

See the instructions for the order in which to list the persons above.

☐ Check this box if neither the organization nor any related organization compensated any current officer, director, or trustee.

	33	Total liabilities and net assets/fund balances		198,547,791.	33	209,799,923.

Part XI Reconciliation of Net Assets

Check if Schedule O contains a response or note to any line in this Part XI ☐

1	Total revenue (must equal Part VIII, column (A), line 12)	1	22,185,205.
2	Total expenses (must equal Part IX, column (A), line 25)	2	11,053,022.
3	Revenue less expenses. Subtract line 2 from line 1	3	11,132,183.
4	Net assets or fund balances at beginning of year (must equal Part X, line 32, column (A))	4	198,199,209.
5	Net unrealized gains (losses) on investments	5	-254,959.
6	Donated services and use of facilities	6	
7	Investment expenses	7	
8	Prior period adjustments	8	458,133.
9	Other changes in net assets or fund balances (explain on Schedule O)	9	0.
10	Net assets or fund balances at end of year. Combine lines 3 through 9 (must equal Part X, line 32, column (B))	10	209,534,566.

Part XII Financial Statements and Reporting

Check if Schedule O contains a response or note to any line in this Part XII ☒

			Yes	No
1	Accounting method used to prepare the Form 990: ☐ Cash ☒ Accrual ☐ Other _____ If the organization changed its method of accounting from a prior year or checked "Other," explain on Schedule O.			
2a	Were the organization's financial statements compiled or reviewed by an independent accountant?	2a		X
	If "Yes," check a box below to indicate whether the financial statements for the year were compiled or reviewed on a separate basis, consolidated basis, or both: ☐ Separate basis ☐ Consolidated basis ☐ Both consolidated and separate basis			
b	Were the organization's financial statements audited by an independent accountant?	2b	X	
	If "Yes," check a box below to indicate whether the financial statements for the year were audited on a separate basis, consolidated basis, or both: ☒ Separate basis ☐ Consolidated basis ☐ Both consolidated and separate basis			
c	If "Yes" to line 2a or 2b, does the organization have a committee that assumes responsibility for oversight of the audit, review, or compilation of its financial statements and selection of an independent accountant?	2c	X	
	If the organization changed either its oversight process or selection process during the tax year, explain on Schedule O.			
3a	As a result of a federal award, was the organization required to undergo an audit or audits as set forth in the Single Audit Act and OMB Circular A-133?	3a		X
b	If "Yes," did the organization undergo the required audit or audits? If the organization did not undergo the required audit or audits, explain why on Schedule O and describe any steps taken to undergo such audits	3b		

SCHEDULE A
(Form 990)

Department of the Treasury
Internal Revenue Service

Public Charity Status and Public Support

Complete if the organization is a section 501(c)(3) organization or a section 4947(a)(1) nonexempt charitable trust.
▶ Attach to Form 990 or Form 990-EZ.
▶ Go to www.irs.gov/Form990 for instructions and the latest information.

OMB No. 1545-0047

2021

Open to Public Inspection

Name of the organization

UNITED CHARITABLE

Employer identification number

20-4286082

Part I Reason for Public Charity Status. (All organizations must complete this part.) See instructions.

The organization is not a private foundation because it is: (For lines 1 through 12, check only one box.)

1 ☐ A church, convention of churches, or association of churches described in **section 170(b)(1)(A)(i).**
2 ☐ A school described in **section 170(b)(1)(A)(ii).** (Attach Schedule E (Form 990).)
3 ☐ A hospital or a cooperative hospital service organization described in **section 170(b)(1)(A)(iii).**
4 ☐ A medical research organization operated in conjunction with a hospital described in **section 170(b)(1)(A)(iii).** Enter the hospital's name, city, and state: _____
5 ☐ An organization operated for the benefit of a college or university owned or operated by a governmental unit described in **section 170(b)(1)(A)(iv).** (Complete Part II.)
6 ☐ A federal, state, or local government or governmental unit described in **section 170(b)(1)(A)(v).**
7 ☒ An organization that normally receives a substantial part of its support from a governmental unit or from the general public described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
8 ☐ A community trust described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
9 ☐ An agricultural research organization described in **section 170(b)(1)(A)(ix)** operated in conjunction with a land-grant college or university or a non-land-grant college of agriculture (see instructions). Enter the name, city, and state of the college or university: _____
10 ☐ An organization that normally receives (1) more than 33 1/3% of its support from contributions, membership fees, and gross receipts from activities related to its exempt functions, subject to certain exceptions; and (2) no more than 33 1/3% of its support from gross investment income and unrelated business taxable income (less section 511 tax) from businesses acquired by the organization after June 30, 1975. See **section 509(a)(2).** (Complete Part III.)
11 ☐ An organization organized and operated exclusively to test for public safety. See **section 509(a)(4).**
12 ☐ An organization organized and operated exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more publicly supported organizations described in **section 509(a)(1)** or **section 509(a)(2)**. See **section 509(a)(3).** Check the box on lines 12a through 12d that describes the type of supporting organization and complete lines 12e, 12f, and 12g.

a ☐ **Type I.** A supporting organization operated, supervised, or controlled by its supported organization(s), typically by giving the supported organization(s) the power to regularly appoint or elect a majority of the directors or trustees of the supporting organization. **You must complete Part IV, Sections A and B.**
b ☐ **Type II.** A supporting organization supervised or controlled in connection with its supported organization(s), by having control or management of the supporting organization vested in the same persons that control or manage the supported organization(s). **You must complete Part IV, Sections A and C.**
c ☐ **Type III functionally integrated.** A supporting organization operated in connection with, and functionally integrated with, its supported organization(s) (see instructions). **You must complete Part IV, Sections A, D, and E.**
d ☐ **Type III non-functionally integrated.** A supporting organization operated in connection with its supported organization(s) that is not functionally integrated. The organization generally must satisfy a distribution requirement and an attentiveness requirement (see instructions). **You must complete Part IV, Sections A and D, and Part V.**
e ☐ Check this box if the organization received a written determination from the IRS that it is a Type I, Type II, Type III functionally integrated, or Type III non-functionally integrated supporting organization.
f Enter the number of supported organizations .....
g Provide the following information about the supported organization(s).

(i) Name of supported organization	(ii) EIN	(iii) Type of organization (described on lines 1-10 above (see instructions))	(iv) Is the organization listed in your governing document? Yes	(iv) No	(v) Amount of monetary support (see instructions)	(vi) Amount of other support (see instructions)
Total						

Part II Support Schedule for Organizations Described in Sections 170(b)(1)(A)(iv) and 170(b)(1)(A)(vi)

(Complete only if you checked the box on line 5, 7, or 8 of Part I or if the organization failed to qualify under Part III. If the organization fails to qualify under the tests listed below, please complete Part III.)

Section A. Public Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grants.")	24798658.	75475310.	25695500.	8225627.	17083907.	151279002
2 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf						
3 The value of services or facilities furnished by a governmental unit to the organization without charge						
4 **Total.** Add lines 1 through 3	24798658.	75475310.	25695500.	8225627.	17083907.	151279002
5 The portion of total contributions by each person (other than a governmental unit or publicly supported organization) included on line 1 that exceeds 2% of the amount shown on line 11, column (f)						21858685.
6 **Public support.** Subtract line 5 from line 4.						129420317

Section B. Total Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
7 Amounts from line 4	24798658.	75475310.	25695500.	8225627.	17083907.	151279002
8 Gross income from interest, dividends, payments received on securities loans, rents, royalties, and income from similar sources	1063724.	1281942.	4080769.	6521019.	1737997.	14685451.
9 Net income from unrelated business activities, whether or not the business is regularly carried on						
10 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.)						
11 **Total support.** Add lines 7 through 10						165964453

12 Gross receipts from related activities, etc. (see instructions) 12

13 **First 5 years.** If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and **stop here** ▶ ☐

Section C. Computation of Public Support Percentage

14 Public support percentage for 2021 (line 6, column (f), divided by line 11, column (f))	14	77.98 %
15 Public support percentage from 2020 Schedule A, Part II, line 14	15	80.61 %

16a **33 1/3% support test - 2021.** If the organization did not check the box on line 13, and line 14 is 33 1/3% or more, check this box and **stop here.** The organization qualifies as a publicly supported organization ▶ ☒

b **33 1/3% support test - 2020.** If the organization did not check a box on line 13 or 16a, and line 15 is 33 1/3% or more, check this box and **stop here.** The organization qualifies as a publicly supported organization ▶ ☐

17a **10% -facts-and-circumstances test - 2021.** If the organization did not check a box on line 13, 16a, or 16b, and line 14 is 10% or more, and if the organization meets the facts-and-circumstances test, check this box and **stop here.** Explain in Part VI how the organization meets the facts-and-circumstances test. The organization qualifies as a publicly supported organization ▶ ☐

b **10% -facts-and-circumstances test - 2020.** If the organization did not check a box on line 13, 16a, 16b, or 17a, and line 15 is 10% or more, and if the organization meets the facts-and-circumstances test, check this box and **stop here.** Explain in Part VI how the organization meets the facts-and-circumstances test. The organization qualifies as a publicly supported organization ▶ ☐

18 **Private foundation.** If the organization did not check a box on line 13, 16a, 16b, 17a, or 17b, check this box and see instructions ▶ ☐

Part III Support Schedule for Organizations Described in Section 509(a)(2)

(Complete only if you checked the box on line 10 of Part I or if the organization failed to qualify under Part II. If the organization fails to qualify under the tests listed below, please complete Part II.)

Section A. Public Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grants.")						
2 Gross receipts from admissions, merchandise sold or services performed, or facilities furnished in any activity that is related to the organization's tax-exempt purpose						
3 Gross receipts from activities that are not an unrelated trade or business under section 513						
4 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf						
5 The value of services or facilities furnished by a governmental unit to the organization without charge						
6 **Total.** Add lines 1 through 5						
7a Amounts included on lines 1, 2, and 3 received from disqualified persons						
b Amounts included on lines 2 and 3 received from other than disqualified persons that exceed the greater of $5,000 or 1% of the amount on line 13 for the year						
c Add lines 7a and 7b						
8 **Public support.** (Subtract line 7c from line 6.)						

Section B. Total Support

Calendar year (or fiscal year beginning in) ▶	(a) 2017	(b) 2018	(c) 2019	(d) 2020	(e) 2021	(f) Total
9 Amounts from line 6						
10a Gross income from interest, dividends, payments received on securities loans, rents, royalties, and income from similar sources						
b Unrelated business taxable income (less section 511 taxes) from businesses acquired after June 30, 1975						
c Add lines 10a and 10b						
11 Net income from unrelated business activities not included on line 10b, whether or not the business is regularly carried on						
12 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.)						
13 **Total support.** (Add lines 9, 10c, 11, and 12.)						

14 **First 5 years.** If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and **stop here** ▶ ☐

Section C. Computation of Public Support Percentage

15 Public support percentage for 2021 (line 8, column (f), divided by line 13, column (f))	15	%
16 Public support percentage from 2020 Schedule A, Part III, line 15	16	%

Section D. Computation of Investment Income Percentage

17 Investment income percentage for **2021** (line 10c, column (f), divided by line 13, column (f))	17	%
18 Investment income percentage from **2020** Schedule A, Part III, line 17	18	%

19a **33 1/3% support tests - 2021.** If the organization did not check the box on line 14, and line 15 is more than 33 1/3%, and line 17 is not more than 33 1/3%, check this box and **stop here.** The organization qualifies as a publicly supported organization ▶ ☐

b **33 1/3% support tests - 2020.** If the organization did not check a box on line 14 or line 19a, and line 16 is more than 33 1/3%, and line 18 is not more than 33 1/3%, check this box and **stop here.** The organization qualifies as a publicly supported organization ▶ ☐

20 **Private foundation.** If the organization did not check a box on line 14, 19a, or 19b, check this box and see instructions ▶ ☐

Part IV Supporting Organizations

(Complete only if you checked a box in line 12 on Part I. If you checked box 12a, Part I, complete Sections A and B. If you checked box 12b, Part I, complete Sections A and C. If you checked box 12c, Part I, complete Sections A, D, and E. If you checked box 12d, Part I, complete Sections A and D, and complete Part V.)

Section A. All Supporting Organizations

			Yes	No
1	Are all of the organization's supported organizations listed by name in the organization's governing documents? *If "No," describe in* **Part VI** *how the supported organizations are designated. If designated by class or purpose, describe the designation. If historic and continuing relationship, explain.*	1		
2	Did the organization have any supported organization that does not have an IRS determination of status under section 509(a)(1) or (2)? *If "Yes," explain in* **Part VI** *how the organization determined that the supported organization was described in section 509(a)(1) or (2).*	2		
3a	Did the organization have a supported organization described in section 501(c)(4), (5), or (6)? *If "Yes," answer lines 3b and 3c below.*	3a		
b	Did the organization confirm that each supported organization qualified under section 501(c)(4), (5), or (6) and satisfied the public support tests under section 509(a)(2)? *If "Yes," describe in* **Part VI** *when and how the organization made the determination.*	3b		
c	Did the organization ensure that all support to such organizations was used exclusively for section 170(c)(2)(B) purposes? *If "Yes," explain in* **Part VI** *what controls the organization put in place to ensure such use.*	3c		
4a	Was any supported organization not organized in the United States ("foreign supported organization")? *If "Yes," and if you checked box 12a or 12b in Part I, answer lines 4b and 4c below.*	4a		
b	Did the organization have ultimate control and discretion in deciding whether to make grants to the foreign supported organization? *If "Yes," describe in* **Part VI** *how the organization had such control and discretion despite being controlled or supervised by or in connection with its supported organizations.*	4b		
c	Did the organization support any foreign supported organization that does not have an IRS determination under sections 501(c)(3) and 509(a)(1) or (2)? *If "Yes," explain in* **Part VI** *what controls the organization used to ensure that all support to the foreign supported organization was used exclusively for section 170(c)(2)(B) purposes.*	4c		
5a	Did the organization add, substitute, or remove any supported organizations during the tax year? *If "Yes," answer lines 5b and 5c below (if applicable). Also, provide detail in* **Part VI,** *including (i) the names and EIN numbers of the supported organizations added, substituted, or removed; (ii) the reasons for each such action; (iii) the authority under the organization's organizing document authorizing such action; and (iv) how the action was accomplished (such as by amendment to the organizing document).*	5a		
b	**Type I or Type II only.** Was any added or substituted supported organization part of a class already designated in the organization's organizing document?	5b		
c	**Substitutions only.** Was the substitution the result of an event beyond the organization's control?	5c		
6	Did the organization provide support (whether in the form of grants or the provision of services or facilities) to anyone other than (i) its supported organizations, (ii) individuals that are part of the charitable class benefited by one or more of its supported organizations, or (iii) other supporting organizations that also support or benefit one or more of the filing organization's supported organizations? *If "Yes," provide detail in* **Part VI.**	6		
7	Did the organization provide a grant, loan, compensation, or other similar payment to a substantial contributor (as defined in section 4958(c)(3)(C)), a family member of a substantial contributor, or a 35% controlled entity with regard to a substantial contributor? *If "Yes," complete Part I of Schedule L (Form 990).*	7		
8	Did the organization make a loan to a disqualified person (as defined in section 4958) not described on line 7? *If "Yes," complete Part I of Schedule L (Form 990).*	8		
9a	Was the organization controlled directly or indirectly at any time during the tax year by one or more disqualified persons, as defined in section 4946 (other than foundation managers and organizations described in section 509(a)(1) or (2))? *If "Yes," provide detail in* **Part VI.**	9a		
b	Did one or more disqualified persons (as defined on line 9a) hold a controlling interest in any entity in which the supporting organization had an interest? *If "Yes," provide detail in* **Part VI.**	9b		
c	Did a disqualified person (as defined on line 9a) have an ownership interest in, or derive any personal benefit from, assets in which the supporting organization also had an interest? *If "Yes," provide detail in* **Part VI.**	9c		
10a	Was the organization subject to the excess business holdings rules of section 4943 because of section 4943(f) (regarding certain Type II supporting organizations, and all Type III non-functionally integrated supporting organizations)? *If "Yes," answer line 10b below.*	10a		
b	Did the organization have any excess business holdings in the tax year? *(Use Schedule C, Form 4720, to determine whether the organization had excess business holdings.)*	10b		

Part IV Supporting Organizations *(continued)*

		Yes	No
11	Has the organization accepted a gift or contribution from any of the following persons?		
a	A person who directly or indirectly controls, either alone or together with persons described on lines 11b and 11c below, the governing body of a supported organization?	**11a**	
b	A family member of a person described on line 11a above?	**11b**	
c	A 35% controlled entity of a person described on line 11a or 11b above? *If "Yes" to line 11a, 11b, or 11c, provide detail in* **Part VI.**	**11c**	

Section B. Type I Supporting Organizations

		Yes	No
1	Did the governing body, members of the governing body, officers acting in their official capacity, or membership of one or more supported organizations have the power to regularly appoint or elect at least a majority of the organization's officers, directors, or trustees at all times during the tax year? *If "No," describe in* **Part VI** *how the supported organization(s) effectively operated, supervised, or controlled the organization's activities. If the organization had more than one supported organization, describe how the powers to appoint and/or remove officers, directors, or trustees were allocated among the supported organizations and what conditions or restrictions, if any, applied to such powers during the tax year.*	**1**	
2	Did the organization operate for the benefit of any supported organization other than the supported organization(s) that operated, supervised, or controlled the supporting organization? *If "Yes," explain in* **Part VI** *how providing such benefit carried out the purposes of the supported organization(s) that operated, supervised, or controlled the supporting organization.*	**2**	

Section C. Type II Supporting Organizations

		Yes	No
1	Were a majority of the organization's directors or trustees during the tax year also a majority of the directors or trustees of each of the organization's supported organization(s)? *If "No," describe in* **Part VI** *how control or management of the supporting organization was vested in the same persons that controlled or managed the supported organization(s).*	**1**	

Section D. All Type III Supporting Organizations

		Yes	No
1	Did the organization provide to each of its supported organizations, by the last day of the fifth month of the organization's tax year, (i) a written notice describing the type and amount of support provided during the prior tax year, (ii) a copy of the Form 990 that was most recently filed as of the date of notification, and (iii) copies of the organization's governing documents in effect on the date of notification, to the extent not previously provided?	**1**	
2	Were any of the organization's officers, directors, or trustees either (i) appointed or elected by the supported organization(s) or (ii) serving on the governing body of a supported organization? *If "No," explain in* **Part VI** *how the organization maintained a close and continuous working relationship with the supported organization(s).*	**2**	
3	By reason of the relationship described on line 2, above, did the organization's supported organizations have a significant voice in the organization's investment policies and in directing the use of the organization's income or assets at all times during the tax year? *If "Yes," describe in* **Part VI** *the role the organization's supported organizations played in this regard.*	**3**	

Section E. Type III Functionally Integrated Supporting Organizations

1 *Check the box next to the method that the organization used to satisfy the Integral Part Test during the year* **(see instructions).**

a ☐ The organization satisfied the Activities Test. *Complete* **line 2** *below.*

b ☐ The organization is the parent of each of its supported organizations. *Complete* **line 3** *below.*

c ☐ The organization supported a governmental entity. *Describe in* **Part VI** *how you supported a governmental entity (see instructions).*

		Yes	No
2	Activities Test. **Answer lines 2a and 2b below.**		
a	Did substantially all of the organization's activities during the tax year directly further the exempt purposes of the supported organization(s) to which the organization was responsive? *If "Yes," then in* **Part VI identify those supported organizations and explain** *how these activities directly furthered their exempt purposes, how the organization was responsive to those supported organizations, and how the organization determined that these activities constituted substantially all of its activities.*	**2a**	
b	Did the activities described on line 2a, above, constitute activities that, but for the organization's involvement, one or more of the organization's supported organization(s) would have been engaged in? *If "Yes," explain in* **Part VI** *the reasons for the organization's position that its supported organization(s) would have engaged in these activities but for the organization's involvement.*	**2b**	
3	Parent of Supported Organizations. **Answer lines 3a and 3b below.**		
a	Did the organization have the power to regularly appoint or elect a majority of the officers, directors, or trustees of each of the supported organizations? *If "Yes" or "No" provide details in* **Part VI.**	**3a**	
b	Did the organization exercise a substantial degree of direction over the policies, programs, and activities of each of its supported organizations? *If "Yes," describe in* **Part VI** *the role played by the organization in this regard.*	**3b**	

Part V Type III Non-Functionally Integrated 509(a)(3) Supporting Organizations

1 ☐ Check here if the organization satisfied the Integral Part Test as a qualifying trust on Nov. 20, 1970 (*explain in* **Part VI**). **See instructions.** All other Type III non-functionally integrated supporting organizations must complete Sections A through E.

Section A - Adjusted Net Income		(A) Prior Year	(B) Current Year (optional)
1 Net short-term capital gain	1		
2 Recoveries of prior-year distributions	2		
3 Other gross income (see instructions)	3		
4 Add lines 1 through 3.	4		
5 Depreciation and depletion	5		
6 Portion of operating expenses paid or incurred for production or collection of gross income or for management, conservation, or maintenance of property held for production of income (see instructions)	6		
7 Other expenses (see instructions)	7		
8 **Adjusted Net Income** (subtract lines 5, 6, and 7 from line 4)	8		

Section B - Minimum Asset Amount		(A) Prior Year	(B) Current Year (optional)
1 Aggregate fair market value of all non-exempt-use assets (see instructions for short tax year or assets held for part of year):			
a Average monthly value of securities	1a		
b Average monthly cash balances	1b		
c Fair market value of other non-exempt-use assets	1c		
d **Total** (add lines 1a, 1b, and 1c)	1d		
e **Discount** claimed for blockage or other factors (*explain in detail in* **Part VI**):			
2 Acquisition indebtedness applicable to non-exempt-use assets	2		
3 Subtract line 2 from line 1d.	3		
4 Cash deemed held for exempt use. Enter 0.015 of line 3 (for greater amount, see instructions).	4		
5 Net value of non-exempt-use assets (subtract line 4 from line 3)	5		
6 Multiply line 5 by 0.035.	6		
7 Recoveries of prior-year distributions	7		
8 **Minimum Asset Amount** (add line 7 to line 6)	8		

Section C - Distributable Amount			Current Year
1 Adjusted net income for prior year (from Section A, line 8, column A)	1		
2 Enter 0.85 of line 1.	2		
3 Minimum asset amount for prior year (from Section B, line 8, column A)	3		
4 Enter greater of line 2 or line 3.	4		
5 Income tax imposed in prior year	5		
6 **Distributable Amount.** Subtract line 5 from line 4, unless subject to emergency temporary reduction (see instructions).	6		

7 ☐ Check here if the current year is the organization's first as a non-functionally integrated Type III supporting organization (see instructions).

Part V **Type III Non-Functionally Integrated 509(a)(3) Supporting Organizations** *(continued)*

Section D - Distributions			**Current Year**
1	Amounts paid to supported organizations to accomplish exempt purposes	1	
2	Amounts paid to perform activity that directly furthers exempt purposes of supported organizations, in excess of income from activity	2	
3	Administrative expenses paid to accomplish exempt purposes of supported organizations	3	
4	Amounts paid to acquire exempt-use assets	4	
5	Qualified set-aside amounts (prior IRS approval required - *provide details in* **Part VI**)	5	
6	Other distributions (*describe in* **Part VI**). See instructions.	6	
7	**Total annual distributions.** Add lines 1 through 6.	7	
8	Distributions to attentive supported organizations to which the organization is responsive (*provide details in* **Part VI**). See instructions.	8	
9	Distributable amount for 2021 from Section C, line 6	9	
10	Line 8 amount divided by line 9 amount	10	

Section E - Distribution Allocations (see instructions)		**(i) Excess Distributions**	**(ii) Underdistributions Pre-2021**	**(iii) Distributable Amount for 2021**
1	Distributable amount for 2021 from Section C, line 6			
2	Underdistributions, if any, for years prior to 2021 (reasonable cause required - *explain in* **Part VI**). See instructions.			
3	Excess distributions carryover, if any, to 2021			
a	From 2016			
b	From 2017			
c	From 2018			
d	From 2019			
e	From 2020			
f	**Total** of lines 3a through 3e			
g	Applied to underdistributions of prior years			
h	Applied to 2021 distributable amount			
i	Carryover from 2016 not applied (see instructions)			
j	Remainder. Subtract lines 3g, 3h, and 3i from line 3f.			
4	Distributions for 2021 from Section D, line 7: $			
a	Applied to underdistributions of prior years			
b	Applied to 2021 distributable amount			
c	Remainder. Subtract lines 4a and 4b from line 4.			
5	Remaining underdistributions for years prior to 2021, if any. Subtract lines 3g and 4a from line 2. For result greater than zero, *explain in* **Part VI.** See instructions.			
6	Remaining underdistributions for 2021. Subtract lines 3h and 4b from line 1. For result greater than zero, *explain in* **Part VI**. See instructions.			
7	**Excess distributions carryover to 2022.** Add lines 3j and 4c.			
8	Breakdown of line 7:			
a	Excess from 2017			
b	Excess from 2018			
c	Excess from 2019			
d	Excess from 2020			
e	Excess from 2021			

Part VI **Supplemental Information.** Provide the explanations required by Part II, line 10; Part II, line 17a or 17b; Part III, line 12; Part IV, Section A, lines 1, 2, 3b, 3c, 4b, 4c, 5a, 6, 9a, 9b, 9c, 11a, 11b, and 11c; Part IV, Section B, lines 1 and 2; Part IV, Section C, line 1; Part IV, Section D, lines 2 and 3; Part IV, Section E, lines 1c, 2a, 2b, 3a, and 3b; Part V, line 1; Part V, Section B, line 1e; Part V, Section D, lines 5, 6, and 8; and Part V, Section E, lines 2, 5, and 6. Also complete this part for any additional information. (See instructions.)

▶ Go to www.irs.gov/Form990 for the latest information.

OMB No. 1545-0047

2021

Name of the organization

UNITED CHARITABLE

Employer identification number

20-4286082

Organization type (check one):

Filers of:	**Section:**
Form 990 or 990-EZ	[X] 501(c)(3) (enter number) organization
	[ ] 4947(a)(1) nonexempt charitable trust **not** treated as a private foundation
	[ ] 527 political organization
Form 990-PF	[ ] 501(c)(3) exempt private foundation
	[ ] 4947(a)(1) nonexempt charitable trust treated as a private foundation
	[ ] 501(c)(3) taxable private foundation

Check if your organization is covered by the **General Rule** or a **Special Rule.**
Note: Only a section 501(c)(7), (8), or (10) organization can check boxes for both the General Rule and a Special Rule. See instructions.

General Rule

[ ] For an organization filing Form 990, 990-EZ, or 990-PF that received, during the year, contributions totaling $5,000 or more (in money or property) from any one contributor. Complete Parts I and II. See instructions for determining a contributor's total contributions.

Special Rules

[X] For an organization described in section 501(c)(3) filing Form 990 or 990-EZ that met the 33 1/3% support test of the regulations under sections 509(a)(1) and 170(b)(1)(A)(vi), that checked Schedule A (Form 990), Part II, line 13, 16a, or 16b, and that received from any one contributor, during the year, total contributions of the greater of **(1)** $5,000; or **(2)** 2% of the amount on (i) Form 990, Part VIII, line 1h; or (ii) Form 990-EZ, line 1. Complete Parts I and II.

[ ] For an organization described in section 501(c)(7), (8), or (10) filing Form 990 or 990-EZ that received from any one contributor, during the year, total contributions of more than $1,000 exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals. Complete Parts I (entering "N/A" in column (b) instead of the contributor name and address), II, and III.

[ ] For an organization described in section 501(c)(7), (8), or (10) filing Form 990 or 990-EZ that received from any one contributor, during the year, contributions *exclusively* for religious, charitable, etc., purposes, but no such contributions totaled more than $1,000. If this box is checked, enter here the total contributions that were received during the year for an *exclusively* religious, charitable, etc., purpose. Don't complete any of the parts unless the **General Rule** applies to this organization because it received *nonexclusively* religious, charitable, etc., contributions totaling $5,000 or more during the year ..... ▶ $ _____

Caution: An organization that isn't covered by the General Rule and/or the Special Rules doesn't file Schedule B (Form 990), but it **must** answer "No" on Part IV, line 2, of its Form 990; or check the box on line H of its Form 990-EZ or on its Form 990-PF, Part I, line 2, to certify that it doesn't meet the filing requirements of Schedule B (Form 990).

Part I Organizations Maintaining Donor Advised Funds or Other Similar Funds or Accounts.

Complete if the organization answered "Yes" on Form 990, Part IV, line 6.

		(a) Donor advised funds	(b) Funds and other accounts
1	Total number at end of year	432	
2	Aggregate value of contributions to (during year)	10,256,600.	
3	Aggregate value of grants from (during year)	3,190,225.	
4	Aggregate value at end of year	207,483,147.	

5 Did the organization inform all donors and donor advisors in writing that the assets held in donor advised funds are the organization's property, subject to the organization's exclusive legal control? [X] Yes [ ] No

6 Did the organization inform all grantees, donors, and donor advisors in writing that grant funds can be used only for charitable purposes and not for the benefit of the donor or donor advisor, or for any other purpose conferring impermissible private benefit? [X] Yes [ ] No

Part II Conservation Easements.

Complete if the organization answered "Yes" on Form 990, Part IV, line 7.

1 Purpose(s) of conservation easements held by the organization (check all that apply).
- [ ] Preservation of land for public use (for example, recreation or education)
- [ ] Preservation of a historically important land area
- [ ] Protection of natural habitat
- [ ] Preservation of a certified historic structure
- [ ] Preservation of open space

2 Complete lines 2a through 2d if the organization held a qualified conservation contribution in the form of a conservation easement on the last day of the tax year.

		Held at the End of the Tax Year
a	Total number of conservation easements 2a	
b	Total acreage restricted by conservation easements 2b	
c	Number of conservation easements on a certified historic structure included in (a) 2c	
d	Number of conservation easements included in (c) acquired after 7/25/06, and not on a historic structure listed in the National Register 2d	

3 Number of conservation easements modified, transferred, released, extinguished, or terminated by the organization during the tax year ▶ _____

4 Number of states where property subject to conservation easement is located ▶ _____

5 Does the organization have a written policy regarding the periodic monitoring, inspection, handling of violations, and enforcement of the conservation easements it holds? [ ] Yes [ ] No

6 Staff and volunteer hours devoted to monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶ _____

7 Amount of expenses incurred in monitoring, inspecting, handling of violations, and enforcing conservation easements during the year ▶ $ _____

8 Does each conservation easement reported on line 2(d) above satisfy the requirements of section 170(h)(4)(B)(i) and section 170(h)(4)(B)(ii)? [ ] Yes [ ] No

9 In Part XIII, describe how the organization reports conservation easements in its revenue and expense statement and balance sheet, and include, if applicable, the text of the footnote to the organization's financial statements that describes the organization's accounting for conservation easements.

Part III Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets.

Complete if the organization answered "Yes" on Form 990, Part IV, line 8.

1a If the organization elected, as permitted under FASB ASC 958, not to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide in Part XIII the text of the footnote to its financial statements that describes these items.

b If the organization elected, as permitted under FASB ASC 958, to report in its revenue statement and balance sheet works of art, historical treasures, or other similar assets held for public exhibition, education, or research in furtherance of public service, provide the following amounts relating to these items:

(i) Revenue included on Form 990, Part VIII, line 1 ▶ $ _____

(ii) Assets included in Form 990, Part X ▶ $ _____

2 If the organization received or held works of art, historical treasures, or other similar assets for financial gain, provide the following amounts required to be reported under FASB ASC 958 relating to these items:

a Revenue included on Form 990, Part VIII, line 1 ▶ $ _____

b Assets included in Form 990, Part X ▶ $ _____

Part III Organizations Maintaining Collections of Art, Historical Treasures, or Other Similar Assets *(continued)*

3 Using the organization's acquisition, accession, and other records, check any of the following that make significant use of its collection items (check all that apply):

a ☐ Public exhibition
b ☐ Scholarly research
c ☐ Preservation for future generations
d ☐ Loan or exchange program
e ☐ Other _____

4 Provide a description of the organization's collections and explain how they further the organization's exempt purpose in Part XIII.

5 During the year, did the organization solicit or receive donations of art, historical treasures, or other similar assets to be sold to raise funds rather than to be maintained as part of the organization's collection? ☐ Yes ☐ No

Part IV Escrow and Custodial Arrangements. Complete if the organization answered "Yes" on Form 990, Part IV, line 9, or reported an amount on Form 990, Part X, line 21.

1a Is the organization an agent, trustee, custodian or other intermediary for contributions or other assets not included on Form 990, Part X? ☐ Yes ☐ No

b If "Yes," explain the arrangement in Part XIII and complete the following table:

		Amount
c Beginning balance	1c	
d Additions during the year	1d	
e Distributions during the year	1e	
f Ending balance	1f	

2a Did the organization include an amount on Form 990, Part X, line 21, for escrow or custodial account liability? ☐ Yes ☐ No

b If "Yes," explain the arrangement in Part XIII. Check here if the explanation has been provided on Part XIII ☐

Part V Endowment Funds. Complete if the organization answered "Yes" on Form 990, Part IV, line 10.

	(a) Current year	(b) Prior year	(c) Two years back	(d) Three years back	(e) Four years back
1a Beginning of year balance					
b Contributions					
c Net investment earnings, gains, and losses					
d Grants or scholarships					
e Other expenditures for facilities and programs					
f Administrative expenses					
g End of year balance					

2 Provide the estimated percentage of the current year end balance (line 1g, column (a)) held as:

a Board designated or quasi-endowment ▶ _____%
b Permanent endowment ▶ _____%
c Term endowment ▶ _____%

The percentages on lines 2a, 2b, and 2c should equal 100%.

3a Are there endowment funds not in the possession of the organization that are held and administered for the organization by:

		Yes	No
(i) Unrelated organizations	3a(i)		
(ii) Related organizations	3a(ii)		
b If "Yes" on line 3a(ii), are the related organizations listed as required on Schedule R?	3b		

4 Describe in Part XIII the intended uses of the organization's endowment funds.

Part VI Land, Buildings, and Equipment.

Complete if the organization answered "Yes" on Form 990, Part IV, line 11a. See Form 990, Part X, line 10.

Description of property	(a) Cost or other basis (investment)	(b) Cost or other basis (other)	(c) Accumulated depreciation	(d) Book value
1a Land				
b Buildings				
c Leasehold improvements

Part V **Supplemental Information**

Provide the information required by Part I, line 2 (monitoring of funds); Part I, line 3, column (f) (accounting method; amounts of investments vs. expenditures per region); Part II, line 1 (accounting method); Part III (accounting method); and Part III, column (c) (estimated number of recipients), as applicable. Also complete this part to provide any additional information. See instructions.

PART I, LINE 2:

UNITED CHARITABLE HAS ESTABLISHED GUIDELINES WHICH MUST BE FOLLOWED WHEN GIFTS ARE MADE TO CHARITABLE ORGANIZATIONS OUTSIDE THE UNITED STATES. FOR GRANTS TO INTERNATIONAL NON-GOVERNMENTAL ORGANIZATIONS (NGO), UNITED CHARITABLE USES A COMBINATION OF EXPENDITURE RESPONSIBILITY AND CHARITABLE EQUIVALENCY TO DETERMINE THE GRANT WORTHINESS OF A FOREIGN ORGANIZATION. THERE IS A PROCESS OF PREAPPROVAL OF THE ORGANIZATION AS WELL AS APPROVAL FOR PLANNED USE OF FUNDS. AMONG THE REQUIREMENTS IS CONFIRMING THAT THE GRANT WILL NOT VIOLATE GOVERNMENT ORDERS REGARDING FINANCIAL TERRORIST ORGANIZATIONS; REGISTRATION DOCUMENATION SHOWING THAT THE NGO IS APPROPRIATELY REGISTERED AS A CHARITABLE ORGANIZATION IN ITS HOME COUNTRY; RECEIVING DOCUMENATION ON ORGANIZATIONS MISSION, KEY STAFF AND ACTIVITIES; AND RECEIVING REPORTS FROM THE NGO OF EXPENDITURE OF DONATED FUNDS.

Part I Questions Regarding Compensation

		Yes	No
1a	Check the appropriate box(es) if the organization provided any of the following to or for a person listed on Form 990, Part VII, Section A, line 1a. Complete Part III to provide any relevant information regarding these items.		
	☐ First-class or charter travel ☐ Housing allowance or residence for personal use		
	☐ Travel for companions ☐ Payments for business use of personal residence		
	☐ Tax indemnification and gross-up payments ☐ Health or social club dues or initiation fees		
	☐ Discretionary spending account ☐ Personal services (such as maid, chauffeur, chef)		
b	If any of the boxes on line 1a are checked, did the organization follow a written policy regarding payment or reimbursement or provision of all of the expenses described above? If "No," complete Part III to explain 1b		
2	Did the organization require substantiation prior to reimbursing or allowing expenses incurred by all directors, trustees, and officers, including the CEO/Executive Director, regarding the items checked on line 1a? 2	X	
3	Indicate which, if any, of the following the organization used to establish the compensation of the organization's CEO/Executive Director. Check all that apply. Do not check any boxes for methods used by a related organization to establish compensation of the CEO/Executive Director, but explain in Part III.		
	☐ Compensation committee ☐ Written employment contract		
	☒ Independent compensation consultant ☒ Compensation survey or study		
	☐ Form 990 of other organizations ☒ Approval by the board or compensation committee		
4	During the year, did any person listed on Form 990, Part VII, Section A, line 1a, with respect to the filing organization or a related organization:		
a	Receive a severance payment or change-of-control payment? 4a		X
b	Participate in or receive payment from a supplemental nonqualified retirement plan? 4b		X
c	Participate in or receive payment from an equity-based compensation arrangement? 4c		X
	If "Yes" to any of lines 4a-c, list the persons and provide the applicable amounts for each item in Part III.		
	Only section 501(c)(3), 501(c)(4), and 501(c)(29) organizations must complete lines 5-9.		
5	For persons listed on Form 990, Part VII, Section A, line 1a, did the organization pay or accrue any compensation contingent on the revenues of:		
a	The organization? 5a		X
b	Any related organization? 5b		X
	If "Yes" on line 5a or 5b, describe in Part III.		
6	For persons listed on Form 990, Part VII, Section A, line 1a, did the organization pay or accrue any compensation contingent on the net earnings of:		
a	The organization? 6a		X
b	Any related organization? 6b		X
	If "Yes" on line 6a or 6b, describe in Part III.		
7	For persons listed on Form 990, Part VII, Section A, line 1a, did the organization provide any nonfixed payments not described on lines 5 and 6? If "Yes," describe in Part III 7		X
8	Were any amounts reported on Form 990, Part VII, paid or accrued pursuant to a contract that was subject to the initial contract exception described in Regulations section 53.4958-4(a)(3)? If "Yes," describe in Part III 8		X
9	If "Yes" on line 8, did the organization also follow the rebuttable presumption procedure described in Regulations section 53.4958-6(c)? 9		

Part II **Officers, Directors, Trustees, Key Employees, and Highest Compensated Employees.** Use duplicate copies if additional space is needed.

For each individual whose compensation must be reported on Schedule J, report compensation from the organization on row (i) and from related organizations, described in the instructions, on row (ii). Do not list any individuals that aren't listed on Form 990, Part VII.

Note: The sum of columns (B)(i)-(iii) for each listed individual must equal the total amount of Form 990, Part VII, Section A, line 1a, applicable column (D) and (E) amounts for that individual.

OMB No. 1545-0047

2021

Open to Public Inspection

Name of the organization

UNITED CHARITABLE

Employer identification number

20-4286082

Part I **Identification of Disregarded Entities.** Complete if the organization answered "Yes" on Form 990, Part IV, line 33.

(a) Name, address, and EIN (if applicable) of disregarded entity	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Total income	(e) End-of-year assets	(f) Direct controlling entity

Part II **Identification of Related Tax-Exempt Organizations.** Complete if the organization answered "Yes" on Form 990, Part IV, line 34, because it had one or more related tax-exempt organizations during the tax year.

(a) Name, address, and EIN of related organization	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Exempt Code section	(e) Public charity status (if section 501(c)(3))	(f) Direct controlling entity	(g) Section 512(b)(13) controlled entity? Yes	(g) No
NATIONAL HERITAGE FOUNDATION, INC. - 58-2085326, 44921 GEORGE WASHINGTON BLVD STE 230, ASHBURN, VA 20147	SUPPORTING ORGANIZATION	GEORGIA	501(C)(3)	LINE 12A, I	UNITED CHARITABLE	X	

Part III **Identification of Related Organizations Taxable as a Partnership.** Complete if the organization answered "Yes" on Form 990, Part IV, line 34, because it had one or more related organizations treated as a partnership during the tax year.

(a) Name, address, and EIN of related organization	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Direct controlling entity	(e) Predominant income (related, unrelated, excluded from tax under sections 512-514)	(f) Share of total income	(g) Share of end-of-year assets	(h) Disproportionate allocations? Yes	(h) No	(i) Code V-UBI amount in box 20 of Schedule K-1 (Form 1065)	(j) General or managing partner? Yes	(j) No	(k) Percentage ownership

Part IV **Identification of Related Organizations Taxable as a Corporation or Trust.** Complete if the organization answered "Yes" on Form 990, Part IV, line 34, because it had one or more related organizations treated as a corporation or trust during the tax year.

(a) Name, address, and EIN of related organization	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Direct controlling entity	(e) Type of entity (C corp, S corp, or trust)	(f) Share of total income	(g) Share of end-of-year assets	(h) Percentage ownership	(i) Section 512(b)(13) controlled entity? Yes	(i) No

Part V **Transactions With Related Organizations.** Complete if the organization answered "Yes" on Form 990, Part IV, line 34, 35b, or 36.

		Yes	No
Note: Complete line 1 if any entity is listed in Parts II, III, or IV of this schedule.			
1 During the tax year, did the organization engage in any of the following transactions with one or more related organizations listed in Parts II-IV?			
a Receipt of **(i)** interest, **(ii)** annuities, **(iii)** royalties, or **(iv)** rent from a controlled entity	1a		X
b Gift, grant, or capital contribution to related organization(s)	1b		X
c Gift, grant, or capital contribution from related organization(s)	1c	X	
d Loans or loan guarantees to or for related organization(s)	1d		X
e Loans or loan guarantees by related organization(s)	1e		X
f Dividends from related organization(s)	1f		X
g Sale of assets to related organization(s)	1g		X
h Purchase of assets from related organization(s)	1h		X
i Exchange of assets with related organization(s)	1i		X
j Lease of facilities, equipment, or other assets to related organization(s)	1j		X
k Lease of facilities, equipment, or other assets from related organization(s)	1k		X
l Performance of services or membership or fundraising solicitations for related organization(s)	1l		X
m Performance of services or membership or fundraising solicitations by related organization(s)	1m		X
n Sharing of facilities, equipment, mailing lists, or other assets with related organization(s)	1n		X
o Sharing of paid employees with related organization(s)	1o		X
p Reimbursement paid to related organization(s) for expenses	1p		X
q Reimbursement paid by related organization(s) for expenses	1q		X
r Other transfer of cash or property to related organization(s)	1r		X
s Other transfer of cash or property from related organization(s)	1s		X

2 If the answer to any of the above is "Yes," see the instructions for information on who must complete this line, including covered relationships and transaction thresholds.

(a) Name of related organization	(b) Transaction type (a-s)	(c) Amount involved	(d) Method of determining amount involved
(1) NATIONAL HERITAGE FOUNDATION, INC.	C	334,683.	FMV
(2)			
(3)			
(4)			
(5)			
(6)			

Part VI **Unrelated Organizations Taxable as a Partnership.** Complete if the organization answered "Yes" on Form 990, Part IV, line 37.

Provide the following information for each entity taxed as a partnership through which the organization conducted more than five percent of its activities (measured by total assets or gross revenue) that was not a related organization. See instructions regarding exclusion for certain investment partnerships.

(a) Name, address, and EIN of entity	(b) Primary activity	(c) Legal domicile (state or foreign country)	(d) Predominant income (related, unrelated, excluded from tax under sections 512-514)	(e) Are all partners sec. 501(c)(3) orgs.? Yes	(e) No	(f) Share of total income	(g) Share of end-of-year assets	(h) Disproportionate allocations? Yes	(h) No	(i) Code V-UBI amount in box 20 of Schedule K-1 (Form 1065)	(j) General or managing partner? Yes	(j) No	(k) Percentage ownership

Part VII Supplemental Information

Provide additional information for responses to questions on Schedule R. See instructions.

1. Program Objectives

1.a Project Summary

1.a.1 **Project Title:** Growing Environmental Justice Through Community Food Forest Development

1.a.2 **Project Location:** Within Maine: Auburn, Norway, Passadumkeag, Starks, Indian Island, Lewiston, Millinocket, and Indian Township

1.a.3 **Applicant:** United Charitable (UC), 44921 George Washington Blvd Ste 230, Ashburn, VA 20147, J. Isaac Leeth, Ex. 6 - Personal Privacy (PP)

1.a.4 **Brief Description of Applicant Organization:** The mission of ReTreeUS, a UC program, is to "promote an environmentally sustainable, socially just food system through education, practical resources and mentorship." We plant orchards in schools, working with partner organizations to feed and empower generations of environmental stewards. We seek to create equitable access to nutritious food by equipping youth with the knowledge and resources necessary to grow food. Our programs create positive change in the food system that benefits the environment. Since we began in 2012, we have planted 74 educational orchards, representing more than 1,500 fruit trees, collectively serving more than 35,500 people reached annually.

1.a.5 **Applying for Small CBO Set Aside Track?** No

1.a.6 **Project Abstract:** ReTreeUS will work with 11 partner organizations to develop 8 food forests (i.e., diverse orchards that are designed to mimic the natural ecology to maximize the production of healthy food), providing benefits such as improvement of public and environmental health, while serving communities with high rates of food insecurity. This project is focused on creating greater climate resiliency and food security for communities disproportionately impacted by environmental injustice. Information gathered will be shared through a nation-wide network (i.e., Giving Grove) to replicate best practices in developing thriving community food forests across the U.S. We will plant and distribute 1,870 fruit and nut trees; provide direct educational programs for 500+ individuals; and create systems of ongoing maintenance, including establishing regional AmeriCorps VISTA Community Orchard Steward positions and documenting best practices and lessons learned that can be shared with affiliated organizations to replicate successes broadly. Specific geographic areas are located within rural areas of Maine (Auburn, Norway, Passadumkeag, Starks, Indian Island, Indian Township, Lewiston, Millinocket), representing communities facing food insecurity.

1.a.7 **Project Type:** Climate Resiliency, Food Access, and Public Education

1.a.8 **Special Considerations:** Climate change/Disaster Resiliency, Rural Areas

1.a.9 **Environmental Issue:** Air, Water, and Food Access

1.a.10 **List of Project Partners:**

- YMCA of Lewiston/Auburn, Lewiston
- Alan Day Community Garden, Norway
- Nibezun, Passadumkeag
- Bomazeen Land Trust, Starks
- Penobscot Tribal Farm, Indian Island
- Ending Hunger Corps, Maine Department of Agriculture, Conservation and Forestry
- City of Lewiston
- Passamaquoddy Tribe, Indian Township
- St. Mary's Nutrition Center, Lewiston
- Wabanaki Health and Wellness Center, Millinocket
- Giving Grove, an affiliate nonprofit that supports community orchards nationwide

1.a.11 **Is a QAPP Required?** No

ED_016126_00000400-00001

1.b Environmental and Public Health Information of the Underserved Community

This section describes the local environmental justice issue(s) that we propose to address and the communities that will be impacted.

1.b.1 Description of the Underserved Community and Disproportionate Health Harms

The underserved communities impacted in our partner locations are impacted by low income, environmental challenges, elevated poverty rates, high levels of food insecurity, and unemployment rates. Our work in Lewiston/Auburn serves a significant population of immigrants, migrants, and asylum seekers. Please see the attached document "Summary of Underserved Community Issues EJCPS 2023" for further insight into the issues the people in our partner project areas confront. Five of the eight community partners with which we will collaborate represent indigenous programs working on building food sovereignty in their communities. These communities have faced historic environmental injustice and elevated food insecurity rates. *"Food sovereignty is the right of peoples to healthy and culturally appropriate food produced through ecologically sound and sustainable methods, and their right to define their own food and agriculture systems. It puts the aspirations and needs of those who produce, distribute, and consume food at the heart of food systems and policies rather than the demands of markets and corporations."*[1] Indigenous tribes such as the Wabanaki have faced some of the most historic environmental injustice, being displaced and relocated into lands that could not sustain their traditional ways of subsistence. Specific data for partner locations is below.

Bradley, ME-Penobscot Tribal Farm, Serving Indian Island

According to the EJScreen Report for the area of Penobscot Tribal Farm in Bradley, ME, the Air Toxics Cancer Risk EJ Index is 93rd percentile for the state and 34th percentile in the USA. Lead paint EJ Index is 85th percentile in state and 70th in USA. People of color is 88th percentile for the state and 32nd percentile for the USA. Low income is 91st percentile for the state and 83rd percentile in USA. The unemployment rate is 64th percentile for the state and 54th percentile for the nation. Limited English Speaking is 85th percentile for the state and 60th percentile in USA. According to the EJSCREEN ACS Summary Report, the population density per sq mile is 1,099, per capita income is 28,084 and percentage of people of color is 15%, which stands out in the State of Maine, and the employable population age 16+ years not in labor force is 42%.

According to the National Environmental Public Health Tracking Network CDC, 12.1% of residents in Penobscot county live below the poverty line compared with 10.6% for the state. According to Feeding America, there is a 12.2% food insecurity rate for the population in Penobscot County and the estimated program eligibility among food insecure people is 68% below SNAP and other nutrition programs threshold of 185% poverty and 32% above.

Passadumkeag, ME-Nibezun

According to the EJScreen Report for the area of Nibezun in Passadumkeag, ME, the air toxics cancer risk EJ Index is 86th percentile in the state and 29th percentile in the USA. Lead Paint EJ Index is 61st percentile in the state and 58th in USA. Low income is 87th percentile for the state and 78th percentile in the USA. Unemployment rate is 94th percentile in the State and 88th

[1] First Global Summit on Food Sovereignty

percentile in the USA. Limited English speaking is 82nd percentile in the state and 58th in USA. Less than high school education is 68th percentile in the state and 51st in the USA. According to the EJSCREEN ACS Summary Report, the population density per sq mile is 96, the per capita income is 20,472 and the employable population age 16+ years not in labor force is 37%.

According to the National Environmental Public Health Tracking Network CDC,12.1% of residents in Penobscot county live below the poverty line compared with 10.6% for the state. According to Feeding America, there is a 12.2% food insecurity rate for the population in Penobscot County and the estimated program eligibility among food insecure people is 68% below SNAP and other nutrition programs threshold of 185% poverty and 32% above.

Millinocket, ME-Wabanaki Health & Wellness Center

According to the EJScreen Report for the area of WPHW in Millinocket, ME, low income is in the 76th percentile for the state and 69th percentile for the USA. Unemployment rate is 83rd percentile for the state and 73rd for the USA. According to the EJSCREEN ACS Summary Report the population density per sq mile is 46, the per capita income is 38,405 and the employable population age 16+ years not in labor force is 70%.

According to the National Environmental Public Health Tracking Network CDC, 12.1% of residents in Penobscot county live below the poverty line compared with 10.6% for the state. According to Feeding America, there is a 12.2% food insecurity rate for the population in Penobscot County and the estimated program eligibility among food insecure people is 68% below SNAP and other nutrition programs threshold of 185% poverty and 32% above.

Starks, ME-Bomazeen Land Trust

According to the EJScreen Report for the area of Bomazeen in Starks, ME, air toxics cancer risk EJ Index is in the 79th percentile in the state and 26th in USA. People of color is in the 84th percentile for the state and 28th for the USA, low income is in the 68th percentile in the state and 64th percentile in the USA, the unemployment rate is in the 87th percentile in the state and 78th percentile in the USA and less than high school education is in the 70th percentile for the state and 52nd percentile in the USA. According to the EJSCREEN ACS Summary Report, the population density per sq mile is 42, the percentage of people of color population is 13%, which stands out in the state of Maine, the per capita income is 25,226 and the employable population age 16+ years not in labor force is 55%.

According to the National Environmental Public Health Tracking Network CDC, 14.5% of residents in Somerset County live below the poverty line compared with 10.6% in Maine. According to Feeding America, there is a 15.5% food insecurity rate for the population in Somerset County and the estimated program eligibility among food insecure people is 78% below SNAP and other nutrition programs threshold of 185% poverty and 22% above.

Indian Township, ME

According to the EJScreen Report for the area of Indian Township, ME, the air toxics respiratory HI EJ Index is in the 97th percentile for the state and 29th for the USA. Lead paint EJ Index is in the 94th percentile in state and 82nd in USA. People of color is in the 99th percentile for the state and 72nd for the USA. Low income is in the 90th percentile in the state and 81st for the USA.

Unemployment rate is in the 95th percentile in the state and 90th for the USA. Unemployment rate is in the 95th percentile and 90th in USA. Less than HS education is in the 89th percentile for the state and 68th percentile for the USA. According to the EJSCREEN ACS Summary Report, the population density per sq mile is 9, the percentage of people of color population is 59%, the per capita income is 23,947, the employable population age 16+ years not in labor force is 55%.

According to the National Environmental Public Health Tracking Network CDC:
12% of residents in Washington county live below the poverty line compared with 10.6% for the state. According to Feeding America, there is a 15% food insecurity rate for the population in Washington County and the estimated program eligibility among food insecure people is 75% below SNAP and other nutrition programs threshold of 185% poverty and 25% above.

Lewiston and Auburn, ME-City of Lewiston Franklin Pasture Park and YMCA of Lewiston/Auburn

According to the EJScreen Report for the area of the Franklin Pasture City Park in Lewiston, ME, the air toxics cancer risk EJ Index is 97th percentile in the state and 39th percentile in the USA and the air toxics respiratory HI EJ Index is 97th percentile in the state and 55th percentile in the USA. Traffic Proximity EJ Index is 95th percentile in the state and 76th for in USA. The Diesel Particulate Matter EJ Index is 97th percentile for the state and 53rd in the USA. Lead Paint EJ Index is 98th percentile in the state and 85th percentile in the USA. It is worth noting that the lowest percentile in the state for all of the selected variables in this report is 78th, with all others being above 95th.According to this same report, people of color is 95th percentile in the state and 43rd percentile in the USA. Low Income is 93rd percentile in the state and 86th percentile in the USA. The unemployment rate is 80th percentile in the state and 69th percentile in USA. Limited English speaking is 92nd percentile in the state and 71st percentile in the USA. Less than High School Education is 95th percentile in the state and 77th percentile in the USA.
According to the EJSCREEN ACS Summary Report the percentage of people of color is 24%, which stands out in Maine. Population density per sq. mile is 5,885. The per capita income is $20,771 and 45% of the employable population age 16+ is not in labor force.

According to the National Environmental Public Health Tracking Network CDC: 11.7% of the residents in Androscoggin County live below poverty line compared with 10.6% for the state. According to Feeding America, there is a 12% food insecurity rate for the population in Androscoggin County and the estimated program eligibility among food insecure people is 67% below SNAP, Other Nutrition Programs threshold of 185% poverty and 33% above.

Norway, ME-Alan Day Community Garden

According to the EJScreen Report for the area of Alan Day Community Garden in Norway, ME, the air toxics cancer rate is 88th percentile in the state and 30th in the USA. Lead Paint EJ Index is 84th percentile in the state and 67th percentile in USA. Low income is 91st percentile in the state and 82nd percentile in the USA. The unemployment rate is 82nd percentile in the state and 72nd percentile in the USA. According to the EJSCREEN ACS Summary Report the population density per sq mile is 630 and the per capita income is $26,004. 39% of the employable population age 16+ is not in the labor force.

According to the EJScreen Report for the area of Alan Day Community Garden in Norway, ME, the air toxics cancer rate is 88th percentile in the state and 30th in the USA. Lead Paint EJ Index is 84th percentile in the state and 67th percentile in USA. Low income is 91st percentile in the state and 82nd percentile in the USA. The unemployment rate is 82nd percentile in the state and 72nd percentile in the USA. According to the EJSCREEN ACS Summary Report the population density per sq mile is 630 and the per capita income is $26,004. 39% of the employable population age 16+ is not in the labor force.

According to the National Environmental Public Health Tracking Network CDC, 13% of Oxford County residents live below the poverty line compared with 10.6% for the state. 5.1% of people living in Oxford County lived within a half mile of a park compared with 33.2% for the state of Maine. According to Feeding America, there is a 12.7% Food insecurity rate for the population in Oxford County and the estimated program eligibility among food insecure people is 74% below SNAP and other nutrition programs threshold of 185% poverty and 26% above.

1.b.2 Environmental/Health Issues to be Addressed by the Project

Food insecurity is an environmental justice issue as climate change and environmental factors are resulting in raising food costs and causing disturbances in food distribution systems. Building models of local food production, inherent in our community food forests, improves local food security and climate resilience within the underserved communities where they are established. Additionally, these food forest models address many of the underlying factors that are worsening climate change through carbon sequestration, soil preservation, water retention and industrial food production and transportation. In the projects we will quantify the following measures resulting from the project:

- CO2 Sequestered
- Fruit and Nut Production
- Rainfall Runoff Interception
- Community Members Served
- CO2 Avoided through local food production
- Community Members Involved in Direct Trainings

1.b.3 Environmental/Health Results to be Achieved

This project is designed to create climate resilience by creating local food production This project will produce eight food forests that will serve as environmental resources for climate resilience and food security. Once trees reach maturity, they will collectively generate 584,000 pounds of fruit and nuts annually for the underserved communities. Over their lifetime, the proposed plantings will sequester 2,891,544 of CO2 and avoid 1,674,800 lbs. of CO2 associated with food transportation. The food forests will intercept 3,734,241 gallons of rainfall runoff while serving as enriching community resources. The food forests will annually serve more than 9,100 individuals in communities with high rates of environmental injustice.

1.c Organization's Historical Connect to the Underserved Community

ReTreeUS was founded in Maine, has worked closely with the participating communities for years and is deeply connected to underserved communities within our range of services.

1.c.1 History of Our Involvement with the Community

ReTreeUS has previously worked with the communities proposed for this grant, to include:

- City of Lewiston and St. Mary's Nutrition Center, Lewiston, ME: Since planting the first school orchard in the region in 2014, ReTreeUS has been deeply connected to the

Lewiston/Auburn area as it is our primary hub including our Auburn office. To date, we have planted five school orchards and two community orchards. In 2020, ReTreeUS planted a large orchard at Teisha's Orchard located in a city park in Lewiston, working closely with the City Arborist, Steve Murch (letter of commitment attached) and St. Mary's Nutrition (letter of commitment attached) to plant and maintain the orchard.

- YMCA of Lewiston/Auburn, Lewiston, ME: Through our connected work in Lewiston and Auburn, we forged a connection with the YMCA of L/A in 2022, visiting the site that is ideally suited to become a food forest that will serve the community.
- Alan Day Community Garden, Norway, ME: In 2017 we established a large orchard at this garden and have maintained a close connection with the community conducting annual pruning/grafting and maintenance workshops
- Nibezun, Passadumkeag, ME: In 2022 we helped expand and improve a large food forest at Nibezun and conducted a native fruit and nut tree giveaway
- Bomazeen Land Trust, Starks, ME: In 2022 we forged a relationship with Bomazeen Land Trust. After surveying the site, we will be planting the initial fruit and nut trees at their site in September of 2023
- Passamaquoddy Tribe, Indian Township, ME: In 2019 ReTreeUS planted an orchard at Indian Township School with students, staff and community members. We have continued to maintain the orchard, while also providing school garden support and conducting a native fruit and nut tree giveaway. Our history of collaboration is what prompted the Tribal Council to reach out to ReTreeUS about the project outlined in this proposal.
- Penobscot Tribal Farm, Indian Island, ME: In 2022 we worked with Penobscot Tribal Farm, Indian Island, ME and volunteers to establish an orchard which we are seeking to expand.

1.c.2 Past Experience Working with the Underserved Community

ReTreeUS brings a track record of working with the underserved communities included in our grant request. Through grants and private funding, we have achieved the following:

- 64 educational orchards in schools with elevated levels of food insecurity (67 in Maine, 6 in New Hampshire, 1 Massachusetts). There are 46 Primary Schools, 15 Secondary Schools, 10 Community Projects, 2 High Schools, and 1 College that have benefited from our programs.
- 10 community orchards with partner nonprofits and municipalities that provide services to underserved communities
- Ongoing maintenance of existing orchards through in-person visits, distributed resources and involving community members and students in tree care.
- 2023 represents the 11th year of ReTreeUS conducting orchard programs with underserved communities.
- ReTreeUS has worked with Native American communities since 2019. Our consistent programming and responsiveness to community goals has resulted in strong relationship building within Maine indigenous communities, as is evident in the proposed project that includes 5 Native American communities.

1.c.3 Community Driven Participation

All eight of the community food forest projects outlined in this proposal started with programs within the community initiative to involve ReTreeUS in their efforts to establish and support thriving fruit trees within their communities. Community partners that benefit from our programs are involved with all stages of the orchard progression: planning tree locations,

prepping soil, selecting fruit tree varieties, planting and caring for the trees. In this way, the orchards truly belong to the participants instilling a sense of pride, stewardship and empowerment. Equity is inherent in all the work we do. We are working to create opportunities for all people, regardless of any racial, social, or economic factors, to have access to healthy food, outdoor learning opportunities and to cultivate authentic connections with fruit trees and the earth. As described in *1.c.2*, we give power of decision making and action to the participants. This creates equity in how the work is done and how ownership of the project is realized. Through our extensive collaborations with schools and partner organizations, we are able to equitably involve Mainers to take the reins of fruitful growth.

1.d EJCPS Model

Element 1 occurred prior to our grant application. We will be utilizing all the other elements (2-7) throughout our implementation of this project, as described below.

Element 1. Collaborative Problem-Solving Model (Issue Identification, Community Vision, and Strategic Goal Setting) has already been employed in this project. We have connected with all eight of the communities outlined in this project to identify the issues (i.e., the need for local, sustainable food production and education), communicated/continue to communicate with each community the vision for the project (including types of fruit/nut trees, locations and ongoing maintenance), and set goals to achieve the visions.

Element 2. One of the primary priorities of this project is Community Capacity Building and Leadership Development. Over the 3-year grant period, we will create and support regional Community Orchard Steward AmeriCorps (COSA) VISTA positions that will greatly expand the capacity of communities to cultivate thriving food forests that also serve as educational resources. Each COSA VISTA will gain leadership skills, sharing information and resources that, in turn, will cultivate fruit tree care and cultivation leadership within each community.

Element 3. We have initiated the process of Consensus Building and Dispute Resolution with each of the community projects outlined in this proposal. We have an online application form that sets the foundation for building consensus for each community project as it outlines roles and responsibilities that extend into the future. By applying for our programs, schools and community organizations understand expectations. After 10 years of planting orchards in schools, ReTreeUS is mindful of ways to resolve disputes that can arise from projects of this nature and work to be proactive rather than reactive. We will maintain clear communication and incorporate all viewpoints throughout the execution of this work.

Element 4. This project is built upon Multi-Stakeholder Partnerships & Leveraging of Resources. There are 11 partnerships (all with attached letters of collaboration) and eight locations involved in this effort. We collaborate with each partner to utilize the resources needed for success, whether that is volunteer recruitment, tools, funding, personnel time, vehicles, access to compost and other materials to maximize the impact of projects while minimalizing inputs.

ED_016126_00000400-00007

Element 5. The success of the projects outlined rely on Constructive Engagement by Relevant Stakeholders. We work very closely with all partners and stakeholders to plant and maintain productive orchards and food forests while providing educational opportunities for the community. The process naturally creates engagement of a wide range of stakeholders interested in growing fruit and nut trees and generating healthy food for the community. The educational component is very important to this project, with the goal of educating and inspiring stakeholders to care for fruit and nut trees, multiplying thereby multiplying the positive impacts of the project.

Element 6. After years of experience conducting projects like the one outlined in this proposal, we are committed to Sound Management and Implementation. With each step of the project, we will clearly communicate the goals of the project as well as the steps necessary to reach the goals, along with the associated roles and responsibilities. We make sure that all the steps are manageable and that we are utilizing the strengths of the partners and stakeholders in each project. Further, this work is often inspiring and fun, providing added motivation from partners and stakeholders to create successful projects.

Element 7. This project is designed to serve as a model through Evaluation, Lessons Learned, and Replication of Best Practices. The value of community orchards and food forests is exceedingly clear in an era of climate change and regionally high levels of food insecurity. The problem is establishing and maintaining successful orchards and food forests. By creating regional COSA VISTA positions, we are demonstrating a model for community orchard stewardship that can be replicated nationwide, especially with our connection to The Giving Grove's nationwide network of community orchard affiliates (letter of collaboration attached). We will evaluate the successes of the program and lessons learned to improve our program and to share with a wider network that can utilize our learnings to duplicate successes. Through this process, the potential for positive impacts is multiplied exponentially.

1.e Project Linkages

This project directly supports EPA Strategic Plan Goal 2, Objective 2.1: Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels by taking decisive action to advance environmental justice and civil rights. This project will promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels. With five Native American organizations represented in this project, we will take decisive action to advance environmental justice and civil rights for communities with historic degrees of environmental and civil injustice. By utilizing food forests to support food sovereignty efforts this project is promoting environmental and civil justice from within communities.

1.f Partners and Collaborations

As described in the table below, our proposed project promotes collaborations with diverse partners from multiple stakeholder groups. Signed Commitment Letters are provided in *Section 7.c,* included in the Mandatory Other Attachments File.

Partner name, address/Stake holder group	Planned role/activities	How partner will contribute	Resources brought by partner	Vested interest of partner	Future relationship with partner
City of Lewiston Arborist/Public Works 103 Adams Ave. Lewiston, ME 04240	Support community-based orchard maintenance; support improvements on City property	Provide material and personnel resources to support the growth of the community orchard	Staff time, mulch, compost, water access and advocacy	City orchard that improves the park and the lives of citizens	Coordinated ongoing maintenance, harvests, and educational/training events for the community.
The Giving Grove 300 E 39th St. LL1D Kansas City, MO 64111	Support community orchard projects and share best practices within a national network	Provide resources to support the project and share project learns with national network	Curriculum, business model and financial resources	ReTreeUS contributes important intellectual resources to share with the national network and contributes to the collective impact	Continue existing multi-year affiliation
St. Mary's Nutrition Center 208 Bates St. Lewiston, ME 04243	Support community-based orchard maintenance and community involvement	Connect community members to orchard training, harvests, and enhancement planting events	Staff time, community outreach and coordination	Advances the mission of St, Mary's Nutrition Center	Coordinated ongoing maintenance, harvests, and educational/training events for the community.
Ending Hunger Corps, Maine Department of Agriculture, Conservation, 18 Elkins Lane, 22 State House Station Augusta, ME 04333	Partner to host 4 Community Orchard Steward AmeriCorps VISTA regionally in Maine, increasing the capacity of ReTreeUS and increasing positive impacts	Serve as the official employer of the AmeriCorps VISTA members that will serve with ReTreeUS	Staff time, human resource management, information sharing, support for service members	Advances the mission of Ending Hunger Corps Maine	Continue partnership hosting regional COSA VISTA service members in order to amplify collective positive impacts

ED_016126_00000400-00009

Partner name, address/Stake holder group	Planned role/activities	How partner will contribute	Resources brought by partner	Vested interest of partner	Future relationship with partner
Bomazeen Land Trust Starks, ME 04938	Collaborate to establish a food forest at headquarters; coordinate ongoing maintenance and harvest distribution.	Coordinate to implement planning, planting and ongoing care of food forest	Agricultural land, volunteers, staff time, compost, water access, community coordination	Gain a food forest of 30 large fruit trees and 50 smaller native fruit and nut trees, maintenance support, and educational opportunities	Coordinated ongoing maintenance, harvests, and educational/training events for the community.
Nibezun 18 Nepisikwit Drive Passadumkeag, ME 04493	Collaborate to enhance existing orchard; coordinate training opportunities; facilitate ongoing maintenance and harvest distribution.	Connect community members to orchard training, harvests, and enhancement planting events	Agricultural land, volunteers, staff time, compost, water access, community coordination	Receive 25 large fruit trees and 100 smaller native fruit and nut trees, maintenance support, and educational opportunities	Coordinated ongoing maintenance, harvests, and educational/training events for the community.
Alan Day Community Garden 26 Whitman St. Norway, ME 04268	Collaborate to enhance existing orchard. Coordinate training opportunities. Facilitate ongoing maintenance and harvest distribution.	Connect community members to orchard training, harvests, and enhancement planting events	Agricultural land, volunteers, staff time, compost, water access, community coordination	Receive 30 large fruit trees and 100 smaller native fruit and nut trees, maintenance support, and educational opportunities	Coordinated ongoing maintenance, harvests, and educational/training events for the community.
Penobscot Nation Department of Natural Resources 12 Wabanaki Way Indian Island, ME 04468	Collaborate to enhance existing orchard; coordinate training opportunities; facilitate ongoing maintenance and harvest distribution.	Connect community members to orchard training, harvests, and enhancement planting events	Agricultural land, volunteers, staff time, compost, water access, community coordination	Receive 50 large fruit trees and 200 smaller native fruit and nut trees, maintenance support, and educational opportunities	Coordinated ongoing maintenance, harvests, and educational/training events for the community.

ED_016126_00000400-00010

Partner name, address/Stake holder group	Planned role/activities	How partner will contribute	Resources brought by partner	Vested interest of partner	Future relationship with partner
YMCA of Auburn-Lewiston 62 Turner Street Auburn, ME 04210	Collaborate to establish a food forest at Outdoor Learning and Education Center; coordinate ongoing maintenance, and harvest distribution.	Implement planning, planting, and ongoing care of food forest	Agricultural land, volunteers, staff time, compost, water access, community coordination	Receive 50 large fruit trees and 200 smaller native fruit and nut trees, maintenance support, and educational opportunities	Coordinated ongoing maintenance, harvests, and educational/training events for the community.
Wabanaki Public Health & Wellness Center 16 Central St., Bangor, ME 04401	Collaborate to establish a food forest at Outdoor Learning and Education Center, coordinate ongoing maintenance, and harvest distribution.	Coordinate with ReTreeUS to implement planning, planting, and ongoing care of food forest	Agricultural land, volunteers, staff time, compost, water access, community coordination	Aligned community-based organization will receive 50 large fruit trees and 150 smaller native fruit and nut trees, maintenance support and educational opportunities	Coordinated ongoing maintenance, harvests, and educational/training events for the community.
Indian Township Tribal Government, Box 301, Princeton ME, 04668	Collaborate to establish a food forest at Outdoor Learning and Education Center, coordinate ongoing maintenance, and harvest distribution.	Coordinate with ReTreeUS to implement planning, planting, and ongoing care of food forest	Agricultural land, volunteers, staff time, compost, water access, community coordination	Aligned community-based organization will receive 50 large fruit trees and 200 smaller native fruit and nut trees, maintenance support and educational opportunities	Coordinated ongoing maintenance, harvests, and educational/training events for the community.

ED_016126_00000400-00011

2. Project Activities/Milestone Schedule/Detailed

We have developed a structured plan and milestone schedule for the project, provided below.

2.a Project Activities

Date	Steps	Anticipated products/results
11/2023-2/2024	Communicate with partners. Establish plan of work for 2 regional Community Orchard Steward Americorps (COSA) VISTA positions	Plan of work documents for 2 regional COSA Americorps service members
3/3024-4/2024	Conduct pruning and tree care workshops at Alan Day Community Garden (ADCG), Nibezun, Penobscot Tribal Farm (PTF), Teisha's Orchard in Lewiston City Park (TO). Educate partner caretakers in the process	4 community training sessions that improve the health of 4 food forest projects
5/2024	Conduct food forest preparation visits at Wabanaki Public Health and Wellness Center (WPHWC) and YMCA of Lewiston/Auburn (L/A), Passamaquoddy Tribal Farm and Garden (PTFG) and Bomazeen Land Trust (BLT). Plant trees in nursery to be planted partner sites in the fall	4 food forest preparations. 300+ large fruit trees and 700 smaller fruit and nut trees potted and in nursery
6/2024-8/2024	Create resources for 2 new Vista members that will start in September of '24. Cultivate and maintain trees in the nursery	Resource book for COSA Americorps members
9/2024	Orientation and training for 2 new VISTA members (L/A Region VISTA and Bangor Region VISTA). Conduct final preparation meetings for WPHWC, PTFG, BLT, YMCA L/A and WPHWC food forest plantings.	Expanded capacity with 2 new regional Americorps members
10/2024	Plant new community food forests at WPHWC, PTFG, BLT, YMCA L/A and WPHWC	4 new food forests, 180 large fruit trees and 600 smaller native fruit and nut trees planted
11/2024-2/2025	Communicate with partners. Establish plan of work 3 regional COSA VISTA members	Plan of work documents for 3 regional COSA VISTA members
3/2025-4/2025	Conduct pruning and tree care workshops at WPHWC, PTFG, BLT, YMCA A-L and WPHWC. Educate VISTA members and partner caretakers in the process	4 community training sessions that improve the health of 5 food forest projects
5/2025	Conduct food forest enhancement preparation visits at Nibezun and TO. Plant trees in nursery to be planted partner sites in the fall. Plant native fruit and nut saplings to be distributed with community giveaways	2 community education events that prepare sites for fall planting
6/2025-8/2025	Convene with the 2 regional VISTA members for training and sharing of learnings. Prepare resources for a new VISTA service member to start in the fall	Completed surveys from service members assessing programs (data collection)
9/2025	Orientation and training for 3 VISTA members (L/A Region VISTA and Bangor Region VISTA and new Northern Region VISTA). Conduct final preparation meetings for Nibezun, AMS and TO food forest enhancement projects and tree giveaways	Expanded capacity with 3 COSA VISTA members

Date	Steps	Anticipated products/results
10/2025	Plant additional trees, shrubs and perennial plants at Nibezun and TO. Conduct L/A area tree giveaway	50 large fruit trees and 150 smaller fruit and nut trees planted. 300 small fruit and nut tree giveaway for L/A community
11/2025-2/2026	Communicate with partners. Establish plan of work 4 regional Community Orchard Steward AmeriCorps VISTA positions	Plan of work documents for 4 regional COSA AmeriCorps service members
3/2026-4/2026	Conduct pruning and tree care workshops at PTFG, TO, YMCA L/A and WPHWC Educate VISTA members and partner caretakers in the process	6 community training sessions that improve the health of 6 food forest projects
5/2026	Conduct food forest enhancement preparation visits at BLT, PTF and ADCG. Plant trees in nursery to be planted partner sites in the fall. Plant native fruit and nut saplings to be distributed with community giveaways	3 community education events that prepare sites for fall planting
6/2026-8/2026	Convene with the 3 regional VISTA members for training and sharing of learnings. Prepare resources for a new VISTA service member to start in the fall	Completed surveys from service members assessing programs (data collection)
9/2026	Orientation and training for 4 VISTA members (L/A Region VISTA, Bangor Region VISTA, Northern Region VISTA and new Downeast Region VISTA). Conduct final preparation meetings for Bomazeen, PTF and ADCG food forest enhancement projects and tree giveaways	Expanded program capacity with 4 regional COSA VISTA members
10/2026	Plant additional trees, shrubs and perennial plants at BLT, PTF and ADCG. Conduct tree giveaway with WHWC	60 large fruit trees and 200 smaller fruit and nut trees planted. 300 smaller fruit and nut trees given to community

2.b Milestone Schedule

Date	Milestone
4/2024	4 community training sessions completed (ADCG, TO, PTF, and Nibezun)
5/2024	4 food forest preparation visits completed (WPHWC, PTFG, BLT, YMCA A-L and WPHWC)
7/2024	Impact report 1 completed, resource book for COSA VISTAs published
9/2024	2 COSA VISTA Members on-boarded
10/2024	4 new food forests planted (PTFG, BLT, YMCA L/A and WPHWC) representing 180 large fruit trees and 600 small native fruit and nut trees planted)
4/2025	4 additional community training sessions completed (PTFG, BLT, YMCA L/A and WPHWC)
5/2025	2 additional food forest enhancement preparation visits completed (TO and Nibezun)
7/2025	Impact report 2 completed
9/2025	3 COSA VISTA Members on-boarded
10/2025	Additional trees, shrubs and perennial plants planted, enhancing 2 existing food forests (Nibezun and TO) representing 50 large fruit trees and 150 smaller fruit and nut trees planted, 300 small native fruit and nut tree giveaway (TO)

Date	Milestone
4/2026	4 additional community training sessions completed (PTFG, TO, YMCA L/A and WPHWC)
5/2026	3 additional food forest enhancement preparation visits completed (BLT, PTF and ADCG)
7/206	Impact report 3 completed
9/2026	4 COSA VISTA Members on-boarded
10/2026	Additional trees, shrubs and perennial planted enhancing 3 existing food forests (BLT, PTF and ADCG) representing 60 large fruit trees and 200 smaller fruit and nut trees planted. 300 small native fruit and nut tree giveaway (WHWC)

2.c Itemized Budget Sheet/Budget Narrative

Please refer to Section 7.a, included in the Mandatory Other Attachments File, for our Itemized Budget Sheet/Budget Narrative.

3. Environmental Results – Outputs, Outcomes, and Performance Measures

A project of this type provides invaluable outputs across the underserved areas.

Site	*Large Fruit Trees to be Planted	**Small Native Fruit & Nut Trees to be planted	Community Members involved in Trainings	Community Members Served	***Small Native Fruit & Nut Trees to be given away
Alan Day Community Garden (Norway, ME)	30	100	60	2000	0
Bomazeen Land Trust (Starks, ME)	30	50	40	1200	0
Nibezun (Passadumkeag, ME)	25	100	40	800	0
Teisha's Orchard (Lewiston City Park)	25	50	200	2000	300
Penobscot Tribal Farm (Indian Island, ME)	10	150	24	590	0
Passamaquoddy Tribal Orchard and Garden (Indian Township)	50	200	30	710	0
YMCA L/A (Auburn, ME)	50	200	80	800	0
Wabanaki Health and Wellness Center	50	150	50	1000	300
Totals	**270**	**1000**	**524**	**9100**	**600**
* Assumes mature common apple (malus domestica) with 3" dbh. 40-year life span w/ 10% mortality					
** Assumes mature hazelnut with 1" dbh.					
***Not included in ecological outcomes					

ED_016126_00000400-00014

Ecological outcomes are provided below, estimates generated by iTree software unless specified.

Outcome	Large Fruit Trees	Small Native Fruit & Nut Trees	Total
Lifetime Avoided runoff (gallons)	1,006,824.40	2,727,416.90	3,734,241.30
Annual fruit harvest (lbs.)	54,000.00	25,000.00	584,000.00
Lifetime CO2 avoided**** (lbs.)	1,144,800.00	530,000.00	1,674,800.00
Lifetime CO2 sequestered (lbs)	825,112.50	2,066,431.60	2,891,544.10
**** estimate not generated by iTree. Based on assumed yield of 200lbs fruit per annum; 0.53 lbs of CO2e per pound			

3.a Environmental Results (Logic Model)

Please refer to *Section 7.b,* included in the Mandatory Other Attachments File, for our Logic Model.

3.b Performance Measurement Plan

This project has identifiable milestones. Performance measurements will be taken at each milestone to track progress towards the achievement of planned outputs and outcomes. In addition to completing all necessary reporting required of this grant, ReTreeUS will complete a comprehensive analysis of the project in July of 2024, 2025, and 2026. This analysis includes collecting surveys from partners and COSA VISTA members, tracking progress and evaluating impact data that will result in a thorough published report.

3.c Sustainability Plan and Community Vision

The objective of this project is to create a sustainable infrastructure that will enable the eight community food forests to thrive into the future, bringing the shared community visions to fruition. Additionally, this project is designed to serve as a replicable model that will bring success to similar projects nationwide. This project truly is utilizing partnerships to problem solve environmental justice issues. The implementation of regional Community Orchard Steward AmeriCorps VISTA positions to maximize food forests in food insecure communities represents significant collaboration and collective problem solving.

4. Programmatic Capability

Through our past experience and current staff and volunteer network, ReTreeUS brings the programmatic capability required to pursue this grant.

4.a Organizational Experience

Since our creation in 2012, ReTreeUS has brought to reality our motto "we plant trees of fruit and seeds of thought." Specific examples of ReTreeUS initiatives that incorporate an approach similar to our proposed approach for the EJCPS grant are:

Back to School Garden Program. By supporting school gardens by aligning crop production to the school calendar, we seek to create equitable access to nutritious food by equipping youth with the knowledge and resources necessary to grow food. This program focuses on building soil, limiting summer maintenance, and the production of nutrient dense, cold-hardy greens for cafeterias. We work directly with students and community organizations to create edible landscapes that provide countless benefits to human health and the ecology. We have planted 70 orchards in schools and 8 food forests with partner organizations that work to create equitable access to healthy food and make positive contributions to the environment. Our programs are

designed to generate healthy food for communities, promote ecological diversity, improve climate resilience and inspire environmental stewardship for generations.

Orchard Program. In 2024, we will plant our 100th educational orchard with students and community members! Each orchard and food forest we build generates thousands of pounds of nutritious fruit and nuts over time, providing increased access to healthy food. Meanwhile, the lessons we conduct with students and community members have created a multiplying effect of positive change. These orchards serve as outdoor classrooms that inspire local food production and environmental stewardship while generating thousands of pounds of fruit and nuts over time. By giving students and community members ownership over their fruit trees, we invite opportunities for connectivity. The seeds of thought that grow from these experiences have the power to generate enormous positive change as people are inspired by local food production and environmental stewardship.

4.a.1 Supportive Infrastructure

ReTreeUS is a program of United Charitable that has built both an organizational infrastructure and strong ties to local communities across Maine. ReTreeUS has built an intricate web of volunteers, community organizations, and tangible assets on which we rely. These include:

- **Volunteers:** We leverage a volunteer workforce of 100+ across the State; averaging 96 hours per year, representing a total of 9,600 volunteer hours.
- **Partnerships.** We rely on 74 partnerships with schools and community-based organizations (67 in Maine, 6 in New Hampshire, and 1 Massachusetts); this includes 46 Primary Schools, 15 Secondary Schools, 10 Community Projects, 2 High Schools, and 1 College and includes reach to more than 36,500 people annually with our programs (17,197 Primary School students, 11,559 Secondary School students, 3,500 community members with partner projects, 2,500 College students and 1,800 High School students). In addition, we are an affiliate partner of Giving Grove, a nonprofit program whose mission is: "to provide healthy calories, strengthen community, and improve the urban environment through a nationwide network of sustainable little orchards." The Giving Grove provides network building and financial support to ReTreeUS and we provide insight that benefits the national network.
- **United Charitable:** Our Fiscal Sponsor and registered 501(c)(3) provides simple customized vehicles that fulfill the philanthropic endeavors of corporations, families, and individuals. United Charitable provides accounting, administrative, compliance, filing, and legal services to us so we can focus on carrying out our mission and impacting our community.
- **Program Specific Staff:** In addition to the support from United Charitable's staff, the ReTreeUS program has two staff members, Richard Hodges, Program Manager (resume attached) and Shelley Kruszewski, Program Coordinator (resume attached)
- **Tangible assets:** ReTreeUS brings an established infrastructure to support the proposed initiative to include transport (i.e., van and trailer) to move items, and an existing fruit tree nursery to source plantings. The nursery includes more than 1,000 trees annually and is used to support our programs with tree varieties selected for hardiness and disease resistance that are maintained without the use of artificial fertilizers or chemical pesticides.

4.a.2 Qualifications of PM and Staff

Our proposed project team bring the qualifications and experience to successfully manage and complete this grant.

- **Project Manager (PM) Richard Hodges** brings over two decades of experience as an outdoor and agricultural educator. As the Founder of ReTreeUS, Mr. Hodges understands the

ED_016126_00000400-00016

criticality of detailed orchestration of programs with multiple stakeholders, fundraising, communication, orchard and garden design, educational instruction to a wide range of age levels, budget management, and strategic development.

- **Project Coordinator Shelley Kruszewski** has worked across several organizations to address food insecurity and other environmental issues for the last decade. Her current position as ReTreeUS' Program Coordinator has prepared her with hands on experience in tree planting, administration of educational programs, and communications with local communities and schools across Maine.
- **Data Analyst Dr. Daniel Feller** is a highly skilled and results-oriented leader with solid academic preparation and a proven ability to provide data analytics to a variety of science oriented topics. He brings more than 10 years' experience working with healthcare and environmental datasets. As a member of ReTreeUS' Advisory Committee, Dr. Feller has been involved in numerous ReTreeUS initiatives over the last three years. For example, applying data analytics to our outcomes, Dr. Feller has developed models for calculating carbon sequestration and carbon offsets of orchards, and calculating environmental factors including water retention.

4.b Staff Experience and Qualifications of Project Manager

Our proposed project team brings the qualifications to undertake this project to include direct hand-on experience with sustainable farming, food insecurity, and data analytics. Further, Mr. Hodges and Ms. Kruszewski bring close ties across New England and specifically within Maine. ReTreeUS is well embedded across the area, for example:

- School ties: ReTreeUS Back to School Garden Program *(see Section 4.a)* has been implemented and continues to thrive in ME and NH with 30 schools involved to date and an additional 20 more schools to be added in 2023. The Orchard Program has planted fruit trees at 64 schools representing more than 33,000 students annually.
- Community organizations: ReTreeUS has worked with 10 community organizations in ME and NH to plant large community orchards that reach more than 3,500 people annually.
- Tribal experience: ReTreeUS has worked closely with indigenous nonprofits groups across Maine, serving low income and indigenous populations to include proposed project partners.

Further, under the direction of Mr. Hodges, ReTreeUS has successfully managed 60 grant projects over the last 10 years (i.e., the five cited in *Section 5* and the list below):

- 12 Arbor Day Foundation project grants
- Captain Planet Foundation
- Davis Conservation Foundation
- Elmina B. Sewall Foundation (x3)
- First National Bank (x2)
- Maine Agriculture in the Classroom (x5)
- Maine Community Foundation (x5)
- Maine Farmland Trust, Blue Hill Grant
- Maine Initiatives
- Mark Baumer Sustainability Fund
- Momentum Inc
- National Gardening Association
- Network For Good
- Onion Foundation (x7)
- Quimby Family Foundation (x8)
- Shrewsbury Institute for Agriculture Education
- Stephen and Tabitha King Foundation
- Unity Foundation (x3)
- USDA Specialty Crop Grant with Maine Landscape and Nursery Association
- Davis Education Foundation with Maine School Garden Network
- University of Maine Farm to School Institute
- Onion Foundation (x7)
- Quimby Family Foundation (x8)

ED_016126_00000400-00017

- Shrewsbury Institute for Agriculture Education
- Stephen and Tabitha King Foundation
- Unity Foundation (x3)
- USDA Specialty Crop Grant with Maine Landscape and Nursery Association
- Davis Education Foundation with Maine School Garden Network
- University of Maine Farm to School Institute

4.c Expenditure of Awarded Grant Fund and Plan for Compliance with EPA's Pre-Award Compliance Review

United Charitable (UC) adheres to strict financial and budget controls across all programs, with a system of checks and balances between UC's controller and the accounting department. Financials are tracked in the Iphicore nonprofit accounting software. For grant purposes, UC holds all funds which are disbursed upon request from the ReTreeUS program. All receipts and invoices are reviewed by UC to verify they are legitimate and fit within the boundaries of the grant.

5. Past Performance

Within the last three years, ReTreeUS has participated in numerous federal and non-federal grants, described below.

Duration	Grantor/Project	Successfully completed and managed budgets, activities	Met reporting requirements timely	Adequately reported on progress	Submitted acceptable final technical reports
2021	USDA/Farm to School Turnkey Grant	X	X	X	X
2022	Arbor Day Foundation/TD Green Space Grant	X	X	X	X
2022	Arbor Day Foundation/TD Tree Days Grant	X	X	X	X
2022	Maine Community Foundation, Community Building Grant (Piscataquis County)	X	X	X	X
2021	Maine Community Foundation, Community Building Grant (Washington County)	X	X	X	X

6. Quality Assurance Project Plan (QAPP) Information

We will not submit a QAPP for this project.

7. Other Attachments

Please see the **Mandatory Other Attachments File** for the following:

- Section 7.a – Itemized Budget Sheet/Budget Narrative
- Section 7.b – Environmental Results/Logical Model
- Section 7.c – Letters of Commitment from Partners
- Section 7.d – Resumes of Project Manager and Key Personnel
- Section 7.e – Proof of Non-Profit Status

ED_016126_00000400-00018

7.a Itemized Budget Sheet/Budget Narrative

Our itemized budget provided below presents the funds needed to complete the proposed plan of work. The following are important considerations:

- The budget for 2023 is only for November and December, trees are pre-ordered those months for 2024 projects.
- The majority of large fruit trees for this project will be planted in 2024 hence the value for 2023 Fruit Trees is the greatest.
- Personnel values are determined by the percentage of time spent on this specific project, not including time spent on other organizational projects. The proportionate values are attributed relative to the associated salary. This project represents 70% of the personnel time of the Program Coordinator and 40% of the overall personnel time of the Program Manager.
- Significant travel is necessary to conduct the project outlined, the values for Travel Reimbursement are calculated using the current IRS Standard Milage Reimbursement Rate of 65.5 cents per mile. This includes milage for AmeriCorps VISTA members as well as ReTreeUS staff.
- The keystone of this project is the incorporation of AmeriCorps VISTA Members to build organizational capacity, 2 in 2024, 3 in 2025 and 4 in 2026. The cost of supporting these positions, in addition to other subcontracted positions gets larger each year, reflecting the addition of service members.
- Providing housing stipends to AmeriCorps VISTA members improves the quality applicants for the positions and improves the experience of the members. $5,000 of housing stipend is allocated to each member.
- United Charitable provides the financial, legal and logistical support to ReTreeUS and the Administrative Fees cover that expense.

2023 (Nov-Dec)	
Expense	**Amount**
Supplies	
Fruit Trees	$6,200
Root Stock	$400
Native Trees and Shrubs	$1,200

7.b Environmental Results/Logic Model

Resources / Inputs	Activities	Outputs	Audience	Short-term Outcomes	Resources / Inputs	Activities
Fruit/nut trees and materials necessary for planting and maintaining them Travel Staff time AmeriCorps Service Member service Community involvement	Community tree plantings Orchard stewardship trainings Resource development and sharing	8 food forests thriving at community-based organizations 270 large fruit trees and 1,000 smaller native fruit and nut trees planted 600 smaller native fruit and nut trees distributed to community members 500+ community members trained in orchard caretaking 9,100 community members annually provided with increased access to healthy food	Local partners Community residents AmeriCorps VISTA service members National network of organizations planting community orchards (Giving Grove)	Increase in number of community members aware of fruit and nut production Decrease of vacant public-use land in communities Expanded organizational capacity for ReTreeUS	Greater involvement of community members with their community orchards and food forests. Expanded access to native fruit and nut trees that can be planted at community members' homes New information about community orchard and food forest stewardship models that can be shared with national network Increase in community orchard stewardship	2,891,544 lbs. CO2 sequestered over orchards' lifetime 584,000 lbs. of fruit harvested annually 1,67,800 lbs. CO2 avoided annually via local fruit production 3,734,241 gallons of storm runoff avoided 8 thriving community food forests that serve thousands of community members that face environmental injustice

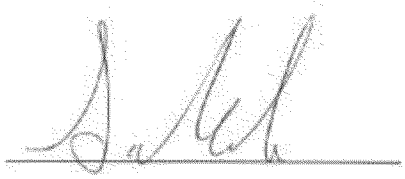
7.c Letters of Commitments from Partners

LEWISTON ME

Public Works

Steve Murch, Lewiston City Arborist

March 24, 2023



Re: The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program

To Whom it may concern,

Please accept this letter on behalf of the City of Lewiston supporting ReTreeUS and their grant request.

Over the last several years ReTreeUS has established a footprint in our community planting trees and educating the public which we expect will have lasting impact for years to come. They have worked with several schools, St Mary's Nutrition Center (a community resource for those in need), the local Farmers market and our staff at Lewiston Public Works. Their outreach, extending through these groups and organization's in our community has benefitted countless residents. As successful and productive as they have been, ReTreeUS hopes to do more and their vision is shared by the City of Lewiston. The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program will help make this vision a reality.

The City of Lewiston stands ready to support their efforts through contributions of labor and outreach efforts. Thank you in advance for your consideration of this proposal and please feel free to contact me directly if you have any questions regarding our support for this project.

To Whom it May Concern,

I'm delighted to offer this letter of collaboration for ReTreeUS. ReTreeUS joined The Giving Grove affiliate network in February 2023. This partnership equips tree planting and community garden organizations with the means to turn on, or ramp up, their own orcharding programming. This includes providing ReTreeUS with curriculum and a business model to empower neighborhoods to grow their own fruits, berries and nuts – making these nutritious calories available to the community for free.

The model is based on a set of principles that have proven successful in thirteen affiliate cities. These principles include the importance of being "invited in" to the community, ensuring that the community orchards are the asset of the neighborhood or school. This also ensures that the maintenance is led by the community and that the surrounding community is actively engaged in the planting, maintaining, and harvesting.

We are very excited about this collaborative partnership, and there are many best practices to share with all thirteen affiliates across our network. We hope that through this Environmental Justice Problem-Solving Cooperative Agreement Grant, ReTreeUS will be able to share their experience in applying food forest practices to existing and new orchards with this nation-wide network. Investing in this cooperative project is investing in innovative approaches to creating equitable tree canopy that also provides organically-grown fruits, berries and nuts for families who often do not have access to this sort of nutrition.

For these reasons, we are pleased to support this grant application.

Sincerely,

Ashley Williamson
The Giving Grove, Co-Executive Director

To whom it may concern,

Bomazeen Land Trust is the first Indigenous land trust in Wabanaki territory, and our mission is to enable the Abenaki/Wabanaki people to renew and resume our land caretaking and stewardship roles in lands and waters with historical, spiritual, and ecological significance to the Abenaki/Wabanaki people. We work to rematriate traditional land and knowledge back to our community through land return, cultural programs for the Wabanaki community, and education. We send this letter in support of ReTreeUS and our partnership in 2023.

In 2021, we received our first land return of 60 acres that included a large forested area, 9 cabins, and a large mess hall with a commercial kitchen. We are using these facilities as our Food Sovereignty Center, and would like to re-tree the parcel of the land that as formerly cleared with fruit and nut trees. Re-Tree US has offered to donate a selection of our choosing and we plan to convene a planting and care workshop in the coming year. Once the trees begin producing, we'll continue hosting workshops around food processing and maintenance.

Perennial food forests are a big part of Wabanaki diets, and expanding our options beyond conventional farming would expand our community's knowledge and food systems capacity. Our vision for the food sovereignty center in Starks, Maine is to grow and process cultivated and forested foods/medicines, and offer workshops for the community to share out that knowledge. Having fruit and nut trees on site could be a learning opportunity for all visitors for many years to come and would also benefit the community with the food they provide.

Signed,

Bomazeen Land Trust

Mali Obomsawin, *Executive Director*

Environmental Protection Agency
Environmental Justice Problem-Solving Cooperative Agreement Program

Dear Environmental Justice Problem-Solving Cooperative Agreement Grantmaking Committee,

We write today to express our support for our friends and partners at ReTreeUS, a nonprofit organization dedicated to promoting an environmentally sustainable, socially just food system through education, practical resources, and mentorship.

Nibezun was founded in 2016 when Wabanaki community members and non-Indigenous allies came together to save sacred land along the Penobscot River, protecting it for the healing of all people and future generations. Our vision is for present and future generations to nurture the sacred unbroken relationship with Mother Earth and each other, living in balance on the ancestral lands and waterways of the Wabanaki. Since our successful campaign to purchase this land was completed in 2018, we have identified six key areas to focus our healing efforts on: ceremony, peacemaking, sustainable lifeways, Wabanaki arts, Wabanaki languages, and wellness. Our partnership with ReTreeUS began in 2021 and has been one of the cornerstones of our Sustainable Lifeways program.

Sustainable Lifeways emphasizes the importance of living in balance with Mother Earth and all our non-human relatives; by nurturing and respecting life around us, we live healthfully in return. Since partnering with ReTreeUS we have worked together to plant 100 fruit and nut trees at Wabanaki-led nonprofits and tribal programs – Nibezun included – and distributed 300 fruit and nut trees to Wabanaki people across the state. Sharing these food trees is one of the many ways we seek to educate and create an abundant future for all, with people and the environment at the center.

Food is medicine and ongoing support from ReTreeUS means continuing our efforts to not only care for our own orchard at Nibezun, but share that knowledge with the Wabanaki community who planted their trees last fall. We hope to continue our food tree distribution program, building on it to teach people how to care for, prepare, preserve, and rely more on our local environments to provide for us in return.

Woliwon (thank you),

Nicole Paul (Passamaquoddy)

Dear Environmental Justice Problem-Solving Cooperative Agreement Grantmaking Committee,

The Indian Township Tribal Government in Collaboration with the Indian Township Housing Authority works with the reservation and members of the tribe to help with Housing, Medical, Social Services, Education, Food Programs, Youth Programs, and many other services. The Indian Township Tribal Government also encourages Tribal Members to engage in programs to better themselves and the community.

We are very excited about the prospect of working with ReTreeUS to start our next venture to establish a food forest also known as Passamaquoddy Tribal Orchard and Garden, our goal is to get this up and running and teach Tribal Members how to grow, plant, and harvest fruits and vegetables, we would like to incorporate our workforce program and the Indian Township School.

Our goal is to get this started and teach our Tribal Members the complete process of starting the program, sustaining the program, and maintaining the program to provide fruits and vegetables for our local food pantry and community and their own homes.

Thank You

William J. Nicholas

October 25, 2022

Greetings,

The YMCA of Auburn-Lewiston is excited to present the next impact project for the Outdoor Learning and Education Center (OLEC). OLEC is a 98-acre parcel of land centrally located in the City of Auburn. The YMCA began developing this property in 2015 as a site to offer Outdoor Educational programming to the Auburn-Lewiston community. In the initial phases we have been able to run a variety of community events as well as our summer camp program, while making the property available to the public for open use. Partnerships have been established with the Veterans Administration in Togus, The Lewiston Veterans Center, Dempsey Center, Lewiston and Auburn School Departments, and the Boy and Girl Scouts of America for several events and programs to make an outdoor experience accessible for community organizations who may have barriers to such a site otherwise.

In our next major phase of development, we will be building a 5,500 square foot Camp Lodge that will allow us to have 4-season programming and provide shelter from the elements and double our capacity for youth participants. The development of an orchard will serve several programs, as well as open several agricultural and wellness education opportunities. The orchard will allow us to begin a Master Gardener program with the USM Cooperative Extension, by sending volunteers to get training and become stewards for the organization. Our volunteer stewards will then become mentors and educators as we introduce agricultural programs to the community.

Auburn-Lewiston is the most densely populated areas of the state with a 2020 census population of 107,958, and an 11.3% poverty rate. The impact that green spaces like an orchard and garden for educational and experiential learning make cannot be overstated. Having the orchard will not only create learning opportunities but will also support our community members in need. Looking at the potential for growth and adding to the agricultural site, harvests from the orchards and garden areas will give us the opportunity to send fresh produce home with youth in our childcare and camp programs.

RE: Letter of Support for RetreeUs

To whom it may concern,

We are pleased to submit a Letter of Support to the EPA – Environmental Justice Collaborative Program grant on behave of RetreeUs. Their mission of planting fruit tree orchards has a beneficial twofold lasting effect not only on the environment but also addressing health disparity by having access to fresh fruits. RetreeUs was a huge help in starting our fruit tree orchard at the Penobscot Tribal Farm by furnishing and planting trees. I look forward to continuing collaborating with RetreeUs as we expand our orchard.

Our farm is a newly developing farm created to address food insecurity for Penobscot Nation citizens. It is important we are able to supply our citizens with fresh locally grown food. It is equally important that we are conscious of restoring balance through agriculture activities.

Thank you,

Charles Loring
Director of Natural Resources

Wabanaki Public Health & Wellness

Cultivating the Health of Our Communities

4/12/2023

Re: Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program

To: ReTreeUS

I, Rebecca Petrie, Co-CEO and AOR for Wabanaki Public Health and Wellness, am pleased to support ReTreeUS' application for **Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program** put forth through the Environmental Protection Agency (EPA), opportunity number **EPA-R-OEJECR-OCS-23-01**.

Wabanaki Public Health and Wellness (WPHW) serves the Wabanaki, the People of the First Light; Mi'kmaq Nation, Houlton Band of Maliseet Indians, Passamaquoddy at Pleasant Point, Passamaquoddy at Indian Township, and Penobscot Nation. WPHW is a tribal organization and the public health authority for tribal citizens and federally recognized Tribes in Maine. Our mission is to provide community-driven, culturally centered public health and social services to all Wabanaki communities and people while honoring Wabanaki cultural knowledge, cultivating innovation, and fostering collaboration. Wabanaki traditions, language, and culture guide our approach and describe the ways we live in harmony with each other and the land we collectively share.

This letter supports the efforts of ReTreeUS in pursuing funding to build capacity and invest in fruitful growing: growing partnerships, growing productivity, and growing orchards and food forests. Wabanaki Public Health and Wellness welcomes the prospect to collaborate in this endeavor and greatly anticipates the opportunity to weave culture and land stewardship, concepts central to the Wabanaki people, into the way in which we create nourishment for our communities.

Receiving a fruit and nut orchard would allow WPHW to continue growing our Community and Land Wellness Division including the Ktanaqson "Abundance" program, food sovereignty and food security systems, as well as increasing fresh, healthy offerings in Community through our Wabanaki Traditional Foods Mobile Food Pantry. Care and maintenance of the fruit and nut orchard would be facilitated by WPHW's food sovereignty coordinators who connect culture, the environment, and traditional foods to generate local, sustainable food access while simultaneously offering opportunities for the transfer of traditional knowledge on topics such as soil health, native plants, and traditional medicines.

In partnership,

Rebecca Petrie, Co-CEO
Wabanaki Public Health and Wellness

16 Central St., Bangor, ME 04401

ST. MARY'S
REGIONAL MEDICAL CENTER
NUTRITION CENTER
A Member of Covenant Health

March 23, 2023

To the Office of Environmental Justice and External Civil Rights:

The St.Mary's Nutrition Center enthusiastically supports the participation of ReTreeUs in the **Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.** The Nutrition Center brings people together to collectively imagine and build a just food system and healthy community. Since 1999, we have been growing and connecting as a way to address food insecurity.

Since their establishment, ReTreeUs has been a welcome partner in providing educational opportunities and helping people grow their own food. We have partnered with ReTreeUs in Tree Give-a-ways, that distributed over 100 native trees and bushes out into the community. Our Food Core Members have partnered with ReTreeUs's back to school garden program, giving them already started fall crop plants that kids could be involved in planting and harvesting when they started school in the Fall. ReTreeUs is part of the coordinating team of the Auburn Community Gardens Initiative, where they have supported the establishment of 3 community gardens in Auburn Maine and procured several of the fruiting trees and bushes that community members had expressed interest in seeing at the gardens. ReTreeUs has also played a contributing role in the Good Food Council of Lewiston Auburn with Shelley as a council member.

One of my favorite partnerships with ReTreeUs has been the expansion of Teisha's Orchard. Teisha's orchard is a little green oasis in downtown Lewiston along a bike path. In the Fall of 2020, 100 new fruit trees were planted in collaboration with the City of Lewiston, students from Lewiston High School and students from Next Steps, an alternative high school. I've been impressed with ReTreeUs's commitment towards the success of the orchard as the baby trees are getting established, including collaborating with multiple groups to create a watering system and schedule, securing more funding for fencing to deter deer destruction and hosting workparties with nearby schools and volunteers to engage community members in the process.

The St. Mary's Nutrition center looks forward to continuing to partner with ReTreeUs in bringing people together to care for fruit forests, learn within community greenspaces and access food from orchards and school gardens in the Lewiston Auburn area and we hope that you will support ReTreeUs in increasing their capacity to maintain and strengthen these types of programs and partnerships both established and new.

Please let me know if there's any other information we can provide to support their proposal.

Sincerely,

Bridgette Bartlett

Dear Grant Review Committee,

I am writing on behalf of Oxford Hills Community Gardens DBA Alan Day Community Garden to express our support, enthusiasm, and collaborative intent in working with ReTreeUS. Over a decade ago we began developing an orchard at our community garden, where we offer workshops, youth leadership programs, cooking classes, farmers' markets, and food distribution programs. We are currently building a commercial kitchen to provide year-round programming for our local schools and community. We are a well-networked nonprofit that understands that the success of our community depends on collaborative efforts and sharing resources.

Over the past several years ReTreeUS has provided us with workshops, work parties, recommendations, and most importantly with trees to help us expand our orchard. To support the growth of the orchard we recently invested $30K in a perimeter deer fence which will protect our efforts going forward to develop a flourishing, abundant food source and educational tour for our community. With the town of Norway as strong partners in our work, and the support of encouraging neighbors, we are currently making plans to connect ADA accessible walking paths through our orchard to a network of town trails including a natural playground and town rec area. This will greatly increase use of our orchard by the community, and for this reason we are inviting the expertise and resources from RetreeUS to thoughtfully develop and manage the site. I hope you will consider supporting this collaborative effort to provide a community resource that will serve for generations to come.

Thanks so much for your time.
Best,

Rocky Crockett

Re: EPA Grant, ReTree US

To Whom It May Concern:

On behalf of Ending Hunger Corps it is my pleasure to support ReTree US in this grant process.

Ending Hunger Corps was formed to build capacity within organizations throughout the State of Maine as they align with Everyone at the Table: Maine's Roadmap to End Hunger by 2030 and meets the goals of the Biden-Harris Administration's Strategy on Hunger, Nutrition, and Health. The work of ReTree US aligns with both plans. ReTree US, with locations throughout Maine, is a valuable resource to the goal of ending hunger.

By its use of schools and other public areas, ReTree US has a unique ability to alter the course of poverty and end hunger through education to our most vulnerable population: children and their families. ReTree US provides nutrition and agricultural education to young people, enabling them to understand not only the production of healthy food, but the importance of nutritious food for their – and our society's – well-being.

Through partnership with Ending Hunger Corps, ReTree US will be able to place AmeriCorps VISTAs (Volunteers In Service To America) at key locations throughout Maine. These VISTAs will further develop the nutrition education programs offered to children and the communities served by ReTree US while providing these communities with fresh produce through the planting of orchards and gardens. The growth through this EPA grant will allow ReTree US to expand their efforts at seven partner orchards: this means that the current efforts will be seven times more effective at meeting both state and national goals of ending hunger in America.

Thank you for your consideration of funding ReTree US: their work is important for us all.

Sincerely,

Kim L Lengert

7.d Resumes of Project Manager and Key Personnel

Name, Position	Richard Hodges, Project Manager
Education	▪ Coursework in fruit tree science, grafting, planting, pruning, disease prevention and maintenance, University of California, Santa Cruz, 2010-2011 ▪ B.A., Liberal Arts, University of Vermont, 2007
Professional and/or Technical Certifications	▪ Resilience Hub and MOFGA, Certification of Permaculture Design, 2018 ▪ University of Maine Cooperative Extension, Certification as a Master Gardener Volunteer, 2014 ▪ Maine Association of Nonprofits, Sustainable Food Systems Leadership Institute, 2014
Employment History	▪ April 2012 – present, Program Manager ReTreeUS, ME and NH ▪ March 2013 to December 2017, Program Manager and Farm Educator, Wolfe's Neck Center for Agriculture and the Environment, Freeport, ME ▪ September 2011 to March, 2013, Coach and Outing Club Director, Durham Community School, Durham, ME ▪ September 2007 to June 2011, Garden Coordinator and Naturalist, Exploring New Horizons Outdoor School, Loma Mar, CA ▪ June 1999 to August, 2007, Camp Co-Director and Counselor, Squam Lakes Association, Holderness, NH

Qualifications

Mr. Hodges brings over two decades of experience as an outdoor and agricultural educator. As the Founder of ReTreeUS, Mr. Hodges understands the criticality of detailed orchestration of programs with multiple stakeholders, fundraising, communication, orchard and garden design, educational instruction to a wide range of age levels, budget management, and strategic development. After completing his undergraduate education, Mr. Hodges has pursued numerous opportunities to build his knowledge of environmental sustainability, attending programs to include permaculture, master gardening, and sustainable food leadership.

Relevant Experience

ReTreeUS, ME and NH: Mr. Hodges founded and manages a non-profit program that plants educational orchards in schools and supports school gardens. ReTreeUS has planted 74 community and school orchards throughout Maine, New Hampshire, Massachusetts, and Vermont. Richard has managed 60 grants over the last 10 years including a USDA Farm to School Turnkey Grant. Richard manages staff and a volunteer workforce of over 100 orchard and garden caretakers, tree stewards informational newsletters, direct conferencing, and site visits.

Wolfe's Neck Center for Agriculture and the Environment, Freeport, ME: Managed an agricultural immersion program for teenagers and supported the Education Department in a wide array of offerings that provided young people with farm-based learning opportunities. Teen Ag Program – 300K – managed 6-7 staff including, impacting approx. 500 kids.

Exploring New Horizons Outdoor School, LoMar, CA: For an educational program in which students while they completed their immersive outdoor education experience in the redwoods completed their immersive outdoor experience in the redwoods, Mr. Hodges managed an educational garden and conducted lessons in the gardens with roughly 60 students per day (Mon-Fri). Further, he led nature hikes and additional outdoor activities.

Name, Position	Shelley Kruszewski, Project Coordinator
Education	▪ Community Planning and Development, Land Use and the Environment, Muskie School of Public Service, Portland, ME, 2011 ▪ B.A. in English, minors in Spanish and Speech Pathology, Summa Cum Laude, Phi Beta Kappa, University of New Hampshire, Durham, NH, 2004
Honors and Awards	▪ Golden Key International Honors Society member ▪ Uplift LA 40 Under 40 Recipient (Lewiston Auburn Metro Chamber of Commerce) ▪ Recipient of 2020 Androscoggin Land Trust Bonnie Lounsbury Environmental Award
Additional Related Affiliations	▪ Board Member, Good Food Council of Lewiston Auburn ▪ Committee Member, Auburn Community Garden Initiative ▪ Committee Member, Androscoggin Land Trust Events Committee ▪ Volunteer Tour Guide, Monteverde Butterfly Gardens and Punta Mona Permaculture Farm, Costa Rica
Employment History	▪ 2/2020 – present, Program Coordinator, ReTreeUS ▪ I1/2021-2/2022, Interim Coordinator, Good Food Council of Lewiston/Auburn ▪ 8/2016-1/2020, Executive Director, Androscoggin Land Trust, Auburn, ME ▪ 8/2012-8/2016, Associate Dean of Admission and Lacrosse Coach, Waynflete School, Portland, ME ▪ 6/2012-8/2012, Outreach Intern, ReTreeUS ▪ 5/2010- 2/2011, Graduate Assistant, Association of State Wetland Managers ▪ 8/2004-6/2012, Paralegal, Legal Assistant, Finance Administrative Assistant, Law Offices of Joe Bornstein

Qualifications

Ms. Kruszewski has worked across several organizations to address food insecurity and other environmental issues for the last decade. Her current position as ReTreeUS' Program Coordinator has prepared her with hands on experience in tree planting, administration of educational programs, and communications with local communities and schools across Maine.

Relevant Experience:

ReTreeUS: Ms. Kruszewski manages correspondence with educational orchard and school garden host sites and coordinates new projects. Her responsibilities include implementing ReTree US programs, including tree planting workshops with students and community members, and maintaining ongoing communication with Orchard Caretakers.

Androscoggin Land Trust: Ms. Kruszewski managed stewardship activities of over 5,000 acres of conserved land including property maintenance and maintenance of several trails open to the public. Managed process of re-accreditation for the organization by the National Land Trust Alliance, demonstrating that the organization met strict standards. She managed completion/completed annual monitoring visits and reports for each property. Further, she investigated potential new land and managed new land or easement acquisitions. Ms. Kruszewski coordinated 12+ events per year, including the signature ALT River Race (an annual canoe/kayak race that brought 60+ people to celebrate the resilience of what was once one of the most polluted rivers) and a river clean up event. She worked closely with Board members, committee members, volunteers and community partners. She also prepared agendas for all board meetings and committee meetings (5+ committees). In addition, she worked with a large group of

regular volunteer Land Stewards as well as coordinating with volunteers for specific events and trail work/project days (including groups of college and high school students). As the only full-time employee, Ms. Kruszewski was responsible for administrative duties, development, outreach, marketing, and developing community relationships, fundraising, assisting bookkeeper to manage finances, budgeting, and grant writing and grant project management.

Good Food Council of L/A: As the sole staff person for the Council, Ms. Kruszewski was responsible for administrative (email, communications, coordinating monthly meetings (agenda and leading meetings) and committee meetings, orienting new members). Working with Board Members and committee members, she managed development, outreach, finance, grant applications and projects. She also participated on the Coordinating Team for the Local Foods Local Places community food system work project. Ms. Kruszewski worked with a Board of 15+ members and members of 8 committees.

Dear Taxpayer:

This is in response to your request dated Sep. 19, 2016, regarding your tax-exempt status.

We issued you a determination letter in July 2008, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

Our records also indicate you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If a return is required, you must file Form 990, 990-EZ, 990-N, or 990-PF by the 15th day of the fifth month after the end of your annual accounting period. IRC Section 6033(j) provides that, if you don't file a required annual information return or notice for three consecutive years, your exempt status will be automatically revoked on the filing due date of the third required return or notice.

For tax forms, instructions, and publications, visit www.irs.gov or call Ex. 6 - Personal Privacy (PP)

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific Time).

Durham, ME 04222

Re: Verification of Charitable Program Status with United Charitable.

Account #: 102342

To Whom It May Concern:

This letter confirms that ReTreeUS was accepted by our Board of Directors as a charitable program sponsored by United Charitable a 501(c)(3), 509(a)(1) charity (EIN 20-4286082). This program has been sponsored since 02/04/2008.

All donations to this program are tax deductible and can be made payable to ReTreeUS.

We applaud the charitable mission of this program, namely: To promote an environmentally sustainable, socially just food system by providing education, practical resources and mentorship.

All funds raised by the Program Manager are sent to United Charitable and become the exclusive property of United Charitable which, for internal operating purposes, allocates the funds to the project named above. The Program Manager is permitted to make recommendations for disbursements which are reviewed by United Charitable to determine, in its sole discretion, if the proposed disbursement conforms to and advances the tax-exempt mission of United Charitable.

If you should require any further information, please feel free to contact me at Ex. 6 - Personal Privacy (PP)

Sincerely,

Julia Healey

ANCHORAGE, AK 99504-0000

Dear Applicant:

Our letter dated July 2002, stated you would be exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code, and you would be treated as a public charity, rather than as a private foundation, during an advance ruling period.

Based on the information you submitted, you are classified as a public charity under the Code section listed in the heading of this letter. Since your exempt status was not under consideration, you continue to be classified as an organization exempt from Federal income tax under section 501(c)(3) of the Code.

Publication 557, Tax-Exempt Status for Your Organization, provides detailed information about your rights and responsibilities as an exempt organization. You may request a copy by calling the toll-free number for forms, Ex. 6 Personal Privacy (PP) Information is also available on our Internet Web Site at www.irs.gov.

If you have general questions about exempt organizations, please call our toll-free number shown in the heading.

Please keep this letter in your permanent records.

Sincerely yours,

Lois G. Lerner
Director, Exempt Organizations

EXPERIENCE:

2003-current **Executive Director, Alaska Forum, Inc.**
Administer operations and manage 501(c)(3) non-profit organization including oversight of employees and contractors, ensuring fiscal compliance, and partnership development. Coordinate and manage the annual Alaska Forum on the Environment, the Alaska Environmental Technician Apprenticeship Program and village-based Solid Waste training initiatives statewide.

Alaska Forum on the Environment (1998-current)
Coordinate premier environmental annual event with as many as 1800 participants and 50 partnering organizations (now in its eighteenth year and the second largest annual event in Alaska). Event strives to provide educational technical training opportunity for all Alaskans inclusive of all perspectives and employment sectors.

Solid Waste Training and Assistance Programs (2003-current)
Supervise and direct up to $300K annual Solid Waste Grants for rural Alaska.

Environmental Technician Apprenticeship Program (2011-current)
Supervise and implement program to establish local workforce of Environmental Technicians through US Department of Labor Apprenticeship Program with $250,000 programmatic budget funded by Alaska Department of Labor and US Environmental Protection Agency grants.

Green Star Program (2014-current)
Supervise and direct up to $200K annual program designed to provided incentives to businesses that achieve environmental standards. Program was adopted as part of merging nonprofit.

1988-2004 **Enforcement Officer, US Environmental Protection Agency**
Promoted compliance through inspection and enforcement of identified Significant Non-complying facilities statewide under various EPA programs and permits including solid waste operations, hazardous waste, toxic substances, air and water quality. Provided oversight of State Solid and Hazardous Waste Program. Initiated educational programs establishing the Training Center (on US Army, Fort Richardson) and the annual Alaska Forum on the Environment. Developed inter-agency partnerships and used innovative efforts and cooperative approaches to achieve statewide environmental objectives.

Interagency Assignment (2000-2002) – Alaska Inter-Tribal Council
Established and managed $1.4 million Integrated Solid Waste Systems Project grant to support Alaska rural communities through tribal governments. Worked with 17 selected communities to improve operational practices.

Interagency Assignment (1999-2000) – Denali Commission
Provided communications and public information support for new federal agency. Provided guidance on environmental program fund development and developed public informational resources and internal network technology.

Interagency Assignment (1995-1997) - Alaska Department of Environmental Conservation
Assisted the Compliance Assistance Office to provide small businesses with compliance incentives, permit assistance and regulatory/technical support.

1986-1988 **Environmental Coordinator, Hercules Incorporated**
Worked to achieve regulatory compliance with operations of facility-owned solid waste landfill and collection services, hazardous waste storage and treatment facilities, industrial wastewater treatment facilities and managed forest and wildlife resources.

- Provide training and support for junior environmental health professionals to increase state-wide environmental health capacity

The Rede Group Health Strategy and Policy Firm **Portland, OR**
Title: Project Manager, Full-Time *November 2012 – December 2013*

- Consultation to clients through research/evaluation, strategic planning, and communications including but not limited to projects encompassing performance management systems, Public Health accreditation, and technical assistance to state and local health departments
- Project Lead on the State of Alaska Tobacco Prevention grant to assess strategic initiatives of the statewide campaign to decrease adult and youth smoking rates
- Project Lead on the consultation, facilitation, and creation of two Oregon County Community Health Assessments and Community Health Improvement Plans
- Project Lead on an innovative observational study tracking behavior and crime linkages to the rates alcohol consumption in a popular Oregon city, providing research, needs assessment, and data translation to city public health officials
- Lead on project planning with Oregon, Washington, and Alaska clients utilizing various web-based technologies, such as Go-To Meeting and Go-To Webinar on a weekly basis
- Monitoring of program activities to ensure quality and accuracy of work outcomes vis-à-vis contractual and grant commitments
- Supervisor duties to 3 junior employees

Alaska Native Tribal Health Consortium **Anchorage, AK**

ED_016126_00000413-00002

Title: Technical Assistance Coordinator & Training and Orientation Co-Coordinator
Full-Time *October 2010 – October 2012*

- Certified Tobacco Treatment Specialist working on smoking cessation with patients at the Alaska Native Medical Center; educated and supported patients, clients and their families in individual and group settings, including administering correct dosage of nicotine replacement therapy, assessment of patient's health and situations, with continued counseling support via appointments, phone calls and written documentation
- Provision of in-depth technical assistance to eleven statewide grantee programs; inclusive of expertise on national and statewide Tobacco Cessation policies, tobacco-free campus policies, media campaigns, and community outreach
- Navigation of systems change for the ANTHC Tobacco Treatment Program as a part of the Lean Six Sigma Green Belt project to streamline pathways of Electronic Health Record referrals and the adoption of tobacco treatment and prevention IC-9 codes into patient records
- Point of contact on collaboration with State of Alaska Program Grant Manager to ensure that the grantee organization adheres to grant tracking and reporting guidelines
- Assistance in the writing and development of grant and contract applications
- Developer and presenter of curriculum and presentations for workshops and annual Tobacco Treatment Specialist Training
- Assistance in statewide training and orientation meetings for grantees, stakeholders and contractors including but not limited to meeting facilitation, presentations, and organizer of group social activities
- Increased program capacity to move towards electronic health record

University of Alaska Anchorage (UAA), Center for Community Engagement & Learning
Anchorage, AK
Title: Project Coordinator, Full-Time *October 2008 - October 2010*

- Project Lead in charge of UAA's 15+ annual Community Engaged Student Assistants including conduction of weekly meetings, project guidance, reviews, and report creations
- Principle Investigator on the implementation, distribution, and analysis of data collected from UAA's annual Faculty Inventory, which aims to gather basic faculty information, interests, and current projects to build collaboration
- Department Liaison to Directors, Department Chairs, and Faculty within a variety of UAA Departments and Colleges to support the development of courses, community research, projects and activities
- Project Lead on the design, production, and distribution of marketing paraphernalia in collaboration with the UAA Institutional Effectiveness, Engagement & Academic Support

OTHER EXPERIENCE AND ACHIEVEMENTS

- Tribal Waste and Response Steering Committee Member, 2021 - present
- National Environmental Justice Advisory Committee member, 2019- present
- Delta Omega Honor Society in Public Health, Gamma Iota Chapter Alumni Achievement Award and Inducted Lifetime Member, 2019
- Municipality of Anchorage Brownfields Committee Member, 2018- present
- Several applicable trainings in Communicating Risk, Health & Disease Data, program evaluation/management, and conflict management
- Alaska Environmental Health Association Board Member, President, 2018- Present
- Leadership Anchorage Cohort 21 Graduate, Alaska Humanities Forum, May 2018
- Alaska Environmental Health Association Board Member, Treasurer, elected October 2015- 2017
- Steering Committee member for Healthy Alaska Natives Foundation Raven's Ball, 2017- 2020
- First Place Research Poster Award, Alaska Public Health Association, 2015

ED_016126_00000413-00003

- MPH Ambassador Award for representation of the UAA MPH Program at the American Public Health Conference in Denver, CO, 2010
- UAA Community Engaged Scholar, 2007-2010

NOTABLE SKILLS

- 40-Hour HAZWOPER Certified
- State of Alaska Certified Qualified Sampler
- Highly organized, independent, and self-directed
- Positive leader, team member, and skilled in empathetic conflict management
- Excellent oral and written communication, proficient in public speaking and facilitation
- Works well with diverse groups of people and cultures
- A proven results-driven project manager with problem solving and research oriented capabilities
- Data analysis and translation, primarily for public understanding and consumption
- Innovative and creative, seeks out-of-the-box approaches for solutions

PROFESSIONAL EXPERIENCE

DEPUTY DIRECTOR
Alaska Forum, Inc. | 2019-Present

- Coordinates and arranges logistics for Alaska Forum Environmental Training Certification program applicants to include training for solid waste, wastewater and environmental training.
- Coordinates and manage all logistics and execution of annual week-long conference Alaska Forum on the Environment (AFE), including 1500+ attendees, 50+ exhibitors, 200+ speakers and 100+ technical sessions
- Successfully coordinated and launched Alaska Connect online training and events platform during a pandemic with over 600 virtual registrants in the first year to host online training and events when in-person events were not permitted by local mandates. And extended that to 750 virtual attendees in the second year.
- Coordinates and arranges logistics for Alaska Forum Environmental Training Certification program applicants to include training for solid waste, wastewater and other vital environmental training.
- Develops communication and promotion plan for AFE and other Alaska Forum projects
- Works directly with Executive Director and Board of Directors to communicate the mission and values of the Alaska Forum to a state-wide audience
- Direct contact for all media relations
- Manages all internal and external communications via website, press releases, social media, etc.
- Manages online registration software
- Manages all contracts with training and conference vendors

MARKETING OFFICER/MARKETING MANAGER
MARKETING ASSOCIATE
First National Bank Alaska | 2013-2019

- Worked directly with Marketing Director on overall marketing and communication strategy and execution to include all digital and print media and advertisement and internal and external communications for bank with $4 billion in assets
- Managed internal and external communications for the bank via social media, bank website, press releases, intranet, internal employee email system, etc.
- Managed bank website and social media accounts
- Managed the development and completion marketing and communication collateral including internal and external communication plans, digital media, print advertising, TV and radio advertising, social media content, and website content
- Managed $1+ million annual Marketing and PR budget
- Managed day to day operations and projects of 11-person Marketing Department, ensuring marketing collateral is on brand, meets the banks vision and is delivered on time and within budget
- Direct Marketing and PR contact for Executive and Senior Management team, 28 branches, 20 departments, 20 sections and numerous units
- Managed annual marketing and business development activities including annual 600-person customer reception

US Environmental Protection Agency

RE: Application for *Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Application*

Dear EPA Proposal Evaluation Team,

Our EJCPS Proposal is built upon a 25-year education and training effort that has sought to benefit the smallest communities and Alaska Native populations of rural Alaska. While this proposal may not feel innovative or particularly creative as you read through it, it does address the limitation of the ability for rural Alaskans to participate in collaborative and environmental education processes, which is a fundamental root of an environmental justice concern. As described in the proposal, rural Alaskans are particularly disadvantaged in the capability to participate in key environmental trainings and forums where vital relationships are established, and problem-solving resources are made readily available. The extensive cost for travel to participate is a key limiting factor where communities face tremendous challenges on environmental issues yet have severe economic limitations often below poverty levels.

The Alaska Forum has forged high quality collaborations with environmental contractors and consultants, State and Federal funding organizations and Alaska Native Councils and Tribal organizations. Each year, the Alaska Forum brings together representatives from all of these groups to share information, technical knowledge, and solutions to address the enormous variety of environmental issues including climate change, waste management, air quality, water quality, disaster, food sustainability and emergency response at our annual environmental education conference, the Alaska Forum on the Environment (AFE). By reviewing our week-long AFE event training agenda from 2023 and our weekly technical sessions held throughout the year (appendices to this proposal, you will gain an understanding of the vital mission the Alaska Forum fulfills, particularly where education, training and local capacity building can be the basis for environmental solutions across the state of Alaska.

The collaborations forged by the Alaska Forum lead to meaningful and positive change, where local and tribal governments take direct action and engagement as a stakeholder in efforts to address environmental concerns.

Thank you for your time and consideration of this proposal. We strongly believe this proposal provides the best opportunity for EPA to create direct impact for EJ impacted communities across state of Alaska, where taking steps to mitigate environmental justice concerns through collaborative approaches is truly a fundamental objective.

Should you have any questions or need additional information, please contact me at Ex. 6 - Personal Privacy (PP) or by email at keilo@akforum.org.

Sincerely,

Kurt A. Eilo, Executive Director
Alaska Forum, Inc.

1.0 PROJECT OBJECTIVES

A. Project Summary Page

1) **Project Title:** Addressing Environmental Issues through Collaboration and Education in EJ Impacted Alaska Communities.

2) **Project Location:** Statewide in Alaska Communities with populations less than 50,000.

3) Applicant Identification:

Alaska Forum, Inc.
PO Box 212409
Anchorage, AK 99521-2409
Ex. 6 - Personal Privacy (PP)
keilo@akforum.org
DUNS#: 124331344 SAM Registration UE ID: MT8MLXVJLHL3

4) Applicant Description: Alaska Forum is an eligible applicant as a 501c3 Non-Profit Organization. For 25 years, the organizations mission has been to promote a healthy environment through communication and education. The Alaska Forum, Inc. works with local governments, federal and state agencies, businesses, and non-profit organizations in a spirit of cooperation to ensure that environmental issues and concerns can be addressed with an understanding of the diversity of perspectives and a fundamental educational background of the available science, technology, knowledge, and Alaskan experiences. The Alaska Forum, our programs, and our projects will not take political or advocacy positions.

5) Small CBO Set Aside: This proposal has been developed for the full available funding. However, we do qualify for the set aside as we have 4 full time employees. This project is scalable to meet the $150,000 set aside upon request by funding agency.

6) **Project Abstract:** This proposal seeks to provide EJ impacted communities with better access to environmental training, education and collaborative partnerships developed through the Alaska Forum's annual conference and weekly virtual training events. A primary limitation for individuals to participate remains the extensive cost to travel from remote communities, therefore further limiting the voice and potential progress that can be made through the extensive training and networking provided by the Alaska Forum and our vast network of partner organizations.

7) **Project Types:** This proposal provides access to training, education, networking and technical information such as successful demonstration projects and solutions, as well as developing collaborative partnerships to EJ impacted communities from rural Alaska.

8) **Special Considerations:** This proposal seeks to provide community driven solutions through education, training and collaborations on environmental issues facing rural Alaska. This includes Climate Change/Disaster Resiliency, as well as core concerns with air quality, water quality, food sustainability, waste management, brownfields, energy conservation and pollution prevention.

9) Environmental Issues: As this proposal can have an EJ impact across Alaska's 300 communities and over 200 tribes, the environmental issues we address through education, technical training and building collaborative approaches affects a tremendous variety including climate change, resiliency, energy, drinking water, wastewater, waste management, air quality, food sustainability, brownfields and fundamental human health and environmental concerns.

10) **List of Project Partners**: The Alaska Forum has a vast list of partners that invest in our training and technical assistance including EPA, Alaska Department of Environmental Conservation, Department of Defense, US Forest Service, US Fish and Wildlife Service, US Park Service and more than 25 additional highly engaged partners from businesses and other federal/state agencies and government entities. Further specific information is provided within the proposal and key appendices.

11) **QAPP**: A QAPP is not anticipated to be required for the scope of this proposal.

B. Environmental and Public Health information of the Underserved Communities

1) Rural Alaska communities experience severe challenges due to remoteness from other communities, disconnection from the road system, lack of appropriate infrastructure and resources to build it, extreme weather conditions, high unemployment, and low income (ADCCED, 2017). According to an Alaska Native Tribal Health Consortium report (2017), the unemployment rate for Alaska Natives statewide in 2015 was 6.5% and the percentage of Alaska Natives living in poverty between 2011 and 2015 was 23.2%. For the nation, the unemployment rate was 5% (USBLS, 2016) and the poverty rate was 13.5% in 2015 (US Census Bureau, 2016). The average median household income for 20 out of the 21 Alaska villages located along the Yukon River (because data weren't available for all 21) is $34,337. This is well below the national median household income at $61,372, the states at $76,114 (US Census Bureau, 2017, 2018), and all Alaska Natives at $45,997 (ANTHC, 2017).

Eighty-six percent of Alaskan communities are located on a river, coast, or both, and away from the road system. Distribution of all communities is uneven among the state's eight regions, with the majority located in western Alaska and most Alaska Native communities located in the north, west, and Interior (ADCCED, 2017). Traveling from one region to another can mean going a long distance given the state's total land area of 586,000 square miles, and that's hardly the biggest obstacle regarding transportation; in addition to the many forests and mountains, Alaska's complex topography also includes a great deal of water with its many lakes, rivers, wetlands, etc. (ADNR and ADFG, n.d.).

Weather conditions can be harsh all year round. The state experiences an average annual precipitation (rain or snowfall) of 1,050,000 gallons/day (ADNR, n.d.) as well as high amounts of wind that can reach hurricane forces (USNWS, n.d.). And severe storms can lead to flooding and soil erosion events (USNWS, n.d.). Another major contributor to increased soil erosion is melted permafrost (USDOI APLIC, 2018). Permafrost (ice that remains frozen all year, for consecutive years) can be found below almost 85% of the state's soil and has a very important role of keeping the ground solid (USDOI APLIC, 2018). However, due to a changing climate, Alaska's permafrost is melting, which has resulted in land with high amounts of moisture that is no longer strong enough stay intact or hold structures aboveground. This has led to the destruction of forests and vegetated habitats, the collapse of roads and buildings, and an increase in susceptibility to soil erosion (USDOI APLIC, 2018).

Because so many rural communities lack the funds and access to materials, proper infrastructure is falling apart or doesn't exist (ADCCED, 2017). Many of these communities, for example, all 21 located along the Yukon River (ADEC, 2018b), have Class III landfills. Such landfills are permitted by the State in villages with less than 1,500 residents, are disconnected from the road system, or unable to access a larger landfill (ADEC, 2018c). However, Class III landfills don't meet EPA's regulatory standards for Municipal Solid Waste facilities, which are in place to protect the environment and public health (Criteria for Municipal Solid Waste Landfills, 2018). Thus, Class III landfills can lead to contamination issues. Many rural communities don't have piped water systems for drinking, sanitation, or toilets. They rely on those nearby water sources (e.g., wells, rivers) for drinking and cleaning. "Honey bucket" - 5-gallon buckets that are used in homes to collect human waste - are often hauled and dumped into a larger container or a sewage lagoon used by the community (ADCCED, 2017). The lack of proper sanitation exacerbates contamination issues, and the result is the outbreak of disease such as pneumonia, meningitis, bronchitis, etc. (Mutter, 2014) and could result in weaker immune

systems, potentially worsening the effects of Covid-19 outbreaks in these rural communities.

While we have considered EPA's EJSCREEN tools to characterize the scope of the project, our proposal addresses such a vast range of communities serving any rural Alaska community with a population of less than 50,000, the mapping tool seems a poor fit. To manage these challenges effectively, these communities facing the highest health and environmental risks require ongoing training and capacity building opportunities for community leaders and environmental personnel. Through education, training, and building collaborative partnerships, providing access to underserved communities through their interested leaders, elders and youth will help mitigate these environmental justice challenges for Alaska rural communities.

2) **Addressing environmental and public health issues**: This proposal seeks to additional access to environmental education and technical training for EJ impacted rural Alaska communities. Through travel scholarships, the Alaska Forum will be better able to provide education, training, collaborative partnership building for communities to prioritize their environmental concerns and build capacity to take steps to address them. As our training and technical education may reach as many as 300 different communities, the specific identification of issues and community vision require a baseline foundational understanding of environmental concerns and potential solutions that may vary greatly as the communities seek and develop a locally driven approach. In addition, case studies of community solutions provide real insight helping build lessons learned and replication of successes. For example, session on successful projects implemented by Tribes receiving IGAP funds has been a vital source of information for any of the other of Alaska's 229 Tribes.

Alaska is the largest state in the nation, covering over 400 million acres, which is more than two times the area of Texas. Meanwhile, the population of the state hovers around only 700,000 residents. The state is made up of 200 communities that vary in population from less than 20 to roughly 300,000. Eighty-five percent of Alaska communities are accessible *only* by boat or plane. Rural communities are made up of a majority Alaska Native people and about 15 percent of the population of Alaska.

It is important to note how unique Alaska is in comparison to any other state in the nation. Like other states, Alaska has levels of government and land ownership: federal, state, municipal, and city. However, the passage of the Alaska Native Claims Settlement Act (ANCSA) in 1971 added an additional and rather complex layer of land ownership across Alaska. ANCSA divided the state into twelve regions defined by the common heritage and shared interests of the indigenous peoples within each geographic area. Though, this separation was made based on commonalities, it is important to distinguish that the Alaska Native people were nomadic and did not traditionally recognize boundaries. The regional boundaries do not represent land owned by the Alaska Native regional corporations; instead, they established which of the twelve Alaska Native regional corporations would serve the people, villages, and communities within that area. Within each region of Alaska there is a complex landscape of governance, land ownership, roles, and relationships. In 1998, the federal government officially recognized over 200 Indian tribes in Alaska, separate from Alaska Native corporations, which opened the doors for a government-to-government relationships between those tribes and the federal government.

Understanding the vast differences between the many cultures of Alaska is instrumental in being able to provide transparent and accurate technical assistance to each community. Thus, to do so, we must hear, learn, and communicate directly from each region and each community in the region to uphold the unique differences that set each apart.

3) **How communities benefit from this project:** Through this proposal, community members will have access to attend the environmental education and technical trainings provided through the Alaska Forum on the Environment with the support of travel scholarship. This will provide opportunity to add more voice to EJ impacted communities and drive capacity to seek and implement local solutions to a communities prioritized environmental concerns. Given that access is

limited to participate in the training provided by the Alaska Forum and our partner organizations due to financial constraints, this project helps mitigate the environmental justice concerns in a community by providing them with a stronger voice and building better capacity through technical information and training. Enable underserved rural Alaska communities with a population of less than 50,000 to better assess and prioritize needed climate change solutions as well as water, energy, and solid waste management process improvements. This will be accomplished by providing scholarships to cover associated travel and lodging costs to attend the Alaska Forum on the Environment in 2024, 2025 and 2026. Scholarships will be awarded consistent with detailed criteria (to be further refined through Activity 1 of this proposal) and will seek community members, elders and youth who otherwise would not have the means to participate.

By incorporating the uncensored participation of community members, youth, and elders, with the support of travel scholarships from this proposal, the Alaska Forum can assist in better establishing commonalities of understanding from those in industry and regulatory agencies who seek to assist indigenous, rural communities, but do not know how. It is well understood in Alaska that in indigenous communities the elders are the gatekeepers of knowledge and traditional ways of knowing. Thus, the Alaska Forum seeks to respect this cherished community group by including Elder and youth led talking circles within each topic track. Most indigenous cultures practice communication through talking circles or a cultural meeting traditionally built around a fire as a place where stories are shared, strategies agreed upon, and emotional connections strengthened. Everyone around the circle has an equal chance to speak. A "talking stick" is circulated in clockwise fashion around the circle to identify the speaker. Oftentimes, the talking stick is an object of cultural significance to the group. The talking circle empowers members to listen from their hearts when a fellow colleague has the talking stick, requiring listening without judgment in the spirit of open-mindedness even if you disagree with the speaker's words. The few elders that have been able to attend AFE have asked for more support so their fellow elders can too, share their knowledge.

C. Organization's Historical Connection to Underserved Communities:

1) History of your organization's involvement with the underserved communities:

For 25 years, the Alaska Forum has worked to promote a more productive and efficient relationship between Alaska government agencies, businesses, organizations, Tribes, and the public by:

- Developing a more common understanding and educational foundation on environmental issues.
- Providing opportunity for the exchange of information and experiences addressing environmental issues.
- Providing recognition for outstanding environmental efforts.
- Understanding the diversity of perspectives and concerns of others across Alaska.

We accomplish this through several different program approaches. The reader of this proposal should note that each of these program approaches become intertwined as we work with underserved communities. While we will outline each of these programs, the primary focus of this proposal is to expand access to the critical information and training provided through the annual weeklong Alaska Forum on the Environment (AFE) and the weekly technical sessions throughout the year. This is a fundamental starting point for communities as they work through their problem-solving processes. Providing additional access to this event will build the capacity and knowledge to access support from our Environmental Job Training program and our Green Star® Community Program which provides community environmental planning technical assistance and recognition for their achievements. These programs as well as the access to the wealth of information and support provided by our partner organizations who have similar missions and responsibilities, all fundamentally start for a disadvantaged community with the education, training and awareness of resources that becomes apparent through the Alaska Forum on the Environment.

2) Organizational work with underserved community residents:

The Alaska Forum works with community residents and local organizations to address environmental and public health issues through a variety of environmental programs described below. The **Alaska Forum on the Environment (AFE)** offers an in-person platform that unites Alaska's vast cultures together for a week of learning, communication, and direct partnership. What the Alaska Forum seeks to incorporate into AFE is the ability to host community members, elders and youth from across the state, to gather in representation of shared values and learn how to move forward through challenges facing the local environments, the lands, and waters Alaska communities live from. The elders and youth of each community are the glue, the link to past and future, and where many of hopes of each community rests.

Alaska Forum on the Environment

The Alaska Forum on the Environment (AFE) is a week-long training includes access to over 60 technical sessions on environmental issues and has been a source of information for 25 years for underserved communities across Alaska. Beginning 2021, we have added weekly virtual session to provide updates and expanded information to build upon information and provide more current up to date changes (such as regulatory changes, policies, or emerging issues and topics). In 2022, we made this event an in-person and virtual event, to better reach participants across the state, although internet access in rural Alaska does not always support virtual attendance options. To gain a full understanding of this event, we request the reader review the AFE 2023 agenda, and the AFE 2023 Final Report which are provided as attachments to this proposal. By expanding access to this event to additional community members, youth and elders, we provide a greater voice and understanding on environmental issues facing rural Alaskan communities. For the purposes of this proposal, providing access to this training for EJ impacted communities leverages the existing investments into the AFE event exceeding over $2 million in 3-year project period.

Green Star® Communities

This Alaska Forum program provides an initial on-site community assessment to identify existing service gaps necessary for sustainable waste and resource management improvements. The assessment is a community-wide review of local utility infrastructure and waste management services and provides information for the community to identify priority needs for improvement and specific action items. General information, training, and technical assistance is delivered onsite during the assessment and covers the following topics: Landfill management and operator training, household hazardous waste (HHW) management and reduction, energy conservation, waste stream evaluation, and water and wastewater management. Information and materials are designed to engage both decision-makers and the community by providing practical, local, and sustainable solutions to many environmental and solid waste issues adjusted to address problems specific to each community's situation. Follow-up and technical support by Green Star staff enable the community to develop a long-term work plan to resolve issues in the village and progress towards earning their Green Star Award.

Environmental Job Training

The Alaska Forum Environmental Training and Apprenticeship Program (ETAP) is a conventional training program and supports industry specific trainings to meet employment qualifications. An apprenticeship is a system of training a new generation of practitioners in a structured competency-based set of skills. ETAP, with support of the FY2023-25 BJT Grant, is providing entry level credentials for employment in the assessment, cleanup, and management of solid and hazardous materials. Individuals can further their qualifications by completing the training and on the job learning experience requirements in the US Department of Labor approved Apprenticeship program. This effort is also support by the State of Alaska. In FY24, we will implement a Community Emergency Response Team (CERT) training course that educates community volunteers about disaster preparedness for the hazards that may impact their area and trains them in basic disaster response skills, such as fire safety, light search and rescue, team organization, and disaster medical operations. CERT offers a consistent, nationwide approach to volunteer training and organization that professional responders can rely on during disaster situations, allowing them to focus on more complex tasks. We also provide specific training designed for Alaska landfill operators though our Alaska Landfill Operator Training course funded by USDA.

With the advent of technology that supports virtual meetings, one may ask why the elders and youth do not simply participate via the virtual route? The answer is simple. In Alaska, lack of consistent broadband connectivity affects a vast majority of the state. Much of the state does not have broadband exceeding 25/3 Mbps. Without reliable broadband across the state of Alaska, many communities are unable to participate in virtual meetings, much less a week-long conference. Further, there are cultural implications of not being able to participate in person, to share from their hearts in person, to merely connect as humans. The virtual component robs the natural indigenous ways of connection that is needed with such delicate topics presented at AFE.

3) Community Driven Participation - How underserved community's residents and/or organizations were involved in developing this current project proposal plan.

At the culmination of our Alaska Forum on the Environment 2023, a survey of participants identified the need to identify funding sources that could help support additional community members with the opportunity to access to the information and collaboration provided by the event. In response to this feedback, the Alaska Forum Board of Directs unanimously passed a motion to seek funding that would help disadvantaged community members interested in the environment with specific opportunities that also include both youth and Native Elders. This proposal directly reflects the input from Alaska communities and our Board representation.

D. EJCPS Model

The EJCPS Model applies well to Alaska communities that are subject to EJ concerns and recognizably underserved. With over 300 communities that may benefit from this proposal (as many as 229 Tribes), the linkage to a particular one of the 7 elements will vary greatly but applies to all the model elements at different levels and different issues. Some communities may still be doing basic community visioning and issues identification, while others are more in-line with element 6 in applying local solutions to their identified priority issues.

EJCPS Model Element 1 – *Issues Identification, Community Vision, and Strategic Planning*
For many who would benefit from access to training provided in this proposal, they will have the opportunity to gain a better understanding of environmental issues facing their community and being their process within this Model.

EJCPS Model Element 2 – *Community Capacity-Building and Leadership Development*
For many who would benefit from access to training provided in this proposal, they will have the opportunity to take their understanding of environmental issues facing their community and become local leaders driving solutions and building community awareness.

EJCPS Model Element 3 – *Community Consensus Building*
Education and awareness will lead to proposed local solutions. For example, a Tribe might enact a resolution that address an issue that was highlighted as education content when a community has key information and leadership that can build consensus.

EJCPS Model Element 4 – *Partnerships and Leveraging Resources*
Almost every environmental solution involves funding. Through the education and examples of success stories provided participants, a community can identify potential funding entities from example best practices learned from their participation.

EJCPS Model Element 5 – *Constructive Engagement*
A community may identify potential funding entities from example best practices learned from their participation that results in actual engagement from funders or service providers.

EJCPS Model Element 6 – *Sound Management and Implementation*

This model element might occur from information and lessons learned provided through the training and technical information learned having been a funded participant from this proposal. However, of the model elements, element 6 is largely a burden upon community leadership. Our role here is more met by lessons-learned and best practices as examples.

EJCPS Model Element 7 – *Lessons Learned and Best Practices*
This proposal would provide access to individuals that would benefit from lessons-learned sessions and best practice examples which are specifically provided as training and technical assistance content. Two examples would be EPA IGAP success stories, and Green Star Community success stories, both of which are provided as event content.

E. Project Linkages

This proposal directly provides financial assistance to communities and individuals that are subject to environmental justice concerns from underserved communities. Impacted individuals and community members will have access to the technical and educational information provided as well as draw potential linkage to other resource providers that can mitigate these EJ concerns. This linkage is straight-forward as the cost of travel to access these tools is severely limited for rural Alaskans including those from Alaska's 229 Tribes. This proposal provides the foundation for local solutions to some of the long list of environmental concerns challenging rural Alaska.

F. Partner and Collaborate

This proposal focuses on providing access to the education and technical information provided with participation in the Alaska Forum on the Environment. This event is the result of over 30 agencies, businesses and organizations working together to provide science-based information on environmental issues and challenges facing Alaskans.

Each year, a committee of these 30 volunteering organizations helps build the content of the event which has included as many as 300 presenters and 100 technical sessions in the week-long event. The commitment of this committee is what has driven our 25 years of successful environmental education events. Within the scope of this proposal, this committee would continue its role in providing this diverse environmental content and engaging a broad range of stakeholders and presenters.

It is a clear demonstration of the effective partnerships that have formed our collaborative process to implement the fundament training needed in underserved communities. The reader is highly encouraged to review the included appendices AFE *2023 Agenda*, the *AFE 2023 Final Report (page 6, 7, 8)* to gain a full understanding of this 25-year story of successful collaboration. The commitment of these stakeholders speaks for itself in their long-term commitment to this annual event. Seeking specific letters of support seemed to be more generic and were not requested based upon the language of the RFA suggesting they would not be evaluated. We think our 25-year history and the depth and diversity of the committed stakeholders serves as an example of true partnerships.

A full list of the stakeholders in the committee, and the engaged organizations and business is provided in the appendices as it is extensive. The following lists should illustrate the annual commitment of these stakeholders to this Alaska Forum on the Environment event:

AFE Event Planning Committee (Primary Role of Developing Technical Content):

- AECOM
- Alaska Department of Environmental Conservation
- Alaska Department of Fish and Game
- Alaska Department of Military and Veteran's Affairs
- Alaska Native Science Commission
- Alaska Native Tribal Health Consortium
- Chugach Electric
- Conoco Phillips Alaska
- Delta Backhaul Company
- Geosyntec Consultants
- JACOBS
- Knik Tribal Council
- Kuna Engineering
- National Oceanic and Atmospheric Administration
- North Pacific Research Board
- Oil Spill Recover Institute
- Prince William Sound Regional Citizens' Advisory Council
- Renewable Energy Alaska Project
- Republic Services
- University of Alaska Anchorage
- University of Alaska Fairbanks - Bristol Bay Campus
- University of Alaska Fairbanks
- US Air Force
- US Defense Logistics Agency
- US Department of Defense
- US Department of the Interior
- US Environmental Protection Agency
- US Forest Service
- US National Park Service

AFE Organizations Providing Education and Technical Training Content (at AFE 2023)**:**

- ADEC Solid Waste Program
- ADF&G Habitat Section
- AECOM
- Alaska Arctic Observatory
- Alaska Association of Village Council Presidents (AVCP)
- Alaska Center for Appropriate Technology
- Alaska Department of Environmental Conservation
- Alaska Department of Fish and Game
- Alaska Department of Natural Resources
- Alaska Dept. of Transportation & Public Facilities
- Alaska Division of Forestry & Fire Protection
- Alaska Earth Sciences
- Alaska Energy Authority
- Alaska Fisheries Development Foundation
- Alaska Geospatial Office
- Alaska Mariculture Alliance
- Alaska Pacific University
- Alaska Sea Grant
- Aleut Community of St. Paul Island
- Alien Species Control, LLC
- Allen University
- ANTHC
- Aquagga
- Arctic Eider Society – Siku
- ASRC Energy
- Brice Engineering
- Bureau of Indian Affairs
- CCLR
- Center for Alaskan Coastal Studies
- Citizens Climate Lobby
- Defenders of Wildlife
- Delta Backhaul Company
- Department of Energy
- Department of Air Force
- Eurofins Scientific
- Geosyntec Consultants

- US Fish and Wildlife Service
- US Forest Service
- US Navy
- Williams College
- Woodwell Climate Research Center
- Yukon River Inter-Tribal Watershed Council

2.0 PROJECT ACTIVITIES/MILESTONE SCHEDULE:

A) Project Activities

OBJECTIVE 1 - DEVELOP TRAINING/AGENDA ENVIRONMENTAL TECHNICAL CONTENT FOR AFE EVENT

- Activity 1: General coordination, marketing, event management, and planning.

This activity is conducted each year by Alaska Forum Staff and our partnering organizations. It takes approximately .25 FTE/year for Senior Staff level work. Given an event the scope and size of AFE, this task is substantial. It is allocated as a **leveraged task** (not requesting funds to support this). However, it is fundamental to accomplish Activities 3, 4, 5, 6 which are the fundamental tasks associated with this proposal.

- Activity 2: Develop annual event content in collaboration with over 30 existing partnering organizations. It takes approximately .25 FTE/year for Senior Staff level work. Partner time averaging 120 hours/year as in-kind organizational contribution based upon estimate hourly rate.

This activity is conducted each year by Alaska Forum Staff and our partnering organizations. Given an event the scope and size of AFE, this task is substantial. It is allocated as a **leveraged task** (not requesting funds to support this). However, it is fundamental to accomplish Activities 3, 4, 5, 6 which are the fundamental tasks associated with this proposal.

OBJECTIVE 2 - PROVIDE APPLICATION PROCESS FOR FINANCIAL SUPPORT VIA SCHOLARSHIPS FOR EJ IMPACTED COMMUNITIES

- **Activity 3: Create online application process and provide clear criteria for selection.**

Alaska Forum Staff will prepare an online process to apply for funding support to attend AFE 2024, 2025, 2026. This will use our existing registration software platform to provide cost efficiency. This process will be supplemented with direct phone contact where online access is limited. The process application will be based upon clear qualification criteria which will include:

1. Alaska residency requirement
2. Community with population <50,000
3. Environmental interest or employment role, youth or Elder
4. Not currently funded for employment by EPA grant.
5. Additional criterion TBD or subject to modification with EPA project officer input.

- **Activity 4: Process scholarships and verify reimbursement requests.**

Alaska Forum Staff will review applications for AFE 2024, 2025, 2026 using established criteria and will maximize the number of scholarships (budget is based upon estimates, however, cost efficiencies from some locations may allow and increase number of participants). 50 or more scholarships will be awarded, and verifications of costs and attendance will be conducted. The scholarships will directly allow full participation in the education and technical training events provided by the Alaska Forum.

OBJECTIVE 3 – GRANT ADMINISTRATION, REPORTING, MEASUREMENT

- **Activity 5: Provide quarterly/mid-year/final reports to EPA.**

Alaska Forum Staff will prepare reports and submit financials according to grant/cooperative agreement terms.

- **Activity 6: Financial management by staff to include invoicing, billing, recordkeeping, expense reports, and any staff training as need to meet requirements.**

Alaska Forum Staff will ensure all financial controls meet grant/cooperative agreement terms and prepare/retain all verification.

B) Milestone Schedule

Project Task	Start	End
Grant Award	November 2023	September 2026
Year 1		
Activity 1: General coordination, marketing, event management, and planning.	Ongoing	Ongoing
Activity 2: Develop annual event content in collaboration with over 30 existing partnering organizations.	September 2023	February 2024
Activity 3: create online application process and provide clear criteria for selection	November 2023	November 2023
Activity 4: process scholarships and verify reimbursement requests	November 2023	January 2024
Activity 5: Provide quarterly/mid-year/final reports to EPA	January 2024, April 2024, July 2024, October 2024	
Activity 6: financial management by staff to include invoicing, billing, recordkeeping, expense reports, staff training	Ongoing	
Year 2		
Activity 1: General coordination, marketing, event management, and planning.	Ongoing	Ongoing
Activity 2: Develop annual event content in collaboration with over 30 existing partnering organizations.	September 2024	February 2025
Activity 3: update online application process and provide clear criteria for selection	October 2024	November 2024
Activity 4: process scholarships and verify reimbursement requests	November 2024	January 2025
Activity 5: Provide quarterly/mid-year/final reports to EPA	January 2025, April 2025, July 2025, October 2025	
Activity 6: financial management by staff to include invoicing, billing, recordkeeping, expense reports, staff training	Ongoing	
Year 3		
Activity 1: General coordination, marketing, event management, and planning.	Ongoing	Ongoing
Activity 2: Develop annual event content in collaboration with over 30 existing partnering organizations.	September 2025	February 2026
Activity 3: update online application process and provide clear criteria for selection	October 2025	November 2025
Activity 4: process scholarships and verify reimbursement requests	November 2025	January 2026
Activity 5: Provide quarterly/mid-year/final reports to EPA	January 2026, April 2026, July 2026	
Activity 6: financial management by staff to include invoicing, billing, recordkeeping, expense reports, staff training	Ongoing	
Final Report and Grant Close Out		September 2026

C) Itemized Budget Sheet & Narrative

Submitted as an Attachment per RFA

3.0 ENVIRONMENTAL RESULTS

A) Logic Model

Submitted as an Attachment per RFA

4.0 PROGRAMMATIC CAPABILITY

A) Organizational Experience

The Alaska Forum, Inc. has successfully managed program deliverables and reporting requirements for all received awards and is in good standing on all past and current projects. The Alaska Forum has successfully hosted 25 annual events, the Alaska Forum on the Environment and has a proven track record on this fundamental component of the proposal. The primary activities associated with managing Activities 3-6 is well within our existing capacity and experience. To accomplish these tasks is primarily an extension of our current capabilities by providing access to additional scholarship funded participants in our education and technical training at AFE. The online software used to create the application has been implemented by our staff for 5 years and they are considered experts in their use of the associated software platform. Scholarship funds will require staff to add a selection process and financial verification which is well within our existing capacity.

B) Staff Experience/Qualifications

Below is a summary of key Alaska Forum staff that will contribute to this proposal:

Kurt Eilo, Executive Director: Mr. Eilo has over 35 years of technical experience in the environmental field. Prior to serving as Executive Director for the Alaska Forum as a 501(c)(3) nonprofit, he worked 15 years for the Environmental Protection Agency (EPA) in hazardous and solid waste compliance and enforcement programs, developing and providing technical and grant oversight for the Alaska Department of Environmental Conservation (ADEC) Hazardous Waste Program, solid waste programs, and serving as project officer on numerous grants. Also while with EPA, Mr. Eilo was provided special assignments to support agency partners including: 1) developing and managing the Alaska Inter-Tribal Council in the management of the Integrated Solid Waste Systems Project, 2) developing and implementing the ADEC Compliance Assistance Program, 3) providing guidance and technical support to the Denali Commission as a newly formed federal agency, and 4) establishing and supporting an inter-agency workgroup between EPA, ADEC, and the Department of Defense Agencies in Alaska. Mr. Eilo has been involved with the RALO program since its inception, as both a Solid Waste Association of North America (SWANA) member and an EPA employee. His involvement includes guiding development of the RALO course and more recently administering USDA solid waste grants. Prior to EPA, he worked as a Compliance Coordinator for a large chemical production facility. *See Appendices for Mr. Eilo's résumé.

Joy Britt, Director of Environmental Programs
Mrs. Britt has 15 years of experience working with Alaska rural communities on environmental programs such as Brownfields, Contaminated Sites, and now Green Star Communities. She joined the Alaska Forum in 2022 to work with and help grow and implement the Green Star® Communities program in Alaska. Britt's main objectives are community outreach and development, general program operations for the Green Star® program, planning, logistics. Prior to joining the Forum, Mrs. Britt worked for the Alaska Native Tribal Health Consortium as their Senior Environmental Program Manager.
*See Appendices for Mrs. Britt's résumé.

ED_016126_00000418-00014

Amy Penney, Deputy Director
Mrs. Penney has more ten years' experience in marketing and communications, and program and project management. She joined the Alaska Forum in 2019 and coordinates all of the Alaska Forums training and events. Penney's main objectives within this project will be the planning and implementation of the Alaska Forum on the Environment event, agenda, and managing the application process for this grant, as well as all other training logistics for the Alaska Forum. Prior to joining the Forum, Mrs. Penney worked for a local community bank managing the banks' marketing, project, and programs.
*See Appendices for Mrs. Penney's résumé.

Jacquoi Porter, Finance Director
Jacquoi Porter has over ten years of experience in accounting, payroll, and finance for Alaskan and Alaskan Native organizations. She joined the Alaska Forum in 2019. Porter's main objectives will be to prepare, monitor, and report on all budgeting and financial aspects of the Green Star Community Program. Porter will support scheduling and planning efforts of the Executive Director and Director of Environmental Program. Prior to joining the Alaska Forum, Mrs. Porter worked for an Alaska Native Corporation supervising the accounting department working closely with department managers in developing and managing budgets and financial assets.
*See Appendix for Mrs. Porter's résumé,

C) Expenditure of Awarded Funds

The Alaska Forum has financial approach, procedures, and controls to ensure funds will be expended properly and in a timely/efficient manner. Our past performance on active and past EPA and USDA funds is provided above and in section 5.0.

5.0 PAST PERFORMANCE

The Alaska Forum, Inc. has successfully managed program deliverables and reporting requirements for all received awards and is in good standing on all past and current projects. The organization has proven financial capacity and has managed an annual budget of $580,000 for the annual conference, Alaska Forum on the Environment, for the past 25 years. It has additional experience managing agreements totaling up to $500,000 in federal grant funds annually. The organization operates under a current annual budget of over $1,000,000. The Alaska Forum has consistently met all past program requirements including project reports, in addition to adhering to all financial reporting guidelines.

Past Federal and State Assistance Agreements – Alaska Forum, Inc. has administered the Environmental Technician Apprenticeship Program through grants from the State of Alaska and U.S. EPA for an operational period of July 2008 to June 2026. The Alaska Forum has received $127,770, $114,969, $111,612, $117,280, $150,122, $163,226, $150,000, $166,090, $174,250, $184,481, $177,268.74, and $195,300 for 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, and 2023. Additionally, the U.S. EPA awarded $200,000 in FY2015, FY2017, FY2019, FY2020, FY2022 and FY2023. Alaska Forum, Inc. has also received funds from U.S. Department of Agriculture, Rural Development Program for Grant Awards annually since 2008. In the last five years, the Alaska Forum has received grant awards totaling $1,133,397 from the U.S. Department of Agriculture.

FY 2004-2020: Alaska Forum has received numerous other small grants, contracts, or commitments under $20,000 each from U.S. EPA, U.S. Fish & Wildlife Service, U.S. Bureau of Land Management, U.S. Forest Service, U.S. Federal Aviation Administration, U.S. Dept. of Agriculture, U.S. Dept. of Energy, U.S. Army, U.S. Navy, and U.S. Air Force.

Current staff capacity in FY24 will be meet our proposed program work plan targets for FY24-26.

6.0 QAPP

This proposal should not require a QAPP. However, if EPA determines a QAPP is required, this is within our capacity to accomplish.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Kodiak Area Native Association

Address: 3449 Rezanof Dr E

City: Kodiak

State: AK: Alaska Zip Code: 99615-6952

B. Unique Entity Identifier (UEI): T184LK4YV3J8

C. Applicant/Recipient Point of Contact

Name: Tyler Kornelis

Phone: Ex. 6 Personal Privacy (PP)

Email: tyler.kornelis@kodiakhealthcare.org

Title: Environmental Development Program Manager

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

N/A

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

N/A

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

N/A

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Mike Pfeffer	Chief Executive Officer	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Ex. 6 - Personal Privacy (PP)

Dear Applicant:

Based on information supplied, and assuming your operations will be as stated in your application for recognition of exemption, we have determined you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code.

We have further determined that you are not a private foundation within the meaning of section 509(a) of the Code, because you are an organization described in section 509(a)(1) and 170(b)(1)(A)(vi).

If your sources of support, or your purposes, character, or method of operation change, please let us know so we can consider the effect of the change on your exempt status and foundation status. Also, you should inform us of all changes in your name or address.

As of January 1, 1984, you are liable for taxes under the Federal Insurance Contributions Act (social security taxes) on remuneration of $100 or more you pay to each of your employees during a calendar year. You are not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Since you are not a private foundation, you are not subject to the excise taxes under Chapter 42 of the Code. However, you are not automatically exempt from other Federal excise taxes. If you have any questions about excise, employment, or other Federal taxes, please let us know.

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

The box checked in the heading of this letter shows whether you must file Form 990, Return of Organization Exempt from Income Tax. If Yes is checked, you are required to file Form 990 only if your gross receipts each year are normally more than $25,000. If a return is required, it must be filed by the 15th day of the fifth month after the end of your annual accounting period. The law imposes a penalty of $10 a day, up to a maximum of $5,000, when a return is filed late, unless there is reasonable cause for the delay.

(over)

You are not required to file Federal income tax return unless you are subject to the tax on unrelated business income under section 511 of the Code. If you are subject to this tax, you must file an income tax return on Form 990-T, Exempt Organization Business Income Tax Return. In this letter, we are not determining whether any of your present or proposed activities are unrelated trade or business as defined in section 513 of the Code.

You need an employer identification number even if you have no employees. If an employer identification number was not entered on your application, a number will be assigned to you and you will be advised of it. Please use that number on all returns you file and in all correspondence with the Internal Revenue Service.

Because this letter could help resolve any questions about your exempt status and foundation status, you should keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown in the heading of this letter.

Sincerely yours,

District Director

The effective date of exempt status under section 501(c)(3) is October 15, 1984, the date your application was received and your operations conform to the requirements of this section. Exemption under section 501(c)(4) remains in effect for periods prior to the effective date of this letter.

About:

Community minded, capable, and consistent at navigating critical and complex projects and programs, I am a team-oriented leader that takes time to build trusting relationships, share successes, and learn from challenges.

Education:

Bachelor of Arts, Business Administration, University of Washington – Seattle, WA. 2007

Employment History:

2014 – present	*Project Manager- Economic*	Kodiak Area Native Association, Kodiak, AK
2007-2013	*Operations Manager*	Iron Mountain, Everett, WA
2000-2007	*Vice President, Seattle Operations*	TrashBusters Rubbish Company, Seattle, WA
1999	*Operations Manager*	TrashBusters Rubbish Company, Seattle, WA

Qualifications:

Economic Development and Environmental Program Development:

- Experienced at identification, application, budget creation, implementation, management, and report compliance of grant funding across range of agencies: BIA, USDA, DOE, EPA, and NGOs
- Strategic thinker with ability to identify big picture concepts and connect to implementation
- Ability to identify and create strategic partnerships and collaborative relationships
- Manage the Comprehensive Economic Development Strategy (CEDS) for Kodiak Rural Region
- Establish and enhance the Environmental Programs at KANA to build capacity and address pressing environmental issues across the Kodiak region
- Recognized as a Regional Energy champion for village communities in the Kodiak region; service on the Kodiak Electric Association Board of Directors imparts energy industry network enhancement
- Founding Board member for Kodiak Harvest Food Cooperative, establishing community based economic development opportunities for agriculture and seafood producers and improve regional food security

Management & Operations:

- Program Management and Development: manage numerous grant and project budgets ranging from $10,000 to over $1.5M, with varied timelines, stakeholders, deliverables, and complexity; demonstrated ability to enhance programs and services through competitive grant funding
- Project Management: facility upgrades, energy infrastructure projects, facility and fleet vehicle preventive maintenance programs
- Business strategy development, process improvement, productivity management and training
- Front-line leadership, management, and coaching for exempt and non-exempt employees with teams as large as 30 across multiple locations
- Experienced liaison through functional areas of customer service, account management, operations; built collaborative solutions to improve customer service and increase revenue
- Budget development and financial analysis: fiscal evaluation and forecasting for all phases of business; identify areas of and implementation of expense reductions, pricing structure development
- HR Management: Recruitment, development, and retention of frontline staff and administrative personnel. Staff training, mentoring, recognition, progressive counseling, and termination as needed

Leadership:

- Strategic communication skills through multiple mediums and audience sizes
- Team-oriented with a commitment to balance, respect, and equity; have focus on building committed workforce that accomplishes more as teams than as individuals
- Experienced with diverse work environments
- Discreet, organized, self-motivated; natural leadership abilities

PROFILE

I am currently working for a non-profit organization in the Environmental and Economic Department, assisting a consortium of 10 Tribes in achieving their environmental goals and priorities along with finding opportunities of economic development in many of the rural villages.

My professional work experience has also included grant writing and grant management. Since 2020 I have had helped write ten grants, managing three which have focused on water quality monitoring, climate change, and food security.

Both my personal and professional passions revolve around encouraging a sustainable lifestyle and improving the health and wellness of both people and their environment.

HELPFUL EXPERIENCE

- CAD
- ARCPRO
- TIP OF THE MITT WATERSHED COURSE
- INVASIVE SPECIES CONTROL IN NATIONAL PARKS

WORK EXPERIENCE

Kodiak Area Native Association

Environmental & Economic Development Specialist

November 2020 – Present

Being hired on as an Environmental Technician, I initially gained field experience sampling and monitoring for harmful algal blooms, paralytic shellfish poisoning, and ocean acidification. I can now say I have expanded upon that by coordinating a Tribal sampling network. In addition to water quality monitoring (both marine and freshwater), I am working on a climate adaptation plan for Kodiak Island Tribes and have assisted with the Kodiak Rural Regional Comprehensive Economic Development Strategies document.

Road Commission for Oakland County

Geographic Information Systems Intern

May 2020 – August 2020

Interning for the Planning and Environmental Concerns Department as a GIS Tech, I gained lots of great field experience for both GIS and environmental consulting demonstrating some of the following tasks:

ArcCollector data collection on storm drainage systems

ArcPro digitizing

Creating department maps on environmental concerns

Chemical Inventory and other “Good Housekeeping” measures

EDUCATION

Central Michigan University

2017-2020

I graduated with a B.S. in Environmental Studies, GIS and Cartographic Design. I proudly held a [redacted] GPA and had the honor of making the Dean’s List while enrolled.

Boyne City High School

2013-2017

I graduated with Cum Laude honors, maintaining a [redacted] GPA throughout High School. I was also dual enrolled at North Central Community College, where I completed 22 college credits before graduating in 2017.

Central Michigan University Residence Life

April 2018 – April 2020

Starting as a Front Desk Manager, I managed 20+ employees during the school year which included scheduling, approving timecards, and holding both personal and team meetings in addition to basic customer service and office-based skills. I was then promoted to holding a position as a Resident Assistant where I worked to create a welcoming community with successful students where I proudly ran community events and was able to partake in other organizations, such as Hall Council.

Boyne Mountain Resorts

Adventure Guide

May 2019 – November 2019

At the Boyne Mountain Adventure Center I have been trained in a wide variety of different jobs which include:

Zipline Guide; Segway Guide; Desk Attendant; Chairlift Operator

Dockhand at The Harborage Marina

June 2015 – August 2018

This job required both manual labor and customer service skills on a full-time basis over the summer months performing the following:

Yardwork

Cleaning

Maintenance

Docking boats and filling them with fuel

Cash handling and other office tasks

VOLUNTEERING & EXTRA CURRICULAR

March 29, 2023

RE: Letter of Commitment for Kodiak Area Native Association to the FY23 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Application

Dear Mr. Burney,

The Alutiiq Museum and Archaeological Repository is submitting this letter of Commitment to support the Kodiak Area Native Association's FY23 Environmental Justice Grant proposal, *Kodiak Tribal Food Security and Economic Stability Initiative.* The Alutiiq Museum is a public non-profit governed by the Alutiiq Heritage Foundation whose board of directors are composed of representatives from eight Alaska Native organizations from the Kodiak Archipelago. We are a cultural center and archaeological repository whose mission is to preserve and share the heritage and living culture of the Alutiiq people. Accredited by the American Alliance of Museums, we develop and share educational and language resources, lead programs, and archive documentation and objects for future generations. Our outreach is primarily focused in the City of Kodiak and the six rural communities in the Kodiak Archipelago, although we also strive to share resources that serve the Alutiiq diaspora and anyone interested in Alutiiq history and culture.

The Alutiiq Museum understands that this proposed project will identify key subsistence resources in the Kodiak region and consider how climate change may impact their availability. We further understand that the study will consider both wild and garden foods, involve community members in sharing their knowledge, and provide opportunities for public education around food harvesting and preparation. This is an important project, one that will help our rural communities consider the long-term accessibility of essential foods. The Alutiiq Museum would be pleased to commit to the following:

The Alutiiq Museum will support research, educational outreach, project promotion, and the preservation of project records. First, members of our staff will assist in locating source materials on subsistence activities in our library and archives. Second, we will work with KANA to develop a traveling educational box on gardening for use in Kodiak classrooms. This box will be modeled after other boxes in our mobile series. Third, we will assist with project promotion. We will share project news and events you provide through our social media sites, monthly email broadcast, and newsletter. Finally, we will create a formal archive of project documents. KANA will provide us with the materials they wish to preserve (e.g., photos, reports, presentations, recordings, transcripts, etc.). We will inventory these materials, accession them to the museum's permanent collection, create a finding aid describing the archive's contents, back up the records on our internal and cloud servers for secure, long- term storage. This will create a collection available to researchers by appointment.

For these services, we respectfully request $10,039 as follows: Personnel (including wages & fringe benefits) = $7,551; Supplies = $1,075; Contracts (a teacher to write a lesson plan) = $500, and 10% overhead

= $913. Please note, this quote is provided at the preferred rate offered to our founding and sustaining Alutiiq organizations.

As an in-kind contribution to the project, we would be pleased to help connect KANA to the museum's existing educational resources (e.g., our mobile museum) and to offer the project a spot in our fall 2024 lecture series. A member of our staff will work with KANA to plan, advertise, and host a project presentation by a KANA staff member. As the Alutiiq Museum's facilities will be undergoing renovations, we will not be able to host the lecture in our gallery. However, we will work with KANA to pick an alternative location, such as the Kodiak Public Library.

We are excited about the opportunities this project offers for community education. Thank you for considering our FY23 Environmental Justice Grant Proposal.

Respectfully,

April G.L. Counceller, Ph.D.

RE: Letter of Commitment for Kodiak Area Native Association (KANA) to the FY23 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Application

Dear Mr. Burney,

The Division of Subsistence at the Alaska Department of Fish and Game is submitting this letter of Commitment to support its FY23 Environmental Justice Grant proposal, Kodiak Tribal Food Security and Economic Stability Initiative.

The Alaska Department of Fish and Game (ADF&G), Division of Subsistence, recognizes the unique challenges brought on by changes in the climate, and the potential impacts to food resources and Tribal members residing in Kodiak. The division scientifically gathers, quantifies, evaluates, and reports on the customary and traditional uses of Alaska's fish and wildlife resources, including the critical role that locally harvest foods play in regional food security. Understanding how Kodiak's wild and locally grown foods will be impacted by climate change is not only important to food security in the region but the nutritional, cultural, economic and spiritual well-being of Kodiak Tribes. The ADF&G Division of Subsistence supports the need for continued access to subsistence and locally grown foods, and exploration of climate change impacts so Kodiak communities and tribes can ensure reliable and available food sources into the future. This project would enable the division to help communities utilize existing data, and understand trends over time.

The Division of Subsistence is committing to the project through 0.5 months for a Research Analyst IV time to analyze existing data, 0.6 months for a Subsistence Resource Specialist III to interpret data and produce a written summary, and 0.1 months for a Publications Technician II to edit the final product at a total cost of $20,771 ($16,641 staff time and $4,130 indirect costs at a rate of 24.82%). The division will collaborate with KANA to analyze five decades of subsistence harvest and use data from the Kodiak communities of Port Lions, Ouzinkie, Larsen Bay, Karluk, Akhiok, Old Harbor, and Kodiak City. This household-level analysis will study trends in key subsistence species and changes in resource use patters. The division will work closely with KANA staff to produce clear and direct data summaries that can be distributed to Tribal members and other members of the public. These data will help inform future research and regulatory decisions.

Thank you for considering our FY23 Environmental Justice Grant Proposal .

Respectfully,

Jacqueline Keating

RE: Letter of Commitment for Kodiak Area Native Association "KANA"

Dear Mr Burney,

Thank you for this opportunity to support KANA in their application for the FY 23 Environmental Justice Grant Proposal-Kodiak Tribal Food Security and Economic Stability Initiative.

NVA is a federally recognized tribe and is governed by a seven-member council. Our council is directed by a constitution and governance policies which direct their decision making for the Tribe. Meetings are held monthly and open to the public.

Since 1998 NVA has successfully facilitated cultural immersion camps for youth on our traditional land on Afognak Island. Although our camp is remote and sometimes difficult to get to from Kodiak, we have found that offering youth the opportunity to learn in the ultimate outdoor classroom has been a very effective way to pass on our traditions.

In the 2023 summer season, we will hold six youth and family camps. Throughout the camps youth and families will participate in activities designed to instill pride in our culture, learn and practice our language, foster a sense of community, build healthy relationships, and provide them with tools to avoid self-destructive behaviors and learn to make positive choices.

Within the last few years like many communities Kodiak has seen a surge in the price of food-but we feel that the real importance is teaching our children how to be self-sufficient; teaching them how to grow their own food; only take what they need; and of course, traditional harvesting practices.

115 Mill Bay Road ✲ Kodiak, AK 99615 ✲ phone Ex. 6 - Personal Privacy (PP) ✲ fax Ex. 6 Personal Privacy (PP)
Ex. 6 Personal Privacy (PP)

NVA and KANA have a history of working together successfully at Dig Afognak, Community Forums, and Cultural Events. NVA is committed to partnering with KANA to host at least one plant walk and/or workshop with an Alutiiq Plant Lore Culture Bearer who would share methods of local food growing and harvesting; processing, and preservation methods with youth and camp attendees. Additionally, we will have a staff member attend the food security workshop to participate in the development of a food systems vulnerability assessment and provide further feedback on how food security can be improved in Kodiak and the surrounding villages.

Thank you for considering KANA's application for the FY 23 Environmental Justice Grant.

Sincerely,

Taletha Gertz

RE: Letter of Commitment for Kodiak Area Native Association (KANA) to the FY23 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Application

Dear Mr. Burney,

Larsen Bay Tribal Council is submitting this letter of Commitment to support its FY23 Environmental Justice Grant proposal, *Kodiak Tribal Food Security and Economic Stability Initiative.*

Larsen Bay Tribal Council is the recognized Tribal governing body of the Native Village of Larsen Bay a Tribe federally recognized by the United States.

Larsen Bays cultural history is that we believe it is crucial to take care and subsist off the lands we live on. Our elders taught their children to take care of the lands which took care of them. We recognize that there is a gap where our children and their children are losing sight of that belief. Therefore, it is our responsibility as advocates and stewards to our community, to carry out our elders wishes in reclaiming these beliefs to change these ways by education and local practices and collaborating would benefit our community in sharing with other villages knowledge that has been passed down to each other.

The Native Village of Larsen Bay is committed to working with KANA to host at least one plant walk and/or workshop with Alutiiq Plant Lore Culture Bearer, Gayla Pedersen, in the Native Village of Larsen Bay. This educational event will share methods of local food growing/harvesting, processing, and preservation methods with Tribal members and youth. Additionally, we will have a staff member attend the food security workshop to participate in the development of a food systems vulnerability assessment and provide further feedback on how food security can be improved in the Kodiak Archipelago and how climate change is impacting those resources.

Thank you for considering our FY23 Environmental Justice Grant Proposal.

Respectfully,

Teresa Carlson
GAP Project Manager
Larsen Bay

Work Plan

1.0 Program Objectives

a. Project Summary Page

Project Title: Kodiak Tribal Food Security and Economic Stability Initiative
Project Location: Kodiak Island, Alaska–consisting of the City of Kodiak, nearby Chiniak, as well as six predominantly Alaska Native villages: Akhiok, Karluk, Larsen Bay, Old Harbor, Ouzinkie, and Port Lions.
Applicant Information: Kodiak Area Native Association
3449 Rezanof Drive East
Kodiak, Alaska 99615
Ex. 6 - Personal Privacy (PP) | kanagrants@kodiakhealthcare.org

Description of Applicant Organization: The Kodiak Area Native Association (KANA) was formed in 1966 as a 501 (c) (3) nonprofit corporation to provide health and social services to the Alaska Natives on Kodiak Island, with a mission to *elevate the quality of life of the people we serve*. KANA works diligently to serve its people holistically—deploying teams that specialize in various aspects of public health, ranging from environmental monitoring to behavioral health. The Environmental and Economic Development teams are working with Tribal members and communities to adapt to a changing climate as they rely heavily on the land and water for subsistence resources, economic well-being, and human health.

Project Abstract: KANA proposes to support the development of the Kodiak Food Systems Vulnerability Assessment (KFSVA), a vulnerability assessment on both subsistence and locally grown food in Kodiak. Understanding how foods in the region will be impacted by climate change is important to understanding how the health of Alaska Natives, our wildlife, and our traditional homelands will be impacted. We will explore the importance of subsistence and locally grown foods on the island, how they're harvested and processed, how they are utilized for nutrition, their place regarding economic stability, and their cultural and spiritual significance to the holistic wellness of our people. KANA will work with Kodiak Tribes, local experts, and organizations to identify and prioritize vulnerabilities to both subsistence and locally grown foods in the region. We will then use the information gathered to assess which foods are most vulnerable to climate change and which will have the most significant impacts on overall health and well-being in the community, if they are made less available, as a result of the climate crisis.

KANA also proposes to address challenges frequently expressed by Tribes and small municipal governments in the Kodiak region in accessing crucial resources intended to enhance resilience, improve the economy, and replace aging infrastructure, by hiring additional staff to provide technical assistance and support to the ten Tribes and five small municipal governments in the Kodiak Archipelago, and build their capacity to thrive.

KANA will address these concerns using the One Health concept, recognizing the interdependence of human, animal, and environmental health as one singular health system. The Environmental and Economic Development Departments will work together to partner with other internal departments (i.e. Workforce Development, Elder Services, Prevention, etc.), as well as with local agencies to ensure that we are taking an effective, knowledgeable, and multi-pronged approach to addressing environmental justice issues in our region. The enclosed "Letter of Commitment" further delineates the organization-wide approach to this model.

Project Type: Assessment and Training

ED_016126_00000438-00001

Special Considerations: Climate Change/Resiliency and Rural Areas

Environmental Issue: Climate Change and Food Security

List of Project Partners: Sun'aq Tribe of Kodiak (Tribe), Alutiiq Museum (business/industry), Kodiak Harvest Food Cooperative (business/industry),Sea Grant Alaska (academic), Gayla Peterson- Local Expert (business/industry), Alaska Department of Fish and Game- Division of Subsistence (Federal), Native Village of Afognak (Tribe), Kodiak Archipelago Leadership Institute(business/industry), Native Village of Larsen Bay (Tribe).

QAPP: This project will not need a Quality Assurance Project Plan. If funded, KANA and our partners will not be collecting environmental data, only requesting opinions and feedback from community members through the survey, which is more like a questionnaire. Opinions about food consumption and growth capacity will be documented in a final report, and complimented by existing knowledge. As defined by the EPA, *"Environmental data are any measurements or information that describe environmental processes, location, or conditions; ecological or health effects and consequences; or the performance of environmental technology. Environmental data include information collected directly from measurements, produced from models, and compiled from other sources, such as databases or literature."* Because we will be gathering feedback from Tribal members and collaborating with experts on the matter to compile our findings, we do not find the proposed project to require a QAPP. Nevertheless, we are happy to complete one, upon request.

b. Environmental and Public Health Information of the Underserved Community

Kodiak Island is a 100-mile-long strip of land on the south-central coast of Alaska, separated from the Alaska mainland by the roughly 30-mile-wide Shelikof Strait. The island encompasses approximately 3,600 square miles and is home to the City of Kodiak, as well as six predominantly Alaska Native villages: Akhiok, Karluk, Larsen Bay, Old Harbor, Ouzinkie, and Port Lions. The Kodiak Archipelago has been occupied for over 7,500 years and is the traditional land of the Sugpiaq (Alutiiq) people.

Kodiak Island is home to eight communities: the City of Kodiak, and the remote communities of Akhiok, Karluk, Larsen Bay, Old Harbor, Ouzinkie, Port Lions, and Chiniak. Within these eight communities, Kodiak Island is home to ten federally recognized Tribes: the Native Village of Afognak, Sun'aq Tribe of Kodiak, and Tangirnaq Native Village are based within the City of Kodiak. Alutiiq Tribe of Old Harbor, Kaguyak Village, Native Village of Akhiok, Karluk IRA Traditional Tribal Council, Native Village of Larsen Bay, Native Village of Ouzinkie, and Native Village of Port Lions are located in the six remote villages of Kodiak. There are no roads connecting the hub city of Kodiak with the outlying villages, with the exception of Chiniak. Village residents rely on transportation by boat or commercial airlines for travel in and out of their communities.

The Alutiiq, or Sugpiaq people, have inhabited their ancestral homelands for approximately 10,000 years and include four main subsets: Prince William Sound, the lower Kenai Peninsula, the Alaska Peninsula, and the Kodiak Archipelago. Like hundreds of similar Alutiiq settlements along the Gulf of Alaska, the people of the Kodiak Archipelago were skilled mariners who depended on the sea for the necessities of life. Kodiak tribal members and communities continue to rely on the land and water for subsistence resources, economic well-being, and human health and welfare.

The population of the Kodiak Island Borough, according to 2021 estimates from the census bureau, is 12,864, including the outlying villages. The total population of the Kodiak Archipelago villages is 782. Accumulatively, the village populations were 74% Alaskan Native/American Indian, 18% Caucasian, 6% two or more races, 2% Hispanic, and less than 1% of both

ED_016126_00000438-00002

Asian/Pacific Islander and African American. According to EPA's EJSCREEN tool, there are three groups of socioeconomic indicators around the island. The further away from the City of Kodiak the more communities have increased health disparities and are underserved, low income, and critical service gaps increase. For instance, the City of Kodiak and Chiniak are in the 32nd percentile of low-income with an unemployment rate in the 60th percentile, while the region that includes, Larsen Bay, Ahkiok, Karluk, and Old Harbor is in the 89th percentile for low-income and has a 96 percent unemployment rate.

Kodiak Tribes' priorities and concerns they experience from climate change are specific to their geographic area; they need to be addressed to create resilience and plan to adapt to the changing climate. Climate changes that many Alaskans are experiencing firsthand are earlier spring snowmelt, reduced sea ice, widespread glacial retreat, warmer permafrost, drier landscape, and changing ocean chemistry. In the past 60 years, Alaska has warmed twice as fast as the continental United States. Alaska's statewide average annual air temperature has increased by 3°F and average winter temperature by 6°F, with substantial year-to-year and regional variability. Alaska's annual average temperature is projected to rise an additional 2°F to 4°F by 2050. As carbon emissions rise, Alaska will continue to see an atmospheric temperature rise. (Chaplin, F.S. et al., 2014.). How foods in our region are gathered, produced, distributed, and consumed will be directly impacted by the accelerating effects due to climate change.

Alaska Native communities are being disproportionately affected by climate change while making limited contributions to climate change itself. Kodiak Tribes are seeing intense changes to the food system that they have successfully relied on for thousands of years, resulting in impacts to human health (physically, mentally, and spiritually), culture, and livelihoods. Adapting to the effects of climate change is a key priority of Tribes in the region as it is actively affecting all aspects of their health.

Tribes and communities on Kodiak are experiencing a compounding of environmental justice concerns. They are overburdened and disproportionately impacted by environmental and socio-economic stressors. Due to the remote nature of these communities, the lack of infrastructure there may act cumulatively to affect health and the environment. Furthermore, Kodiak Tribes and small municipal governments frequently express frustration with their challenges in accessing crucial resources intended to enhance resilience, improve the economy, and replace aging infrastructure. Issues like lack of capacity, time, experience, and internet connectivity are among the top challenges. According to EPA's EJSCREEN tool, the City and Kodiak have no broadband gaps, however, households outside this zone on the island fall within the 80-95% limited broadband category. Further frustration is expressed when funding is received by a Tribe of municipal government in complying with funding requirements (record keeping, reporting, compliance).

Kodiak Tribes have initiated conversations that highlight these issues and concerns with KANA and local experts in 2018. This project will consider both wild and locally grown foods, involve community members in sharing their knowledge, Indigenous and Traditional Knowledge (ITEK), and provide opportunities for public education around food harvesting and preparation. Understanding how our foods will be impacted by climate change and adapting to the effects and changes is a key priority of all Tribes in the region; as it will help the Kodiak rural community consider the long-term accessibility of essential foods.

This project seeks to address climate adaptation/resilience in rural communities along the Kodiak Archipelago. Through the creation of the KFSVA using the One Health concept, we will aim to better understand the connections between our foods, changing climate, local environmental

ED_016126_00000438-00003

impacts, and related health effects. There will be a holistic approach throughout the planning process to integrate cultural values and capture key insights through the inclusion of traditional knowledge, review unified data for the Kodiak region, and assess vulnerable food resources. Underserved communities along the Kodiak Archipelago will benefit from these results by having increased centralized knowledge about vulnerable foods and adaptation strategies to increase food resilience. Furthermore, Tribes and communities can then use this tool to leverage additional funding or resources and increased support and knowledge on how to apply for funding to support projects that will continue to increase their climate resilience. If funded, the creation of the Kodiak Regional Capacity Development Coordinator, KANA will have the capacity to support these future applications.

Lastly, it's essential to note the existing health disparities afflicting our Alaska Native communities. Current health crises include type 2 diabetes, hypertension, and obesity, all of which can be resolved, in part, by a healthier environment and more reliable healthy food systems. The percentage of Alaskan Native/American Indian (AN/AI) adults diagnosed with diabetes was higher than for people of other races/ethnicities, with additional data from the Department of Health and Human Services noting that "American Indian/Alaska Native adolescents are 30 percent more likely than non-Hispanic white adolescents to be obese. American Indian or Alaska Native adults are 50 percent more likely to be obese than non-Hispanic whites."[1] Similarly, the Indian Health Service notes that "The American Indian and Alaska Native people have long experienced lower health status when compared with other Americans. Lower life expectancy and the disproportionate disease burden…are the broad quality of life issues rooted in economic adversity and poor social conditions."[2]

Local data from the Kodiak region points to these broader trends among AN/AI populations. For example, an assessment of students in grades K-7 and 9 in the 2017-2018 academic year found that 19.2% of students were overweight, 21.4% were obese, and 8% were severely obese[3]. This report also found that "At least 18% of students were obese in all grades sampled…the percentage of students either overweight or obese was highest amongst 4th-grade students, as was the prevalence of obesity alone." Broken down by race/ethnicity, it was found that 53.3% of AN/AI students were overweight or obese, compared to only 31% of White students, and obesity rates were much higher among students identified as low socioeconomic status than their counterparts (25.1% vs. 16.0%).

In addition, Kodiak's adult population is also in a precarious situation. The 2019 Providence Community Health Needs Assessment found that 65% of respondents were overweight or obese based on BMI calculations, with 39% reporting they engaged in less than 3 days of physical activity in a given week.[4] Trendline data provided in this assessment also noted that obesity rates in Kodiak have increased from 27% to 33% since 2010, outpacing both the State of Alaska average and the national average. As we believe that healthy people live in healthy communities, we are requesting your support in combating these disparities through the One Health model.

c. Organization's Historical Connection to Underserved Community & Community-Driven Participation

The Economic Development department at KANA created the foundation for work in the environmental field with the vision that "*Healthy people live in healthy communities*". In 2018, KANA received EPA Indian General Assistance Program funds to establish an Environmental Department and Regional Environmental Consortium to increase local administrative, programmatic, and communications capabilities, and to build the tribal environmental programs' communications, solid waste management, water quality monitoring, and subsistence protection programs. Our regional consortium is made up of all ten federally-recognized tribes in the Kodiak Archipelago.

When the consortia formed, these village communities and tribes were independently working on a wide variety of environmental protection activities, including solid and hazardous waste management, environmental observations TEK, water temperature monitoring, and education and outreach. Through the consortium, we have been able to identify overlapping or common priorities of all the tribes. This allows KANA to identify and prioritize our focus areas, and serve our Tribes, effectively. For the last four years, KANA, in collaboration with consortium tribes, has been actively working on some of our region's top environmental priorities identified by the tribes, including ocean chemistry monitoring (dissolved inorganic compounds or ocean acidification), harmful algal blooms monitoring, and solid and hazardous waste management, as these were identified as environmental priorities.

In this short four-year period, KANA has been able to increase program capacity by bringing in additional grant funds and building partnerships. Our environmental department is currently funded and supported by the EPA Indian Environmental General Assistance Program (IGAP), EPA Hazardous Waste Management, Bureau of Indian Affairs Tribal Resilience Funding, and The Office of Lisa Murkowski. In addition to our funders, we have a large network of collaborators and partners with whom we work.

In 2017 KANA received funding to evaluate Kodiak's food sovereignty and make recommendations to increase it. KANA contracted with consultant Rachel Miller. The findings were that food is expensive, it's not impossible to increase growth and food production, animal and animal byproduct production is happening, and shipping rates to rural communities are really expensive and must become more economical or less necessary.

In October 2019, a resilience workshop co-facilitated by Alaska Sea Grant and KANA; Adapt Kodiak, brought together Kodiak Tribal members, residents, local governments, and business representatives to discuss climate-influenced challenges Kodiak Island is facing and may face. There were four areas of focus identified for the workshop: Fisheries Futures; Food Security and Subsistence; Infrastructure and Energy; and Cultural and Wellness. The event aimed to begin a conversation about climate change and resiliency in the region and identified vulnerabilities. Federal and state agencies, private industries, and Tribal members were present and participated in the two-day workshop. Information and data collected can be found on adaptalaska.org.

Because Adapt Kodiak was so well-received, in 2020, KANA, consortium tribes were awarded BIA TRCP funds to help organize and fund the next step of Adapt Kodiak—the Adapt Kodiak: Tribal Climate Adaptation workshop. This climate adaptation workshop is scheduled to take place in the fall of 2022 and will be tribal-focused, assisting tribes with climate risk assessment and planning for the future. The overall product of the two-day workshop will be developing a Kodiak Tribal Climate Adaptation Plan specific to tribes and their communities. This document will include climate hazards for Kodiak Tribes, assess vulnerabilities of key concerns

ED_016126_00000438-00005

identified by tribal members, outline climate change data sets and monitoring efforts, and review ways to reduce climate-related risks. KANA will develop a Kodiak Tribal Climate Adaptation Template, which is a version of the Plan that Tribes can easily adjust to meet their unique needs.

Since food security is a shared concern of the region, there has been a local movement among individuals and entities on the island around securing locally grown foods, harvesting programs, and new ideas on how to cut out the large dependence on off-island sourced foods. However, those conducting this work have identified gaps that we have identified in this proposal. In addition, not a lot of work has been done focusing on the assessment of just how vulnerable our local food sources are to the effects of climate change as well as outlining adaptation strategies so we can increase our resiliency.

If funded, this project would be the next step in our efforts of climate adaptation planning through tribal and community-driven participation. The overwhelming feedback from the climate adaptation planning process has pointed to the direction of food security and limited resources to apply for and maintain funding to support infrastructure, climate resilience, and general environmental work along the Archipelago. The proposed workshop and steering committee would bring together local businesses, industry, local governments, Tribes academia, and medical service providers to develop solutions to food security and economic stability that one entity cannot tackle on its own.

This project is centered around decision action. It will be tribally focused and lead with input from local, state, and federal stakeholders to create a holistic approach to human, animal, and environmental health.

d. EJCPS Model

The project supports EPA Strategic Plan Goal 2, objective 2.1 to Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels because food security and response capacity are environmental justice issues. Lack of adequate and healthy food not only has health impacts but cultural, wellness, economic, and environmental justice impacts along the Kodiak Archipelago. The lack of capacity to apply for, manage, and receive funding to support rural communities is also an environmental justice and civil rights issue this project seeks to address.

e. Project Linkages

This project supports the aforementioned as it's centralized around seeking feedback and comment from the public. The information gained will provide capacity-building resources (through the KFSVA and Kodiak Regional Capacity Development Coordinator) to address environmental justice concerns in the region and support Tribes' and communities' ability to meaningfully engage and provide feedback. communities along the Kodiak Archipelago are disproportionately impacted by climate change, food security, and capacity support. This project seeks to address these disproportionate impacts.

f. Partner Collaboration

Since the development of KANA's Environmental and Economic Development Departments, we have created a large network of partners and stakeholders. Including but not limited to: Alaska Sea Grant, Sitka Tribe of Alaska, Southeast Alaska Tribal Ocean Research (SEATOR), NOAA- Kodiak, NOAA Beaufort, Adapt Alaska, USDA, Local Environmental Observer (LEO) Network, Haikai Institute, Alaska Harmful Algal Bloom Network Steering Committee Member, and AOOS network member. The diversity of our letters of commitment and project partners speaks to the diversity of input and support we already have for this project. We will not limit or exclude other partnerships, especially local tribes or indigenous individuals or

ED_016126_00000438-00006

entities that want to be involved in any capacity. We have worked diligently to fairly solicit the best partners and experts for work under this grant.

If funded, we will work to strengthen leadership within the region for addressing climate challenges as a priority. We will be able to create a space for tribal members to not only discuss climate adaptation planning but a space for storytelling, healing, and sharing. Because the documentation and process are Tribal led, members will gain leadership skills through increased knowledge, awareness, and critical thinking about climate change impacts. Tribal members will use technical assistance (TA) and skills to motivate others. Tribal members to work on climate change issues, which will lead to increased community planning skills.

These grant funds will also go towards supporting a training/learning opportunity and help strengthen tribal relationships between KANA's environmental staff and tribal members. These funds will support a large Kodiak Tribal Food Security and Economic Stability Workshop in Kodiak in the Fall of year one. We have funding to bring in Tribal and project partners to Kodiak for a two-day workshop.

On day one of the workshop, Alaska Sea Grant's Davin Holen will guide the discussion and provide expertise in talks with local Tribes. This facet of the workshop will focus on the KFSVA, gaining insight and knowledge from stakeholders. KANA staff will attend, take notes, and document discussion topics to put them into the KFSVA document that will be disturbed at the end of the project. Day two of the workshop, however, will consist of a grants symposium that will advance Tribes' understandings of how to pursue and execute supportive, culturally-conscious funding opportunities. This piece of workshop will likely be led by the KANA Grants Department.

Funding will also support our staff to travel out to each community once per year to gain knowledge and strengthen relationships, attend the bi-annual One Health Training in Fairbanks in year two, or train in the state of Alaska where she can learn more and share from their experiences. This will also fund the environmental team to get to all six of the villages located on Kodiak to hold community meetings, bolster relationships, gather information on resource use, TK and food system knowledge, conduct in-person surveys, and do community outreach and education.

Recently there have been many organizations working to increase access and production of locally grown foods on the Island. One of the efforts is the Kodiak Harvest Food Co-op, a grassroots startup with the mission to "provide Kodiak communities with quality food choices that are locally sourced, economically sustainable, and environmentally responsible while promoting education and engagement." (Kodiak Harvest Food Co-Op, 2022). There is also a large effort to support the village and tribal farms around Kodiak. Since 2014, there has been a push to provide education and technical assistance, farm development (hoop house, hydroponic, and mariculture), and building business plans specific to their demographics, location, resources, and needs.

Even though there is a lot of work being done on the island around food security, how the climate has and will impact these foods has not been addressed. There has not been a regional or collaborative effort to look at both subsistence and locally grown foods. Since we started this adaptation plan, most of the comments from Tribal members and the steering committee have been food security-related. Knowing this is a topic of major importance and concern to our region and its people, we propose to take on this topic of concern by conducting a KFSVA. The effort to fill this data gap could not be accomplished without the support and partnership from Tribes, entities, and individuals working on this, which is why we have proposed a grant that incorporates many of the entities currently working on this topic.

The work proposed will be a collaborative effort with our committed partners:

Funder Partners:

ED_016126_00000438-00007

- The Alutiiq Museum will support research, education outreach and project promotion and the preservation of the project records. Museum staff will assist in sourcing materials on subsistence activities, develop a traveling education box on gardening for use in Kodiak classrooms and share project news and events through their social media and marketing channels. They will also create a formal archive of the project documents to preserve project findings and documentation. The Alutiiq Museum will support research, educational outreach, project promotion, and the preservation of project records. They will work closely with KANA and teachers from the Kodiak Island Borough School district to create a traveling educational box on climate adaptation, growing, and harvesting for classrooms of all ages. Their cost for work under this project will be $10,591.
- Local Expert, Gayla Pederson, will collaborate and assist KANA with providing and gathering local Traditional Ecological knowledge based on my experience and interviews with others. She will also assist with creating educational content about harvesting and processing subsistence foods from Kodiak. Her expertise and work will cost $14,440.
- Alaska Department of Fish and Game (ADFG), Division of Subsistence, will conduct a Subsistence Survey to quantify the use of subsistence foods on the island. The data is used to inform education and policy. However, no longitudinal assessments of the data have been done. If funded, in Year 2, the Alaska Department of Fish and Game, Division of Subsistence, will analyze five decades of existing subsistence harvest and use data from the Kodiak communities and Kodiak City, helping us translate important and notable trends. Following similar work conducted on communities in Prince William Sound (http://www.adfg.alaska.gov/techpap/TP471.pdf), this household-level analysis will focus on trends in key subsistence species, and changes in resource use patterns. The Division will produce tables, figures, and interpretive text from these analyses, The Division will work closely with KANA staff to produce clear and digestible data summaries that can be distributed to tribal members and other members of the public. These data will help inform future research and regulatory decisions. Work conducted here will cost $20,771.
- Kodiak Archipelago Leadership Institute is a community-based, non-profit organization, based in Kodiak, Alaska. Their mission is to support the long-term sustainability of our region's coastal communities, and their Alutiiq heritage. This expert resource will support survey and outreach efforts throughout the project, which will cost $8,500.

Unfunded Partners:

- Alaska Sea Grant will provide in-kind support through staff time (Davin Holen, Associate Professor and Coastal Community Resilience Specialist) and travel funding to facilitate the food system vulnerability assessment workshop in Kodiak in year one of the proposed project. Alaska Sea Grant will guide the discussion, provide expertise, and assist with outreach throughout the project period.
- Kodiak Food Cooperative will participate in the workshops and events that are components of the proposed project and identify important subsistence resources and locally grown foods. The co-op will also work with KANA and Kodiak Tribes to host educational events in our space on local food growing, processing, and preservation methods. Their participation in the Food System Vulnerability assessment
- Native Village of Afognak is committed to partnering with KANA to host at least one plant walk and/or workshop with our Local Expert who will share methods of local food growing and harvesting; processing, and preservation methods with youth and camp attendees. They will also have one staff member attend the workshop to participate in the development of

ED_016126_00000438-00008

the food system vulnerability assessment and provide further feedback on how food security can be improved in Kodiak and the communities.

- Native Village of Larsen Bay is committed to partnering with KANA to host at least one plant walk and/or workshop with our Local Expert who will share methods of local food growing and harvesting; processing, and preservation methods with youth and camp attendees. They will also have one staff member attend the workshop to participate in the development of the food system vulnerability assessment and provide further feedback on how food security can be improved in Kodiak and the communities.
- Sun'aq Tribe of Kodiak. In 2019 Sun'aq Tribe of Kodiak completed the Kodiak Tribes Seafood Consumption Assessment to assess how much seafood the Alutiiq/Sugpiaq people of the Kodiak Archipelago eat. Sun'aq Tribe of Kodiak will collaborate with KANA and ADFG to access and review the Seafood Consumption Assessment survey they sent out and help KANA develop more specific surveys to better understand residences, food courses, and key species of interest of concern. They will also work with KANA to host at least one educational and/or outreach event on food security and subsistence harvesting.
- The Environmental and Economic Development Departments will work together to partner with other departments within KANA (i.e. Workforce Development, Elder Services, Prevention, Behavioral Health, etc.), as well as with local agencies (i.e. Kodiak Harvest, Alaska Department of Fish and Game, Koniag) to ensure that we are taking an effective, knowledgeable, and multi-pronged approach.

2.0 Project Activities & Milestones

Objectives	Activities	Milestone Schedule
(1) One Health Umbrella Initiative	**Use the concept as an umbrella to join environmental, animal, and human health into a holistic view of food security and economic stability for the region.**	**Share concepts and continue to make connections** **Use EJSCREEN tool and LEO network to strengthen the connection between** **Months 1-24**
(2) Tribal Focus Group- guides the initiative	1. Creation of the steering committee	Coordinate with project partners and select steering committee members. Months 1-3 Meet regularly to ensure the project is driven by tribal voices and guide the project. Months 1-24
(3) Locally Grown and Subsistence Harvested Foods Vulnerability Assessment	1. Assess Climate Change impacts on foods 2. Traditional knowledge integration 3. Local grower and harvester engagement	Gather feedback and create a food survey for locally-grown foods Gather Local, State, and Traditional Climate Change/Adaptation Data Gather Local, State, and Traditional Food Systems Data

ED_016126_00000438-00009

		Assess existing subsistence survey from ADF&G for missing data and information; Months 1-3 Work with project partners to create and distribute the survey Months 4-9
(4) Increased Partnerships and Communication	1. KANA Internal Program Engagement 2. Outreach and Communication	Host the workshop for food security and economic stability in the City of Kodiak and stream virtually. Month 10 KANA staff receive training (travel) and travel out to villages with local experts. Months 1-24 KANA staff meet with internal staff to learn about the program and better integrate environmental, and economic goals into other programs Coordinate with the Alutiiq Museum for their traveling toolbox and resources. Months 4-10 KANA staff and Local Expert host local workshops & travel out to the villages to conduct workshops with the education boxes (to camps or schools as requested); Months 10-12
(5) Tribal Community Needs Assessment and Kodiak Regional Capacity Development Coordinator	1. Improve economic opportunity and stability in the region 2. Conduct a needs assessment to better serve Tribes and Communities	Hire Kodiak Regional Capacity Development Coordinator Months 1-6 Written needs assessment, conversations with Tribal members, and travel in year 1 to gather feedback on needs Months 1-12 Combine information into one document Month 23

ED_016126_00000438-00010

		Focus day two of the workshop on grant writing training and capacity building. Month 10

Outcomes:

- Host a tribal-focused workshop to provide an opportunity to further discuss and assess locally grown and substance-harvested vulnerabilities and develop adaptation goals and actions to reduce vulnerability, and increase resilience. Focus day two of the workshop on a grants symposium that will advance Tribes' understandings of how to pursue and execute supportive, culturally-conscious funding opportunities.
- Increased data development and sharing through participant and community observations on the EJSCREEN tool and LEO network.
- Partner with local, state, and regional entities who have been working on food security to collaborate on projects.
- Connect adaptation activities between the different communities to increase opportunities for share resources, potential area-wide or multi-community growing/monitoring, and mitigation and adaptation activities that benefit more than one community
- Co-host workshops and events steered by Alutiiq traditional knowledge, to highlight TK and substance knowledge.
- Compile a Tribal Community Needs Assessment to better serve Tribes, communities, and municipalities in the region.
- Hire a Kodiak Regional Capacity Development Coordinator to Assist with communication and collaboration amongst local governments, Tribes, Tribal organizations, Federal and State programs/funders, and private entities within the Kodiak region and assist with applications to support environmental and economic development in the region.

The Kodiak Tribal Food Security and Economic Stability project has three main activities. All of these activities will be led by a Tribal Focus Group. This ensures the project objectives will meet the needs of the people we serve and ensures partnerships and outcomes are useful resources and will remain beneficial after the project's conclusion. KANA serves communities through a holistic approach and is proposing to address these concerns using the OneHealth concept, recognizing the interdependence of human, animal, and environmental health as one singular health system. All activities under this project will utilize the One Health initiative to make more meaningful connections between these sectors- aligning human health, environmental health, and animal health into one conversation to increase holistic wellness for the people that we serve.

The first activity KANA proposes is to support the development of the Kodiak Food Systems Vulnerability Assessment. We are proposing to conduct a vulnerability assessment on both subsistence-harvested and locally-grown food in Kodiak. Understanding how our foods will be impacted by climate change is important to food security in the region. We will be exploring the importance of subsistence and native foods on the island, how they're harvested, and processed, how they are utilized for nutrition, their economic stability, and cultural and spiritual wellness.

ED_016126_00000438-00011

KANA will work with Kodiak Tribes, local experts, organizations, and agencies to identify and prioritize vulnerabilities to both subsistence and locally grown foods in our region. We will then use the information gathered and assess their vulnerabilities to climate change and projected impacts. Through the KFSVA we will determine which foods have the highest probability of impact and outline resilience strategies to give a better depth of knowledge to food resources in our region and better adapt to the changing climate.

KANA staff will gather feedback from previous food security work around the Island and will write an Assessment including regional climate and atmospheric data, subsistence resources and associated environmental trends, Traditional Knowledge TK observations as well as other accredited community input or regional data. We will focus on compiling key foods and climate change data that will help us assess the effects of climate impacts specific to our region that will help us predict what to expect and how to adapt. KANA staff will utilize the EJSCREEN tool to include demographic and environmental data to identify environmental hazards in our communities, which will be reflected in the final KFSVA document. At the workshop and throughout the planning process, KANA will utilize the EJSCREEN tool and encourage participation and community observations through the web platform: Local Environmental Observer (LEO) Network. The LEO network was developed by ANTHC and links local observers and topical experts to share unusual environmental events. Community members will have the opportunity to share their observations and describe how changes are affecting their way of life.

To gain community feedback about the important foods in the region, KANA will create and distribute a Locally Grown Foods and Grow Capacity Survey. In year 1, KANA staff will collaborate with the Sun'aq Tribe of Kodiak and ADF&G to access and review their Kodiak Tribes Seafood Consumption Assessment surveys to develop a more specific survey to help better understand how and where residents source their food and if there are any key species of interest or concern. Kodiak Community Co-op and KALI will help KANA staff craft survey questions concerning the vulnerabilities within our food systems. The survey will be distributed through social media posts, and email, and delivered to Kodiak Tribes and offices to distribute and send back. KANA staff will also travel out to the village to hold community meetings and conduct surveys, in person.

The second objective of this project is to increase meaningful partnerships and communication between KANA, state, federal and regional partners to better serve Tribes and communities along the Kodiak Archipelago. The foundation of this objective is a steering committee; comprised of at least one representative from each of the participating Kodiak Tribes. The steering committee will meet monthly and be responsible for creating an agenda and narrowing and prioritizing workshop topics. Steering committee members will assist KANA staff with gathering local TK, including background information from literature about the Alutiiq people, language, and culture. This will ensure Tribal voices are involved in the planning process for a program or project to ensure that their needs are defined adequately and addressed.

In the fall of year one, KANA will host a Food Security and Economic Stability Workshop in the city of Kodiak. The event will be open to Tribes and municipalities in the City of Kodiak and in the more rural villages. We will provide funding to bring in two representatives from each Tribe; farmers, subsistence users, or engaged in locally grown and/or harvesting practices in their community. We will invite tribes, communities, agencies, and organizations working on or interested in addressing food security issues to the conference. Zoom will be utilized for attendees to connect virtually as well. This virtual option will allow the participation of individuals who cannot or choose not to, travel. The development of successful adaptation strategies will require

an understanding of the whole system. State and federal partners will be invited to participate, as well as representatives from the City of Kodiak and Kodiak Island Borough to make connections for shared resources and future management.

On day one, Alaska Sea Grant, will guide the discussion. There will be a review dedicated to teaching attendees how to conduct a vulnerability assessment. This way, Kodiak Tribes, and residents gain the knowledge of what goes into a vulnerability assessment. Day two of the workshop, however, will consist of a grants symposium that will advance Tribes' understandings of how to pursue and execute supportive, culturally-conscious funding opportunities.

After the workshop, KANA staff will transform conversations, and interviews, identify priorities, and consolidate background research to begin developing a KFSVA and needs assessment for Kodiak Tribes and communities. The KFSVA will outline key concerns, review the workshop, climate change data sets, and monitoring efforts, and review options to reduce climate-related risks. Without understanding the impacts of climate change, Kodiak tribes cannot effectively plan for the changes and protect their resources. Through this multilayered communication process, connections will be created between Tribes and climate sciences to network and better plan for and adapt to changing climate conditions.

For subsistence-harvested foods, many tribes and organizations have been working on highlighting subsistence practices to revitalize Alutiiq harvest techniques and show the importance and dependence on subsistence sources. In 2013, the Alutiiq Museum partnered with the Kodiak Island Borough School District to create a subsistence education box that can be lent out for youth to learn about subsistence foods. They created the Wild Foods Cookbook. The museum also has five harvest videos with Gayla Pederson, Alutiiq Plant Lore Culture Bearer (Local Cultural Expert) demonstrating how to harvest, prepare, and cook with local greens. However, the museum noted a gap in knowledge about processing and preserving techniques-- "how do you get foods into a state where you can then follow a recipe." The Alutiiq Museum will support research, educational outreach, project promotion, and the preservation of project records. They will work closely with KANA and teachers from the Kodiak Island Borough School district to create a traveling educational box on climate adaptation, growing, and harvesting for classrooms of all ages. Lastly, the Museum will create a formal archive of the project documents including photos, reports, presentations, interviews, etc. The Museum will inventory the materials, access them to the museum's permanent collection, create a finding aid describing the archive's contents, and back up the records on our internal and cloud servers for secure, long-term storage. That way the collection will be available to Tribes, researchers, and residents who wish to view the information.

Travel including village site visits will be a large portion of education and outreach. The in-person connection has had the most meaningful impact. inform future research and regulatory decisions. Travel in year 1 will provide an opportunity for KANA Staff to hold community meetings or present at Tribal council meetings to gather feedback on locally grown and subsistence-harvested foods, climate concerns, and areas of interest and review grant support needs. Travel to the bi-annual One Health conference in Fairbanks and to the Annual ADF&G subsistence board meeting was set aside to further connections on the state and regional levels.

KANA will also hire a Local Expert, Gayla Peterson, as mentioned in Partnerships. The Local Expert with a wealth of plant and subsistence knowledge of our region and experience with harvesting practices would be a pillar for achieving project objectives and guiding us through this project. If funded, the Local Expert will create and conduct events and activities for the City of Kodiak and its Villages. She will help create educational content based on her experience and interview with others to support collaborations with the Kodiak Co-op, Native Village of Afognak

ED_016126_00000438-00013

and Sun'aq Tribe of Kodiak. Travel support for KANA staff and the Local Expert was put in place for travel out to the villages to participate in culture camps, and harvesting walks, engage with local growers about their needs, and discuss findings. Events will focus on sharing community member knowledge and will spread the Alutiiq knowledge, language, and practices. Examples of activities include but are not limited to connecting with participants including youth and Elders through discussions, interviews, and educational activities, plant walks to ensure the information collected through the assessment process goes back into the communities, and review or documentation of Elder Recipes. KANA staff will also present the educational boxes to engage youth (and adults) at these travel events.

To address Kodiak Tribes and small municipal governments' frustrations in their challenges in accessing crucial resources intended to enhance resilience, improve the economy, and replace aging infrastructure: activity three will be to conduct a tribal community needs assessment and increase centralized grant support through the creation of Kodiak Regional Capacity Development Coordinator.

3.0 Environmental Results

a. Logic Model. Attached

b. Performance Measurement Plan.

KANA will work with partners to gather information and ensure absolute adherence to the Performance Measurement Plan. The objective of the evaluation plan is to assess the effectiveness of activities performed under this project, as it pertains to the goal of food systems, economic stability, and environmental justice. KANA intends to utilize a combination of process and outcomes evaluations throughout the duration of the project. Process metrics will primarily be focused on participation attendance, steering committee member attendance, outreach events, and survey response feedback. To measure the success of these objectives and outcomes, KANA will hold post-workshop interviews/community meetings with all participating tribes. Surveys will be distributed allowing tribes to provide honest feedback and use a number matrix to quantify our efforts and outcomes. The primary sources for process information will be participant feedback on the FSVA, Assessment, and steering committee input. This information will be stored on KANA's shared, internal network to ensure that data is centralized, secure, and accessible for the full duration of the project and post-project evaluation period. Access to information within KANA's network can be as limited as necessary to protect confidential information, with information free of identifiable information being released on request or as otherwise appropriate. Examples of when information may be released include regular reports submitted to partner agencies, internal/external programmatic reporting, or sharing with the communities being served. The primary evaluation questions to be addressed throughout this process for all identified strategies are:

1. *How many applications for associated programs have been submitted?*
2. *How can services best be improved?*
3. *How many individuals participated in the vulnerability assessment workshop / how many participated in local workshops/ plant walks?*
4. *How many participants represented underserved communities / rural communities?*
5. *How many participants were aware of and using the gathering, processing, and preservation methods that were shared pre-workshop?*
6. *How many participants are utilizing the gathering, processing, and preservation methods that have been shared post-workshop*
7. *How can these methods be shared further to reach more community members?*

ED_016126_00000438-00014

8. *How many grant notifications have been shared or applications submitted with the support of the Kodiak Regional Capacity Development Coordinator?*
9. *Where has there been new tribal representation (for example: subsistence advisory council)*
10. *Have there been any changes in land management or accessibility?*

Key deliverables will include but are not limited to training certificates for all workshop attendees and presenters, locally grown and subsistence harvested foods vulnerability assessments, a survey for locally grown foods that includes growing capacity information, Tribal Community Needs Assessment, traveling education box, outline for subsidence foods education/outreach events co-created with Local Expert and travel reports for village travel and travel to One Health Conference (in year 2) and ADF&G subsistence board meeting (year 1&2).

We will use existing structures of a steering committee, workshop, site visits, and partnership to leverage resources effectively and efficiently. The depth and breadth of our partnerships ensure KANA staff is not over capacity to conduct this work. We are using existing partnerships and experts to leverage resources for this work. These evaluation questions will be assessed bi-annually throughout the project to modify the programmatic structure as needed to achieve the identified outcomes. In addition to these general questions, KANA has also identified more specific evaluation and performance measurement plans for each of the identified strategies, as well as for established commitments. Please see the attached logic model for specific target metrics.

c. Sustainability Plan and Community Vision.

KANA staff already has a structure in place that is being used to create the Kodiak Tribal Climate Adaptation Plan and Template, which models the same project structure. The proposed activities, objectives, and outcomes outlined in this project are a direct result of Tribally-led climate adaptation planning. This project comes closer to achieving Kodiak Tribes' and communities' goals and objectives by taking the next step in the region's climate adaptation planning efforts and creating a position at KANA that will provide more centralized support (i.e. grant writing) so Tribes, communities, and municipalities can capitalize on resources and funding. The key concerns identified through the Climate Adaptation planning process were food security and program sustainability. One Health encompasses humans, the environment, and animals. Because food (plants and animals) are not just a nutritional resource but cultural importance, economic stability, and a way of life; communities have a vested interest in sustaining this project's momentum.

The proposed work will advance Tribes in climate adaptation planning and preparedness by creating the first Kodiak Food System Vulnerable Assessment that will be living documents to be used and incorporated into tribal program management, emergency planning/management, and or their EPA Tribal Environmental Plans (ETEPS). The Assessment will be created and used to identify Tribal and community grant support needs. Tribal leaders who attend the workshop will gain skills and knowledge on how to conduct vulnerability assessments, utilize this information for their Tribe, and better plan how to adapt to the changing climate, environmental factors, and ecosystems. Tribal leaders will also gain access to the GIS environmental datasets (EJSCREEN and LEO) and learn how to add observations and manipulate graphs to adjust data for their community.

We know this project can be replicated and used in communities elsewhere because Davin Holen with Alaska Sea Grant has done similar vulnerability assessments through Adapt Alaska, including an Adapt Kodiak workshop and assisting in facilitating the Kodiak Tribal Climate Adaptation Planning workshop. The FSVA output would be displayed on the Adapt Kodiak

ED_016126_00000438-00015

website for other communities to view and use. If funded, we would also share our Kodiak Regional Capacity Development Coordinator position job description and role outline. This role is not a need unique to the Kodiak region. This support is needed in many communities across rural Alaska. This can be seen in the number of tribes that hire consultants

4.0 Programmatic Capacity

a. Organization Expertise.

KANA was founded in 1966 as a 501(c) (3) nonprofit corporation and exists through the resolutions of the Tribal Governments of the Koniag region under Public Law (P.L.) 93-638, the Indian Self-Determination and Education Assistance Act. KANA has maintained stable management, organizational structure, and quality financial stability since its inception. As a federally designated Tribal Organization, KANA elects its Board of Directors through a membership-wide vote of KANA beneficiaries. The Board of Directors is 100% Alaska Native. To ensure strong operations and administration, KANA maintains fully staffed departments for finance, human resources, and other support services. KANA's Executive Leadership team is comprehensive and includes the Chief Executive Officer, Vice President of Strategy, Vice President of Community Services, Vice President of Health Services, Vice President of Administration, Chief Medical Officer, Chief of Staff, and Finance Director. This team meets weekly, alternating between 30-minute meetings for brief updates and priority issues and longer, 90-minute sessions to discuss strategy and organizational oversight.

KANA's Environmental Department is a recipient of funding under the EPA IGAP, EPA Hazardous Waste, and BIA Climate Tribal Resilience programs, and has carried out relevant environmental grant programs for several years. We display a long history of successfully fulfilling grant requirements with the EPA and several other federal and state entities. Not only is KANA's environmental team equipped with experienced and capable staff with regard to fulfilling grant requirements, but also employs grants and finance departments that aid in the successful execution of reporting requirements. Not only has the applicant fully utilized the robust systems and teams delineated above, having submitted acceptable final technical reports under these agreements, but has been commended on the thoroughness of both proposals and reporting. The extent to which we adequately report on our progress towards achieving the expected outputs and outcomes under these agreements, as well as the timeliness of reports, shows in the fact that we continue to maintain and be re-awarded funds by the EPA and countless other entities.

b. Staff Experience.

Tyler Kornelis, Economic and Environmental Project Manager. Tyler has operated in this capacity for nearly a decade, in Kodiak. He is uniquely qualified for this work. For this specific project, the Project Manager oversees other program staff and provides project direction. Generally, the Project Manager is responsible for the management, coordination, development, and implementation of economic and environmental development projects and programs deemed necessary to foster community and tribal economic development and environmental response. They coordinate with and manage projects in conjunction with other department coordinators, supervisors, and managers, and liaisons with necessary agencies, outside partners, and contractors to facilitate project or program success. The Project Manager identifies and defines project scope, resource needs, tracking mechanisms, implementation or business models, and desired outcomes. Oversees and manages applicable grants and grant staff related to solid waste management, including Tribal operations when necessary. Lastly, the Project Manager assists Village

ED_016126_00000438-00016

Governments in identifying environmental needs and priorities in response to the climate crisis. In overseeing the *Kodiak Tribal Food Security and Economic Stability Initiative*, the Project Manager will develop a strategic view of the assessment and ensure other staff remains on track with delineated objectives, milestones, deliverables, and measures of success. Please see their resume in 'Other Attachments.'

Grace Ellwanger, Environmental and Economic Development Specialist. Grace has operated in this capacity on Kodiak for nearly three years now and has developed a unique relationship with the Tribes and our environment. The Environmental and Economic Development Specialist manages all aspects of the project, in developing the Kodiak Food Systems Vulnerability Assessment. The Environmental and Economic Development Specialist works closely with the Environmental Coordinator and Project Manager to ensure all project tasks and objectives are met. They also work alongside the Project Manager to serve as a liaison between necessary agencies, outside partners, and contractors to facilitate project or program success. They assist in handling projects to ensure scope, resource needs, tracking mechanisms, implementation or business models, and desired outcomes are documented and in compliance with funder requirements. Under this project, the Environmental and Economic Development Specialist will attend a workshop, conference or training focused on climate change and adaptation in Alaska or another rural location that faces similar issues to coastal Alaska. They will attend this to gain skills and knowledge about food security, building resiliency, and vulnerability assessments. They will compile what was learned and discussed and include a report in the Kodiak Food Systems Vulnerability Assessment. Please see their resume in 'Other Attachments.'

Kodiak Regional Capacity Development Coordinator. This new hire will provide grant-seeking, writing, and management support for Tribes. Additionally, they will work diligently to aid in capacity-building efforts, as regard economic development and environmental justice projects.

c. Expenditure and Compliance.

KANA's approach, procedures, and controls for ensuring that awarded grant funds will be expended in a timely and efficient manner, have been proven repeatedly. As delineated above, KANA's current financial system is Microsoft Dynamics GP, a fund accounting system that allows us to record and present financial data in conformance with reporting requirements. KANA successfully administers more than 80 grants and contracts to provide quality healthcare, behavioral health, and community services to its patrons through full-time positions such as Grants Director, Grants Specialist, Grants Accountant, and program manager. KANA maintains the accounting and internal control policies and procedures that follow Generally Accepted Accounting Principles (GAAP). Our financial systems, policies, procedures, and statements are reviewed annually by an audit firm, and our financial statements are published to reflect GAAP. KANA is a low-risk auditee and our auditor issues a clean opinion of KANA annually.

KANA has established a clear separation of duties within the Finance and Administration departments to safeguard assets and maintain financial stability. KANA's electronic financial management system allows the Finance Director to present financial performance reports quarterly or monthly to the Board of Directors and Management, respectively. Billing and collection reports are generated and distributed to management and the Board of Directors on a monthly basis, and staff who are assigned budget management authority receive monthly budgets to actual expense reports to monitoring spending and financial activity. This information is used by managers to support decision-making related to the financial and programmatic activity. KANA program managers monitor and review expenditures to ensure accordance with each respective award as

ED_016126_00000438-00017

well as with Federal Cost Principles. Additional layers of review exist at the program director and grant accountant levels.

5.0 Past Performance

The Economic Development department at KANA created the foundation for work in the environmental field with the vision that "*Healthy people live in healthy communities*". In 2018, KANA received EPA Indian General Assistance Program funds to establish an Environmental Department and Regional Environmental Consortium to increase local administrative, programmatic, and communications capabilities, and to build the tribal environmental programs' communications, solid waste management, water quality monitoring, and subsistence protection programs. Our regional consortium is made up of all ten federally recognized tribes: the Native Village of Afognak, the Sun'aq Tribe of Kodiak, the Native Village of Ouzinkie, the Native Village of Port Lions, the Native Village of Larsen Bay, the Alutiiq Tribe of Old Harbor, Native Village of Akhiok, Native Village of Karluk-IRA Tribe of Karluk, Kaguyak Village Tribe, and the Tangirnaq Native Village.

When the consortia formed, these village communities and tribes were independently working on a wide variety of environmental protection activities: solid and hazardous waste management, environmental observations (TEK- Traditional Ecological Knowledge), water temperature monitoring, and education and outreach. Through the consortium, we have been able to identify overlapping or common priorities of all the tribes. This allows KANA to identify and prioritize our focus area. For the last four years, KANA, in collaboration with consortium tribes, has been actively working on some of our region's top environmental priorities identified by the tribes. In just a short time of four years, we have been able to increase program capacity by bringing in additional grant funds and building partnerships. Our environmental department is currently funded and supported by the EPA Indian Environmental General Assistance Program (IGAP), EPA Hazardous Waste Management, Bureau of Indian Affairs Tribal Resilience Funding, and The Office of Lisa Murkowski. We are currently operating successfully in managing these funds, adhering to programmatic and financial reporting requirements in an efficient and timely manner, and actively working towards achieving the expected outputs and outcomes of those agreements still operating. We have successfully submitted final financial and technical reports to both the EPA and BIA in the past, under these programs, and will do so also under the projects that are still developing.

Letter of Commitment

RE: Response to the FY23 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Application

Mr. Burney,

I'm writing on behalf of the Kodiak Area Native Association (KANA), submitting this Letter of Commitment in support of our Environmental Department's proposal, in response to the FY23 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Application—*Kodiak Tribal Food Security and Economic Stability Initiative*.

KANA was formed in 1966 as a 501 (c) (3) nonprofit corporation to provide health and social services to the Alaska Natives on Kodiak Island, with a mission to *elevate the quality of life of the people we serve*. KANA works diligently to serve its people holistically—deploying teams that specialize in various aspects of public health, ranging from environmental monitoring to behavioral health.

The Environmental Department proposes to support the development of the Kodiak Food Systems Vulnerability Assessment (KFSVA): a vulnerability assessment on both subsistence and locally grown food in Kodiak. Understanding how foods in the region will be impacted by climate change is important to understanding how the health of Alaska Natives will be impacted. KANA will work with Kodiak Tribes, local experts, and organizations to identify and prioritize vulnerabilities to both subsistence and locally grown foods in the region. Then, our environmental team will use the information gathered to assess which foods are most vulnerable to climate change and which will have the most significant impacts to overall health and wellbeing in the community if they are made less available.

They also propose to address challenges frequently expressed by Tribes and small municipal governments in the Kodiak region in accessing crucial resources intended to enhance resilience, improve economy, and replace aging infrastructure by hiring an additional staff to provide technical assistance and support to the ten Tribes and five small municipal governments in the Kodiak Archipelago.

ED_016126_00000439-00001

KODIAK AREA NATIVE ASSOCIATION
3449 Rezanof Drive East Kodiak, Alaska 99615 | Ex. 6 - Personal Privacy (PP) | www.kodiakhealthcare.org

KANA will address these concerns using the One Health concept, recognizing the interdependence of human, animal, and environmental health as one singular health system. The Environmental and Economic Development Departments will work together to partner with other internal departments (i.e. Workforce Development, Elder Services, Prevention, etc.), as well as with local agencies to ensure that we are taking an effective, knowledgeable, and multi-pronged approach to addressing environmental justice issues in our region.

As an organization, KANA commits to ensuring the integration of our departments, in support of the holistic One Health model, and the *Kodiak Tribal Food Security and Economic Stability Initiative,* as a whole. We seek to increase stakeholder engagement; enhance the integrity of community health connections between humans, animals, and the environment; and *elevate the quality of life of the people we serve.*

We respectfully request your support of this proposal.

Sincerely,

M Pfeffer

RE: Letter of Commitment for Kodiak Area Native Association to the FY23 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program Application

Dear Mr. Burney,

Alaska Sea Grant is submitting this Letter of Commitment to support its FY23 Environmental Justice Grant proposal, Kodiak Tribal Food Security and Economic Stability Initiative.

Alaska Sea Grant is a partnership between NOAA and the University of Alaska Fairbanks. The Coastal Community Resilience Program provides data and decision support tools to rural communities in Alaska, leveraging the University's resources and NOAA. Since 2016 I have conducted workshops across Alaska on coastal resilience with partners including Tribes such as KANA. As an anthropologist who spent my first career studying the customary harvest of wild foods and food security of rural residents of Alaska including Kodiak, I understand the importance that wild foods play in the subsistence way of life of Kodiak residents. We conducted a workshop called Adapt Kodiak in 2019, and one of the 4 focus areas was food security. This was followed up by collaborating with KANA on their Tribal Climate Adaptation Workshop last fall, which was thematically organized around the subsistence way of life. We are supporting this project as Alaska Sea Grant recognizes the unique challenges brought on by changes in the climate and their potential impacts on food resources in coastal village communities and tribal members residing in the Kodiak region. The main source of local food in Alaska is obtained through subsistence activities. Locally grown and harvested foods are a significant component of regional food security. Understanding how important foods that are grown and harvested in the region will be impacted by climate change is important not only to food security in the region but the nutritional, cultural, economic, and spiritual well-being of Kodiak Tribes.

Alaska Sea Grant supports the need for dependable subsistence resources and locally grown food access and exploration of climate change impacts so Kodiak communities and Tribes can ensure reliable and available food sources into the future. Alaska Sea Grant is committing to the project as follows.

In-Kind: Staff time and travel funding to facilitate the food system vulnerability assessment workshop in Kodiak in year one of the proposed project. Alaska Sea Grant will guide the discussion, provide expertise, and assist with outreach throughout the project period.

Thank you for considering our FY23 Environmental Justice Grant Proposal. I fully support the work that KANA is doing to support the residents of Kodiak as they address future challenges posed by climate on resources important for the cultural, social, and economic wellbeing of Kodiak residents.

Respectfully,

Davin Holen

Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Latino Community Fund of Washington State

Address: 1225 Weller South Street, Suite 410

City: Seattle

State: WA: Washington Zip Code: 98144

B. Unique Entity Identifier (UEI): ZFEEC9G7W9R7

C. Applicant/Recipient Point of Contact

Name: Lilliane Ballesteros

Phone: Ex. 6 - Personal Privacy (PP)

Email: lilliane@latinocommunityfund.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☒ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☒ Yes	☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Lilliane Ballesteros	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

U.S. EPA, Region 10
1200 Sixth Avenue, Suite 155
Seattle, WA 98101

Dear EPA Community Education review committee,

On behalf of the Yakima Health District (YHD), please accept this letter of commitment for the Latino Community Fund of Washington State (LCF) application for the 2023 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. Through this grant, LCF will be working with partners in Eastern and Central Washington to support and enhance the capacity of local leaders to address and build a deeper understanding and personal stewardship actions addressing local environmental issues.

The YHD is the first, and oldest, health district in the nation having provided public health services to people in Yakima County for over 100 years. Our work spans public health education and prevention, communicable disease surveillance and intervention, as well as environmental health oversight. Collaborations are extremely important in the Yakima Valley, particularly with the high concentration of low income and traditionally underserved residents in our communities. The general population in the region faces numerous major environmental health concerns including hazardous air and groundwater quality. Due to the cumulative impacts of this pollution and health inequities, the Latino community experiences disproportionate health impacts from these issues and additional barriers to information and engagement opportunities

LCF has a history of working with the Latino community throughout Washington State through a variety of networks and coalitions. This includes the Latino Equity Network, which initially brought together nine Latino nonprofit organizations since 2014 who work with thousands of Latino families in communities across the state to identify issues of concern and create solutions to them, including environmental issues. The network has since grown to include more member organizations and expand its scope. In Central and Eastern Washington, LCF has been building partnerships with local nonprofits and groups that are working to increase participation among Latino residents in various issues, including climate change and other environmental issues in the region. LCF has led community dialogue climate listening sessions, wildfire leadership and capacity cohorts, has built strong relationships with leaders in Central WA, and will host a youth leadership summit on August 12th, 2023, bringing together youth from Central WA and across Washington State to discuss civic engagement, climate change, and other local issues that community members face. For these reasons, LCF is ideally

positioned to expand the knowledge of residents in Central and Eastern Washington about a variety of pressing environmental issues.

YHD is excited to work with Latino Community Fund in this work to continue promoting awareness and education among Latino community members in Yakima County. Our commitment to work together would include participating in partner collaboration meetings, partnering on community outreach work, and co-hosting community resource fairs. We have partnered with LCF in the past on this work and are excited to continue doing so.

I hope you will give every possible consideration to LCF's application for the 2023 Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program. This grant will significantly benefit the communities of Eastern and Central Washington facing local environmental issues affecting the health and wellbeing of community members.

Please feel free to contact me at Ex. 6 - Personal Privacy (PP) if you have questions or require additional information.

Sincerely,

Lilian Bravo
Director of Public Health Partnerships

Nuestra Casa

April 14, 2023

Environmental Protection Agency Office of Environmental Justice,

Re: Letter of commitment for the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program

To Whom It May Concern,

This letter of commitment is submitted in support of the Latino Community Fund of Washington's Application for the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program.

Nuestra Casa is a non-profit organization, community-based organization dedicated to providing social services to rural immigrants in the Lower Yakima Valley. Although we started serving women first, we have now expanded our program to include their families through English as a Second Language Classes and Citizenship Classes. In addition, we have collaborated with Latino Community Fund on social and environmental issues. Over the last couple of years we've collaborated in promoting clean water and clean air quality via different programs.

Their expertise in environmental justice issues and Nuestra Casa's ability to connect with the community has turned us into an impactful partnership. Together, we are creating new leaders to address the conservancy and health of the Yakima Valley.

Should the program get funded, Nuestra Casa is committed to continue work with Latino Community fund in any aspect of this project. We are committed to leveraging resources and creating learning opportunities for the resilient people of the Yakima Valley.

If you need additional information, please do not hesitate to contact me at Ex. 6 - Personal Privacy (PP) or email at caty@nuestracasawa.org.

Sincerely,

Caty Padilla

SACHAMAMA

April 10, 2023

Environmental Protection Agency
Office of Environmental Justice

On behalf of Sachamama, I am honored to provide this letter of commitment for the Latino Community Fund of Washington State (LCF) application for the ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS) COOPERATIVE AGREEMENT PROGRAM and their efforts to build community resilience and leadership within the Latino community in Washington State.

Sachamama is a non-profit organization working to build support for a clean energy economy for all, and cultivating sustainable attitudes, behaviors & lifestyles within communities of color. Through communications and messaging, leadership and advocacy development, and community-led local actions, we are informing and activating individuals to advocate for healthy more resilient communities, while developing a nurturing movement that supports self-exploration, diversity, and civic participation.

Since 2020, Sachamama has had the privilege to work with LCF, providing resources and tools for Latino communities to be more resilient to wildfires across the Yakima Valley. Thought our 8-week Spanish video "Before the Fire Curriculum" and participatory learning processes, we have tapped into communities' knowledge to help address some of the challenges they face, determine community assets, and bring forward community-based wildfire solutions. On this joint effort, Sachamama will support LCF through:

1. Hosting the video curriculum series in our online course platform
2. Cofacilitation of weekly classes
3. Development of leadership training materials and production of communication content

sachamama.org
info@sachamama.org

SACHAMAMA

Sachamama looks forward to the opportunity to continue developing wildfire community resilience and leadership to Latino communities in Washington State. Please feel free to contact me at c.zegarra@sachamama.org or Ex. 6 - Personal Privacy (PP) if you have questions or require additional information.

Sincerely,

Carlos Zegarra
Executive Director
Sachamama

Latino Community Fund
WASHINGTON STATE

April 7, 2023

U.S. EPA, Region 10
1200 Sixth Avenue, Suite 155
Seattle, WA 98101

Dear EPA Community Education review committee,

On behalf of the Department of Natural Resources, please accept this letter of commitment for the Latino Community Fund of Washington State (LCF) application for the ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS) COOPERATIVE AGREEMENT PROGRAM. Through this grant, LCF will be working with partners in Eastern and Central Washington to support and enhance the capacity of local leaders to address and build a deeper understanding and personal stewardship actions addressing local environmental issues.

Latino Community Fund of Washington State is a 501(c)(3) nonprofit that invests in the Latino community to cultivate new leaders, support effective nonprofit organizations, and improve the quality of life for all Washingtonians. Through this project, LCF will work with local and statewide partners, including the Washington Environmental Council, Washington Toxics Coalition, and other partners through sub-grants to engage youth and adult community leaders to become stewards for addressing environmental issues.

The Central and Eastern Washington regions have some of the highest concentrations of Latino residents in the Northwest. The general population in the region faces numerous major environmental health concerns and lacks adequate culturally competent education and engagement materials; Latino residents face even greater barriers to information and engagement. LCF has a history of working with the Latino community throughout Washington State through a variety of networks and coalitions. This includes the Latino Equity Network, which initially brought together nine Latino nonprofit organizations since 2014 who work with thousands of Latino families in communities across the state to identify issues of concern and create solutions to them, including environmental issues. The network has since grown to include more member organizations and expand its scope. In Central and Eastern Washington, LCF has been building partnerships with local nonprofits and groups that are working to increase participation among Latino residents in various issues, including climate change and other environmental issues in the region. LCF has led community dialogue climate listening sessions, wildfire leadership and capacity cohorts, has built strong relationships with leaders in Central WA, and will host a youth leadership summit on August 12th, 2023, bringing together youth from Central WA and across Washington State to discuss civic engagement, climate change, and other local issues that community members face. For these reasons, LCF is ideally positioned to

expand the knowledge of residents in Central and Eastern Washington about a variety of pressing environmental issues.

I hope you will give every possible consideration to LCF's application for the 2023 ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS) COOPERATIVE AGREEMENT PROGRAM. This grant will significantly benefit the communities of Eastern and Central Washington facing local environmental issues affecting the health and wellbeing of community members.

We are excited to work with Latino Community Fund in this work to continue bringing education and resources to Latinx community members in Yakima County. Our commitment to work together would include sharing wildfire resilience resources through education material and staff presentations. We have partnered with LCF in the past on this work and are excited to continue doing so.

We look forward to the opportunity the grant funding will provide LCF and their partners to achieve their educational goals and objectives. Please feel free to contact me at Ex. 6 - Personal Privacy (PP) if you have questions or require additional information.

Sincerely,

Russ Lane
Division Manager, Wildland Fire Management Division

EXECUTIVE SUMMARY

Innovative, results-oriented leader with over ten years of experience in the nonprofit sector developing and executing strategic fundraising goals, collaborations with nonprofit staff, boards, and community partners, and strengthened operational structures to increase organizational impact. Proven collaborative leadership, proactive work ethic, and ability to effectively convey cohesive mission and vision of organization to a variety of stakeholders. A strong team member who leads with integrity, initiative, and a collaborative spirit. Extensive knowledge of nonprofit systems, program budgeting, and data management. A values-driven professional, dedicated to investing in leadership pipelines that center community voice and create systems change.

PROFESSIONAL EXPERIENCE

Latino Community Fund of WA State

Executive Director, Seattle, WA, October 2019 – present

Oversee organizational administration, programming, finance, and fundraising. This has included managing a staff of 13 leaders across 3 counties, as well as 13 fiscally sponsored organizations. Developing and implementing new operational and finance policies. Managing statewide relationships with nonprofit leaders, foundation staff and board, and youth leaders. Building organizational cohesiveness and shared learning across organization through team activities, program reports, and collaborative approaches to work plans.

Notable Accomplishments:

- Co-facilitated Wildfire Resilience Trainings and supported in Outreach
- Expanded organizing work to include King, Yakima, Benton, Franklin, and Chelan Counties
- Raised and distributed over $1.5 million in Covid Response Funds in 2020
- Worked with team to lead year-long strategic planning process with board and staff
- Continued relationships with statewide partners through strategic visioning and programming in the fields of Census work, Environmental Justice, Health Equity, and Philanthropy

Interim Executive Director, Seattle, WA, January 2019 – October 2019

Manage organizational growth during leadership transition, assessing the needs and opportunities for the organization. Developed new organizational policies and procedures.

Notable Accomplishments:

- Worked with staff to successfully raise over $500,000 in 2019.
- Developed new financial management policies, including expense request process, budgeting for events, and financial oversight by managers.
- Increased budgeting skills and financial literacy of team, including youth fellows.
- Developed new relationships with statewide partners through strategic visioning and programming in the fields of Census work, environmental justice, and philanthropy.

Director of Development and Capacity Building, Seattle, WA, July 2015 – January 2019

Developed fundraising goals with program staff, Executive Director, and Board of Directors. Developed new and expanded on existing avenues for fundraising, including community events, online giving campaigns, annual Gala, and community grants committee. Established relationships that included sponsors, foundation funders, student interns, and partner organizations.

Notable Accomplishments:

- Collaborated with staff, board, and partners to raise annual budget from $1.5M to over $3M in revenue, including through grant revenue (both restricted and unrestricted), event revenue, and individual giving.

- Advocated for, raised funds for, and hired new Communications Coordinator to strengthen storytelling projects, increase impact reporting, and build out organizational branding.
- Led the planning and implementation of staff retreats, visioning sessions, and program collaborations.
- Started new relationship with UW Carlson Center, bringing in student interns (some who became Fellows and integral to the organizations growth), while also increasing staff ability to serve in managerial roles.
- Brokered collaboration with nationwide environmental nonprofit, leading to civic engagement and 2020 Census work with local Latino/a leaders in Wenatchee – leading to the first hiring of a Youth Fellow in Wenatchee, thereby expanding LCF's statewide presence and collaborations.

Entre Hermanos
Development Assistant, Seattle, WA, September 2013 – December 2016
Analyzed data and developed fundraising strategy, engaging board members to recruit new donors and bring in new sponsors for annual Gala event. Developed communication plan, including social media content, to improve donor retention. Organized Gala Event and managed relationships with sponsors. Supervised development intern.

Notable Accomplishments:
- Secured new sponsors including new nationwide partner, local unions, and health institutions.
- Developed donor database to track donor retention and create targeted donor communication.

Mari's Place for the Arts
Grant Writer, Everett, WA, June 2015 – June 2016
Worked closely with Executive Director to increase funding by leading grant research and implementation, with an emphasis on general operating support. Built out new systems for tracking and collecting financial data, including introducing excel budgeting to organization, developing program budgets, and crafting a cohesive narrative to attract new foundation partners.

United Way of King County
Community Program Ambassador, Seattle, WA, December 2014 – March 2015
Engaged with local communities to increase participation in the United Way's Free Tax-Prep Campaign.

Education Pioneers Fellowship, California Charter Schools Association
Education Pioneers Fellow, Los Angeles, CA, June 2014 –August 2014
Developed a political giving campaign to recruit small dollar contributors for statewide Charter School Association's 501c4 organization. Created school leader and board member database with 501c3 staff members.

weSPARK Cancer Support Center
Development, Events Coordinator, Los Angeles, CA, June 2009 – August 2013
Collaborated with Program Director and Executive Director to develop proposal budgets, strategize program growth, determine funding priorities, and create evaluation measures for grants. Led the development department to create new fundraising events, engage new and existing donors, and build a stronger data infrastructure. Supervised event staff member, student interns, and event volunteers, serving to build leadership of staff and volunteers through targeted learnings, shadowing, and mentorship. Implemented communication plan, including the re-design and reach of the quarterly newsletter, social media expansion, and direct outreach at local events.

Notable Accomplishments:
- Expanded and directed fundraising, increasing annual event revenues from $80K to $300K.
- Worked directly with board member to start first Run/Walk event for organization. Over 4 years of leading the event planning, increased attendance of event from 300 to over 3,000 participants, increased revenue from $40,000 to over $100,000, managed over 100 volunteers, and established new relationships with sponsors, vendors, and community organizations.
- In collaboration with Program Director, initiated partnership with statewide organization and secured grant funding for the organization's first in-person young adult cancer support group.

- Established recurring gift program, analyzing donor database to create optimal return on appeal asks and raising over $20,000 in the first year of the program.
- Over the course of 4 years, was promoted three times from intern to assistant to coordinator of development department, serving as the lead staff member for events, grants, and communication.

Accounting Period Ending:
December 31
Public Charity Status:
170(b)(1)(A)(vi)
Form 990 Required:
Yes
Effective Date of Exemption:
November 9, 2006
Contribution Deductibility:
Yes
Advance Ruling Ending Date:
December 31, 2010

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. During your advance ruling period, you will be treated as a public charity. Your advance ruling period begins with the effective date of your exemption and ends with advance ruling ending date shown in the heading of the letter.

Shortly before the end of your advance ruling period, we will send you Form 8734, Support Schedule for Advance Ruling Period. You will have 90 days after the end of your advance ruling period to return the completed form. We will then notify you, in writing, about your public charity status.

Please see enclosed Information for Exempt Organizations Under Section 501(c)(3) for some helpful information about your responsibilities as an exempt organization.

If you distribute funds to other organizations, your records must show whether they are exempt under section 501(c)(3). In cases where the recipient organization is not exempt under section 501(c)(3), you must have evidence the

ED_016126_00000460-00001

LATINO COMMUNITY FUND OF

funds will be used for section 501(c)(3) purposes.

If you distribute funds to individuals, you should keep case histories showing the recipient's name and address; the purpose of the award; the manner of selection; and the relationship of the recipient to any of your officers, directors, trustees, members, or major contributors.

Sincerely,

Lois G. Lerner

INFORMATION FOR ORGANIZATIONS EXEMPT UNDER SECTION 501(c)(3)

WHERE TO GET FORMS AND HELP

You can obtain forms and instructions by calling toll free 1-800-829-3676, through the Internet Web Site at www.irs.gov, and at local tax assistance centers.

You can obtain additional information about most topics discussed below through our customer service function by calling toll free 1-877-829-5500, or on our Web Site at www.irs.gov/eo. In addition, you should sign up for Exempt Organization's EO Update, a regular e-mail newsletter that highlights new information posted on the charities pages of irs.gov. To subscribe, go to www.irs.gov/eo and click on "EO Newsletter."

NOTIFY US ON THESE MATTERS

If you change your name, address, purposes, operations or sources of financial support, please inform our TE/GE EO Determinations Office at the following address: Internal Revenue Service, P.O. Box 2508, Cincinnati, Ohio 45201. If you amend your organizational document or by-laws, or dissolve, provide the EO Determinations Office with a copy of the amended documents. Please use your employer identification number on all returns you file and in all correspondence with the Internal Revenue Service.

FILING REQUIREMENTS

In your exemption letter, we indicated whether you must file Form 990, Return of Organization Exempt From Income Tax. If your exemption letter states that you are not required to file Form 990, you are exempt from these requirements. Otherwise, if your gross receipts are normally more than $25,000, you must file Form 990 or Form 990-EZ with the Ogden Submission Processing Center, Ogden, UT 84201-0027.

You are eligible to file Form 990-EZ if your gross receipts are normally between $25,000 and $100,000, and your total assets are less than $250,000. You must file the complete Form 990 if your gross receipts are over $100,000, or your total assets are over $250,000. The Form 990 instructions show how to compute your "normal" receipts.

Form 990 Schedule A is required for both Form 990 and Form 990-EZ.

Organizations With Gross Receipts of $25,000 or Less

For tax periods beginning after December 31, 2006, you must file an annual electronic notice if your gross receipts are normally $25,000 or less. Alternatively, you may file a complete Form 990 Package if we send one to you.

Exception: Section 509(a)(3) supporting organizations must file Form 990 or

Form 990-EZ even if gross receipts are normally $25,000 or less. However, supporting organizations of religious groups with gross receipts that are normally $5,000 or less may file an annual electronic notice instead of Form 990 or Form 990-EZ.

Due Date of Return or Annual Electronic Notice

Your return or annual electronic notice is due by the 15th day of the fifth month after the end of your annual accounting period. There are penalties for failing to file a complete return timely. For additional information on penalties, see the Form 990 instructions or call our toll free number.

Revocation of Tax-Exempt Status

For tax periods beginning after December 31, 2006, your tax-exempt status will be revoked as of the filing due date of the third year if you fail to file for three consecutive years Form 990, Form 990-EZ, or the annual electronic notice.

If your tax-exempt status is revoked because you failed to file for three consecutive years, you must reapply for exemption and pay the appropriate user fee.

UNRELATED BUSINESS INCOME TAX RETURN

If you receive more than $1,000 annually in gross receipts from a regular trade or business, you may be subject to Unrelated Business Income Tax and required to file Form 990-T, Exempt Organization Business Income Tax Return. There are several exceptions to this tax:

1. Income you receive from the performance of your exempt activity,
2. Income from fundraisers conducted by volunteer workers, or where donated merchandise is sold, and

3. Income from routine investments such as certificates of deposit, savings accounts, or stock dividends.

There are special rules for income derived from real estate or other investments purchased with borrowed funds. This income is called "debt financed" income. For additional information regarding unrelated business income tax, see Publication 598, Tax on Unrelated Business Income of Exempt Organizations, or call our toll free number shown above.

PUBLIC INSPECTION OF APPLICATION AND INFORMATION RETURN

You are required to make your annual information return, Form 990 or Form 990-EZ, available for public inspection for three years after the later of the due date of the return, or the date the return is filed. This rule also applies to any Form 990-T filed after August 17, 2006. You are also required to make available for public inspection your exemption application, any supporting documents, and your exemption letter. You must also provide copies

of these documents to any individual, upon written or in person request, without charge other than reasonable fees for copying and postage.

You may fulfill this requirement by placing these documents on the Internet. Penalties may be imposed for failure to comply with these requirements. Additional information is available in Publication 557, Tax-Exempt Status for Your Organization, or call our toll free number shown above.

FUNDRAISING

Contributions to you are deductible only to the extent that they are gifts and no consideration is received in return. Depending on the circumstances, ticket purchases and similar payments in conjunction with fundraising events may not qualify as fully deductible contributions.

CONTRIBUTIONS OF $250 OR MORE

Donors must have written substantiation from the charity for any charitable contribution of $250 or more. Although it is the donor's responsibility to obtain written substantiation from the charity, you can assist donors by providing a written statement listing any cash contribution or describing any donated property.

This written statement must be provided at the time of the contribution. There is no prescribed format for the written statement. Letters, postcards and electronic (e-mail) or computer-generated forms are acceptable.

The donor is responsible for the valuation of donated property. However, your written statement must provide a sufficient description to support the donor's contribution.

For contributions of cash, a check or other monetary gift made on or after January 1, 2007, a donor cannot claim a tax deduction unless the donor maintains a record of the contribution in the form of either a bank record (such as a cancelled check) or a written communication from the charity (such as a receipt or letter) showing the name of the charity, the date of the contribution, and the amount of the contribution.

For additional information regarding donor substantiation, see Publication 1771, Charitable Contributions - Substantiation and Disclosure Requirements. For information about the valuation of donated property, see Publication 561, Determining the Value of Donated Property.

CONTRIBUTIONS OF MORE THAN $75 AND CHARITY PROVIDES GOODS OR SERVICES

You must provide a written disclosure statement to donors who receive goods or services from you in exchange for contributions in excess of $75.

Contribution deductions are allowable to donors only to the extent their contributions exceed the value of the goods or services received in exchange.

Ticket purchases and similar payments in conjunction with fundraising events may not necessarily qualify as fully deductible contributions, depending on the circumstances. If you conduct fundraising events such as benefit dinners, shows, membership drives, etc., where something of value is received, you are required to provide a written statement informing donors of the fair market value of the specific items or services you provided in exchange for contributions of more than $75.

You should provide the written disclosure statement in advance of any event, determine the fair market value of any benefit received, determine the amount of the contribution that is deductible, and state this information in your fundraising materials such as solicitations, tickets, and receipts. The amount of the contribution that is deductible is limited to the excess of any money (and the value of any property other than money) contributed by the donor less the value of goods or services provided by the charity. Your disclosure statement should be made, no later than, at the time payment is received. Subject to certain exceptions, your disclosure responsibility applies to any fundraising circumstances where each complete payment, including the contribution portion, exceeds $75. For additional information, see Publication 1771 and Publication 526, Charitable Contributions.

EXCESS BENEFIT TRANSACTIONS

Excess benefit transactions are governed by section 4958 of the Code. Excess benefit transactions involve situations where a section 501(c)(3) organization provides an unreasonable benefit to a person who is in a position to exercise substantial influence over the organization's affairs. If you believe there may be an excess benefit transaction in which you are involved, you should report the transaction on Form 990 or 990-EZ. For information on how to correct and report this transaction, see the instructions for Form 990 and Form 990-EZ, or call our toll free number shown above.

EMPLOYMENT TAXES

If you have employees, you are subject to income tax withholding and the social security taxes imposed under the Federal Insurance Contribution Act (FICA). You are required to withhold Federal income tax from your employee's wages and you are required to pay FICA on each employee who is paid more than $100 in wages during a calendar year. To know how much income tax to withhold, you should have a Form W-4, Employee's Withholding Allowance Certificate, on file for each employee. Organizations described in section 501(c)(3) of the Code are not required to pay Federal Unemployment Tax Act (FUTA) tax.

Employment taxes are reported on Form 941, Employer's Quarterly Federal Tax Return. The requirements for withholding, depositing, reporting and paying employment taxes are explained in Circular E, Employer's Tax Guide, (Publication 15), and Employer's Supplemental Tax Guide, (Publication 15-A). These publications explain your tax responsibilities as an employer.

CHURCHES

Churches may employ both ministers and church workers. Employees of churches or church-controlled organizations are subject to income tax withholding, but may be exempt from FICA taxes. Churches are not required to pay FUTA tax. In addition, although ministers are generally common law employees, they are not treated as employees for employment tax purposes. These special employment tax rules for members of the clergy and religious workers are explained in Publication 517, Social Security and Other Information for Members of the Clergy and Religious Workers. Churches should also consult Publications 15 and 15-A. Publication 1828, Tax Guide for Churches and Religious Organizations, also discusses the various benefits and responsibilities of these organizations under Federal tax law.

PUBLIC CHARITY STATUS

Every organization that qualifies for tax-exemption as an organization described in section 501(c)(3) is a private foundation unless it falls into one of the categories specifically excluded from the definition of that term [referred to in section 509(a)(1), (2), (3), or (4)]. In effect, the definition divides these organizations into two classes, namely private foundations and public charities.

The Code section under which you are classified as a public charity is shown in the heading of your exemption letter. This determination is based on the information you provided and the request you made on your Form 1023 application. Please refer to Publication 557 for additional information about public charity status.

GRANTS TO INDIVIDUALS

The following information is provided for organizations that make grants to individuals. If you begin an individual grant program that was not described in your exemption application, please inform us about the program.

Funds you distribute to an individual as a grant must be made on a true charitable basis in furtherance of the purposes for which you are organized. Therefore, you should keep adequate records and case histories that demonstrate that grants to individuals serve your charitable purposes. For example, you should be in a position to substantiate the basis for grants awarded to individuals to relieve poverty or under a scholarship or education loan program. Case histories regarding grants to individuals should show names, addresses, purposes of grants, manner of selection, and relationship (if any) to members, officers, trustees, or donors of funds to you.

For more information on the exclusion of scholarships from income by an individual recipient, see Publication 970, Tax Benefits for Education.

Part X Public Charity Status *(Continued)*

e 509(a)(4)—an organization organized and operated exclusively for testing for public safety. ☐

f 509(a)(1) and 170(b)(1)(A)(iv)—an organization operated for the benefit of a college or university that is owned or operated by a governmental unit. ☐

g 509(a)(1) and 170(b)(1)(A)(vi)—an organization that receives a substantial part of its financial support in the form of contributions from publicly supported organizations, from a governmental unit, or from the general public. ☒

h 509(a)(2)—an organization that normally receives not more than one-third of its financial support from gross **investment income** and receives more than one-third of its financial support from contributions, membership fees, and gross receipts from activities related to its exempt functions (subject to certain exceptions). ☐

i A publicly supported organization, but unsure if it is described in 5g or 5h. The organization would like the IRS to decide the correct status. ☐

6 If you checked box g, h, or i in question 5 above, you must request either an **advance** or a **definitive ruling** by selecting one of the boxes below. Refer to the instructions to determine which type of ruling you are eligible to receive.

a **Request for Advance Ruling:** By checking this box and signing the consent, pursuant to section 6501(c)(4) of the Code you request an advance ruling and agree to extend the statute of limitations on the assessment of excise tax under section 4940 of the Code. The tax will apply only if you do not establish public support status at the end of the 5-year advance ruling period. The assessment period will be extended for the 5 advance ruling years to 8 years, 4 months, and 15 days beyond the end of the first year. You have the right to refuse or limit the extension to a mutually agreed-upon period of time or issue(s). Publication 1035, *Extending the Tax Assessment Period,* provides a more detailed explanation of your rights and the consequences of the choices you make. You may obtain Publication 1035 free of charge from the IRS web site at *www.irs.gov* or by calling toll-free 1-800-829-3676. Signing this consent will not deprive you of any appeal rights to which you would otherwise be entitled. If you decide not to extend the statute of limitations, you are not eligible for an advance ruling. ☒

b **Request for Definitive Ruling:** Check this box if you have completed one tax year of at least 8 full months and you are requesting a definitive ruling. To confirm your public support status, answer line 6b(i) if you checked box g in line 5 above. Answer line 6b(ii) if you checked box h in line 5 above. If you checked box i in line 5 above, answer both lines 6b(i) and (ii). ☐

(i) (a) Enter 2% of line 8, column (e) on Part IX-A. Statement of Revenues and Expenses. _____

(b) Attach a list showing the name and amount contributed by each person, company, or organization whose gifts totaled more than the 2% amount. If the answer is "None," check this box. ☐

(ii) (a) For each year amounts are included on lines 1, 2, and 9 of Part IX-A. Statement of Revenues and Expenses, attach a list showing the name of and amount received from each **disqualified person.** If the answer is "None," check this box. ☐

(b) For each year amounts are included on line 9 of Part IX-A. Statement of Revenues and Expenses, attach a list showing the name of and amount received from each payer, other than a disqualified person, whose payments were more than the larger of (1) 1% of line 10, Part IX-A. Statement of Revenues and Expenses, or (2) $5,000. If the answer is "None," check this box. ☐

7 Did you receive any unusual grants during any of the years shown on Part IX-A. Statement of Revenues and Expenses? If "Yes," attach a list including the name of the contributor, the date and amount of the grant, a brief description of the grant, and explain why it is unusual. ☐ **Yes** ☐ **No**

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Mother Africa

Address: 1209 Central Ave S, Suite 120, Kent, WA 98032

City: Kent

State: WA: Washington Zip Code: 98032-7436

B. Unique Entity Identifier (UEI): NM4CC29SJLY7

C. Applicant/Recipient Point of Contact

Name: Risho Sapano

Phone: 2532498811

Email: risho@motherafrica.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None.

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☒ Yes ☐ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Angela Brooks, HR Manager, 1209 Central Ave S Ste 120 Kent WA 98032, hr@motherafrica.org, Ex. 6 Personal Privacy (PP) x [redacted]

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

Mother Africa is an Equal Opportunity Employer. Applications are considered without regard to race, age, sex, color, creed, religion, disability, national origin, marital status, mental or physical handicap, sexual orientation (heterosexuality, homosexuality, bisexuality) and expression of gender identity or any other classification protected by law.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

Risho Sapano	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

RE: Letter of Commitment for Mother Africa's EPA Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Project

Dear Mr. Burney,

ECOS is pleased to partner with Mother Africa for the U.S. EPA EJCPS project. This project aims to develop a culturally relevant, multilingual climate resilience and healthy homes assessment program for immigrant and refugee communities in King County, Washington. It will enhance connections between frontline communities and current knowledge, resources, and decision-making spaces in climate action and preparedness, as well as allow Mother Africa to build connections with stakeholders such as industry and government to better meet these goals.

ECOS' mission is to protect the health and wellness of people, pets and the planet by creating the most authentic, sustainable and affordable cleaning products for all. We have made environmental justice a cornerstone of our mission and offer Safer Choice-certified cleaning products that are available nationwide at an affordable price point.

We believe that everyone has a right to safer and healthier home and that it's important to reach out to underserved communities to ensure they have access to green cleaning products. That's why ECOS is contributing cleaning products for 350 Safer Choice cleaning kits with a market value of $5,3050.

We are proud to support Mother Africa in this EJCPS project and in their work to reduce exposure of under-resourced and marginalized communities to the harms from toxic chemicals. If I can be of any further assistance or provide you with any additional information, please do not hesitate to contact me at directly at Ex. 6 - Personal Privacy (PP) or Ex. 6 - Personal Privacy (PP)

Yours sincerely,

Kelly Vlahakis-Hanks
President & CEO

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

Based on the information you submitted with your application, we approved your request for reinstatement under Revenue Procedure 2014-11. Your effective date of exemption, as listed at the top of this letter, is the postmark date of your application.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar

United States Environmental Protection Agency
1200 Pennsylvania Avenue NW
Washington, DC 20460

RE: Letter of Commitment for Mother Africa's EPA Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Project

Dear Mr. Burney,

King County Emergency Management is pleased to partner with Mother Africa for the EPA EJCPS Cooperative Agreement Project, which aims to address emergency preparedness and health impact assessments in priority populations. This would be accomplished through building the capacity of a trusted, community-based organizational partner to establish a culturally contextualized, multi-language emergency preparedness campaign. The partnership will enhance connections between focus communities and deepen community capacity to engage on climate and emergency preparedness.

The mission of King County Emergency Management is to provide regional leadership to strengthen community resilience and access to emergency services for the whole community. We provide for the effective direction, control, and coordination of County government services functional units; provide liaison with other governments and the private, non-governmental sector; and, serve as the coordinating entity for cities, County departments, and other appropriate agencies, prior to, during, and after incidents and events of regional significance. This is done in support of the King County Executive's Vision of King County as a welcoming place where everyone has the opportunity to thrive.

To further our commitment to a whole community approach to emergency management, we maintain a robust preparedness and public education program. Our office, in partnership with community-based organizations, has developed an extensive outreach plan and corresponding curriculum that would make an ideal foundation for key components of the EJCPS project. Our intent is to partner with project leads and local subject matter experts to tailor our resources to best fit the needs of the given community. We feel this would address potential gaps in response plans, enhance the health of our community, and ensure we are serving our constituents to be best of our ability.

Thank you for considering our comments on and commitment for Mother Africa's EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Project. Should you have any questions, please feel free to contact Susanna Trimarco at strimarco@kingcounty.gov or Ex. 6 - Personal Privacy (PP)

Sincerely,

Brendan McCluskey, JD, MPA, CEM, CBCP

Washington, DC 20460

RE: Letter of Commitment for Mother Africa's EPA Environmental Justice Collaborative Problem-Solving (EJCPS) Project

Dear Mr. Burney:

As the air quality regulatory body for over four million people in King, Kitsap, Pierce, and Snohomish Counties, the Puget Sound Clean Air Agency preserves, protects, and enhances air quality and public health, enforces the Clean Air Act, supports policies that reduce climate change, and partners with communities to do this work equitably.

The Agency is pleased to collaborate with Mother Africa on the proposed EPA EJCPS project. We understand the project will focus on multi-ethnic communities that are disproportionately impacted by environmental injustices. This project aims to develop a culturally relevant, multilingual climate resilience and healthy homes assessment program for immigrant and refugee communities in King County, Washington. This project will enhance connections between frontline communities and current knowledge, resources, and decision-making spaces in climate action and preparedness, as well as allow Mother Africa to build connections with stakeholders such as industry and government to better meet these goals.

As part of our mission, we work with communities that have historically faced disproportionate impacts in air quality and socioeconomic factors. We have our own environmental justice and air quality mapping tool, which preceded state and national tools, that we use to guide our work. Using that tool, we identified four overburdened

communities, areas that have the greatest impact from air pollution. These locations are the Chinatown-International District, Duwamish Valley, Auburn, and Lakewood. The first three areas are in King County and overlap with communities this project will target. Over the last nine years, we've built relationships and provided air quality information and exposure reduction resources in these communities.

The health impacts from wildfire smoke are not borne equally – children, elders, and people with pre-existing health conditions face greater risk. Because the air quality burden in our overburdened communities is already higher than other areas, it is especially important that community members have access to air pollution and climate resilience education and resources. Our experience providing educational workshops and sharing air quality data indicate that we are well positioned to share our knowledge on how to successfully execute trainings and educational workshops.

Specifically, we commit to:

- Promoting the group education events to our community partners as needed.
- Sharing our knowledge and resources on air quality (including wildfire smoke and wood smoke), health impacts, climate impacts, exposure reduction techniques (ex. how to construct filter-fans), and environmental justice.
- Sharing our technical expertise around air quality data and educational programming.
- Having our air quality scientists and overburdened community engagement staff present at some of the group events.

We appreciate the opportunity to work with Mother Africa and believe that their work is key in the effort to protect public health.

Sincerely,

Christine Cooley
Executive Director
Puget Sound Clean Air Agency

Personal Summary

I am an authentic, passionate, problem solving and goal-oriented leader, my experience lays on managing various aspects of programs from beginning to end with details that includes constantly supervising staff from different backgrounds, working on budgeting and make sure that everything is in the right track, support supervisee with their tasks . Specialize in planning, monitoring, appraisal evaluation, and reviewing job contributions and making any changes necessary to increase productivity.

Employment History

April 2019 – present

Company: Mother Africa

Position: Program & Operation Manager

Job description

- Responsible for the understanding of the program design for each of the programs I supervise, including the expected deliverables, timelines, and budget.
- Track program deliverables to ensure effective progress and outcomes are met.
- Meet weekly with each of your Supervisees to provide 1 on 1 supervision support of their program work.
- Provide coaching and feedback on areas supervisees are exceling and areas for growth.
- Meet bi-weekly with the Deputy Director to create continued alignment between organization vision and program implementation.
- Attend funder meetings and community meetings as needed.
- Attend program events to support staff.
- Play an active role in program evaluation for each program, collecting data and analyzing to see whether we are on track to meet metrics.
- Report any barriers or challenges in program delivery to the Directors, participate in creative problem solving.
- Draft monthly, quarterly and/or end of program reports for funders.
- Make purchases for the organization based on approved program and operations budgets, with oversight from the Deputy Director.
- Call for and run the monthly staff meeting.
- Perform annual performance evaluations for each of your supervisees.
- Ensure that all agency policies and procedures are carried out by all supervisees.
- Conduct client initial screening, assessment tools, intake interview, determine eligibility and enrolling clients.
- Provide case management services to clients; serve as an advocate on behalf of clients in need of resources and other support.
- Maintains office efficiency by overseeing office systems: organize and manage files; maintain documents, make recommendations for streamlining systems for efficiency.
- Supervise operations staff including administrative team.
- Draft and implement office policies by setting up procedures and standards to guide the operation of the office.
- Oversee procurement of all office supplies monthly.
- Procurement of all IT hardware and software and ensuring employee compliance.

April 2018 – April 2019

Company: Mother Africa

Position: Community Support Specialist

Job Description

- Conduct client initial screening, assessment tools, intake interview, determine eligibility and enrolling clients.
- Provide case management services to clients; serve as an advocate on behalf of clients in need of resources and other support.
- Coordinate support groups to connect women who are victim of domestic violence with professional facilitator.
- Act as liaison between clients and landlords in matters relating to apartment such as lease, W9 form and welcoming letters to stabilize the family housing situation.
- Make referrals and connect clients to appropriate providers and resources to reduce barriers in order for them to be ready for employment.

- Communicate with property manager regarding move in schedule and conduct unit inspect.
- Outreach to different cities to networking with other services providers to ensure client's needs are met.
- Complete and submit quarterly data and narrative reports to supervisor.
- Attend, participate and contribute to program team building by attending training and meetings.
- Maintains clients' records by reviewing case notes; logging events and progress.

May 2017 – Sep 2017

Company: Living Well Kent Collaborative - Kent, Washington

Position: Farmer`s Market Coordinator/ Administrative (Volunteer)

Job Description

- Coordinate the operations of the Farmer's Market.
- Interact with vendors, consumers, city officials and the media.
- Responsible for the collection of participation fees.
- Supervise volunteers and/or seasonal workers.
- Coordinate reservations, scheduling, monitoring and organizing market functions.
- Meets budget by monitoring expenses; implementing cost-saving actions.
- Prepares reports by collecting, analyzing, and summarizing the function of the Market
- Set up signs and barricades, tables and chairs and other related components.
- Supervise and help they youth volunteers to clean the market area, empty trash barrels, pick up litter and landscape as needed.

September 2013 – March 2017

Company: Lincoln University College - Pateling Jaya, Malaysia

Position: Head of English Language Department/ English Language Lecturer

Job Description

- Design and develop English Master program called (Master of Art in Teaching English as a Second Language (MATESL).
- Supervise the Educational operation with an additional concentration on teaching English Language as a major target.
- Prepare the departmental yearly academic calendar.
- Prepare English Placement Test (EPT) that covers the four English language skills.
- Allocate duties to English Language Center teachers and staff to ensure the smoothness of the teaching process.
- Arrange timetables for several English programs.
- Monitor lecturer`s academic activities such as; preparing students attendance list, course outline and weekly plan, subject materials, exam papers and assessments sheets.
- Encourage collaboration with other departments and academic organizational units as appropriate.
- Prepare a yearly human resource planning report.
- Conduct a monthly departmental meeting to ensure the effectiveness and efficiency of the

Academic Qualifications

MBA-Master of Business Administration (Human Resource Management) University of Ballarat,
Victoria, Australia (Nov 2006 - Apr 2008)

B.A- Bachelor of English Language & Literature
Hebron University, Hebron, Palestine (Oct 1998 – Jul 2002)

Higher Secondary (A Levels)
University Graduates Union Secondary School, Hebron, Palestine (Sep 1997- Jul 1998)

Training and Workshops

- Kent school district interpreter training – March 2019
- Mental health first aid training – Auburn 2019
- WSCADW training – Advocacy for Rookies- Lacey –(27- 28) November 2018
- 2018 DV Symposium: Capitalizing on our Success - Best Practices and the Tools that Get Us There – Seattle university 2018
- Trauma-Informed Care South Seattle college – Seattle – September 25, 2018.
- Recognizing & Responding to Human Trafficking at Work April 14th at St. Francis of Assisi Catholic Church
- Teaching English as a second language -volunteering training Feb 17th ,018) – World Relief - Kent
- Leadership Coop training – living Well Kent (June -21 & 30), (July- 19 & 21) and (Aug -16 & 26)
- Learning Outcomes Seminar and Curriculum Development -Lincoln University College- Nov 2016).

- Attended Motivational Talk Workshop - Linton University College (Feb 2016). The speakers had their great ways to inspire students and helped them to find new ways to improve their academic performances.

Language Skills

Fully fluent in Arabic and English

Personal Interests / Hobbies

Reading, traveling, tennis, and swimming

PROFESSIONAL EXPERIENCE

MOTHER AFRICA - KENT, WASHINGTON, USA

Deputy Director (November 2015- current)

- Design programs, projects and initiatives
- Supervise managers and supervisors, provide mentorship
- Design and develop monitoring and evaluation metrics and analysis
- Oversee data analysis and report drafting
- Grant writing, monitoring and management
- Create and manage annual organizational budgets, invoicing, lead for bookkeeper, CPA and annual audit engagement
- Engage with stakeholders including community leaders, service providers and government officials
- Develop internal controls and systems including board recruitment and development, financial policies, governance policies & protocols, communications & social media plans, support 3 year strategic planning process

AUTISM COMPASSION AFRICA – GHANA AND NIGERIA, WEST AFRICA

Co-Founder, Operations Director (June 2016- current)

NGO in Ghana and Nigeria West Africa providing ABA services to children with autism and their families

- Run fundraising and marketing campaigns
- Donor engagement, communications and planning fundraising events
- Bookkeeping, program budget management
- Support on the ground operations and programming

UNIVERSITY OF WASHINGTON

DEPARTMENT OF GLOBAL HEALTH - SEATTLE, WASHINGTON, USA

East Africa Diploma of Tropical Medicine and Hygiene Coordinator (September 2011- June 2014)

- Facilitate communication between 5 partner institutions: University of Washington, Johns Hopkins University, London School of Hygiene and Tropical Medicine, Makerere University (Uganda), Kilimanjaro Christian Medical University (Tanzania).
- Manage budget, coordinate faculty, develop website content
- Conducted quantitative data collection in Uganda and ran data analysis from at 12-week course evaluation, presenting findings to steering committee.

JACKSON SCHOOL OF INTERNATIONAL STUDIES, WILLIAMSWORKS & FOOTWORK, SEATTLE - WASHINGTON, USA

Global Studies Senior Research Fellow (April 2013- June 2013)

- Managed team of undergraduate students to complete research project with Williamsworks, for their client Footwork, a nonprofit working to eliminate neglected tropical diseases
- Identified funding resources available for research and program implementation in Cameroon for the client
- Provided contextual background on health system structural challenges and serving marginalized populations

DEPARTMENT OF GLOBAL HEALTH - SEATTLE, WASHINGTON, USA

Western Regional International Health Conference Coordinator (September 2011- June 2012)

Skilled event coordinator and team manager

- Conducted outreach to local organizations, engaged 20+ to participate in resource fair
- Generated co-sponsorship from 25+ academic and community institutions from the US and Canada.
- Managed planning team of 30 volunteers
- Coordinated 6 topical tracks including 20+ panel presentations and over 60 presenters and moderators
- Managed marketing, website content development and all conference logistics

DINTL - SEATTLE, WASHINGTON, USA

Independent Contractor, Gender Mainstreaming Expert (August 2013- August 2014)

- Research for development contracts with clients such as USAID, UNAIDS and African national governments, utilizing innovative approaches at results oriented development with a focus in gender mainstreaming
- Head of Research for stocktaking of national, regional, multilateral and bilateral thinking on the positioning of HIV and AIDS in the post-2015 development agenda for all 25 UNAIDS West and Central African countries.
- Program design and development for gender mainstreaming online linking and learning platform
- Marketing and social media content development lead

CONSORTIUM OF UNIVERSITIES OF GLOBAL HEALTH, UNIVERSITY OF WASHINGTON - SEATTLE, USA

Global Child Health Educational Module Project Coordinator and Researcher (September 2012- May 2014)

- Worked with author teams from various US academic institutions to develop 14 e-learner global health educational modules for pediatric residents. Provided program coordination expertise
- Contributed content and module design to the Neonatal and Maternal Health Module
- Supervised team of medical student interns

WOMEN IN PROGRESS/GLOBAL MAMAS - GHANA

Qualitative Researcher (June 2012- September 2012)

Three month field placement with nonprofit that offers women business owners in the batik and sewing industries access to international markets via fair trade systems.

- Conducted qualitative research and program evaluation on two different business models for the nonprofit
- Qualitative data analysis supported my MAIS thesis, which focused on women's empowerment and financial independence through entrepreneurship

NATIONAL YOUTH LEADERSHIP FORUM- NATIONAL SECURITY, WASHINGTON, DC, USA

Faculty Adviser (February- April 2008, January- March 2009)

- Lead diplomacy conferences for high-achieving high school students. Providing leadership for student experience including site visits, speaking events, and career guidance.
- Facilitated intense foreign policy simulation on the conflict in the Great Lakes Region of Africa. Taught classroom sessions, 30 students per session.

INTERNSHIPS

INTERNATIONAL RESCUE COMMITTEE, WASHINGTON, DC, USA

Intern (January 2010- July 2010)

- Supporting refugee clients through resettlement process. Accompanying clients to health screenings, youth vaccinations, school enrollments, ESL enrollment, and Social Security appointments.
- Facilitating education for language skills, banking and healthcare system.

MANAGEMENT SYSTEMS INTERNATIONAL - WASHINGTON, DC, USA

Intern, Human Resources and Contracts (March 2009 - May 2009)
Intern, Project Management team (June 2009- September 2009)

- Working in Project Management procedures in International Development and USAID protocol.
- Compiling expense reports, payment requests, Sub Contractor and Grantee deliverable tracking, cost-share reports, travel booking, shipping materials to the field, organizing for conferences.
- Human Resource management.

ADDITIONAL EXPERIENCE/VOLUNTEER SERVICE

CENTERSTONE, NOW BYRD BARR PLACE - SEATTLE, WA USA

Board Member, Governance Committee Chair (September 2013-December 2022)

- Advise on community needs assessments with a focus on immigrant and refugee populations
- Offer cultural competency and sensitivity lens on all new program research and development
- Chair of the governance committee responsible for recruitment, orientation, and due diligence on by-laws

AARTH SERVICES- AFRICAN AMERICANS REACH AND TEACH HEALTH MINISTRY - SEATTLE, WASHINGTON, USA

Volunteer (June 2008 – December 2008)

- Providing health services at community events focusing on immigrant and refugee population outreach and low income family health assistance.
- Offering free blood pressure tests, mammograms, health education and school supplies for families, information on HIV/AIDS prevention and awareness.

UNIVERSITY STUDY ABROAD CONSORTIUM (USAC), LUNEBURG, GERMANY

Assistant to Program Director, University of Luneburg (2006)

- Supporting USAC's Luneburg Program Director, providing administrative assistance and coordinating events.
- Liaising between USAC and European Erasmus (abroad) students, translating correspondence.
- Sending program-wide newsletters of upcoming University, USAC, and community events.

WORLD AFFAIRS COUNCIL - SEATTLE, WASHINGTON, USA

Volunteer (2008-2009, 2003-2004)

- Collaborating with community members to raise awareness of current international issues.
- Meeting with refugees, immigrants and facilitating educational events for high-school students.

EDUCATION

SUMMARY OF SKILLS

- Masters degree in International Development and Social Change.
- Extensive experience working with non-profit organizations operating in the fields of humanitarian assistance, community development, social change and social services.
- Strong advocate for refugees and immigrants, BIPOC communities, racial and social justice.
- Visionary, strategic thinker with excellent managerial and interpersonal skills.
- Fluent in two languages, Arabic and English.

PROFESSIONAL EXPERIENCE

Executive Director Nov 2015 – present
Mother Africa
Responsible for providing direction, guidance, and leadership, with primary oversight of all organizational activities. takes leadership and holds overall responsibility for upholding the mission, vision, values, and sustainability of the organization, including fund development, financial management, personnel management, program planning, administration, board relations, and community relations. Support the development of the strategic plan to ensure that programs, budget, and decision-making processes are aligned to meet the vision, mission, and values of MA. Partner with Board and staff to strengthen and pursue various sources of funding. Currently managing 24 staff, raised and managed the organization budget from $5,000 in 2013 to $1.8M in 2021.

Cross-Cultural Therapist Oct 2012 – 2018
Lutheran Community Services Northwest
Provided mental health counseling, case management, crisis intervention, information, referrals, and social services to individuals from culturally diverse, low-income backgrounds – primarily refugees, immigrants, and asylum seekers.

Domestic Violence Victim's Advocate Jan 2010 – Sep 2012
Refugee Women's Alliance (ReWA)
Provided support, case-management, advocacy, and referrals to Arabic-speaking victims of domestic violence in King County. Facilitated support groups and provided training to service providers on how to support refugees and immigrants who speak Arabic and/or are from the Muslim faith.

Family Advocate July 2007 – 2010
YWCA, South King County
Provided case management for families in emergency shelter and transitional housing. Assisted clients to determine, develop and carry out individual goals with an emphasis on safety and self-sufficiency, and monitor goal progression. Arranged necessary communications with other agencies or individuals to assist clients in securing income, emotional and housing stability. Network with other service providers to advocate for clients and establish suitable referral systems.

Peer Health Professional 2006 – 2009
Puget Sound Educational Services District (PSESD)
Conducted educational sessions for the parents of Head Start and ECAP programs in South King County on how to use the Healthwise book and dental hygiene. Helped train parents of Head Start and ECAP to become peer health educators. Provided resources and referrals as needed.

Domestic Violence Victim's Advocate Mar 2003 – Oct 2008
YWCA, South King County
Advocated for victims of domestic violence and their children. Provided crisis intervention, information and referrals, safety planning and ongoing advocacy-based counseling. Interfaced with legal advocates to guide victims through criminal justice system, attend arraignments, civil hearings and trials as needed. Developed ongoing referral relationships with health, legal and social service systems. Provided education on domestic violence to victims, community groups, agencies and special populations in South King County. Worked directly with city employees and was available in court for survivor assistance as needed. Represented the YWCA in local and regional taskforce meetings as well as conferences. Conducted support group for survivors of domestic violence. Contributed to the enhancement of program publications: brochure, flyers and other educational and training materials.

Program Assistant for Africa 1999 – 2000
Oxfam America Boston, MA
Provided administrative and technical program support for Oxfam America's regional programs in Southern and West Africa. Assured efficiency and effectiveness of the grant-making cycle through enhancing the grant application and disbursement procedures. Developed new financial documents to facilitate the routine grant audits and compiled an up-to-date partner's profile for all Oxfam America's partners in Africa. Assisted in the development of the global program database, served in two hiring committees, and managed five volunteers.

Training Facilitator 1993 – 1995
Ebony Consultants Khartoum, Sudan
Co-trained UNDP/ADS (United Nations Development Program/Area Development Scheme) staff of lower Atbara, Northern Sudan, in Participatory Rapid Appraisal (PRA) approach to program design and evaluation. Facilitated two workshops for training of trainers in PRA.

Research Assistant & Training Facilitator 1995
Cranfield Disaster Preparedness Center (CDPC) Sudan
Facilitated three interactive workshops in Sudan (Khartoum, Sinkat and El Fashir) to field test training modules designed by CDPC to meet disaster preparedness needs for NGOs operating in Sudan.

Program Officer 1992
Sudanese National Committee for Eradication of Harmful Practices Sudan
Assessed and monitored projects concerning practices affecting women and girls such as female genital mutilation (FGM), food taboos, early marriage, etc. Contributed to writing project proposals and reports.

Health Program Officer 1992
Sabah Organization for Child Care and Development Sudan
Organized health education sessions on AIDS and STDs. Provided first aid services for the street children in Khartoum.

Field Program Officer 1990 – 1992
Canadian Save the Children Fund Sudan
Managed relief and development projects for displaced persons living in shantytowns around Khartoum. Projects covered supplementary feeding centers, primary health care clinics, education, income-generation, water, and sanitation services. Managed and supervised 15 volunteers and 10 staff.

Secretary to the Ambassador 1990
Embassy of the former Federal Republic of Yugoslavia Sudan
Scheduled appointments. Translated Arabic correspondence and news journals to English. Interpreted for the Ambassador.

INTERNSHIPS

Intern 1998 – 1999
City Manager's Office for Planning and Community Development (OPCD) Worcester, MA
Assisted the Geographic Information Systems (GIS) coordinator in maintaining municipal cadastral database: adding new subdivisions, splitting and/or combining parcels, and linking data to financial/taxation records. This activity was an essential component of the City of Worcester database updates.

Intern 1998
Grassroots International Boston, MA
Assisted the Coordinator of Palestine Democratic Development Program (PDDP) and Eritrea Reconstruction and Development Program (ERDP) in following up on the partnership programs in Palestine and Eritrea. Translated correspondence from Arabic to English.

Intern 1996
Center for Development and Population Activities (CEDPA) Washington DC
Adolescent Reproductive Health and Gender Project for Sub-Saharan Africa
Maintained project database and document publications. Assisted in the organization of the workshop for US-based international organizations working in reproductive health.

ADDITIONAL EXPERIENCE/ VOLUNTEER WORK

Community Advisory Board Member Jan 2022 – Present
Center for Adjustment, Resilience and Recovery (CARRE), International Rescue Committee (IRC)

Board Member Feb 2022 – May 2022
Health Alliance International (HAI)

Advisory Board Member 2018 – 2022
Youth Development Executives of King County (YDEK)

Co-founder, Vice President 2016 – 2018
Washington State Coalition of African Community Leaders

Co-founder, Board Member 2014 – 2019
Living Well Kent

Board member 2004 – 2006
Washington State Coalition Against Domestic Violence (WSCADV)

Board Member 2005 – 2009
African Communities Network

Founder, Board President 2004 – 2015
Mother Africa

Volunteer 2001 – 2016
American Red Cross, the Seattle-King County Chapter
Language Bank: Provide interpretation and translation services to the community.

Relief Worker, Health Educator, and Community Development Practitioner 1984 – 1995
Sudanese Red Crescent Society (SRCS) Khartoum, Sudan
As an active volunteer, served as development officer and member of the executive committee for Khartoum Branch. As team leader, led relief operations intended for displaced persons' camps. Designed and implemented community-based development projects. Disseminated Red Cross/Crescent principles to volunteers and the public. Assisted in distributing Red Cross messages in collaboration with the International Committee of the Red Cross (ICRC) Tracing Agency. Trained and managed over 150 volunteers under different projects such as AIDS control, immunization, control of diarrhea diseases, primary health care, mother and childcare in many SRCS branches. Represented the organization nationally and internationally.

Girl Guides Leader 1989 – 1995
Sudan Girl Guides Association and Sudanese Aeronautical Scout Khartoum, Sudan
Organized and implemented programs that engaged youth (boys and girls) in community service and development. Managed and trained over 150 volunteers in different programs/activities such as AIDS control, leprosy control, environment conservation, etc. Represented the group nationally and internationally.

EDUCATION

MA, International Development and Social Change 1999
Clark University MA, USA
Courses covered: participatory approaches to development, development theories, gender and development, research methods, principles of mediation and conflict resolution, geographic information systems-GIS.

BS, Business Administration, Major in Management 1995
Omdurman Ahlia University Omdurman, Sudan

Accounting Technician Diploma 1990
Sudan University for Science and Technology Khartoum, Sudan

1.a. PROJECT SUMMARY

Project Title: Safer Healthy Homes

Project Location: South King County, Washington

Applicant Information:

Mother Africa
1209 Central Ave S, Suite 120, Kent WA 98032
risho@motherafrica.org
Ex. 6 - Personal Privacy (PP)

Organization Description (70/100 words):

Mother Africa's mission is to support African women, immigrants, and refugees and their families, to help them reach their highest potential. Our programs reach subcommunities such as parents of children ages 0-5, women, youth ages 6-17 and 18-24 years old, elders, and more. We address concerns such as creating community, high school completion, college entrance and success, infant mortality and maternal advocacy, parent and child connection, meeting basic needs, environmental justice, and household health.

Are you applying for the Small CBO Set Aside Track for $150,000 projects?

If yes, ensure you submit documentation with your application (such as an employee roster) verifying the number of full-time employees on staff and the associated hours per week and salary/wage details for each full-time employee.

- ☐ Yes
- ☑ ~~No~~

Project Abstract (147/250 words):

Include the main objective, activities, and outputs/outcomes of the project, including the specific geographic areas of focus.

Safer Healthy Homes (SHH) works to improve the health of immigrant and refugee families, reduce toxics in the home and pollution in the community, and insulate those in our local South King County community against disaster. To achieve these goals, SHH staff educate community members on toxic materials' identification and the dangers of mold and lead; educate on indoor air quality; demonstrate how to safely dispose of hazardous materials; provide safer, greener cleaning product alternatives through our partnership with ECOS; and develop personalized disaster plans with participating families.

Several key outcomes of this program are: participants reduce the presence of mold and lead in the home through observation and prevention; participants reduce or eliminate the presence of toxic cleaning products in the home through toxics identification and responsible shopping; local household pollution is reduced due to avoidance of household toxics and responsible disposal; and participants maintain updated and reasonable disaster plans to create climate resilience for their

families and selves.

Project Types:

- ☑ public education
- ☑ installations of air or water filtration systems
- ☑ mitigation of pollution
- ☑ remediation of lead or asbestos
- ☑ development of disaster preparedness plans

Special Considerations:

- ☑ Climate Change/Disaster Resiliency
- ☐ Rural Areas
- ☐ Health Impact Assessments

Environmental Issue:

- ☑ Air
- ☑ Water
- ☑ Waste

List of Project Partners

ECOS (business)
King County, Office of Emergency Management (local government)
King County Climate Team, Department of Natural Resources and Parks (local government)
Puget Sound Clean Air Agency (regional government)

Will you need to develop a QAPP for your project?

- ☐ Yes
- ☑ No

1.b. ENVIRONMENTAL & PUBLIC HEALTH INFORMATION OF THE UNDERSERVED COMMUNITY

Describe and characterize the underserved community directly impacted by disproportionate environmental and/or public health harms and risks and describe how the community is impacted by those harms and risks.

(i.e., Who is the community comprised of and what are the disproportionate environmental and/or public health issues they experience?)

We work across a wide, diverse set of communities, serving clients from 25 African and 10 Middle Eastern countries. Community members speak multiple languages including Arabic, French, Swahili, Lingala, Kinyarwanda, Kirundi, Kikuyu, Amharic, Tigrinya, Dari, and MaiMai, and Mother Africa interacts with them in all their native languages.

The majority of our participants and community members are considered frontline communities and are racialized as Black in the United States. Others are Middle Eastern and North African.

Most of the community members that we serve have low-income or very low-income status. These identity markers make our communities very vulnerable to negative public health impacts and environmental or climate-change related harms. These harms and negative impacts come from a variety of sources. According to the University of Washington Climate Impacts Group, these communities also have stronger rates of asthma, face more barriers to quality healthcare, and have more difficulty evacuating during emergencies.With a projected increase in wildfires and air quality impacts, there will be prolonged periods of smoke and poor air quality in King County, making emergency preparedness planning critical for these communities, reports the Puget Sound Clean Air Agency's 2020 Air Quality Summary Report.

Air quality and pollution:

> Black and low-income communities are also disproportionately, negatively affected by air pollution at home. The EPA's Climate Change & Social Vulnerability in the United States report also states that low-income communities are 15% more likely to be threatened by higher childhood asthma diagnoses due to poor air quality while Black communities are even more likely at 34%. A study published by Nature journal titled "Air pollution exposure disparities across US population and income groups" reported that "areas of the U.S. with lower income groups have been exposed to higher average PM2.5 levels [particulate air pollution] than areas with higher income groups."
>
> Additionally, many low-income families struggle to achieve and maintain proper *indoor* air quality. The NIH's "Mold and Your Health" states that "Indoor concentrations of pollutants, such as mold, tend to be higher in low-socioeconomic status households." The NIH also links mold to adverse health outcomes, including asthma chiefly, but also allergic reactions, inflammation, and negative immune system changes.

Household toxics and wastewater pollution:

> The EPA is itself concerned with water pollution due to household products, especially toxic cleaning supplies. In an online resource published in June 2022 (https://www.epa.gov/greenerproducts/identifying-greener-cleaning-products - Two), the EPA listed the following methods of household pollution as causes for concern regarding local water quality:
>
> - Residual cleaning product chemicals washed/rinsed down drains.
> - Biodegraded surfactants broken down into "more toxic, persistent, and bioaccumulative chemicals", impacting water quality and aquatic population health.
> - Volatile organic compounds in cleaning products emitted into the air and creating smog; due to the hydrological cycle, this plays a role in reduced water quality.

Lead exposure:

> The CDC lists low-income communities as those with the highest risk of lead exposure–in large part due to the older build houses which comprise much of low-income housing. The CDC also explicitly identifies refugee and immigrant families as a population at high-risk of lead exposure, both from their home countries as well as from exposures in the United

States. They may encounter it through many sources–for example, a testing event run in 2022 by the Public Health - Seattle & King County found cultural cosmetics such as kohl eyeliner to be up to 84% lead! Overall, 11% of products tested through this event contained "concerning amounts of lead".Furthermore, in a 2019 series of testing events hosted by the King County Lead & Toxics Program, King County Medical Society, and Washington Poison Center and funded by the CDC, test results found that approximately 4% of the local children tested had elevated levels of lead in their blood. These tests were administered specifically to low-income households and children of color.

What are the environmental/public health issue(s) that the project seeks to address? What are the environmental/public health results the project seeks to achieve and how will the underserved community benefit from those results?

We aim to achieve the following long-term results from our shorter outcomes.

Air quality and pollution:

We educate our communities on the importance of ventilation and air purification, the management of moisture control, the adverse health effects of mold exposure, and the methods for mold testing.

1. Maintenance or reduction of participating families' reported respiratory conditions.

   Short term efforts: Increase community members' awareness of mold growth conditions and adverse impacts of mold exposure as well as non-toxic remediation techniques.

   Intermediate term efforts: Increase community members' household mold prevention.

Household toxics and wastewater pollution:

We empower our participants to reduce household toxics by selecting healthier and greener alternatives, both for the health of their families and homes as well as for the health of their communities at large.

1. Improved household health pollution due to decreased toxics usage.

   Short term efforts: Increase community members' awareness of toxics in household cleaning products.

   Intermediate term efforts: Increase household selection of greener, non-toxic cleaning products when shopping for supplies.

2. Decreased toxics concentration in local water systems.

   Short term efforts: Increase community members' awareness of local environmental impact of improper toxics and medication disposal and of available local proper disposal techniques.

   Intermediate term efforts: Increase in utilization of proper disposal techniques and reduction of improper disposal into wastewater.

Lead exposure:

We educate our participants on the potential types of lead exposure and the consequences of those exposures, especially for young children. We empower them to protect their

families with blood lead tests to check for lead levels, and if elevated levels are detected, we connect them to care to stay healthy and safe. Additionally, we connect them to local product testing events to check household items (cooking pots, ceramics, makeup, spices, toys etc) for lead.

1. Decreased use of products that often include high lead content.

   Short term efforts: Increase community members' awareness of potential lead exposures and its adverse impacts.

   Intermediate term efforts: Increase data on which household products contain high lead content.

2. Increased referrals to lead poisoning support providers.

   Short term efforts: Increase community members' awareness of potential lead exposures and its adverse impacts.

   Intermediate term efforts: Increase families' lead level blood testing.

If your project relates to one or more of the other factors in Section V (e.g., Health Impact Assessment, Rural Areas, Climate, or Disaster Resiliency) include additional details about how the project addresses those factors in this section.

Our fourth concern addressed by Safer Healthy Homes is climate change and environmental disasters:

> The EPA itself in its Climate Change & Social Vulnerability in the United States report identifies Black and low-income communities as two of the communities most vulnerable to climate related disasters. According to this report, communities identified as Black are 10% more likely to live in areas where they will be impacted by property loss due to inland flooding and 11% more likely to be similarly impacted by coastal flooding. Low-income communities are 16% more likely to be impacted by property loss due to coastal flooding and 11% more likely to suffer fatalities due to extreme temperature.

This will yield the long-term outcome of:

1. Increased local refugee and immigrant families' confidence to persist safely through disaster.

   Short term efforts: Increase families' awareness of the need for disaster preparedness.

   Intermediate term efforts: Increase families' continued maintenance and revision of disaster plans and supply stocks.

1.c. HISTORICAL CONNECTION TO UNDERSERVED COMMUNITY

Describe the history of your organization's involvement with the underserved community, including the duration of involvement and circumstances that led to your organization's involvement.

Mother Africa is not only involved with our communities but embedded in them. The history of our organization is a history of our communities, because we represent our underserved

communities. Mother Africa was founded in 2004 by Risho Sapano, now our Executive Director. As a Sudanese immigrant woman, Risho knew firsthand the challenges immigrant and refugee women and their families face. Risho realized that African refugees and immigrants lack opportunities to sit at decision making tables, to have a say in the decisions that impact them most. They face many barriers that ultimately slow down their progress and ability to thrive. Navigating systems to access resources that meet basic needs, employment, education, and healthcare is frustrating and almost prohibitively challenging. In response to this reality, she created Mother Africa, whose mission is to support African women, immigrants, and refugees and their families, to help them reach their highest potential. We use many strategies, which depend on the community's need, voice, and strengths. We create collective power in our communities by educating women about specific issues and empowering them to take action while providing the resources and means to do so.

Mother Africa's leadership very closely matches the communities that we serve. 92% of our staff are immigrants or refugees from African and Middle Eastern countries themselves. 66% of our board are immigrants or refugees. (The additional 34% of our board have all lived or worked in African countries and are thus connected to our served populations that way.) 100% of both our staff and Board of Directors are women.

Describe how the organization has worked with the underserved community's residents and/or organizations to address local environmental and public health issues currently or in the past and what are some of the results of that work. Include information about recent efforts in the community, if any, that have sought to address the disproportionate issues you described in 1.b.

At the beginning of our Safer Healthy Homes history, we partnered with the King County Department of Hazardous Waste, who funded us through a co-creation process, pilot launch, and two-year expansion. With community feedback, we co-created a database of materials that our team translated into Arabic, French, and Somali, ensuring communication materials reached our community members. We included photos of people to whom our community can connect, like black families and individuals in hijab. Our community expressed that they felt more included and considered in county activities and that they were finally able to access and engage with pollution and environmental justice resources which had been previously withheld from them due to language and cultural barriers.

We also run another environmental justice program called Waste4Purpose (W4P). We aim to decrease the amount of food that will enter the disposal system. Food waste sent to the landfill, rather than being composted, significantly contributes to greenhouse gas emissions. Mother Africa engages with local community members to educate them on food waste reduction strategies such as composting, recycling, and gardening.

We have a strong partnership with Tilth Alliance; their staff members present to our program participants each month on W4P topics identified by our program participants themselves. This partnership provides powerful knowledge about food waste reduction and composting, and our participants have become strong advocates for the importance of utilizing these approaches. We partner with Living Well Kent. Recently, they allowed us to build a composting station at their greenhouse site in Auburn.

As our program grows, our participants have expressed the desire to see the youth of our communities intentionally included as well. (By nature of involving families in W4P, the children also became involved.) Due to this feedback, we plan to host workshops in the summer months specifically designed for the youth engagement in our learning activities. Our staff have noticed how engaged and excited they are becoming about food waste reduction, composting, and creating a clean environment for their futures.

Mother Africa also has an ongoing relationship with Seattle King County Public Health, working on several projects that focus on lead impacts in our communities. These include product testing for lead in common household items that our communities frequently bring over from their home countries, serving on the Health Advisory Committee around lead and toxics to advocate with landlords and health professionals that serve young children, as well as running a campaign to raise lead poisoning awareness for families with young children.

Community Driven Participation: How the underserved community's residents and/or organizations were involved in developing the current project plan and are part of the decision making process.

Community involvement is essential to program success and value community feedback and critique; we prove this through our co-creation process. Our community listening sessions and program surveys are strategies in our co-creation approach to program development and iteration. We regularly collect and evaluate data through pre and post surveys, listening sessions, and 1:1 and group interviews. We take an iterative approach where program participants' feedback guides and directs improvements at consistent intervals. By involving our community consistently in program creation processes including ongoing growth and improvement, we meet specific, self-expressed needs for our clients.

An essential part of our evaluation plan for Safer Healthy Homes specifically includes a pre-programming survey period completed by incoming participants as well as a post-programming survey period for our outgoing participants. Pre-programming feedback helps us to tailor our programming according to our incoming cohort and post-programming feedback informs our program design for the next cohort.

1.d. EJCPS MODEL

Provide a clear and concise description about which of the seven elements of the EJCPS Model will be undertaken for this project. Also, describe which EJCPS Model element(s) associated with this project may have already begun or been accomplished.

For example, EJCPS Model Element 1 – Community Vision and Strategic Planning may have occurred prior to applying. The EJCPS program focus is on developing and implementing solutions; it is anticipated that applicants may have already accomplished some aspects of EJCPS Model elements.

Mother Africa anticipates incorporating all seven elements into our Safer Healthy Homes program design, implementation, and execution. We've found this model to be very helpful in articulating specifically the elements that make our environmental justice activities successful.

As this is a current program (not a new one), we have already completed several elements of the

EJCPS Model, including 1. Issue Identification, Community Vision, and Strategic Goal Setting; 3. Consensus Building & Dispute Resolution (largely this has been accomplished, but we understand that with four partners, this will likely be an ongoing effort); 4. Multi-Stakeholder Partnerships & Leveraging of Resources; and 5. Constructive Engagement by Relevant Stakeholders.

In the project term, Mother Africa will further implement the following elements of the Model: 2. Community Capacity-Building & Leadership, which is re-engaged with each new cohort; 6. Sound Management & Implementation–we have already essentially completed this task as we believe successful sound management and implementation should begin in the design/goal-setting phase, but will continue to monitor throughout active programming with an eye to this element to ensure its success; 7. Evaluation, Lessons Learned, & Replication of Best Practices, which is an ongoing and continuous process for Mother Africa, although through previous iterations of Safer Healthy Homes we have already learned much and implemented many lessons.

1.e. PROJECT LINKAGES

Briefly describe how the project supports EPA Strategic Plan Goal 2, Objective 2.1 (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels). https://www.epa.gov/planandbudget/strategicplan

We help to advance Goal 2: Take Decisive Action to Advance Environmental Justice and Civil Rights, Objective 2.1: Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels by targeting sub-communities often left out of these conversations–African and Middle Eastern immigrant and refugee families. The EPA has identified three strategies to achieve this goal, and Mother Africa's Safer Healthy Homes contributes to two of three in our work:

Building capacity and climate resilience and maximizing benefits to overburdened and underserved communities.

> Mother Africa is a community-led organization that is trusted and loved by our community members. Collaborating with Mother Africa allows one to collaborate directly with our underserved African and Middle Eastern immigrant/refugee communities. Real, durable impact is created when communities hold the power to shape their circumstances and take control of their surroundings. This is why Safer Healthy Homes works to directly empower community members and engage them in environmental justice and anti-pollution work, for their own benefit as well as that of their communities.

Engaging and supporting federal, state, and local governments to achieve results in communities.

> Safer Healthy Homes partners deeply and closely with county (King) and regional (Puget Sound) government agencies and works to both align with and influence government priorities and activities to the needs of our under-recognized communities. This program provides EPA the opportunity to take part in the same.

1.f. PARTNER & COLLABORATE

Describe how the project will accomplish its goals through the use of appropriate and diverse partnerships from multiple stakeholder groups, such as industry, business, academia, government, etc.

Partnership is necessary to leverage resources and scale impact for our local communities. Mother Africa hopes that by engaging ECOS as a business partner for this project, it will promote non-toxic consumership within our communities and help contribute to a community ripple effect that will raise greener and non-toxic product choices above their toxic counterparts. By bringing non-toxic alternatives to the forefront of our communities' consciousness, we will improve household health and local wastewater pollution.

Our close partnership with county and regional government agencies aim to leverage current government initiatives and work on our identified topics as well as embed the consideration of our communities in future government activities. Our government partners will also increase our design and evaluation capacity by serving as technical experts who can ensure excellent data hygiene and pursue evaluation partnerships (discussed in 3.b.), leaving Mother Africa's program staff to focus on close connections with our participants.

Identify and describe all partners involved, including those partnerships that may be under development.

Include the following details about each of your partners: Planned roles of each partner listed in your Project Summary, how each partner will contribute to the project, what resources each partner brings to the partnership, how the partner has a vested interest in working with this partnership [other than just getting income from a sub-award or contract], how the applicant organization plans to maintain and sustain these relationships on into the future.

If you intend to fund the partner's participation in the project describe how the proposed financial transaction complies with applicable requirements in 2 CFR Part 200 on competitive procurement or for subrecipients EPA's Subaward Policy or EPA Guidance on Participant Support Costs.

We will collaborate with four partners for this programming.

ECOS:

> ECOS is a business stakeholder who will provide an in-kind donation of 350 Safer Choice certified, green, non-toxic cleaning kits for distribution during our household toxics and pollution reduction module. ECOS describes their brand as "built on ethics, empathy and environmental and social justice." They engage in productive lobbying and advocacy and find it important to materially support and partner with smaller organizations working towards their priorities: "championing safer products and ingredient transparency, taking climate action for people and the planet, caring for workers and families, and seeing a greener future."
>
> Mother Africa met ECOS CEO, Kelly Vlahakis-Hanks, at the EPA Safer Choice

Partner and Stakeholder Summit in 2022.

King County Office of Emergency Management:

The Office of Emergency Management is a local government stakeholder who will partner with us using a "train the trainer" model. OEM trainers will train our SHH program staff members, as well as our program supervisor, in emergency and disaster preparedness planning during the program design period of our program plan as well as provide reference resources. Then these Safer Healthy Homes staff members will utilize that training from OEM to elevate the quality of our disaster preparedness training disseminated to program participants.

Mother Africa first developed our relationship with OEM in 2022 and they have since been interested in finding ways to engage and serve our communities. We are currently working on another small project together to develop videos in the languages spoken by our communities about disaster preparedness for use at the county level. We have been seeking a larger scale opportunity to collaborate directly, and they were immediately enthused when we came to them with this proposal. We believe that this will strengthen our existing relationship and pave a path for a closer one in the future.

This partnership will include a sub-award contract for provision of technical expertise in the form of staff hours and materials, estimated at $8000. Subrecipients will only receive reimbursement for their actual direct or approved indirect costs such that they do not "profit" from the transaction and subrecipients are subject to the same Federal requirements as the pass-through entity.

King County, Department of Natural Resources & Parks (DNRP), Sustainable Resilient Frontline Communities (SFRC) Team:

We partnered closely with the SFRC team at King County first in 2018. We worked together to adapt an infographic about climate change into Arabic and provide culturally relevant visuals for our communities to increase the infographic's impact. Mother Africa has been an active member of the Climate Equity Community Task Force since 2019, led by the SFRC team. DNRP's SFRC team and Mother Africa are both key partners on the implementation of the King County Strategic Climate Action Plan (SCAP), updated every five years. The 2020 SCAP launched the first climate equity framework for King County in a new section entitled Sustainable and Resilient Frontline Communities (SRFC). SFRC leads will serve as thought partners and share their technical expertise and any relevant materials to support and guide introduction of climate resilience and preparedness content and messaging.

The DNRP is already invested in the well-being and inclusion of our immigrant and refugee communities, evidenced by their continued partnership with Mother Africa. The SFRC team is excited about this opportunity as a way to align further work with the Climate Action Plan and prepare future iterations of the Plan that will be inclusive to all members of King County.

This partnership will include a sub-award contract for provision of technical

expertise in the form of staff hours, estimated at $26,000. Subrecipients will only receive reimbursement for their actual direct or approved indirect costs such that they do not "profit" from the transaction and subrecipients are subject to the same Federal requirements as the pass-through entity.

Puget Sound Clean Air Agency (PSCAA):

The PSCAA serves as the air quality regulatory body for King, Kitsap, Pierce, and Snohomish Counties. We have a close partnership with members of the staff via the Climate Equity Community Task Force through King County DNRP, of which we are all members. We then first engaged with the PSCAA in 2022 when they attended our Annual Health & Wellness Fair with a resources booth to engage the community about indoor air quality. Now, they will partner with the Safer Healthy Homes program by offering technical expertise on air quality data; promoting SHH to community partners during their recruitment periods; sharing resources and knowledge with program staff regarding air quality, health ramifications, climate impacts, and exposure reduction strategies; and lending air quality scientists and overburdened community engagement staff to group workshops.

PSCAA is independently invested in serving historically overburdened communities, evidenced by their air quality environmental justice mapping tool which works to identify those overburdened communities so that PSCAA can adequately direct and target their efforts. Thus, their values and priorities create a natural alignment with the work of Safer Healthy Homes and Mother Africa.

2.a. PROJECT ACTIVITIES

Provide a clear description of the steps the applicant will take to meet the program objectives and execute the project. Provide clear descriptions and details for each project activity or component and the anticipated products/results associated with each activity.

An important consideration when reviewing Mother Africa's programming is that all program activities will be conducted in our participants' native languages. Safer Healthy Homes will reach between two and four language groups, depending on the multilingual status of the two program staff we will hire for this project. We will host 4 workshops per cohort, each 2 hours long on a specific topic, and follow-up individual coaching sessions for each participating family to ensure task completion and knowledge cementation.

Air quality and pollution:

Workshop 1: Cohort workshop will focus on the topic of air quality and pollution, with a specific emphasis on educating attendees on indoor air quality and the negative health effects of mold in the home.

After the group workshop, staff members will meet with participating families in one-on-one coaching sessions to refine workshop takeaways and complete workshop tasks, such as at-home mold and air quality testing. Depending on family need, more than one coaching session may be offered.

Household toxics and wastewater pollution:

Workshop 2: Group workshop on how to identify toxics in cleaning products (reading warning labels), how to make safe and affordable cleaning solutions at home, how to look for Safer Choice labels on certified products, and what are the available safe disposal procedures locally for existing toxics in the home. Staff will distribute our partner-provided ECOS cleaning kits to build non-toxic cleaning habits in participants.

Lead exposure:

Workshop 3: Group workshop on potential lead exposures, the risks of those exposures, and lead level blood testing. Coaching sessions will connect participants to testing sites and opportunities, and staff will connect participants to lead product testing events at Mother Africa's offices, during which participants can bring their personal items (cookware, ceramics, cultural makeups, toys, etc.) to be tested for lead content.

If blood tests reveal lead exposure (typically in children), then staff will provide referrals to child development, healthcare, etc. providers who can support families through lead exposures.

Disaster preparedness:

Workshop 4: Group workshop on local disaster risks and demonstration of developing personalized and tailored disaster plans for families. These plans will include essential details such as rendezvous and evacuation points; shelter-in-place plans, current and necessary resources and emergency kit creation; and emergency contacts. Follow up individual coaching will ensure that participants are able to complete their disaster preparedness plans.

2.b. MILESTONE SCHEDULE

Include a clearly articulated/organized milestone schedule, detailing timeframes and major milestones to complete significant project activities within the three-year period of performance.

Program Design (November 2023-April 2024)	Cohort 1 (May 2024-October 2024	Cohort 2 (November 2024-April 2025)	Cohort 3 (May 2024-October 2025)	Cohort 24 (November 2025-April 2026)	Program Evaluation (May 2026-October 2026)
Partnership fulfillment and design activities including inventory delivery, staff training, curriculum creation, strategic planning, etc.	Month 1: Recruitment, outreach. Month 2: Pre-program survey. Month 3: Workshop 1-air quality and pollution, 1:1 coaching session. Month 4: Workshop 2-household toxics and wastewater pollution, 1:1 coaching session, non-toxic ECOS cleaning kits distribution. Month 5: Workshop 3-lead exposure, 1:1 coaching session, lead product testing Month 6: Workshop 4-disaster preparedness), 1:1 coaching session, disaster plan creation, and post-program survey.	See Cohort 1 schedule.	See Cohort 1 schedule.	See Cohort 1 schedule.	Quantitative and qualitative evaluation including comprehensive data collation, data evaluation, community listening sessions, etc.

3.b. PERFORMANCE MEASUREMENT PLAN

Applicants should describe how they plan to track and monitor their project performance and progress throughout the project period. Applicants will be evaluated on the extent and quality to which the application demonstrates a sound plan for tracking progress towards achieving the expected outputs, outcomes, and associated timeframes for achieving those results.

Mother Africa has a long history of strong program evaluation and iteration. The following outcomes will be tracked by participant self-description as measured in our pre-programming and post-programming surveys. These surveys are built into our programming structure (see 2.b. above):

Increase community members' awareness of toxics in household cleaning products.

Increase community members' awareness of local environmental impact of improper toxics and medication disposal and of proper disposal techniques.

Increase families' awareness of the need for disaster preparedness.

Increase community members' awareness of potential lead exposures and its adverse impacts.

Increase community members' awareness of mold growth conditions and adverse impacts of mold exposure on indoor air quality and health.

Increase community members' awareness of potential lead exposures and its adverse impacts.

Increase data on which household products contain high lead content.

The following outcomes will be measured by an annual follow-up survey distributed to previous participants a year after the completion of their Safer Healthy Homes cohort:

Increase household selection of greener, non-toxic cleaning products including Safer Choice certified products when shopping for supplies.

Increase in utilization of proper disposal techniques and reduction of improper disposal into wastewater.

Increase families' continued maintenance and revision of disaster plans and supply stocks.

Increased local refugee and immigrant families' confidence to persist safely through disaster.

Increase families' blood lead level testing.

Increase community members' household mold prevention.

Improved household health due to decreased toxics usage.

Decreased use of products that often include high lead content.

The following outcomes will be measured by Mother Africa's internal client record tracking, with data prior to this project compared to data after this project:

Increased referrals to lead poisoning support providers.

Maintenance or reduction of participating families' reported respiratory conditions.

The following outcome will be measured through collaboration with the local Water Treatment Division, by comparing pre-Safer Healthy Homes data from our participants' neighborhoods with post-Safer Healthy Homes data:

Decreased toxics concentration in local water systems.

3.c. SUSTAINABILITY PLAN & COMMUNITY VISION

Describe plans to utilize the results and momentum of the proposed project to come closer to achieve the community's goals and objectives. Details about current work and initiatives in the community, and how the community has a vested interest in sustaining the project's momentum into the future should also be included. If applicable, applicant should also describe how the activities and results of their project can be used in communities elsewhere.

This is an expanded format of our current Safer Healthy Homes program. Mother Africa takes program feedback and iteration seriously in our work, and we see this as an invaluable opportunity to learn and grow in SHH. We began Safer Healthy Homes in 2019 and over the last four years, we have developed it–with feedback from our communities and partners–into a program which earned the EPA 2022 Safer Choice Partner of the Year Award. By expanding our partnerships this year and collaborating so closely with the EPA, we will be able to inherit and generate much shared wisdom that will inform not only the cohort iterations within this project, but the larger iterations of Safer Healthy Homes after 2026.

Over the last several years, community members have expressed a genuine enthusiasm for environmental justice work. In fact, the launch of Safer Healthy Homes was precipitated by community request and interest in this work. Our community members want to participate in this work, secure the health of their families, and assist in promoting the health of their local community. However, due to language, cultural, financial, and other barriers, our immigrant and refugee communities are more often than not excluded from opportunities to engage with environmental justice. We are confident that their interest will continue, as it has not wavered yet, but in fact only grown, as evidenced by our program waitlists.

We are a part of several local coalitions and cooperatives and value sharing best practices and learned wisdom wherever possible. We are always happy to share our environmental justice expertise with CBOs and providers in other communities in hopes that others can benefit from our lessons learned.

4.a. ORGANIZATIONAL EXPERIENCE

As related to the proposed project and their infrastructure as it relates to their ability to successfully implement the proposed project.

Mother Africa has managed our suite of environmental justice programming for over five years. This includes our Safer Healthy Homes program and Waste4Purpose program. We have several longstanding partnerships including the King County Hazardous Waste Management team, who was our original funding partner for the first four years of Safer Healthy Homes. (Further partnerships are discussed in 1.c. and 1.f.)

Our previous grants (see 5.0.) prove that we have a strong track record of collaborating with larger funders on program design, implementation, and execution. The Safer Healthy Homes programming detailed in this proposal is an expansion of the programming we have offered to our community for years and an opportunity for us to serve more community members as we learn. Our program staff and leadership staff is well prepared to manage and engage with Safer Healthy Homes in its expansion, as they have all been deeply involved with previous iterations of the program from inception. This also equips them to comprehensively educate and train the two incoming program staff we will hire to increase capacity to support this project.

4.b. STAFF EXPERIENCE / QUALIFICATIONS OF PROJECT MANAGER (PM)

Provide information that clearly demonstrates that the proposed PM and other staff associated with the project are qualified to perform the project successfully. This will be determined through the description of the following:

- Why the PM and associated staff are qualified to undertake the project;
- Illustrating the PM's ties/historical connection to the community and the applicant organization. Please include detailed descriptions of any activities that the PM has worked on with the community and/or applicant organization.

All three leadership team members including our PM have worked on the development and implementation of Safer Healthy Homes since its inception in 2018.

Founder & Executive Director, Risho Sapano founded Mother Africa in 2004 (more historical context in 1.c.). She stewards relationships with all our partners and provides vision on our program designs, including for SHH.

Deputy Director, Colleen Alabi has worked for Mother Africa for 11 years and was part of the implementing design team of SHH. She provides grant monitoring and reporting, invoicing, and financial tracking for all Mother Africa programs.

Program Manager, Kholoud Naser Aldeen has worked for Mother Africa for six years and was part of the implementing design team of SHH and has provided ongoing program management throughout the history of this program to date.

Program Supervisor, Rasha Elshaarawi started as a health promoter on our team at the beginning of the program in 2019, serving French and Arabic speaking communities. She was then promoted to Senior Program Coordinator in 2022, and will be promoted to Program Supervisor with this grant award. With her hands-on experience delivering the program activities for the past three years, she is well positioned to

onboard and support new health promoters to effectively serve in this role.

4.c. EXPENDITURE OF GRANT FUNDS & COMPLIANCE PLAN WITH EPA's Pre-award Compliance Review for Nonprofit Organizations

Mother Africa has effectively stewarded multiple King County grant funds upwards of $500,000 each over the past several years. We have also effectively stewarded Washington State funds (Department of Ecology) in the amount of $240,000. Our grants are expended in a timely and efficient manner. We have conducted annual independent audits the past 2 fiscal years with no findings, as well as fiscal desk monitoring with King County with no findings. We have no concerns about being able to comply with the EPA's Pre award Compliance Review for Nonprofit Organizations.

5.0 PAST PERFORMANCE

Submit a list of federally and/or non-federally funded assistance agreements that your organization performed within the last three years. Assistance agreements include grants and cooperative agreements, but not contracts. List no more than 5 agreements.

We do not have any federally funded agreements to date. Here are 5 of our largest Non-federally funded assistance grants:

1. King County Best Starts for Kids Universal Developmental Screening.
2. King County Best Starts for Kids Innovation Fund. This was completed in 2022 and led to a new award in a different department.
3. King County Best Starts for Kids Youth & Family Homelessness Prevention Initiative.
4. Washington State Department of Ecology Public Private Partnerships, Solid Waste Reduction.
5. Department of Social and Human Services Office of Refugees and Immigrants sub-contract award for Refugee Youth Mentorship Program (sub-contract of World Relief).

All 5 of these contracts have been successfully run. Four of the five programs are currently active, with timely expenditure and reporting on all anticipated outputs and outcomes. All 5 programs have had acceptable final technical reports submitted under these agreements, leading to contract extensions or new awards.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: South Willamette Solutions

Address: 48513 Hwy 58, Ste 5

City: Oakridge

State: OR: Oregon Zip Code: 97463

B. Unique Entity Identifier (UEI): SQD3M1XTDLZ7

C. Applicant/Recipient Point of Contact

Name: Sarah Altemus-Pope

Phone: Ex. 6 Personal Privacy (PP)

Email: director@southwillamettesolutions.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Sarah Altemus-Pope	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

EPA KEY CONTACTS FORM

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Authorized Representative: *Original awards and amendments will be sent to this individual for review and acceptance, unless otherwise indicated.*

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Relevant Professional Experience

Southern Willamette Forest Collaborative
Project Manager- RARE AmeriCorps *September 2022 - July 2023*
Outreach Coordinator- RARE AmeriCorps *September 2021 - July 2022*

- Co-authored grant proposals for, managed implementation of, and monitored over $700k worth of successful wildfire mitigation projects
- Convened and facilitated interagency meetings between local, county, state, and federal fire officials alongside cooperating residents in the county's first Fire Safe Council
- Facilitated the Recreation Committee, bringing together recreation economy stakeholders to share information with, and provide input to, US Forest Service staff
- Conducted over 100 assessments advising residents on reducing wildfire risk to their homes
- Convened and facilitated a Community Disaster Readiness Group in order to begin integrating the community into effective all-hazards emergency management

Thurston Community Garden *March 2021 - December 2022*
Garden Manager

- Managed and coordinated over 20 gardeners, performing manual labor as well as resolving conflicts, liaising between partner organizations, and managing volunteers

Lincoln Southwest High School *August 2014 - March 2019*
Public Forum Debate Coach

- Wrote monthly policy analyses on wide-ranging topics for educational use
- Coached, supervised at tournaments, and created lesson plans for high school debaters

Volunteer Experience

Westfir-Oakridge Local Food Hub (WOLFH) *March 2020 - Fall 2022*
Secretary

- Helped to form a nonprofit dedicated to food security and community building in and around Oakridge, OR

Thurston Food Pantry *March 2021 - Fall 2022*
Steering Committee, Food Delivery Volunteer

- Harvested fresh produce from the community garden and distributed food boxes at a local mobile home park

Alternatives to Violence Project *December 2017 - May 2018*
Volunteer Facilitator

- Facilitated conflict resolution workshops, primarily with inmates on work release

Proyecto Chico Mendes *February 2014 - April 2014*
Restoration Technician

- Volunteered as a laborer to help re-establish a culturally important tree species in rural Guatemala

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Lane Regional Air Protection Agency

Dear EPA,

Lane Regional Air Protection Agency (LRAPA) is the regional air authority for Lane County, and we are strongly committed to providing clean air and reducing PM2.5 in Oakridge. LRAPA has been a partner with the Southern Willamette Forest Collaborative (SWFC) project from the beginning, as a member of the community air attainment group that eventually led to the community firewood program and two EPA Targeted Airshed Grant (TAG) awards that LRAPA administers under the banner of Oakridge Air. SWS is contracted by LRAPA to deliver Oakridge Air home heating upgrades and community outreach, and we work closely together to provide smoke education and messaging to the community.

Public health and fire adaptation are intertwined in Oakridge, and we fully agree that the most vulnerable to fire and smoke should be engaged with first. In 2022, the Cedar Creek Fire, located 15 miles east of Oakridge, burned 127,311 acres of forest and wilderness land in the Willamette National Forest. This lightning-caused fire required the mandatory evacuation of Oakridge and severely impacted air quality. Between September 1 and October 31, 2022, 37 days experienced 24-hour averages above health-based standards set by the EPA.

Adding capacity through this grant proposal would be instrumental in reducing wildfire risk to the community, maintaining the community Firewise program, and moving Oakridge-Westfir towards becoming a fire-adapted community.

LRAPA commits to partnering with Oakridge Collaborative Wildfire Resiliency and Adaptation Project in the following ways:

- Coordinating with SWS to provide effective public education on the dangers of smoke through the Oakridge Air and SWFC projects;
- Using our networking resources to help SWS reach the people who have the highest need;
- Continuing to participate in the annual Community Wildfire Safety Night;
- Assisting where the Oakridge Air project smoke outreach coincides with this project.

LRAPA is dedicated to equitable public health outcomes and recognizes that funding for added capacity through the EJCPS grant would be beneficial to this goal.

Sincerely,

Steven A Dietrich

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for the Middle Fork Ranger District of the Willamette National Forest

Dear EPA,

The Willamette National Forest would like to register its support for the South Willamette Solutions (SWS) application to the EPA EJCPS grant. The Middle Fork Ranger District (MFRD) is located in Westfir, Oregon and works with the SWS on projects that benefit the National Forest System and the local communities.

The Oakridge-Westfir area is completely surrounded by Forest Service lands, and cooperation is both mutually beneficial and critical to resilience and equitable outcomes in the face of wildfire. Wildfire is a common occurrence on MFRD. In 2023, the Cedar Creek fire affected 15% of the MFRD and caused a level 3 evacuation of Oakridge-Westfir. MFRD staffs a full fire crew, 4 engines, and a call when needed helicopter each season. The MFRD regularly participates in mutual aid initial attack when called and has responded to numerous brush fires in town.

SWS has proactively worked to encourage the local community to adopt fire-adaptive practices. They have facilitated consistent, effective lines of communication and opportunities for planning between our agency and community members. In 2021, these efforts led to Firewise redesignation for the greater Oakridge-Westfir area and official designation for the City of Oakridge. Educating the community and encouraging property improvements not only helps the city in the event of fire, but it allows greater access for managing fires on Forest Service land and can help prevent the growth of fires. SWS engaged Forest Service staff to help complete Firewise assessments and facilitates discussions for cross-boundary treatments with private landowners, state agencies, and other stakeholders.

The Oakridge Collaborative Wildfire Resiliency and Adaptation Project (OCWRAP) seeks to address these challenges by taking SWS's recent success in mitigation and focusing on the most vulnerable residents. Facilitating community engagement and promoting sustainable practices that reduce the impacts of wildfires and smoke exposure are important functions that SWS provides. The Willamette National forest provides $20,000 funding annually for the SWFC through Challenge Cost Share agreement, 22-CS-11061800-022, Southern Willamette Forest Collaborative Capacity Building and Coordination. Our contribution to the OWCRAP EJPCS project will include:

1. Enhancing safety and risk reduction through prioritized fuels reduction projects and wildfire mitigation efforts.

2. Provide technical assistance for cross boundary field reduction projects and prescribed burning.
3. Continue to participate as an advisory member to the South Willamette Solutions board of directors.
4. Continue to participate in monthly SWFC meetings including the fire safe council and implementation advisory committee.
5. Provide meeting space for collaborative meeting and workshops at the Middle Fork Ranger District.
6. Provide SWS access to ArcGIS Online and share relevant spatial data through ESRI for planning purposes.

If there are further questions about our work with SWS, please don't hesitate to call Molly Juillerat, Middle Fork District Ranger Ex. 6 - Personal Privacy (PP) or Cameron Mitchell, Deputy District Ranger Ex. 6 - Personal Privacy (PP) for further information.

Sincerely,

MOLLY JUILLERAT

"STEWARDSHIP IN FORESTRY"

April 3, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Oregon Department of Forestry

Dear EPA,

Oregon Department of Forestry (ODF) would like to register support for the South Willamette Solutions' (SWS) proposal for the Oakridge-Westfir Wildfire Resiliency and Adaptation Project (OWWRAP). This project will add crucial capacity to the community's efforts to reduce wildfire risk, become wildfire adapted and improve interagency coordination. The Cities of Oakirdge and Westfir have been identified as priority areas for wildfire risk mitigation due to the location within the Wildland Urban Interface (WUI) and the high risk of damage from wildfires.

ODF worked closely with the Southern Willamette Forest Collaborative (SWFC), the main project of SWS, to develop both the Greater Oakridge-Westfir Area and City of Oakridge Firewise Assessments. ODF has funded SWS to administer fuels reduction projects for WUI surrounding Oakridge and Westfir, assisted in identifying priority areas for treatment, and helped develop treatment prescriptions. ODF also participates in the SWFC led Fire Safe Council meetings.

ODF Partners commit to aiding this project in the following ways:

- Participate in monthly Fire Safe Council and SWFC Implementation Advisory Committee meetings.
- Assist with maintaining an active status for the City of Oakridge and Greater Oakridge-Westfir Area Firewise communities.

- Provide technical assistance for prescribed fire planning and implementation and smoke permitting.
- Collaborate to identify priority projects for ODF Western States Fire Managers Grant and Community Assistance Grant in the Oakridge-Westfir WUI.

Increasing collaboration and coordination for this work in Oakridge and Westfir is crucial to lower the wildfire risk to people and property. This proposed in-community work will build upon agency projects and help to protect the communities from wildfire and make the landscape more resilient. When coupled with the recent fuels reduction efforts managed by SWS, this grant funding will help fulfill the firewise assessment goals.

If you have any questions regarding the support of this project, please feel free to reach out to me.

Regards,

/s/ Connor Devore

April 3, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program from the Lane County Firewise Incentive Program.

Dear EPA,

The Lane County Firewise Incentive Program, is a program of the Lane County Land Management Division, Lane County, Oregon. Firewise offers rural Lane County homeowners financial assistance to make their homes better able to survive wildfires. We frequently collaborate with South Willamette Solutions and the Southern Willamette Forest Collaborative (SWFC), and support their proposal for the Oakridge-Westfir Wildfire Resiliency and Adaptation Project (OWWRAP). As Firewise professionals, we recognize the need for those at the highest risk to be targeted for assistance.

Lane County Firewise staff have worked closely with the Southern Willamette Forest Collaborative to train their staff to conduct Firewise Home Ignition Zone assessments, helped connect homeowners to their programming, and regularly attend Fire Safe Council meetings facilitated by SWFC. Lane County Firewise intends to aid this proposed project in the following ways:

- Continue to leverage partnerships to effectively administer the Lane County Firewise Incentive program to vulnerable community homeowners;
- Participate in monthly Fire Safe Council and SWFC Implementation Advisory Committee meetings;
- Share information and training about Structural Ignition Potential to local residents;
- Share information about funding opportunities with residents and agency partners;
- Continue to participate in the Oakridge-Westfir Community Wildfire Safety Night.

This proposed in-community work is consistent with and supports our program's efforts, and helps to make Home Ignition Zone assistance more accessible to a wider community.

If you have any questions regarding our support of this project, please feel free to reach out to our staff.

Regards,

Lane County Department of Public Works
Land Management Division: Firewise Program

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program Oregon State University Extension Fire Program

Dear EPA,

The Oregon State University Extension Fire Program's mission is in direct alignment with the South Willamette Solutions (SWS) proposal for the EPA EJCPS grant. Focusing on environmental justice is of top importance when it comes to addressing the wildfire crisis in the West.

OSU Extension partners with local communities to provide trusted expertise and science-based knowledge to address critical issues and help every Oregonian thrive. We are committed to creating positive change through programs and providing spaces where each person feels safe and welcome. Our research, programs, partnerships and volunteer opportunities are focused on creating healthy communities and economies, resilient and productive forests and natural ecosystems, sustainable agriculture, food systems, and gardening, and thriving youth, individuals and families.

OSU Extension is committed to collaborating with the Oakridge Collaborative Wildfire Resiliency and Adaptation Project (OCWRAP) in the following ways:

- Use OSU Extension's networking capacity to connect important stakeholders to project completion;
- Provide place-based and audience appropriate education and material to SWS and its partners about the role of prescribed fire for wildfire risk mitigation and forest health;
- Provide technical assistance to advise SWFC and partners how navigate the Oregon Department of Forestry's Certified Burn Manager training program;
- Help SWS navigate the regulatory and social landscape as necessary to complete strategically sound fuels reduction.

In the last five years, significant wildfires have heavily impacted the Oakridge area, threatening structures and creating prolonged hazardous smoke intrusions. Events such as the 2022 Cedar Creek Fire, which caused evacuation of the community and record breaking smoke effects, have proven the need to collaborate on mitigation projects that represent uniquely vulnerable populations. OSU Extension Service supports this project to reach the most vulnerable Oakridge-Westfir residents including those with lower incomes, people of color, indigenous people, people whose primary language is not English, and people with disabilities who are disproportionately impacted by the risk posed by wildfire.

Sincerely,

Kayla Bordelon

MIDDLE FORK
WILLAMETTE
WATERSHED COUNCIL

April 3, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program

Dear EPA,

The Middle Fork Willamette Watershed Council (MFWWC) works with communities for a healthy Middle Fork Willamette watershed through environmental education and habitat restoration. We are a non-regulatory nonprofit bringing local property owners, residents, stakeholders, and private land managers together with local, state, and federal agencies to form a common vision for the ecological and economic sustainability and livability of our watershed. To help bring these stakeholders together, we frequently work together with South Willamette Solutions and the Southern Willamette Forest Collaborative (SWFC) and Oakridge Air project.

Fire adaptation has become a top priority in our ecological restoration and education efforts. Recent wildfires have burned through vast areas in our watershed, often threatening communities and ecosystem health. Adding capacity through OWWARP will be instrumental in maintaining resiliency in the communities and environment around Oakridge-Westfir. The MFWWC commits to partnering with the Oakridge Collaborative Wildfire Resiliency and Adaptation Project in the following ways:

- Assisting in educational outreach with local schools, incorporating fire ecology and science when appropriate.
- Continuing to act as an advisory board member for South Willamette Solutions.
- Continuing to participate in SWFC committee meetings, such as the Fire Safe Council and the Implementation Advisory Committee
- Continuing as one of the main implementing partners for the Oakridge Air project, delivering smoke safe curriculum and education to the Oakridge School District.

This proposal to focus on the most vulnerable residents in Oakridge and Westfir is critical to facilitate community engagement and promote wildfire risk reduction activities to reduce the impacts of wildfires and smoke exposure in the communities of the Upper Willamette watershed.

Sincerely,

Dov Weinman
Executive Director
Middle Fork Willamette Watershed Council

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

RE: Letter of Commitment and Support for
Environmental Justice Collaborative
Problem-Solving (EJCPS) Cooperative Agreement Program
City of Oakridge and City of Westfir

Dear EPA,

Oakridge and Westfir have worked for years to address economic and social challenges faced since the downturn of the timber industry decades ago. Through various projects, Oakridge and Westfir city leaders have worked with agency and nonprofit partners to bring in millions of dollars to purchase and remediate the Oakridge Industrial Park, address wood smoke pollution, promote recreation and tourism, and maintain infrastructure and services that are impressive for the size of the community.

These efforts are put at risk by the increasing threat of wildfire. The last ten years have seen multiple wildfires adjacent to Oakridge and Westfir and the past two years fires have forced evacuations. According to the Oregon Wildfire Risk Explorer, much of the surrounding forests are expected to burn with high or intense fire severity in the future. Community populations rank in the highest relative Social Vulnerability Index (SVI) category, with a poverty rate of 30% in Oakridge. It is well-known that vulnerable populations are more susceptible to the dangers of wildfire, and less likely to be able to afford the means to mitigate their risk.

South Willamette Solutions (SWS) has worked to support the two Cities and bring needed change to the community's approach to wildfire preparedness. Among the efforts that SWS has led or partnered to achieve are four different fuels reduction projects, emergency assistance during wildfire evacuations, a community yard waste program, and the inclusion of two new Firewise communities. The OWWARP project would add crucial capacity to address wildfire resilience in Oakridge-Westfir. The Cities of Oakridge and Westfir pledge their commitment to the project in the following ways:

- Oakridge will continue to provide space in the Oakridge Industrial Park for the community yard debris program and community firewood program;
- Oakridge and Westfir will assist in sharing information with citizens about how to volunteer time to maintain the Greater Oakridge-Westfir Area and City of Oakridge Firewise communities;
- Oakridge and Westfir will continue to participate in the annual Community Wildfire Safety Night;
- Oakridge and Westfir will continue to participate in monthly Fire Safe Council meetings and other SWFC committees as appropriate;

- Oakridge and Westfir will continue to share information with the public about prescribed burning and ways people can protect themselves from smoke in accordance with the Oakridge Smoke Safety Plan.

This proposal to focus on **the most vulnerable residents** in Oakridge and Westfir is critical to **facilitate community engagement and promote wildfire risk reduction activities to reduce the impacts of wildfires and smoke exposure** in our communities. We fully support this proposal.

Sincerely,

Bryan Cutchen

Title: Managing Director of Operations

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

1.0: PROGRAM OBJECTIVES

a. Project Summary

Project Title: Oakridge-Westfir Wildfire Adaptation and Resiliency Project (OWWARP)
Project Location: East Lane County, Oregon: Oakridge, 97463; Westfir, 97492
Applicant Information:

Name of Organization: South Willamette Solutions
Address: 48513 Hwy 58, Ste 5, Oakridge Oregon, 97483
Main Contact: Sarah Altemus-Pope, Executive Director, Ex. 6 - Personal Privacy (PP)
Email: director@southwillamettesolutions.org

Brief Description of Applicant Organization:

South Willamette Solutions (SWS) is a community-based nonprofit in Oakridge, Oregon, with the mission **to promote, coordinate and support creative solutions that strengthen rural communities, economies and landscapes**. SWS brings together community members, conservation groups, industry, agencies and land managers to find common ground on environmental challenges and co-create balanced, sustainable solutions.

SWS main projects are the Southern Willamette Forest Collaborative (SWFC) and Oakridge Air. Projects are overseen by the SWS board of directors made of seven community members and four advisory positions with Forest Service and City of Oakridge, City of Westfir and Middle Fork Willamette Watershed Council.

Are you applying for the Small CBO Set Aside Track for $150,000 projects?: Yes, attached

Project Abstract:

This project aims to bolster the capacity of SWFC's Firewise and Fire Adapted Community programs by transitioning an AmeriCorps member into a staff position. SWS, Oakridge Air, and SWFC programs serve the historically disadvantaged communities of Oakridge and Westfir, which lie entirely within the Wildland Urban Interface (WUI) and frequently experience hazardous air quality due to wildfires.

The Oakridge Air project primarily tackles wintertime woodsmoke and implements a community response plan for smoke, while SWFC focuses on fuel reduction projects to diminish wildfire threats. Since forming two Firewise communities in 2019, SWFC has administered grants to execute private lands fuel reduction projects, manage yard debris and community firewood programs, and establish a volunteer community disaster readiness group.

Pursuing the National Cohesive Wildfire Management Strategy's vision of a Fire Adapted Community demands comprehensive interagency collaboration, community coordination, and public outreach. Enhancing SWFC's capacity allows for more effective identification and addressing of Oakridge-Westfir's vulnerable residents' needs. SWFC is poised to advance these goals while prioritizing support for disproportionately affected communities by:

1. Promoting sustainable practices to mitigate climate change and reduce wildfire risks;

2. Involving all community members and ensuring access to decision-making processes;
3. Educating on wildfire hazards and risk-reduction strategies;
4. Providing access to resources for wildfire mitigation;
5. Expanding the community disaster readiness group for comprehensive emergency preparedness and response.

SWFC remains dedicated to uniting stakeholders in addressing these challenges and protecting vulnerable populations from wildfire impacts.

Project Type(s): Emergency Preparedness and Disaster Resiliency, Collaborative Capacity Building, Stakeholder Engagement, Community Engagement

Special Considerations: Climate Change, Disaster Resiliency, Rural Areas

Environmental Issues: Air Quality, Ecosystem Health, Life Safety Risks related to Wildfire

List of Project Partners:

Partner Name	Stakeholder Group
Lane Regional Air Protection Authority	Regulatory Agency
US Forest Service, Middle Fork Ranger District	Federal Government
Oregon Department of Forestry	State Government
City of Oakridge	Municipal Government
City of Westfir	Municipal Government
Oregon State University (OSU) Extension	Academic
University of Oregon	Academic
Lane County Firewise Office	County Government
Middle Fork Willamette Watershed Council	Watershed Council

Will you need to develop a QAPP for your project?: NO

b. Environmental and Public Health information of the Underserved Community:

Oakridge-Westfir is designated WUI and at high wildfire risk by the Lane County Community Wildfire Protection Plan (CWPP). Because The area is completely surrounded by forest topography and frequent lightning events, residents are impacted by wildfire almost every year. Approximately 4,500 residents live in the area and there are 1,900 homes in the Greater Oakridge-Westfir Area and City of Oakridge Firewise neighborhoods. The CWPP recognizes that reducing risk to wildfire is a shared responsibility and requires collaboration between citizens, non-profit organizations, agencies, and the community to develop better solutions, share resources, and utilize limited funding more efficiently.

Oakridge and Westfir are both within the Oakridge airshed, which is a state designated Smoke Sensitive Receptor Area (SSRA) and has been in violation of EPA's federal air quality standards for PM2.5 for decades. Oakridge's air quality is poor, leading to higher risks of respiratory and heart problems, and even cancer. This community is in the 99th and 100th percentile rankings in both cancer risk and respiratory hazard indicators and has a disproportionately older and lower

income demographic. Using Lead Paint indicators via the EPA's EJScreen tool, Oakridge-Westfir homes are in the 81st percentile for the EPA region, meaning that only 19% of homes in the whole region are older. Furthermore, this community ranks in the 93rd percentile for low-income indicators, 24% of the population has a disability, 14% of which are related to walking. Many people in Oakridge live in poverty, with 38% below the poverty line and 54% of those over 60 in poverty. Most students in the area receive free or reduced lunch.

EPA United States Environmental Protection Agency

EJScreen Report (Version 2.1)

the User Specified Area, OREGON, EPA Region 10

Approximate Population: 4,489

Input Area (sq. miles): 14.50

Oakridge-Westfir

Selected Variables	Value	State Avg.	%ile in State	USA Avg.	%ile in USA
Pollution and Sources

Less Than High School Education	18%	9%	88	12%	78
Under Age 5	3%	5%	38	6%	34
Over Age 64	32%	18%	88	16%	91

The 2022 Cedar Creek Fire was a major disaster, burning over 127,000 acres and forcing evacuations. When residents returned, they faced weeks of hazardous air quality. Between September 1 and October 31, 2022, 37 days had 24-hour averages above health bases standards for PM2.5 set by the EPA.

The project will address the need for hazardous fuel reduction in communities and WUI to reduce the likelihood and intensity of wildfires. This is an environmental justice concern in Oakridge as a community in the upper percentile for disproportionately impacted populations:

Over 1100 purifiers were distributed to Oakridge and Westfir residents by SWS volunteers during the Cedar Creek Fire

those with health conditions, low incomes, who are over 64, and have less than a high school education. Creating a Fire Adapted Community and disaster readiness group will help residents be more prepared for climate change impacts. Public education on home hardening and outreach will increase understanding about the links between wildfires, air quality, and health.

Environmental/public health issues that the project seeks to address

Added staff capacity will enable SWS projects to focus on the intersection between environmental and public health issues arising from wildfire risks and smoke exposure and the increased vulnerability of impoverished, mobility-challenged populations, and people with language or cultural barriers. Fuels reduction, the most widespread form of wildfire hazard mitigation, is increasingly being planned with EJ in mind. The US Forest Service now includes Environmental Justice as a consideration when planning wildfire mitigation treatments, which means working with local communities to identify populations that are disproportionately ignored by their efforts.[1] The USGAO has suggested that the EPA cooperate with other Federal partners to strategically plan mitigation efforts in order to increase equitable outcomes.[2]

Issues:

Structure Ignition Potential: Individuals living in poverty or with mobility issues are more likely to be impacted by structure ignition during wildfires, as they have limited means to mitigate risks and face challenges in evacuating. Ember showers often exploit ignitable landscaping and unhardened home construction, putting these vulnerable populations at higher risk.

Financial and Physical Barriers: Many effective wildfire risk mitigation measures, such as removing limbs and dead trees or replacing flammable siding and roofing, are cost-prohibitive or physically demanding. These barriers leave vulnerable populations more exposed to wildfires and their consequences.

Solutions:

Targeted Fuels Reduction Assistance: SWFC will focus on providing support to those with the greatest need for fuels reduction assistance, ensuring the most vulnerable residents receive help in mitigating wildfire risks. SWFC has funding from the Oregon Office of the State Fire Marshal to assist at least 25 homes, and with added capacity can identify the most vulnerable residents based on factors such as income, disabilities, age, language barriers, and fire risk.

---

[1] Ex. 6 Personal Privacy (PP)

[2] https://www.gao.gov/assets/gao-23-104723.pdf

ED_016126_00000512-00004

Capacity to Secure Funding for Wildfire Mitigation: SWFC will collaborate with partners to secure additional funding for essential wildfire mitigation measures.

Section V Factors:
Rural Areas: At populations of 3300 and 250, Oakridge and Westfir and surrounding unincorporated Lane County are classified as rural by several measures. Emergency and assistance services are difficult to come by in Oakridge-Westfir due to its rural status.
Disaster Resiliency: Fuels, topography, climate change, socioeconomics, vulnerable structures, and restricted evacuation routes make Oakridge-Westfir at high risk from wildfire, snow storms, and other disasters.

By focusing on these results, the project aims to create a safer, more resilient community that prioritizes the needs of the most vulnerable populations, mitigating the environmental and public health risks associated with wildfires.

Issue:
Emergency Preparedness: Essentials in the face of disaster, such as preparedness kits, extra savings, and a social safety net are much harder to come by for marginalized and low-income communities. Social, linguistic, and cultural barriers may also reduce information sharing during wildfire emergencies. This has borne out in recent disasters in Oakridge and Westfir.

Solutions:
Community Capacity and Resilience: SWFC has been asked to start a Community Disaster Readiness Group which can help to prepare the community for wildfire events and disasters, including evacuation support and preparedness resources. This group can also work to recruit, identify and support individuals with disabilities and health issues, ensuring that these at-risk populations are accounted for during emergencies.
Preparedness Kits: Collaborating with community partners will provide low-income residents with essential supplies for disasters, helping them be ready to evacuate when necessary.
Transportation Support: Identifying residents without reliable transportation and including them in evacuation carpool plans, ensuring timely and effective evacuations

Section V Factors:
Climate: Climate change is directly responsible for exacerbating wildfire impacts in our area in two ways: 1) The climate in western Oregon has become hotter and drier overall. This doesn't tell the whole story, though, as recent springs have been inordinately wet. This trend increases vegetative growth in the spring which increases hazardous fuels when the trend of extended dry seasons occurs. 2) The dry season has extended later into the season than recent historical record. This has a twofold effect. One, it extends the period in which fuels dry which increases fire effects. Two, it increases the amount of time that the dry season coincides with East Winds, the dry and rapid winds which have caused the explosion of mega fires in the region recently.

Capacity will provide the ability to educate the public about the ways a changing climate affects disasters and will bring together technical experts to help address climate-driven issues

How the underserved community benefit from those results

Without adequate paid professional capacity, mitigation projects can sometimes benefit the most convenient clients instead of those who have the greatest need. The underserved community, particularly those with mobility issues, low incomes, English as a second language, and respiratory problems, benefit from the project results in several ways:

- Enhanced Safety and Risk Reduction: By prioritizing vulnerable residents in fuels reduction assistance and wildfire mitigation efforts, the project helps reduce their risk of structural ignition, protecting their homes and ensuring their safety.
- Improved Emergency Preparedness: The project's focus on disaster readiness and tailored evacuation plans specifically considers the needs of those with mobility issues and language barriers, enabling them to be better prepared and supported during emergencies.
- Financial Support: Securing funding for essential wildfire mitigation measures, such as replacing roofs and siding, alleviates the financial burden on low-income residents and enables them to access resources that would otherwise be cost-prohibitive.
- Accessible Information: The project ensures that diverse populations, including those with English as a second language, have access to vital information and resources related to wildfire risks and preparedness, enabling them to make informed decisions and take appropriate actions during emergencies.
- Community Empowerment: By engaging underserved community members in decision-making processes and promoting their participation in projects, the project fosters a sense of empowerment and ownership, ultimately contributing to a more resilient and inclusive community.

Quotes from SWFC Fuels Reduction Clients:

"I would have never been able to reduce the excess amount of overgrowth on my own. I really appreciate the help to reduce potential fire disasters in the community." -Dan

"The fuel reduction project recently done on our property and my adjoining neighbors property will go a long way in providing fire prevention measures to protect our community." -Jay

c. Organization's Historical Connection to Underserved Community:

SWS was established in 2019 to be the nonprofit umbrella for Oakridge Air and the Southern Willamette Forest Collaborative (SWFC). The SWFC has been facilitating collaborative processes for forest management planning, restoration, and implementation since 2014. SWS employs 2.5 staff, who in 2022 managed over $700,000 of projects in the community. The Oakridge Air project provides certified wood stoves, ductless heat pumps and weatherization through the Oakridge Air TAG grant. Oakridge Air also helps coordinate high school CTE woodshed distribution and deliver chimney sweeps. SWFC projects provide Firewise assessments, defensible space and landscape fuels reduction treatments in Oakridge and Westfir. SWFC and Oakridge Air collaborate to implement the smoke safety plan, coordinating before and during smoke events to message to the community about all types of smoke and manage the CFP subsidized firewood program and community yard debris program.

Additional recent SWS accomplishments include:

- Forming the Greater Oakridge-Westfir Area and City of Oakridge become Firewise and Fire Adapted communities in order to prepare for smoke and wildfire events.
- Leading the local fire safe council to coordinate interagency fuels reduction treatments for critical areas of the wildland urban interface.
- Helping the Oakridge School District secure a $600K grant to remodel the high school multipurpose room with backup power and draft a cleaner air space MOU with the City.
- Developed a community response plan (called the Smoke Safety Plan) with the support of the Oregon Department of Environmental Quality to address PM2.5 pollution year round.
- Host the Willamette Activity Center Fundraising Committee to leverage a 1.5M grant to revitalize an abandoned community building to again provide essential social services.
- Coordinate cleaner air spaces, industrial air purifiers for schools and distributing over 1100 air purifiers to the public during the Cedar Creek Fire.
- Holding collaboration committee meetings for the public and agencies to work together on pressing environmental issues that impact the community and surrounding environment.

The bulk of SWS community engagement has grown from recommendations and projects that are identified in SWFC committees. Since 2014, SWFC has organized collaborative meetings with agencies, industry, special interest groups, elected leaders and the public for forest related projects planning and implementation. To tackle social, economic and ecological challenges simultaneously, the SWFC formed to bring people together on projects that integrate social and ecological objectives and environmental justice. Because of partner and public concern, programs have been added to address wildfire risks to private lands and communities. SWFC committees are open to the public and regularly have about 20 participants join monthly meetings with email lists of up to 100 participants, many of whom are local citizens.

1) **SWS Board of Directors/ SWFC Steering Committee** has been active in the upper Willamette watershed since 2014 when the SWFC steering committee was formed and started meeting monthly. The SWS was legally incorporated as a 501(c)(3) non-profit organization in 2019 to apply for and maintain grants, agreements, and oversee Oakridge Air and SWFC projects. Many of the founding members are still active on the board and with SWFC committees.

2) **SWFC Implementation Advisory Committee** (IAC) has been active since 2016 to plan cross-boundary fuels reduction, restoration projects and implementation with the Forest Service and ODF. After many years of large fires in the area, the IAC is now learning about how cross-boundary fire planning can protect communities and manage fire on the landscape.

3) **SWFC Rigdon collaboration committee** has been active since 2017 and works closely with the Forest Service Rigdon Interdisciplinary Team to develop recommendations to restore four sub-watersheds across 105,000 acres. This complex landscape covers the northernmost extent of this unique habitat type that is altered due to fire exclusion. The committee engages in pre-scoping discussions to help shape projects by identifying zones of agreement.

4) **SWFC Recreation committee** has been active since 2019. Recreation is an important local economic driver but the demands and impacts on the ground are increasing. The committee shares about recreation events and works together to support sustainable recreation.

5) The **Fire Safe Council** has been active since 2022 and coordinates strategic community fuels reduction projects for the Oakridge-Westfir WUI. Partners collaborate on cross boundary fuels reduction planning, smoke management, Firewise assessments and work together to seek funding and implement projects to create a Fire Adapted Community.

In addition to facilitating collaborative committees, SWS hosts community projects that align with the SWS mission and intersect with climate change:

Oakridge Air developed from the air attainment partners group which SWFC helped to form in 2014 which eventually led to an Oregon Solutions project and signed a declaration of commitment to assist Oakridge towards re-attainment. Since then, Lane Regional Air Protection Agency received two EPA Targeted Airshed Grants and hired SWS as a contractor to coordinate residential upgrades to improve community health and air quality by providing clean heating options for residents. SWS employs 1.5 staff under the Oakridge Air banner which has enabled dozens of home heating upgrade projects replacing old, polluting wood stoves.

Community Firewood Program (CFP) started as a SWFC led public-private partnership in 2015. The CFP is the only local firewood vendor, which is important because the community relies on wood heat because there is no natural gas. The program offers subsidized, seasoned wood supplied by sources that might otherwise be burned (i.e. slash piles).

The Community Disaster Readiness Group (CDRG) is a new initiative that has grown from after action review recommendations from the community. After the Cedar Creek Fire, United Way of Lane County approached the SWS and offered seed funding to form a Community Disaster Readiness Group. The goal is to stand up a volunteer group that can coordinate volunteers to help fill the gaps that professional first responders may not be able to meet during a disaster. SWS is tapping the SWFC network to recruit volunteers to participate and SWFC will help coordinate training, exercises, and other efforts such as neighborhood emergency asset mapping. Anyone can participate and no prior emergency response experience is necessary.

<u>Community Driven Participation</u>

SWFC and SWS are successful because of the volunteer time and investments from the community. Over the past nine years the organization has steadily grown because of citizen engagement and the attention collective action raises with agency partners. Volunteers outnumber paid staff or government employees in SWFC meetings and events. In addition to the hundreds of hours volunteered on SWFC committees, citizens annually volunteer over 1500 hours making homes safer during wildfires.

- Volunteers, in addition to regional fire prevention partners, help to coordinate the annual Wildfire Safety Night, with food and labor at a discount from local vendors.
- General public regularly attend SWFC events such as the Community Wildfire Safety Night, evening learning sessions and field trips.

- Volunteers help the SWFC prep hundreds of seedlings and volunteer to hand them out during the annual Oakridge Westfir Tree Planting Festival parade.
- Dozens of Private forestland owners and individual home owners have worked with SWFC to receive fuels reduction treatments to their properties.
- Local healthcare providers work with SWS staff to help with air purifier distribution and home heating upgrades in addition to messaging.
- Smoke and fire messaging is amplified by volunteer Oakridge Air ambassadors as well as local fire crews.

SWS staff are all deeply involved in the local community and committed to cooperating with citizens from all backgrounds and circumstances. This commitment is driven in part by the fact that most staff have lived lives that reflect the experiences of the local community. SWS staff include 2.5 paid employees and one RARE Americorps member. Two of SWS staff graduated from Oakridge High School, two staff and two contractors identify as growing up low income in Oakridge, two staff identify as female and one staff identifies as African American.

The SWS board of directors includes seven community members and four advisory members who reflect the local demographic in age, gender and socioeconomic status. Steering committee members and staff include professionals, retirees, business owners, and veterans. The board reflects much of the demographics of the area, whereas the staff may be young compared to the community at large. Staff and board members are active volunteers on Oakridge-Westfir community festival committees, museum board, food box volunteers, library volunteers, garbage clean-up crews, farmers market, and youth sports coaches.

d. EJCPS Model:

The proposed project builds upon the first four elements of the EJCPS Model:

CPS Element 1: Issue Identification, Community Vision, and Strategic Goal Setting:

Wildfire adaptation has been identified as an issue in collaborative SWFC efforts for years. SWFC partners and the community have long been concerned with the disproportionate impacts of smoke and fire risk on our community. Out of this, our Firewise communities were established in 2020 and 2021. Agency partnerships led to Community Firewise Assessments, which set forth a community risk assessment, put together a community vision, and set near and long-term goals to begin the process of becoming Fire Adapted.

CPS Element 2: Community Capacity-Building and Leadership Development:

Firewise leadership was originally vested in agency outreach positions, consultant partners, fire mitigation experts, SWFC staff, and local officials. Since 2021, community liaisons and volunteers have been tasked with helping the core group of professionals to recruit, educate, and maintain Firewise status in Oakridge and Westfir. SWFC IAC and Fire Safe Council leveraged agency outreach capacity with local social knowledge to start to empower those in the community who are respected and know their neighbors. The annual Community Wildfire Safety Night has also been an excellent tool to connect experts, laypeople, and other concerned community members to take ownership of the Wildfire risk problem.

CPS Element 3: Consensus Building and Dispute Resolution:
The Fire Safe Council brings together stakeholders from technical experts, concerned citizens, agency partners, industry partners, and community leaders. This forum, along with the IAC and Community Disaster Readiness Group, are specifically built with the principle of consensus decision-making in mind. SWFC staff are professionally trained conflict resolution facilitators.

CPS Element 4: Multi-Stakeholder Partnerships and Leveraging of Resources:
Collaborative fire mitigation and response planning has been achieved in several official forums which have produced tangible results. SWS has brought in over $600k of state funded grants to mitigate wildfire risk for residents. This work would not have been possible without the technical, in-kind, and financial support of agency, community, and industry partners as described in CPS Element 3. SWS continues to leverage these resources for future opportunities. SWFC also recently facilitated a US Forest Service workshop on Potential Operational Delineations (POD's), a collaborative planning process that integrates fire suppression planning with community values at risk, which will lead to more cross-boundary projects.

This proposal seeks to add capacity as a tipping point to effectively achieve CPS Element 5, 6, and 7 with a focus on disproportionately impacted communities:

CPS Element 5: Constructive Engagement by Relevant Stakeholders
The Fire Safe Council, Community Disaster Readiness Group, Firewise network, and the collaborative POD's process are firmly established. Now the work of strengthening the groups and bringing all relevant stakeholders together must be ramped up. This includes doing the legwork to meaningfully engage more low income people, people whose primary language is not English, people with disabilities, Tribal liaisons, the elderly, and people of color. While SWFC has had success in bringing some representatives of a wide-variety of groups to the table, in order to ensure that environmental justice is a focus, capacity must be added.

CPS Element 6: Sound Management and Implementation
SWFC has effectively managed wildfire mitigation projects that have treated at least 70 properties. Almost all of these residents have had direct interactions with the Project Manager. In the course of executing the project in this proposal, lessons learned from previous work will be incorporated into collaborative management and implementation from the Fire Safe Council and Community Disaster Readiness Group.

CPS Element 7: Evaluation, Lessons Learned, and Replication of Best Practices
The proposed project would facilitate a lessons learned workshop or after action review of the process in Fall of 2026. This proposal also includes several intermediate workshops to collect lessons learned from community members. Evaluation of past and current projects is always a part of our recurring Fire Safe Council and is recorded in publicly available notes.

e. Project Linkages:

In keeping with EPA Strategic Plan Goal 2, Objective 2.1 (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels), the capacity added by this project is specifically to promote Environmental Justice at all levels of society.

Wildfire hazard has often been studied through the lens of Environmental Justice social vulnerability.[3] Reasons for inequitable outcomes during wildfires include systemic issues such as housing inequality, out-of-pocket cost to residents for risk reduction activities and insurance, and a thin financial and social safety net in life-disrupting disaster events. Cultural and linguistic barriers can also hamper effective information sharing regarding effective hazard mitigation. Recent focus has been turned toward the disproportionate impact of particulate matter pollution on vulnerable communities in wildfires. [4] The elderly, residents of lower-value properties, Native Americans, and people of color are disproportionately situated in wildfire hazard areas.[5] People with disabilities, in addition to being more susceptible to the effects of wildfire smoke, are often excluded from disaster planning which has led to tragic results during wildfire events.[6]

Agency, Industry, Environmental Advocacy Groups and community members come together on a Collaborative field trip

f. Partners and Collaborators:

Partnerships are key to the success of all SWFC work and are a critical component of Oakridge-Westfir Wildfire Adaptation and Resiliency Project. The SWFC committees and programs are transparent and open to the public, but will be improved by having dedicated staff time to foster two-way engagement with tribes, communities of color, non-english speakers, working poor families, and other socially disenfranchised groups. The partners listed below are only a fraction of the total groups that SWFC and OA cooperate with on a regular basis.

City of Oakridge and **City of Westfir** closely partner with SWS for the Oakridge Air and SWFC fuels reduction projects to benefit residents. Both are committed to improved air quality and reducing wildfire risk for citizens. The Oakridge Industrial Park hosts the community firewood program and yard debris program. Both mayors help with outreach for SWS projects, participate in committees, and hold advisory seats on the SWS board. The City of Oakridge is finalizing a MOU with SWS to allow direct access to the City readerboard to post information about smoke and fire safety. **Oakridge Fire Department** and **Westfir Fire Department** assist with Wildfire

[3]
[4] **Ex. 6 Personal Privacy (PP)**

[6] http://www.jik.com/CaliforniaWildfires.pdf

Safety night, Firewise hazard assessments, smoke coordination, and participate in the Fire Safe Council and CDRG advisory group.

Oregon Department of Forestry funds SWFC through the Federal Forest Restoration program, participates in the Fire Safe Council, IAC and provides technical support for firewise assessments, cross-boundary fuels reduction planning, and smoke coordination. ODF funds SWS private lands fuels reduction for the Oakridge-Westfir WUI. ODF has multiple years of future funding from Western States and Community Assistance Grant for unincorporated areas in east Lane County and coordinates with SWFC to identify local properties in need of assistance.

Lane County works with SWFC across a variety of projects. The Firewise office participates in the Fire Safe Council and Wildfire Safety Night and conducts home ignition zone treatments to unincorporated areas that qualify for their program. The Emergency Management office engages SWFC staff in updating the County Natural Hazard Mitigation Plan and Community Wildfire Protection Plan. The Economic Development office participates in the Implementation Advisory Committee and WAC committee. Lane County Commissioner Buch joins SWFC committees when relevant and helps SWFC during the Oakridge-Westfir Tree Planting Festival.

Willamette National Forest, Middle Fork Ranger District (MFRD) covers most of eastern Lane County and completely surrounds the communities of Oakridge and Westfir. Across the 750,000 acre district uncharacteristically large wildfires are becoming increasingly frequent. In 2021 and 2022, the Middle Fork Complex and Cedar Creek fires came within miles of Oakridge-Westfir. MFRD has been a key partner with the SWFC since it was founded, participating in all committees and as an advisory member to the SWFC steering committee and SWS board of directors. SWFC committees and the Fire Safe Council work closely with the MFRD on cross-boundary fuels reduction planning and implementation and smoke coordination. The Forest provides approximately $20,000 base funding for SWFC facilitation each year.

Lane Regional Air Protection Agency (LRAPA) is the local government agency that monitors and regulates air quality in Lane County. LRAPA is the project manager for the Oakridge Air TAG grant and contracts with SWS to deliver home heating upgrades and outreach. LRAPA is a key partner for community outreach and engagement, smoke education and provides technical assistance for smoke advisories and prescribed burning.

OSU fire ecologist speaks to the public at wildfire safety night

Oregon State University (OSU) is a land grant university with a Fire Extension Service that provides technical assistance to fire practitioners. sits on the Fire Safe

Council and IAC. OSU has been a member of the SWFC Rigdon committee since its inception, providing best available science and conducting wildfire research on the MFRD. In addition, a SWS local board member is also a professor in the OSU Environmental and Molecular Toxicology Department.

Orchid Health is the only medical clinic in Oakridge and Westfir and staffs a community health worker who helps Oakridge Air. In 2020, Oakride Air distributed purifiers through the clinic to the most vulnerable patients who were identified by the medical providers. Orchid also helped during the Cedar Creek fire, distributing purifiers and replacement filters at their office to those most in need. Orchid Health also participates at the Wildfire Safety Night. Orchid Health is a valuable partner and can help SWFC connect to the medically vulnerable and underserved.

Middle Fork Willamette Watershed Council (MFWWC) works to improve the conditions of the watershed. MFWWC coordinates in-stream and upland restoration and is invested in helping communities in the watershed become Fire Adapted. MFWWC participates in SWFC committees, delivers Oakridge Air education at the schools, and is an advisory member to the SWS board of directors.

We anticipate partnership with the following because of ongoing relationships:

Oregon Office of the State Fire Marshal (OSFM) is responsible for coordinating fire response in communities. In the past few years the office has adapted to address wildfire and is now funding fuels mitigation projects in communities and has granted SWS funds for creating defensible space around Oakridge homes. OSFM participates in the Fire Safe Council, the Wildfire Safety Night and provides technical assistance for new state fire safety codes.

University of Oregon (UO) Ecosystem Workforce Program is researching health outcomes of home heating upgrades and there could be overlap with homes with air monitors and defensible space work. The EWP has worked with SWFC providing technical expertise for collaborative processes and design, conducted a workforce study for SWFC, and is a co-applicant on a research proposal to study social impacts of the Cedar Creek Fire, which could also overlap. A local SWS board member is also a professor in the OU Classics department.

2.0 Project Activities / Milestone Schedule

Goal 1: Connect Most Vulnerable Residents of Oakridge-Westfir to Resources that Mitigate Wildfire Risk

Tasks	Timeline
1.1: Engage with and identify 25 highest-need community members based on wildfire risk rating and social vulnerability with OSFM grant funds	1.1: Monthly
1.2: Facilitate contractor work at these homes	1.2: Ongoing
1.3: Connect future fuels mitigation projects to the needs of most vulnerable residents in project proposals	1.3:Annually April-June
1.4: Work with partners such as Orchid health to recruit and identify potential underserved clients to connect to future projects	1.4: Ongoing

Partners: ODF, MFWWC, City Governments, Lane County Firewise, Residents, Orchid Health, OSFM

Goal 2: Build and maintain Community Disaster Readiness Group (CDRG)

Tasks	Timeline
2.1: Facilitate Map Your Neighborhood Exercise/Phone Tree/Asset Map	2.1: Winter 2023
2.2: Facilitate bimonthly meetings to discuss CDRG strategy	2.2: Ongoing
2.3: Facilitate trainings with Community Emergency Response Team trainers	2.3: Biannually
2.4: Work with partners to create a disaster communication system	2.4: Ongoing

Partners: ODF, MFWWC, City Governments, Lane County Firewise, Residents, Orchid Health, OSFM

Goal 3: Maintain and Strengthen Interagency and Community Collaboration around Fire Mitigation and Disaster Preparedness

Tasks	Timeline
3.1: Facilitate monthly Fire Safe Councils to coordinate fuels reduction work and prescribed fire projects and alternatives to burning	3.1: Ongoing
3.2: Recruit community members from populations disproportionately affected by wildfire using developed outreach strategy	3.2: Ongoing
3.3: Plan and execute Community Wildfire Safety Night (CWSN) with partners	3.3: Annually
3.4: Work with USFS to integrate community goals into wildfire planning	3.4: Ongoing

Partners: ODF, USFS, OSU, LRAPA, MFWWC, City Governments, Lane County Firewise, Residents, Orchid Health, OSFM

Goal 4: Maintain and Enhance Firewise Community Status

Tasks	Timeline
4.1: Update volunteer hours spent by community doing fire mitigation around their homes to fulfill Firewise requirements each November	4.1: Annually
4.2: Work with community partners to create a community Firewise Assessment update for the Greater Oakridge-Westfir Firewise community	4.2: Fall 2025
4.3: Collaborate to provide synchronized Firewise outreach and education	4.3: Summers

Partners: City Governments, Residents, Orchid Health, OSFM, USFS, Lane County Firewise

ED_016126_00000512-00014

Time	Milestones and Project Activity Deliverables	Goals
Fall 2023	• Community Disaster Readiness Group has facilitated a Neighborhood Asset Mapping campaign with results recorded and easily communicated	• **2**
Winter 2023	• Team has created an outreach list for OSFM Firewise campaign and has an established outreach plan, including maps, contact information • Compile Firewise volunteer hours from Oakridge/Westfir communities and submit to NFPA for recertification	• **1** • **3**
Spring 2024	• Educate community via newsletters and social media about project implementation • Hold two official Community Wildfire Safety Night planning sessions • SWS Team holds meetings and launches an outreach campaign to identify neighborhood Firewise leaders • Create community asset map in an easily available, sharable, and interoperable format	• **3** • **3** • **4** • **2** • **2**
Summer 2024	• Hold 4th annual Community Wildfire Safety Night • If Smoke or Fire emergency, focus capacity toward health, education, and evacuation. • If no Emergency, use capacity to educate on mitigation and plan for Fall engagement with public • Implement vast majority of OSFM mitigation project	• **3** • **2** • **1** • **1**
Fall 2024	• Conduct surveys with residents to determine mitigation successes and failures • Complete Mitigation work that was incomplete from Spring completing Firewise work on 25 homes • Prepare next cohort of mitigation clients	• **1, 3** • **1** • **1**
Winter 2024	• Hold standalone Community Wildfire Safety Workshop. • Pursue funding opportunities for continued mitigation work • Work with partners on prescribed fire while minimizing public health impact • Plan at least one community disaster response training or exercise	• **3** • **All** • **1** • **2**
Spring 2025	• Write grants for mitigation funding from government and private funders • Begin 2025 mitigation projects, through new funding or with volunteers • Begin Planning for 5th annual Community Wildfire Safety Night • Conduct at least one community disaster response training or exercise • Assemble Firewise Community Assessment Team Members	• **All** • **1** • **3** • **2**

ED_016126_00000512-00015

Time	Milestones and Project Activity Deliverables	Goals
Summer 2025	• Finish Mitigation projects that pose fire risk before fire season • Hold 5th Annual Community Wildfire Safety Night • Prepare for contingency plans regarding Fire and Smoke emergencies • Complete Oakridge Firewise Assessment with collaborative partners	• **1** • **3** • **2** • **4**
Fall 2025	• Conduct surveys with residents around mitigation successes and failures • Complete Mitigation work that was incomplete from Spring before fire season and prepare new clients • Collect Firewise volunteer hours and submit updated Firewise Assessment	• **1** • **1** • **4**
Winter 2025	• Hold annual standalone Community Wildfire Safety Workshop • Pursue funding • Ensure completion of 2025 Mitigation projects plan with partners • Plan at least one community disaster response training or exercise	• **3** • **All** • **1** • **2**
Spring 2026	• Write grants for mitigation funding from government and private funders • Implement bulk of 2025 Mitigation to vulnerable residents • Begin Planning for 6th annual Community Wildfire Safety Night • Conduct at least one community disaster response training or exercise	• **All** • **1** • **3** • **2**
Summer 2026	• Hold 6th annual Community Wildfire Safety Night • Smoke/Wildfire contingency plan if needed	• **3** • **2**
Fall 2026	• Comprehensive Review of EJCPS funded activities and publish findings • Finalize formal transitions in capacity and leadership from SWS to partners	• **All**
Ongoing	• Fire Safe Council monthly meetings • Weekly reports at staff meetings about project progress • Tabling at events to educate and network as opportunities arise	• **All**

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

a. Environmental Results (Logic Model): Submitted as an attachment

b. Performance Measurement Plan

The Project Manager will report directly to the SWS Executive Director. All progress is reported in weekly staff meetings, monthly board meetings and in collaborative committees. Proof of progress on project management includes photo documentation taken before and after treatments or through georeferenced GPS tracks of project boundaries created by contractors on Avenza, Arc FieldNotes, or a similar application. Additional records include homeowner testimony; contractor invoicing; signed project agreements and waivers clarifying roles, regulations, and expectations between SWS, landowners, and contractors. Outreach coordination is tracked in shared spreadsheets and maps which are updated weekly during

project outreach and implementation. Maps, outreach material, contracts, waivers, photos, and other documentation are saved electronically and at the SWS offices.

EPA reporting project progress on expenditures, purchases, and other fiscal activities

- Real-time and quarterly reports of program dollars expended by program task

EPA reporting actual accomplishments versus proposed outcomes and milestones

- Number of homes which have undergone Firewise assessments
- Number of homes which have undergone defensible space treatments
- Number of SWFC meetings facilitated by the project manager
- Number of public speaking engagements by the project manager

The SWS board of directors has final monitoring and oversight of all SWFC staff actions.

c. Sustainability Plan and Community Vision

A primary objective of this proposal is to delegate and empower community members and other agencies to continue collaborative programs and processes. The vision for Oakridge-Westfir is to become a Fire Adapted community that collaborates to identify wildfire risk and works collectively on actionable steps to reduce the risk of loss. This work protects property and increases the safety of firefighters and residents.

1. Moving the community towards becoming Fire Adapted sets up processes and practices to reduce wildfire risks and make people and property safer.
2. Involving all community members and ensuring access to decision-making processes creates citizen buy in and investment in and understanding.
3. Educating about wildfire hazards and risk-reduction strategies provides tools and knowledge to citizens that enables them to protect their properties and livelihoods.
4. Providing access to resources for wildfire mitigation brings equity to wildfire preparedness and removes financial and physical barriers that many people experience.
5. Establishing and growing the community disaster readiness group increases community emergency preparedness and adds capacity to respond when disasters do happen.

4.0 Programmatic Capability

a. Organizational Experience

The SWFC has a proven track record of successfully implementing fuels reduction projects. SWS has successfully been awarded multiple state and foundation grants to coordinate and implement fuels reduction projects, manage a yard debris and community firewood program, and stand up a volunteer community emergency response committee. 2022-23 outcomes include 330 acres of private lands fuels reduction, 60 homes with defensible space, and an additional 45 firewise assessments in the Oakridge-Westfir area. In addition to implementing projects, the SWFC facilitates the Fire Safe Council to bring stakeholders together to coordinate fuels treatments on private and federal lands and manage smoke.

b. Staff Experience / Qualifications of Project Manager (PM)

The staff that will be working on this project include Sarah Altemus-Pope, who founded the SWFC. Sarah also serves as the executive director of South Willamette Solutions, which was

ED_016126_00000512-00017

formed in 2019 to fiscally sponsor the SWFC and Oakridge Air. Sarah grew up in Oakridge and attended the University of Oregon where she graduated with a JD/MA Conflict Resolution. Sarah started with the Forest Service on the Middle Fork fire crew, worked ten years as a Forest Service smokejumper in Missoula, MT, and spent three years at the Washington office in D.C. developing ICS based training for the USAID Office of Foreign Disaster Assistance. Sarah returned to Oregon to finish her J.D. and started the SWFC as a masters degree project.

Dustin Rymph has worked as the SWFC projects coordinator since 2021. Dustin is in his second year of service through a Resource Assistance for Rural Environments (RARE) Americorps participatory agreement, which will be converted to a staff position at the end of the service term. Dustin graduated the University of Oregon's Conflict and Dispute Resolution master's program with a specialty in Land Use conflicts and has over 12 years of professional horticultural/ botany experience. Dustin has completed the National Fire Protection Agency (NFPA) Assessing Structural Ignition Potential (ASIP) training, shadowed ODF and Lane County Firewise assessors, and has completed over 75 home assessments. Dustin facilitates the fire safe council and has managed hundreds of acres of fuels reduction work coordinating private landowners, individual homeowners and managing contractors.

c. Expenditure of Awarded Grant Funds
Federally and/or non-federally funded assistance agreements that SWS performed within the last three years.

5.0 Past Performance

Agreement	**Successfully Managed**	**Met reporting requirements**
$99,200 Oregon Department of Environmental Quality # 057-22	SWS successfully implemented 44 acres of fuels reduction in the WUI	Yes
$354,000 Oregon Department of Forestry #21LRP-LB-01	SWS has successfully implemented 140 of required 150 acres of fuels reduction in the WUI	Still open, closes 6/30/23
$279,400 Oregon Department of Forestry #4SFG01-08	SWS has successfully implemented 89.35 of required 120 acres of fuels reduction in the WUI	Still open, closes 6/30/23
$32,608.40 Forest Service Cost Share Agreement #21-CS-11061800-001	SWS successfully facilitated and coordinated SWFC committees and projects	Yes
$65,000 Oregon Watershed Enhancement Board Agreement #2200-8008-17532	SWS successfully developed and advanced zones of agreement with SWFC committees	Yes

EXPERIENCE

Current

Group Sales Coordinator
Space Needle & Chihuly Garden and Glass

- Responsible for advance sales to schools and groups
- Increase revenue based on private tours and travel experiences
- Handles problems with guest experience for two properties
- Member of sustainability committee.

Jan 2021 - Dec 2021

Research Assistant, Glacial Seismology
University of Washington,

- Use of Python and AWS to analyze and model seismic data
- Interpretation of results and developing ideas in code
- Unique problem solving with Python scripts
- ***Presented at National AGU Meeting in December 2021***

April 2021 - Sept 2021

Environmental Outreach Internship
United States Esports Association

- Individual research into sustainability initiatives and SDGs
- Developed plans to fit UNFCCC's Sports for Climate Action Framework
- Gathered and organized deliverables weekly

July 2018 - March 2020

Admissions Representative
Pacific Science Center

- Personalized guest experiences
- Needed to possess wide variety of Seattle and scientific knowledge
- Understood all tickets and exhibits to promote sales

EDUCATION

Sept 2017 - March 2021

B.S in Geophysics, University of Washington, Seattle, WA
Minor in Mathematics

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Letter 947

Part 1A: Project Summary

Project Title esports.eco: Addressing Scope 2 emissions from esports activities from electricity consumption at local esports venues, and combating climate change at the community level, with national effect

Project Locations See Project Partners; Online

Applicant Name United States Esports Association
Applicant Address 100 N Howard Str., Ste W, Spokane, WA 99201-0508
Applicant Primary POC Eliot J. Oreskovic (he/them), eliot@esportsus.org, Ex. 6 - Personal Privacy (PP)

Applicant Description The United States Esports Association is an IRC Section 501(c)(3)-exempt WA nonprofit corporation. Our mission is to promote the holistic development of the American esports industry. We are one of three esports organizations in the UNFCCC's Sports for Climate Action Framework and one of two on the Race to Zero. We are also developing an out-of-school-time add-on program for collegiate esports programs as part of a project funded by a Targeted Violence and Terrorism Prevention grant award from DHS.

Small CBO Set-Aside Track? Yes, we're applying for the Small CBO set-aside
QAPP Required? Yes, we're required to and will develop a QAPP

Project Abstract We propose to build and deploy a comprehensive research, education, and self-regulatory apparatus to monitor, report, and reduce esports' ecological impact in terms of Scope 2 emissions from electricity consumption at local esports venues, to educate industry and public stakeholders as to esports' comprehensive ecological impact, and to establish ecological awareness as the foundation of the American esports industry through voluntary consensus. We propose to deploy watt monitors at project partners' venues, which encompass 9 of 10 EPA regions and 11 of 22 continental eGRID Subregions, in order to record a sample of their gaming computers' electricity consumption for years 1 through 2 of the performance period. These data would be combined with venue-level electricity consumption, recorded and analyzed on a dedicated information system, and published for industry and academic consumption on an annual basis. Based on this research, we propose to create educational-informational materials about esports' ecological impact and the importance of awareness to electricity consumption, host webinars about our findings and ways to reduce Scope 2 emissions for local esports venues, and create and publish informational toolkits for how stakeholders can address Scope 2 emissions and to educate stakeholders on this issue. Finally, we propose to found an industry standardization and self-regulation organization, with representation from project partners, which would pursue ANSI recognition as a standards developer for club esports. This organization would foster voluntary consensus among stakeholders to establish and implement best practices for addressing esports' ecological impact, throughout years 2 and 3 of the performance period.

Project Type Monitoring, Education, Standardization, Self-Regulation
Special Considerations Climate Change
Environmental Issue Scope 2 emissions, especially from Energy Inefficiency

Project Partners

The following partners are industry stakeholders that own and operate esports venues. They are organized as for-profit entities, typically limited liability companies and C-type corporations.

EPA Region 2		The Esports Cave	Leander, TX
Contender Esports	Wappingers Falls, NY	Shenanigans Esports	San Antonio, TX
EPA Region 3		**EPA Region 7**	
Laughing Coffin	Taneytown, MD	Contender Esports	Springfield, MO
EPA Region 4		**EPA Region 8**	
Triangle Esports Academy	Cary, NC	Contender Esports	Fort Collins, CO
EPA Region 6		**EPA Region 9**	
Contender Esports	Tulsa, OK	Contender Esports	Gilbert, AZ
Warguts Esports	Tulsa, OK	GameSync Esports Center	San Diego, CA
The Vault Legacy	Amarillo, TX	**EPA Region 10**	
The Esports Cave	Austin, TX	Legacy Gaming, Community, & Concierge	Tukwila, WA
Desh Gaming Lounge	Burleson, TX		

The following partner is a CBO that directly works with the above industry stakeholders, which administer programming to local communities. They are organized as a nonprofit corporation in the State of OK and are tax-exempt under IRC Sections 501(c)(3) and 509(a)(2).

EPA Region 6	
Amateur Esports Association	Stillwater, OK; Tulsa, OK

Part 1B: Environmental & Public Health Information

This project proposes to address and reduce energy inefficiencies in local esports venues in multivarious communities throughout the United States as part of a broader climate resilience

strategy. This strategy seeks to make climate resilience a core component of the American esports industry and to transform the industry into an emissions-negative space.

This project's locus of impact is the operations of local esports venues within their communities. In this way, this project proposes to address past and future ecological harms by neutralizing the source of the problem, aligning industry stakeholders with national and international climate goals, establishing voluntary consensus on the issue among stakeholders, and implementing voluntary best practices to reduce esports' ecological harms from local esports venues.

Local Community Profiles

This project proposes to work with 15 local esports venues located in 14 different communities nationwide. These communities span 10 of the 50 states, 8 of the 10 EPA regions, and 10 of the 27 eGRID subregions and half of the contiguous subregions. This project mixes underserved and overburdened communities with well-served, affluent, and non-minority-serving ones and distinguishes between communities based on two (2) factors: poverty and minority status.

9 of the 14 different communities where the partnered local esports venues reside have poverty rates that are in excess of either the poverty rate for their county, state, or both. These are provided by Figure A below. Data were obtained from the 2021 5-Year ACS.

Figure A: Poverty Status per Project Community

Community	City	County	State	Community	City	County	State
Taneytown, MD	9.2%	4.7%	13.9%	Springfield, MO	17.4%	12.9%	12.7%
Tulsa, OK	18.9%	14.9%	15.6%	Fort Collins, CO	13.9%	11.8%	9.7%
San Antonio, TX	17%	14.7%	14.2%	San Diego, CA	11.7%	10.6%	12.3%
Austin, TX	12.7%	11.3%	14.2%	Tukwila, WA	12.4%	9.4%	9.9%
Amarillo, TX	16.6%	9.2%	14.2%				

An additional 7 of the 14 communities have a significant percentage of their population (40% or above) who are not White. The percent of non-White residents is provided by Figure B below. Data were obtained from the 2021 5-Year ACS.

Figure B: Minority Status per Partner Community

Community	Percent Minority	Community	Percent Minority
Wappingers Falls, NY	42.44%	Austin, TX	45.31%
Cary, NC	41.77%	San Diego, CA	53.62%

Tulsa, OK	48.19%	Tukwila, WA	69.97%
San Antonio, TX	55.67%		

Target Public Health Issues

Esports activities by their nature cause greenhouse gas emissions through dedicated hardware's energy consumption. For this reason, esports activities differ greatly from the traditional sports industry, while their core elements align.[1] While ecological sustainability within the traditional sports context remains an open question, as does sustainability in high technology, limited progress towards a carbon-neutral future for these industries has been made. This is not the case for esports.[2] Coupled with the rapid expansion of esports worldwide, the consequences of not addressing esports activities' inherent harms are existential.[3] In this way, the incentive structures for succeeding in esports and advancing ecological sustainability are at odds.

While esports development to date has focused on remote competitions that culminate in massive in-person events, the next frontier of esports development is the creation and expansion of local esports venues,[4] driven by the prohibitive costs of requisite hardware to compete at high levels.[5] This trend has already occurred across East and Southeast Asia, and large-scale infrastructural development began in the United States as of Q1 2020. Vindex, which is a major British esports conglomerate, has committed to constructing 500 local esports venues in over 125 major American markets from 2020 to 2025.[6] Other franchising companies have joined this trend, and existing franchises are continuously expanding.

Left unaddressed, participation in esports activities puts participants at increased risks of multivarious psychosocial, physical, and cognitive issues.[7] Despite latent risks to health and wellbeing, the benefits of participation in esports are overwhelming, with particular emphasis on meaning-making and identity formation[8] and the development of 21st century skills.[9] Pairing the benefits of participation in esports in general with the benefits of local, community-based sports has the potential to yield a synthesis of benefits focused on the community itself. Additional benefits emerge when local, community-based esports activities are leveraged as community anchors,[10] tourism pull factors,[11] and catalysts for economic regeneration.[12] Development in these areas, coupled with esports' link to high-quality broadband access,[13] positions esports activities as central to community development.

Given the attractiveness of the benefits of esports activities to the local community, the esports industry has rapidly grown within the past five (5) years. Esports activities require that electricity be consumed, given that esports themselves are played on computers or dedicated hardware. Whereas similar social, recreational, and sporting activities are separable from their electricity demand, esports is not. As a result, any growth in esports activities is necessarily coupled with a growth in electricity demand which results in a growth in Scope 2 emissions.

Energy efficiency is known to be linked to health outcomes.[14] Therefore, this project addresses energy inefficiencies in esports activities conducted in local esports venues as a catalyst for decreasing esports' Scope 2 emissions which will have positive effects on public health, especially through its positive effects on climate change.

Desired Public Health Outcomes

This project's desired public health outcome is an enhanced quality of life in communities with local esports venues. This will be achieved by decreasing energy consumption by partnered local esports venues by means of an increase in energy efficiency and the standardized creation and implementation of best practices based on voluntary consensus of relevant stakeholders. These effects will be achieved by an increase in ecological awareness and climate action among the owners and operators of partnered local esports venues, which will be achieved through continuous research, education, and self-regulation.

The proposed partner communities are direct beneficiaries of this project and its desired public health outcomes in three (3) ways.

First (1st), this project enhances the public health benefits of local, community-based esports by ensuring that participation in esports, and esports' expansion as a result, does not come at a cost to the environment. In this way, this project aligns business and community interests in respect of the esports industry and climate action. By doing so, this project decreases esports' contributions to climate change through Scope 2 emissions, which will decrease the degree to which these communities are affected by proximal electricity generation. As a hedge against a future increase in electricity demand as a result of the rapid development of local esports venues, proposed partner communities and communities that will host local esports venues in the future will increasingly benefit from this intervention as development progresses.

Second (2nd), by working with business interests to address climate change at the local level, this project supports holistic, community-serving economic development throughout proposed partner communities. This project mixes underserved and overburdened communities with well-served, affluent, and non-minority-serving ones. As a result, this project fosters climate awareness and action equally across communities and therefore combats disparate treatment and future overburdening as climate change's effects intensify. Further, this project advances broad, industry-level climate goals through specific, community-level action which increases the degree to which community members can meaningfully participate in climate action.

Third (3rd), this project asserts community interests as co-equal to business interests and has principal buy-in from local business interests based on this position. This project's voluntary consensus component in particular levels the playing field by giving all community stakeholders equal access and influence within the voluntary consensus process. This has the effect of enhancing underserved and overburdened communities' relative power and reducing the degree to which well-served, affluent, and non-minority-serving communities can exert disproportionate influence on decision-making processes. In this way, this project advances a climate action model of "national impact through local action." This model enhances community members' ability to meaningfully participate in climate action and increases the degree to which communities themselves can assert their rights and support ecological justice.

By shifting the locus of impact to businesses in local communities, this project is uniquely able to advance an ecological justice framework that empowers community members to action within their communities, with national effect. We assert that this framework, as operationalized by this project, can achieve the desirable public health outcomes, as described.

Impact on Climate Change

This project meaningfully contributes to national climate action, and by its design to community climate action, by limiting the esports industry's negative ecological impact via Scope 2 emissions by increasing energy efficiency and establishing self-regulatory measures to voluntarily enforce an ecological justice framework for local esports activities.

By increasing energy efficiency, through education as to esports' ecological impact and self-regulatory action against energy inefficiency, this project decreases national electricity demand arising from esports activities. By decreasing demand, this project decreases the degree to which esports activities cause Scope 2 emissions within their eGRID subregions and negatively impact communities within the proximity of electricity generation sites. By decreasing emissions and negative proximal impact, this project aligns economic development motives with climate action and drives positive ecological impact through commercial activity.

Part 1C: Organization's Connection to the Community

History of Community Involvement

The United States Esports Association's (USEA) direct historical connection with the target communities is through its partnership with the Amateur Esports Association (AEA).

The AEA organizes amateur competition through its local partners, of which most are local esports venues. The AEA was founded in 2020 and began community work throughout OK at that time. Since then, the AEA has grown its membership to over 64 organizations, comprising local esports venues, charitable organizations, schools, and online competition organizers. The AEA's timeline for work in partner communities varies and is provided by Figure C below.

Figure C: Timeline of Community Involvement through Proposed Project Partners

Wappingers Falls, NY	8/22	San Antonio, TX	7/22	Fort Collins, CO	8/22
Taneytown, MD	7/22	Austin, TX	11/21	Gilbert, AZ	8/22
Cary, NC	1/23	Leander, TX	11/21	San Diego, CA	8/22
Tulsa, OK	10/21	Amarillo, TX	2/22	Tukwila, WA	5/22
Burleson, TX	7/21	Springfield, MO	8/22		

A representative sample of the AEA's local esports venue members are proposed as community partners for all three (3) components of this project, as per the *Local Community Profiles* subsection to Part 1A of this application.

History of Connection to the Issues

The USEA's and AEA's historical connection with environmental and public health issues is through their partnership on the matter. The USEA is a member of the Sports for Climate Action Framework and the Race to Zero, both of which are organized by the United Nations Framework Convention on Climate Change (UNFCCC). As a member of these initiatives, the USEA has committed to a 50% reduction in organizational GHG emissions by 2030 and net zero emissions by 2040 and to limit global climate change to within 1.5 degrees Celsius.

In early-mid 2021, the USEA launched esports.eco, which is its primary ecological sustainability initiative and program oriented towards achieving climate commitments to the UNFCCC. In mid-late 2021, the USEA entered into a memorandum of understanding with the AEA in contemplation of the AEA's participation in esports.eco as a co-equal partner. Under this agreement, the AEA will expose esports.eco to its member venues and collaborate with the USEA on achieving programmatic and ideological buy-in on the underlying ecological issues among AEA members. The AEA will also work with the USEA to estimate GHG emissions in relation to AEA competitions at the AEA level and to coordinate reporting for their member venues, some of which are included as proposed partners for this project.

History of Community-Driven Work

There exists a critical lack of funding and research on the issue of esports ecology. As a result, there has not been any industry-specific ecology work performed to date. While esports.eco is aligned on the UNFCCC's goals, these deficits have prevented work at any level thus far, both for esports.eco as well as any other esports or esports-adjacent initiatives. This issue is further exacerbated by dissimilar and disproportionate challenges in similar industries, especially sports, at the local, regional, national, continental, and international levels.

esports.eco is the first ecological sustainability initiative for the esports industry across the world. Thus this project would be the first attempt globally at researching esports' ecological impact in terms of Scope 2 emissions, publicly reporting this impact for multivarious industry stakeholder groups, and convening industry stakeholders to establish and implement standard best practices via voluntary consensus mechanisms. Given the USEA's prior relationship with the Global Esports Federation, which is a global esports industry governing body, as its US member federation from Q2 2020 to Q1 2022, this project's broader impact aligns with the historical and present work of the USEA within the global esports community.

Nature of Community Participation

Partnered local esports venues, who are indirect beneficiaries, were consulted about the project's reasonability in terms of their dispensation of roles and responsibilities as required, given the existence of a non-financial relationship between the partners and the USEA or AEA in this matter. Notably, many of these proposed partners have a pre-existing financial relationship with the AEA as part of a members dues program for participation in AEA programming. Direct beneficiaries in the local communities were not consulted in this project's development.

Control over this project will be delegated in parts. The AEA will control work with the local esports venues. The local esports venues will have supervised control over the data collection component of this project's research component. The USEA will have supervisory control over the research component and direct control over the educational component. The USEA, AEA, and local esports venues will share direct control over the voluntary consensus component.

The USEA and AEA will attempt to foster direct beneficiary control throughout the performance period and establish permanent direct beneficiary control thereafter.

Throughout the performance period, the USEA and AEA will work with partnered local esports venues to coordinate and publish information about the project, esports' ecological impacts, and ways that individual community members can contribute to reducing esports' negative impact. Community members will also be able to access and meaningfully participate in webinars as part of this project's education component as well as in the voluntary consensus component as a stakeholder class. Further, the USEA and AEA, in coordination with partnered local esports venues, will hold quarterly listening sessions to foster community participation and will make a form available for community members to provide feedback on the project and to lodge complaints about partnered esports venues to allege discrimination or other complaints.

Following the performance period, the USEA and AEA will continue to hold quarterly listening sessions to foster continuous community participation, engage community members as a stakeholder class in relation to this project's voluntary consensus component, and keep a form available for community members to provide feedback on the project and to lodge complaints. The USEA and AEA will work with the National Esports Collegiate Conference (NECC), which is the largest college esports athletic conference in North America, to coordinate internship and experiential learning opportunities at partnered local esports venues in relation to continuous research. The USEA has a pre-existing relationship with the NECC for a similar purpose, and the NECC is aligned with the USEA and AEA in offering such opportunities to interested students.

Part 1D: Incorporation of the EJCPS Model

This project incorporates and operationalizes Elements 1, 2, 3, 5, 6, and 7 of the EJCPS Model. Element 4 was excluded because it targets different stakeholders than proposed. As this project requires multi-stakeholder and cross-value chain buy-in to be successful, we intend to expand to include other stakeholders following the performance period.

Element 1

Element 1, *Issue Identification, Community Vision, and Strategic Goal Setting,* is incorporated and operationalized by this project's research and voluntary consensus components.

Within the research component, partnered local esports venues, as indirect project beneficiaries, will deploy and maintain three (3) watt monitors within their facilities and cooperate with the AEA on transmitting, cleaning, and warehousing data on a weekly basis. Once data are warehoused, they will be analyzed for trends, inefficiencies, and opportunities to implement best practices. As these data are not presently collected at the industry level, nor is

organizational reporting of electricity consumption and Scope 2 emissions normative, insights from this component will be foundational to identifying particular issues with local esports venues' operations and informing decision-making across stakeholder classes as a result.

Within the voluntary consensus component, partnered local esports venues, as indirect project beneficiaries, will co-found and participate in an industry self-regulation and standardization organization for the purpose of achieving consensus in relation to club esports. Participation in the standards development and implementation processes will require a science and evidence-based approach. The data from the research component, as well as any insights therefrom, will inform participating stakeholders as to the issue at hand and aid in their decision-making as to ways and means to effectively address esports' ecological risks. As such, this component supports the development of a community vision and enables strategic goal-setting based on science and empirical evidence.

Element 2

Element 2, *Community Capacity-Building and Leadership Development*, is incorporated and operationalized by all the components of this project.

Within the research component, partnered local esports venues, as indirect project beneficiaries, will deploy and maintain three (3) watt monitors within their facilities and cooperate with the AEA on transmitting, cleaning, and warehousing data on a weekly basis. This project activity will be the first time local esports venues, and the industry at large, participates in strategically coordinated electricity consumption monitoring to achieve desirable public health outcomes. As a result, this component builds capacity within emitting organizations at the community level and mobilizes esports stakeholders in support of climate action.

Within the education component, partnered local esports venues, as indirect project beneficiaries, will undergo a series of educational-informational webinars. These webinars will upskill staff as to best practices for reducing their facilities' Scope 2 emissions from esports activities as well as educate and inform stakeholders as to the findings of this project's research component. In this way, the education component builds local industry capacity and systematically upskills partnered local esports lounge staff as a means of achieving local climate resilience. This component also achieves systemic change as to esports lounges' energy conservation and efficiency and establishes generalizable training supports for broader within-stakeholder-group adoption. These gains serve to develop and mobilize esports stakeholders as leaders in ecological sustainability.

Within the voluntary consensus component, partnered local esports venues, as indirect project beneficiaries, will co-found and participate in an industry standardization and self-regulatory organization for the purpose of achieving consensus in relation to club esports. We will also seek ANSI recognition of this organization as a national standards developer, which will conform this organization's voluntary consensus mechanisms with those required by ANSI and ISO. By unifying this area of the industry in this way, this component builds local and industry capacity to combat esports' ecological risk and mobilize climate action.

Element 3

Element 3, *Consensus Building and Dispute Resolution,* is incorporated and operationalized by this project's voluntary consensus component. Partnered local esports venues, as indirect project beneficiaries, will co-found and participate in an industry standardization and self-regulatory organization for the purpose of achieving consensus in relation to club esports. We will also seek ANSI recognition of this organization as a national standards developer, which will conform this organization's voluntary consensus mechanisms with those required by ANSI and ISO. In this way, this project coordinates, facilitates, and systematizes the consensus-building process for all stakeholder classes on the issue of club esports, which includes but is not limited to local esports venues' ecological, and especially climate, risk. By unifying stakeholder interests in this way, this project works to align diverse stakeholders incentive structures along common ideas and plans for addressing areas of concern. From this, dispute-resolution mechanisms will likely emerge, as competing stakeholders classes will then have a voluntary forum to voice concerns.

Element 5

Element 5, *Constructive Engagement by Relevant Stakeholders,* is incorporated and operationalized by this project's education and voluntary consensus components.

Within the education component, partnered local esports venues, as indirect project beneficiaries, will undergo a series of educational-informational webinars. These educational-informational webinars will also be made available for public consumption at the time of production as well as on demand thereafter. Additional educational-informational materials on known best practices in energy efficiency for entertainment and sports venues and findings from this project's research component will similarly be made available to partnered local esports venues, community members, and any other stakeholder classes on demand. These webinars and materials will be the first of their kind and will offer local esports venues and other stakeholder classes easy and open access to information and assistance on the issue.

Within the voluntary consensus component, partnered local esports venues, as indirect project beneficiaries, will co-found and participate in an industry standardization and self-regulatory organization for the purpose of achieving consensus in relation to club esports. This organization will be the first organization of its kind for local esports venues and other stakeholder classes on the issue of club esports. As such, this organization will offer local esports venues and other stakeholder classes a public forum for fostering cooperation and consensus, addressing interorganizational concerns, resolving disputes, and instilling awareness to esports' ecological and climate risk, amongst other concerns, as central to the club esports conversation.

Element 6

Element 6, *Sound Management and Implementation,* is incorporated and operationalized throughout this project's execution by design. Through points of contact as clearly defined, the USEA will cooperate with the AEA in maximizing partnered local esports venues' participation in

all components of this project, ensuring their timely completion of deliverables and other performance milestones, complying with relevant governmental and organizational compliance processes and procedures, and proactively upholding the community's civil rights. To ensure transparency and accountability throughout the performance period, the USEA and AEA will regularly convene in formal settings to review this project's execution and partnered local esports venues' responsibilities throughout all components of this project, as agreed.

Element 7

Element 7, *Evaluation, Lessons Learned, and Replication of Best Practices,* is incorporated and operationalized throughout this project's execution by design. Through points of contact as clearly defined, the USEA will cooperate with the AEA in evaluating progress made towards achieving this project's performance milestones and desired public health outcomes. The Project Manager and Partner Manager will cooperate with partnered local esports venues on producing quarterly reports, status updates, and formal reflections on this project's execution, for internal, governmental, and public consumption. Other relevant compliance materials will be published on this project's dedicated website throughout the performance period.

Part 1E: Project Linkages

This project advances Goal 2 of the *EPA Strategic Plan, FY 2022-2026* by conducting novel research on the ecological impacts of esports activities, especially on the climate; educating emitting organizations on esports' ecological risk and known best practices in energy efficiency for entertainment and sporting venues; and convening stakeholders in a neutral forum for the purpose of achieving voluntary consensus on this matter. With these activities, this project advances Objective 2.2 by empowering communities with local esports venues to participate in industry decision-making, standardization, and self-regulation processes and assert their civil rights in defense of public health as equal beneficiaries of our natural environment.

Part 1F: Partner and Collaborate

Partner Responsibilities

The partnered local esports venues have committed to deploy and maintain watt monitors at their facilities for years 1-2 of the performance period, in respect of the research component; participate in educational-informational webinars hosted by the USEA and AEA, in respect of the education component; and co-found and fully participate in the voluntary consensus organization, in respect of the voluntary consensus component. The AEA has committed to cooperate with the USEA under an anticipated subaward in the execution of all parts of this project, as described throughout this application. Letters of commitment are attached.

Partner Resources and Interests

The partnered local esports venues have pledged time and effort as part of their commitment to their responsibilities, as described. The AEA has pledged time and effort as part of their commitment to their responsibilities, as described, in anticipation of a subaward.

The partnered local esports venues have a pre-existing financial relationship with the AEA and, as such, have a material interest in cooperating with the AEA in this and related matters. Based on consultation with the owners and operators of the partnered local esports venues, the USEA and AEA are confident in the stated commitment of the partnered local esports venues to dispense of their responsibilities, as described, and intend to hold them accountable to their letters of commitment, as attached. The USEA and AEA believe that strategic communications published throughout the performance period, as well as prominent recognition of partnered local esports venues for their participation, offer commercial incentives for cooperation.

Applicant - Partner Relationship

The USEA and AEA have a pre-existing relationship for the co-development and co-execution of esports.eco, part of which is this project's execution. The AEA has positive report with the partnered local esports venues, and the USEA and AEA have mutual positive report, given historical cooperation and collaboration.

Parts 2A-B: Project Activities and Milestones

This project consists of three (3) components: research, education, and voluntary consensus.

The research component consists of the deployment of watt monitors into partnered local esports venues' facilities for a period of two (2) years and is supported by data cleaning, warehousing, and publication in raw form.

The education component consists of the creation and dissemination of educational-informational materials focusing on esports ecology; known best practices in energy efficiency, especially for entertainment and sporting venues; and insights from data collection in the research component.The voluntary consensus component consists of the formation of a voluntary consensus organization in respect of club esports, acceptance into ANSI as a member and Accredited Standards Developer, and the creation of at least one (1) standard in relation to esports ecology, namely energy efficiency best practices.

Performance milestones and the timeline for the completion and delivery of project deliverables are provided by Figure D on the following page.

Figure D: Performance Milestones and Project Deliverables

Q3 2023	Q4 2023	Q1 2024	Q2 2024	Q3 2024	Q4 2024	Q1 2025	Q2 2025	Q3 2025	Q4 2025	Q1 2026	Q2 2026
Data collection via watt monitoring at partnered local esports venues								Publish industry and academic report on esports' Scope 2 emissions		Adopt 1 standard on esports emissions and energy efficiency best practices	
Monthly blog posts on esports ecology, energy efficiency, and project progress											
Complete QAPP	Found nonprofit	Apply for ANSI membership	Apply for ANSI ASD status		Quarterly webinars on esports ecology and energy efficiency						

Part 3B: Performance Measurement Plan

The Project Manager and Partner Manager will convene weekly to assess progress made towards project deliverables and performance milestones and will document their formal interactions on this matter. The Partner Manager will convene the owners and operators of the partnered local esports venues to assess progress made towards project deliverables and performance milestones and to ensure their fullest dispensation of responsibilities. The Partner Manager will document their formal interactions on this matter and share documentation with the Project Manager within one (1) week of the documentation's creation.

The Project Manager will coordinate the provision of technical support services with the Partner Manager to ensure timely and efficient progress is made towards project deliverables and performance milestones by partnered local esports venues. Where timely and efficient progress on any matter is not being made, as supported by the Project Manager's and Partner Manager's documentation on the matter, the Project Manager will convene the affected partners and prescribe a remediation plan to regain timeliness and efficiency. The Project Manager will notify EPA as to any progress developments as they are realized and complete any progress reports prescribed by EPA prior to their deadlines for submission. If issues arise that are beyond the USEA's control, the Project Manager will contact EPA's principal point of contact to the USEA immediately to request non-financial support, if needed, and establish a remediation plan.

All documentation on performance measurement will be made available to the USEA and AEA on demand by means of a password-protected cloud storage system. The Project Manager will make such documentation available to EPA as requested or otherwise required. The Project Manager and Partner Manager will cooperate with partnered local esports venues on producing quarterly reports, status updates, and formal reflections on this project's execution, for internal, governmental, and public consumption. Other relevant compliance materials will be published on this project's dedicated website throughout the performance period.

Part 3C: Sustainability Plan & Community Vision

The USEA and AEA have a pre-existing memorandum of understanding contemplating the co-development of esports.eco as co-equal partners. We anticipate that this relationship will endure throughout the performance period and sustain esports.eco thereafter.

The AEA has a prior financial relationship with the partnered local esports venues, and we anticipate that this relationship will endure throughout the performance period and thereafter. Given this relationship, we anticipate that participation in continuous research, education, and voluntary consensus by partnered local esports venues will be maintained throughout the performance period and thereafter. We additionally anticipate that the partnered local esports venues' membership in the voluntary consensus organization, as part of this project's voluntary consensus component, will incentivize them to maintain participation in esports.eco following the performance period.

The USEA and AEA are in agreement that the AEA will coordinate participation in esports.eco by its other local esports venues following the performance period. Following the performance

period, the USEA and AEA will work with the National Esports Collegiate Conference (NECC), which is the largest college esports athletic conference in North America, to coordinate internship and experiential learning opportunities at partnered local esports venues in relation to continuous research. The USEA has a pre-existing relationship with the NECC for a similar purpose, and the NECC is aligned with the USEA and AEA in offering such opportunities to interested students. We anticipate that increasing student participation and collegiate buy-in to esports.eco, especially for students and institutions that share communities with local esports venues, will further esports.eco's growth and sustainability following the performance period.

Parts 4A-C: Programmatic Capability

Organizational Experience & Infrastructure

The USEA has the necessary controls to ensure successful and compliant project execution as a result of a previous federal financial award. The USEA's subject-matter experience is derived from its participation in the UNFCCC's Sports for Climate Action Framework and Race to Zero. The USEA intends to contract Sarah Han, who is the USEA's present Managing Director of Communications, as Project Manager, and Victoria Johnson, who was instrumental in developing esports.eco, as a Climate Specialist.

The AEA does not have prior experience with sustainability programming. As a result, the Project Manager will be contracted from the USEA and will oversee, coordinate, and lead the execution of all parts of this project, including the execution of the AEA's responsibilities. As an anticipated subaward, the AEA will comply with the USEA's internal procurement policy, which itself is compliant with 2 CFR 200, and the USEA's policies and procedures for soliciting, receiving, and addressing complaints as to discrimination or other civil rights violations. The AEA has a qualified volunteer staff and will contract with Wyatt Pursley, who is the AEA's present CEO, as Partner Manager. The USEA will leverage its positive report with the AEA in overseeing administration and compliance.

Staff Experience & Qualifications

Project Manager

We intend to contract with Sarah Han, who is the USEA's present Managing Director of Communications and secondary point of contact for the USEA's previous federal financial award, for the performance of project management services. Sarah would be responsible for leading the execution of this project in all parts, which includes but is not limited to coordination of project activities by proposed partners, management of the procurement process for subawards and contracts, oversight and approval of deliverables from subawards and contracts made, and service as principal point of contact between the USEA and EPA.

Sarah has 10+ years of paid work experience in client management, community development, and event management. In this time, Sarah worked for more than four (4) years in wealth management for UBS, which is a globally recognized bank, in client

support for managing portfolios totaling at least $10 million in assets; led the development of a community esports organization at California State University, Long Beach; and has over two (2) years of experience in the esports and gaming industries. Sarah is also instrumental to the day-to-day operations of the USEA, which she supports collaboratively with the Managing Director of Operations who serves as the organization's executive director.

Climate Specialist

We intend to contract with Victoria Johnson, who was instrumental in the development of the USEA's esports.eco program throughout 2021, for the performance of specialist services in relation to this project's education and voluntary consensus components. Victoria would be responsible for providing subject-matter expertise in the development of educational-informational materials and webinars within the education component as well as the development of the voluntary consensus organization and advisory of the governing body of the voluntary consensus organization on relevant subject matter within this project's voluntary consensus component.

Victoria earned a BS in Geophysics from the University of Washington in Spring of 2021 and had her thesis research accepted for the Fall 2021 meeting of the American Geophysical Union. While her particular area of study differs from climate science per se, Victoria's experience with data analysis and modeling of seismic data is substantially relevant to this project's technical demands. From her work on esports.eco to date, Victoria has familiarized herself with the Corporate Standard and has supported research in development by the USEA as to esports' ecological impact, with a focus on sustainable business models and alternative frameworks for conceptualizing esports emissions.

Partner Manager

We intend to make a subaward to the AEA for services in support of this project's research and education components. We anticipate that the AEA will contract with Wyatt Pursley, who is the AEA's present CEO, for the performance of partner management services. Wyatt would be responsible for leading the execution of this project's research component, liaising with partnered local esports venues, managing the procurement process for contracts made by the AEA under their proposed subaward, overseeing and approving of deliverables from contracts made, and serving as principal point of contact between the USEA and AEA and between the AEA and partnered local esports venues.

Wyatt is the AEA's founder and chief executive. As such, Wyatt has led the AEA into being the largest network of independent or franchised local esports venues and community-based esports clubs across the United States as well as the only nonprofit organization organizing community-based esports competitions in this way. Given Wyatt's position within the organization, he has unique and special relationships with the owners and operators of the partnered local esports venues. We anticipate that this

positive report will foster streamlined and efficient work with partnered local esports venues throughout all parts of this project, especially the research component.

Expenditure of Awarded Grant Funds

The USEA is compliant with 2 CFR 200 through its internal procurement policy. The Project Manager has experience working with federal information systems to file progress reports and requests draw-downs from awards. The USEA's Board of Directors has sole control over the USEA's financial affairs, including budgeting and the release of funds. The Project Manager also has experience meeting and evaluating project deliverables and performance milestones, especially with the USEA's previous federal financial award. Through the anticipated subaward relationship between the USEA and AEA, the USEA will ensure compliance with federal laws and regulations, project deliverables and performance milestones are met, and grant monies are timely and efficiently dispensed.

Part 5: Past Performance

The USEA does not have experience with EPA assistance agreements or non-federal grants. The USEA was awarded a grant in 2022 under the Targeted Violence and Terrorism Prevention program administered by the DHS Center for Prevention Programs and Partnerships (CP3).

- Opportunity Number: DHS-22-TTP-132-00-01
- Award Number: EMW-2022-GR-00102

The USEA has met performance milestones as agreed to and accepted by CP3 and has submitted performance reports to CP3 and FEMA prior to the deadline. When the USEA has not met performance milestones within the anticipated timeline, the USEA has communicated these shortcomings as well as the relevant challenges and other circumstances that led to this transpiring. The USEA has also made alternative accommodations to remediate any performance deadline shortcomings, communicated these to CP3, and worked to meet alternative deadlines. The USEA has not requested any extensions to the performance period.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Alaska Municipal League

Address: One Sealaska Plaza, Suite 302

City: Juneau

State: AK: Alaska Zip Code: 99801

B. Unique Entity Identifier (UEI): RPTJN4EMAGN3

C. Applicant/Recipient Point of Contact

Name: Nils Andreassen

Phone: Ex. 6 - Personal Privacy (PP)

Email: nils@akml.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

Not applicable, no pending lawsuits.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

Not applicable, no pending lawsuits.

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

Not applicable, no pending lawsuits.

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

Not applicable.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Not applicable, we have less than 15 employees.

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Not applicable, we have less than 15 employees.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Alicia Hughes-Skandijs	Executive Director	04/13/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

EPA Form 5700-54 (Rev 4-02)

State of Alaska

Department of Commerce

Juneau

CERTIFICATE OF INCORPORATION

The undersigned, as Commissioner of Commerce of the State of Alaska, hereby certifies that duplicate originals of the Articles of Incorporation of ALASKA MUNICIPAL LEAGUE

duly signed and verified pursuant to the provisions of the Alaska Non-Profit Corporation Act, have been received in this office and are found to conform to law.

ACCORDINGLY the undersigned, as such Commissioner of Commerce, and by virtue of the authority vested in him by law hereby issues this Certificate of Incorporation of

ALASKA MUNICIPAL LEAGUE

and attaches hereto a duplicate original of the Articles of Incorporation.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed my official seal, at Juneau, the Capital, this

11th day of January A.D. 19 72

KENNETH M. KADOW
COMMISSIONER OF COMMERCE

08-122

ED_016126_00000540-00001

RECORD

ARTICLES OF INCORPORATION

ALASKA MUNICIPAL LEAGUE

The undersigned adult residents of the State of Alaska desiring to form a corporation not for profit under AS 10.20, adopt the following Articles of Incorporation:

ARTICLE I

The name of the corporation is the Alaska Municipal League.

ARTICLE II

The purposes for which the corporation is organized are as follows:

(a) To perpetuate and develop the League as an agency for the cooperation of Cities and Boroughs in the State of Alaska for the practical study of municipal affairs.

(b) To promote application of the best methods in all branches of municipal service by holding at least one conference annually for the discussion of problems of administration.

(c) To gather and circulate information and experience concerning the most approved methods of municipal administration.

(d) To secure general and municipal legislation which will be beneficial to the Cities and Boroughs and inhabitants thereof, and to oppose legislation injurious thereto.

(e) To safeguard the interests, rights and privileges of Alaskan Cities and Boroughs as they may be affected by Federal and State governmental action.

(f) To secure cooperation among Cities and Boroughs of the State in a thorough study of local problems and in the application of efficient methods of local government.

(g) To provide means whereby municipal officials may interchange ideas, experiences, and obtain expert advice.

(h) To engage in the study and preparation of uniform ordinances, resolutions, and practices; and to do any and all other things necessary or proper for the benefit of the Cities and Boroughs of Alaska.

ED_016126_00000540-00002

(i) To promote the general welfare of the Cities and Boroughs in this State and the general improvement and facilitation of every branch of municipal government and administration.

ARTICLE III

The principal place of business of the corporation is in Juneau, Alaska.

ARTICLE IV

The period of the corporation's duration is perpetual.

ARTICLE V

Any incorporated Alaska City, organized Borough, or Federally incorporated community shall be eligible for membership in this League. When the City or Borough becomes a member of the League, any official of such City or Borough may be selected by its governing body as a delegate to any convention of the League. Any member City or Borough which shall be in arrears for more than one-year's dues shall be stricken from the roll of the League until its dues shall be paid in full. Any member City or Borough may withdraw from the League after thirty (30) days' written notice thereof is given to the Executive Director, provided that all dues then payable have first been paid.

ARTICLE VI

The address of the initial registered office of the corporation is Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP). The initial registered agent shall be Don M. Berry.

ARTICLE VII

The powers of this corporation shall be exercised, its properties controlled and its affairs conducted by the Board of Directors. The Board of Directors shall consist of the President, Vice-President, and seven Directors, each of whom shall hold an elective or appointive position in a member City or Borough. The officers of this organization shall be a President, Vice-President, and an Executive Director. The terms of office of the President and Vice-President shall be one year. The terms of office of Executive Director shall be two years. The initial officers and directors shall be the officers and directors of the existing unincorporated association known as the Alaska Municipal League, to which this corporation is successor. Any vacancy in office shall be filled by appointment by the President subject to approval of the Board of Directors. The Board of Directors

ED_016126_00000540-00003

shall not receive any compensation for their services but, by resolution of the Board, may receive reimbursement for actual and necessary expenses incurred in the performance of their duties. The President may appoint special committees for the purpose of studying municipal problems, conducting schools, making legislative recommendations, or other appropriate League services. No committee shall be authorized to create any financial liability unless it shall have been approved both in nature and amount by the President, the Executive Director, or the Board of Directors.

ARTICLE VII

An annual conference of the League shall be held each year at a time and place to be determined by the Board of Directors. The program of the annual conference shall be arranged by or under the direction of the Board of Directors. Special meetings of the League may be called by the President or by a majority of the Board of Directors at any time by giving notice to the City Clerk of each member City and Borough at least fifteen (15) days prior to the date of the meeting. The notice shall state the purpose of the meeting. Regional meetings may be called at any time for the benefit of City and Borough officials located in various sections of the State in the same manner as herein provided for calling special meetings.

ARTICLE VIII

Nomination for elective offices shall be made by a nominating committee of five (5) members chosen by the President on the first day of the annual conference. Additional nominations may be made from the floor, and elections shall be on the last day of the session.

ARTICLE IX

There shall be no limit upon the number of delegates to be sent by any member City or Borough to the meeting of the League. All delegates may be heard in debate. Questions shall be decided by voice vote unless any member City or Borough shall require roll call vote. When a roll call vote is taken, each member City or Borough is entitled to only one (1) vote. Each delegation shall select one of its registered delegates as chairman to express or record its vote. No member may vote by proxy.

ARTICLE X

The annual dues for each City or Borough shall be based on the population within the City or Borough as determined on December 1st of each year by the governing body thereof. The rate of annual dues for each member

ED_016126_00000540-00004

City and Borough shall be established by the Board of Directors. The dues shall be payable in advance on January 1st of each year, provided that dues for any member City or Borough joining the League between April 1st and June 30th shall be three-fourths (3/4) of the annual dues; between July 1st and September 30th shall be one-half (1/2) of the annual dues; and between October 1st and December 31st shall be one-quarter (1/4) of the annual dues.

ARTICLE XI

Upon the dissolution or winding up of this corporation, its assets remaining after payment of, or provision for payment of, all debts and liabilities of this corporation shall be distributed to the State of Alaska or to a local government body of the State of Alaska for use exclusive for public purposes, or to a non-profit fund foundational corporation which is organized and operated exclusively for charitable purposes and which has established its tax exempt status under Section 501 (c) (3) of the Internal Revenue Code, and Section 23701 - d of the Revenue and Taxation Code. If this corporation holds any assets in trust, such assets shall be disposed of in such a manner as may be directed by decree of the Superior Court of the Judicial District in which this corporation's principal office is located upon petition thereof by the Attorney General or by any person concerned in the liquidation.

ARTICLE XII

The League shall always be non-partisan in its organization and in the conduct of its affairs. It shall be the duty of the presiding officer to suppress the discussion of partisan politics and to suppress efforts to make a personal or political attack upon any official or any member of this League.

ARTICLE XIII

It shall be the duty of the Executive Director to prepare by-laws and submit them to the Board of Directors for consideration and adoption by a majority of its members. By-laws may be amended by a majority vote at the annual meeting or any special meeting of the League.

ARTICLE XIV

These articles of incorporation may be amended at the annual meeting or special meeting by a two-thirds (2/3) vote of all Cities and Boroughs voting, provided the proposed amendment shall have been submitted in writing and read to the delegates on the first day of the meeting.

UAA Institute for Circumpolar Health Studies
University of Alaska Anchorage

U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA)
OFFICE OF ENVIRONMENTAL JUSTICE AND EXTERNAL CIVIL RIGHTS (OEJECR)
1200 Pennsylvania Ave, N.W.
Washington, DC 20460

April 5th, 2023

The University of Alaska Anchorage (UAA) Institute for Circumpolar Health Studies has worked with the Alaska Municipal League (AML) to support and host the Alaska Municipal Climate Network (AMCN). This ongoing effort has helped share climate planning information with community leaders, and presented best practices at AML's annual local government conference.

UAA is pleased to be able to strengthen this collaboration in support of this application to EPA, focused on collaborative problem solving. This serves as our letter of commitment to participate in the project, and to provide technical assistance as it relates to climate action and resilience planning, including in its relation to the outcomes of the health impact assessments being conducted.

I will serve as the UAA project lead. My research focuses on understanding the health impacts of climate change and working with communities to develop locally relevant adaptation and resilience-building strategies. To address community needs, my prior work has addressed vector-borne and zoonotic diseases, wildfires, health and extreme heat, air quality, food security, and safe transportation. I also facilitated the development of the Municipality of Anchorage's Climate Action Plan in 2019. My role in the project's development and implementation, includes:

- Identifying available data sources and information related to the intersection of public health and climate change impacting communities in Alaska.
- Development of a model or template climate action and resilience plan (CARP) for use by the project team, which will facilitate the strategic and efficient implementation in communities.
- Working with the project team to develop the plan for or helping conduct climate planning with local resilience planning committees.
- Reviewing draft CARPs to ensure technical accuracy and provide recommendations as necessary.

The contribution of UAA staff time will be considered a subaward and compliant with 2 CFR 200, leveraging UAA's staff expertise and interests, including work that is already occurring in relation to climate planning in Alaska. UAA's team at the Institute for Circumpolar Health Studies includes a variety of research assistants, and we are able to bring in additional resources as needed to complete the project effectively.

UAA understands that this project will occur over three years, beginning in November 2023, and that the CARP component will occur mainly in the second half of the project. Technical assistance will be provided throughout, including through the implementation of the health impact assessments that are scheduled to be deployed in the first half of the project. My experience may be helpful here, too.

I look forward to a successful outcome from this application and to working with AML in delivering this project in ways that benefit the public health and environmental justice of Alaska communities.

Sincerely,

Micah B. Hahn

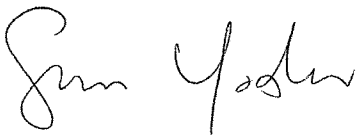
Washington, DC 20460

On behalf of the Alaska Department of Health (DOH), Division of Public Health (DPH), please accept this letter of commitment from DOH for the Alaska Municipal League (AML) proposal, "Health-Climate Planning that Strengthens Alaska's Rural Communities". We commit to participating in the project by providing technical assistance on topics related to public health, particularly on the use of health impact assessments (HIA) to evaluate the impact of climate change and natural disasters on disadvantaged communities in rural areas of Alaska.

DPH currently has a memorandum of agreement with AML to collaborate on addressing public health concerns in Alaska and we look forward to strengthening this collaboration through the project proposed by AML.

The Environmental Public Health Program (EPHP), within DPH, will be lead during this collaborative effort. I manage this program and lead climate and health activities for the Department. I am also lead on DOH activities related to HIA and helped develop the Alaska HIA toolkit. As part of this work, I was the primary author on the 2018 DPH report, "Potential Health Impacts of Climate Change in Alaska". EPHP intends to be a strong contributor to the project's development and implementation, and will participate as capacity allows in the:



- Identification of available public health data to be used for community HIAs and assessing social determinants of health.
- Development of model or template assessment for use by the project team to facilitate the rapid appraisal within communities.
- Development of stakeholder engagement plan.
- Review of draft HIAs to ensure technical accuracy and provide recommendations as necessary.

Contributions from EPHP staff will be considered in-kind support and will, wherever possible, leverage DOH staff expertise and interests, including current work related to climate and health in Alaska. We understand that this project will occur over three years, beginning in November 2023, and that the HIA component will occur mainly in the first half of the project. As feasible,

technical assistance will be provided throughout, including through the development of climate action and resilience plans that are scheduled to be developed in the second half of the project.

We look forward to a successful outcome from this application, as well as working with AML in delivering this project, which we feel will benefit public health and environmental justice for in Alaskan communities.

Sincerely,

Sarah Yoder
Environmental Public Health Program Manager

April 5th, 2023

The Alaska Department of Environmental Conservation (DEC) is working closely with the Alaska Municipal League (AML) to ensure an effective response to EPA's Climate Pollution Reduction Grant Program. The close collaboration that AML has with other State agencies, including Department of Health and Alaska Department of Transportation and Public Facilities reflects the value that AML brings to strengthening the intersection of local and State government processes and activities.

Given DEC's role in delivering a Priority Climate Action Plan for the State of Alaska, including to conduct a greenhouse gas emission inventory, and ultimately to produce a Comprehensive Climate Action Plan, it is critical that partnerships exist between communities and state government. DEC will work with AML to meet the deliverables of that effort.

At the same time, DEC recognizes how broad in scope community concerns and climate resilience truly are, and believes that additional components as highlighted in this application will inform overall state processes. By including elements such as environmental justice and social determinants of health, and utilizing tools like the health impact assessment, we believe that our coordinated approach to addressing resilience will be strengthened.

With that in mind, DEC is pleased to be able to strengthen this collaboration in support of AML's application to EPA, focused on collaborative problem solving. This serves as our letter of commitment to participate in the project, and to provide technical assistance as it relates climate action plan development, including to cross-reference against the work that we will conduct to complete the Climate Pollution Reduction grant activities.

The DEC project lead is Morgan Frank, who will be a strong contributor to the project's development and implementation, and is the project manager for DEC for the CPRG, who will:

- Provide DEC resources and data as applicable, and coordinate sharing of GHG inventory data.
- Coordinate with the project team any consultation on State-level climate action plan activities.

- Work to align community priorities, environmental justice considerations, and health equities as part of statewide planning.

This staff time will be considered in-kind support, leveraging DEC staff expertise and interests, including work that is already occurring in relation to climate planning in Alaska. DEC's air quality team is extensive, and we are able to bring in additional resources as needed. DEC understands that this project will occur over three years, beginning in November 2023, and that our collaboration will be beneficial over the life of the project.

We look forward to a successful outcome from this application and to working with AML in delivering this project in ways that benefit climate action planning within Alaska communities.

Sincerely,

Morgan Frank

The Alaska Federation of Natives (AFN) is working closely with the Alaska Municipal League (AML) to ensure an effective response to federal investment opportunities that benefit Alaska's communities and Tribal governments. AFN and AML have co-hosted two infrastructure symposia and a broadband summit in the last year, and contribute to the work of the Alaska Infrastructure Coordinating Committee and online resources for Alaska communities.

AFN manages a program of Community Navigators who assist Tribal governments in working through federal opportunities, and fostering collaboration. AFN provides technical assistance to Tribal governments, Alaska Native regional and village corporations, and affiliates organizations. AFN is uniquely situated to facilitate engagement and participation in community-level activities.

AFN is pleased to be able to strengthen this collaboration in support of AML's application to EPA, focused on collaborative problem solving. This serves as our letter of commitment to participate in the project, and to assist especially with stakeholder engagement as it relates to Alaska' Tribal governments.

Our project lead is Nicole Borromeo, who is the program director for the AFN Navigator Program, and who will:

- Provide input and guidance in project development and implementation, ensuring that resilience strategies are consistent with priorities expressed by Tribes in Alaska.
- Coordinate with the project team any consultation on community level climate action plans or strategies, and to encourage Tribal environmental coordinators to participate in Local Resilience Planning Committees.
- Contribute perspectives on equitable resilience and climate planning, and environmental justice.

This staff time will be considered in-kind support, leveraging AFN staff expertise and interests, and work that is already occurring in relation to maximizing the federal investment into Alaska. AFN understands that this project will occur over three years, beginning in November 2023, and that our collaboration will be beneficial over the life of the project.

RESEARCH AND PROFESSIONAL EXPERIENCE

2018 – Present - *Executive Director* ◦ Alaska Municipal League
Supervise staff of 14 and support board of 29. Set strategic direction and implement member directed activities. Serve as a Trustee of the Alaska Municipal League Joint Insurance Association, and as executive director of the Alaska Municipal League Investment Pool, overseeing $460 million in assets. Responsible for operations that include Alaska Municipal Financial Solutions, providing bookkeeping and accounting services; Alaska Remote Seller Sales Tax Commission, which manages the collection annually of $20 million; and the Alaska Municipal Health Trust.

2009 – 2018 - *Executive Director* ◦ Institute of the North
Principal Investigator for the Arctic Council's Arctic Energy Summit, Principal Investigator for the Arctic Council's Arctic Maritime and Aviation Transportation Infrastructure Initiative. Supervise staff of two to five people, manage funding of up to $1,500,000 annually, and develop strategic plan and implementation process for the Institute of North. Secretariat for the State of Alaska's Alaska Arctic Policy Commission and author/editor of the State's Arctic Policy; and Secretariat of the State's Climate Change Task Force and author/editor of the State's Climate Change Policy.

2005 – 2009 - *VISTA Program Coordinator* ◦ Rural Alaska Community Action Program
Coordination of VISTA Village Council Management Program in ten rural communities. Develop community planning curriculum for VISTA members, and coordinate environmental activities for 20 AmeriCorps members in rural Alaska, overseeing completion of Fire Smart Alaska program.

RESEARCH AND PROFESSIONAL EXPERIENCE

2022 – Present - *Infrastructure Coordinator* ◦ Alaska Municipal League
Responsible for assisting organization with development of strategic approach to responding to and maximizing federal infrastructure investments, coordinating collaboration with State agencies, and sustaining a comprehensive outreach, education, and technical assistance program. Liaise with State agencies on multi-jurisdictional and intergovernmental collaboration. Support grant writing efforts of local governments, as it relates to project development and merit criteria.

2019 – 2022 - *City Manager* ◦ City of Unalaska and International Port of Dutch Harbor
Ensure policy direction set by City Council is implemented and delivery of public services is provided in an efficient and cost-effective manner. Direct oversite of Assistant City Manager and nine department directors.

2015 – 2019 - *Assistant City Manager* ◦ City of Unalaska and International Port of Dutch Harbor
Led Department of Administration with staff and programs involved with human resources, risk management, employee housing, non-profit community support grants. Formalized employee development program, including a partnership with University of Alaska Fairbanks to provide onsite Certified Public Management training for Directors and Deputy Directors.

2011 – 2015 - *Director of Planning* ◦ City of Unalaska and International Port of Dutch Harbor
Led staff and projects involved with comprehensive planning, housing initiatives, development review, tideland leasing, GIS & mapping, and historic preservation. Coordinated the annual development and adoption process of the 5-year Capital Project & Major Maintenance Plan, and the integration into Budget process. Reestablished the Historic Preservation Commission and provided staff support to the Planning Commission, Historic Preservation Commission, & City Council.

2009 – 2011 - *Long Range Planning Supervisor* ◦ City of Franklin, Tennessee
Formed and managed the Long-Range Planning Division in the Department of Planning and Sustainability, which included staff and projects involving sustainability, land use and transportation planning, and grant administration. Coordinated annual updates to the Land Use Plan, tracking outreach methods and increasing participation.

EXECUTIVE SUMMARY

Background

Over the past century, the air and water temperatures in Alaska have warmed considerably faster than in the rest of the United States. Because Alaska is the only Arctic state in the Nation, Alaskans are likely to face some climate change challenges that will be different than those encountered in other states. For example, permafrost currently underlies 80% of Alaska and provides a stable foundation for the physical infrastructure of many Alaska communities. As has already been seen in numerous villages, the groundcover that overlies permafrost is vulnerable to sinking or caving if the permafrost thaws, resulting in costly damage to physical infrastructure. The reliance on subsistence resources is another contrast to many other states. Many Alaskans depend upon subsistence harvests of fish and wildlife resources for food and to support their way of life. Some Alaskans report that the changing environment has already impacted their traditional practices.

Many past efforts to characterize the potential impacts of climate change in Alaska have focused primarily on describing expected changes to the physical environment and the ecosystem, and less on describing how these changes, in addition to changes in animal and environmental health, could affect human health. Thus, a careful analysis of how climate change could affect the health of people living in Alaska is warranted. The Alaska Division of Public Health has conducted such an assessment using the Health Impact Assessment (HIA) framework; the assessment is based on the current National Climate Assessment (NCA) predictions for Alaska.

The document is intended to provide a broad overview of the potential adverse human health impacts of climate change in Alaska and to present examples of adaptation strategies for communities to consider when planning their own response efforts. This document does not present a new model for climate change in Alaska, and it does not offer a critique of the NCA predictions for Alaska.

Finally, while this assessment is focused on the potential adverse health impacts of climate change in Alaska, it is important to note that there will likely be some beneficial health impacts of climate change in Alaska as well. For example, warmer temperatures might be more conducive to a longer growing season and growing a wider range of agricultural crops, resulting in increased food security in some areas. Warmer winter temperatures might also lead to fewer injuries and fatalities related to cold temperatures.

Big Picture Overview

What is already known about this topic?

Alaska is experiencing changes in climate, and temperatures in the state have warmed faster than the rest of the United States. Climate change has already affected human health in Alaska and additional impacts are likely to occur.

What is added by this report?

The impacts of climate change in Alaska have been well documented in historical, environmental, and regional contexts, but little has been published on the range of human health impacts statewide. This report provides a broad assessment of the potential adverse human health impacts of climate change in Alaska.

This report is also intended to serve as a resource for communities to determine which adverse impacts of climate change are most likely to affect their residents and to help communities develop their own adaptation strategies for climate change.

ED_016126_00000549-00005

Climate Change Predictions for Alaska

This HIA is based on assumptions and projections provided in the third NCA report and supporting documents, including Volume I of the fourth NCA. The NCA frequently refers to Scenario A2, which assumes increasing concentrations of greenhouse gases in the Earth's atmosphere and has been considered as a plausible climate scenario in multiple climate assessments. This HIA presents a general picture of what climate conditions might look like in Alaska, based on Scenario A2, as well as additional simulations presented by other agencies. Highlights of these predictions are below.

Temperature: Compared to 1971–1999, Alaska's average annual temperature is expected to be 2°–4°F higher in 2050 and 8°–9°F higher in 2100. Moreover, projections indicate that as temperatures increase, near-surface permafrost will disappear from much of Alaska by 2100 and the permafrost boundary will move hundreds of miles northward by the end of the century.

Precipitation: The average annual precipitation is predicted to increase by 15%–30% by 2100, compared to the reference period of 1971–1999. Snowfall amounts are predicted to decrease, but more areas will likely become wetter due to increased duration and volume of rainfall. Much of the increased precipitation is likely to evaporate because of increased temperatures. Extreme storms and extreme precipitation events may also increase.

Sea Ice Extent: Summer sea ice is predicted to disappear in the Chukchi Sea by 2050, and winter sea ice could decrease by 50% in the Bering and Chukchi Seas by the end of the century.

Climate Change and Potential Health Impacts in Alaska

The Alaska Division of Public Health typically assesses health impacts using health effect categories (HECs), which have been developed to identify the full spectrum of possible health impacts related to a specific scenario. Examples are provided below of what has been observed in each of these categories and what may be expected for the next 20–50 years, given the climate change predictions for Alaska (note: a wide range of examples of potential adverse health impacts of climate change in Alaska that are not provided in this executive summary are presented in the full document). It is important to note that climate-associated health impacts on communities are magnified by additional social and economic stresses that are not reviewed in this HIA.

Mental Health and Wellbeing: Climate change can affect mental health by causing solastalgia, the distressing sense of loss that people experience as a result of unwanted environmental changes that occur close to one's home, and associated pathologies including anxiety, depression, and post-traumatic stress disorder that can result from acute events such as fires, floods, and storm surges, and more protracted changes such as thawing permafrost and coastal erosion. These effects tend to disproportionately impact those living in low-resource settings, including indigenous groups. Psychosocial distress and its associated comorbidities will likely continue to increase in Alaska as communities experience unwanted changes in their environment.

Accidents and Injuries: Accidents and injuries due to extreme weather events, such as droughts, floods, and storms, are predicted to increase with climate change, and some reports suggest that such increases are already occurring. Flooding is a particular concern of extreme precipitation events and coastal storms, as floods are the second only to heat as the deadliest of all weather hazards in the United States. Extreme precipitation events can also lead to fatal- and non-fatal injuries due to mudslides, debris flow, and avalanches. Moreover, motor vehicle accidents may increase as thawing permafrost and the freeze-thaw cycles in the active layer of soil can cause

ED_016126_00000549-00006

damage to the transportation infrastructure in Alaska, which includes highways, railroads, and airstrips.

Potential Exposure to Hazardous Materials: A warming climate is predicted to lead to more frequent and larger fires in the Arctic. Over 5 million acres burned in Alaska in 2015, making it one of the worst recorded fire seasons ever. Fairbanks has had multiple air quality advisories in recent years due to hazardous conditions from wildfire smoke. As large wildfires increase, more poor air quality events are likely to occur, potentially leading to exacerbations of pre-existing respiratory and cardiovascular illnesses.

Food, Nutrition, and Subsistence Activity: Diminished food quality and quantity as well as changing food distribution and subsistence patterns are predicted to continue to arise from climate change. In Alaska, for example, hunters report thinning sea and river ice, which makes harvesting wild foods more dangerous. Storing and harvesting wild foods may also become more difficult with increased temperature and precipitation.

Infectious Diseases and Toxins from Microorganisms: Increasing temperatures and changing weather patterns could have many implications for infectious diseases in Alaska, especially waterborne and vectorborne diseases. For example, increased water temperatures could lead to more outbreaks of *Vibrio parahaemolyticus* gastroenteritis. Additionally, increased air temperatures could facilitate the northern spread of insects that can transmit West Nile Virus and Lyme disease.

Non-communicable and Chronic Diseases: Climate change is predicted to affect allergies and respiratory health as higher temperatures and changes in precipitation influence the abundance, seasonality, and distribution of aeroallergens (e.g., plant pollen). As a result, rates of allergic rhinitis (hay fever) and asthma are predicted to increase due to changes in aeroallergen concentrations. Warmer average winter temperatures in Alaska might have already contributed to an increase in patients seeking health care due to reactions from insect (e.g., yellowjacket) stings.

Water and Sanitation: Climate change brings a new complication to the challenge of addressing Alaska's existing water and sanitation disparities. Water and sanitation infrastructure damage has already occurred in some communities due to coastal erosion, thawing permafrost, storm surges, and flooding. Further damage to drinking water, wastewater, or storm water systems could adversely impact human health by way of facilitating waterborne diseases and decreasing the availability and quality of drinking water.

Health Services Infrastructure and Capacity: Thawing permafrost, erosion, wildfires, and flood events could damage health care infrastructure and decrease access to care by making travel to clinics more challenging.

ED_016126_00000549-00007

Key Potential Adverse Health Impacts by Health Effect Category

One initial step that local communities can take to prepare for climate change is to identify and prioritize the potential health impacts that will be most relevant to their community and, for each identified impact, determine the expected timing and magnitude of the effect. Examples of criteria that could be used for this application include (a) potential time to impact, (b) geographic extent of the impact, (c) the number of people directly impacted, (d) the number of people impacted who might experience serious health problems, and (e) resources needed to adapt to the impact. These criteria can then be summarized and presented in a simplified visual format such as a tiered and color-coded table. Next, communities can create a table that displays what the potential adverse health impacts of climate change might look like in their community for each health effect category to help prioritize adaptation strategies and resource needs (an example of what such a table might look like on a statewide basis is presented in the full document).

Summary of Monitoring and Adaptation Recommendations

The monitoring recommendations provided in this HIA are intended to help characterize the adverse health impacts of climate change over time. Monitoring indicators and resources are listed to help decision-makers and other stakeholders develop surveillance strategies and identify agencies currently collecting the relevant health and environmental data. Examples of proposed monitoring indicators include cases of selected infectious diseases, hospitalizations and deaths due to climate-related events (e.g., flooding, storm surges, wildfires), and changes in subsistence food consumption and food security. Examples of monitoring resources provided include the Scenarios Network for Alaska + Arctic Planning (SNAP) for community profiles on observed and projected temperatures; the Local Environmental Observer (LEO) Network for postings by local observers and topical experts about unusual animal, environment, and weather events; and the Alaska Trauma Registry (ATR) for injury trends. Where possible, this HIA identifies monitoring strategies that have been developed and tested by other state, federal, and international entities.

The adaptation recommendations provided in this HIA are intended to reduce morbidity and mortality from climate-related causes. Adaptation as it relates to climate change is defined by the Intergovernmental Panel on Climate Change as the "adjustment in natural or human systems in response to actual or expected climatic stimuli or their effects, which moderates harm or exploits beneficial opportunities." Examples of proposed overarching adaptation strategies include developing local and statewide climate change advisory groups, assessments, and adaptation plans; offering community members opportunities to relay their concerns about climate change and propose solutions; including human health in community vulnerability assessments for climate change; and assuring an adequate workforce capable of performing climate change research, surveillance, and adaptation. More specific adaptation strategies are also provided, such as reviewing architecture and engineering designs to ensure that plumbing infrastructure can withstand changes to the underlying permafrost, and if not, consider ways to address the problem; supporting successful community-based mental health wellness programs; and developing community response plans for wildfires.

ED_016126_00000549-00008

1.0 INTRODUCTION AND OVERVIEW

1.1 Climate Change Overview and Description

Climate change refers to both local and global alterations in climate, as well as the secondary effects of new climate conditions (such as decreasing sea ice). Rising temperatures, changes to precipitation, and increased frequency of extreme weather events are only a few of the commonly discussed features of climate change (IPCC, 2012). Each of these features has implications for ecosystems and human health (Luber et al., 2014; NCA, 2014).

1.2 HIA Overview

This Health Impact Assessment (HIA) provides a review of potential adverse human health impacts related to climate change in Alaska. It will (1) provide a broad overview of the wide range of potential adverse climate change impacts on human health in Alaska, (2) present the most current climate change information, to the extent possible, and (3) present examples of strategies for communities and decision-makers to consider when planning their own actions in response to climate change.

1.3 Legal Requirements for Health Impact Assessment (HIA)

The State of Alaska developed an HIA Toolkit to guide HIA practitioners in the state (referred to as Alaska HIA Toolkit; ADHSS, 2015). This Climate Change HIA represents a non-traditional HIA for Alaska (in that it does not focus on a proposed resource development project), though it still uses the HIA Toolkit as a guiding framework. As with traditional Alaska HIAs, this document and its related recommendations are not legally binding for any agency.

1.4 Purpose of Document

This report is intended to identify available information and enhance knowledge on climate change and how it might negatively impact human health in Alaska. It uses the structure of HIA to characterize and forecast the potential adverse health impacts of climate change in the state. A review of this type is especially important because there has not been a statewide comprehensive review or extensive discussion of potential human health impacts of climate change in Alaska. This report will be useful for communities and decision-makers in determining how to prioritize monitoring and adaptation strategies related to climate change.

1.5 HIA Framework and Methodology

1.5.1 HIA Definition

Health Impact Assessment is a combination of procedures, methods, and tools by which a policy, program, or project may be judged as to its potential effects on the health of a population, and the distribution of those effects within the population.

ED_016126_00000549-00009

1.5.2 HIA Methods

Using methodology presented in the Alaska HIA Toolkit (ADHSS, 2015), this HIA

- Reviews components of climate change based on climate change predictions for Alaska,
- Reviews the physical and general environmental setting of predicted changes,
- Identifies potential adverse health impacts using a set of defined health effect categories (HECs),
- Provides a perspective of the wide range of potential climate change impacts on human health in the state, and
- Provides examples of monitoring recommendations and adaptation strategies tied to potential health impacts.

1.5.3 HIA Scope

This HIA reviews the potential health impacts of climate change in Alaska primarily based on the following information:

- State of Alaska (SOA) databases and reports
- The National Climate Assessment (NCA) and associated documents
- The United States Global Change Research Program's (USGCRP) Climate and Health Assessment, 2016
- General methodologic parameters developed by the Alaska HIA Toolkit

1.5.3.1 Areas Outside the Scope of the HIA

While this HIA is focused on the potential adverse health impacts of climate change in Alaska, it is important to note that there will likely be beneficial health impacts of climate change in Alaska as well. For example, warmer temperatures could be more conducive to a longer growing season and growing a wider range of agricultural crops, which would increase food security in some areas. Warmer winter temperatures might also lead to fewer injuries and fatalities related to cold temperatures. That said, the instances of potential benefits of climate change are likely to be limited in number and smaller in magnitude than the adverse consequences (e.g., the increase in food security from the ability to grow new crops is likely to be smaller than the decrease in food security resulting from the decreased availability of some subsistence resources; USGCRP, 2016). Local communities can maximize potential positive health impacts of climate change by prioritizing their adaptation strategies and taking timely action steps.

1.5.3.2 Health Effect Categories (HECs)

The Alaska-specific HECs are a standard set of health effect categories that have been developed and discussed in the Alaska HIA Toolkit (Table 1). HECs have been developed to identify the full spectrum of possible health impacts related to a specific project or, in the case of this HIA, a set of climate change predictions. This climate change HIA adapted the Alaska HECs to better suit a discussion of climate change. As such, the Social Determinants of Health—the conditions in which people are born, grow up, live, work, and age (USDHHS, 2017)—are discussed as a constellation of factors that have implications within each HEC, rather than as a separate HEC, and Mental Health and Wellbeing was added as a new HEC. Finally, the advantage of the HEC structure is completeness, the disadvantage is occasional redundancy as some of the HECs overlap (e.g., mental health and wellbeing can be related to food, nutrition, and subsistence activities).

ED_016126_00000549-00010

Table 1. Health Effect Categories

Health Effect Category	Pathway Description
Mental Health and Wellbeing	This category pertains to outcomes and determinants related to mental health, substance use, social exclusion, psychosocial distress, historical trauma, family dynamics, economic stressors, and social support systems. The key outcomes considered are increases and decreases in psychosocial distress and its associated comorbidities, adverse health behaviors (such as substance abuse), anxiety, depression, and suicide.
Accidents and Injuries	This category pertains to health outcomes and determinants related to accidents and injuries. The key outcomes considered are increases and decreases in intentional and unintentional injuries with fatal and nonfatal results. The key determinants in this category include items such as the presence of law enforcement, traffic patterns, alcohol involvement, distance to emergency services, and the presence of prevention programs.
Exposure to Potentially Hazardous Materials	This category pertains to health outcomes and determinants that may arise from exposure to hazardous materials. The key health outcomes considered are increases and decreases in documented illnesses or exacerbation of illnesses commonly associated with pollutants of potential concern. These may be mediated through inhalation, ingestion, or physical contact.
Food, Nutrition, and Subsistence Activity	This category pertains to health outcomes and determinants related to food security, dietary choices, and the consumption of subsistence foods. The key health outcomes considered are nutrient levels, malnutrition or improvements in nutrient intake, and the subsequent increases or decreases in related diseases. The key determinants include diet composition, food security, and the consumption of subsistence foods.
Infectious Diseases and Toxins from Microorganisms	This category pertains to health outcomes and determinants that result from infectious diseases. The key health outcomes include rates of increase or decrease for a range of infectious diseases, such as sexually transmitted infections (STI), respiratory illnesses, or skin infections. Important health determinants may include immunization rates and the presence of infectious disease prevention efforts.
Water and Sanitation	This category pertains to changes to access, quantity, and quality of water supplies.

ED_016126_00000549-00011

Table 1. Health Effect Categories

Health Effect Category	Pathway Description
	Key determinants reviewed may include distance to clean water, water fluoridation, indoor plumbing, water treatment facilities, adequate volume of water resources, and the existence of community facilities, such as a washeteria and/or community.
Non-communicable and Chronic Diseases	This category pertains to health outcomes and determinants related to chronic disease. Important outcomes include increases or decreases in mortality and morbidity rates of cancer, cardiovascular and cerebrovascular diseases, diabetes, respiratory diseases, and mental health disorders. Key determinants for chronic diseases may include smoking rates, rates of alcohol and drug abuse, physical activity levels, presence of recreation centers, as well as cancer screening rates.
Health Services Infrastructure and Capacity	This category pertains to health outcomes and determinants related to health care access and health care infrastructure. Important outcomes include the increase or decrease in the number of medical evacuations (medevac), clinics or hospital visit trends, health expenditures, and medication usage. Health determinants may include distance to health facilities, medevac facilities/aircraft, the presence of community health aides, and the frequency of visits to the area by health care providers.

ED_016126_00000549-00012

2.0 OBSERVED AND PREDICTED CLIMATE CHANGE

2.1 Climate Change Defined

What is climate?

Climate is the long-term average variation in weather measured over an extended period (i.e., several decades; NWS, 2009).

What is weather?

Weather is the state of the atmosphere in terms of wind, temperature, cloudiness, humidity, etc. at a given time. Climate refers to the average weather conditions over a longer period of time (NWS, 2009).

What is climate change?

According to the U.S. Environmental Protection Agency (EPA), "climate change refers to any substantial change in measures of climate (such as temperature or precipitation) lasting for an extended period (decades or longer)" (EPA Climate Change Indicators, 2016). It is important to note that climate change is *not* synonymous with global warming. Global warming refers to the average increase in temperature of the atmosphere, which is just one potential indicator of climate change.

General Theory of Climate Change

Climate change is influenced by human activities and natural processes (IPCC, 2014; USGCRP, 2017). Normally, when solar radiation reaches the Earth, some is reflected by the atmosphere, but most is absorbed and warms the Earth's surface. Some of the absorbed solar radiation is re-emitted as infrared radiation and absorbed by greenhouse gas molecules in the atmosphere (e.g., water vapor, CO_2, methane, nitrous oxide, and chlorofluorocarbons [NASA, 2017]), which re-emits the radiation back towards the Earth, warming the Earth's surface. As the Earth's atmosphere changes and greenhouse gas emissions increase, less solar radiation can escape, which leads to further warming. This extra heat then impacts various components of climate (e.g., air and ocean temperatures, weather patterns; NCA, 2014).

2.2 Climate Change Indicators

This HIA defines seven key indicators most relevant to climate change in Alaska. These indicators are tied to the potential effects of climate change and facilitate tracking these effects to obtain a better picture of the various components of climate change in Alaska. This climate change HIA is focused on the following indicators:

- Temperature
- Precipitation
- Weather patterns
- Sea ice
- Glaciers
- Permafrost
- Sea levels

A detailed discussion of these indicators and how they are measured can be found in Appendix 1.

ED_016126_00000549-00013

2.3 Evidence of Climate Change in Alaska

Globally, temperature trends show evidence of a warming planet. The annual average global surface temperature has risen at an average rate of 0.15°F per decade since 1901 (EPA Climate Change Indicators, 2016). Ocean temperatures, precipitation, and sea levels have also increased globally. A more detailed discussion of the changes among the indicators on a global and national scale can be found in Appendix 2.

Trends in the Arctic related to climate change are typically more pronounced than in other parts of the world. Arctic regions are predicted to see rapid and substantial climate changes (ACIA, 2005). Over the past several decades in Alaska, the only Arctic region in the United States, temperatures have risen, precipitation has increased, sea ice has declined, and permafrost has thawed at an increasing rate (EPA Climate Impacts, 2016; Stewart et al., 2013; Richter-Menge et al., 2017).

2.3.1 Temperature

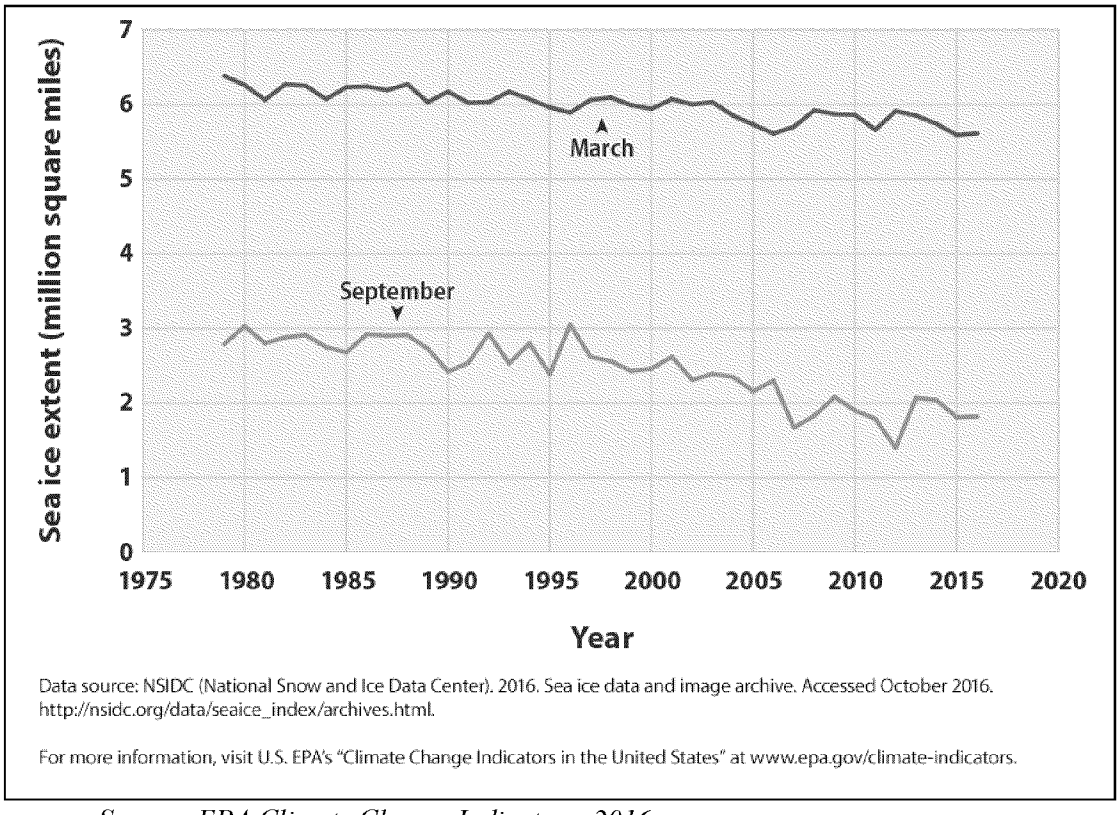
Alaska warmed twice as fast as the rest of the United States from 1949–2011 (EPA Climate Impacts, 2016; Chapin et al., 2014). While there is substantial variation in year-to-year temperatures, clear trends exist (Stewart et al., 2013). Overall, Alaska now experiences more extremely hot days (warmest 1% of daily high temperatures since 1950) and fewer extremely cold days (coldest 1% of daily low temperatures since 1950; NCA, 2014; Stewart et al., 2013; Blunden & Arndt, 2017). Statewide, the average annual air temperature has increased by 3°F and the average winter temperature has increased by 6°F since the 1950s (Chapin et al., 2014). Much of the warming has occurred in the winter and spring (Stewart et al., 2013). Alaska had record-setting warmth during the cold season of 2015–2016 (from October through April). Average temperatures during the 2015–2016 cold season exceeded the period-of-record (1925–2016) mean by more than 8.4°F; the Interior region experienced the greatest increase in temperatures (Stewart et al., 2013; Walsh et al., 2017).

2.3.2 Precipitation

Long-term trends show average precipitation from 1945–1965, followed by approximately 15 years of below average precipitation totals. Subsequently, the average annual precipitation has increased statewide by approximately 10% in recent decades (Stewart et al., 2013).

Extreme precipitation events, defined as the heaviest 1% of 3-day precipitation totals for each calendar year, have increased in the spring in the southeast and west-central portions of the state. The northern region has experienced a decrease in extreme precipitation events in all seasons except fall. All regions in Alaska, except the Arctic, have seen an increase in extreme precipitation events during the summer months (Stewart et al., 2013).

2.3.3 Weather Patterns



An analysis of Alaska storm information from the National Centers for Environmental Predictions storm track database during 1953–2010 showed no significant change in the overall frequency of strong storm events. Along the northern and northwestern coasts, however, strong storm events have increased in the summer and fall months when there is no protective sea ice cover (Stewart et al., 2013).

ED_016126_00000549-00014

2.3.4 Sea Ice

Sea ice extent has declined substantially in the Arctic and some of the fastest loss has been along the Alaskan coast (USGCRP, 2017). Based on satellite-based sea ice records, which began in 1979, end of summer sea ice from 2007–2012 was lower than any prior time (Stewart et al., 2013). The average annual Arctic sea ice extent has decreased 3.5–4.1% per decade since 1979 (USGCRP, 2017). In 2012, the September sea ice coverage was roughly 50% less than in the 1980s (Figure 1. ; EPA Climate Change Indicators, 2016). The March 2017 sea ice extent was approximately 8% less than the 1981–2010 average for that month (Richter-Menge et al., 2017). The September 2017 sea ice extent was approximately 25% less than the 1981–2010 average for that month. The sea ice is also younger and thinner (factors that make sea ice more vulnerable to summer melt) than any time on record (Chapin et al., 2014; Stewart et al., 2013). The greatest reduction in sea ice has been in the Pacific side of the Arctic. Researchers believe that increased heat inflow through the Bering Strait from the North Pacific is a key contributing factor to the retreat of sea ice since the 1980s (Stewart et al., 2013).

Figure 1. March and September Monthly Average Sea Ice Extent, 1979-2016

Source: EPA Climate Change Indicators, 2016

2.3.5 Glaciers

Alaska is experiencing the fastest loss of glacier ice on Earth (NCA, 2014). According to the National Climate Assessment, "from 2005 to 2010, Alaskan glacier losses made up one-third of the world's ice sheet losses, even though Alaska has 20 times fewer ice-covered areas than Greenland" (NCA, 2014). Additionally, Alaska's glaciers lose approximately 75 gigatons of water each year, which contributes 0.008 inches to the global annual sea level rise as well as a relative sea level fall in some parts of Alaska, such as in the southeast, as the land in these glacial regions rebounds (Meier et al., 2007; Vaughan et al., 2013).

ED_016126_00000549-00015

2.3.6 Permafrost

Permafrost is ground that remains frozen for a period of at least 2 consecutive years. It has an active layer, which thaws downward from the surface during warm seasons, and refreezes during the fall. Underneath the active layer is a stable layer that remains frozen; the depth of this layer depends on average annual temperatures, snow depth, soil properties, and ground slope (Stewart et al., 2013). Additionally, large quantities of organic carbon are stored in permafrost. As permafrost thaws, it can release greenhouse gases such as carbon dioxide (CO_2) and methane (Schuur et al., 2015).

Permafrost is critical for the basic existence of many communities and ecosystems in Alaska. Eighty percent of Alaska is underlain by permafrost, and seventy percent of this land is vulnerable to subsidence (caving in or sinking) if the permafrost becomes unstable (Chapin et al., 2014; Jafarov et al., 2012). As temperatures have increased, permafrost has begun to thaw. Since the 1970s, permafrost near the Arctic coast has warmed 4–5°F at the 65-foot depth (Chapin et al., 2014). In 2016, record high temperatures were observed at the 20 meter depth at all permafrost observatories on Alaska's North Slope, with the exception of Deadhorse (Blunden & Arndt, 2017; Ritcher-Menge et al., 2017).

2.3.7 Sea Levels

While sea levels have risen in much of the world, levels in parts of Alaska have fallen. Scientists believe the decrease in sea level is due to changing vertical tectonic motion. Large earthquakes in Alaska's recent history have also impacted sea level calculations (separate sea level trends are calculated using data from before and after the earthquakes in 1957, 1964 and 1988). There is considerable regional variability in current sea level trends in Alaska. For example, Yakutat, Skagway, and Juneau have recorded the largest decreases in sea level (-15 to -18 millimeters/year from 1975–2014). Sand Point, Prudhoe Bay, and Prince Rupert have experienced small increases in sea level (+0 to 3 millimeters/year from 1975–2014; NOAA Tides and Currents). There are limited tidal gages in Alaska (e.g., there are no tidal gages from Bristol Bay to Norton Sound) and thus there is considerable uncertainty in determining the relative changes in sea level statewide (USGCRP, 2017).

ED_016126_00000549-00016

2.4 Climate Change Predictions for Alaska

This HIA is based on assumptions and projections provided in the third National Climate Assessment (NCA, 2014) and supporting documents including Volume I of the fourth NCA (Volume II was not yet available at the time of publication of this HIA; USGCRP, 2017). The NCA frequently refers to Scenario A2, which was released by the Intergovernmental Panel on Climate Change (IPCC, 2000); this scenario assumes increasing concentrations of greenhouse gases (e.g., water vapor, CO_2, methane, nitrous oxide, and chlorofluorocarbons [NASA, 2017]) in the Earth's atmosphere and has been considered as a plausible climate scenario in multiple climate assessments. This HIA presents a general picture of what climate conditions might look like in Alaska, based on Scenario A2, as well as additional simulations presented by other agencies. It is important to underscore the inherent difficulty in making climate change predictions due to a wide range of variables, including changes in emissions, population, economics, technology, etc. However, the use of such a scenario, where the potential changes of various indicators are predicted from the same set of climate model simulations, provides a consistent climate picture to forecast potential health impacts to a population (Stewart et al, 2013). A summary of the projections for Alaska, focusing on seven measurable climate indicators, is provided below (Table 2; refer to Section 2.6 for additional region-specific information). This document does not present a new model for climate change or contain any new data or analyses; rather, it is a review of existing literature.

Table 2. Summary of Climate Change Predictions for Alaska

Climate Change Indicator	Region*			
	Alaska (Statewide)±	Coastal#	Interior†	Northern‡
Temperature	• Increase of 2–4°F by 2050[2] • Increase of 8.6°F by 2085[1]	• Increase of 6–8°F by the end of the century[2] (least amount of warming in southeast AK)	• Increase of 8–10°F by the end of the century[2]	• Increase of approximately 10–12°F by the end of the century[2]
Precipitation	• Increase of 0–15% by 2035[1] • Increase of 10–35% by 2085[1] • Increased heavy precipitation events, amount indeterminate • Wetter winters and drier summers[4]	• Increase of 5–15% by 2035[1] • Increase of 15–35% by 2085[1] • Largest increases in northwestern coastal region, smallest increases in southeast AK[1,2]	• Increase of 0–5% by 2035[1] • Increase of 20–30% by 2085[1]	• Increase of 0–15% by 2035[1] • Increase of 25–35% by 2085[1]
Weather	• Increased storm intensity, amount indeterminate[3] • Change to winter storms is uncertain[2] • Increased length of summer[1] • Decreased length	• Increased storm intensity, amount indeterminate[3] • Change to winter storms is uncertain[2] • Fall freeze-up delayed by 40–60 days[1]	• Increased storm intensity, amount indeterminate[3] • Change to winter storms is uncertain[2] • Spring thaw date advanced by 2–3 weeks[1]	• Increased storm intensity, amount indeterminate[3] • Change to winter storms is uncertain[2] • Fall freeze-up delayed by one month[1]

ED_016126_00000549-00017

Climate Change Indicator	Region*			
	Alaska (Statewide)±	Coastal#	Interior†	Northern‡
	of winter[1]		• Fall freeze-up delayed by 2 weeks[1]	
Sea Ice	• Virtually ice-free northern waters in late summer by 2040s[2, 5]	• Decrease of winter sea ice in the Bering Sea of more than 50% by the end of the century[1]	• N/A	• No summer ice in the Chukchi Sea by 2030–2050[1] • Decrease of winter sea ice in the Chukchi Sea of more than 50% by the end of the century[1]
Glaciers	• Continued glacier retreat, amount indeterminate[2]	• Continued glacier retreat, amount indeterminate[2]	• Continued glacier retreat, amount indeterminate[2]	• Continued glacier retreat, amount indeterminate[2]
Permafrost	• Near-surface permafrost will be lost entirely from large parts of the state by the end of the century[2] • Permafrost boundary will shift hundreds of miles northward by the end of the century[4]	• Permafrost-free by the end of the century[2]	• Significant permafrost degradation[1,2]	• Degradation of permafrost by the end of the century, but the smallest decreases in the state[2]
Sea Levels	• Increasing sea levels, amount indeterminate[3]	• Increasing sea levels, amount indeterminate[3]	• N/A	• Increasing sea levels, amount indeterminate[3]

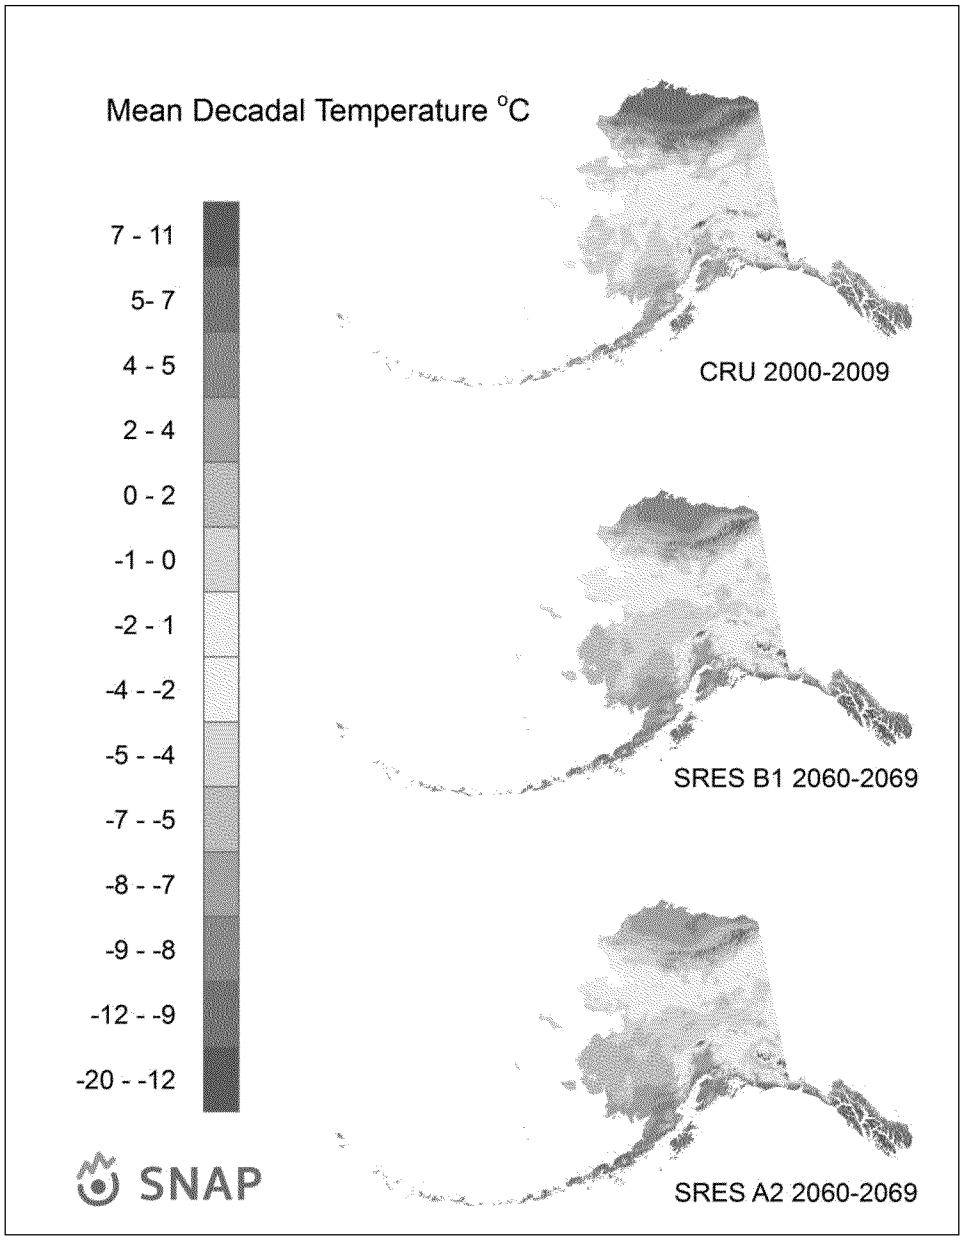
[1]Stewart et al., 2013; [2]NCA, 2014; [3]UAF Sea Grant, 2014; [4]EPA Climate Impacts, 2016; [5]USGCRP, 2017

[*]The regions presented here were selected to remain consistent with the National Climate Assessment Reports and other supporting documents (e.g., Stewart et al., 2013). Change in indicator represents a change from baseline levels. Baseline data are presented in subsequent sections.

[±]Predictions for Alaska overall; data presented often represent average predicted change for Alaska.

[#]The coastal region represents communities south of the Brooks Range and in proximity to the coast. In this document, the coastal region includes southeast (e.g., Juneau, Ketchikan, Sitka), south coast (e.g., Anchorage, Kodiak, Cordova), southwest (e.g., Bethel, Dillingham), and west-central (e.g., Nome, Kivalina, Kotzebue) portions of the state.

[†]The interior region is bounded by the Brooks Range and the Alaska Range; communities in this region include (among others) Fairbanks, Tanana, and Galena.



[‡]The northern region is bounded by the Brooks Range and the Arctic Ocean. Communities in this region include (among others) Utqiaġvik (formerly known as Barrow), Prudhoe Bay, and Anaktuvuk Pass.

ED_016126_00000549-00018

2.4.1 Temperature

Recent models predict that compared to 1971–1999, Alaska's average annual temperatures will be 2°–4°F higher in 2050 and 8°–9°F higher in 2100 (Stewart et al., 2013). Compared to 2000–2009, from 2060–2069, northern and interior Alaska are expected to experience greater increases in mean decadal temperature than other regions in the state (Figure 2). These regions are predicted to increase by approximately 10°F. Statewide, mean winter temperatures are predicted to increase by approximately 4°F by 2035, 8°F by 2050, and more than 12°F by 2085 (Stewart et al., 2013; Walsh et al., 2017).

Figure 2. Mean Decadal Annual Temperature for Alaska, by Region

CRU: past data collected by the Climatic Research Unit; SRES B1: lower emissions scenario; SRES A2: higher emissions scenario. Source: NCA, 2014; Stewart et al., 2013

ED_016126_00000549-00019

2.4.2 Precipitation

Annual precipitation is predicted to continue to increase in Alaska, particularly in northwestern Alaska. Models also predict that, compared to 1971–1999, precipitation statewide will increase 0%–15% by 2035 and 10%–35% by 2085 (Stewart et al., 2013). Precipitation in northwestern Alaska is predicted to increase 15%–30% by 2100, based on the A2 scenario (Stewart et al., 2013). While precipitation is expected to increase, fresh water availability is expected to decrease in Alaska due to increased water evaporation from higher temperatures and longer growing seasons (Chapin et al., 2014). For example, annual available water declined 55% over the past 50 years on the western Kenai Peninsula (USFWS, 2017).

While models do not predict a decrease in winter precipitation, there is considerable uncertainty regarding seasonal variability in precipitation predictions. Some studies predict changes to snowfall patterns, including later dates of first snows, earlier snowmelt, and a decline in high snowfall days. Models show that extreme precipitation events may also increase, particularly in the coastal regions (Walsh et al., 2014a).

2.4.3 Weather Patterns

Models show that extreme storm events may increase. Storm surges of 10 feet or more are predicted for many coastal communities in western Alaska during the next 50 years; some locations may see storm surges as high as 13 feet (UAF Sea Grant, 2014).

2.4.4 Sea Ice

The decline of sea ice is predicted to continue with increasing air and ocean temperatures, in addition to changes in atmospheric and ocean circulation (Stewart et al., 2013). If current trends continue, climate models predict significant declines in the extent of sea ice in Alaska. Models show that summer sea ice could disappear in the Chukchi Sea at some point during 2030–2050, and winter sea ice could decrease by 50% in the Bering and Chukchi Seas by the end of the century. Virtually ice-free northern waters in late summer are predicted by the 2040s (USGCRP, 2017; Chapin et al., 2014; Stewart et al., 2013). The predicted loss of sea ice and increased extreme storm events will likely increase coastal erosion, as sea ice typically protects the shoreline (EPA Climate Impacts, 2016).

2.4.5 Glaciers

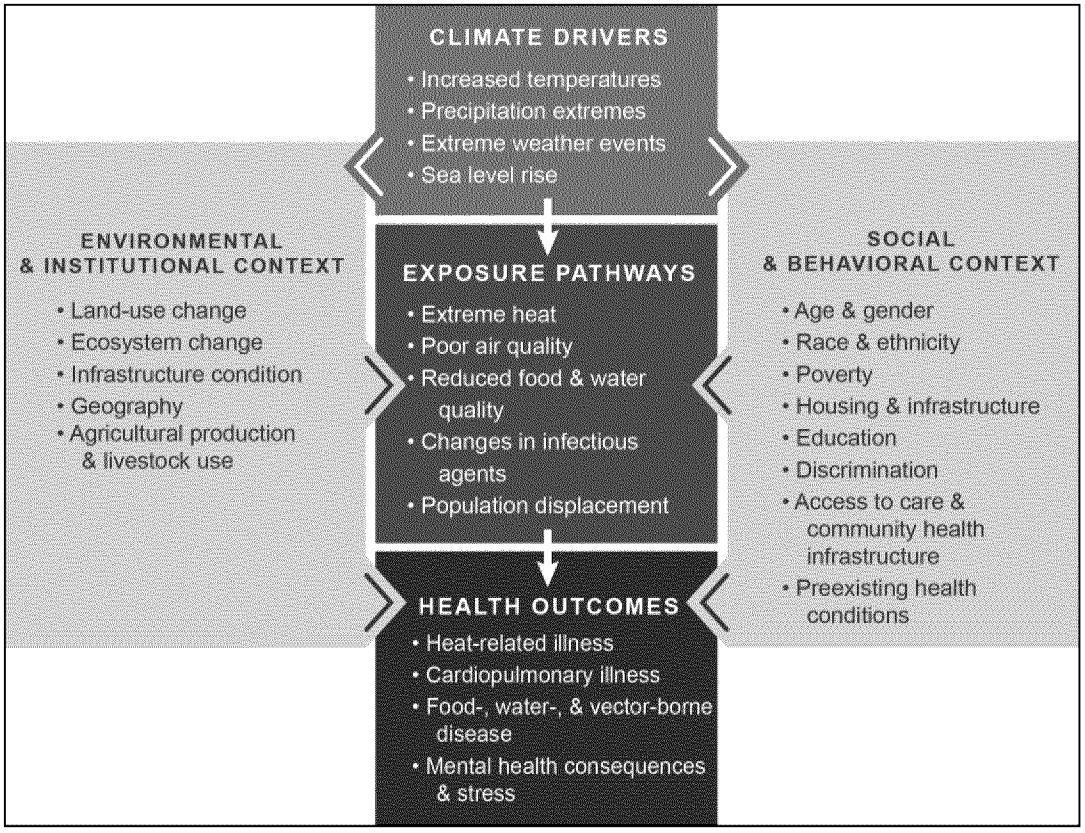
Scientists expect continued glacial retreat in Alaska, though the scale of retreat is uncertain. Even if air temperatures stopped increasing in Alaska, glaciers could continue to respond to past warming trends for decades (NCA, 2014).

2.4.6 Permafrost

Projections show that permafrost will continue to thaw due to increased soil temperatures and that near-surface permafrost will disappear from much of Alaska by 2100 (Chapin et al., 2014; Jafarov et al., 2012; Stewart et al., 2013). As a result, the permafrost boundary is likely to move hundreds of miles northward by the end of the century (EPA Climate Impacts, 2016; Stewart et al., 2013). A loss of permafrost could also lead to the loss of surface water, which can lower the water table and decrease the depth of ponds and lakes (EPA Climate Impacts, 2016). Data also indicate that thawing permafrost releases carbon dioxide and methane and contributes to an increase in greenhouse gas emissions in Alaska (Commane et al., 2017). Scientists estimate that thawing permafrost worldwide could contribute to an increase of 0.13–1.69°F in global temperatures by 2300 (MacDougall et al., 2012).

ED_016126_00000549-00020

2.4.7 Sea Levels



Currently, the land surface in southern Alaska is rising faster than the global rise in sea level, leading to a continued decrease in sea level (O'Harra, 2010). Scientists anticipate that global sea rise will eventually exceed the rate of rising land surface in Alaska and that the State's entire coastline will eventually be affected by sea level rise, though the sea level rise is projected to be less than the global average (O'Harra, 2010; UAF Sea Grant, 2014; USGCRP, 2017). Much of Alaska's coastal land surface is predicted to rise 0.1–1.0 meter by 2100, whereas the projected global mean sea level (GMSL) rise is 0.3–2.5 meters (Sweet et al., 2017).

ED_016126_00000549-00021

2.5 Climate Change and Health

Climate change can affect human health (Patz et al., 2014; USGCRP, 2016). Many international agencies (e.g., WHO, World Bank) and national groups (e.g., CDC, NOAA, and NASA) have discussed the current implications of climate change on human health and the potential for future health impacts. Although there are exceptions, climate change generally appears to exacerbate existing health challenges at both the community and individual levels (Smith et al., 2014). There are several different pathways by which climate change can affect health, including direct impacts such as injuries caused by fires or storm surges, and indirect impacts such as changes in quantity and quality of subsistence foods (Figure 3). Moreover, it is important to note that climate-associated health impacts on communities are magnified by additional social and economic stresses.

Figure 3. Climate Change and Human Health

Source: USGCRP, 2016; modified from U.S. Environmental Protection Agency

The potential human health impacts related to the climate change predictions for Alaska are discussed in this section. A health impact is a positive or negative change in a specific health outcome or health determinant that is characterized by *specific* health outcomes or determinants (not general statements about health status) and quantifiable data, whenever possible.

Each HEC contains health impacts that fit the criteria above. The following sections describe the interaction between the potential factors of climate change and human health. It is important to note that health outcomes and indicators in Alaska will change over time, regardless of climate change; this HIA focuses only on the potential health impacts from climate change. Future health impacts could be more or less substantial than what is discussed in this HIA, depending on changes in Alaska not directly tied to climate (e.g., economic changes).

ED_016126_00000549-00022

2.6 Potentially Affected Communities

The Alaska HIA Toolkit defines a potentially affected community (PAC) as an area, community, or village where health impacts may occur. This HIA commonly refers to four regions of PACs where impacts due to climate change are predicted.

Climate change regions

Alaska: General predictions are available for Alaska (statewide) for most of the climate change indicators. Not all data are available at the regional level. This is noted where applicable.

Coastal: This region consists of communities where maritime strongly influences climate. In this HIA, the coastal region includes the Southeast (e.g., Juneau, Ketchikan, Sitka), South coast (e.g., Anchorage, Kodiak, Cordova), Southwest (e.g., Bethel, Dillingham, communities in the Aleutian Islands), and west-central (e.g., Nome, Kivalina, Kotzebue) portions of the state.

Interior: Interior Alaska is bounded by the Brooks and Alaska mountain ranges. This region experiences a continental climate with large temperature variability, low humidity, and relatively light precipitation (Stewart et al., 2013). Communities in this region include (among others) Fairbanks, Tanana, and Galena.

Northern: This region is north of the Brooks Range and is bordered on the north by the Arctic Ocean. This region is considered Alaska's Arctic and has the lowest average annual temperatures in the state. Communities in this region include (among others) Utqiaġvik (formerly Barrow), Prudhoe Bay, and Anaktuvuk Pass.

ED_016126_00000549-00023

3.0 PRIORITIZING HEALTH IMPACTS

The following sub-sections describe the interaction between the potential factors of climate change (based on the climate change predictions from Section 2.4) and provide examples of potential adverse health outcomes. Appendix 3 presents a comprehensive summary table of the potential interactions between climate change and health in Alaska.

The potential impacts identified in this section are reviewed according to climate change-specific health impact dimension criteria and are presented in a color-coded table in Section 3.2. Communities can identify and evaluate potential health impacts from climate change using a similar framework.

Populations of Concern

Climate change has impacts across various population groups in the United States and some populations may be particularly vulnerable to specific impacts. According to the World Health Organization, "vulnerability is the degree to which a population, individual or organization is unable to anticipate, cope with, resist and recover from the impacts of disasters" (Wisner and Adams, 2002). In terms of climate change, "vulnerability is the tendency or predisposition to be adversely affected by climate-related health effects, and encompasses three elements: exposure, sensitivity or susceptibility, and the capacity to adapt to or to cope with change" (USCGRP, 2016). Population groups that are particularly vulnerable to the impacts of climate change include people with low incomes, those with less literacy proficiency, indigenous groups, immigrant groups, children and pregnant women, the elderly, and persons with pre-existing or chronic medical conditions (Patz et al., 2014; USGCRP, 2016).

Rural Alaska has some of the highest rates of poverty in the United States as well as some of the highest costs for food and fuel. In 2014, the percent of residents living below the federal poverty level in the state was 10.2%, while the percent of people living below the federal poverty level in rural Alaska was over 60% (ACS Study, 2015). People who live in poverty may be particularly vulnerable to climate change because they have fewer resources to cope with adversity, relocate, evacuate, or respond in other ways (e.g., to increases in the cost of food and other resources; EPA Climate Impacts, 2016; NCA, 2014).

Alaska Native people living in rural areas may also be at increased risk for adverse health impacts from climate change, in part due to their close cultural ties to the land and subsistence food resources, such as salmon, caribou and whale (EPA Climate Impacts, 2016). Stresses to traditional practices, which encompass a way of life, as well as cultural, spiritual, and personal identity, could have significant social impacts in Alaska (ADEC, 2010); some villages report such changes have already begun (Bell et al., 2010; Cochran et al., 2013).

Children and the elderly are also important populations vulnerable to the impacts of climate change (Smith et al., 2014; USGCRP, 2016). Older adults may have added difficulty coping with climate change, due in part to mobility issues in a time of emergency, such as an extreme weather event. Children are also vulnerable due to mobility issues (they are reliant on others to care for them in disaster situations).

ED_016126_00000549-00024

3.1 Potential Impacts by Health Effect Category

3.1.1 Mental Health and Wellbeing

Mental health and stress-related disorders are important health outcomes that are influenced by climate change (Luber et al., 2014; USGCRP, 2016). For example, climate change can affect mental health by causing solastalgia, the distressing sense of loss that people experience as a result of unwanted environmental changes that occur close to one's home (Albrecht et al., 2007), and associated pathologies such as anxiety, depression, and post-traumatic stress disorder that can result from acute events such as fires, floods, and storm surges, as well as more protracted changes such as thawing permafrost and coastal erosion (Patz et al., 2014; Watts et al. 2015; USGCRP, 2016). These effects disproportionately impact those living in low-resource settings, including indigenous groups (Berry et al., 2010). Climate change can also influence interpersonal violence, community conflict, and can impact mental health and wellbeing through changes in factors such as family structure, economic status, and cultural continuity (Cochran et al., 2013; USGCRP, 2016).

Psychosocial distress and associated health outcomes may also increase among emergency workers and first responders, due to the nature of their jobs. These workers respond to disasters involving death and injury and work in stressful environments, which put them at risk for post-traumatic stress disorder, depression, and panic disorder (USGCRP, 2016).

In Alaska, many residents have expressed concern and a feeling of depression related to the uncertainty of the scope and magnitude of potential climate change (ADEC, 2010). Residents have expressed anxiety about the potential impact of climate change on culture, subsistence resources, traditional knowledge and ways of knowing, infrastructure damage, the economy, community relocation, cultural and burial sites, recreational activities, future generations, and the 'Alaskan way of life' (ADEC, 2010). Based on the climate change predictions for Alaska, there may be continued impacts on mental health, community wellness, family structure, and "maladaptive" coping behaviors, such as alcohol use, substance abuse, and suicidality. Psychosocial distress, the stress and anxiety that arise over factors such as economic issues, relocation, and uncertainty over infrastructure stability, has already increased among some residents (Cochran et al., 2013). Psychosocial distress and its associated comorbidities is predicted to continue to increase as community relocation becomes more imminent, mental illness could be exacerbated because of factors such as decreased food security, damaged infrastructure and associated economic costs, water quality concerns, and extreme storm events (NCA, 2014; USGCRP, 2016).

Effects of Thawing Permafrost

Permafrost is found in over 80% of Alaska (Chapin et al., 2014; GAO, 2009). An estimated 100,000 Alaskans (roughly 14% of the Alaska population) live in areas sensitive to permafrost degradation (EPA Climate Impacts, 2016; USARC, 2013). As permafrost disappears and the landscape changes, roads may become damaged, subsistence resources may become more scarce and more difficult to access, and communities may need to relocate (Chapin et al., 2014; Cochran et al., 2013). Additional discussion on community relocation can be found in Sea Level Changes, below.

Thawing permafrost also increases the susceptibility of soil to erosion, which is a concern during intense storms along the coast, as well as in communities located along riverbanks. As the melted water in the soil drains away, the remaining soil becomes soft and porous, resulting in loss of

ED_016126_00000549-00025

surface water (including estuaries, ponds, lakes, streams, and rivers). When this soil comes into contact with waves or river currents, it easily erodes, sometimes in large quantities. Eroded coastline can lead to damaged infrastructure, including the potential loss of housing, medical clinics, water sanitation systems, roads, cultural and burial sites, and entire communities.

Damaged infrastructure, and uncertainty regarding the scope of thawing permafrost, could lead to psychosocial distress (e.g., anxiety or depression).

Effects of Sea Level Changes

Nearly 90% of Alaska Native communities are located on the coast (NPR, 2013). As sea levels continue to rise, several coastal Alaska villages have become inundated with tidal waters and have suffered extensive erosion and damaged infrastructure. Thawing permafrost has also led to coastal and riverbank erosion and infrastructure damage. In Shishmaref, for example, entire houses have been destroyed due to erosion. The United States Army Corps of Engineers (USACE) determined that Shishmaref and 183 of 213 (86%) other Alaska Native communities are at risk of flooding and erosion. According to the United States Government Accountability Office (GAO), 31 Alaska Native villages face imminent threats from flooding and erosion, both of which may worsen due to climate change (Bronen, 2011; GAO, 2009). Of these communities, at least 12 have decided to relocate (either partially or entirely), or at least consider the relocation process; several communities, such as Newtok, have already begun the relocation process (GAO, 2009). The threat and process of community relocation is stressful for residents and could result in a variety of adverse health outcomes related to psychosocial distress (Bronen, 2011).

Effects of Gradual Temperature Changes and Ecosystem Properties

In addition to extreme weather events causing psychosocial impacts, gradual climate change could also impact mental health. The gradual impacts of climate change may exacerbate existing mental health conditions or cause new ones (USGCRP, 2016). For example, climate change could lead to a distressing sense of loss—called solastalgia—as a person's land and way of life (culture) is changed (Smith et al., 2014). Studies on the mental health impacts from gradual and cumulative climate change are still limited and are less robust than the research on short-term extreme weather events, but there is some indication that long-term climate change could produce mental health impacts. The literature has focused on the effects of long-term temperature change, but some emerging studies show that changes to air quality, water quality, changing disease vectors, and food sources may also lead to adverse mental health outcomes (USGCRP, 2016).

Effects of Extreme Weather Events

Alaska is predicted to continue to experience more frequent and intense storms. Precipitation is expected to continue to increase, as shown by the climate change predictions for Alaska. Many people who have been affected by extreme weather events, such as floods, hurricanes, and wildfires, have experienced stress reactions and mental health consequences, such as post-traumatic stress and depression (EPA Health Impacts). Additional mental health effects include grief, increased substance abuse, and suicidal ideation (USGCRP, 2016). Highly destructive hurricanes have been associated with an increase in acute stress, post-traumatic stress, domestic violence, depression, and suicide in affected communities (USGCRP, 2016). These adverse mental health outcomes are particularly concerning for those who have experienced multiple disasters. For example, following Hurricane Katrina in 2005, veterans with pre-existing mental illness were 6.8 times more likely to develop additional mental illness compared to veterans without a pre-existing mental illness (Sullivan et al., 2013; USGCRP, 2016).

ED_016126_00000549-00026

Anxiety and depression are also commonly reported outcomes of climate-related disaster events that involve significant life disruptions, including the loss of life, resources, and social support networks (USGCRP, 2016; Luber et al., 2014). Long-term depression and anxiety has been associated with flood events, as well as increased aggression in children (USGCRP, 2016; Ahern et al., 2005). Interpersonal violence often increases after extreme weather events, as well as suicidal behavior and substance abuse (Smith et al., 2014; USGCRP, 2016).

Effects of Weather Pattern Changes

With increased air temperatures, tourism, recreational, and subsistence activities may be impacted. Warmer temperatures can decrease the number of days when recreational snow activities such as skiing and snow machining can occur. Increased wildfires could impact hiking and other recreational activities in summer months. As tourism patterns change, communities that support themselves through these recreational activities may experience economic impacts. Alaskans who rely on these recreational activities for exercise and mental health may incur adverse health consequences if their recreational opportunities become more limited.

3.1.2 Accidents and Injuries

Climate change can cause direct and indirect impacts to the health outcomes and determinants related to accidents and injuries. Relevant health outcomes include unintentional fatal and non-fatal injuries, such as motor vehicle crashes and falls.

Effects of Temperature Changes

Climate change is projected to increase the frequency and duration of heat waves and the number of high-temperature days in Alaska (Stewart et al., 2013). In the past 60 years, average annual temperatures in Alaska have increased by 3°F and average winter temperatures have increased by 6°F (Chapin et al., 2014). On average, summers in Alaska have increased by more than 2.3°F over the past 50 years (Stewart et al. 2013), and the average annual temperatures in Alaska could be 2°–4°F higher by 2050 (Chapin et al., 2014). Alaska now experiences more extremely hot days and fewer extremely cold days than in previous decades (Chapin et al., 2014; Stewart et al., 2013).

Heat stress is the most direct health effect of a warming planet due to climate change (Patz et al., 2014). Prolonged exposure to heat can cause heat exhaustion, heat cramps, and heat stroke (Portier et al., 2010). Fatalities from extreme heat result from heat stroke and related conditions. Extreme heat also exacerbates preexisting conditions, such as cardiovascular, cerebrovascular, and respiratory diseases (Luber et al., 2014). Nationwide, heat-related deaths represent more deaths than from all other weather events combined, such as flooding or tornadoes (Luber and McGeehin, 2008; Patz et al., 2014; Portier et al., 2010). Roughly 700 deaths, on average, are attributed to heat-related causes in the United States annually (Portier et al., 2010). An estimated 35,000 excess deaths occurred during the European heat wave in 2003 (Patz et al., 2014).

While the temperatures in Alaska are not predicted to be nearly as high as in many other parts of the country, Alaskans may be more vulnerable to increasing temperatures than those living in other regions of the country due to a general lack of air conditioning or other means of cooling buildings and houses (Berner et al., 2005; Brubaker et al., 2013; Brubaker et al., 2011). One study found that cities with cooler climates tend to experience more heat-related deaths than those with warmer climates because populations in warmer climates can better acclimatize to heat and are more likely to have access to air conditioning (Portier et al., 2010). In the summer of 2013, for

ED_016126_00000549-00027

example, temperatures in Nondalton hovered around 70°–80°F for multiple weeks; there was a shortage of fans in the community, and several cases of heat stress were reportedly seen at the clinic (Brubaker et al., 2013).

Alaskan seniors and those with preexisting illnesses such as heart disease and diabetes may experience a higher burden of morbidity and mortality due to heat stress. Socioeconomic factors have also been found to determine vulnerability—economically disadvantaged and socially isolated people face higher burdens of death from heat (Portier et al., 2010). As such, rural Alaska communities may experience more challenges in adapting to warmer temperatures.

Effects of Extreme Weather Events

Extreme weather events such as droughts, floods and storms are predicted to increase with climate change and some reports suggest that change is already occurring. The frequency and intensity of extreme precipitation events is projected to increase in Alaska (Stewart et al., 2013). Flooding is typically the primary concern of extreme precipitation events and coastal storms, as floods are the second-deadliest of all the weather hazards in the United States (Patz et al., 2014; USGCRP, 2016).

Extreme precipitation events can also lead to fatal- and non-fatal injuries due to rock falls, mudslides, debris flow and avalanches. Extreme weather events, such as intense storms, could lead to increased risk of injury and death by more vessels capsizing from higher seas, more motor vehicle accidents caused by icier roads, etc. Extreme weather events may also cause infrastructure damage (Larsen et al., 2008). For example, buildings can collapse from heavy snow loads and supersaturated ground (IPCC, 2012). Infrastructure damage could lead to an increased risk of injury and death.

Storm surges—extreme high-water events caused by high winds and low atmospheric pressure—and stronger winter storms are predicted to increase in Alaska. Storm surges have already been causing increasing damage, particularly on the Bering Sea coast and in the Arctic (UAF Sea Grant, 2014). Damage includes receding shoreline due to erosion, infrastructure damage, and flooding. These consequences can lead to drowning, as well as fatal and non-fatal injuries (Brubaker et al., 2010; USGCRP, 2016).

In Alaska, a community-based surveillance study found that unintentional injury was significantly more likely to occur during months when participants reported unseasonable environmental conditions (e.g., heavier than average precipitation, increased variability in ice conditions); self-reported unintentional injuries were even more likely if participants had to change their travel plans (e.g., take a different route) in response to the unseasonable conditions (Driscoll et al., 2016)

Effects of Thawing Permafrost

The thawing and freezing cycles of permafrost often cause damage to the transportation infrastructure in Alaska, including roads, railroads, airstrips, and trails (EPA Health Impacts). Many of Alaska's roadways are built on permafrost. Roads and bridges can be damaged due to frost heaves or the subsidence of permafrost; motor vehicle accidents may result as unsuspecting drivers encounter this damage. Damaged roads, in addition to damaged airstrips and railroads, could also impede access to a number of facilities, including health clinics in emergency situations (Brubaker et al., 2012; Schwartz et al., 2014). See Section 3.1.8, Health Services Infrastructure and Capacity, for more information regarding the potential health impacts of damaged health facilities due to thawing permafrost.

ED_016126_00000549-00028

Effects of Wildfires

Wildfires are predicted to continue to increase in size and intensity in Alaska due to increased temperature, as well as changes to precipitation and storm patterns (Brubaker et al., 2014; Chapin et al., 2014). Wildfires can directly cause fatal and non-fatal injuries—residents can be trapped in their homes, firefighters can be overpowered by flames, etc. Wildfire smoke can also impair driving visibility, which increases the risk of motor vehicle deaths and injuries (USGCRP, 2016). See Section 3.1.3 for an expanded discussion of the potential impacts of wildfires in Alaska, including potential air quality concerns.

Effects of Sea Ice Changes

As temperatures increase, sea ice distribution changes and ice thickness declines (Stewart et al., 2013). The reduction of sea and river ice can cause fatal and non-fatal injuries when people travel over thin ice and become stranded or break through the ice. Such accidents have been shown to cause a significant amount of deaths among Inuit populations (Berner et al., 2005). Hunters have reported a decrease in ice extent and thickness during key hunting times (Berner et al., 2005; Brubaker et al., 2012; Brubaker et al., 2010; Fleischer et al., 2013; NCA, 2014).

3.1.3 Exposure to Potentially Hazardous Materials

Climate change could impact air quality and change the way resources are transported in Alaska. This could change the exposure to potentially hazardous materials, such as air pollutants. Changes to the environment, such as thawing permafrost, could also lead to exposure to potentially hazardous materials. For example, thawing permafrost could expose previously buried contaminants. The key health outcomes considered in this HEC are increases and decreases in documented illnesses or exacerbation of illnesses commonly associated with pollutants of potential concern. These exposures may be mediated through inhalation, ingestion, or physical contact.

Effects of Thawing Permafrost

Permafrost contains large quantities of carbon—approximately twice the carbon that is currently in the Earth's atmosphere (NCA, 2014). As permafrost thaws, microbes in the soil become more active and accelerate the breakdown of organic material. Greenhouse gasses such as carbon dioxide and methane are released into the air during this process (NCA, 2014). The release of greenhouse gases adversely impact air quality and further accelerates climate change (Schuur et al., 2015).

Additionally, as permafrost thaws, buried structures and materials can become exposed, leading to infrastructure damage, and the potential for increased exposure to contaminants. For example, thawing permafrost could subside and expose landfills and contaminated sites and increase the exposure to hazardous materials, such as asbestos, lead and other heavy metals, and organic contaminants (AMAP, 2003). Thawing permafrost could also damage existing infrastructure, such as pipelines, which could also lead to exposure to hazardous materials. In 2017, a well failure in Prudhoe Bay, Alaska led to an uncontrolled release of oil and gas into the environment. The event appears to have occurred as a result of a mechanical failure after thawed permafrost caused the ground below the well to sink, which placed extra pressure on the well (ADN, 2017). Though the permafrost thaw is believed to have been caused by hot production fluids in this particular incident, this event highlights the possibility of an increased exposure to hazardous materials due to thawing

ED_016126_00000549-00029

permafrost from a warming climate.

Effects of Global and Local Air Pollution

Climate change could impact air pollutant concentrations in a variety of ways. Climate influences weather components such as temperature, humidity, wind patterns and precipitation; each of these climate factors can influence air quality (NCA, 2014; USGCRP, 2016). Additional climate-driven metrological changes, such as wildfires and wind-blown dust, can also influence air quality. Poor air quality has been linked to adverse cardiovascular and respiratory health, premature death, and an increase in all-cause mortality (Lim et al., 2012; UNEP, 2011). This section focuses on the role of climate change in air pollution and associated human health outcomes.

Ozone

Ozone occurs naturally in Earth's stratosphere and is also formed by human-made activities. Ozone in the stratosphere is beneficial; it prevents harmful ultraviolet radiation from reaching Earth's surface. Ozone at ground level is a powerful oxidant and a lung irritant (USGCRP, 2016). Ground-level ozone is an air pollutant that is created by chemical reactions between nitrogen oxides (NOx) and volatile organic compounds (VOCs); ozone is a component of smog (EPA Ozone, 2016; Luber et al., 2014). Ground-level ozone is associated with adverse health outcomes, such as decreased lung function, increased premature deaths, and aggravated respiratory conditions (e.g., asthma, chronic bronchitis, and emphysema; EPA Ozone, 2016; Luber et al., 2014).

Ozone formation can increase with higher temperatures and sunlight. Ozone can also be affected by changes in weather patterns and humidity (Portier et al., 2010). Climate change may have already impacted ground-level ozone concentrations in some regions of the United States (Bloomer et al., 2009; Leibensperger et al., 2008; USGCRP, 2016). Worldwide, projections show that increasing temperatures from climate change could increase the number of days with unhealthy levels of ozone (EPA Climate Impacts, 2016).

However, ozone's warming effect on the Arctic, including Alaska, appears to be less significant than in other regions of the world. Modeling ozone changes in the Arctic has a lot of uncertainty when drawing conclusions about ozone levels and their effect on the Arctic (AMAP, 2015).

Particulate Matter (PM)

Particulate matter is a complex mix of solid particles and liquid droplets found in the air. PM can include, among other components, organic chemicals, metals, dust particles, and acids (i.e., nitrates and sulfate). Particulate matter is categorized by the size of particles. Particulate matter that is 10 micrometers (μm, PM_{10}) or smaller in aerodynamic diameter can be inhaled and enter a person's lungs. Fine PM ($PM_{2.5}$) is a subset of PM_{10} and refers to particles that are 2.5 μm or smaller in aerodynamic diameter, which are small enough to be inhaled deep into the alveoli in the lungs.

PM is known to cause adverse health effects. Recent literature shows that exposure to $PM_{2.5}$ has stronger associations to adverse health effects than PM of a larger size. Smaller particles can be inhaled more deeply into the lungs and are more likely to deposit in the lungs because they are not as readily expelled through sneezing or coughing.

Due to the complexity of particulate matter, researchers have not been able to predict whether

ED_016126_00000549-00030

climate change will increase or decrease fine particulate matter concentrations in the United States (EPA Climate Impacts, 2016). Humidity and temperature are known to play a role in the formation of $PM_{2.5}$ (Portier et al., 2010). Increased rainfall could decrease particulate matter suspended in the air (less dust), but other climate change factors could lead to an increase in PM, such as wildfires, melting glaciers (increased glacial dust), and wind patterns (EPA Climate Impacts, 2016).

In Alaska, there are several features of climate change that could lead to an increase in PM concentrations. Receding glaciers, for example, can lead to increased glacial dust. Strong winds, which may increase with climate change, can suspend glacial dust and lead to elevated ambient PM levels (primarily PM_{10}). This is already an issue in parts of Alaska; for example, PM_{10} in the Matanuska-Susitna Valley is primarily wind-blown silt from river basins. This phenomenon may worsen as glaciers continue to retreat. $PM_{2.5}$ could also increase in Alaska due to larger and more frequent wildfires (discussed in greater detail below).

Wildfires

Primarily due to increasing temperatures and changing precipitation and weather, Alaska's wildfire season is getting longer and fires are occurring more frequently and growing larger (UAF, 2013; USGCRP, 2017). Studies show that warmer temperatures could cause droughts, and therefore cause an increased risk of wildfires in various regions of the United States (Patz et al., 2014). Western states, including Alaska, are predicted to be particularly affected by more frequent large wildfires (Bennett et al., 2014; USGCRP, 2017). Record-breaking forest fire seasons have been seen in recent years; over 5 million acres burned in Alaska in 2015, one of the worst recorded fire seasons in the state (AICC, 2015). There have also been unusually large tundra fires in recent years. For example, the 2007 Anaktuvuk River fire burned 1,039 acres on the Alaskan tundra and released more carbon than had been absorbed by the entire circumpolar Arctic in the past 25 years (Chapin et al., 2014).

Adverse health outcomes are predicted to increase in association with increased wildfires in many regions of the United States (Luber et al., 2014; USGCRP, 2016). In addition to morbidity and mortality directly from wildfires (see Section 3.1.2: Accidents and Injuries), pollution exposure could also affect the population. Wildfire emissions can significantly exceed national air quality guidelines for several pollutants (such as PM). Wildfire smoke (comprised of particulate matter, nitrogen oxides, carbon monoxide, volatile organic compounds, and heavy metals such as mercury) has air pollution implications far beyond the actual location of the fire (Luber et al., 2014; Naeher et al., 2007). Communities near wildfires and thousands of miles downwind of fires can be exposed to wildfire emissions (smoke) ranging from days to months while the fire is active (Smith et al., 2014; USGCRP, 2016).

Exposure to smoke from wildfires has been associated with multiple adverse health effects, such as low birth weight, increased hospitalizations due to respiratory and cardiovascular conditions, and premature death (USGCRP, 2016). Worldwide, an estimated 339,000 premature deaths per year are attributed to air pollution from forest fires (Patz et al., 2014). Particulate matter can exacerbate existing conditions, such as asthma, COPD, and cardiovascular conditions (Delfino et al., 2009; Naeher et al., 2007; USGCRP, 2016). Wildfires are commonly associated with increased hospital admissions for exacerbated conditions, such as asthma and COPD. During the 2007 fire in San Diego, the odds of a person seeking emergency care increased by approximately 50% during periods of peak PM concentrations when compared with non-fire conditions (Thelen et al., 2013).

Climate modeling suggests that a warming climate might lead to more frequent and larger fires in the Arctic (ACIA, 2005). Future climate change may further increase the risk of wildfires in Alaska, thereby increasing wildfire emissions and negatively impacting human health (Chapin et al., 2014).

ED_016126_00000549-00031

As large wildfires increase, more poor air quality events may result, potentially leading to exacerbations of pre-existing respiratory and cardiovascular illnesses.

Effects of Sea Ice Changes

A reduction in sea ice extent could make the Arctic Ocean more accessible for marine traffic. Shipping routes could increase, as well as oil and gas exploration and cruise ship travel in new areas. These changes could increase the risk of exposure to hazardous materials during a maritime-related accident, though the risk could also decrease given that marine vessels would have greater access to safer ice-free waters (NCA, 2014). Air and ocean pollution may also increase with more traffic in the Arctic Ocean; ports and marine vessels are major sources of black carbon and PM (Azzara and Rutherford, 2015).

Effects of Gradual Temperature Changes and Ecosystem Properties

Pesticides can be used to control nuisance or potentially disease-carrying pests, such as mosquitoes and ticks. They can also be used to protect agricultural crops from pests. Health effects vary depending on the type of pesticide. For example, some pesticides can affect the nervous and endocrine systems; some can cause lung, eye, or skin irritation; and some may cause cancer (EPA, 2017). Increased temperature, as well as other predicted ecosystem and weather pattern changes, such as increased precipitation, may facilitate pest migration to Alaska or an expansion of existing pest populations in the state (Rosenzweig et al., 2001). Pesticide use may increase in Alaska in response to changing pest populations, which could lead to increased human exposure to pesticides.

3.1.4 Food, Nutrition, and Subsistence Activity

Alaska state law defines subsistence use as "the noncommercial, customary and traditional uses of wild, renewable resources by a resident domiciled in a rural area of the state for direct personal or family consumption as food, shelter, fuel, clothing, tools, or transportation, for the making and selling of handicraft articles out of nonedible by-products of fish and wildlife resources taken for personal or family consumption, and for the customary trade, barter, or sharing for personal or family consumption" (State of Alaska, 2016: AS 16.05.940 [34]). The Alaska Federation of Natives (AFN) describes subsistence as "the hunting, fishing, and gathering activities which traditionally constituted the economic base of life for Alaska's Native peoples and which continue to flourish in many areas of the state today" (AFN, 2012).

Subsistence is part of a rural economic system, called a "mixed, subsistence-market" economy, wherein families invest money into small-scale, efficient technologies to harvest wild foods. Fishing and hunting for subsistence resources provide a reliable economic base for many rural regions. Subsistence is focused toward meeting the self-limiting needs of families and small communities (Wolfe and Walker, 1987; Fall, 2016). Subsistence fishing and hunting are important sources of employment and nutrition in almost all rural Alaska communities, regardless of race. Traditional and cultural activities also support a healthy diet and contribute to residents' overall wellbeing (ADF&G, 2016; Norton-Smith, 2016).

Rising food prices, challenges to food quality and quantity, and changing food distribution patterns are all factors that could be impacted by climate change (Luber et al,. 2014; Patz et al., 2014). Due to the specialized dietary patterns in Alaska with a heavy reliance on subsistence resources, changes to key food sources could lead to food insecurity and associated health

ED_016126_00000549-00032

consequences. Many Alaska communities have already reported various changes to subsistence harvest, such as salmon die-offs related to warmer ocean waters, shifting caribou migration, decline and range change in sea mammals, and increased variability in berry harvest (berry changes have been both positive and negative; Brubaker et al., 2014; Brubaker et al., 2012; Hupp et al., 2015).

Notable potential impacts of climate change on food, nutrition, and subsistence activity in Alaska include a northward shift in seal, walrus, and fish species; thinning sea and river ice, which can make harvesting wild foods more precarious; increasing ocean temperatures; and permafrost changes that could alter spring run-off patterns (Cochran et al., 2013). If these changes continue to occur, the consumption of local food sources might decrease (though the consumption of some local food sources could increase if a species moves into a new area).

Effects of Thawing Permafrost

In Alaska, permafrost changes could make travel and thus the harvesting of subsistence foods more difficult. Areas once stabilized by permafrost have started to subside, damaging transportation infrastructure and posing challenges for local populations harvesting subsistence resources (Norton-Smith et al., 2016). Subsistence harvesters in Kivalina report that thawing permafrost and related erosion have decreased stream water quality, resulting in a decrease in Arctic char populations. Salmon populations have increased in the area, but the traditional preference is for char (Brubaker et al., 2010). These challenges have led to smaller reported food harvests. If changes such as these continue to occur, the consumption of local food sources might decrease (though the consumption of some local food sources could increase if a species moves into a new area).

Thawing permafrost creates an additional challenge to the availability of traditional foods. Traditional ice cellars are failing in some Arctic communities (Brubaker et al., 2010b). Ice cellars, formed by digging a storage area into the permafrost, are an important component of subsistence food storage for some residents in the communities of Nuiqsut, Kivalina, Point Hope, Point Lay, Utqiaġvik, Wainwright, and Kaktovik. Alaska Native people have used ice cellars for thousands of years to store food and families have used the same ice cellars for generations (Brubaker et al., 2010). As soil temperatures increase and permafrost begins to thaw, ice cellars are more likely to fail and result in food spoilage. Cellar failure could lead to foodborne illnesses from consuming spoiled food (see Section 3.1.5) and could also lead to a crucial shortage of food for a household. Such shortages could increase food insecurity in communities (Brubaker et al, 2009b).

Effects of Gradual Temperature Changes and Ecosystem Properties

The various components of climate change, such as increasing temperatures, could impact ecosystems in Alaska. An example of such an impact is the expansion of plant species that were once limited to a specific part of the state due to temperature. Gradual changes to the ecosystem could also impact subsistence resources, and therefore potentially impact the availability of certain foods for residents (NCA, 2014). Some ecosystem changes could lead to population declines for some resources (e.g., less food available for caribou herds and the introduction of invasive species). Migration patterns of subsistence resources, such as caribou, have changed and may to change due to ecosystem changes. These migration changes could make harvesting subsistence resources more difficult in some communities (i.e., people will need to travel further to find a caribou), but could lead to more successful subsistence harvests in some areas (i.e., a resource moving into new habitat—such as deer) (Struzik, 2010). Warming temperatures might also lead to an increase in parasites in subsistence resources, such as caribou, which could potentially affect the availability of certain foods in Alaska (ADF&G, 2008; Bradley et al., 2005).

ED_016126_00000549-00033

Ocean acidification, rising ocean temperatures, and declining sea ice are additional components of climate change that may interact to affect the location and abundance of marine fish, including those used for subsistence. Due to declining sea ice, subsistence hunters report needing to travel increasingly large distances to hunt marine mammals, such as bearded, spotted, ringed, and ribbon seals, whose reproduction and survival rates are known to fluctuate with climate changes (Ferguson et al., 2005).

3.1.5 Infectious Diseases and Toxins from Microorganisms

Researchers predict that climate change will cause a variety of temperature and ecosystem changes at both the global and local levels. Increasing temperatures and changing weather patterns can affect the incidence and spread of infectious diseases, especially vectorborne and waterborne diseases. Such implications include altered population size and range of hosts, vectors, and pathogens; duration of the transmission season; and outbreak timing and persistence (Parkinson et al., 2005). This section focuses on vectorborne, waterborne, and foodborne diseases that may be linked to climate change and are relevant to Alaska.

Vectorborne and Zoonotic Diseases: Effects of Temperature Changes, Extreme Weather Events, and Changing Weather Patterns

Vectorborne diseases are illnesses that are caused by pathogens and parasites in human populations (WHO, 2016). Common arthropod vectors include mosquitoes, ticks, and fleas. Climate change could impact vector ecology in several ways. Changes to weather patterns and the frequency of extreme weather events can affect vector population size, density, and survival rates. Climate change could also influence the reproduction and survival rate of pathogens in the host, as well as the size of the host population (Gage et al., 2008). Increases in temperature could also impact vector development; this may hinder or aid in vector survival, depending on the vector (ADEC, 2010). For example, an increase in temperature could allow for mosquitoes to survive longer in a previously inhospitable environment (Patz et al., 2014). In Alaska, increasing temperature and precipitation are potential driving factors for changes in the occurrence of vectorborne diseases.

Zoonotic diseases are diseases that can be spread between animals and humans. Since many people interact with animals frequently in their daily lives, some zoonotic diseases are common in human populations.

West Nile Virus

West Nile virus (WNV) was first observed in the United States in 1999. Since then, WNV has been documented in 48 states and has been spreading across the Canadian provinces as far west as Yukon Territory. Thus far, no locally-acquired cases of WNV have been recorded in Alaska.

The normal lifecycle of WNV involves mosquitoes and birds. When a mosquito feeds on an infected bird, it becomes infected with WNV and then transmits the virus by feeding on another bird, human, or horse. Humans and horses represent dead end hosts; probably because the level of viremia that develops is not high enough to allow mosquitoes that subsequently bite them to become infected (ADHSS, 2002). Of the 35 mosquito species known to carry WNV, several of those species are endemic or have been found in Alaska (e.g., *Aedes canadiensis, A. vexans, Culex pipiens,* and *C. restruans*) (ADHSS, 2002). However, given our relatively cool, short summers and brief mosquito season, experts feel that Alaska does not currently have favorable

ED_016126_00000549-00034

climatic conditions to support ongoing transmission of the virus, though this could change with a changing climate. The ideal temperature for WNV carriage in mosquitoes is at least 86° (30°C) over a 10 day period (NY ClimAid).

Climate change predictions for Alaska show an increase in temperatures across the state, particularly in the Interior and Northern regions. Summer temperatures in Interior Alaska already exceed 80°F for several days annually, and it is reasonable to assume that with the predicted temperature change for Interior Alaska, there is potential to meet this temperature requirement by the mid- to late-century (Chapin et al., 2014; Stewart et al., 2013).

Lyme Disease and Other Tick-borne Diseases

Ticks are restricted to specific geographic locations where climatic conditions, such as temperature and precipitation, are suitable for them to complete their life cycles (Gage et al., 2008). Tick habitat is also related to the abundance of host species, such as white tailed deer and white-footed mice. In the Lower 48, warmer air temperatures have increased the reproduction rate and range of the blacklegged ticks, *Ixodes scapularis* (deer tick) and *I. pacificus* (western blacklegged tick; EPA Climate Impacts, 2016). These ticks are vectors for the bacteria *Borrelia burgdorferi*, which causes Lyme disease (CDC Lyme Transmission, 2015).

There have been no known locally-acquired cases of Lyme disease in Alaska (Alaska does not currently have favorable climatic conditions to support the tick species that transmit the disease). Tick surveillance demonstrates that *I. scapularis* currently has an established range from the eastern U.S. into southern Manitoba, Canada (Bouchard et al., 2015). Climate-based models indicate that as temperatures increase, the *I. scapularis* population could continue to expand northward through Canada, and potentially to Alaska (Brownstein et al., 2005; Gage et al., 2008; McPherson et al. 2017). Moreover, recent surveillance efforts have identified *I. scapularis* on some Alaska dogs with recent travel outside of Alaska. There is no indication that *I. scapularis* is currently established in Alaska; however, further introduction of these ticks into the state could eventually result in an established population (Durden et al, 2016). Other non-native species can also survive if they are introduced to certain parts of the state (Woodford, 2012). For example, *Dermacenter variabilis* (the American dog tick, a vector for the pathogens that cause Rocky Mountain spotted fever, tularemia, Q fever, and bovine anaplasmosis) has been identified on Alaska dogs without a history of recent travel outside of Alaska. *D. variabilis* is not established in Alaska, but it does have eventual invasion potential, given the right set of climatic conditions (current northern range limit is below 52° North latitude in southern Canada [Dergousoff et al., 2013]; Durden et al., 2016; Woodford, 2012).

Rabies Virus

Rabies is a zoonotic disease caused by a family of viruses that infect mammals. The majority of animal rabies cases in the U.S. occur in wild animals, such as foxes, skunks, bats, and raccoons. Rabies is most commonly transmitted to humans via the bite of a rabid animal (CDC Rabies, 2016).

Rabies is enzootic (consistently present) among the fox populations of northern and western coastal Alaska. In Alaska, rabies infection most commonly occurs in foxes, although dogs, wolves, and bats occasionally become infected as well (ADHSS, 2011). Most cases occur in early fall through spring. During this time, foxes move inland from the sea ice. Climate changes could lead to conditions that support an increase in the Arctic fox population (Kim et al., 2014). Increasing temperature could facilitate an expansion of rabid Arctic fox populations, but

ED_016126_00000549-00035

predictions are complicated by modeled regional differences in precipitation (Kim et al., 2014). Decreased sea ice could limit the movement of Arctic foxes, which could lead to decreased opportunity for rabies transmission (Kim et al., 2014), but may also result in Arctic foxes foraging closer to villages and thereby might increase the likelihood of contact with humans and domestic pets.

Rabies from bats is common in the continental United States and several Canadian provinces. There are only six bat species in Alaska, and most have ranges that do not extend beyond southeast Alaska (ADHSS, 2016). The geographic range of bats is tied to several factors, including climate (particularly average temperatures; Kim et al., 2014). Of note for Alaska, the short duration of darkness in the summer limits foraging activities for bats, thereby limiting their northern range (ADHSS, 2006). This limiting factor would remain, regardless of climate change.

Echinococcosis

Echinococcosis is a zoonotic infection caused by tapeworms from the genus *Echinococcus*. Echinococcosis occurs sporadically in Alaska and reported cases have decreased in recent decades. Cystic echinococcosis, caused by infection with *Echinococcus granulosus*, has been reported in all regions in Alaska except the Aleutians. Alveolar echinococcosis, caused by infection with *E. multilocularis*, has only been reported in Alaska in the North Slope region and St. Lawrence Island. Warmer temperatures could support the expansion of foxes and voles, which are common carriers of *E. multilocularis,* though warmer temperatures might also make it harder for *E. multilocularis* eggs to survive (Parkinson and Evengård, 2009; Rausch, 2003; Jenkins et al., 2013).

Food- and Waterborne Diseases: Effects of Temperature Changes, Extreme Weather Events, and Ecosystem Properties

Climate change may alter the incidence of food- and waterborne disease by way of increased temperatures, extreme weather events, and changing availability of fresh food and drinking water. Increased temperatures can directly affect pathogens by influencing their survival, persistence, and virulence (ADEC, 2010; Fleury et al., 2006). For example, increased air temperatures may lead to thawing permafrost, which could impact the safety of traditional forms of food storage in Alaska (Brubaker et al., 2010b).

Extreme weather events, such as floods and droughts, can reduce the availability of safe drinking water, fresh food, and sewer services. Increased precipitation and associated runoff can also change the spread of pathogens that cause food and waterborne diseases (Parkinson and Butler, 2005). Flooding and heavy rainfall could cause overflows from sewage treatment facilities into fresh water sources and overflows could contaminate food crops with pathogen-containing feces (EPA Climate Impacts, 2016).

Botulism

Foodborne botulism is caused by ingesting the neurotoxin made by the bacterium *Clostridium botulinum*. Improperly canning, fermenting, aging, or putrefying foods can create an anaerobic environment, which promote the growth and toxin production of *C. botulinum*; this can happen at temperatures greater than 39°F (4°C; Parkinson and Butler, 2005). Cases of botulism in Alaska are relatively uncommon and have decreased in recent years, but the rate of foodborne botulism is higher in Alaska than anywhere else in the Nation (CDC Botulism, 2017). All foodborne botulism cases in Alaska have occurred among Alaska Native people who consumed traditional Alaska

ED_016126_00000549-00036

Native foods (ADHSS, 2017b). These include "fermented" foods, dried foods, and traditionally prepared condiments, such as seal oil. Traditional foods, such as sea mammals, are not technically fermented because they lack adequate carbohydrates to enable fermentation; instead, these foods are usually putrefied (ADHSS, 2017b). Because of the temperature dependency of spore germination, it is possible that warmer ambient air temperatures in Alaska could result in an increase in cases of foodborne botulism if foods are not able to be properly prepared and stored in a manner that prevents spoilage (Parkinson and Evengård, 2009).

Paralytic Shellfish Poisoning

Paralytic shellfish poisoning (PSP) is a potentially fatal neuroparalytic condition that results from ingesting saxitoxin, a marine toxin produced by dinoflagellate algae. In the right conditions, saxitoxin accumulates in bivalve mollusks (e.g., mussels, scallops, and clams). Increasing temperatures promote harmful algal bloom (HAB) events in freshwater and saltwater, although PSP is a risk year-round (Paerl et al., 2011; Smith et al., 2014). Outbreaks of PSP have been reported world-wide and have increased in frequency and range. PSP cases occur in Alaska and could occur with greater frequency and broader range due to increasing ocean temperatures (Parkinson and Butler, 2005). HAB events can also involve domoic acid, a toxin produced by dinoflagellates that can cause amnesiac shellfish poisoning (ASP) when ingested by humans (NOAA Fisheries, n.d.). Climate change projections show HAB events in Puget Sound occurring 2 months sooner and lasting up to a month longer than at present. In Alaska waters, HAB events may also occur more frequently and last longer (UAF Sea Grant, 2014).

Giardiasis

Giardiasis is a diarrheal illness caused by the ingestion of *Giardia lamblia* cysts found in contaminated soil, food, or water, as well as by fecal-oral spread from an infected person (CDC Giardia, 2015). Alaska has some of the highest annual rates of giardiasis in the United States (Yoder et al., 2010; Painter et al., 2015). The incidence of giardiasis could increase with climate change as northern habitats become more suitable for animals that carry the protozoan (e.g., beaver; Brubaker et al., 2010; Parkinson and Evengård, 2009; Jenkins et al., 2013).

Other Gastrointestinal Illnesses

Vibrio parahaemolyticus is a leading cause of seafood-associated gastroenteritis in the United States. *V. parahaemolyticus* in Alaska has been associated with the consumption of raw oysters gathered in warm-water estuaries (McLaughlin et al., 2005). *V. parahaemolyticus* thrives in warmer water temperatures (e.g., >15°C; ADHSS, 2004b). Warm water temperature also appears to have led to Alaska's first documented outbreak of *V. parahaemolyticus* in 2004, which was a particularly warm summer (ADHSS, 2004). The prevalence of *V. parahaemolyticus* may increase in Alaska waters with increasing water temperatures, though there are effective means to prevent an outbreak. Following the 2004 outbreak, the Alaska Department of Environmental Conservation developed a control plan for *V. parahaemolyticus*. As part of this plan, shellfish harvesters must monitor water temperatures. If the temperature reaches ≥60°F, harvesters must take corrective action; such an action may include lowering oyster gear below the thermocline (temperatures <60°F; ADEC, 2017). The control plan and increased awareness of *V. parahaemolyticus* in the state are likely reasons why an outbreak in Alaskan waters has not occurred since 2004. (Note: potential impacts related to water and sanitation, such as

ED_016126_00000549-00037

gastrointestinal illness due to damaged water systems, will be addressed in Section 3.1.7, Water and Sanitation.)

Effects of Other Infectious Diseases and Toxins

Infectious Respiratory Diseases

The distribution of viruses with a wild bird host, such as influenza, could be impacted by climate change—particularly as ecosystems gradually change in response to factors such as changing temperatures (Berner et al., 2005). The impact of these potential factors on human cases of influenza, however, is unpredictable (Gilbert et al., 2008).

Other Toxins

Naturally occurring toxins may also be mobilized into the environment due to thawing permafrost, which could increase exposure to contaminants. In 2016, for example, an outbreak of anthrax occurred in the Siberian region of Russia and resulted in the hospitalization of dozens of people and the death of a child. Historically, many outbreaks of anthrax have occurred in reindeer and cattle in this region. Some researchers speculated that the cause of the outbreaks in 2016 was thawing permafrost that led to previously frozen and buried dead animals thawing and rising to the surface, and subsequently releasing anthrax spores that had been previously immobilized in the carcasses (NPR, 2016).

3.1.6 Non-communicable and Chronic Diseases

Climate change could also impact chronic non-communicable diseases due to lifestyle changes (e.g., leisure-time activity and diet) and aeroallergen and air quality changes (the potential effects of air pollution are addressed in Section 3.1.3).

Effects of Thawing Permafrost, Temperature Changes, and Ecosystem Properties

Changing Food Consumption Patterns

As discussed in Section 3.1.4, climate change could lead to a decrease in the consumption of subsistence foods and a decrease in food-secure households in Alaska. Shifting from subsistence foods can lead to an increase in the consumption of store-bought foods of lesser nutritional value (Johnson et al., 2008). Diets with more unhealthy and/or less nutrient-rich foods could lead to several chronic non-communicable conditions, such as obesity, diabetes, certain types of cancer, and cardiovascular disease (ADEC, 2010; Eyre et al., 2004). If diets change in Alaska due to climate change, rates of these chronic diseases could increase over time.

Changing Access to Recreational and Subsistence Activities

Warmer temperatures could decrease the number of days when recreational snow activities such as skiing and snow machining can occur, as well as some subsistence activities (e.g., hunting on the ice or snow). Increased wildfires could impact recreational activities (such as hiking) and subsistence activities during the summer months. Alaska residents who rely on these recreational and subsistence activities for exercise and mental health may be adversely affected if their opportunities become more limited.

Insect Bites and Stings

ED_016126_00000549-00038

Increased temperatures may influence insect bites and stings in Alaska. Warmer average winter temperatures in Alaska might have already contributed to an increase in patients seeking health care for insect bite and sting reactions. In Alaska, there was a statistically significant increase in patients seeking care for insect reactions (e.g., yellowjacket stings) over a 14-year period (Demain et al., 2009). The most northern regions in the study had the largest percentage of increases in patients seeking health care for insect reactions and experienced the largest increases in winter temperatures, averaging at least 6°F. Researchers believe that warmer temperatures may have been a contributing factor to the increase in insect bites and stings (ADEC, 2010; Demain et al., 2009).

Effects of Aeroallergen Changes

Climate change could affect allergies and respiratory health as higher temperatures and changes in precipitation influence the abundance, seasonality, and distribution of aeroallergens (such as birch pollen; NCA, 2014). Warmer temperatures in Alaska could lead to greater pollen exposures due to earlier and longer pollen seasons. As a result, rates of allergic rhinitis (hay fever) and asthma could be impacted by these changes to aeroallergens.

A community-based surveillance study in Alaska observed that allergic asthma symptoms from outdoor sources were significantly more likely in months when participants reported unseasonable environmental conditions, such as pollen changes or increased precipitation (Driscoll et al., 2016; AMAP, 2017). In 2014 and 2016, tree pollen counts in Anchorage and Fairbanks were the some of the highest the world and may have been the result of an early, dry spring (ADHSS, 2017; ADN 2016). This increase in tree pollen counts may have resulted in more reported allergy symptoms in both communities (ADN, 2016).

3.1.7 Water and Sanitation

The World Health Organization (WHO) lists unsafe drinking water combined with inadequate sanitation and hygiene as one of the top 10 health risk factors leading to disease, disability, and death worldwide (Berner et al., 2005; WHO, 2009). The WHO estimated that these risk factors contribute to approximately 88% of the deaths from diarrheal diseases (CDC WASH, 2015). An estimated 900,000 people fall ill and up to 900 die each year in the United States from diseases resulting from drinking contaminated water (APHA, 2011). In Alaska, the lack of adequate sanitation is associated with increased transmission of communicable diseases such as respiratory infections, skin infections, meningitis, and gastroenteritis in rural communities (Berner et al., 2005; Hennessy, 2008; Wenger et al., 2010; Thomas et al., 2015).

Drinking water distribution in Alaska currently consists of several methods, including piped utility systems, community-haul, and self-haul (Warren et al., 2005). Sewage systems in Alaska include piped facilities, septic systems, pit privies (outhouses), community haul and self-haul. Approximately 80% of rural community housing units have in-home water and wastewater services (Thomas et al., 2015). The remaining 20% (approximately 30 communities) use alternative methods, such as honey buckets (a honey bucket is a container placed in the house and used as a toilet; disposal requires carrying the container outside to be emptied at a designated spot, which may or may not be a sewage lagoon; Berner et al., 2005).

ED_016126_00000549-00039

Climate change could impact water and sanitation facilities, and rates of associated disease, in a number of ways. Flooding, thawing permafrost, increased temperatures, and changing weather patterns are all examples of climate change components that could impact human health. In Alaska, water and sanitation infrastructure damage has already occurred in some communities due to coastal and riverbank erosion, thawing permafrost, storm surges, and flooding (including flooding from spring ice breakup). Further damage to drinking water, wastewater, and/or storm water systems could adversely impact human health by way of facilitating waterborne diseases (such as giardiasis) and decreasing the availability and quality of water used for personal hygiene and drinking water.

Effects of Thawing Permafrost

Thawing permafrost can damage water and sewer infrastructure, leading to an increase in waterborne diseases, such as cryptosporidiosis and giardiasis. Thawing permafrost has already been implicated in damage to water and sewer systems in rural Alaska communities. Kwigillingok, for example, reported the loss of an aquifer due to the disappearance of permafrost (ADEC, 2010). As permafrost continues to thaw in Alaska, water and sewer infrastructure may suffer damage, which could increase waterborne and water-washed diseases (diseases caused by lack of clean water for washing, such skin and eye infections; ADEC, 2010).

Thawing permafrost could also lead to the drainage of surface water sources (AMAP, 2017). Lakes in permafrost regions in Alaska have already begun to change; some lakes have decreased in size and others have disappeared (Evengård et al., 2011). Because many communities in the Arctic rely on surface water sources, including Alaska's North Slope, changes to these sources could impact the availability of potable water and impact human health. For example, limited access to water is associated with an increase in skin infections and pediatric hospitalization rates for pneumonia, influenza, and respiratory syncytial virus infections (Wenger et al., 2010; Thomas et al., 2015; Hennessy et al., 2008).

Effects of Weather Pattern Changes

Increased precipitation, particularly heavy rainfall events, can overwhelm water and sewage systems, leading to waterborne infections (see Section 3.1.5 for an expanded discussion of waterborne disease and climate change; CDC, 2011; USGCRP, 2016; ADEC, 2010; Patz et al., 2014). In 1993, the largest outbreak of *Cryptosporidium* in the United States was preceded by the heaviest rainfall event in 50 years. This outbreak in Milwaukee caused approximately 403,000 illnesses and 50 deaths (MacKenzie et al., 1994; Patz et al., 2008). Extreme storm events have been tied to human illness in the Arctic (Evengård et al., 2011; Warren et al., 2005).

Extreme storm events can also damage infrastructure for drinking water, wastewater, and storm water systems (USGCRP, 2016). Heavy precipitation can lead to flooding and surface runoff and can increase pathogen loads in water sources and promote harmful algal blooms (USGCRP, 2016). Heavy precipitation events can also exacerbate existing issues with inadequate or deteriorating infrastructure.

Nationally, researchers predict that hurricanes and rainfall will increase in intensity, thus increasing the risk of flooding in coastal and inland regions. In Alaska, storms are predicted to increase in frequency and intensity. This predicted change, combined with increased coastal and riverbank erosion, could lead to damaged water and sanitation infrastructure, as well as contaminated surface water sources due to flooding. Storm damage to Kivalina in 2004, for example, damaged the community's leach field system for the washeteria (which is the only structure providing public

ED_016126_00000549-00040

showers, laundry facilities, and flush toilets, as Kivalina does not have piped water and sewer) and resulted in the closure of the washeteria for the entire winter (Brubaker et al., 2010). The rate of respiratory infections in Kivalina increased after 2004, possibly due to the washeteria's prolonged closure (Thomas et al., 2013). A community-based surveillance study in Alaska found that water insecurity (reduced amount of water usually used) was significantly more likely in months when participants reported unusual weather (Driscoll et al., 2016).

Effects of Sea Level Changes

Rising sea levels can increase coastal erosion, worsen storm surges and flood areas, and damage infrastructure (Patz et al., 2014). While sea levels are decreasing in some parts of Alaska, levels are increasing near some communities. Additionally, coastal erosion and storm surges are already challenges in some communities. Storm surges in vulnerable coastal regions could lead to sea water overtopping and contaminating freshwater sources (ADEC, 2010). As discussed in the climate change predictions for Alaska, the state may be adversely impacted once the rate of sea level rise exceeds the rate of rising land surface, though the scale and timing of this change is uncertain (O'Harra, 2010; UAF Sea Grant, 2014).

Effects of Temperature and Precipitation Changes

Though precipitation in the form of rain is expected to increase for much of Alaska, some models predict that the availability of potable water will decrease due to climate change (ADEC, 2010). For example, tundra lakes and ponds in some parts of Alaska have already been shrinking due in part to increased evaporation and increased drainage as permafrost thaws (Riordan et al., 2006). For a community-specific example, water operators in Point Hope reported that during the summers of 2007 and 2008, there was a disruption in drinking water treatment due to drought and a temperature-driven increase in organic material in an Arctic tundra lake, which was the source of drinking water for the community (Brubaker et al., 2009). There was no evidence of an impact to the rates of waterborne illness in the community during this incident; however, substantial increases in organic material can raise the cost of water treatment (due to more frequent filter changes), sometimes limiting a community's ability to provide safe drinking water (Brubaker et al., 2009).

3.1.8 Health Services Infrastructure and Capacity

Health services infrastructure and capacity refers to physical infrastructure, staffing levels, staff competencies, and technical capabilities of health care facilities. Access to health care and health care capacity is often influenced by natural disasters. This can occur if an influx in patients overwhelms health service capacity, thus limiting residents' access to health care. If large-scale incidents occur that involve multiple individuals, existing health services could be overwhelmed, as many clinics and regional health centers have limited capacity.

Currently, about half of all Alaska Native people reside in small communities that are isolated from regional hospitals and health centers due to large distances, weather events, and geographic barriers. Many of these communities are not accessible by road, and can only be accessed via boat, snow machine, or small aircraft.

Climate change could impact access to health care services. For example, thawing permafrost could damage a health clinic structure, a road accessing a clinic, or village runways. Extreme storm events and wildfire smoke can decrease access to health services. Communities without

ED_016126_00000549-00041

access to health care services may be adversely affected by climate variability and climate change (Frumkin et al., 2008; Smith et al., 2014).

Effects of Thawing Permafrost

Thawing permafrost could damage health care infrastructure and directly impact health care services—more people requiring medical assistance because of accidents and injuries due to failing infrastructure. Water supply systems and wastewater systems are further examples of infrastructure that could be damaged from thawing permafrost and result in adverse health effects.

Effects of Extreme Weather Events

In Alaska, scientists predict more frequent and intense storms due to climate change. As mentioned above, large-scale incidents, such as extreme weather events, could overwhelm existing health services, especially in communities where the capacity of health care resources are already strained. Extreme weather events could also preclude access to health services—e.g., storms can impede air and boat travel.

ED_016126_00000549-00042

3.2 Key Potential Health Impacts by Health Effect Category

One initial step that local communities can take to prepare for climate change is to identify the potential health impacts that will be most relevant to their community and, for each identified impact, determine the expected timing and magnitude of the effect. Examples of criteria that could be used for this application include (a) potential time to impact, (b) geographic extent of the impact, (c) the number of people directly impacted, (d) the number of people impacted who might experience serious health problems, and (e) resources needed to adapt to the impact. The criteria can then be summarized and presented in a simplified visual format such as a tiered and color-coded table (e.g., Table 3). Next, communities can create a table that displays what the potential adverse health impacts of climate change might look like in their community for each health effect category to help prioritize adaptation strategies and resource needs (e.g., Table 4 presents a notional example of what such a table might look like on a statewide basis).

Table 3. Example of a System to Rank the Timing and Magnitude of Health Impact Dimension Criteria

	Timing and Magnitude		
Health Impact Dimension	**Lower**	**Intermediate**	**Higher**
Time to Impact	≥50 years	20–50 years	<20 years
Geographic Extent	Local	Regional	Statewide
Number of People Directly Impacted	Few	Intermediate	Many
Number of People Impacted who Might Experience Serious Health Problems	Few	Intermediate	Many
Resources Needed to Adapt/Respond	Few	Intermediate	Many

ED_016126_00000549-00043

Table 4. Notional Example of Potential Adverse Health Impacts of Climate Change Statewide, by Health Effect Category*

Health Effect Category	Selected Adverse Health Impacts	Time to Impact	Geographic Extent	# of People Directly Impacted	# People Experiencing Serious Health Problems	Resources Needed to Adapt/ Respond
Mental Health and Wellbeing	Increase in solastalgia, anxiety, and depression due to the changing environment					
Accidents and Injuries	Increased heat stress and associated disorders					
	Increased accidents/injuries due to infrastructure damage					
	Increased accidents/injuries due to wildfires					
	Increased accidents/injuries due to extreme weather events (e.g., flooding)					
	Increased accidents/injuries due to unsafe ice conditions					
Exposure to Potentially Hazardous Materials	Increased cardiovascular disease morbidity/mortality due to air pollution (e.g., caused by wildfires)					
	Increased respiratory disease morbidity/mortality due to air pollution (e.g., caused by wildfires)					
	Increased exposure to hazardous materials (e.g., due to infrastructure damage, storm events)					
Food, Nutrition, and Subsistence Activity	Decrease in subsistence food consumption and food security (e.g., due to migration changes, increased costs of importing foods)					
Infectious Diseases and Toxins from Microorganisms	Increased morbidity/mortality related to vectorborne diseases					
	Increased morbidity/mortality related to zoonotic diseases					
	Increased morbidity/mortality related to food- and waterborne diseases (e.g., botulism, PSP, *Vibrio parahaemolyticus*)†					
Non-communicable and Chronic Diseases	Increased rates of chronic diseases such as obesity, diabetes, and hyperlipidemia due to changing lifestyles±					
	Increased rates of chronic respiratory diseases due to aeroallergens					
Water and Sanitation	Increased morbidity/mortality due to compromised access to water and sanitation facilities (e.g., infrastructure damage)					
Health Services Infrastructure and Capacity	Increased morbidity/mortality due to compromised access to health care (e.g., infrastructure damage)					

**Note: This table was constructed as a notional example for Alaska communities to consider replicating when developing the community health component of their own climate change adaptation plans. As such, it should be viewed primarily as an instructional tool rather than a precise representation of the likelihood of specific health impacts due to climate change in Alaska. Creating a reliable table for the entire state would require more input from a wide range of subject matter experts and stakeholders.*

†This health impact focuses on illnesses that are not a direct result of compromised access to water and sanitation facilities, which are addressed in a subsequent category (Water and Sanitation).

±This health impact focuses on illnesses that are not a direct result of air pollution, which is addressed in a previous category (Exposure to Potentially Hazardous Materials).

ED_016126_00000549-00044

3.3 Monitoring Recommendations and Adaptation Strategies

The monitoring recommendations and adaptation strategies discussed in this section are provided as suggestions based on the examples of potential health impacts identified in this statewide HIA.

3.3.1 Monitoring Recommendations

The monitoring recommendations provided here are intended to help characterize the adverse health impacts of climate change over time. Monitoring indicators and resources are listed to help decision-makers and other stakeholders develop surveillance strategies and identify agencies currently collecting the relevant health and environmental data. This section presents monitoring recommendations and resources for each HEC.

An effective monitoring strategy requires the development of a suite of measurable and objective indicators. Fortunately, numerous public health surveillance systems exist and robust sets of climate change indicators have been developed by agencies such as the U.S. Environmental Protection Agency (EPA Climate Change Indicators, 2016) and the Council of State and Territorial Epidemiologists (CSTE Climate Change Indicators, n.d.).

This HIA proposes health and environmental indicators to (1) characterize how well the state is performing for several health outcomes in each health effect category, and (2) monitor future change (Table 5). Table 5 also presents monitoring resources to help improve situational awareness related to potential climate change impacts. These resources are listed to help decision-makers and other stakeholders develop surveillance strategies and identify agencies currently collecting the relevant health and environmental data; however, agencies may not have designated staff for ongoing monitoring and the list of monitoring resources is not exhaustive. More resources will need to be developed to comprehensively monitor all potential indicators statewide. Where possible, this HIA identifies monitoring strategies that have been developed and tested by other state, federal, and international entities. For example, this HIA suggests monitoring many of the health and environmental indicators proposed and pilot tested as indicators by CSTE (CSTE Climate Change Indicators, n.d.).

ED_016126_00000549-00045

Table 5. Proposed Health and Environmental Indicators and Monitoring Resources

Potential Impact	Health and Environmental Indicators	Examples of Existing Monitoring Resources
Mental Health and Wellbeing		
Increase in psychosocial distress (e.g., anxiety or depression) due to the changing environment	Health indicators • Hospital/clinic visits due to distress following a climate-associated event (e.g., flooding, storm surge, wildfire) Environmental indicators • Tidal gauges (to monitor sea-level rise)	Health resources • Alaska Trauma Registry (ATR) for injury trends: http://dhss.alaska.gov/dph/Emergency/Pages/trauma/registry.aspx • Alaska Health Facilities Data Reporting Program (HFDR) for hospital diagnoses trends: http://dhss.alaska.gov/dph/HealthPlanning/Pages/DischargeData.aspx Environmental resources • NOAA Sea Level Trends: http://tidesandcurrents.noaa.gov/sltrends/sltrends.html
Accidents and Injuries		
Increased heat stress and associated disorders	Health indicators • Deaths due to heat (number, rate)* • Hospitalizations due to heat (number, rate)* • ER visits due to heat (number, rate)* Environmental indicators • Daily maximum and minimum temperatures	Health resources • ATR for injury trends • Alaska HFDR for hospital diagnoses trends Environmental resources • Scenarios Network for Alaska + Arctic Planning (SNAP) for community profiles on observed and projected temperatures: https://www.snap.uaf.edu/tools-and-data/all-analysis-tools

ED_016126_00000549-00046

Potential Impact	Health and Environmental Indicators	Examples of Existing Monitoring Resources
Increased accidents/injuries due to infrastructure damage (e.g., motor vehicle accidents)	Health indicators • Injuries and deaths from transportation (number, rate) Environmental indicators • Daily maximum and minimum temperatures • Soil temperatures	Health resources • ATR for injury trends • Alaska HFDR for hospital diagnoses trends • Alaska Department of Transportation (DOT) reports on fatal and nonfatal motor vehicle accidents Environmental resources • SNAP for community profiles on observed and projected temperatures
Increased accidents/injuries due to wildfires	Health indicators • Injuries and deaths due to wildfire (number, rate)* Environmental indicators • Air mass stagnation events (number)* • Total number of wildland fires* • Total number of acres affected by wildland fires*	Health resources • ATR for injury trends • Alaska HFDR for hospital diagnoses trends Environmental resources • BLM wildfire webpage: http://fire.ak.blm.gov
Increased accidents/injuries from extreme weather events (e.g., flooding)	Health indicators • Injuries and deaths due to severe storms (number, rate)* Environmental indicators • Meteorological event data, such as extent and timing of unusual events	Health resources • ATR for injury trends • Alaska HFDR for hospital diagnoses trends Environmental resources • SNAP for observed and projected extreme weather data • Alaska Shoreline Change Tool: http://maps.dggs.alaska.gov/shoreline/#-16434084:9589812:5
Increased accidents/injuries due to unsafe ice conditions	Health indicators • Injuries and deaths due to ice break-through events (number, rate) Environmental indicators • Ice thickness, timing of ice break-up and ice-free waters	Health resources • ATR for injury trends • Alaska HFDR for hospital diagnoses trends Environmental resources • SNAP for observed and projected sea ice coverage • Local Environmental Observer (LEO) Network for

ED_016126_00000549-00050

3.3.2 Adaptation Strategies

Adaptation as it relates to climate change is defined by the Intergovernmental Panel on Climate Change as the "adjustment in natural or human systems in response to actual or expected climatic stimuli or their effects, which moderates harm or exploits beneficial opportunities" (IPCC, 2012; Watts et al., 2017). According to the Arctic Monitoring and Assessment Programme (AMAP), adaptation is also "an ongoing process encompassing awareness, understanding, mobilizing resources, building capacity, taking action, evaluating success and adjusting accordingly" (AMAP, 2017). Adaptation strategies related to health include efforts to reduce morbidity and mortality from climate-related causes (Watts et al., 2017). Communities can use the adaptation strategy examples below in developing their own climate change assessments, vulnerability assessments, and action plans. Overarching and HEC-specific adaptation strategy examples for communities are provided in Table 6 and 7. When possible, local values should be incorporated into the process of selecting adaptation strategies to increase the likelihood of successful implementation (Reid et al., 2014; AMAP, 2017).

Another important component of climate change adaptation is community resilience. In the event of a disaster, including climate-driven disasters such as large-scale flooding or a rapidly eroding shoreline, community resilience measures a community's capability of restoring the original pre-disaster state, as well as the capacity to cope with emerging post-disaster situations (Kais & Islam, 2016). Proactive community resiliency can reduce the vulnerability of residents and infrastructure to climate hazards and disasters (Community Resilience Building, n.d.). Policymakers that understand a community's resilience can better aid communities in avoiding or adapting to climate-related disasters (Kais & Islam, 2016). Building community resilience is typically a process whereby participants from various sectors (e.g., local government, tribal leadership, academia, corporations, and residents) work together to identify top hazards, current challenges and strengths, and prioritize actions to utilize resources in effective ways to recover from climate disasters (Community Resilience Building, n.d.).

Table 6. Overarching Adaptation Strategy Examples for Communities

Adaptation Strategies
Create local climate change advisory groups, assessments, and adaptation plans
Offer community members ample opportunity to relay their concerns about climate change and propose solutions
Develop and implement local community resilience plans (https://www.communityresiliencebuilding.com)
Include human health in community vulnerability assessments for climate change (for an example, see: http://www.georgetowntc.com/pdf/GeorgetownVulnerabilityAssessmentFinal.pdf)
Develop or update Small Community Emergency Response Plans (SCERP) and include potential climate-related disasters in the plans (https://ready.alaska.gov/Plans/SCERP).
Develop local and statewide health surveillance systems for selected climate change indicators
Provide informational resources to community members about the potential health impacts of climate change
Promote climate change research at local, regional, and statewide levels
Develop an ongoing catalogue of climate change studies and data gaps in Arctic and sub-Arctic populations
Assure sufficient public health workforce capable of performing climate change research, surveillance, and adaptation
Conduct risk communication, health education, and community outreach as needed

ED_016126_00000549-00051

Table 7. Health Effect Category-Specific Adaptation Strategy Examples for Alaska Communities

Health Effect Category	Potential Adaptation Strategies
Mental Health and Wellbeing	• Raise awareness about solastalgia (the distressing sense of loss that people experience as a result of unwanted environmental changes that occur close to one's home) and promote strategies that mediate public risk perceptions, psychological and social impacts, coping responses, and behavioral adaptation (Resser et al. 2011) • Implement community-based strategies to promote mental health and wellbeing (e.g., https://www.preventioninstitute.org/taxonomy/term/124) • Implement and strengthen existing community-based behavioral health programs that aim to prevent mental/behavioral health problems (e.g., anxiety/depression, substance abuse, suicide, and violence prevention programs)
Accidents and Injuries	• Review architecture and engineering designs to ensure that infrastructure can withstand changes to the underlying permafrost and extreme weather events, and if not, consider ways to address the problem • Support surveillance and communication networks to warn community members of dangerous travelling conditions (e.g., thin ice, frost heaves in roads, storm surges) • Develop risk-appropriate storm shelters for Alaska communities • Develop a plan to create access to cooling centers during extreme heat events (e.g., in interior Alaska; often cooling centers are located in buildings with the capacity to provide cooler environments, such as an air-conditioned school or library)
Exposure to Potentially Hazardous Materials	• Review architecture and engineering designs to ensure that infrastructure can withstand changes to the underlying permafrost, and if not, consider ways to address the problem • Assess location-based vulnerabilities to wildfires, mitigate high-risk areas, and develop community response plans, such as the Firewise Community Program (http://forestry.alaska.gov/fire/firewise) • Develop a plan to create access to clean air centers during wildfires (https://www3.epa.gov/airnow/wildfire_may2016.pdf)
Food, Nutrition, and Subsistence Activity	• Establish community-based monitoring programs for subsistence resources, such as the Local Environmental Observer (LEO) Network and the Alaska Native Tribal Health Consortium (ANTHC) Rural Alaska Monitoring Program (RAMP); https://anthc.org/what-we-do/community-environment-and-health/climate-change-food-security) • Provide support for community freezers and other food safety programs to ensure access to safe and healthy traditional foods in Arctic communities • Conduct risk communication, health education, and community outreach regarding the presence of potential contaminants in subsistence foods
Infectious Diseases and Toxins from Microorganisms	• Support programs such as LEO Network, the One Health Group, and RAMP • Conduct ongoing, active monitoring for harmful algal blooms (HABs) • Expand surveillance efforts for cases of vectorborne diseases and presence of associated vectors
Chronic and Non-communicable Diseases	• Support monitoring efforts for seasonal patterns of respiratory and cardiovascular disease exacerbations that might be associated with wildfire smoke or aeroallergens
Water and Sanitation	• Review architecture and engineering designs to ensure piping infrastructure can withstand changes to the underlying permafrost, and if not, consider ways to address the problem • Collaborate with water utilities and water resource managers to assess expected performance of infrastructure and natural systems under changing climate conditions
Health Services Infrastructure and Capacity	• Review architecture and engineering designs to ensure health care infrastructure can withstand changes to the underlying permafrost, and if not, consider ways to address the problem

5.0 APPENDIX 1: CLIMATE CHANGE INDICATORS

5.1.1 Temperature

This indicator focuses on air, surface, and ocean temperature patterns over time. Air temperature is measured at fixed locations over land and a mixture of ship- and buoy-based systems over the water. Thermometer and other instrument-based surface temperature records date back hundreds of years in some locations (NCA, 2014).

This indicator also examines trends in unusual temperatures from (a) the changes in average annual temperatures, (b) the size and frequency of prolonged heat waves, (c) unusually hot summer temperatures and cold winter temperatures, and (d) the changes in record high and low temperatures. To determine whether an observation is 'unusual' in terms of temperature, data are averaged over a particular month or season of interest; the coldest 10% of years are considered 'unusually cold', and the warmest 10% are considered 'unusually hot' (EPA Climate Change Indicators, 2016). Extremely hot and cold days are also reviewed; extremely hot days are considered the warmest 1% of daily high temperatures and extremely cold days are considered the coldest 1% of daily low temperatures (Stewart et al., 2013).

5.1.2 Precipitation

This indicator entails precipitation patterns, based on rainfall and snowfall measurements from land-based weather stations worldwide. Reliable statewide records are available for Alaska from 1925 to present (EPA Climate Change Indicators, 2016).

An extreme precipitation event is an episode of abnormally high rain or snow; the definition of 'extreme' varies based on location, season, and the length of the historical record.

5.1.3 Weather Patterns

This indicator includes climate features tied to weather patterns; season lengths, frequency/intensity of storms, and timing/amount of storm events are all considered. Roughly defined, weather is "the conditions of the atmosphere over a short period of time" (NASA, 2005). Climate, in comparison, is the behavior of the atmosphere over longer periods of time.

5.1.4 Sea Ice

This indicator describes the extent and age of Arctic sea ice. Data for this indicator are typically gathered by the National Snow and Ice Center using satellite imaging technology (EPA Climate Change Indicators, 2016). Extensive measurements of Arctic sea ice through satellite imaging began in 1979.

Sea ice extent is defined as the area of ocean where at least 15% of the surface is frozen. This indicator focuses on the average sea ice extent during peak freezing and peak melting months. Sea ice extent typically reaches its annual minimum in September and its maximum in March (EPA Climate Change Indicators, 2016).

The age of sea ice is determined by tracking ice as it moves over time through a combination of daily satellite images, wind measurements, and data from surface buoys (EPA Climate Change Indicators, 2016).

ED_016126_00000549-00063

5.1.5 Glaciers

A glacier is a large mass of snow and ice, present year-round, which has accumulated over many years. Glaciers accumulate snow, which eventually becomes compressed into ice, and at lower elevations, the ice naturally loses mass because of melting and calving (ice breaking off and floating away). A glacier that does not increase or decrease in size when melting/calving is balanced by new snow accumulation (EPA Climate Change Indicators, 2016).

A world glacier inventory was created in the 1970s, based primarily on aerial photographs and maps. This inventory contains more than 100,000 glaciers, which cover an approximate area of 240,000 km^2 (UNEP, 2008).

This indicator describes the change in glacier mass balance, which is measured as the average change in thickness across the surface of a glacier. Glaciers provide visible evidence of changes in temperature and precipitation and can contribute to sea level rise if they lose more ice than they can accumulate through new snowfall (EPA Climate Change Indicators, 2016).

5.1.6 Permafrost

Permafrost is a layer of soil below the surface in which the temperature continuously remains below freezing (NWS, 2009). The upper layer of permafrost, the active layer, may thaw and refreeze seasonally. The active layer lies above the continually frozen permafrost layer. Permafrost consists of soil, rocks, and frozen water. Large quantities of carbon dioxide and methane are stored in permafrost (Chapin et al, 2014).

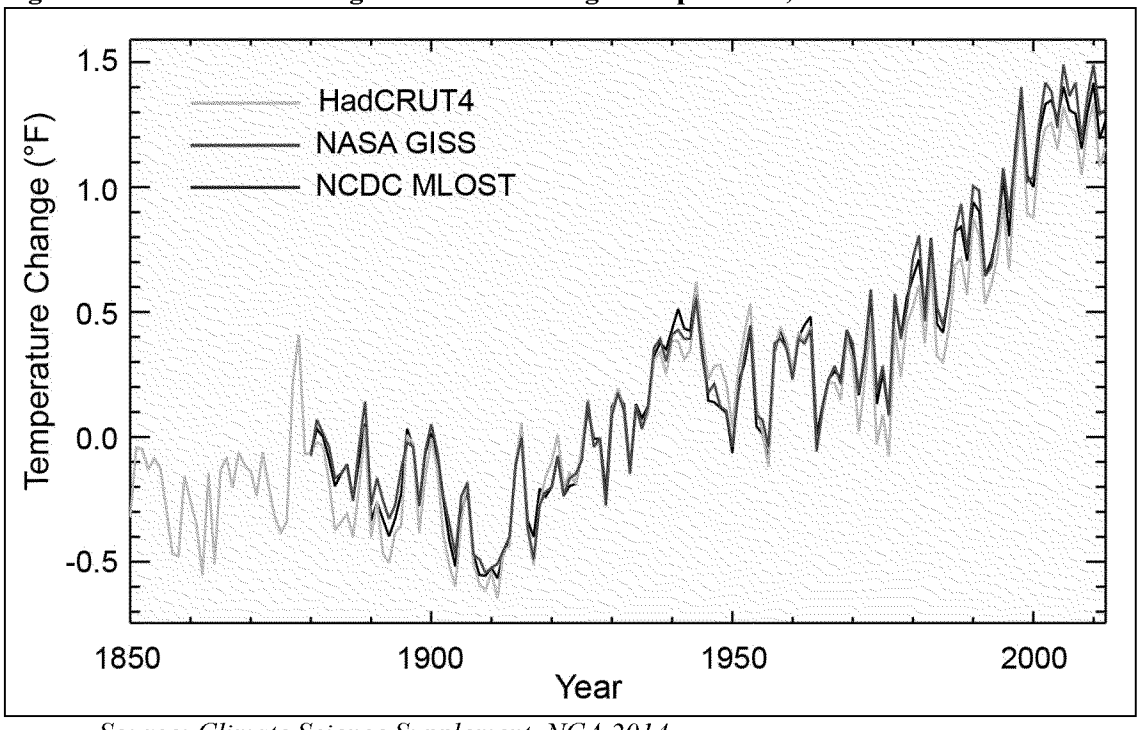
This indicator describes the extent of permafrost in Alaska. Permafrost extent is measured by soil temperature. The University of Alaska Fairbanks Geophysical Institute has been monitoring temperatures and depth of permafrost since 1976 (Stewart et al., 2013).

5.1.7 Sea Levels

This indicator encompasses trends in sea level based on measurements from tide gauges and from satellite imagery. Tide gauges measure relative sea level change along the coast and satellites measure absolute sea level change over the ocean surface. Many tide gauges have collected data for more than 100 years. Satellites have collected data since the early 1990s (EPA Climate Change Indicators, 2016). Sea level data for much of Alaska are available from 1975 to present (NOAA Tides and Currents).

ED_016126_00000549-00064

6.0 APPENDIX 2: EVIDENCE FOR CLIMATE CHANGE OUTSIDE OF ALASKA



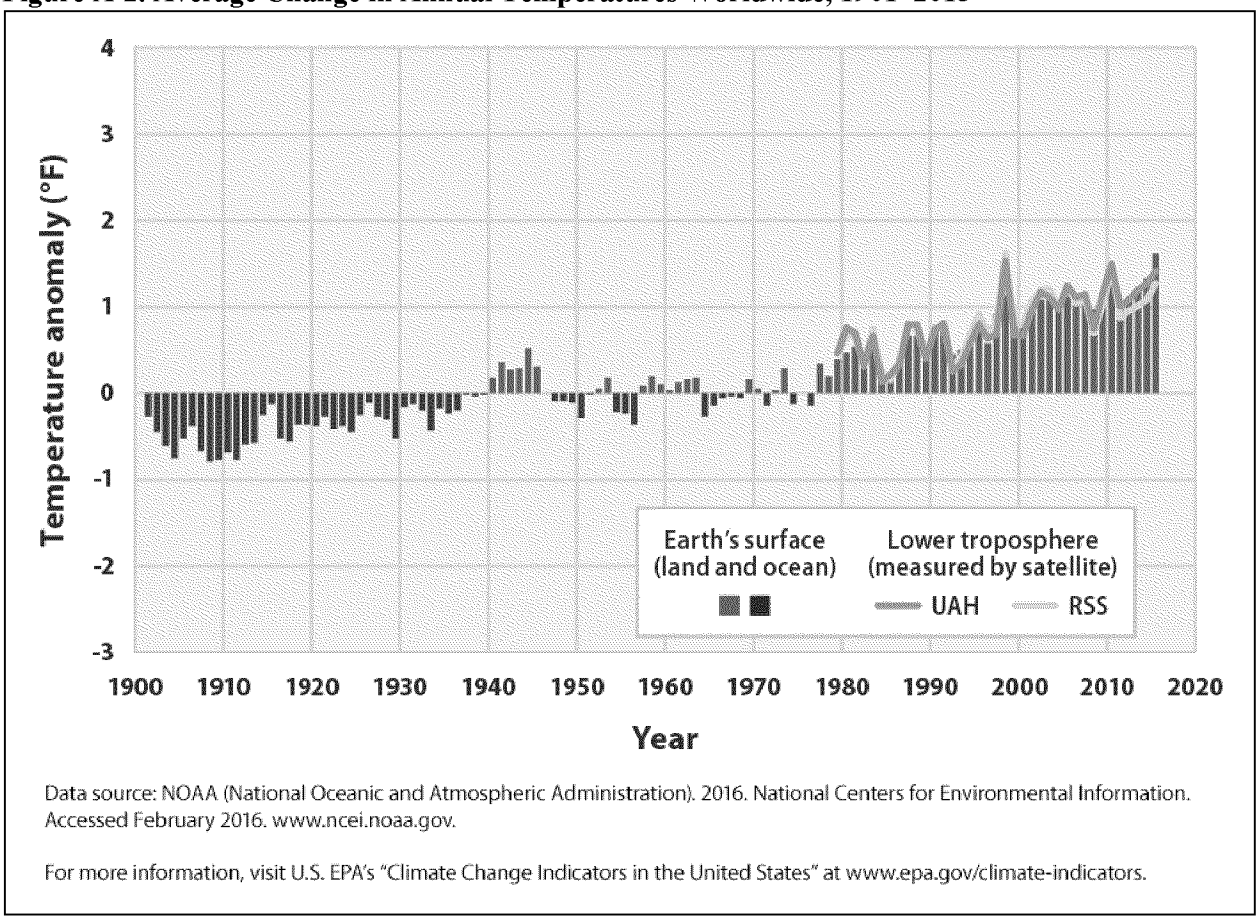
This section presents general changes in various climate change indicators and focuses on the global and national scale.

6.1.1 Temperature

Global Temperature Change

Globally, temperatures have increased by at least 1.5°F since 1880, based on information from three global temperature datasets (HadCRU4, NASA GISS, and NCDC MLOST; Figure A-1). Global temperature has risen at an average rate of 0.13°F per decade since 1901 (Walsh et al., 2014).

Figure A-1. Observed Change in Global Average Temperature, 1901–2012

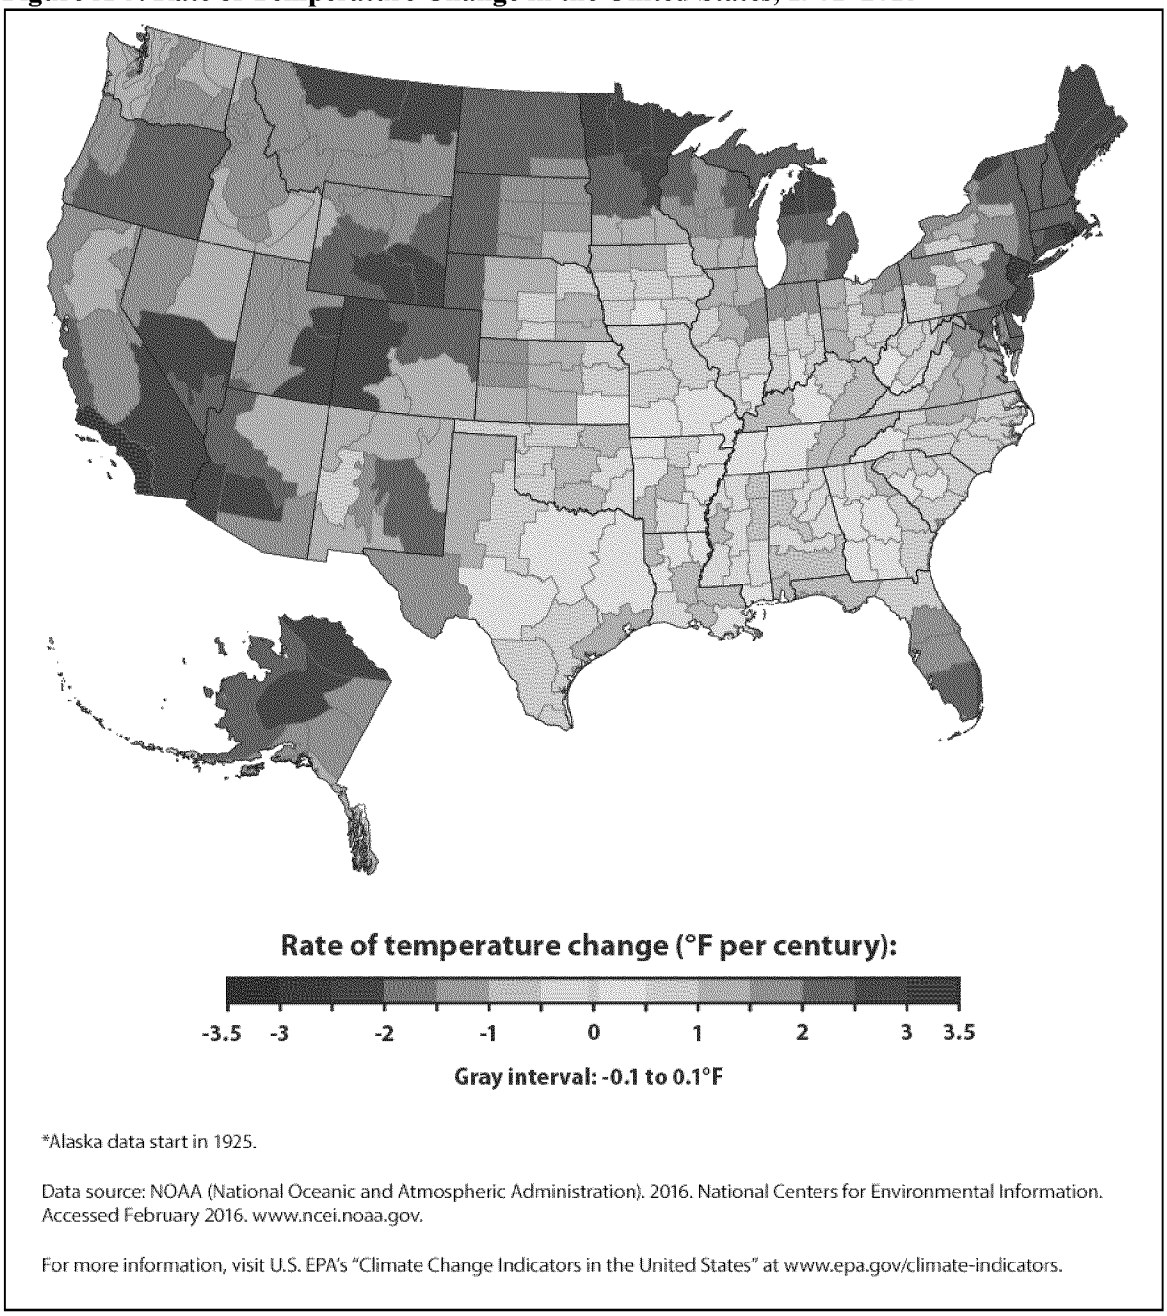


Source: Climate Science Supplement, NCA 2014

ED_016126_00000549-00065

Average temperatures have risen more rapidly since the 1970s (range: +0.26–0.43°F per decade; Figure A-2). The time period of 2005–2014 was the warmest decade since thermometer-based records began in the 1900s, and 2016 was the warmest year on record worldwide (EPA Climate Change Indicators, 2016; Blunden et al., 2017). Arctic regions have seen temperatures increase at twice the rate of temperatures elsewhere in the world (NCA, 2014).

Figure A-2. Average Change in Annual Temperatures Worldwide, 1901–2015



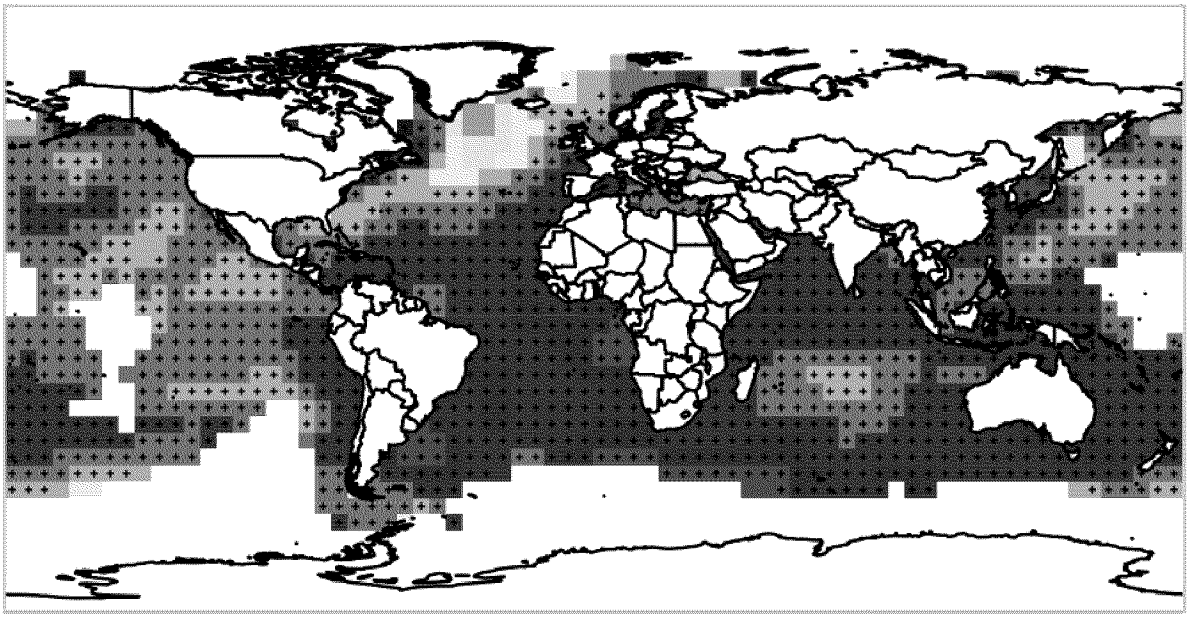
Source: EPA Climate Change Indicators, 2016

ED_016126_00000549-00066

United States Temperature Change

In the United States, temperatures have risen more quickly in the North, the West, and in Alaska than in the rest of the country (EPA Climate Change Indicators, 2016). The average temperature in the United States has increased by 1.2–1.8°F for the period 1986–2016 relative to 1901–1960, at an average rate of 0.14°F per decade, though most of this change has occurred since 1970 (USGCRP, 2017; Walsh et al., 2014; EPA Climate Change Indicators, 2016; Figure A-3).

Figure A-3. Rate of Temperature Change in the United States, 1901–2015



Source: EPA Climate Change Indicators, 2016

ED_016126_00000549-00067

Ocean Temperature Change

The average sea surface temperature has increased globally. Temperatures rose at an average rate of 0.13°F per decade, from 1901–2014 (EPA Climate Change Indicators, 2016; Figure A-4).

Figure A-4. Change in Sea Surface Temperature, 1901–2015

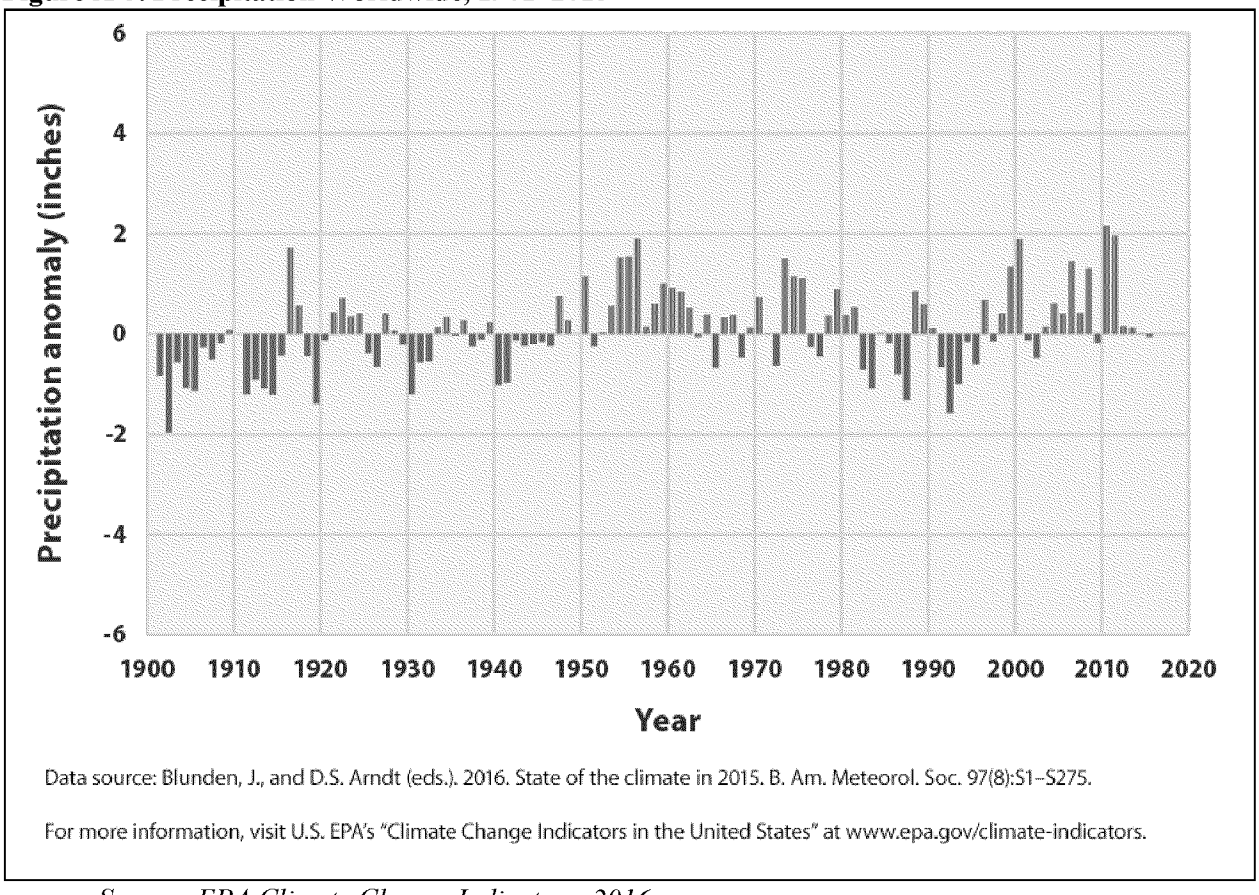
Source: EPA Climate Change Indicators, 2016



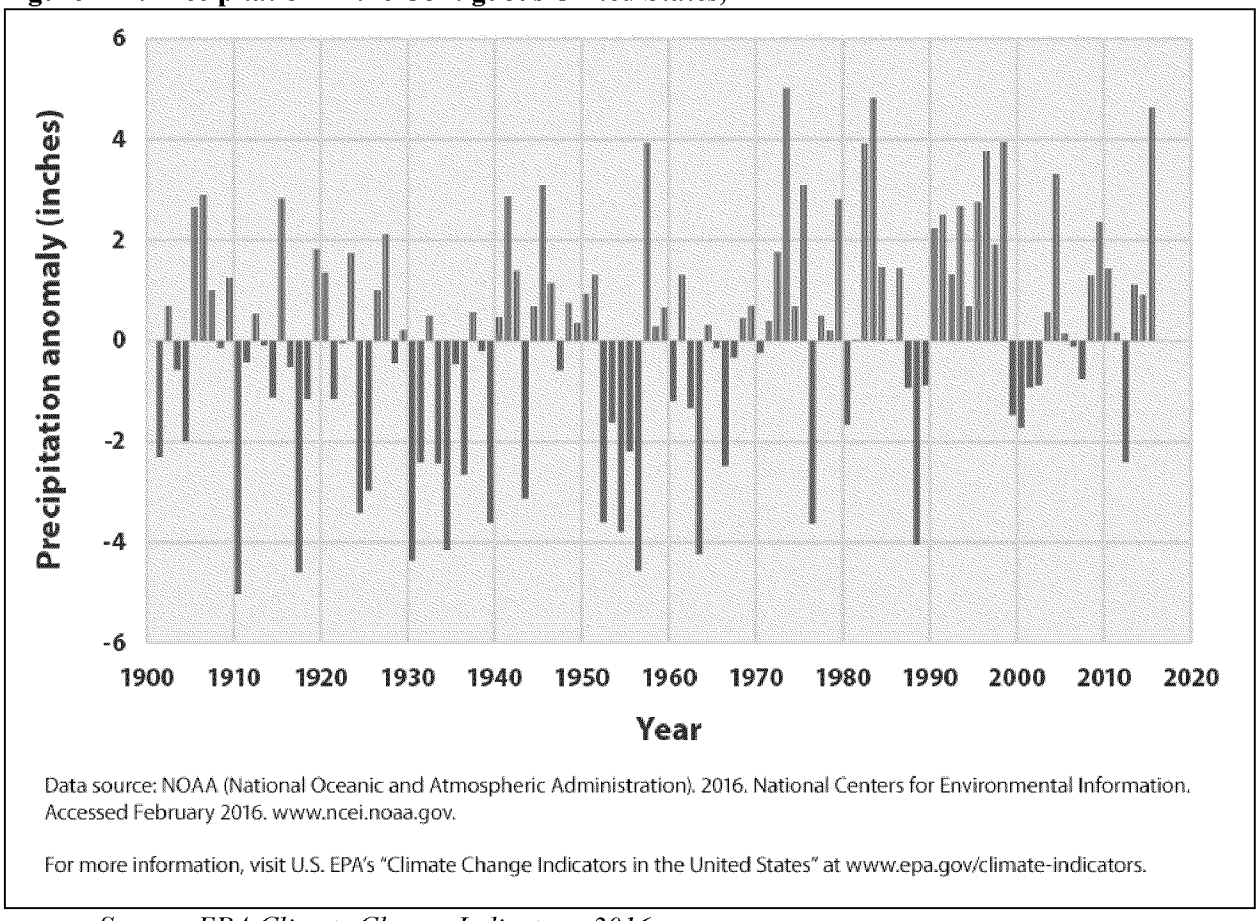
ED_016126_00000549-00068

6.1.2 Precipitation

Global Precipitation Change

Overall, precipitation has increased worldwide (Figure A-5). While there are regions experiencing drought, the average global precipitation has increased at a rate of 0.08 inches per decade (EPA Climate Change Indicators, 2016).

Figure A-5. Precipitation Worldwide, 1901–2015



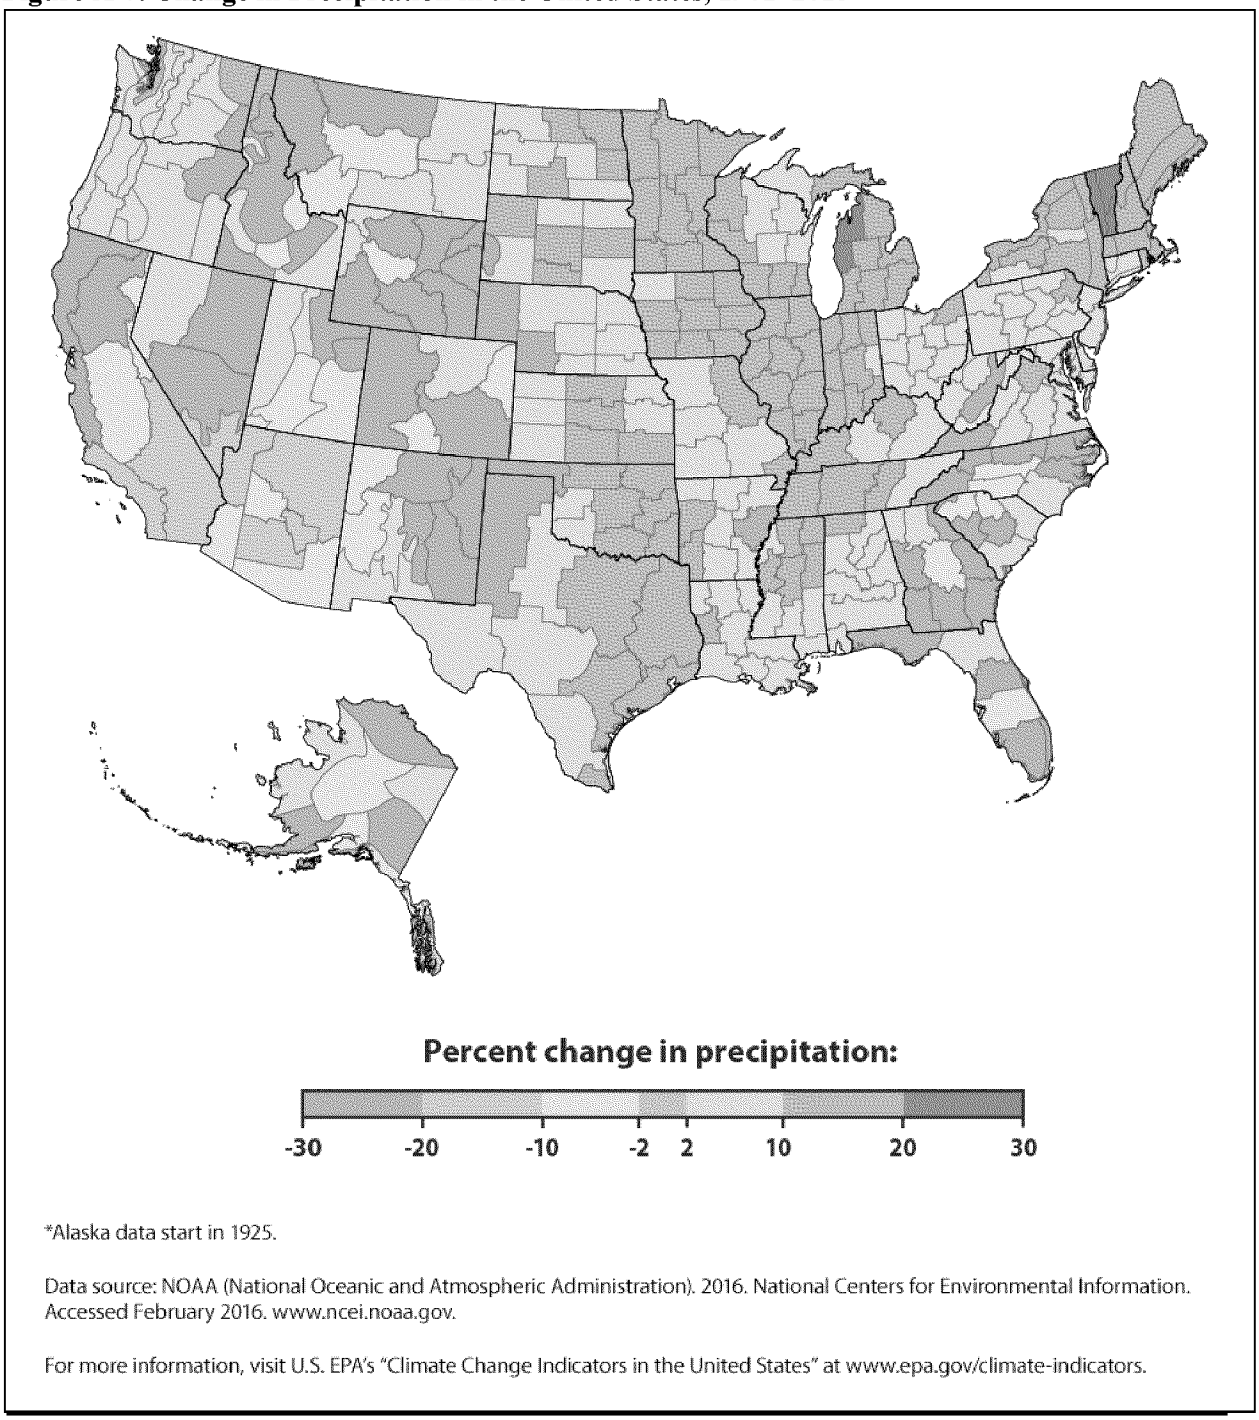
Source: EPA Climate Change Indicators, 2016

ED_016126_00000549-00069

United States Precipitation Change

Precipitation in the contiguous United States has increased at a rate of 0.17 inches per decade (EPA Climate Change Indicators, 2016; Figure A-6).

Figure A-6. Precipitation in the Contiguous United States, 1901–2015

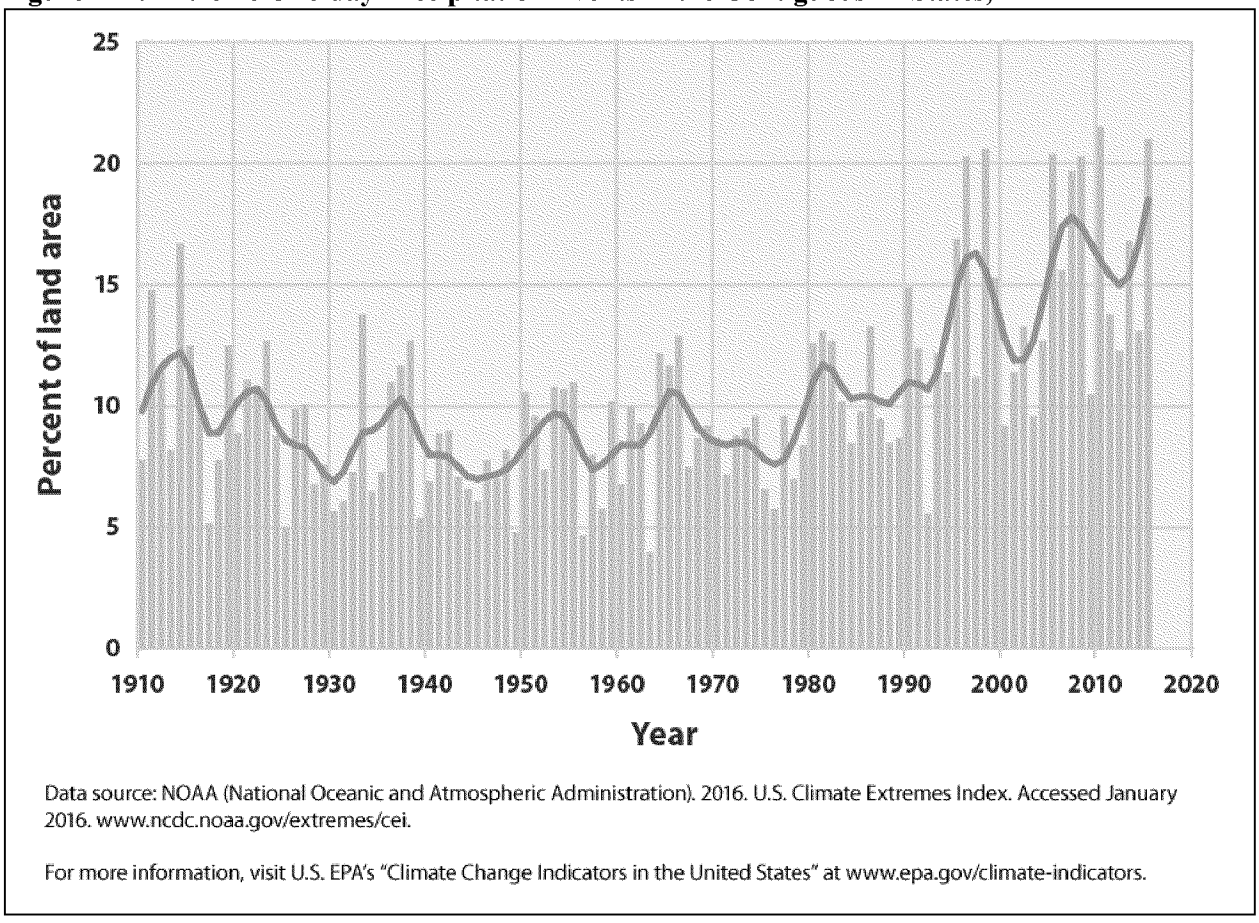


Source: EPA Climate Change Indicators, 2016

ED_016126_00000549-00070

While the United States has seen a general increase in precipitation, particularly in the Midwest and Northeast, areas such as the Southwest have experienced a decrease in precipitation (EPA Climate Change Indicators, 2016; Figure A-7).

Figure A-7. Change in Precipitation in the United States, 1901–2015



Source: EPA Climate Change Indicators, 2016

ED_016126_00000549-00071

Heavy Precipitation

Recently in the United States, a larger percentage of precipitation has come from intense single-day events (EPA Climate Change Indicators, 2016; Figure A-8).

Figure A-8. Extreme One-day Precipitation Events in the Contiguous 48 States, 1910–2015

Source: EPA Climate Change Indicators, 2016

6.1.3 Sea Ice

Sea ice forms at approximately 28.8°F and melts from exposure to sunlight, warm air, and ocean currents. Arctic sea ice has been declining since satellite measurements began in 1979. Typically, sea ice reaches its minimum in September in the Arctic (Stewart et al., 2013). Sea ice extent in the Arctic has decreased at an average rate of 3% per decade. Models predict seasonally nearly ice-free northern waters by the 2030s or 2040s (Doney et al., 2014; USGCRP, 2017).

6.1.4 Glaciers

Globally, the amount of ice contained in glaciers has been declining every year for more than 20 years. This lost mass partially contributes to the observed rise in sea level (Hartmann et al., 2013). Current climate change scenarios predict continued rapid glacier retreat and may possibly lead to deglaciation of many areas in the next several decades (UNEP, 2008).

6.1.5 Sea Levels

The Global Mean Sea Level (GSML) has risen by about 7–8 inches since the late 1800s (Walsh et al., 2014; USGCRP, 2017) and has been rising at a rate of 0.14 inches per year since the early 1990s (Walsh et al., 2014; Rhein et al., 2013). According to the Intergovernmental Panel on Climate Change (IPCC), the rate of sea level rise from 1993–2003 was significantly higher than the average rate in the preceding 80 years (Rein et al., 2013). Models predict that if warming continues unabated, oceans could rise 0.3–0.6 feet by 2030, 0.5–1.2 feet by 2050, and 1.0–4.3 feet by 2100 (USGCRP, 2017).

ED_016126_00000549-00073

7.0 APPENDIX 3: POTENTIAL HEALTH IMPACTS OF CLIMATE CHANGE, BY CLIMATE CHANGE FACTOR

Climate Change Factor	Health/Environmental Determinant	Potential Health Impact
Mental Health and Wellbeing		
Temperature/ Ecosystem changes	• Changes to subsistence resources, transportation infrastructure, etc. • Changing recreational opportunities (positive and negative) • Changes to economic opportunities	• Increased cases of stress disorders, anxiety, depression • Increased rates of "maladaptive" coping, e.g., increased substance/drug (including alcohol) use • Increased economic indicators, such as median household income
Weather pattern changes	• Infrastructure damage due to extreme weather events	• Increased cases of stress disorders, anxiety, depression • Increased rates of "maladaptive" coping, e.g., increased substance/drug (including alcohol) use
Permafrost changes	• Infrastructure damage	• Increased cases of stress disorders, anxiety, depression • Increased rates of "maladaptive" coping, e.g., increased substance/drug (including alcohol) use
Sea level changes	• Erosion • Infrastructure damage	• Increased cases of stress disorders, anxiety, depression • Increased rates of "maladaptive" coping, e.g., increased substance/drug (including alcohol) use
Accidents and Injuries		
Temperature/ Ecosystem changes	• Decreased exposure to cold • Increased high temperature days • Increased wildfires (may decrease in some locations)	• Decrease in fatalities from cold-related exposures • Increase in heat-related hospitalizations • Increased burn injuries or deaths
Weather pattern changes	• Increase in flooding events • Potential increase in rock slides and avalanches (due to extreme weather events)	• Increase in injuries or drownings • Increase in accidents/injuries from rock slides, avalanches, etc.
Sea ice changes	• Increased "break-through" on waterways • Decreased sea ice extent	• Increase in fatalities due to drowning • Increased animal bite/exposures (with changes to wild fox habitat range)
Permafrost changes	• Increased damage to transportation infrastructure	• Increased accidents/injuries

ED_016126_00000549-00074

Climate Change Factor	Health/Environmental Determinant	Potential Health Impact
Exposure to Potentially Hazardous Materials		
Temperature/ Ecosystem changes	• Increased ozone • Increased rates, range and season for allergens • Increased dust • Increase of PM_{10} • Increase of $PM_{2.5}$ • Increase of CO_2	• Increased rates of respiratory disease • Increased rates of cardiovascular disease
Sea ice changes	• Increased exposure to spills • Increase of PM_{10} • Increase of $PM_{2.5}$ • Increase of CO_2 • Increase of NOx • Increase of SOx • Increase of black carbon	• Increased morbidity/mortality from exposure to hazardous materials (air, water, and soil hazards; natural and man-made) • Increased rates of respiratory disease • Increased rates of cardiovascular disease
Permafrost changes	• Increased mobilization and exposure to ground contamination (e.g., legacy wells, contaminated sites, salt water intrusion) • Increased potential for infrastructure damage (e.g., pipeline damage) and exposure to related materials (e.g., diesel) • Increased contamination levels in subsistence resources • Decreased air quality • Decreased surface and ground water	• Increased morbidity/mortality from exposure to hazardous materials (air, water, and soil hazards; natural and man-made • Decreased consumption of local food sources • Decreased access to health facilities (due to damaged infrastructure • Decreased rates of adequate water and sewer services (due to damaged infrastructure)
Food, Nutrition, and Subsistence Activity		
Temperature/ Ecosystem changes	• Changes to food security (changes in availability of local food sources) o Crop yields o Animal migration patterns o Plant diseases o Food costs • Decreased food quality (increased presence of contaminants • Decreased food quantity (increased presence of contaminants) o Decreased food security (increased presence of contaminants)	• Changes to consumption of local food sources (could increase or decrease, depending on resource)

ED_016126_00000549-00075

Climate Change Factor	Health/Environmental Determinant	Potential Health Impact
Sea ice changes	• Changes to food security (changes in availability of local food sources)	• Decrease in consumption of local food sources • Decreased access to safe food resources
Permafrost changes	• Decreased food security (decreased ability to store food [ice cellars, drying fish, etc.], decreased access to resources)	• Decrease in consumption of local food sources • Decreased access to safe food resources
Infectious Diseases and Toxins from Microorganisms		
Temperature/ Ecosystem changes (esp. changes in vector ecology); weather pattern changes	• Increased zoonotic diseases/vectors (e.g., bats) • Increased vectorborne diseases/vectors (e.g., mosquitoes, ticks) • Increased foodborne diseases • Increased waterborne diseases (flooding, etc.) • Introduction of new diseases	• Increased rates of vectorborne diseases e.g., rabies, West Nile Virus, Lyme disease • Increased rates of foodborne diseases e.g., PSP, domoic acid, *Vibrio parahaemolyticus*, botulism • Increased rates of waterborne diseases e.g., cryptosporidiosis, giardiasis
Permafrost changes	• Increased breeding ground for mosquitoes • Decreased adequate water and sewer services in households (due to damaged infrastructure) • Exposure to grave sites	• Increased rates of vectorborne diseases, e.g., West Nile Virus • Increased rates of waterborne diseases, e.g., cryptosporidium, childhood gastrointestinal illnesses
Non-communicable and Chronic Diseases		
Temperature/ Ecosystem changes	• Changing access to and availability of subsistence resources (shift from subsistence food consumption) • Changing access to recreational activities (could increase or decrease, depending on the activity • Insect bites/stings (e.g., wasp, bee) • Increased fungi, molds, etc. • Increased production of pollen and other allergens • Changes to abundance and seasonality of allergens	• Decrease in consumption of local food sources • Increased rates of obesity • Increased rates of diabetes • Change in leisure time physical activity (could increase or decrease) • Increased allergic sensitizations • Increased asthma episodes • Increased rates of respiratory disease
Permafrost changes	• Decreased food security (decreased ability to store food [ice cellars, drying fish, etc.], decreased access to resources)	• Change in consumption of local food sources (could increase or decrease, depending on resource) • Increased rates of obesity • Increased rates of diabetes

ED_016126_00000549-00076

Climate Change Factor	Health/Environmental Determinant	Potential Health Impact
	• Changing access to and availability of subsistence resources • Changing access to recreational activities (could increase or decrease, depending on the activity	• Change in leisure time physical activity (could increase or decrease)
Water and Sanitation		
Temperature/ Ecosystem changes	• Decreased water availability and quality (due to salinization of aquifers) • Increased algal blooms	• Decreased availability and quality of drinking water • Decreased surface water quality • Increased rates of PSP, *Vibrio parahaemolyticus*, domoic acid, etc.
Weather pattern changes	• Overwhelmed sewage systems • Damaged water and sanitation services • Decreased percentage of households with water and sewer service	• Increased rates of waterborne diseases (e.g., cryptosporidiosis, childhood gastrointestinal illnesses)
Permafrost changes	• Damaged water and sanitation services • Decreased percentage of households with water and sewer service	• Increased rates of waterborne diseases e.g., cryptosporidiosis, childhood gastrointestinal illnesses
Sea level changes	• Contamination of groundwater and/or surface water	• Increased rates of waterborne diseases (e.g., cryptosporidiosis, childhood gastrointestinal illnesses)
Health Services Infrastructure and Capacity		
Temperature/ Ecosystem changes	• Increased strain on health care infrastructure	• Decreased access to comprehensive care
Weather pattern changes	• Damage to health care infrastructure (due to extreme weather events) • Damage to transportation infrastructure • Damage to specific health clinics (due to extreme weather events)	• Decreased access to comprehensive care • Decreased number of health clinics • Decreased capacity of emergency services
Permafrost changes	• Damage to health care infrastructure • Damage to transportation infrastructure (esp. ice roads) • Damage to health clinics	• Decreased access to comprehensive care • Decreased number of health clinics • Decreased capacity of emergency services

Project Summary Page

Project Title: Health-Climate Planning that Strengthens Alaska's Rural Communities

Project Location: Alaska statewide

Applicant Information: Alaska Municipal League
* One Sealaska Plaza, Suite 302, Juneau, Alaska 99801 * nils@akml.org * Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization: The Alaska Municipal League (AML) is a nonprofit that provides services to Alaska's local governments, focused on community and economic development, good governance, and strengthened resilience. AML is supporting federal relief implementation and compliance and provides technical assistance to communities seeking infrastructure investments. Services range from collection of sales tax to providing bookkeeping services, and AML hosts three conferences annually during which we share information and best practices. AML's mission is to strengthen local governments; our membership includes all cities and boroughs in the state, even as our relationships extend to tribal governments.

Small CBO Set Aside Track: No

Project Abstract: The project will utilize health impact assessments (HIAs) to evaluate the impact of climate change and natural disasters on disadvantaged communities in rural areas of Alaska, resulting in climate action and resilience plans for 25 communities. HIAs will be employed to develop the basis for future climate action and disaster resilience plans. AML will work with partners to develop a model for rapid implementation that is consistent with the limited capacity of these communities. This project will increase the competency of disadvantaged communities to participate in state and federal opportunities, including for federal infrastructure investments that require this level of planning and assessment. The project will include all coastal communities as part of its outreach and engagement, with 25 disadvantaged communities directly benefiting and dozens of others receiving best practices and training. Project activities include community engagement through a city's public processes, development of assessment and planning tools by the project team, assessment of health impacts of climate change, evaluation by the project team, development of climate action plan, and identification of potential state and federal investments. The objectives of the project are to produce a health impact assessment and climate action and resilience plan for each participating community, with outcomes that include increased public health and access to federal funding that improves living conditions.

Project Type: Facilitating engagement of disadvantaged communities in State and Federal public processes.

Special Considerations: Climate Change/Disaster Resiliency, Rural Areas, Health Impact Assessments

Environmental Issue: Climate and disaster resiliency and adaptation.

Project Partners: Partners include the Alaska Federation of Natives (Tribal government/ nonprofit), University of Alaska (academic) and the State of Alaska Department of Health and Department of Environmental Conservation (state government).

Development of QAPP: Yes.

ED_016126_00000550-00002

1.0 Program Objectives

b. Environmental and Public Health information of the Underserved Community

Description of underserved communities, and EJ impact

The project will serve those communities considered rural, where the majority population is often Indigenous, and residents adversely affected by persistent poverty, as defined in Executive Order 13985. Alaska coastal communities, in particular, are directly impacted by disproportionate environmental and public health harm and risks, as they experience the effects of climate change in a different way than land-locked communities. Residents are vulnerable to environmental risks including sea level rise, coastal erosion, tidal inundation, and flooding. Public health harm includes inequitable access to clean water and wastewater systems, solid waste management, and healthcare systems. These challenges impact multiple social determinants of health, especially the well-being of residents threatened due to loss of livelihoods and inadequate infrastructure.

Table 1 reflects the census tracts that include underserved communities considered coastal shoreline, and which will be prioritized as part of this project. All are coastal shoreline, and all are considered rural by their USDA RUCA score. Included here is data related to population and population density, whether they are Qualified Opportunity Zones under IRS tax code, are considered Areas of Persistent Poverty by USDOT, are Disadvantaged according to the Justice 40 initiative, or would qualify for the Low-Income Housing Tax Credit as Qualified Census Tracts as defined by HUD. The table on page 3 is abbreviated to reflect highest priority; the full table of coastal communities by census tract is included in the Appendix.

Included in the Supplemental Materials are the cities that would be included based on these census tracts. All coastal cities will be included in the project so that those with greater capacity and expertise can share lessons learned and contribute to the overall collaboration. The project will focus on 25 cities identified as underserved, resulting in climate action and resilience plans.

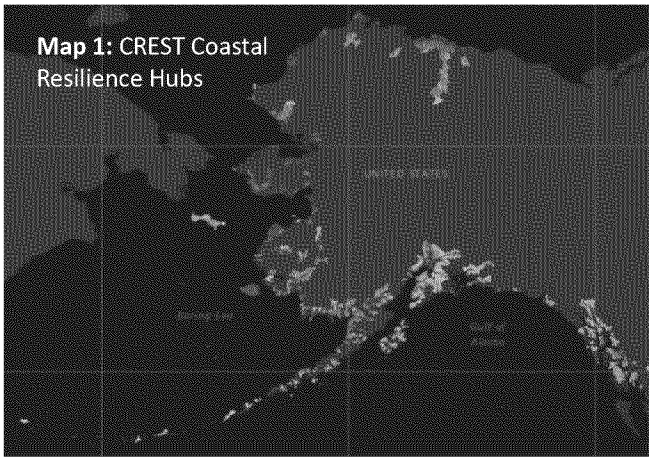
Environmental/public health issue(s) that the project seeks to address

Alaska's local governments experience firsthand the impacts of climate change and extreme weather events, even as residents depend on a healthy ecosystem for subsistence, cultural, and economic activities. Municipal officials are also concerned about and responsible for community resilience, though resource constraints limit the efficacy of their efforts. This project will strengthen their capacity for ecosystem and community resilience by providing additional resources that they might leverage and connecting municipal officials to others experiencing and experienced with resilience planning and impacts.

Recent and historic storms have highlighted the challenge of community resilience. News articles in the aftermath note both the long-time issues and the urgent needs of communities battered by Typhoon Merbok and facing a cold, hard winter.

- Typhoon Merbok spotlights Alaska's need for science and climate-resilient infrastructure
- Even before Merbok, Native Villages were in harm's way
- In recovery after storm, Alaska faces hard days ahead
- Residents in an Alaska village try to outrun the effects of climate change

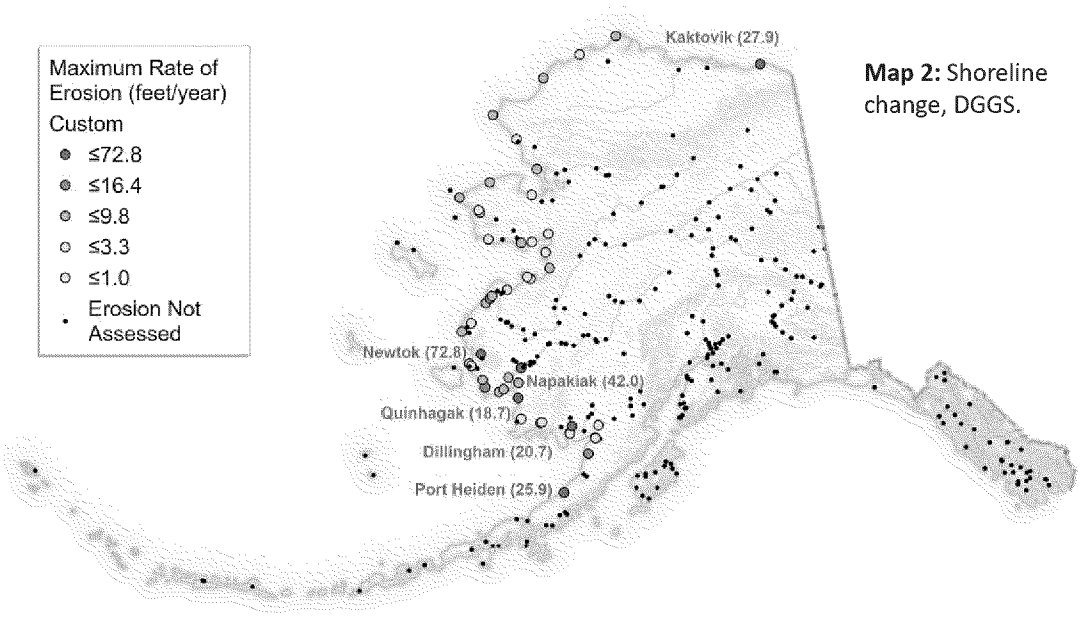
These articles reference the rural and underserved communities impacted by climate-related natural disasters such as this storm, and the related municipal infrastructure, including the role of schools as safe meeting locations, need to protect water and sewer infrastructure, as well as bulk fuel storage and power systems.



ED_016126_00000550-00003

Table 1: Evaluation of Disadvantage Status by Census Area.

City/Borough	Population 2020	Density per square mile	QOZ	APP	Disadvantaged (Justice40)	QCT (LIHTC)
Priority 1: North and Western (a portion included in Rural Partners Network)						
Bethel Census Area	10209	0.48	No	Yes	Yes	Yes
Dillingham Census Area	2660	0.14	No	Yes	Yes	Yes
Kusilvak Census Area	8368	0.49	No	Yes	No	Yes
Nome Census Area	5840	0.26	Yes	Yes	Yes	Yes
North Slope Borough	4452	45.52	No	No	Yes	No
North Slope Borough	2503	0.03	Yes	No	Yes	No
Northwest Arctic Borough	4446	0.13	Yes	Yes	Yes	Yes
Priority 2: Southwest & Central						
Aleutians East Borough	3425	0.49	Yes	No	No	No
Aleutians West Census Area	969	0.29	Yes	No	No	No
Kenai Peninsula Borough	483	0.06	Yes	Yes	Yes	Yes
Kodiak Island Borough	1864	0.29	No	No	Yes	No
Lake and Peninsula Borough	1375	0.06	No	No	Yes	No
Priority 3: Southeast (included in Rural Partners Network)						
Haines Borough	2518	1.09	Yes	No	No	No
Hoonah-Angoon Census Area	47	33.57	No	No	Yes	No
Hoonah-Angoon Census Area	2085	0.28	Yes	No	No	No
Prince of Wales – Hyder Census Area	2284	0.66	Yes	No	Yes	No
Prince of Wales – Hyder Census Area	1635	12.31	Yes	No	No	No
Wrangell	2484	0.98	Yes	No	No	No



AML received a number of calls from impacted communities, as they sought answers and help. Our direct contact with municipal officials helped the State's emergency response team with firsthand knowledge of needs and priorities. AML hosted calls with local government officials in the aftermath and connected them to emergency response professionals with a local government background. It is increasingly common for AML to provide direct support to communities looking for answers.

At the same time, AML has been supportive of the Alaska Municipal Climate Network (AMCN) that is facilitated by the University of Alaska, and working toward assessment of which few communities have climate action plans. While nascent activities, AML is placing a priority on this effort as threats to community resilience increase. Climate resilience includes protect-in-place and community-driven relocation efforts, which have been exacerbated by recent storms.

Map 1: CREST Coastal Resilience Hubs

ED_016126_00000550-00004

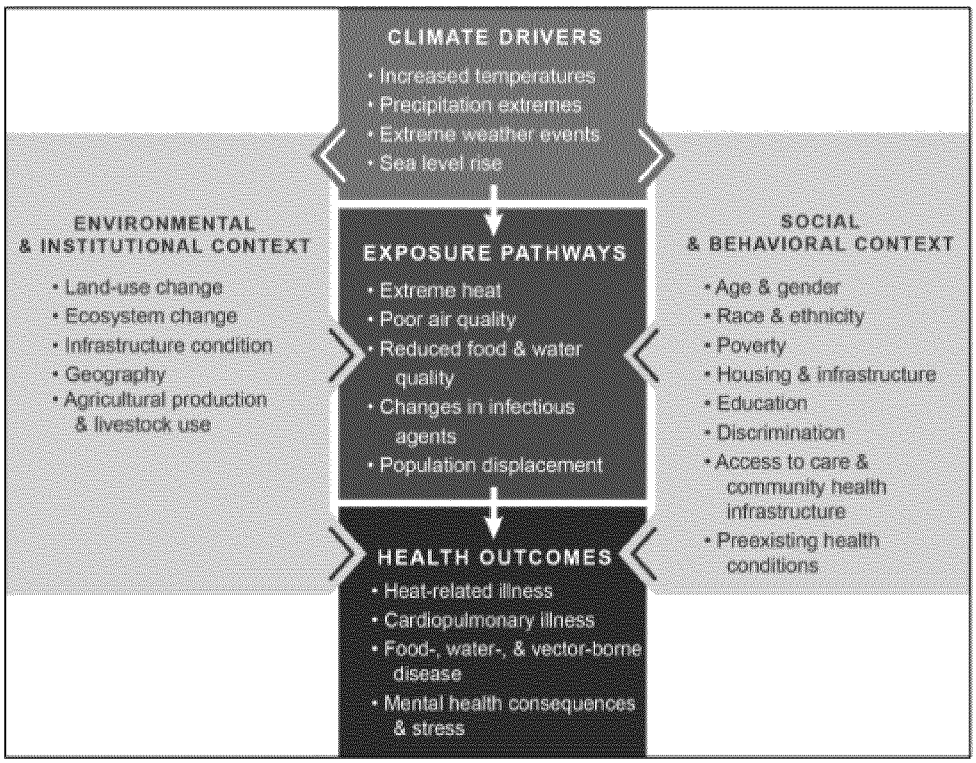
Map 2: Shoreline change, DGGS.

Asset management is increasingly used by utilities to comprehensively guide their risk and infrastructure management activities. However, these programs may be lacking in risk considerations surrounding identification of critical customers, environmental justice, equity concerns, and full consideration of differing consequences of failures to different sectors of society. Disadvantaged neighborhoods are often more at risk of impacts from water system disruptions and emergency events. Similarly, when service is disrupted, they may be out of service for longer time periods than the wider system, and their limited resources may result in greater impacts from outages than those experienced by other communities. This disparity affects access to reliable water infrastructure, the impacts of which lead to other social, health, and economic pitfalls that already under-resourced communities can never truly recover from— even after water services are restored. Asset management programs need enhancements in these practice areas to address equity and environmental justice concerns in managing utility assets.

Environmental/public health results of project and community benefits

Project activities will strengthen the resilience of underserved communities and the ecosystems they depend on by providing new and additional tools, resources, and expertise to local government officials. Community leaders often feel unable to effectively address climate challenges or resilience efforts, lacking the resources and the authority to directly mitigate the worst or plan for the best. By providing a platform for engagement and learning, identifying communities' capacity needs, working toward growing available resources, and assisting with planning efforts, this project will strengthen local governments and their ability to foster resilience of ecosystems that their communities depend on.

Coastal communities depend heavily on the marine environment and require a healthy marine ecosystem as well as coastal habitats. While fish species are of particular importance, it is worth noting the significance of marine mammals, birds, and other species that rely on coastal habitats to thrive. Residents depend on these for food security, economy and jobs, and as cultural assets for indigenous peoples. The underserved communities participating in the project will have the opportunity to identify and prioritize habitats and species of particular importance to residents and their quality of life and include in resilience planning ways in which these can be sustained.



ED_016126_00000550-00005

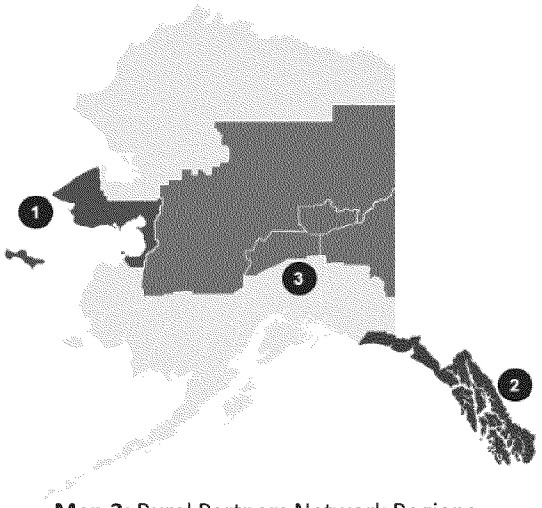
Climate Action and Resilience Plans will reflect the Social Determinants of Health (SDH) and environmental justice within coastal communities. The National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP) notes that breaking down barriers to health equity by addressing SDH remains a top priority, as they are strongly tied to chronic disease conditions and communities that are most affected (reference). AML's Cities of Opportunity program, a cohort approach to addressing SDH, is structured around building blocks that reflect a community's living conditions that are determined by the relative health of all four of these environments:

- Physical environment – land use, transportation, housing, pollution, recreation
- Social environment – urban/rural, safety, equity, diversity, media, civic engagement
- Economic and work environment – employment, income, retail businesses
- Service environment – education, health care, social services, childcare

The State of Alaska Department of Health (DoH) produced an assessment in 2018 of the potential health impacts of climate change in Alaska (reference). This assessment notes that there are several different pathways by which climate change can affect health, including direct impacts such as injuries caused by fires or storm surges, and indirect impacts such as changes in quantity and quality of subsistence foods. It includes a list of public health impacts to plan for and develop strategies in response to:

- Mental health and well-being
- Accidents and injuries
- Exposure to potentially hazardous materials
- Food, nutrition, and subsistence activity
- Infectious disease and toxins from microorganisms
- Chronic and non-communicable diseases
- Water and sanitation
- Health services infrastructure and capacity

Intersection Between Resilience and Health Impact Assessments.



ED_016126_00000550-00006

Addressing SDH is integral to any strategy to achieving health equity. Moreover, inequities in these social and environmental conditions are dictated by local policy and practice decisions, and accordingly could benefit immensely from HIA.

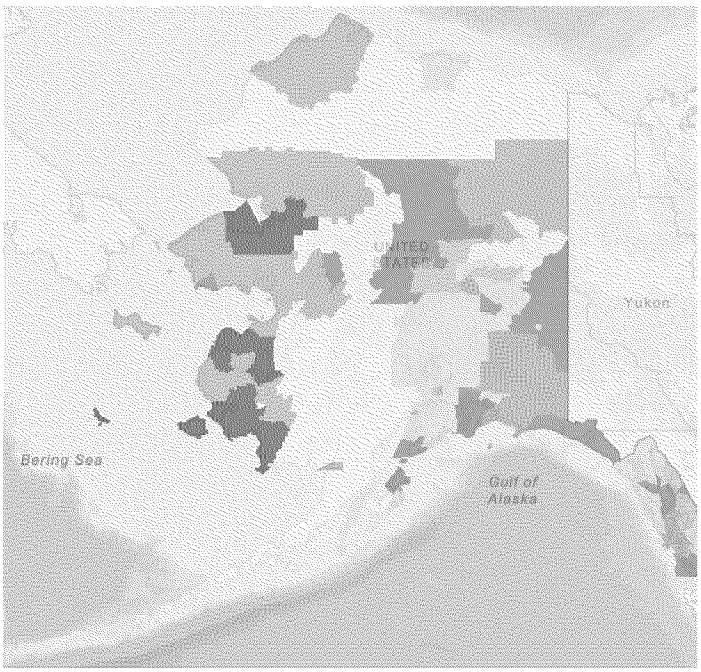
Relation to Health Impact Assessment, Rural Areas, Climate, or Disaster Resiliency

All of the project communities will be rural, including two of the regions (1 and 2 in Map 3) in Alaska that are included in the USDA Rural Partners Network.

The project will utilize a version of the rapid appraisal Health Impact Assessment (HIA) as a tool (Dept. of Health Toolkit) to evaluate the adequacy of current hazard mitigation plans or other community planning documents (i.e., comprehensive plans, climate adaptation plans) and utilize the outcomes to develop a model climate and resilience plan with participating communities. This will be framed around SDH and in relation to climate and resilience planning.

Map 3: Rural Partners Network Regions

HIA is not used regularly at local levels to assess potential health impacts of policy decisions as part of standard practice. Rather, it is used mostly on a voluntary basis by only a few local agencies, usually in collaboration with the State. For example, based on a 2016 review of publicly available data tracking all HIAs conducted in the US, just 53 city/county health agencies had served as the lead/authoring partner for an HIA since 1999, with 90 total HIAs completed among them (reference). A core feature of HIA is that it can be used to assess any type of policy, program, project, or plan, including zoning, land use, community development, and housing—all elements, for example, that shape distributions and patterns of place-based SDH exposures, experiences, and opportunities. This process at the community level will be extremely important to improve community resilience in the face of climate change.



The EJScreen images (see page 8) produced to determine high percentiles of people of color, as a measure of equity, compares Alaska's 66,000 miles of coastline with that of the West Coast's 1,293 miles, demonstrating just how much of Alaska's geographic area falls within this consideration relative to elsewhere in the nation.

c. Organization's Historical Connection to Underserved Community

The history of AML's involvement with underserved communities

AML is a membership-based service provider, with a 70-year history of delivering resources to Alaska's local governments. That history includes helping to write some of Alaska's most critical statutes related to local government, collaborating with state agencies to share information and support communities, and hosting annual events that deliver the latest resources to community leaders. That history relies on strong governance, with an active board of directors committed to strengthening local governments, representation from across the state, including robust rural participation from this project area, and continuity across time. Staff are experienced communicators and regularly deliver small and large-scale projects on behalf of members. Members of AML benefit from shared services and technical assistance that the organization is increasingly able to offer, and in response to federal priorities and opportunities.

ED_016126_00000550-00007

EJScreen maps of West Coast and Alaska Coast.

AML's history of working with communities to address environmental and public health issues

AML has worked to engage and support coastal communities through a caucus structure over the last three years. At the same time, in partnership with the Alaska DoH, we have hosted monthly webinars focused on public health concerns of communities. While these emerged as useful during the State's response to COVID, which was accomplished by working closely with local governments, they have continued as part of a collaborative effort to understand and work to address public health concerns. This program has included presentations about HIAs.

AML's annual conference, attended by the majority of AML members, is the most common convening of communities that we host. Within these annual events, we share best practices and trainings on topics that include (based on 2022 program): strategic planning, electric grid resilience, managing through community growth, comprehensive economic development strategy, digital equity, housing task force, affordable housing, transportation funding opportunities, municipal and tribal collaboration, land use policy, regional infrastructure planning, and the coastal caucus. Our winter conference included a presentation on human health criteria and wetlands permitting.

AML's Cities of Opportunity program works with 10 local government emerging leaders in a cohort model that focuses on SDH. Half of the participants are from coastal communities, with one specifically working on a HIA, while the others are involved in community and economic development planning.

More recently, AML has worked with communities to implement federal COVID relief funding successfully, and to apply for federal investment opportunities under the BIL. Communities have been able to use information from AML outreach and communications to better respond to equity and disadvantage in their communities. This preparation has resulted in greater ability to

ED_016126_00000550-00008

be successful in federal grant applications. Seven communities were successful in applying for USDOT's Safe Streets program, which will result in equitable approaches to safety planning in rural communities. AML's support meant that more communities applied for community wildfire planning and hazard mitigation planning funding from state agencies.

By providing local governments direct access to public health officials, Alaska managed to have relatively lower death rates (per 100,000) of COVID than other states.

Community Driven Participation

Cities that participate in this project will be able to work together on common interests, to address challenges specific to coastal communities, and to share in the development of solutions that respond to their needs and leverage their capabilities. In fact, in 2021, dozens of coastal communities came together and produced the following list of actions they could work together toward. This project will build on that effort and coalesce the interest into a platform for continued dialogue and capacity-building.

Coastal caucus priorities included the following resilience-related topics:

- Future of the Alaska Marine Highway System, which 34 coastal communities depend on
- Value and sustainability of fisheries, including bycatch review
- Port system development and infrastructure needs and prioritization
- Ocean research
- Social vulnerability, including housing shortages and onshore economic activity
- Water and wastewater system improvements
- Waste disposal, landfill management, and recycling
- Oil spill disaster response and planning
- Storm and tsunami warning and response

Clearly, while those participating in initial meetings were focused on marine transportation and ports and harbor infrastructure, the expansion and formalization of this group of coastal communities will result in greater diversity of topics and the ability to prioritize based on project goals. Municipal officials in these communities will have an active role in shaping future discourse and the ways in which the project will be implemented.

d. EJCPS Model

This project will focus on EJCPS Element 2 – Community Capacity-Building and Leadership Development. Coastal community leaders have already identified a vision and goals for community resilience, often expressed in their hazard mitigation plan or climate action plans, or other municipal planning documents. Building off the efforts already undertaken for CPS Model Element 1, this project will strengthen the ability for municipal leaders to accomplish their goals by providing additional capacity-building tools and leadership development.

By utilizing a HIA, community leaders will have access to an increased amount of information and understanding of the issue, including potential solutions. Technical assistance will be provided to support community efforts to develop strategies to address next steps in the CPS model, including consensus building, partnership development, and stakeholder engagement.

e. Project Linkages to EPA Strategic Plan

AML has long understood the challenges faced by Alaska's rural and disadvantaged communities, and argued for the need to focus resources more intensely in support thereof. EPA's commitment to taking decisive action to advance environmental justice and civil rights fits well within the scope and scale of need in Alaska, to address the inequities of and strengthen underserved and

ED_016126_00000550-00009

threatened communities in Alaska. EPA specifically calls out non-contiguous states in its strategic plan, a reference that speaks to the need to bring parity to our nation's communities by working to "achieve measurable environmental, public health, and quality of life improvements in the most overburdened, vulnerable, and underserved communities." The impact of climate change on Alaska's coastal communities, the majority of whose residents are Indigenous, is a real threat to resilience, which speaks to Executive Order 14008, as well.

This project leverages the responsibilities of local governments and the potential leadership they can bring to advancing environmental justice, even as it recognizes the limited capacity they have to do so in most instances. By strengthening local governments – providing them tools and technical assistance – and enhancing their ability to cooperate with federal, state, and Tribal partners, the project can increase the benefits to overburdened and underserved communities in Alaska.

AML is in a unique position to facilitate the connection between local governments representing rural coastal communities and government programs, and to work with government programs to listen and respond to community voices. This aligns well with EPA's strategies for implementing Objective 2.1. At the same time, the project's scope includes a review of equity and environmental justice as it relates to land management, transportation and housing, and publicly owned facilities.

f. Partner and Collaborate

Description of how the project will accomplish its goals through partnerships

AML is pleased to collaborate with the State of Alaska Department of Health (DoH) and Department of Environmental Conservation (DEC), as well as with the University of Alaska Anchorage (UAA). These partners will support the development of Health Impact Assessment (HIAs) in partner communities by helping identify available data sources and information related to the intersection of public health and climate change impacting communities in Alaska. UAA will support the development of adaptation activities in the community Climate Action and Resilience Plans (CARPs). This project team will collaborate to develop a model or template CARP for use by the project and through coordination with DoH to use the Health Impact Assessments (HIAs) from each partner community to facilitate conversations around developing and prioritizing locally- and culturally relevant resilience strategies. AML will work with UAA to develop a database of potential adaptation strategies to address vulnerabilities identified in the HIAs and will co-develop criteria for prioritizing these strategies with community partners. AML, DEC, and UAA will recommend strategies for monitoring and evaluation of implementation of final adaptation strategies and will review final plans for technical accuracy. The partners will rely on project staff from AML for project management, coordination of community meetings, and management, design, and sharing final community deliverables such as the HIAs and community CARPs. AML is also responsible for stakeholder engagement, working through its membership and existing relationships to maximize the impact and outreach.

Identification and description of all partners involved

Alaska Department of Health

- Role: Technical assistance to identify public health issues and to help manage the HIA process to be conducted in communities.
- Stakeholder Group: State government
- Resources brought: DoH has an HIA toolkit that will be made available and adapted by the project team. DoH will contribute in-kind staff time as part of this project.
- Vested interest of partner: DoH is committed to advancing public health as part of its mission, and supporting those implementing community-level action through HIAs by providing subject matter expertise.

ED_016126_00000550-00010

- How AML will maintain and sustain relationship: AML has a current memorandum of understanding with the Department, which will continue into coming years as a way to strengthen collaboration between State and local health officials.
- Compliance with 2 CFR 200 if subaward: Not applicable.

Alaska Department of Environmental Conservation
- Role: Technical assistance related to environmental justice and to engage on GHG inventory and climate action planning work conducted under EPA's Climate Pollution Prevention Program.
- Stakeholder Group: State government
- Resources brought: Data and expertise related to greenhouse gas emission and air pollution challenges, EPA climate action plan funding, and access to a range of experts in meeting environmental justice and public health goals.
- Vested interest of partner: Deliver climate action plan on behalf of State.
- How AML will maintain and sustain relationship: AML and DEC are working toward a contract to support climate action planning in Alaska, and this collaboration is anticipated to occur over the next four years at least.
- Compliance with 2 CFR 200 if subaward: Not applicable.

University of Alaska Anchorage – Institute for Circumpolar Health Studies (ICHS)
- Role: Technical assistance related to HIAs and climate action and resilience planning (adaptation activities, monitoring, and evaluation).
- Stakeholder Group: Academia
- Resources brought: UAA offices are equipped with networking, video, and teleconferencing capabilities and staff have access to licenses that include an extensive range of software such as, SPSS, Stata, SAS, Adobe Creative Suite, Nvivo, Qualtrics, ArcGIS, and REDCap. ICHS maintains locked filing cabinets in secure offices for sensitive data, and electronic files are housed on a server that meets Health Insurance Portability and Accountability Act (HIPAA) requirements. The UAA IRB works collaboratively with the Alaska Area IRB, which reviews research with Alaska Native people in the Alaska Tribal Health System.
- Vested Interest: ICHS has a mission to improve the health of the people of Alaska and the Circumpolar North through instruction, information services, and basic and applied research in health and medicine.
- How AML will maintain and sustain relationship: The University of Alaska is a member of the Alaska Infrastructure Coordinating Committee, of which AML is the host. Together UA and AML collaborate to maximize the benefits to Alaska from federal infrastructure investment.
- Compliance with 2 CFR 200 if subaward: Yes

Alaska Federation of Natives (AFN)
- Role: To encourage Tribal engagement in LRPCs, including EPA Indian Environmental General Assistance Program (GAP) coordinators.
- Stakeholder Group: Nonprofit and Tribal organization.
- Resources brought: AFN membership is comprised of Tribal governments, and Alaska Native regional and village corporations. AFN has 12 regional navigators that assist with community engagement and project identification for infrastructure funding.
- Vested Interest: AFN is committed to advancing environmental justice and equity in Alaska Native communities.
- How AML will maintain and sustain relationship: AFN is a member of the Alaska Infrastructure Coordinating Committee, which AML is the host of. Together AFN and AML have State funding to provide technical assistance to local and Tribal governments.
- Compliance with 2 CFR 200 if subaward: Not applicable.

ED_016126_00000550-00011

2.0 Project Activities / Milestone Schedule / Detailed Budget

a. Project Activities

Project activities will rely on the establishment of a community stakeholder advisory body, which will be called the Alaska Municipal Coastal Resilience Council (AMCRC). Stakeholder engagement is critical to project success and the AMCRC will invite representatives from each coastal community to participate in project coordination and activities, and ultimately shape the outcomes. The AMCRC will meet quarterly virtually and in-person at the AML annual conference, with sessions featuring progress and planning updates and discussion, as well as content delivery related to climate and disaster planning, resilience strategies, social determinants of health, and environmental justice.

While the AMCRC features broad inclusion of local government officials, the project team will work through this body to identify resilience leads in 25 communities, who will commit to forming and sustaining a Local Resilience Planning Committee (LRPC). These committees will be part of a project cohort, then, and provided with additional resources related to resilience planning. Travel scholarships will be available for team leads to attend in-person activities during the AML annual conference and other types of training activities as available.

AML will work with the Alaska DoH to adapt the 2015 HIA toolkit for community use, leveraging the rapid appraisal approach. AML staff will work with DoH to identify existing data and relevant SDH information to be included in draft HIAs for each community, thereby populating these as much as possible up front. AML and DoH staff will conduct stakeholder engagement interviews with and through the LRPCs to complete the HIA process. Drafts will be shared with the LRPC and feedback from the community incorporated into the final versions for each of the 25 communities.

AML will work with UA partners to review examples of CARPs that demonstrate best practices nationally, and consistent with EPA strategic goals. The project team will develop a model plan for participating communities, a streamlined approach that will ensure efficacy of implementation. The project team will bring in the results from each community's HIA, and coordinate with the State agencies developing greenhouse gas emission inventories and a statewide climate action plan to incorporate and cross-reference data collected on that front, which the HIA will complement. The LRPCs will host community meetings to discuss climate action and resilience priorities and strategies, the output of which will be included in the plans that will be released to the LRPC and community for review and feedback. The project team will finalize all climate action and resilience plans, deliver to the governing body of each community, and support local ordinance or resolution of adoption.

Throughout the project there will be education and outreach to coastal communities, with lessons learned shared to all local governments in Alaska. HIAs and CARPs will be shared with State and Federal agencies and engagement opportunities provided for further learning. Participating communities will benefit from grant identification and support, also, to implement plans.

b. Milestone Schedule - see next page

ED_016126_00000550-00012

	Task / Sub-Task / Milestone	23 Q2	24 Q3	24 Q4	24 Q1	24 Q2	25 Q3	25 Q4	25 Q1	25 Q2	26 Q3	26 Q4	26 Q1	26 Q2
1	**Establish Municipal Stakeholder Advisory Committee**													
1.1	Invite participation of coastal communities													
1.2	Develop governance and project coordination for planning activities													
1.3	Identify capacity building activities for participating communities													
1.4	Schedule webinars, calls, and training related to climate, resilience, and EJ (broad)													
M1	**Stakeholder advisory committee completes organization**													
2	**Engage Local Resilience Planning Committees**													
2.1	Select cohort of 25 communities to host local resilience planning committees													
2.2	Identify resilience leads in each participating community													
2.3	Develop agreements to participate in HIA and climate resilience planning.													
2.4	Deliver technical assistance to committees (SDH, climate, HIA)													
2.5	Facilitate resilience planning activities (specific to community)													
M2	**LRPCs complete participation agreements**													
3	**Health Impact Assessments conducted**													
3.1	DoH rapid appraisal HIA adapted for community use													
3.2	Existing data review and analysis with DoH													
3.3	HIA interviews conducted with stakeholder engagement													
3.4	Draft HIAs finalized by project staff and reviewed by LRPCs													
3.5	Feedback incorporated and final drafts shared with communities													
M3	**HIAs completed in 25 communities**													
4	**Community Climate Action and Resilience Plans**													
4.1	Work with University to develop model for community plan													
4.2	Include HIA data and analysis in climate action and resilience plan													
4.3	Coordinate with State agencies on emission inventory efforts													
4.4	LRPCs host community meetings on strategic recommendations													
4.5	Draft plans released to communities for review and feedback.													
4.6	Incorporate community input for final plan.													
4.7	Support local ordinance or resolution adopting final plan.													
M4	**Climate Action and Resilience Plans completed in 25 communities**													
5	**Technical Assistance and Stakeholder Engagement**													
5.1	Stakeholder advisory committee meets quarterly													
5.2	Education opportunities for all local governments at AML annual conference													
5.3	Identify and share state and federal funding opportunities with communities													
5.4	Share HIA and Climate Plans with state and federal agencies													
5.5	Communicate progress and learning to all local governments													
M5	**Communities report increased public health and environmental justice awareness**													

ED_016126_00000550-00013

c. Itemized Budget Sheet / Budget Narrative – Included as required attachment.

3.0 Environmental Results: Outputs, Outcomes, and Performance Measures (Logic Model)

a. Environmental Results (Logic Model) – Included as required attachment.

b. Performance Measurement Plan

This project will monitor and report progress toward achieving expected project outputs:

- **Resilience Planning:** AML will track the number of training courses held and the attendance by municipal officials at training courses. Tracking will also occur for materials produced and resilience plans implemented at the community level. Progress will be measured in implementation of resilience plans that account for climate change and environmental resilience.
- **Technical Assistance:** AML will track participation, including attendance at regularly scheduled meetings or trainings, responsiveness to requests for information, and use of recommended tools. Progress will be measured using an established capacity assessment tool.
- **Outreach and Support:** AML will track all outreach activities, number of respondents, and technical assistance provided with a spreadsheet, by community. Progress will be measured by utilization of available resources.

AML will develop a monitoring plan template as part of this project, for communities whose resilience planning efforts result in climate action plans. Thus, if future implementation is considered as a result of project activities, the development of a monitoring plan will contribute to the capacity of a community to be successful.

c. Sustainability Plan and Community Vision

AML's coastal caucus identified greater opportunities for collaboration as a priority more than three years ago. They have met annually, with a goal to "connect and strengthen their position relative to State and federal programs and participation." The group has acknowledged their diversity as well as their common interests. That fits well within the scope of the EJCPS. AML's hosting of this group can be formalized through this project, with an expansive view of resilience that includes the social determinants of health. Many of the issues the group has identified revolve around natural resource management, sustainable infrastructure development, and community livability.

AML will utilize the activities and deliverables of this project to advance the goals of these communities. The products of this project will set the stage for a long-term platform in which coastal communities can deliberate and work together to move forward into implementation.

A cohort approach to climate action planning is scalable to other regions of the state. There is an economy of scale that comes from shared learning and planning activities that the project team recognizes and believes could be replicated. In fact, this model is not new – organizations such as the International Council for Local Environmental Initiatives (ICLEI) offer an integrated climate action planning cohort that is developed specifically for local governments to participate in and work together to address shared goals. Similarly, Indiana University hosted a Resilience Cohort, to help local government leaders measure and reduce greenhouse gas emissions and implement climate resilience strategies. This application within Alaska is promising, then, to build from in the future.

ED_016126_00000550-00014

4.0 Programmatic Capability

a. Organizational Experience

AML's membership is comprised of all local governments in Alaska, which makes the opportunity for community engagement unparalleled. AML staff work regularly with municipal officials in Alaska communities and depend on them to provide input into AML processes reflective of the needs of local governments. AML's annual local government conference includes multiple sessions related to environmental efforts and community engagement. As an example, in 2022 we included:

- Local Government Strategic Planning
- Managing Effectively through Community Growth
- Working within Alaska's Comprehensive Economic Development Strategy
- Equitable Infrastructure Development
- Land Use Policy and Economic Development
- Municipal and Tribal Collaboration

Project staff have experience working on environmental issues, including hazard mitigation, water and wastewater management, and erosion. Staff also regularly engages with the Alaska Municipal Climate Network.

This project will depend on the ability of current management and project coordinators to implement a new program that rests on AML's strengths – the nimble ability to respond to where local governments needs are greatest. It will mean adding a new staff member and scaling current operations to support municipal governments in a new way. AML has a track record of delivering successful projects to and in support of Alaska's communities and intends to utilize these strengths to achieve the project objectives in a timely manner.

b. Staff Experience / Qualifications of Project Manager (PM)

Why the PM and associated staff are qualified to undertake the project

The following management team will be integral to the development and implementation of this project. Resumes for staff can be found in the attachments.

- **Nils Andreassen,** AML's Executive Director, has worked with communities across Alaska for more than 15 years, including to serve in a management role at nonprofit organizations for 10 years. Nils has contributed to State efforts and helped draft its Arctic policy, as well as its Climate Action Plan. In prior roles working on Arctic issues, Nils managed international efforts in support of the Sustainable Development Working Group (SDWG) and Protection of the Arctic Marine Environment (PAME) of the Arctic Council, including to help map Arctic infrastructure, host the Arctic Energy Summit, and organize the Arctic Mayors Roundtable. Nils serves on the Denali Commission, served on the Governor's Broadband Task Force, and is on the board of directors of the National League of Cities (NLC). His role in this project is to maintain and cultivate relationships that strengthen delivery of the program, assist with outreach to communities, and contribute input into the strategic direction and deployment of the project.
- **Erin Reinders**, AICP, has been a municipal planner and manager for more than two decades and joins AML as the Director of Infrastructure Deployment, to assist communities with BIL implementation and planning. Throughout her time in the public sector, Erin has been involved in community planning and community engagement processes, which included the development of Land Use Plans, Sustainable Action Plans, and Hazard Mitigation Plans for local governments and regional Transportation Plans. She developed zoning ordinance updates and

ED_016126_00000550-00015

municipal code revisions to promote more sustainable development to help bring those plans into reality. Erin successfully advocated for the communities she served on regional, state, and federal levels. She paid particular attention to aligning community needs and priorities with grant and assistance opportunities, understanding organizational capacity challenges. Erin found partnering with and supporting other organizations in efforts to seek funds or support assistance to be particularly rewarding and effective. Erin has worked with other governmental entities and a transit authority to bring forth transportation improvements benefiting an entire region, and with a local Tribe in obtaining support to complete a community wide civil affairs and infrastructure assessment.

- **Micah Hahn**, PhD, MPH, is an Associate Professor of Environmental Health in the Institute for Circumpolar Health Studies, University of Alaska-Anchorage focusing on the health impacts of climate change and working with communities to develop locally-relevant adaptation strategies. As an epidemiologist, she uses mixed-methods to answer interdisciplinary, applied questions around climate-related exposures. She has developed models to assess the impact of wildfire smoke and extreme heat on in Alaska and ecological models to assess associations between climatological variables and West Nile virus incidence and the tick vectors of Lyme disease in the continental U.S. She is currently funded by the EPA STAR program to work with Alaskan communities to develop a state-wide climate and health tool focusing on wildfire and wildfire smoke to assist communities with climate adaptation planning. She also facilitates the Alaska Municipal Climate Network, a group of municipal representatives from Alaskan communities who are working on climate activities and previously worked with the Municipality of Anchorage to develop their Climate Action Plan.

Illustrating the PM's ties/historical connection to the community and the applicant organization.

As the project manager, AML has a significant connection to participating communities. That history extends to pre-Statehood. Participating communities are all members of AML, too, so there is a strong relationship of mutual benefit and interest shared between the organization and municipality. Erin Reinders, as the staff responsible as the project manager, has been the city manager for the City of Unalaska, a coastal community. Another AML staff member has served in this capacity at one of the smallest coastal communities Alaska has, in Cold Bay. These team members have conducted strategic planning and public administration in coastal communities and are knowledgeable about challenges and methodologies to be successful in this environment.

c. Expenditure of Awarded Grant Funds

The AML grants management and compliance staff provides comprehensive grants administration; coordinates reporting activities with project managers; ensures effective financial management programs; coordinates regular grant activities; works with staff and external funding agencies to ensure project goals and objectives are met, ensures timely submittal of progress reports and closeout data; and coordinates with project managers and accountants to manage grants according to granting agency regulations. All internal and external financial reporting is completed in collaboration with program managers. AML procurement and contracting staff work with program managers to ensure that appropriate scopes of work and performance and compliance requirements are incorporated into all contracts via a contracts procurement and management system.

ED_016126_00000550-00016

5.0 Past Performance

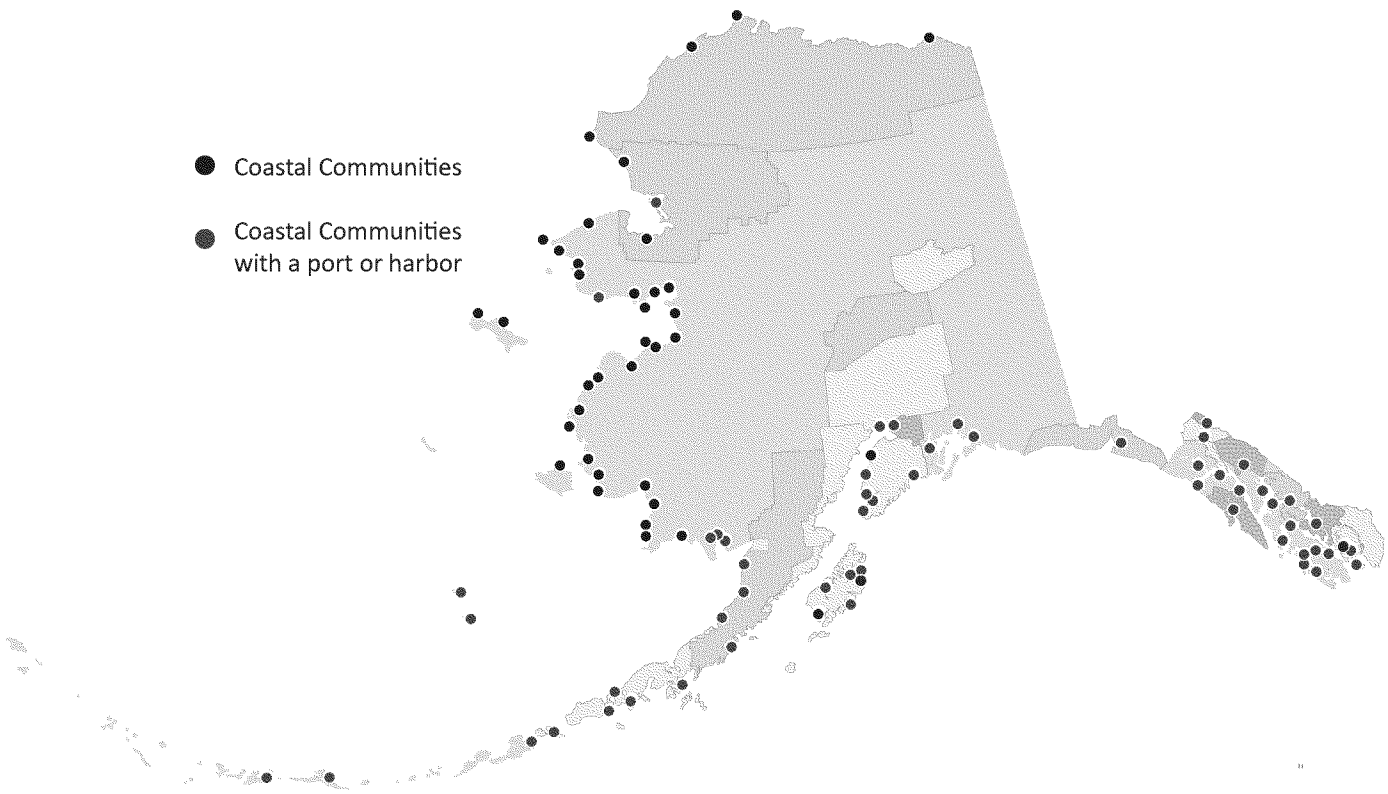
Demonstrated ability to successfully complete and manage agreements

Over the last four years, AML has played a significant role in strengthening the effectiveness of federal and state relief and investment into Alaska local governments and Tribes. AML has also partnered with the State of Alaska to build better service delivery at the local level, cultivate State-municipal relationships, and provide local input into State decision-making.

1. AML provided direct assistance to local governments that received federal CARES Act assistance through the State, and assisted with compliance and reporting, thereby ensuring that communities' implementation of CARES funds was successful AML partnered with the Alaska Federation Natives (AFN) to additionally support Tribal governments in their implementation and reporting. Local governments contributed more than $400,000 to this effort.
2. AML has provided ARPA compliance and reporting support for Alaska local governments and Tribes. This has meant extensive outreach and coordination, training, and work with city and Tribal councils and administrators across Alaska. AML collaborated with nonprofit partners to secure nearly $300,000 to support the technical assistance provided.
3. AML has a memorandum of agreement with the State of Alaska's Department of Health, to act as a local government liaison and provide stronger linkages between local governments and the Division of Public Health.
4. AML has a memorandum of agreement in place with the Alaska Department of Transportation and Public Facilities to serve as an intake center for all local transportation projects that will be competing for federal BIL grant awards. This includes careful reviews, strategic guidance, and feedback to strengthen the competitiveness of applications. The value of this MOA is between $200,000 and $1 million a year over these next five years.
5. AML has a $1.5 million grant (in the FY23 budget) from the State of Alaska to support technical assistance and grant writing for communities to access and manage BIL funding.

AML completes a successful financial audit each year, as well, and complies with all state and federal laws and regulations in its organizational capacity. AML's annual budget for FY23 is $3 million; this project represents a reasonable growth of that budget and would be administered by current financial staff that include a controller and accounting technician. Our Director of Programs (resume included for Alicia Hughes-Skandijs) is responsible for grant management and compliance.

History of meeting reporting requirements of agreements



AML has completed timely reporting requirements, including monthly reports that have required data exports, summaries of engagement, and review of activities. Final reports have included financial reporting and outcome evaluation. AML worked with the State OMB to ensure that local governments in Alaska submitted monthly CARES Act reports and closed out their final reporting. With recent ARPA annual reporting, AML ensured that all 165 cities and boroughs in Alaska had completed their report, calling each and working with them to finalize and submit, including to work with U.S. Treasury to problem solve and address submission challenges. Beyond AML's direct experience, each of the staff involved has deep experience in meeting reporting requirements and producing acceptable final technical reports. That includes reporting on federal grants to the State and to municipal government, and by nonprofits. AML is familiar with the requirements of 2 CFR 200, having provided guidance to local governments in their administration of federal funds.

ED_016126_00000550-00017

Many of these agreements have required the documentation of progress made toward achieving expected results, and AML has successfully reported on that progress under those agreements. Documentation has included web-based assets like websites, online forms and accompanying datasets, surveys of participants and members, engagement logs that track communication, outreach, and assistance, and staff reports. Separate fund accounting has kept all financial reporting easily accomplished, with clear reimbursables or financial reports available for reporting purposes.

6.0 Quality Assurance Project Plan (QAPP) Information

It is possible that this project will require a Quality Assurance Project Plan (QAPP), as it will use existing research, may create a new database based on information gathered, and may make recommendations on environmental decisions related to climate change. No personal, medical, or environmental data will be included as part of this project.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Unite Oregon

Address: 1390 SE 122nd Ave

City: Portland

State: OR: Oregon Zip Code: 97233

B. Unique Entity Identifier (UEI): C16ARLN8FA16

C. Applicant/Recipient Point of Contact

Name: Toni Naranjo-Rivera

Phone: Ex. 6 - Personal Privacy (PP)

Email: development@uniteoregon.org

Title: Lead Grants Manager

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Joel Williams; HR and Administration Director; Ex. 6 - Personal Privacy (PP)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Joel Williams; HR and Administration Director; Ex. 6 - Personal Privacy (PP)

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Khanh Le	Lead Grants Manager	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Unite Oregon
1390 SE 122nd Avenue
Portland, OR 97233

RE: Support for Unite Oregon's Environmental Justice Collaborative Problem Solving Cooperative Agreement

Dear Unite Oregon Climate Resilience Program Managers,

This letter is to support the Oregon Climate Resilience proposal submitted by Unite Oregon and its partners. The Warm Springs Community Action Team (WSCAT), a nonprofit community development organization on the Warm Springs Reservation, is excited to collaborate with the Unite Oregon team, work with our community, provide services, and support CTWS tribal leaders in achieving a local vision of a thriving, climate-friendly future. The team, led by Unite Oregon, Coalition of Communities of Color, and the City of Bend, is uniquely suited to engage rural and tribal communities to build resilience to the effects of climate change, and to related disasters that threaten our communities. The team has experience in community-led programming, policy engagement, research and data analysis, and capacity building across a range of climate resilience subject matter areas. We believe we can learn much from the coalition that will assist us in delivering better outcomes in health, economic opportunity, and clean environment for our community.

The residents of the Warm Springs Reservation have been on the front lines of the climate crisis. The increasing temperatures and drought that have affected much of the West have reduced the yield from timber on the reservation, and caused more wildfires. When wildfires break out, they are more damaging than in the past. Wildfires and higher heat levels have increased the number of power outages, as have utility preventative (PSPS) shutdowns. That leaves Warm Springs residents in a bind, because they are increasingly dependent on electricity for cooling in the extreme heat of the summer. Although Pacific Power has promised upgrades at the Warm Springs substation, the reservation has suffered for years from highly unreliable power – grid blackout rates that would cause outrage if they occurred in the Willamette Valley or other parts of the state.

Drought, high temperatures and decades of decay in the water system, have contributed to chronic water shortages. In 2019 a broken water main left many Warm Springs residents without running water for the entire summer. The following year another broken pipe left more than 100 residents without running water, and more than 2,000 under a boil-water notice because of microbes in the water. The lack of safe water likely made the pandemic worse: in July 2020 the reservation's COVID infection rate was higher than that of any Oregon county.

The Warm Springs Community Action Team (WSCAT) is committed to working with Confederated Tribes of Warm Springs (CTWS) tribal leaders to address these problems. WSCAT was first established in 2001 as an incubated program under the Central Oregon Partnership, and became an independent 501(c)(3) nonprofit organization in August 2008. Our mission is to promote community development in Warm Springs by empowering individuals and groups of people to realize their potential, become self-reliant, and affect positive change for themselves, their families, and their community. We do this through programs in asset building (we have the largest IDA program in Indian Country, with 170 tribal members

ED_016126_00000561-00002

currently enrolled), local business promotion (serving 50-75 aspiring entrepreneurs per year) , workforce development (serving 40-50 tribal members per year), placemaking (building a small business incubator, food cart pod, commercial kitchen, and developing community public art projects), youth development (serving 50-75 youth per year with small business training, financial education, workforce training, and summer youth programming), and education for personal and professional development (homeownership, financial skills, and business workshops and courses for 100-150 tribal members per year).

WSCAT has developed and is in varying stages of implementing projects in support of climate resilience, including installing solar hydro-panels to draw drinking water from the air (2019), putting solar panels on our own building to make it a net zero energy office building (May 2023), developing the Commissary incubator, food cart pod, and commercial kitchen as a net zero energy buildings (July 2024), developing a community solar project to provide reduced-rate electric power to up to 500 homes owned by lower income community members (early planning states, projected 2026), and developing a community resilience hub at the Warm Springs K-8 School (early planning stages, projected 2027). WSCAT is currently partnering with the Oregon Clean Power Cooperative, Pacific Northwest National Laboratory (through its Energy Storage for Social Equity program), and Vertue Lab, and has received either funding or credits for solar projects from Pacific Power's Blue Sky Program, Vertue Lab, and Energy Trust of Oregon. WSCAT provides unique services as a nonprofit community-based organization not available in the broader commercial marketplace. WSCAT has received funding from a wide range federal funders, and has a clear understanding of how to manage federal funds and adhere to federal procurement rules.

We are very excited to join this coalition in support of this important work for our community and other communities around the state!

Sincerely,

Chris Watson
Executive Director
Warm Springs Community Action Team

Coalition of Communities of Color

April 5, 2023

FR: COALITION OF COMMUNITIES OF COLOR

TO: Unite Oregon
1390 SE 122nd Ave., Portland, OR 97233

RE: Support for Unite Oregon's Environmental Justice Collaborative Problem Solving Cooperative Agreement

To whom it may concern,

I am writing to document the Coalition of Communities of Color's support for the Oregon Climate Resilience proposal submitted by Unite Oregon and its partners. Our organization will be engaged in this robust collaboration. It will support the ability to effectively engage communities, provide services, and support community leaders in achieving their vision for a thriving future. The team, led by Unite Oregon, Warm Springs Community Action Team, and Earth Advantage, is uniquely suited to engage, especially rural and tribal communities across Oregon, in authentic and community-led ways to build the kinds of resilience that climate change and disasters are demanding of our communities. The team also has experience in community-led programming, policy engagement, research and data analysis, and capacity building across a range of climate resilience subject matter areas our region needs to improve health and economic opportunity and build a clean environment.

The Coalition of Communities of Color (CCC) is an alliance of nineteen culturally specific organizations that serve diverse communities across Oregon, including Black/African American, Native American/Indigenous, Asian and Pacific Islander, Latinx, Muslim, Slavic, and immigrant and refugee communities. The mission of the CCC is to advance racial justice by building collective BIPOC community power. In addition, the CCC's Research Justice Institute (RJI) is advancing the organization's mission by conducting research and data justice efforts across the state and advocating for more reliable, holistic, actionable, and community-centered data.

Unite Oregon is a member of the Coalition of Communities of Color. We have a history of successful partnerships that center and engage marginalized communities (e.g., low-income, rural, communities of color, immigrant, and refugee), especially around housing, environmental justice, and advocacy. This partnership will continue to benefit underserved communities in Central and Southern Oregon through the RJI's ongoing training and support around data justice. We will provide Unite Oregon and other partners with training and support for how best

Coalition of Communities of Color

to collect and analyze data – especially qualitative data – gathered via community engagement efforts and how best to share and report these data to advance justice in our region. The CCC's Research Director, Dr. Andres Lopez, and Senior Researcher, Dr. Mira Mohsini, will serve as leads for training and other activities in support of data justice for this project.

The Coalition of Communities of Color provides unique services as a nonprofit community-based organization unavailable in the broader commercial marketplace. Further, we have been selected as a qualified partner consistent with EPA procurement rules. If this proposal is selected for funding, the Coalition of Communities of Color will be committed to partnering on the project to utilize data justice in an approach to influencing statewide climate and environmental justice programs, efforts, and base building with communities in Central and Southern Oregon.

Sincerely,

Dr. Andres Lopez

CITY OF BEND

April 10, 2023

FR: City of Bend

TO: Unite Oregon
1390 SE 122nd Ave.,Portland, OR 97233

RE: Support for Unite Oregon's Environmental Justice Collaborative Problem Solving Cooperative Agreement

To whom it may concern,

I am writing to document the City of Bend's support for the Oregon Climate Resilience proposal submitted by Unite Oregon and their partners. Our organization will be engaged with this robust collaboration and will support its ability to effectively engage communities, provide services, and support community leaders in achieving their vision of a thriving future. The team led by Unite Oregon, Coalition of Communities of Color, and the Warm Springs Community Action Team are uniquely suited to engage, especially rural and tribal communities, across Oregon, in authentic and community-led ways to build the kinds of resilience climate change and disasters are demanding of our communities. The team also has the experience in community-led programming, policy engagement, research and data analysis, and capacity building across a range of climate resilience subject matter areas our region needs to improve health, economic opportunity, and a clean environment.

The City of Bend has a robust Community Climate Action Plan (CCAP) and program that was developed in 2018, adopted in 2019 and has been implemented over the last 4 years in coordination with community partners and stakeholders. When the City was developing the CCAP, it began establishing relationships with local community-based organizations to help make sure underrepresented voices were centered in the Plan and that the Plan would have beneficial outcomes for the most vulnerable. The City also convenes an advisory Committee made up of Bend citizens who are interested in environmental stewardship called the Environment and Climate Committee (ECC). This Committee directly advises the City Council and directs the implementation of the CCAP.

While the City has a successful track record and commitment with engaging community in climate action policy and program decisions, it has also struggled to sustain meaningful engagement with underrepresented communities in Bend on these topics. Collaborating with Unite Oregon on this proposal will allow the City to re-build relationships it started with the Community Climate Action Plan, establish new ones, and nurture these relationships so that they can be sustained and impactful. These relationships will allow the City to create community-led climate policy and ensure that they result in better outcomes for all. Unite Oregon's presence in Bend and Central Oregon would also have the advantage of working throughout our surrounding rural and tribal communities to foster and hold space for a climate equity movement regionwide.

FR: Earth Advantage

TO: Unite Oregon
1390 SE 122nd Ave., Portland, OR 97233

RE: Support for Unite Oregon's Environmental Justice Collaborative Problem Solving Cooperative Agreement

To whom it may concern,

I am writing to document Earth Advantage's support for the Oregon Climate Resilience proposal submitted by Unite Oregon and their partners. Our organization will be engaged with this robust collaboration and will support its ability to effectively engage communities, provide services, and support community leaders in achieving their vision of a thriving future. The team led by Unite Oregon, Coalition of Communities of Color, the Warm Springs Community Action team, and Midstate Electric are uniquely suited to engage, especially rural and tribal communities, across Oregon, in authentic and community-led ways to build the kinds of resilience climate change and disasters are demanding of our communities. The team also has the experience in community-led programming, policy engagement, research and data analysis, and capacity building across a range of climate resilience subject matter areas our region needs to improve health, economic opportunity, and a clean environment.

Earth Advantage® is a 501(c)(3) nonprofit focused on helping to create an informed and humane residential real estate marketplace that: Acknowledges both the climate impacts of housing and the impact climate has on housing; Provides all homebuyers and renters with access to sustainability-related information about a home; Supports equitable housing outcomes, protecting those most vulnerable from the effects of climate change, and; Recognizes both the personal and societal value that climate-friendly housing creates. Earth Advantage's team is located across five states with a headquarters in downtown Portland, Oregon in the PAE Living Building. The organization's commitment to carbon

ED_016126_00000561-00008

reduction strategies is demonstrated by the 17,000+ individuals who have participated in Earth Advantage training, the approximately 4,000 high-performance residential units certified each year by our green building team, the 30,000+ homes with a verified Home Energy Score, and the over 2 million homes contained in our Green Building Registry. Earth Advantage brings over two decades of direct experience on a variety of residential energy efficiency and green building projects across Oregon. The Earth Advantage team trains and mentors a growing local energy efficiency workforce and supports residential building professionals through quality assurance and installation verification services. EA will bring to this project our subject matter expertise in workforce partnerships and career pathway development experience, green residential new construction and home retrofits, industry networks and employer connections, and long-standing reputation as a professional training provider and local third-party green home certification program.

Earth Advantage's workforce development training programs aim to provide energy efficiency and green building technical training, mentorship support, and professional development opportunities for groups that have been historically underserved in the building industry. Since 2018, EA has collaborated with our partner network (community-based organizations, pre-apprenticeship training providers, youth and high school programs, minority contractor associations, utilities, and beyond) to develop, coordinate and deliver 130+ total days of green construction workforce development training and credential opportunities. These trainings are designed to prepare tradespersons from underserved communities across Oregon for a career in green building, and our goal is to support our partner organizations and help enhance their training programs to ensure their trainees and these new tradespersons understand green building approaches and career pathways in residential construction. These partners consist of training instructors who run their own Minority- or Women-Owned Businesses (*EnerCity Collaborative, Enerstructa LLC, Premium Efficiency LLC, Elise Energy Solutions, and Burch Energy*) and delivery partners whose core mission is to serve and engage these communities (*LatinoBuilt, Constructing Hope, Oregon Tradeswomen, Portland YouthBuilders, Portland Opportunities Industrialization Center, Heart of Oregon Corps YouthBuild, The Blueprint Foundation, and the Green Workforce Academy*). Working in close collaboration with our partners, Earth Advantage currently supports five distinct workforce development training projects under the *Portland Clean Energy Fund (PCEF)*. By utilizing Earth Advantage support, these programs

have grown their construction training programs and made measurable impacts in lives of their trainees entering the green construction industry.

To meet current and future demand, Earth Advantage believes the construction industry workforce will need to be more diverse, skilled, and younger than ever before. We've seen that sustainable practices create greater interest among workforce trainees looking to enter the industry, and those who gain green building knowledge and a green credential are more attractive and valuable to future employers. Earth Advantage's workforce development programs are specifically designed to engage Black, Indigenous and people of color (BIPOC), women, transgender and gender diverse individuals, low-income and/or rural communities, and others who have been historically underrepresented or marginalized in the building industry. Our experience in the industry has demonstrated that these underserved groups have historically been passively excluded from energy efficiency and environmental initiatives. For many years, the energy efficiency industry has provided a wide variety of technical training intended to support and advance the practices of residential construction contractors. However, few of these trainings were led and offered by diverse/minority-led organizations, delivered by diverse/minority contractors, and/or made available in languages other than English. This standardized dominant-culture approach has hindered progress and resulted in lower levels of participation from diverse/minority-led communities, contractor businesses, and their workers in these trainings and in the overall energy efficiency conversation. Earth Advantage understands how to design technical training programs that have the potential to elevate these underserved communities and activate this critical potential to facilitate Oregon's quest for meeting its climate and equity goals.

Earth Advantage's approach is embedded with strategies for advancing equity, which is demonstrated by our co-authoring a '*Building Green: Clean Energy Construction Apprenticeships, Training, and Career Tracks for People of Color and Women*' report, recently launching a centralized online *Residential Construction Career Hub*, and translating our '*Sustainable Homes Professional (SHP)*' 20-hour training curriculum into the Spanish-language to generate new pathways for Latinx contractors access to the energy efficiency field. Ultimately, we feel strongly that these and our other workforce development projects will cultivate a community of diverse and minority contractors who possess the skills to

ED_016126_00000561-00010

meaningfully contribute to climate justice goals. At this critical juncture of the climate crisis, we have the collective duty to define a new praxis of ecologically conscious construction. The next iteration of Oregon's construction economy demands industry professionals with the technical competencies and community connections to transform our vision of climate justice into a lived reality. We believe that by supporting diverse and minority contractors through energy efficiency and green building training, we engender the conditions for a contracting community that can build a more resilient and sustainable future.

Earth Advantage provides unique services as a nonprofit community-based organization not available in the broader commercial marketplace, and was selected as a qualified partner consistent with EPA procurement rules. If this proposal is selected for funding, Earth Advantage will be committed to partnering on this project to increase education opportunities for green sector jobs in and around community resilience hubs and networks in tribal and rural communities.

Sincerely,

Ryan LaPoma

April 11, 2023

FR: MIDSTATE ELECTRIC COOPERATIVE, INC.

TO: Unite Oregon
1390 SE 122nd Ave., Portland, OR 97233

RE: Support for Unite Oregon's Environmental Justice Collaborative Problem Solving Cooperative Agreement

To whom it may concern,

I am writing to document Midstate Electric Cooperative's (MEC) support for the Oregon Climate Resilience proposal submitted by Unite Oregon and their partners. Our organization will be engaged with this robust collaboration and will support its ability to effectively engage communities, provide services, and support community leaders in achieving their vision of a thriving future. The team led by Unite Oregon, Warm Springs Community Action Team, and Earth Advantage, are uniquely suited to engage, especially rural and tribal communities, across Oregon, in authentic and community-led ways to build the kinds of resilience climate change and disasters are demanding of our communities. The team also has the experience in community-led programming, policy engagement, research and data analysis, and capacity building across a range of climate resilience subject matter areas our region needs to improve health, economic opportunity, and a clean environment.

As a member-owned cooperative, MEC enjoys a close relationship with all the communities we serve. While delivering safe, affordable power is our number one priority we also have a longstanding commitment to community service. Through our consistent involvement we have developed a reputation as a trusted community partner.

The focus of this partnership being on rural communities will be a major benefit to large portions of our service territory. These communities can be left out of county-wide programs in many cases, as the largest cities in the county receive most of the resources. MEC would greatly appreciate the opportunity to work with Unite Oregon on community outreach and education, and the partnership would benefit us by boosting participation in our existing Energy Conservation programs.

Midstate Electric provides a unique perspective as a trusted rural electric provider and was selected as a qualified partner consistent with EPA procurement rules. If this proposal is selected for funding, we will be committed to partnering on the project to co-host community forums in rural parts of the region to educate people about incentive opportunities and gain a shared understanding of data justice in analyzing qualitative data.

Ex. 6 - Personal Privacy (PP)
Ex. 6 - Personal Privacy (PP)

April 13th 2023

Unite Oregon
1390 SE 122nd Ave., Portland, OR 97233

Reference: Support for Unite Oregon's Environmental Justice Collaborative Problem Solving Cooperative Agreement

I write as cofacilitator of Southern Oregon Climate Action Now (SOCAN), an organization of over 2,000 rural Southern Oregonians who are concerned about the climate crisis and urge statewide action to address it. The mission of SOCAN is to promote awareness and understanding of the science of global warming and its climate chaos consequences and stimulate individual and collective action to address it. We undertake this mission with the framework of social justice. Since rural Oregonians occupy the frontlines in experiencing the impact of the drought, shrinking snowpack, wildfires and extreme weather that the climate crisis imposes, we are strongly committed to action.

When we discuss 'addressing' climate chaos, our minds often, and quite naturally, turn to how we can prevent the ongoing crisis from deteriorating further through mitigation. This generally involves either reducing our emissions of climate pollution, or capturing greenhouse gases (mainly carbon dioxide) from the atmosphere through the promotion of photosynthesis as a natural solution, or through technology that captures the gas(es) from our atmosphere. However, in addition to mitigation, addressing the climate crisis also involves developing programs that help those suffering from climate change to maintain viable and vibrant lives as we move forward together. This comprises 'adaptation.' Regrettably, as the climate crisis worsens, the future that is inevitable unless we eliminate human-induced emissions today will bring us an increasing frequency of severe weather and climate-induced phenomena. The severe weather events will include thunderstorms and flooding as well as heat waves and drought. Since we live in a Mediterranean (winter wet / summer dry) climate, western states have always experienced conditions that feature drying soil and vegetation annually each summer and fall. This annually produces conditions where fire is likely. Warming, which will be

greater in the summers than winters, reduced summer rainfall, and reduced snowpack will all conspire to exacerbate the summer drying and thus elevate wildfire risk.

These are the conditions that Oregon residents will experience as the century unfolds. It is incumbent upon all of us to acknowledge this reality and prepare for it. While those of us who are economically more privileged will likely have the financial capacity to survive these phenomena at east in the short term, those who are less economically advantaged will become ever more vulnerable to these calamitous events. Providing Oregonians with locations where they can go to understand, escape, and learn how to adapt to these climate-induced phenomena will be critical to allowing our communities to survive. As a bonus, these Resilience Hubs can also serve the same purpose in the event of calamitous events unconnected with climate such as a Cascadia Subduction Zone Earthquake.

Enough information has been provided on what Resilience Hubs comprise and what they offer that I will not repeat that here. Rather, I commend you to the website of our companion organization, Rogue Climate, for a discussion of Community Resilience Hubs. Suffice to conclude by noting that Resilience Hubs can be designed to meet local needs and thus serve Oregonians from rural and urban locations alike.

For these reasons, Southern Oregon Climate Action Now is delighted to endorse and join a team led by Unite Oregon, Coalition of Communities of Color, and the Warm Springs Community Action Team, and MidState Electric in their effort to help local vulnerable communities, especially rural and tribal communities, build resilience to our changing climate and other potential disasters. Having collaborated with several of these organizations to address issues of mutual concern, we can testify to the expertise of the consortium in community building, engagement in promoting policies conducive to their missions, and developing local capacity.

Southern Oregon Climate Action Now was founded in 2012 and has since served the Rogue Valley, Southern Oregon, and the broader Oregon community through some twenty volunteer-driven projects in five Program areas: Government, Education, Natural Resources, Transportation, and Community Outreach. Throughout most of this period, we have been collaborating with the statewide coalition of concerned climate activists and sympathetic state legislators to establish programs in the state that will both promote mitigation of the climate crisis and adaptation to those trends that are inevitable. We also offer education programs and presentations to educational institutions on all aspects of the climate crisis and, in 2017, initiated our 'Master Climate Protector – A Primer for Action' course. Now completing our ninth offering of the course, we have graduated well over 100 Master Climate Protectors, several of whom have since been elected to local city councils. A couple of years ago, within the Government Program, we launched a Regional and Local Project through which teams of volunteers living in local communities engage with their communities to promote climate action. Currently, active teams exist in Grants Pass, Medford, Jacksonville, Talent and another is

set to initiate action in Ashland. We also collaborate with A Greater Applegate to promote climate action throughout that rural corner of Jackson County

When we are confronted by serious problems requiring a substantial and concerted response, we are more likely to respond positively if we understand both the nature of the problem, and what constitute rational responses to that problem. As a result of discussions with representatives from Unite Oregon, it is our judgment that we (SOCAN) can bring our considerable experience in promoting understanding about the science of climate change to non-scientific audiences of vulnerable Oregonians. In this context, we offer our expertise to develop and offer workshops that will help Oregonians understand the nature of the climate crisis as it affects their region of the state, and what we can do both to mitigate our contributions to the problem, and to help ourselves adapt to those consequences that are inevitable. At this early stage, it is premature to identify exactly what such a series of programs would entail since the content and delivery format should be developed in collaboration with those wishing to experience the workshops.

In exchange for developing these workshops, Southern Oregon Climate Action Now asks for an allocation of $10,000.

Respectfully Submitted

Alan Journet

ROGUE VALLEY ORGANIZER

CAREER OBJECTIVE

My long term goal is to be able to work and advocate for those that can't advocate for themselves, Help marginalized communities, Build empowering networks of community, Employ the leadership skills I have been fortunate enough to acquire through many life experiences and positions.
But most importantly, I want to keep learning about the processes that disenfranchise certain communities, I want to be able to recognize and distinguish tools designed to maintain certain power structures to more effectively help dismantle them, and create a more equal, fair, compassionate and informed collective, where we can all raise our kids safely. I want to always stay curious and flexible to learn new ideas and improve my human experience. I would like to make my life objective, a career objective.

EXPERIENCE

COMMUNICATIONS AND ENGAGEMENT COORDINATOR

Jackson County Community Long Term Recovery Group, Medford, OR / May 2022 - Present

- Provide leadership in production and dissemination of important information resources from different non profit organizations out to the community in the form of print, Video, Online platforms and public speaking.

PROFESSIONAL EXPERIENCE

Executive Director & Individual Development Account (IDA) Program Manager, Warm Springs Community Action Team (WSCAT), Warm Springs Indian Reservation, OR

Executive Director (April 2014 – present)

- Lead, coach, and develop WSCAT's 17-person staff, which works with the WSCAT board, the Confederated Tribes of Warm Springs (CTWS) tribal government, and community partners to promote community development on the Warm Springs Indian Reservation and to increase the economic vitality, stability, and self-sufficiency of community members.
- Ensure programmatic excellence, rigorous program evaluation, and consistent quality of organization's finances, administration, and communications; recommend timelines and resources needed to achieve strategic goals; raise funds from federal, state, and private donors.
- Have raised $14 million from federal, state, and private donors for capital projects and programs in community development, climate resilience, local business promotion, asset building, agriculture, youth development, and workforce development program.

IDA Program Manager (April 2013 – August 2016)

- Managed a 5-year, $1.5 million federally-funded program enabling members of the Confederated Tribes of Warm Springs (CTWS) to build financial skills, open individual development accounts, build their credit, and obtain assets to start or expand businesses, buy homes, and pay for their education.
- Managed a $1,191,750 State of Oregon-funded IDA program enabling CTWS tribal members to open individual development accounts, build assets, and move towards financial self-sufficiency.
- Increased the client base of the IDA program from 24 to 180 clients in 40 months.

Program Evaluator, New West Technologies, LLC, Washington, DC (August 2008 – October 2012), under contract with the Administration for Native Americans (ANA), Dept. of Health & Human Services

- Evaluated 96 ANA-funded, community-designed and implemented projects in social and economic development, environmental regulatory enhancement, Native American/Alaska Native/Pacific Islander language revitalization, and governance in the US and Pacific territories.
- Co-developed an impact evaluation survey enabling ANA evaluators to analyze the extent to which projects achieved intended objectives and produced impact within their communities.
- Co-compiled five annual reports to the U.S. Congress, presenting key data and findings from projects visited and providing a report on the activities, outputs, outcomes, and impact of each project.

Proposal Writer, Adventist Development & Relief Agency, Kathmandu, Nepal (September 2007 – June 2008)

- Wrote a $280,000 Australian Agency for International Development proposal to fund literacy education, gender disparity awareness training, agro-vocational training, and savings and credit training for 1,000 women from marginalized ethnic and caste groups in Nepal's Terai region. (Proposal funded)
- Wrote a $450,000 United Nations Population Fund (UNFPA) funding proposal to provide mobile reproductive health (RH) camps for 25,000 women, adolescents, and family members in five remote, conflict-affected districts in Nepal's Midwestern Development Region. (Proposal funded)

Researcher, World Learning, Brattleboro, VT (February 2007 - August 2007)

- Compiled a "Leadership for Social Justice" capacity-building training manual and provided research support for a book on social justice leadership in collaboration with faculty from the School for International Training and the Ford Foundation International Fellows Program.

Program Evaluation Consultant, for Heifer International, Little Rock, AR (May 2006 – February 2007)

- Evaluated Heifer International's North American Indigenous People's Initiative, analyzing program performance and extent to which it contributed to the organization's mission in North America.
- Evaluated Heifer's $6 million U.S.-based experiential education programs, analyzing program impact on participants and effectiveness in advancing Heifer's mission of reducing global hunger and poverty.

Fundraiser and Project Manager, Stonewall Farm, Keene, NH (July 2004 – September 2005)

- Wrote grant proposals that garnered the organization, a non-profit environmental and agricultural education center, the funding needed to construct a 4,000-square foot greenhouse, convert a herd of dairy cows from conventional to organic production, design and implement an educational signs project, fund scholarship programs for visiting elementary school students, and cover operating expenses.
- Managed, monitored and evaluated a greenhouse design and construction project, a dairy barn wastewater project, a cow lanes project, and two educational signs projects.

EDUCATION

M.A., Sustainable Development, School for International Training, Brattleboro, Vermont (2003-2006)
Concentration: Development Management. Coursework: Intercultural Communication, Theory & Practice of Sustainable Development, Program Monitoring & Evaluation, Program Planning & Project Design, Research Methods, Budgeting, Policy Advocacy, Social Change, and Human Resource Management.

B.A., History/Political Science, with honors, Claremont McKenna College, California (1985-1989)

Financial Education and Asset Building (2013-2015)
Building Native Communities: Financial Skills for Families – Instructor's Course (2013); *Credit Building is Asset Building*, Credit Builders Alliance (2013); "Your Money, Your Goals" - Consumer Protection Financial Bureau (2013). *Pathways Home – A Native Homeownership Guide* - Instructor Training (2014); *Indianpreneurship* – ONABEN (2014); Credit Coaching Training – First Nations OWEESTA (2015).

Conflict Transformation Across Cultures Peacebuilding Institute, Brattleboro, Vermont (June 2007)

Nepal Immersion Program, Pitzer College, Kathmandu, Nepal (August 1988 – December 1988)

MISCELLANEOUS

Board of Trustees Member, Nonprofit Association of Oregon (NAO) (January 2020 – present)

- Provide financial oversight, advice, and guidance to Executive Director and staff of the Nonprofit Association of Oregon a statewide nonprofit membership organization representing and supporting charitable nonprofits of all sizes, geographic locations, and missions across Oregon.

Central Oregon Leadership Council Member, Oregon Community Foundation (October 2014-October 2020)

- Served as liaison between the Warm Springs Indian Reservation community and the Oregon Community Foundation, the 8th largest community foundation in the United States, with a $1.6 billion endowment.

Advisory Board Member, KWSO Radio 91.9, Confederated Tribes of Warm Springs (July 2014 - present)

- Advise station manager on how KWSO can best serve the Warm Springs Reservation community, and on fundraising and management strategies.

Volunteer Grant Proposal Writer, Confederated Tribes of Warm Springs (CTWS) Culture and Heritage (C&H) Department (March 2014)

- Wrote a 3-year, $760,000 Administration for Native Americans grant proposal enabling the CTWS C&H Department to create a Master/Apprentice Language Immersion Program to train five young community members to attain fluency in the Ichiskiin language. The program employs seven people, provides teacher training to six staff members, and will enable the CTWS to preserve one of its three tribal languages into the distant future. (Proposal funded)

Travel and overseas experience: Taught English in South Korea for three years (1994-1997) and in Saudi Arabia for 6 months (2000). Served as a U.S. Army Lieutenant in Germany for 3 years (1989-1992). Have travelled to 80+ countries (in Africa, Asia, Europe, and the Americas), 55 sovereign Native American nations, and all 50 U.S. states. Studied in Nepal, Guatemala, and Germany.

University of Missouri-Kansas City

Masters of Arts (2012)
Major: Sociology
Thesis: "Fixing 'The Man Problem': Masculine Discourse in Christian Men's Ministries"

Xavier University

Bachelor of Arts (2005)
Major/Minor: Sociology/Women and Gender Studies
Thesis: "Are college-aged men restricted by their masculinity?"

Selected Research, Evaluation, and Assessment Experience

Full-Time Work:

Research Director, Coalition of Communities of Color
(Portland, OR. January 2020 – Present)

- Direct all efforts of the CCC's Research Justice Center
- Lead member driven, large-scale community-based participatory action research projects
- Provide research consultation to community, city, county, and state partners

Graduate Research Assistant:

Graduate Student Success GRA, Graduate School, Oregon State University
(Corvallis, OR. March 2016—June 2018)

- Conducting various multi-method research and evaluation projects with data from BANNER, CORE, and Data Warehouse and originally collected data – from conception and management to writing final manuscript
- Monitoring student participation and evaluating graduate professional development offerings
- Participation on the Graduate Student Success Team – coordinating, developing, implementing, and assessing graduate programing
- Managing the Graduate Student Success Center, ordering promotional materials, creating event flyers and programming brochures, and communicating with the public via social media platforms
- Serving various unit and university wide committees at the Dean's request

Department of Ethnic Studies, Oregon State University
(Corvallis, OR. September 2015—March 2016)

- Archival research on Latina/o populations in Oregon & history of Ethnic Studies at Oregon State University

Research Institute for Studies in Education (RISE), School of Education, Iowa State University
(Ames, IA. May 2013—August 2015)

- Conduct qualitative/quantitative research assignments – survey construction, regression, and crosstab analysis
- Evaluating and assessing ISU benefits survey, faculty interaction survey, and Strengthening the Professoriate NSF grant writing trainings and partnerships
- Training graduate students, professional researchers, and faculty members on Social Network Analysis
- Methodological development of process evaluation for the Iowa Governor's Statewide STEM Initiative.
- In-depth interviewing, leading focus groups, and content analysis of educational research initiatives and projects

Teaching Experience

Department of Ethnic Studies, Oregon State University Ecampus
(Corvallis, OR. September 2015— March 2016)
- TA 20 hours a week: Asian American Studies; Environmental Racism
    - Grading, lecturing, proctoring, leading discussions, and developing assignments

Department of Sociology, Iowa State University
(Ames, IA. August 2012-May 2013)
- Instructor of Record: SOC 327 Gender and Sex (Fall & Spring)
    - All aspects involved with teaching a 300 level course

Department of Sociology, University of Missouri-Kansas City
(Kansas City, MO August 2009-May 2012)
- TA 20 hours a week: four sections of ANTH 101 Intro to Cultural Anthropology; two sections of SOC 350 Applied Sociology; two sections WGS 101 Intro to Women's and Gender Studies
    - Grading, lecturing, proctoring, leading discussions, and developing assignments
    - Oversaw semester long student research projects in Applied Sociology

SELECTED WORK EXPERIENCE

Senior Researcher |The Coalition of Communities of Color, Portland, OR |July 2020-present
Co-developing the Research Justice Institute's data justice approach, and continuing to engage in community-based participatory action projects using a research justice approach throughout the state of Oregon. Advising government agencies, health care systems, and other institutions on data equity strategies. Co-convening organizations that serve Black, Indigenous, and People of Color (BIPOC) communities, and collaborating with BIPOC researchers and scientists to elevate community data, and create pathways for sustainable and ethical community engagement efforts with BIPOC communities.

Training & Equity Facilitator | Living Yoga, Portland, OR | March 2020-Present
Developing diversity, equity, and inclusion goals focusing on racial and economic justice; conducting research and analyzing data related to the intersection of personal and systemic trauma with mental health, disparities in criminal justice, health disparities, and economic/housing insecurity; conducting outreach and actively building a diverse network for Living Yoga's trauma-informed training; developing new curriculum on topics of equity and inclusion & facilitating online body-based resiliency training.

Researcher | The Coalition of Communities of Color, Portland, OR | Sept 2019-July 2020
Leading project funded by Oregon Health Authority to (1) understand barriers faced by communities of color in Oregon in accessing behavioral health services and (2) recommend culturally- and linguistically-responsive best practices for Coordinated Care Organizations; facilitating Steering Committee meetings using a Research Justice framework; training community-based organizations in data collection and analysis; conducting participatory data interpretation and analysis; community and stakeholder engagement. Leading survey-based research and analysis on the social and behavioral health profile of incarcerated Native Americans in Oregon in partnership with Red Lodge Transition Services.

Program Evaluator | Grounded Solutions Network, Portland, OR | Oct 2019-present
Developing program assessment framework for a nation-wide affordable housing and anti-displacement initiative in three U.S. cities; conducting semi-structured interviews, developing survey instruments, focus groups, and facilitating cultural domain research for program participants in Winston-Salem, Indianapolis, and San Antonio.

Instructor | Wayfinding Academy, Portland, OR | January 2020-present
Designing and facilitating a Learning Lab for students and community members on immigration, borders, and questions of legality. Focus of Lab is to breakdown myths and misinformation about immigration. Using storytelling and project-based work to enable students to develop platforms (i.e. podcast, blog/vlog, games, organizational toolkits) to raise public awareness and dismantle stereotypes about immigration.

Visiting Assistant Professor | University of Akron, Akron, Ohio | Sept 2016-June 2019

- Designed, managed, and led four collaborative projects: (1) refugee experiences in the U.S.; (2) documenting urban poor farms and infirmaries; (3) politics of urban revival, housing, and community development; (4) Muslim minorities and informal labor in India.
- Designed, organized, and delivered workshops on diversity, equity, and inclusion for faculty, staff, and students; conducted high school community outreach.
- Developed and taught online, hybrid, and face-to-face courses on race and racism, gender studies, globalization, Islamophobia, qualitative and quantitative research methods, religion, and cultural diversity; awarded Faculty Champion award for teaching two experiential learning courses focused on community-centered research.

I. PROGRAM OBJECTIVES

A. Project Summary Page

Project Title: **Oregon Climate Resilience**

Project Location: **Oregon, Jefferson, Crook, Deschutes, Jackson, Josephine Counties**

Applicant Information: **Unite Oregon**

1390 SE 122nd Ave.,Portland, OR 97233

https://www.uniteoregon.org/

Ex. 6 - Personal Privacy (PP)

Becca Phelps (she/her), Climate Resilience and Environmental Justice Manager, becca@uniteoregon.org

Toni Naranjo-Rivera, Lead Grants Manager, toni@uniteoregon.org

Description of Applicant Organization: Unite Oregon is a community-based, racial justice organization focused on policy and infrastructure change at the local, regional, and statewide levels. We work across Oregon to eliminate systemic inequities that lead to disparate outcomes in health, educational opportunities, and economic security for immigrants, refugees, and Black, Indigenous, people of color (BIPOC). Equity is a cornerstone of all our work, which functions to build a unified intercultural movement for justice. We provide culturally responsive leadership development, civic engagement, policy and advocacy, and community organizing training that is designed to engage community leaders over time.

Small CBO Set Aside?: No

Project Abstract (250 words): The Oregon Climate Resilience project will work Central Oregon and Rogue Valley communities with high climate disaster risk, pre-existing pressures on economic and environmental health, and where community leaders are stepping forward to take action. In these rural and tribal areas, Unite Oregon and our partners across Indigenous and other community-led organizations, local government, and rural electric co-ops will collaborate to 1) Strengthen the capacity of community leaders in Central Oregon and the Rogue Valley to organize around climate justice, and take action on policies and other systemic inequities affecting their communities; 2) Create two Community Resilience Hubs so communities with limited English proficiency, immigrants, rural Oregonians, and people of color have the same access to disaster response assistance from government, the private sector, and their neighbors; and 3) Reduce home energy costs by increasing rural and tribal community access to residential home energy efficiency incentives from federal, state, and utility sources.

Project Type: Emergency preparedness and disaster resiliency, public education, home energy efficiency, training

Special Considerations: The project focuses engagement in rural and tribal areas of central Oregon and the Rogue Valley to increase the capacity to prevent, mitigate, and recover from Climate Disasters (especially forest fires and severe storms) via Community Resilience Hubs.

ED_016126_00000565-00001

Environmental Issue: Climate Change- Unite Oregon's immigrant, refugee, BIPOC and rural communities are concerned about their exposure to more frequent climate disasters (e.g., wildfire risks to homes and health).

List of Project Partners:
Coalition of Communities of Color (CBO); City of Bend (local government); Warm Springs Community Action Team (CBO); Earth Advantage (non-profit); Midstate Electric Co-Op (rural electric cooperative); and Southern Oregon Climate Action Now (non-profit).

Will we need a QAPP: Yes

Total Project Cost:
Federal funds requested: $500,000 (approx. $167,000/yr)

B. Environmental and Public Health Information of the Underserved Community

Much of Central Oregon and the Rogue Valley are in the 90-95% percentile for wildfire risk, with some areas in the 95-100% risk area. We define the regions as Jefferson, Crook, and Deschutes County (Central Oregon including the Confederated Tribes of the Warm Springs Reservation) and Jackson and Josephine County (Rogue Valley). The combination of high-transit corridors, urban-wildland interfaces, and a drier and hotter climate have already led to significant, catastrophic fires in these regions–ones the communities, especially immigrant and BIPOC families, are still recovering from. Oregon's fire season is 100 days longer than in the 1970s.[1]

Rural areas in these regions experience asthma rates higher than the national average – 80-90% higher for many rural census tracts, and 95-100% higher for the Confederated Tribes of the Warm Springs Reservation community (Warm Springs). Wildfire smoke exacerbates chronic respiratory and heart disease, especially for vulnerable people such as pregnant women, and for people experiencing intersections of multiple inequities such as low-income residents in mobile home parks. Wildfire also intensifies affordable housing shortages in regions that are already severely rent burdened (i.e., more than 25% of households in Bend, Ashland, and Medford spent more than 50% of their income on rent in 2022 versus the statewide average of 15% of Oregon households are severely rent-burdened).[2]

These regions have also experienced some of Oregon's fastest growth in recent years around the urban centers of Medford and Bend. That growth has significantly increased housing costs, and overall cost of living. As a result, the displacement caused by wildfire can have devastating impacts–just like the Almeda fire did in the cities of Talent and Phoenix in the Rogue Valley in

---

[1] https://www.oregon.gov/oha/PH/HEALTHYENVIRONMENTS/CLIMATECHANGE/Documents/2020/Climate%20and%20Health%20in%20Oregon%202020%20-%20Full%20Report.pdf

[2] https://www.oregon.gov/lcd/UP/Documents/Annual_Severe_Rent_Burden_Announcement.pdf.

2020.[3] The fire destroyed 2,600 homes, the most destructive in Oregon history, and many of those homes belonged to LatinX, immigrant, refugee and Spanish-speaking families, who are still struggling to access federal resources for recovery. Additionally, the region is clamoring to restore the lost affordable housing, and the Bear Creek Greenway. Immigrant communities in particular struggled to access recovery support–both because of policy restrictions in providing support to undocumented individuals, and broader mistrust of government. This underscored the important role of CBOs as frontline responders in these cases.

Research shows that regions whose resilience plan emphasizes local community engagement and collective action in addition to physical infrastructure are better prepared for extreme events. Communities with deeper ties, more trust, and more interaction suffer lower mortality during extreme weather events and other natural disasters.[4] For these measures to be climate justice and not just preparedness, resiliency initiatives must 'help the most vulnerable, not just the easy to reach,' and furnish them with 'a shock-responsive rights-based safety net guaranteeing their basic material, emotional and social wellbeing'.[5] For Unite Oregon, climate justice is holistic long-term resilience; multidimensional, participatory, ownership; whole-community efforts; and anticipating, preparing for, coping with, and recovering from climate impacts.

And Oregon is taking steps to get ahead of the health inequity caused by climate disasters. Oregon got approval in 2023 for the first-in-the-country Medicaid 1115 demonstration waiver that authorizes healthcare dollars to be invested in climate response (the state request included authorization for disaster preparedness and resilience, but that was not granted by the federal Center for Medicare and Medicaid services).[6]

Unite Oregon's Climate Adaptation strategy envisions a future in which all Oregonians thrive and are resilient in the face of a changing climate. Executing on this strategy requires inclusion of the voices and expertise of diverse stakeholders living in these impacted communities. The strategy taps into Unite Oregon's strengths in creating mitigation strategies that build wealth and resilience for our communities while pushing for immediate actions to compensate and protect impacted Oregonians from the impacts of catastrophic climate change. This proposal focuses on several community types and issues prioritized in this EPA RFA:

- Rural Areas: We will focus on organizing and community engagement in the rural portions of Central Oregon and the Rogue Valley, especially with Indigenous people, immigrant communities, and people of color;

[3] https://www.ijpr.org/wildfire/2021-09-08/the-almeda-fire-one-year-later.
[4] Aldrich, D. P. (2018). The Right Way to Build Resilience to Climate Change. Current History, 117(795), 16–21.
[5] Bharadwaj, R. (2022). Firm foundations for child-centered climate resilience. International Institute for Environment and Development.
[6] https://www.oregon.gov/oha/hsd/medicaid-policy/pages/waiver-renewal.aspx

- Climate Disaster Resiliency: Climate change is exacerbating wildfire and other disaster risks. This project will build the social connections and community resilience hub connections to connect rural immigrant and BIPOC communities to culturally-specific supports before, during, and after disasters;

- Connecting Health & Climate: Project partners have made a direct connection between health improvement, healthcare delivery, and reducing the risk of climate-connected health inequity.

C. Unite Oregon's Historical Connection to Underserved Community

Unite Oregon represents the 2016 merger of two strong nonprofit organizations—Center for Intercultural Organizing (CIO) and Oregon Action (OA)—who together have decades of experience organizing immigrants, refugees, people of color, and low-income Oregonians to address racial justice and human rights issues in Oregon. Founded by Portland-area Muslims to dispel harmful racial stereotypes in the wake of 9/11, CIO was a diverse, grassroots organization working to build a multiracial, multicultural movement for immigrant and refugee rights. Formed in 1980, Oregon Action was a statewide broad-based, multiracial community organization dedicated to addressing economic and racial justice issues. Having collaborated for over ten years, CIO and OA decided to join forces. Today, Unite Oregon operates across the state to connect and empower community members to find the solutions our communities need in ways that disrupt patterns of extraction, exploitation, and dependency.

All of Unite Oregon's work is developed and implemented with an intercultural framework and follows a strengths-based approach that honors the community's deep wisdom, unique circumstances, and expertise. We define our priorities and issues through an in-depth engagement process with members, who represent a broad section of Oregon's culturally diverse communities. Engaging our constituents from the beginning of our campaigns ensures that they are at the helm of the organization.

Unite Oregon is a community-based organization led by immigrants, refugees, and Black, Indigenous, people of color. Our by-laws require that our board, staff, and membership be at least 50% immigrant, refugee or Black, Indigenous, people of color. We have 55 staff: 75% identify as BIPOC, immigrants, or refugees; 33% are LGBTQIA+2S; 73% of staff are people who experience gender and sex-based discrimination; and 100% of leadership across all chapters are BIPOC. Together, we speak 12 different languages. Current chapters exist in the Portland metro area and Rogue Valley, and we plan to begin a new chapter through this project in Central Oregon. We are the only intercultural movement-building nonprofit in Oregon organizing communities across the urban-rural divide.

The organizing for the Oregon Climate Resilience project combines Unite Oregon's experience in organizing in the Rogue Valley during the Almeda fires; Unite Oregon's successful Pan-Immigrant and Leadership Organizing program (PILOT), which has trained 200+ immigrant, refugee, and

ED_016126_00000565-00004

BIPOC leaders since its inception in 2012; and Unite Oregon's COVID-19 service-to-organizing supports for over 2,500 families with emergency services resources such as rental and cash assistance, housing advocacy, economic training, and small business opportunities.

This Oregon Climate Resilience project proposal emerged from a virtual climate justice listening tour from July to October 2022 conducted by Unite Oregon and various partners. The sessions were designed to educate our communities on current statewide policies, the Just Transition framework, and Participatory Budgeting. We also wanted to hear the needs, concerns, and ideas of the frontline communities we serve regarding climate and environmental justice. The climate justice team deployed an online survey and conducted one-on-one interviews with Indigenous community members to support this process to supplement the listening sessions. Community narratives/ideas/desires/concerns are informing this project, and two other climate justice initiatives– our new East Portland Community Garden, and our rapid response Wildfire Relief & Emergency Preparedness services to impacted communities.

D. EJ Collaborative Problem-Solving (EJCPS) Model

This project combines moving along several steps of the Collaborative Problem-Solving Model based on the different tracks of work described in Sections II A and B below. Unite Oregon has engaged with Central Oregon and Rogue Valley communities in issue identification and community capacity building around environmental justice generally. These communities were part of a 4-session listening tour with 150 participants from the Portland Metro area, coast, Rogue Valley, and Central Oregon. Those conversations led to organizing and action planning to:

- Build ongoing capacity for climate justice organizing and action in Central Oregon via a new chapter of Unite Oregon with capacity to identify further EJ issues and take action using data collected and analyzed with communities;
- Establish Community Resilience Hubs to improve the ability to prevent, mitigate, and recover from wildfire and other climate disasters; and
- Reduce home energy costs.

This project will move the "Community Resilience Hub" and "Reduce home energy cost" tracks of work into consensus-based conversations on how best to achieve those goals, and form the multi-stakeholder partnerships via constructive engagement by relevant stakeholders. By Year 2 we anticipate forming the multi-stakeholder partnerships, and by Q1 of Year 3 soundly managing and implementing two Community Resilience Hubs and connecting low-income immigrant, refugee and BIPOC families to incentives for home energy efficiency improvements.

The EJCPS model is circular. Successful actions improve the environment and health for communities, and Unite Oregon and its partners are always circling back with communities for further issue identification and capacity-building. Unite Oregon will focus in Central Oregon in organizing a new chapter, which includes recruiting, onboarding, educating, and activating new leaders from communities experiencing injustice. The "building ongoing capacity" track of work

will focus on continual work in steps 1 and 2 of the EJCPS model- spinning out action plans and leadership as new issues around Climate Change response, especially in rural areas, emerge.

E. Project Linkages to EPA Strategic Plan

The Oregon Climate Resilience project is designed to build capacity with immigrants, refugees, BIPOC, and low-income communities–especially in rural areas, with Tribes, and other partners at every step to address EJ and civil rights concerns so that every community has the opportunity to thrive–no exceptions. This means active community engagement, and the ability to collect and use data, engage with various decision processes, and access the resources needed to improve resilience to climate disasters, reduce air pollution, access clean reliable water free from lead and other toxins, manage solid waste, clean up hazardous sites, and generally take action on issues most important to communities in Central Oregon and the Rogue Valley. Proposed activities, outputs, and outcomes of this project align directly to the EPA FY 2022-2026 Strategic Plan's Objective 2.1: Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels, as they advance EPA's three strategies: (1) build capacity and climate resilience and maximize benefits to overburdened and underserved communities; (2) engage and support federal, state, and local governments to achieve results in communities; (3) Integrate EJ principles into the implementation of federal programs in tribal areas and in other areas of interest to Tribes.

In line with recent Executive Order 13985: Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, and Executive Order 14008's Justice40 mandate, the project's activities will advance equity among underserved communities and where environmental, health, and economic burdens and capacity constraints co-occur – including immigrants, refugees, people of color, and low-income people, especially in remote and rural areas. Based on the needs Unite Oregon communities have shared thus far, the achievement of the Oregon Climate Resilience project's outputs and outcomes will also promote Objective 1.2: Accelerate Resilience and Adaptation to Climate Change Impacts; Objectives 4.1 and 4.2: Ensure Clean and Healthy Air for All Communities; Objectives 5.1 and 5.2: Ensure Clean and Safe Water for All Communities; and Objectives 6.1, 6.2, and 6.3: Safeguard and Revitalize Communities.

F. Partner and Collaborate

Our Oregon Climate Resilience team has deep relationships and experience in grassroots organizing and building capacity with communities, creating community-led action plans, and implementing changes that improve environmental and public health across Oregon. The partners here root our work together in values of equity such as generosity, relationality with all things seen and unseen, and across time - past-present-future. The importance of Indigenous values, partnerships, multiculturalism, leadership support, sense of humor, being a community member, and gratitude offer the building blocks to guide us in this work. Our team knows how to activate community leadership, and connect those leaders to resources and partnership with

ED_016126_00000565-00006

government and business sector partners. **Letters of Commitment from each partner organization confirming their commitment to this project are in Attachment C. All partners have been selected in compliance with competitive Procurement Standards in 40 CFR Part 30 and 40 CFR Part 31.36, as appropriate. EPA funds from this grant will go only to Community-Based Organization partners.**

Unite Oregon (a community-based organization): is experienced with the kind of multi-partner, multi-year funding and collaborative efforts needed to foster coordinated and effective on-the-ground action. As lead applicant, Unite Oregon will be the point of contact for EPA and Oregon Climate Resilience project partners. Unite Oregon will lead community engagement, capacity building, and formation of the two Community Resilience Hubs. Unite Oregon's key personnel include:

- Becca Phelps, Climate Resilience and Environmental Justice Manager;
- Rene Braga, Rogue Valley Community Organizer; and
- Lorri O'Neill, Indigenous Organizer.

Coalition of Communities of Color (a community-based organization): Formed in 2001, the Coalition of Communities of Color (CCC) is an alliance of culturally-specific community based organizations with representation from the following communities of color: African, African American, Asian, Latino, Middle Eastern and North African, Native American, Pacific Islander, and Slavic. The CCC supports a collective racial justice effort to improve outcomes for communities of color through policy analysis and advocacy, environmental justice, culturally-appropriate data and research, and leadership development in communities of color. CCC will engage its research justice team[7], specifically Drs. Andres Lopez and Mira Mohsini, to support ongoing collection and analysis of data for the project. This includes working with Unite to organize the data it collects to support its community initiatives, and creating a standard process that Unite Oregon can use to collect and analyze data moving forward. That process will include an EPA-consistent Quality Assurance Project Plan (QAPP), but one framed through a lens of research justice. CCC will continue its capacity building for Unite Oregon and community members to analyze survey results, analyze qualitative data collected during community forums, and package results into reports that inform climate resilience actions.

Warm Springs Community Action Team (a community-based organization): The Warm Springs Community Action Team (WSCAT)[8] is a non-profit community development organization located on the Warm Springs Indian Reservation. WSCAT envisions a Warm Springs Reservation in which tribal and community members control their own destinies, in which people are in a position to provide for their families, pursue their hopes and dreams, and achieve their full potential. WSCAT will work with Unite to engage community leaders informing a Central Oregon chapter of Unite Oregon. WSCAT will also co-create culturally relevant and responsive resources and materials to tribal members as part of the Community Resilience Hub in regard to emergency management programs including health and emotional health; energy efficiency; and job

[7] https://www.coalitioncommunitiescolor.org/-why-research-data-justice
[8] https://wscat.org/mission-goals/

ED_016126_00000565-00007

training opportunities in the green sector. Through all this work, WSCAT will provide tribal members opportunities to advocate for needs in regard to climate change; and support community forums for Community Resilience Hub implementation.

City of Bend (Bend), Sustainability Department (a local government): The City of Bend developed and implemented a Community Climate Action Plan.[9] The City will work with Unite Oregon to strengthen and deepen relationships with the city/community members who might currently not be engaged with the Climate Action Plan using Unite Oregon's grassroots organizing/base building tactics. Rural, BIPOC, immigrant, and refugee voices are currently underrepresented in shaping and implementing the Community Climate Action Plan and the City's strategic planning and future programming. The City of Bend will also support the project's efforts across Central Oregon, including rural areas and the Warm Springs Reservation, because we are stronger together. As with all partners, the City will connect community engagement with opportunities for community members to inform and shape policy choices.

Earth Advantage (a nonprofit): Earth Advantage[10] helps create an informed and humane residential real estate marketplace that: Acknowledges both the climate impacts of housing and the impact climate has on housing; Provides all homebuyers and renters with access to sustainability-related information about a home; Supports equitable housing outcomes, protecting those most vulnerable from the effects of climate change, and; Recognizes both the personal and societal value that climate-friendly housing creates. The organization's commitment to carbon reduction strategies is demonstrated by the 17,000+ individuals who have participated in Earth Advantage training, the approximately 4,000 high-performance residential units certified each year by our green building team, the 30,000+ homes with a verified Home Energy Score, and the over 2 million homes contained in our Green Building Registry. Earth Advantage will work with Unite Oregon and local electric utilities to build the capacity of community members to work with peers to access energy efficiency and other green homes opportunities and jobs. This includes amplifying a new green building career hub[11] with access to various career pathways and workforce development trainings in green building.

Midstate Electric Cooperative (MEC), Inc. (a rural electric Cooperative): MEC is a private, non-profit rural electric cooperative providing electrical power and related services to 17,233 member/owners in parts of four Central Oregon counties: Deschutes, Klamath, Lake, and Lane. MEC has provided power to residential, commercial, industrial, and agricultural members for 70 years. MEC will work with Unite Oregon to provide culturally responsive materials to recruit participants for energy efficiency incentive programs.

Southern Oregon Climate Action Now (non-profit): Southern Oregon Climate Action Now (SOCAN)[12] is a grassroots, volunteer, non-profit organization of area residents who care about climate change and have joined forces to take bold action against it. Through volunteer projects,

[9] https://www.bendoregon.gov/city-projects/sustainability/community-climate-action-plan
[10] https://www.earthadvantage.org/about-us/overview.html
[11] https://residentialcareerhub.org/
[12] https://socan.eco/#

they focus on reducing the impacts of Global Warming across Southern Oregon. For this project, SOCAN will support climate education workshops for Rogue Valley community members, and will work with Unite to connect our Rogue Valley community members to energy incentives and local energy incentive providers.

Unite Oregon will sustain each of these partnerships through a mix of government and private foundation funding. Unite's model of forming place-based and community-led chapters creates a cycle of ongoing leadership and capacity formation and sustains collaboration over time. Within this project, Unite will form a Central Oregon chapter to help sustain partnerships. The two Community Resilience Hubs will also institutionalize partnerships between government and community to sustain the work started before this grant, and deepened during it.

II. PROJECT ACTIVITIES/MILESTONE SCHEDULE

A. Project Activities

Our communities have told us that strong social connections lead to better mental health, and better mental health leads to better physical health. Our communities have told us they have a strong interest in their own sovereignty–their ability to shape their future, care for neighbors, and respond in the face of adversity. This Oregon Climate Resilience project builds on those directions from the community, focusing first in some of the areas with high climate disaster risk, pre-existing pressures on economic and environmental health, and where community leaders are stepping forward to take action.

These areas are the rural areas of Central Oregon and the Rogue Valley, including the Confederated Tribes of the Warm Springs Reservation, Cow Creek Band of Umpqua Tribe of Indians Reservation, and ceded lands for several other Oregon Tribes. The project's goals are to:

- Strengthen the capacity of community leaders in Central Oregon and the Rogue Valley to organize around climate justice, and take action on policies and other systemic inequities affecting their communities;
- Create the policies, procedures, and resources (via two Community Resilience Hubs) so communities with limited English proficiency, immigrants, rural Oregonians, and people of color have the same, safe, comfortable access to disaster response assistance from government, the private sector, and their neighbors; and
- Reduce home energy costs by increasing rural and tribal community access to residential home energy efficiency incentives from federal, state, and utility sources.

Goal 1: Strengthen capacity to take climate justice action

Unite Oregon will work with its Rogue Valley chapter and Warm Springs Community Action team to deepen and expand culturally specific outreach and recruitment efforts around climate and environmental justice in Central Oregon and the Rogue Valley.

ED_016126_00000565-00009

Task 1.1. Stand up a Central Oregon chapter of Unite to expand the work there: Unite Oregon's chapters provide ongoing capacity to recruit, grow, and support community leaders. Chapters are community-driven, and a space for community leaders to meet and collaboratively organize and advocate for policies that increase equity. Unite Oregon and Warm Springs Community Action team will lead engagement and planning to form a Central Oregon chapter focused especially in the Warm Springs Reservation lands, rural communities in Jefferson, Crook, and Deschutes Counties, and in the City of Bend. We anticipate reaching at least 200-230 people through a range of engagement efforts. That outreach will identify and support a core of 50-60 leaders we anticipate will lead a Central Oregon Chapter. Some of the supports a chapter would provide include:

- Expanding culturally specific outreach and recruitment efforts;
- Providing language interpretation to communities we serve in Central Oregon;
- Focusing on Indigenous outreach and relationship building;
- Providing capacity to a wide range of action campaigns to address injustice–environmental and otherwise; and
- Sustain Central Oregon's first chapter leadership council

Task 1.2. Deepen data justice capacity to analyze data and tell community stories: In partnership with the Coalition of Communities of Color (CCC), Unite Oregon will revisit communities who participated in our 2022 climate justice listening tours to provide the results of those listening tours with the release of our Climate Justice Listening Tour report. This follow up with community members will help Unite Oregon and CCC update a data justice training and approach for climate justice.

With an updated data justice training and approach complete, Unite Oregon and CCC will work with partners and community leaders to train 20-30 community leaders and partners on data justice best practices, and build community capacity to collect, assign meaning, and communicate the stories that their own data point to. Data justice[13] capacity strengthens the ability of community leaders to identify needs and opportunities, craft their solutions, and work with others to implement those solutions. The Warm Springs Community Action team will be a central focus for building this data justice capacity as a complement to the ongoing work on community development in the Confederated Tribes of the Warm Springs community.

Task 1.3. Sustain and expand engagement in the Rogue Valley: Unite Oregon's Rogue Valley chapter presented at and assisted in outreach and recruitment efforts for the first annual Southern Oregon University Climate Justice Conference in 2022. This work brought attention to climate justice issues in the region and allowed Unite Oregon to build new and strengthen existing relationships with community members, organizational partners, and stakeholders. We aim to build on these relationships in the coming years reconnecting with existing relationships and meeting new community members (about 300 people total). Unite Oregon's Rogue Valley chapter and Indigenous organizing staff will also engage with Cow Creek Band of Umpqua Indian Tribe members and other Indigenous communities connected to the Rogue Valley. Together

[13] https://www.datacenter.org/services-offered/research-justice/

ED_016126_00000565-00010

with the Rogue Valley chapter members, Unite Oregon's climate justice team will conduct "train the trainer" events to grow the capacity of the Rogue Valley chapter to engage in climate justice-related policy and other organizing work. Additionally, this model of training and community engagement will inform Unite Oregon's expansion to Central Oregon.

Goal 2. Increase utilization of energy efficiency incentives and reduce home energy costs by immigrants, refugees, people of color, and low-income Oregonians

Task 2.1. Partners understand existing incentive programs & community barriers to accessing them: Unite Oregon will work with Midstate Electric Cooperative, City of Bend, Earth Advantage, and other partners to understand the existing and emerging energy efficiency incentives available from the State of Oregon, utilities, and federal agencies under the Inflation Reduction Act and Bipartisan Infrastructure Law. There are many new programs, and our partners need to ensure we understand new opportunities available to Indigenous, immigrant, refugee, BIPOC and rural communities. Unite Oregon will work with community leaders, via listening sessions and community events, to understand barriers to accessing existing programs and potential barriers to accessing emerging programs. Some of the targets communities have articulated via the statewide Building Resilience coalition[14] include:

- Install 500,000 new heat pumps for low income households;
- Update building codes so new construction improves indoor air quality, even with wildfire smoke;
- Set energy efficiency standards for commercial buildings; and
- Update public buildings to be clean, efficient, and centers for resilience.

Task 2.2. Provide outreach campaigns to connect residents to incentive programs: Unite Oregon will work with the same parts in Task 2.1. to implement outreach campaigns specific to the immigrant, refugee and BIPOC communities Unite Oregon serves in Central Oregon and the Rogue Valley (reaching at least 200 households). We will provide translation and interpretation into the languages of the communities we serve, which can include Spanish, Burmese, Arabic, Nepali, Amharic, Swahili, Somali, and Thai. We anticipate that about 50% of the people we reach will utilize incentive programs (about 100 households).

Task 2.2. Increase and sustain more diverse utilization of energy efficiency incentives: Unite Oregon will work the same partners in Task 2.2. to institutionalize culturally-specific engagement practices within the organizations who provide incentives. This will sustain the ongoing outreach needed, and lead to policy and procedural changes needed to overcome some of the existing barriers to accessing energy efficiency incentives. Unite Oregon will also work with partners to compile lessons learned and share those lessons learned with other energy incentive providers–especially rural electric cooperatives.

Goal 3: Create equal, safe, comfortable access to climate disaster resources for response, recovery, and resilience

[14] https://buildingresilience.org/what-were-working-on

ED_016126_00000565-00011

Task 3.1. Map necessary system components for a Community Hub: Unite Oregon will work with its Rogue Valley Chapter and emerging leaders in a future Central Oregon Chapter to identify the component parts of a Community Resilience Hub in each region. Unite Oregon is aware of some of these component parts based on our Almeda Fire/Rogue Valley work, which include:

- A central point for gathering, information sharing, and coordination in response to a disruption in the community;
- Is positioned, operated and resourced on a day-to-day basis to provide community resources, including but not limited to food, water, information exchange, electronic charging stations, basic medical supplies and equipment proportionate to the size of the community's population and needs;
- Community cache sites and support for community members who shelter in place;
- Child care, training, food distribution and other services so a community can respond to unmet social needs to prepare for, respond to and recover from disasters; and
- Provide, or retrofitted to provide, heating, cooling, air filtration and weather protection.

As part of Task 3.1, Unite Oregon will review these components with community leaders and partners to see which services might need to be adapted, added, or removed. Unite Oregon will also work with partners to identify how these Hubs and associated networks can/need to be integrated with ongoing efforts from local and state offices of emergency management, Oregon's Medicaid 1115 waiver implementation for climate response, county services, and nonprofit emergency response such as the Red Cross.

Task 3.2. Craft multi-stakeholder partnership for implementation of the Hub: Unite Oregon and project partners will continue to convene potential Community Hub partners in the Rogue Valley and Central Oregon to come to consensus on agreements needed to implement the Hubs. Those agreements include:

- Staffing, roles and responsibilities;
- Commitments to center justice and strategies for culturally-specific services; and
- A budget and sustainability plan to ensure the Hubs exist over time.

Task 3.3. Activate two Community Resilience Hubs: Hub partners will begin implementing the partnership agreements developed in Task 3.2. Unite Oregon will also work with partners to compile lessons learned and share those lessons learned with other climate and emergency response networks–especially rural and tribal wildfire and emergency response networks.

B. Milestone Schedule

Project Year / Quarter	Year 1		Year 2		Year 3	
	Q 1-2	Q 3-4	Q 1-2	Q 3-4	Q 1-2	Q 3-4
Milestone						
Strengthen capacity for climate action						
Central Oregon chapter: 200-230 outreach contacts	30	40	45	45	40	30
50-60 potential community leaders reached and trained	5	10	15	15	10	5
90% of community leaders (52) report gaining new knowledge of climate justice and new leadership skills	4	9	13	13	9	4
Central Oregon chapter: Leadership committee formed		50%	100%			
Data justice: 2 listening session revists	2					
Data justice: 20-30 partner and community leaders trained		15	15			
Rogue chapter: Grow capacity and sustain relationships via 300-330 contacts	55	55	55	55	55	55
Increase utilization of energy efficiency incentives						
Compiled, culturally-specific information on energy efficiency incentives- both opportunities and barriers	50%	100%				
200 community households reached with outreach campaigns			50	50	50	50
90% of households reached (160) report their access needs were met regardless of language or disability			40	40	40	40
50% of households reached (100) applying for energy efficiency incentives- disaggregated by rural, BIPOC, and income			25	25	25	25
Sustainability plan complete for continuing culturally-specific outreach services					50%	100%
Lessons learned package created and shared with other energy efficiency incentive providers					50%	100%
Create equal access to climate disaster resources for response, recovery, and resilience						
Community Hub component parts identified and adapted for Central Oregon and Rogue	50%	100%				
Partnership agreements finalized between Hub partners			50%	100%		
Two Community Resilience Hubs are active					50%	100%
Lessons learned package created and shared with other energy efficiency incentive providers					50%	100%
Reporting & communications						
Semi-annual reports submitted to EPA	1	1	1	1	1	1
Quarterly meeting with EPA Regional Project Officer	2	2	2	2	2	2
Participation in EJ Grantee Training Workshops		1		1		1
Final Technical and Status Reports to EPA						100%
Post-project updates to EPA Regional Project Officer	2+ updates post Year 3					
Total Award Expended (Estimated %):	10%	30%	40%	60%	70%	100%

C. Itemized budget & budget narrative

See Attachment A for Budget and Budget Justification.

Total Project Cost:
Federal funds requested: $500,000 (approx. $167,000/yr)

III. ENVIRONMENTAL RESULTS- OUTPUTS, OUTCOMES, MEASURES

A. Environmental Results (Logic Model)- **see Attachment B**

B. Performance Measurement Plan

Unite Oregon manages all of its projects using a combination of initial work planning and goal setting, regular project/management/financial staff check ins, and utilizing the project management tool Asana to track who is working on which tasks. Unite Oregon also uses an internal CRM Database for entering and tracking all data, which we will use for reporting purposes. Unite Oregon collects consistent community engagement data across project and funding types (e.g., participant numbers; training and engagement session attendance; demographic information for participants; participants receiving language interpretation, stipends, mileage, childcare, food, technology supports; and skills and capacities gained).

These systems allow for multiple collaborative efforts to go on simultaneously with a mix of community, external organizations, and internal staff teams. Unite Oregon also practices continual learning, reflecting on projects and programs based on Unite staff and community feedback at regular intervals during and after a project. That learning focuses on successes achieved, opportunities for improvement, and lessons to inform practices across programs.

As part of this project, Unite Oregon is also excited to work closely with our EPA program officer in Region 10 and other EJ grantees through training workshops and other cohort learning and sharing opportunities. We are also excited to work with the newly announced Thriving Communities Technical Assistance Centers here in the Northwest. Unite Oregon will track project and fiscal information needed to provide semi-annual and final reports to EPA, especially information on how this project serves Justice 40 communities. Unite Oregon also commits to providing regular post-project updates to our EPA project officer.

C. Sustainability Plan & Community Vision

Unite Oregon commits to communities for the long-term. Part of this project establishes a Central Oregon chapter of Unite Oregon (launching with dedicated staff) and deepens capacity and relationships in the Rogue Valley. These organizing structures help sustain partnerships and relationships. Ongoing funding partners include grants from public (e.g., Oregon Health Authority) and private (e.g., Energy Foundation, Meyer Memorial Trust, Oregon Community Foundation, etc.) grants.

The climate resilience hub activities and the actions to improve access to energy efficiency incentives will be incorporated into the normal operations of government and energy utilities. Part of the partnership formation includes how offices of emergency management, healthcare, and others can fund the ongoing work of climate hubs through their annual budget lines.

IV. PROGRAMMATIC CAPABILITY

A. Organizational Experience

Unite Oregon has decades of experience across Oregon connecting community members to find the solutions they need in ways that disrupt patterns of extraction, exploitation, and dependency. Unite Oregon uses civic engagement, policy advocacy, intergenerational leadership development, community organizing, and community services to advance the justice our communities seek. Those focal areas today include Climate, Housing, Community Safety, Education, Economic, and Health justice.[15]

Unite Oregon's leadership programs have graduated over 100+ immigrants, refugees, and BIPOC from our no-cost popular education-based programs, and our founder Kayse Jama[16] moved on from Unite Oregon to become the first former refugee, Black Muslim and Somali-American to serve in the Oregon State Senate. Our Refugee, Immigrant, BIPOC , Political Leadership and Education (RIPPLE) program educates community members on how to organize, advocate for communities, turn ideas into policy, and run for office. Anti-Displacement PDX focuses on empowering, educating, and developing advocacy skills to create opportunities that minimize displacement risks for our communities in the Portland Metro area. Unite Oregon has also grown its capacity to link direct services and organizing–building a community garden, delivering rental and other assistance during the COVID-19 pandemic, and following our communities' interest in climate and environmental justice.

In 2020, our communities called on Unite to support a culturally-specific response to the Almeda Fire in the Rogue Valley. In 2022, our partners with Oregon Just Transition Alliance and Participatory Budgeting Oregon called us in to engage in listening to communities about climate concerns. These projects have grown into a relatively new body of Climate Justice work for Unite, but a set of services and organizing communities are increasingly calling for.[17]

B. Staff Experience

The Oregon Resilience Project will be co-led by Unite Oregon's Becca Phelps, Climate Resilience and Environmental Justice Manager; and Rene Braga, Rogue Valley Climate Justice Community Organizer. Resumes that highlight the expertise and relevant experience of key Unite Oregon staff and external partners are attached in Attachment D. Unite Oregon's key personnel include:

---

[15] https://www.uniteoregon.org/our-work-1
[16] https://www.oregonlegislature.gov/Jama
[17] https://www.uniteoregon.org/climate-justice.

Becca Phelps, Climate Resilience and Environmental Justice Manager, will oversee this Oregon Climate Resilience project. Becca's superpower is basebuliding/networking/grassroots organizing. She has co-led campaigns, managed youth education environmental programs, and bridged rural/urban communities to work together. Her experience with Unite Oregon and The Environmental Center in Central Oregon[18] centered a lot of growing new relationships (e.g., cold calling grassroots efforts, door knocking, etc.) and establishing sustainable programs. Becca established the Green Leadership Coalition for The Environmental Center for high school youth, and was able to acquire long-term funding within the first year of the launch. Becca approaches her work through a lens of trauma-informed care and leadership development.

Rene Braga, Rogue Valley Climate Justice Community Organizer, will lead the engagement, climate hub, and energy efficiency outreach work in the Rogue Valley. Rene's superpower is recognizing and distinguishing tools designed to maintain certain power structures to more effectively help dismantle them, and create a more equal, fair, compassionate and informed collective, where we can all raise our kids safely. Rene was a frontline responder to the Almeda fire in the Rogue Valley. He provided direct outreach and engagement to the Latinx communities in the FEMA camps after the fire. He developed outreach printed materials, videos, and other materials to connect people to resources for recovery. Rene canvassed communities via in-person and virtual methods, and acted as a translator (both English-Spanish and bureaucrat-community) between institutions with resources and communities who need them. Rene also has a background in financial education through his work at local banks.

C. Expenditure of Awarded Grant Funds

Unite Oregon's Finance and Development Teams have robust internal controls to ensure appropriate use and tracking of federal funds. Unite Oregon will track the funds discretely and evaluate each cost for allowability, as well as compare the budget to the actuals on a monthly basis. We are also currently undergoing a uniform guidance assessment which will ensure that our policies and procedures align with cost assignment principles under the Office of Management and Budget compliance regulations. Some of the procedures we currently use include:

- Timesheets coded to particular projects;
- Providing project managers with monthly budget to actual expenditures by project and budget categories;
- Monitoring sub awardees for compliance with grant objectives; and
- Ensuring Civil Rights compliance and broader consistency with equity and justice values for ourselves and our sub awardees.
- PEX online software to disburse needs-based and program participation compensation (includes discreet charge of request, approval, and fulfillment activities)

[18] https://envirocenter.org/

ED_016126_00000565-00016

Unite Oregon's finance team uses MIP Fund Accounting software to track federal grant compliance and timely appropriate use of funds. Unite Oregon receives annual independent financial statement audits, and has yet to complete its 2022 audit.

V. PAST PERFORMANCE

Unite Oregon has managed complex state, local, and private grants and contracts. Unite Oregon recently completed our first direct federal grant with the Environmental Protection Agency in February 2023. Over the past three years, our organization received various federal funds via subawards, grants, and contracts to provide wildfire resources, cash assistance, and preparedness materials to our community members. Five relevant awards to Unite Oregon in the last three years are highlighted below:

Environmental Protection Agency: People Science Training and Risk Assessment for Low-income Latinx and BIPOC Families to Address Hazardous Air Pollutants and Health Impacts (FEDERAL AGREEMENT #Ex. 6 Personal Privacy (PP), $75,000, 2/1/2022-2/1/2023)

Unite Oregon recently completed a grant in the Rogue Valley to increase the community awareness of air quality, heavy metal exposure, particulate matter, asbestos fibers, contaminated soil, and to take health preventative measures during poor air quality days. These funds also supported training community members on emergency response procedures to help protect families during future catastrophic fires, as well as interventions to mitigate negative health impacts and strengthen the overall health of our communities. Unite Oregon has consistently complied with EPA reporting requirements and meetings with our program officer.

Oregon Health Authority: Public Health Modernization ($525,000, April 2022-June 2023)

Unite Oregon is completing the final quarter of our environmental public health, climate change, and emergency preparedness work under this grant. Unite Oregon has identified, assessed, and reported risks to human health from exposure to environmental and occupational hazards, and supported communities with potential risks where they live, work, play, and learn to remain healthy and safe. Oregon Health Authority (OHA) provided an amendment with additional funding to Unite Oregon to increase our capacity to expand this work in the rural Rogue Valley. Unite Oregon completes quarterly reports and meets with an OHA program officer monthly under this grant agreement.

Meyer Memorial Trust: Environmental Justice Data Mapping ($90,000, 4/1/2022 to 3/31/2023)

This award centers Oregon's frontline and fenceline communities and community-based organizations in the development of environmental justice data and mapping tools across the state. Unite Oregon has led 4 regional climate justice listening tour sessions with 200 people engaged to influence the environmental justice mapping tool launch via the governor's office.

Unite Oregon successfully managed, executed and completed all grant agreements and reporting requirements.

American Red Cross via Oregon Community Fund: Wildfire Recovery and Rebuilding ($250,000, 1/1/2021-8/31/2022)

Through this grant Unite Oregon was able to successfully execute various recovery and rebuilding efforts to support wildfire survivors that were displaced by the 2020 Almeda wildfire in the Rogue Valley. We distributed funds directly to our low-income, undocumented and BIPOC community members, which assisted with rent payments, utility payments, etc. Additionally, Unite Oregon dispersed essential items for families who lost everything, including emergency go-bags, food, hygiene products, suitcases, plastic storage containers, clothing for children and adults, personal protective equipment, and air purifiers. We shared information through community networks and social media about relief efforts and resources available to displaced families. Unite Oregon met all grant and reporting requirements in a timely manner.

Oregon Consumer Justice: Climate Justice Capacity Building ($100,000, 6/1/2022-6/30/2024)

Unite Oregon aims to support capacity building for our staff in climate justice-related consumer justice issues, including energy costs/utilities, energy efficiency, knowledge of rebate programs, electrification, transportation, and advancing policies related to decarbonization for buildings and homes. For this project, Unite Oregon is conducting trainings and listening sessions across the state related to climate justice and consumer justice issues, addressing topics that disproportionately affect low income, immigrant, refugee, non-English-speaking, BIPOC community members to ensure that our communities are centered in our consumer justice and climate justice efforts. Unite Oregon is successfully managing grant requirements.

VI. QUALITY ASSURANCE PROJECT PLAN

This project will require a Quality Assurance Project Plan (QAPP), which will be developed upon notice of award. Unite Oregon has developed an EPA-approved QAPP recently as part of another EPA grant with Beyond Toxics[19] that measures particulate matter and soot in homes in wildfire-affected communities in the Rogue Valley. We will use that QAPP as a model for this project, but anticipate only collecting qualitative data on community needs and preferences.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Farmworker Justice

Address: 1126 16th St. NW
Ste LL-101

City: Washington

State: DC: District of Columbia Zip Code: 20036

B. Unique Entity Identifier (UEI): P5KWHV8QH7F1

C. Applicant/Recipient Point of Contact

Name: Alexis Guild

Phone: Ex. 6 Personal Privacy (PP)

Email: aguild@farmworkerjustice.org

Title: Vice President, Strategy & Programs

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☐ Yes ☒ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☒ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☐ Yes ☒ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☐ Yes ☒ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Natalie Camacho Mendoza	CEO	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

EDUCATION

American University, School of International Service; Washington, DC (2011-2012)

- Master in International Service. August 2012.

Indiana University; Bloomington, IN (1998-2001)

- M.S. Environmental Sciences; Master of Public Affairs. May 2001.
    - o Overseas study: National Institute for Development Administration, Bangkok.

University of Puerto Rico; San Juan, Puerto Rico (1994-1998)

- B.S. in Natural Sciences. Major: Environmental Sciences. May 1998.

EXPERIENCE

Farmworker Justice; Washington, D.C. (2019-Present)

- Project Director, Occupational Safety and Health
    - o Lead the organization's occupational safety and health projects, including those on heat stress, wildfire smoke and pesticide protections
    - o Advocate before EPA and OSHA for better environmental and workplace protections for farmworkers
    - o Provide technical assistance and training to community health center staff aimed at improving agricultural workers' access to quality health care and other services
    - o Contribute research and writing for publications on farmworker health topics, including a Health Policy Bulletin, issue briefs, reports, etc.
    - o Write comments to federal and state agencies concerning pending regulations and programs affecting farmworker health and environmental justice
    - o Translate or review Spanish translations of published materials

Freelance translator (2013-2015)

- Performed English-Spanish and Spanish-English document translation

Amnesty International; Washington, DC (2011-2012)

- State Death Penalty Abolition Coordinator (Volunteer)

- Organized events, planned/managed event logistics and coordinated volunteer efforts

Environmental Law Institute; Washington, DC (2012)

- Visiting Researcher
  - Supervised interns
  - Researched natural resource management's role in post-conflict recovery

Bentz Whaley Flessner; Arlington, VA (2011)

- Research Associate
  - Collected and analyzed philanthropic giving data
  - Researched prospects for board member recruitment by institutions of higher education

Natural Resources Defense Council (2001-2010)

- Research Associate
  - Served as lead researcher and co-author of published reports on environmental policy and health
  - Performed research on issues such as pesticide exposure, endocrine disruptors, mercury pollution and water contamination to support Public Health Program projects
  - Drafted informational materials on environmental health issues
  - Planned and coordinated research projects; managed logistics
  - Designed research protocols and led field research projects; produced research reports and fact sheets
  - Drafted comments and recommendations to federal agencies on pending regulations
  - Represented the organization in interviews with Spanish language media

EDUCATION

SIT Graduate Institute, Brattleboro, VT
Master of Arts in Intercultural Service, Leadership, & Management (August 2011)
Coursework includes: Training & Design for Experiential Learning, Cross-Cultural Counseling, Development Management: Program Planning & Development, Policy Advocacy, Training for Social Action, Training of Trainers, Issues in Indigenous Rights

Bowdoin College, Brunswick, ME
Bachelor of Arts in Anthropology and English (May 1998)

EXPERIENCE

Director of Programs (March 2023-present)
Farmworker Justice, Washington, DC
Lead direction of Programs' Team ensuring alignment with mission. Oversee projects, ensuring compliance with funders' directives. Develop curriculum and implement trainings for lay health educators. Provide bilingual (Spanish/English) technical assistance and training to community-based member organizations.

Senior Project Director, Community Engagement & Health Promotion (September 2013-March 2023)
Farmworker Justice, Washington, DC
Monitor and evaluate program effectiveness and progress toward goals. Develop curriculum and implement trainings for lay health educators. Provide bilingual (Spanish/English) technical assistance and training to community-based member organizations.

Project Manager, Community Engagement & Health Promotion (December 2010-September 2013)
Farmworker Justice, Washington, DC
Currently serving as Project Manager in Farmworker Justice's Occupational Safety and Heatlh program. Develop health and safety curriculum dependent on community-based organizations' needs. Develop and implement trainings for lay health educators. Provide bilingual (Spanish/English) technical assistance and training to community-based member organizations.

Health & Safety Program Manager (June 2008-December 2010)
Association of Farmworker Opportunity Programs, Washington, DC
Served as Program Manager for the Farmworker Health & Safety Alliance. Managed three programs funded by US EPA and AmeriCorps National Direct. Developed, executed, and monitored curriculum and training for flagship pesticide safety and heat stress programs. Provided bilingual (Spanish/English) technical assistance and training to community-based member organizations. Built key relationships with member organizations, a vast network of health and safety trainers, and strategic partnerships including national and regional EPA and Department of Agriculture staff. Planned and conducted bilingual train the trainer

courses for 120 pesticide safety trainers nationawide. Presented at local and national conferences.

NORTHWEST REGIONAL PRIMARY CARE ASSOCIATION

Alaska Idaho Oregon Washington

Ron Estrada
CEO
Farmworker Justice
1126 16th St. NW, Suite LL-101
Washington, DC 20036

RE: Letter of Commitment – Funding Opportunity EPA-R-OEJCR-OCS-23-01, Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement Program

Dear Mr. Estrada,

The Northwest Regional Primary Care Association (NWRPCA) looks forward to working with Farmworker Justice on its Wildfire Preparedness and Resiliency project under EPA's EJCPS Cooperative Agreement. This project is an opportunity to support farmworker families as they encounter the continued threats due to climate change.

NWRPCA serves community and migrant health centers (C/MHCs) in region X, which includes Alaska, Idaho, Oregon, and Washington. Founded in 1983, NWRPCA offers a range of programs and services to support and strengthen C/MHCs in the Northwest and works to ensure equal access, regardless of one's financial or insurance status, to primary and preventive health care for all residents living in the region.

As a project partner, NWRPCA will support the development and dissemination of project material in Washington State. Working with the community health centers across the state, we will: support the gathering of information during the needs assessment at the beginning of the project period; encourage outreach staff at health centers to promote the dissemination of the toolkit created by Farmworker Justice to support information-sharing; participate in evaluations of the toolkit to ensure that materials are appropriate for and responsive to farmworkers; and participate in the project's Advisory Committee. In addition, NWRPCA will leverage its role as the organizer of the Western Forum for Migrant and Community Health to share FJ's toolkit and wildfire preparedness resources with health center and community organization outreach staff from Washington, Oregon, Idaho, California, Arizona, and other states from across the country that participate in the annual conference. NWRPCA will also invite Farmworker Justice to participate as a trainer at the annual Washington State Network of Promotoras and Community Health Workers Spring Intensive Training, which we help co-organize with other state and local organizations, including the Washington Association for Community Health. NWPRCA will also participate in a national convening to be held during year 3 of the project period. FJ will provide NWRPCA with a total subaward of $60,000 to support project activities.

200 W Thomas Street, Suite 330 • Seattle, WA 98119 • Ex. 6 - Personal Privacy (PP) • fax: Ex. 6 Personal Privacy (PP) • www.nwrpca.org

FJ is a valued partner. We currently co-lead a COVID-19 coalition, comprised of frontline staff from organizations in Washington and other states. Last year, NWRPCA worked with FJ and members of the COVID-19 coalition to support efforts to improve wildfire smoke and heat protections across the Western States (Washington, Oregon, and California). Wildfire preparedness and response is an important issue for our health center members who serve farmworker and rural communities. We are committed to continuing this collaboration and partnership through our partnership on the Wildfire Preparedness and Resiliency project.

Sincerely,

Bruce Gray

Washington, DC 20036

RE: Letter of Commitment – Funding Opportunity EPA-R-OEJCR-OCS-23-01, Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement Program

Dear Mr. Estrada,

Moses Lake Community Health Center (MLCHC) looks forward to working with Farmworker Justice (FJ) on its Wildfire Preparedness and Resiliency project under EPA's EJCPS Cooperative Agreement. This project is an opportunity to support farmworkers in Central Washington as they encounter the continued threats due to climate change.

MLCHC has served the communities of Grant County Washington since 1978. We have a rich history of working with the farmworkers in our area and 45 years ago we committed ourselves to providing high quality, compassionate, and comprehensive primary health services for the entire family, with a special focus on the underserved and migrant farmworkers in our community. We have a dedicated and creative Outreach team works toward the following goals:

- Provide mental health prevention information to patients and community members including access.
- Provide prevention education and control chronic diseases: hypertension, diabetes etc.
- Increase social services assistance for patients in the following areas: housing, transportation, clothing and food.
- Increase knowledge of services provided by ML/QCHC to the community and patients.
- Strengthen social and community context, leveraging social media to engage and create access to care for our patients and our partners.

As a project partner, Moses Lake Community Health Center will support the development and dissemination of project materials to farmworkers in the Moses Lake/Quincy, Washington communities. Our team of promotores de salud will: participate in the needs assessment at the beginning of the project period; share the toolkit, including educational materials, to farmworkers during outreach activities; encourage utilization of the text messaging/SMS created by Farmworker Justice to support information-sharing; participate in evaluations of the toolkit and the tech/SMS platform to ensure that materials are appropriate for and responsive to farmworkers. Moses Lake Community Health Center will participate on the project's Advisory Committee and in the national convening to be held in year 3. To support these efforts, FJ will provide Moses Lake Community Health Center with a total subaward of $60,000.

We currently partner with FJ on a variety of activities, including an outreach project focused on health insurance education and enrollment. We are committed to continuing this collaboration through our partnership on the Wildfire Preparedness and Resiliency project.

Sincerely,

Sheila Berschauer

THE SCIENCE OF IMPROVING LIVES

March 31, 2023

Ron Estrada
CEO
Farmworker Justice
1126 16th St. NW, Suite LL-101
Washington, DC 20036

RE: Letter of Commitment – Funding Opportunity EPA-R-OEJCR-OCS-23-01, Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement Program

Dear Mr. Estrada,

Through its leadership on the National Migrant and Seasonal Head Start Collaboration Office (NMSHSCO), FHI 360 looks forward to working with Farmworker Justice on its Wildfire Preparedness and Resiliency project under EPA's EJCPS Cooperative Agreement. This project is an opportunity to support farmworker families as they encounter the continued threats due to climate change.

FHI 360 is a global non-profit organization that advances equity, health and well-being through data-driven, locally led solutions — so that humanity thrives. FHI 360 has operated the Region XII Collaboration Office since 2007. NMSHSCO has been led by the current Collaboration Director, Guadalupe Cuesta, since its inception. The NMSHSCO staff have facilitated collaboration among Migrant and Seasonal Head Start, Regional Head Start, and Early Head Start programs with entities that carry out activities designed to benefit low-income children from birth to school entry and their families. FHI's MSHSCO Director and staff possess a wealth of experience, a passionate commitment to the Head Start mission, and a deep understanding of the cultural and economic realities that shape and impact MSHS families and stakeholders – attributes that are all essential to the delivery of high quality services to MSHS grantees.

As a project partner, the NMSHSCO will support the development and dissemination of project materials. Working with parents and staff at Migrant and Seasonal Head Start grantees in Washington State (INSPIRE Development Centers and Educational Services District 105), we will: support the gathering of information during the needs assessment at the beginning of the project period through the facilitation of focus groups; provide training on the wildfire preparedness and resiliency toolkit (toolkit) to Migrant and Seasonal Head Start staff to ensure the dissemination of information to farmworker parents and community members; share the toolkit, including educational materials, to farmworker parents and community members; encourage utilization of the text messaging/SMS created by Farmworker Justice to support information-sharing; participate in evaluations of the toolkit and the tech/SMS platform to ensure that materials are appropriate for and responsive to farmworkers. In addition, FHI 360 will participate on the project's Advisory Committee and leverage its national reach to engage and share information, including project materials, with farmworker parents across the United States. FHI 360 will also invite Farmworker Justice to participate with us in presentations at national Migrant and Seasonal Head Start conferences. NMSHSCO will also participate in a national convening to be held during year 3 of the project period. FJ will provide FHI 360 with a total subaward of $60,000 to support project activities.

College of Nursing
WASHINGTON STATE UNIVERSITY

April 10, 2023

Ron Estrada
CEO
Farmworker Justice
1126 16th St. NW, Suite LL-101
Washington, DC 20036

RE: Letter of Commitment – Funding Opportunity EPA-R-OEJCR-OCS-23-01, Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement Program

Dear Mr. Estrada,

The Washington State University (WSU) College of Nursing looks forward to serving as a member of the Advisory Committee on Farmworker Justice's Wildfire Preparedness and Resiliency project under EPA's EJCPS Cooperative Agreement. Wildfire risks to farmworker communities have increased as a result of climate change. This project would help address growing community needs regarding wildfire preparedness and recovery after a disaster.

Washington State University is a top tier public research university and designated land grant institution with strengths in environmental health, agricultural sciences, nursing, and human health. Dr. Julie Postma, Associate Dean for Research at the College of Nursing, Primary Investigator, and Molly Parker, RN, PhD Candidate and Research Assistant have conducted two recent studies: "Supporting Agricultural Workers during periods of Heat and Smoke", and "Monitoring and Communicating Wildfire Smoke Hazards in the Agricultural Workplace". This work is significant as there is a substantial and increasing burden of wildfire smoke among outdoor agricultural workers in the Pacific Northwest. Dr. Postma has extensive expertise in Occupational and Environmental Health. Molly Parker brings many years of farmworker community outreach experience as well as nursing experience into her current field of research.

As members of the Advisory Committee, we will provide feedback and advice on aspects of the project within our areas of expertise, which includes community-based participatory research with farmworkers and employers about wildfire and heat education and prevention. We will attend bi-annual Advisory Committee meetings in which we will provide advice regarding the design of the community needs assessment, development of the wildfire preparedness and resiliency toolkit, communications, evaluation of materials, and the scaling of the project to the

national level. We will also participate in a national convening to be held during year 3 of the project period. Washington State University will not receive remuneration for its participation as an Advisory Committee member.

FJ and Washington State University previously participated in an initiative to advocate for a Western States Pact on Heat and Wildfire Smoke to improve farmworker protections. We would like to continue this collaboration through our participation in FJ's Wildfire Preparedness and Resiliency project.

Sincerely,

Molly Parker

Washington, DC 20036

RE: Letter of Commitment – Funding Opportunity EPA-R-OEJCR-OCS-23-01, Environmental Justice Collaborative Problem Solving (EJCPS) Cooperative Agreement Program

Dear Mr. Estrada,

The Pacific Northwest Agricultural Safety and Health Center (PNASH) looks forward to serving as a member of the Advisory Committee on Farmworker Justice's Wildfire Preparedness and Resiliency project under EPA's EJCPS Cooperative Agreement. Wildfire risks to farmworker communities have increased as a result of climate change. This project would help address growing community needs regarding wildfire preparedness and recovery after a disaster.

The PNASH Center has served the Northwest for over twenty-five years, providing technical expertise and research that leads to practical solutions for agricultural workers to promote health and safety. PNASH's funding base is awarded through the National Institute for Occupational Safety and Health (NIOSH/CDC) Centers for Agricultural Safety and Health. Our overall goal is to conduct research and promote best safety and health practices for Northwest producers, workers, and communities in farming, fishing, and forestry.

PNASH has ample experience researching wildfire risks to farmworker communities in the State of Washington, Oregon and Idaho through research and education. As a member of the Advisory Committee, PNASH will provide feedback and advice on aspects of the project within our areas of expertise, which include wildfire smoke safety, air quality monitoring and modeling, health effects of wildfire smoke on farmworker communities, and safety messaging. We will attend bi-annual Advisory Committee meetings in which we will provide advice regarding the design of the community needs assessment, development of the wildfire preparedness and resiliency toolkit, communications, evaluation of materials, and the scaling of the project to the national level. PNASH will also participate in a national convening to be held during year 3 of the project

period. PNASH will not receive remuneration for its participation as an Advisory Committee member.

FJ and PNASH previously participated in an initiative to advocate for a Western States Pact on Heat and Wildfire Smoke to improve farmworker protections. We would like to continue this collaboration through our participation in FJ's Wildfire Preparedness and Resiliency project.

Sincerely,

1.0 PROGRAM OBJECTIVES

a. Project Summary Page

Project title: Wildfire Preparedness and Resiliency in Farmworker Communities

Project location: Washington state

Applicant information: Farmworker Justice, 1126 16th St. NW, Suite LL-101, Washington, DC 20036, aguild@farmworkerjustice.org

Brief Description of Applicant Organization - Farmworker Justice (FJ) is a national farmworker organization based in Washington, DC. Its mission is to empower farmworkers to improve their living and working conditions, occupational safety, health, immigration status, and access to justice. FJ partners with farmworker-serving organizations across the country to implement community-based projects focused on health care access, occupational safety and health (i.e., heat stress), and workplace rights.

Are you applying for the Small CBO Set Aside Track for $150,000 projects: No

Project Abstract: Farmworker Justice's project will build capacity among farmworker-serving partners to perform community outreach and improve wildfire emergency preparedness and disaster resiliency among farmworker communities by providing access to information and links to resources. During the three-year project, FJ will partner with organizations in Washington state to create a toolkit of resources as well as SMS/text messages to 15,387 farmworkers in Washington state. During the first two years of the project, FJ, its project partners, and the National Advisory Committee will pilot the toolkit in Washington with the aim of scaling the project to the national level during year 3.

Project Type: Training, demonstration, public education

Special Considerations: Climate Change/Disaster Resiliency, Rural Areas

Environmental Issue: Wildfire smoke

List of Project Partners: Northwest Regional Primary Care Association, Moses Lake Community Health Center, National Migrant and Seasonal Head Start Collaboration Office/FHI 360, Pacific Northwest Agricultural Safety and Health Center (academic), Washington State University College of Nursing

Will you need to develop a QAPP for your project? No

b. Environmental and Public Health Information of the Underserved Community

There are an estimated 2.4 million migratory and seasonal agricultural workers (MSAWs) in the U.S; approximately 4 million agricultural workers when including their families.[1] These workers encounter numerous structural factors that put them at higher risk for poor health

[1] Philip Martin, *Immigration and Farm Labor: Policy Options and Consequences,* 95 Am. J. Agric. Econ. 470 (2013)

outcomes compared to the general public, such as language barriers, discrimination, low wages, and substandard housing. According to the most recent National Agricultural Workers Survey (NAWS), conducted by the U.S. Department of Labor, 68% percent of farmworkers in the U.S. are foreign-born and 44% are undocumented immigrants who lack work authorization.[2]

There are multiple social determinants of health (SDOH) that negatively impact the health status of MSAWs. Most U.S. farmworkers are limited English proficient, which makes it more difficult for them to access health information and medical services, and less than half (48%) are insured.[3] Farmworkers also face a range of challenges in their ability to meet their basic needs; lack of childcare options, housing that is often inadequate and unsanitary, and systematic exclusion from safety-net programs. Economic insecurity plays a role as well; the seasonality of agricultural work results in low incomes; average and median annual family incomes for farmworker families range from $25,000 to $29,999, and 20% of MSAWs live under the federal poverty line.[4] These disparities–combined with the physically and mentally taxing nature of agricultural work–put farmworkers at increased risk for a range of adverse health outcomes.

MSAWs and their families are also often more vulnerable to the effects of natural disasters and the varied impacts of our ongoing climate crisis. Amidst rapidly changing environmental conditions, farmworkers are at increased risk for a range of health problems from exposure to pesticides, solar radiation, and heat-related illnesses. Per recent projections, significant increases in temperatures will double the number of unsafely hot work days by 2050.[5]

According to the National Climate Assessment, the current warming trend across the U.S. is expected to continue and accelerate.[6] Extreme weather events linked to climate change have made wildfire seasons longer and more severe. On average, wildfires in the Western U.S. burn six times the acreage as they did 45 years ago and the trend of more intense wildfire seasons is projected to continue as a result of global warming.[7]

Between 1984 and 2015, the number of large fires has doubled across the western United States largely in part due to climate change.[8] Shorter springs allow earlier than usual snow melts which in turn allow soils, ground cover, trees and plants to remain dry and hotter for longer. These dry and hot conditions create ideal conditions for forest fuels to be easily ignited and for wildfires to burn hotter and spread so quickly that they can be difficult to extinguish. Rising

[8] Department of Ecology. State of Washington. Retrieved from: https://ecology.wa.gov/Air-Climate/Responding-to-climate-change/Wildfire-risks

ED_016126_00000579-00002

temperatures and drier summers also contribute to the increased risk of wildfires. These effects include longer heat waves, increased drought, and lower soil moisture; the hotter and drier conditions also make way for human-ignited wildfires.[9] On average, a rise in temperature of one degree Celsius annually may increase as much as 600 percent of the area burned in a year.[10]

Impacts of wildfire smoke on farmworkers in Washington

In Washington state, the agricultural population faces significant health risks as a result of wildfire smoke and heat exposure. Washington has among the highest percentage of migrant and seasonal farmworkers in the country, with an estimated 102,304 total farmworkers supporting the state's $10.6 billion agricultural industry.[11] Counties in Central and Eastern parts of the state, where the majority of farmworkers in Washington live and work, have among the highest concentrations of polluted air and have experienced the worst wildfires in the state's history.[12]

The following Washington state counties, Yakima, Grant, Chelan, and Benton, have the highest concentration of agriculture populations and the greatest exposure to heat and air pollutants.[13] Despite their heightened risk, there remains scant information on air quality and insufficient monitoring of exposure to air pollutants from wildfire smoke in these areas.[14] In Mattawa, located in Eastern Washington, nearly 3 out 4 farmworkers reported that while working they were exposed to an unhealthy amount of wildfire smoke, and 100% of respondents said they had little or no information regarding wildfire smoke protection.[15]

In Washington state, smoke from wildfires is the main source for particle pollution. During wildfire seasons, air pollution can worsen with contaminants like pesticides and particulate matter and cause a range of acute and chronic health problems.[16] Particulates, which contain microscopic pieces of solid matter, can penetrate deeply into lung tissue and increase the risk of respiratory disease and heart problems.[17] The effects from breathing in smoke from wildfires can be fatal and include wheezing and coughing along with heart and lung disease.

ED_016126_00000579-00003

Wildfire smoke inhalation has been attributed to 15,000 premature deaths in the US, and is projected to increase to 40,000 deaths as a result of climate change.[18]

Most agricultural workers labor outdoors harvesting the fields have limited control over their working conditions. These workers may be prompted by employers or economic necessity to remain in threatened areas and continue working in dangerous conditions to harvest crops or protect farm property even as evacuations are underway. This has been an annual occurrence for vineyard workers in the Napa Valley of California, some of whom have to continue working during wildfires while surrounded by toxic smoke.[19]

Need for culturally appropriate emergency preparedness materials

The interplay between environmental stressors and existing health disparities creates unique challenges in addressing the gaps in care and outreach to farmworker communities impacted by climate change. When natural disasters hit, emergency awareness and response capacity among farmworkers is often low due to lack of transportation, geographic isolation, and a dearth of culturally appropriate information. Economic insecurity and immigration enforcement concerns may also make some of these agricultural workers unable or unwilling to seek shelter before disaster.

Farmworkers have limited knowledge of disaster preparedness in part because preparedness resources and health and safety materials are rarely provided in formats and languages that are accessible to them.[20] Language barriers and lack of communication from employers leave agricultural workers in the dark about impending dangers. Although most (62%) farmworkers in the U.S. are most comfortable speaking in Spanish, and 29% of workers reportedly not speaking any English at all, disaster and emergency response planning rarely meet the needs of these limited English proficient (LEP) communities.[21]

Safety information and resources from local health departments and emergency management agencies are often not in the primary languages spoken by local agricultural workers. A 2008 survey of farmworkers throughout Washington state found that 94% of farmworkers surveyed spoke Spanish as their primary language at home and more than three-quarters surveyed indicated that they could neither read nor write in English.[22] The dearth of culturally and linguistically appropriate safety and health information often means farmworkers receive vital emergency information and evacuation alerts too late, or not at all.

ED_016126_00000579-00004

During a wildfire in Ventura County, California, emergency warnings detailing critical information such as evacuation routes and road closures were only available in English,[23] and county officials were not able to provide real-time updates with information accessible for farmworkers until ten days after the fire started. To bridge these gaps, local immigrant rights groups such as MICOP,[24] had to mobilize quickly to provide language support and essential services for farmworkers.[25]

Strategies to improve risk communications for farmworkers

Outreach workers and community health workers are among the most trusted sources of emergency preparedness information for farmworkers. These community health workers (CHWs), or *promotores de salud*, are lay health educators who typically belong to the communities in which they work, and are able to deliver health messages that resonate with farmworker communities.

During the devastating wildfires that affected Washington state in 2021, the CHWs at the Moses Lake/Quincy Community Health Center in central Washington learned that local migratory farmworkers had not been notified of an active evacuation order during a previous fire. To ensure that the community would be better prepared in case of future disasters, they developed an emergency preparedness fact sheet and partnered with another local health care organization to prepare and deliver emergency kits to farmworkers.

These types of interventions from community health workers are best paired with clear and timely messaging. The 2018 Wildfire Smoke Risk Communication Stakeholder Symposium called for improved smoke risk communication for workers in Washington state with occupationally-focused messaging that explains risk levels for farmworkers concisely and provides actionable mitigation strategies.[26] Mobile telecommunication platforms like WhatsApp have also been instrumental in disseminating timely public safety information and multilingual resources to thousands of farmworkers during disasters.[27]

Health centers, government agencies, and community organizations can mitigate the destructive impacts of wildfires and respond more effectively to the needs of farmworker communities by embracing community mobilization and culturally appropriate service delivery models for emergency preparedness, response, and recovery.

c. Organization's Historical Connection to Underserved Community

ED_016126_00000579-00005

FJ has long-standing, close working relationships with farmworker-serving organizations in the state of Washington. We have collaborated with Moses Lake Community Health Center (MLCHC; Moses Lake, WA) on various projects, including an initiative in 2022 to advocate for a Western Pact on Heat and Wildfire Smoke. The purpose of this initiative was to urge state governments in Washington, Oregon and California to strengthen and harmonize regulatory protections for farmworkers concerning heat stress and wildfire smoke. This initiative brought together representatives of community-based organizations (CBOs), academia and other civil society groups from all three states to develop recommendations for improved farmworker protections and to issue a petition to state governors asking them to sign on to the Western Pact.

FJ has also been actively participating as a co-coordinator for three years in a COVID-19 coalition convened by MLCHC representatives to share information and resources in response to COVID-19's impacts on farmworker communities in WA, OR and CA. This coalition is composed of representatives of community-based, regional and state organizations. FJ has contributed a variety of COVID-19 educational resources created specifically for farmworkers and health providers that serve this community. Most recently, FJ co-presented the workshop "Collaborations to Support Agricultural Worker Health and Safety" together with MLCHC outreach staff at the 2023 Western Forum for Migrant and Community Health held in Long Beach, CA. This is one of a series of activities undertaken in collaboration with MLCHC and funded by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health to provide trainings to health center staff that deliver services to farmworkers and their families.

We have also partnered with the Northwest Regional Primary Care Association (NWRPCA) – member organization serving community and migrant health centers in Washington, Alaska, Oregon and Idaho – to provide training and technical assistance to health centers that serve migratory and seasonal farmworkers, including convening partners and sharing strategies to promote health insurance and health care access for agricultural workers. Most recently, FJ and NWRPCA organized an Agricultural Worker Social Determinants of Health Stakeholder Collaborative with HRSA Region X stakeholders, including those from Washington state, to share best practices and strategize solutions to protect the health and safety of health center staff and the agricultural worker patients they serve. FJ and NWRPCA are sharing strategies and resources from collaborative members to help inform their COVID-19 response and other efforts to address social determinants of health in agricultural worker communities.

Further, FJ has a long-standing partnership with Migrant and Seasonal Head Start (MSHS). FJ staff regularly present to MSHS grantees and parents at their National Conference, most recently in San Antonio, TX in April 2023. As a member of the National Migrant and Seasonal Head Start Collaboration Office's National Advisory Council, FJ has worked closely with Migrant and Seasonal Head Start grantees in Washington and other states to strengthen partnerships between MSHS grantees and local health centers that in turn promotes access to health care for families.

d. EJCPS Model

Our proposed project utilizes the seven elements of the Environmental Justice Collaborative Problem-Solving Model (EJCPS Model) to ensure that its design and implementation are guided by community input and responsive to community needs.

Element 1: Issue Identification, Community Vision, and Strategic Goal Setting

Wildfire smoke was identified as a problem having significant impacts on farmworker communities by various CBOs during meetings for the Western Pact on Heat and Wildfire Smoke (described in subsection "**c**" above). CBOs also identified gaps in emergency preparedness–such as insufficient communication of emergency information in relevant languages and difficulties reaching workers living in labor camps) – that this project will seek to address. In order to identify other gaps, design solutions and set project goals, we will conduct a needs assessment in collaboration with our community partners and our Advisory Committee. Together with our partners, we will devise solutions and collaborate in setting specific, sustainable goals and measurable objectives based on the needs identified.

Element 2: Community Capacity-Building and Leadership Development

This project will build the capacity of farmworker-serving CBOs by developing and distributing informational materials designed for farmworkers, using technology to connect communities to disaster preparedness alerts and resources, providing outreach guidance and support, and creating new collaborations through which organizations can share resources and information. It will also support leadership development by engaging community health workers, outreach workers, farmworker advocates and members of the community in the process of leading community outreach and informing the efforts of local and state policymakers to improve wildfire disaster preparedness in a way that is inclusive of underserved farmworker communities.

Element 3: Consensus Building and Dispute Resolution

We will work with our partners to create an inclusive space where they have equal opportunity to provide input in a consensus-based decision-making process. This consensus process will be designed by all the partners. Meetings will be documented and dissent noted. Should disputes arise, these will be resolved through a facilitated dialogue led by an independent facilitator.

Element 4: Multi-Stakeholder Partnerships and Leveraging of Resources

We will partner with the following stakeholders: Moses Lake Community Health Center (MLCHC), Northwest Regional Primary Care Association (NWRPCA), and the National Migrant and Seasonal Head Start Collaboration Office (NMSHSCO)/FHI 360. These organizations, through their members and outreach staff, can help us reach a large number of farmworkers in multiple key settings: community health centers, migrant and seasonal Head Start centers, agricultural workplaces and community events. By bringing our resources and expertise together, we will be able to identify gaps in wildfire preparedness, provide resources and information to underserved farmworkers, and devise strategies to maximize our impact.

Element 5: Constructive Engagement by Relevant Stakeholders

In addition to partnering with MLCHC, NWRPCA and NMSHSCO/FHI 360, we will engage a National Advisory Committee (NAC) whose members will include the Pacific Northwest Agricultural Health & Safety Center (PNASH) at the University of Washington, Washington State University, representatives from community, environmental and/or environmental justice organizations, and a representative from each of our three partner organizations (for a total of up to 8 members). The NAC will provide guidance on various

aspects of the project, including the needs assessment, materials development and evaluation, outreach and communication strategies, etc.

Element 6: Sound Management and Implementation

FJ and our partner organizations have ample experience with federal grants and have auditing and management systems in place to ensure that all financial requirements are followed.

Element 7: Evaluation, Lessons Learned, and Replication of Best Practices

In Year 2 (2025), we will evaluate all project materials with feedback from our partners and Advisory Committee and make revisions. In Year 3 (2026), an outside consultant will lead an evaluation of project results, identify best practices and areas for improvement, and develop recommendations for scaling up the project to the national level. We will convene a national meeting of farmworker-serving organizations prior to the 2026 wildfire season to discuss national replication of the project using best practices derived from Year 1 - 3 activities.

e. Project Linkages

Our project will build capacity among our farmworker-serving partners to perform community outreach and improve wildfire emergency preparedness and disaster resiliency among farmworker communities by providing access to information and links to resources. We will also engage with agencies and policymakers at the federal, state and local level to convey the results of the needs assessment and make recommendations regarding how the government can help address these needs, ensuring that our community partners are meaningfully involved in this process.

f. Partner and Collaborate

FJ has ample experience working with our three partners in this project–MLCHC, NWRPCA and NMSHSCO/FHI 360–to provide health and safety information and training to farmworkers and organizations that serve them. Having well-established relationships with our partners gives us a solid foundation on which to continue collaborating for the duration of this project and beyond. FJ has worked for years with MLCHC's Outreach and Behavioral Health Coordinator, Mary Jo Ybarra-Vega–herself a former farmworker–to provide training to community health workers (CHWs), coordinate with farmworker-serving organizations through the aforementioned COVID-19 coalition, and improve wildfire protections for farmworkers. In addition, we have a long history of collaboration with NWRPCA providing training and technical assistance to health center staff to help them better serve farmworker patients. We also work with NMSHSCO/FHI 360 to develop curricula for train-the-trainer and farmworker parents.

Our three partners are deeply involved in the provision of services to farmworker communities in the state of Washington. MLCHC has a team of 300 health professionals that delivers comprehensive primary care with a special focus on the underserved and migrant farmworkers. Their team of CHWs conducts outreach with farmworker communities, delivering health education and other services. NWRPCA provides farmworker-serving community and migrant health centers in Washington with services related to workforce development, education, training, networking, partnerships, and advocacy. It counts 9 migrant health centers in Washington among its membership, which serve approximately 100,000 farmworker patients per

ED_016126_00000579-00008

year.[28] NMSHSCO, which is staffed by FHI 360, a human development nonprofit, delivers educational and health support services for farmworker children and parents through Migrant and Seasonal Head Start Centers in Washington (INSPIRE Development Centers that serve 1,177 families and Educational Services District 105, which serves 1,257 families).

Together, we will convene community focus groups to carry out the needs assessment to identify gaps in preparedness for wildfire disasters, with guidance from the Advisory Committee. FJ will, in consultation with our partners and the Committee, develop a preparedness and resiliency toolkit consisting of materials on wildfire preparedness and recovery. Our partners will conduct community outreach and help disseminate the materials, while FJ will implement a communications and social media campaign to amplify our reach. Partners will help evaluate and improve the toolkit and assist with outreach to local and state government, as well as in convening a national stakeholder meeting to scale up the project.

2.0 PROJECT ACTIVITIES/MILESTONE SCHEDULE

a. Project Activities

FJ's *Wildfire Preparedness and Resiliency* project will address five primary goals as outlined in the Milestone Schedule. Each goal has a corresponding series of activities that will take place over the course of the three-year project.

Goal #1: Identify gaps in wildfire awareness among Washington farmworkers

In order to identify gaps in wildfire awareness, FJ and partners will first conduct a needs assessment in farmworker communities throughout Washington. The needs assessment phase will take place during the first four months of the first project year. An external evaluator (Northwest Center for Public Health Practice at University of Washington) will work closely with FJ to develop the needs assessment tools (surveys, in-depth interview questions, data trackers, etc.) and assist with implementation. During this four-month phase, FJ, partners and the National Advisory Committee (the project's expert panel assembled by FJ to provide input of critical components and phases of the project) will reach out to a variety of stakeholders (including farmworkers, farmworker-serving organizations, experts in wildfires, etc.) to assess knowledge and accessibility of existing resources, emergency preparedness plans, and the use of technology in dispensing and accessing information. The results of the needs assessment will help to inform the future components of the project. After project materials are developed FJ will lead an on-going annual evaluation to assess the efficacy and accessibility of those materials and other project components (including linguistic accessibility and cultural relevancy) in farmworker communities. FJ and partners will also identify areas for the development and communication of policy recommendations. Discussions on the topic will begin during the needs assessment phase and carry into the second and third years of the project. Ultimately these recommendations will be shared during the National Convening for Wildfire Preparedness in the final year of the project.

Goal #2: Disseminate wildfire preparedness materials to farmworkers

FJ will be working closely with partners over the course of the three-year project to prepare and disseminate wildfire preparedness materials to farmworkers. In the development of

[28] Data from the U.S. Health Resources and Services Administration 2021 Uniform Data System, available at https://data.hrsa.gov/tools/data-reporting/program-data?type=AWARDEE&state=WA

ED_016126_00000579-00009

the toolkit, FJ will lean on the expertise earned from decades of work in creating training programs and supporting materials using the principles of Popular Education, where complex topics can be distilled into more accessible formats. Assessing information gleaned from the needs assessment phase, FJ will develop a Wildfire Preparedness Toolkit in the second quarter of the first project year, the contents of which will be shared with farmworker communities throughout Washington. The materials in the toolkit (training of trainers curriculum, fact sheet, social media posts and other materials as determined by the results of the needs assessment) will be culturally and linguistically relevant (developed in Spanish and English, with the possibility of additional indigenous languages as identified in the needs assessment), highly pictorial and approachable for farmworkers of all literacy levels. FJ will share draft versions of all materials with partners, seeking feedback on linguistic terms, relevancy and accessibility of content and making edits as necessary.

Once the pilot version of the toolkit is developed, FJ will provide a training-of-trainers (TOT) workshop on wildfire preparedness to project partners at the annual Washington State Network of Promotores and Community Health Workers Spring Intensive Training. The TOT will be highly participatory, allowing participants the opportunity to share their own personal experiences and knowledge, and practice the delivery methods for the toolkit materials. The TOT will take place in the third quarter of the first project year, and a refresher training will be offered in the subsequent project years. Following the TOT, FJ and partners will begin widespread dissemination of the materials. This phase will take place during both the third and fourth quarters of each project year, beginning in the lead-up to wildfire season and then extending through the end of that season each year. NWRPCA will engage their constituency through their network of conferences and collaborations; NMSHSCO will channel their distribution through a wide network of farmworker parents that are associated with their centers throughout Washington; and Moses Lake Community Health Center will disseminate information directly through *promotores de salud* (PdS/ outreach workers). The PdS contribute to the success of FJ's outreach projects because they are trusted sources of information in their communities, typically share the same languages as the farmworker population, and strive to connect in a way that is culturally sensitive and relevant to their constituency. Over the course of the three-year project period partners will reach at least 15,387 farmworkers as they disperse critical wildfire preparedness information.

Goal #3: Develop text-based/SMS service to connect farmworker communities to disaster preparedness alerts and resources

FJ, working with a technology consultant, will develop a text-based/SMS service to connect farmworker communities to disaster preparedness alerts and resources. Beginning in the second quarter of each project year, FJ will develop 20 text messages (for a total of 60 messages over the three-year period) that will provide critical information for farmworkers. The content will be based upon the findings of the needs assessment and in subsequent years be informed by the annual evaluation assessments. Once the content is developed FJ will share the messages with partners and the National Advisory Committee (NAC) to ensure cultural and linguistic relevancy and accessibility. After the messages have been fully approved, the dissemination will begin through project partners. The PdS will share the opt-in information for the text messaging/ SMS program with farmworkers in their communities, helping them to understand the utility of the information and guiding them through the enrollment process. Partners will continue to share the text messaging/ SMS program with their networks throughout wildfire season. At the end of

ED_016126_00000579-00010

each project year, the efficacy and utility of this project component will be assessed and edits incorporated based on feedback to strengthen the messaging in subsequent years. During the scaling up of the project in the third project year the messages will be available for use by a national audience.

Goal #4: Create a social media campaign on wildfire protection

Beginning in the second quarter of each project year, FJ will develop a series of social media posts highlighting wildfire awareness that will be shared during wildfire season (20 posts per year for a cumulative project total of 60 posts). Once the content is developed, FJ will share the posts with project partners, soliciting feedback and incorporating edits. Several weeks before wildfire season officially begins FJ and partners will launch the social media campaign, sharing the content widely on their various social media platforms, including Facebook, Twitter and Instagram (to name a few). Project partners will also distribute the messages via their social media platforms. The social media campaign will allow for the critical wildfire information (including information on where wildfires are occurring, places to go for emergency assistance, etc.) to be dispersed more widely than the person-to-person outreach and in tandem with the text messaging component the social media campaign, allows for the quick, timely distribution of emergency information. Post engagements will be tracked, ultimately yielding a minimum of 2500 engagements per year (7500 engagements over the three-year project period).

Goal #5: Scale up the project to national level

The third year of the project will be geared toward scaling up for a national audience, and setting the stage for sustainability beyond the dedicated timeline of the project. After an initial assessment of the first two project years, FJ and project partners will begin the planning phase for a virtual National Convening for Wildfire Preparedness (NCWP) to be held before that year's wildfire season begins. The NCWP will bring together a wide range of participants with the goal of highlighting best practices in wildfire preparedness, identifying existing gaps in this process, and working together to solve some of the persistent issues in wildfire preparedness. The NAC and project partners will play a strong role in the planning phase, helping to identify priorities for discussion at the convening and determining the list of experts and organizations that will be invited to attend. FJ will modify the existing toolkit in preparation for the NCWP so that it is relevant for nation-wide distribution.

b. Milestone Schedule (table 1)

ED_016126_00000579-00011

	Year 1												Year 2											
Month:	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
Goal 1: Identify gaps in wildfire preparedness among WA farmworkers																								
Task 1.1: Needs assessment																								
Task 1.2: Evaluation of project materials																								
Task 1.3: Development and communication of policy recommendations																								
Milestone 1: Assess gaps in wildfire education																								
Goal 2: Disseminate wildfire preparedness materials to farmworkers																								
Task 2.1: Develop preparedness toolkit materials																								
Task 2.2: Seek partner feedback on materials; make revisions																								
Task 2.3: Partner organizations help disseminate materials prior to and during wildfire season																								
Milestone 2: Reach 15,387 farmworkers with wildfire preparedness information																								
Goal 3: Develop text-based/SMS service to connect farmworker communities to disaste preparedness alerts and resources.																								
Task 3.1: Develop & test text/SMS messages																								
Task 3.2: Promote service for farmworker opt-in																								
Task 3.3: Disseminate messages through partners' networks																								
Milestone 3: Disseminate 20 SMS messages per year to subscribers; 60 messages over 3-year period																								
Goal 4: Create a social media campaign on wildfire protection																								
Task 4.1: Test relevant messages																								
Task 4.2: Create social media content to be shared with farmworkers																								
Task 4.3: Share social media content																								
Milestone 4: 2,500 post engagements/year; 7,500 over 3-year period																								

	Year 3											
Month:	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
Goal 1: Identify gaps in wildfire preparedness among WA farmworkers												
Task 1.1: Needs assessment												
Task 1.2: Evaluation of project materials												
Task 1.3: Development and communication of policy recommendations												
Milestone 1: Assess gaps in wildfire education												
Goal 2: Disseminate wildfire preparedness materials to farmworkers												
Task 2.1: Develop preparedness toolkit materials												
Task 2.2: Seek partner feedback on materials; make revisions												
Task 2.3: Partner organizations help disseminate materials prior to and during wildfire season												
Milestone 2: Reach 15,387 farmworkers with wildfire preparedness information												
Goal 3: Develop text-based/SMS service to connect farmworker communities to disaster preparedness alerts and resources.												
Task 3.1: Develop & test text/SMS messages												
Task 3.2: Promote service for farmworker opt-in												
Task 3.3: Disseminate messages through partners' networks												
Milestone 3: Disseminate 20 SMS messages per year to subscribers; 60 messages over 3-year period												
Goal 4: Create a social media campaign on wildfire protection												
Task 4.1: Test relevant messages												
Task 4.2: Create social media content to be shared with farmworkers												
Task 4.3: Share social media content												
Milestone 4: 20 posts/year; 60 posts over 3-year period; 2,000 post engagements/year; 6,000 over 3-year period												
Goal 5: Scale up the project to the national level												
Task 5.1: Plan & hold national convening with project partners, Advisory Committee, and invited organizations												
Task 5.2: Modify project materials for a national audience												
Task 5.3: Disseminate modified materials via FJ's national network												
Milestone 5: Participation by 8 invited organizations; sustainable plan for continuing and expanding project beyond Year 3												

c. Itemized Budget Sheet

3.0 ENVIRONMENTAL RESULTS - OUTPUTS, OUTCOMES, AND PERFORMANCE MEASURES

ED_016126_00000579-00013

a. **Environmental Results (Logic Model)**

See Attachment ii

b. **Performance Measurement Plan`**

Over the three-year project period, Farmworker Justice will continuously monitor progress towards objectives and assess impact of activities (as outlined in Table 1 - milestone schedule) on target agricultural communities. Beginning in Year 1, FJ will work closely with partners and the Northwest Center for Public Health Practice (NWCPHP) at the University of Washington School of Public Health to conduct a needs assessment to identify gaps in existing wildfire disaster preparedness and risk communication to local farmworker communities. The preliminary findings from this needs assessment will inform a beta-version of a text-based/SMS service to connect farmworker communities to disaster preparedness alerts and resources.

NWCPHP will serve as the primary evaluators; evaluating findings from the Year 1 needs assessment and collecting feedback from community-based organizations and relevant stakeholders on the preparedness materials and initial launch of the SMS/text messaging platform. NWCPHP's evaluation team will design the overall evaluation and data collection plan at the start of the grant, and track data for program improvement and outcomes. In addition, their team will develop all tracking documents, questionnaires, and interview guides needed to evaluate project performance and impact. Evaluation results will be shared periodically with the FJ program team to inform continuous quality improvement of project deliverables. Summary recommendations from NWCPHP's evaluation will be used to inform revisions to the SMS messaging service ahead of wildfire season, July - October 2025.

FJ staff will meet weekly to discuss the status of activities and progress towards workplan expected outcomes and objective targets. In addition to regular coordination meetings with project partners, FJ will also consult with a technical advisory committee twice a year to review progress and solicit feedback on emergency preparedness materials.

In Year 3, NWCPHP will conduct a final evaluation of the project and share a summary report of key findings to be presented at a national meeting ahead of the 2026 wildfire season to discuss opportunities for scale-up of the text messaging service and wider dissemination of emergency preparedness materials.

c. Sustainability Plan and Community Vision

Our project is geared for sustainability beyond the three-year proposed timeline. Because this is a project that focuses on building wildfire preparedness it is both timely and relevant. The increased surge of wildfires particularly across the western United States puts everyone in the affected communities at risk; farmworkers and community members alike. Because of the heightened dangers impacting whole communities there is a demonstrated need for emergency preparedness materials that provide information and clear procedures for protective measures in the event of wildfires.

This project seeks to increase linguistically and culturally accessible wildfire preparedness information for farmworkers; in the first two years of the project collaborations

ED_016126_00000579-00014

will be formed on local, regional and state-wide levels. Important policies and gaps in those policies will be identified so that coalitions can be strengthened and/or formed in the pursuit of these protective measures. Because of the urgency of the topic these networks will continue to work together toward increased knowledge and protective measures for communities at large.

The third year of the project will focus primarily on scaling the project up for replicability on a national level. The Wildfire Preparedness Toolkit will be reworked to ensure national relevance, and will be easily accessible for future use via the Farmworker Justice website, EPA website, and other platforms. Awareness will be generated through the multi-year social media campaigns that will share critical emergency information, resources and strategies for prevention, mitigation, and safety to a wide and diverse audience. Additionally, the National Convening for Wildfire Preparedness will create a platform for scientific experts, academics, organizations and individuals to come together to identify existing gaps and share best practices in this topic.

4.0 PROGRAMMATIC CAPABILITY

a. Organizational Experience

Farmworker Justice (FJ) is a 501(c)(3) national nonprofit organization based in Washington, DC with a mission to empower farmworkers and their families to improve their health, occupational safety, immigration status, and access to justice. FJ has decades of experience in policy, outreach, and education to farmworker communities, specifically on topics related to environmental and occupational health. Our training and educational materials incorporate adult and popular education techniques in recognition of the diverse experiences and learning styles of adult farmworkers.

As discussed in Section 5.0, FJ has a demonstrated history of managing and implementing community-based projects under federal grants. Past project topics include pesticide protection, health insurance access, and worker safety training. To successfully implement project deliverables, FJ works with community-based organizations that have direct ties to farmworkers. Working with community-based organizations, FJ uses a training-of-trainers model to empower Community Health Workers/PdS to provide education to farmworkers. As trusted messengers, they provide the information and resources to the farmworkers in their communities, meeting them where they are such as in the fields, at their housing, among other locations. FJ staff meet regularly with the community partners to provide oversight and support, ensuring successful completion of the project.

b. Staff Experience/Qualifications of Project Manager

FJ staff bring expertise in occupational safety and health issues affecting farmworkers as well as substantial experience developing trainings and educational materials for outreach staff and farmworkers in both English and Spanish.

ED_016126_00000579-00015

The Project Manager, Mayra Reiter, joined FJ in September 2019, contributing her expertise in occupational safety, health, and environmental justice to FJ's policy advocacy and community-based projects. In her role as Project Director for Occupational and Environmental Health, Mayra leads FJ's environmental and occupational health advocacy at the federal and state level. In 2021, she supported the Western Pact on Heat and Wildfire Smoke (Pact), working with partners in Washington, Oregon, and California to provide policy and subject matter expertise to advocate for heat and wildfire protections for farmworkers. Several of the partners who were part of the Pact, including Northwest Regional Primary Care Association, Moses Lake Community Health Center, and Washington State University, are working with us on our proposed Wildfire Preparedness and Resiliency project. In addition to her policy work, Mayra has led projects and trainings on worker protections and is currently the project director for a heat stress training grant funded by OSHA. As Project Manager, Mayra will work with FJ staff and project partners to implement project deliverables.

Rebecca Young, Director of Programs, will support Mayra in the project. She has extensive experience in leading and developing occupational safety and health trainings and educational materials for farmworker-serving organizations. She has worked with NWRPCA and Moses Lake Community Health Center to provide trainings to outreach staff on COVID-19 resiliency and recovery. She also worked with the National Migrant and Seasonal Head Start Collaboration Office to create materials and trainings for grantee staff and farmworker parents on health and nutrition. She has been at FJ for 12 years, supporting an EPA grant previously awarded to FJ.

Other FJ staff that will support the project include a Project Coordinator, who will work with Mayra to develop the needs assessment and toolkit and will monitor day-to-day activities, a Legal Fellow to support policy research, and a communications specialist to support the social media campaign. Alexis Guild, VP of Strategy and Programs, will provide strategic oversight. She has been at FJ since 2011 and worked closely with NWRPCA, NMSHSCO, and Moses Lake Community Health Center on a HRSA-funded technical assistance project for many years, she currently leads a COVID-19 coalition of organizations and government agencies in Washington that meets monthly to share resources and strategies to support farmworkers. Ron Estrada, FJ's CEO, is the authorized representative, ensuring the availability of adequate organizational resources to meet grant requirements. Staff resumes for Mayra Reiter and Rebecca Young are included as an attachment.

c. Expenditure of Awarded Grant Funds

Yolanda Rodriguez, FJ's Director of Finance and Operations, oversees project finances and expenditure of awarded grant funds. FJ adheres to our well-established fiscal management system. Timesheets, travel reimbursement, and partner and consultant invoices are approved and reviewed by the Project Manager, the VP of Strategy and Programs, and the Director of Finance and Operations. Check requests are processed by the Director of Finance and Operations and written by our accounting consultant, who also assists in allocating expenses to the assigned

ED_016126_00000579-00016

projects. The firm, Friedman and Associates, submits monthly income and expense reports on FJ and each of our projects to the CEO and Director of Finance and Operations. The Project Manager regularly consults with the VP of Strategy and Programs and the Director of Finance and Operations to ensure that grant funds are being properly expended.

5.0 PAST PERFORMANCE

Farmworker Justice has a demonstrated history of successfully administering federal grants from CDC, OSHA, and the Health Resources and Services Administration (HRSA). We always meet reporting requirements under the agreements, including progress reports and final technical reports, and consistently achieve and often exceed the expected outputs and outcomes, as demonstrated by grantor site visits. To complete and manage agreements, we implement processes to ensure financial and programmatic oversight internally and with our project partners. Three recent grants are detailed below. FJ is also currently implementing projects from OSHA and DOL Women's Bureau that began in October 2022.

OSHA Susan Harwood Training Materials Grant: Dairy Safety Training Toolkit - Grantor: OSHA, Contact: Wylie Hinson, Ex. 6 Personal Privacy (PP) Project dates: September 30, 2021 - September 30, 2022.

- Project partner: Aurora Organic Dairy
- Expected output: A toolkit for dairy employers and workers that includes a video, fact sheet, and training guide created in English, Spanish, and K'iche. The toolkit would be piloted with 50 workers and 5 employers.
- Outcome: FJ created a training guide, student handbook, and fact sheet in Spanish and English and a dairy safety training video in Spanish with English subtitles and K'iche in Spanish subtitles. Sixty-one (61) workers were trained in Spanish, 8 workers were trained in K'iche, 5 employers were trained in Spanish and 1 employer was trained in K'iche.

OSHA Susan Harwood Training Grant: Workplace Safety and Health Training on Infectious Disease, including COVID-19 - Grantor: OSHA, Contact: Wylie Hinson, Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) Project dates: September 30, 2021 - March 31, 2023.

- Project partners: Organización en California de Líderes Campesinas (Lideres Campesinas) and Pineros y Campesinos Unidos del Noroeste (PCUN)
- Expected output: Provide 937.5 hours of COVID-19 training to at least 775 employers and workers in California and Oregon.
- Outcome: FJ and its project partners provided 988 hours of COVID-19 training to 753 employers and workers. We are still collecting numbers from our partners for the final quarter of the project.

ED_016126_00000579-00017

HRSA National Training and Technical Assistance Partner Cooperative Agreement - Grantor: Health Resources and Services Administration, Contact: Gladys Cate, Contact: Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) Project dates: July 1, 2020 - June 30, 2023

- Expected output: Increase the number of health centers that receive training and technical assistance to address the unique challenges of agricultural workers. T/TA objectives include: emerging issues, diabetes prevention and management, social determinants of health, and community partnerships. T/TA includes: webinars, resource development and dissemination (for clinicians, outreach staff, and workers), conference presentations, and peer-to-peer learning sessions. Train 1,525 health center staff to be trained and provide 111 total of T/TA sessions during the project period.
- Outcome (as of 4/1/2023): FJ has trained 4,609 health center staff and provided 188 T/TA sessions. FJ has completed all project deliverables each project year.

6.0 QUALITY ASSURANCE PROJECT PLAN (QAPP) INFORMATION

A quality assurance project plan is not necessary for this project.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Methow Valley Citizens Council

Address: PO Box 774

City: Twisp

State: WA: Washington Zip Code: 98856

B. Unique Entity Identifier (UEI): SCJCN3LPMCE7

C. Applicant/Recipient Point of Contact

Name: Nancy McKinney Milsteadt

Phone: Ex. 6 Personal Privacy (PP)

Email: nancy@mvcitizens.org

Title: Deputy Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☒ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Mary Yglesia	Deputy Director	04/10/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

This modifies our letter of the above date in which we stated that you would be treated as an organization which is not a private foundation until the expiration of your advance ruling period.

Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Internal Revenue Code, because you are an organization of the type described in section **see below. Your exempt status under section 501(c)(3) of the code is still in effect.

Grantors and contributors may rely on this determination until the Internal Revenue Service publishes notice to the contrary. However, a grantor or a contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act that resulted in your loss of section **see below status, or acquired knowledge that the Internal Revenue Service had given notice that you would be removed from classification as a section **see below organization.

Because this letter could help resolve any questions about your private foundation status, please keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above. **509(a)(1)&170(b)(1)(A)(vi).
Attached caveats are an integral part of this letter.

Sincerely yours,

Teddy K. Kern

Accounting Period Ending:
December 31
Foundation Status Classification:
*509(a)(1) & 170(b)(1)(A)(vi)
Advance Ruling Period Ends:
December 31, 1985
Person to Contact:
R. Hutchins
Contact Telephone Number:
Ex. 6 Personal Privacy (PP)

Farmworker Justice Fund, Inc.
806 15th Street, N.W.
Washington, D.C. 20005

Dear Applicant:

Based on information supplied, and assuming your operations will be as stated in your application for recognition of exemption, we have determined you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code.

Because you are a newly created organization, we are not now making a final determination of your foundation status under section 509(a) of the Code. However, we have determined that you can reasonably be expected to be a publicly supported organization described in section 509(a)(1) & 170(b)(1)(A)(vi).

Accordingly, you will be treated as a publicly supported organization, and not as a private foundation, during an advance ruling period. This advance ruling period begins on the date of your inception and ends on the date shown above.

Within 90 days after the end of your advance ruling period, you must submit to us information needed to determine whether you have met the requirements of the applicable support test during the advance ruling period. If you establish that you have been a publicly supported organization, you will be classified as a section 509(a)(1) or 509(a)(2) organization as long as you continue to meet the requirements of the applicable support test. If you do not meet the public support requirements during the advance ruling period, you will be classified as a private foundation for future periods. Also, if you are classified as a private foundation, you will be treated as a private foundation from the date of your inception for purposes of sections 507(d) and 4940.

Grantors and donors may rely on the determination that you are not a private foundation until 90 days after the end of your advance ruling period. If you submit the required information within the 90 days, grantors and donors may continue to rely on the advance determination until the Service makes a final determination of your foundation status. However, if notice that you will no longer be treated as a section *see above organization is published in the Internal Revenue Bulletin, grantors and donors may not rely on this determination after the date of such publication. Also, a grantor or donor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act that resulted in your loss of section * status, or acquired knowledge that the Internal Revenue Service had given notice that you would be removed from classification as a section * organization.

Letter 1045(DO) (6-

P.O. Box 13163, Baltimore, MD 21203

ED_016126_00000587-00002

If your sources of support, or your purposes, character, or method of operation change, please let us know so we can consider the effect of the change on your exempt status and foundation status. Also, you should inform us of all changes in your name or address.

Generally, you are not liable for social security (FICA) taxes unless you file a waiver of exemption certificate as provided in the Federal Insurance Contributions Act. If you have paid FICA taxes without filing the waiver, you should call us. You are not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Organizations that are not private foundations are not subject to the excise taxes under Chapter 42 of the Code. However, you are not automatically exempt from other Federal excise taxes. If you have any questions about excise, employment, or other Federal taxes, please let us know.

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

You are required to file Form 990, Return of Organization Exempt from Income Tax, only if your gross receipts each year are normally more than $10,000. If a return is required, it must be filed by the 15th day of the fifth month after the end of your annual accounting period. The law imposes a penalty of $10 a day, up to a maximum of $5,000, when a return is filed late, unless there is reasonable cause for the delay.

You are not required to file Federal income tax returns unless you are subject to the tax on unrelated business income under section 511 of the Code. If you are subject to this tax, you must file an income tax return on Form 990-T. In this letter, we are not determining whether any of your present or proposed activities are unrelated trade or business as defined in section 513 of the Code.

You need an employer identification number even if you have no employees. If an employer identification number was not entered on your application, a number will be assigned to you and you will be advised of it. Please use that number on all returns you file and in all correspondence with the Internal Revenue Service.

Because this letter could help resolve any questions about your exempt status and foundation status, you should keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown in the heading of this letter.

Sincerely yours,

District Director

Methow Valley Citizens Council
Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program
"Empower EJ communities to build climate resiliency through community-oriented solutions, fuels reduction programs and protecting health from poor air quality. "

1.0 PROGRAM OBJECTIVES

a. Project Summary Page

Project title: "Empowering environmental justice communities to build climate resiliency through community-oriented solutions, fuels reduction programs and protecting health from poor air quality."

Project location: Okanogan County, WA. The boundaries for this project roughly include the airshed that is defined by Water Resource Inventory Area (WRIA) 48 and 49. The Methow River Basin (WRIA 48) and the Okanogan River Basin (WRIA 49) are in Okanogan County in north central Washington. The towns within this area include: Mazama (98833); Winthrop (98862); Twisp (98856); Carlton (98814), Methow (98834), Pateros (98846), Okanogan (98840), Omak (98841), Tonasket (98855), Brewster (98812), Oroville (98844), Wauconda (98859), Elmer (99124) and Nespelem (99116).

Applicant Information: Clean Air Methow; Methow Valley Citizens Council; Jasmine Minbashian; Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP), Twisp, WA 98856; jasmine@mvcitizen.org; Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization: Methow Valley Citizens Council (MVCC) is dedicated to raising a strong community voice for protection of the Methow Valley's natural environment and rural character. Since 1976, we have educated the public and decision makers on key environmental and land use issues that define the character of the Methow Valley; engaged citizen participation so our collective voice is heard; and advocated to ensure that environmental laws and regulations are followed. Projects include land use planning; protecting waterways from pollution and over-development; and ensuring a sustainably clean airshed. Climate change mitigation and adaptation concepts are incorporated across all programs.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No

Project Abstract: Okanogan County is a geographically isolated, under-resourced rural area with residents dispersed among the east slopes of the Cascade Mountains with year-round PM2.5 exposures from smoke (predominantly wildfire, prescribed fire, outdoor burning, and woodsmoke). With growing anticipation of annual wildfires due to a changing climate and prescribed burning in the forests surrounding towns in Okanogan County, measures to ensure climate change resiliency, encourage alternatives to burning, and protect public health from smoke are of critical importance. MVCC recently led a two-year, community-based climate action planning process that evaluated climate change vulnerabilities and identified priority adaptation and mitigation solutions. Advancing the area as a fire- and smoke-ready community is named as a top strategy towards building climate resiliency. Furthermore, North Central Washington is comprised of many organizations, businesses, and government entities with similar missions, visions, and values regarding climate resiliency. In 2025, MVCC and partners will host an Air and Climate Conference in North Central Washington to engage the broader region and procure commitments from local governments on action items directly related to strengthening climate resiliency for vulnerable and overburdened communities. It is anticipated that this work will inform, engage, and deepen connections between overburdened and vulnerable communities across North Central Washington.

Project Type: Monitoring, Demonstration, Public Education
Special Considerations: Climate change/disaster resiliency, rural areas
Environmental issues: Air, climate
Project Partners: Okanogan Conservation District, Pateros Brewster Resource Center, Fire Adapted Methow Valley, University of Washington Climate Impacts Group, The Colville Tribal Reservation Natural Resources Division, Washington State Department of Ecology Air Quality Program
QAPP required? No
Environmental and Public Health information of the Underserved Community

ED_016126_00000591-00001

Extensive heat and extreme, prolonged wildfire smoke events are becoming increasingly frequent phenomena across the Western United States, and are related to manifestations of climate change (e.g. drier forests more susceptible to insects and disease, lower snowpack, etc.). Rural communities in fire-prone and heat-island areas dependent on the outdoors for livelihoods, recreation, and cultural practices, are particularly hard hit. These communities are often already grappling with inadequate access to healthcare services, alternative income sources, and insufficient and low-quality housing.

Okanogan County is located on the eastern slope of the North Cascade Mountain range with approximately 43,000 residents dispersed along drainages; the largest two towns (Okanogan and Omak) each have under 2,600 and 4,700 residents respectively. We utilized the EPA's EJSCREEN tool to provide demographic information for the Okanogan County to provide Okanogan County level statistics, and those are taken into consideration in the discussion below.

For specific information on Okanogan County, we used relevant demographic information from a Data USA report. Residents of Okanogan County are mostly white (64.6%) with a Hispanic population of (20.4%). Okanogan County (pop. 41,638), is also one of the poorest counties in the state (over 55% of households below $50k/yr. and the lowest population density (8 persons/sq. mile). The Data USA report states that the median household income is $50,434 per year, and one quarter earns less than $25,000 per year. Twenty-nine percent of children under the age of 18 are living in poverty (matching the high county poverty rate of 30%), suggesting that it is hard to get by in the valley while raising a family. EJ Screen was used to determine other demographics relevant to this application.

According to EJ Screen, Okanogan County is in the 78th percentile for PM2.5 exposure. Okanogan county is also in the 80% for heart disease and 72% for asthma. The EPA's Commitment to Environmental Justice states that PM2.5 is a pollutant of great concern to already overburdened and vulnerable communities of color including indigenous and low-income people. Scientific evidence shows that both short- and long-term exposures to PM2.5 can harm people's health, leading to heart attacks, asthma attacks and premature death. Large segments of the US population, and, for the sake of this application, Okanogan County, including older adults, children, people with heart or lung conditions and minority populations are at risk of adverse health effects from PM2.5 exposure.

Okanogan County residents vulnerable to the effects of pollution and other environmental, public health, and economic burdens include but are not limited to: women; racial or ethnic groups; low-income individuals and families; individuals who are incarcerated or have been incarcerated; individuals with disabilities; individuals with mental health conditions; children; youth and young adults; seniors; immigrants and refugees; individuals who are of limited English proficiency (LEP); and Lesbian, Gay, Bisexual, Transgender, Queer, and Questioning (LGBTQQ) communities; or combinations of these populations. These disadvantaged communities experience continuing injustice due to systemic inequities that influence their living and working places, the quality of their air and water, and their economic opportunities. In the MVCC Climate Action Plan, equity was defined as providing added support to neighbors in need so everyone can experience the benefits of our adaptation and mitigation actions. It states, "we can all adapt to a changing climate when we work to balance disparities and bring awareness and action to improving the lives of those who are disadvantaged and vulnerable in our community."

Like many rural communities in the Western United States, Okanogan County experiences year-round PM2.5 pollution, predominantly from smoke. For the last several years in summer and fall, some residents have experienced substantial and prolonged smoke exposure from wildfires, with 21 consecutive days of unhealthy to hazardous air quality and 40 days of visual horizon loss in 2018. In 2021, the Cedar Creek fire burned nearly 55,000 acres, and resulted in 21 days of unhealthy to hazardous air quality from smoke. In fall and spring, forest prescribed burning, as well as outdoor burning by many residents in the absence of equitable systems to dispose of vegetative debris, lead to additional significant smoke exposures. Outdoor burning is increasing due to extensive outreach to encourage property owners to become "fire-wise." Fire-wising frequently results in major thinning of trees, vegetative and woody debris that is often intentionally burned to dispose of potential wildfire

"fuels," creating smoke in the process. Finally, winter air quality has been historically poor as many residents heat their homes with wood, often in uncertified, old stoves, and smoke is often trapped close to the valley floor due to weather inversions. House Bill 1168, a Washington State legislative act relating to long-term forest health and the reduction of wildfire dangers, was passed on April 22nd, 2021, which identifies the need to increase prescribed burning and other forest health activities. While the bill mentions prioritizing communication systems to prepare for wildfires, there was no language in the bill addressing public communication plans to inform communities vulnerable to prescribed burning smoke.

c. Organization's Historical Connection to the Underserved Community

The MVCC has been working to preserve the natural environment and rural character of the Methow Valley since 1976; in recent years the organization has expanded its work more broadly to Okanogan County and North Central Washington. Clean Air Methow (CAM) was founded in 2014 as a MVCC project in response to growing concerns about detrimental winter air quality. CAM seeks to create solutions for a sustainably clean airshed and "breathing room" for everybody. Fundamentally, CAM seeks to always work in partnership with community members, other non-profits and organizations, government, schools, etc., in a collaborative approach to solution seeking. Resilient Methow (RM) is another program overseen by MVCC which works to implement the Climate Action Plan (described below). RM offers resources, support, and connection to community partners to empower effective local climate action. MVCC has evolved from a largely independent player in the Methow to a coalition partner on issues of broader geographic and political significance in Okanogan County such as water conservation and land management. The breadth of MVCC's programs (air quality, water sustainability, forestry practices, land use) has increased MVCC's visibility and credibility as a broad scope environmental advocate and attracted new members. Increasingly, our environmental issues are more effectively addressed at the County level. To influence policy, law, and regulation requires greater visibility and partnerships with like-minded individuals, agency staff, and organizations. This project will also help actively identify, seek out, develop, and nurture ongoing relationships with those who share these values. We will identify specific areas where collaboration and collective effort can best advance shared goals and develop working partnerships to achieve them. Described below are some recent successes that MVCC has had in recent years:

• **"Building climate change resiliency and protecting health through smoke disaster preparedness (smoke-readiness)"** With support from an EPA Environmental Justice Small Grant (2021-2023), Clean Air Methow's project promoted smoke-readiness concepts through strengthening public health leadership and focusing on the importance of clean indoor air. Activities of this grant were 1) Build a strong public health network of care providers invested in building "Smoke-Readiness", 2) coordinate an accessible indoor air purifier distribution program and 3) communicate the importance of smoke-readiness to decision-makers and public health leaders to ensure sustainability and growth of programs that support "Smoke-Ready" Communities. A "smoke-ready" community is defined as a community that understands its sources of air pollution, is taking meaningful steps to reduce this pollution, and has dedicated resources to protect the health of its most vulnerable. During this project, CAM conducted five trainings for health care professionals about PM2.5 and human health, while simultaneously developing strong partnerships across Okanogan County with the Okanogan County Community Action Council, Family Health Centers, and Confluence Health. A total of 270 box fan air purifiers were distributed to vulnerable residents of Okanogan County through three distribution partners, listed above. Finally, CAM attended eight public outreach events, highlighting the debut of the "smoke ready checklist", which is an outreach material designed in Spanish and English that informs the public about how they can be "smoke-ready". The rack card provides intervention information and resources about wildfire smoke and human health.

•**Supported and expanded our Clean Air Ambassador Program**: With support from an EPA Environmental Justice Small Grant (2019), CAM has placed a network of 32 Purple Air low-cost PM2.5 sensors with a variety of businesses, schools, municipalities, and individuals, dubbed "Clean Air Ambassadors," as part of an effort to develop a more robust and real-time map of air quality across this large region. In 2020, we expanded the ambassador program to invite individuals to take a "Clean Air Pledge" to become ambassadors; trained our

existing sensor hosts on community FAQs, social media, and air sensor data interpretation; and counseled four other communities in other regions in Washington State (Kittitas, Ferry County, Chelan County) on how to start their own purple air sensor network and program. In a recent survey, responses showed that air quality data is being heavily accessed to inform decision making and protect health by valley residents, especially during wildfire season. Additionally, we worked with Family Health Centers and their community health workers to connect to the Hispanic community asking about their questions regarding wildfire smoke, purple air sensors, and air quality. Via the community health worker's interface with patients, in their clinics and during agricultural worker health and safety orientations, we were able to help support Spanish speakers in their concerns about smoke.

•**Vegetation and chipping drives as an alternative to outdoor burning**, conducted in partnership with the Okanogan Conservation District, Resilient Methow, Town of Twisp; Okanogan County Public Works; Fire-Adapted Methow Valley (FAMV), and the WA Department of Ecology. We have continued to develop a strong partnership with the Okanogan Conservation District, an organization encouraging fire preparedness, resilience and recovery. This has been a successful partnership with hundreds of volunteer hours that demonstrate community receptivity to the intersection of fire safety and smoke reduction. For example, in 2022, CAM and the Okanogan Conservation District partnered to conduct project management, funding, advertising, and outreach for the Town of Twisp to conduct over 7 free chipping and vegetation collection days at the Twisp Transfer Station. Over 100 (of 600 total eligible) Twisp households participated in the curbside chipping event, and 405 loads measuring 50+ tons were taken to the dump, resulting in a huge decrease of smoke from the averted burning. These events not only reduce air pollution but are also a highly visible means to highlight the importance of using alternatives to burning.

•**Outdoor burning outreach:** Funded by a Prevent Non-Attainment grant from Washington's Department of Ecology, CAM launched a county-wide communications campaign that focused on "smoke-readiness" and outdoor burning. During late spring through late fall, the campaign included rack cards, banners, billboards, drink coasters, social media posts and more to highlight the concept of "smoke-readiness" and cleaning your indoor air during smoke events. From late fall until early spring, the campaign focused on outdoor burning. Materials for this effort included an animated video featuring a personification of "smoke" acting as an uninvited guest, a print-style comic ad rendered from the video, billboards, and rack cards. The outdoor burning campaign's objective was to encourage residents of Okanogan County to consider alternatives to burning such as chipping or composting, and to be mindful of how they burn. Organizations outside of Okanogan County have expressed interest in the materials from the campaign and have since shared the materials with them, designing a place on the materials where other organizations can add their logo and distribute. So far, three additional local health jurisdictions have received the materials and planned to distribute them.

•**Woodstove Exchange Program:** With support from the Washington Department of Ecology, CAM has coordinated and administered a woodstove exchange program since 2019. The program focuses on residencies near town centers that experience a higher burden of winter PM2.5 concentration. Applicants who meet specific income guidelines (under $45,000 per year for a 1-person household), may apply to exchange their outdated and inefficient wood stove for a new EPA-certified wood stove. CAM reviews applications and coordinates the installation process with our partner, North Valley Lumber in Okanogan.

Community driven participation in the development of this proposal: The priority need for the specific work proposed within this EPA grant application was identified in the following ways involving the community:

1. *Resilient Methow's Climate Action Plan.* In 2018, Resilient Methow (www.resilientmethow.org) Developed a community-based action plan to identify top priority climate change vulnerabilities, adaptation strategies, and mitigation called the Methow Valley Climate Action Plan. Resilient Methow (RM) was coordinated by MVCC and guided by a community-based Steering Committee; the effort received input through community meetings and interviews with hundreds of valley residents, including dozens of key experts from several different sectors, and traditionally underrepresented groups. CAM's

former Director, Dr. Elizabeth Walker, chaired the health sector subgroup. Reducing emissions, advancing the Methow Valley as a fire-adapted community, and investing in community and economic resiliency was identified as top climate change adaptation strategies, along with community education and outreach around wildfire smoke preparedness and community problem solving.

2. *Community talks and discussions.* Clean Air Methow (CAM) and Resilient Methow (RM) routinely engage at the community level to conduct outreach about air quality and building climate resiliency and solicit community questions and input. A few select examples include the following:

    a. A presentation given to Methow at Home (MAH) members in Spring of 2022 that included a discussion about indoor air quality and air purifiers. MAH's main goal is to offer volunteer services, activities, and educational opportunities to support a vibrant, sustainable, and safe lifestyle for seniors aging in their homes. All attendees reported concerns about air quality and were eager to learn about the benefits of air purifiers to reduce symptoms associated with poor air quality.
    b. A community-based workshop co-hosted by CAM, the Okanogan River Airshed Partnership, EPA, and the US Federal Reserve Bank on "Building a Smoke-Ready Community" in December 2022 had breakout sessions focusing on indoor air quality, outdoor burning solutions and on equity. Attendees discussed how to both promote awareness of the need for clean indoor air, outdoor burning alternatives as well as how to get box fans to households unable to afford them.
    c. A box fan distribution program conducted in partnership with the Okanogan County Community Action Council, Family Health Centers, and Confluence Health. All 270 clients who were offered box fans and accepted them were members of the community who are disproportionately affected by wildfire smoke such as seniors, outdoor agriculture workers and those with pre-existing cardio-respiratory issues. Recipients anecdotally reported that having the air purifiers improved their wellbeing and health.

    d. A Climate Action Plan forum in fall of 2022 highlighted early successes, ongoing efforts, and how to get involved with Climate Action featuring a discussion on national context and local opportunities with Dr. Leah Stokes. Dr. Stokes' research examines public policy, public opinion, and political behavior, with a focus on energy, the environment and climate change. Members of the public came with questions and ideas about how they can respond to climate change. Another forum was held March 2023 which discussed drought planning and water resilience.

EJCPS Model - Demonstrate how this application utilizes the Environmental Justice Collaborative Problem-Solving Model (Section I.B). Provide a clear and concise description about:

• Which of the seven elements of the EJCPS Model will be undertaken for this project. Also, describe which EJCPS Model element(s) associated with this project may have already begun or been accomplished.

EJCPS Model Element 1 and 2: Community Vision, Strategic Planning and Community Capacity: This project builds on existing leadership and experience from the air and climate program's staff at MVCC. It is anticipated that funding from this grant will cover staff expenses for the air program and climate program coordinators who are already doing critical work on equitable air pollution reduction solutions, climate resiliency, education, and outreach. This grant would nurture the leadership skills of both program managers by granting time and resources to effectively carry out their programmatic goals and objectives over the three-year performance period. We plan to continue involving community residents to identify concerns by hosting quarterly forums focusing on the progress and deliverables from the Climate Action Plan. We have identified the Okanogan Conservation District, The University of Washington's Climate Impacts Group, and the Okanogan River Airshed Partnership as key partners for this project.

EJCPS Model Element 3 and 4: Consensus building, dispute resolution, multi-stakeholder partnerships and leveraging of resources: By reinforcing common goals of smoke reduction and climate resiliency, this project aims to establish a common set of ideas and plans to address concerns on air pollution, prescribed burning, public education, and outreach to vulnerable populations. We plan to talk early and often with partners and lean on the established work of these partner organizations to effectively coordinate and execute project deliverables while maintaining and nurturing the relationships for the performance period and through the future. There are clear, workable goals and visions of climate resiliency which MVCC shares with the Okanogan Conservation District that will enable us to work in an organized and effective manner. Shared goals include advancing the Methow Valley as a fire-adapted community, supporting a resilient agricultural community and reducing emissions.

EJCPS Model 6 and 7: Sound management, implementation, and evaluation. Lessons learned and replication of best practices: This project seeks clear results to improve community conditions through an environmental justice lens by actively reducing air pollution and building climate resiliency through accessible programs. Described below are timelines for each activity which will be used to clarify and maintain a realistic workplan. We will use the strength of our partners to help us solve challenges we face by collaborating in innovative and sustainable ways. To do this, we will periodically evaluate our progress through the quarterly forums described above and in organizational staff meetings. It is of the utmost importance that we keep consistent communication with our partners about progress, the lessons learned and our measures of success. We look forward to sharing both the lessons learned and successes at the Air-Climate Conference and beyond as we continue to conduct this work in our county and beyond.

Project Linkages and Partnerships

This proposed project will support EPA's Strategic Plan Goals 1 and 2. Objective 1.2 (Accelerate Resilience and Adaptation to Climate Change Impacts), and Objective 2.2 (Increasing Transparency and Public Participation). Funding community-based projects such as Clean Air Methow and Resilient Methow enables community based and led problem assessment, solution finding, and implementation directly related to the Clean Air Act and its provisions. Clean Air Methow, through several years of work to improve air quality in the community, appreciates the specific sources of pollution, strategies to improve air quality and assess public needs and concerns about health related to air pollution on an ongoing basis. EPA's potential support helps bolster lacking resources and develops additional strategies to reduce air pollution to a community disproportionately impacted by climate change effects. Further, if funded, this work will focus on strategies to motivate the community to reduce unnecessary burning.

Resilient Methow is multi-solving for equity and climate solutions and for the well-being of future generations in the Methow Valley. Drafted by Resilient Methow, the Climate Action Plan for the Methow Valley was created for the community as a plan to prepare for the impacts of climate change and implement climate solutions by reducing local sources of planet-warming emissions. Grounded in science and based on input from experts and community members, the Plan offers a vision for a Resilient Methow and realistic, practical strategies and actions to become a stronger, healthier community.

The Okanogan Conservation District (OCD) provides voluntary, non-regulatory services to landowners and lessees in Okanogan County. In recent years, the OCD, Clean Air Methow and Resilient Methow have partnered to conduct free chipping drives for the Methow Valley. Through these events, our organizations have built a strong, collaborative relationship. For this project, the Okanogan Conservation District will help with outreach for the chipping and vegetation drives and offer insight into resource allocation and location suggestions for the events. Furthermore, the OCD has vast knowledge about local ecology and has been critically important when educating CAM, RM and the public about chipping best practices for fire preparedness.

Fire Adapted Methow Valley (FAMV) is a local organization that fosters understanding and means that motivate and enable Methow Valley community members to live adaptively with fire. Through collaborations with local, regional, statewide, and nationwide partners, FAMV brings fire preparedness education, demonstration and assistance to Methow Valley community members and visitors. Over the past two years (2020-2022), FAMV has piloted an equitable mitigation program and has conducted a literature review. FAMV has identified priority clients who would benefit most from chipping and fire preparedness activities based on prioritization factors and geographic location. In recent years, MVCC has partnered with FAMV to conduct over 10 chipping drive events in the Methow, disseminate important outreach about smoke-readiness, alternatives to burning material and other Firewise health information. We plan to collaborate with FAMV for outreach, information dissemination, and to identify client clusters for chipping and fuels reduction work. FAMV (program coordinator, Kathryn Heim) will be key a partner for the success of activity 2, described below.

This project's full success will be achieved through the participation of the following partners: Okanogan Conservation District, University of Washington Climate Impacts Group, The Pateros Brewster Resource Center, Washington Department of Ecology Air Quality Program, The Colville Tribal Reservation Natural Resources Division and Fire Adapted Methow Valley. We maintain relationships with all these partners through regular and ongoing communication, i.e., daily to weekly to monthly, about mutual objectives, collaboration on existing projects, and updates on clean air activities.

2.0 PROJECT ACTIVITIES/MILESTONE SCHEDULE/DETAILED BUDGET NARRATIVE

a. Project Activities. The major activities associated with our project "Empower EJ communities to build climate resiliency through community-oriented solutions, fuels reduction programs and, protecting health from poor air quality are 1) Building climate change resiliency throughout Okanogan County using the Climate Action Plan framework; 2) Promoting equitable pollution monitoring and fuels reduction solutions; 3) Hosting a regional Air-Climate conference to engage to facilitate communication with decision makers and public health leadership.

Activity 1. Building climate change resiliency. This project promotes climate change resiliency by working to implement actions detailed in the Methow Valley Climate Action Plan (MVCAP), an exceptionally rigorous local plan that serves as our shared guide for building a Resilient Methow. While developed specifically for the Methow Watershed, the Climate Action Plan is relevant to the entirety of the project area and can serve vulnerable populations across Okanogan County. Five criteria were used to prioritize actions for special focus and early implementation. They are: 1) Impact: Actions that address the biggest climate-related issues offer the greatest potential for significant change. 2) Synergistic/cross-cutting: actions that support multiple values/benefits/outcomes are prioritized. 3) Equity: Priority is given to actions that work to resolve system inequities while also addressing a climate-related issue. 4) Foundational: Actions necessary to galvanize other priority actions or support ongoing efforts in new ways. Foundational priorities fill in a missing piece considered essential for a climate-ready community. 5) Timely: Actions that take advantage of a time-limited opportunity are ranked accordingly. The action timelines were further defined: Near-term actions address critical unmet or emerging needs and/or are essential first steps to achieving resiliency and/or mitigation outcomes or ongoing/longer-term actions are those which are already underway and/ or require a longer time to achieve the intended impact. These include actions that address systemic changes, that may require big investments, and/ or require sustained effort to achieve results. Equity was centered in all elements of developing the MVCAP. This includes a commitment to long-term consultation with tribes as well as ongoing engagement with diverse stakeholders. Equity in this plan involves providing added support to disadvantaged groups so everyone can participate in and benefit from climate actions taken, and it recognizes that our disadvantaged community members often bear a greater brunt of climate impacts. Our strategy centers on mobilizing stakeholders and advisors who are actively working to set priorities, support and accelerate local climate action, and implement the MVCAP. It is the community's plan, and RM exists to help the community achieve it. Resilient Methow offers resources, support, and connection to community partners to empower effective local climate action. Accordingly, we will:

1. Convene quarterly educational Climate Action Plan Forums for the public on relevant topics in the climate plan. The goal of these forums is to generate collaboration, educate, provide resources, and increase access to climate solutions – both resilience to climate impacts and mitigation. Forums have been held so far on topics of transportation and drought mitigation, each with over 60 participants - the upcoming spring forum will be focused on resources and available incentives for home electrification.
2. Facilitate a group of community volunteers, the "Implementation Hub", that provides grant writing support, evaluation and metrics, and networking to advance climate action projects. Resilient Methow will assist with other non-profit organizations serving the underserved populations in Okanogan County.
3. Write and distribute newsletters with funding opportunities, resources, and events linked to the MVCAP.
4. Provide grant writing support to partners on climate action and environmental justice projects.
5. Coordinate targeted outreach and collaboration with stakeholders in implementing the MVCAP including the wide spectrum of task force members who helped create the plan. Outreach and coordination efforts will be directed toward other non-profit organizations in Okanogan County, State agencies, Schools in Okanogan County, and the Confederated Colville Tribes to identify ongoing opportunities to advance goals in the MVCAP and explore engagement in The North Central Washington Climate Resiliency and Environmental Justice Conference (Activity 3.)
6. Collect and organize comments and feedback on the MVCAP as they are received for the next update.
7. Support and mentor a summer Western Washington University Climate Leadership Certificate undergraduate fellow. Students gain work experience in climate action while contributing to our implementation efforts.

Results: These activities will serve EJ populations by increasing access to resources and information for both resilience to climate impacts and mitigation of emissions. Educational events and resources, such as the quarterly forums will be developed with an equity lens to ensure that the educational material is relevant and useful to historically underserved populations. The information in the forums will be available in a variety of formats – in person, virtual, and written format. Based on attendance to the first two forums, we anticipate at least 60 attendees at each event. The volunteer Implementation Hub will provide free resources and support to individuals and community organizations looking to advance parts of the MVCAP, such as this free toolkit on home electrification. We anticipate that the ongoing outreach and collaboration with stakeholders in the MVCAP will generate collaboration, build towards a future conference (Activity 3), and identify gaps in the MVCAP where further action is needed to meet goals of climate resilience.

Activity 2. Promote equitable pollution monitoring and fuels reduction solutions as a critical element of climate change resiliency, citizen science and protecting public health. CAM creates solutions for a sustainably clean airshed and "breathing room" for everybody. Due in part to Okanogan County's geophysical landscape and the widespread use of woodstoves, outdoor residential and silviculture burning, the towns of Okanogan County experience some of the worst PM2.5 air pollution in the Pacific Northwest. We propose to fund an air program coordinator to continue to oversee programs in the county that reduce air pollution and build public literacy about air quality and how to protect themselves.
Below are the activities that this project proposes to fund:

1. Conduct 4 free chipping drives per year over the three-year performance period. Increased participation during the 2022 chipping and vegetation events in Okanogan County suggests a growing demand for free events related to burning alternatives. Some participants surveyed at the events stated that barriers to chipping, in general, are a) the cost of disposal outside of the free events and b) physically bringing their debris to the location of the event (borrowing a truck, loading the truck, driving it to the location during working hours). For this project, we propose to identify client clusters of landowners who are of top priority and base the chipping activities closer to their locations. No-cost chipping events that are more accessible bring equitable solutions to those who need them most. Our project partner, Fire Adapted Methow Valley, has committed to helping identify priority locations for a chipper to visit, using their Equitable Mitigation Program as the primary framework. For each event series (two

events total), there will be one day of running the chipper at the client clusters, and one day of running the chipper at a venue where participants bring their woody debris to the location. Fire Adapted Methow Valley has extensively researched and conducted a pilot program to ensure fire preparedness activities are equitable and accessible. Clean Air Methow intends to collaborate and utilize FAMV's knowledge and relationships to host the proposed chipping events in ways that are accessible and meaningful to the people who need them most.

2. Expand the Clean Air Ambassador community-based air monitoring network to replace aging purple air sensors and recruit new sensor hosts in overburdened communities. The performance of low-cost air monitors as they age has not been extensively studied. However, we anticipate that most of our sensors may need replacing after 4-6 years in the field. Air quality and total health burden in most overburdened communities in Okanogan County is currently invisible due to lack of monitoring. This program documents and tracks cumulative exposures from all sources and makes air quality information highly accessible by placing sensors at the homes of community members, making data meaningful and actionable.

3. Communication and outreach efforts specifically focused on environmental justice populations. For example, funds from this grant will cover the design and distribution costs of direct mailer cards, which will be sent to households vulnerable to smoke from prescribed fire. Direct mailers will feature a map, information about prescribed burning, actions they can take to protect themselves from prescribed fire smoke, and resources to learn more. Furthermore, Clean Air Methow plans to continue to design materials in both Spanish and English.

4. Support and mentor a summer intern working closely with Clean Air Methow. The intern will interface with air sensor hosts, attend community engagement events to discuss air quality and alternatives to burning strategies and aid with outreach and communication campaigns. The intern will gain invaluable experience learning about a community-based organization and environmental justice in a rural community.

Results: This Activity will serve EJ populations by offering accessible strategies to reduce PM2.5 pollution (i.e., reduction in outdoor burning) and decrease exposures to smoke through increased monitoring and outreach about health impacts. For example, equitable and accessible chipping and vegetation drives mitigate climate and health risks in our community by reducing the amount of fuel available to burn, thus reducing the amount of PM2.5 being released as smoke. Smoke reduction for the entire county benefits not only the individuals who might be burning, but the vulnerable populations who are disproportionately adversely affected such as older and younger populations, pregnant women, and those with cardio and respiratory conditions. Less smoke in the air in Okanogan County protects these populations. While smoke from wildfires and prescribed burning may not be avoided, part of this project will address how to reduce these uncontrolled PM2.5 exposures such as increased monitoring and outreach about projected activities of prescribed fire, the health effects of smoke and ways people can prepare and protect themselves. The replacement of Purple Air sensors ensures accurate and precise air quality data year-round for overburdened communities in Okanogan County as well as promoting the use of this specific data for science-based decision making. When a new sensor is installed in an area where there was previously no air quality data, the surrounding community benefits from the data and the concept of understanding how to protect themselves and the most vulnerable during unhealthy smoke events. Sensor hosts fill the role of air quality liaison when they take ownership of hosting a sensor. When a host becomes an ambassador, they will learn about air quality, the sources of air quality in Okanogan County, how they can protect themselves and how they can protect those most vulnerable in their communities. These sensors provide a way for the community to understand air quality data and their health, and be able to talk to their peers, family members and their greater community about air quality and smoke-readiness. While building the clean air ambassador network in 2019, we were successful in recruiting over 32 hosts who were enthusiastic to learn about air quality and fill the role of a "clean air ambassador".

Activity 3. Host "The North Central Washington Climate Resiliency and Environmental Justice Conference", Wenatchee, WA, 2025 to facilitate engagement, build deeper partnerships, expand strategies

throughout the region and procure local government commitment to focus on climate resiliency and air pollution reduction through the lens of environmental justice. In North Central Washington, there is an imminent need to gather, share successes and lessons learned and discuss the future of climate resilience across our region and connect with the organizations striving to make a difference. The Methow Valley is an outstanding example of how a community can come together to build and implement a climate action plan. We enthusiastically want to share what we have learned, and the successes we have had with other organizations who are creating and implementing their own, or to inspire other communities to start the process of formally planning for climate change adaptation and mitigation. Funding from this project will foster relationship building with stakeholders, resulting in their anticipated attendance and participation in this conference.

1. MVCC will partner with organizations around the region to host the inaugural North Central Washington Air-Climate conference, coordinating the logistics of hosting a 2-day conference consisting of speakers, vendor booths, workshops and more. This conference will recruit a climate planning committee to provide the basis for strengthening partnerships, sharing ideas, and ensuring stakeholder voices are heard and implemented. The conference will build upon the concept of shaping "smoke-ready" communities for North Central Washington –enabling other local communities to come together to share successes, challenges and lessons learned along the way.
2. Facilitate round table discussions that address key issues outlined in most climate action plans such as forest health interventions, smoke ready communities, outreach about climate resilience to the underserved populations, low-cost air pollution monitoring and visualizations and more.
3. Survey attendees (n= 200) to evaluate the effectiveness of the conference, and whether the attendees felt like they had purposeful conversations, and if they learned anything from the experience. For example, one question would be focused on action: "As a result of this conference, I feel that I have a better understanding of how to draft a program in my own community that tackles air pollution while also being equitable and accessible to all of my neighbors".

Results: We anticipate hosting 200 attendees at the conference who will take a post-conference survey to measure how effective the conference was for what we intended. Through strategic outreach to leaders and decision makers, we will deepen connections and network with other organizations with the same goals. The primary objective of this conference will be to leverage our built relationships and procure commitments from local government to take responsibility of planning for the future and implementing environmental justice and climate resiliency into their initiatives. We will simultaneously use this conference as a vehicle in 2024 to connect organizations, meet in 2025 and then build upon the conversations and commitments as the performance period moves into 2026. Organizations and individuals with historical missions to protect vulnerable populations, forest health, and public safety, must consider the unprecedented impact on public health of current and forecasted smoke exposure levels. We anticipate this conference to nurture effective collaboration and relationship building as described in this activity.

Milestone Schedule (First quarter Winter 2023)

Activity 1.	Timeline

1a. Conduct 12 quarterly forums through the 3-year performance period to advance implementation of the Climate Action Plan and share relevant education and collaboration around rural climate solutions.	• Spring/Summer/Fall/Winter 2023-2026
2a Coordinate and support volunteer "implementation hub", that provides grant support, evaluation and metrics, and networking to advance climate action projects.	• Winter, 2023 through fall 2026
3a. Distribute 12 quarterly newsletters for Resilient Methow over the three-year performance period.	• Winter 2023 through fall 2026
5a. Coordinate targeted outreach and collaboration with stakeholders in implementing the MVCAP	• Summer 2024, 2025 & 2026
9a. Hire summer intern for Resilient Methow.	• Summer 2024, summer 2025, summer 2026
Activity 2.	
1a. Conduct 12 chipping and vegetation drives over 3-year performance period.	• Spring and fall, 2023-2026
1b. Hire program intern.	• Summer: 2024, 2025, 2026
2a. Recruit two new Clean Air Ambassadors to the clean air ambassador network in vulnerable communities in Okanogan County currently without an air quality sensor within ~10 miles.	• Spring 2025
2b. Replace 35 aging Purple Air sensors.	• Spring, summer 2024
3a. Develop a direct mailer outreach toolkit for prescribed burning operations for locally affected communities in North Central Washington.	• Winter 2025-2026
3b. Develop "alternatives to burning" handouts and other material focusing on why and how property owners can reduce air pollution and be prepared for wildfire.	• Spring, 2024 and 2025

Activity 3.	
1a. Secure venue for conference. 1b. Invite partners: other organizations, agencies, businesses. 1c. Secure keynote speaker commitment. 1d. Plan all logistics: audio-visual, catering, rentals, decoration. 1e. Advertise the event. 1f. Coordinate outreach materials (flyers, rack cards, coasters, t-shirts, stickers, etc.) 1g. Host event	• Spring 2024 • Summer 2024 • Winter 2024-2025 • Winter/spring 2025 • Spring 2025 • Summer 2025 • Fall 2025

c. Itemized Budget Sheet / Budget Attached separately.

3.0 ENVIRONMENTAL RESULTS – OUTPUTS, OUTCOMES, TRACKING AND SUSTAINABILITY

a. Environmental Results-Outputs/Outcomes: A logic model is attached separately to this application.

b. Performance Measurement Plan
Staff at the Methow Valley Citizens Council (MVCC), including the CAM and RM coordinators, meet biweekly to discuss progress, challenges, and updates on all projects and grants. Accordingly, progress against articulated milestones/outputs and timeline will be routinely monitored and adjusted if necessary. Milestones and outputs for this project are highly concrete (e.g., development of outreach materials, coordination of chipping and composting events, holding community outreach events, and coordinating the Air-Climate Conference). If milestones appear at risk for meeting the targeted timeline, then MVCC staff will evaluate and troubleshoot to understand what additional resources or intervention is needed to aid in the achievement of the milestone on time or adjust the timeline if deemed necessary.

Assessing short- and long-term outcomes for this project will occur as part of the larger, ongoing Air and Climate Initiative at MVCC. Building climate resiliency is a priority action identified in the MVCC led Resilient Methow climate action planning process. The specific activities outlined in this grant are anticipated to significantly advance this goal. Longer term outcomes such as raised awareness regarding air pollution sources and steps taken to improve air quality will be assessed through numbers of participants in programs and workshops offered such as those on clean home heating and chipping/composting events, as well as visitors to our social media and website pages. We will also consider replications of the programs with other stakeholders or community entities. We routinely poll and ask the community and our partners/stakeholders for feedback and use both qualitative and quantitative approaches to measuring our impact.

c. Sustainability Plan and Community Vision

This project is integrated into a larger vision and several community initiatives to broadly develop climate resilience. The recently published Resilient Methow Climate Action Plan articulates several priority actions,

including many to "increase fire resiliency" that include recommendations to increase the pace and scale of forest health treatments (i.e., including prescription burning); expand fire-wise and fire-adapted community efforts; become a smoke-ready community, and reduce emissions. Implementation groups and teams are currently forming; the timeliness of this grant to help identify stakeholders to oversee this project while actively interfacing with related climate resiliency efforts is ideal. The climate action plan also articulates as a core value "human health and safety" for ALL members of the community, especially the most vulnerable.

4.0 PROGRAMMATIC CAPABILITY

Organizational Experience

The Methow Valley Citizens Council has been established in Methow Valley since 1976. Our organization is a recognized, trusted leader in the community as a resource for environmental policy issues. We have an experienced board and staff who have strong skills in non-profit management and administration, creating and implementing budgets, and executing goal-driven, effective programs in the areas of land use, air quality, and water quality and availability. We have engaged constructively with our local, state and federal land management agencies to develop plans and projects that have broad community buy-in. Over the last four decades we have built strong relationships and partnerships in our community that have enabled us to advance environmental and conservation initiatives with broad community support. MVCC has sponsored an air quality and climate program, Clean Air Methow since 2014, and Resilient Methow since 2018, and is looked to as a trusted source of information regarding air quality and climate solutions. Additionally, MVCC has 800 members in the community and a strong base of experienced and knowledgeable volunteers who have backgrounds in the field of environmental policy, health care, and environmental data analysis that provide excellent support to the program.

Staff Experience/Qualifications of Project Manager (PM)

The Project Manager of this work will be Jasmine Minbashian, the Executive Director of the Methow Valley Citizen's Council. Jasmine was formerly the Communications Director for Conservation Northwest, a large non-profit in the region and is highly experienced in the execution of effective communication campaigns. She is versed in the development of print and earned media, events, social media, and other forms of public relations. For the last 3 years, she has overseen the implementation of MVCC's Clean Air Program and is steeped in the issues and challenges associated with efforts to protect air quality in the valley. She also holds strong relationships with many community leaders including locally elected officials. Jasmine lives with her family outside of the town of Twisp and is deeply embedded in the local community of the Methow Valley.

The key staff member will be Anna Mounsey, MVCC's Air Program Coordinator. Anna holds a Master of Science in Environmental Health with a focus on data science from the Department of Environmental and Occupational Health Sciences from the University of Washington. In 2022, Anna was hired at MVCC to oversee the grant deliverables on the 2021-2023 EPA EJ Grant awarded to MVCC, advised by Elizabeth Walker. Since then, she now works on other program coordination such as the Clean Air Ambassador program, Woodstove Exchange Program, chipping and vegetation event coordination and more. Living on and off in Methow for the past 10 years and moving back full time after college, Anna has created strong and meaningful connections in the community, focusing on how to advance a sustainably clean airshed for the Methow Valley.

The other key staff member will be Dana Golden. Dana is a facilitator, community builder, and problem solver with a focus on climate and health justice. She holds an MBA in Sustainable Systems from Presidio Graduate School where she learned to apply an equity and systems lens to complex problems, and an undergraduate degree in Environmental Policy from Williams college. Dana is currently the community coordinator for Resilient Methow, an initiative to support the implementation of the new Methow Valley Climate Action Plan through stakeholder and community outreach. In the past, she's worked as a consultant synthesizing research, conducting interviews, and facilitating groups in both public and private sector environments. She is inspired by the opportunity to creatively address the root causes and impacts of climate change at home in the Methow Valley.

Elizabeth Walker will be engaged as the Smoke-Ready Expert Consultant. Liz holds a PhD in Toxicology from the Department of Environmental and Occupational Health Sciences at the UW and has specialized training in Risk Assessment and Communication. Along with Kris Ray of the Colville Tribes, Liz has helped pioneer and pilot the concept of smoke-readiness in eastern Washington. A resident of the Methow Valley for 11 years, Liz has grown the Methow Valley Clean Air Project from a mostly winter woodsmoke-focused volunteer effort with a $1500/year budget to its current expression as Clean Air Methow, with a 100-fold increased budget, year-round seasonal air quality programming, and one of the largest networks of purple air low-cost sensors in the world hosted by the "Clean Air Ambassadors." Since 2013, she has personally developed and executed strategic programming and built extensive community relationships to advance a sustainably clean airshed for the Methow Valley, including with all the partners named in this project proposal. Building on her success with Clean Air Methow and Resilient Methow, Liz has recently expanded her consulting practice to work more broadly to address the health effects of climate change.

Expenditure of Awarded Grant Funds
MVCC has a strong system of procedures and controls to ensure funds are spent in a timely and efficient manner. We have an experienced and capable finance committee that meets monthly and includes the Executive Director, Jasmine Minbashian. This committee provides oversight to ensure that all grant monies are spent in a timely way and according to our agreements. We also hold weekly project team meetings which provide regular check-in opportunities to report on and evaluate our progress towards project goals. Our bookkeeping is done through QuickBooks and is kept up to date by an experienced bookkeeper who maintains a regular presence in our office and has close communication with our Executive Director.

5.0 PAST PERFORMANCE

Over the last four years, MVCC has received several large grants, totaling over $541,000. We have successfully completed all reporting requirements on time. Below is a list of five grants MVCC has received in the last two years that are similar in size and scope to the 2023 EPA EJSG we are applying for.

a. $45K from Conservation Alliance (non-federal grant) to support our work with on the Okanogan Wenatchee National Forest implementing science-based forest restoration strategies. Met proposed goals/objectives on time.

b. $90K from Resources Legacy Fund in 2021 (non-federal grant) to support our work with Enloe Dam removal outreach. This is the second round of funding to support this campaign. In 2018 we received $75K, and successfully met proposed goals/objectives on time and submitted a final report.

c. $20K from Vogt Family Foundation (non-federal grant) for our work to foster citizen action for a climate ready future for the Methow Valley. Met proposed goals/objectives on time.

d. $30K Environmental Justice Small Grant from the EPA to assist in expanding our successful Clean Air Ambassador Program to serve additional underserved communities in the Methow Valley and provide educational opportunities regarding air quality. A final report was submitted in September 2021.

e. $282K Ecology Prevent Non-Attainment Grant to create a highly visible, high frequency communications campaign to raise awareness of air quality issues and reduce unnecessary burning in Omak and Okanogan County, create a regional Air Quality Stakeholder Alliance, and to hold seasonal meetings to provide ongoing support for the establishment and success of additional community-based air quality programs. Goals and objectives have been met and a final report will be submitted summer 2023.

f. $75K Environmental Justice Small Grant from the EPA to build climate change resiliency and protect health through smoke disaster preparedness (smoke-readiness). Met and exceeded proposed goals/objectives on time.

g. 6.0 QUALITY ASSURANCE PROJECT PLAN (QAPP)

h. We do not believe this project requires a QAPP.

INTERNAL REVENUE SERVICE
DISTRICT DIRECTOR
2 CUPANIA CIRCLE
MONTEREY PARK, CA 91755-7406

DEPARTMENT OF THE TREASURY

Date: MAY 02 1994

METHOW VALLEY CITIZENS COUNCIL
PO BOX 774
TWISP, WA 98856-0774

Employer Identification Number:
91-1061350
Case Number:

Contact Person:
TYRONE THOMAS
Contact Telephone Number:
Ex. 6 - Personal Privacy (PP)
Our Letter Dated:
June 22, 1990
Addendum Applies:
No

Dear Applicant:

This modifies our letter of the above date in which we stated that you would be treated as an organization that is not a private foundation until the expiration of your advance ruling period.

Your exempt status under section 501(a) of the Internal Revenue Code as an organization described in section 501(c)(3) is still in effect. Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Code because you are an organization of the type described in section 509(a)(1) and 170(b)(1)(A)(vi).

Grantors and contributors may rely on this determination unless the Internal Revenue Service publishes notice to the contrary. However, if you lose your section 509(a)(1) status, a grantor or contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act, or the substantial or material change on the part of the organization that resulted in your loss of such status, or if he or she acquired knowledge that the Internal Revenue Service had given notice that you would no longer be classified as a section 509(a)(1) organization.

If we have indicated in the heading of this letter that an addendum applies, the addendum enclosed is an integral part of this letter.

Because this letter could help resolve any questions about your private foundation status, please keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above.

Sincerely yours,

Richard R. Orosco
District Director

Objective

Inspire people to preserve our natural heritage by connecting them to nature.

Experience

2018-present **Executive Director**. *Methow Valley Citizens Council. Twisp, Washington*.
Chief Executive Officer responsible for the organization's consistent achievement of its mission and financial objectives. Duties: Raise and administer funds to support program, supervise staff of eight and budget of $400,000, support and serve as staff liaison to the organization's board of directors.

2014-2018 **Associate Director and Instructor**. *Methow Valley Riding Unlimited. Winthrop, Washington.*
Develop and implement organization's fundraising plan and budget in partnership with board of directors. Lead organizational strategic planning. Teach riding and horsemanship lessons to able-bodied and disabled students from age 3 to adult. Other duties: Maintain website and social media presence assist with horse care, maintain financial records and other administrative functions, administer and maintain organizational database (Salesforce).

2005-2014 **Communications Director and Special Projects**. *Conservation Northwest. Bellingham, Washington.*
Coordinated and implemented media and organizational communications for regional conservation organization with staff of twenty-five in three offices. Developed and implemented special campaigns and projects as needed. Duties: Develop organizational budget, hire and manage communications staff, develop and implement media strategies, edit publications, create marketing plans, cultivate press relations, develop messaging for organization's campaigns and programs.

2005-2012 **Board Director and Treasurer**. *Animals as Natural Therapy. Bellingham, Washington*.
Planned and oversaw a $250,000 budget for a non-profit that empowers individuals of all ages as well as victims of addiction and domestic violence through honest relationships developed with animal partners. Duties: Assist with fundraising, attend monthly board meetings, supervise executive director, recruit new board members, volunteer for programs, help plan events.

2000-2005 **Campaign Director**. *Northwest Old-Growth Campaign. Bellingham, Washington.*
Coordinated a coalition of thirteen conservation organizations working to protect and restore old-growth forests on federal lands in the Pacific Northwest. Duties: Organize monthly meetings, develop campaign strategies, conduct polling and media campaigns, lobby congress, and develop outreach materials.

1997-2000 **Executive Director**. *Pacific Crest Biodiversity Project. Seattle, Washington.*
Supervised and managed a growing non-profit forest conservation organization, which successfully protected Seattle's Cedar River Watershed and over one thousand acres of old growth in Southwest Washington. Duties: manage programs and campaigns, raise funds, supervise staff of five and budget of $200,000.

1995-1996 **Assistant Expedition Leader/ Lecturer**. *Marine Expeditions. Toronto, Canada.*
Helped organize and lead environmental education expeditions to the Antarctic aboard Russian research vessels. Duties: plan and present lectures, map itineraries, pilot Zodiacs, publish daily logs.

Education

1996-1997 **University of Cambridge.** *Cambridge, England. Scott Polar Research Institute.*
Master of Philosophy in Polar Studies. Thesis: Ecological Monitoring in the Antarctic Peninsula Region.

1995 **University of Washington**. *Seattle, Washington. College of Forest Resources.*
Post-graduate work. Coursework: River Ecology, Marine Mammalogy, Statistics, Wildlife Research Techniques, Silviculture.

1988-1992 **Western Washington University**. *Bellingham, Washington. Huxley College of Environmental Studies*. B.S. Environmental Policy and Assessment

SUMMARY OF QUALIFICATIONS

- Experienced leader and change catalyst, focused on empowering diverse, multi-stakeholder teams and collaborations.
- Fifteen years of experience in designing and executing effective strategies to support innovation in public health policies.
- Highly skilled communicator: facilitating and presenting in small and large group settings including interfacing with EPA, USFS, FDA, EMA, PMDA, state and local government; leading virtual teams through milestones; writing for lay, regulatory, and scientific audiences.

PROFESSIONAL EXPERIENCE

Director, Clean Air Methow 6/2015 - present
Health and Climate Lead, Resilient Methow 1/2018 - present
Methow Valley Citizens Council

- Lead a non-profit, community-based effort seeking equitable solutions to improve air quality and protect human health, as well as identify community climate vulnerabilities and develop resiliency strategies. Work in partnership with community organizations, municipalities, health practitioners, schools, individuals, and state and federal agencies to identify air and climate issues of greatest concern and implement practical and appropriate solutions.
- Air quality and public health topics addressed include protecting vulnerable populations; risk assessment, perception and communication of air quality information; wildfire smoke health risk; use of low-cost air quality sensors; building smoke-ready communities; impact of smoke disasters on mental health and wellbeing; prescribed burning; outdoor burning; and woodsmoke from home heating.

Principal 11/2017 – present
Elizabeth Walker Consulting

- Specialize in planning, leading, and executing public health needs assessment, solution testing, and impact assessment. Specialty areas of expertise include implementation of novel methodologies and technologies in clinical trials; risk communication; rural air quality issues and wildfire smoke-readiness; community-level engagement and activation; and facilitating collaboration between regulators and industry.

Affiliate Assistant Professor 1/1/2019-present
Department of Environmental and Occupational Health Sciences
University of Washington

- Mentorship and advising of graduate and undergraduate student thesis projects and guest lectures.

Director, Regulatory Strategy and Submissions 6/2011-11/2017
Critical Path Institute

- Provided leadership for regulatory strategy in support of C-Path's vision to be the global leader in creating multi-stakeholder collaborations that advance scientific innovations to improve human health.
- Developed and instituted organizational best practices, quality management systems, and writing support and review for all regulatory interactions and submissions describing the utility of novel drug development tools from C-Path's fourteen scientific consortia.
- Led C-Path consortia teams to identify and execute effective regulatory strategies for advancing novel tools and methodologies in highly diverse areas of drug development, including facilitating face-to-face interactions with FDA, EMA, and PMDA. Examples include drug safety (translational biomarkers); type 1 diabetes (model-based prognostic biomarkers for prevention trials); Crohn's disease (imaging biomarker for diagnosis and clinical trial endpoint); polycystic kidney disease (imaging biomarker for enrichment); and therapies for neonates (white papers to inform regulatory guidance; standardized disease definitions and treatment protocols).

Executive Director, Predictive Safety Testing Consortium (PSTC) 5/2009 – 6/2011
Assistant Director, Predictive Safety Testing Consortium 1/2008 – 5/2009
Critical Path Institute

- Provided scientific leadership and management of a global, virtual consortium of over 300 industry, regulatory, and academic safety scientists and clinicians from 18 pharmaceutical companies, the FDA, EMA, PMDA and multiple research institutions. Advanced the mission of the consortium in developing novel translational biomarkers to improve patient safety and advance regulatory science through incorporation of cutting-edge research.
