During the year ended December 31, 2020, the Organization received approximately 22% of its revenue and support from one funder. A significant reduction in the level of this support, if this were to occur, may have an effect on the Organization's program and activities.

Concentration of Credit Risk

At times, the Organization may have deposits in excess of federally insured limits. The risk is managed by maintaining all deposits in high quality financial institutions.

NOTE 8: LIQUIDITY AND AVAILABILITY

Financial assets available for general expenditure, that is, without donor or other restrictions limiting their use, within one year of December 31, 2020 are:

Cash and cash equivalents	$ 259,413
Grants receivable	97,250
Total	$ 356,663

As part of the Organization's liquidity management plan, the Organization invests cash in excess of daily requirements in money market funds.

ED_016126_00001226-00013

NOTE 9: SUBSEQUENT EVENTS

The Organization has evaluated subsequent events and has concluded that as of April 26, 2021, the date that the financial statements were available to be issued, there were no significant subsequent events to disclose beyond the following:

Public Health Order – Coronavirus

In March 2020, the WHO classified the COVID-19 outbreak as a pandemic and the Organization and the area it operates in was subject to a public health order related to COVID-19 coronavirus which affected activities of the Organization. The full impact of the COVID-19 outbreak continues to evolve as of the date of this report. As such, it is uncertain as to the full magnitude of the effect that the pandemic will have on the Organization's financial condition, liquidity, and future results of operations. Management is actively monitoring the impact on its financial condition, liquidity, operations and workforce.

PPP Loan

In February 2021 the Organization was notified that the PPP loan it had taken out had been forgiven in full.

INDEPENDENT ACCOUNTANTS' REVIEW REPORT

Board of Directors
Atma Connect
Oakland, California

We have reviewed the accompanying financial statements of Atma Connect (the Organization), which comprise the statement of financial position as of December 31, 2021, and the related statements of activities, cash flows and functional expenses for the year then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of Organization management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

Accountants' Responsibility

Our responsibility is to conduct the review engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the American Institute of Certified Public Accountants. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Accountants' Conclusion

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

Report on Summarized Comparative Information

The accompanying summarized comparative information as of and for the year ended December 31, 2020 is derived from financials that were previously reviewed by us and we stated that we were not aware of any material modifications that should be made to those financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America in our report dated April 26, 2021. We have not performed procedures in connection with that review engagement since that date.

ED_016126_00001227-00007

NOTE 1: NATURE OF ACTIVITIES

Atma Connect (the Organization) is a nonprofit organization started to build resilience in low-income vulnerable communities. Founded in 2014 and based in Oakland, California, we are a nonprofit public benefit technology company that creates solutions to empower users. We envision a world where neighbors help neighbors prepare for disasters, improve access to basic needs, and overcome chronic challenges.

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America (GAAP).

Net Assets

The financial statements report net assets and changes in net assets in two classes that are based upon the existence or absence of restrictions on use that are placed by its donors, as follows:

Net assets without donor restrictions – are resources available to support operations. The only limits on the use of the net assets are the broad limits resulting from the nature of the Organization, the environment in which it operates, the purposes specified in its corporate documents and its application for tax-exempt status, and any limits resulting from contractual agreements with creditors and others that are entered into in the course of its operations.

Net assets with donor restrictions – are resources that are restricted by a donor for use for a particular purpose or in a particular period. Some donor-imposed restrictions are temporary in nature, and the restriction will expire when the resources are used in accordance with the donor's instructions or when the stipulated time has passed. Other donor-imposed restrictions are perpetual in nature; the Organization must continue to use the resources in accordance with the donor's instructions.

When a donor's restriction is satisfied, either by using the resources in the manner specified by the donor or by the passage of time, the expiration of the restriction is reported in the financial statements by reclassifying the net assets from net assets with donor restrictions to net assets without donor restrictions. Net assets restricted for acquisition of building or equipment (or less commonly, the contribution of those net assets directly) are reported as net assets with donor restrictions until the specified asset is placed in service by the Organization, unless the donor provides more specific directions about the period of its use.

Accounting for Contributions

Contributions, including unconditional promises to give, are recognized when received. All contributions are reported as increases in net assets without donor restrictions unless the contributed assets are specifically restricted by the donor. Amounts received that are restricted by the donor to use in future periods or for specific purposes are reported as

ED_016126_00001227-00008

increases in net assets with donor restrictions. Unconditional promises with payments due in future years have an implied restriction to be used in the year the payment is due, and therefore are reported as restricted until payment is due, unless the contribution is clearly intended to support activities of the current fiscal year. Conditional promises are not recognized until they become unconditional, that is, until all conditions on which they depend are substantially met.

Accounting for Restrictions Met in the Same Reporting Period

The Organization has elected to treat contributions received with donor restrictions whose restrictions are met within the same reporting period as unrestricted contributions for purposes of the statement of activities. This policy is also applied to investment activity.

Accounting for Revenue

The Organization recognizes revenue as performance obligations are satisfied.

Revenue is recognized over time for cost reimbursement contracts as eligible expenses are incurred if other conditions of the contract are satisfied. Revenue from agreements that include milestones and milestone payments are recognized over time as milestones are reached. Revenue from agreements based on hourly rates are recognized over time as time is expended if the Organization expects it will have an enforceable right to payment for such amounts. Revenue is recognized based on estimated progress towards complete satisfaction of the performance obligation if the Organization can reasonably measure such progress. If the Organization's efforts are expended evenly throughout the performance period the Organization may recognize revenue on a straight-line basis over such a period.

Revenue is recognized at a point in time when goods or services are provided to customers and the Organization is not required to provide additional goods or services or if the above criteria are not met. As a practical expedient the Organization disregards the effects of potential financing components if the period between payment and performance is one year or less.

All revenues and net gains are reported as increases in net assets without donor restrictions in the statement of activities unless related to a donor specified restriction for a particular purpose or future period.

Program Service Fees

Program service fees consist of consulting services charged for conducting human-centered design interviews and community needs assessment. The Organization recognizes such revenue over time as related performance obligations are satisfied or hourly rates are billed.

Income Taxes

The Internal Revenue Service and the California Franchise Tax Board have determined that the Organization is exempt from federal and state income taxes under IRC 501(c)(3) and California RTC 23701(d). The Organization has evaluated its current tax positions as of December 31, 2021 and is not aware of any significant uncertain tax positions for which a reserve would be necessary. The Organization's tax returns are generally subject to

ED_016126_00001227-00009

examination by federal and state taxing authorities for three and four years, respectively, after they are filed.

Contributed Services

Contributed services are reflected in the financial statements at the fair value of the services received only if the services (a) create or enhance nonfinancial assets or (b) require specialized skills, are performed by people with those skills, and would otherwise be purchased by the Organization.

Accounts Receivable

Accounts receivable are primarily unsecured non-interest bearing amounts due from grantors on a cost reimbursement or performance grants. The Organization considers all accounts receivable to be fully collectible at December 31, 2021. Accordingly, no allowance for doubtful accounts was deemed necessary. If amounts become uncollectible, they are charged to expense in the period in which that determination is made.

Contributions Receivable

Contributions receivable including pledges and grants receivable are unconditional promises to give that are recognized as contributions when the promise is received. Contributions receivable that are expected to be collected in less than one year are reported at net realizable value. Contributions receivable that are expected to be collected in more than one year are recorded at fair value at the date of promise. That fair value is computed using a present value technique applied to anticipated cash flows. The Organization has evaluated the value of the discount and concluded that it was not material for recognition. The Organization considers all contributions receivable to be fully collectible at December 31, 2021. Accordingly, no allowance for doubtful accounts was deemed necessary. If amounts become uncollectible, they are charged to expense in the period in which that determination is made.

Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results could differ from those estimates.

Cash Equivalents

For purposes of the statement of cash flows, the Organization considers all money market funds and other highly liquid investments with original maturities of three months or less when purchased to be cash equivalents. Cash and cash equivalents held in investments accounts for investment purposes, if any, are treated as part of investment balances for purposes of the statement of cash flows.

Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset

ED_016126_00001227-00010

or liability in an orderly transaction between market participants on the measurement date. The Organization determines the fair values of its assets and liabilities based on a fair value hierarchy that includes three levels of inputs that may be used to measure fair value.

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Organization has the ability to access at the measurement date.

Level 2 - Inputs other than quoted market prices that are observable for the asset or liability, either directly or indirectly.

Level 3 - Unobservable inputs for the assets or liability.

The Organization had no assets or liabilities recorded at fair value on December 31, 2021.

Property and Equipment

All acquisitions of property and equipment in excess of $5,000 and all expenditures for repairs and maintenance, renewals, and betterments that materially prolong the useful lives of assets are capitalized. Property and equipment are stated at cost or, if donated, at the approximate fair value at the date of donation. Depreciation is computed using the straight-line method over the estimated useful lives on the property and equipment. Certain software development costs for externally marketed software may be capitalized if the Organization expects to generate revenue through the sale or lease of such software. The Organization accounts for expenditures and contributions to open source software solutions as program expenses when incurred. The Organization had no property and equipment that met this capitalization policy at December 31, 2021.

Expense Recognition and Allocation

The cost of providing the Organization's programs and other activities is summarized on a functional basis in the statement of activities and statement of functional expenses.

The functional classification of expenses involves grouping natural expense classifications by functions, such as program, administrative, and fundraising activities. Functional classification tells why an expense is incurred. The columns of the Functional Expense Statement used by the Organization are the functional categories while the rows are the natural classification.

Program expenses include all expenses from activities carried out to fulfill the Organization's mission or purpose. The Organization only reports one major program. Fundraising expenses are costs related to activities that involve inducing potential donors to contribute assets, services, or time. Management and general activities relate to the overall direction of the Organization which are not identifiable with any program and fundraising activity but are indispensable to the conduct of those activities and are essential to the Organization.

The Organization accumulates functional expense information based on its service efforts. It uses two methods in determining functions of expenses: (a) direct identification of expenses and (b) percentage allocation.

ED_016126_00001227-00011

As much as practical, whenever an expense can be directly identified with a specific function, it will be assigned or charged to that function. This will mean that the expense is coded to that function when the expense is entered into the accounting system.

Percentage allocation is used whenever direct identification is not practical and the expense relates to more than one function. The following steps are done when percentage allocation is used:

1. Identify the natural expense classifications
2. Determine the allocation bases to be used for each identified expense
3. Assemble the required data for each allocation bases
4. Perform the allocation computation

The percentage allocation is computed and documented in the Functional Expense Worksheet. The allocation bases applicable are identified below:

Natural Expense Classification	Allocation Base
Salaries & Benefits	Staff's time allocation
Payroll Taxes	
Rentals	
General Office Supplies and Subscriptions	
Travels, meals and events	
Security and Utilities	

All expenses and net losses are reported as decreases in net assets without donor restrictions.

Prior Year Summarized Information

The financial statements include certain prior year summarized comparative information in total but not by net asset class. Such information does not include sufficient detail to constitute a presentation in conformity with GAAP. Accordingly, such information should be read in conjunction with the Organization's financial statements for the year ended December 31, 2020, from which the summarized information was derived.

Reclassifications

Certain accounts in the prior year's summarized information have been reclassified for comparative purposes to conform with the presentation in the current-year financial statements.

NOTE 3: CONTINGENCIES

Compliance with Donor Restrictions

Grant awards require the fulfillment of certain conditions as set forth in the provisions of the grants. Failure to fulfill the conditions could result in the return of the funds to the grantors. The Organization deems this contingency remote since by accepting the grants and their terms, it has accommodated the objectives of the Organization to the provisions of the grants. The Organization's management is of the opinion that the Organization has complied with the terms of all grants.

Flexible PTO Policy

The Organization offers staff a flexible PTO policy with no accrual cap, paid time off balance or defined rate of accrual. It is possible that staff will take paid time off after the end of the fiscal year as a result of work performed prior to fiscal year. No reasonable estimate of the potential liability for such time off was available.

PPP Funding

The SBA reserves the right to audit any forgiveness granted, and such audit activity, if any, may result in changes to amounts forgiven or a requirement to return funds received under the program.

NOTE 4: PAYCHECK PROTECTION PROGRAM

The Organization received notice of loan forgiveness for its first and second paycheck protection program (PPP) loans in the combined amount of $127,800 during the year ended December 31, 2021. Based on the guidance in *FASB ASC 405-20-40-1*, the Organization recognizes the revenue from these loans when notified of loan forgiveness.

NOTE 5: NET ASSETS WITH DONOR RESTRICTION

Net assets with donor restriction consisted of $25,000 for specific program purposes as of December 31, 2020.

NOTE 6: IN-KIND SUPPORT

In-kind support consisted of the following for the years ended December 31:

	2021	2020
Legal counsel	$ 7,925	$ 117,561
Other services	3,038	26,000
Hosting / software / training	-	55,927
Total	$ 10,963	$ 199,488

NOTE 7: CONCENTRATIONS

Revenue and Support

During the year ended December 31, 2021, the Organization received approximately 47% of its revenue and support from one funder. A significant reduction in the level of this

ED_016126_00001227-00013

support, if this were to occur, may have an effect on the Organization's program and activities.

Concentration of Credit Risk

At times, the Organization may have deposits in excess of federally insured limits. The risk is managed by maintaining all deposits in high quality financial institutions.

NOTE 8: LIQUIDITY AND AVAILABILITY

Financial assets available for general expenditure, that is, without donor or other restrictions limiting their use, within one year of December 31, 2021 are:

Cash and cash equivalents	$ 289,310
Accounts receivable	13,248
Grants receivable	31,206
Total	$ 333,764

As part of the Organization's liquidity management plan, the Organization invests cash in excess of daily requirements in money market funds.

NOTE 9: SUBSEQUENT EVENTS

The Organization has evaluated subsequent events and has concluded that as of April 22, 2022, the date that the financial statements were available to be issued, there were no significant subsequent events to disclose beyond the following:

Coronavirus

In March 2020, the WHO classified the COVID-19 outbreak as a pandemic. The full impact of the COVID-19 outbreak continues to evolve as of the date of this report. As such, it is uncertain as to the full magnitude of the effect that the pandemic will have on the Organization's financial condition, liquidity, and future results of operations. Management is actively monitoring the impact on its financial condition, liquidity, operations and workforce.

PROFESSIONAL EXPERIENCE

A seasoned project manager and a recipient of numerous awards for leadership in public-private partnership. As Founder and CEO of the AmTech Center for Collaboration, developed large scale partnerships, including the NASA- industry partnership to develop drones and sensors for monitoring air quality. Acted as Partnership Manager for the $13B Federal program to redesign the air transportation infrastructure. Under her management, AmTech administered $500M of government funding to multi-stakeholder project teams. She is conversant in Spanish.

ATMA CONNECT 2021-Present
Director of Partnerships

ROBBINS CONSULTING 2008-2019
Business Consultant

Providing diverse business insights to mix of clients. *Examples*:

- For Impact Network, advising on strategy and communications
- For Google, Doug Engelbart Institute, and Computer History Museum, acted as project manager of major event (https://thedemoat50.org/symposium/)
- For Social Commenting LLC (internet startup), advised on business strategy
- For Saab-Sensis (defense contractor) advised on business positioning
- For State of California Water Resources Board, drafted Resolution adopted by California legislature regarding use of drones for water conservation.
- For FAA, identified and recruited stakeholders for policy development.

AMTECH CENTER FOR COLLABORATION, SF/Washington D.C. 1989-2008
Co-Founder & CEO

Built and led 10+ person professional team delivering consulting and professional services in support of diverse collaborative projects, networked communities, R&D partnerships, professional associations, and change initiatives. Services encompassed forming and managing alliances, partner recruitment and engagement, knowledge management, financial management, legal and contract management, public relations, and strategy. Emphasis on public-private ventures. Moved $500 million of federal funds to multistakeholder projects.

EDUCATION AND TECHNICAL PROFICIENCY

Education

- UC Berkeley / Certificate, Venture Capital Executive Program, May 2008

SANI PLANT
SALES & SERVICE OF ENVIRONMENTAL SYSTEMS & EQUIPMENT

March 31, 2023

Mrs. Meena Palaniappan
Atma Connect
meena@atmaconnect.org

Dear Mrs. Palaniappan:

Sani-Plant Co., Inc. is a multi-generational family-owned business. Since 1973, Sani-Plant has been providing solutions in the areas of water, wastewater, and storm water treatment to its municipal, industrial, commercial, and residential customers in Puerto Rico. We work on large municipal or industrial water & wastewater treatment plants as well as systems for small residential onsite systems.

The proposed project from Atma Connect, a community based organization working in Puerto Rico on community led resilience, and their partners, helps address a key unmet need in Puerto Rico to build awareness of water quality issues, engage residents in water quality testing, and improve water quality through helping residents and small water systems identify threats to water quality and implement solutions, including helping people obtain the resources needed to upgrade septic systems.

Sani-Plant Co., Inc. looks forward to collaborating with this team of community organizations and their partners to build awareness and demand for improved water quality, and improved septic system management in Puerto Rico. We will assist in providing technical assistance to community organizations, presenting at schools, and providing low-cost septic system testing and training as part of this project.

Sincerely,

Alberto E. Dávila Fussá
Vice-Presidente

USEPA Reviewers
Environmental Justice Collaborative
Problem-Solving Program

The following letter is to express my intention to collaborate with Atma Connect in the proposed project for the USEPA Collaborative Problem-Solving Program (USEPA CPS). I am a Professor in Environmental and Water Resources Engineering at the University of Puerto Rico, Mayaguez (UPRM). My expertise is on hydrology and water resources, with particular emphasis on contaminant and groundwater hydrology. My current research focuses on impacts of extreme hydrologic events on environmental quality and health. The issue of water quality and contaminants in Puerto Rico has been a significant area of my research.

I believe the proposed project from Atma Connect for the USEPA CPS helps address a need to build awareness and education on water quality issues in Puerto Rico and promote a network of organizations and leaders who can support improvements in water quality on the island. In particular, the proposed work will assist in building awareness towards addressing PFAS pollution in Puerto Rico. If the project is funded, I intent to provide expertise and guidance on water quality issues so they can be shared with local people, organizations, and institutions in Puerto Rico.

Best regards,

Sincerely,

Ingrid Padilla, Ph.D., P.H.
Professor
Department of Civil Engineering and Surveying

Finca
HIGUACA
Pitahaya, Cabo Rojo

10 de abril de 2011

FROM: FINCA HIGUACA CORP

We are a farm dedicated to providing a space for human connection with nature. Inside our farm we have a garden of ornamental plants specializing in succulents, cacti, and agaves. We also have an outdoor event space. Within our mission since our beginnings, we have had the task to educate and provide environmental solutions seeking to create and bring our grain of environmental justice. This is an assignment that we carry as individuals and as a company. We have done and continue to do this in 3 ways:

1.We have focused in educating on plastic pollution and microplastics on our coasts since 2008 when we started beach clean ups several times every year in our town in Guánica and nearby cities. We are volunteers in a marine debris ongoing study in Guánica and Lajas that seeks to understand the entrances, exits and routes of garbage, seeking to create solutions for its proper management. The study is conducted by Villanova University in collaboration with Protectors de Cuencas and Alelí Environmental, Inc.

2. In 2022 we started a tree conservation project on our farm planting 99 trees for reforestation and conservation. 100 new trees will be planted on June 3 as the second phase of planting of this project. Within this project we have planted native trees, endemic and in danger of extinction.

3. We lend our space at Finca Higuaca to the Caribbean Astronomy Society (SAC) for astronomy nights in dark skies. This monthly free event is an educational event of the SAC on astronomy and the topic of light pollution. This is because our farm is located in Pitahaya Cabo Rojo one of the points of less light pollution in PR.

Recently it has been brought to our attention a project to build awareness of water quality issues that provides environmental education and solutions to our beautiful island of Puerto Rico on this matter. Water quality is a big challenge that human society has resulting in human health problems, poisoned wildlife, and long-term ecosystem damage. For this, it is of our interest the proposed project by Atma Connect, a community-based organization working in Puerto Rico on community led resilience, and their partners. They help address a key unmet need in the island to build awareness of water quality issues, engage residents in septic system testing, and improve water quality through helping residents and small water systems identify threats to water quality

Ex. 6 - Personal Privacy (PP) Ex. 6 - Personal Privacy (PP) & Ex. 6 - Personal Privacy (PP)

and implement solutions, including helping people obtain the resources needed to upgrade septic systems.

We look forward to collaborating with this team of community organizations and their partners to build awareness and demand for improved water quality, and improved septic system management in Puerto Rico. Making this important matter part of our personal mission seeking to help provide environmental education, solutions, and justice.

As part of this project, I will connect the team to networks of farmers from the southwest of Puerto Rico, schools, Yauco and Guánica municipalities and community organizations and volunteers so that we can provide trainings and resources to these networks of organizations about water quality through an engaging interactive exhibit, and access to help to apply for grants to help fund these septic system and water quality improvements.

Cordially

Jamie V. Almodóvar

Letter of commitment between

Asociación Enlace Asuntos Comunitarios de Sabana Seca, Semillas de Ezperanza, Inc.

& Atma Connect

EPA EJCPS 2023 Call

We have been working with Atma Connect for the last year on building community resilience in Puerto Rico. We are very interested in collaborating on the proposed Water Quality project from Atma Connect, a community based organization working in Puerto Rico helps address a key unmet need in Puerto Rico to build awareness of water quality issues, engage residents in septic system testing, and improve water quality through helping residents and small water systems identify threats to water quality and implement solutions, including helping people obtain the resources needed to upgrade septic systems.

We look forward to collaborating with this team of community organizations and their partners to build awareness and demand for improved water quality, and improved septic system management in Puerto Rico. **We will assist in providing technical assistance to homeowners and associations, and connecting residents with experts to assist in applying for local and national resources to upgrade septic systems.**

The Asociación Enlace Asuntos Comunitarios de Sabana Seca, Semillas de Esperanza, Inc. is a non-profit community based organization registered in Puerto Rico (hereafter Asociación) is specially interested in participating with Atma in this opportunity, as we want to train their residents to manage their water wastes. They understand that their community faces water contamination problems caused by sub-par discharge water infrastructure since long ago. Houses in Sabana Seca used to drain their dirty water through the ditches that ran behind houses, and some places still have this system. Similarly, Sabana Seca has some sewer systems, but many are not well built, so they are inoperable, making houses rely on septic tanks or ditches.

Intrinsically interested in this project, the Asociación will assume 3 roles in the project:

- Role: Center for Community Re-education and Integration
    - Activities:
        - Hold workshops of home water quality assessments in Toa Baja, Toa Alta, Dorado, and Cataño, potentially expanding to other municipios.
        - Hold activities to insert the community in the participation of improvements to the septic wells and runoff waters in their community. i.e:
            - Science Fairs or school competitions

        - Data Collection
        - Encourage citizens to use available financing and provide guidance (an extension to Atma's Financial & Professional Help For Improving Septic Systems)
    - Provide and/or do reach out to provide locations and events to present the exhibition.
- Role: Testing Center
    - Activities:
        - Collect community data in Toa Baja, Toa Alta, Dorado, and Cataño, potentially expanding to other municipios.
            - Data on Water Quality
            - Septic Tanks
            - Contaminated runoff water
- Role: Connection
    - Activities:
        - Serve as a liaison between Atma and other organizations of interest, such as our partners the Environmental Territorial Board and National University College, that can collaborate or participate in this project.

Sincerely,

Luz I. Ortiz Barrientos

Luz I. Ortiz Barrientos

TITLE Presidente

ATMA CONNECT - SAFE WATER QUALITY NETWORK PUERTO RICO							
BUDGET DETAIL							
	DESCRIPTION						TOTAL
	Position	Narrative Description	Monthly	Months	Effort	Total	
Personnel	Project Manager	Erika Marerro is the Project Manager and will be in charge of implementation of all project activities. 80% time for 24 months at [redacted] per month	Ex. 6 Personal Privacy (PP)				
	Partnerships Director	Karen Risa Robbins in the Partnerships director and will be in charge of engaging and coordinating partners, creating resident and agency partnerships for this project. 12% time for 24 months at [redacted] per month					
	Project Oversight and Compliance	Meena Palaniappan the CEO will ensure Project oversight, ensure deliverables are being met, and financial reporting is being met, and oversee implementation. 10% time for 24 months at [redacted] per month					
	Outreach Coordinator	Outreach Coordinator will manage engagement with local comunities and associations across Puerto Rico with a focus in rural areas.	3,513	20	80%	56,203

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Bronx River Alliance, Inc.

Address: 1 Bronx River Parkway

City: Bronx

State: Ex. 6 Personal Privacy (PP)

Zip Code: 10462-2869

B. Unique Entity Identifier (UEI): MW8CCAHLLTN7

C. Applicant/Recipient Point of Contact

Name: Julia Hitz

Phone: Ex. 6 Personal Privacy (PP)

Email: development@bronxriver.org

Title: Grant Manager

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

N/A

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☒ Yes ☐ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☐ Yes ☒ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Yes,
Elena Conte, Interim Executive Director, elena.conte@bronxriver.org
1 Bronx River Parkway
Bronx, NY 10462
Ex. 6 - Personal Privacy (PP)
Fax: Ex. 6 - Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

Procedures document cannot be attached to this form. It is available upon request.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Julia A Hitz	Interim Executive Director	04/07/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Applicant:

Our letter dated July 2002, stated you would be exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code, and you would be treated as a public charity, rather than as a private foundation, during an advance ruling period.

Based on the information you submitted, you are classified as a public charity under the Code section listed in the heading of this letter. Since your exempt status was not under consideration, you continue to be classified as an organization exempt from Federal income tax under section 501(c)(3) of the Code.

Publication 557, Tax-Exempt Status for Your Organization, provides detailed information about your rights and responsibilities as an exempt organization. You may request a copy by calling the toll-free number for forms, Ex. 6 - Personal Privacy (PP) Information is also available on our Internet Web Site at www.irs.gov.

If you have general questions about exempt organizations, please call our toll-free number shown in the heading.

Please keep this letter in your permanent records.

Sincerely yours,

Lois G. Lerner
Director, Exempt Organizations
Rulings and Agreements

Letter 1050 (DO/CG)

EJCPS Budget Detail, Bronx River Alliance, Partnership for Urban Waterways in Bronx and Lower Westchester Counties, New York		
	Description	**Total**
	Personnel salaries are calculated including a 3% cost-of-living increase each year, then averaged over the number of years the person will participate	
Personnel	• Executive Director @ $119,515 annual salary X 5% of time on project = $17,927 for three years • Director of Programs @ $77,273 annual salary X 8% of time on project = $18,545 for three years • Ecology Coordinator @ $58,212 annual salary X 20% of time on project = $34,927 for three years • Ecology Assistant @ $39,151 annual salary X 30% of time on project = $23,491 for two years • Outreach Coordinator @ $58,212 annual salary X 10% of time on project = $11,642 for two years • Volunteer Assistant @ $37,601 annual salary X 10% of time on project = $11,283 for three years • Finance Manager @ $77,273 annual salary X 12% of time on project = $27,818 for three years • Communications Assistant @ $39,151 annual salary X 5% of time on project = $5,873 for three years • Ecology Fellow @ $13,523 annual salary X 100% of time on project = $27,045 for two years	$178,552
Fringe	• Director of Programs 30% of salary (includes medical, dental, life insurance) = $5,564 for three years • Ecology Coordinator 30% of salary (includes medical, dental, life insurance) = $10,478 for three years • Ecology Assistant 30% of salary (includes medical, dental, life insurance) = $7,047 for two years • Outreach Coordinator 30% of salary (includes medical, dental, life insurance) = $3,493 for two years • Volunteer Assistant 30% of salary (includes medical, dental, life insurance) = $3,385 for three years • Finance Manager 30% of salary (includes medical, dental, life insurance) = $8,345 for three years • Communications Assistant 30% of salary (includes medical, dental, life insurance) = $1,762 for three years • EJ Fellow 30% of salary (includes medical, dental, life insurance) = $8,114 for two years	$48,188

Travel	Car rental for sample collection: 24 weeks x $625 per week including gas and insurance = $15,000	$15,000
Equipment		$0
Supplies	• Public Event costs (refreshments, room rental): $1,500 per event X 3 events = $4,500 • Sterile Sample Bottles: $225/ pack X 3 packs = $675 • Sterile Pipettes: $100/ pack X 3 packs = $300 • Quantitrays: $333.33/pack x 6 packs = $1,999.98 • Enterolert: $2,083.33/ pack X 3 packs = $6,249.99 • Nitrile Gloves: $16.67/ pack X 6 packs = $100.02 • Thermometers: $14.58 each X 12 = $174.96 • Liquid pH Test Kits: $18.75 each X 4 = $75	$14,075
Contractual	• Data Visualization consultant: 5 data sheets X $1,800 each = $9,000 • Translation of data sheets into 5 languages: 5 sheets X 5 languages X $125 each = $3,000 • Grant Management consultant: $47.38/ hour @ 3 hours/ week @ 156 weeks = $22,172	$34,172
Construction		$0
Indirect Costs	De Minimus rate of 10% of total project costs (with only the first $25,000 of each subaward included in total): $364,987 X 10% = $36,499	$36,499
Other	• Subaward to **Save the Sound** for QAPP revision and approval, volunteer recruitment and training, lab analysis of water samples, and public outreach = $80,514 • Subaward to **Van Cortlandt Park Alliance** for volunteer recruitment and support and public outreach = $46,500 • Subaward to **Center for the Urban River at Beczak** for volunteer recruitment and support and public outreach = $46,500	$173,514
	Total	$500,000

Bronx River Alliance

EPA EJCPS, Partnership for Urban Waterways in Bronx and Lower Westchester Counties, New York

Logic Model

Resources/ Inputs	Activities	Outputs	Audience	Short-term Outcomes (6 - 12 months)	Intermediate Outcomes (12 - 24 months)	Long-term Outcomes (2+ years)
- Staff time - Volunteers - Partnering Organizations - Lab Facilities - Specialized Consultant expertise	- Updating Save the Sound's existing QAPP to incorporate project activities - Water Quality Monitoring: Pathogen testing, Outfall testing, and eDNA testing, to gather data about regional river water quality - Data analysis and visualization to make the study results usable to the public and officials	- 1 Approved QAPP - 528 samples collected and analyzed each for Pathogen Indicator Bacteria - 24 Outfall samples collected and analyzed for Pathogen Indicator Bacteria - 8 eDNA samples collected and analyzed - 12 Community Science volunteers supporting sampling activities - 5 One-pager information sheets produced in English - 5 One-pager information sheets produced in each additional language: Spanish,	- Community residents - Local partners organizations - General public - Municipal government agencies	- Increase in # of community stakeholders with WQM skills and knowledge (target = 24 community science volunteers) - Increase in regional partnership working toward river water quality goals (target = 5 organizational partners)	- Increase in amount and range of water quality data available for each river	- Increase in community residents knowledgeable about river water quality issues and able to advocate for policies and practices to mitigate problems - Increase in general public awareness about regional river water quality issues - Increase in municipal engagement to

	- Community education and outreach in Yonkers, Mount Vernon and the Bronx to share results and empower stakeholders to advocate for infrastructure and policy improvements - Social media and traditional media outreach to educate and motivate the public	Arabic, Bengali, French, and Portuguese - 3 Watershed-specific public events - 8 Macroinvertebrate Days carried out with public - 310 Stakeholders participate in public events - At least 15 social media posts - At least 1 traditional media article				remediate pollution sources

Save the Sound®
Action for our region's environment.

March 30th, 2023

Environmental Protection Agency [Mail Code 2201A]
Office of Environmental Justice and External Civil Rights
1200 Pennsylvania Avenue, NW
Washington, DC 20460

To whom it may concern:

Save the Sound is pleased to partner with the Bronx River Alliance and other stakeholders on the *Partnership for Urban Waterways in Bronx and Lower Westchester Counties* project. This initiative takes a regional approach to finding solutions for disproportionate pollution in disadvantaged communities by monitoring pathogen indicator bacteria and sources in four rivers (Bronx River, Hutchinson River, Saw Mill River, Tibbetts Creek) and empowering local residents to advocate for policies and actions that will mitigate environmental and health impacts of pollution as climate change intensifies.

The mission of Save the Sound is to protect and improve the land, air, and water of the Long Island Sound and its watershed. We use legal and scientific expertise and bring people together to achieve results that benefit our environment for current and future generations. We have been monitoring the Hutchinson River for fecal indicator bacteria since 2014 and have seen consistently elevated levels of *E. coli* and Enterococci that often exceed the EPA geometric mean for primary contact by ten times or more. We are also currently engaging communities and municipalities throughout the entire Hutchinson River Watershed in a restoration plan; as such we are well positioned to integrate these bacterial sampling efforts with engagement of the community members that live around the Hutchinson River and are most impacted by environmental injustices.

Save the Sound will contribute to this project by providing laboratory services to all of the other partner groups, as well as helping to coordinate the sampling efforts and community outreach events. All fecal indicator bacteria and eDNA samples will be returned to the lab at the conclusion of a sampling session and analyzed by Save the Sound staff and an external contracted lab for the final eDNA processing steps. We will be working closely with project partners to coordinate monitoring activities in the Hutchinson River including station selection, sampling protocols, and the training and recruitment of volunteers. Save the Sound will also engage in outreach activities with local community groups including sampling trips in the field, youth-driven community events, and identifying advocacy opportunities.

I am happy to confirm Save the Sound's participation as a project partner and encourage the EPA Office of Environmental Justice and External Civil Rights to support this effort to work in collaboration with environmental justice communities across the Bronx and lower Westchester County.

Best regards,

Sam Marquand
Clean Water Advocate
Save the Sound

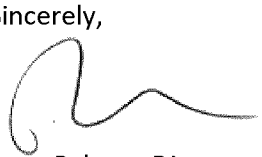
SARAH LAWRENCE COLLEGE

CENTER FOR THE URBAN RIVER AT BECZAK

March 29, 2023

Environmental Protection Agency [Mail Code 2201A]
Office of Environmental Justice and External Civil Rights
1200 Pennsylvania Avenue, NW
Washington, DC 20460

To whom it may concern:



The Sarah Lawrence College Center for the Urban River at Beczak (CURB) is pleased to partner with the Bronx River Alliance and other stakeholders on the *Partnership for Urban Waterways in Bronx and Lower Westchester Counties* project. This initiative takes a regional approach to finding solutions for disproportionate pollution in disadvantaged communities by monitoring pathogens in four rivers (Bronx River, Hutchinson River, Saw Mill River, Tibbetts Brook) and empowering local residents to advocate for policies and actions that will mitigate environmental and health impacts of pollution as climate change intensifies.

CURB is and education, research, and community center located on the Hudson River in downtown Yonkers. We have been monitoring the Hudson and Saw Mill River for fecal indicator bacteria for 8 years, finding alarmingly high levels in both. For many sites in the Saw Mill the geometric mean is over 10 times the EPA limit for contact recreation. Next door to CURB there is a CSO outfall that routinely discharges 1-3m gallons in even a moderate rain event. Clearly our community at CURB, which includes over 3,000 visitors a year from school children to retirees, are impacted by poor water quality.

CURB will partner with this project by working with our project partners to coordinate the monitoring activities in the Saw Mill River including site selection, sampling protocols, and training and recruitment of volunteers. We will also engage in the projects various outreach activities such as creating education materials, social media outreach, and community outreach events. Resources CURB brings to the table include our staff's ample water quality monitoring experience and education and outreach expertise, and our center as a potential outreach event venue.

Again, I am happy to confirm our participation as a project partner and hope that the EPA Office of Environmental Justice and External Civil Rights will support this effort to work in collaboration with environmental justice communities across the Bronx and lower Westchester County.

Sincerely,

Ryan Palmer, Director

35 ALEXANDER STREET, YONKERS, NY 10701 | Ex. 6 - Personal Privacy (PP) | CENTERFORTHEURBANRIVER.ORG

van cortlandt park alliance

April 3, 2023

Environmental Protection Agency [Mail Code 2201A]
Office of Environmental Justice and External Civil Rights
1200 Pennsylvania Avenue, NW
Washington, DC 20460

To whom it may concern:

Van Cortlandt Park Alliance (VCPA) is pleased to partner with the Bronx River Alliance and other stakeholders on the *Partnership for Urban Waterways in Bronx and Lower Westchester Counties* project. This initiative takes a regional approach to finding solutions for disproportionate pollution in disadvantaged communities by monitoring pathogens in four rivers (Bronx River, Hutchinson River, Saw Mill River, Tibbetts Brook) and empowering local residents to advocate for policies and actions that will mitigate environmental and health impacts of pollution as climate change intensifies.

Van Cortlandt Park Alliance's mission is to preserve, support, and promote the recreational, ecological, and historical value of Van Cortlandt Park. Since 2016, VCPA has been dedicated to monitoring, maintaining and improving Tibbetts Brook which flows through Van Cortlandt Park. After 20+ years of advocacy, we are thrilled that the southern end of Tibbetts Brook will be daylit in the near future. **The Daylighting of Tibbetts Brook is New York City's largest Green Infrastructure project to date.** If granted, the proposed EPA-funded project will help ensure that water quality is still healthy enough to safely flow into the Harlem River once daylighting is complete.

For this project, VCPA will be responsible for: introducing the Ecology Fellow to Tibbetts Brook by providing an initial informational tour, background information, and previous data to determine the best sample locations, participate in regular project meetings, recruit volunteers to assist Ecology Fellow, host MacroInvertebrate Days that will be open to the general public in Van Cortlandt Park, promote this project and share the data collected with the local community via community events, e-blasts, and social media posts, and provide a final report to BxRA detailing participation of staff and community in project activities.

Again, I am happy to confirm our participation as a project partner and hope that the EPA Office of Environmental Justice and External Civil Rights will support this effort to work in collaboration with environmental justice communities across the Bronx and lower Westchester County.

Sincerely,

Christina A Taylor

Washington, DC 20460

To whom it May Concern:

The United States Geologic Survey is pleased to partner with the Bronx River Alliance and other stakeholders on the Partnership for Urban Waterways in Bronx and Lower Westchester Counties project. This initiative takes a regional approach to finding solutions for disproportionate pollution in disadvantaged communities by monitoring pathogens in four rivers (Bronx River, Hutchinson River, Saw Mill River, Tibbetts Brook) and empowering local residents to advocate for policies and actions that will mitigate environmental and health impacts of pollution as climate change intensifies.

USGS believes that water information is fundamental to national and local economic well-being, protection of life and property, and effective management of the Nation's water resources. USGS has long been the lead partner on the Bronx and Harlem River project of the Federal Urban Waters Partnership, and therefore has a long-standing relationship with the Bronx River Alliance on water quality monitoring.

USGS will partner on this project by providing technical assistance and training; participating in education and outreach events; and sharing relevant data that we have collected to aid this water quality community science effort.

USGS is happy to confirm our participation as a project partner and hope that the EPA Office of Environmental Justice and External Civil Rights will support this effort to work in collaboration with environmental justice communities across the Bronx.

Re: Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program

To Whom It May Concern:

The New York City Department of Environmental Protection (DEP) is pleased to partner with the Bronx River Alliance and other stakeholders on the Partnership for Urban Waterways in Bronx and Lower Westchester Counties project. This initiative takes a regional approach to finding solutions for disproportionate pollution in disadvantaged communities by monitoring pathogens in four rivers (Bronx River, Hutchinson River, Saw Mill River, Tibbetts Brook) and empowering local residents to advocate for policies and actions that will mitigate environmental and health impacts of pollution as climate change intensifies.

The mission of DEP is to enrich the environment and protect public health for all New Yorkers by providing high quality drinking water, managing wastewater and stormwater, and reducing air, noise, and hazardous materials pollution. DEP will partner on this project by providing information on the location of NYC stormwater infrastructure assets including MS4 outfalls to assist with this community monitoring project.

DEP is happy to confirm our participation as a project partner and hope that the EPA Office of Environmental Justice and External Civil Rights will support this effort to work in collaboration with environmental justice communities across the Bronx.

RELEVANT EXPERIENCE

Ecology Coordinator September 2019 – Present
Bronx River Alliance Bronx, NY

- Managed research programs on the Bronx River monitoring fecal bacteria, microplastics and floatable waste, nutrients and common water quality parameters, and air quality.
- Recruited, trained, and managed students and volunteers to collect water quality data on the Bronx River.
- Performed field collection and laboratory analyses of river samples and entered and managed datasets.
- Coordinated and facilitated public meetings disseminating Bronx River ecology information to various public, city, state, and federal stakeholders throughout the year.
- Participated in various local, regional, and national coalitions to support and advocate for the advancement of environmental protections for the Bronx River, urban parks and green spaces, and EJ communities.
- Led public events and programs to engage the local community in the research and stewardship of the Bronx River watershed.
- Organized and managed grant deliverables, tracked grant budgets, and coordinated with contractors.
- Wrote grant proposal narratives and grant reports.
- Helped write an EPA-approved Quality Assurance Project Plan.
- Hired, trained, and supervised high school and undergraduate interns to assist with ecology-related projects.
- Designed graphics for fliers and informational one-pagers and social media posts.
- Gave presentations at academic institutions and regional and national conventions and symposiums.
- Taught middle and high school students in classroom and field settings.

GS5 Ecology Intern April 2019 – August 2019
Bureau of Land Management Grand Junction, CO

- Collected field data for longitudinal demographic studies of rare and sensitive plant species.
- Collected environmental DNA (eDNA) samples, amphibian swab samples, and used visual encounter and call surveys to collect data for the Colorado Bullfrog Project.
- Helped organize and lead data collection surveys for the Western yellow-billed cuckoo.
- Entered, organized, and managed data for several ecological surveys and projects.
- Used ArcGIS to create maps and enter data.
- Helped lead an educational outreach program for middle school students by teaching them local ethnobotany.
- Wrote botanical and ecological reports for sensitive plant and animal species.
- Received and utilized Proper Functioning Condition (PFC) training to evaluate the health of riparian habitats.
- Received and utilized Terrestrial AIM training to collect and submit data on rangeland health
- Received and utilized 4x4 training to operate government vehicles on challenging terrain.
- Received UTV training and certification.

Conservation Crew Apprentice April 2018 – December 2018
Bronx River Alliance Bronx, NY

- Performed ecological restoration along the Bronx River corridor by removing trash and invasive species and planting native trees and shrubs.
- Maintained the Bronx River Alliance plant nursery.
- Assisted in leading field assignments and volunteer group events and projects.
- Operated NYC Parks Department vehicles for transportation of people and equipment.
- Operated and maintained power tools including hedge trimmers, weed whackers, and chainsaws.
- Operated and maintained wood chippers for the removal of woody debris.
- Collected and organized raw data on waterborne waste in the river.
- Assisted in hosting canoeing events on the river.
- Worked in all weather conditions.

ADDITIONAL EXPERIENCE

Lab Technician July 2016 – September 2017
RFK Science Research Institute Williamstown, MA

- Operated ESR spectrometer, x-ray irradiator, performed data entry, and analyzed data.
- Prepared scientific samples, and cleaned and prepared instruments.
- Assisted in the supervision of high school students performing lab activities.

Research Assistant July 2016 – August 2016
McMaster Nuclear Reactor Hamilton, ON

- Assisted in the irradiating of fossil samples for fossil dating and research.
- Managed and catalogued hundreds of aliquots.
- Performed data entry.

SKILLS: Proficient in Microsoft Office • Ecological field work • Plant and animal identification • Visual art • Power tool use and maintenance • UTV driving certified • 4x4 driving certified • Terrestrial AIM training• PFC training • ACA canoe/kayak certified • Knowledge of QGIS and ArcGIS software functionality

EDUCATION

Master of Science, Environmental Science and Management, Sacred Heart University **Spring 2016**

- *Relevant Coursework:* Wetland Delineation; GIS for Environmental Analysis; Hydrology; Field Methods; Environmental Sampling; Soils & Land Management; Environmental Statistics
- *Final Project:* Enterococci Densities across Western Long Island Sound Shoreline and Tributary Sites: Prioritizing Sites for Remediation

Bachelor of Arts, Environmental Studies, University of California Santa Barbara **Winter 2008**

- *Relevant Coursework:* Ecosystem Processes; Biogeography; Environmental Planning; Ecology; Calculus, Environmental Education

WORK AND COMMUNITY EXPERIENCE

Director of Water Quality – Save the Sound, Mamaroneck, NY **2020 – Present**
Manager of Water Quality – Save the Sound, Mamaroneck, NY **2015 – 2020**

- Set up and oversee Save the Sound's Water Quality Program laboratory and field sampling.
- Hire, train, and manage water quality staff.
- Oversee and train the Western Long Island Sound Citizen Science Corps.
- Maintain all water quality instruments in the Western Long Island Sound Office.
- Aggregate and analyze data for the Long Island Sound Report Card.
- Developed the *Unified Water Study,* a Long Island Sound embayment ecological health study for community sampling groups. Includes bringing together stakeholders for input, writing standard operating procedures, recruiting sampling groups, and training groups on field procedures.
- Develop and execute an annual $750,000 in federal funds to run the *Unified Water Study*. Includes over $400,000 a year in lab and monitoring group contracting.
- Manage and oversee sampling and pollution patrolling from Save the Sound's water quality vessels.
- Conduct track down sampling following up on field observations and concerned citizen reports.
- Present Water Quality Program initiatives and findings at meetings, conferences, and press releases.
- Construct budgets and written materials for grant and funding request/reporting.
- Mentor numerous regional High School and Graduate students as part of their respective projects.

Treasurer, Greenwich World Hunger Association **2019 – Present**

- Maintain fiscal records including database management, banking operations, and tax document preparations.
- Review and vote on grant submissions for projects that provide funds to increase food supply in communities around the world with a focus on self-sustaining initiatives.

Member, Town of Greenwich Inland Wetlands and Watercourses Agency **2016 – Present**

- Appointed by Town Selectmen and voted into the position by the Representative Town Meeting.
- Review wetland permits submitted to the Town of Greenwich.
- Comment, question, and vote on the approval or disapproval of wetland permits at monthly public meetings at Town Hall.

Chairman, Village of Mamaroneck Marine Education Center Advisory Committee **2015 – Present**

- Appointed by Mayor and Village of Mamaroneck Board of Trustees.
- Organize subcommittees and develop objectives. Lead the Education Program Subcommittee.
- Provided input on 2016 Marine Education Center renovation. This included planning for future exhibitions, educational programs, and largely expanded habitat-specific aquariums.

Board of Directors, Director of Environmental Education, Friends of Greenwich Point **2012 – 2019**

- Designed and implemented a wide range of environmental education programming.
- Located collaborators and guest speakers to enhance educational offerings of Friends of Greenwich Point.

Manager of School and Community Partnerships – Bruce Museum, Greenwich, CT **2014 – 2015**

- Created and expanded partnerships between the museum and local schools and community organizations.
- Obtained funding for school partnerships through grants and other opportunities.
- Developed educational programming that complemented CT and NY State curriculum.
- Ensured school curricula connections between all Museum programming and mandated standards.
- Developed Educator Guides focused on science exhibitions.
- Customized and developed long-term educational initiatives with regional schools.

Manager of Seaside Center – Bruce Museum Seaside Center, Greenwich Point, CT **2011 – 2014**

- Collaborated with Town and local organizations to renovate and outfit the new location for the Center.
- Oversaw the maintenance, acquisitions and installation of the large marine aquariums housed in the Center.
- Managed on-site summer Naturalists for the operation of the Center.
- Oversaw all of the Bruce Museum's educational programming at the Center focused on Long Island Sound.
- Mentored Greenwich school students' research projects related to Long Island Sound.

Manager of Outreach Education – Bruce Museum, Greenwich, CT **2010 – 2014**

- Oversaw the Bruce Museum's Outreach Education Programs for school and adult groups. Managed Bruce Museum Outreach Instructors. Included the hiring, training, scheduling, and payment of staff.
- Developed educational programming that complements and supports CT and NY curriculum.
- Curator of the exhibition *Extreme Habitats: Into the Deep Sea*, April 2014 – November 2014.
- Co-curator of the exhibition *Lure of the Ocean: The Art of Stanley Meltzoff*, February 2013 – June 2013.
- Co-curator of the exhibition *Extreme Habitats: Living Desert Dry*, August 2012 – March 2013.
- Managed the Museum's Jr. Educator Program. Responsibilities included recruiting, training, scheduling, and mentoring High School Educators who lead programs at the Museum.

Educator – The Maritime Aquarium, South Norwalk, CT **2009 – 2010**

- Instructed a wide range of lessons with a central focus on Long Island Sound Ecology.
- Worked as crew on the Maritime Aquarium's research and education vessel, the RV Oceanic.

Seaside Center Naturalist – Bruce Museum, Greenwich, CT **Summer 2009**

- Managed the daily operations of the Bruce Museum Seaside Center located on Greenwich Point. Set up large saltwater aquariums. Kept detailed records and led educational programs for all ages.

SKILLS

Certified CPR & First Aid • Boat Operation • Sonde Deployment • Microsoft Suite, ArcGIS, R, SPSS • Extensive Environmental Field & Lab Experience

Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) Wappingers Falls, NY 12590 Ex. 6 - Personal Privacy (PP) Ex. 6 - Personal Privacy (PP)

Environmental Professional

Accomplished leader with 16 years' experience in non-profit management and board development, strategic partnership development, forging regional alliances, grant writing and fundraising, watershed planning, policy and education, water quality monitoring, community organizing, and with focus and expertise with urban environments and Environmental Justice.

RELEVANT PROFESSIONAL EXPERIENCE

Director, Center for the Urban River at Beczak, Sarah Lawrence College, Yonkers, NY 2013 – Present

- Director of a 4,000 ft^2 environmental education and research center located on the Hudson River focused on urban watershed and Hudson River issues.
- Manage a $400,000 annual budget, full time staff of three, and seasonal paid interns.
- Primary fundraiser raising over $1,800,000 in grants and major donors over last 8 years.
- Manage the facility including overseeing $200,000 in renovations including construction of a wet lab used for water quality monitoring.
- Manage our 2-acre park site including our "Sustainable Shorelines" designated restored tidal marsh.
- Develop, implement, and assess program initiatives utilizing shared leadership model with staff.
- Develop and cultivate strategic regional partnerships with key organizations and stakeholders.

Director, Green Cities Initiative, Clearwater, Inc., Beacon, NY 2013 – 2013

- Directed a regional urban revitalization initiative focused on proactively addressing environmental issues in Hudson River cities, improving quality of life for residents, and promoting sustainable economic development.

Project Coordinator, Green Cities Initiative, Clearwater, Inc., Beacon, NY 2011 – 2012

- Coordinated all programs and developed partnerships in Poughkeepsie, NY including planning, outreach, and education programs with the Fall Kill Watershed Committee.

Energy Conservation Consultant, Energy Management Solutions, LLC, Suffern, NY 2010 - 2012

- Led business development and consultations for energy efficiency and renewable energy firm specializing in NYSERDA programs for commercial properties in Metro NY.

Environmental Associate, Clearwater, Inc., Poughkeepsie, NY 2004 - 2007

- Coordinated environmental advocacy programs to protect the Hudson River; managed all aspects of the development of The Hudson River Watershed Alliance.

Project Assistant, Lyme Disease Ecology Study, Institute of Ecosystem Studies, Millbrook, NY 2003 - 2003

- Conducted extensive ecological assessment of study areas including bird and mammal surveys, vegetation surveys, and tick collection for analysis for Lyme Disease.

PROFESSIONAL AFFILIATIONS

Board Member, Hudson River Watershed Alliance 2013 – Present

- Vice President 2017-2018, President 2019 -2022

Co-Chair, Westchester County Climate Crisis Task Force Water Committee 2019 – Present

Mayoral-Appointed Member, Yonkers Green City Advisory Committee 2014 – Present

Founder and Member, Lower Hudson Partnership 2016 – Present

SELECTION OF FUNDRAISING EFFORTS

Westchester Community Foundation — $155,000
- Five grants 2017-2022 for water quality monitoring and Youth Advisory Council

NYS DEC Office of Environmental Justice — $200,000
- Two grants 2019 -2022 for High School student training, water quality monitoring, and qPCR fecal contamination source tracking.

NYS DEC Hudson River Estuary Program — $208,000
- Five grants 2016-2022 for curriculum development, teacher training, watershed planning, and a green infrastructure demonstration design project.

City of Yonkers Community Development Block Grant Program — $62,000
- Eight program grants 2014 – 2021 for community education and engagement projects.

City of Yonkers Community Development Block Grant Program — $120,000
- Six facility grants 2014 – 2021 for upgrades including lab construction and equipment, HVAC system, IT and AV upgrades, and research and education supplies.

Con Edison — $73,500
- Eight grants 2014 – 2021 for community education and engagement projects.

Thomas and Agnes Carvel Foundation — $72,500
- Eight grants 2014 – 2021 for community education and engagement projects.

Total Major Donor Contributions — $418,500
- Six gifts from three donors for general operating support and capital projects.

OCCUPATIONAL EXPERIENCE:

Van Cortlandt Park Alliance, Inc. - Bronx, NY

Deputy Director April 2019 to Present

- Oversee the planning, implementation and evaluation of the organization's programs and services
- Ensure that the programs and services offered by the organization contribute to the organization's mission and reflect the priorities of the Board
- Monitor the day-to-day delivery of the programs and services of the organization to maintain or improve quality
- Develop and maintain relationships with community entities surrounding and using park
- Assist with fundraising planning and implementation, including identifying resource requirements, researching funding sources, establishing strategies to approach funders, submitting proposals and reports and administrating fundraising records and documentation.
- Perform and oversee the required daily accounting functions
- Present board with accurate reports of organization's finances and programmatic needs

Friends of Van Cortlandt Park, Inc. - Bronx, NY

Executive Director March 2007- April 2019

- Oversee the planning, implementation and evaluation of the organization's programs and services
- Ensure that the programs and services offered by the organization contribute to the organization's mission and reflect the priorities of the Board
- Monitor the day-to-day delivery of the programs and services of the organization to maintain or improve quality
- Develop and maintain relationships with community entities surrounding and using park
- Meet and consult with parks administrator regarding various Van Cortlandt Park issues
- Oversee fundraising planning and implementation, including identifying resource requirements, researching funding sources, establishing strategies to approach funders, submitting proposals and reports and administrating fundraising records and documentation.
- Perform and oversee the required daily accounting functions
- Present board with accurate reports of organization's finances, fundraising and programmatic needs
- Recommend yearly budget for Board approval and prudently manages organization's resources within those budget guidelines.
- Composed organization's quarterly newsletter, *Many Hands* and maintain website, www.vancortlandt.org for organization

Interim Executive Director November 2006- March 2007

- Performed above duties while still working as Education/Outreach Coordinator

Education/Outreach Coordinator September 2000- November 2006

- Increased programming from 2 programs to 7 different environmental education based programs.
- Increased annual program participants from under 100 to over 2,400 in the first five years.

- Coordinated and directed two internship programs for local middle and high school students that focus on environmental education
- Developed and administered teacher workshops to increase the educational use of the park
- Organized volunteer and special events within the park
- Developed and administered school programs focusing on environmental awareness

NYC Department of Parks and Recreation, North Manhattan, NY
Urban Park Ranger March 2000- Sept. 2000

- Lead nature and history tours in various parks of North Manhattan for both school groups and the public. Prepared curriculum for school programs
- Patrolled parks in all five boroughs
- Performed animal rescues when necessary
- Staffed nature center and organized educational activities for children

EDUCATIONAL EXPERIENCE:

Certificate in Nonprofit Management June 2016
Manhattanville College School of Business
Community Resources Exchange: Fundraising Institute December 2007
Bachelor of Science in Environmental and Forest Biology May 1999
SUNY College of Environmental Science and Forestry, Syracuse, NY
Magnum Cum Laude

ASSOCIATIONS

Bronx Coalition for Parks and Greenspace Co-Chair
Bronx Council for Environmental Quality Board Member

• **Project Title:** Partnership for Urban Waterways in Bronx and Lower Westchester Counties, New York
• **Project Location:** The project incorporates Bronx County and southern Westchester County, New York, including Yonkers and Mount Vernon
• **Applicant Information:** Bronx River Alliance, Inc., 1 Bronx River Parkway, Bronx, NY 10462
Contact: Julia Hitz, Grant Manager, development@bronxriver.org, Ex. 6 - Personal Privacy (PP)

• **Description of Applicant Organization:** The Bronx River Alliance serves as a coordinated voice for the river, working in harmonious partnership to protect, improve and restore the Bronx River corridor so that it may be a healthy ecological, recreational, educational, and economic resource for the communities through which the river flows. BxRA has become a national model for urban open space development by engaging the community in cleaning up the polluted river, restoring wildlife and habitats, creating miles of greenway and parks and drawing thousands of people to paddle the river each year. The Alliance meets its goals through the work of five interconnected programs: Ecology, Education, Greenway, Outreach, and Recreation.

• **Are you applying for the Small CBO Set Aside Track for $150,000 projects**? No

• **Project Abstract:** The main objective of the project is to work in partnership to gather information about water quality in four rivers (Bronx River, Hutchinson River, Saw Mill River, Tibbetts Brook) in the Bronx/Westchester County, New York region, all environmental justice communities, and empower local residents to use the data to promote remediation of infrastructure and policies to improve water quality and quality of life. The project will enable hiring an Urban Waterways Environmental Justice Fellow recruited from local communities who will work with local stakeholders to carry out pathogen water quality monitoring, additional monitoring of high polluting outfalls identified through the project, and eDNA testing. Data revealing the environmental health of these waterways for people and wildlife will be analyzed and visualized to be accessible and useful to the public. Public education and outreach including community-based macroinvertebrate studies and public events will take place with stakeholders in each community to discuss solutions to regional water quality issues.

• **Environmental Issue** – Water Pollution
• **Project Type(s)** -- monitoring, public education
• **Special Considerations:** The project addresses Climate Change/Disaster Resiliency

•**List of Project Partners** --
Bronx River Alliance, Inc (BxRA), CBO
Save the Sound (StS), CBO
Van Cortlandt Park Alliance (VCPA), CBO
Sarah Lawrence College Center for the Urban River at Beczak (CURB), Education
USGS New York Water Science Center, Government
NYC Department of Environmental Protection, Government

•**Will you need to develop a QAPP for your project?** Yes

b.Environmental and Public Health information of the UnderservedCommunity
This project benefits the underserved communities in the Bronx and Westchester County by empowering local residents to advocate for actions and policies that reduce water pollution. Project activities take a regional approach, taking place both in Westchester and Bronx Counties, benefitting underserved communities in both areas. Much of the pollution enters the waterways in more affluent communities upstream, and has historically negatively impacted the EJ communities downstream.

The project seeks to address the issue of water quality in four of the region's rivers (Saw Mill River, Hutchinson River, Tibbetts Brook, and Bronx River). Water quality indicators for these rivers show that they are not safe for human contact such as swimming and wading. With increased flooding risks as a result of climate change, the human populations will be increasingly exposed to river water, including floodwaters in their communities or even in their own homes. This project will generate data that can be used by municipal authorities to address illicit dumping and infrastructure deficiencies that contribute to poor water quality.

The Bronx: According to the EPA EJSCREEN tool, many communities in the Bronx are within the 70 - 100th percentile for national unemployment rate, while much of the Bronx is in the 90-100th percentile on exposure to Wastewater Discharge. Much of the Bronx ranks in the 80 - 100th percentile in the Demographic Index, with most of the population between 80 - 100th percentile for people of color, 80 - 100th percentile for limited English speakers, and 80 - 100th percentile for having Asthma. Along the Bronx River, communities are between 80 - 100th percentile for percentage of properties at risk for flooding due to climate change, with 95 - 100th percentile around Tibbetts Brook, and 95 - 100th percentile along the Hutchinson River.

According to the CDC, 1,427,317 people reside in Bronx County. The average household income is $41,470, and 24.4% of residents live below the poverty line. 43.5% of residents are classified as Black, and 45.6% as White, with 55% of the population being Hispanic.

In contrast, in Westchester County as a whole, population 969,296, the average household income is $101,741. That 7.6% of the population still lives below the poverty line is an indication of pockets of underserved communities, such as Yonkers and Mount Vernon.

Yonkers, Westchester County: Much of the city is in the 80 - 100th national percentile for unemployment rate. Yonkers falls between the 70 - 90th percentiles for exposure to Wastewater Discharge. The city is in the 80 - 100th percentile on the Demographic Index, the 80 - 100th percentile for people of color, 80 - 100th percentile for limited English speakers, and the 60 - 95th percentile for having Asthma. Communities along the Saw Mill River in Yonkers are in the 90 - 100th percentile for percentage of properties at risk for flooding due to climate change.

According to the Center for the Urban River at Beczak, students enrolled in Yonkers Public Schools are approximately 20% white and 80% people of color (62% latinx, 16% black, 5% Asian, 2% multiracial). A distressing 78% of these students are considered economically

disadvantaged. City-wide at least 15% of families live below the poverty level. The Saw Mill does not have any Combined Sewer Overflows (CSO's), but it has dozens of miles of massive sewer trunk lines running beside it, which are prone to leaks. In Westchester County, 65% of all sewage runs along these trunk lines and ends up at the Yonkers Joint Wastewater Treatment Plant. This environmental justice issue not only adversely affects the people of Yonkers, but everyone who wishes to enjoy a clean and healthy Saw Mill River.

Mount Vernon, Westchester County: Much of Mount Vernon is in the 70 - 95th national percentile for the unemployment rate, and falls between the 50 - 90th percentiles for exposure to Wastewater Discharge. The city is in the 70 - 100th percentile on the Demographic Index, between 70 - 100th percentile for people of color, 70 - 90th percentile for limited English speakers, and 90 -100th percentile for having Asthma. It is in the 80 - 100th percentile for percentage of properties with high flood risk along the Hutchinson River, and properties along the Bronx River in Yonkers are in the 60 - 90th percentile.

Environmental Health Results: The underserved communities along these rivers will benefit from improved river water quality as a result of the project. Environmental and public health impacts of exposure to contaminated river water through recreation or flooding events will be reduced.

Other Factors - Climate and Disaster Resiliency

Climate change is expected to result in an increased number of heavy and extreme wet weather events. Wet weather events have already been seen to lead to flooding in the communities benefited by this project, including devastating flooding on our local waterways from Hurricane Ida in September of 2021. Unfortunately, these types of storms are expected to worsen, increasing the need for resiliency to flooding disasters. The project seeks to mitigate the water quality impacts of flooding by improving the understanding of regional water quality indicators, identifying sewage outfall locations, and helping authorities to act to mitigate infrastructure and pollution problems. With better information and targeted action, the effects of climate change and flooding disasters can be addressed before the environmental and public health impacts worsen.

The Bronx River Alliance is currently developing an Intermunicipal Watershed Management Plan that will incorporate climate change considerations into plans for environmental projects all along the Bronx River. Likewise, Save the Sound is also working on a Watershed Plan for the Hutchinson River.

Water quality data being collected by the partners is being used for the Westchester County Sewer Consolidation Study, which will help the County overhaul the sewer system, helping to improve infrastructure and increase resiliency of the conveyance system and treatment plants. Reducing inflow and infiltration into the system will reduce CSO's and also reduce energy consumption and Greenhouse Gas emissions at the plants from not treating rainwater.

This project will provide data supporting these and other efforts to increase resiliency to climate change and flooding.

c.Organization's Historical Connection to Underserved Community

The Bronx River Alliance (BxRA) grew out of a legacy of community activism for the river. In 2001, a band of passionate community leaders joined together to realize their vision of a Bronx River as a force for environmental reclamation and community development in the heart of the Bronx. BxRA serves as a coordinated voice for the river, working in harmonious partnership to protect, improve and restore the Bronx River corridor so that it may be a healthy ecological, recreational, educational, and economic resource for the communities through which the river flows. BxRA has become a national model for urban open space development by sustaining community leadership with partnerships with local non-profits, a Team structure incorporating local residents and organizational leaders, and bylaws that state that "the Nominating/Governance Committee will consider, among other factors, the importance of having Directors who live or work in environmental justice communities along the Bronx River." The Alliance has made intentional efforts to cultivate a board and staff that represent the diversity of the watershed, particularly its EJ communities; as of March 2023, Alliance staff are 82% made up of Black, Indigenous, and People of Color (BIPOC), with a leadership team that is 60% BIPOC. Likewise the Alliance board is 57% BIPOC with a leadership team that is 40% BIPOC.

The Bronx River was once clean enough to be considered for the city's water supply. However, over the course of a century, it was degraded by residential and industrial pollution to the point of being declared an "open sewer." Several generations have launched restoration efforts for the river, but until the 1970's they largely ignored the lower river, particularly in the South Bronx. What resulted was a river of stark contrasts. In fact, it still flows through very affluent towns in Westchester County into urban communities with some of the lowest incomes in America. Cleaning the river is an environmental justice issue, as pollution aggregates as it flows into the South Bronx, where low-income BIPOC communities suffer under many layers of environmental injustices.

The Alliance's work is participatory in nature, and over 22,000 volunteers have devoted almost 127,000 hours to restoring and enjoying the river, and dozens of local organizations have incorporated river restoration into their work. The Alliance has helped create 26 acres of new parkland and 5 miles of greenway trails near the river. Over 136,000 native plants have been planted as 114 acres of invasive species have been removed, restoring the native ecology. BxRA has engaged community scientist volunteers in water quality monitoring programming for more than seven years (see full description of current efforts to address water pollution issues in Section 4.0 a.), and has been collecting water quality data for twenty years.

The Bronx River Alliance incorporates the community into planning its work and goal setting by recruiting many Board members locally, hiring local staff, and consulting with Ecology, Greenway, and Foodway Teams made up of stakeholders such as residents and representatives from organizations and agencies working in the Bronx. This project was

developed in consultation with our partner organizations, who are also embedded in their local communities. In addition, the Alliance has discussed the project plan and goals with the Ecology Team and elicited feedback representing a wide range of stakeholders.

d. EJCPS Model

1) Issue Identification, Community Vision, and Strategic Goal Setting

The project builds upon the leadership of the partner organizations in their respective communities and their years of experience conducting community science-based water quality monitoring such as that undertaken by this project. For example, BxRA and CURB are part of the Lower Hudson Urban Waters Collaborative, which was formed with the support of an EPA Urban Waters Small Grant. Through this collaboration, member organizations share experiences and combine data resources with the goal of strengthening stewardship and community science capacity. Together with Riverkeeper, CURB and BxRA also held an event in 2019 which elicited feedback and ideas from water quality monitoring volunteers about how to utilize data to take action toward solutions to water quality issues.

The Bronx River Alliance develops its goals through community engagement processes such as quarterly meetings of its Ecology Team, made up of residents and stakeholder organizations. The Alliance is currently engaged in a participatory process in Bronx and Westchester Counties to update the 2010 Intermunicipal Watershed Management Plan, identifying key environmental concerns including water quality and flooding. BxRA is holding three public input meetings this spring about community priorities and is also circulating a digital survey in multiple languages.

Save the Sound's work in environmental justice communities is intentionally collaborative – working to bridge communities and leverage resources to support the leadership of those most impacted by poor environmental quality. StS listens to concerns and needs and develops a holistic approach that can work towards improving water quality while also addressing community needs.

In this project, community groups will play a particularly important role in designing the Education and Outreach activities, beginning from the start of the project and culminating in public activities to encourage advocacy for infrastructure remediation and policy change.

2) Community Capacity Building & Leadership Development

The project builds on long-term community efforts to improve water quality in the respective rivers. Each partner prioritizes the engagement of local residents in volunteer opportunities and community science training including water quality monitoring, and promotes community action to advocate for environmental improvements. The Bronx River Alliance has an existing volunteer and community science program focused around water quality monitoring that can support this initiative.

The project will provide training to local volunteers and hire Urban Justice Fellows from local EJ communities. It will build public trust in the data by incorporating community science participation and providing opportunities to share and discuss the results of the study. It will host

public meetings to engage and nurture leadership of community members, including sharing technical knowledge and providing education around water quality issues with the goal of promoting environmental justice. BxRA EELS Interns (Environmental Enhancement and Leadership for Students), a local youth development project, will use the data as part of their research into environmental issues along the Bronx River.

3) Consensus Building & Dispute Resolution
And 4)Multi-Stakeholder Partnerships & Leveraging of Resources

Each of the partner organizations has been involved in the design and development of the current project through weekly meetings and ongoing email consultations. While some of the partners have worked together before, this is an opportunity for each group to strengthen relationships with the others to pursue a unified regional goal. The partners have discussed and negotiated the strategies and activities of the project to develop a common vision, goals, and objectives. The partners are unified in approving a clear and workable plan to carry out the project and address the environmental issues of shared concern. Each partner is sharing their individual resources to strengthen the project, such as the use of Save the Sound's lab and already approved QAPP to ensure the technical quality of the monitoring data. The agreed-upon organizational structure of the project relies on the Bronx River Alliance's role in administering the grant and managing project activities in regular communication with the partners.

The partners are adept at reaching out to a range of stakeholders to address the issues identified by this project. The Bronx River Alliance utilizes a public/private partnership model in working with NYC Parks Department and has developed collaborations with over 100 local groups. Van Cortlandt Park Alliance (VCPA) built a Coalition for Daylighting Tibbetts Brook, comprising local environmental groups, individual community members, and elected officials who worked together for 20+ years to advocate for daylighting to divert millions of gallons of clean water away from NYC's sewer system. The resulting joint project led by NYC Parks and Department of Environmental Protection is now underway and is the largest Green Infrastructure project New York City has ever undertaken.

5)Constructive Engagement by Relevant Stakeholders

Project partners will engage civil organization stakeholders to participate in the education and outreach activities. The project will identify municipal agencies that can support the efforts of the community to address water quality issues in each watershed. Project participants will be encouraged to engage with governmental representatives to promote infrastructure repairs and policy changes.

In the past, when Van Cortlandt Park Alliance conducted water quality monitoring along Tibbetts Brook within Yonkers, they encountered sightings and readings that gave cause for concern. VCPA brought these to the attention of the City of Yonkers who worked quickly to discover and correct illegal discharges, ultimately improving the water quality for the community.

Similarly, BxRa and CURB have been in close communication with Westchester County municipalities to remediate illicit discharges and broken infrastructure with demonstrated success.

6) Sound Management & Implementation
As detailed in this proposal, the project has clear outcome measures that will contribute to tangible improvements in water quality conditions in the affected communities. Project partner commitments are clearly defined. All activity plans and timelines are clearly defined. The strengths of each partner organization are leveraged to support project outcomes.

7) Evaluation, Lessons Learned & Replication of Best Practices
Project progress will be evaluated in monthly meetings during the monitoring periods. During these evaluations lessons learned will be incorporated to improve outcomes, utilizing a culture of learning in our work. Sample collection and analysis and community participation success measures are clearly defined. Social media and traditional media outreach will share the results of the project. A logic model (attached) was developed as a template for the project plan.

StS's youth engagement work centers around open discussion (and sometimes surveys) with the participants at the end of a given season to help inform how projects could be improved in future iterations. For example, post-program surveys in their 2020 Mount Vernon youth engagement work helped inform, and ultimately change, programmatic methods for 2022 & 2023 field seasons.

e. Project Linkages Briefly describe how the project supports EPA Strategic Plan Goal 2, Objectives 2.1 and 2.2:
The proposed project will provide capacity-building resources to the local communities through educational outreach sharing information about the quality of water in regional rivers, the sources of pollution and agencies responsible for infrastructure improvement and pollution reduction. Local EJ communities can utilize this information to effect changes to reduce environmental impacts of pollution.

The project incorporates environmental justice by focusing on pollution originating in more affluent communities that flows downstream to environmental justice communities. Residents of the EJ communities will be empowered to seek redress and advocate for actions that will improve environmental impacts that disproportionately affect them and will continue to affect them more as the pace of climate change accelerates. This project will provide the steps of an advocacy campaign and a structure to continue it into the future. This first-time partnership formed of four EJ waterways coming together in common cause about water quality is in itself a tangible outcome that will form the basis for future action.

The project reduces the river water quality disparities between more affluent communities and the EJ communities impacted by downstream pollution flows. The project promotes community driven and meaningful involvement in addressing water pollution environmental justice concerns. The project incorporates translation of outreach materials into the main non-English

language group, Spanish, and also four other languages used locally, such as Arabic, Bengali, French, and Portuguese.

f. Partner and Collaborate

The proposed project includes three community-based environmental organizations, one educational institution, and two government agencies. This mix ensures the integration of regional community stakeholders with the technical expertise needed to meet project objectives successfully.

Partners

Bronx River Alliance, Inc. (BxRA) is a Community Based Organization (CBO) which serves as a coordinated voice for the river, working in harmonious partnership to protect, improve and restore the Bronx River corridor so that it may be a healthy ecological, recreational, educational, and economic resource for the communities through which the river flows. Stakeholders include community residents, especially those living in EJ communities along the river in Bronx and Westchester Counties, as well as NYC Parks and other organizations and agencies working to restore and improve the environment along the river as part of overall community development.

In this project BxRA will carry out the administration of the contract with EPA, participate in regular project meetings, supervise the EJ Fellow, volunteers and other staff who will organize and carry out the water quality sample collection, analyze data, supervise outreach material production, and, in collaboration with partners, execute public outreach activities and events. BxRA brings to the project professional staff for the administration of the grant, over twenty years of experience in water quality monitoring and outreach, and extensive relationships with community stakeholders.

The project represents an important part of the organization's mission by improving water quality of the Bronx River in partnership with other regional entities.

Save the Sound (StS): Save the Sound is a CBO that protects and improves the land, air, and water of Connecticut and Long Island Sound. They use legal and scientific expertise and bring people together to achieve results that benefit our environment for current and future generations. Among other things, StS promotes water quality improvements for the Hutchinson River, which runs through Westchester County through Scarsdale, Eastchester, Mount Vernon, New Rochelle, Pelham, and the Bronx before it empties into the Sound at Eastchester Bay. In this project, StS will incorporate project activities into its current QAPP, recruit volunteers to support sample collection, train Fellows and volunteers in QAPP sampling protocols, participate in regular project meetings, analyze the water quality samples for pathogens, carry out macroinvertebrate sampling, participate in public education and outreach events, promote public awareness through social media, and provide a final report to BxRA detailing participation of staff and community in project activities. StS brings technical expertise and Environmental Laboratory Accreditation Program-qualified lab facilities to the project, as well as experience working with local stakeholders in the Hutchinson River watershed.

Save the Sound has ongoing interest in data collected in the Long Island Sound watershed. The data can help advocate for improvements in the neighborhoods that need it most.

Van Cortlandt Park Alliance (VCPA): The Van Cortlandt Park Alliance, a CBO, preserves, supports, and promotes the recreational, ecological, and historical value of Van Cortlandt Park in the northern Bronx. VCPA has conducted water quality monitoring and has worked to improve Tibbetts Brook and its associated wetlands since 2016. VCPA is currently developing a project to daylight the covered Tibbetts Brook, a body of water that flows from Yonkers into the Bronx in Van Cortlandt Park. Tibbetts Brook is added into the NYC sewer system unnecessarily, so VCPA and other stakeholders are advocating for it to be removed from the sewer system and "daylighted."

For this project, VCPA will be responsible for: introducing the Ecology Fellow to Tibbetts Brook by providing an initial informational tour, background information, and previous data to determine the best sample locations, participate in regular project meetings, recruit volunteers to assist Ecology Fellow, host MacroInvertebrate Days that will be open to the general public in Van Cortlandt Park, promote this project and share the data collected with the local community via community events, e-blasts, and social media posts, and and provide a final report to BxRA detailing participation of staff and community in project activities. VCPA brings working knowledge and experience to this project, along with a connection to the local community.

In addition to promoting community involvement, the proposed project will provide data about Tibbetts Brook water quality that will support the daylighting process.

Center for the Urban River at Beczak, Sarah Lawrence College (CURB): An Education institution, CURB was launched June 2013 as an alliance of Sarah Lawrence College and the Beczak Environmental Education Center. The mission of CURB is to advance environmental knowledge and stewardship by providing high quality K-12 environmental education for the local community, establishing a regional hub for research and monitoring focused on Hudson River estuary and urban watershed issues, and serving as a welcoming open community space for a variety of civic and cultural activities. Since 2015 CURB has been monitoring and conducting research on sewage contamination in the Saw Mill River, a tributary of the Hudson River in southern Westchester County, with a host of partners and community scientist volunteers. For this project, CURB will participate in regular project meetings, engage in recruitment of volunteers to support the Fellow at sampling, carry out Macroinvertebrate study days, work with local organizations to plan public education events, provide stakeholder organizing and training with the Saw Mill River community through public events, develop outreach and education materials with partners, and and provide a final report to BxRA detailing participation of staff and community in project activities. CURB brings extensive subject matter expertise to the project, as well as deeply embedded relationships with local stakeholders.

Through this project, CURB supports its mission by highlighting key issues facing water quality in Hudson River tributaries and leading the regional conversation on how to fix them.

USGS New York Water Science Center (NYWSC): A government agency, the New York Water Science Center provides the hydrologic observations, research, and modeling needed for full integration of hydrogeologic, physiochemical, biological, and landscape processes across the freshwater to marine continuum. The NYWSC studies the effects of weather, climate, and man-made influences on groundwater levels, streamflow, and reservoir and lake levels as well as the ecological health of rivers, lakes, reservoirs, watersheds, estuaries, and fish and wildlife. In this project NYWSC will provide technical training to project staff and volunteers and participate in the public education and outreach activities. They bring technical expertise that will enrich the quality of educational outreach activities.

The agency's Interest in the project includes building collaborative partnerships among regional organizations and being able to reach a broad range of public stakeholders to raise awareness about New York water issues.

NYC Department of Environmental Protection (DEP): A government agency, the DEP manages wastewater and stormwater for the city. For this project it will provide information on the location of NYC stormwater infrastructure assets including MS4 outfalls. DEP brings deep knowledge of the existing infrastructure to the project and will support outreach to agencies responsible for implementing infrastructure improvements.

Subawards: Partner subawards to the CBO and Education organizations include compensation for staff time spent on the project over three years as well as costs for watershed outreach activities, and will not result in net profit for any partner. Subawards will be paid in three installments, at the end of each sampling period and after project completion upon receipt of required reporting. Bronx River Alliance has grant management and financial management systems in place to comply with all applicable EPA requirements.

2.0 Project Activities / Milestone Schedule / Detailed

QAPP

Activities:

- Save the Sound will add the project sampling locations for pathogen indicator bacteria and eDNA to their existing EPA approved QAPP and submit the additions for approval, negating the need to develop a separate QAPP for the proposed project.
- QAPP expansion steps include: addition of new pathogen indicator bacteria stations, developing the eDNA sampling standard operating procedure and filling in all data quality objectives associated with this sampling, and listing of the eDNA laboratory with all supporting material.

Objectives:

- All water quality sampling and analyses will be included under an EPA approved QAPP.
- All project water quality data will meet acceptance criteria set forth by the EPA and New York State Department of Environmental Conservation.

Outcomes (metrics): Project QAPP approved by EPA

Pathogen Indicator Bacteria Sampling

Activities:

- Partners will recruit 3 to 4 community volunteers to support the EJ Fellow in sample collection. (Supported by BxRA Volunteer Assistant)
- Save the Sound will train the EJ Fellows and volunteers on QAPP-approved sampling procedures.
- The BxRA Ecology Assistant will drive the project rental car to facilitate transportation of the EJ Fellow (a seasonal employee) and volunteers as needed to the sample sites.
- Water samples will be gathered by EJ Fellow and volunteers:
  - **Bronx River (sampling sites in Westchester County) - 5 samples/ week for 24 weeks over 2 years**
    - The Bronx River, approximately 24 miles long, flows through southeast New York in the United States and drains an area of 38.4 square miles. The river forms the border between the large cities of Yonkers and Mount Vernon, and flows into the northern end of The Bronx, where it divides East Bronx from West Bronx, southward through Bronx Park, New York Botanical Garden, and the Bronx Zoo and continues through neighborhoods of the South Bronx.
  - **Hutchinson River (sampling sites in Bronx County)- 5 samples/ week for 24 weeks over 2 years**
    - The Hutchinson River is a freshwater stream located in the Bronx and Southern Westchester, New York. The river forms in Scarsdale at Brookline Road and flows 10 miles south until it empties into Eastchester Bay in the Bronx.
  - **Tibbetts Brook (sampling sites in Bronx County and Westchester County) - 6 samples/ week for 24 weeks over 2 years**
    - Tibbetts Brook is a 4-mile waterway that begins in Yonkers, flowing into the Bronx where it runs into the New York City sewer system at an opening within Van Cortlandt Park. From there, the water goes into New York City's combined sewer system on Broadway. The project would take place inside Van Cortlandt Park in the Bronx and in Yonkers, where water testing will occur at multiple sites along the brook.
  - **Saw Mill River (sampling sites in Westchester County) - 6 samples/ week for 24 weeks over 2 years**
    - The Saw Mill River is a 23.5-mile tributary of the Hudson River in Westchester County, New York. It flows into Yonkers, where it empties into the Hudson as that river's southernmost tributary. It is the only major stream in southern Westchester County to drain into the Hudson instead of Long Island Sound. It drains an area of 26.5 square miles, most of it heavily developed suburbia.
- All samples will be transported by car to the laboratory at Save the Sound in Larchmont, NY
- Samples will be analyzed for:
  - Pathogen Indicator Bacteria - Enterococci in brackish waters and *E.coli*, and Total Coliforms in freshwater.
- Quality-assured data will be provided to BxRA EJ Fellow for management and analysis

Objectives: To generate water pollution data for comparison along each river and between rivers on a regional level.
Outcomes (metrics):

- 528 pathogen samples collected and analyzed
- 24 community science volunteers trained and assisting with sample collection over 2 years

Outfall Sampling
Activities:

- Based on preliminary Pathogen Sampling data, an average of three storm sewer or combined sewer outfalls on each river will be identified for additional sampling each year (precise locations will depend on need indicated by data).
- Effluent samples will be collected by the EJ Fellow and volunteers at outfalls with active discharge, testing for pathogen indicator bacteria and eDNA when elevated levels are detected.
    - River water samples collected as per QAPP and analyzed at the Save the Sound laboratory for Enterococci.

Objectives: To generate water pollution data to identify outfall pipes with an illicit discharge for remediation.
Outcomes (metrics): 24 outfall samples collected and analyzed

eDNA Sampling
Activities: A subset of pathogen indicator samples where persistent levels exist, seasonal stations, or where deemed necessary on outfall samples will be analyzed for eDNA. Samples will be collected at the same time as pathogen indicator bacteria samples.

- Samples will be analyzed for:
    - eDNA results will include quantification, or nondetect, of a human marker in the water sample. Samples can be collected in fresh or brackish water for this analysis.This type of sampling will only be taken at sites confirmed to have elevated pathogen indicator bacteria to maximize source tracking objective.

Objectives: To confirm whether the origin of pathogen indicator bacteria in water samples is human or non-human and quantify the human marker when present in a sample.
Outcomes (metrics): 8 environmental DNA samples will be collected and analyzed throughout the project cycle.

Data Analysis/ Visualization
Activities:

- Data entry and spreadsheet management by EJ Fellow during sampling periods
- Data Quality Assurance/Quality Control carried out by Ecology Coordinator to check for errors with data entry
- Graphing the spatial distribution of bacterial concentrations and elevated levels of other pollutants along each of the 4 rivers in the study areas
- Data is designed and published as one one-pager for each waterway and one region-wide data sheet by graphic design consultant, including local agency contact information

- One-pagers translated into Spanish

Objectives: Data visualization reveals contaminant levels and sewage/wastewater effluent hotspots along each of the four rivers.

Outcomes (metrics):

- 4 English language one-pagers produced detailing the monitoring results and identifying priority areas for restoration along each of the four rivers based on the project results, and 1 presenting region-wide results.
- 25 translated-pagers (5 languages total)
- Actionable information on steps that need to be taken to restrict/eliminate point sources of pollution included. Watershed residents are encouraged to use the information to call elected officials and agency representatives (contact info listed for each jurisdiction) and demand infrastructure repairs.

Education/ Outreach/ Advocacy

Activities:

- Data will be uploaded to EPA's Water Quality Portal
- Data is additionally made publicly available on water quality websites owned by partners
- Partners work with community groups to develop project educational activities beginning early in the grant period and culminating in the public events (BxRA Community Outreach Coordinator)
- Partners work with local stakeholder groups to help with distribution of one-pagers and outreach to increase meeting attendance
- Three youth-friendly public meetings held in Yonkers, Mount Vernon, and the Bronx with respective watershed residents to raise awareness and encourage attendees to petition agency representatives for action to mitigate pollution in each river
- Social media outreach/campaigns to increase public awareness of the pollution issues and advertise public meetings and call to action
- Promote project and results to mainstream media outlets through press release and outreach

Objectives: An outreach campaign that galvanizes watershed residents to advocate with municipalities to make wastewater infrastructure repairs and adhere to the Clean Water Act.

Outcomes (metrics):

- 3 Community organizations incorporated into outreach event planning
- 3 public meetings with a goal of 50 attendees per meeting (total 150)
- Each partner organization makes at least 3 social media posts (15 posts total).
- At least 1 article published in mainstream media

Macroinvertebrate Days

Activities:

- (Activities will not be included in the QAPP, rather be considered community engagement and education)
- Each waterway-based project partner will organize and carry out one macroinvertebrate study event per river per year, inviting stakeholder participation

- With volunteers from the community, kick nets/leaf packs will be used to sample for macroinvertebrates at sites that provide the most suitable habitat for a diverse array of species. Volunteers wade into each river with staff, collect macroinvertebrates from the water, and identify and count each type of organism.
- Education about macroinvertebrates, water quality, and waterway health will be shared with participants at each event.

Objectives:

- To quantify the health of each river using species diversity as a proxy.
- To engage and educate watershed stakeholders.

Outcomes (metrics):

- 8 macroinvertebrate days held over two years
- At least 160 community members will participate in macroinvertebrate study events

b. Milestone Schedule

Milestone Schedule assuming project start date of October, 2023

Timeframe	Activity	Description	Responsible
October 2023 - February 2024	QAPP Update	Add additional pathogen indicator bacteria sampling stations and eDNA parameter to existing EPA approved QAPP	StS
April - May 2024 April - May 2025	Volunteer Recruitment	Hiring and training of community volunteers to support sample collection	BxRA, StS, VCPA, CURB
May 2024 May 2025	Water Quality Fellow	Hiring and training of Fellow to organize and carry out sample collection	BxRA
June - August 2024 June - August 2025	Water Quality Monitoring	1) Seasonal pathogen indicator bacteria sample collection and transport to StS lab 2) Outfall sample collection and transport to StS lab 3) eDNA sample collection, processing and transport to certified lab 4) Monthly partner meetings to evaluate progress and procedures and make any needed corrections 5) Data management and quality control	1) BxRA 2) BxRA 3) BxRA, StS 4) BxRA, StS, VCPA, CURB 5) BxRA, StS
September - November 2025	Data Analysis	Data analysis and production of visualized one-pagers	BxRA, StS
April 2024 - September 2026	Public education and outreach	1) Partners work with local orgs to plan education activities 2) Macroinvertebrate days inviting community participation 3) Production and distribution of one-	1) BxRA, CURB, VCPA 2) BxRA, StS, VCPA, CURB 3) BxRA 4) BxRA, StS, VCPA,

ED_016126_00001251-00014

		pagers 4) Organize and carry out public events 5) Public education through social media and traditional media	CURB, NYWSC 5) BxRA, StS, VCPA, CURB, NYWSC

c. Itemized Budget Sheet / Budget Narrative - Attached

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures

a. Environmental Results (Logic Model) – Attached

b. Performance Measurement Plan

1) The BxRA Executive Director and Director of Programs will oversee the execution of the project to ensure compliance with all project activities and deliverables
2) The Project Manager (BxRA Ecology Coordinator) will maintain and update the project milestone plan, meeting monthly with project partners during the sampling season.
3) The Project Manager will supervise the EJ Fellow and Ecology Assistant, ensuring that samples are collected as planned.
4) Monthly meetings during active project periods including all partners will provide an opportunity to review progress and make adjustments to improve outcomes.
5) Project partners will submit a report to the Project Manager at the end of the project, detailing their activities recruiting and supporting volunteers, incorporating the public into macroinvertebrate days, and outreach activities.
6) BxRA Grant Manager and Finance Manager will maintain records, oversee and track project spending in accordance with EPA requirements, and submit timely reports.

c. Sustainability Plan and Community Vision

This project supports ongoing water quality monitoring efforts at the BxRA, including Project Water DROP (Detecting River Outfalls and Pollution) which has been working with dedicated community science volunteers to conduct testing along the Bronx River in Bronx and Westchester Counties for more than 7 years. Project data will contribute to the understanding of long-term water quality trends and document progress that has been made through the efforts of the Alliance and other community members to promote compliance with the Clean Water Act. It will be utilized in future outreach to elected officials and state and municipal agencies to promote infrastructure repair and policy changes.

Community residents have a vested interest in continuing water quality improvement efforts on the Bronx River because as the creation and restoration of parklands along the Bronx River have progressed, they have had more opportunities to come into personal contact with the river, including fishing, boating, and other recreational activities. The restoration of natural habitats along the river are supporting the return of wildlife such as American eels, Alewife herring, bald eagles, and even dolphins. Bronx residents are excited and motivated by the rewilding of parts of this highly urban area.

This regional partnership approach to water quality monitoring and community engagement would be applicable to many other watersheds and regions throughout the country.

4.0 Programmatic Capability

a. Organizational Experience related to the proposed project and their infrastructure as it relates to their ability to successfully implement the proposed project.

Organizational Experience with monitoring programs:

The Alliance Ecology Program runs several community science programs aimed at engaging students and community members in the collection of data about the health of the river in order to advocate more effectively for policies and practices that protect the river for wildlife and people. These programs also strive to cultivate a sense of stewardship and ownership of these spaces by community members. The Alliance's headquarters, Bronx River House, contains a basic laboratory for testing samples, and Ecology Program staff is well-practiced in working with volunteers to carry out monitoring programs. The Outreach Program staff help to recruit and manage volunteers and organize public engagement events and activities.

Water quality projects include:

➔ *Project WASTE (Waterway and Street Trash Elimination)*

Ecology personnel regularly organize volunteer groups to collect trash from riverbanks and from a trash boom that captures floatable debris entering the Bronx from upstream Westchester County communities. The volunteers not only clean the river, they also record the type and quantity of items collected for analysis and waste-reduction education and outreach.

➔ *Project Water DROP (Detecting River Outfalls and Pollutants)*

This project supports Community Science volunteers to monitor water quality at 15 sites along the Bronx River during six months of the year. Data collected over the last ten years allows the Alliance and public agencies to chart changes in the quantity and origins of pollution present in the river water, and targeted testing helps identify and address illicit sewage and chemical dumping sites all along the river's length. New pilots launched recently include microplastics research to investigate the variety and abundance of microplastics along the river, and nutrient loading which will inform the point sources of pollution to the river more precisely.

➔ *Unified Water Study*

The Alliance participates in a study across the Long Island Sound to monitor the health of the embayments, particularly in terms of dissolved oxygen. From spring through the fall our team is out on the water at dawn to take and analyze water samples which contribute to this large study of the environmental health of Long Island Sound embayments.

b. Staff Experience / Qualifications of Project Manager (PM)

Program Manager Qualifications:

In this project, the Program Manager will maintain communications with project partners, hire and train the EJ Fellow, supervise the EJ Fellow and Ecology Assistant as they carry out the sampling activities, attend EJ Grantee Networking and Training Workshops, assist in purchasing project materials, lead the analysis of data and work with the data visualization consultant and translator to produce the one-pager education and outreach materials, work with the project partners to assemble a final report with findings and recommendations, collaborate with the Community Outreach Coordinator to organize and lead public outreach events, meet project

reporting requirements, collaborate with the Communications Assistant to publicize the project, and organize public meetings with stakeholders to share the results of this project.

The Program Manager, BxRA Ecology Coordinator Christian Murphy, has a bachelor's degree in environmental studies with a concentration in Earth systems science. Christian worked as a lab technician at a private fossil dating lab for 2 years, and received 4 months of extensive training to perform field surveys with the U.S. Bureau of Land Management in Western Colorado. The PM has worked in the Bronx community since 2018. As the BxRA Ecology Coordinator, he has 3.5 years of experience organizing and managing community scientists in the collection and lab analysis of pathogen samples from 15 sites along the full length of the Bronx River. Christian helped write an EPA-approved QAPP for the Bronx River's pathogen, nutrients, and detergents monitoring program, Project Water DROP. In addition to recruiting and managing community volunteers, he also mentors 5 to 6 students conducting environmental research on the Bronx River each year and coordinates and leads public meetings to share information on the ecological of the Bronx River and relevant issues up to 6 times a year.

The BxRA Ecology Assistant, Isabella Romano, has a bachelor's degree in Environmental Studies from New York University and performed extensive lab work, data entry, and reporting during her academic career. Isabella brings 4 years of experience organizing and leading hundreds of students and volunteers in virtual and in-person events pertaining to public health at Peer Health Exchange and the Reflect Organization.

The BxRA Community Outreach Coordinator, Victoria Toro, received a Bachelor of Science in Marine Science and Biology from the University of Tampa. In her role Victoria helps connect Bronx River community residents to volunteer programming along the Bronx River and ensures they are widely-publicized and accessible for environmental justice communities. She also maintains frequent lines of communication with dozens of local and regional elected officials and stakeholders on various events and collaborative projects, such as the updated Bronx River Intermunicipal Watershed Management Plan.

c. Expenditure of Awarded Grant Funds -

The project approach, procedures, and controls for ensuring that awarded grant funds will be expended in a timely and efficient manner are described in this workplan. In summary, they include:

- Clearly defined project activities and timeline
- Regular meetings and communication between project partners with evaluation sessions
- Program Manager experience in operating similar programs
- Established reporting procedures for project partners
- Professional BxRA grant and financial management staff with written and board-approved accounting procedures to administer grant spending, record keeping, and reporting
- Weekly BxRA staff meetings to review project progress and quarterly grant reviews to ensure compliance with deliverables and spending goals

- Project oversight by BxRA Executive Director and Director of Programs

5.0 Past Performance

Hearst Foundation, 'River-Based STEM Education for Students', $100,000. 7/1/2021 - 6/30/2025
This grant has supported the successful pilot of a new internship program, and has met or exceeded the agreed outcomes. Annual progress reports have been submitted on time to the satisfaction of the donor.

National Fish and Wildlife Foundation, Long Island Sound Futures Fund, 'Project Water DROP', $49,232.48, 10/1/2021 - 12/31/2022
The project was successfully completed, exceeding proposed outcomes. Interim and final technical reports have been submitted on time to the satisfaction of the donor.

New York State Department of State, 'Bronx River Watershed Management Plan Update', $245,428. In collaboration with Westchester County Planning Department and the Bronx Borough President's Office. 9/1/2018 - 8/30/2023
Due to delays in grant contracting, the project activities did not start until March 2022. Project elements are being carried out currently, and we are requesting a grant extension beyond 8/30/23 in order to allow sufficient time for community engagement activities. Reports have been submitted on time to the satisfaction of Westchester County Planning, who is administering the grant, and the NYS DOS.

New York State Department of Environmental Conservation, Environmental Justice Community Impact Grant, 'Hyperlocal Air Quality Monitoring in the South Bronx', $99,995. 1/1/2022 - 12/31/2024.
The project has achieved all milestones to date. Quarterly reports have been submitted on time and accepted by the DEC.

Creatives Rebuild New York, a project of the Tides Center, Artist Employment Program, $236,400. 7/1/2022 - 7/1/2024. The project has achieved all milestones to date. Reports have been submitted as scheduled and accepted by CRNY.

6.0 Quality Assurance Project Plan (QAPP)

In order for the data produced through this project to be accepted by the EPA and other governmental authorities a QAPP will be required. Because of the participation of Save the Sound in the project, these additional sampling locations and parameter will be added to their existing EPA approved QAPP and submitted to EPA for approval. There will be no need to start from scratch, and the process is anticipated to take no more than 4 months at the start of the project period.

Internal Revenue Service
District Director

Department of the Treasury

Date: NOV 12 1982

Person to Contact:
J. Feltman

Contact Telephone Number:
Ex. 6 - Personal Privacy (PP)

Ironbound Community Corporation
95 Fleming Avenue
Newark, N. J. 07105

Gentlemen:

Based on the information you recently submitted, we have classified your organization as one that is not a private foundation within the meaning of section 509(a) of the Internal Revenue Code because you are an organization described in section 509(a)(1) and 170(b)(1)(A)(vi).

Your exempt status under section 501(c)(3) of the Code is still in effect.

This classification is based on the assumption that your operations will continue as you have stated. If your sources of support, or your purposes, character, or method of operation change, please let us know so we can consider the effect of the change on your exempt status and foundation status.

Because this letter could help resolve any questions about your foundation status, you should keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above.

Sincerely yours,

Cornelius J. Coleman
District Director

This letter supercedes the modification letter which was issued on July 29, 1974, and it reaffirms the determination letter which was issued on February 18, 1972.

Title: Deputy Director of Organizing & Advocacy

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

n/a

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

n/a

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Yasmin Mattocks, HR Manager, ymattocks@ironboundcc.org, Ex. 6 Personal Privacy (PP) (fax), Ex. 6 Personal Privacy (PP) (phone)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Please contact Ms. Mattocks at the contact information above for a copy of the procedues.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Drew Curtis	CEO	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Ms. Applewhite:

The following is a Letter of Support for the US EPA's Environmental Justice Collaborative Problem-Solving Cooperative agreement program for "Advancing Environmental Justice and Climate Resiliency through Increasing Tree Canopy in the Ironbound section of Newark." This project will engage residents and small businesses in increasing tree canopy to build environmental justice and climate resilience through improving air quality, lessening the urban heat island effect, and mitigating flooding.

This project includes the following partners:

- Ironbound Community Corporation (ICC), Newark NJ
- City of Newark
- Ironbound Business Improvement District, Newark, NJ
- New Jersey Tree Foundation

Ironbound Community Corporation is a 54-year-old, community-based, nonprofit organization with a mission to empower and engage Newark residents to create a more just, vibrant, and healthy neighborhood and we see that they are committed to advancing environmental justice and climate resiliency. This project will increase tree canopy in an environmental justice community in EPA's Region 2.

The New Jersey Tree Foundation is a nonprofit dedicated to planting trees in the state's most urban areas, where the need is greatest, for over 25 years. Through tree planting, volunteerism, and partnerships, the NJ Tree Foundation assists communities in improving their environment and quality of life while combating environmental injustice. Since 2006, the organization's Renaissance Trees Program has worked directly at the request of Newark residents and is a longtime collaborator of the Ironbound Community Corporation.

New Jersey Tree Foundation

@njtrees

We look forward to working with ICC and others on this important and needed project by leading the planting of 150 trees and teaching residents and small businesses how to be effective tree stewards over the three year grant period.

Please do not hesitate to reach out to me with questions about the NJ Tree Foundation or our involvement in this project with the ICC. I can be reached via email at lsimms@njtreefoundation.org.

Sincerely,

Lisa Simms
Executive Director

April 12, 2023

Director Applewhite,

I am pleased to provide this Letter of Support for Ironbound Community Corporation (ICC)'s project, "Advancing Environmental Justice and Climate Resiliency through Increasing Tree Canopy in the Ironbound section of Newark," submitted to the US EPA's Environmental Justice Collaborative Problem-Solving Cooperative agreement program.

This project will engage residents and small businesses in increasing the tree canopy, which will build environmental justice and climate resilience through improving air quality, lessening the urban heat island effect, and mitigating flooding. This project will increase tree canopy in an environmental justice community in EPA's Region 2.

ICC is a 54-year-old, community-based nonprofit organization with the mission to empower and engage Newark residents to create a more just, vibrant, and healthy neighborhood. The City of Newark has worked closely with ICC on a number of initiatives for many years, and we are familiar with ICC's commitment to advancing environmental justice and climate resiliency.

Newark is committed to creating a greener, healthier, and more sustainable city for our residents and visitors. As laid out in the City's new Master Plan, we face incredible challenges in years to come. We look forward to working with ICC and the rest of the team on this important and needed project by ensuring that all grassroots work towards the project is well connected to City efforts. Through this type of collaboration, we will ensure longevity to our canopy. This type of collaboration is the best chance forward for Newark and its residents to mitigate the harms of climate change now, together.

Sincerely,

Jonathan Gordon

To Hazel Applewhite:

The following is a Letter of Support for the US EPA's Environmental Justice Collaborative Problem-Solving Cooperative agreement program for "Advancing Environmental Justice and Climate Resiliency through Increasing Tree Canopy in the Ironbound section of Newark". This project will engage residents and small businesses in increasing tree canopy to build environmental justice and climate resilience through improving air quality, lessening urban heat island effect, and mitigating flooding.

This project includes the following partners:

- Ironbound Community Corporation (ICC), Newark NJ
- City of Newark
- Ironbound Business Improvement District, Newark, NJ
- New Jersey Tree Foundation

Ironbound Community Corporation is a 54-year-old, community-based, nonprofit organization with a mission to empower and engage Newark residents to create a more just, vibrant, and healthy neighborhood and we see that they are committed to advancing environmental justice and climate resiliency. This project will increase tree canopy in an environmental justice community in EPA's Region 2.

The Ironbound Business Improvement District (IBID) is a long-standing certified Newark Special (Business) Improvement District established in December 2000 by municipal ordinance and is a 501© (3) nonprofit management and planning community business development organization. Current management has been in place since 2002 with 20 years of continuous focus. It's municipally approved and collected annual budget is $1,050,000. As indicated above, these funds reflect a comprehensive community development program that includes efforts to improve and enhance green space and the tree canopy.

We look forward to working with ICC and others on this important and needed project through outreach to the business community to engage them in tree planting and through supporting maintenance of the newly planted trees.

Sincerely,
Vince Baglivo, Executive Director
Ironbound Business Improvement District

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

n/a

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

n/a

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☐ Yes ☒ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☒ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

yes

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

no

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Christine Limb	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

EXPERIENCE

Ironbound Community Corporation
Deputy Director, Organizing and Advocacy, currently
Director of Environmental Justice and Community Development, 2017 – Present

- Set strategic goals and visions for the division.
- Fundraise for all programing and advocacy campaigns.
- Spear-headed the Right to Counsel Newark Coalition which successfully passed the ordinance within one year of launch.
- Represents ICC on the Steering Committee of the Climate Justice Alliance
- Advise on all policy and advocacy matters for the agency.

Ironbound Community Corporation
Leadership Developer, 2014- 2017

- Create content, ensure outreach and delivery effective community meetings and teach-ins.
- Curriculum development for various programs including a 6 week intensive Environmental Justice Leadership Institute.
- Run job trainings that empower residents through a holistic approach that includes work place conflict resolution skills and environmental justice community issue awareness.
- Develop the leadership and advocacy skills of targeted residents.

The ROOTS Project, Inc
Founding Member and Current Board Member
Program Manger March 2012-May 2014

- Developed programs and curriculum
- Developed relationships with schools and interested clients
- Facilitated and managed ongoing programs such as the Consortium on Leadership and Diversity, The YouthROOTS Project, etc
- Volunteer recruitment, training and engagement.
- Social media presence and resource development.
- Worked with high school students, educators and community members around all social justice issues including but not limited to: race, class, gender, sexual orientation, ability status, body image, educational opportunities, religion.

Ceceilyn Miller Institute for Leadership and Diversity In America,
Trainer and Consultant, September 2007 – March 2012

- Developed and implemented curriculum based on conflict resolution and community development.
- Helped conceptualize and bring to life the Martin Luther King Youth Leadership conference that became a flagship program of the organization.
- Met with clients to determine needs and create customized programs for their communities.
- Turn key facilitation skills trainings for clients such as City Year, Harrison School district, West New York School District, etc.
- Helped run the National Student Leadership and Diversity Convention.

EDUCATION
Drew University, Madison, NJ
Bachelor of Arts in Sociology and Philosophy

Special Skills

Ex. 6 Personal Privacy (PP)
Ex. 6 Personal Privacy (PP) Bloomfield, NJ 07003
Ex. 6 - Personal Privacy (PP)
Ex. 6 Personal Privacy (PP)

- Native Spanish Speaker
- Conflict resolution training.
- Strong Facilitation, listening and communication skills.
- Workshop and curriculum development and implementation skills.
- Qualitative and quantitative evaluation skills.

a. Project Summary – Recommended one-page summary document (does count as part of 18-page workplan limit). Summary includes:

Project Title: Advancing Environmental Justice and Climate Resiliency through Increasing Tree Canopy in the Ironbound section of Newark

Project Location: Newark, NJ

Rural Area: No

New EJCPS Recipient (if awarded): Yes

Applicant Information (name, address, main contact information):

Maria Lopez-Nunez, Ironbound Community Corporation,

Ex. 6 Personal Privacy (PP) mlopeznunez@ironboundcc.org

Brief Description of Applicant Organization:

Founded in 1969 by residents, ICC's mission is to engage and empower individuals, families, and groups to realize their aspirations and, together, work to create a just, vibrant and sustainable community. ICC has prided itself as a grassroots organization, working closely with residents in the development and delivery of its services and initiatives. Today, ICC serves thousands of children and families annually with multiple services and organizes the entire community to achieve high quality educational, social, environmental, and economic outcomes for all residents.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? No

Project Abstract -- Brief description (250 words or less) of the main objective, activities, and outputs/outcomes of the project, including the specific geographic areas of focus.

Ironbound Community Corporation (ICC), Ironbound Business Improvement District (IBID), NJ Tree Foundation (NJTF), and the city of Newark will partner to plant trees throughout the Ironbound section of Newark, which has the least amount of tree canopy in the city. This project will reduce urban heat island effect, mitigate flooding, and improve air quality, while engaging hundreds of residents and businesses. ICC and IBID will conduct extensive outreach to residents and businesses to solicit interest and buy-in to receive a tree, respectively, while NJ Tree Foundation will manage the planting of the trees and offer tree stewardship workshops to residents and businesses who sign up for a tree and to the community at-large. The city of Newark will help facilitate permits and other services, while tying the efforts to its larger

sustainability and resiliency plans. All told there will be at least 150 trees planted and 150 residents and small business owners engaged throughout the Ironbound.

Project Type(s) -- such as training, monitoring, demonstration, small scale construction, public education Small scale construction

Special Considerations - If applicable to your project, which special considerations do you believe your project qualifies for? (Climate Change/Disaster Resiliency, Rural Areas, Health Impact Assessments, and/or other factors identified in Section V) climate change/disaster resiliency

Environmental Issue – e.g., Air, Water, Waste, etc. • List of Project Partners -- include partner name and stakeholder group. For example, CBOs, State University (academic); County commissioner (local government); Houses of worship (faith-based); Corporate or local companies (business/industry); etc. Air, Water, Heat

Will you need to develop a QAPP for your project? No

b. Environmental and Public Health information of the Underserved Community - The applicant will be evaluated on the ability to clearly describe the local environmental justice issue(s) the project proposes to address and the community that is impacted. Please describe the following:

• Describe and characterize the underserved community directly impacted by disproportionate environmental and/or public health harms and risks and describe how the community is impacted by those harms and risks (i.e., Who is the community comprised of and what are the disproportionate environmental and/or public health issues they experience?)

The Ironbound" neighborhood is located in the East Ward of Newark in Essex County, New Jersey. It is roughly four square miles east of Newark's Pennsylvania RR Station, bounded by highways (Routes 1 & 9, 21, 78, NJ Turnpike), waterways (Passaic River, Newark Bay), Newark Airport and Port Newark/Elizabeth. With a population in excess of 50,000, two-thirds of which are foreign born, the Ironbound is one of the most densely populated and diverse areas of the city. Seventy five percent of those over the age of five speak a foreign language at home, typically Portuguese or Spanish. Educational attainment levels are relatively low: 55% of those over 18 have not obtained a high school diploma. The range of household poverty rates among Ironbound census tracts is roughly 25 to 55%. Within the eastern end of the Ironbound where many of the waste related industries are concentrated, 40-50% of households have an annual income of less than $20,000. Ironbound also floods regularly, both from major disasters like Hurricane Irene and SuperStorm Sandy, and after everyday rain events due to stormwater back-up and Combined Sewer Overflow (CSO). There are over 100 brownfield sites in the Ironbound and the Passaic River is the longest Superfund site in the country. Overall, Newark is the second-worst urban heat island in the country and the Ironbound has the least amount of tree canopy in the city, combined with mostly impervious surfaces like concrete and asphalt. A snapshot of the Ironbound from EJScreen confirms how overburdened the neighborhood is:

EPA United States Environmental Protection Agency

EJScreen Report (Version 2.11)
the User Specified Area
NEW JERSEY, EPA Region 2
Approximate Population: 53,535
Input Area (sq. miles): 4.36
Ironbound

Selected Variables	Percentile in State	Percentile in USA
Environmental Justice Indexes		
Particulate Matter 2.5 EJ Index	88	83
Ozone EJ Index	46	75
Diesel Particulate Matter EJ Index*	89	92
Air Toxics Cancer Risk EJ Index*	85	88
Air Toxics Respiratory HI EJ Index*	87	90
Traffic Proximity EJ Index	85	87
Lead Paint EJ Index	72	84
Superfund Proximity EJ Index	92	94
RMP Facility Proximity EJ Index	93	92
Hazardous Waste Proximity EJ Index	91	93
Underground Storage Tanks EJ Index	87	93
Wastewater Discharge EJ Index	88	91

EJ Indexes - The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator

This project will address three of these issues through tree planting: improving air quality, lessening urban heat island effect, and mitigating flooding.

c. Organization's Historical Connection to Underserved Community - The applicant will be evaluated on the description of the strong connection between their organization and the underserved community. Please describe the following:

ICC has a fifty-four year history of working in the Ironbound community and we serve more than 1000 residents every day through our diverse programs throughout the neighborhood – from an early learning center with over 220 families, two after school programs with more than 160 students, two Family Success Centers with hundreds of people served each day, housing and tenant organizations, park stewardship groups, and various environmental committees. ICC has a rich history of environmental justice activism dating back to our work with residents struggling with the devastating impact of dioxin contamination at the Diamond Alkali Superfund site in the 1980s. Since then, we have developed comprehensive programs that address some of the most challenging environmental justice issues of our time. ICC continues a tradition of grassroots, community based organizing to create space for residents to speak for themselves and enact real change on the ground. Some of the examples of our work on the ground include our efforts organizing residents to save Riverbank Park, one of two precious neighborhood parks at the time, from demolition in the 1990s. More recently, we helped organize residents in defeating a proposal for a medical waste facility near a public housing complex and advocating for the cleanup of two brownfield sites, Tidewater Baling and a lead contaminated soccer field. In 2010, when Wilson Avenue School, a local elementary school, was evacuated due to benzene contamination, parents and teachers called on ICC to help them get their public health and environmental questions answered by public officials. This call came again in 2016 when elevated levels of lead in the drinking water was announced in the press, the parents and ICC banded together to ensure a new filtration system from the then state controlled district. In 2020, during the heart of the pandemic, ICC and partners got the state of NJ to pass the strongest environmental justice law in the country, which mandates that its Department of Environmental Protection reject permits for facilities in already overburdened communities like the Ironbound and Newark. These are just a few of the examples of the ways in which ICC's active engagement and support of residents' self-empowerment to advocate for environmental justice concerns are vital to this community's survival.

ICC also works closely with residents on critical community-wide planning initiatives that help create a shared vision and roadmap for future development in the community. In 2001, ICC together with a committee of more than 100 residents completed the Ironbound Community Master Plan, which laid out a comprehensive plan for land use in the neighborhood. We have always pushed our local government to listen to the community vision. In 2003, ICC completed

the Ironbound Open Space and Recreation Plan which used resident input and charrettes to identify the major needs, assets and potential growth areas for green space in the community. This analysis led to the creation of the Gateway Waterfront Park Plan, which articulated the community's vision of a restored Passaic River waterfront park. In 2004, and updated in 2017, ICC developed the East Ferry Street Neighborhood Revitalization Plan drawing on community input to identify this area of the community as most in need of attention and investment. All of these planning efforts have been structured around community input through innovative public participation processes which encourage meaningful participation by diverse residents to shape the direction and scope of the plans developed to deepen democracy. The city's adoption of a new Master Plan in 2015 was a huge win for self-determination at the neighborhood level throughout the City of Newark.

In addition to these organizing activities, ICC also coordinates standing resident committees such as neighborhood Community Advisory Boards, youth and adult Environmental Justice Leadership groups, and urban farming groups made up of concerned residents. In addition to these all resident led committees, ICC convenes diverse stakeholder groups like the Ironbound CARE Cumulative Impacts Project Stakeholder Committee, the Brownfields Area Wide Planning Grant Steering Committee, the Passaic River Superfund Community Advisory Group, Mujeres Activas, and our various Community Advisory Boards that focus on the hyperlocal neighborhood issues. ICC strives to have as many entry points for participation and inclusion of the frontline in the future of Newark.

Recent efforts working with young people in the community has led to youth residents taking leading roles in action strategies and advocacy – young people from the community have presented on EJ in their neighborhood, participated in community air monitoring projects, and organized testimony in front of municipal boards, NJ Department of Environmental Protection hearings, and federal public comment meetings around the Superfund cleanup of the Passaic River. ICC's commitment to not just serving but empowering residents has gone a long way towards a vibrant and more just community.

d. EJCPS Model - Demonstrate the utility of the Environmental Justice Collaborative Problem Solving Model (Section I.B). Provide a clear and concise description about:

This project will utilize all parts of the EJCPS model and has in fact already begun to use it:

1. ICC, together with IBID, NJTF, and the city of Newark, all understand that the Ironbound section of Newark lacks trees and that trees can advance both environmental justice and climate resilience. Previous community plans and city-wide plans that had deep community input called for more trees as well. Together, project partners decided to come together to address these challenges.

2. This project will involve community capacity building and leadership development. ICC and IBID will reach out to residents and small businesses directly and seek to bring them into the project directly, as stewards of trees in the Ironbound. NJ Tree Foundation will provide tree stewardship training to these residents and small business owners to ensure they have the skills needed to succeed.

3. All project partners have long histories in working together. Still, there are times when goals may differ. We will mitigate this by maintaining open communication, building trust, and referring back to shared goals, which in this case is increasing tree canopy in the Ironbound.

4. This project brings together multiple partners from multiple sectors and leverages each other's resources. Our clear logic model will be used to coordinate the partnership as we work towards our shared goal and vision.

5. This project is not just engagement for engagement sake, but engagement that leverages the expertise and experiences of each project partner. ICC will engage residents, IBID will engage the business community and support maintenance of trees, NJ Tree Foundation will complete the actual tree planting and tree stewardship education, and the city of Newark will provide resources, streamline permitting, and more.

6. All project partners have the capacity to effectively manage and implement this initiative, given their years of experience completing their clear tasks

7. Lastly, this project has evaluation built in from the start and is aimed at being a model for other environmental justice communities; not just in Newark, but throughout the country.

e. Project Linkages

This project supports EPA Strategic Plan Goal 2, Objective 2.1 by directing improving the air quality, reducing urban heat island effect, and mitigating flooding for the severely overburdened environmental justice community of the Ironbound in Newark, NJ.

f. Partner and Collaborate - Provide a clear and concise description of how the proposed project promotes collaborations with partners from multiple stakeholder groups, such as industry, business, academia, government, etc., to develop solutions that will address environmental and/or public health issues. We encourage applicants to seek diversity in partnerships in an effort to enhance the process of achieving the project's goals. Applicants are strongly encouraged to have at least THREE signed letters of commitment from partners representing at least THREE different stakeholder groups submitted with their application.

Ironbound Community Corporation (ICC), Ironbound Business Improvement District (IBID), NJ Tree Foundation (NJTF), and the city of Newark will come together to form a multi-sector collaboration to advance environmental justice and community climate resilience by increasing tree canopy in the Ironbound section of Newark. ICC, as a neighborhood-based anchor institution, has long standing relationships with each partner and will bring them together with community residents for this project. ICC will be responsible for overall project management and direct outreach to residents to get them to sign up for and adopt a new tree. IBID promotes interest in the Ironbound and Newark as a great place to visit in addition to fostering economic growth and employment opportunities. ICC will also train residents and small business owners in environmental justice and climate resiliency. Established in 2000, IBID is led by a 13-member board and is funded through special assessments of commercial properties in the District. Since its inception, it has upgraded and improved the Ironbound by focusing on quality-of-life issues such as streetscape improvements, sidewalk and street cleaning, parking changes and pedestrian signage, and other administrative tasks. IBID will be responsible for outreach to businesses and supporting maintenance of the trees with their watering truck. The NJ Tree Foundation is a state-wide non-profit organization dedicated to planting trees in NJ's most underserved neighborhoods. They will be responsible for the planting of the trees, as well as teaching tree stewardship classes to residents and business owners who sign up for trees, as well as to the community at large. The city of Newark, through its Sustainability Office, will connect this effort to the city's larger sustainability and resiliency efforts and plans, as increasing tree canopy was a goal in both its Sustainability Action Plan and the Northeast NJ Resiliency Action Plan. It will also provide a front-end loader to offload trees during the plantings and disposing of waste after litter cleanups, and will allow access to city owned property and issue permits for tree planting and concrete removal. Together, this collaboration will ensure success of the project and all partners will continue their working relationship to both maintain these trees and look for additional opportunities to increase tree canopy.

2.1 Project Activities / Milestone Schedule / Detailed Budget Narrative

Project Activities	Project Milestones

• Project start-up by ICC as project manager and by partners, including finalization of curriculum • Outreach to residents and small businesses by ICC and IBID to sign them up for first round of tree planting (both to get a tree planted at their home or business and to volunteer during the planting) • NJ Tree Foundation and city of Newark prepare for first round of tree planting (obtaining permits, cutting concrete, etc.), while ICC and IBID assist NJTF with recruiting volunteers • First round of tree planting • Tree stewardship workshops are offered by NJ Tree Foundation for the Ironbound and greater Newark community, especially those who received trees in the spring. ICC augments these workshops to include training on environmental justice related to air quality, urban heat island effect, flooding, and climate resiliency more broadly • Project team debriefs spring planting season to make improvements for future plantings • Project team prepares for Fall tree planting (outreach, sign ups, permits, etc.)	• Project ready for launch by January 31, 2024 • Outreach and sign-ups are complete by March 30, 2024 • Trees are ready to be planted by April 13, 2024 • First round of trees are planted by June 20, 2024 • First round of tree stewardship workshops is completed by August 30, 2024 • Debrief is completed by July 31, 2024 • Fall planting is ready to commence by September 13, 2024 • Fall planting season is complete by November 30, 2024 • Debrief is completed by January 31, 2025 • Next round of tree stewardship workshops is completed by March 30, 2025 • Outreach and sign-ups are complete by March 30, 2025 • Trees are ready to be planted by April 11, 2025 • Spring tree planting completed June 20, 2025

• Fall planting season • Project team debriefs fall planting season to make improvements for future plantings • Tree stewardship workshops are offered by NJ Tree Foundation for the Ironbound and greater Newark community, especially those who received trees in the fall • Outreach to residents and small businesses by ICC and IBID to sign them up for the next round of tree planting • Project team prepares for the next round of tree planting (obtaining permits, cutting concrete, recruiting volunteers, etc.) • Spring 2025 Tree Planting • Tree stewardship workshops are offered by NJ Tree Foundation for the Ironbound and greater Newark community, especially those who received trees in the spring • Project team debriefs spring planting season to make improvements for future plantings • Project team prepares for Fall tree planting (outreach, sign ups, permits, etc.) • Fall planting season	• Next round of tree stewardship workshops is completed by August 30, 20 • Debrief is completed by July 31, 2025 • Fall planting is ready to commence by September 12, 2025 • Fall planting season is complete by November 30, 2025 • Debrief is completed by January 31, 2026 • Next round of tree stewardship workshops is completed by March 30, 2026 • Outreach and sign-ups are complete by March 30, 2026 • Trees are ready to be planted by April 10, 2026 • Spring planting completed by June 20, 2026 • Debrief is completed by July 31, 2026; Lessons Learned document is completed by September 30, 2023 • Final round of tree stewardship workshops is completed by August 30, 2026

• Project team debriefs fall planting season to make improvements for future plantings • Tree stewardship workshops are offered by NJ Tree Foundation for the Ironbound and greater Newark community, especially those who received trees in the fall • Outreach to residents and small businesses by project team to sign them up for next round of tree planting • Project team prepares for next round of tree planting (obtaining permits, cutting concrete, recruiting volunteers, etc.) • Spring Planting Season • Project team debriefs planting of trees and documents its lessons learned • Tree stewardship workshops are offered by NJ Tree Foundation for the Ironbound and greater Newark community, especially those who received trees in the spring	

3.1 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

Project Outputs	Project Outcomes
• At least 150 trees are planted in the Ironbound section of Newark, NJ • At least 150 residents and small business owners are educated on proper tree stewardship and addressing quality of life issues • Lessons Learned document is created and made available for other communities looking to address urban heat island effect and increase climate resiliency in their neighborhood	• Tree canopy is increased in the Ironbound section of Newark, NJ, thus improving air quality, mitigating flooding, and lessening urban heat island effect • Residents and small business owners have increased awareness of how to properly care for and maintain trees and know who to go to with the city of Newark to address quality of life issues related to trees, air quality, flooding, and heat • A blueprint for community-led, collaborative tree planting exists for other environmental justice communities

Performance Measurement Plan

Resources/Inputs	Activities	Outputs	Outcomes

• Staff time • In-kind contributions • Project Materials, especially trees • Partnering Organizations	• Project start up • Outreach • Planting preparation • Tree Planting • Tree Stewardship and Environmental Justice Workshops	• At least 150 trees are planted in the Ironbound section of Newark, NJ • At least 150 residents and small business owners are educated on proper tree stewardship and addressing quality of life issues • Lessons Learned document is created and made available for other communities looking to address urban heat island effect and increase climate resiliency in their neighborhood	• Tree canopy is increased in the Ironbound section of Newark, NJ, thus improving air quality, mitigating flooding, and lessening urban heat island effect • Residents and small business owners have increased awareness of how to properly care for and maintain trees and know who to go to with the city of Newark to address quality of life issues related to trees, air quality, flooding, and heat

			• A blueprint for community-led, collaborative tree planting exists for other environmental justice communities

c. Sustainability Plan and Community Vision

This project advances both community plans like the 2015 South Ironbound Resiliency Action Plan (and the accompanying Newark Resiliency Action Plan) and the 2017 East Ironbound Equitable Development Plan and government-adopted plans that had robust community engagement like the Sustainability Action Plan last updated in 2019 and the 2022 Newark Master Plan and 2022 Northeast NJ Resiliency Action Plan. Residents and small businesses owners being trained in tree stewardship, environmental justice, and climate resiliency will build more ownership and sustainability of the project moving forward as residents continue to push for more trees and better maintenance of the ones they have now. Lastly, the proect will help environmental justice communities elsewhere in Newark, New Jersey, and the country learn about how to develop and implement a neighborhood-based tree planting program like this, through its Lessons Learned document.

4.1 Programmatic Capability

ICC has years of experience with environmental justice, even before it was a regularly accepted term. In the 1970s, ICC opened NJ's first public health information van, in response to high rates of illness at its pre-school and community school. Other major environmental justice campaigns include cleaning up the Diamond Alkali Superfund site (the fight continues to this day with the Passaic River Community Advisory Group), fighting against garbage incineration from the late 1980s until present, stopping the demolition of a historic park, and most recently, passing the strongest state environmental justice law in the country.

Maria Lopez-Nunez, (she/her), would be the prime staff person responsible for this work.In her role as Deputy Director of Advocacy and Organizing of Ironbound Community Corporation (ICC); she fights the bad and builds the new challenging the current political system, holding power brokers and polluters accountable while fighting for environmental, housing, immigrant, and racial justice. She has organized and helped the passage of historic and landmark city and state legislation such as Right to Counsel for Newark tenants, state-wide pandemic eviction protections and the NJ Environmental Justice Cumulative Impacts Bill, all of which will significantly increase the quality of life of those that are often deemed disposable.

Maria serves on the White House Environmental Justice Advisory Council (WHEJAC) and she is a Steering Committee member of the Climate Justice Alliance which unites communities for a Just Transition, the Coalition of Healthy Ports, and volunteers as a Board Member and trainer for ROOTS. She oversees a staff of eleven and a budget of nearly one million dollars. She is also a member of the Right to the City and Grassroots Global Justice Alliances.

ICC is led by an Executive Director with over 25 years of experience, including over a decade as ICC's Chief Financial Officer. The Accounting Department manages more than 50 grants and contracts, including federal grants from the Department of Health and Human Services and the US Environmental Protection Agency, state grants from the Departments of Education and the Department of Environmental Protection, and city grants such as Community Development Block Grants (CDBG) and the Neighborhood Stabilization Program (NSP2). Our various program directors have decades of leadership experience in their respective fields. Our success in developing and operating programs for more than four decades is reflected in independent evaluations, grant and contract renewals, clean annual audits, national awards and accreditations, and long-standing collaborations and partnerships. We have successfully managed several US EPA grants and cooperative agreements through close tracking of our stated outcomes and milestones. To effectively manage and complete the proposed project we will be doing weekly staff check-ins, keeping a monthly activity log and events calendar, tracking evaluation measures for stated outputs and outcomes, and reporting on all stated performance measures in a timely fashion.

5.1 Past Performance

ICC has an excellent track record of reporting outputs and outcomes for all our federal grants and cooperative agreements. We have consistently met our stated outputs in a timely fashion as part of three EJ Small Grant Projects, as well as our Urban Waters grant, Children's Environmental Healthy grant, Brownfields Area-Wide Planning grant, and our EPA CARE level I project. We have produced the necessary quarterly reports for all the grants listed below with both a narrative description of progress updates as well as a report of progress in a matrix formatted with our milestones, outcomes and outputs. We have been able to achieve our stated outcomes to date. We

have closed out all grants successfully, with the exception of our most recent EJ Small Grant, which will be closed out shortly as well having successfully completed those project goals. The following are the relevant federal grants and cooperative agreements:

Award #	Title	Amount	Years	Contact
EQ 96241722	EJSG/Ports Newark Communities for A Healthy Port	$75,000	3/2022-2/2023	Reema Loutan
EQ 96290813	Growing Green for Environmental Justice	$30,000	9/2013-8/2015*	Terry Wesley
UW 96298912	Passaic River Education & Outreach Project	$60,000	10/2012-9/2014	Cyndy Kopitsky
EQ 97206311	Ironbound EJ Gardening & Greening	$25,000	10/2011-9/2013*	Terry Wesley
CH 83511701	Early Education & Environmental Health in Newark, NJ	$100,000	10/2011-3/2013	Kathy Seikel

TR 83491001	East Ferry Street Neighborhood Brownfields Area Project	$175,000	10/2010- 12/2012	Aimee Storm
RE 97233101-0	Ironbound CARE Cumulative Impacts Project	$100,000	10/2009- 9/2011	Nikolaus Wirth

**We received extension for this project, but completed all project milestones and outputs and they were both closed out successfully.*

6.1 Quality Assurance Project Plan (QAPP) Information

After reviewing Appendix F, this project will not require a Quality Assurance Project Plan (QAPP).

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Partner Letter of Commitment

April 14, 2023

Melissa Miles
New Jersey Environmental Justice Alliance (NJEJA)
PO Box 1398
Summit, NJ 07902

Dear Ms. Miles,

The New Jersey Department of Environmental Protection is pleased to confirm our commitment to serve as a state government partner in support of the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program anticipated to start on or about 11/1/2023 for a period of 36 months.

We understand that NJEJA will support this team by acting as the lead applicant and will provide overall project management for the Hub Leaders, hub member organizations and the seminar participants.

Our expectations are that DEP will:

- Attend relevant meetings with Hub Leaders and NJEJA
- Incorporate curriculum into DEP's Summer Youth Inclusion Program
- Pilot the curriculum at hub leader seminar
- Help plan and attend EJ tour
- Deliver trainings at Year 2 seminars
- Help plan and attend end of Year 2 graduation
- Collaborate to create virtual modules from the seminars
- Track financial and non-financial data
- Submit required reports

New Jersey is an Equal Opportunity Employer. Printed on Recycled Paper and Recyclable.

As the state's environmental regulatory authority, our mission makes the agency well suited to provide educational and technical assistance as described under this RFA. We can help communities understand the policies, regulations, and data we use to implement and enforce existing environmental laws and respond to emerging threats such as climate change. DEP's Office of Environmental Justice is tasked with assisting our state colleagues amend our internal practices and procedures toward a fairer and more equitable New Jersey, which improves the quality of life in the state's most vulnerable communities. Yet, in order to make effective changes that upend the status quo, the Department must be guided by feedback from frontline communities. By empowering those who are often outside of government decision-making processes, we will be able to better protect public health and the environment for all. This initiative to increase capacity so that communities can engage in environmental decision-making furthers our mission to advance equity and addresses our need for meaningful feedback from the state's environmental justice communities.

Sincerely,

Kandyce Perry

Melissa Miles
New Jersey Environmental Justice Alliance (NJEJA)
PO Box 1398
Summit, NJ 07902

Dear Ms. Miles,

Isles, Inc. is pleased to confirm our commitment to serve as one of the Hub Leaders in support of the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program anticipated to start on or about 11/1/2023 for a period of 36 months. Founded in 1981, Isles, Inc. is a community development and environmental organization based in Trenton, New Jersey. With a mission to foster self-reliant families and healthy, sustainable communities, we design and develop effective services that support this mission and share what we learn with others who can make a difference. We look forward to being a part of this important and innovative project that will empower and strengthen community members to be active and engaged participants in addressing environmental issues in their communities.

We understand that NJEJA will support this team by acting as the lead applicant and will provide overall project management for the Hub Leaders, hub member organizations and the seminar participants. As the Trenton-based hub leader, Isles commits to:

- Attend relevant meetings with Hub Leaders and NJEJA
- Recruit member organizations and participants living and working in and around Trenton, NJ
- Hire interpreters as needed
- Solicit feedback from member organizations and participants
- Host one hybrid recruiting meeting for local member orgs
- Help plan and attend an Environmental Justice tour
- Track financial and non-financial data
- Submit required reports

For our expertise and participation, NJEJA will award Isles $80,000 over the three years of the grant, which will cover staff time and the costs associated with performing the work described above, as well as the costs of at least one locally-hosted seminar as part of the grant goals.

Our mission makes us well-suited to provide outreach and technical assistance as described under this RFA, and we have a long track record of educating and empowering communities to address pressing Environmental Justice threats. Our neighborhood-based engagement in Trenton and the surrounding communities will enable community members who are often overlooked to become active participants in addressing environmental justice harms. We look forward to engaging in this exciting and important project, and commit our participation and invested involvement in ensuring the project's goals are met.

Sincerely,

Michael Nordquist

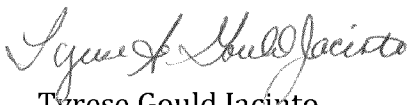
PO Box 1398
Summit, NJ 07902

Dear Ms. Miles:

Native American Advancement Corporation is pleased to confirm our commitment to serving as one of the Hub Leaders in support of the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program, anticipated to start on or about 11/1/2023 for a period of 36 months.

We understand that NJEJA will support this team by acting as the lead applicant and will provide overall project management for the Hub Leaders, hub member organizations, and the seminar participants.

Our expectations are that NAAC will:



- Attend relevant meetings with Hub Leaders and NJEJA
- Recruit member organizations and participants
- Hire Interpreters as needed
- Solicit feedback from member orgs and participants
- Host one hybrid recruiting meeting for local member orgs
- Help plan and attend an EJ tour
- Track financial and non-financial data
- Submit required reports

For our expertise and participation, NJEJA will award NAAC:

- Year 1 = $20,000
- Year 2 = $30,000
- Year 3 = $30,000 as an advisory committee honorarium

Our mission makes us well-suited to provide outreach and technical assistance as described under this RFA, and we have a long track record of educating and empowering communities to address pressing Environmental Justice threats.

Sincerely,

New Jersey Environmental Justice Alliance (NJEJA)
P.O. Box 1398
Summit, New Jersey 07954

Dear Ms. Miles,

OCEAN Inc. is pleased to confirm our commitment to serve as one of the Hub Leaders in support of the Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program anticipated to start on or about 11/1/2023 for a period of 36 months.

We understand that NJEJA will support this team by acting as the lead applicant and will provide overall project management for the Hub Leaders, hub member organizations and the seminar participants.

Our expectations are that {OCEAN Inc.} will:

* Attend relevant meetings with Hub Leaders and NJEJA
* Recruit member organizations and participants
* Hire Interpreters as needed
* Solicit feedback from member orgs and participants
* Host one hybrid recruiting meeting for local member orgs
* Help plan and attend an EJ tour
* Track financial and non-financial data
* Submit required reports

OCEAN Inc. Is actively engaged in community and environmental issues throughout the coastal communities in New Jersey. We are often seen/used as an intermediary agency for smaller non- profits focused on emerging issues with expertise in varying areas related

to Shore Community needs and assessments. As our lead for this hub we would be engaging L. Simmons Ex. 6 Personal Privacy (PP) who brings an enhanced understanding of environmental justice as well as Community College Teaching experience in order to ensure information is tailored to allow the maximal understanding for the myriad of constituents we serve.

For our expertise and participation, NJEJA will award OCEAN Inc.:

* Year 1 = $20,000
* Year 2 = $30,000
* Year 3 = $30,000 as an advisory committee honorarium

Our mission makes us well-suited to provide outreach and technical assistance as described under this RFA, and we have a long track record of educating and empowering communities to address pressing Environmental Justice threats.

Sincerely,

Channell Wilkins
CEO

EXPERTISE IN DELIVERING SUSTAINABLE ENVIRONMENTAL CONSULTING SERVICES, CULTIVATING BUSINESS RELATIONSHIPS, REDUCING RISK AND COST MANAGEMENT SOLUTIONS

ENVIRONMENTAL CONSULTANT

BUSINESS DEVELOPMENT ■ ENVIRONMENTAL MANAGEMENT ■ LEADERSHIP

Accomplished Environmental Leader with over twenty years of technical and management responsibility involving hazardous materials management, industrial hygiene, environmental site assessments and indoor air quality. Former Project Director with, Con-Test, ATC, ESTI/ESTCL and Warren &Panzer engineers, full service environmental consulting firms.

Distinguished record of accomplishments building organizations and infrastructure from ground up. Expertise in leading environmental projects from concept to completion from business development and managing teams to client relations and ensuring financial viability.

- Biological Containment Assessment Hazardous Materials Management
- Emergency Response /Compliance Management
- Right to Know Inspections
- Asbestos Surveys and Management
- Industrial Hygiene / Indoor Air Quality
- Lead Based Paint Management
- Environmental Management

NOTABLE CONTRIBUTIONS

- Rowen University, University of Phoenix, Keiser University, and Ashford University – Adjunct professor Environmental studies, Environment Policy, Biology.
- Developed, financed, built and managed a $10 M ,100-acre green hotel property in the Caribbean.
- Team leader for a $15M Trinidad contract in 18 months from concept to project mobilization
- Port Development Consortia, Trinidad, and Tobago – environmental impact assessment
- Team leader for a solid waste management plan development in Kisumu Kenya
- Port Authority of New York and NJ Hazmat contract manager
- Verizon Communications Hazmat contract manager NY, NJ, PA
- SCA NY Hazardous Materials client manager, Asbestos, LBP, PCBs, and other hazardous materials
- Defense Canada – Limited Asbestos Hazardous Materials Building Survey (Vermiculite Survey)
- Canadian Imperial Bank of Commerce (CIBC) – biological sampling for indoor building contaminants, Ottawa
- Algonquin College, Ontario – provided services specific to certificate of compliance permits and hazardous material management
- Helmsley Spear Facilities, New York City Right to Know (SARA Title 111) audit
- Indoor Air Quality study for Channel 13 (PBS), New York City
- AHERA re-inspection of the school district of Philadelphia: 18 million square feet
- Lead in water monitoring of the school district of Philadelphia: 350 facilities
- Industrial Hygiene Audit, Standard Tool, New Jersey
- The Philadelphia Housing Authority Lead Based Paint Program management
- The General Services Administration, Industrial Hygiene Exposure, monitoring of lead paint removal workers
- Wilmington Delaware Housing Authority, comprehensive environmental management audit and program development
- Harrisburg, Pennsylvania Housing Authority, mold testing, abatement design and management

EMPLOYMENT HISTORY

Vice President, SEMCI. 03/13-Present

- Developed the new service offerings
- Direct client manager
- Established a consulting service relationship with new and existing clients
- Hired staff and directed project managers to support staff to fulfill their client's service needs

Director, Warren & Panzer, New York, NY 09/08 – 3/13

- Managed, SCA, DOE, Verizon, PANYNJ, NYCHA, CUNY and other large clients
- Developed business by diversifying product line and firm's geographical service areas as well as maintaining excellent client relations
- Focused on the daily delivery on service to the clients

President, ESTI/ESTCL, Cherry Hill, NJ 12/95 –09/08

- Developed new Fortune 500 clients which included Philip Morris, Verizon, AT&T, WorldCom, Federated Stores and Equiva
- Involved in the day-to-day delivery of services to clients and the development of facilities and companywide environmental management programs for clients
- Expanded the main office from its original service area of Philadelphia, Pennsylvania to branch offices in Harrisburg, Pennsylvania; Laurel, Maryland; Cherry Hill, New Jersey, New York City, New York, Toronto, Canada and Port of Spain, Trinidad
- Evolved service areas from full service environmental management to eventually include turnkey construction management

Branch Manager, Con-Test/ATC, Air and Water Engineering, Philadelphia, PA 3/91 – 12/95

- Developed the Delaware Valley Regional Office
- Increased sales volume from $0 to $3.0 million annually, with a total sales value of $4.0 million in 1994
- Established a consulting service relationship with new and existing clients
- Hired all staff and directed field support staff to fulfill the client's service needs
- Met client and corporate project demands, including time requirements, cost, quality, invoicing and collections.

Environmental Hygienist, Con-Test, Inc. Air and Water Engineering, New York City, NY 3/89 – 3/91

- Conducted environmental field surveys, monitoring and sampling
- Performed indoor air quality studies
- Completed routine site assessments and hazardous materials investigations
- Submitted field analysis reports according to established protocols and project requirements
- Organized and interpreted sample results and field data control methods
- Prepared proposals, technical reports and documentation as required

EDUCATION / REGISTRATION/CERTIFICATIONS

Master of Science/Environmental Science, Drexel University
Master of Business Administration, Capella University
Bachelor of Arts/Biology, City College, City University of New York

- Registered Georgia Institute of Technology Lead Hazard and LBP Risk Assessment Training
- 40 Hour Hazardous Materials Health and Safety Training
- Microbiological Sampling and Assessment of indoor environments
- 16 Hour Basic Indoor Air Environmental Hygiene Quality Evaluation Course
- 8 Hour Confined Space Entry Training
- EPA AHERA Asbestos Building Inspector

Ex. 6 Personal Privacy (PP) | Ex. 6 - Personal Privacy (PP) | LinkedIn Profile

CAREER PROFILE:

Environmental professional with eight years' experience working on environmental policy in local and state government and the nonprofit sector on issues including, but not limited to: environmental and climate justice, resiliency, water infrastructure, green stormwater infrastructure, brownfield redevelopment. My personal mission is to collaborate with multiple stakeholders to create resilient and just communities for all. Areas of expertise include policy development and implementation, systems change theory, stakeholder engagement and community outreach, organizational diversity, equity and inclusion, and public speaking

CAREER HIGHLIGHTS:

- Planned "town hall-style" sessions for the NJ Commissioner of Environmental Protection to hear directly from impacted communities about their local environmental justice issues. Executed eight sessions since the lifting of the COVID-19 restrictions in Nov. 2021
- Authored "Green Streets" section of Complete & Green Streets for All: Model Policy and Guide published by New Jersey Department of Transportation as a means to achieve green local, county, and state roadways
- Employed successful advocacy and strategic coalition building strategies between opposing real estate and environmental communities leading to new NJ state-level regulations requiring developers to utilize green approaches to stormwater management, a significant and unprecedented paradigm shift in state stormwater regulations
- Oversaw creation of Developers' Green Infrastructure Guide 2.0 in print and online, which breaks down New Jersey's Stormwater Management Rule amendments and helps developers understand green infrastructure options (even for challenging development and redevelopment sites), advantages, costs, and benefits

PROFESSIONAL EXPERIENCE:

New Jersey Department of Environmental Protection— Trenton, NJ **July 2021-Present**

As an executive branch agency, the DEP implements the governor's vision to make New Jersey a stronger, fairer state by advancing innovative strategies to protect and enhance New Jersey's air, water, land, and the health of its residents.

Director, Office of Environmental Justice **July 2021-Present**

Reporting to the Commissioner (chief executive in Governor's cabinet), responsible for the management and oversight of the Office, which provides guidance to all New Jersey state departments and agencies on ways to incorporate EJ into their statutory and regulatory responsibilities, policies, programs, and core functions. Acts as a key contact for overburdened communities.

- Convenes the state's Environmental Justice Interagency Council and presented methodology for 20+ executive branch departments and agencies to assess their operations for current EJ best practices, systemic barriers preventing EJ, and opportunities to overcome said barriers as a precursor to development of a whole-of-government EJ Action Plan
- Incorporates feedback from EJ advocates into DEP's policy and practice by convening the state's 18-member EJ Advisory Council. Oversees the Commissioner's appointment of new councilmembers after 3-year terms expire
- Restructured the Office by refreshing the Office's vision and redesigning its website
- Provides regular briefings to the NJ Governor's Office and NJ Dept. of Environmental Protection Commissioner on progress towards whole-of-government approach to environmental justice

New Jersey Future — Trenton, NJ **Oct 2015-Jun 2021**

Statewide NJ nonprofit, nonpartisan organization committed to pursuing greater justice, equity, diversity, and inclusion through its programs that promotes sensible and equitable growth, redevelopment, and infrastructure investments to foster healthy, strong, and resilient communities.

Director of Stormwater **Sep 2020-June 2021**

Directed New Jersey Future's strategies and programs to improve water quality and reduce flooding, including: the *Stormwater Utilities Program* and the *Mainstreaming Green Infrastructure Program*

- Lead work planning, priority setting, and budgeting for two foundation-provided grants. Ensured steady progress on grant deliverables was achieved. Oversaw preparation of foundation reports.
- Maintained relationships with state-level decision makers, foundation officers, close partners, and allies to achieve joint goals.
- Crafted original and compelling written communications to bolster the organization's positions and recommendations.

Planning and Policy Manager **Jul 2018–Sep 2020**

Managed *the Mainstreaming Green Infrastructure Program*, which advocates that green infrastructure (GI) be the first choice for stormwater management in New Jersey by providing technical assistance to municipal decision-makers, educating developers and their engineers on best design practices, and working with state agencies to improve state-level rules, policies, and guidance

- Wrote grant proposals, created and managed project work plans, wrote annual reports to track progress towards milestones
- Issued request for proposals and qualifications; drafted contracts to hire consultants and manage consultant deliverables
- Wrote blog posts; created promotional materials like webpages, flyers, and posters

- Staffed Green Infrastructure Committee of the Jersey Water Works Collaborative by advancing work plan items with members and planning and staffing meetings. (Oct 2015-Sep 2020)

Planning and Policy Associate **Oct 2015-Jul 2018**
Coordinated *Mainstreaming Green Infrastructure Program* and created *Developers' Green Infrastructure Guide* website.

Camden Redevelopment Agency — Camden, NJ **Jun 2015–Oct 2015**
Lead agency responsible for the redevelopment and environmental management of the city's brownfields.

Graduate Intern **Jun 2015–Oct 2015**
Developed an inventory of brownfield sites in specific neighborhoods for exploration of future redevelopment opportunities; revised the City of Camden's *Brownfields Redevelopment Strategic Plan* to include new redevelopment sites and created scoring criteria to recommend a hierarchy of priority sites; drafted memos briefing the Mayor and CRA Executive Director on crucial updates affecting the Agency and legislation impacting the State of New Jersey and brownfield redevelopment

EDUCATION:

University of Pennsylvania — Philadelphia, PA **May 2015**
Master of Environmental Studies, Concentration in Environmental Policy

Spelman College — Atlanta, GA **May 2013**
B.S. in Environmental Science, Summa Cum Laude, Phi Beta Kappa, Gates Millennium Scholar

PUBLIC SPEAKING ENGAGEMENTS:

- 2022 Governor's Youth Summit panel on Climate and Sustainability
- 2022 Environmental Council of the States: presented NJ's best practices and methodology for conducting an EJ Assessment
- 2021 ANJEC (Assoc. of NJ Environmental Commissions) Environmental Congress
- 2021 NJ Trails and Greenways Summit
- Two-hour lecture on the "Foundations of Environmental Justice" to 100 participants of the Rutgers, The State University of New Jersey's Environmental Stewards program (May 2021)
- Plenary panelist at 2017, 2019, and 2021 NJ Complete Streets Summit
- Provided testimony to NJ Clean Water Council on strategies to reduce nonpoint source pollution and to NJ Dept. of Environmental Protection on New Jersey Future's comments on the state's Stormwater Management Rule proposal

LEADERSHIP:

Outdoor Equity Alliance **Jan 2021–Jun 2021**
Contributed to development of 3-year strategic plan for newly formed organization whose mission is to create and implement attractive, accessible, and equitable educational experiences and career opportunities for people of all ages, races and ethnicities, income levels and abilities, with a focus on people of color, to enjoy nature and become stewards of the outdoors.

New Jersey Future's JEDI (justice, equity, diversity, inclusion) Staff/Board Committee **Aug 2018–Jun 2021**
Recommended and implemented strategies to advance internal and external organizational JEDI principles. Significantly contributed to a winning grant proposal (18 winners out of 360 total) for a national competition to fund organizational JEDI capacity. Wrote RFP to hire a JEDI consultant for the organization. Developed a hiring toolkit to institutionalize equitable hiring practices for the organization.

DiverseForce on Boards Program at the University of Pennsylvania **Jan 2020–Dec 2020**
Participated in year-long board governance and leadership development training program for leaders of color with the goal of matching each cohort member with nonprofit board placement opportunities.

Environmental Leadership Program **Apr 2018–Nov 2018**
Participated in 6-month leadership development fellowship with a diverse cohort of 20 emerging environmental/social change leaders.

EDUCATION

Edward J. Bloustein School of Planning and Public Policy, Rutgers University, New Brunswick, NJ
Master of Public Policy (M.P.P.), Concentration: Environmental Policy, May 2011

Rutgers - The State University of New Jersey / New Jersey Institute of Technology (NJIT), Newark, NJ
Bachelor of Science (B.S.) in Environmental Science, Certificate in Public Administration and Policy Studies, October 2003

EXPERIENCE HIGHLIGHTS

Stakeholder/Partner Engagement with community groups, government agencies, and elected officials

Program Coordination and Management of events, workshops, meetings, and databases

Research, Writing and Policy Analysis on smart growth, land use/transportation, and sustainability policy and planning

Program Evaluation through developing evaluation criteria, researching metrics, and conducting interviews

PROFESSIONAL EXPERIENCE

New Jersey Department of Environmental Protection, Trenton and Ewing, NJ

Office of Environmental Justice, August 2018 – Current

- Provide facilitation, program coordination, and technical assistance to the Environmental Justice Advisory Council, including Air, Water, Land, and Environmental Education and Communication Working Groups
- Provide interagency coordination, public engagement, and technical assistance to support interagency council and implementation of guidance for environmental justice pursuant to Executive Order 23
- Provide outreach and technical assistance to environmental justice communities and organizations
- Provide technical assistance and guidance regarding environmental justice to NJDEP's program areas
- Provide public engagement and analysis support on the environmental justice impacts of NJDEP and state regulations, policies, legislation, and initiatives including RGGI, TCI, S1700, lead exposure, and climate and coastal resiliency

Environmental Services Trainee/Environmental Specialist 1/Radiation Physicist 1, December 2014 – August 2018

- Monitor Nuclear Regulatory Commission (NRC) regulatory amendments and initiate updates to NJ Administrative Code to ensure compatibility between NJ and federal radioactive materials regulations
- Evaluated documentation for $40 million of decommissioning financial assurance
- Inspect radioactive materials licensees for compliance with regulations and radiation safety practices
- Review radioactive materials license applications and amendment requests
- Respond to radiation incidents as member of Radioactive Materials Radiological Assessment Response Team
- Participate in emergency response drills to respond to incidents at nuclear power plants

Public Information Assistant, August – December 2014

- Pilot tested targeted outreach project to increase radon testing rates in high risk municipalities
- Coordinated public awareness initiatives with NJ Department of health, municipalities, and schools
- Designed Excel-based tracking system for inspections process

Human Impacts Institute, *Environmental Leadership Intern*, Brooklyn, NY, 2013

- Organized Human Impact Salons for public and private stakeholders to discuss climate resiliency

World Wildlife Fund, *Market Research Intern*, Washington, D.C., 2012

- Compiled research on sustainable consumption / decoupling economic activity from resource consumption
- Created information portal for sources of food, fiber, and fuel commodity data
- Referenced, and organized key commodity, trade, and consumption statistics into internal database

Rutgers – The State University of New Jersey (Consultant to Transportation Climate Initiative (TCI)/Georgetown Climate Center), *Research Assistant,* New Brunswick, NJ, 2011

- Evaluated state policies for smart growth and land use / transportation sector GHG emissions reduction
- Coordinated with state transportation, planning, environmental and other agencies to inform evaluation
- Identified 85 potential best practices to inform regional collaboration on metrics and infrastructure planning
- Presented findings at TCI regional meeting and in report on state policies supporting sustainable communities
- Conducted research to inform development of state guidelines for municipal sustainability plans
- Co-conducted community focus groups to test usability of GIS-based toxic facilities/health risks web portal

Isles, Inc., *Masters Practicum Team Member,* Trenton, NJ, 2011

- Co-conducted food security assessment for Trenton, NJ, presented as report to Isles, Inc.

Smart Growth America, *Policy Intern*, Washington, D.C., 2010

- Extrapolated research for paper on transportation's role in climate and energy policy for Senate staff
- Reviewed state policies for report evaluating alignment of state transportation and climate policies
- Authored section on economic, environmental, and health impacts of reducing transportation-sector emissions
- Compiled studies on health benefits of smart growth policies for report on land use / economic development
- Reviewed federal energy and climate bills and their analyses to assess impacts on transportation
- Coordinated meetings with congressional offices

Voorhees Transportation Center, Rutgers University, *Research Assistant*, New Brunswick, NJ, 2006

- Researched best practices from and prepared case studies of active living initiatives
- Interviewed community and business leaders coordinating such programs
- Co-produced initial version of Mayors Wellness Campaign toolkit adopted by NJ municipalities

Sustainable Development Policy Institute, *Consultant*, Islamabad, Pakistan, 2005

- Evaluated results of chemical analysis of water effluent samples from 5 sugar mills in Pakistan
- Researched regulations, penalties, mitigation/treatment options and calculated fines based on pollutant load
- Delivered results in paper with policy recommendations to mitigate environmental and economic consequences of exceeding discharge limits set by National Environmental Quality Standards (NEQS)

EPA – Office of Environmental Justice, *ECO Associate*, Washington, D.C., 2004

- Coordinated National Environmental Justice Advisory Council (NEJAC) meetings
- Handled inquiries from the public about environmental justice issues
- Generated informational material for EPA community grant projects and environmental law training
- Trainings: Clean Air Act, Section 309 Review; Clean Water Act and Safe Drinking Water Act; Environmental Mediation; Fundamentals of Environmental Justice; National Environmental Policy Act

SKILLS AND APPLICATIONS

Computer: Microsoft Office (Word, Excel, Power Point), New Jersey Environmental Management Systems (NJEMS), ArcGIS (NJDEP course plus some previous experience), NJ-GeoWeb (NJDEP course)

Experience

NAAC Weatherization (501-C3) Bridgeton, New Jersey *2011 March – Present*
Fiscal/HR Manager
Serve as Fiscal Officer managing finance and operations for various grant awards and act as Human Resources Manager for company employees processing insurance and personnel actions. Lead fiscal contact for 2009 ARRA, 2010 HIP, 2011 LIHEAP, 2011 HIP as sub-grantee of NJ Department of Community Affairs (DCA) with a cumulative budget of 4.9 Million; SAGE administrator responsible for all local and federal fiscal reporting and program correspondence; management of Single Program Audits, internal control & compliance measures.

City of Bridgeton (Municipality) Bridgeton, New Jersey *2008 January – 2010 April*
Director of Community Development
Managed administrative staff of five (5) plus program contractors and served as Executive Administrator of NJ Urban Enterprise Zone program responsible for securing ten (10) economic development grants and managed an annual budget of 1.2 Million; In addition, as Executive Administrator of U.S. HUD Community Block Grant program responsible for community development programming and funding with consolidated budget of 815K; Daily responsibilities include management of business development team and transaction broker for city owned real estate. Established municipality's online program and created department database systems. Project Manager for revised City Master Plan *(last updated 1975)*

Bank of America Wilmington, DE *2005 April – December 2007*
Assistant Vice-President, Marketing Manager
Managed Affinity Marketing programs for top tier groups: AAA (69 franchises), Keller Williams Realty and Oppenheimer among others. In capacity as project manager worked closely with sales group to develop RFP Presentations for emerging/growth markets. Developed direct mail campaigns, media marketing and manage design production of exhibits and collateral.

Verizon Greenbelt, MD *2004 January – 2005 April*
Advertising Account Manager
Responsible for development of marketing programs for small-to-mid sized companies worth over $1M of annual billings. Roles include Meeting with Marketing Directors and Executive Management to gain a full understanding of their industry and initiating campaign development and management. This includes identification of business needs and proposing effective solutions utilizing Verizon advertising products / services, to a wide range of clients predominantly within Washington, DC Metro region (MD, DC, and VA).

BFDI Marketing Group Washington, DC *2002 May – 2004 January*
Senior Project Manager
Lead consultant that provided business development solutions for professional service clients. Responsibilities included the creation of proposals, marketing plans, developing brand and creative strategies for new and existing firms and practices. Additional duties included hiring Freelance Staff, Providing Art Direction and Design for Print, Direct Response, Online Marketing and Collateral materials. Administrative duties included creation and implementation of departmental processes and policy.

Visual Networks Rockville, MD *2000 September - 2002 May*
Marketing Communications Manager
Managed design and production for online media, events and marketing materials. Performed press checks for quality and negotiated pricing. Additional Duties included: Manage and direct freelance staff, Estimate project costs, Design and implement creative standards, Develop department policies and procedures, Manage budget and equipment purchases, Provide department capabilities to all in-house clients.

RELATED EXPERIENCE

- **Member of Policy Advisory Council, State of New Jersey, DEP Environmental Justice** **Present**
  EJAC is committed to the basic tenet set forth by the Environmental Justice Movement that all communities, regardless of their racial, ethnic, or economic composition, are entitled to equal protection from the consequences of environmental hazards. Accordingly, EJAC provides a valuable forum for discussions about integrating Environmental Justice into DEP's programs, policies, and activities. EJAC members represent broad-based constituents and geography. This statewide, diverse representation provides guidance, builds DEP's capacity, and improves its support of the state's Environmental Justice constituents and stakeholders. Through the established working groups: Environmental Education and Communications (EEC), Air, Land, and Water, each member of EJAC focuses directly and primarily on the issue(s) for which his/her working group was created.

- **Member of Policy Advisory Council, State of New Jersey, Department of Community Affairs, Weatherization Assistance Program** **Present**
  The Department of Community Affairs (DCA) has designated the Weatherization Assistance Program Policy Advisory Council (WAPPAC) to serve as the statewide policy advisory council during the continued development, implementation, and ongoing operation of the Weatherization Assistance Program. WAPPAC members are also advised in the monitoring, evaluation, and planning of weatherization training and technical assistance, facilitating and coordinating efforts to improve the quality of services to the eligible targeted population of New Jersey.

- **Member of the Nanticoke Lenni-Lenape Indians of New Jersey Citizenship Committee** **Present**
  The Tribe is the authentic primary resource for American Indian culture and a welcoming home for all American Indians and their partners and friends. The Grant Committee has the following oversight responsibilities: Monitor all grants already in place for the Tribe to determine all criteria are met. Along with staff, research all new program development. Assist in the final implementation of any resolutions needed for grant submission.

Experience

Senior Project Manager | Isles, Inc.
FEBRUARY 2020 - PRESENT, TRENTON, NJ

Oversight of a portfolio of projects related to neighborhood planning and community development in Trenton. Manage relationships with government entities, nonprofits, residents, and educational organizations. Coordinator for the Downtown Trenton Neighborhood Preservation Program, a five-year grant to support physical improvements in downtown, on behalf of the City of Trenton.

Project Manager | Isles, Inc.
NOVEMBER 2016 - FEBRUARY 2020, TRENTON, NJ

Designed and coordinated multiple neighborhood vacant property and infrastructure surveys to track change over time. Conducted GIS and other research to support three neighborhood plans, including history, best practices, property status, and demographic data.

Community Planning Associate | Isles, Inc.
FEBRUARY 2014 - NOVEMBER 2016, TRENTON, NJ

Supported numerous planning projects; served as project lead for a recreation plan in Trenton's West Ward. Managed a GIS database of property and environmental conditions. Created maps and presentations for community stakeholders and potential funders. Strengthened skills in data analysis while cultivating relationships with partners, residents, and the City of Trenton.

Urban Agriculture Intern | Isles, Inc.
JULY 2013 - NOVEMBER 2013, TRENTON, NJ
Aided in various environmental and nutritional programs for residents and students of Trenton. Designed Isles' Virtual Garden Tour, an online interactive map, using ArcGIS.

Salesfloor Associate | Target
MAY 2008 - JULY 2013, CHERRY HILL, NJ
Provided excellent customer service in a fast-paced environment.

Education

Ex. 6 - Personal Privacy (PP)

- Non-profit and higher education professional with 15+ years of progressively responsible experience in roles of managing director, executive director, faculty member, program coordinator, and administrator
- Participatory and equity-focused leader, ensuring programs and projects are working to dismantle racial and economic inequities while building alternative social ecosystems where people can thrive
- Effective and reflective manager, including program and project development and growth, strategic planning, reorganization, hiring, and empowering colleagues to identify, develop, and apply their strengths
- Successful grant writer/manager and resource development professional, maintaining and expanding public and private funding for programming and operations, responsible for securing and managing more than $5mln annually
- Skilled facilitator and connector, with record of effectively linking practitioners, academics, community members, and scholarship-informed perspectives to create social change through cross-disciplinary projects and programs

PROFESSIONAL EXPERIENCE

Managing Director, Community Services July 2020-present
Managing Director, Community Planning & Development July 2019-June 2020
Isles, Inc., Trenton, NJ

Leadership and Management
Responsibilities

- Provide leadership and direction for Community Services division's main service areas: Planning & Placemaking, Urban Agriculture, Youth Services, Isles Youth Institute, Violence Prevention, Isles Financial Solutions &Housing Counseling Services, Real Estate Development & Property Management
- Oversee operations and direction of division's 54 full-time staff members, with 12 direct reports
- Manage ~$5mln budget funded by 45+ grants
- Develop and implement strategic plans, goals, and assessment efforts for services
- Support colleagues to develop and implement strategic goals and to support team as managers of others
- Communicate successes and impact to internal and external stakeholders
- Represent and promote Isles in local and regional meetings, conferences, and convenings

Selected Accomplishments

- Merger of service areas: Managed the merger of service areas into my portfolio, including Isles Youth Institute and Isles Financial Solutions/Housing Counseling, and created a distinct Youth Services division focusing on social and cultural programming. Identified collaborations across units and created shared culture among staff members.
- Development of Cross-functional teams: Created cross-functional teams to address priority concerns across the organization, including communications and outreach, policy, and violence prevention.
- Resource Development: Maintained existing and secured new funding for initiatives, including more than $2.7mln in neighborhood-focused community development funding, $2.5mln in violence prevention resources, and $500k in financial empowerment funds over my three years in this role

Program and Project Development and Management
Responsibilities

- Oversee and support the development and implementation of a broad range of programs and services
- With colleagues, develop strategies to implement projects and programs
- Identify opportunities to modify and transform existing projects and programs to better meet the needs of the community and to leverage complementary service areas within Isles

Selected Accomplishments

- Violence Prevention: With colleagues and community members, identified effective and community-demanded strategies to reduce and prevent violence and secured resources to implement them, including: community street teams; anti-violence messaging campaign; reengagement center; and policy and program advocacy.
- IFS transition: Shifted the focus of Isles Financial Solutions from an employer-based, moderate-income customer model to a low-income, publicly available service, and secured funding to enable this transition.
- Community Plan Development and Implementation: Played key leadership roles in the development of neighborhood revitalization plans for Downtown Trenton and Battle Monument/North Trenton, with the

engagement and support of residents, business owners, workers, and stakeholders. Secured resources to implement plans.

Executive Director July 2015-June 2019
Center for Community Engaged Learning and Research (CELR Center) *interim, July 2015-Dec 2016*
The College of New Jersey (TCNJ), Ewing, NJ

Key Responsibilities

- Provide leadership and direction for Center's three main programs: Community Engaged Learning, Bonner Community Scholars, and Community Engaged Research and Initiatives
- Oversee operations and direction of CELR Center's $2mln budget and 15 full-time staff members
- Develop and implement strategic plans, goals, and assessment efforts for the CELR Center
- Identify, recruit, and maintain partnerships and opportunities on- and off-campus that support CELR goals
- Communicate successes and impact to on- and off-campus stakeholders
- Represent and promote CELR Center and TCNJ in networks working in the areas of civic engagement, service learning, and campus-community partnerships

Selected Accomplishments

- Engaged Scholars Initiative, 2019-2020: Selected as one of twelve early career scholars by Eastern Region Campus Compact "to develop, support and connect leaders who can advance co-created knowledge, critically engaged pedagogies, institutional change, and collaborative action to address societal issues"
- Assessment and Evaluation: Developed multiyear assessment framework for Community Engaged Learning and Bonner Community Scholars, including learning outcomes, surveys, analysis, and dissemination of results
- Strategic Planning and Implementation: Facilitated a six-month strategic planning process that involved more than 200 stakeholders on and off-campus to produce the Center's first comprehensive five-year plan which includes mission, vision, and values statements
- Reorganization: Designed, planned, and implemented a reorganization of the Center's staff and roles to better address the core mission of the Center; regularly reevaluated effectiveness with staff, partners, and students
- Capital City Youth Violence Coalition (formerly Trenton Prevention Policy Board): As co-chair, successfully revived and redirected organization to focus on youth violence reduction strategy while redeveloping essential relationships with key stakeholders in Trenton
- Faculty CEL Trainings: Designed and led faculty training and informational sessions, including annual two day workshop with nationally recognized facilitators

Community Engaged Learning Coordinator, Environment Division 2013-2015
Bonner Institute for Civic and Community Engagement, The College of New Jersey, Ewing, NJ

- Develop and implement environment-focused community engaged learning projects with community partners and faculty; Coordinate activities of 20-student TCNJ Bonner Community Scholar Environment Division

Affiliate Faculty 2012-2019
Department of Political Science, The College of New Jersey, Ewing, NJ

- Regularly teach courses in political theory, environmental politics, and the First-year Seminar Program

Assistant Professor 2009-2012
Department of History and Political Science, Albertus Magnus College, New Haven, CT

- Taught 8 discrete courses annually across multiple disciplines (Political Science, Philosophy, History, Humanities); Advised students; Served on College committees; Served as sabbatical replacement chair

EDUCATION

Ph.D.	Political Science: Political Theory and International Relations University of Minnesota-Twin Cities	2010
B.A.	Politics and German Studies (double major) Ithaca College, Ithaca, NY	2002

a. Project Summary Page

Project Title: New Jersey EJ Education Collaborative

Project Location: multiple locations across New Jersey

Applicant information: New Jersey Environmental Justice Alliance (NJEJA)

Melissa Miles, Executive Director
45 Academy St. Newark, NJ 07102
melissa@njeja.org phone: Ex. 6 - Personal Privacy (PP)

Brief Description of Applicant Organization: NJEJA is a 501c(3) Community-based Organization (CBO). We are a coalition of individuals and organizations with the mission of being "*committed to working together to identify, prevent, and reduce and/or eliminate environmental injustices that exist in communities of color and low-income communities*". Together, we support and work with vulnerable communities by engaging them across four priority areas: (1) training and technical assistance, (2) targeted campaigns and coalition-building, (3) education and advocacy, (4) local, state, and national policy development.

Are you applying for the Small CBO Set Aside Track for $150,000 projects? (Yes/No): No

Project Abstract: There is a significant need to increase the capacity of EJ communities to empower residents to participate in public discourse on issues affecting them. Residents must be educated on how to advocate for their community's best interest in dialogue with government and private entities over siting, permitting and other decisions affecting their environment. These communities are historically difficult to reach, engage and organize, which is why grassroots organizations are critical to this mission. The NJ EJ Law requires enhanced public engagement for residents in EJ communities, allowing them to demonstrate local impact and have permits denied. This has accelerated the need to train EJ Communities so they can effectively influence this democratic process.

The NJ EJ Education Collaborative hopes to address these issues by proposing the development of a NJ-specific hub-and-spoke outreach network to community adults and youth. It will create and provide EJ basic information and a blueprint for navigating governmental processes. This will help demystify the core issues for participants and give them skills to substantively promote their community's interests. This complements the EPA WE ACT TCTAC grant in which NJEJA is a partner and extends its capacity with deeper outreach to vulnerable communities.

NJEJA is well-suited to lead this multi-stakeholder, statewide coalition of groups and individuals with a 20-year track record of advocacy. Our partners bring together regulatory, advocacy, community development, educational expertise, and trusted relationships in EJ communities.

Project Type(s): Public education, training, community organizing.

Special Considerations: none

Environmental Issue: 1. Cumulative Impacts 2. Environmental Justice (EJ)

List of Project Partners: NJ Department of Environmental Protection (DEP); John S. Watson Institute for Urban Policy and Research at Kean University; Isles, Inc.; Native American Advancement Corporation; O.C.E.A.N., Inc.

Will you need a QAPP? Yes

b. Environmental and Public Health information of the Underserved Community

New Jersey's Environmental Justice Law defines an overburdened community (OBC) as any census block group, as determined by the most recent US Census in which 1. 35% of households qualify as low-income households; 2. at least 40% of the residents identify as minority or as members of a State recognized tribal community; or, 3. At least 40% of the household have limited English proficiency. This data is mapped in the Environmental Justice Mapping and Analysis Tool (EJMAP). OBCs undergo a stressor analysis (with 26 environmental stressors) to determine if the OBC is subject to adverse cumulative stressors. This methodology overlaps considerably with the indictors and indices used in EPA's EJScreen and the stressors used by the Climate and Economic Justice (CEJST) Screening Tool to identify Disadvantaged Communities(DAC) to advance the Justice 40 Initiative.

According to the EPA's EJScreen map of the top 12 EJ indices: 69% of the indices of the 4 largest cities in NJ are in the 90-100th percentile ***nationally*** and another 29% are in the 80-90th percentile ***nationally***. This shows that NJ has one of the most acute EJ situations in the country. In fact, there was only 1 index out of the 48 total that was below 80th percentile and it was still in the 73rd.

Of the 564 municipalities in New Jersey, 338 have OBC block groups. This encompasses over 4.9M people, approximately half of the state's entire population. The stressor analysis further shows that 84% of the OBC block groups, encompassing nearly 4.2M people, are subject to adverse cumulative stressors (cumulative impacts).

The very young, the elderly, and communities whose socio-economic marginalization – including people of color, immigrants, non-English speakers, and the poor, often feel the effects of environmental stressors such as heat, air quality, extreme weather and more, due to their location and exposure. The EJScreen indices show this population has been historically underrepresented and lack a voice in outcomes that affect them. Such inequities result in disproportionate cumulative impacts of environmental stressors, including increased health disparities, yet these communities have fewer resources to remediate a given imbalance.

What are the environmental/public health issue(s) that the project seeks to address?

The stressor analysis to identify adverse cumulative impacts facing OBCs includes 8 categories of environmental and public health stressors covering 8 categories: Concentrated Areas of Air Pollution; Mobile Sources of Air Pollution; Contaminated Sites; Transfer Stations or Other Solid Waste Facilities, Recycling Facilities, and Scrap Metal Facilities; Point-Sources of Water Pollution ; May Cause Potential Public Health Impacts; Density/Proximity Stressors; Social Determinants of Health.

This Educational Initiative seeks to address this burden of disproportionate cumulative environmental and public health stressors in OBCs, ranging from historic disproportionate environmental pollution to higher vulnerability to emerging threats such as extreme weather patterns. Increasing capacity in OBCs to better understand and engage in environmental and public health decision-making processes will enable them to better advocate for their communities and develop solutions for reducing the disproportionate stressors.

The cumulative environmental and public health stressors faced by OBCs include lead in drinking water, superfund proximity, hazardous waste, air toxins, and residents with pre-existing chronic health conditions. Emerging heat and extreme weather patterns further exacerbate

these issues. Research shows that cities, most of which have OBCs, tend to be warmer and hot days see an increase in medical services for heart and, renal failure, electrolyte imbalance, kidney stones, fetal health, and preterm birth. People without air conditioners face additional exposure to heat stress as do construction workers, seniors living alone, athletes, and children playing outdoors. The poorer air quality added to ozone aggravates a whole host of respiratory diseases. Particulate matter has been associated with elevated rates of respiratory and cardiovascular disease as well as premature mortality. The combination of heat stress and poor air quality is especially risky for vulnerable populations such as children, the elderly, the economically disadvantaged. DEP, the government partner on this grant, is pursuing multiple initiatives to understand, characterize, and address heat islands in NJ, information that can be made more accessible to OBCs through this Collaborative.

New Jersey is already familiar with the environmental/health effects of extreme weather from Hurricane Sandy. They include flooding, power outages, carbon monoxide poisoning from improper generator use, mold and mildew exposure in water-damaged buildings, and an increase of stomach, intestinal illness, and water contamination. Disruptions in power and transportation and displacement of residents after a storm can also hinder access to medications or treatment of chronic conditions.

NJEJA is on the Steering Committee of the EPA Region 2 Thriving Communities Technical Assistance Center. From that position, NJEJA can effectively coordinate the New Jersey hubs with the TCTAC initiatives to increase capacity to reduce these cumulative stressors.

The Collaborative will increase capacity in OBCs to reduce these cumulative stressors through increasing:

Environmental Literacy. Underserved communities will benefit by having more residents and leaders well-versed on environmental issues and terminology so they can engage in civic discourse and environmental decision-making processes. These will dovetail with information not covered in the TCTAC grant.

Policy Literacy: Participants will learn about major EJ policy initiatives, such as NJ's EJ Law and Newark's EJ ordinance, the efforts and steps they took to pass, and how residents can learn and build on that movement, giving them confidence and skills to participate in environmental policy development and enactment.

Governmental Processes: Participants will learn about siting, permitting and other technical requirements for facilities, and how to maneuver through the paperwork of applying for funding. This will complement the resources provided by the TCTAC project with content specific to NJ, such as "home rule" delegating significant legal and regulatory authority to local bodies.

Advocacy: Residents will learn best practices for advocating for the protection of local environment and public health in forums such as local zoning boards, planning commissions and green teams.

Job Preparedness: A co-benefit of these trainings will be to have OBC residents potentially certified after building new skill sets that will be valuable in the new green economy, and a correlating improvement in mental health and well-being.

Youth: We will develop content for youth engagement and training to build the next generation of OBC community leaders.

Capacity and Networking: The NJ EJ Education Collaborative will expand the capacity of organizations and communities across the state as participants become leaders, and relationships with a network of EJ leaders across the state increases opportunities for peer learning, mentorship, and regional and statewide collaboration.
Miscellaneous. The Community Hubs system can serve as a template for future initiatives including disaster preparedness.

c. Organization's Historical Connection to Underserved Community

Over the last 20 years NJEJA has been collaborating with groups in New Jersey's most EJ-impacted communities such as Newark, Jersey City, Rahway, Camden, Trenton, Elizabeth, Paterson, Orange, Linden, New Brunswick, Edison, and Metuchen. We have been part of a multitude of task forces and coalitions. We are the first statewide EJ organization in NJ and have made inroads with many communities. Because of those early relationships, we are frequently requested to become involved in new projects. Recent efforts include:

Dr. Nicky Sheats, Esq., Director of the John S. Watson Institute for Urban Policy and Research at Kean University is a NJEJA founding member and the chair of the Board of Trustees. He is considered one of the foremost authorities on Cumulative Impacts nationally and was instrumental in the formulation of the Newark Environmental Justice and Cumulative Impacts Ordinance of 2016, the Environmental Justice Act of 2019 and the EJ For All Act of 2021. He was also a major contributor to the NJ EJ Law of 2020.

NJEJA was integral to the passing of the NJ EJ Law every step of the way, over the course of several years. Once the draft rules were released, NJEJA mobilized multiple communities across the state to come out and testify at hearings in Trenton, Camden, and Newark. Together with other organizations, we recruited over 300 people to attend meetings in the northwest. In 2022 NJEJA, SWEA and Ironbound Community Corporation co-facilitated 2 public meetings on the NJ EJ Law prior to its adoption, in preparation for the comment period.

In 2019 NJEJA organized grassroots groups in NJ and nationally to work with Senator Cory Booker on the federal Environmental Justice Act of 2017. In 2020 NJEJA convened meetings of advocates to discuss the EJ For All Act prior to its release in 2021. We were instrumental in the passage of the Newark Environmental Justice and Cumulative Impacts Ordinance (ERC).

In 2021- 22 NJEJA held meetings and webinars with NAACP branches in Rahway, Metuchen-Edison, and New Brunswick, and taught a summer module for High School students at KEAN University about Cumulative Impacts and the NJ EJ Law. NJEJA has been a member of the Sandy Climate Justice Roundtables since 2016.

Our Executive Director is on the Steering Committee for TCTAC to advise on its strategy for engaging and building the EJ capacity of underserved communities. She is also part of the New School's Ripe for Creative Disruption EJ Design Fellowship where she works with environmental and climate leaders across the country on innovative solutions to the climate crisis. She was also featured in two documentaries, one of which, The Sacrifice Zone, has been screened nationwide. Our ED sits on many boards, participates in Work Groups, and offers EJ perspectives to other CBOs, local, state and national governments.

Over the last 5 years NJEJA board and staff have given dozens of talks and lectures, interviews on Cumulative Impacts across the state, region and country. We have given EJ Leadership

Trainings in a variety of communities across the state. NJEJA also continues to offer guidance on EJ best practices through advisory requests. More examples upon request.

Community Driven Participation

Local residents are always part of our process and results. Many of NJEJA's staff and board are from and/or currently live in EJ communities. We maintain ongoing relationships with these communities by continuing to be a presence at local events for environmental issues, by planning and facilitating some of these events, and by attending/chairing/presenting at governmental meetings on EJ-related issues. This means that many participants in these convenings are our neighbors. We will encourage participants from these seminars to register for TCTAC events.

EJCPS Model

This initiative is designed to increase capacity in overburdened communities across New Jersey to meet a core tenet of the Collaborative Problem-Solving Method (EJCPS): advancing environmental justice through ensuring all people are given the opportunity to participate meaningfully in the development, implementation, and enforcement of environmental laws, regulations, and policies. The following EJCPS Model elements will be undertaken for this project:

CPS Element 1 – Issue Identification, Community Vision, and Strategic Goal Setting (accomplished)

With the passage of the NJ EJ Law we are already at the implementation and enforcement stage, while developing new resident protections are continuously underway. So, there is some urgency in developing a network and EJ-educated local leaders.

The issue identification and visioning process began in 2022 with the Environmental Education and Communication (EEC) working group of NJDEP's multi-stakeholder Environmental Justice Advisory Council (EJAC) of which the NJEJA ED is now the Co-Chair. The group identified a lack of sufficient capacity in OBCs across the state that prevented them from effectively participating in local environmental decisions and state and federal development, implementation, and enforcement of environmental laws, regulations, and policies. Through discussions over the course of months, members of the work group who represent EJ communities across the state developed the vision of a statewide learning network to train, mentor, and develop community leadership across the state well-versed in the concepts and strategies needed to meaningfully participate in environmental and EJ decision-making. The discussions also lead to the conclusion that such an undertaking will require financial resources over a sustained period of time.

CPS Element 2 – Community Capacity-Building & Leadership Development (begun)

Self-Education. NJEJA is already an expert in this space, has already provided community training on EJ issues for the last 20 years, and continuously gathers new information on the topics.
Assessments. Through trainings, listening sessions and other community touchpoints all partners in this Collaborative routinely conduct assessments regarding causes and solutions to EJ. This initiative will re-design DEPs current training modules.

Technical Assistance. The lead in this Collaborative is also a subawardee for the TCTAC grant and will point to their resources.
Education. NJDEP staff, Kean University staff and established EJ leaders will provide seminars for residents to learn about EJ topics and state processes.
Youth. Several partners will focus on contributing content and strategies for youth training, and how to develop the next generation of community leaders in OBCs.
Capacity. The NJ EJ Education Collaborative will build capacity of organizations and communities across the state to competently engage in environmental advocacy, shaping of policy, and decision-making in their communities.

CPS Element 3 - Consensus Building and Dispute Resolution (begun)

The Collaborative, like most of the individual partners, is built on the Jemez Principles for Democratic Organizing to ensure all voices are heard and respected. We are adept at identifying and addressing concerns through the multitude of collaborations we already comprise.

CPS Element 4 – Multi-Stakeholder Partnerships & Leveraging of Resources (begun)

This multi-stakeholder Collaborative has an outline for scheduling group and individual org touchpoints to cultivate communication and planning for the common goals of community development, creating safe and healthy places to live, green jobs, economic revitalization, and youth development. The nature of advocacy work requires collaboration. We will employ many resources already available to optimize efficiency, such as TCTAC, Kean University, New School University Tishman Environmental and Design Center, Environmental Protection Network and more.

CPS Element 5 - Constructive Engagement by Relevant Stakeholders (begun)

We already have a variety of stakeholders in this Collaborative and will add more as appropriate; for example, businesses that would benefit from an EJ-trained workforce. Government could step in with support to acknowledge the value of the certificates our participants will earn. DEP (and other government offices) working directly with CBOs, affords residents access to provide meaningful feedback to policymakers.
The Collaborative is using Kean University for content expertise and analysis of participant feedback. TCTAC's relationship with their academic partners will be used for further technical assistance.

CPS Element 6 - Sound Management and Implementation (begun)

The NJ EJ Education Collaborative has already begun this CPS Element by dovetailing this application with an already-funded (TCTAC) project. This is practicing sound organization and management' and ensuring that EPA's investment is magnified. We have created a clearly delineated plan for the next 3 years that utilizes the particular strengths of each partner. Once participants graduate, we hope to identify new leaders among them. We have already received letters of commitment from partners.

CPS Element 7 – Evaluation, Lessons Learned & Replication of Best Practices (begun)

The NJ EJ Collaborative will pilot our seminars with the Hub Leaders first, to create a feedback loop that will refine the content and accessibility of delivery mechanisms over time. We will measure success by whether residents attend seminars and/or graduate. We will publicly share success stories.

d. Project Linkages

The NJ EJ Collaborative will go beyond the basic support of the EPA's Goal 2, Objective 2.1. We will also fulfill Objective 2.3, EPA's four cross-agency strategies, and the federal Justice40 Initiative.

Our Collaborative will directly support Objective 2.1 by creating an outreach network to underserved populations and by providing education designed to increase their capacity to meaningfully engage on environmental issues to Federal, Tribal, State, and Local governments.

We will reinforce Objective 2.3 by implementing and enforcing the NJ EJ Law, Newark Environmental Justice and Cumulative Impacts Ordinance of 2016, to reduce civil rights concerns in EJ areas in community-driven ways. The existence of the EJ Law already meets the "integrate environmental justice considerations and achieve civil rights compliance in their planning, guidance, policy directives, monitoring, and review activities" portion of 2.3.

The make-up of the Collaborative as well as the demographics of the EJ communities themselves fulfills the EPA's four cross-agency strategies for diversity in partners.

In addition, the NJ EJ Collaborative will fulfill the Justice40 Initiative For the first time in our nation's history, the Federal Government has made it a goal that 40 percent of the overall benefits of certain Federal investments flow to disadvantaged communities that are marginalized, underserved, and overburdened by pollution.

Since NJEJA is part of WE ACT TCTAC grant, as an added benefit, we will coordinate with that already funded program to ensure they are additive to each other, not duplicative. This extra level of planning will protect the investment the EPA has already made and expand your reach further without typical redundancies.

e. Partner and Collaborate

The NJ EJ Collaborative will accomplish its goals of building a grassroots network and creating and disseminating a New Jersey-specific EJ curriculum to OBCs by drawing on the expertise and community relationships of the diverse partner groups. The partners chosen for this project are nationally sought-after for their expertise as follows:

The **project lead**, NJEJA, builds broad networks and influences environmental decision-making.
The **academic** partner will guide curriculum development and also has their own strong relationship with EJ communities.
The state **government** partners will adapt educational modules and use their experience in EJ and civil rights advocacy.
The **Tribal** partner will draw on its ground-level understanding of the lived experience of environmental injustice and in reaching populations that are often overlooked.
The **CBOs** will use their deep relationships in OBCs across the state to reach, organize and mobilize participants from these communities. We will cover the entirety of the state so working with groups who are locally trusted is the only way to accomplish these broad efforts.

Many of these groups, for example, were part of a decade-long effort that resulted in the adoption of the NJ EJ Law. It was the strength of those partnerships, their broad reach, their adherence to scientific rigor on data, and their unwavering commitment to incorporating a local perspective that brought about the NJ EJ Law and its key protection for residents of having an open forum for discussion before any new projects are undertaken.

Details about the make-up of our Hub Partner Leaders:

Community-based Organizations

NJ Environmental Justice Alliance (NJEJA):

We are an alliance of New Jersey organizations and individuals committed to working together to *identify, prevent, and reduce and/or eliminate environmental injustices that exist in communities of color and low-income communities*. NJEJA will support community efforts to remediate and rebuild impacted neighborhoods, using the community's vision of improvement, through education, advocacy, the review and promulgation of public policies, training, and through organizing and technical assistance.

As the lead applicant of this Collaborative NJEJA brings an expertise on EJ topics to the group and deep relationships in the communities they represent as the first and still only statewide EJ organization. These relationships are key to breaking down silos of information and participation; communities trust NJEJA to encourage local people to be part of the conversation and any solutions on issues they live with, yet historically have not been privy to the conversation. We also bring talent in organizing and motivating groups and individuals.

Role: Primary applicant, overall project manager of the Collaborative; manager of financial and other reporting

Activities: construct the timing and activities of each Hub Leader, lead hub meetings and some seminars; use local relationships to recruit hub member orgs and participants; complete all financial requirements of the grant, gather data and submit reports as required; coordinate vision, resources and activities with TCTAC

NJEJA will contribute a Project Manager, Executive Director expertise, the Community Education Manager to assist with education module development, the Operations Manager managing the subawards and legal requirements of the grant, and a contracted Accountant who will manage the spend-down of the grant; this grant will also fund the hiring of a Communications Director to manage social media and its outreach efforts;

Increasing the capacity of OBCs to advance environmental justice through meaningful public participation is integral to the core mission of NJEJA. Since most of NJEJA's staff and board are from or currently live in EJ-affected areas of NJ, they also have a vested personal interest in seeing their home environments improved.

Isles, Inc.

Founded in 1981, Isles, Inc. is a community development and environmental organization based in Trenton, New Jersey. With a mission to foster self-reliant families and healthy, sustainable communities. They bring deep ties to their community.

Role: Hub Leader, recruiter of member orgs and participants, and facilitator of seminars

Activities: enlist local orgs to their hub, recruit participants, manage seminars in Trenton and Central Jersey communities; and connect this initiative to its green job training and youth engagement efforts

This organization has a vested interest because building capacity in disadvantaged communities aligns with its core mission.

O.C.E.A.N., Inc.

As the Community Action Agency for low to moderate income residents throughout communities in our service area (coastal communities), O.C.E.A.N., Inc.'s mission is the delivery of quality, comprehensive services that improve the quality of life of individuals and families and assist them in moving toward self-sufficiency. They bring a wide reach to coastal communities that are severely overburdened.
Role: Hub Leader, recruiter of member orgs and participants, and facilitator of seminars
Activities: perform outreach, recruit trainees from, and lead seminars to Southern New Jersey communities

This organization has a vested interest because building capacity in disadvantaged communities aligns with its core mission.

Tribal Organizations

Native American Advancement Corporation (NAAC):

NAAC is an organization dedicated to the advancement and development of North American Natives, led by members of the Nanticoke Lenni-Lenape Indian Tribe of New Jersey. Over the past 25 years, it has successfully administered and managed programs addressing energy savings and fuel assistance, weatherization, financial literacy, housing, lead remediation, job creation and job training. They bring relationships to Native Americans who are difficult to reach for governmental bodies.
Role: Hub leader, recruiter of member orgs and participants, and facilitator of seminars
Activities: enlist local orgs to their hub, recruit participants, facilitate seminars in tribal and South Jersey communities; and engage youth

Capacity building in Native American and South Jersey communities aligns with its core mission.

Academic partners

John S. Watson Institute for Urban Policy and Research, Kean University:

The institute comprises integrated policy centers and initiatives that support informed public policy. It serves as a vital, non-partisan resource for New Jersey decision-makers, supporting the development and implementation of real-world solutions. It will draw on its expertise as a policy institute dedicated to EJ and urban communities by guiding, reviewing and advising on curriculum development.
Role: EJ subject matter expert, curriculum advisor, youth organizer
Activities: assist in adapting DEP's current curriculum to the purposes of this Collaborative; inform strategy for training youth and college students; train and build network of Kean University students

This institute has a vested interest because building capacity in disadvantaged communities aligns with its core mission.

State Government:

NJ Department of Environmental Protection (DEP):

DEP is the state regulatory authority responsible for safeguarding and enhancing New Jersey's air,water and land; managing natural and historic resources; reducing and responding to climate change threats; and revitalizing our communities and protecting public health. They bring policy knowledge, educational expertise and capacity to this project.
Role: regulatory subject matter expert, organizer of module content, seminar leader

Activities: collaborate on editing existing training modules to complement TCTAC resources with content specific to navigating environmental regulations and decision-making processes in NJ; incorporate content into Summer Youth Inclusion Program; deliver seminars at regional hubs

They are invested as a partner because increasing capacity in communities will help DEP meet its equity goals through enhanced engagement from OBCs. Such capacity is also integral to effective implementation of NJ EJ Law.

Potential Collaborative Partners and Regional Hub Members:

South Ward Environmental Alliance (SWEA): (local grassroots community group) SWEA is an alliance of residents and community-based organizations with a focus on environmental justice issues in the South Ward of Newark, New Jersey. Community partners in a community based participatory research decision making process. Environmental Justice advocates.

NAACP Atlantic City Branch:

The mission of the National Association for the Advancement of Colored People (NAACP) is to secure the political, educational, social, and economic equality of rights in order to eliminate race-based discrimination and ensure the health and well-being of all persons.

NAACP Edison-Metuchen Area Branch (Middlesex County and surrounding communities)

The mission of the National Association for the Advancement of Colored People (NAACP) is to secure the political, educational, social, and economic equality of rights in order to eliminate race-based discrimination and ensure the health and well-being of all persons.

Ironbound Community Corporation (ICC)

Founded in 1969, Ironbound Community Corporation's (ICC's) mission is to engage and empower individuals, families, and groups in realizing their aspirations and, together, work to create a just, vibrant and sustainable community.

North Jersey Community Development Corporation (NJCDC)

NJCDC is revitalizing the Great Falls Neighborhood of Paterson, New Jersey through education, youth development, affordable housing, and community building.

Center For Environmental Transformation (CFET)

CFET is part of a network of community-based organizations in Camden, NJ and actively works to educate and uplift the community through hands-on activities and engagement.

Orange HUUB

Orange HUUB is part of a duo of faith-based community outreach organizations that work to promote placemaking, housing and environmental justice in Orange, NJ.

Sustainable Jersey City (SJC)

SJC is an environmental education and advocacy organization based in Jersey City, NJ.

Other types of organizations for outreach

New Jersey based Environmental organizations with whom we have partnerships, such as Sierra Club, Environment NJ, Clean Water Action and The Nature Conservancy.

***All financial partners will comply with EPA's Subaward Policy in 2 CFR Part 200, Subpart E that their expenses will be reasonable, incurred within the project period, otherwise allocable to the EPA assistance agreement, and adequately supported by accounting records.

NJEJA has been in close working relationships with most of these groups for nearly 20 years. We have a strong bond and many common interests. A key mechanism for maintaining and

sustaining these relationships into the future will be by sitting on committees together, doing public workshops together, co-applying with them and others on future grants to continue improving NJ's EJ ecosystem.

1.0 Project Activities/Milestone Schedule/Detailed Budget Narrative

NJEJA will engage the NJEJA Community Education Mgr. as Project Mgr. to provide overarching project management. They will start the process by creating outreach materials , setting dates for informational meetings in the 2nd quarter, to provide a structure for the group. Then, they will identify 5-6 additional organizations to invite to each hub as members so Hub Leaders can begin strengthening relationships with them. In turn, they will invite more potential hub member organizations from their local connections to a quarterly hub meeting.

Quarterly hub meetings: Hub Leaders, Kean and DEP will be expected to attend meetings each quarter throughout the 3 years as well as periodic 1:1 meetings with NJEJA as a way to prioritize communication, break down silos and deepen relationships.

Meanwhile, the ED will coordinate ideas and activities with TCTAC hubs to ensure there is no duplication of efforts. This will continue throughout the 3 years on a regular basis.

In Q2, the PM will develop a communications timeline for the 2nd and 3rd year and engage a Communications Manager to create a social media outreach campaign and devise a way for all parties to communicate more casually.

On the content side, the PM will collaborate with Kean and DEP to develop a model of credentials (CEUs) that participants can earn for attending the seminars, including planning for a youth content advisory group and invite students from the Summer at Kean to the seminars. DEP will utilize the Summer Youth Inclusion Program as a basis for the curriculum. This will expedite the overall curriculum development and encourage youth to participate. They will have one iteration of the content at this point.

The NJEJA team will track financial and non-financial data throughout the course of the grant. Month 6 will begin the semi-annual reporting that is required.

In months 7-12, the PM will continue developing outreach materials (now with the Comms Mgr) and planning, NJEJA and Hub Leaders will each conduct one hybrid informational meeting for one different hub each quarter for the hub member organizations and the participants they recruit. This will require several iterations of recruiting and confirming commitments until hub have 2-3 confirmed groups and all have attended an informational meeting. The PM and Hub Leaders will hire interpreters as needed at this point to ensure all residents feel welcome to attend. This has been found to be a key to reaching limited English speakers. Kean will host the summer workshop at this point and include some of the new content.

This is when DEP will conduct a pilot seminar for Hub Leaders and obtain feedback from them, iterating content as needed afterward. The feedback loop will flow from NJEJA to Hub Leaders to hub member organizations to participants and back up the chain in a continuous loop to ensure all viewpoints are considered.

In the 2nd year, the project will officially launch on social media and the websites of at least each Hub Leader. This will really impact the recruitment process and bring in a wider variety of participants, where NJEJA will highlight different groups. With the content finished, DEP will lead all seminars, and the videographer will begin to film each module (spread out over each Hub

Leader location) and then begin editing it into shorter modules to eventually be housed on a website to be created. NJEJA will distribute quarterly stipends to participants as needed.

After the 2nd seminar is given, the PM will organize an EJ Tour of a city (to be selected). We have found this to be a profound learning experience where the visuals really drive home the point of what an overburdened community is. There will be a graduation ceremony and presentation of a certificate (TBD) for those that complete all the modules as an extra incentive and to show pride in their accomplishments.

The 3rd year will be a mix of receiving feedback before the final editing of the modules, continuing the communications campaign to keep parties interested and engaged, reviewing the final edits, and then launching them on the website. We will also begin to discuss lessons learned in preparation for the final report.

a. Milestone Schedule

Months	Activities	Activities	Activities
1-6	**NJEJA: Northern Jersey** -Engage the NJEJA Community Education Mgr. as Project Mgr. to provide overarching project management. They will: a. identify 5-6 additional organizations to invite to each hub b. create physical and digital outreach materials c. leaders begin strengthening relationships with potential hub members d. set dates for informational meetings in the 2nd quarter e. invite potential hub members to informational meetings -Coordinate with TCTAC hubs -Convene the 1st and 2nd quarterly hub meetings with regional Hub Leaders -Meet 1:1 with each regional hub leader -Engage a Communications pro -develop communications timeline for the 2nd and 3rd year	-Develop a model of credentials (CEUs) that participants can earn for participating -Plan for youth content advisory group -Track financial and non-financial data **Hub Leaders =** **NJEJA: North Jersey** **Isles: Central Jersey** **O.C.E.A.N., Inc.: coastal communities** **NAAC: Southern Jersey** -attend the 1st and 2nd quarterly hub meetings - Meet 1:1 with NJEJA - Identify 5-6 additional organizations to invite as hub members -Begin strengthening those relationships -Set dates for informational meetings in the 2nd quarter	-Invite hub member orgs to meetings -Track financial and non-financial data **Kean:** -Create list of possible credentials that participants can earn from participation -plan for Summer at Kean program for student engagement DEP: -meet with Hub Leaders to refine curriculum - discuss credentialing -plan for incorporating DEP's Summer Youth Inclusion program into modules -Retool DEP educational content

7-12	**NJEJA:** -Coordinate with TCTAC hubs -Conduct 1:1 meetings with all hub leaders -Continue work on outreach materials & plan -Convene 3rd & 4th quarterly hub meetings -NJEJA and Hub Leaders conduct one hybrid informational meeting for one different hub each quarter - Hub leads follow up with each interested group -Hubs with less than 3 confirmed groups conduct a second round of outreach -Conduct one additional hybrid informational session	-Confirm 2nd round of 1:1 with hubs -Hire Interpreters as needed -Track financial and non-financial data -Submit required reports **Hub Leaders:** - Host one hybrid recruiting meeting for local member orgs - Follow up with member groups -If needed, conduct a second round of outreach -Conduct one additional hybrid informational session -2nd round of 1:1 mtgs with NJEJA	-Hire Interpreters as needed -Submit quarterly reports **Kean:** -Attend Hub Leader meeting - Host Summer At Kean for student engagement -Submit quarterly reports DEP: -pilot curriculum w/ hub leader seminar -Hub leaders provide input and feedback. -Submit quarterly reports
13-18	**NJEJA:** -Coordinate with TCTAC hubs -Officially launch project on social media and on individual Hub Leaders' websites -Highlight participant groups through on-going social media campaign -Comms Mgr. films each module -1st quarterly hub meeting of the 2nd year -Hub leaders solicit feedback from participants -Consult hub leaders on findings	-convene 2nd quarterly hub meeting -Facilitate delivery of 2nd seminar -Track financial and non-financial data -Submit quarterly reports as required **Hub Leaders:** - Attend 2 quarterly meeting -Reconfirm participants for 2nd seminar -Facilitate 2nd quarterly seminar -Solicit feedback from participants	-Submit quarterly reports **Kean:** -Advise & support Hub Leaders -Integrate youth modules into Summer At Kean program curriculum - Attend 2nd seminar -Submit quarterly reports DEP: - Deliver 2nd seminar -Submit quarterly reports
19-24	**NJEJA:** -Coordinate with TCTAC hubs -Plan & lead an EJ tour in one location	**Hub Leaders:** -Plan and attend EJ tour -Plan and attend end of Year 2 graduation	**Kean:** -Plan and attend EJ tour -Plan and attend

	- Award final quarterly stipends - Plan and attend Year 2 graduation and awarding of certificate -Link participants in a social media group; -Track financial and non-financial data -Submit quarterly reports as required	-Link participants in a social media group -Reconfirm participants for 3rd seminar -Submit quarterly reports as required	end of Year 2 graduation -Submit quarterly reports DEP: -Plan and attend EJ tour -Plan and attend end of Year 2 graduation -Submit quarterly reports
25-30	**NJEJA:** -Coordinate with TCTAC hubs -Edit module content -Collaborate with Kean, DEP and contractor to create 10-12 virtual modules. -Assemble advisory group from participants -Facilitate one feedback meeting -Track financial and non-financial data -Submit quarterly reports as required	**Hub Leaders:** -attend 1 feedback mtg -Submit quarterly reports	**Kean:** -Collaborate to create virtual modules. -Submit quarterly reports DEP: -Collaborate to create virtual modules. -Submit quarterly reports
31-36	**NJEJA:** -Coordinate with TCTAC hubs -Continue editing module content Attend 2nd meeting to review content of curriculum and videos -launch website -Track financial and non-financial data -Submit final report as required **Hub Leaders:** --Attend 1st meeting to review content	-Continue editing module content -Attend 2nd meeting to review content -Submit final report as required **Kean:** -Attend 1st meeting to review/assess on content of curriculum and videos -Continue editing module content -Attend 2nd mtg. to review content	-Submit final reports as required DEP: -Attend 1st meeting to review content -Continue editing module content -Attend 2nd meeting to review content -Submit final report as required

a. Itemized Budget Sheet/Budget Narrative

This project is requesting $500,000 for assembling a hub of grassroots community leader organizations, hub member organizations and seminar participants; developing EJ and environmental regulations content; paying a contractor to professionally record and edit educational video modules, paying a contractor for development of a web platform, and operating costs over the three years of the project.

2.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

a. Environmental Results (Logic Model) – See Attachment 'Logic Model'

b. Performance Measurement Plan

The goal of this Collaborative is to expand our statewide network on EJ groups and individuals and to increase the number of participants from OBCs who are aware of and adept at how to engage on NJ environmental justice issues. Progress and performance will be tracked based on measurements divided semi-annually and annually:

a) number of hub member organizations enlisted,
b) number of seminars/EJ Tour given
c) number of individuals who complete one curriculum module
d) number of individuals who complete the full curriculum and graduate/are certified
e) number of individuals from each regional hub who have completed at least one curriculum module

These measurements will allow for both short and long-term outcomes for awareness of EJ resources and ability to engage on local and/or statewide EJ issues. It also gives government a more efficacious way to engage underserved communities and creates a credentialed green jobs readiness pipeline of candidates.

The Collaborative will track the number of participants in each meeting in the milestones by a sign-in sheet. We will monitor those numbers at least semi-annually. We will track attendance at seminars/EJ Tour to ensure participants have earned their certificate and qualify to graduate.

c. Sustainability Plan and Environmental Justice Integration

Colonizing a statewide hub of grassroots organizations and individuals sets the stage for any number of future endeavors by anchoring the process prior to scaling, in a variety of ways. This Collaborative plans to utilize the results of this project by:

- bringing in more partners
- adding more modules as funding permits
- translating classes and written material into languages other than Spanish and English
- Further developing EJ Tour 'how-to training'
- Further developing a website with turnkey online educational content and participant interactions
- Considering 'Community Resiliency' through disaster preparedness
- By reaching out to new seminar graduates to peer mentor the next generation of advocates
- Potentially use this model to tackle public environmentally caused public health issues

This Collaborative is a capacity building project specifically aimed to grow the EJ advocate network within the state. To ensure sustainability, the training modules we develop will be accessible to the public and can be routinely revised in the future for more updated content and curriculum. NJEJA will continue to sit on boards, lead and attend committees and listening groups, and participate in policy discussions at all levels, to safeguard the point of view of affected communities.

4.0 Programmatic Capability

Early NJEJA members attended the Second National People of Color Environmental Summit in 2002. As a result of the learning and advocacy there, they established NJEJA as New Jersey's first Environmental Justice organization. Around 2002, NJEJA was the first organization in New Jersey to bring the issue of Cumulative Impacts to the public and to state agencies as an issue to be addressed in climate change policy. NJEJA began working with statewide and community-based orgs on this issue. Nicky Sheats, PhD, MPP Esq., Director of the Center for The Urban Environment at Kean University is a NJEJA founding member and the chair of the Board of Trustees. Dr. Sheats is considered one of the foremost authorities on Cumulative Impacts nationally and was instrumental in formulating the Newark Environmental Justice and Cumulative Impacts Ordinance of 2016, the Environmental Justice Act of 2019 and the EJ For All Act of 2021. He was also a major contributor to the NJ EJ Law of 2020. One of his principal contributions to the state bill and the federal bills was the inclusion of Cumulative Impacts. Their experience laid the groundwork for NJEJA today.

From the outset, NJEJA has been instrumental to landmark policy initiatives at every level of government: Most recently, the signing of Governor Phil Murphy's EJ Executive Order; the 2017 federal EJ Bill co-sponsored by NJ Senator Cory Booker; the passage of the Newark Environmental Justice and Cumulative Impacts Ordinance; and we submitted critical feedback on the Federal Clean Power Plan. NJEJA also continues to offer guidance on EJ best practices through advisory requests and local and statewide convenings. These workshops are on a range of topics from an EJ perspective, tailored for a variety of audiences from high school students to university researchers.

NJEJA's *Executive Director* Melissa Miles is an EJ leader with local, regional and national influence. She supports frontline organizations with EJ policy expertise and educates and convenes social justice organizations on EJ issues and campaigns. She regularly works with DEP to promulgate the rules for the NJ EJ Law, and to center EJ and to promote mandatory emissions reductions in climate change mitigation policy. Ms. Miles has experience organizing legal and academic partners to support our EJ campaigns, testifying at hearings hosted by local and national government agencies and participating meaningfully in organizational visioning, strategic planning and leadership transitions. She frequently represents NJEJA amongst various stakeholder groups and fosters partnerships with other grassroots and base building organizations towards realizing common goals.

NJEJA's Community Education Manager Dr. Cynthia Hall will serve as *Project Manager*. Dr. Hall has been teaching Environmental Science at the university level since 2007. She has conducted research on lead contamination and environmental justice and served on various committees at department, college and university levels. She is the co-founder of a farm and helps to manage weekly farmer's markets along with a 200+ member Community Supported Agriculture (CSA)

group. Dr. Hall also regularly facilitates educational programs that encourage and teach people how to grow their own food.

Expenditure of Awarded Grant Funds (OMB)

NJEJA retains Phillip M. Nembhard, MBA, CPA, owner of NPM Accounting and Advisory, LLC, as the organizational accountant. Our accounting system is designed to track and analyze financial activities from multiple dimensions to help manage grants and donations effectively. Revenue and expenditure activities are tracked at the grant level and also at the program levels while keeping track of restricted and non-restricted fund balances. Our QuickBooks system also tracks budgeted activities against actual periodic results.

Transactions are tested and audited annually by an independent accountant. Our internal controls impose limits and restrictions on record-keeping, custody over company assets, and authorization limits.

The federal draw down is processed by Budget and Finance Federal Funds Administration (FFA). Drawdowns are processed in the Federal Automated Standard Application for Payments (ASAP) system. Further information provided upon request.

5.0 Past Performace

NJEJA has grown dramatically in the last few years, so our main example is from Surdna Foundation, Inc. In 2019 they awarded NJEJA a $300,000 general operating grant to be delivered over 3 years ($100,000/year). We were to report annually to maintain the grant in good standing. We sent in annual reports as required and a final report in the final year of the grant.

In 2022 we applied again with Surdna and were awarded another $300,000 grant to be delivered over 3 years, ending in 2025. The first report is due at the end of April, 2023 and it has been started and is currently being edited. We have never failed to submit a report on time, regardless of the size of the award.

In March 2023 we were part of the WE ACT TCTAC team to be awarded a $10M grant from the EPA. NJEJA will receive $100,000 as part of this award but have not yet received the funds, although there have been some EPA requests to fill prior to starting.

We have also hired a contract grant writer to keep track of awards and reporting requirements, as well as to write the reports and submit them.

6.0 QAPP

The NJ EJ Collaborative will involve the use of existing environmental data and statistics.

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: PathStone Corporation

Address: 400 East Avenue

City: Rochester

State: NY: New York Zip Code: 14607

B. Unique Entity Identifier (UEI): HNEZN8HPK785

C. Applicant/Recipient Point of Contact

Name: Angela Iocolano

Phone: Redacted

Email: aiocolano@pathstone.org

Title: Sr. Director, Quality & Evaluation

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

Several complaints have been filed with HUD / NYS Division of Human Rights alleging discriminatory housing practices.
Responses denying the allegations of these complaints are being filed on behalf of the respondents.
PathStone manages hundreds of units of affordable housing in multiple states, so these complaints are common.
However, as noted below, these complaints are not decided against the applicant when closed.

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None.

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None.

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Anne Babcock-Stiner, Esq.
Chief Human Resource Officer
PathStone Corporation
400 East Avenue
Rochester, NY 14607
T: Ex. 6 - Personal Privacy (PP)
F: Ex. 6 - Personal Privacy (PP)

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Please see requested copy of Grievance Procedures attached at Other Attachments since it is not possible to add an attachment directly to this form.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Angela M Iocolano	Sr. Vice President, Direct Services	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Taxpayer:

This is in response to your request of Nov. 05, 2008, regarding your tax-exempt status.

Our records indicate that a determination letter was issued in September 1982, that recognized you as exempt from Federal income tax, and discloses that you are currently exempt under section 501(c)(3) of the Internal Revenue Code.

Our records also indicate you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

If you have any questions, please call us at the telephone number shown in the heading of this letter.

Sincerely yours,

Cindy Westcott

CHIEF FINANCIAL OFFICER

CAREER PROGRESSION

PATHSTONE – Rochester, NY — 2019 to Present
CHIEF FINANCIAL OFFICER

Overview: Assure development, implementation, maintenance, evaluation, and monitoring of the overall corporate financial management systems. Provide overall Financial management for PathStone Corporation and 24 affiliate companies and 48 partnerships with combined annual revenues of $57,000,000 and $224,000,000 in Assets. Provide management oversight of PathStone's Property Management services, with annual revenues of $15,000,000.

- **Ensure an effective central purchasing system** for all purchases made by the corporation.
- **Maintain accurate, complete, and up-to-date inventory** of all corporately owned physical property, including equipment located in all PathStone office and subcontractor sites.
- **Responsible for the conduct of an annual independent public certified audit** and the preparation of all information required by such audit.
- **Participate in all grant audits** as required and ensure the availability of accurate and complete information for grant auditors. Audit preparation for subcontractors.
- **Responsible for the accurate up-to-date recording of corporate fiscal operations** through the computerized general ledger, accounts payable and payroll systems.
- **Preparation and negotiation of Indirect Cost Rate**, Fringe and Release rates
- **Responsible for design of overall Fiscal system** including Hardware/Software utilization, corporate internal controls, and segregation of duties.
- **Ensure that accurate, complete and timely reporting** of all required state and federal reporting forms is completed.
- **Utilization of a complete and comprehensive knowledge of all regulations** affecting fiscal matters to inform the CEO and Program Directors of regulations affecting the fiscal management and operation of individual grants.

IBERO AMERICAN ACTION LEAGUE – Rochester, NY — 2015 to 2019
CHIEF FINANCIAL OFFICER

Overview: Managed financial and regulatory reporting process, financial operations, systems development, project management, and process re-engineering. Responsible for integrating the Finance Department and managing the conversion of a multi-location financial reporting system following a service agreement between two organizations. Established corporate infrastructure and created a common culture.

- **Improved organizational performance** by focusing on deliverables and outcomes. Proposed and implemented changes to eliminate negative trends. Experienced a 326% Change in Net Assets recovery.
- **Created a high performing finance team** by providing growth opportunities. Mentored and developed talent. Team members are more productive and exhibit a higher commitment to our mission.
- **Established and managed** the Finance Department infrastructure to incorporate a new organization into our reporting cycle.
- **Improved processes** for monthly cash forecasting and financial reporting. Accounts Payable were reduced by $600K compared to previous year.
- **Evaluated programs' social and economic impact** to our region and proposed changes that generated $150K.
- **Designed and implemented an** incentive program to attract and retain new radio station staff. The station contributed over $25K to the agency's bottom line in its first year of operations.
- **Reengineered** the financial reporting process. Provided Board members and department managers a new cash flow/monthly reporting package.

UNIVERSITY OF ROCHESTER – Rochester, NY 2009 to 2015
SENIOR ACCOUNTANT

Overview: Provided administrative oversight in the clinical, research, and operation areas. Successfully developed faculty practice/operational budgets. Functionally responsible for all financial projections, financial analyses, and expenditure approval.

- **Led a team to create a salary/productivity benchmark analysis** and increased wages of over 190 physicians.
- **Managed a cross-functional team to develop a performance measure scorecard.** Reported work RVUs and charges per hour on a quarterly basis for over 40 faculty members. Physicians were able to compare their performance between fiscal year quarters and among themselves.
- **Created annual hospital and faculty practice budgets $125M.** Explained variances to the Medical Faculty Group and Strong Memorial Hospital Finance Department. Provided action plan for correction of variances whenever appropriate.
- **Updated policies and procedures** to improve financial reporting. Received a positive follow-up letter from the Internal Audit department after implementing a new ledger reconciliation process.
- **Maximized productivity and workflows by** training new employees in all accounting and reporting software.

ROCHESTER REGIONAL HEALTH SYSTEM – Rochester, NY 2008 to 2009
SENIOR ACCOUNTANT

Overview: Responsible for overseeing all monthly closing activities, including variance analysis and financial statement preparation. Created new budgets and modified existing ones to maximize revenue generating activities. Prepared and filed cost reports with government agencies and served as key liaison to external auditors when completing the annual financial audit.

- **Streamlined monthly closing process** by identifying and eliminating two-step allocations when recording expenses at the affiliate level. Gained operational efficiencies.
- **Consistently complied with monthly closing schedule** to produce timely and accurate financial statements.
- **Successfully addressed** all questions in the 2007 Consolidated Fiscal Report (CFR) desk audit, instrumental in filing the 2008 CFR.

ACTION FOR A BETTER COMMUNITY, INC. – Rochester, NY 2000 to 2008
ASSISTANT DIRECTOR OF BUDGETS & CONTRACTS

Overview: Promoted from Staff Accountant position to oversee a variety of functions including preparation of monthly/year-end financial statements, budgets, revenue distribution, and control of capital expenditures on both corporate and divisional level. Assumed leadership over special projects including preparing responses to funding sources' (federal and state) requests for information. Directed activities of staff and volunteers tasked with analyzing financial data.

- **Credited with saving over $500K** by implementing corrective action plan that included transferring two positions to a different division, reorganizing transportation component, and eliminating two positions. All without compromising productivity. Plan was approved by Board of Directors.
- **Generated 80% reduction in disallowed Medicaid payments** over a three-year period by leading quality assurance internal audit functions.
- **Spearheaded engagement to examine six years of federal payments and allocation of said payments** among federal awards; prepared reconciliation and report for auditors which confirmed findings ($82M).
- **Improved operating efficiencies** by leading implementation of new accounting software to replace 15-year old system. Delivered seamless transition despite timing of project six months into the new fiscal year.
- **Prepared and filed federal financial reports for agency's largest funding stream ($16M)** and reconciled federal payments received to expenses reported on general ledger.

Ex. 6 - Personal Privacy (PP)

Case Manager 2004-2008
TANF Program, Ponce, Puerto Rico

- Visit individuals in homes to provide information on agency services, requirements and procedures.
- Interview clients individually to conduct assessments on their situations, capabilities, and problems to determine what services are required to meet their needs.
- Refer clients to community resources for services such as job placement, debt counseling, legal aid, housing, medical treatment, or financial assistance, and provide concrete information, such as where to go and how to apply.

School and Community Assistant, Family Advocate
Even Start Program, Dunkirk, New York 1997-2004

- Serve as liaison between students, homes, schools, family services, child guidance clinics, courts, protective services, doctors, and other contacts, to help children who face problems such as disabilities, abuse, or poverty.
- Consult with parents, teachers, and other school personnel to determine causes of problems such as truancy and misbehavior, and to implement solutions.
- Counsel students whose behavior, school progress, or mental or physical impairment indicate a need for assistance, diagnosing students' problems and arranging for needed services.

EDUCATION

Masters of Business Administration in Management and Strategic Leadership
Universidad Ana G. Méndez Santa Isabel, P.R.

Bachelor of Arts in Sociology
State University of New York, Fredonia, New York

Associates Degree in Applied Sciences

PathStone
Connecting You to Opportunities

EXPERIENCE PORTFOLIO

Placement and Career Services Developer 2023
PathStone Corporation, Ponce, Puerto Rico

- Conduct participant initial screening and comprehensive assessment of job readiness, skills, strengths, abilities, and barriers, and establish individual employment plans for over 50 participants on a yearly basis.
- Assess, plan, implement, monitor, and evaluate actions required to meet the client's services needed.
- Assess training needs through surveys, interviews with participants, focus groups, or consultation with managers, instructors or customer representatives.
- Assist participants in establishing, reviewing and monitor individual and family goals and objectives.
- Coordinate job readiness, English classes, and cognitive restructuring workshops for over 50 participants on a yearly basis.
- Collaborate with agency representatives, community groups, and area employers to determine employment trends and conduct quarterly Labor Market Analysis.
- Establish employment referral network including job bank and training activities specific to the employer needs.
- Develop and maintain employment and training opportunities for program clients and provide support in utilizing those opportunities.
- Serve as leader and coordinate all training and employment activities.
- Market training programs, and develop placement opportunities for job ready participants.
- Assist over 50 participants a year with employment, retention, occupational skills training, emergency, support, advocacy, and referral services.
- Link clients to needed and available community resources in the areas of legal, medical, educational, financial, mental health and more.
- Maintain current, accurately documented participant files, complete all required paperwork and service tracking reports according to deadlines.
- Recruit potential employers by advocating for individuals with barriers such as: criminal background, disabilities, lack of employment skills, high school dropouts, etc.
- Build and develop positive alliances with community business and potential employers.

Outreach Coordinator 2017-2023
PathStone Corporation, Ponce, Puerto Rico

- Develop strategic relationships and conduct informational presentations in order to recruit eligible low income participants for participation in training and employment programs.
- Prepare brochures and marketing materials to conduct outreach activities.
- Organize outreach events, including the marketing and planning, to promote the services of the organization.
- Participate in job fairs organized by public housing, churches, one stops, and communities
- Identify prospect participants by collecting, screening, and analyzing data on local demographics.
- Complete program enrollment process and make sure that required documents are accurate and meet program eligibility criteria.
- Enter participant information in MIS system.
- Schedule and conduct pesticide and heat stress orientations in farmworker communities.

09/2015 to 07/2017
Marketing Promoter / Team Leader
SSS Advantage, Ponce, Puerto Rico

- Identify prospects eligible for Medicare.
- Measured performance and developed new strategies.
- Organized events to establish community relationships and maximize marketing strategies.

09/2008 to 09/2015
Social and Family Assistance Technician
Administration of Socioeconomic Development of the Family, Ponce, PR

- Coordination of distribution of aid due to natural disasters.
- Performed site evaluations, customer surveys and team audits.
- Worked closely with team to deliver project requirements, develop solutions and meet deadlines.

Summary of qualifications

1991 – Present PathStone Corporation Rochester, New York

Current Position: Senior Director Client Data Systems/MIS

- Direct management including quality assurance of Client Data Tracking Systems for PathStone Corp, including PathStone Management Information Systems (MIS), Individual and Family Development Plan Case Management System, Aids Institute Reporting System (AIRS), and PathStone's Dashboard, .
- Performs agency reporting to federal, state and local funding sources and assures compliance with funding source regulations.
- Fully bi-lingual (Spanish and English)

Professional experience

1991 – 1992 PathStone Corporation Rochester, New York

Data Entry Clerk

- Entered into PathStone MIS all applicants' data from multi-state field offices.
- Identified missing and/or incomplete data and obtained information as need for correction.

1992 – 1994 PathStone Corporation Rochester, New York

Program Information Coordinator

- Reviewed participant applications for 2,000 clients and maintained their files, including employment and training contracts, placements and job follow-ups.
- Created and/or edited programs for specialized reporting and tracking requirements, materials and manuals used for computer training.
- Created budgets for various proposals
- Translated documents for the division.

1994 – 1999 PathStone Corporation Rochester, New York

WAN Manager

- Managed agency-wide, computerized information network (Management Information Systems) for four states/thirty field offices; tracked participant databases programs and demographics for 7,000-8,000 clients.
- Performed agency reporting to federal, state, and local funding sources, ensured compliance with funding source regulations, and managed computerized tracking systems.
- Created and/or edited programs for specialized reporting and tracking requirements, materials and manuals used for computer training.

Ex. 6 Personal Privacy (PP) – **page two**

1999 – 2001 PathStone Corporation Rochester, New York

Deputy for Network Technology

- Maintained agency-wide, computerized information system (Management Information Systems), servicing six states/thirty-five field offices; tracked programs and demographics for 8,000-9,000 clients.
- Supervised two full-time staff members and one seasonal staff.
- Performed agency reporting to federal, state, and local funding sources, ensured compliance with funding source regulations, and developed computerized tracking and record keeping systems.
- Created programs for specialized reporting and tracking requirements, developed materials and manuals used for computer training, and
- Installed and maintained computerized client tracking system agency wide and trained staff on system usage.
- Created budgets for various proposals and translated documents for the division.

2001 – 2008 PathStone Corporation Rochester, New York

Director for Client Data Systems/ MIS

- Maintain agency-wide, computerized information system (PathStone Server Suite), servicing seven states and Puerto Rico field offices.
- Perform agency reporting to federal, state, and local funding sources, ensure compliance with funding source regulations.
- Conduct quality assurance and edit as needed data for 10,000-12,000 clients. Update the client data systems as needed.
- Supervise three full-time staff members.
- Development of enhanced computerized tracking and record keeping systems.
- Conduct analyses of program performance and distribute reports to Directors; Create internal reports as requested for peers.
- Provide client and budget data for funding applications.
- Translate documents for PathStone Board of Directors, staff and clients.
- Present PathStone MIS, Case Management tool (IFDP) and Best Practices at national conferences such as MAFO, AFOP, and NCLR.
- Provide agency-wide staff training and technical assistance.

Education

University of Puerto Rico Mayagüez, PR

BSBA – Industrial Management

1.0 PROGRAM OBJECTIVES a. Project Summary Page

• **Project Title**: Environmental Justice Collaborative Problem-Solving in Arecibo, Barceloneta and Utuado Municipalities of Puerto Rico - PathStone

• **Project Location**: Arecibo, PR 00612; Barceloneta, PR 00617; and Utuado, PR 00641.

• **Applicant Information**: PathStone Corporation; 400 East Avenue; Rochester New York 14607

Brenda Soto Colón /Authorized Representative
Sr. Vice President, Direct Services
BSoto@PathStone.org Ex. 6 - Personal Privacy (PP)

Mileidy Soto /Project Manager
Director, Training & Employment
MSoto@PathStone.org Ex. 6 - Personal Privacy (PP)

• **Applicant Description**: PathStone is a not-for-profit 501(c)3 community development and human services organization founded in 1969. Education & Health, Community Development, Housing, and Workforce Development services supported by federal, state, local and private funders enable 500+ dedicated staff to enact our mission to *build family and individual self-sufficiency by strengthening farmworker, rural and urban communities; and promote social justice through programs and advocacy* in PR, IN, ME, NJ, NY, OH, PA, VT and VA.

• Are you applying for the Small CBO Set Aside Track for $150,000 projects? **No**.

•**Project Abstract**: This EJCPS project will assist residents of underserved, high poverty, rural, Hispanic communities to develop emergency preparedness and disaster resiliency skills and plans to minimize exposure to pollutants, exploitation, injury and illness and maximize healthy recovery and thriving before, during and after natural disasters—hurricanes, tornadoes, coastal flooding and earthquakes. These disasters disproportionately impact the environmentally overburdened, low-income, rural communities this EJCPS project will serve: Arecibo, Barceloneta, and Utuado in Puerto Rico. Outputs/outcomes will include 100 individuals gaining knowledge and skills for direct use to mitigate negative impacts and manage resources, including water purification, food storage, and preparing shelters; with NIMS ICS certifications for the FEMA Incident Command System. Other outcomes include skills and FCC certifications for emergency communications, and specialized response skills for earthquakes and hurricanes, including preparing for emergency helicopter access. Residents will learn about what is required to attain Community Hub status and contracts with the PR government to obtain/distribute resources. A significant EJ outcome is that residents will engage with Manejo de Emergencias/ Emergency Management to develop or expand three community response plans and gain meaningful involvement in decisions directly affecting their communities.

• **Project Type**: Training for emergency preparedness and disaster resiliency skills and plans.

• **Special Considerations:** Project goal is to provide education, skills and planning assistance to increase ***Climate Change/Disaster Resiliency*** of residents in three ***Rural Areas*** of Puerto Rico.

• **Environmental Issue**: Contaminant danger (pollution/waste) from natural disasters.

• **Project Partners**: National Partnership for Environmental Technology Educ./ academic; Program Area Advisory Committee & Utuado Municipality/Target Community; COSSAO/ Economic Development; Apóstle II Methodist Church/ Faith-based; Congress member Jenniffer González-Colón & Senator Elizabeth Rosa Vélez/ Government; Clinical Social Worker M. Mercado/ Health; ECO JMJ Fitness Inc./ Business; Conexión Laboral, Área Local Desarrollo Laboral Manatí Dorado & Norte Central/ Workforce System – American Job Centers.

• Will you need to develop a QAPP for your project? **No**.

https://data.census.gov/profile/United_States?g=010XX00US
*USDA Rural Development Office; USDA Secretary, Mrs. Darma Daondo. Two Arecibo neighborhoods are designated urban.

As cited in the above table, our target area includes the contiguous rural municipalities of Arecibo, Barceloneta and Utuado; characterized by unemployment 2 to 5 times higher than the national rate; median incomes near half of the national median; 99% minority population; 2,880 veterans; and poverty rates of 45-55%, over four times higher than the national rate of 11.6%. Utuado is in the Central Mountain Region Rural Community Network. (www.rural.gov/community-networks/pr) Our Environmental Justice Collaborative Problem-Solving initiative will have significant impact in this area.

Our target area is also home to many Superfund sites—two old pesticide storage centers, two former pharmaceutical and manufacturing facilities, a 20-acre regional landfill, and a lead smelter battery plant. According to the EPA, the designation "Human Exposure Under Control" applies to none of these sites.[1] In 2011, the EPA designated Arecibo as an area of nonattainment for failure to meet air quality standards for lead in an area bounded by 4 km from the Battery Company boundaries.[2] PR's Environmental Quality Board operates two lead monitoring stations near the battery plant. In the inactive Barceloneta Landfill, 300 tons of hazardous wastes are located in three sinkholes; with no barriers to protect groundwater, underlying limestone formations may speed contaminant migration.[3] Concern has arisen over whether Hurricanes Maria (and later Fiona) caused contamination to move beyond these Superfund site boundaries. Stormwater runoff from the Battery plant previously contaminated a nearby wetland and Reserve. Benjamín Bostick, soil scientist at Columbia, wants to test the Island's waters and soils near Superfund sites; his proposal noted that hurricane flooding *almost certainly spread poisons further*. Osvaldo Rosario, an environmental chemist at University of Puerto Rico, believes "*Without a doubt, natural disasters, especially hurricanes, aggravate and accelerate the spread*

1 https://cumulis.epa.gov/supercpad/cursites/csitinfo.cfm?id=0202486.
2 Air Quality Designations for the 2008 Lead (Pb) National Ambient Air Quality Standards. *Federal Register*, vol. 76, p. 72098; 22 Nov. 2011.
3 https://earther.gizmodo.com/the-puerto-rican-town-left-to-stew-in-toxic-waste-1824949208.

of pollutants from a given site."[4] Confidence is not inspired by the local wastewater treatment and aqueduct filtration; EPA records show both cited for Clean Water Act non-compliance.[5]
In our target area, several pharmaceutical, chemical and electronic companies and a power plant are required to report to the Toxics Release Inventory/TRI, which tracks management of toxic chemicals that pose threats to human health and the environment, a sample is presented below.[6]

- Thermo King has released nickel (carcinogen) in a total of 6,573 pounds of hazardous TRI-chemicals.
- GE Industrial of PR has released copper (impacts gastrointestinal and respiratory systems) and zinc (impairs hematological and reproductive systems) in a total 214,918 lbs. of hazardous TRI-chemicals.
- Pantheon Puerto Rico Inc., a chemical company cited for noncompliance, has released dicloromethane (carcinogen) and methanol (impacts developmental, hepatic and neurological processes) in a total of 20,549 pounds of hazardous TRI-chemicals.
- DuPont Agricultural Caribe Industries, cited for significant noncompliance, has released carcinogens ethylbenzene and lead in a total 3,009,539 pounds of hazardous TRI-chemicals.
- DuPont Electronics Microcircuits ITS Caribe Industries has released the carcinogens ethylbenzene, naphthalene and lead in a total 145,053 pounds of hazardous TRI-chemicals.
- Janssen Ortho, a pharmaceutical manufacturer cited for noncompliance, has released 4,676 pounds of hazardous TRI-chemical methanol (impacts developmental, hepatic and neurological processes).
- Merial Barceloneta has released the carcinogens naphthalene and ethylbenzene in a total of 144,715 pounds of hazardous TRI-chemicals.
- ADM Alliance Nutrition has released the carcinogens cobalt, cobalt compounds and chromium in a total 1,296 pounds of hazardous TRI-chemicals.
- Pfizer Pharmaceuticals, cited for significant noncompliance, has released the carcinogen dichloromethane in a total 271,080 pounds of hazardous TRI-chemicals.
- ABBVIE Pharmaceutical Preparation Manufacturing has released the carcinogens naphthalene, polycyclic aromatics and dioxin in a total 6,166 pounds of hazardous TRI-chemicals.
- Prepa-Cambalache Combustion Turbine (owner: Puerto Rico Electric Power Authority) has released carcinogens naphthalene, polycyclic aromatics and lead in a total 1,063 pounds of TRI-chemicals.

The target area's 45-55% poverty rates taken with the above pollution data strongly align with the Environmental Justice premise that *the poorest people reside in the most polluted areas.*

The majority of the above-cited Tri-chemicals were released to the air.[7] In the US, the asthma rate in Hispanic children is 7.9%; that rate is 16.5% in Puerto Rico's children. The annual

4 https://earther.gizmodo.com/the-puerto-rican-town-left-to-stew-in-toxic-waste-1824949208
5 https://www.epa.gov/toxics-release-inventory-tri-program/my-right-know-application.
6 https://www3.epa.gov/enviro/facts/tri/ef-facilities/#/Release/ 2007-2017 Data files.
7 https://www3.epa.gov/enviro/facts/tri/ef-facilities/#/Release/ 2007-2017 Data files.

ED_016126_00001311-00003

economic cost of asthma, including direct medical costs from hospital stays and indirect costs such as lost school and work days, is approximately $56 billion.[8,9] The economy in our target area, particularly tourism, is also directly affected by toxic pollution. Hotels report that, frightened by contamination reports, foreign guests and convention planners have elected to go elsewhere, exacerbating the area's economic woes.[10]

The demographic, TRI and health data clearly demonstrate that the residents of Arecibo, Barceloneta and Utuado are impacted by economic disinvestment, health disparities, and environmental contamination. Our EJCPS project will further Environmental Justice by ensuring that minority, low income, rural residents access education, skills and planning assistance that will enable them to have meaningful involvement in and benefit from ***Climate Change/Disaster Resiliency*** plans and actions in their environmentally overburdened communities.

Outputs and outcomes will include 100 individuals gaining knowledge and skills for direct use to mitigate negative impacts of ***Climate Change/Disaster*** and manage resources, including water purification, food storage, and preparing shelters; with NIMS ICS certifications for the FEMA Incident Command System. Other outcomes include skills and FCC certifications for emergency communications, and specialized response skills for earthquakes and hurricanes, including preparing for emergency helicopter access. Residents will learn what is required to attain Community Hub status and contracts with the PR government to obtain/distribute resources. A significant EJ outcome is that residents will engage with Manejo de Emergencias/ Emergency Management to develop or expand three community response plans and gain meaningful involvement in decisions directly affecting their rural communities. We recently received text messages from Gisela Rosario, Executive Director of Manejo de Emergencias, confirming her strong commitment to personally participate in this project, guaranteeing that this desired outcome will be achieved.

c. Organization's Historical Connection to Underserved Community

• History of PathStone's involvement with underserved community. Since PathStone's beginnings in 1971, we have been involved with Puerto Rico residents. In western New York, agricultural workers from Puerto Rico worked in food processing plants (e.g., Comstock, Bird's Eye and Seneca Foods). Nearly all of these workers were men who left their families in Puerto Rico to work in the processing plants for approximately six months each year. PathStone was successful in raising funds to provide these workers with English as a Second Language and Adult Basic Education classes. At this time, the Commonwealth of Puerto Rico's Migration Division maintained an office in Rochester, NY—where PathStone is headquartered—to oversee a labor contract with the food processing companies; the Migration Division welcomed PathStone's efforts to provide services to Puerto Rican workers. A Puerto Rico representative served on the PathStone Board from 1971 until the Migration Division Office closed in 1998.

8 http://yosemite.epa.gov/opa/admpress.nsf/!OpenDocument; 06/11/2012.
9 https://minorityhealth.hhs.gov/omh/browse.aspx?lvl=4&lvlid=60 2015 (Most recent available).
10 En el sur los más tóxicos; El nuevo dia.com, at http://abeyno.wordpress.com/2012/10/24/salinas-victima-de-la-contaminacion.

ED_016126_00001311-00004

Many workers were requesting assistance to continue their education in the off season in Puerto Rico. Better continuity and coordination of services was needed for efforts in Puerto Rico and on the mainland. In 1974, PR DOL contracted with PathStone to provide job training and educational services to food processing workers interested in upgrading their skills.

On September 22, 1998, Hurricane Georges cut a path of destruction across Puerto Rico; thousands of families were suddenly homeless or living in seriously damaged housing. Federal agencies FEMA, HUD and HHS moved to increase community level support for disaster victims. Response from the U.S. Department of Agriculture was largely in the form of relief for farmers and other agricultural interests but not for workers. PathStone appealed to Congress and to the Secretary of Agriculture for help for Puerto Rico's agricultural workers and was awarded $600,000 to provide emergency services and to repair and rehabilitate homes in the central mountain region. A year later, PathStone entered into a contract with USDA to identify, educate and counsel potential homebuyers living in the mountain region who would qualify to borrow under USDA Rural Development's Section 502 mortgage program. For the next four years, PathStone operated out of an office in Adjuntas where many farmworkers and low income families lived, with funding from USDA, a relationship which continues today. In late 2003, PathStone was awarded one of three USDOL contracts to support a micro-enterprise pilot for farmworkers. This program was successful: 20 entrepreneurs received training, 4 completed business plans and 2 obtained financing to launch new businesses. In 2007, PathStone received USDOL funding to operate the National Farmworkers Jobs Program, and established relationships with an ever-growing network of employers and partners. These key partnerships, now strengthened by decades of providing valued services and delivering on outcomes, are evident in the attached Letters, many of which reflect partnerships begun in 1997.

• Work with underserved community residents / partners on environmental & public health issues. In 2009, PathStone partnered with the Migrant Health Center in a three year initiative funded by HHS to provide health outreach, education and screening in 45 rural communities of Puerto Rico. Community Health Fairs were conducted for health screening, over 2,500 individuals were referred for health care services, 4,500 individuals attended education for prevention of diabetes, HIV/AIDS and domestic and sexual violence; and over 15,000 received health education. For these Community Health achievements, PathStone was awarded 2nd place for the National 2012 Platinum Awards for healthcare impact success and innovation. In 2015, PathStone was funded by US EPA to deliver Environmental Job Training, which continues today. We have exceeded cooperative agreement goals for training, certifications and employment placements in every grant cycle and each year enable 25 minority, low income residents to enter environmental careers and both advance and benefit from revitalization and environmental cleanup in their home communities.
Currently, the National Partnership for Environmental Technology Education/PETE has certified 24 PathStone lead trainers to deliver Disaster Site Worker, HAZWOPER and OSHA training.

ED_016126_00001311-00005

Year	PETE Agreement	Individuals received Capacity Building Training	Contact Hours
2020-2021	10825 + 10826	120	1368
2021-2022	10868 + 10869	269	3700
2022-2023	10928	265 (to date)	912.5 (to date)
2022-2023	10902 + 10903	85 (to date)	1266 (to date)

• Community Driven Participation. PathStone has strong relationships in our target area—PathStone has a regional service site in Arecibo and is actively involved in community-building in Arecibo, Barceloneta and Utuado through membership in local civic and community groups, participating in charity events and providing a strong advocacy presence for those in need of a stronger voice. PathStone has been heavily engaged in resiliency, preparedness and rebuilding; and local needs assessment and emergency distributions; food, water, water filters, health & hygiene items, emergency generators, stoves, and solar lights. Staff has assisted individuals in obtaining health services, repairing homes and securing employment.

In recent months, we have actively engaged community members in the development of this proposal through in-person meetings with 390 key partners, providers, area residents and stakeholders. Please see table, below. Everyone is very excited about this opportunity.

Resident input was collected and included in the design of this project, and residents will have voice to influence the project further during implementation with choice built into the process with regards to content, scheduling, etc. as well as quarterly project reviews, continuous improvement meetings

and Program Area Advisory Committee meetings, plus other feedback mechanisms including social media.

d. EJCPS Model. EJCPS Model Element 1- Community Vision and Strategic Planning occurred prior to applying but will be revisited at project completion, following Element 7 - Evaluation. The main goals of this project are focused on Element 2 - Community Capacity-Building and Leadership Development, providing residents with the skills, information, and resources they need to engage in self-leadership and achieve their Disaster Resiliency goals. Central to this process is educating residents and involving them in formulating solutions and strategies, activities serving as the backbone of this project. Element 3 - Consensus Building / Dispute Resolution will arise during implementation where groups will make decisions about content choices, scheduling, etc. PathStone staff is trained to facilitate these scenarios, which will be more in evidence after training when Community Response Plans are developed. Element 4- Partnerships and Leveraging of Resources has impact in this project due to the diverse partners—communities, faith groups, government, business, health, eco-dev—with interest in its success. Element 5 - Constructive Engagement by Relevant Stakeholders will be a challenge for the community groups to address as the project progresses and individuals need to stay aligned with the common mission and goals, with clear communications and action plans. New stakeholders will need to be identified and engaged to access resources.

CPS Element 6 - Sound Management and Implementation will be challenging when this project will be implemented in the margins of most participants' lives—commitments need to be realistic and manageable. Element 7 - Evaluation, Lessons Learned, and Replication of Best Practices will occur at milestones before moving on as well as at the project conclusion. Residents will need to understand that this is an iterative process and recognizing learnings will benefit them in the next iteration—as well as serve others who may replicate this design. Documenting information on successes and course corrections is key to a better process in the future as well as recognizing the work accomplished and preparing for revisiting the Vision and Strategic Plan. Summarizing progress in quantitative, qualitative, institutional, and social terms, and incorporating lessons learned and best practices into a continuing process will sustain the work into the future—for these communities and for others.

e. Project Linkages. This project supports EPA Strategic Plan Goal 2, Objective 2.1 by implementing the strategy of Building capacity and climate resilience and maximizing benefits to overburdened and underserved communities, to be evidenced by 100 individuals gaining knowledge and skills for direct use to mitigate negative impacts and manage resources, including water purification, food storage, and preparing shelters; with NIMS ICS certifications for the FEMA Incident Command System. Also by individuals gaining skills and FCC certifications for emergency communications, and specialized response skills for earthquakes and hurricanes, including preparing for emergency helicopter access. Residents will learn about what is required to attain Community Hub status and contracts with the PR government to obtain/distribute

resources, to maximize the benefits of resource investment achieve meaningful change on the ground. A significant EJ outcome is that residents will engage with Manejo de Emergencias/ Emergency Management to develop or expand three community response plans and gain meaningful involvement in decisions directly affecting their communities.

f. Partner and Collaborate – PathStone has engaged a diverse group of partners representing multiple stakeholder groups to promote fruitful collaboration and achieve the project's goals. Bringing together the resource access of these partners will enable the project to accomplish its capacity building goals and also closely connect residents to other needed services. Diverse perspectives will also enlarge ideation for planning and solution generation.

1. Academic Stakeholder Group –National Partnership for Environmental Technology Education (PETE), an Affiliated Council of the American Association of Community Colleges, brings deep experience in Disaster training and links to related resources that will be helpful. PETE has a strong desire to promote resiliency on the Island, and has supported many initiatives to provide training and resources so PathStone staff—residents of environmentally overburdened communities—can take leadership roles in mitigating adverse effects and increasing resiliency.

2. Community Stakeholder Group. The Program Area Advisory Committee led by Belsy Velez is committed to insuring that PathStone has information pertaining to local needs, communities' assessments, and local projects that may support this and other EJ projects. The Program Area Advisory Committee will promote this project and refer qualified participants and partners.

Centro de Servicios Communitarios y Agricolas de Utuado Inc. is vested in creating a disaster refuge in Utuado and will participate in project activities to integrate resiliency efforts underway. The Municipality of Utuado is committed to these capacity-building efforts and creating access for emergency assistance as a means to change the impacts of disasters in their isolated community and move forward toward self-sufficiency. The municipality will help coordinate community orientations and activities, and also use this project to link current efforts more tightly together and gain more traction.

3. Economic Development Services Stakeholder Group – COSSAO (Corporacion de Servicios de Salud Primaria y Desarrollo SocioEconomico Del Otoao) led by Francisco J. Valentin brings access to Eco-Dev resources and linkages. COSSAO will directly support outreach efforts, provide referrals and make space available as needed to insure that these communities obtain the skills needed to survive Disaster events.

4. Faith-based Stakeholder Group –Apóstle II Methodist Church led by Pastor Héctor Cortés Aguilar and Mateo 4:19 Church led by Pastor Hilda Jeanette Torres Rosado bring connection to many residents and potential partners, as well as the ability to identify and marshal volunteers willing to assist in different facets of managing during a natural disaster.

5. Government Stakeholder Group – US Congress member Jenniffer González-Colón and Arecibo District Senator Elizabeth Rosa Vélez commit to promote the program, help in the

identification and coordination of services to communities in need of greater resiliency, adaptation and Emergency preparedness skills and knowledge. These leaders have access to communities and their leaders and are able to help obtain community input and feedback for program needs and development.

6. Health Services Stakeholder Group – Clinical Social Worker Martha Mercado has committed to provide Emotional / Trauma training & assistance and social services linkages to these communities, and to refer candidates in need of this capacity building.

7. Business Stakeholder Group - ECO JMJ Fitness Inc. will support this project with Emergency / Disaster response training customizable to each community and aligned to their goals with the personal desire that, in the event of an emergency, project participants can survive and assist others to do so as well. JMJ brings a strong relationship with Emergency Management and status as a Distribution Hub contracted with the PR government.

8. Workforce System – American Job Centers - Conexión Laboral, Área Local Desarrollo Laboral Manatí Dorado led by Yamilette Ramos De La Cruz and Conexión Laboral-Área Local Norte Central led by Samaris A. Tejada Cruz will identify/refer participants; coordinate supportive services and related assistance, provide orientation training services and training space; provide valuable connections to partners and employers and serve as a key source of local labor market information. As part of the workforce system, they bring access to opportunities for career exploration, referral to supportive services, support of paid and/or unpaid work experience, OJT, internships, summer jobs, and unsubsidized full and part-time employment placement assistance.

These partners have a vested interest in working with this partnership based on their lived experiences in these areas. Only one partner will receive any payment; JMJ will be paid for training services resulting from appropriate procurement at this time (sole source determination) to be repeated at the time of award in case other providers of comparable services emerge.

2.0 Project Activities / Milestone Schedule / Detailed Please describe the following:

a. Project Activities .

Quarter 1. First steps include_Informing partners & communities of award, holding a Press release/Media event with EPA participation and establishing project fiscal & data codes/controls. Hiring and training staff for this program and coordinating Partner activities are key for success and are done at this time.

A report to the PathStone CEO and Board of Directors regarding the project plan and review of the design and outcomes will also occur at this time, to be repeated quarterly. Project Management (plan vs. actual; best practices) also begins in the first quarter to insure project

launch is positive and that procedures are finalized for later activities, including performance and fiscal reviews.

The Project Administrator will establish resources: supplies, agreements, contracts that will be needed as staff are on-boarded.

We anticipate that our Project Officer will have their first meeting in Quarter 1 to on-board the new grantee, which will continue quarterly through the remaining quarters of the project.

Quarter 2. At this point, staff should be on-board and outreach plans are finalized in preparation for implementation.

Quarters 3-4-5. PathStone will utilize our successful community outreach model to recruit individuals for our EJCPS project. PathStone has been providing services to residents of the rural barrios and poorest municipios of Puerto Rico for many years. We have experience in creating and implementing efficient plans to reach the entire area, including leveraging established local partners. Churches, civic and social groups, and other nonprofits are effective and willing to enhance our outreach efforts; many partners have committed to outreach for this program (see attached Letters). Staff and volunteers are chosen for their knowledge of the population, geography and culture of the target area. Staff conducts outreach at residents' gathering places, and orientations are offered at community centers, consortiums, municipalities, One-Stops, community fairs, and churches. Outreach and recruitment efforts are often conducted in the evenings and weekends.

Recruitment will be accessible to all the members of the community. Partners assist with targeted referrals, as do staff in other PathStone programs. Local media, faith based organizations and mayors typically assist with targeted community outreach. Staff will engage in effective screening, including an interview process, to insure that participants are likely to succeed. That success includes completing training, earning certifications and utilizing new skills in service of their community. Screening is the foundation for retention, and staff helps participants remain focused on the goals throughout the entire process. Appropriate screening for readiness, motivation and goal direction plus intensive case management promotes retention.

Our goal is to foster local economic growth and leverage jobs while promoting resiliency to improve quality of life for all community residents. All fees for licensing, certification are included in the training cost—No fees will be charged, consistent with promoting Environmental Justice in this area. Training sites are easily accessible. Every effort is made to establish transportation access to facilitate training and participation; a small amount of funding is budgeted to assist as needed.

We anticipate the first semi-Annual report will be due in April/Quarter 3 and then in Quarters 5, 7, 9 and 11, and then the final Report; semi-annual reports will also be submitted in 2027.

Quarter 4. At this time, Training Module 1 for Disaster/Emergency Response (52 hours) will begin for Cohort 1, which we anticipate will be in Utuado because they have already begun planning for it. Module 1 units are as follows:

1-a Before, During & After an Emergency
1-b Incident Command per NIMS+ICS of Home land Security/ Div of FEMA (4 certifications) for ICS-100, ICS-200 and two electives to be selected by the group.
1-c Food storage and preparation
1-d Prep Emergency, Hiking +Survival Backpacks
1-e Water Purification Methods
1-f Prep shelters outside the comfort zone: Rural areas, Urban areas and Hostile areas
1-g Fire preparation outside traditional systems

The above units will start ~ July 13, 2024 and complete ~Oct. 16, 2024. The schedule is designed to offer longer training sessions, i.e., 4 or more hours on Saturdays and shorter training sessions, i.e., 2 hours, on Wednesday evenings.

Cohort 2 (Arecibo+Barceloneta) will begin on September 7 and complete on Nov 13, 2024.

Quarter 5. All participants have completed Module 1 Training for Disaster/Emergency Response (52 hours). CPR/AED will begin and complete in this quarter, with Utuado completing in October and Arecibo+Barceloneta completing in November.

Quarter 6. At this time, Training Module 2 for Disaster/Emergency Response (30 hours) will begin for Cohort 1- Utuado. Module 2 units are as follows:

2-a Imp of Communications, Systems, & Techniques
2-b Radio Frequency Communications
2-c Communications- Prep for Licensed Technician
2-d Examination Process-FCC Board of Examiners

The above units will start ~ January 18, 2025 and complete ~March 1, 2025. The sessions are all 4-6 hours and will be on 7 Saturdays and many participants will earn FCC certifications.

Cohort 2 (Arecibo+Barceloneta) will begin on March 8 and complete on April 19, 2025.

Quarter 7. All participants have completed Module 2 Training for Disaster/Emergency Response (30 hours). There will be a well-earned training break until Quarter 8 begins.

Quarter 8. At this time, Training Module 3 for Disaster/Emergency Response (22 hours) will begin for Cohort 1- Utuado. Module 3 units are as follows:

3-a Essential knowledge, Good Samaritan Law
3-b Essential Knowledge Hurricane
3-c Essential Knowledge Earthquake
3-d Essential Knowledge Tsunami
3-e Essential Knowledge Explosion

ED_016126_00001311-00011

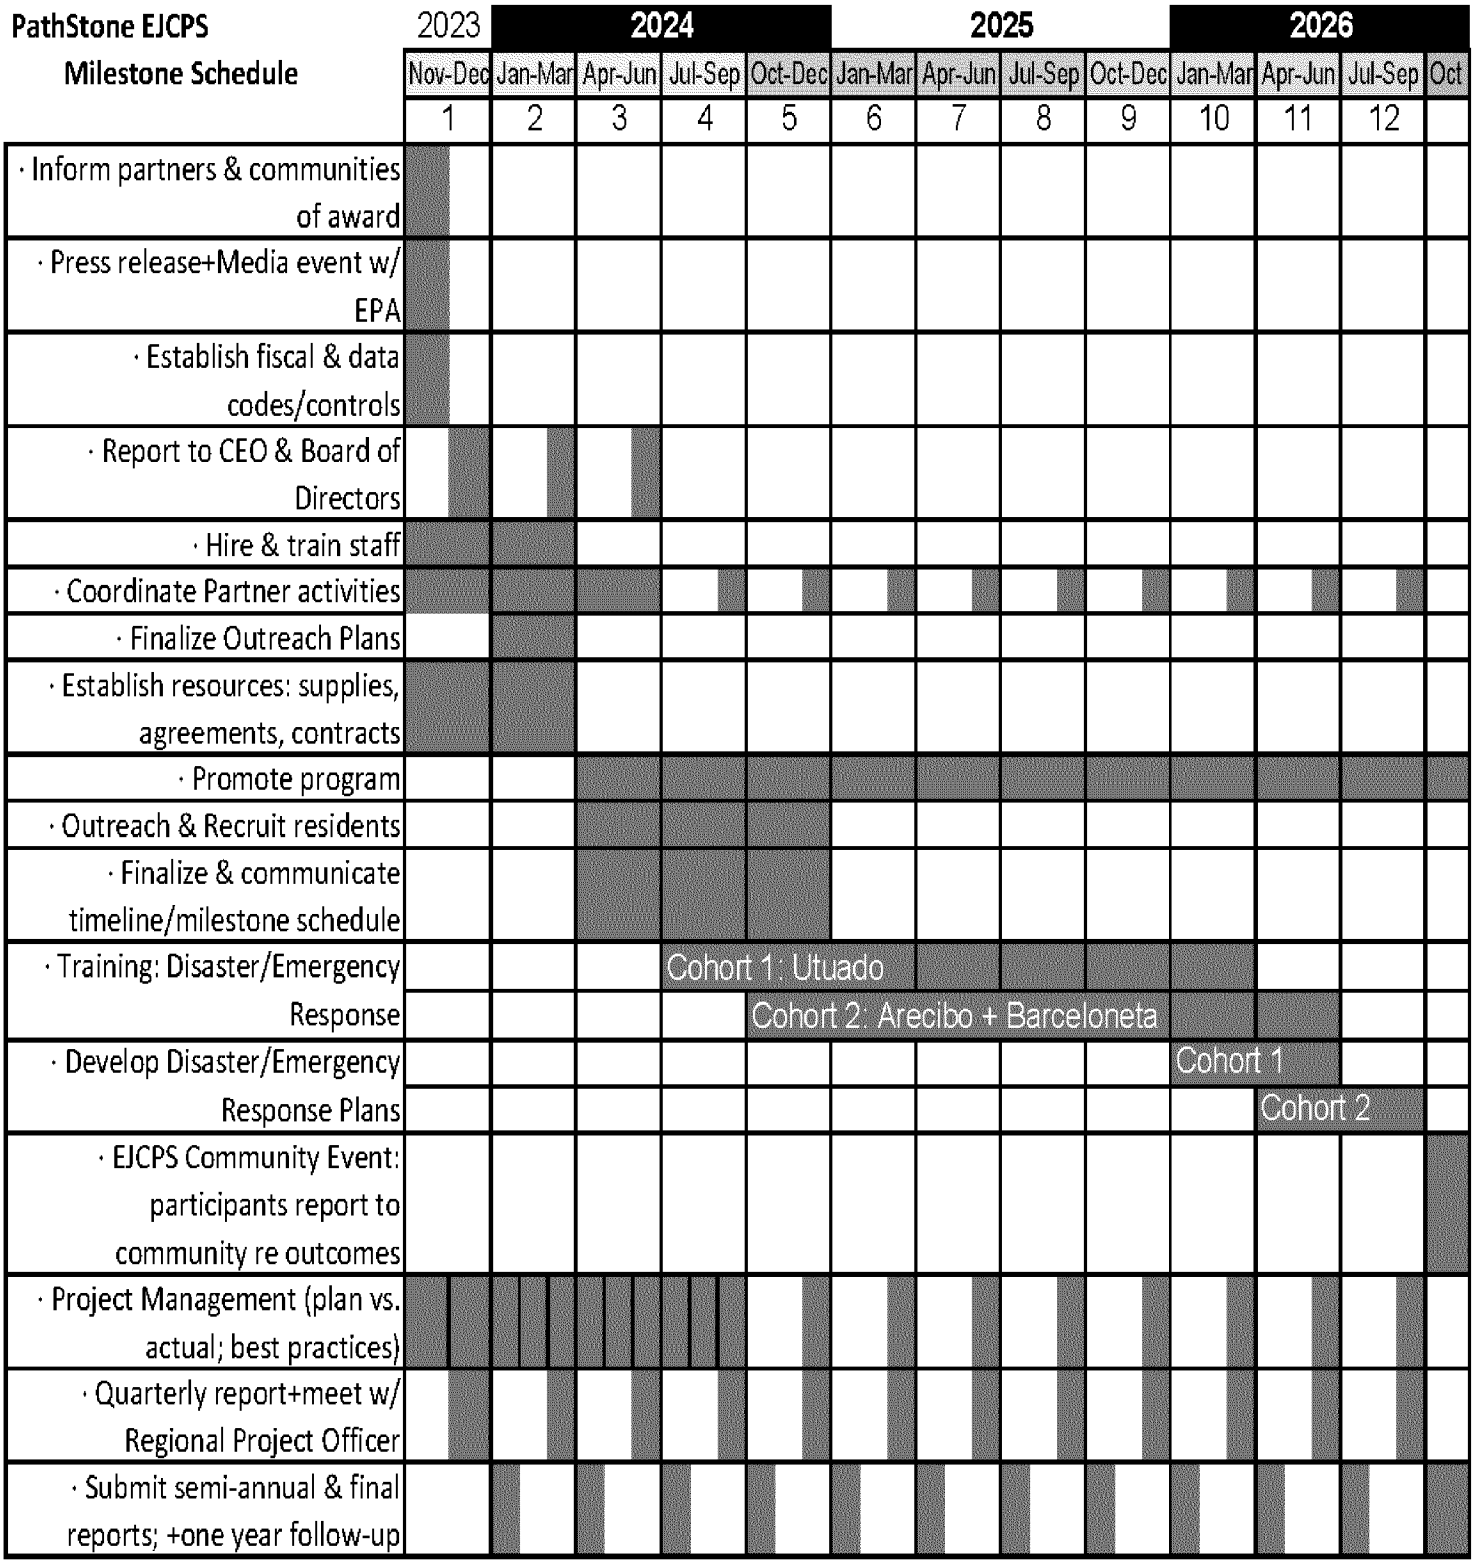
3-f Essential Knowledge Active Shooter
3-g Creation of Emergency Plans

The above units will start ~ July 9, 2025 and complete ~August 9, 2025. Five sessions (2 hours) will be on Wednesday evenings and the last two sessions (4 and 8 hours) and will be on Saturdays.

Cohort 2 (Arecibo+Barceloneta) will begin on August 13, 2025 and complete on September 20, 2025.

Quarter 9. All participants have completed Module 3 Training for Disaster/Emergency Response (22 hours).

If participants wish to review/retake sessions, peer groups will be facilitated in this quarter.



Quarters 10-11. At this time, participants will engage with Emergency Management to review/develop their Community Response Plans. Eighty hours is planned for this activity with Cohort 1 beginning on January 17, 2026 and completing June 20, 2026; and Cohort 2 beginning April 4, 2026 and completing September 15, 2026.

Upon completing the Community Response Plan, each cohort will plan a community event for October to share what they have learned and the Community Response Plan with their community and all partners.

October 2026. Community events for sharing learnings and Community Response Plans.

Also for celebrating accomplishments!

b. Milestone Schedule – Please see below.

PathStone EJCPS
Milestone Schedule
2023
2024
2025
2026

· Inform partners & communities of award
· Press release+Media event w/ EPA
· Establish fiscal & data codes/controls
· Report to CEO & Board of Directors
· Hire & train staff
· Coordinate Partner activities
· Finalize Outreach Plans
· Establish resources: supplies, agreements, contracts
· Promote program
· Outreach & Recruit residents
· Finalize & communicate timeline/milestone schedule
· Training: Disaster/Emergency Response
Cohort 1: Utuado
Cohort 2: Arecibo + Barceloneta
· Develop Disaster/Emergency Response Plans
Cohort 1
Cohort 2
· EJCPS Community Event: participants report to community re outcomes
· Project Management (plan vs. actual; best practices)
· Quarterly report+meet w/ Regional Project Officer
· Submit semi-annual & final reports; +one year follow-up

c. Itemized Budget Sheet / Budget Narrative – Please see Attachment i - per RFA instructions.

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

Please describe the following:

a. Environmental Results (Logic Model) – Please see Attachment per RFA instructions.

b. Performance Measurement Plan. PathStone's program and fiscal Performance Management was identified as a Best Practice— enhancing ability to conduct projects, meet requirements and exceed expectations—by the Technical Assistance Partnership's National High Performers Workgroup. All staff is required to enter all participant, service and outcome data (quantitative data) and integrated case management notes (qualitative data) into PathStone's web-based, secure Program Data System (PDS). PDS is a custom system built upon decades of expertise of program and PDS staff and developers. The PDS protects data with multiple levels of security. The existing Senior Director for Client Data Systems, Beatriz Arce (see resume attached), directly manages the PDS, is responsible for all quantitative reporting, and has 20+ years of successful reporting to federal and non-federal funders. Our data integrity, timely and reliable reporting, and responsiveness to requirements are proven quarterly in quality monitoring for USDOL by the Center for Social Policy Research. Staff ensures that PathStone's system captures all elements required for each program. PathStone's web-based tracking system successfully captures and reports the elements required by the program. Staff uses software and/or forms to determine eligibility and enroll participants. Supervisors and PDS staff reviews intake information before participants are served. Documentation substantiating data entered in the Client Data System is kept in client case files and required for payments for services. PathStone's Performance Management supports program integrity and accountability at all levels. Quarterly, the Board reviews agency performance via PathStone's Performance Dashboard. Individual work plans/IWPs tied to performance-based pay provide clear expectations for staff individually to insure program goals are collectively achieved. Project Director leads quarterly reviews with program and data staff; data is presented in a Plan versus Actual variance format; data and progress to plan and timeline are analyzed; Best Practices and innovation are modeled. EPA EJCPS project officer meetings are quarterly, with semi-annual and final reporting. Typically, internal reviews are established prior to the quarterly EPA reviews and to reporting deadlines. Partners are invited to internal quarterly reviews as needed to insure optimal service delivery. Program staff is provided a template and guidance for written qualitative reports for their progress on outcomes, which is paired with quantitative system data to produce PathStone's reports to funders, as well as to PathStone's Executive Staff and Board of Directors. Reports are submitted as directed; photographs of training sessions and other program activities are included if the reporting process permits. Qualitative impact is also assessed through the creation of a "Success Story" at program completion or significant milestones. These stories provide insight into program impact not captured in traditional reporting. Federal, state

ED_016126_00001311-00014

and other funders have repeatedly audited PathStone's program management and reporting systems, and determined they meet/exceed all requirements.

c. Sustainability Plan and Community Vision. During development discussions with communities, partners and training providers, the issue of sustainability has been central. Opportunities for expansion and continuance of this effort are already being explored, since the need is far greater than this program can address. Residents and community leaders are very enthusiastic about this topic, since they have continuing needs to mitigate disaster impacts and engage residents in resiliency efforts. Sources of support under exploration include traditional government funding; private foundations with interests in this area; plus innovative options such as the Social Innovation Fund that unite public and private resources to evaluate and grow community-based solutions. Many Island groups have part of the required sustainability action plan. Significant community coordination is needed to move beyond our existing Next Steps targeting PathStone's partner network and service focus to a more comprehensive strategy. Funding of this proposal would serve as a catalyst for that effort.

One of the goals communities expressed is to build the skills of the residents to increase self-sufficiency and understanding of actions to take before, during and after a disaster—that vision is directly addressed by this design. Working groups in these communities have identified needs and are moving to secure resources and address these needs. One expressed goal is to integrate residents with the Manejo de Emergencias/ Emergency Management to review and further develop community response plans and gain meaningful involvement in decisions directly affecting their communities. We recently received text messages from Gisela Rosario, Executive Director of Manejo de Emergencias, confirming her strong commitment to personally participate in this project, guaranteeing that this desired outcome will be achieved. Communications have been a problem for these communities and there is a module in this project to mitigate that issue. These communities have been very hard hit by natural disasters in the past five years and there is no question as to their vested interest – please see attached letters. Community leaders are very interested in the potential to attain Community Hub status to obtain/distribute resources and learning how to increase access to their communities for emergency services. Although solutions / results generated will be specific to these communities, they will certainly have replicability for other communities in Puerto Rico—and beyond, to other environmentally burdened rural communities.

4.0 Programmatic Capability

a. Ability to successfully implement the proposed project. The National Partnership for Environmental Technology Education/PETE has certified 24 PathStone lead trainers to deliver Disaster Site Worker, HAZWOPER and OSHA training. As noted previously, PathStone has provided Disaster training to 739 individuals in the past three years, with a total of 7,246.5 Contact hours. Following the devastating hurricanes (Maria, Fiona) and earthquakes in Puerto Rico,

ED_016126_00001311-00015

PathStone staff conducted Needs Assessments (shared with FEMA and others); assembled and delivered food, water and other necessary items; and helped re-build homes

PathStone has strong relationships in our target area—PathStone has a regional service site in Arecibo and is actively involved in community-building in Arecibo, Barceloneta and Utuado through membership in local civic and community groups, participating in charity events and providing a strong advocacy presence for those in need of a stronger voice. PathStone has been heavily engaged in resiliency, preparedness and rebuilding; and local needs assessment and emergency distributions; food, water, water filters, health & hygiene items, emergency generators, stoves, and solar lights. Staff has assisted individuals in obtaining health services, repairing homes and securing employment. In recent months, we have actively engaged community members in the development of this proposal through in-person meetings with 390 key partners, providers, area residents and stakeholders. We have assembled a diverse partner group to support this project.

PathStone has in place the management capacity to effectively operate this project. Brenda Soto Colón, Sr. VP of Direct Operations, is responsible for ME, NY, OH, VT and PR Operations. She has 15 years of experience successfully delivering programs in Puerto Rico and is responsible for fiscal administration of all grants and contracts; staffing patterns and service delivery structures; assignment of goals and objectives, linkage/partner development and all aspects of service delivery. Beatriz Arce has 20+ years of experience as Director for Client Data Systems/MIS, responsible for all MIS development, data collection, management and reporting. Ruperto Montero, CFO, provides Financial Management for PathStone Corporation with 19 years of experience in exceeding program requirements.

PathStone has demonstrated ability to successfully implement the proposed project with over 50 years of experience as a federal grantee, including many successful projects with US EPA, starting in 2015. We have established systems, policies and procedures and deep expertise in Puerto Rico, dated back to 1971. PathStone's structure consists of 4 Executive Staff reporting to the CEO and responsible for fiscal administration of grants/contracts, staffing patterns, management of personnel and locations, assignment of goals and objectives, linkage/partner development and all aspects of service delivery in their areas: 1) NY/ME/OH/VT/PR, 2) PA/NJ/DE/VA, 3) Housing and 4) Eco Dev. Our CFO/Finance and Sr. VP/Human Resources manage those functions agency-wide; staffing is 500. Staff are chosen for their connection to the population, communities, language and culture. PathStone was founded in 1969 to serve rural workers; today we provide health and education, training and employment, housing, and emergency and supportive services in eight states and PR. PathStone has successfully developed worker housing in OH, NY, NJ, PA and PR. Relevant experience includes successfully serving 1,800 rural workers annually through one program alone. PathStone has continuously operated successful rural programs since 1972, for USDOL, USDOE and state agencies.

b. Staff Experience / Qualifications of Project Manager. Mileidy Soto, Project Manager, has been operating US EPA projects since 2017 and has been recognized for exceeding goals in every cycle. Please see tables below and at Past Performance for examples of her successes.

Outcomes Summary US EPA 96253020	Goal	Achieved	% of Goal
• Completed HAZWOPER training / certification	55	66	120%
• Completed Pesticide Safety / EPA Worker Protection Std.	55	66	120%
• Completed OSHA 10 Safety training / certification	55	58	105%
• Completed Forklift Driver training / certification	55	65	118%
• Completed AED and CPR training / certification	55	66	120%
• Completed Commercial Driver's License with HazMat	10	15	150%
• Completed Asbestos Remed./Hazardous Matls Removal	4	4	100%
• Completed Lead Abatement /Hazardous Matls Removal	4	4	100%
• Obtained Full-time Employment	40	44	107%
• Entered Post-Secondary Credential Program	2	4	200%

Ms. Soto is fully certified/authorized in Disaster Training and Resiliency, and has operated projects in the target area for over a decade. She resides in the target area and was the Regional Administrator for that area prior to being promoted to Director Island-wide. Associated staff members are equally qualified by both industry certifications and experience for the project tasks (outreach, training, facilitation, partner management) and have deep experience of the target area. Please see attached resumes for specific qualifications.

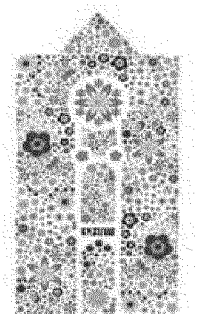
c. Expenditure of Awarded Grant Funds. PathStone's program and fiscal Performance Management was identified as a Best Practice— enhancing ability to conduct projects, meet requirements and exceed expectations—by the Technical Assistance Partnership's National High Performers Workgroup. PathStone's established administrative structure and system of internal controls ensure fiscal and reporting integrity; equitable, accurate cost allocation and the effective administration of all grants and contracts. Federal, state and other funders have repeatedly audited PathStone's financial management and reporting systems, and determined they meet/exceed all requirements. The Board requires an annual agency audit by a certified public accounting firm, and administration of uniform personnel, accounting and evaluation policies and procedures agency wide. Independent auditors have reviewed PathStone's program and fiscal management and reporting systems and found them capable of accurate tracking and timely reporting for Federal programs as well as providing necessary controls for compliance with Federal rules and regulations. PathStone financially manages grants and contracts via Abila Fund Accounting software, a secure, centralized, web-based system for multi-funded, non-profit agencies that enables a high degree of accountability for programs and activities. The Abila system produces a multi-level chart of accounts, extensive detail and summary reporting, and the ability to produce reports at all levels of activity. The system is managed by the CFO; finance staff receives on-going training and support through Abila Software webinars and conferences. OMB Circulars plus specific grantor regulations determine allowability, cost allocation and treatment of costs. Financial monitoring is a coordinated effort of Accounting and Program Management; all payment requests are approved at multiple levels. Budgets are required and monthly variance reports are issued. Direct Services has a Program Analyst who tracks and

reviews spending, and produces fiscal projections per program timeline for program staff review. The Finance Committee of PathStone's Board conducts quarterly reviews. Cash drawn is determined from program-specific cash disbursement reports. Annually, financial systems and internal controls are extensively evaluated via the CPA audit, OMB audit, and 50 independent audits by federal, state and private grantors.

5.0 Past Performance

Below is a list of federally funded assistance agreements completed in the last three years.

Grant #	Project Period	Funds Expended	# Participants Trained/ Achieved Certification	# Participants Placed	% placed in full time employment
US EPA 96268117 completed	07/01/2017 - 06/30/2020	$199,010 (100%)	58 109% of goal	51 128% of goal	93% Goal = 72.7%
US EPA 96253020 completed	01/01/2020 - 12/31/2022	$200,000 (100%)	66 120% of goal	*44* 107% of goal	90% Goal = 72.7%
Ex. 6 Personal Privacy (PP)	07/01/2016 - 06/30/2020	$1,000,000 (100%)	113 151% of goal	85 113% of goal	*66% Goal = 60%*
Ex. 6 Personal Privacy (PP)	07/01/2021 - 09/30/2022	*100%*	71%	161	*88.5%*



i. PathStone utilized its performance management and fiscal management processes previously described to successfully complete and manage the above agreements.

ii. PathStone met all reporting requirements under the above agreements including adequately and timely reporting on your progress towards achieving the expected outputs and outcomes of those agreements and submission of acceptable final technical reports under the agreements.

PathStone would like to note that our staff is to be commended for attaining the results noted above during a pandemic on an Island besieged by devastating hurricanes. Our staff engaged many community members and partners in these efforts and the positive impact on these communities of these successes far exceeds the numbers trained and placed—it is both a demonstration and testimonial to individual and community resilience—including our staff.

6.0 Quality Assurance Project Plan (QAPP) Information (If applicable)

Based on our analysis using the Checklist in Appendix F, an approved Quality Assurance Project Plan will not be required for this project.

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. We determined that you are a public charity under the Code section(s) listed in the heading of this letter.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 0.5 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Sixth Street Community Center, Inc.

Address: 638 East 6 Street

City: New York

State: New York Zip Code: 10009

B. Unique Entity Identifier (UEI): YNLVJT1234M5

C. Applicant/Recipient Point of Contact

Name: Anna Tsomo Leidecker Phone: Ex. 6 - Personal Privacy (PP) Email: anna@sixthstreetcenter.org

Title: Project Manager

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ■ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints, unless covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination under federal law based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints, unless covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ■ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ■ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ■ Yes ☐ No

b. Is the notice posted in a prominent place on the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ■ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ■ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. 563 (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

Jen Chantrtanapichate, Deputy Director, Sixth Street Community Center, 638 East 6 Street, New York, NY 10009 jen@sixthstreetcenter.org [redacted]

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

Yes

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
[signature]	Executive Director	April 13, 2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

EPA KEY CONTACTS FORM

OMB Control No. 2030-0020
Approval expires 06/30/2024

This collection of information is approved by OMB under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. (OMB Control No. 2030-0020). Responses to this collection of information are required to obtain an assistance agreement (40 CFR Part 30, 40 CFR Part 31, and 40 CFR Part 33 for awards made prior to December 26, 2014, and 2 CFR 200, 2 CFR 1500, and 40 CFR Part 33 for awards made after December 26, 2014). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The public reporting and recordkeeping burden for this collection of information is estimated to be 0.5 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates and any suggested methods for minimizing respondent burden to the Regulatory Support Division Director, U.S. Environmental Protection Agency (2821T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.

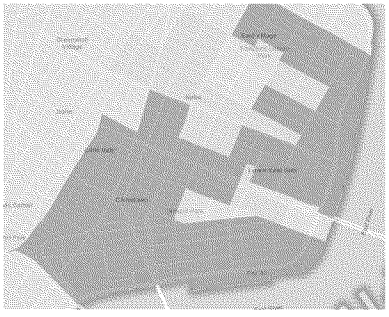
1.0 Program Objectives

1a. Project Summary Page

- **Project Title: SSCC Citizen Science for Environmental Health & Climate Resiliency in the Lower East Side**
  - **Project Location:** Losaidia/LES (the Lower East Side), Manhattan, New York City, 10009
  - **Applicant Information:** Sixth Street Community Center, 638 E 6th St, Manhattan, NY, Ex. 6 Personal Privacy (PP)
  - **Primary Contact:** Anna Tsomo Leidecker, Ex. 6 - Personal Privacy (PP) anna@sixthstreetcenter.org
  - **UEI #:** YNLVJT1234M5*
- **Brief Description of Applicant Organization:** SSCC is a community-based not-for-profit organization founded in 1978 and committed to advancing social, environmental, housing, economic and racial justice in the East Village and Lower East Side community. We believe that people of all backgrounds and incomes in New York City have the right to a safe, clean, and healthy environment and have their basic needs met with dignity and respect. Our mission is to provide emergency services, expand food access, empower our youth, and support community organizing.
- **Set-Aside:** Small CBO Set Aside Track for $150,000
- **Project Abstract:** The Lower East Side community exists at the intersection of unhealthy air quality and flood vulnerability, and SSCC is well positioned to fight for local climate resiliency and environmental health. This project will expand the capacity of our existing Teen Climate Justice Program (TCJP) as well as our climate organizing initiatives, to conduct air quality monitoring, flood sensing, and public engagement with citizen science. Our goal is to empower community members through citizen science to make data-backed recommendations for a healthier, more climate resilient community. We hope to leverage this information for political decision making that will protect LES by utilizing a strong base of engaged students and community members. If granted funding through the EPA's EJCPS, SSCC and our community partners will host 8-10 public workshops for community learning on local climate impacts, air quality monitoring, flood sensing, and data analysis. Four or more engaged program participants will be identified to undergo training as Community Facilitators in the workshop curriculum, to assist with future workshops and cultivate more local subject matter experts on climate resilience and citizen science for future needs in the community. Further goals are to install 1 air quality monitor and 1 flood sensor on site at SSCC, install 2-4 additional stationary air quality monitors in neighboring locations, install 1-2 additional flood sensors in neighboring locations, and obtain and use 5-8 handheld air quality monitors for data collection.
- **Project Types:** Air Quality, Emergency Preparedness and Disaster Resiliency, Youth Development related to Environmental Justice
- **Special Considerations:** Project addresses Climate Change, Disaster Resiliency, and/or Emergency Preparedness
- **Environmental Issue:** Air quality, Flooding
- **Project Partners:**
  •CUNY Advanced Science Research Center: Kendra Krueger, Outreach & Education Director
  •LES Breathe: Wendy Brawer and Mary Jo Burke, Co-Founders
  •El Jardin Del Paraiso, JK Canepa, Steering Committee Member
  •FloodNet NYC, Véronëque Ignace, Community Engagement Manager
  •Mount Sinai, Dr. Pendley, PhD, MPH, Dept. of Environmental Medicine and Public Health
  •State Assembly Member Harvey Epstein
- **Need to develop a QAPP:** Yes

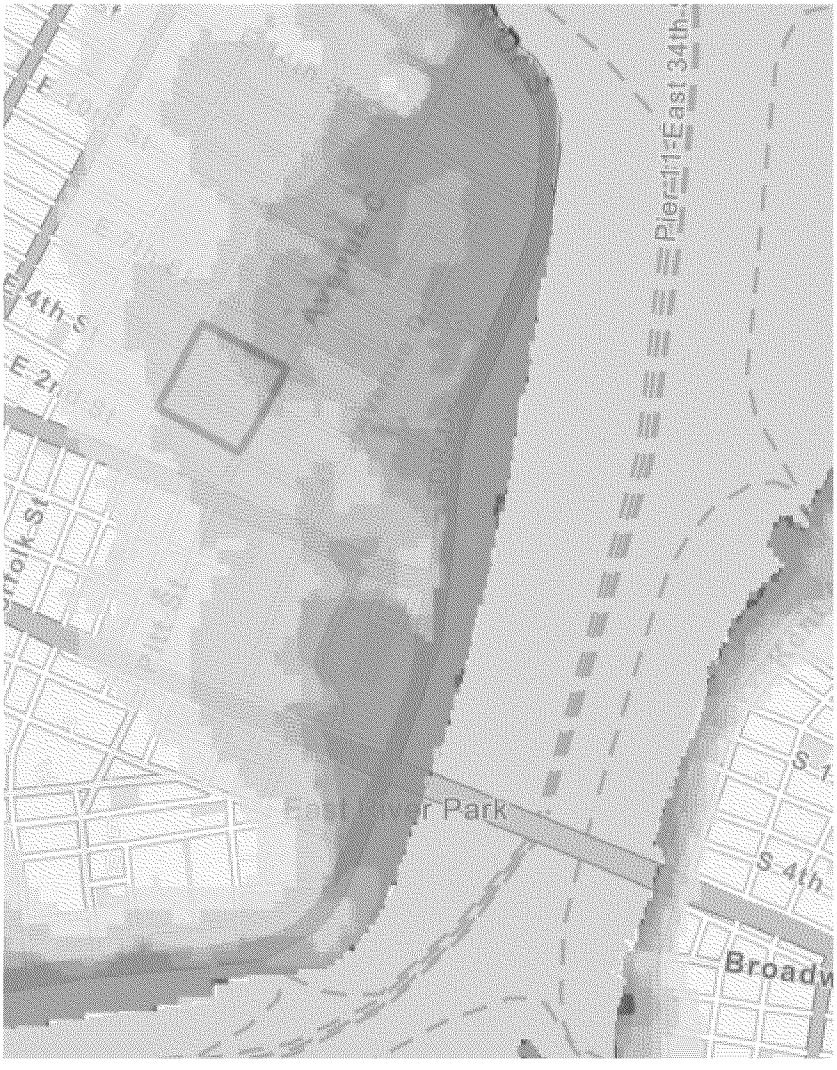


*At the time of submission, SSCC's UEI # was inactive; via communications with FSD.gov and EPA representative Mr. Jacob Burney, SSCC was permitted to submit outside of the Grants.gov portal.

1.b Environmental and Public Health information of the Underserved Community

Sixth Street Community Center (SSCC) is located in an DEC-designated Environmental Justice area. The six-block radius of our "EJ Zone" alone houses a population of 3,675, with 75.6% identifying as racial minorities, and 27.2% living below the poverty line. Large swaths of the Lower East Side and Chinatown are EJ areas, making it the only large collection of EJ areas in Manhattan located south of East 96th Street. The air quality of communities near FDR Drive are particularly of interest, and these localities are designated as EJ areas stretching from East 14th Street down to Delancy Street, and from Center Street to the south bend of FDR Drive.

Map and map detail of Environmental Justice designated area surrounding SSCC, from NYC Department of Health and Mental Hygiene, *https://nycdohmh.maps.arcgis.com/*



According to the EPA's EJScreen Tool, the block housing SSCC faces some of **the worst air quality and environmental pollution in the United States, as well as a high proportion of vulnerable groups**:

ENVIRONMENTAL HAZARD	Percentile in US	Percentile in NYS
Air toxics cancer risk	95-100th %	99 %
Air toxics respiratory hazardLo index	95-100th %	97 %
Diesel particulate matter	95-100th %	94 %
Hazardous waste proximity	99 %	99 %
Wastewater discharge indicators	97 %	95 %
Superfund proximity	95 %	88 %
Underground storage tank indicator	94 %	82 %
Traffic proximity and volume	91 %	87 %
Ozone	76 %	69 %
Particulate Matter 2.5	68 %	92 %

SOCIOECONOMIC / HEALTH INDICATOR	Percentile in US	Percentile in NYS
People of Color	83 %	76 %
Low Income	72 %	77 %

Limited English Speaking	78 %	66 %
Less Than HS Education	89 %	88 %
Low Life Expectancy	68 %	86 %
Asthma	80-90 %	*Data Not Available*

It is imperative to note that while this data represents only the 3-block radius where SSCC is located (E 6h Street to E 2nd Street between Avenue B and Avenue C), the data just one block East past Avenue D becomes even more stark as it approaches the FDR Drive. For example, E 6th Street and Avenue D are in **the 95 percentile for Coronary Heart Disease, and the 95 percentile for Adult Asthma nationally.** The same location is in **the 97 percentile for Low Income, 94 percentile for People of Color, 97 percentile for Limited English Speaking, 98 percentile for Less Than HS Education.** Many blocks in LES are also affected by medical underservice and gaps in broadband internet service. SSCC is flanked by similar statistics on the South and North sides. As is demonstrated by this data, the wider LES community is clearly rightfully designated by the NYS DEC as an Environmental Justice community, with shockingly high exposure to pollutants as well as high rates of environmentally-linked diseases and a majority population of vulnerable communities.

Map sourced from EPA's EJScreen Tool

As pictured, SSCC is located in a Level 5 Coastal Flood Hazard area, as are large swaths of the Lower East Side. This was experienced first hand by thousands of residents who were harmed by the impacts of Superstorm Sandy.

1.c Organization's Historical Connection to Underserved Community

In 1978, a group of single mothers living on East 6th Street between Avenues B and C formed a block association. Exhausted by the decrepit condition of their neighborhood where they were struggling to raise their children and improve their environmental conditions, they actively envisioned that through joint effort they could foster positive change for their community. After years of grassroots organizing and fundraising, the block association was able to purchase and revive the abandoned synagogue to become a center for the people.

Since its inception, SSCC has fostered economic and community development through a variety of programs including after school and summer programs, tenants rights and entitlement advocacy, and life skills and career development for teens and adults. As early as 1996, SSCC initiated projects that brought youth and community residents together around issues of sustainable urban living, sustainable agriculture, environmental advocacy, health and nutrition through our CSA, Youth-in-Agriculture, and SOS Food Programs.

In 2012, LES was one of the most impacted communities by Superstorm Sandy. SSCC is located near some of the largest stock of NYCHA buildings in NYC, and following the storm, many residents were left without electricity. Although many other community-based organizations were shut down during Sandy, SSCC opened the doors to the local community, simultaneously managing the flood damage to the building's basement. Over two thousand households benefitted from the emergency resources SSCC provided: food, water, clothing, toiletries, diapers, batteries, and other essentials as well as outlets to charge phones to contact loved ones; all given free of charge to any community member in need. Over two hundred volunteers converged at SSCC, as it emerged as a cornerstone for LES disaster relief. Additionally, SSCC Staff executed house runs to drop off supplies to house-bound families, as people could not leave their homes until power returned to elevator systems. SSCC Deputy Director Jen Chantrtanapichate recalls walking up 14 flights of stairs, carrying food to deliver to a community member who was home-bound because of disability without elevator service. Eleven years after the damage from Superstorm Sandy, the LES is still left without flood protection. After demolition began on East River Park in 2021, the neighborhood is at an increased risk until at least 2025, when reconstruction is projected to be complete. Now left without the greenspace that acted as an absorptive barrier, mitigating the flooding during Superstorm Sandy, the community is at an increased vulnerability level to storm surges. The community is aware of the impacts of climate change and flooding through their lived experiences, but have been left without tools and information to demand the protections they deserve.

In response to growing food insecurity in the Lower East Side due to the COVID 19 pandemic, SSCC organized and launched a weekly free food distribution program. Since April 2020, SSCC has served nearly 500 families weekly, distributing over 36,000 bags/boxes of fresh produce, fruits and food. For the first year of the pandemic, the food was provided in partnership with other organizations such as City Harvest, Beam Living, EV Loves NYC and much of the fresh produce provided by our own Community Supported Agriculture (CSA) program which

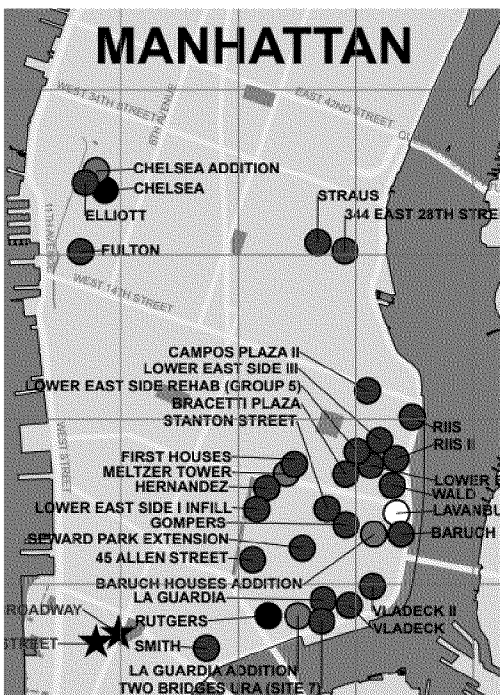
offers organic produce sourced from Hepworth Farms in the Hudson Valley. By the summer of 2021, Federal support and local resources dried up but food insecurity experienced by our families was still a stark reality. Using funds donated by our Sixth Street neighbors, friends and volunteers, SSCC pivoted to buying food from wholesale produce distributors, with a partnership with Tay Shing/Purveye'd Corporation to provide culturally sensitive produce for the majority East Asian immigrant population being served. The food distribution program has continued into 2023 with monthly distributions serving over 90-120 families per month.

More recently, SSCC staff has actively organized with a broad array of climate justice campaigns and coalitions such as the No North Brooklyn Pipeline Alliance, Public Power, NY Renews, Save East River Park, Transform Don't Trash, and more. Much of SSCC climate justice organizing already is in line with the Clean Air Act, such as air quality monitoring workshops facilitated by LES Breathe, and advocating for community-informed coastal resiliency with the Save East River Park movement. Through the latter, SSCC has facilitated engagement with the local community, educating residents on local climate justice issues such as air pollution from the FDR Drive and flood vulnerability. LES Breathe has already installed two PurpleAir Quality Monitors in the LES as a way to collect data to advocate for the protection of East River Park, and will function as one of the key community partners for this project. Through this proposal, SSCC aims to expand on the existing groundwork by meaningfully engaging the community through workshops on climate risk, air quality monitoring and flood sensing, and empowering local communities to impact change.

1.d EJCPS (EJ Collaborative Problem Solving) Model

1 - Issue Identification, Community Vision, and Strategic Goal Setting: Through the collective lived experience of the LES community being impacted by Superstorm Sandy, there is clear and well established identification of flood vulnerability as a local issue. Similarly, many local community groups in LES have formed from a concern about the air pollution issues detailed in Section 1.B, Environmental and Public Health Information of the Underserved Community, including proposed community partners LES breathe and the Loisaida Center Ecolibrium project. This proposal provides an answer to local community members who have climate concerns, but don't have access to resources or information to advocate for change. Through the Save East River Park movement, LES community members collaborated to create a community-led plan for coastal resiliency, highlighting the need for flood protections that also continue to serve the needs of the community for open green space. While the previous city administration ultimately chose its East Side Coastal Resiliency Project over the earlier HUD-funded community plan, SSCC has continued to tap into the active base of concerned community members who have a vested interest in local flood resilience. SSCC Deputy Director, Jen Chantrtanapichate, will continue to utilize her Masters in Urban Planning and Bachelors in Urban Studies, to support active community participation in the roll out of this project. SSCC Staff will enact this program towards the goals of healthy, breathable air, and local infrastructure for flood resilience. Utilizing best practices from community organizing strategies, facilitators will encourage workshop participation via listening to the concerns of community members, and linking their lived experiences back to the issues of air quality and flood risk. Curriculum for

workshops will include space for community members to share their thoughts, experiences, and opinions about how air pollution, flooding, or environmental factors impact their lives and the LES community. Workshops will be facilitated with a key emphasis on participants co-leading the conversation with ample time for sharing questions, experiences, and co-creation of group priorities.



2 - Community Capacity Building and Leadership Development: A crucial leadership development component of the proposal consists of identifying four community members who demonstrate high engagement with public workshops, to be trained as Community Facilitators for future utilization of workshop curriculum. Two Air Quality Community Facilitators will be trained on curriculum Units 1-5, and two Flood Sensor Community Facilitators will be trained on curriculum Units 1-2 and 6-8. These Community Facilitators will receive a stipend to support their training, and go on to facilitate workshops with future cohorts of the TCJP, as well as any community groups who may benefit from the curriculum. By identifying these leaders, the impact of this proposal has the capacity to outlast the year-long grant term, as individuals embedded in the LES community will be equipped with information and training to train others. Moreover, this program plans to increase the capacity of all workshop participants to engage with local issues of air quality and flood vulnerability by directly providing the technology needed to gather air quality data and sense flooding. After providing those resources, the program ensures that the technology can be utilized in an accessible way through a multi-step community engagement process, from local on-the-ground outreach efforts to recruit participants and public interest, to hands-on educational workshops providing both information about how air pollution and flooding impact the LES as well as how to gather and analyze data about those issues. After a community member participates in a training session, the aim is that they will be able to use a handheld air quality monitoring system to gather local data in collaboration with a supporting SSCC staff member. SSCC hopes to see community member interest in advocacy utilizing data collected first-hand, and aims to leverage organizational political relationships to fight for the community's interest. High school students in the Teen Climate Justice Program will complete outreach training in advance of the public workshops, to help gather interest from the local community by synthesizing key information about LES climate vulnerability and presenting it as a justice issue. Teens will have hands-on experience with the handheld air quality monitors, and learn how to collect and track data from the stationary air quality monitors and flood sensors.

4 - Multi-Stakeholder Partnerships and Leveraging of Resources: One of the primary partners for this proposal is the CUNY Community Sensor Lab, a public university based organization that works with high school students and community members to build low-cost, DIY environmental monitoring sensors, building technical skills in electronics and programming and also growing confidence in self-advocacy through data literacy, analysis and presentation. Through utilizing the expertise Kendra Krueger has in teaching citizen science with specific emphasis on air quality monitors, CUNY Community Sensor Lab can bring forward accessible scientific information to share with the LES community. CUNY Community Sensor Lab has curriculum and materials available for lessons on building low-cost air quality sensors, as well as a comprehensive existing curriculum units introducing citizen science, climate science, and air quality. LES Breathe co-founders Wendy Brawer and Mary Jo Burke have installed multiple existing PurpleAir stationary air quality monitors located in LES, which connect to a public database, as well as held educational workshops with high school students on the topics.

Utilizing this existing resource, there is a baseline of data available for LES community members and SSCC staff to compare and contribute newly collected data against our stationary and handheld air quality monitors. LES Breathe's experience with monitor installations and interpretation of data will support this project. Additionally, LES Breathe has critical experience leveraging citizen science data for public advocacy campaigns to foster climate resilience in LES. El Jardin del Paradiso is an environmental awareness and educational community park located just two blocks from SSCC, and has been a key community gathering space since the opening in 1981, making it an ideal location for holding workshops and data collection sessions. FloodNet NYC has expertise in locating, installing, and maintaining flood sensors, as well as collecting and interpreting flood data, which is invaluable information for consultation with the SSCC Staff and partners team. FloodNet has an existing community outreach curriculum in development, which can be used as a source for key information in curriculum units pertaining to flooding. Mount Sinai as a community partner will leverage their public health expertise and provide support on evaluation measures. State Assembly Member Harvey Epstein will provide any expertise needed on legislative processes and civic engagement.

1.e Project Linkages

Map of local NYCHA developments, sourced from nychamap.pdf

As designated by the Department of Environmental Conservation, SSCC is located in the heart of an "Environmental Justice Community," surrounded by a cluster of neighborhoods with the same designation. LES has suffered both inequitable impacts from Superstorm Sandy, as well as inequitable access to recovery from such climate disasters. LES is among the most highly air polluted locations in the United States, compounded by proximity to a Con Edison facility, the FDR Drive highway, and now at increased vulnerability to flooding from the reconstruction of East River Park removing a crucial barrier between the waterline and residential buildings that mitigated storm surges such as Superstorm Sandy. According to the EPA's EJScreen Tool, LES populations are 83-94% People of Color and 72-97% Low Income. LES is home to one of the largest stocks of NYCHA public housing buildings in New York City, with residents often particularly vulnerable to environmental pollutants and climate risks, as well as a lack of sufficient resources to recover from flooding events or which cause molding and indoor air pollution. This project promotes Environmental Justice and Civil Rights through providing access to environmental monitoring technology, as well as providing access to skill-based training and information on local climate risks, climate resiliency, air quality monitoring, flood sensing, and data analysis. LES contains marginalized demographics and is overburdened with environmental risk and pollution, placing it as a key location for access to citizen science as a tool for climate justice and environmental health. If awarded the EJCPS grant, this program will

increase the capacity of the LES community to advocate for policies, projects, and campaigns that promote environmental health, particularly by collecting environmental data and empowering community members with skills, technology, and information.

1.f Partner and Collaborate

Community Partner	Role/Activities	Type	Stakeholder Group	Resources and Expertise
LES Breathe	Workshop development, workshop facilitation, air quality monitor installation assistance, data analysis, and training for SSCC staff.	CBO	LES residents, environmental advocates, citizen scientists	Local environmental knowledge, expertise on utilizing data for political advocacy, environmental data analysis and presentation experience, community facilitation experience, database of local air quality, existing stationary air monitors
CUNY Sensor Lab	Workshop development, workshop facilitation, grant proposal writing input, air quality monitor and flood sensor technological support, data analysis, and training for SSCC staff.	University (CUNY)	Scientists, environmental educators	Technical knowledge of installation and use of air quality monitors and flood sensors, existing curriculum units on citizen science and air quality, data analysis and presentation expertise, community facilitation on environmental science expertise.
El Jardin	Location for installation of stationary air quality monitor and flood sensor, outdoor workshop host site	Community Garden	LES residents, community garden members,	Strong base of community members and local residents, greenspace location for siting air quality monitor and flood sensor, expertise in hosting local community events.
FloodNet NYC	Workshop development and implementation, training for SSCC staff, utilizing FloodNet's strategic plan for flood sensor siting	University (NYU + CUNY Brooklyn College)	Scientists, environmental educators	Technical knowledge of flood sensors, database of city-wide flood information
Mount Sinai	Training for SSCC staff, public health data	Hospital	Researchers, physicians	Public health resources, environmental medicine, evaluation and assessment tools
Assembly Member Harvey Epstein	Political support, open workshops for constituents	State Legislator	Elected officials	Legislative processes, civic engagement

SSCC has been fortunate to hold deep ties to all of the community partners in this proposal. El Jardin has been involved with SSCC since both were founded; in particular, our Executive Director was instrumental in the opening of El Jardin and lives next door. Recently, El Jardin serves as a host space for events such as SSCC Community Land Trust meetings, workshops with the TCJP as well as the Youth Program, and more. El Jardin, since 1981, has

served as a resource for environmental education in LES and is dedicated to the health, safety, and agency of the community.

SSCC and LES Breathe worked closely together in advocating for the community plan to redevelop East River Park, and has co-facilitated two workshops on air quality monitoring with a cohort of high schoolers from the TCJP. LES Breathe was formed by residents out of a concern for indoor and outdoor air quality in LES.

CUNY Sensor Lab has come to facilitate hands-on workshops with multiple TCJP cohorts, and Outreach and Educator Director Kendra Kruger also serves on the SSCC board. Similarly, FloodNet works closely with Ms. Kruger on the design aspects of flood sensors, and SSCC is eager to further our partnership. These organizations are committed to protecting the environmental health and furthering the climate resilience of New Yorkers.

Mount Sinai has supported SSCC via a grant for a Community-Based Food Security, Access, and Nutrition Project. That includes measures of programmatic data collection, and deriving quantitative measures to assess effectiveness.

State Assembly Member Harvey Epstein has funded SSCC's Youth Program since 2021, and has supported the Climate Organizing SSCC staff advocates for, specifically with emphasis on renewable energy and climate justice legislation, such as the NY Build Public Renewables Act and the Climate, Jobs, and Justice Package. SSCC has invited AM Epstein to speak with high schoolers from the TCJP about climate priorities and the legislative process.

For all partners, SSCC plans to continue to work together for future environmental health and climate resiliency projects, such as collaborations with SSCC's TCJP, Youth Program, and Climate Organizer.

2.0 PROJECT ACTIVITIES / MILESTONE SCHEDULE

2a. Project Activities

- **Increase SSCC Staff Capacity**: Hire and onboard Project Manager, increase the hours of the TCJP Program Director by 8 hours per week, increase the hours of the Climate Organizer by 8 hours per week. Increasing staff capacity will result in ensuring successful management of the program, via community partners training SSCC staff on their topics of expertise, and will cover administrative needs such as developing the QAPP.
- **Develop Curriculum**: SSCC Staff and community partners will collaborate to develop 8 curriculum units for public community workshops. Workshop units may be reformatted or expanded depending on the amount of information and community priority given to each sub-topic, especially from workshop participant feedback. Developing the curriculum will ensure the quality of content in community workshops. Planned workshop units entail:
    - Unit 1: "Introduction to Climate Impacts in LES
    - Unit 2: "Climate Resilience, Barriers, and Solutions"

    - Unit 3: “Air Quality Monitoring 101”
    - Unit 4: “Air Quality Data Collection Field Work”
    - Unit 5: “Local Air Quality Data Analysis”
    - Unit 6: “Flood Sensors 101”
    - Unit 7: “Flood Sensor Data Collection Field Session”
    - Unit 8: “Local Flood Data Analysis”
- **Install Air Quality Monitors and Flood Sensors:** SSCC Staff and community partners will work together to install 1 stationary air quality monitor and 1 flood sensor on site at SSCC, and at El Jardin Del Paraiso. SSCC Staff will obtain 5-8 handheld air quality monitors for community and TCJP use. Scientific information and community input will be considered in choosing additional locations for the remaining flood sensor and air quality monitors.
- **Outreach for Workshop Participation:** SSCC Staff, TCJP students, and community partners will work together to promote awareness and buy-in for community workshops. SSCC, LES Breathe, El Jardin, and other local organizations SSCC has relationships with will send out information via mailing lists. TCJP students will be trained in canvassing and outreach skills, develop a fluency in speaking about local climate justice issues, and participate in on-the-ground outreach efforts alongside SSCC staff and volunteers. This outreach will result in 10-20 workshop participants for each curriculum unit.
- **Host Workshops:** SSCC Staff and community partners will host workshops on site at SSCC and at El Jardin as weather permits. Workshops will be formatted in sections, including open discussion following prompts about local climate impacts and experiences, presentation information sharing on science, data tools, and technology skills, and some sessions will be centered on active data collection from air quality monitors and flood sensors. Workshops will offer a meal for participants to incentivize participation and lessen the daily needs of those opting in to commit their time to the workshops.
    - Workshops may close with collecting feedback from participants on what information they retained, using informal discussion or a tool such as Kahoot or Google forms, as well as overall workshop feedback on facilitation, accessibility of information, food, and timing.
    - During the grant period, SSCC Staff and community partners will identify highly engaged community participants to become Community Facilitators, who will be offered a stipend for further training in workshop facilitation. There will be two stipends available for facilitators on Units 1-5 on air quality monitoring, and two stipends available for facilitators on Units 1-2 and 6-8 on flood sensing. (Per EPA guidance, stipends are provided for under “Participant Support Costs” in the proposed budget.) The technology, databases, and SSCC space will remain accessible to these Community Facilitators past the completion of the one year grant term, if they choose to hold additional workshops.
    - Workshops will result in participants ability to:
        - Vocalize the unique climate vulnerability and air quality issues of LES
        - Access and interpret open/public data sets on air quality and flooding such as OpenAq and FloodNet
        - Identify trends and hazardous conditions from data sets
        - Gain familiarity with new and emerging technology for climate monitoring, such as a handheld Atmotube air quality monitor

- **Collect and Present Environmental Data:** Environmental data collected throughout the

grant term, particularly through the TCJP summer intensive sessions in July and August, will be presented in a public format for community members, TCJP families, and local elected officials. Data will be accessible for wider community use, and a conversation will be opened during these community forums about what solutions the community sees fit for LES, and what steps should be taken to begin advocacy work.

2b. Milestone Schedule

MONTH	MILESTONES
October 2023 **Project start date: October 1st, 2023.*	• Onboard Project Manager, increase Teen Climate Justice Program Director and Climate Organizer hours for project focus • Begin QAPP • Receive disbursement of funds from EPA • Install stationary air quality monitor at SSCC; begin data collection • Acquire flood sensor components • Purchase handheld air quality monitors
November 2023	• Establish schedule for consistent curriculum development meetings with project partners • Develop Unit 1: "Introduction to Climate Impacts in LES" • Complete and submit QAPP, if needed • Begin training 2023-2024 cohort of Teen Climate Justice Program students on public outreach • Install air quality monitor at neighboring location
December 2023	• Develop Unit 2: "Climate Resilience, Barriers, and Solutions" • Conduct robust public outreach through SSCC mailing lists and events, partner mailing lists and events, "elevator pitches" at local community board or other meetings, and flyering. • Train Teen Climate Justice Program students in Unit 1: "Introduction to Climate Impacts in LES" • Install flood monitor on site at SSCC, begin data collection
January 2024	• Hold in-person (or hybrid, in accordance NYC recommended with COVID-19 safety measures) public workshop, utilizing Unit 1: "Climate Change in LES" ○ If public interest exceeds 30 community member participants, hold an additional workshop for Unit 1, offering in-person or hybrid options. • Collect feedback from Teen Climate Justice Program students and community members about Unit 1 curriculum accessibility, relevance, and quality. • Develop Unit 3: "Air Quality Monitoring 101"
February 2024	• Hold in-person or hybrid public workshops, utilizing Unit 2: "Climate Resilience, Barriers, and Solutions" ○ Hold an additional workshop for Unit 2 if participation demand is present.

	• Continue robust public outreach efforts. • Collect feedback from TCJP students and community members about Unit 2 curriculum accessibility, relevance, and quality. • Develop Unit 4: “Air Quality Data Collection Field Work”
March 2024	• Hold in-person or hybrid public workshop, utilizing Unit 3: “Air Quality Monitoring 101” ○ Hold an additional workshop for Unit 3 if participation demand is present. • Continue robust public outreach efforts. • Collect feedback from TCJP students and community members about Unit 3 curriculum accessibility, relevance, and quality. • Develop Unit 5: “Local Air Quality Data Analysis”
April 2024	• Hold in-person or hybrid public workshop, utilizing Unit 4: “Air Quality Data Collection Field Work” ○ Hold an additional workshop for Unit 4 if participation demand is present. • Continue robust public outreach efforts. • Collect feedback from TCJP students and community members about Unit 4 curriculum accessibility, relevance, and quality. • Develop Unit 6: “Flood Sensors 101” • Install stationary air quality monitor at neighboring location
May 2024	• Hold in-person or hybrid public workshop, utilizing Unit 5: “Local Air Quality Data Analysis” ○ Hold an additional workshop for Unit 5 if participation demand is present. • Continue robust public outreach efforts. • Collect feedback from TCJP students and community members about Unit 5 curriculum accessibility, relevance, and quality. • Develop Unit 7: “Flood Sensor Data Collection Field Session”
June 2024	• Onboard key engaged community members as TCJP facilitators for Units 1-5. • Conduct robust public outreach efforts for engagement in summer sessions. • Collect feedback from TCJP students and community members about Unit 5 curriculum accessibility, relevance, and quality. • Make changes and adjustments to Units 1-5 based on participant feedback. • Install flood sensor at neighboring location
July 2024	• Onboard consistently engaged community members as teachers for July summer intensive cohort of TCJP students, Units 1-5: ○ Unit 1: “Introduction to Climate Impacts in LES

	○ Unit 2: “Climate Resilience, Barriers, and Solutions” ○ Unit 3: “Air Quality Monitoring 101” ○ Unit 4: “Air Quality Data Collection Field Work” ○ Unit 5: “Local Air Quality Data Analysis” • Install stationary air quality monitor at neighboring location • Work with July summer intensive cohort of TCJP students to analyze, interpret, and present data gathered from community members on local air quality • To culminate July intensive TCJP summer session, share findings in a public event with community stakeholders: project partners, local elected officials, and community members.
August 2024	• Onboard consistently engaged community members as teachers for July summer intensive cohort of TCJP students, Units 1-2 and 6-8: ○ Unit 1: “Introduction to Climate Impacts in LES ○ Unit 2: “Climate Resilience, Barriers, and Solutions” ○ Unit 6: “Flood Sensors 101” ○ Unit 7: “Flood Sensor Data Collection Field Session” ○ Unit 8: “Local Flood Data Analysis” • Hold in-person or hybrid public workshop, utilizing Unit 6: “Flood Sensors 101” • Work with August summer intensive cohort of TCJP students to analyze, interpret, and present data gathered from community members on local flood sensing. • To culminate August intensive TCJP summer session, share findings in a public event with community stakeholders: project partners, local elected officials, and community members.
September 2024	• Hold in person or hybrid public workshop, utilizing Unit 7: “Flood Sensor Data Collection Field Session” • Meet with project partners to assess the success of workshops on Units 1-7 during January 2024-June 2024, and July and August 2024 intensive sessions. • Review feedback from July and August 2024 to make necessary updates and changes to curriculum • Brainstorm with project partners potential avenues for continued funding to implement Units 1-7 for new audiences
October 2024	• Hold in person or hybrid public workshop, Unit 8: “Local Flood Data Analysis” • Onboard key engaged community members as facilitator for Units 1-2 and 6-8. • Meet with project partners to assess the success of workshops on Units 6-8. • Prepare reporting necessary to EPA grant funder • Apply for grants to continue LES climate resilience and health organizing and education work

2c. Itemized Budget Sheet / Budget Narrative

Attached with Mandatory Documents.

3.0 ENVIRONMENTAL RESULTS - Outputs, Outcomes, and Performance Measures

3a. Logic Model

Attached with Mandatory Documents.

3b. Performance Measure Plan

Activity	Performance Measures	Evaluation
Co-create curriculum with community partners	1. 3 community partners to attend 3+ co-development sessions 2. Develop a curriculum template for Units 1-8 3. Educational Needs of community partners are identified and integrated into curriculum	1. Community partner pre- and post-program surveys for program participants 2. Attendance tracking 3. Curriculum review process
Install Static Air Quality Monitors and Analyze Air Quality Data	1. Air monitors are installed 2. Environmental data is produced at least monthly specifically targeting sites of concern for environmental health hazards 3. Air quality readings are shared accurately and consistently within the community	1. Data is analyzed, published, and shared with stakeholders and community via open online resources 2. Documentation of install and maintenance as needed 3. Air Quality data is collected and synthesized at the end of the grant term to produce a report
Install Static Flood Sensors and Analyze Flood Data	1. Flood sensors are installed 2. Environmental data is produced as available specifically targeting sites of concern for flood hazard 3. Flood sensor readings are shared accurately and consistently within the community	1. Data is analyzed, publishes, and shared with stakeholders and community via open online resources 2. Documentation of install and maintenance as needed 3. Flood data is collected and synthesized at the end of the grant term to produce a report
Run workshop & trainings	1. At least 4 community members are trained as Community Facilitators in workshop curriculum 2. Program attendance at least 75% of 10-20 participant goal per workshop 3. Program participants understand and can communicate environmental science terms related to air quality and flooding	1. Program Manager administers pre- and post-program surveys for program participants 2. Community Facilitators can successfully communicate all information in designated curriculum Units independent of SSCC staff and project partners 3. Attendance tracking

3c. Sustainability Plan and Community Vision

The LES community has a clear vested interest in the continuation of this project, as the links between high local respiratory illness rates and air pollution become clearer, and as the climate crisis continues to cause storm surges and flooding. LES residents across community groups have already begun to organize to collect data on air quality, and to advocate for local flood protections, as exemplified by the work of our project partners such as LES Breathe, and the community plan for coastal resilience. In the future, we may take the curriculum and data developed from this project into partnerships with other local environmental health and climate resilience organizations working in LES, such as the air quality project Ecolibrium by Loisaida Center. LES Ecology Center, like Loisaida Center, was unable to partner in this project because

of a lack of staff capacity, but has an ethos of environmental stewardship and community education that is in line with this project and could fit as a future collaborator.

If awarded the EJ ECPS Cooperative Agreement, SSCC and community partners will develop curriculum units that can continue to be utilized beyond the grant term for future cohorts of the TCJP, community members, and other community groups. The infrastructure and technology needed for community members and students to gather environmental data will be in place and accessible for use. Specifically, the Community Facilitators will be equipped to continue the workshops and cultivate more local subject matter experts on climate resilience and citizen science for future needs in the community. SSCC hopes that by providing training and resources, program participants will be empowered to use data to advocate for local decision making that protects the health and safety of LES residents. This data could be used to advocate for more comprehensive local flood protections, improved monitoring for air polluting activities around building and roadway construction, and to assist in identifying other sources of air pollution. We believe this model of providing training and technology access to empower community members as citizen scientists can be applied to other communities which are suffering disproportionate burdens of polluted air or vulnerability to flooding.

4.0 PROGRAMMATIC CAPABILITY

4a. Organizational Experience

Sixth Street Community Center has been managing community programs and resources since its founding in 1978. Our programs include a wide range of activities in the areas of environmental justice organizing in support of sustainable neighborhoods and renewable energy in collaboration with community partners and city and statewide coalitions; youth education in sustainability through our afterschool and summer programs for children and teens; and health and nutrition support through our Community Supported Agriculture program, emergency food/fresh produce distributions, and mutual aid kitchen providing weekly prepared meals to homeless and food insecure households. Through these projects, SSCC has demonstrated a high capacity for outreach and public engagement with campaigns and community development. The Community Center's renovated three-story facility, donated to the organization in 1984, houses our programs and also serves as a neighborhood venue for community meetings, workshops and celebrations. In crises such as Hurricane Sandy in 2012 and the recent Covid-19 pandemic, the Community Center has served as an emergency hub providing food, water, clothing and other essentials along with legal and social services referrals for Lower East Side residents. The work of our full-time and part-time staff is supplemented with over 50 regular volunteers and a hands-on Board of Directors that assists in all of our activities.

4b. Staff Experience / Qualifications of the Project Manager

Anna Tsomo Leidecker (she/they), proposed Project Manager (current Part-Time Program Director of the Teen Climate Justice Program at SSCC), is a Tibetan-American climate justice educator with a BS in "Wellness Equity" Health Sciences + Anthropology from CUNY

Baccalaureate and Macaulay Honors College, and is currently completing a Masters in Community Health from CUNY School of Public Health. As TCJP Program Director, Anna has developed and facilitated workshops on a rich array of climate justice topics and supported cohorts of 25+ high school students, while fostering community partnerships and participating in climate organizing coalitions. As an organizer with Sane Energy Project, she has led outreach, direct action, public education, and community building events that strengthened the No North Brooklyn Pipeline Alliance. Anna is currently completing a research project in partnership with NYC Health + Hospitals/Elmhurst on patient-provider communication regarding contraception and abortion services. Her experience with climate justice curriculum development and facilitation, in addition to her aptitude for movement-building and environmental campaign outreach, combined with her public health background, all position her to be a successful Project Manager.

Howard Brandstein (he/him), the current Executive Director, began his work at Sixth Street Community Center as a volunteer in the 1980s. He received his Masters in Urban Affairs from the University of Delaware and BS in Engineering Science from SUNY Stony Brook. As a lifelong New Yorker and urban homesteader, he assisted Lower East Side and East Harlem residents in homesteading and sweat equity projects, helping to establish resident-owned and managed buildings, community gardens and a community supported agriculture (CSA) co-op. Howard was instrumental in organizing the first Community Land Trust (CLT) in NYC here in LES. He is passionate about environmental justice and preserving our communities for low-income and working class people. As part of this he is leading the current SSCC effort to organize a new CLT on East 5th and 6th Streets in partnership with the Cooper Square Committee and New York City Housing Authority local tenant associations. Howard's deeply rooted ties to the LES community, as well as his robust community and environmental organizing background, make him highly qualified to support this proposal.

Jen Chantrtanapichate (she/her), the current Deputy Director, is a Thai-American artist, climate activist and community organizer from New York City. She received her Masters in Urban Planning and BA in Urban Studies from Hunter College. She developed and jump started Sixth Street's Youth Programs, Teen Programs, Emergency Food Distribution and Mutual Aid Kitchen Project. Her commitment to arts accessibility, urban sustainability and climate justice inspire much of the community programs at Sixth Street. On top of being responsible for the overall success of SSCC programs, she leads the center's organizing work in climate justice campaigns around energy democracy, opposition to fossil fuel expansion and coastal resiliency. In 2015, she founded the grassroots community organization, Cleanup North Brooklyn, which advocates for environmental justice, particularly in response to waste inequity and environmental racism in North Brooklyn. She serves on the board of the Bushwick Food Coop and the Fifth Street Farm Project. In her spare time, she fights for climate justice for BIPOC communities with coalitions like Frack Outta Brooklyn (FOBK) and works on campaigns that fall under the ethos of ecosocialism. Whether she is engaging communities through the arts, climate justice actions or collaborating with our vulnerable communities to develop environmentally sustainable solutions, she is invested in ensuring citizen participation is an integral part of the planning process - experience that will inform the key value of community

involvement in this proposal. In addition, Jen has direct experience with citizen science for political advocacy through air quality monitoring through the Transform Don't Trash campaign, which went on to inform city policy around waste equity.

Kendra Krueger (she/her), Board Member of SSCC, is an award-winning educator and engineer who believes in the transformative power of science. She has a bachelor's and master's degree in Electrical Engineering (BS Rensselaer Polytechnic Institute, MS University of Colorado Boulder) and has industry experience in radio astronomy, photonics, nanofabrication and ceramic sciences. Her transformative teaching philosophy integrates play, mindfulness and intuitive learning with science to allow students to develop not only their analytical thinking but also their emotional and social intelligence as well. Currently she serves as the STEM Education and Outreach Manager at CUNY's Advanced Science Research Center where she oversees The IlluminationSpace, an immersive learning center that hosts field trips and in-school programming. She also serves as a founding director for The CUNY Community Sensor Lab, a space for DIY community science and advocacy. As both a scientist, science educator, and a member of the SSCC Board, Kendra's experience with air quality monitoring, flood sensing, and educational development brings invaluable skills to this proposal.

Hennessy Garcia (she/they), Climate Organizer at SSCC, is an Afro-Puertorican intersectional activist and organizer. She is currently working on finishing her environmental science degree from CUNY Medgar Evers and an online degree in data analytics from Southern New Hampshire University. Hennessy is Sixth Street's Climate Justice Organizer. In this role, she works with large coalitions such as NY Renews, Public Power and the No North Brooklyn Pipeline Alliance. Hennessy has been lobbying and educating on environmental legislation such as the NYS Climate Jobs, and Justice Package (CJJP) and the Build Public Renewables Act (BPRA). Hennessy has only worked for SSCC for just five months and had taken the lead in getting our teen program to advocate in Albany for the CJJP on March 8th. Then got our teen program to come back to Albany for NY Renews Mass Mobilization where they performed a spoken word piece in front of Kathy Hochul's office on their experiences with the climate crisis. ,Presently, Hennessy is helping to spearhead the abolition and climate justice sub-team within NY Renews. Along with work and Sixth Street, Hennessy organizes around reproductive and women's rights.

4c. Expenditure of Awarded Grant Funds

Sixth Street Community Center has adequate financial controls, systems, and procedures in place to comply with all facets of the project. SSCC retains Supporting Strategies as our bookkeeping and accounting firm (www.supportingstrategies.com) and Lehman Flynn Vollaro CPAs LLC (https://lfvcpa.com) to handle our audits and filings with IRS and New York State. Our staff has extensive experience working with contractors and partner organizations in the community along with the many groups that utilize space at SSCC. Our Board of Directors is actively engaged in overseeing our financial management and assists in all our activities.

5.0 PAST PERFORMANCE

For all below listed grants, necessary reports were submitted on time and were acceptable under grant agreements.

- New York Community Trust– Teen Climate Justice Program (received $70k in 2021-22 and $70k in 2022-23)
    - Interim and final reports submitted for initial two-year cycle. Following successful submission of reporting requirements, anticipated renewal for $70k in 2023-24
- New York Renews Regrant– Climate Justice Organizing (received $25k in 2022-23)
    - Final report submitted. Following successful submission of reporting requirements, anticipated renewal for $25k in 2023-24
- NYS Legislative Grant from Assembly Member Harvey Epstein– Sixth Street Youth Program (received $25k in 2021-22 and $30k in 2022-23)
    - Final report submitted. Following successful submission of reporting requirements, anticipated renewal for $35k in 2023-24.
- NYC Civic Impact Fund – Emergency Food Distribution (received $10k in 2021, $10k in 2022 and $10k in 2023).
    - Final report submitted. Following successful submission of reporting requirements, anticipated renewal of $10k in 2024.
- Omidyar Network– Mutual Aid Kitchen Project (received $20k in 2021)
    - Final report submitted successfully.

6.0 QUALITY ASSURANCE PROJECT PLAN

This project will involve the use of existing environmental data, as well as the collection of new data, utilize computer databases containing analytical data, and use information to make recommendations on environmental decisions, and will require the development of a Quality Assurance Project Plan.

MANDATORY DOCUMENTS

2c. Itemized Budget Sheet / Budget Narrative

	Description	Total
Personnel	Project Manager @$45,000 annual salary x 100% of time on project Deputy Director @ $74,000 annual salary x 20% of time on project= $15,000 Teen Program Director $45,000 annual salary x 33% of time on project = $15,000 Climate Justice Organizer $25,000 annual salary x 50% of time on project = $12,500	$87,500
Fringe Benefits	For all personnel 21% of salary devoted to project.(includes medical insurance)	$18,375
Travel		$0
Equipment	Purple Air Quality Monitors- 5 units @ $400 each = $2,000 Flood Sensor Equipment- 3 units @ $375 each = $1,125 Atmotube Pro- 8 units @ $190 each = $1,520 1 Desktop Computer = $1,750 1 Laptop = $1,500 2 Tablets @ $1,000 each = $2,000	$ 9,895
Supplies	Snacks & meals for EJCPS Community Workshops and Meetings @ $200/month x 12 = $2,400 Supplies and materials for EJCPS Community Workshops and Meetings @ $120/month x 12 = $1,440 Miscellaneous Supplies for Project Staff = $1,254	$ 5,094
Contractual		$0
Construction		$0

Indirect Costs	Ten Percent *De Minimis* Rate of $136,364 in Direct Costs	$13,636
Other	CUNY Sensor Lab subaward for technical/scientific and workshop and training support = $5,250 LES Breathe subaward for technical/scientific and workshop and training support = $5,250 El Jardin del Paraiso Community Garden subaward for monitor location and workshop host site = $1,000 Participant Support Costs- $1,000 stipends for leadership training for community facilitation: Train 2 community members in air quality monitoring and workshop facilitation for curriculum units 1-5; and train 2 community members for facilitation in flood sensing monitoring and workshop facilitation for curriculum units 1-2 and 6-8. Total PSC cost is $4,000.	$15,500
TOTAL		**$150,000**

3a. Logic Model

Resources/Inputs	• Staff time
	  ○ Project Manager
	  ○ TCJP Program Director
	  ○ Deputy Director
	  ○ Climate Organizer
	• Partner organizations
	  ○ CUNY Sensor Lab
	  ○ LES Breathe
	  ○ El Jardin Del Paraiso
	  ○ FloodNet
	  ○ Mount Sinai
	  ○ Assembly Member Harvey Epstein
	
	• SSCC network
	  ○ TCJP students, mailing lists, volunteers

Activities	• Meet with partner organizations to develop workshop curriculum • Train SSCC staff on air quality and flood monitoring • Conduct robust public outreach ○ Train TCJP students in canvassing skills • Install air quality monitors and flood monitors

	• Host 8-10 workshops • Collect and present environmental data
Outputs	• 8+ units of workshop curriculum • 10-20 participants attend each workshop • 4+ more workshop announcements will go out via SSCC and community partner networks • 2 public forums culminating TCJP summer intensive sessions presenting environmental data • Flyering across 20+ city blocks via on-the-ground outreach, including 2 local NYCHA developments
Audience	• LES residents • Local community groups (including potential future community partners) • Local high schools and universities • Community partners
Short-Term Outcomes (6-12 months)	• Workshop participants will be able to vocalize the unique climate vulnerability and air quality issues of LES, access and interpret public data via OpenAq and FloodNet, identify trends and hazardous conditions from data sets, and use a handheld Atmotube air quality monitor
Intermediate Outcomes (12-24 months)	• New community or student groups will utilize workshop curriculum units • Key community participants from workshops will be trained as Community Facilitators, to facilitate curriculum units for future TCJP cohorts or other community groups • Environmental data from air quality monitors and flood sensors will be accumulated for community advocacy efforts
Long-Term Outcomes (2+ years)	• Increased advocacy capacity for environmental health and climate resiliency in LES

COMMUNITY PARTNER LETTERS OF COMMITMENT

THE ASSEMBLY STATE OF NEW YORK
ALBANY

HARVEY EPSTEIN
Assemblymember 74th District

To Whom it May Concern:

I am pleased to provide this Letter of Support for the Sixth Street Community Center (SSCC) proposal being submitted in response to the federal EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EJCPS). Our office is committed to supporting community-based efforts to address concerns of air quality, flooding and climate resiliency particularly given the challenges our neighborhoods have faced in the aftermath of Hurricane Sandy. The SSCC proposal seeks to increase education and literacy around these concerns while expanding air and flood monitoring. The data collection enabled through this proposal will allow residents of the Lower East Side to develop and pursue an advocacy agenda to address air quality issues and implement strategies to mitigate environmental harms in their community.

Our office will work alongside SSCC and community leaders to identify key advocacy goals based on the air quality data collected through this initiative and share workshop opportunities with our constituents. As neighbors and advocates in the fight for environmental justice, we are excited to collaborate with SSCC **Citizen Science for Environmental Health & Climate Resiliency in the Lower East Side.**

Sincerely,

Harvey Epstein
NY State Assembly Member
Assembly District 47

Letter of Commitment
April 11, 2023

U.S. Environmental Protection Agency
Office Of Environmental Justice And External Civil Rights
Re: Environmental Justice Collaborative Problem Solving Grant Partnership

Dear Selection Committee,

On behalf of FloodNet, I am pleased to provide this Partnership Letter for Sixth Street Community Center's proposal being submitted in response to the United States EPA's Environmental Justice Collaborative Problem-Solving Agreement: EPA-R-OEJECR-OCS-23-01. FloodNet is excited to serve as a Project Partner in support of Sixth Street Community Center's proposed community air and flood monitoring campaign.

FloodNet is a cooperative of communities, researchers, and New York City government agencies working to better understand the frequency, severity, and impacts of flooding in New York City, through the installation of street-level flood sensors, and collection and dissemination of flood data. The data and knowledge gained can be used by local residents, researchers, city agencies, and others to advocate around and work to reduce flood risk. FloodNet brings together innovative sources of information on street flooding impacts in neighborhoods that are vulnerable to high tides, storm surge, and stormwater runoff.

If SSCC is awarded the EJCPS grant, FloodNet partners at the City University of New York (CUNY) and New York University (NYU) will support SSCC's work in curriculum development for and implementation of a community solutions workshop model on flood resilience and flood awareness in the Lower East Side. This model will provide education and training on engaging community residents in data collection and utilization to address flood impacts in the Lower East Side neighborhood. FloodNet will provide guidance on utilizing the existing outputs of its work, namely the FloodNet sensor data dashboard, community-collected data on local experiences of flooding, and technical guidance and advisory on building flood sensors to SSCC Staff, SSCC constituents, and associated community residents.

Sincerely,

Véronëque Ignace, MPH
Community Engagement Manager, FloodNet NYC

To Whom it May Concern:

On behalf of LES Breathe, I am pleased to provide this Partnership Letter for Sixth Street Community Center's proposal being submitted in response to the United States EPA's Environmental Justice Collaborative Problem-Solving Agreement: EPA-R-OEJECR-OCS-23-01. LES Breathe is thrilled to serve as a Community Partner to assist Sixth Street Community Center's proposed community air monitoring and flood sensing campaign.

LES Breathe is a community committee formed out of the non-profit East River Park Action to protect air quality during construction of the East Side Coastal Resilience project on the Lower East Side through citizen science. Since June 2021, LES Breathe has installed five PurpleAir real-time air quality sensors around the Lower East Side and actively monitors their data, as well as the data from other sensors in our region for comparison. We also utilize Atmotube handheld air quality monitors, provide community engagement for accessibility of data collection and analysis, and support education about cleaner air at home.

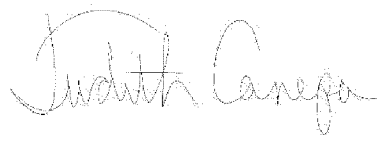
Through this project collaboration, we hope to build capacity around measuring and assessing air quality, and build awareness in environmental health on the Lower East Side of Manhattan. LES Breathe seeks to support the project by assisting with workshop facilitation and curriculum development, as well as the installation of air quality monitors. LES Breathe has experience in collecting and analyzing air quality data to inform community advocacy for the environmental health of residents of the Lower East Side.

Sincerely,

Wendy Brawer
LES Breathe Co-Founder

Mary Jo Burke
LES Breathe Co-Founder

April 11, 2023; Subject: Environmental Justice Collaborative Problem Solving Grant Partnership



To Whom It May Concern:

On behalf of El Jardin Del Paraiso, I am pleased to provide this Partnership Letter for Sixth Street Community Center's proposal being submitted in response to the United States EPA's Environmental Justice Collaborative Problem-Solving Agreement: EPA-R-OEJECR-OCS-23-01. El Jardin is thrilled to serve as a Community Partner to assist Sixth Street Community Center's proposed community air monitoring and flood sensing campaign.

El Jardin del Paradiso is an environmental awareness and educational community park located just two blocks from SSCC, and has been a key community gathering space since the opening in 1981. El Jardin has been involved with SSCC since both were founded. Recently, El Jardin has served as a host space for events such as SSCC Community Land Trust meetings, workshops with the TCJP as well as the Youth Program, and more. El Jardin, has served as a resource for environmental education in LES and is dedicated to the health, safety, and agency of the community.

If granted funding through the EPA's EJCPS, El Jardin will host a stationary air quality monitor and a flood sensor on site, as well as potentially host workshops and community events for the proposal.

Best,

Judith Canepa, Steering Committee Member
El Jardin Del Paradiso, 706-718 E 5th Street & 311-321 E 4th Street, Manhattan, 10009

ADVANCED SCIENCE RESEARCH CENTER
THE GRADUATE CENTER
CITY UNIVERSITY OF NEW YORK

April 7, 2023; Subject: Environmental Justice Collaborative Problem Solving Grant Partnership

To Whom it May Concern:

On behalf of the City University of New York's Advanced Science Research Center (CUNY ASRC), I am pleased to provide this Partnership Letter for Sixth Street Community Center's proposal being submitted in response to the United States EPA's Environmental Justice Collaborative Problem-Solving Agreement: EPA-R-OEJECR-OCS-23-01. CUNY ASCR is thrilled to serve as a Project Partner in support of Sixth Street Community Center's proposed community air monitoring and flood sensing campaign.

The CUNY ASRC Community Sensor Lab is a workshop series that works with high school students and community members to build low-cost, environmental monitoring sensors. These sensors are critically relevant in a time when our world is gripped by crises that reveal the interconnections of health and environmental injustice. Our curriculum aims to build technical skills in electronics and programming and also grow confidence in self-advocacy through data literacy, analysis and presentation.

Through this project collaboration, we hope to build capacity around measuring and assessing air quality, flood risk, and environmental health in the Lower East Side of Manhattan. CUNY seeks to support the project by assisting with workshop facilitation and curriculum development. We will also install long-term static air monitoring equipment with young adults in the program, and train participants to learn about their basic operations, maintenance and upkeep. Data produced by these sensors will be collected and fed into a shared data tool, and analyzed in part by our team. This data will serve as an indicator for environmental health concerns in locations throughout the neighborhood that pose the greatest hazards to LES residents. CUNY believes in supporting and collaborating with organizations like Sixth Street Community Center, and is excited to continue our partnership through this grant opportunity.

Sincerely,

Kendra Krueger

STEM Education & Outreach Manager

Re: EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EJCPS)-EPA-R-OEJECR-OCS-23-01

To Whom It May Concern:

The Community Engagement Core for Mount Sinai's Clinical and Translation Science Awards Program, also known as CondulTS, enthusiastically support the Sixth Street Community Center (SSCC) proposal for *Citizen Science for Environmental Health & Climate Resiliency in the Lower East Side* being submitted in response to the federal **EPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EJCPS)-EPA-R-OEJECR-OCS-23-01**.

We have recently selected SSCC to be part of our Clinical and Translational Science Community Pilot Mini-Grant Award Program through which we will offer technical support in evaluation, assessment and public health resources. The objective of the pilot program is to foster community-academic partnerships that strengthen community capacity to develop, implement, and evaluate public health programs and ultimately position organizations to successfully respond to larger funding opportunities. SSCC staff will attend Mount Sinai-hosted workshops tailored to the technical assistance needs of the awardees. The goal of these workshops is to directly address major technical support themes, while also providing dedicated time to project planning.

We're very excited to partner with and support SSCC in their initiative for Citizen Science for Environmental Health & Climate Resiliency in the Lower East Side. Please contact us if you have any further questions.

Sincerely,

Sofia Curdumi Pendley, PhD, MPH
Assistant Professor
Department of Environmental Medicine and Public Health
Icahn School of Medicine at Mount Sinai

SIXTH STREET COMMUNITY CENTER

Grievance Procedure Policy

Introduction.

Sixth Street Community Center is aware that there may be times when employees need to file an official complaint about unjust treatment, harassment, and/or health and safety concerns in the workplace. This grievance procedure policy was created to clearly outline the process for these instances to ensure all our employees are heard and treated equally.

Purpose.

The propose of this grievance procedure policy is to (a) explain the scope and definition of grievances, (b) outline the process for reporting and closing a grievance, (c) define the company's confidentiality measures, and (d) describe the disciplinary action steps for policy violations.

Scope.

This policy is applicable to all Sixth Street Community Center employees, including paid interns, volunteers, and seasonal, part-time, and permanent employees. A grievance can be filed against any Sixth Street Community Center employee, including senior management and members of the Board of Directors. Sixth Street Community Center defines a "grievance" as a formal work-related complaint, issue, and/or objection made by an employee.

Grievance Procedure:

Before filing an official grievance complaint, Sixth Street Community Center asks that all employees review the policy that directly impacts their complaint. For example, if an employee files a sexual harassment complaint, he/she must consult the company's Sexual Harassment Policy.

Sixth Street Community Center encourages employees to resolve minor disputes with the help of a member of the Board of Directors. If the informal complaint is not *fairly and constructively* resolved within five days, employees may file a formal grievance.

Employees can file grievances when:

- They have been victims of workplace harassment.
- Their health and safety have been compromised.
- They've witnessed poor supervisor and/or management behavior.
- There are unjust changes made to the employment agreement.
- Policy guidelines are violated.
- There is a dispute between coworkers, suppliers, and/or management.

Sixth Street Community Center also recognizes that every case is different and this list is subject to change, depending on the definition filed in the Grievance Complaint Form.

Filing a Grievance.

When filing a grievance, employees have the option of reporting their complaints using the company's official online portal or contacting their direct supervisor or the Board of Directors HR committee. In either case, employees will be required to complete and file a Grievance Complaint Form.

Once the complaint has been submitted to the Board of Directors HR committee, employees have the right to attend meetings of the committee with a witness, appeal decisions, and depending on the severity of the complaint, refuse to attend work until the grievance is resolved.

When a grievance is filed against another employee, the accused also reserves the right to:

- View and request a copy of the official grievance complaint.
- Formally respond to the complaint after consulting his/her supervisor and the Board of Directors HR committee.
- Attend all formal meetings with a witness.
- Appeal the final decision to the full Board of Directors,

Company Responsibilities.

It is the responsibility of Sixth Street Community Center to:

- Accept and thoroughly investigate all Grievance Complaint Forms.

- Ensure that the grievance is resolved within 10 days, depending on the severity of each case.
- Treat both the complainant and the accused fairly throughout the grievance process.
- Adhere to the no-retaliation policy when employees file a complaint against management.
- Organize mediation meetings with the appropriate parties.
- Practice a high level of confidentiality throughout the grievance process.
- Accept and investigate all appeals.
- Ensure that the final decision is implemented.
- Maintain accurate and comprehensive records of each grievance.

Confidentiality.

Sixth Street Community Center employees, including senior management are required to sign a Confidentiality Agreement that limits them from discussing the grievance before and after it has been resolved. The complainant and those that stand accused of a grievance are prohibited from discussing the matter with any other Sixth Street Community Center employee.

Policy Violations.

If an employee is found to have violated the grievance procedure policy, they will be subject to disciplinary action, up to and including termination. The severity of each case will determine the type of disciplinary action, which may include a verbal or written warning, suspension, and/or termination.

If an employee is unequivocally proven to have committed the grievance he/she is being accused of, Sixth Street Community Center will adhere to its Disciplinary Action Policy to ensure that the matter is resolved justly and according to organizational guidelines.

Accounting Period Ending:
June 30th
Form 990 Required: X Yes ___ No
Person to Contact:
M. Evans
Contact Telephone Number:
Ex. 6 - Personal Privacy (PP)

Dear Applicant:

Based on information supplied, and assuming your operations will be as stated in your application for recognition of exemption, we have determined you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code.

We have further determined that you are not a private foundation within the meaning of section 509(a) of the Code, because you are an organization described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

If your sources of support, or your purposes, character, or method of operation change, please let us know so we can consider the effect of the change on your exempt status and foundation status. Also, you should inform us of all changes in your name or address.

Generally, you are not liable for social security (FICA) taxes unless you file a waiver of exemption certification as provided in the Federal Insurance Contributions Act. If you have paid FICA taxes without filing the waiver, you should contact us. You are not liable for the tax imposed under the Federal Unemployment Tax Act (FUTA).

Since you are not a private foundation, you are not subject to the excise taxes under Chapter 42 of the Code. However, you are not automatically exempt from other Federal excise taxes. If you have any questions about excise, employment, or other Federal taxes, please let us know.

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Letter 947(DO)(5-77)

The line checked in the heading of this letter shows whether you must file Form 990, Return of Organization Exempt from Income Tax. If Yes is checked, you are required to file Form 990 only if your gross receipts each year are normally more than $10,000*, or $25,000 for years ended on or after December 31, 1982. If a return is required, it must be filed by the 15th day of the fifth month after the end of your annual accounting period. The law imposes a penalty of $10 a day, up to a maximum of $5,000, when a return is filed late, unless there is reasonable cause for the delay.

You are not required to file Federal income tax returns unless you are subject to the tax on unrelated business income under section 511 of the Code. If you are subject to this tax, you must file an income tax return on Form 990-T. In this letter, we are not determining whether any of your present or proposed activities are unrelated trade or business as defined in section 513 of the Code.

You need an employer identification number even if you have no employees.

If an employer identification number was not entered on your application, a number will be assigned to you and you will be advised of it. Please use that number on all returns you file and in all correspondence with the Internal Revenue Service.

Because this letter could help resolve any questions about your exempt status and foundation status, you should keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown in the heading of this letter.

Sincerely yours,

District Director

cc:

* For tax years ending on and after December 31, 1982, organizations whose gross receipts are not normally more than $25,000, are excused from filing Form 990. For guidance in determining if your gross receipts are "normally" not more than the $25,000 limit, see the instructions for the Form 990.

* Beginning January 1, 1984, unless specifically excepted, you must pay taxes under the Federal Insurance Contributions Act (social security taxes) for each employee who is paid $100 or more in a calendar year.

EXPERIENCE

SIXTH STREET COMMUNITY CENTER

DEPUTY DIRECTOR **MAY 2015 - PRESENT**

Develop and implement new community programs, projects and campaigns. Leads the organization's work in climate justice campaigns- locally, citywide and statewide. Represents SSCC in coalitions we are a part of: No North Brooklyn Pipeline Coalition, NY Renews and NYS Public Power Coalition. Oversees hiring, onboarding and managing SSCC's team of directors, organizers and educators. Oversees operations of SSCC including but not limited to: program development, program finances and budgets, development and fundraising, partner relations, outreach, recruitment of diverse participants that reflect the Lower East Side, community engagement, participant enrollment, volunteer management and engagement. Develop and manage collaborative projects with local community partners, community based organizations and diverse stakeholders. Direct the organization's communications, compile reports about community impact, act as a media spokesperson for the organization. Started as the Youth Program Director (2015-2017) and worked as SSCC's Program Director (2017-2021) prior to becoming Deputy Director.

CLEANUP NORTH BROOKLYN (CNB) **MAY 2015 - PRESENT**

FOUNDER

Started from the ground up a grassroots community organization of approx. 75 members based in N. Brooklyn— Actively confronting environmental racism as it pertains to waste inequity and the harms posed by the unsustainable structure of NYC's private waste industry, while advocating for environmental justice and equitable solutions for our most targeted communities. Base-builds w/ community members that are reflective of the longstanding community that has been impacted. Organize, lead and facilitate community meetings, large community forums, town halls, actions and rallies. Outreach and coordinate w/ local elected officials and city council staff. Develop and maintain relationships with ally CBOs and partners like New York City Environmental Justice Alliance, El Puente, OUTRAGE, Make the Road, New York Lawyers for the Public Interest, Teamsters Labor Union, Sure We Can, Neighbors for Allied Growth and ALIGN. Work w/ coalitions like Bag It NYC and Transform Don't Trash.

AMPLIFY **MAY 2012 - 2015**

ELA PROGRAMS COORDINATOR

Developed from the ground up and coordinated a pilot youth program (The Writer's Express) at a third-party location (Sixth Street Community Center) to implement a digital english language arts (ELA) curriculum. Responsible for developing a community partnership with the host site, cultivating relationships with local schools and families, outreach and enrollment of youth participants, managing a small team of college aged interns, student engagement, parent coordinating and developing and teaching enrichment workshops in the arts, creative writing and urban gardening.

EDUCATION

MASTER IN URBAN PLANNING. HUNTER COLLEGE. **GRADUATED 2018**

COMMUNITY BASED PLANNING AND ADVOCACY, URBAN SUSTAINABILITY & CLIMATE JUSTICE

Studio member representing Hunter College's Master's of Urban Planning department at the annual APA NY Metro Studio 2018. Graduated with academic honors.

BACHELOR OF ARTS IN URBAN STUDIES. HUNTER COLLEGE. **GRADUATED 2014**

Graduated with academic honors.

ADDITIONAL EXPERIENCE AND SKILLS

BUSHWICK FOOD COOPERATIVE. BOARD MEMBER	2020- PRESENT
FIFTH STREET FARM PROJECT. ADVISORY BOARD MEMBER	2018- 2020

Re: EPA-R-OEJECR-OCS-23-01

Dear Reviewers:

Please accept this letter of commitment to support PathStone Corporation in their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01.

National Partnership for Environmental Technology Education (PETE) has been working in collaboration with PathStone since 2019 to provide training; we are on our seventh contract for PathStone to train community members to respond to disasters in Puerto Rico and the Caribbean including emphasis of working under Infectious Disease (COVID-19) restrictions. PathStone is utilizing DSW worker supplies and expertise garnered from participation in PETE's DSW Trainer-the- Trainer program to provide the training. In addition to the DSW, PathStone's lead trainers were also authorized through PETE Train-the-trainer to offer HAZWOPER and OSHA.

National PETE appreciates the professional training that PathStone delivers to prepare community members for disasters and create a skilled workforce to meet the needs of reconstruction in the Infectious Disease impacted environment. The job readiness, occupational/environmental skills and safety training PathStone delivers will create a skilled workforce to meet employers' needs and help communities prevent, prepare for, and respond to disasters.

National PETE is committed to assist PathStone to build community and workforce capacity and resilience. Our current and future collaboration will contribute to PathStone's success in increasing economic resilience for communities, workers and businesses.

Sincerely,

Kirk J. Laflin,
Executive Director

March 30, 2023

U.S. Environmental Protection Agency
Office of Environmental Justice and External Civil Rights

Dear Reviewers,

My name is Belsy Velez and I am the president of the Program Area Advisory Committee in Puerto Rico. As volunteers, we work in different communities around the island, identifying the needs that they may have. Through this letter, we confirm our commitment to PathStone Corporation's proposed Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01. This program will deliver much needed training to our communities that will address Climate Change, Disaster Resiliency, and Emergency Preparedness.

We will provide PathStone with information pertaining to our local needs, communities' assessments, and local projects that may support PathStone in their efforts. The Program Area Advisory Committee will help PathStone promote their services and refer qualified participants.

This program will be very helpful to these communities and we are excited to work in collaboration for the benefit of all.

Sincerely,

Centro de Servicios Comunitarios y Agrícolas de Utuado Inc.
PO Box 2525 CMB 14
Utuado, Puerto Rico 00641-2525

April 12, 2023

Mrs. Mileidy Soto
Director, Training & Employment
PathStone Corporation

Dear Mrs. Soto

Centro de Servicios Comunitarios y Agrícolas de Utuado Inc. (CSCAU), is a non-profit organization dedicated to assist communities in the Utuado area, with a multiservice center dedicated to supply all the community needs, including a safe space in case of a natural disaster. We are pleased to provide this Letter of Commitment to collaborate with PathStone in their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, funded by the Environmental Protection Agency to deliver training that will address Climate Change, Disaster Resiliency, and Emergency Preparedness to the residents of Utuado.

We created our organization, because we noticed the importance of providing a place in the community that all the population around us can feel safe in the event of a natural disaster or an emergency. Our focus is to create a space that in a future can serve as a refuge to the affected communities in the Utuado area. With this opportunity in collaboration with PathStone we are going to be able to refer candidates that will receive the trainings and collaborate towards the completion of the project that we have in our community.

We are looking forward to work together on this new opportunity.

Sincerely,

Wilfrido Bermúdez
President
Ex. 6 - Personal Privacy (PP)

"Unidos somos más"

March 28, 2023

Dear Reviewers:

We are pleased to provide this letter of support for PathStone Corporation's proposed Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, funded by the Environmental Protection Agency.

Our municipality has continually supported PathStone and their efforts within our communities. We will provide support in identifying communities, assessing the needs, referring individuals that may benefit from this opportunity, and will help in the coordination of community orientations and/or activities.

The most recent Disaster that affected our communities in Utuado was hurricane Fiona. Fiona not only left Puerto Rico with significant flooding and a widespread power blackout, but the extreme rainfall caused unaccountable damages to many areas of our municipality, mostly due to flooding and landslides. The impact still remains visible in our communities. Our town had not yet fully recovered from Hurricane Maria, when Fiona made impact.

As leaders of our town, we are excited to learn of this opportunity and PathStone's efforts to address Climate Change, Disaster Resiliency, and Emergency Preparedness. We are confident this program will provide the needed support to our communities.

We will support PathStone and commit to apply appropriate experience and/or resources to deliver the planned outcomes. We understand that this program will allow our residents to prepare for future disasters and to learn when and how to respond.

We are grateful for the impact PathStone has made in Utuado with services from their different programs since 2007. We have witnessed services such as emergency food, shelter, housing relocation, training, career exploration and even employment services. Because of this, we will continue supporting their programs and look forward to this collaboration.

Cordially,

Nilda I. Maldonado Maldonado
Director of Human Resources
Utuado Municipality

March 30, 2023

Mrs. Mileidy Soto
Director, Training & Employment
PathStone Corporation

Dear Mrs. Soto,

Corporacion de Servicios de Salud Primaria y Desarrollo SocioEconomico Del Otoao (COSSAO) is a non-profit organization dedicated to assist communities in the Utuado area, with health services and economic development. In COSSAO, we are pleased to provide this Letter of Commitment to collaborate with PathStone in their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, funded by the Environmental Protection Agency to deliver training that will address Climate Change, Disaster Resiliency, and Emergency Preparedness to the residents of Barceloneta, Arecibo, and Utuado.

Working in our organization, we noticed the importance of providing emergency related trainings, since in the past emergencies; our communities were severely impacted and damaged, having been completely uncommunicated for weeks after Hurricane Maria. Our residents were in need of food and shelter and were not able to access these resources until help finally came in by helicopters in some areas of our communities. For these reasons, and the concerns that have arised after natural disasters, we will fully support the efforts that will not only prepare our residents for disasters, but will also give them the confidence to proceed to obtain needed resources. We will support outreach efforts, provide referrals and needed space, so these communities will be receiving the training needed to survive these events.

We have worked with PathStone and its different programs since 2007 and are committed to this collaboration. We look forward to working together on this new opportunity.

Sincerely,

Francisco J. Valentin
Presidente COSSAO

Iglesia Metodista San Juan Apóstol II
Bo. Hato Viejo, Arecibo

March 28, 2023

Mrs. Mileidy Soto
Director, Training & Employment
PathStone Corporation

Dear Mrs. Soto,

San Juan Apóstol II Methodist Church is a faith-based organization, which is located in Hato Viejo a neighborhood of Arecibo. We are pleased to provide this Letter of Commitment to collaborate with PathStone in their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, funded by the Environmental Protection Agency to deliver training that will address Climate Change, Disaster Resiliency, and Emergency Preparedness to the residents of Barceloneta, Arecibo, and Utuado.

Currently our church has different ministries of social assistance, which in one way or another directly impact the municipality of Arecibo and adjacent towns. We have been able to identify the need to provide training and tools that will empower these communities in the event of a natural disaster.

That is why our church San Juan Apostol II is hopeful to help and support you with this program. It would be an accessible tool for each person that our congregation can identify, who has the need to be trained and who wants to be volunteers in the event of a natural disaster in assisting during the emergency with the acquired tool provided by the trainings.

We proudly support PathStone training and employment program and services and will be helping this program to succeed.

With regards,

Héctor Cortés Aguilar
Pastor

April 13, 2023

Dear Reviewers,

The Mateo 4:19 Church, in the town of Arecibo, served the community in their needs and bring the word of God to others. As a Church, we are preparing our selves to help people in our community, to respond in a time of crisis. Our community is located in a very vulnerable place in Arecibo, because is close to rivers and the sea coast.

We are pleased to provide this Letter of Commitment to collaborate with PathStone in their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, funded by the Environmental Protection Agency to deliver training that will address Climate Change, Disaster Resiliency, and Emergency Preparedness to the residents of Barceloneta, Arecibo, and Utuado.

We support their plan to provide residents, training that will improve the management of how to act during a natural disaster. We may provide PathStone with information pertaining to natural disasters and how to prepare before, during and after a natural disaster.

This program will be very helpful to our residents and we are excited to work in collaboration for the benefit of all. We understand that this Program will allow our residents to prepare for future disasters and to learn when and how to respond.

Respectfully,

Hilda Jeannette Torres Rosado
Pastora de la Iglesia

Marianne Engelman-Lado
Acting Principal Deputy Assistant Administrator
Office of Environmental Justice and External Civil Rights
Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Acting Principal Deputy Assistant Administrator Engelman-Lado:

I write in support of the application submitted by PathStone Corporation, Puerto Rico (PathStone-PR) in response to the Office of Environmental Justice and External Civil Rights' funding opportunity under the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EPA-R-OEJECR-OCS-23-01).

PathStone-PR has successfully delivered employment and training services to disfranchised individuals on the Island since 2007. One of their main objectives is to foster programs that fill employment gaps in areas of high demand, including construction, renewable energy, and other environmental career pathways. The organization has demonstrated its capacity to prepare farmworkers, at-risk youth, justice-involved and incarcerated individuals, seniors, and low-income residents to attain better economic and social opportunities, while building self-sufficiency in underserved communities. As a result, they have created a network of hundreds of participants who are ready to work and support each other.

This grant opportunity supports community-based efforts that promote collaboration across public and private sectors to address environmental and public health concerns in communities that are disproportionately impacted by environmental issues. It is my understanding that PathStone-PR intends to use grant funds to deliver training that will address climate change, disaster resiliency, and emergency preparedness, in addition to providing guidance in the development of emergency plans to the residents living in the municipalities of Barceloneta, Arecibo, and Utuado, located on the northwestern region of the Island. This program would complement similar initiatives undertaken by PathStone-PR in other municipalities, broadening impact and ensuring more residents are prepared to manage natural disasters and other emergencies.

PRINTED ON RECYCLED PAPER

I trust PathStone-PR would be a valuable partner for this program considering their trajectory and years of experience, as well as their renowned service to communities across the Island. I once again reinstate my support and respectfully request proper consideration of their proposal.

Please consider this request in accordance with applicable laws, rules, and regulations.

Sincerely,

Jenniffer González Colón
Member of Congress

HON. ELIZABETH ROSA VÉLEZ
SENADORA DISTRITO DE ARECIBO

SENADO
ESTADO LIBRE ASOCIADO DE PUERTO RICO

March 30, 2023

To whom it may concern:

Through this letter, we certify our commitment to PathStone Corporation's proposed Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, subsidized by the Environmental Protection Agency. PathStone Corporation is a non-profit organization, organized under the laws of New York and duly authorized to do business in Puerto Rico since April 1, 1997.

Our office and the efforts we carry out on a daily basis in our communities support their plan to provide various municipalities, including Barceloneta and Arecibo residents the opportunity to develop solutions that will significantly address issues in communities disproportionately burdened by environmental harms and risks. This project will help transform disadvantaged and underserved communities into healthy, thriving communities capable of addressing the environmental and public health challenges they have historically faced, as well as current and future challenges.

Since January 2021, I serve as the Arecibo District Senator, which consists in the following municipalities: Arecibo, Barceloneta, Camuy, Ciales, Dorado, Florida, Hatillo, Manatí, Morovis, Quebradillas, Vega Alta and Vega Baja. During this time, I have witnessed PathStone's engagement with the communities and their needs, as well as the need to improve environmental programs that address Climate Change, Disaster Resiliency, and Emergency Preparedness. PathStone has participated in multiple activities throughout the municipalities I represent, bringing information and services to the population.

We commit to continue helping PathStone promote their services and will help in the identification and coordination of services to communities in need resiliency, adaptation and Emergency preparedness skills and knowledge. We have access to communities and their leaders and are able to help obtain community input and feedback for program needs and development.

This project will have a positive impact in our communities and is a great opportunity to facilitate the involvement of those potentially affected by disasters, in emergency

EL CAPITOLIO, PO BOX 9023431, SAN JUAN, PUERTO RICO 00902-3431

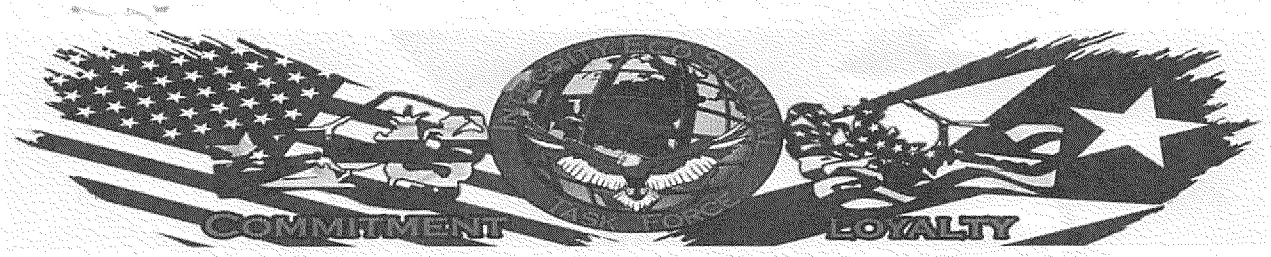
planning and implementation. We are excited to continue working in collaboration for the benefit of those we serve.

Respectfully,

ELIZABETH ROSA VELEZ

March 28, 2023

Mrs. Mileidy Soto
Director, Training & Employment
PathStone Corporation



Dear Mrs. Soto,

My name is Martha Mercado and I am a Clinical Social Worker. As a clinical social worker, I have worked directly with communities in the north-west part of the island for over 10 years, and worked directly in shelters during the past natural disasters encountered. I am pleased to provide this Letter of Commitment to collaborate with PathStone in their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, funded by the Environmental Protection Agency to deliver training that will address Climate Change, Disaster Resiliency, and Emergency Preparedness to the residents of Barceloneta, Arecibo, and Utuado.

In my past experiences during natural disasters the community residents suffer from lack of necessary knowledge to guide and to provide the correct information during an emergency. These residents also need guidance and preparation on how to identify needed resources in a timely manner. For these reasons, if this opportunity is provided to PathStone, I will be more than happy to provide assistance training required training and social services to these communities, and commit to referring candidates that are in need of this training.

This program will be very helpful to the communities and we are excited to work in collaboration for the benefit of all.

Martha M. Mercado Cri'

ECO JMJ Fitness Inc.

Mrs. Mileidy Soto
Director, Training & Employment
PathStone Corporation

Dear Mrs. Soto,

ECO JMJ Fitness Inc. is an organization dedicated to developing and providing training related to emergency response, survival in disasters, food preservation, and radio communications, among others. Our Organization has developed a programed named Integrated Eco Survival. Through this program we have developed different types of training focused on existential needs of our communities after impacts of natural disasters. Through training that is offered in 3 phases, we provide workshops that will create awareness, integration, preparation, and practice. This type of training will help ensure the survival and resilience of our community residents.

Through this communication we certify our commitment to work in collaboration with PathStone to fulfill objectives established for their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01. This funding will meet an immediate need for the development of curricula that will target communities in Arecibo, Barceloneta, and Utuado, all having been heavily impacted by the most recent disasters. PathStone proposes to address Climate Change, Disaster Resiliency, Emergency Preparedness and will seek the opportunity to create and/or improve much needed emergency plans. PathStone will make an impact through training and activities that will empower community residents to be more involved in the decision making processes developed in preparation or recovery of disasters.

After the most recent disasters encountered in our island, we noticed the importance of empowering our communities with training and equipment that will guide them to respond correctly before, during and after a natural disaster.

Our organization is committed to assist PathStone in providing the required trainings so that, in the event of an emergency, they can survive and assist others to do so as well.

NON PROFIT 501c3 REGISTRO 420151 EIN 66-0862131

We have worked with PathStone and its different programs and are committed to this collaboration. We look forward to working together on this new opportunity.

Sincerely,

Mrs. Mileidy Soto
Director, Training & Employment
PathStone Corporation

Dear Mrs. Soto,

Conexión Laboral, Área Local Desarrollo Laboral Manatí Dorado/ American Job Center is pleased to provide this Letter of Commitment to collaborate with PathStone in their application to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement #EPA-R-OEJECR-OCS-23-01, funded by the Environmental Protection Agency to deliver training that will address Climate Change, Disaster Resiliency, and Emergency Preparedness to the residents of Barceloneta, Arecibo, and Utuado.

Representing the Workforce System, and providing services to 8 municipalities through our Job Center, we will help by providing assistance with the coordination of services, orientations, activities, referral of individuals that reside in the attended municipalities and we may also provide additional services which include, career exploration, referral to supportive services, support of paid and/or unpaid work experience, OJT, internships, summer jobs, and unsubsidized full and part-time employment placement assistance. We will also collaborate in the development of training programs, provide valuable connections to employers with jobs and serve as a key source of local labor market information. We will seek opportunities to provide a greater array of services for individuals through co-enrollment.

We have worked with PathStone and its different programs since 2007 and are committed to this collaboration. We look forward to working together on this new opportunity.

Sincerely,

Yamilette Ramos De La Cruz

March 30, 2023

Dear Reviewers:

This letter demonstrates our commitment to collaboration with PathStone, a national/multi-state 501(c) 3 non-profit organization, in response to opportunity Number: #EPA-R-OEJECR-OCS-23-01, FY23 Environmental Justice Collaborative Problem-Solving Cooperative Agreement, to be funded by the Environmental Protection Agency.

The project, entitled "Environmental Justice Collaborative Problem-Solving Cooperative Agreement" will address Climate Change, Disaster Resiliency, and Emergency Preparedness. These outcomes will be achieved in part through the integration of evidence-based activities, delivering integrated skills and training.

The targeted communities are Arecibo, Utuado, and Barceloneta.

We may assist PathStone to provide and/or coordinate supportive services and related assistance, orientation activities, training services, and training space. In representation of the workforce system, we may also assist in the coordination of workforce services, which may include assistance with resume writing, career exploration, support of paid and/or unpaid work experience, OJT, internships, summer jobs, apprenticeships, and unsubsidized full and part-time employment placement assistance. We will collaborate in the development of training programs, provide valuable connections to partners and employers and serve as a key source of local labor market information.

The Conexión Laboral-Área Local Norte Central hereby commits to identifying and referring eligible participants.

As partners, we will apply appropriate experience and/or resources to deliver the required project outcomes and to meet all EPA requirements.

We have worked with PathStone and its different programs since 2007 and are committed to this collaboration. We look forward to this opportunity for our communities.

Cordially,

Samaris Tejada Cruz

Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Asociación de Residentes de La Margarita, Inc.
CD2 URB La Margarita
Salinas PR 00751

April 1, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

RE: Subaward Agreement and Letter of Commitment and Support for
Environmental Justice Collaborative Problem-Solving (EJCPS)
Cooperative Agreement Program for Sociedad Ambiente Marino (SAM).

Dear EPA,

The La Margarita Resident Association is a community-based organization dedicated to holistically improve the social well being of adjacent communities through the defense and reinvigoration of the natural and cultural heritage, education, recreation, sporting, and endogenous sustainable development. Their work is based on the transformation of the excluded communities of the south east region of Puerto Rico. The community has been organizing for a long time but officially incorporated as a non-profit 501(c)(3) organization in 2020. We are pleased to agree to receive a sub-award from Sociedad Ambiente Marino (SAM) and serve as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by SAM.

Role: We are committed to working with SAM and other identified partners in the EJCPS application to advance the local vision and address the needs specified in the Request for Applications (RFA). This letter serves as a confirmation of our acceptance of an $8,000 sub-award to establish this partnership, as well as our agreement to play a key role in decision-making for the allocation of up to $57,000 for community direct community interventions. La Margarita Resident Association, a trusted organization with a proven track record in disaster recovery and climate adaptation, will provide support in community planning and community outreach to local neighborhoods in Salinas, as well as assist community stakeholders in developing an itemized budget for the $57,000. We have discussed the logistics of managing the $57,000 direct intervention budget with SAM, and SAM agrees that they will manage the funds but La Margarita Resident Association will play substantial role in facilitating a discussion with local stakeholders to direct how the allocation is used. Leveraging our existing relationships with community leaders and residents, we will work to create a comprehensive action plan and participate in a presentation to national community-based organizations.

Relationship to Applicant: La Margarita Resident Association has collaborated with Sociedad Ambiente Marino through the PR Citizen Assemblies partnership since 2021, including organizing stakeholder engagement and community meetings on climate justice and adaptation.

Interest in Environmental Issues and Relationship to Community: Puerto Rico's southeast coast has long been considered one of the island most contaminated regions. Toxic ash and noxious chemicals from coal-fired and thermoelectric power plants have impacted this community resulting in health problems ranging from cancer to Alzheimer's. As community-based organization, La Margarita Resident Association spearhead defense of natural environment, human health, exploration of alternative power sources such a solar community cooperative and infrastructure building to combat air pollution, flooding and disinvestment.

If SAM, is selected for participation in the program, La Margarita Resident Association will accept the sub-award and will be regularly engaging with SAM and other key partners of the Environmental Justice Collaborative Problem-Solving Agreement. This includes leading the community engagement and dissemination, and supporting the development of the Climate Community Plan. Moreover, the potential to participate in EJCPS meetings with key partners and stakeholders from our community.

We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

Thank you,

Wanda Rios
President
Asociación de Residentes de La Margarita, Inc

TALLER SALUD

April 13, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights

RE: Subaward Agreement and Letter of Commitment and Support for
Environmental Justice Collaborative Problem-Solving (EJCPS)
Cooperative Agreement Program for Sociedad Ambiente Marino (SAM).

Dear EPA,

Taller Salud is a community-based feminist organization dedicated to improving women's access to health care, to reducing violence in community settings and fostering economic growth through direct services, organizing and advocacy. Founded in 1979, Taller Salud is an independent, non-government based, non-profit 501(c)(3) organization. We are pleased to agree to receive a sub-award from Sociedad Ambiente Marino (SAM) and serve as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by SAM.

Role: We are committed to working with SAM and other identified partners in the EJCPS application to advance the local vision and address the needs specified in the Request for Applications (RFA). This letter confirms our acceptance of an $18,000 sub-award to establish this partnership, as well as our agreement to play a key role in decision-making for the allocation of up to $42,000 for community direct community interventions. Taller Salud, a trusted organization with a proven track record in disaster recovery and climate adaptation, will support community planning and outreach to local neighborhoods in Loíza and assist community stakeholders in developing an itemized budget for the $42,000. Leveraging our existing relationships with community leaders and residents, we will work to create a comprehensive action plan and participate in a presentation to national community-based organizations.

It is important to note that Taller Salud does not offer the same services to the general public as those outlined in the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted by SAM. Rather, Taller Salud has goals that align with those of SAM, and we are pleased to serve as a community partner in this initiative. We look forward to working with SAM toward achieving our shared goal of environmental justice. We have discussed the logistics of managing the award with the SAM, and they agree that Taller Salud will play a substantial role in directing how the award is carried out.

PO Box 524 Loíza, PR 00772-0524

info@tallersaludpr.org ◆ www.tallersaludpr.org

TALLER SALUD

Relationship to Applicant: Taller Salud has collaborated with SAM and the project team on different initiatives since 2022, including organizing stakeholder engagement and community meetings on the issues of land use and climate adaptation, as well as on other research and engagement initiatives in urban and water governance, food security, climate adaptation, and disaster prevention and recovery.

Interest in Environmental Issues and Relationship to Community: As a feminist community-based organization, we are well aware that women are the backbone of rebuilding efforts in their communities. After Hurricane Irma and María, they strongly lead community efforts and mutual aid initiatives, even during the COVID-19 emergency. Since 2017, Taller Salud spearheaded disaster response and recovery efforts supporting women's work but also creating new spaces and opportunities for a more just and humane recovery. We also launched a Hurricane Relief Fund which has provided essential goods and drinking water to more than 10,000 families around the island to this day.

If SAM, is selected for participation in the program, Taller Salud will accept the sub-award and will be regularly engaging with SAM and other key partners of the Collaborative Problem-Solving Agreement. This includes the potential to participate in EJCPS meetings with the technical advisory panel and other key partners and stakeholders from our community.

We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

Thank you,

Tania Rosario-Mendez

Office of Environmental Justice and External Civil Rights

RE: **Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Sociedad Ambiente Marino.**

Dear EPA,

The Hispanic Federation is pleased to be recognized as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by Sociedad Ambiente Marino (SAM).

We are committed to working with SAM and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the RFA. However, we would like to emphasize that our collaboration with the communities we are working with through a participatory planning process will take place only with the consent of their community leadership and the program managers if the proposal would come to fruition, which we anticipate would be welcomed with arms wide open.

The Hispanic Federation can provide technical and planning support to the communities and local practitioners, access to communities already working on climate recovery plans, as well as help in building collaborative partnerships with other stakeholders to develop and support solutions to coastal adaptation issue(s) at the community level.

Regarding our relationship with SAM, the Hispanic Federation looks forward to collaborating with SAM and the project team to advance coastal and marine ecosystem community engagement. As for our relationship with the community, we are committed to working with them closely to ensure their needs are being met.

If SAM is selected for participation in the program, Hispanic Federation commits to regularly engaging with SAM and other key partners of the Environmental Justice Collaborative Problem-Solving Agreement. This includes supporting the local government and stakeholder training modules and sessions and the potential to participate in EJCPS meetings with the core group and other key partners and stakeholders from our community.

We are eager to participate in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

Thank you,

David J. Carrasquillo

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Sociedad Ambiente Marino.

Dear EPA,

The Interdisciplinary Center for Coastal Studies (CIEL) is a research center attached to the Department of Social Sciences of the Faculty of Arts and Sciences of the University of Puerto Rico Mayagüez Campus. Based on interdisciplinary study and applied research, CIEL researches, educates, and disseminates information about coastal social processes, emphasizing the relationship between humans, society, and the environment. CIEL is also a place of work, research, and training for undergraduate and graduate students from various disciplines. We are happy to be listed as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by Sociedad Ambiente Marino (SAM).

Role: We are committed to working with SAM and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the Request for Applications (RFA). Climate Trace will lead the facilitation and coordination of Regional Climate Assemblies, and supporting the co-design of participatory decision-making processes in the communities for the development of Community Climate Plans.

Relationship to Applicant: SAM and Climate Trace PR have worked directly for over 5 years on climate and ocean governance topics. Climate Trace PR looks forward to collaborating with SAM and the project team to advance coastal and marine ecosystem community engagement.

Relationship to Community: Climate Trace PR has a long trajectory of research and community engagement with disadvantaged communities. We have sustained, working relations with multiple stakeholder groups across Puerto Rico, including those in Culebra and Salinas.

If SAM is selected for participation in the program, Climate Trace PR commits to regularly engaging with SAM and other key partners of the Environmental Justice Collaborative Problem-Solving Agreement. This includes supporting the local government and stakeholder training modules and sessions and the potential to participate in EJCPS meetings with the Community Core Group and other key partners and stakeholders from our community.

We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

Thank you,

Isatis M Cintron Rodriguez
Executive Director
Climate Trace

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Sociedad Ambiente Marino.

URBANA PLANIFICA

Dear EPA,

Urbana Planifica is a digital platform and a nonprofit organization dedicated to making planning information, activities, and/or environments sensible, meaningful, and usable for as many people as possible. We collaborate with nonprofit organizations and community groups on three main areas: (1) planning education and access to public information, (2) network-building between local communities and advocacy and community development organizations, and (3) community-based plan-making. We are happy to be listed as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by Sociedad Ambiente Marino (SAM).

Role: We are committed to working with SAM and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the Request for Applications (RFA). Urbana Planifica can provide a range of technical and planning support, including support for research and engagement and digital communications, as well as helping in building collaborative partnerships with other stakeholders to develop community climate adaptation plans.

Relationship to Applicant: Urbana Planifica has been following the work of SAM on the conservation and restoration of marine resources in Puerto Rico. Urbana Planifica also shares SAM's interest in research and education and on making information accessible to different stakeholder groups. Urbana Planifica looks forward to collaborating with SAM and the project team to advance environmental and climate justice in community climate adaptation planning.

Relationship to Community: Urbana Planifica has a trajectory of supporting communities in their planning efforts and research needs. We also have experience organizing planning events such as community meetings, stakeholder convenings, and workshops, among others. Additionally, we have an ongoing, working relationship with community groups and organizations in Loíza, Puerto Rico.

If SAM is selected for participation in the program, Urbana Planifica commits to regularly engaging with SAM and other key partners of the EJCPS Agreement. This includes supporting the local government and stakeholder training modules and sessions and the potential to participate in EJCPS meetings with the core group and other key partners and stakeholders from our community.

We look forward to participating in the EJCPS and helping advance environmental and climate justice in community climate adaptation planning.

Thank you,

RE: Letter of Commitment and Support for Environmental Justice
Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for Sociedad Ambiente Marino.

Dear colleagues:

The Interdisciplinary Center for Coastal Studies (CIEL) is a research center from the Department of Social Sciences at the ofCollege of Arts and Sciences. Based on interdisciplinary and applied research, CIEL engages in research, education, mentoring, and the dissemination of information on the complex coastal social processes, emphasizing the relationship between humans and nature. , society, and the environment. CIEL is also a place of work, research, and training for undergraduate and graduate students from various disciplines, such as Marine Sciences, Biology, Social Sciences, and Planning, among others. We are happy to be listed as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program submitted to the Environmental Protection Agency (EPA) by Sociedad Ambiente Marino (SAM).

Role: We are committed to working with SAM and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the Request for Applications (RFA). CIEL can provide a range of technical and planning support, including support for research and engagement, as well as helping in building collaborative partnerships with other stakeholders to develop solutions to coastal adaptation issue(s) at the community level.

Relationship to Applicant: SAM and CIEL have collaborated in the past, through the UPR Sea Grant Program, to develop coastal ecosystems and coral island-wide reports. CIEL looks forward to collaborating with SAM and the project team to advance coastal and marine ecosystem community engagement.

Relationship to Community: CIEL has a trajectory of doing research and community engagement with coastal communities, including but not limited to coastal fishers in Puerto Rico. We have a sustained working relationship with multiple fishers' groups across Puerto Rico, including those in Culebra and Loíza. We also have a lengthy experience involving stakeholders in the conservation of coastal ecosystems, and have a track record in working with them in the development of management plans for Marine Protected Areas, including Culebra.

If SAM is selected to participate in the program, CIEL commits to regularly engage with SAM and other key partners of the Environmental Justice Collaborative Problem-Solving Agreement. This includes supporting the local government and stakeholder training modules and sessions and the potential to participate in EJCPS meetings with the core group and other key partners and stakeholders from our community.

We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

Thanks for your attention to this matter.

Profile

Energetic, creative climate scientist with proven success in supporting community capacity building, science policy, research and program management. Skilled in strategic planning, partnership development, civic diplomacy, participatory and human rights-based decision-making, science communication, climate education, data analysis, international relations, policy analysis, community outreach, coalition building

Education Background

2014-2023

- Rutgers University
- Ph.D. degree in Environmental Sciences | Air Pollution Science and Technology

2008-2014

- University of Puerto Rico, Rio Piedras Campus
- Bachelor degree in Science | Environmental Science & Chemistry

Awards

- NSF Graduate Research Fellowship Program (2016)
- MBRS Rise Scholar. Research assistantships for undergraduate students (2012- 2014)

Working Experience

Climate Justice Postdoctoral Fellow (2022-present)

- **Columbia University**
- Research on source attribution, loss and damage co-creation research, and participatory decision-making ecosystem. Support ecosystem valuation and carbon sequestration for corals in Puerto Rico with Sociedad Ambiente Marino. Support and advance research and engagement initiatives for the Environmental Justice and Climate Justice Network focusing on climate governance.

,Director (2020-present)

- **ACE Observatory**
- Strategic consultancy to strengthen the institutional capacity to incorporate ACE in the National Plans.
- In-depth analysis of champions NDC, national plans, and strategies related to climate change.
- Manage internal and external partnerships

ACE Framework, Consultant (2020-2022)

- **US ACE Focal Point to the United Nations at NOAA**
- Mobilized national community of practice and led knowledge management for the network. Highlighted sector best practices via monthly newsletter, organized action learning workshops, and on-line forums.
- Develop strategic direction, political strategy and manage internal and external partnerships.

- Design and deploy multi-level engagement for increasing ACE implementation in United States through the development of a framework to guide the establishment of an ACE National Strategy.

Steering Committee – Acting Latin America Liaison (2018-present)

- **UN Education Communication Outreach Stakeholder community**
- Senior partnership development and engagement, management and design of engagement
- strategies for civil society, scientist and policymakers around the world.
- Provide expert advice on programmatic and policy issues related to public participation, education,
- access to information and climate science.

Latin America & Caribbean Manager and Board Member (2015-present)

- Citizens Climate International
- Skills: Team Leader. Strategic consultancy. International relationship manager with the Latino Community. Expanding the civic engagement space in the international level, especially in the UNFCCC process. Advising and mentoring internship program. Development of media plans.

Climate Ready Estuaries Program Consultant (2014)

- **San Juan Bay Estuary**
- Convened stakeholder consultations, incorporated relevant input and helped finalized a Citizen Guide for Watershed Climate Change Mitigation and Adaptation.
- Managed campaign and community relationships.
- Planned and deployed workshop on the Estuary Conservation Programs.

Director (2012-2014)

- **Latino Climate Action Network, El Puente**
- Helped establish and coordinated the first island-wide network of experts in local, regional and global climate justice and governance from a 10 member into a 300 member network representing different sectors on the island.
- Provide technical advice and collaboration in local climate change, sustainability and land development policies to executive management, public sector agencies, and community.
- Communicate climate-related issues and facilitate community empowerment from a multi-sectorial approach through partnerships and team building.
- Work closely with Advisory Board to establish performance milestones, budget, and monitor progress.

EDUCATION

PhD Regional Planning, University of Illinois, Urbana-Champaign 2022

MP Planning, University of Puerto Rico, Río Piedras 2016

BA Economics, University of Puerto Rico, Mayagüez 2013

ACADEMIC APPOINTMENTS

Postdoctoral Research Scholar, Columbia University 2023
- Support and advance research and engagement initiatives in urban and water governance, climate adaptation, and disaster prevention and recovery.

Project Manager, Social Vulnerability and Resilience (SOLVER) Research Lab 2022
University of Pittsburgh – funded by NCAR, sponsored by NSF
- Lead qualitative field research with municipal Coordinate qualitative research on social vulnerability, resilience, and public health; supervise undergraduate and graduate students

Visiting Professor, University of Puerto Rico 2020 - 2021
- Taught undergraduate courses in the College of General Studies
- Taught multiple courses in the Graduate School of Planning, including Planning History and Theory, Plan Making, Community and Economic Development Policy, and Planning and Disaster Recovery.

Research Fellow, City University of New York (CUNY) 2019 - 2020
- Conducted case study research on disaster recovery policies and planning processes; presented findings in professional and academic forums; and published a peer-reviewed article in the Centro Journal.

University of Illinois, Urbana-Champaign 2019 - 2020
Graduate Instructor, Department of Urban and Regional Planning
- Served as a graduate instructor in the following courses:
  - Transnational Community Resilience Workshop in Puerto Rico
  - Planning History and Theory

City University of New York, New York 2019 - 2021
Graduate Instructor, Hunter College (remote teaching)
- Served as an instructor in the following course:
  - CDBG-DR: Fondos y Acción para la Recuperación Post Desastre

Research Assistant, Human Impacts on Coastal Ecosystem (HICE) Project 2014 - 2016
University of Puerto Rico, Río Piedras – funded by NASA
Advisor(s): Dr. Maritza Barreto & Dr. Luis Santiago

- Co-designed and implemented mixed-methods research, including surveys, interviews, and choice experiments for ecosystem service valuation.
- Presented at multiple academic forums, including the ACSP 55th Annual Conference.
- Published a peer-reviewed journal article in Environment and Natural Research and two conference proceedings.

PROFESSIONAL EXPERIENCE

Co-founder + Executive Director, Urbana Planifica Inc. 2020 - present

- Provide community planning support to community-based and nonprofit organizations; develop research and engagement activities on issues of urban planning, environmental governance, disaster recovery, and climate adaptation; coordinate a wide range of digital communication initiatives.

Planning Consultant 2021 – 2022

- Conduct research and policy analysis for the Coastal Hazards Adaptation Areas project; commissioned by the Department of Natural and Environmental Resources.
- Developed research briefings about informal housing and community settlements for a community planning project; commissioned by El Enjambre.

GIS System Analyst, Apple, Inc. 2016 - 2017

- Collaborated with other analysts and developers to complete complex GIS analysis projects; inspected, validated, and edited map data; communicated detailed analyses and recommendations to a high-level audience for decision-making purposes.

Policy Planner, Senate of Puerto Rico 2015 - 2016

- Drafted technical reports and senate bills; produced state-wide databases of public schools, hospitals, food banks, and public agencies; and developed policy research projects regarding health care, food waste management, transportation, and spatial analyses.

- Undergrad-thesis: Socio-ecological vulnerability assessment of shallow coral reefs

PROFESSIONAL EXPERIENCE

Mujeres de Islas Inc. | Culebra, PR 10/2021 – Present
Marine social scientist
- Research the viability of collective action for Culebra's fisheries and mariculture enterprises.
- Lead the implementation of the island's food security action plan through the technical assistance of the EPA's Local Food Local Places Program.

Socio-environmental Analysis Lab (SeaLab) | Puerto Rico & Oregon 08/2019 – 09/2021
Graduate Fellow
- Modelled drivers of conflict and cooperation in the artisanal fisheries.
- Analyzed the self-governance strategies of fisherfolk through social networks.

Sociedad Ambiento Marino Inc. | Culebra, PR 09/2017 – 07/2019
Research Technician
- Restored reefs with endangered corals to enhance ecosystem functions.
- Performed geospatial analysis of seagrass and coral reef ecosystems.
- Monitored water quality, meteorology, and hydro-acoustics.
- Coordinated an educational outreach program for a marine protected area.

EXPERIENCIAS

El Puente - ELAC, San Juan, P.R. — *Coordinadora de encuentros comunitarios*

febrero 2022 - PRESENT

Segunda fase de un proyecto de investigación y acción sobre deterioro ambiental en Puerto Rico y sus ramificaciones socio-políticas. Además de asistir en el proceso de investigación, mi rol es servir de enlace con comunidades y organizaciones ambientales que estén interesadas en discutir el tema con mayor profundidad y organizarse a partir de ese interés común.

Climate Trace, San Juan, PR. — *Coordinadora de Enlace Comunitario*

agosto 2021 - presente

Co-coordinadora y facilitadora de la "Asamblea Ciudadana por el Clima", una serie de encuentros con organizaciones ambientales y comunidades alrededor de Puerto Rico para diseñar y proponer una estrategia nacional de cambio climático.

Laboratorio de Limnología Tropical, UPRRP— *Asistente de investigación*

agosto 2015 - mayo 2021

Mis tareas como parte del laboratorio incluyeron llevar experiencias educativas y de investigación a estudiantes en edad escolar; además de dar recorridos guiados por las facilidades y servir de mentora a estudiantes subgraduados.

DESTREZAS

Excelentes destrezas de comunicación verbal y escrita.

Dinamismo y alta ética de trabajo individual y en grupo.

Sobre 10 años de experiencia llevando experiencias educativas a grupos.

Pasión por la naturaleza y por compartir sus maravillas con otros.

CERTIFICACIONES

Certificación como Intérprete Ambiental (NAI) - aprobada con un 95%

IDIOMAS

Español e inglés (verbal y escrito)

EDUCACION

Universidad de Puerto Rico, Río Piedras— *Doctorado en Ciencias Ambientales*

Enero 2020 - presente

Universidad de Puerto Rico, Río Piedras— *Bachillerato en Ciencias Ambientales con segunda concentración en Geografía*

2008 - 2015

PROYECTOS

ACE Assessment Framework — *enero a mayo 2022*

La primera fase del proyecto consistió en realizar una serie de consultas internacionales (abril - mayo 2022) a líderes comunitarios, organizaciones civiles y funcionarios de gobierno sobre lo que es acción por el empoderamiento climático (ACE en inglés) y cómo debería implementarse y evaluarse en sus países. Las consultas nutrieron el desarrollo de la guía "ACE Assessment Framework: Articulating People Centered Climate Action", la cual se presentó en la Conferencia de Cambio Climático de las Naciones Unidas en junio de 2022 en Bonn, Alemania.

"Human Impact on Coastal Ecosystems in Puerto Rico" (HICE-PR) — *2015 a 2018*

El proyecto, que pretendía estudiar la relación entre las actividades humanas a lo largo de una cuenca y los impactos en la zona costera, incluyó la facilitación de reuniones con comunidades y partes interesadas a lo largo de las dos zonas estudiadas.

Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: The Bronx is Blooming

Address: Ex. 6 Personal Privacy (PP)

City: Bronx

State: NY: New York Zip Code: 10451

B. Unique Entity Identifier (UEI): X4MYE8H3B4B9

C. Applicant/Recipient Point of Contact

Name: Jennifer Beaugrand

Phone: Ex. 6 Personal Privacy (PP)

Email: jenn@bronxisblooming.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☐ Yes	☒ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☐ Yes	☒ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☐ Yes	☒ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

NA

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

NA

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Jennifer Beaugrand	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

US EPA Environmental Justice Collaborative Problem-Solving Program
Project Work Plan - Narrative

1.0 PROGRAM OBJECTIVES

a. Project Summary Page

Project Title: Program for Leaders Advancing their Community's Environment (PLACE): Partnership Building for Program Expansion and Urban Forestry Workforce Development in Frontline Communities
Project Location: Bronx, New York (Various Locations)
Applicant Information: Jennifer Beaugrand, Executive Director, The Bronx is Blooming, jenn@thebronxisblooming.org, Ex. 6 Personal Privacy (PP) Bronx, NY, 10451

Brief Description of Applicant Organization: The Bronx is Blooming works to improve environmental health, build community, and increase youth employment in neighborhoods whose residents suffer NYC's highest environmental and public health burdens, and highest rates of poverty. Our mission is to grow and support a culture of environmental stewardship in The Bronx. We accomplish this through programs that engage community members in the restoration of park ecosystems to support local environmental and public health: PLACE employs and trains local youth to lead communities in the care of their parks, while GREEN provides civic groups, schools, and volunteer groups with hands-on environmental education and stewardship workshops.

Small CBO Set Aside Track: Yes. Employee roster is included in the attachments.

Project Abstract: The Bronx is Blooming's Program for Leaders Advancing their Community's Environment (PLACE) hires local college students to mentor and train Bronx youth to then lead groups of volunteers in park revitalization projects. Our unique train-the-trainer model flips the mentor structure usually seen in under-resourced communities. In addition to seasonal employment, participants receive training in leadership and horticulture skills, environmental education, exposure to higher education and green vocational jobs, and professional development support. Through new partnerships, we will scale PLACE to engage more than 300 students to lead 3,000 volunteers in the stewardship of 3,000 trees, planting of 500 new trees and 3,000 native plants in 12 parks over the 3-year period.

To provide pathways to employment in the environmental sector for highly engaged students, this project will extend PLACE into the spring and fall bridge seasons, with a focus on advancing technical skills and providing critical maintenance during existing gaps in our program. Incorporating Citizen Pruner training and certification for 120 PLACE participants will help prepare these young people for environmental jobs while establishing a community of tree stewards in areas of the city that are most in need.

This project will promote environmental justice by building the capacity of chronically overburdened Bronx communities to address long-standing environmental harms and public health risks, especially those related to air quality, excessive heat, and park access. It leverages existing youth employment and workforce development programs and fosters new partnerships to make tangible improvements and increase climate resiliency.

ED_016126_00001340-00001

Project Type(s): Youth Development Relating to Environmental Justice, Environmental Job Training, Air Quality and Asthma, Heat Vulnerability
Special Considerations: Climate Change
Environmental Issues: Air, Heat, Park Access
List of Project Partners: Mosholu Montefiore Community Center (CBO), Roads 2 Success (CBO), Universal Activities Unlimited, Inc. (CBO), Trees New York (non-profit), The Nature Conservancy (non-profit).
QAPP: Not needed

b. Environmental and Public Health information of the Underserved Community

The Bronx is Blooming's Program for Leaders Advancing their Community's Environment (PLACE) currently operates in eight parks around The Bronx. PLACE serves Bronx college students, high school students, and other youth in the program, community members who participate as volunteers in revitalization projects, and the hundreds of thousands of Bronx residents who live in the surrounding neighborhoods and who use these parks.

According to the US Census, The Bronx is home to approximately 1.4 million people, 91% of whom identify as people of color and 26% of whom live in poverty, compared to 13% statewide. The borough's median household income is $43,726, compared to $70,663 in NYC as a whole. More than one quarter (27%) of adults in the Bronx have not completed high school, compared to 17% citywide, and just 28% have a college degree, compared to 45% citywide.

Bronx youth face the worst economic prospects in the country, based on the share of young adults unemployed, living at home with a parent, lacking a high school diploma, or living in poverty (Bloomberg). The COVID-19 pandemic has exacerbated economic issues for youth in The Bronx and NYC as a whole. Post-pandemic recovery of youth employment in the city lags behind national levels; remaining 8 percentage points lower than in 2019 compared to 0.4 points nationally (State Deputy Comptroller for the City of New York).

PLACE Students are hired through NYC's youth workforce development programs, which predominantly serve minority and low-income youth. A 2016 study found that 80-94% of participants identify as people of color and that as many as 77% were from families who are eligible for federal assistance (Youth Employment Task Force Report).

The Bronx's large, vulnerable population is disproportionately affected by a range of environmental harms that are exacerbated by climate change, especially air pollution and the urban heat island effect, and their associated health risks. In addition, many Bronx residents lack adequate access to well-maintained parks and green spaces, which are critical to maintaining physical health, mental well-being, and overall quality of life.

Due to industrial land uses, heavy truck traffic, and multiple highways resulting from decades of inequitable land use policies, Bronx neighborhoods suffer some of the worst levels of air pollution in the city. The Bronx is in or above the 90th percentile in the New York State for all Air Quality Environmental Justice Indices (Particulate Matter 2.5, Ozone, Diesel Particulate Matter, Air Toxics Cancer Risk, Air Toxics Respiratory HI) and in the 89th percentile for Traffic Proximity (EJScreen). The Bronx has more diesel truck traffic (Transform Don't Trash) and industrially zoned areas (Maantay) than any other borough. Morris Heights, located just

northwest of two parks where we work and adjacent to the Major Deegan and Cross Bronx Expressways, is the community with the highest exposure to vehicle pollution in the state, with PM2.5 levels 2.5 times higher than the average (Union of Concerned Scientists). Air pollution is one of the most critical environmental threats to urban populations; exposure to common air pollutants has been linked to respiratory and cardiovascular diseases, cancers, and premature deaths (NYC DOH), and also increases vulnerability to COVID-19 (Harvard).

The impacts of poor air quality on public health in The Bronx are well documented. At 34.9 per million, the age-adjusted asthma death rate in The Bronx is nearly three times the state average of 11.9 (NYS Health). According to the NYC Department of Health and Mental Hygiene (DOH), children living in The Bronx have been disproportionately affected by asthma for over a decade. In 2016, the asthma-related emergency department visit rate for Bronx children aged 5 to 17 was more than two times the rate of all other NYC boroughs combined. In the height of the pandemic, The Bronx's COVID-19 case rate was only 1% more than the citywide rate, but its death rate was 26% higher, reflecting the prevalence of pre-existing health conditions, such as high rates of asthma, obesity, and diabetes, as well as differences in access to health care.

The Bronx experiences higher temperatures and poorer air quality as a result of the Urban Heat Island effect. A study published in Environmental Health Perspectives found that The Bronx had the highest levels of heat-related morbidity and mortality of any NYC borough. Urban Heat Islands in New York City disproportionately affect Black and brown neighborhoods, a circumstance that has been tied to decades of disinvestment and historic policies such as redlining. Residents of these neighborhoods also tend to have much higher rates of obesity, asthma, and cardiovascular disease, increasing risks associated with extreme heat. According to the DOH, Black New Yorkers are twice as likely to die from heat exposure as white New Yorkers.

The neighborhoods in which we work face 'High' or 'Very High' risk of heatwaves according to the City's Heat Vulnerability Index (HVI). The HVI is an analysis of social and environmental factors that contribute to residents' risk of dying during and immediately following extreme heat, including surface temperature, green space, access to home air conditioning, and the percentage of residents who are low-income and/or non-Latino Black. The DOH reports that the differences in risk factors across neighborhoods are rooted in past and present racism.

While The Bronx has more parkland than any other borough, much of that land is consolidated in a few large parks in the north; in other areas of the borough, open space is limited to small parks and playgrounds that lack significant numbers of trees and other vegetation. Low-income neighborhoods are disproportionately impacted by a lack of adequately sized parks. Improving the stewardship and maintenance of parks in these neighborhoods is as critical as the construction of new parks in addressing issues of access and equity (NYC Green Fund Literature Review).

Bronx parks are severely underfunded: Manhattan parks receive 1.5 times more public funding and 90 times more private funding than Bronx parks (Building the Future of New York, Parks and Open Spaces). Central Park has dozens of full-time gardeners responsible for horticulture and upkeep. Soundview Park (where we hosted weekly stewardship events, planted nearly 1,000 plants and removed more than 500 wheelbarrows of debris in 2022), by contrast,

does not have a single gardener, despite being the largest park in the South Bronx and about ¼ the size of Central Park.

By combining youth development with community building and park revitalization, PLACE simultaneously addresses the socio-economic challenges facing Bronx youth and the environmental and public health harms faced by the broader community, while building the community's stewardship capacity.

PLACE hires young people from Bronx neighborhoods to lead volunteer groups in environmental restoration projects during the summer and school year youth employment program sessions. By working through NYC's workforce development programs, PLACE provides opportunities primarily for young people from disadvantaged backgrounds who often have limited access to other opportunities.

PLACE flips the mentor structure usually seen in under-resourced communities. Instead of bringing in outside volunteers to mentor "at-risk" youth, our train-the-trainer model prepares Bronx college students to mentor groups of Students and charges these Students with leading and educating groups of 15-150 volunteers in environmental service projects. Students are not beholden to successful professionals donating their time; instead, successful professionals see them as adept, knowledgeable leaders – the way they begin to see themselves.

In addition to seasonal employment, participants receive leadership training and learn about environmental justice and ecology. As they care for trees and native plants in community parks, they learn about environmental justice and how their work helps combat the effects of air pollution, the urban heat island, stormwater runoff and climate change, fostering an interest in and increasing community awareness of environmental issues.

PLACE Students gain exposure to higher education and preparation for green vocational jobs. In addition to receiving 1-on-1 mentorship, each PLACE Student participates in 2-3 college tours. Because college may not be the right option for every participant, we also prioritize technical skills and professional development for environmental jobs. By 2030, up to 60 million jobs could be created in the green economic sector. These tend to be higher-income positions, paying 10-20% more than similar jobs in other fields (Decent Jobs for Youth). The PLACE alumni program helps current and former participants take the next step toward careers in the environmental field, where their communities and backgrounds are underrepresented.

By helping young people achieve economic security, our work leads to more actively engaged citizens who are better able to address the needs of their communities. PLACE participants gain new skills and experiences that help them see their own potential to improve their local environment, enable them to connect with the natural areas in their city, and prepare them to succeed in future endeavors.

We approach community-driven environmental stewardship and park maintenance as an opportunity to reduce environmental harms that contribute to high asthma rates, elevated temperatures, and poor water quality in our overburdened communities, and to enhance local habitat and biodiversity. PLACE participants lead volunteers in environmentally beneficial projects that include tree stewardship, invasive species removal, and planting of native trees, shrubs and perennials that support pollinators. This work improves air quality, reduces the heat

ED_016126_00001340-00004

island effect, absorbs stormwater to decrease flooding and combined sewer overflows, and creates pockets of healthy habitat throughout the borough.

By planting hundreds of new trees and caring for over a thousand trees each year, PLACE teams create a denser, healthier canopy in Bronx parks, helping minimize the impact of air pollution on environmental and public health for generations to come. A mature tree absorbs more than 48 pounds of carbon dioxide each year (Arbor Day). Our work supports trees that absorb nearly 50,000 pounds of carbon dioxide each year from our community. Trees can also absorb between 7-24% of PM2.5 within roughly 100 meters (The Nature Conservancy).

In addition to increasing carbon absorption, tree planting and stewardship in our parks helps mitigate the increased heat vulnerability associated with climate change. Parks, especially those that are densely wooded, can help counter high urban temperatures that are exacerbated by heat-trapping buildings, pavement and concrete (Trust for Public Land). In addition to providing shade, trees cool the air temperature through evapotranspiration. According to the EPA, evapotranspiration can reduce temperatures by 2-9 degrees, depending on density. The cooling effect of parks with healthy tree canopies can extend into surrounding neighborhoods. One study detected reduced temperatures up to a half mile away (Trust for Public Land).

Through this project, we will expand PLACE to serve more youth and more community parks. We will strengthen existing and build new relationships with youth employment providers to grow recruitment from different areas around the borough, enabling us to bring on Students from communities close to our parks and to identify new potential park sites. We will extend PLACE into the bridge seasons (between the summer and school year programs) for highly engaged students with a strong interest in environmental careers. These Students will receive additional training, work with our Environmental Team to run park revitalization projects, and fill a critical maintenance gap in our program, ensuring the success of new trees and plants.

Through our partnership with Trees New York we will provide all PLACE Mentors and bridge season Students with Citizen Pruner training and certification, which is required to legally care for street trees. Certification will convey additional, marketable technical skills and the ability to help support the urban canopy in their underserved neighborhoods, this supports the *NYC Urban Forest Agenda* goal of expanding urban forestry career and leadership opportunities to advance equity, targeting communities that are underemployed and to those who live in areas most vulnerable to climate change effects.

By engaging community groups in environmental service projects and by maintaining a regular presence in our parks, PLACE also helps build broader community awareness and capacity to both care and advocate for parks, while fostering a sense of community. It unites community members through accessible environmental education and hands-on restoration that transforms peoples' ability to appreciate nature and engage with the world around them. We find a sense of belonging and security can be fostered as people create long-lasting connections between themselves, their neighbors, and the natural environment.

c. Organization's Historical Connection to the Underserved Community

Since its inception, The Bronx is Blooming has partnered with agencies including NYC Parks; Bronx community groups, including "friends of" park groups; environmental, youth

employment, and community development organizations, local schools, colleges, and universities; and other entities to engage the Bronx's diverse communities.

The Bronx is Blooming was founded in 2011 by Executive Director Jennifer Beaugrand, a native New Yorker and Bronx resident. While working in The Bronx, first at the NYC Department of Parks & Recreation (NYC Parks) as part of the Neighborhood Parks Initiative and then building a green youth leadership program at another local nonprofit, she was inspired by the capacity of the Bronx community to transform their parks. Collaborating with a team of institutional and community partners, she launched a new non-profit to catalyze borough-wide park revitalization through community-driven environmental stewardship.

Over the past 12 years, The Bronx is Blooming has engaged more than 20,000 volunteers in park revitalization projects at 20 Bronx community parks and green spaces. Our staff, students, and volunteers have planted more than 18,000 native plants and stewarded more nearly 16,000 trees. In 2022 alone, our teams held more than 80 events, added more than 400 new native trees, and completed 20,000 hours of service - the equivalent of more than 10 park staff members working full time.

The Program for Leaders Advancing their Communities Environment (PLACE) summer youth development program was launched in 2013, when the first group of Mentors and Students were hired through the NYC Summer Youth Employment Program and Mosholu Montefiore Community Center to lead volunteers in caring for community parks. **To date, the PLACE summer program has provided seasonal employment, leadership and horticulture training, exposure to higher education, and professional development for more than 350 Bronx high school and college students.**

Last year, we leveraged new partnerships with youth employment/workforce development providers to launch a new 17-week PLACE school year program. The school year PLACE program offers a paid opportunity to learn about local ecology and environmental justice, develop professional skills, and participate in hands-on park revitalization work.

Surveys and interviews conducted with PLACE participants at the start and end of the program show how they have grown. They report increased environmental and horticultural knowledge and immense growth in leadership and interpersonal skills. **Participants share that exposure to our work, to higher education, and to the myriad of jobs in the green-collar workforce opens their eyes to new opportunities and inspires them to take on new challenges.**

From the start, The Bronx is Blooming has relied on close partnerships with Bronx institutions and community groups, as well as the direct engagement of local community members, to create an effective program. We aim to grow and support a culture of stewardship and civic participation that empowers Bronx residents to care and advocate for their parks. We consistently seek input from program participants, partners, and the public to help inform planning for PLACE. As a grassroots organization with diverse partners and a strong presence in our parks, we are able to get substantial community feedback that helps drive our work.

- We **survey** PLACE participants at the beginning, in the middle, and at the end of each season about their experience and what they would like to see in the program and their parks, to help shape the program's development.

ED_016126_00001340-00006

- Through our **partnerships** with NYC Parks and Recreation staff and local park groups, we learn about needs/opportunities to help guide our restoration and maintenance efforts.
- Since our staff is regularly in the field, we are also able to gather from **volunteers** participating in our stewardship events and **community members** who use these spaces.
- The consistent presence of our PLACE teams in parks during the summer enables them to develop relationships with **local stakeholders** that inform future priorities.
- We work with **local elected officials** to identify new partnerships and project sites.
- At a larger scale, our **partnerships with other environmental organizations** around the city help us to ensure that we are building a program that addresses broader citywide goals related to youth development, environmental justice, and climate change.

We are currently exploring opportunities, including online and SMS-based platforms, to formally gather additional community input.

d. EJCPS Model

The Bronx is Blooming was founded on the premise that by bringing together diverse partners and creatively leveraging resources, we can harness the desire and strength of our community to address complex, long-standing environmental justice issues in underserved Bronx communities that are disproportionately affected by environmental and public health harms. We rely on collaborative problem-solving with a range of partners including the NYC Department of Parks & Recreation; Bronx community groups, including "friends of" park groups; environmental, youth employment, and community development organizations, local schools, colleges, and universities; and other entities to make lasting change by simultaneously addressing the socio-economic and physical environmental drivers of injustice.

In developing and growing the Program for Leaders Advancing their Community's Environment (PLACE) over the past ten years, The Bronx is Blooming has carried out the first steps of the EJCPS Model. This project focuses primarily on Element 4, with some work on Element 5.

Element 1: Issue Identification, Community Vision, and Strategic Goal Setting

PLACE was launched following collaborative efforts with a wide range of local stakeholders to identify local environmental justice issues, especially those related to air pollution, the urban heat island effect, and inequitable access to quality green spaces. The program was designed around a vision of leveraging New York City's workforce development programs and the unique resources of Bronx communities to transform the borough's parks and green spaces.

Element 2 - Community Capacity-Building and Leadership Development: As PLACE has grown, we have focused on building both organizational and community capacity. Through continued partnership development, we have expanded the program in size and impact. We have worked with partners to deepen the program's curriculum, incorporating additional leadership training, more intensive technical training, education about environmental justice issues and ecology, and greater exposure to higher education and career opportunities.

Element 3 - Consensus Building and Dispute Resolution: There is broad community and stakeholder support for PLACE. We have worked to build consensus around a vision for the future of PLACE, youth development, and park revitalization by identifying common goals and

ED_016126_00001340-00007

involving stakeholders in the early stages of project planning and implementation. Therefore, we have not had to manage disputes, and our work results in outcomes that are reflective of community needs. Consensus building is an on-going and iterative process; we will continue to extensively engage all stakeholders as part of this project.

Element 4 - Multi-stakeholder Partnerships and Leverage of Resources: This project will focus on (1) scaling our successful model to expand our reach geographically and in the number of people served, (2) providing pathways to environmental jobs for highly engaged participants, and (3) increasing the program's potential to support citywide climate resiliency efforts that aim to grow and steward the urban canopy. We will leverage additional resources and foster new partnerships to achieve tangible environmental and health improvements in our communities.

Since its inception in 2013, PLACE has leveraged New York City's youth workforce development programs to provide Bronx youth with seasonal employment, environmental education, academic guidance, professional development, and the opportunity to participate directly in the environmental stewardship of community parks.

Unlike many other park improvement focused programs, PLACE is not focused around one particular park or neighborhood; the model can be replicated to include any underserved park in any environmental justice community throughout the borough or city. However, in order to expand, we need to build relationships with more community-based youth employment providers/workforce development organizations to access new pools of students. Establishing and strengthening these relationships through this project will significantly increase the number of students who have access to PLACE and the number of parks in which we can work. Working with new partners will also help us to recruit from communities that directly surround parks where we work, making it easier for young people to work and become leaders in their own communities where they have strong ties. These partnerships will help us to further leverage existing city resources, which currently fund nearly 100,000 summer positions, and will help achieve goals shared by The Bronx is Blooming and the workforce development organizations.

As we continue to grow PLACE, we are focused on creating pathways to environmental jobs and careers, within our organization and beyond. We are working to extend the summer and school year PLACE programs into the spring and fall "bridge" seasons to provide highly engaged participants an opportunity to continue to work with us, furthering their skills and maintaining our work sites during these critical gap seasons. This additional training will help prepare them for future employment opportunities with The Bronx is Blooming, as assistants on our service projects, Mentors, interns, and staff. Furthermore, through our partnership with Trees New York, we will provide Citizen Pruner training and certification for Mentors and Students. This adds a tangible qualification to prepare them for careers in urban forestry and horticulture and helps equip local communities with skills to steward the urban canopy.

Element 5 - Constructive Engagement by Relevant Stakeholders: Also as part of this project, we will continue to engage with The Nature Conservancy's Forest for All NYC Coalition and their Workforce Development Action Team. The Coalition is composed of environmental organizations, parks groups and alliances, academic institutions, industry partners, and government agency advisors. The Bronx is currently underrepresented in the Coalition. Collaborative visioning and problem-solving through this partnership will integrate PLACE into

ED_016126_00001340-00008

broader efforts to provide early exposure and widespread access to forestry and environmental stewardship in underserved communities, provide support to deepen PLACE's impact on citywide efforts to mitigate climate change, and ensure that the Coalition's work is tied to on-going grassroots efforts in The Bronx.

e. Project Linkages

Funding the expansion of the Program for Leaders Advancing their Community's Environment (PLACE) will help the EPA fulfill Goal 2, Objective 2.1 in its Strategic Plan. This project promotes environmental justice at the local level by building the capacity of chronically underserved and overburdened communities in The Bronx to address the environmental and public health harms they have faced for generations and to increase climate resilience. It leverages existing youth employment programs and workforce development programs to:

- **Build a community of environmental stewards** by training hundreds of Bronx youth in leadership and horticulture skills, providing college preparation and professional development support, and by engaging community members in hands-on environmental education and stewardship projects.
- **Support citywide climate resiliency efforts** by planting and stewarding trees and by certifying 100+ Bronx youth as Citizen Pruners, giving them a foundation for careers in urban forestry and enabling them to care for trees in their communities.
- **Make tangible environmental improvements in Bronx parks and green spaces** to address the poor air quality, extreme heat, water quality, and inadequate access to high-quality green spaces in underserved neighborhoods.
- **Address economic injustices** that contribute to continued disenfranchisement of Bronx youth and limit local community participation in environmental advocacy and planning.

f. Partner and Collaborate

The Bronx is Blooming collaborates with a wide range of partners including the NYC Department of Parks & Recreation, Bronx-based and citywide organizations, schools, colleges, and local community groups to make the Program for Leaders Advancing their Community's Environment (PLACE) a success. This project will grow our relationships to serve more students, parks, and communities, dramatically increase the number of Bronx youth who are trained to care for trees, and cultivate urban forest careers to help grow and enhance the urban canopy.

PLACE leverages **NYC's Summer Youth Employment Program (SYEP)**, the nation's largest youth employment program, which connects tens of thousands of youth between the ages of 14 and 24 with paid work experience each summer. SYEP participants can explore different interests and career pathways, develop productive workplace habits, and engage in learning experiences that strengthen their social, civic, and leadership skills. Last year, the City allocated additional funding to the program, increasing the number of paid SYEP positions to 90,000, as part of an overall strategy to keep youth engaged and active over the summer months when crime spikes.

Since launching PLACE in 2013, we have partnered with **Mosholu Montefiore Community Center (MMCC)**, a community-based youth employment provider, to place SYEP participants in the summer program. MMCC will continue to be a key partner on this project, however we are nearly reaching their maximum recruitment capacity of interested students. In the last year,

ED_016126_00001340-00009

under the direction of our new PLACE Program Manager, we added two new providers, **Roads 2 Success** and **United Activities Unlimited**, to help us launch our school year PLACE program.

To achieve our goal of expanding PLACE, a key component of this project will be to (1) strengthen our relationships with these organizations to engage more students in both the summer and school year programs and (2) identify additional providers that serve other neighborhoods around the borough. Working with providers that are located near potential park sites helps to achieve our goal of recruiting students from the adjacent neighborhoods, with ties to the surrounding communities.

Trees New York works to plant, preserve, and protect New York City's urban forest through education and community participation. They provide tree care training and lead youth and adult volunteers in caring for NYC street trees. Trees New York also offers Citizen Pruner training and certification, a 12-hour classroom and on-site program. Upon successful completion of the final exam, participants receive a license from Trees New York and NYC Parks to legally prune NYC street trees. Trees New York is the only institution designated to train and license Citizen Pruners in New York City. According to Trees New York, "Citizen Pruners not only provide essential tree care services, they also play important leadership roles in their communities."

To achieve our goals of providing career pathways for PLACE participants, increasing our community's capacity to care for their environment, and growing an urban forestry workforce in underserved and vulnerable communities, this project will incorporate Citizen Pruner training in the PLACE Program more broadly, ensuring that all Mentors and select Students have the opportunity to become certified Citizen Pruners. Training will be offered biannually as part of our bridge season PLACE sessions, which will provide the most engaged and motivated Students from the summer and school year sessions the opportunity to further develop their skills and support our environmental restoration efforts.

The Bronx is Blooming is part of the **Forest for All NYC Coalition**, a diverse group convened and facilitated by **The Nature Conservancy** New York Cities Program that is working to carry out the *NYC Urban Forest Agenda*: *Toward a Healthy, Resilient, Equitable, and Just New York City* (2021), a strategic roadmap that provides detailed recommendations to meaningfully protect, maintain, expand, research, and promote the NYC urban forest to benefit all New Yorkers. As part of its plan for investment, the *Agenda* highlights the expansion of urban forestry career and leadership opportunities targeted to communities that are underemployed and to those who live in areas most vulnerable to climate change effects. Our PLACE Program Manager participates on the Coalition's Workforce Development Action Team and has agreed to host interns through the partnership.

To achieve our shared goals of providing early exposure and widespread access to forestry and environmental stewardship in underserved communities and building a citywide forestry workforce, this project will include working within the Coalition to define and execute a clear vision for collaboration and program expansion to support citywide climate response goals.

2.0 Project Activities / Milestone Schedule / Detailed

a. Project Activities

This project will leverage resources and partnerships to engage Bronx youth in environmental restoration projects that directly mitigate environmental and public health harms, while building local stewardship capacity in environmental justice communities.

The Program for Leader Advancing their Community's Environment (PLACE) summer session, operating since 2013, will run each year of this project from June to August. College students hired as PLACE Mentors will begin leadership, project management, and horticulture training in June and then work 30-35 hours each week until mid to late August on project preparation, set-up, and leading their groups of Students. PLACE Students, hired through youth employment providers/workforce development programs, will then receive training and support to lead park revitalization projects, incorporating tree planting and stewardship, invasive species removal, and native species planting, for groups of 15-150 volunteers, 25 hours per week in July and August. Students will also participate in college tours and other academic and professional development activities to support their growth.

The PLACE school year session, launched in 2022, will run each year of this project from December to March, offering a 17-week paid internship program during which Students, supported by Mentors, gain knowledge about environmental justice issues and ecology, leadership skills, exposure to other community organizations, and hands-on experience with environmental stewardship. School year PLACE Students will work 10 hours per week and receive academic and professional development guidance.

From Year 1 to Year 3 we will grow the number of summer Students by 50%, from 80 to 120, and double the number of school year Students, from 10 to 20. Will also add 3-4 new parks.

We will establish spring and fall "bridge" PLACE sessions by extending the summer session to November and the school year session to June, providing an opportunity for the most engaged Students, with the greatest interest in pursuing environmental careers, to receive additional training to prepare them for subsequent jobs in the environmental field, either with us, as assistants on environmental revitalization projects, Mentors and/or interns, or other positions in public, private and non-profit sectors. They will also have a crucial role in maintaining project work sites during critical gap periods.

A key component of this project will be partnership building to expand PLACE to serve more young people and more parks, and to build the New York City's urban forestry workforce. Through regular coordination meetings, our PLACE Program Manager will strengthen our long-term and fledgling relationships with three youth employment/workforce development providers. He will collaborate with these partners to improve recruitment strategies and program curriculum to achieve shared goals. He will also identify new partner organizations to access new pools of students in different neighborhoods, especially those near existing or potential PLACE park sites.

Leveraging our partnership with Trees New York, we will integrate Citizen Pruner training and certification for Mentors and Students into the PLACE program bridge seasons. Citizen Pruner

training is a 12-hour course that includes 4 in classroom sessions and 1 field session. Upon successful completion of the test, participants receive a Citizen Pruner license. Trees New York is the only institution designated by NYC Parks to license New Yorkers to legally prune street trees. This partnership will have the dual benefit of providing Bronx youth with additional horticulture credentials and helping to build a community of tree stewards in underserved neighborhoods.

Through this project we will also grow our participation in The Nature Conservancy and the Forest for All Coalition to work toward achieving our mutual goal of establishing an urban forestry workforce in environmental justice communities that are especially vulnerable to climate change. Our PLACE Program Manager will be an active member of their Workforce Development Action Team, and will work to increase involvement of Bronx organizations, host interns in coordination with the Coalition, and develop short and long-term strategies for collaboration. As initial steps, The Nature Conservancy and other Coalition members will share their expertise about environmental and forestry careers with PLACE participants and we will connect program graduates to job opportunities through our PLACE Alumni Network.

On-going work throughout the project will also include project oversight and management by our Executive Director and Program Operations Manager, as well as strategic communications (social media, newsletters, press) and relationship building to increase awareness of the program, highlight opportunities to get involved, and showcase impact of our work.

b. Milestone Schedule

Activity	Start	End
YEAR 1		
Build and strengthen relationships with School Year PLACE youth employment/workforce development organizations (increase from 2 to 3)	Nov 2023	Nov 2023
Partner with providers to recruit 10 school year PLACE participants and enhance collaborative professional development curriculum	Nov 2023	Dec 2023
Implement School Year PLACE, providing 10 Students with Mentors and paid internships focused on environmental education, professional development, and hands-on stewardship opportunities Identify highly engaged students for Spring Bridge Program	Dec 2023	Mar 2024
Implement Spring Bridge PLACE providing 2-5 Students with extended employment and training to prepare for environmental jobs	Mar 2024	Jun 2024
Build and strengthen relationships with Summer PLACE youth employment/workforce development organizations (increase from 1 to 2)	Feb 2024	Apr 2024
Hire 2 Program Assistants, 10 PLACE Mentors to lead Summer PLACE Teams	Apr 2024	May 2024
Partner with providers to recruit 80 Summer PLACE Students from diverse Bronx communities	May 2024	Jun 2024
Provide Citizen Pruner training and certification for 20 PLACE Mentors and Students with Trees New York	Jun 2024	Jul 2024

Implement Summer PLACE with 10 Mentor-led teams of Students carrying out environmental restoration projects in 10 Bronx parks Identify highly engaged students for Fall Bridge Program	Jul 2024	Aug 2024
Implement Fall Bridge PLACE providing 8-12 Students with extended employment and training to prepare for environmental jobs **Provide Citizen Pruner training and certification for 20 PLACE Mentors and Students with Trees New York**	Aug 2024	Oct 2024
YEAR 2		
Build and strengthen relationships with School Year PLACE youth employment/workforce development organizations (increase from 3 to 4)	Sep 2024	Nov 2024
Partner with providers to recruit 15 school year PLACE participants and enhance collaborative professional development curriculum	Nov 2024	Dec 2024
Implement School Year PLACE, providing 15 Students with Mentors and paid internships focused on environmental education, professional development, and hands-on stewardship opportunities Identify highly engaged students for Spring Bridge Program	Dec 2024	Mar 2025
Implement Spring Bridge PLACE providing 3-7 Students with extended employment and training to prepare for environmental jobs	Mar 2025	Jun 2025
Build and strengthen relationships with Summer PLACE youth employment/workforce development organizations (increase from 2 to 3)	Feb 2025	Apr 2025
Hire 2 Program Assistants, 12 PLACE Mentors to lead Summer PLACE Teams	Apr 2025	May 2025
Partner with providers to recruit 100 Summer PLACE Students from diverse Bronx communities	May 2025	Jun 2025
Provide Citizen Pruner training and certification for 20 PLACE Mentors and Students with Trees New York	Jun 2025	Jul 2025
Implement Summer PLACE with 12 Mentor-led teams of Students carrying out environmental restoration projects in 11 Bronx parks Identify highly engaged students for Fall Bridge Program	Jul 2025	Aug 2025
Implement Fall Bridge PLACE providing 10-15 Students with extended employment and training to prepare for environmental jobs **Provide Citizen Pruner training and certification for 20 PLACE Mentors and Students with Trees New York**	Aug 2025	Oct 2025
YEAR 3		
Build and strengthen relationships with School Year PLACE youth employment/workforce development organizations	Sep 2025	Nov 2025
Partner with providers to recruit 20 school year PLACE participants and enhance collaborative professional development curriculum	Nov 2025	Dec 2025

Implement School Year PLACE, providing 20 Students with paid internships focused on environmental education, professional development, and hands-on stewardship opportunities Identify highly engaged students for Spring Bridge Program	Dec 2025	Mar 2026
Implement Spring Bridge PLACE providing 5-10 Students with extended employment and training to prepare for environmental jobs	Mar 2026	Jun 2026
Build and strengthen relationships with Summer PLACE youth employment/workforce development organizations (increase from 3 to 4)	Feb 2026	Apr 2026
Hire 3 Program Assistants, 14 PLACE Mentors to lead Summer PLACE Teams	Apr 2026	May 2026
Partner with providers to recruit 120 Summer PLACE Students from diverse Bronx communities	May 2026	Jun 2026
Provide Citizen Pruner training and certification for 20 PLACE Mentors and Students with Trees New York	Jun 2026	Jul 2026
Implement Summer PLACE with 14 Mentor-led teams of Students carrying out environmental restoration projects in 11 Bronx parks Identify highly engaged students for Fall Bridge Program	Jul 2026	Aug 2026
Implement Fall Bridge PLACE providing 15-20 Students with extended employment and training to prepare for environmental jobs **Provide Citizen Pruner training and certification for 20 PLACE Mentors and Students with Trees New York**	Aug 2026	Oct 2026
On-going		
Strategic communications (social media, newsletters, press) and relationship building to increase awareness of the program, highlight opportunities to get involved, and showcase impact of our work.	Nov 2023	Oct 2026
Participate in Forest for All NYC Coalition to support integrating PLACE into citywide urban forestry workforce development efforts.	Nov 2023	Oct 2026

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures

a. Environmental Results (Logic Model) - Attachment

b. Performance Measurement Plan

The Bronx is Blooming regularly uses quantitative and qualitative metrics to measure and track its success in achieving environmental restoration, youth development, and community building goals. We track the number of trees stewarded, native species planted, bags of trash and debris removed, volunteers participating, and volunteer hours committed for each site, as well as the number of PLACE participants and the trainings, college tours, and community events in which they participate. This data allows us to document the increased impact our

ED_016126_00001340-00014

programs have had as they have grown over time and estimate future impacts with further expansion. For this project, we will also track the number of youth who receive Citizen Pruner training and become certified and will work with the Trees for All NYC Coalition to identify other key indicators related to urban forestry workforce development as part of broader, citywide efforts.

Using data on the benefits of healthy trees we are able to quantify the environmental benefits of our tree stewardship efforts. For example, research has shown that a mature healthy tree can absorb more than 48 pounds of carbon dioxide (ArborDay) and as much as 100 gallons of water per day (NC State University). Based on these figures, we estimate that by stewarding 1,000 trees each year our PLACE teams help to absorb 48,000 pounds of carbon monoxide and 36,500,000 gallons of rainfall and runoff each year.

We believe that the most significant impact of our work is the change we see in the people who participate in our programs. The Mentors, Students, and volunteers who work with us gain new skills and experiences that help them see their own potential to improve their neighborhood parks, enable them to connect with the natural areas in their city, and prepare them to succeed in future endeavors. We conduct robust environmental knowledge and leadership surveys, as well as interviews, with PLACE participants at the start and end of the program, giving us the opportunity to see how they have grown throughout their time working with us. These surveys and interviews provide qualitative information on participant experience as well as quantitative educational outcome measurements.

c. Sustainability Plan and Community Vision

In The Bronx, there is broad community interest in and momentum around addressing long-standing environmental justice issues, enhancing youth and workforce development for green jobs, and increasing climate resiliency, and a strong sense of collaboration. The Bronx is Blooming maintains strong partnerships with many Bronx organizations through which Program for Leaders Advancing their Community's Environment (PLACE) participants learn about on-going work in the borough including Cap the Cross Bronx Expressway, the Bronx River Greenway and restoration of the Bronx River, and the Rainbow Garden in Melrose. **By growing and fostering a community of young environmental stewards who are interested in and prepared for jobs in the environmental field, we are helping to create a generation of environmental leaders to help support and sustain these efforts**.

As "Key Leaders" in The New York Foundling's Strong Families & Communities initiative, team members of the Bronx Climate & Environmental Justice Working Group, and active participants in seven community board districts, The Bronx is Blooming is well connected to community needs and resources.

This project is focused on building partnerships with key stakeholders to help scale PLACE. Over the past decade, PLACE has grown significantly, from just 3 Mentors leading 15 Students in 3 parks, to 10 Mentors leading 75 Students in 8 parks. To continue to grow the program, both in number of students and geographically, we need to establish new partnerships with additional youth employment/workforce development providers to access new pools of students. **Experience gained and lessons learned through this project will help inform and facilitate**

ED_016126_00001340-00015

additional expansion throughout The Bronx. Our model, which leverages NYC's youth employment and workforce development programs, can be applied in any environmental justice community in NYC. The current City budget includes funding for 100,000 jobs through the Summer Youth Employment Program. Recent reporting has found that organizations are struggling to fill these positions. Working together, we can help fill these positions while making tangible, and highly visible, changes to the city's green spaces and its environmental and public health.

By increasing our participation in the Forest for All NYC Coalition as part of this project, we will also strengthen our relationships with environmental organizations, industry partners, and other groups citywide, and integrate our work into broader efforts. **Working with the Coalition will help provide us with the support to grow and sustain our programming and will also help ensure that we are focused on achieving shared goals for urban forestry workforce development.**

4.0 Programmatic Capability

a. Organizational Experience

The Bronx is Blooming has been operating the Program for Leaders Advancing their Community's Environment (PLACE) for 10 years, beginning with its first cohort of 3 Mentors and 15 Students working at 3 parks in 2013. Over time, the program has grown significantly. In 2022, we hired our first-ever PLACE Program Manager, who, in his first year, oversaw the program's most successful year yet, with 8 Mentors and 75 Students leading 900 volunteers in revitalization projects at 8 parks during the summer program. The PLACE Program Manager also launched a new school year PLACE program, with 5 Mentors leading 9 Students in environmental education, park revitalization, and professional development.

We have a proven track record of running efficient and effective programs, having leveraged resources and partnerships to create significant and lasting changes. For many years, approximately half of our annual budget came from partnerships and in-kind support, as we worked to foster relationships with funders and elected officials. Over the past few years, we have grown from 1 to 4 full-time staff and a part-time Program Operations Manager. We regularly hire seasonal staff and interns to support our programming.

b. Staff Experience / Qualifications of Project Manager (PM)

Jennifer Beaugrand, our Founder and Executive Director, created and launched the Program for Leaders Advancing their Community's Environment (PLACE) in 2013 and has overseen its growth since. Jenn has nearly 20 years of experience running community driven horticulture programs in The Bronx and has many long-standing relationships with community partners. She completed the Fordham University Center for Non-Profit Leaders - Executive Education Certificate in 2012, as well as the We are the Bronx Fellowship in 2011. She has a long history of youth development work, is a certified landscape designer and a horticulturist, and received the NYC Mayoral Service Award in 2019. Jenn will provide overall leadership and oversight on this project, and will ensure compliance with all grant requirements.

Prior to founding the Bronx is Blooming, Jenn grew a community driven horticulture program at another Bronx non-profit from the ground up: with an organizational budget of $135,000, she leveraged $800,000 in resources, partnerships, in-kind support, and volunteer hours. The Green Jobs training workforce development program that Jenn ran in partnership with the Human Resources Administration (HRA) had the highest retention rate of all HRA projects.

Henry Jorden, our PLACE Program Manager (Project Manager) since early 2022, has played a critical role in expanding the program's impact. He increased its geographic reach to eight parks, recruited the largest cohort of summer participants ever (75 students), launched a new school year program, enhanced the program's educational and professional development components, and advanced the PLACE Alumni Network. Henry has a Masters of Social Work and brings significant capacity to guide PLACE participants' development. He will be responsible for program design, managing operations, and partnership development.

Henry has extensive prior experience running environmentally focused youth leadership programs, including curriculum development and leading outdoor expeditions for youth interested in environmental careers. As a graduate student, he established an Environmental Justice Caucus and worked with Green City Force, an urban agriculture non-profit serving residents of NYC public housing, to increase alumni engagement.

Melissa Gardella, our part-time Program and Operations Manager, provides vital support to the PLACE program by managing human resources, contracts, reporting, supply purchasing, invoicing, and other operational needs. Melissa has more than 15 years of experience managing daily business operations and special projects for senior executives. She excels in turning disorganized environments into smooth running operations and overhauling administrative processes to improve accuracy and efficiency. Over the past year she has played a critical role streamlining our operations to set us up for continued growth. On this project she will lead bookkeeping, onboarding, HR and payroll and support compliance with all EPA requirements.

c. Expenditure of Awarded Grant Funds, and plan for compliance with EPA's Pre-award Compliance Review for Nonprofit Organizations

The Bronx is Blooming has been in operation since 2011 and has been operating the Program for Leaders Advancing their Community's Environment since (PLACE) 2013. Despite our small size, we have been able to successfully manage our finances and comply with a broad range of grant reporting requirements. We are confident in our ability to meet all compliance requirements for this grant.

- **Over the past 12+ years, we have grown slowly and steadily**, to ensure that we do not overstretch the financial partnerships that we have in place. We hired our Executive Director as the first full-time staff member in 2017, added a full-time Environmental Program Manager in 2021 and a full-time PLACE Program Manager in 2022.
- **Last year, we hired a part-time Program Operations Manager** who is working with the Executive Director to update our operational systems and establish best practices for billing, payroll, HR management, compliance, and contract management with our State, City, and other partners.

- **We are currently in compliance with all required grant deliverables and reporting.** Government and foundation grants comprise approximately 2/3 of our current annual budget. In many cases, we have received repeated awards from our funders, including 4 grants from the NYS Department of Environmental Conservation and several foundation partners, demonstrating our ability to adeptly manage our growing commitments even with our limited staff and resources. These lasting partnerships attest to our ability to manage this grant and to develop a strong partnership with the US EPA.
- **We are not yet large enough to require an audit** but are working with our board and accountants to set up processes to ensure sound management of funds that come under our guardianship and to maximize their positive impact on our communities and local environment.
- **We are also working with development and data management consultants to create improved systems** for tracking our grants, deliverables, and project data, to facilitate and streamline our grant management and reporting processes.
- **We have included funding for our Executive Director and Program Operations Manager** as part of this grant application, to account for their time, oversight, and dedication to establishing a successful partnership and meeting all of the program requirements.

5.0 Past Performance

City Parks Foundation Green Relief and Recovery Fund: $40,000 awarded in 2022

- All deliverables and reporting for grants received in 2020 ($20,000) and 2021 ($50,000) were completed in a timely manner, resulting in a third grant being awarded in 2022. This grant is still in progress, deliverables and reporting are up to date.

Pinkerton Foundation: $60,000 awarded in 2022

- All deliverables and reporting for grant received in 2021 ($50,000) were completed in a timely manner, resulting in a renewal grant being awarded in 2022. This grant is still in progress, deliverables and reporting are up to date.

Arbor Day Foundation: $100,000 awarded in 2021

- This is a 2+ year grant that is still in progress, deliverables and reporting are up to date.

New York Community Trust: $75,000 awarded in 2021 + additional $10,000 for GOS

- All deliverables and reporting for grant received in 2019 ($20,000) were completed in a timely manner, even with the challenges and adjustments that were necessary due to the COVID-19 Pandemic, resulting in a second grant being awarded in 2021. The deliverables and final report for this grant have been submitted.

NYS Dept. of Environmental Conservation, Environmental Justice: $100,000 awarded in 2021

- This is a multi-year grant that is still in progress.
- Awarded 3 additional grants since 2017. COVID-19 and related staffing challenges impacted ability to complete some aspects of these grants in a timely manner, but we have worked closely with NYS DEC staff to make adjustments in order to meet all requirements and are in good standing with the Office, to the level of being recommended for other funding.

ROADS TO SUCCESS

April 5, 2023

To Whom it May Concern:

Roads to Success is pleased to partner with The Bronx is Blooming on the continued development and expansion of the Program for Leaders Advancing their Community's Environment (PLACE) youth development and park revitalization program as proposed in their application to the US EPA's Environmental Justice Collaborative Problem-Solving Program.

Roads to Success's mission is to inspire and empower all young people to take control of their future. We work with the New York City Department of Youth and Community Development to provide youth employment opportunities through the Summer Youth Employment Program (SYEP) the nation's largest youth employment programs, connecting NYC youth between the ages of 14 and 24 with career exploration opportunities and paid work experience each summer, and CareerReady Work Learn Grow (WLG), which offers SYEP participants aged 16-19 a 25-week employment opportunity during the school year, through which they strengthen work readiness skills, explore careers, and receive academic support.

PLACE furthers the mission of the Bronx is Blooming to grow and support a culture of environmental stewardship in the Bronx. PLACE students gain ecological knowledge, technical horticulture skills, and are empowered to become leaders in their communities. This program helps to combat decades of environmental injustice by preparing Bronx youth for jobs in the growing environmental field while actively restoring local ecology to address long-standing environmental harms.

Roads 2 Success began partnering with The Bronx is Blooming in 2021, and last year worked with them to launch a new school year PLACE program, providing an opportunity for four Bronx high school students to learn about environmental justice and ecological principles, participate in hands-on park revitalization projects, and receive academic and professional development support. In addition, The Bronx is Blooming hosted several professional development training sessions for our Work, Learn, Grow Program cohort of over 35 summer students. Roads to Success is committed to continuing this partnership and working with The Bronx is Blooming to help grow the program. We are excited to begin working with The Bronx is Blooming on the summer PLACE program this year, and hope to have them host up to 30 Bronx Summer Youth Employment Program participants.

We look forward to our continued partnership with The Bronx is Blooming, and urge you to thoughtfully consider this application

Sincerely,

Daphne Agard

Daphne Agard,
Senior Program Director

UAU | UNITED ACTIVITIES UNLIMITED

April 5, 2023

To Whom It May Concern:

United Activities Unlimited is pleased to partner with The Bronx is Blooming on the continued development and expansion of the Program for Leaders Advancing their Community's Environment (PLACE) youth development and park revitalization program as proposed in their application to the US EPA's Environmental Justice Collaborative Problem-Solving Program.

UAU is a community-based agency that provides comprehensive social services, educational support, enrichment activities, prevention services, counseling, and workforce development training to inspire, transform, and empower individuals of all ages. UAU is a provider for the New York City Department of Youth and Community Development to provide youth employment opportunities through the Summer Youth Employment Program (SYEP), the nation's largest youth employment program, connecting NYC youth between the ages of 14 and 24 with career exploration opportunities and paid work experience each summer, and CareerReady Work Learn Grow (WLG), which offers SYEP participants aged 16-19 a 25-week employment opportunity during the school year, through which they strengthen work readiness skills, explore careers, and receive academic support.

PLACE furthers the mission of the Bronx is Blooming to grow and support a culture of environmental stewardship in the Bronx. PLACE students gain ecological knowledge, technical horticulture skills, and are empowered to become community leaders. This program helps to combat decades of environmental injustice by preparing Bronx youth for jobs in the growing environmental field while actively restoring local ecology to address long-standing environmental harms.

UAU began partnering with The Bronx is Blooming in 2022, and last year worked with them to launch a new school year PLACE program, providing an opportunity for Bronx high school students to learn about environmental justice and ecological principles, participate in hands-on park revitalization projects, and receive academic and professional development support. UAU is committed to continuing this partnership and working with The Bronx is Blooming to help grow the program. In the summer of 2023, UAU also hopes to have The Bronx is Blooming host up to 10 Bronx-based Summer Youth Employment Program participants.

We look forward to our continued partnership with The Bronx is Blooming, and urge you to thoughtfully consider this application.

Sincerely,

Rasheeda Edmonds
Director of SYEP

Trees New York
plant preserve protect

April 12, 2023

To Whom it May Concern:

Trees New York is pleased to partner with The Bronx is Blooming on the continued development and expansion of the Program for Leaders Advancing their Community's Environment (PLACE) youth development and park revitalization program as proposed in their application to the US EPA's Environmental Justice Collaborative Problem-Solving Program (EJCPS).

Trees New York's mission is to plant, preserve, and protect New York City's urban forest through education and community participation. Founded in 1976 as a volunteer response to New York City's devastating cutbacks in forestry and tree-related services. We have over 45 years of experience in community tree planting, stewardship and education projects. Since our founding, Trees New York has trained over 13,500 Citizen Pruners and 9,000 youth in tree care and stewardship. In the past 10 years, Trees New York has planted over 5,000 trees in underserved communities throughout New York City.

PLACE furthers the mission of the Bronx is Blooming to grow and support a culture of environmental stewardship in the Bronx. PLACE students gain ecological knowledge, technical horticulture skills, and are empowered to become leaders in their communities. This program helps to combat decades of environmental injustice by preparing Bronx youth for jobs in the growing environmental field while actively restoring local ecology to address long-standing environmental harms.

We first partnered with The Bronx is Blooming nearly 10 years ago, when we initially provided tree stewardship tutorials for staff and students. More recently, we have been providing annual Citizen Pruner training for PLACE Mentors. Through the EJCPS, The Bronx is Blooming will hire Trees New York to incorporate Citizen Pruner training into the PLACE program curriculum over the course of three years. Through this partnership, and the support of the EPA, all PLACE Mentors and select Student Leaders will have the opportunity to become certified, enabling more than one hundred Bronx youth to gain new skills and to care for trees in their underserved communities. In our experience, Citizen Pruners not only provide essential tree care services, they also play important leadership roles in their communities.

We look forward to our continued partnership with The Bronx is Blooming, and urge you to thoughtfully consider this application.

PROFESSIONAL EXPERIENCE

The Bronx is Blooming, Bronx, NY

Community organization designed to inspire a culture of environmental stewardship and community advocacy by engaging communities and youth as leaders in the restoration of local parks.

Executive Director (Founder), February 2011- Present

- Created community investment in a movement that has brought 126,000+ volunteer hours to 20+ Bronx parks and greenspaces, stewarding 16,000+ trees and planting 16,000+ native plants. Our work is the equivalent of 5-6 full time staff working for each of the last 12 years.
- Employed 350+ Bronx youth in seasonal internships, providing skills in horticulture, environmental restoration and project management to help in future job attainment.
- Provided community--based horticulture and environmental education to more than 20,000 volunteers.
- Managed corporate, community and non--profit projects of groups of 5 to 250.
- Engaged high school students in in-school, out of school and after-school environmental programming.

The Native Plant Center, Valhalla, NY

Nonprofit organization dedicated to educating people about the environmental necessity, economic value and natural beauty of native plants.

Horticulturist / Native Plant Sale Manager (contract basis), February 2013 - Present

- Coordination of the largest fundraiser of the year, the Native Plant Sale. Responsible for all plant selection and communication with all vendors. Our plants are bought by individuals throughout Westchester County and beyond and teach the importance and beauty of native plants for the home gardener.
- Leading plant walks and tours of our Lady Bird Johnson affiliated gardens to groups of horticulture professionals and garden conservancy groups.
- Design and selection of native species in collaboration with campus crews for campus wide native plantings.

Mosholu Preservation Corporation, Bronx, NY

Nonprofit organization promoting community, economic, and real estate development in the northwest Bronx.

Horticultural Program Director, July 2008 - January 2011

- Directed a program that after 2 years ran at a cost of $135,000 to the organization and brought in approximately
- $800,000 in seasonal program opportunities, in--kind donations, volunteer hours and other resources.
- Managed a staff that seasonally rose to up to 65 people, including a 45 student high school summer youth program, 2 welfare to work 6 month training programs, 3 civic corps year long interns, and 2 other staff.
- Expanded a part--time, 3,500 hour per- year initiative to an expansive 24,500 hour per year program in 2.5 years. Included managing projects of 5 to 500 people for one--day and long--term programming.
- Designed more than 12 large horticultural beds and amended and often redesigned up to 40 flowerbeds. Managed staff to maintain 7 parks and greenspaces.

The Cape Eleuthera Institute/ The Island School, Cape Eleuthera, The Bahamas

An institute dedicated to connecting people to the environment, and a semester abroad program that uses experiential learning to push beyond the bounds of the traditional classroom.

Aquaponics/Landscape Design Instructor and Student mentor/ IS Staff Member, November 2007 - June 2008

- Co--taught a semester-long intensive research course to high school students.
- Taught a course in hands-on landscape design using native plants to help with dune restoration, and other associated landscape problems.
- Mentored a group of students in their semester abroad, handling all parent communication and student issues.

The New York City Department of Parks and Recreation – NPI Program, Bronx, NY

Neighborhood Parks Improvement (NPI) Program – Creating a horticultural presence in underserved community parks throughout the city.

Gardener/ Community Outreach Coordinator, May 2005 – November 2006

- Managed the horticulture for a 20--acre park in the northwest Bronx, including: planting, pruning, erosion control, pathway maintenance, restoration, tree care, invasive removal, and staff management of seasonal summer youth crews and seasonal parks staff.
- Designed 8 new, large horticultural beds and maintained over 15 flowerbeds/ horticultural areas in the park.
- Organized small and large--scale volunteer events with community groups, corporate groups and non--profit partner organizations.

Freelance Landscape Design, United States, Scotland, Western Australia

Freelance landscape design for private residences, community gardens, apartment buildings.

Freelance Landscape Designer, July 2000 – Present

- Landscape design, plant selection, soil amendment, pruning and maintenance of gardens in various climates and in diverse circumstances around the world.

- Airtable
- Planning and Scheduling
- Written Communication
- Customer Service

Experience

The Bronx is Blooming – Bronx, NY

Part Time Program Operations Manager *March 2022 - Present*

- Administer bi-weekly payroll
- Collect and manage all new hire paperwork
- Manage government required staff trainings
- Maintain updated contact information for all staff and interns
- Track all organizational revenue and expenses in Quickbooks
- Develop systems to monitor and pay incoming invoices and bills online
- Manage invoicing and billing for all programming
- Draft and submit grant reports and attachments based on program data
- Monitor billing and submit invoices for city government contracts and foundation grants
- Maintain organization records and files and operating needs (i.e. insurance)
- Regularly update donor database and support donor relation efforts, including mailings
- Procure supplies for project activities, including plants, tools and materials
- Manage inventory and maintain supplies, including sign out sheets for staff tools and supplies and staying on top of inventory management with staff
- Provide general administrative and operational support as needed

Digital Advertising Alliance – New York, NY

Senior Financial Operations Administrator *January 2021 - Present*

Financial Operations Administrator *April 2016 – December 2020*

- Prepare invoices and communicate with DAA participants to ensure smooth billing processing
- Initiate outreach to participants with outstanding balances & support participants to expedite payment
- Develop & implement best practices and reporting related to Accounts Receivable and Accounts Payable
- Prepare a range of reports, from financial to CRM database reports for clear insight into DAA program's progress

- Maintain and update data quality in Salesforce, QuickBooks, and Constant Contact to ensure high quality, accurate reports among participants and prospects
- Add company assets as demanded to Salesforce to support key DAA operations (Web site, badging, listing of participants, enforcement and other primarily participant functions)
- Support staff in prompt, responsive communication to consumers, by organizing incoming consumer communication
- Facilitate smooth relationship with Regus (our current landlord) for reception, mail and printing, staff event coordination and participation, moving and storage, logistics, meeting room scheduling, and office aesthetics
- Serve as lead registrar for DAA Summit and any other public or semi-public DAA Event in-person meetings, working with lead DAA staff contact(s) for each event
- Greet incoming DAA office guests – and taking them from Reception to assigned meeting rooms and offices for scheduled meetings, and "vetting" any unscheduled visits, working accordingly with Reception
- Support Executive Director with any special requests, working with DAA staff colleagues where necessary, regarding acknowledgements, gifts, correspondence, or other matters of protocol
- Support Senior Director and DAA colleagues with marketing promotion vendor relationships
- Support Senior Director and DAA colleagues with shipments to industry conferences of DAA promotion and communications collateral

Benestream, Inc. – New York, NY

December 2015 – February 2016

(Temporary) Finance Assistant

The Finance Assistant supports the Controller on administrative and compliance-based tasks, assisting in all areas of the Finance Department. This includes working with the Controller and others, including the Company's Bookkeeper, to maintain accurate Company financial records and managing the day to day entry level financial transactions of the Company. The Finance Assistant's essential job functions include:

- Inputting invoices into accounting systems
- Reviewing and processing staff reimbursements after appropriate approval
- Generating outbound invoices
- Maintaining essential supporting documentation for all Finance Department functions
- Organizing and updating physical and electronic records
- Receiving and depositing checks and payments
- Providing reports to other departments and requested by management
- Elevating items to, and identifying trends for the Controller as appropriate
- Willingness to be a team player and comfort working in a start-up environment

Shopkeep POS - New York, NY

August 2014 – February 2015

(Temporary) Executive Assistant to Co-CEO

- Compiled and managed priority file and reviewed key issues, action items, pending deadlines
- Coordinated meetings with multiple groups and compiled notes for distribution
- Scheduled and coordinated all details for quarterly board meetings
- Managed schedules, arranged appointments, coordinated travel, and organized conference calls
- Faxed, copied and prepared documents for distribution
- Prepared expense reports for reimbursement

Addendum Applies:
No

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: We Stay/Nos Quedamos, Inc.

Address: 754 Melrose Avenue

City: Bronx

State: NY: New York Zip Code: 10451-4446

B. Unique Entity Identifier (UEI): NXPMX8AJH7U1

C. Applicant/Recipient Point of Contact

Name: Jessica Clemente

Phone: Ex. 6 Personal Privacy (PP)

Email: development@nosquedamos.org

Title: President/Chief Executive Officer

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

n/a

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

n/a

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

n/a

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Jessica Clemente	President/Chief Executive Officer	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Our Letter Dated:
February 1995
Addendum Applies:
No

Dear Applicant:

This modifies our letter of the above date in which we stated that you would be treated as an organization that is not a private foundation until the expiration of your advance ruling period.

Your exempt status under section 501(a) of the Internal Revenue Code as an organization described in section 501(c)(3) is still in effect. Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Code because you are an organization of the type described in section 509(a)(1) and 170(b)(1)(A)(vi).

Grantors and contributors may rely on this determination unless the Internal Revenue Service publishes notice to the contrary. However, if you lose your section 509(a)(1) status, a grantor or contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act, or the substantial or material change on the part of the organization that resulted in your loss of such status, or if he or she acquired knowledge that the Internal Revenue Service had given notice that you would no longer be classified as a section 509(a)(1) organization.

You are required to make your annual information return, Form 990 or Form 990-EZ, available for public inspection for three years after the later of the due date of the return or the date the return is filed. You are also required to make available for public inspection your exemption application, any supporting documents, and your exemption letter. Copies of these documents are also required to be provided to any individual upon written or in person request without charge other than reasonable fees for copying and postage. You may fulfill this requirement by placing these documents on the Internet. Penalties may be imposed for failure to comply with these requirements. Additional information is available in Publication 557, Tax-Exempt Status for Your Organization, or you may call our toll free number shown above.

If we have indicated in the heading of this letter that an addendum applies, the addendum enclosed is an integral part of this letter.

Letter 1050 (DO/CG)

WE STAY-NOS QUEDAMOS INC

Because this letter could help resolve any questions about your private foundation status, please keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above.

Sincerely yours,

Steven T. Miller
Director, Exempt Organizations

URBAN FUTURE LAB | NYU TANDON SCHOOL OF ENGINEERING

March 29, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights (OEJECR)
1200 Pennsylvania Avenue, N.W..
Washington, DC 20460

To Whom it May Concern at OEJECR,

I am writing to express my support for the application as submitted by We Stay/Nos Quedamos Inc. in response to the Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving (EJCPS) 2023 Grant Cycle.

Building on long-standing community leadership and deep cross-sector partnership, NQ is well positioned to work with local residents and key stakeholders to develop and implement environmental literacy training curricula focused on climate resiliency and emergency preparedness in the South Bronx. The Urban Future Lab (UFL) at NYU Tandon School of Engineering has worked closely with NQ over the past 2 years, as NQ was the first community based organization awarded our Urban Future Impact Prize. Staff at UFL presented to the youth team on the climate tech ecosystem and facilitated discussions on how various clean technologies intersect with community needs, challenges, and visions for the future of their neighborhoods. NQ youth were then able to integrate new content into community activities and events.

UFL is enthusiastic to continue our work with NQ as an advisor on the Curricula Design Development Team (CDDT) described in the proposed EPA EJCPS project, helping to identify and fill knowledge gaps, and bring our expertise and resources to bear throughout the process. As New York City's innovation hub for clean energy, sustainable urban infrastructure, and deep decarbonization, UFL can contribute meaningfully to the development of curricula centered on South Bronx community resiliency needs, potential interventions, and potential intersections with workforce development and advocacy efforts around just transition and the blue/green energy sector.

Please accept my recommendation for their application, and I look forward to supporting this project as one that significantly improves environmental literacy and resilience in Melrose.

Sincerely,

Jeannette Williams

QUALIFICATIONS SUMMARY

- *Success in turnaround operations*: Driving force behind reorganization, reversing negative cash flow, rightsizing programs, elevating morale, and overcoming negative community opinions
- Energetic professional with strong management, outreach and organizational skills
- Abilitiy to engage, respect and activate diverse stakeholders through collaborative problem solving
- Creative thinker and team-player who can prioritize tasks and set, analyze and acheive goals
- Program development/implementation

EXPERIENCE

2011-Present **We Stay/Nos Quedamos, Inc**
Chief Executive Officer and President Bronx, New York

- Spearhead restructuring efforts, reorganized finances, growth initiatives, and constituent/membership expansion
- Direct and lead team toward the achievement of the organization's philosophy, mission, strategy, and its annual goals and objectives
- Coordinate and advocate for city, state and federal policy reform

2009-2011 **Albert Einstein College of Medicine-Hispanic Community Health Study/Study of Latinos**
Outreach and Retention Manager Bronx, New York

- Manage both community outreach and annual follow up/retention efforts for the largest comprehensive multi-center longitudinal epidemiologic study in Hispanic/Latino populations.
- Develop, implement and manage annual follow up protocols and procedures
- Develop and maintain a medical referral list for study participants linking them to health care access and local community resources
- Accomplished to date an overall response rate of over 90% for the first two years of annual follow up
- Plan and organize community outreach events aimed to achieve maximum possible retention of study participants throughout the study period
- Create and deliver professional presentations on research objectives to community leaders and local stakeholders
- Coordinate and partner with local community organizations to bring forth a community education plan in an effort to address diverse topics in relation to health in the Hispanic/Latino community

2009 **Mount Sinai School of Medicine-The National Children's Study**
Recruiter Queens, New York

- Responsible for the recruitment of women either pregnant or between the ages of 18 and 49 and could become pregnant for the National Children's Study. A national longitudinal study that will prospectively investigate the influence of biological, environmental, genetic, and social factors on the health and development of children

2007-2009 **New York City Department of Health & Mental Hygiene World Trade Center Health Registry**
Research Scientist, Outreach & Recruitment New York, New York

- Developed and implemented outreach strategies for potential In-depth Respiratory Health study participants including extensive door-door and telephone recruitment
- Served as the key liaison with community partners, advisory boards and community boards
- Conducted presentations on the In-depth Health study and other World Trade Center Health Registy initatives at local community boards, tenant assocations, and parent-teacher associations

Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP) Bronx, New York 10467 ~ Tel: Ex. 6 Personal Privacy (PP) ~ Email: Ex. 6 Personal Privacy (PP)

2005-2007 **New York University, Office of Government & Community Affairs** New York, New York
Research Scientist

- Promoted to Research Scientist from Research Project Coordinator
- Managed all facets of U.S. Environmental Protection Agency (EPA) funded South Bronx Environmental Health and Policy Study (SBEHPS)
- Liaison among NYU researchers, community partners, Congressman Serrano's Office and U.S. EPA
- Researched environmental health and policy-related data used by Congressman Serrano to devise policy
- Prepared quarterly reports, policy papers, and develop communications materials
- Developed and coordinated 20+ community/environmental outreach projects
- Trained 4 community group partners in Geographic Information Systems (GIS) resulting in 12 people in the community having knowledge of how to use GIS as an environmental decision-making tool

2004-2005 **United Puerto Rican Organization of Sunset Park Inc, (UPROSE)**
NYU Advanced Project in Urban Planning Brooklyn, New York
Project Associate

- Served on 8-person team consisting of NYU Wagner graduate candidates to analyze four proposed plans related to the development of Sunset Park and its waterfront
- Examined the economic and financial feasibility, physical conflicts, environmental impacts, and the ability of each plan to complement the neighborhood's tradition of manufacturing
- Recommended advocacy strategies and produced community advocacy materials

2001- 2005 **New York University School of Medicine, Department of Environmental Medicine**
Research Project Coordinator Tuxedo, New York

- Managed all facets of U.S. Environmental Protection Agency (EPA) funded South Bronx Environmental Health and Policy Study (SBEHPS)
- Saved over $250,000 by negotiating cost effective alternatives for SBEHPS implementation
- Managed and facilitated all activities related to the Children's Health Study research ("Back Pack Study"); including obtaining and maintaining IRB approvals for all protocols-a component of the SBEHPS which studies possible health effects of air pollution on asthmatic school children
- Public speaking on SBEHPS via community education workshops, presentations, print media, mass media (television and radio) to local community groups, government officials, and the general public
- Created the curriculum for a Environmental Education Youth Participation and Leadership Program and engaged 23 young participants from 5 Bronx high schools
- Coordinated the Department's first Particulate Matter (PM) monitoring site in response to the World Trade Center (WTC) disaster at NYU Downtown Hospital; our swift research initiatives gained the Department a $1,000,000 WTC research grant

EDUCATION

New York University, Robert F. Wagner Graduate School of Public Service, New York, New York
Masters of Urban Planning, January 2007
Specialization: **Environmental Regulation and Management**

Purchase College, State University of New York, Purchase, New York
Bachelor of Science in Environmental Science, May 2001
Thesis: *Is Global Warming Influencing Dengue Fever/Dengue Hemorrhagic Fever Distribution?*

FORDHAM
THE JESUIT UNIVERSITY OF NEW YORK | Center for Community Engaged Learning

April 20, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights (OEJECR)
1200 Pennsylvania Avenue, N.W..
Washington, DC 20460

To Whom It May Concern,

We are writing this letter to express our full support for Youth Ministries for Peace and Justice's (YMPJ) application to the Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving (EJCPS) 2023 Grant Cycle.

The summit was organized by Fordham's Center for Community Engaged Learning, which builds bridges between the University's Bronx and Manhattan campuses and neighboring communities to create collaborative programming and educational opportunities.

As part of this application, Fordham University's Center for Community Engaged Learning will work to support the implementation of the proposed Health Impact Assessment (HIA) focused on the redevelopment of the waterfront properties in YMPJ's catchment to increase connected open space for recreation, decrease flooding by expanding green infrastructure, and improving local air quality. We will offer YMPJ access to available data, resources, and support, as well as serving as trusted advisors as they undertake the HIA in this area.

We have full confidence in David Shuffler and the YMPJ team on this application. Please feel free to reach out directly with any questions via email at Ex. 6 - Personal Privacy (PP) or via phone at Ex. 6 - Personal Privacy (PP) Thank you for your time and consideration.

Sincerely,

Julie L Gafney
Assistant Vice President
Strategic Mission Initiatives

Place Solutions Group, LLC

April 6, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights (OEJECR)
1200 Pennsylvania Avenue, N.W..
Washington, DC 20460

To Whom It May Concern:

We are writing this letter to express our full support for Youth Ministries for Peace and Justice's (YMPJ) application to the Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving (EJCPS) 2023 Grant Cycle.

Place Solutions Group plans to participate as an active coalition member for the proposed project and continue our ongoing collaboration with YMPJ towards advancing policies and practices that promote food system equity, food access, and nutrition education; community resources and a built environment that support increased physical activity; and family healthy weight programs that are evidence-based and accessible. Place Solutions Group has extensive experience in the connection between food access and placemaking and is currently working with YMPJ on community visioning sessions to study our hyper local area and understand what the community wishes to see in the spaces and will use that work to inform our work with EJCPS as well.

YMPJ's work shows their dedication to addressing not just the symptoms, but the complex systemic causes of environmental injustice and related community health impacts in the South Bronx. It is because of their work and continuing commitment to the youth and residents of our community that we gladly support their proposal for the EJCPS Grant. I am confident that YMPJ will provide a comprehensive health impact assessment serving residents of all ages, and I am excited about the opportunities that this project will offer for YMPJ and the community they serve.

We have full confidence in David Shuffler and the YMPJ team on this application. Please feel free to reach out directly with any questions via email at Ex. 6 - Personal Privacy (PP) or via phone at Ex. 6 Personal Privacy (PP). Thank you for your time and consideration.

Sincerely,

Stephen Davies
Principal

April 17, 2023

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights (OEJECR)
1200 Pennsylvania Avenue, N.W..
Washington, DC 20460

To Whom It May Concern,

We are writing this letter to express our full support for Youth Ministries for Peace and Justice's (YMPJ) application to the Environmental Protection Agency's Environmental Justice Collaborative Problem-Solving (EJCPS) 2023 Grant Cycle.

The Bronx River Alliance serves as a coordinated voice for the river. We work in harmonious partnership to protect, improve and restore the Bronx River corridor. Our goal is to make a healthy ecological, recreational, educational, and economic resource for all communities through which the river flows. The Alliance works in close partnership with the New York City Parks as well as dozens of community-based partners, regional nonprofits, businesses and all levels of government. YMPJ has been a key community based organization in the Bronx River/Soundview area for more than three decades, and for the past thirteen years, YMPJ has demonstrated an unparalleled dedication to improving air quality conditions for all people who call the South Bronx their home. We have a deep history or partnership with YMPJ, and have seen firsthand their impactful work leading successful advocacy efforts around the recent proposed redevelopment of brownfields in their catchment area. We believe that YMPJ is ready to take on a comprehensive health impact survey focused on the redevelopment of the waterfront properties in their catchment to increase connected open space for recreation, decrease flooding by expanding green infrastructure, and improving local air quality. We will offer YMPJ access to available data, resources, and support, as well as serving as trusted advisors as they undertake the HIA in this area.

YMPJ's work shows their dedication to addressing not just the symptoms, but the complex systemic causes of environmental injustice and related community health impacts in the South Bronx. It is because of their work and continuing commitment to the youth and residents of our community that we gladly support their proposal for the EJCPS Grant. As a fellow stakeholder in the South Bronx, I am confident that YMPJ will provide a comprehensive health impact assessment serving residents of all ages, and I am excited about the opportunities that this project will offer for YMPJ and the community they serve.

Please feel free to reach out directly with any questions to me via email at christian.murphy@bronxriver.org or via phone at [Ex. 6 - Personal Privacy (PP)] Thank you for your time and consideration.

Sincerely,

Christian Murphy
Ecology Coordinator

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Youth Ministries for Peace and Justice, Inc.

Address: 1384 Stratford Avenue

City: Bronx

State: NY: New York Zip Code: 10472-1604

B. Unique Entity Identifier (UEI): W85WGJRUAL13

C. Applicant/Recipient Point of Contact

Name: David R. Shuffler, Jr.

Phone: Ex. 6 - Personal Privacy (PP)

Email: funddevelopment@ympj.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

n/a

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

n/a

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

n/a

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

n/a

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
David R Shuffler	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

SUMMARY OF EXPERIENCE: Managed an efficient funding program, which had a city-wide and a neighborhood focus. Spearheaded grant-making decisions on the board of an activist-advised community foundation. Coordinated community involved efforts to increase resources in neighborhoods throughout New York City for over ten years. Trained staff, volunteers, community members and other stake holders for eight years. Fundraised and managed relationships with foundations, banks, and public and private donors for over ten years.

EMPLOYMENT:

Youth Ministries For Peace and Justice, Inc.
1384 Stratford Avenue, Bronx, New York 10472

7/2010-Present — *Executive Director*
- Manage an efficient Community Based Organization that provides direct services and community organizing .
- Maintain and cultivate new relationships with potential funding sources.
- Coordinate and advocate for city, state and federal policy reform.

Association for Neighborhood and Housing Development
50 Broad Street, New York, NY 10004 Suite 1125

10/2005-4/2010 — *Director of Initiative for Neighborhood & City-Wide Organizing*
- Manage an efficient funding program.
- Maintain and cultivate new relationships with potential funding sources.
- Coordinate and advocate for citywide policy reform campaigns.

12/2004-9/2006 — *Director of Organizing Training*
- Provided multi-layered organizational capacity building assistance to over 100 not-for-profits.
- Lead New York City budgetary advocacy for HPD preservation contracts.
- Coordinated and advocated for citywide policy reform campaigns.

New York City Environmental Justice Alliance
115 West 30th Street, New York, NY 10001 Suite 709

12/2003-7/2004 — *Membership Coordinator*
- Coordinated participation of the seventeen member organizations.
- Supported staff with their relevant program areas.
- Developed trainings and workshops for the member organizations.

Youth Ministries For Peace and Justice, Inc.
1384 Stratford Avenue, Bronx, New York 10472

2/2002 – 11/2003 — *Police Reform Campaign Director*
- Coordinated a youth-led campaign for police reform within the South Bronx.
- Built alliances with community organizations, residents, and elected officials.
- Developed weekly curricula for youth programs.
- Submitted applications and final reports to foundations.

7/1999 – 1/2002 — *Environmental Justice Campaign Coordinator*
- Led an environmental justice campaign to revitalize the waterfront in the South Bronx.
- Coordinated ecological and educational restoration projects.
- Planned weekly curricula, developed progress reports, monitored youth programs and managed relationships with other environmental justice organizations.

10/1997 – 6/1999 — *Site Coordinator*
- Designed program schedules and tracked program objectives.
- Managed over one hundred members and ensured safety of program participants.

SPECIAL SKILLS: Trainer/ Facilitator/ Fundraiser/ Public Speaker
Proficient with Microsoft applications.

February 20, 2023

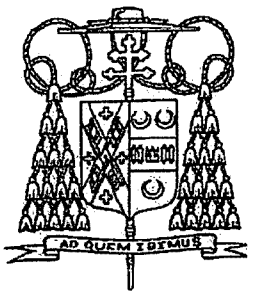
Dear Executive Director David Schuffler,

Enclosed is the 2022 Group Ruling issued by the IRS for all organizations listed in the Official Catholic Directory (Kennedy Directory). Your agency is located on pages 789 of the directory.

The information supplied is needed to verify your tax-exempt status as a Catholic Agency. I ask that you review the information provided and notify me of any changes that you would like made to your agency's listing. These changes will be reflected in the supplementary addition of the Official Catholic Directory in the end of 2023.

Please Note: You will also receive a form from the Official Catholic Directory publisher asking you for changes to your listing. That form should be completed and return to my attention not Sr. Dorothy Francke.

Please do not hesitate to contact me should you have any questions or need my assistance with this or any other matters.



Sincerely,

Christina y Perez

Christina Perez
Associate Director Agency Relations

Archdiocese of New York

(Archidioecesis Neo-Eboracensis)

HIS EMINENCE TIMOTHY MICHAEL CARDINAL DOLAN, D.D., PH.D.

Group Exemption Number:
0928

Dear Sir/Madam:

This responds to your June 23, 2022, request for information regarding the status of your group tax exemption.

Our records indicate that you were issued a determination letter in March 1946, that you are currently exempt from federal income tax under section 501(c)(3) of the Internal Revenue Code, and are not a private foundation within the meaning of section 509(a) of the Code because you are described in sections 509(a)(1) and 170(b)(1)(A)(i).

With your request, you provided a copy of the *Official Catholic Directory for 2022*, which includes the names and addresses of the agencies and instrumentalities and the educational, charitable, and religious institutions operated by the Roman Catholic Church in the United States, its territories, and possessions that are subordinate organizations under your group tax exemption. Your request indicated that each subordinate organization is a non-profit organization, that no part of the net earnings thereof inures to the benefit of any individual, and that no substantial part of their activities is for promotion of legislation. You have further represented that none of your subordinate organizations is a private foundation under section 509(a), although all subordinates do not all share the same sub-classification under section 509(a). Based on your representations, the subordinate organizations in the *Official Catholic Directory for 2022* are recognized as exempt under section 501(c)(3) of the Code under GEN 0928.

Donors may deduct contributions to you and your subordinate organizations as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to them or for their use are deductible for federal estate and gifts tax purposes if they meet the applicable provisions of section 2055, 2106, and 2522 of the Code.

Subordinate organizations under a group exemption do not receive individual exemption letters. Subordinate organizations are not listed in Tax Exempt Organization Search (Pub 78 data), and many are not listed in the Exempt Organizations Business Master

File extract, or EO BMF. Donors may verify that a subordinate organization is included in your group exemption by consulting the *Official Catholic Directory*, the official subordinate listing approved by you, or by contacting you directly. IRS does not verify the inclusion of subordinate organizations under your group exemption. *See* IRS Publication 4573, *Group Exemption*, for additional information about group exemptions.

Each subordinate organization covered in a group exemption should have its own EIN. Each subordinate organization must use its own EIN, not the EIN of the central organization, in all filings with IRS.

If you have any questions, please call us at the telephone number shown in the heading of this letter.

Sincerely,

Stephen A. Martin
Director, Exempt Organizations
Rulings and Agreements

Office of the General Counsel

DATE: September 6, 2022

TO: Subordinate Organizations under USCCB Group Ruling (GEN: 0928)

SUBJECT: 2022 Group Ruling

FROM: Anthony Picarello, General Counsel ARP
Madeline Obler, Assistant General Counsel MO

This memorandum relates to the annual Group Ruling determination letter issued to the United States Conference of Catholic Bishops ("USCCB") by the Internal Revenue Service ("IRS"), the most recent of which is dated August 24, 2022, with respect to the federal tax status of subordinate organizations listed in the 2022 edition of the Official Catholic Directory ("OCD").[1] As explained in greater detail below, this 2022 Group Ruling determination letter is important for establishing:

(1) exemption of subordinate organizations under the USCCB Group Ruling from federal income tax; and

(2) deductibility of contributions to such organizations for federal income, gift, and estate tax purposes.

The 2022 Group Ruling determination letter is the latest in a series that began with the original determination letter of March 25, 1946. In the original 1946 letter, the Treasury Department affirmed the exemption from federal income tax of all Catholic institutions listed in the OCD for that year. Each year since 1946, in a separate letter, the 1946 ruling has been reaffirmed with respect to subordinate organizations listed in the current edition of the OCD.[2] The annual group ruling letter clarifies important tax consequences for Catholic institutions listed in the OCD, and should be retained for ready reference. Group Ruling letters from prior years establish tax consequences with respect to transactions occurring during those years.

Responsibilities under Group Ruling. Diocesan officials who compile OCD information for submission to the OCD publisher are responsible for the accuracy of such information. They must ensure that only qualified organizations are listed, that organizations are listed under their correct legal names, that organizations that cease to qualify are deleted promptly, and that newly-

---

[1] A copy of the most recent Group Ruling determination letter and this memo may be found on the General Counsel's "Tax and Group Ruling" page.

[2] Catholic organizations with independent IRS exemption determination letters are listed in the 2022 OCD with an asterisk (*), which indicates that such organizations are **not** included in the Group Ruling.

qualified organizations are listed as soon as possible.

EXPLANATION

1. **Exemption from Federal Income Tax**. The latest Group Ruling determination letter reaffirms that the agencies and instrumentalities and educational, charitable, and religious institutions operated, supervised or controlled by or in connection with the Roman Catholic Church in the United States, its territories or possessions that appear in the 2022 OCD and are subordinate organizations under the Group Ruling are recognized as exempt from federal income tax and described in section 501(c)(3) of the Code. The Group Ruling determination letter does not cover organizations listed with asterisks or any foreign organizations listed in the 2022 OCD.

Verification of Exemption under Group Ruling. The latest Group Ruling determination letter indicates that subordinate organizations are not listed in Tax Exempt Organization Search (Pub. 78 data) ("TEOS," formerly "EO Select Check), and many are not listed in the Exempt Organizations Business Master File extract, or EO BMF . As a result, many subordinate organizations included in the USCCB Group Ruling are not included in various online databases (e.g., GuideStar) that are derived from the EO BMF. This does not mean that subordinate organizations included in the Group Ruling are not tax exempt, that contributions to them are not deductible, or that they are not eligible for grant funding from corporations, private foundations, sponsors of donor-advised funds or other donors that rely on online databases for verification of tax-exempt status. It does mean that a Group Ruling subordinate may have to make an extra effort to document its eligibility to receive charitable contributions. The Group Ruling determination letter states that donors may verify that a subordinate organization is included in the Group Ruling by consulting the Official Catholic Directory or by contacting the USCCB directly. It also states that the IRS does not verify inclusion of subordinate organizations under the Group Ruling. *Accordingly, neither subordinate organizations nor donors should contact the IRS to verify inclusion under the Group Ruling.*

Subordinate organizations should refer donors, including corporations, private foundations, and sponsors of donor-advised funds, to the specific language in the Group Ruling determination letter regarding verification of tax-exempt status and to IRS Publication 4573, *Group Exemptions*, available on the IRS website at www.irs.gov.[3] Publication 4573 explains that: (1) the IRS does not determine which organizations are included in a group exemption; (2) subordinate organizations exempt under a group exemption do not receive their own IRS determination letters; (3) exemption under a group ruling is verified by reference to the official subordinate listing (e.g., the Official Catholic Directory); and (4) it is not necessary for an organization included in a group exemption to be listed in TEOS or the EO BMF. Although not required, organizations in the Group Ruling may be included in the EO BMF, and consequently, online databases derived from it.

[3] For an illustration of how exemption verification works, refer to the "Information for Donors and Grantmakers" link on the USCCB website "Tax and Group Ruling." page.

2. **Public Charity Status**. The latest Group Ruling determination letter recognizes that subordinate organizations included in the 2022 OCD are public charities and not private foundations under section 509(a) of the Code, but that all subordinate organizations do not share the same public charity status under section 509(a). Therefore, although the USCCB is classified as a public charity under sections 509(a)(1) and 170(b)(1)(A)(i), that public charity status does *not* automatically extend to subordinate organizations covered under the Group Ruling.

Verification of Public Charity Status. Each subordinate organization in the Group Ruling must establish its own public charity status under section 509(a)(1), 509(a)(2), or 509(a)(3) as a condition to inclusion in the Group Ruling. Certain types of subordinate organizations included in the Group Ruling qualify as public charities by definition under the Code. These are:

- churches and conventions or associations of churches under sections 509(a)(1) and 170(b)(1)(A)(i) (generally limited to dioceses, parishes and religious orders);
- elementary and secondary schools, colleges and universities under sections 509(a)(1) and 170(b)(1)(A)(ii); and
- hospitals under sections 509(a)(1) and 170(b)(1)(A)(iii).

Other subordinate organizations covered under the Group Ruling may qualify under the public support tests of either sections 509(a)(1) and 170(b)(1)(A)(vi) or section 509(a)(2). Verification of public charity classification under either of the support tests generally can be established by providing a written declaration of the applicable classification signed by an officer of the organization, along with a reasoned written opinion of counsel and a copy of Schedule A of Form 990/EZ, if applicable. Large institutional donors, such as private foundations and sponsors of donor-advised funds, may require this verification prior to making a contribution or grant to be assured that the grantee is not a Type III non-functionally integrated supporting organization.[4] A subordinate organization included in the Group Ruling may want to file Form 8940, Request for Miscellaneous Determination, with the IRS to request a determination that it is a publicly supported charity described in sections 509(a)(1) and 170(b)(1)(A)(vi) or section 509(a)(2), or is a Type I or II supporting organization, in order to satisfy private foundations and sponsors of donor-advised funds regarding its public charity status.

3. **Deductibility of Contributions**. The latest Group Ruling determination letter assures donors that contributions to subordinate organizations listed in the 2022 OCD are deductible for federal income, gift, and estate tax purposes.

4. **Unemployment Tax**. As section 501(c)(3) organizations, subordinate organizations covered by the Group Ruling are exempt from *federal* unemployment tax; however, individual states may impose unemployment tax on subordinate organizations even

[4] *See* Notice 2014-4, 2014-2 I.R.B (January 6, 2014).

ED_016126_00001373-00008

though they are exempt from federal unemployment tax. Please consult a local tax advisor about any state unemployment tax questions.

5. **Social Security Tax**. All section 501(c)(3) organizations, including churches, are required to withhold and pay taxes under the Federal Insurance Contributions Act (FICA) for each employee.[5] However, services performed by diocesan priests in the exercise of their ministry are not considered "employment" for FICA (Social Security) purposes.[6] FICA should not be withheld from their salaries. *For Social Security purposes*, diocesan priests are subject to self-employment tax ("SECA") on their salaries as well as on the value of meals and housing or housing allowances provided to them.[7] Neither FICA nor income tax withholding is required on remuneration paid directly to religious institutes for members who are subject to vows of poverty and obedience and are employed by organizations included in the Official Catholic Directory.[8]

6. **Federal Excise Tax**. Inclusion in the Group Ruling has no effect on a subordinate organization's liability for federal excise taxes. Exemption from these taxes is very limited. Please consult a local tax advisor about any excise tax questions.

7. **State/Local Taxes**. Inclusion in the Group Ruling does not automatically establish a subordinate organization's exemption from state or local income, sales, or property taxes. Typically, separate exemptions must be obtained from the appropriate state or local tax authorities in order to qualify for any applicable exemptions. Please consult a local tax advisor about any state or local tax exemption questions.

8. **Form 990/EZ/N**. All subordinate organizations included in the Group Ruling must file Form 990, Return of Organization Exempt from Income Tax, Form 990-EZ, Short Form Return of Organization Exempt From Income Tax, or Form 990-N, e-Postcard, *unless* they are eligible for a mandatory or discretionary exception to this filing requirement. ***There is no automatic exemption from the Form 990/EZ/N filing requirement simply because an organization is included in the Group Ruling or listed in the OCD.*** Subordinate organizations must use their own EIN to file Form 990/EZ/N. **Do not** use the EIN of the USCCB or an affiliated parish, diocese or other organization to file a return. Form 990/EZ/N is due by the 15th day of the fifth month after the close of an organization's fiscal year.[9] The following

---

[5] Section 3121(w) of the Code permits certain church-related organizations to make an irrevocable election to avoid payment of FICA taxes, but only if such organizations are opposed for religious reasons to payment of social security taxes.

[6] I.R.C. § 3121(b)(8)(A).

[7] I.R.C. § 1402(a)(8).

[8] Rev. Rul. 77-290, 1977-2 C.B. 26. *See also* USCCB/RCRI Memorandum on Compensation of Religious, (September 11, 2020).

[9] The penalty for failure to file the Form 990/EZ is $20 for each day the failure continues, up to a maximum of $10,000 or 5 percent of the organization's gross receipts, whichever is less; however, organizations with annual gross receipts in excess of $1 million are subject to penalties of $100 per day, up to a maximum of $50,000. I.R.C. § 6652(c)(1)(A). There is no monetary penalty for failing to file or filing late a Form 990-N.

organizations are not required to file Form 990/EZ/N: (i) churches and conventions or associations of churches; (ii) integrated auxiliaries;[10] (iii) the exclusively religious activities of religious orders; and (iv) schools below college level affiliated with a church or operated by a religious order.[11] Organizations should exercise caution if they choose not to file a Form 990/EZ/N because they believe they are not required to do so. If IRS records indicate that the organization should file a Form 990/EZ/N each year (for example, the organization receives an IRS notice stating that it failed to file a return for a given year), then the organization may appear on the auto-revocation list notwithstanding its claim to being exempt from the filing requirement.

Which form an organization is required to file usually depends on the organization's gross receipts or the fair market value of its assets.

Gross receipts or fair market value of assets	Return required
Gross receipts normally not more than $50,000 (regardless of total assets)	990-N (but may file a Form 990 or 990-EZ)
Gross receipts < $200,000, *and* Total assets < $500,000	990-EZ (but may file a Form 990)
Gross receipts ≥ $200,000, *or* Total assets ≥ $500,000	990

Special Rules for Section 509(a)(3) Supporting Organizations. Every supporting organization described in section 509(a)(3) included in the Group Ruling must file a Form 990 or Form 990-EZ (and not Form 990-N) each year, unless (i) the organization can establish that it is an integrated auxiliary of a church within the meaning of Treas. Reg. § 1.6033-2(h) (in which case the organization need not file Form 990/EZ *or* Form 990-N); or (ii) the organization's gross receipts are normally not more than $5,000, in which case, the religious supporting organization may file Form 990-N in lieu of a Form 990 or Form 990-EZ.

Automatic Revocation for Failure to File a Required Form 990/EZ/N. Any organization that does not file a required Form 990/EZ/N for three consecutive years automatically loses its tax-exempt status under section 6033(j). The IRS is required to send an organization a notice if the organization fails to file Form 990/EZ/N for two consecutive years informing the organization that the IRS has no record of a return for two consecutive years and the organization's tax exemption will be automatically revoked if the IRS does not receive a return from the organization by the due date for the next such return required to be filed.[12] If an organization loses its tax-exempt status under section 6033(j), it must file an application (Form

[10] I.R.C. § 6033(a)(3)(A)(i); Treas. Reg. § 1.6033-2(h).
[11] Treas. Reg. § 1.6033-2(g)(1)(vii).
[12] I.R.C. § 6033(j)(1)(A).

ED_016126_00001373-00010

1023 or Form 1023-EZ) with the IRS to reinstate its tax-exempt status. *See* the IRS website (charities and non-profits) at www.irs.gov/charities-non-profits for information on automatic revocation, including the current list of revoked organizations and guidance about reinstatement of exemption.

Public Disclosure and Inspection. Subordinate organizations required to file Form 990/EZ[13] must upon request make a copy of the form and its schedules (other than contributor lists) and attachments available for public inspection during regular business hours at the organization's principal office and at any regional or district offices having three or more employees. Form 990/EZ for a particular year must be made available for a three year period beginning with the due date of the return.[14] In addition, any organization that files Form 990/EZ must comply with written or in-person requests for copies of the form. The organization may impose no fees other than a reasonable fee to cover copying and mailing costs. If requested, copies of the forms for the past three years must be provided. In-person requests must be satisfied on the same day. Written requests must be satisfied within 30 days.[15]

Public Disclosure of Form 990-T. Form 990-T, Exempt Organization Unrelated Business Income Tax Return, for organizations exempt under section 501(c)(3) (which includes all organizations in the USCCB Group Ruling) is subject to rules similar to those for public inspection and copying of Forms 990/EZ.[16]

Group Returns. USCCB does not file a group return Form 990 on behalf of any organizations in the Group Ruling. In addition, no subordinate organization under the Group Ruling is authorized to file a group return for its own affiliated group of organizations.

For more information, refer to *Annual Filing Requirements for Catholic Organizations*, available at www.usccb.org/about/general-counsel/ under "Tax and Group Ruling."

9. **Certification of Racial Nondiscrimination by Private Schools in Group**

---

[13] Form 990-N is available for public inspection at no cost through the IRS website at www.irs.gov.

[14] The penalty for failure to permit public inspection of the Form 990 is $20 for each day during which such failure continues, up to a maximum of $10,000. I.R.C. § 6652(c)(1)(C).

[15] I.R.C. § 6104(d). Generally, a copy of an organization's exemption application and supporting documents must also be provided on the same basis. However, since organizations included in the Group Ruling do not file exemption applications with the IRS, nor did the USCCB, organizations included in the Group Ruling should respond to requests for public inspection and written or in-person requests for copies by providing a copy of the page of the current OCD on which they are listed. If a covered organization does not have a copy of the current OCD, it has two weeks within which to make it available for inspection and to comply with in-person requests for copies. Written requests must be satisfied within the general time limits.

[16] Only the Form 990-T itself, and any schedules, attachments, and supporting documents that relate to the imposition of tax on the unrelated business income of the organization, are required to be made available for public inspection.

ED_016126_00001373-00011

Ruling. Revenue Procedure 75-50[17] sets forth notice, publication,[18] and recordkeeping requirements regarding racially nondiscriminatory policies with which private schools, including church-related schools, must comply as a condition of establishing and maintaining exempt status under section 501(c)(3) of the Code. Under Rev. Proc. 75-50 private schools are required to file an annual certification of racial nondiscrimination with the IRS. For private schools not required to file Form 990, the annual certification must be filed on Form 5578, Annual Certification of Racial Nondiscrimination for a Private School Exempt from Federal Income Tax. This form is available at www.irs.gov. Form 5578 must be filed by the 15th day of the fifth month following the close of the fiscal year. Form 5578 may be filed by an individual school or by the diocese on behalf of all schools operated under diocesan auspices. The requirements of Rev. Proc. 75-50 remain in effect and must be complied with by all schools listed in the OCD. ***Diocesan or school officials should ensure that the requirements of Rev. Proc. 75-50 are met since failure to do so could jeopardize the tax-exempt status of the school and, in the case of a school not legally separate from the church, the tax-exempt status of the church itself.*** For more information, refer to *Annual Filing Requirements for Catholic Organizations*, available at www.usccb.org/about/general-counsel/ under "Tax and Group Ruling."

10. **Lobbying Activities**. Subordinate organizations under the Group Ruling may lobby for changes in the law, provided such lobbying is not more than an insubstantial part of their total activities. Attempts to influence legislation both directly and through grassroots lobbying at the federal, state, or local levels are subject to this restriction. The term "lobbying" includes activities in support of or in opposition to referenda, constitutional amendments, and similar ballot initiatives. There is no distinction between lobbying activity that is related to a subordinate organization's exempt purposes and lobbying that is not. There is no fixed percentage that constitutes a safe harbor for "insubstantial" lobbying. Please consult a local tax advisor about any lobbying activity questions. For more information, refer to *Political Activity and Lobby Guidelines for Catholic Organizations*, available at www.usccb.org/about/general-counsel/ under "Tax and Group Ruling."

11. **Political Activities**. ***Subordinate organizations under the Group Ruling may not participate or intervene in any political campaign on behalf of or in opposition to any candidate for public office. Violation of the prohibition against political campaign intervention can jeopardize the organization's tax-exempt status.*** In addition to revoking tax-exempt status, IRS may also impose excise taxes on an exempt organization and its managers on account of political expenditures. Please consult a local tax advisor about any political campaign

---

[17] 1975-2 C.B. 587.

[18] Revenue Procedure 2019-22, 2019-22 I.R.B. 1260, revised Revenue Procedure 75-50 to include a third method by which a private school may make its racially nondiscriminatory policy known to all segments of the general community the school serves. The school may now display a notice of its racially nondiscriminatory policy on its primary publicly accessible Internet homepage at all times during the tax year (excluding temporary outages due to website maintenance or technical problems) in a manner reasonably expected to be noticed by visitors to the homepage.

ED_016126_00001373-00012

intervention questions. For more information, refer to *Political Activity and Lobby Guidelines for Catholic Organizations*, available at www.usccb.org/about/general-counsel/ under "Tax and Group Ruling."

12. **Group Exemption Number ("GEN")**. The group exemption number or GEN assigned to the USCCB Group Ruling is 0928. ***This number must be included on each Form 990/EZ, Form 990-T, and Form 5578 required to be filed by a subordinate organization under the Group Ruling.***[19] We advise *against* using GEN 0928 on Form SS-4, Request for Employer Identification Number, because in the past this has resulted in the IRS improperly including the USCCB as part of the subordinate organization's name in IRS records.

13. **Employer Identification Numbers ("EINs")**. Each subordinate organization under the Group Ruling must have and use its own EIN. **Do not** use the EIN of the USCCB or an affiliated parish, diocese, or other organization in any filings with IRS (*e.g.*, Forms 941, W-2, 1099, or 990/EZ) or other financial documents. Subordinate organizations may *not* use USCCB's EIN in order to qualify for online donations, grants or matching gifts.

[19] The IRS has expressed concern about organizations covered under the Group Ruling that fail to include the group exemption number (0928) on their Form 990/EZ/T filings, particularly the initial filing.

ED_016126_00001373-00013

IRS **Tax Exempt & Government Entities**

Group Exemptions

What is a group exemption letter?

The IRS sometimes recognizes a group of organizations as tax-exempt if they are affiliated with a central organization. This avoids the need for each of the organizations to apply for exemption individually. A group exemption letter has the same effect as an individual exemption letter except that it applies to more than one organization.

What is the reason for group exemptions?

Group exemptions are an administrative convenience for both the IRS and organizations with many affiliated organizations. Subordinates in a group exemption do not have to file, and the IRS does not have to process, separate applications for exemption. Consequently, subordinates do not receive individual exemption letters.

What types of organizations can qualify for group exemptions?

Exempt organizations that have, or plan to have, related organizations that are very similar to each other may apply for a group exemption.

What are central and subordinate organizations?

Groups of organizations with group exemption letters have a "head" or main organization, referred to as a central organization. The central organization generally supervises or controls many chapters, called subordinate organizations. The subordinate organizations typically have similar structures, purposes and activities.

> **Example**: *X is a national, fraternal organization exempt under Internal Revenue Code (IRC) Section 501(c)(8). X has several state and hundreds of local chapters that have nearly identical articles of incorporation, by-laws, purposes and activities. As the national organization, X is considered the central organization; the state and local chapters are subordinate organizations and are covered under X's group exemption.*

What criteria must organizations meet to be included in a group exemption?

To qualify for a group exemption, the central organization and its subordinates must have a defined relationship. Subordinates must be:

- Affiliated with the central organization;
- Subject to the central organization's general supervision or control; and
- Exempt under the same paragraph of IRC 501(c), though not necessarily the paragraph under which the central organization is exempt.

Revenue Procedure 80-27, 1980-1 C.B. 677 sets forth additional criteria.

Must the central organization be recognized by the IRS as tax-exempt before the organization can obtain a group exemption?

No. A central organization may submit its request for a group exemption at the same time it submits its exemption application on Form 1023, Application for Recognition of Exemption Under Section 501(c)(3) of the Internal Revenue Code; Form 1024, Application for Recognition of Exemption Under 501(a); or Form 1024-A, Application for Recognition of Exemption Under Section 501(c)(4) of the Internal Revenue Code. Although churches are not required to apply for recognition of their own status to be tax-exempt, under the procedures for group rulings, a church must request recognition of its own exempt status to be the central organization in a group ruling.

Are there any special rules for churches?

With limited exceptions, churches are subject to the same general requirements on group rulings as other organizations. However, churches are not required to file annual updates notifying the IRS of changes in the composition of the group.

Where does a central organization apply for exemption and submit a request for a group exemption?

A central organization submits its application for exemption, the request for a group exemption and the required user fee as directed in the most recent revenue procedure on Exempt Organizations determination letters on exempt status (**Rev. Proc. 2019-5**, updated annually).

ED_016126_00001373-00014

What must a request for a group exemption contain?

The central organization submits a letter to the IRS on behalf of itself and its subordinates. The letter includes:

a. Information verifying the existence of the required relationship;

b. A sample copy of a uniform governing instrument (such as a charter, trust indenture or articles of association) adopted by the subordinates;

c. A detailed description of the subordinates' purposes and activities including the sources of receipts and the nature of expenditures;

d. An affirmation by a principal officer that, to the best of the officer's knowledge, the subordinates' purposes and activities are as stated in (b) and (c) above;

e. A statement that each subordinate to be included in the group exemption letter has furnished written authorization to the central organization;

f. A list of subordinates to be included in the group exemption letter to which the IRS has issued an outstanding ruling or determination letter relating to exemption;

g. If the application for a group exemption letter involves IRC 501(c)(3), an affirmation to the effect that, to the best of the officer's knowledge and belief, no subordinate to be included in the group exemption letter is a private foundation as defined in IRC 509(a);

h. For each subordinate that is a school claiming exemption under IRC 501(c)(3), the information required by **Rev. Proc. 75-50, 1975-2 C.B. 587** (as modified by **Rev. Proc. 2019-22, 2019-22 I.R.B 1260**) and **Revenue Ruling 71-447, 1971-2 C.B. 230**; and

i. A list of the names, mailing addresses (including ZIP Code), actual addresses (if different) and employer identification numbers of subordinates to be included in the group exemption letter. A current directory of subordinates may be furnished in lieu of the list if it includes the required information and if the subordinates not to be included in the group exemption letter are identified.

The rules for applying for a group exemption are set forth in **Rev. Proc. 80-27, 1980-1 C.B. 677**.

How does the group exemption process work?

Upon receipt of an application Form 1023, 1024 or 1024-A and a request for group exemption, the IRS first determines whether the central organization and the existing subordinates qualify for tax exemption. Once the IRS grants the exemption, the central organization is responsible for:

1. Ensuring that its current subordinates continue to qualify to be exempt;
2. Verifying that any new subordinates are exempt; and
3. Updating the IRS annually of new subordinates, subordinates no longer to be included and subordinates that have changed their names or addresses.

What is included in an annual update?

Annual updates must contain:

a. Information about changes in purposes, character or method of operation of subordinates included in the group exemption letter.

b. Lists of:

   1. Subordinates that have changed their names or addresses during the year;
   2. Subordinates no longer to be included in the group exemption letter because they have ceased to exist, disaffiliated or withdrawn their authorization to the central organization; and
   3. Subordinates to be added to the group exemption letter because they are newly organized or affiliated or have newly authorized the central organization to include them.

   Each list must show the names, mailing address (including ZIP Codes), actual address (if different) and employer identification numbers of the affected subordinates.

   An annotated directory of subordinates will not be accepted for this purpose. If none of these changes occurred, the central organization must submit a statement to that effect.

c. The same information about new subordinates that was required in the initial request. If a new subordinate does not differ in any material respects from the subordinates included in the original request, however, a statement to this effect may be submitted in lieu of detailed information.

ED_016126_00001373-00015

Where does a central organization submit an annual update?

Annual updates go to:

Internal Revenue Service Center
Ogden, Utah 84201-0027

What are the filing requirements for organizations that hold group exemptions?

A group exemption letter does not change the filing requirements for exempt organizations. The central organization and the subordinates must file Forms 990, Return of Organization Exempt from Income Tax, (or 990-EZ, Short-Form Return of Organization Exempt from Income Tax), unless they meet a filing exception. If the central organization is required to file an annual return, it must file its own separate return but may also file a group return on behalf of some or all its subordinates. To see how the subordinates are reported on a group return, please consult the form instructions.

How do I verify that an organization is included as a subordinate in a group exemption ruling?

The central organization that holds a group exemption (rather than the IRS) determines which organizations are included as subordinates under its group exemption ruling. Therefore, you can verify that an organization is a subordinate under a group exemption ruling by consulting the official subordinate listing approved by the central organization or by contacting the central organization directly. You may use either method to verify that an organization is a subordinate under a group exemption ruling.

How do donors verify that contributions are deductible under Section 170 with respect to a subordinate organization in a Section 501(c)(3) group exemption ruling?

Subordinate units that are included in group exemption letters are not listed separately in **Tax Exempt Organization Search** (Publication 78 data). Donors should obtain a copy of the group exemption letter from the central organization. The central organization's listing in Tax Exempt Organization Search will indicate that contributions to its subordinate organizations covered by the group exemption ruling are also deductible, even though most subordinate organizations are not separately listed in Tax Exempt Organization Search or on the Exempt Organizations Business Master File. Donors should then verify with the central organization, by either of the methods indicated above, whether the particular subordinate is included in the central organization's group ruling. The subordinate organization need not itself be listed in Tax Exempt Organization Search or on the EO Business Master File. Donors may rely on central organization verification about deductibility of contributions to subordinates covered in a Section 501(c)(3) group exemption ruling.

Where can you get more information?

You can get more information about group exemptions and the group ruling process from the IRS Exempt Organizations Office:

EO Website www.irs.gov/eo

Publication 557, Tax-Exempt Status for Your Organization

EO Customer Account Services
You may direct questions about group exemptions to the IRS Tax Exempt and Government Entities Customer Account Services at Ex. 6 Personal Privacy (PP) (toll-free number).

Alliance-builder and strategist with extensive experience in community-based and government sectors with a focus on environmental issues. A Bronx-focused strategy developer skilled at convening small and large scale discussions targeting community stakeholders, funders and government entities.

PROFESSIONAL EXPERIENCE

Youth Ministries for Peace and Justice Bronx, NY
Special Projects Manager 2017-2018

Develop, plan, and implement infrastructure projects; develop new and maintain existing strategic relationships with external stakeholders; identify and cultivate relationships with funding prospects; update program messaging and design; support fund development and marketing strategy; manage Bronx River Foodway pilot season including Foodway grants program; organize Soundview Marketplace campaign including launch of property activation phase; establish relationship with Community Food Funders including visit by over 30 funders; and develop and implement capital campaign for infrastructure projects.

Simon Bolivar Foundation/CITGO Bronx, NY

Program Officer 2010-Present

Develop and implement a community-advised grants program targeting grassroots organizations in the South Bronx in the areas of education, environment, health, and arts and culture; **Develop grant guidelines** informed by focus groups of Bronx stakeholders; **Build and manage advisory team** to guide grantmaking for $1.25M annual investment; **Support Vice President and Foundation Board** in developing strategic relationships; **Maintain communications** with grantees, including conducting site visits; **Develop collateral** to convey impact of investments.

Office of Congressman Jose E. Serrano Bronx, NY

Special Advisor on Environmental Affairs 2004-2010

Interfaced with community groups, government agencies, local institutions to identify policy solutions and advocacy positions to address environmental issues in the Bronx

- **Built strategic alliances** with grassroots, advocacy, faith-based and labor groups;
- **Advised on community proposals** for government funding, development plans, environmental impact studies (EIS), and business plans in terms of local impact;
- **Analyzed policy impact** on various communities;
- **Developed advocacy tools** such as position statements;
- **Cultivated collaborative partnerships** in building a government and community-based referral network to centralize diverse resources;
- **Informed communication tools** such as newsletters and press releases;

Key Accomplishments:

- **guided federal funding for projects connecting communities to Parks**: participated in various stakeholder roundtables focused on park and greenway development: the Bronx River Greenway (Starlight Park, Concrete Plant Park); the South Bronx Greenway (Hunts Point Riverside Park, North and South Brother Islands, Barretto Point Park); the Harlem River Greenway (High Bridge, Depot Place Park, Randall's Island Connector)
- **commissioned studies on park stewardship models:** convened stakeholder meetings on public-private partnerships and their impact on the maintenance, programming, and earned income potential of Bronx parks and greenways
- **convened community advisory board** to oversee implementation of NYU's South Bronx Asthma Study, landmark research which correlated truck traffic with childhood asthma

Community Premier Plus Bronx, NY

Director of Community Outreach and Government Relations 2002-2004

- Funded Community Partnerships: advised on strategic Bronx investments of health events, campaigns, and programs in collaboration with community groups
- Health Policy Education: organized educational seminars, legislative briefings and community outreach campaigns targeting marginalized communities.

National Park Service Yosemite, CA

Technical Writer 2003

- Developed content for Sierra Nevada Wilderness Area's educational website to promote the need to conserve wilderness and encourage greater appreciation by urban audiences
- Captured the essence of 29 distinct wilderness areas throughout the Sierra Nevada mountain range based on independent field and archival research.

The Global Hunger Project New York, NY

Development Associate/Global Strategy Team Member 2001

- Administered fundraising work of twelve countries and 800 individual major donors
- Facilitated investor workshops and leadership trainings for fundraisers, securing $8M to support locally-developed initiatives focused on empowering women to create systemic change.

South North Development Initiative New York, NY

Latin America Program Manager 2000

- Procured capital and technical assistance by bridging North American investors to socially responsible Local Venture Capital (LVC) funds in Ecuador and Argentina.
- Coordinated United Nations Development Program (UNDP) regional funds distribution for technical assistance to international affiliates working to change venture capital climate
- Facilitated communication with international financial institutions, NGOs, and multilateral and bilateral agencies to streamline investment processes.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Anacostia Riverkeeper

Address: 45 L Street SW #70565, Washington, DC 20024

City: Washington

State: DC: District of Columbia Zip Code: 20024

B. Unique Entity Identifier (UEI): V31BQXEBKRR5

C. Applicant/Recipient Point of Contact

Name: Quinn Molner

Phone: Ex. 6 Personal Privacy (PP)

Email: riverkeeper@anacostiariverkeeper.org

Title: Director of Operations

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Suzanne W Kelly	Director of Operations	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Engaging Diverse Communities in the Anacostia Watershed

EJ Collaborative Problem-Solving Cooperative Agreement Program

Environmental Outcomes Logic Model

ANACOSTIA RIVERKEEPER®

12+ annual listening tour events reaching 200+ diverse community members

ARK develops relationships with small community groups within the watershed

As programming starts, ARK will leverage existing partnerships to meet with a diverse group of watershed residents, hearing their own visions on the watershed & barriers to access and engagement.

Additionally, during this period ARK will strive to build new partnerships with community organizations in the watershed who might be interested in expanding or supporting Environmental Justice programming.

Programming & Events in Diverse Communities

ARK is committed to hosting a series of events targeting neighborhoods and communities that historically have not engaged with the watershed programming. Programming, when possible, will be provided in English and Spanish. Annually, these include:
→ 3 Anacostia Evening events
→ 20 dedicated private boat tours
→ 15+ educational events with youth groups.

After each event, individuals will receive a brief survey allowing them to report on any barriers to access, as well as their own interest in continued engagement on the watershed.

2,000+ total novel participants from diverse communities

Participants self-report increased investment in the Watershed

Partner organizations are empowered to run continued environmental justice to residents

ARK & partners see increased engagement in BIPOC & Spanish-speaking residents

Short-term, ARK will know its successful if it engages with 2,000+ novel participants, and 90% or more of these participants report increased interest and intent to recreate in the watershed.

Long-term, we hope that our partnership will foster long-term relationships with community groups so that they can continue environmental justice programming. Additionally, ARK hopes its programming leads to an increasingly diverse membership engaged audience as we continue to educate all on issues broaching the watershed.

ANACOSTIA PARKS &
COMMUNITY
COLLABORATIVE

RE: EJ Collaborative Problem-Solving Cooperative Agreement Program (EJCPS)

To Whom It May Concern:

I am contacting you on behalf of the Anacostia Parks and Community Collaborative (APACC) providing our support for Anacostia Riverkeeper's (ARK) proposal to engage underserved BIPOC and Spanish-speaking communities in DC and Maryland in rich recreational and educational opportunities on the Anacostia watershed, reigniting these communities' passion for stewardship of their river.

Anacostia Riverkeeper is a long-time member of APACC, and we have worked with ARK on various community listening sessions and events. We are excited for this opportunity to join ARK's proposal and are committing to help organize listening sessions to important communities within our watershed and assist in the planning, promotion, execution, and participation of one yearly (three total) *Anacostia Evening* events at Anacostia Park.

Sincerely,

Brenda Lee Richardson

CHEER

Community Health and Empowerment
through Education and Research

April 13, 2023

RE: EJ Collaborative Problem-Solving Cooperative Agreement Program (EJCPS)

To Whom It May Concern:

I am contacting you on behalf of Community Health and Empowerment through Education and Research (CHEER) providing our support for Anacostia Riverkeeper's (ARK) proposal to engage underserved BIPOC and Spanish-speaking communities in DC and Maryland in rich recreational and educational opportunities on the Anacostia watershed, reigniting these communities' passion for stewardship of their river.

We are working with ARK on their Montgomery County grant, *Litter Cleanups By and For Diverse Communities* and their Upper Anacostia water quality monitoring program. We have also been working with Nature Forward on a project to reduce litter in Long Branch that is training and activating youth as environmental advocates through a youth participatory action research process. We are excited for this opportunity to join ARK's proposal and are committing to help organize listening sessions to important communities within our watershed and assist in the planning, promotion, execution, and participation of one yearly (three total) *Anacostia Evening* events in Long Branch. This project will enable us to broaden community members' sense of place and belonging to the Anacostia watershed. It will provide opportunities for community members to enjoy the natural spaces that are available to them and promote their health and wellbeing in the process. Consequently, we hope that more community members will exercise a greater responsibility for the watershed.

Sincerely,

Bruce L Baker

ONE MONTGOMERY GREEN

April 11, 2023

RE: EJ Collaborative Problem-Solving Cooperative Agreement Program (EJCPS)

To Whom It May Concern:

I am contacting you on behalf of One Montgomery Green (OMG) providing our support for Anacostia Riverkeeper's (ARK) proposal to engage underserved BIPOC and Spanish-speaking communities in DC and Maryland in rich recreational and educational opportunities on the Anacostia watershed, reigniting these communities' passion for stewardship of their river.

We are working with ARK on their Montgomery County grant, *Litter Cleanups By and For Diverse Communities*. We are excited for this opportunity to join ARK's proposal and are committing to helping organize listening sessions to important communities within our watershed and assist in the general outreach for all (nine total) Anacostia Evening events. We have worked with ARK on many projects including microplastics sampling and outreach, as well as bringing students to the Anacostia watershed for educational visits.

This project will educate Montgomery County residents (particularly underserved communities in Wheaton and Silver Spring where OMG focuses) about litter and how it moves with stormwater pollution into our waterways. Moreover, this work will not only reduce litter entering the streams but will teach residents ways they can help reduce litter's impacts on the watershed and their communities.

One Montgomery Green is a nonprofit 501 (c) (3) organization, located in Montgomery County MD whose mission is to develop and promote models for a sustainable, just, and regenerative Montgomery County, MD. We do this by engaging stakeholders, fostering partnerships with local businesses, and promoting educational projects for a verdant and equitable economy.

Sincerely,

Wendy Howard

WORK EXPERIENCE

ANACOSTIA RIVERKEEPER Washington, DC

Director of Operations (January 2023 - Present)

- Manages $90,000 of grant revenue annually across programs such as *Anacostia River Explorers* Boat Tours, *Friday Night Fishing*, and *Clean Waterways* volunteer trash cleanups
- Coordinate with over 20 watershed community groups on core program and grant events, outreach to diverse communities, and environmental justice initiatives
- Develops and maintains public-facing outreach materials and organizational knowledge management systems, and organizational calendar

Operations and Communications Manager (January 2022 – December 2022)

- Create and execute newsletter and social media content for an audience of over 24,000 constituents; increased newsletter open rate average from 20% to 45% since 2018
- Collaborate with multiple NGO and government organizations, coordinate projects, and promote community engagement in the DC and MD area to restore and protect the Anacostia River

Communications and Media Assistant (January 2018 – December 2021)

- Spearhead new media campaigns and manage all social media platforms to enhance the organizational reach; averaging a 190% increase in followers over three years
- Develop newsletters for 8,000 subscribers to promote volunteerism, and donations; avg. 20% open rates

ECONOMICS RESEARCH INSTITUTE Washington, DC

Operations Analyst November 2020 – May 2021

- Leading organizational pivot to create educational content, including terms index and class guides
- Provide data visualization and graphics for 25 projects over 6 months and oversee posts for Visual Economics Blog
- Construct organizational management AirTable for staff onboarding and program management

EDUCATION

THE GEORGE WASHINGTON UNIVERSITY, Columbian College of Arts and Sciences Washington, DC

Bachelor of Arts in Organizational Sciences, Double Minor in Communications and Sustainability May 2021

Cumulative GPA: 3.57, Major GPA: 3.54

Relevant coursework includes: Conflict Negotiation and Resolution, Network Analysis, Strategic Communication, Leading Change, Corporate Ethical Communication, Industrial / Organizational Psychology, Intermediate Chinese I-IV

Research Thesis: *Effects of Change Leadership During Mergers and Acquisitions from a Financial Perspective*

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

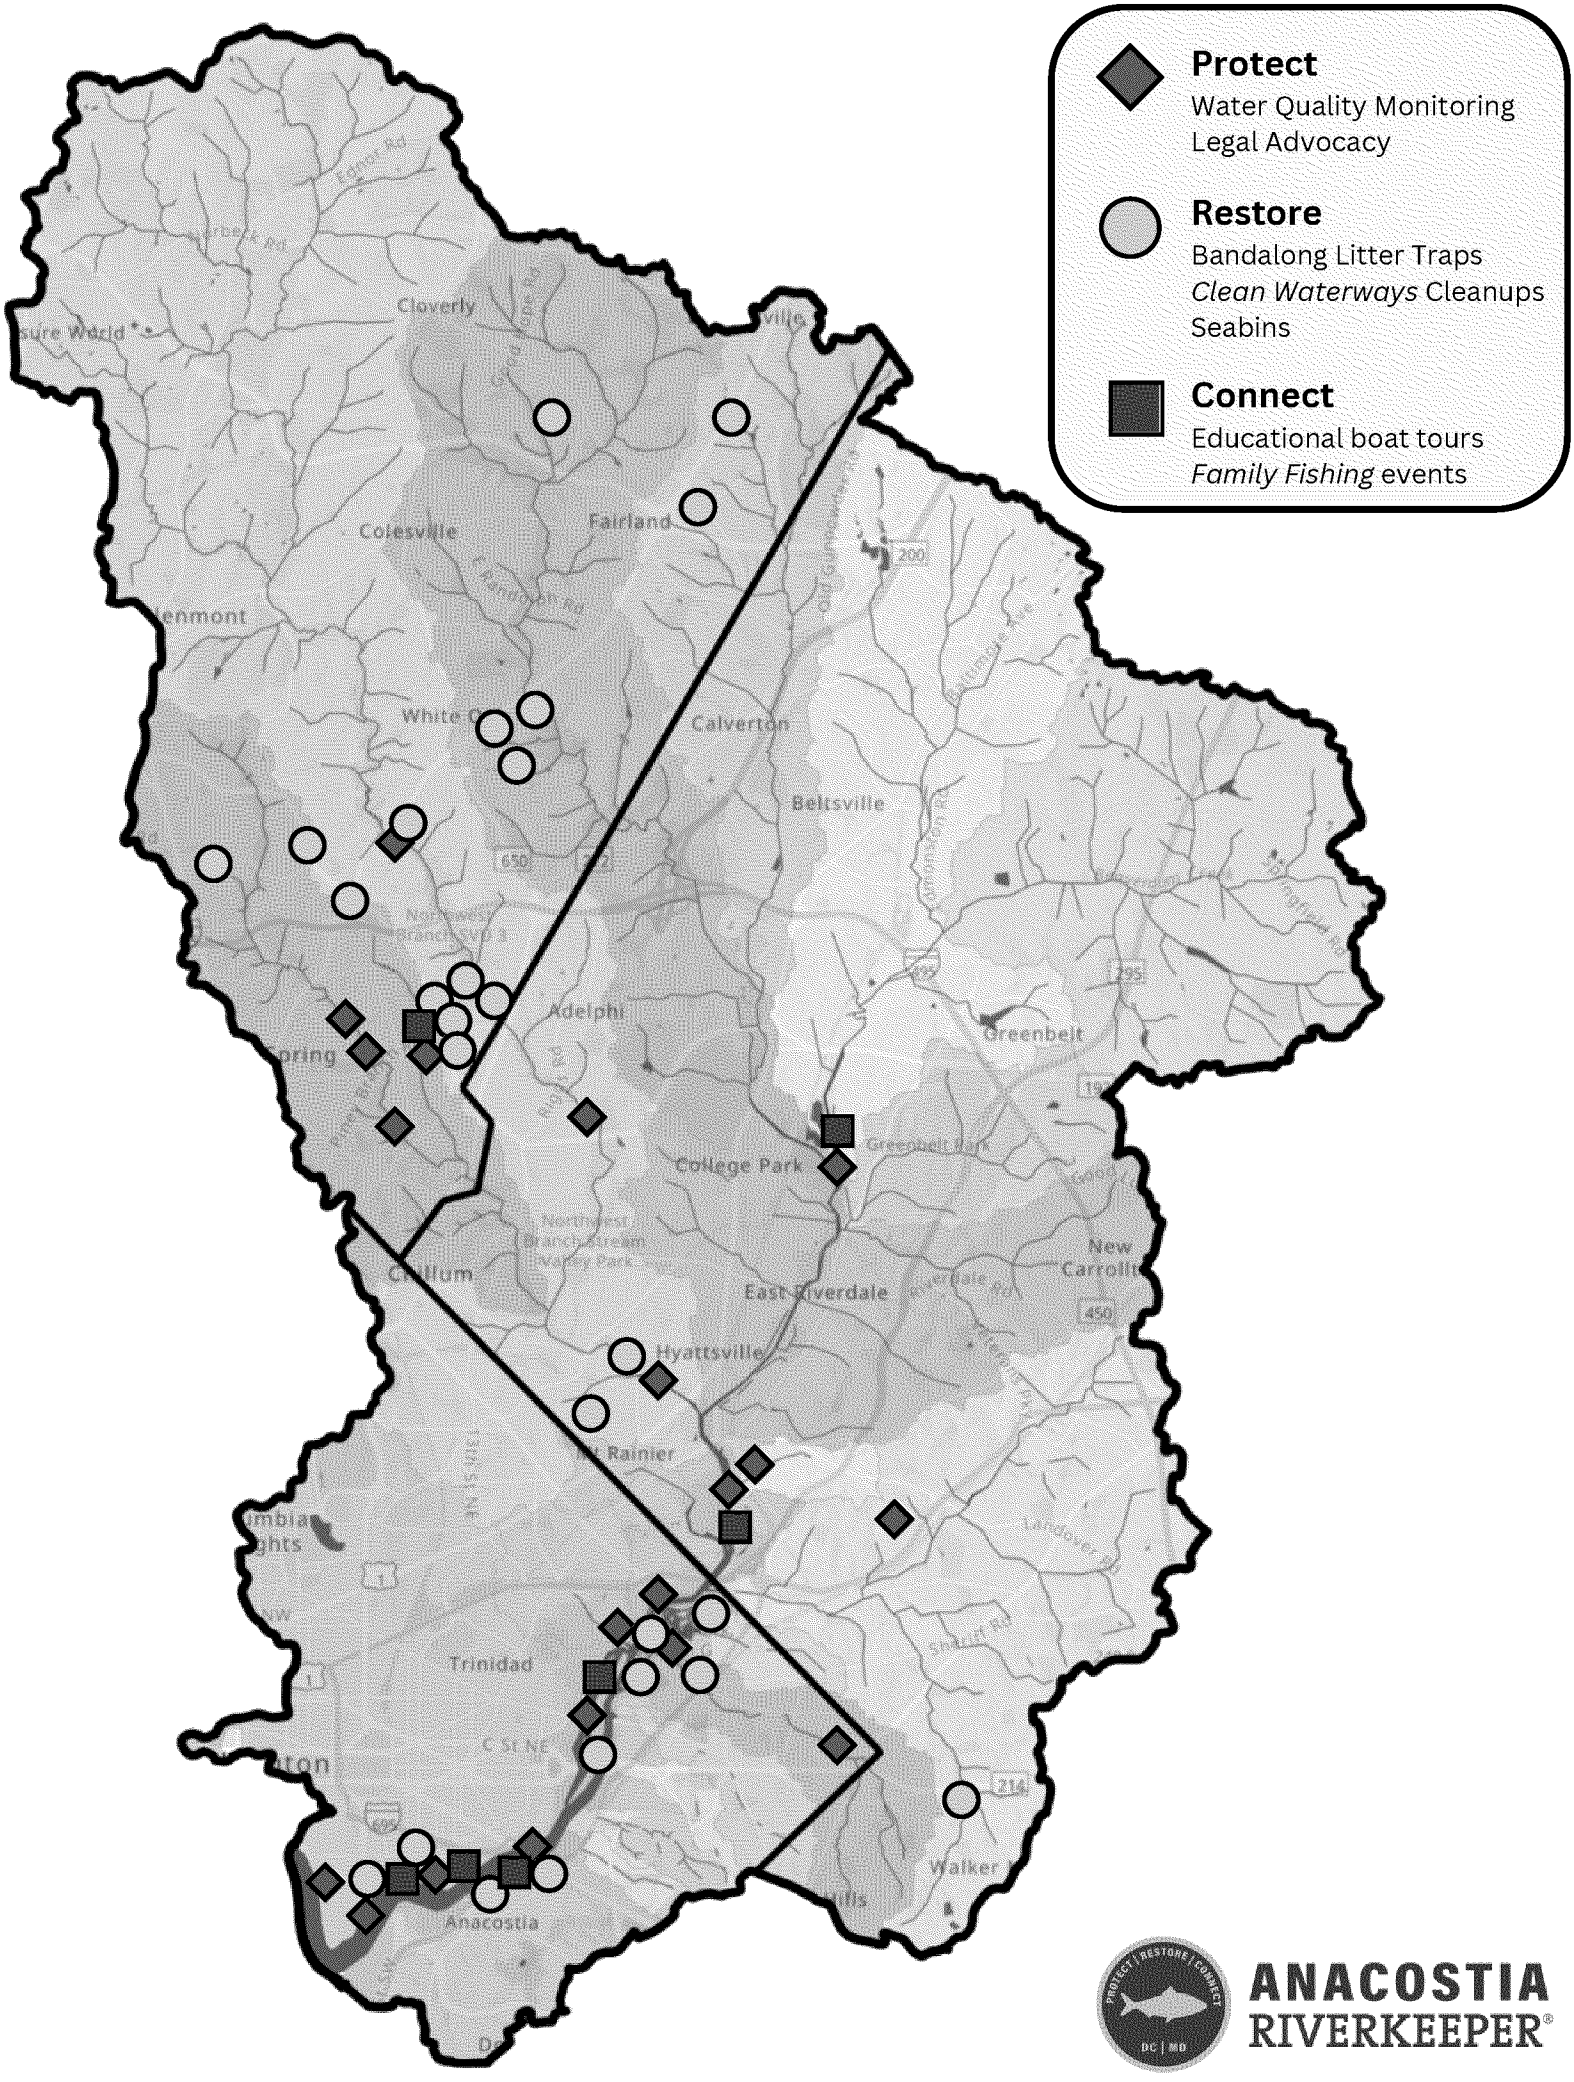
Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. We determined that you are a public charity under the Code section(s) listed in the heading of this letter.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

Letter 947 (DO/CG)

ANACOSTIA RIVERKEEPER

We have sent a copy of this letter to your representative as indicated in your power of attorney.



Sincerely,

Robert Choi

Title: Sr. Director of Development

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

NA

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☐ Yes ☒ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☐ Yes ☒ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Melissa Guzman, Chief Operating Officer, 8151 15th Ave, Hyattsville, MD 20783, me.guzman@wearecasa.org, (fax) Ex. 6 Personal Privacy (PP) (phone) Ex. 6 - Personal Privacy (PP)

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

CASA provides a complaint/grievance process for employees to report any incidents related to discrimination, harassment, violation, or any other professional conduct concerns. This information is provided in the CASA Employee Handbook, in Section 2.5 Policy Prohibiting Harassment and Discrimination and Section 6.10 How Employee Concerns Are Addressed. Further, Section 2.3 Equal Opportunity Employment covers CASA's commitment to equal opportunity employment. CASA is happy to provide a copy of the handbook upon request for further review.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Yasmin Viera	Sr. Director of Development	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights (OEJECR)

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for CASA

To Whom it May Concern:

I am writing on behalf of the Coalition for Smarter Growth, a division of the Piedmont Environmental Council (PEC),[1] to affirm our commitment to partner with CASA as a sub-awardee on their proposal to the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program (EJCPS) to create a Virginia-wide 'Safe Streets' Program in minority, immigrant, lower-income communities. The Coalition for Smarter Growth (CSG) is the leading organization in the Washington DC region dedicated to making the case for smart growth. Our mission is to advocate for walkable, bikeable, and transit-oriented communities as the most sustainable and equitable way for the Washington, DC region to grow and provide opportunities for all. We are pleased to receive a subaward from CASA and serve as a key community partner in their responsive proposal to the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Agreement Program submitted to the Environmental Protection Agency (EPA) by CASA.

Coalition for Smarter Growth Role: We are committed to working with CASA and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the Request for Applications (RFA). This letter confirms our agreement to accept and fulfill a subaward of $80,000 ($40,000 per year over two years) to achieve the goals of the CASA proposal and this partnership. The Coalition for Smarter Growth will contribute staff time, planning, technical expertise in transportation, capacity building support, outreach assistance, and relationships with decisionmakers. To support the project and its partners, the Coalition for Smarter Growth commits to the following:

- Assistance with identification of potential geographic areas of focus and issue areas of focus for campaigns.

[1] The Piedmont Environmental Council (PEC) is a 501(c)3, EIN 54-0935569, and is a current recipient of other federal grants. PEC's mission is "protecting and restoring the lands and waters of the Virginia Piedmont, while building stronger, more sustainable communities."

ED_016126_00001397-00002

- Technical advice on transportation policy, design, and funding and educational briefings to constituents on safe street design.
- Assistance with data collection during the outreach stage of the campaign including safety audits.
- Aid with identifying and communicating with decision makers.
- Communication and dissemination of information about the campaign to our networks and constituencies.

CASA and Coalition for Smarter Growth have agreed upon the aforementioned role expectations surrounding this partnership.

Coalition for Smarter Growth Relationship to Applicant: The Coalition for Smarter Growth and CASA have previously partnered on a 'Safe Streets' campaign focused on a dangerous arterial road (Route 7), through an immigrant neighborhood in a regionally defined "Equity Emphasis Area" in Fairfax County. We have continued to collaborate and have a common interest using the lessons learned to expand to a state-wide program to win safer streets for minority, immigrant, and lower-income underserved communities through this funding opportunity. Our prior partnership and work on pedestrian safety and access to transit on Route 7 in Fairfax has already yielded promising results, such as the installation of new LED street lighting, a speed study, lower speed limit, and new sidewalk connection. CSG and CASA share a vision and continued interest in improving pedestrian safety, increasing access to transit and safe biking, and reducing air pollution and emissions from single-occupant vehicles.

Interest in Environmental Issue and Relationship to Community: PEC and other leading environmental groups in the Washington DC region founded CSG in 1997 to promote a more sustainable way for the region and the States of Virginia and Maryland to grow. Our mission is directly relevant to the project and EPA's sustainability and equity goals: "advocating for walkable, bikeable, and transit-oriented communities as the most sustainable and equitable way for the Washington, DC region to grow and provide opportunities for all." In recent reports using the Rocky Mountain Institute Shift Calculator we have demonstrated that walkable, transit-oriented communities are essential for reducing vehicle miles traveled (VMT) and greenhouse gas emissions. In fact, we have shown, and the Metropolitan Washington Council of Governments has confirmed, that the region needs to reduce VMT by 20% in order to reduce the region's greenhouse gas emissions 50% below 2005 levels by 2030. Walkable, inclusive, transit-oriented communities are key to shifting trips to non-auto modes and reducing VMT.

More walkable communities with safer street designs and reduced rates of driving also provide essential health benefits for local residents by reducing ozone and particulate pollution, and by reducing the rate of deaths and serious injuries in crashes. Smart Growth America's 2022 Dangerous by Design[2] report documents that the nation's arterial roads represent just 15% of our nation's lane miles but 60% pedestrian deaths, and that people of color and lower income communities are disproportionately at risk. That is why our focus with CASA on safe streets in minority, immigrant, and lower income communities in communities in Virginia is so important.

If CASA is selected for participation in the program, the Piedmont Environmental Council will accept the sub-award on behalf of its Coalition for Smarter Growth division. CSG will regularly engage with CASA and other key partners of the Collaborative Problem-Solving Agreement. This includes participating in

[2] Smart Growth America, Dangerous by Design 2022, https://smartgrowthamerica.org/dangerous-by-design/

EJCPS meetings with the technical advisory panel and other key partners and stakeholders from our community.

We look forward to participating in the EJCPS to build local capacity in CASA and the community to advance transformative environmental justice projects that achieve health, equity, and environmental sustainability goals.

In summary, we encourage the EPA OEJECR to favorably consider CASA's application for this program and count this letter as an official commitment by the Coalition for Smarter Growth.

Respectfully,

Christopher Miller
President
Piedmont Environmental Council

Stewart Schwartz
Executive Director
Coalition for Smarter Growth

Chesapeake Climate Action Network

April 3, 2023
U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights (OEJECR)

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for CASA

To Whom it May Concern,

I am writing on behalf of Chesapeake Climate Action Network as a formal demonstration of commitment to partner with CASA in a financial capacity on their Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program, specifically as it pertains to their desire to create a Virginia-wide Safe Streets Program. CCAN is a grassroots organization dedicated to fighting for climate justice in the Chesapeake Region of Virginia, Maryland, and DC. We are pleased to receive a subaward from CASA and serve as a key community partner in the Request for Applications (RFA) for the Environmental Justice Collaborative Problem-Solving Agreement Program submitted to the Environmental Protection Agency (EPA) by CASA.

CCAN Role: We are committed to working with CASA and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the Request for Applications (RFA). This letter confirms our agreement to accept and fulfill a subaward of $80,000 ($40,000 over two years) to establish this partnership. CCAN will contribute to the project by way of funding in the form of a subaward, and in-kind resources such as staff time, planning, capacity building support, outreach assistance, and area expertise. To support the project and its partners, CCAN commits to the following:

- Support with community outreach in the form of door knocking, participation in pop-up events, and more. Assistance with data collection during the outreach stage of the campaign.
- Participation in planning and strategy implementation for the Richmond-specific geographic area regarding the campaign.
- Assistance with identification of potential geographic areas of focus and issue areas of focus for campaigns.
- Communication and dissemination of information about the campaign to our networks and constituencies.

CASA and CCAN have agreed upon the aforementioned basic role expectations surrounding this partnership.

CCAN Relationship to Applicant: CCAN has previously partnered with CASA on the original, small-scale 'Safe Streets' campaign in Fairfax through the distribution of surveys. We attended the launch of the previous campaign and are eager to further the partnership and expand the scale and scope of the campaign. Our organization's area of expertise related to this project has been public transit issues at the state level and we have the ability to help translate the 'Safe Streets' campaign into state-wide legislation. CASA and CCAN share a vision and plan for increasing pedestrian safety and alternative transportation options and reducing air pollution and vehicle emissions.

Interest in Environmental Issue and Relationship to Community: CCAN has organized for climate justice in the Richmond region for over a decade. In recent years, CCAN has partnered closely with local organizations to advocate for improved transit quality and frequency and increase riders' influence over decision-making processes. The vast majority of riders in Richmond are well below the poverty line and rely on transit as their only method for accessing employment. Improving transit in the Greater Richmond area is therefore essential for supporting a robust local economy, on top of its climate benefits by virtue of decreasing the number of single-passenger trips over short distances.

If CASA is selected for participation in the program, CCAN will accept the subward and will be regularly engaging with CASA and other key partners of the Collaborative Problem-Solving Agreement. This includes the potential to participate in EJCPS meetings with the technical advisory panel and other key partners and stakeholders from our community. We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

In summary, we encourage the EPA OEJECR to favorably consider CASA's application for this program and count this letter as an official commitment by CCAN.

Respectfully,

Victoria Higgins

PRINCE WILLIAM
– Board of County Supervisors
Office of the Occoquan District Supervisor
Kenny A. Boddye

KENNY BODDYE
OCCOQUAN DISTRICT SUPERVISOR

U.S. Environmental Protection Agency (EPA)
Office of Environmental Justice and External Civil Rights (OEJECR)

To Whom it May Concern,

I am writing on behalf of my office, as the duly elected Occoquan District Supervisor on the Prince William Board of County Supervisors. I commit to working with CASA on their Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program, specifically as it pertains to their desire to create a Virginia-wide Safe Streets Program.

To support the project and its partners, my office commits to the following:

- Policy support as it pertains to aligning the vision of the program with Prince William County's Comprehensive Plan.
- Policy support as it pertains to aligning the vision of the program with the County's first Community Energy & Sustainability Master Plan (CESMP), which is to be adopted later this year.
- Advice and guidance on how to navigate local government agencies in the administration of the program, including but not limited to the Prince William County Department of Transportation, Office of Sustainability, Health District, and Police Department.
- Outreach and collaboration with community leaders, like-minded organizations, and the broader community to educate and promote street-level buy-in of the program.

This commitment is new, specific, and measurable in the following ways:

- **Relevant** – CASA seeks a key partnership with local government in Prince William County. In December of last year, our Board adopted a new Comprehensive Plan which calls for new connections to transit, enhancing existing transit offerings, and promoting safer street connections through a lens of equity. The proposed Safe Streets Program handshakes with these new initiatives.
- **Public** – As a member of the Board of Supervisors, and a commissioner of the Potomac Rappahannock Transportation Commission, Virginia Railway Express Operations Board, and Prince William Joint Environmental Taskforce, I have a public role in ensuring we achieve the vision set out by CASA's proposed Safe Streets program.
- **High Impact** – CASA is seeking to partner with local government in the second-largest and most diverse locality in Virginia in administering this program. A successful partnership and Safe Streets Program in this context and increase ridership on local and regional transit, reduce traffic congestion metrics, and reduce vehicle-related accidents, injuries, and fatalities. Getting it right here can serve as a model for other parts of the region, commonwealth, and nation.

In conclusion, I hope you will seriously consider CASA's application for this program and count this letter as an official commitment by my office..

In service,

Kenny Boddye

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for CASA

To Whom it May Concern,

I am writing on behalf of François & Sinclair, LLC as a formal demonstration of commitment to partner with CASA in a non-financial capacity on their Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program, specifically as it pertains to their desire to create a Virginia-wide Safe Streets Program. François & Sinclair is a collection of expertise and contacts for various non-profit stakeholders across the Commonwealth and focused in Richmond that are all dedicated to advancing equitable access to resources and opportunity for youth and the community at large. We are happy to be listed as a key community partner in the Request for Applications (RFA) for the EJCPS Agreement Program submitted to the EPA by CASA.

François & Sinclair, LLC Role: We are committed to working with CASA and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the RFA. François & Sinclair will contribute to the project by way of in-kind resources such as staff time, planning, capacity building support, outreach assistance, leveraging of networks, and area expertise. To support the project and its partners, François & Sinclair, LLC commits to the following:

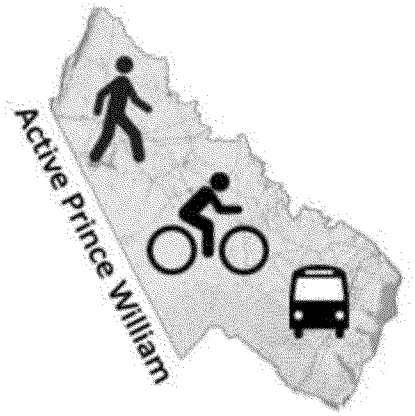
- Support with community outreach in the form of door knocking, participation in pop-up events, and more.
- Assistance with reporting on metrics and outputs.
- Participation in planning and strategy implementation for the Richmond-specific geographic area regarding the campaign.
- Assistance with identification of potential geographic areas of focus and issue areas of focus for campaigns.
- Communication and dissemination of information about the campaign to our networks and constituencies.
- Facilitation of connection to local networks of schools/educational institutions.

CASA and François & Sinclair, LLC have agreed upon the aforementioned basic role expectations surrounding this partnership.

François & Sinclair, LLC Relationship to Applicant: François & Sinclair and CASA share a similar vision and continued interest in improving pedestrian safety, increasing access to alternative transportation options, and reducing air pollution and emissions from single vehicles. François & Sinclair's mission and vision align with CASA's work, and the LLC has supported CASA initiatives in the past and will continue to join in their positive community impact.

Interest in Environmental Issue and Relationship to Community:François & Sinclair is co-founded by Lyons Sanchezconcha who holds voices in the Virginia Latino Advisory Board, The Virginia College Access Network, The Asian Latino Solidarity Alliance, The Virginia College Access Network, and Scholars Latino Initiative, and Richmond Public Schools and can leverage many more community partners and their constituencies in this collective work.

If CASA is selected for participation in the program, François & Sinclair commits to regularly engaging with CASA and other key partners of the Collaborative Problem-Solving Agreement. This includes the potential to participate in EJCPS meetings with the technical advisory panel and other key partners and stakeholders from our community. We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.



In summary, we encourage the EPA OEJECR to favorably consider CASA's application for this program and count this letter as an official commitment by the François & Sinclair. Should we need to be contacted for further discussion of our support to this initiative, please reach out to the mailing address above or email and number below.

Respectfully,

Lyons Sanchezconcha

RE: Letter of Commitment and Support for Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program for CASA

To Whom it May Concern:

We're writing to communicate Active Prince William's commitment to partner with CASA in a non-financial, volunteer capacity on their Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program, specifically as it pertains to their desire to create a **Safe Streets Program within greater Prince William County**.

Active Prince William is a grassroots citizens' organization dedicated to advancing walking, bicycling, public transportation, and smarter growth to create more livable, equitable, healthy, and sustainable communities in Prince William County and the Cities of Manassas and Manassas Park. We are happy to be listed as a key community partner in the Request for Applications (RFA) for the EJCPS Agreement Program submitted to the EPA by CASA.

Active Prince William's role: We are committed to working with CASA and other community partners identified in the EJCPS application to advance the local vision and needs articulated in the RFA. Active Prince William will contribute to the project with in-kind resources such as volunteer time, planning, capacity-building support, outreach assistance, leveraging of networks, and area expertise. To support the project and its partners, Active Prince William commits to the following:

- Support community outreach via door knocking, pop-up events, and more.
- Participate in the planning and strategic implementation for the campaign.
- Assist with identifying potential geographic areas and issue areas of focus for the campaign.
- Communicate and disseminate information about the campaign to our networks and constituencies, including via social media.

CASA and Active Prince William have agreed upon the aforementioned basic role expectations surrounding this partnership.

Active Prince William's relationship to the applicant: Active Prince William and CASA share a similar vision and continued interest in improving pedestrian safety, increasing access to alternative transportation options, and reducing air pollution and emissions from motor vehicles within the greater Prince William area.

Interest in environmental issues and relationship to community: Active Prince William seeks to increase active mobility, public transit ridership, and traveler safety in greater Prince William to improve access and mobility for all residents and thereby further transportation equity, public health, environmental sustainability, and community vibrancy.

If CASA is selected for participation in the program, Active Prince William commits to regularly engage with CASA and other key partners of the Collaborative Problem-Solving Agreement. This includes the potential to participate in EJCPS meetings with the technical advisory panel and other key partners and stakeholders from our community. We look forward to participating in the EJCPS to build local capacity in our organization and community to advance transformative environmental justice projects.

In summary, we encourage the EPA OEJECR to favorably consider CASA's application for this program and count this letter as an official commitment by Active Prince William.

Respectfully,

FUND DEVELOPMENT & OPERATIONS MANAGEMENT

PROFESSIONAL PROFILE

- High-performing fundraising & development leader with a demonstrated ability to instill a common vision within dynamic and diverse teams and a proven record of accomplishment for directing process analysis, procurement and contracting, budgeting, grant making, fund development and compliance activities within nonprofits, philanthropy and local government.
- Record of accomplishment of successful strategic leadership within finance and operations, developing and overseeing annual operating budgets of over $20M. Possess a high commitment to excellence and expertise in managing organizational change to achieve maximum results.

PROFESSIONAL EXPERIENCE

Sr. Director of Development, *CASA*, Langley Park, MD (2019 – Present)
- Responsible for raising $25M - Organization's operating budget.
- Raised $4M between March 2020 – July 2020 to fund the organization's COVID-19 Response plan.
- Raised an additional $5.5M above the Board approved budget in 1 year with organization.
- Execute regional, multimillion dollar capital campaigns.
  - Pennsylvania - York Office – $ 5.1M (75% completed)
  - Maryland - Rockville Center - $10M (Active)
  - Maryland – Baltimore Center $14M (Completed 2020)
  - Woodbridge Welcome Center - $8.1M (75% completed)
  - Fairfax Welcome Center - $7.5M (Active)
- Oversee team of development associates, administrative associate, and grant writers and create comprehensive plans to sustain and expand CASA's foundation and government grant sources to support CASA's annual and long-term strategic plan goals and annual operating budget.
- Execute Organization's annual revenue/income budgeting process.
- Active player in Organization's strategic and DEI planning efforts.

Senior Consultant, Grants & Contracts Operations & Systems Development, *MOHS*, Baltimore, MD, (2017 – 2018)
- Recruited to design and lead an effective record-keeping process for all grant and contract agreements, amendments to contracts and MOU's focused on service quality, process improvement and grantee performance measurement.
- Developed and implemented a grantee and vendor performance-measurement system to substantially improve management of quality, operational, and financial information.
  - Executed a system to collect and analyze data, program documents and financial information.
    - Processes led to increased efficiency in contract execution and decreased delays in grantee payments.
      - 59% of contracts executed within three days of City's Board of Estimates approval.
      - 86% of grantee advances paid within the same month of contract execution and program start.
- Oversaw the Community Youth Program's $2.58M in grant-making efforts, including RFP development, proposal review and grantee selection processes.
  - Provided grant and program oversight and advisement, including:
    - Programmatic and administrative site visits
    - Scope and budget development workshops and assistance
    - Program planning and fund development advisement
    - Staff and executive-level capacity building and technical assistance activities
- Co-developed and convened a cross-sector advisory group of subject matter experts tasked with developing the strategy for addressing the issues outlined in the Decree.

Director of Partnership Management, *Family League of Baltimore*, Baltimore, MD, (2014 – 2017)
- Developed and executed organizational funding priorities.
  - Provided upwards of $40.9M dollars in grants to Baltimore City organizations serving youth, families and communities.
    - Oversaw dedicated personnel and the administrative and financial grant operations of more than 140 funded programs and organizations.
  - Executed the organization's first 100% youth-led grants solicitation and review process.
    - Within the first year and a half, the youth panel, comprised of 30-40 youth aged 14 to 18, went on to grant upwards of 400 thousand dollars in small community grants to over 70 Baltimore city-based organizations providing summer, spring and winter activities to youth.

- Led and supported cross-departmental teams on several federal and private grants applications resulting in upwards of $20M for the organization annually and implemented efficient grants management to ensure all aspects of individual gifts and corporate or foundation grants were met and the expenses accounted for.
    - Researched potential funding opportunities with a high successful funding rate.
    - Drafted and negotiated grant, facility, service, event, IT and media/communications and marketing agreements, MOUs and BAs ensuring organization responsibility and fiscal stewardship.
    - Reviewed and administered contracts and modifications, including preparation of contract review records and managed local and federal government grants and contract compliance.
    - Successfully identified, cultivated, solicited and stewarded individual and corporate donations of $1,000+.
- Oversaw organization's vendor procurement operations and activities.
    - Oversaw $1.5M in vendor procurement activities.
    - Re-designed vendor procurement policies ensuring women and minority-owned business accounted for equal percentage of contracted service providers.
    - Revamped organization's vendor records and contracts management processes, resulting in a 50% reduction in vendor procurement and contracts processing and execution time.
- Developed and implemented several organization wide policies and SOPs including:
    - Procurement of Good and Services Policy
    - SOP for partner requests for letters of support
    - SOP and standards for contracts process

Director of Special Populations & Cultural Competency Officer, *Healthy Howard, Inc.*, Columbia, MD, (2009-2014)

- Managed project resources, progress, completion timeframes, and budget while exceeding key operational and programmatic performance targets.
- Developed and executed $1.5 million budget to fund four various service programs.
    - Solicited funding support via grants and proposals.
    - Developed and managed data and program outcome tracking database.
    - Recruited, hired and trained 12 support staff positions including program directors, managers, RNs and coordinators.
- Reviewed and analyzed population and individual health data at the program and county level to develop equitable health programs targeting vulnerable communities and populations.
    - Developed and implemented internal and external facing recommendations for changes in strategies, procedures, policies and standards.
    - Executed continuous quality improvement plans to ensure program progress and effectiveness
- Developed and oversaw the Howard County Health Plan for six years, providing healthcare coverage to uninsured individuals:
    - Increased provider partnerships and specialty network by more than 80% within two years.
    - Procured and implemented a medical video interpretation service for plan's limited English speakers.
- Established a Community Care Team that reduced hospital emergency department spending by more than $.5M within the first 6 months, with a projected $2.5M reduction by the end of 2015.
- Built and systematized a Prenatal Services program providing free and reduced healthcare for uninsured Latina women resulting in increased care for undocumented individuals and successful, healthy births for all participants.
- Directed a reentry program, in partnership with Jessup Correctional Facility, Howard County Mental Health Authority, and several others to assist newly released inmates with accessing healthcare, employment, and other necessary services in an effort to reduce recidivism.
    - More than 90% of participants connected with healthcare within two weeks of release.
- Oversaw operations of the Howard County Local Health Improvement Coalition, tasked with reducing health disparities in Howard County, to include quarterly meetings and events for more than seventy-five members and stakeholders.
- Assigned Cultural Competency Officer after receiving recognition for internal and external diversity and inclusion efforts.
    - Certified that the organization and its policies and procedures complied with federal mandates, guidelines and regulations when serving Limited English Proficiency and foreign-born populations.
    - Developed and executed organization-wide cultural and linguistic competency policies and training.

EDUCATION

University of Maryland
MBA (Management & Administration)
Bachelor of Arts, Psychology (Behavioral and Cognitive Psychology)

Identified suitable locations based on market trends, budget, student population, etc. Organized and implemented international trips including all presentations, appointments, site visits, fairs, transportation, and lodging. Upon return, closed out travel request and reconciled funds
- Processed exchange students including application, registration, and orientation. Assisted with maintaining exchange balances and relationships with partner institutions abroad
- Managed and allocated international student scholarships with combined annual budgets of $650,000
- Secured funding for and carried out student events including volunteer trips with local nonprofit organizations
- Oversaw and directed student assistants

Volunteer

Client Outreach Coordinator, Fences for Fido, March-Aug 2022, Linn & Benton County, OR

- Communicated with clients, crew leaders, and volunteers to plan, schedule, and build fences to keep dogs off chains

Citizenship Preparation for Refugees Instructor, Southside Baptist Church, Sept 2017-May 2019, Jacksonville, FL

- Taught a weekly class to refugees applying for US Citizenship through USCIS
- Prepared students for the civics (US history and government) and English portions of the application and interview

Animal Outreach Volunteer, La Fundacion de Animales en Peligro Inc., June-July 2014 & 2015, Santiago, Dominican Republic

- Orchestrated veterinary outreach programs for pets and street animals in neighborhoods with need
- Held fundraisers at local businesses

Skills

- Conversational Spanish, strong intercultural communication and cultural intelligence
- Microsoft Word, Excel, PowerPoint, Canva, Outlook, Volgistics volunteer management, DonorPerfect

1.0 PROGRAM OBJECTIVES

A. Project Summary Page

Project Title: Virginia Safe Streets Project Expansion
Project Location: The project will take place in Prince William County, Woodbridge, VA 22192, Fairfax County, Culmore, VA 22041, and Richmond, VA (City of Richmond),in communities with immigrant and working-class residents, especially Limited English Proficient (LEP), Latino, and West African immigrants.
Applicant Information: CASA, Inc. | 8151 15th Ave, Hyattsville, MD 20783-3501 | Ex. 6 - Personal Privacy (PP) | yviera@wearecasa.org
Brief Description of Applicant Organization: Founded in 1985, CASA is an organization of and for immigrants and people of color. Our mission is to create a more just society by building power and improving the quality of life in these communities. We advance this through community engagement and organizing and by providing programs, including vocational training, community economic development, citizenship support, access to health, and many more.
Are you applying for the Small CBO Set Aside Track for $150,000 projects? No.
Project Abstract: CASA seeks funding to expand existing Safe Streets Fairfax work into a Virginia Statewide program focusing on pedestrian safety and promoting alternative commute options to decrease private vehicle use and associated air pollution and emissions. With five project partners, CASA will engage working-class and immigrant members through local and state-level transit equity outreach efforts. These efforts will connect immediate needs in communities of color, including safety and access to economic opportunity, through increased, safer, and more reliable transit and transportation options. CASA will integrate our proven adult popular education model to inspire community members to further analyze the impact of current transportation systems in perpetuating racial and economic inequity and in contributing to climate change.

The project consists of four components: (1) a planning stage to assemble a Stakeholder Advisory Committee and develop materials, (2) a public engagement, community outreach, and education stage consisting of community meetings, surveys, field work, etc., (3) the development of a comprehensive proposal centering voices of marginalized communities, and (4) bringing forth the proposal to decision-makers to ultimately ensure concrete tangible changes to reduce fossil fuel emissions through increased transit and safe transportation systems for pedestrians and cyclists.
Project Type(s): Community outreach and engagement, public education
Special Considerations: Not Applicable
Environmental Issue: Air pollution reduction, greenhouse gas emissions reduction, air and water quality education and outreach, energy efficiency education, indoor air quality education
List of Project Partners: (1) Coalition for Smarter Growth – Nonprofit Community Organization, (2) Chesapeake Climate Action Network – Nonprofit Environmental Organization, (3) Occoquan District Supervisor Kenny Boddye – Local Government (Prince William Board of County Supervisors, Virginia), (4) François & Sinclair, LLC – Business, (5) Active Prince William – Grassroots Citizen Organization
Will you need to develop a QAPP for your project? No.

ED_016126_00001399-00001

B. Environmental and Public Health information of the Underserved Community

CASA is a community-based nonprofit organization (CBO) and our constituency is made up of immigrants and other working-class communities of color who are among the nation's most underserved and marginalized populations and are impacted by persistent poverty and inequality. A majority are immigrants from Latin America and West Africa and speak a language other than English as their primary language or are Limited English Proficient (LEP). These populations traditionally make limited use of government resources due to systemic barriers.

Specific community demographics vary by region and location and efforts to serve are tailored linguistically and culturally as appropriate; CASA is a multilingual organization with the capacity for outreach and service to community members in English, Spanish and French. In Virginia, our focus is on immigrants from El Salvador, Mexico, and Guatemala. In addition to populations in close proximity to CASA's ten offices in four states, CASA's constituency has a national reach with immigrant and working-class members across forty-six states.

Immigrant and working-class communities of color face long-standing issues related to health and environmental justice. Health justice issues include a lack of access to quality, affordable healthcare. Further, members of communities CASA serves are more likely to be denied a green-sector job, to see their rent go up from wasteful and outdated energy usage, or to be related to a climate refugee. As such, CASA members have long since recognized that justice for the environment is one and the same as justice for their communities.

Concerning the proposed project, immigrant and working-class communities face environmental and health justice issues as a result of a lack of proper pedestrian infrastructure and insufficient public transportation. For example, the Bailey's Crossroads community in Fairfax County is home to a large immigrant population; many residents rely on walking, biking, and the bus to get to work and to participate in daily activities. The main arterial road connecting critical walkable infrastructure such as grocery stores, schools, religious institutions, and other services is unsafe due to missing sidewalks, few safe crossing options, bus stops without crosswalks, and heavy, high-speed traffic. Fairfax County Department of Transportation found that four of the top ten high risk corridors in the county for pedestrians are in Bailey's Crossroads ***(refer to Attachment A)***.

The results of a walkability survey ***(refer to Attachment B)*** by CASA and Coalition for Smarter Growth that received 202 responses revealed that survey respondents from the Culmore community walk, bike, and use transit at considerably higher rates than Fairfax County residents. When taken in combination with increased rates of injury and fatality for pedestrians and cyclists, this highlights the way immigrant and low-income communities are disproportionately impacted as a result of lack of pedestrian infrastructure and safety. In short – immigrant and working class communities who need safe, clear right of ways the most often live along or frequently use corridors with the lowest quality right of ways.

With this project, CASA seeks to address the following environmental/public health issues:

- Air pollution
- Greenhouse gas emissions

ED_016126_00001399-00002

- Pedestrian safety
- Alternative transportation options, and
- The impact of current transportation systems in perpetuating racial and economic inequity and in contributing to climate change, climate justice

By addressing these issue areas, CASA's project will help to ensure that the whole community benefits from positive results including, (1) increased, safer, and more reliable transit and transportation options including but not limited to cycling, walking, and public transportation that serve to decrease private vehicle usage and associated fossil fuel emissions and air pollution coupled with a reduction in the number of pedestrians involved in auto-accidents; (2) further education and analysis of both the larger scale impact of current transportation systems in perpetuating racial and economic inequity and in contributing to climate change; (3) an increase in the number of community members utilizing public transportation, walking, and bicycles instead of private vehicles as a result of climate education and tangible physical investments in safe commuting and transit structures such as bike lanes, better lighting, pedestrian crosswalks/crossing areas, improved sidewalks, etc., and; (4) improved public health and environmental outcomes in immigrant and working-class populations as a result of outreach education surrounding topics including energy burden (information on energy efficient appliances, weatherization, IRA benefits, how to understand your electric bill, protecting against scammers with fraudulent energy-related practices), indoor air pollution (information on the dangers of indoor air pollution and air and water quality), and climate-related damage to homes (information about insurance, accessing disaster relief, what to do in case of an emergency). Potential long-term outcomes include improved indoor air quality in homes of community members and a reduction in associated respiratory issues, homes equipped with more energy-efficient modifications, improved health as a result of weatherization efforts and decreased mold exposure, etc.

The areas where our membership and community base reside and work are heavily affected by pollution and environmental degradation. Using EJSCREEN, CASA pulled information related to our project areas of focus. In the city of Richmond, diesel particulate matter ranges as high as 90%, and airborne cancer toxin risk is at 99% over the entire city. Respiratory risk from air toxicity also ranges high, from 80% to 90%. In the northern part of Richmond, 90% to 99% of neighborhoods are in high proximity to traffic. That range is wider, with a lower minimum, for our communities in neighborhoods in the south part of the city (24% to 90%) because of proximity to the James River.

Similar rates of pollution pertain for communities in Fairfax County, with a diesel particulate matter rate ranging from 70% to 90%, airborne cancer toxin risk ranging from 80% to 99%, and the exact same rate for airborne respiratory toxicity risk. Traffic proximity for our neighborhoods ranges from 70% to 99%, including busy areas such as the Beltway, Springfield, Centreville, and Annandale.

In Prince William County, a high rate of diesel particulate matter is localized primarily around Gainesville, where it ranges from 60% to 70%. Airborne cancer toxin risk is uniformly high across our communities' neighborhoods in the county at a range of 80% to 90%, and airborne respiratory toxicity risk is somewhat better but still concerning at 50% to 80%. Traffic proximity

ED_016126_00001399-00003

varies widely, from 20% to 90%, with heavily populated localities like Gainesville and Dale City representing the high end of that range. In those same areas, the asthma rate is in the 50 to 60th percentile.

Overall, if you look at the entire project area from Fairfax County, to Prince William County, to the city of Richmond, you will see those three areas are more polluted than surrounding neighborhoods, counties, and cities ***(refer to Attachment C)***.

C. Organization's Historical Connection to Underserved Community

CASA's historic and ongoing commitment to impacting and empowering immigrant and working class community members is in our organizational DNA. CASA's staff have the cultural proficiency and language capacity to reach the immigrant and working class communities throughout our regions. For example, in recent years, the immigrant community in the DMV region has grown proportionally to include far more Francophone West African families, and CASA has invested heavily in recruiting and training Francophone staff to serve this population.

Moreover, our rootedness in the community as a trusted messenger and track record of successfully engaging immigrant communities who are often wary of government programs is demonstrated by our outreach and engagement work on the U.S. Census, ACA, public benefits, and COVID-19 relief and assistance. CASA's comprehensive model means that we do not conduct outreach alone, but also provide comprehensive engagement, screening, and enrollment assistance, minimizing turnaround and referral delays and dropoffs. CASA also has longstanding partnerships with a number of other community institutions, allowing for cross-referrals and keeping CASA staff abreast of best practices.

Furthermore, engaging communities in issues that impact their communities has been a core component of our work for 37 years. This is true not only of CASA's members, but also of our partner organizations and institutions. CASA is proud of our robust network of partnerships built on shared commitments, values, and trust. Whether working in partnership or within our own membership and communities, we have decades of experience engaging stakeholders through direct individual outreach, digital communications, community meetings and events, phone and text outreach, and social media. Further, our staff have significant experience leveraging the relational networks of our members and new outreach contacts by training and supporting them to reach out to their own family and friends, thus amplifying the effect of the community connections we build.

Rather than working from a predetermined set of efforts, CASA's strategic plan directs us to work to achieve racial and economic justice and to create the space and conditions for disadvantaged people to lead their own work and be their own spokespeople. CASA's strategy for engaging underserved communities includes conducting direct outreach and building grassroots leadership from the ground up, while also developing partnerships and coalitions with public and private stakeholders. We build community through outreach efforts that utilize one-on-ones and digital outreach as a method of developing support for and interest in community-wide issues – while leveraging community assets, such peer networks, to expand reach.

CASA has worked with our community members across our footprint on issues of environmental and public health justice, specifically in organizing themselves around their own goals and fitting our community's own priorities into those struggles. CASA previously implemented a small-scale, environmental and health justice 'Safe Streets' campaign in Fairfax county to address community-driven issues such as unsafe pedestrian and bicycle commuting options due to lack of sidewalks, few safe crossing options, bus stops without crosswalks, and heavy high-speed traffic. The target area is home to a large immigration population where many residents rely on walking, biking, and using the bus to get to work and other daily activities. This project proposal aims to scale up goals to fix unsafe conditions through safety investments such as speed limit reductions, high visibility crosswalks at key intersections, automated speed warning signs, median refuges, improved sidewalks, bicycle facilities, and bus stops, and more.

Environmental health hazards as well as inactive lifestyles are both major impediments to public health. Auto emissions are a significant part of the overall air pollutant load in urban and suburban communities, and driving, as opposed to walking, biking, or taking mass transit, is a fundamentally passive transportation form that contributes to inactive lifestyles and attendant concerns such as heart disease, obesity, etc. Reducing emissions through investment in public transportation is a viable strategy especially for lower income community members who might prefer not to drive anyway due to the expense of car ownership. But community members cannot use greener transit options if they do not feel safe doing so – risk of injury or death along an unsafe corridor for commuters, children, and other pedestrians can be just as great as more attenuated environmental health concerns and can cause equal or greater hardship.

CASA is a member-led organization of and for low-income populations, immigrants, and working-class communities of color and thus all program areas originate with and serve the low-income (economically disadvantaged) community. CASA is built on a web of member committees on the local and national level – geographic and campaign based – where members hash out the decisions about what the organization fights for, what our strategy is to get there, and who will represent them in CASA's organization-wide Leadership Council. In early 2021, CASA members identified climate justice as one of the organization's most urgent and pressing priorities.

CASA's service approach is based on "popular education" – a participatory educational methodology wherein service delivery, interventions and educational materials are all designed to consider the social, economic, political and cultural context in which the individual finds themself when approaching the organization. CASA has used this learner-centered approach successfully for nearly three decades to educate and engage low-income, Limited English Proficient (LEP), people of color. As members identify new service needs or areas required by the community, CASA adapts and fills in to meet those needs, ensuring that the member-driven structure guides the organization. Our diverse staff are reflective of the community we serve and this combination of cultural competency and authentic representation helps ensure that the organization is inclusive and equitable.

Empowering and building the capacity of communities of color to advocate for themselves and their communities is at the core of all of CASA's work – to move disadvantaged community

ED_016126_00001399-00005

members from a position of oppression to a position of power. Further, CASA advances racial equality and economic justice by engaging communities of color in identifying both the immediate and systemic barriers they face, providing targeted services and systems navigation to address immediate barriers, and leveraging their individual and community assets to advocate for policy changes that ultimately remove systemic barriers. Through the direct participation of communities of color not only as targets of advocacy efforts, but in the development of policies themselves, we will arrive at a more just and equitable process which will necessarily result in better outcomes for the community as a whole.

The 'Safe Streets' program in particular was created out of community need. CASA performs an essential function by connecting members' everyday issues to larger issues, providing our members the tools to better advocate for themselves. As part of this program CASA has continued building up the list of new community members of existing committees in Fairfax, Mannassas/Prince William, and Richmond, as well as conducting workshops to engage working class and immigrant members in the fight for climate justice.

During the initial 'Safe Streets' campaign, CASA and Coalition for Smarter Growth conducted a walkability survey ***(refer to attachment B)*** that received 202 responses and revealed that people overwhelmingly do not feel safe walking, biking, or getting to transit. Crime, dangerous driving, poor lighting, lack of bike infrastructure, not enough time to cross the street, and lack of connected sidewalks and safe crossing options were cited as reasons. (***Refer to attachment D for more information about the campaign).***

Catalina, an immigrant from Ecuador and CASA member who lives in Culmore, VA, shared her story ***(refer to attachment E)*** with unsafe street conditions and her daily commute to work on a scooter, describing the lack of traffic signage and lighting for scooter riders, cyclists, and pedestrians. Catalina is joining the fight to advocate for sidewalks, lighting, and crosswalks for pedestrians, all with adequate signage to create a safer environment for all pedestrians.

Jose, an immigrant from El Salvador and CASA member who lives in Culmore, VA provided testimony ***(refer to attachment F)*** describing concerns about the amount of vehicle accidents, high speed limits, lack of signs for pedestrians and cyclists in the area. He regularly travels on foot to shop for food, do laundry, and get to work, and laments that there have been human casualties as a result of the issues described. Jose urges the relevant authorities to take action to lower speed limits, add signage, and add adequate lighting to improve pedestrian safety on public streets and reduce preventable fatal accidents.

Viviana, an immigrant from Ecuador and CASA member who lives in Culmore, VA commented on her reasons for supporting the 'Safe Streets' campaign ***(refer to attachment G)***, citing that the roadway that she and her family of two children travel along for working, shopping, laundry, and restaurants has become increasingly dangerous for pedestrians due to lack of pedestrian and cyclist signage and ample space. She is concerned about the vehicle crashes that have unfortunately claimed human losses. As she is currently pregnant with her third child, she is concerned for her and her family's safety and urges officials to implement proper lighting, vehicle speed reducers, and marked signage for pedestrians.

ED_016126_00001399-00006

D. EJCPS Model

The project will engage with all seven EJCPS Model Elements to some degree.

1. Issue Identification, Visioning, and Strategic Goal-Setting: Work on Element 1 has already begun at a preliminary level with (1) CASA members selecting climate justice as a key priority for the organization, (2) the initial pilot 'Safe Streets' campaign through the input of immigrant and working-class communities via a survey and other outreach, but will be expanded during the planning phase of the proposed project with support from partner organizations and impacted communities. Further, identification of major partners has already taken place and is detailed in this proposal and accompanying letters of commitment. CASA will build upon existing community experience and knowledge by engaging community partners via the establishment of a Stakeholder Advisory Committee in each project geography.

2. Community Capacity-Building and Leadership Development: CASA is already well-established as a trusted community partner and messenger to immigrant and low-income communities and will utilize this position to foster the campaign and provide education that will reach communities that are traditionally difficult to access for government and other sources due to systemic barriers of language, immigration status, culture, and historical mistrust. Moreover, CASA believes that the immigrant and working-class community is the heart of the climate justice movement and must not only be involved in processes of change but take a leading role.

Element 2 will be further addressed through the community engagement and outreach phase of the campaign, to consist of disseminating information, surveys, and mobilizing community members and stakeholders. With partners, the project will gather data about issues of pedestrian safety, public transportation and transit options, and other related climate justice concerns.

3. Consensus Building and Dispute Resolution: Prior to the project start, partner organizations were established based on a related set of values, ideas, and goals to address concerns. Each partner brings a different expertise and perspective to the work, but shares a common thread of belief in empowering community members to achieve positive environmental justice and public health related outcomes. Consensus building structures are integrated into the project and campaign by way of the establishment of Stakeholder Advisory Committees that will meet regularly to represent various stakeholders and shape the campaign accordingly.

4. Multi-Stakeholder Partnerships and Leveraging of Resources: CASA achieves collective impact through partnerships with employers, unions, community colleges, national networks, and other stakeholders. We leverage partnerships that complement our strengths with other constituencies, subject matter areas, or areas of expertise. This project is no exception.

Collaboration is essential to the success of this project and victories for impacted communities cannot be achieved without multi-stakeholder partnerships, each bringing different sets of resources and networks. CASA will bring together stakeholders, both in formal partnership and informal campaign involvement, across public and private sectors including government, business, community nonprofit organizations, and grassroots citizens' organizations.

ED_016126_00001399-00007

5. Constructive Engagement with Other Stakeholders: Each partner will be an asset in raising community awareness of issues and mobilizing support within their respective constituencies. Government agencies and elected officials will play several roles in the project. Project partner Occoquan District Supervisor Kenny Boddye will provide policy support and alignment with existing government programs and plans as well as guidance on navigating related government agencies. His support will open doors to community leaders and other stakeholders, and help bring attention to the problems identified in the campaign. Government of various levels will also be engaged to implement solutions proposed to issues identified in the campaign. Tangible wins such as construction of bike lanes, better lighting on public thoroughfares, pedestrian medians and crosswalks, and more cannot be achieved without buy-in and action from government. The diversity of stakeholders involved in the campaign will demonstrate the imperative of action on behalf of government to improve conditions for immigrant and working-class communities.

6. Sound Management and Implementation: To the benefit of this project, CASA has prior experience with management and implementation of the campaign from the smaller scale, pilot version of the 'Safe Streets' program. Thus, this expanded project is being designed and built with lessons learned from the first campaign in mind. CASA has extensive experience with community outreach and builds new projects utilizing the successful framework of others.

7. Evaluation: The project includes outcomes, outputs, a milestone schedule, and performance measurement plan to help evaluate its progress and success. One year after project completion, CASA will distribute post-surveys to community members who have engaged with the project to follow up and see if improvements have been made.

E. Project Linkages

CASA's membership as well as the communities where CASA works are definitionally low-income and almost exclusively immigrant, Black and/or Latino identifying. This project directly engages community members living in environmental justice communities in shaping the future of the places where they live. Over our more than 36-year history engaging this community, CASA has consistently and effectively helped to elevate the concerns of these communities and put these community members directly into dialogue with policymakers and public officials, and this project is no different. People living in frontline and fenceline communities know first hand the effects of pollution and unsafe pedestrian corridors, and understand deeply the costs of inaction in ways that are often invisible to those charged with planning and executing right of way improvements. The challenges of low-income people to participate fully in civic engagement and public processes are well-documented, and for decades, CASA has worked to remove those barriers and facilitate robust community participation in local planning processes. Our pilot project in Fairfax County, which preceded this proposal, demonstrated that CASA has credibility and capacity to do broad community engagement with communities that local governments often have the most trouble engaging through ordinary public comment processes.

F. Partner and Collaborate

ED_016126_00001399-00008

CASA believes that community members are the best reporters, spokespeople, and sources for information about the challenges they face in their communities, and our efforts are all pointed towards ensuring that those community members have an equal voice to shape the communities where they live. That said, we acknowledge that projects, such as this one, require broad community engagement but also technical expertise, existing relationships with government agencies and officials (among other public and private sector stakeholders), and public transportation planning process expertise. The coalition CASA has assembled to help execute this project includes the public and private sector, reflects deep expertise in public transportation planning and processes, and key connections to government agencies in multiple units of government to ensure that plans and comment generated by this process can and do find their ways to decision-makers who can authorize needed changes.

CASA's partners in this work include:

Coalition for Smarter Growth – Nonprofit Community Organization: Coalition for Smarter Growth (CSG) will partner on the project in a financial capacity and receive a subaward of $80,000 ($40,000 over two years) and will use this funding to participate in the project via the following resources: planning, technical advice, capacity building support, outreach assistance, and area expertise. Planning activities include identifying and communicating with key decision makers (such as legislators, government entities, etc.) and help with identification of geographic areas of focus and issue areas of focus for the campaign. Outreach activities include participation in pop-up events, data collection, and dissemination of information about the campaign to their networks and constituencies. CSG will provide crucial technical advice on transportation policy, design, and funding as well as educational briefings to constituents on safe street design.

As the original partner organization for the small-scale pilot version of the 'Safe Streets' project, CSG will play a pivotal role in making the project a success. CSG's focus is "advocating for walkable, bikeable, inclusive, and transit-oriented communities as the most sustainable and equitable way for the Washington, DC region to grow and provide opportunities for all," which is aligned with the vision and long-term outcomes of the project. The previous partnership-work surrounding pedestrian safety and alternative public transportation options has already yielded promising results, such as the installation of new LED street lighting on a major thoroughfare. Further collaboration via this expanded, state-wide project will provide the opportunity to ramp up the scale and scope and achieve more positive outcomes for the environment and communities most heavily impacted by the effects of climate change. Each organization recognizes the disproportionate impact that unsafe transit systems have on immigrant and low-income communities.

The proposed financial transaction (subaward) complies with EPA's Subaward Policy and EPA Guidance on Participant Support Costs and will list estimated costs for subawards in a separate "Subaward" line item in the "Other" budget object class category of the SF 424A and budget detail narrative.

Chesapeake Climate Action Network – Nonprofit Environmental Organization: Chesapeake Climate Action Network (CCAN) will partner on the project in a financial capacity and receive a subaward of $80,000 ($40,000 over two years) and will use this funding to participate in the

ED_016126_00001399-00009

project via the following resources: planning, capacity-building support, outreach assistance, and area expertise. Planning activities include strategy development and implementation for the Richmond-specific geographic area of the campaign, help with identification of geographic areas of focus within Richmond for campaign implementation, and assistance with identification of areas of focus. Outreach activities include door-knocking, participation in pop-up events, assistance with data collection, and dissemination of information about the campaign to their networks and constituencies. CCAN will provide essential Richmond-area expertise as CASA does not have an office or large constituency in this location. Further, CCAN's involvement is critical to advance the campaign into state-wide legislation that produces long-term, sustainable change for the environment and impacted communities.

CCAN and CASA have a vested interest in the project and issues of environmental and health justice. CCAN previously partnered with CASA on the original, small-scale 'Safe Streets' campaign in Fairfax and assisted via the distribution of surveys and attendance of the campaign launch. Each organization is committed to grassroots mobilization for climate change and plans to collaborate around a shared vision of community engagement to achieve environmental justice outcomes.

The proposed financial transaction (subaward) complies with EPA's Subaward Policy and EPA Guidance on Participant Support Costs and will list estimated costs for subawards in a separate "Subaward" line item in the "Other" budget object class category of the SF 424A and budget detail narrative.

Occoquan District Supervisor Kenny Boddye – Local Government (Prince William Board of County Supervisors, Virginia): Occoquan District Supervisor Kenny Boddye will partner with the project in a non-financial capacity and will function as a key community partner, contributing the following resources: policy support, guidance on navigating local government agencies, and outreach assistance. Policy support activities include aid in aligning the vision of the project with Prince William County's Comprehensive Plan and aligning the vision of the project with the County's first Community Energy & Sustainability Master Plan (CESMP). Guidance on navigating local government agencies activities include assistance with entry to and interaction with key entities of government including the Prince William County Department of Transportation, Office of Sustainability, Health District, and Police Department. Outreach assistance activities include collaboration with community leaders, other organizations, as well as the broader community to provide education and promote street-level buy-in for the project.

The District Supervisor will play a key role in the coordination with and integration of local government. Local government is central to translating the campaign into real, substantive outcomes. The District Supervisor and CASA have aligned priorities surrounding the enhancement of transit options, reducing vehicle-related accidents, increasing ridership on local and regional transit, and the ultimate creation of safer streets from an equity perspective. It is the aim of both parties that this project will lay the groundwork to become a model to be more broadly implemented across the nation.

François & Sinclair, LLC – Business: François & Sinclair, LLC will partner with the project in a non-financial capacity and will play an important role, contributing the following resources:

ED_016126_00001399-00010

planning, capacity-building support, outreach assistance, and area expertise. Planning activities include strategy development and implementation for the Richmond-specific geographic area of the campaign, help with identification of geographic areas of focus within Richmond for campaign implementation, and assistance with identification of areas of focus. Outreach activities include door-knocking, participation in pop-up events, and dissemination of information about the campaign to their networks and constituencies. François & Sinclair, LLC will provide essential Richmond-area expertise as CASA does not have an office or large constituency in this location.

François & Sinclair, LLC and CASA have a vested interest in the project and issues of environmental and health justice. The co-founder, Lyons Sanchezconcha, holds voices in several other entities including Virginia Latino Advisory Board, The Virginia College Access Network, the Asian Latino Solidarity Alliance, The Virginia College Access Network, and Scholars Latino Initiative, and Richmond Public Schools and thus will help bring many other stakeholders and their constituencies into the project.

Active Prince William – Grassroots Citizen Organization: Active Prince William will partner with the project in a non-financial capacity and will function as a significant community partner, contributing the following resources: planning, capacity-building support, outreach assistance, and area expertise. Planning activities include strategy development and implementation for the Prince William County-specific geographic area of the campaign, help with identification of geographic areas of focus within Prince William County for campaign implementation, and assistance with identification of areas of focus. Outreach activities include door-knocking, participation in pop-up events, and dissemination of information about the campaign to their networks and constituencies.

The all-volunteer organization is clearly aligned to the long-term goals of the project, with its focus being dedicated to creating more livable, equitable, and healthy communities by advancing walking, bicycling, and public transportation within Prince William County. CASA and Active Prince William both seek to further transportation equity, public health, environmental sustainability, and community vibrancy.

2.0 PROJECT ACTIVITIES / MILESTONE SCHEDULE / DETAILED

A. Project Activities

CASA's project is an authentically grassroots, community-driven initiative that consists of four high level components, each composed of various activities.

(1) Planning stage. CASA will collaborate heavily with our project partners during this planning phase to begin identifying geographic and issues of focus. Partners will put together a Stakeholder Advisory Committee to develop and create the survey to be used in the following component. The survey will serve to gain an understanding from diverse community members on how to improve street safety as well as analyze the number of folks who have encountered danger as pedestrians and cyclists. The Committee will also plan a safety audit and petition, and gather information on relevant bicycle and pedestrian-related projects, bus rapid transit, and road

ED_016126_00001399-00011

design planning. Educational materials and flyers about the campaign will be produced in English and Spanish. The campaign will identify key entities and decision makers that are needed to achieve specific outcomes (example: entities and decision makers needed to achieve speed limit reductions). During this stage, key entities, decision makers, and organization-wide staff will be notified about the campaign. Further, CASA will launch a website and social media around the campaign and announce the campaign via press releases, media advisories, and other outlets.

(2) Public engagement, community outreach and education, and data collection. The project will initiate engaging the public, particularly immigrants and working-class communities of color, and conducting community outreach campaigns to gather information about issues related to transit safety, public transportation, etc. The first community forums will be held to introduce the survey and education about the campaign. Community outreach and education will take various forms including monthly community meetings, monthly stakeholder advisory group meetings, flyer and survey dissemination (virtual and hard copy), door-knocking, social media, text messages, and neighborhood pop-up events. Topics that we can provide education to our immigrant and low-income constituencies include energy burden (information on energy efficient appliances, weatherization, IRA benefits, how to understand your electric bill, protecting against scammers with fraudulent energy-related practices), indoor air pollution (information on the dangers of indoor air pollution and air and water quality), and climate-related damage to homes (information about insurance, accessing disaster relief, what to do in case of an emergency, etc.). A community walkability audit will be conducted and photos, videos, maps on safety and design issues will be collected to inform the project's direction. The public engagement and community outreach phase will ensure that all aspects of the public, but especially immigrant and low-income folks, are involved in the process and can provide feedback and work in partnership with local governments to develop safer streets.

(3) Analyzing feedback collected from community outreach efforts to develop a comprehensive proposal with a list of issues and solutions. The Stakeholder Advisory Committee will review and finalize the draft report and proposal. This feedback and proposal will serve as the voice of marginalized communities in the fight for climate and health justice and equity. Meetings with local officials will begin to take place, including a walking tour with project partners and decision makers to give officials firsthand insight as to how the issues manifest on the ground. This component involves a media campaign, 'call to action', and continued web, social media, and grassroots outreach.

(4) Delivering the proposal as feedback to local government agencies to advocate for changes that will result in sustainable, long-term pedestrian safety, alternative public transportation options, and safer streets. The Advisory Committee will develop community leaders and advocates to represent the community at key transportation and budget hearings and meetings with officials to drive proposals forward. In the face of lagging action by officials, the project will mobilize rallies, testify, generate media coverage, and push for action via social media. This component is the culmination of all previous work to make real change for communities involved and impacted.

B. Milestone Schedule

ED_016126_00001399-00012

Broadly, the project will aim to provide community outreach and education on climate-related issues, build a comprehensive group of all community stakeholders, engage those stakeholders in a meaningful and robust process of comment, discussion, and debate, analyze and synthesize the outputs of that effort into a set of community recommendations, and then work to bring those recommendations to decision makers with a clear eye towards implementation as soon as possible. Specifically, we will operate on the following two-year schedule:

Project Stage	**Time frame**	**Goals/Milestones by Completion of Period**
Planning	Launch to 3 Months	-Stakeholder Advisory Committee of community partners is established in each project geography -Stakeholder Advisory Committees have convened at least once and established a schedule for regular meetings -Community Engagement Survey designed, tested, approved/finalized for use in outreach -Public facing resources about the campaign prepared and published (e.g. website, flyers, etc.)
Public Engagement	Months 3-18	-Community walkability audit completed at each project site -At least 500 community surveys distributed -At least 6 public forums held -At least 5,000 flyers distributed to community members with information on climate-related issues -At least 12 "pop-up" events held at impacted sites to engage more residents -At least 8 Stakeholder Advisory Group meetings held
Analysis/ Synthesis	Months 18-21	-One comprehensive set of recommendations for improvements created for each project site, reviewed, and approved by Stakeholder Advisory Committee
Advocacy	Months 21-24 (and beyond)	-Plans/recommendations presented to local policy makers and decision makers -Stakeholder Advisory Groups agree to plan for ongoing engagement with policy makers -Post survey developed, tested, and approved/finalized for all project participants -Comprehensive report for each project location produced which articulates activities undertaken, stakeholders engaged, progress thus far, and plan for ongoing engagement

C. Itemized Budget Sheet / Budget Narrative – Located in "Mandatory Other Attachments".

Personnel ($219,566.26 of total project budget, $500,000) - CASA's project will be staffed by a combination of lead organizers, community organizers and community promoters in the 3 identified project areas.

- Lead organizers supervise organizers and promoters, represent CASA in coalitions, bring various committees together to work on campaigns/shared priorities. The 3 Lead organizers have each been included in the budget at 15% of total annual salary.

ED_016126_00001399-00013

- Organizers are responsible for staffing standing member committees in their geographic area (most often these are tenant committees), conducting 1:1s to follow up on leads generated by promoters, cultivate and maintain partnerships, conduct workshops and community meetings. The 5 organizers have each been included in the budget at 20% of total annual salary.
- Promoters are primarily responsible for conducting outreach to introduce potential members to CASA, generate new contacts for organizers to follow-up, support organizers as needed with the community meetings, etc. The 3 promoters have each been included in the budget at 30% of total annual salary.

Fringe ($47,975.01 of full project budget, $500,000) - CASA's fringe benefits are calculated at 21.85% of total salaries. This includes medical, dental, and life insurance which comprises 10.52% of the full rate, FICA at 7.65% of the full rate, Workers Comp at 1.78% of the full rate, Retirement at 1.26% of the full rate, and Unemployment for the remaining .64% of the full rate.

Travel (48,646 of full project budget, $500,000) - Travel costs for the project are minimal and include local mileage for the 8 organizing staff and 3 promoter staff listed in the personnel section of the budget to complete field work. This is calculated at 25 miles per person month at the federally approved mileage reimbursement rate of $0.655/miles for 48 months (the full project term).

Supplies ($7,500 of full project budget, $500,000) - CASA's supplies line of the budget includes Printing and Copying costs for outreach and education materials, pamphlets, flyers, etc. We have estimated these costs to be an average of $1.50 per copy and will budget up to 2500 copies per year for 2 program years. Additionally, CASA will utilize electronic notepads for the 3 Promoters and 5 Organizers/Outreach staff to perform field duties. These pads will cost $750 each and will be purchased only in the first program year. Finally, we have included costs for misc. supplies for staff on this project, including, pens, pencils, paper, sticky notes, etc.

Indirect Costs ($38,728.47 of full project budget, $500,000) - Indirect costs included in the budget are in accordance with CASA's federally negotiated indirect rate and are calculated at 13.3% of total direct costs.

Other ($170, 080.00 of full project budget $500,000) - The Other category in the budget includes subaward costs for two program partners detailed in the partners section of this proposal. A subaward to Chesapeake Climate Action Network to provide planning, capacity-building support, outreach assistance, and area expertise will be granted at $40,000 per year for a total of $80,000 granted over two years and a subaward to Coalition for Smarter Growth to provide planning, technical advice, capacity building support, outreach assistance, and area will be granted at $40,000 per year for a total of $80,000 granted over two years. Additionally, we have included costs for providing gas cards for community members who are completing outreach activities, community forums, pop-up events, and other items. These have been calculated at 14 per month for the full project term at $30 each for a total of $10,080.

3.0 ENVIRONMENTAL RESULTS – OUTPUTS, OUTCOMES, AND PERFORMANCE MEASURES (LOGIC MODEL)

A. Environmental Results (Logic Model) – Located in "Other Attachments".

B. Performance Measurement Plan

ED_016126_00001399-00014

The proposed project is for a two year period of performance. See details in the table below.

Project Stage	Timeframe	Performance Measurement
Planning	Launch to 3 Months	-Dated attendance sheets for each Stakeholders Advisory Meeting will be completed -Surveys and public facing resources will be published and publicly available and can be shared with EPA
Public Engagement	Months 3-18	-Completed surveys are tracked online via Formstack/Google Forms (or other reputable online survey service) -Public forums will have dated attendance records taken -Flyer distribution will be tracked weekly - total quantity of flyers created can be monitored against amount remaining, and in combination with weekly reports from CASA outreach specialists can be used to verify/reconcile numbers -Pop-up events will be documented via social media and surveys completed and flyers distributed metrics will show spikes around pop-up event dates
Analysis/Synthesis	Months 18-21	-Recommendations will be published in single accessible documents and available online and can be shared with EPA
Advocacy	Months 21-24 (and beyond)	-Meetings with policy makers/decision makers or in which policy makers/decision makers are present will be documented and reported -Post surveys can be shared with EPA and results for completed surveys can be tracked via Formstack/Google Forms (or other reputable online survey service) -Stakeholder Advisory Groups' ongoing engagement plans can be shared with EPA -Reports produced for public will be shared with EPA

C. Sustainability Plan and Community Vision

CASA has already started a small-scale canvassing campaign in the community on this project through the first pilot Safe Streets program, which began with a kick-off event in coalition with our partner organization, the Coalition for Smarter Growth. Through conducting surveys of community members living in the affected area, we have collected several useful individual community member testimonies, which can be used at press events on social media, and eventually in testimony before local government boards. As our community members themselves say, they have a vested interest in this program because it is they, along with their friends and loved ones, who use these unsafe streets every day. As one respondent, Viviana, put it: “Our community has suffered the ravages of the high speed and lack of visibility of the area and I am especially concerned that there are still cases of crashes that unfortunately have already claimed human losses. We no longer want that for the community, at least we need to reduce those types of incidents.”

The environmental movement is powerful only when it is inclusive of the frontline communities most immediately affected by climate change; the immigrant community knows first hand the real world impacts of our changing climate. The work of building a multi-racial, cross-class,

grassroots movement for climate justice requires the robust participation of working-class communities of color and immigrant communities at all levels. CASA's program is designed to be focused on both delivering results in the short term over the next two years as well as the long-term education and power building it will take to center working-class and immigrant voices in the climate justice movement in the future.

CASA has an extensive history of outreach experience with hard-to-reach communities with health education and other programs; this expertise will be utilized for this project and evidence of successful completion of projects such as these can be used as the model for projects in communities elsewhere.

4.0 PROGRAMMATIC CAPABILITY

A. Organizational Experience related to the proposed project

CASA has more than 200 staff and dozens of AmeriCorps members serving in Pennsylvania, Maryland and Virginia, and an annual budget of over $20M. With more than 20 years of experience managing government-funded grants and contracts – ranging from special appropriations designations to competitively bid awards – including funding from the federal, state, and local levels of government. CASA consistently receives positive contract monitoring reviews during its contract monitoring visits from government agencies. CASA undergoes an independent A-133 single audit annually since 2014 and has had no findings.

B. Staff Experience / Qualifications of Project Manager (PM)

CASA is a multicultural, people of color-led organization which employs individuals from dozens of countries – reflecting the diversity in the community we serve – and it is common for community leaders to join staff and advance through the organization. This ensures that staff are often able to relate personally to community members, and fosters a true sense of identity among our membership. This project will be led by Eduardo Zelaya, CASA's Virginia Organizing Director, and Lydia Walther-Rodriguez, CASA's Chief of Organizing and Leadership, who are both members of the immigrant community, bilingual in English and Spanish, and hold extensive relevant experience related to community outreach and education.

As CASA's Virginia Organizing Director, Eduardo has been successful in pioneering social justice campaigns for immigrant rights, community development, housing, education justice, labor, and workers rights. He immigrated to the United States from El Salvador in 2010 and became a US citizen in 2017. A resident of Arlington County, Eduardo planned and implemented popular mobilizations to the General Assembly, which led to tremendous victories like driver's licenses for all in 2019. Eduardo manages a team of Census promoters in Fairfax County, an area which for the 2020 Census reported unprecedented response rates. He forms and trains community member-led teams to be the champions of their own priorities and advocates of their own liberation in the Eastern Shore, Hampton Roads, Fairfax County and Winchester. He also leads CASA's temporary protected status (TPS) efforts at federal level.

ED_016126_00001399-00016

He first joined CASA as a promoter mobilizing Virginians to the national immigration reform march in 2013, the birth of CASA in Virginia. A year later he was promoted to community organizer, and as such he led and formed multiple groups of community members and structured them as committees that are the main foundation of the social organization in Virginia for CASA. He also led and supported drivers licenses for all, minimum wage increase, in-state tuition for undocumented students, and increasing the language learners funding policies in the Virginia General Assembly.

Eduardo served as the primary program lead for CASA's first pilot Safe Streets program and holds close relationships with all project partners along with other Virginia entities such as elected officials, community leaders, and other organizations. He is currently specializing in Leadership Principles and Management Essentials at Harvard Business School.

Lydia Walther-Rodriguez, CASA's Chief of Organizing and Leadership, is a proud Afro-Latina immigrant from Panama, who oversees CASA's organizing and leadership development efforts alongside a team of organizing and leadership directors, thirty-plus organizers, and fifteen-plus promoters, charged with building grassroots, collective people powered–member committees which drive progressive social and racial justice campaigns at the local, state, and national levels. Prior to her current role, Lydia served as CASA's Baltimore/Central Maryland Region Director, Community Organizer, and Lead Organizer. She has developed and overseen CASA's multiracial organizing efforts, advanced its Police accountability and Reform campaigns, and expanded its youth college access programs. Lydia holds a Political Science and International Relations degree from Morgan State University.

C. Expenditure of Awarded Grant Funds, and plan for compliance

CASA has a robust contract and financial management system that adheres to Generally Accepted Accounting Procedures, manages its general ledger on a modified accrual basis using Netsuite, and maintains separate accounting for each funding source and project. All expenses and income are coded according to program (class), funding source (customer/donor), and type of expense/income (chart of accounts). Program directors manage program expenses, and directors and managers must approve check requests before checks are processed. CASA uses ADP as its payroll training software, and all staff complete timesheets that allocate hours worked to appropriate funding sources.

CASA has more than 20 years of experience managing government-funded grants and contracts - from special appropriations designations to competitively bid awards - including funding from the federal, state, and local levels of government. Since 2014, CASA has undergone an independent A-133 single audit annually due to the level of federal funding it receives. CASA's finances are independently audited yearly by outside auditors chosen by CASA's Board of Directors, and the proposal to audit CASA is re-bid every three years. CASA's audits have always reported responsible financial management, and its financial statements are free from internal control deficiencies.

CASA has many years of experience successfully administering federal funds; this includes nine years of Occupational Safety and Health Administration (OSHA) funding through the

ED_016126_00001399-00017

Department of Labor (approximately $130,000 annually), a Department of Justice Byrne Criminal Justice Innovation award in 2017 ($850,000 over two years), a Department of Education Investing in Innovation (i3) grant ($3,000,000 over four years), and a Department of Education Promise Neighborhood planning grant ($500,000), and most recently a $740,000 grant from the Federal Communications Commission's Affordable Connectivity Outreach Grant Program. State and local funding over the past five years has included the State of Maryland, the Commonwealth of Virginia, the Commonwealth of Pennsylvania, Montgomery County, Prince George's County, Baltimore County, Baltimore City, Fairfax County, the City of Falls Church, and the City of York. We consistently receive positive contract monitoring reviews during our contract monitoring visits from government agencies.

5.0 PAST PERFORMANCE

Grant 1 (Non-Federal) - New Venture Fund via Climate and Clean Energy Equity Fund - $450,000 from 7/1/21-6/30/24; The grant is for general support for the organization, and requires yearly and final reporting to which CASA has adhered to. The proposal detailed CASA's work to cultivate a base of climate justice-focused, immigrant, Latino, and working-class people to fight for climate justice at the state and federal level, and leveraging that power to produce real change. This grant is still active and in progress and CASA has not reported final outputs or final technical reports.

Grant 2 (Federal) - AmeriCorps Program, PA Dept. of Labor and Industry PennSERVE - $388,455.00 from 8/20/22-8/19/23; Annual funding received since 2018 for CASA's AmeriCorps Program through which AmeriCorps members serve at CASA sites providing financial and workforce services including citizenship support and employment coaching. The grant requires regular monitoring, programmatic and fiscal oversight, and auditing.

Grant 3 (Non-Federal) - Equal Justice Works - $216,700 for FY23-FY24; Funding for CASA to serve as a host organization for 2 Fellows (1 Attorney Fellow and 1 Community Organizer Fellow) providing housing-focused legal services and community organizing activities. The grant requires regular programmatic and financial reporting.

Grant 4 (Non-Federal) - Community Catalyst - $302,500 for 2.5 years; Voices for Health Justice is currently in the renewal process. This grant funds community organizing around health equity in the state of Maryland and includes two subgrants to the Ministers Conference Empowerment Center and the Maryland Citizens Health Initiative Education Fund.

Grant 5 (Federal/Non-Federal) - Maryland Legal Services Corporation - $688,494 for FY23; $313,518 for FY22 - Annual funding received since 2010 for legal services for low-income Marylanders. The grant requires regular programmatic reporting and fiscal monitoring and auditing.

ID number: 0704530

CASA INC
8151 15TH AVE
HYATTSVILLE, MD 20783

Dear Sir or Madam:

We're responding to your request dated September 22, 2022, about your tax-exempt status.

We issued you a determination letter in June 1985, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

We also show you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax-deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading, we indicated whether you must file an annual information return. If you're required to file a return, you must file one of the following by the 15th day of the 5th month after the end of your annual accounting period.

- Form 990, Return of Organization Exempt From Income Tax
- Form 990-EZ, Short Form Return of Organization Exempt From Income Tax
- Form 990-N, Electronic Notice (e-Postcard) for Tax-Exempt Organizations Not Required to File Form 990 or Form 990EZ
- Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation

According to IRC Section 6033(j), if you don't file a required annual information return or notice for 3 consecutive years, we'll revoke your tax-exempt status on the due date of the 3rd required return or notice.

You can get IRS forms or publications you need from our website at www.irs.gov/forms-pubs or by calling Ex. 6 Personal Privacy (PP)
Ex. 6 - Personal Privacy (PP)

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific time).

Thank you for your cooperation.

Sincerely,

Stephen A. Martin
Director, Exempt Organizations
Rulings and Agreements

What to do if you're a homeowners association

Homeowners associations that are not tax-exempt may receive certain tax benefits under the provisions of IRC Section 528 if they meet requirements specified on Form 1120-H, U.S. Income Tax Return for Homeowners Associations. If your organization meets these requirements, you may elect to take advantage of the tax benefits by annually filing Form 1120-H, due the 15th day of the 4th month after the end of your tax year. We don't require any application form or fee to take advantage of these tax benefits.

If you'd like to apply for exemption as a homeowners association, submit a completed Form 1024-A on www.pay.gov. Organizations intending to operate under IRC Section 501(c)(4) must also submit Form 8976 on the Form 8976 Electronic Notice Registration System at services.irs.gov/registration.

What to do if you're a political organization

If you're organized to raise and spend funds to influence the selection of individuals campaigning for political office, you may be an organization described in IRC Section 527. Any political organization that wants to be treated under the rules of IRC Section 527 must file Form 8871, Political Organization Notice of Section 527 Status, electronically within 24 hours of the date on which the organization was established, unless it meets an exception. Review Revenue Ruling 2003-49 for more details.

We don't send letters affirming coverage under IRC Section 527. However, we post Form 8871 on our website for public review. You can electronically file Form 8871, as well as search for and view previously submitted Form 8871 by going to www.irs.gov/polorgs and clicking on "Political Organization Filing and Disclosure."

For more information, go to www.irs.gov/polorgs.

Where to find additional information

- Visit www.irs.gov/eo for more information on how to apply for IRS recognition of tax-exempt status.
- Review Publication 557, Tax-Exempt Status for Your Organization, at www.irs.gov/pub557 to see the rules and procedures for organizations that seek recognition from federal income tax under IRC Sections 501(a) and 501 (c).
- You can find forms, instructions, and publications at www.irs.gov/forms-pubs or by calling Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP)
- If you're affiliated with a state, regional or national organization, you may want to contact them to determine if they hold a group exemption ruling in which you are included.

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m., local time, Monday through Friday (Alaska and Hawaii follow Pacific time).

Sincerely,

Stephen A. Martin
Director, Exempt Organizations
Rulings and Agreements

Note that in late 2021 we changed our legal name from “CASA de Maryland, Inc.” to “CASA, Inc.” Please see attached screenshot of our registration/status with the Maryland Dept. of Assessments and Taxation as well as Articles of Amendment reflecting our name change.

NEGOTIATED AGREEMENT
Non-Profit Organization

Institution: CASA de Maryland, Inc.
8151 15th Avenue
Hyattsville, MD 20783

Date: 2/24/2023

Filing Ref: This document replaces the negotiated agreement dated January 5, 2022.

Subject: The indirect cost rate(s) contained herein is for use on grants and contracts with the Federal Government subject to the conditions contained in Section II of this Agreement issued by OMB Cost Principles under 2 CFR 200.

SECTION I: RATES

Indirect costs

	Effective Period				
Type	**From**	**To**	**Rate**	**Locations**	**Applicable To**
Final	07/01/17	06/30/18	22.00%	All	All Programs
Final	07/01/18	06/30/19	25.66%	All	All Programs
Final	07/01/19	06/30/20	20.32%	All	All Programs
Final	07/01/20	06/30/21	13.30%	All	All Programs
Provisional	07/01/21	06/30/23	13.30%	All	All Programs

***Modified total Direct cost Base:** Total direct cost excluding capitalized equipment, pass-through funds and the portion of each sub-award and each contract in excess of $25,000 regardless of the period of performance of the subawards or contracts.

***Treatment of Fringe Benefits:** Fringe benefits applicable to direct salaries and wages are treated as direct costs.

SECTION II: GENERAL

A. Limitations: Use of the rate(s) contained in this agreement is subject to any statutory or administrative limitations and is applicable to a given grant or contract only to the extent that funds are available. Acceptance of the rate(s) agreed to herein is predicated on the conditions: (1) that no costs other than those incurred by the grantee/contractor were included in its indirect cost pool as finally accepted and that such costs are legal obligations of the grantee/contractor and allowable under the governing cost principles; (2) that the same costs that have been treated as indirect costs are not claimed as direct costs; (3) that similar types of costs have been accorded consistent accounting treatment; and (4) that the information provided by the grantee/contractor which was used as a basis for acceptance of the rate(s) agreed to herein is not subsequently found to be materially incomplete or inaccurate.

B. Accounting Changes: The rate(s) contained in this agreement are based on the accounting system in effect at the time the proposal was prepared and the agreement was negotiated. Changes to the method of accounting for costs which affect the amount of reimbursement resulting from the use of this rate(s) require the prior approval of the office responsible for negotiating the rate(s) on behalf of the Government. Such changes include but are not limited to changes in the charging of a particular type of costs from indirect to direct. Failure to obtain such approval may result in subsequent cost disallowance.

C. Reimbursement: Indirect cost reimbursement on all awards will be determined based upon indirect cost rates established for the fiscal period in which the applicable direct expenditures are incurred.

D. Notification to Federal Agencies: Copies of this document may be provided to other Federal offices as a means of notifying them of the agreement contained herein.

E. Special Remarks: Federal programs currently reimbursing indirect costs to this Department / Agency by means other than the rate(s) cited in this agreement should be credited for such costs and the applicable rate cited herein applies to the appropriate base to identify the proper amount of indirect costs allocated to the program.

WORK EXPERIENCE

Chief of Operation & Co-founder — 2006-Present

Centro de Apoyo Familiar (CAF) — Lawrence, MA

- Provide leadership in the development of the organization's statements of: vision, mission, and goals, and the corresponding strategies, plans, and budgets to achieve them;
- Oversees all program operations functions
- Develop a functional workplan, performance measurements, management controls, and critical success factors;
- Review approved plans and budgets as part of the annual planning and budgeting cycle and present recommendations to the board of directors;
- Develop and provide appropriate policy recommendations for consideration by the board and the team;
- Propose agendas for the board of directors reflecting issues, opportunities, and priorities;
- Present a written trimetric report to all board meetings;
- Develop and maintain an effective staff organization which provides appropriate policy and program recommendations which delivers services, programs and information beneficial to the members;
- Hire, reward, discipline, terminate, and set the remuneration of, all employees in accordance with policy and/or approved budgets;
- Develop a survey instrument to identify, document, and articulate the needs of the community members;
- Promote collaboration with and among other non-profit organizations locally and nationally to address the needs of the community and the mission and goals of the organization;
- Act as the spokesperson for the organization for community events;

Director of the Latino Faith-Based Capacity Building and Leadership program the Connectors and Healthy Families Initiative.

Director of Healthy Families Programs.

- Responsible for raising funds to support CAF community development component, training Promotoras and youth leaders in Asthma and lead prevention, healthy Eating and other health related issues and provide overall supervision of programs and department.

Capacity Building Program

- Oversees CAF's Capacity Building Program a network of close to 200 faith-based institutions that work together with CAF to connect families with community resources and opportunities.

Clinical Mental Health Counselor — 2006-2007

Lawrence, MA

- Clinical Mental health counselor for children, adolescents with emotional disturbance and their families.

Community Social Worker — 2000 – 2007

Family Service Inc. (FSI) Lawrence, MA

Responsible for coordinating and managing adolescent mentoring program.

Assist in the coordination and facilitation of Environmental health program *Casa de Salud* and facilitation of workshops

- Supervise and provide intense case management for the teen pregnancy program.
- Responsible for leading and facilitating parenting programs.
- Develop and facilitate psychosocial and educational programming for seniors.
- Lead and assist in the development and implementation of children groups, teen pregnancy prevention groups, and teen mothers' groups.
- Responsible for designing, evaluating, and facilitating the grandparents group.

TAG Club Coordinator — 1998 – 2000

University Of Massachusetts at Boston
Boston, MA
English High School

- Develop, and coordinate a mentoring program that motivates high school students to graduate and go to college.

- Provide tutoring and academic assistant to students.
- Assist teachers and teach class when needed.

WORK EXPERIENCE

President and Founder **10/06 – Current**

Centro de Apoyo Familiar (CAF) Riverdale, MD

- Implement the organization's mission, and provide strategic direction in support of the organization's goals.
- Build and maintain strong relationships and communications with the Board of Directors.
- Serve as an advocate and spokesperson for the organization and the nonprofit community within the state as well as nationally.
- Manage CAF's operations and ensure procedures are follow.
- Optimize revenue and fundraising opportunities, seeking out new and non-traditional sources of income in coordination with the executive director and other key staff of the organization
- Create and foster the growth of collaboration to address emerging opportunities and challenges locally and nationally.

Asset Development- Program Manager **3/04 – 3-09**

National Council of La Raza (NCLR) Washington, DC.

- Develop and manage NCLR's Mas a Ti Project – the first community financial institution in the country which includes: (IDAs, Tax Prep, Housing counseling program, and financial services).
- Build and maintain relationships with organizations in the NCLR Housing Network (NHN) and other partners at the national, federal, state, and local level.
- Provide technical assistance to the Housing Network and EMCs in the areas of technology and lending partnership.
- Monitor progress of community groups participating in the NHN and EMC programs, which also entails conducting site-visit, convening meetings and providing trainings and other activities (i.e. administrative, public relations, resource development) as needed.
- Assist senior staff with decision making in areas of Asset and Community Development.
- Responsible for raising funds to support NCLR's community development component.
- Organize Asset and housing related Workshops for NCLR's Annual Conference.

Family Assets Building Program Director **7/2001 – 6/2003**

Lawrence CommunityWorks, Inc. (LCW) Lawrence, MA

- Responsible for the management, and development of seven after school programs for youth.
- Develop financial literacy curriculum and manage the Individual Development Accounts Program (IDA).
- Supervise a staff of 13, involving training, work flow, quality control, conflict resolution, and review processes.
- Develop long-term plans, strategies, and projections for the Young Professional initiative.
- Assist grant writer with grant proposals development including: site visits, reports, program budget, etc.
- Organize major events such as trainings, conferences, workshops and business expos.
- Responsible for designing, evaluating, and implementing a system of support and network for the organization.

AmeriCorps IDA VISTA Volunteer-Program Manager **6/2000 – 7/2001**

Allston Brighton Community Development Corporation Allston, MA,
The Corporation for Enterprise Development (CFED) Washington, DC

- Make presentations to community groups and residents, local organizations, and members of board of directors.
- Develop community partners with local business, civic agencies to support and promote the IDA program.
- Assist with the recruitment of participants into the program and monthly financial literacy workshops; identify topics, speakers, and facilitate monthly support meetings.

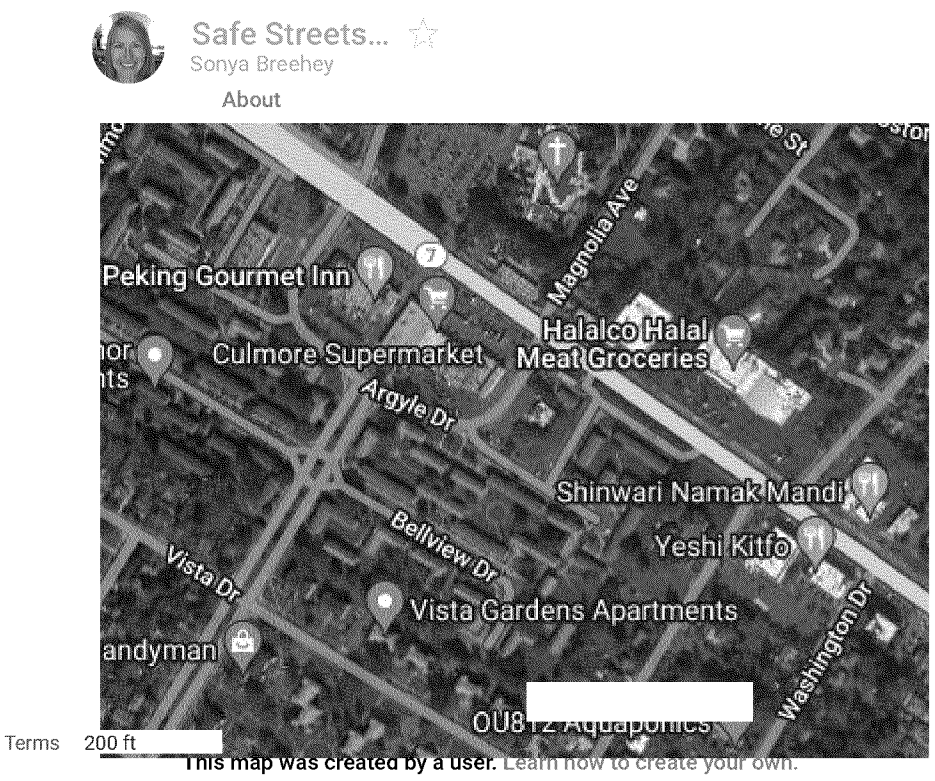
REPORT

The Danger Immigrants Face Crossing the Streets of Culmore

Bailey's Crossroads Community Walkability Survey and Audit Results



Virginia

Coalition for Smarter Growth
DC • MD • VA

walking, biking and the bus to get to work and daily activities. This Virginia community has a high density of housing within a walkable distance to grocery stores, restaurants, schools, religious institutions, and other services. Yet, the main arterial road, Route 7 (Leesburg Pike) is unsafe because of missing sidewalks, few safe crossing options, bus stops without crosswalks, and heavy high-speed traffic.

The Coalition for Smarter Growth (CSG) the region's leading smart growth organization and immigrant advocacy powerhouse CASA have partnered on a Safe Streets for Bailey's Crossroads campaign to engage and organize local residents in the Culmore neighborhood of Fairfax County to make the community's streets safer and improve access to walking, biking and transit. The campaign is guided by a stakeholder advisory committee of local community residents and volunteers, and the Fairfax Alliance for Better Bicycling (FABB) and Fairfax Families for Safe Streets (FfxFSS), in addition to CSG and CASA.

CSG and CASA, in coordination with the campaign's Stakeholder Advisory Committee, developed a walkability survey to hear directly from residents their concerns about walking, biking, and accessing the bus and what they feel would make it better. We received 202 responses, which have been compiled and analyzed in this report. A walking audit was done to augment the survey and to assess and document firsthand the experience of walking along and crossing Route 7 in the Culmore neighborhood. Key observations, problem locations and supporting images from the walk audit can be viewed on the interactive google map.

Overwhelmingly, people in Culmore indicated they do not feel safe walking, biking or getting to transit. They cite crime, dangerous driving, poor lighting, lack of bike infrastructure, not enough time to cross the street, and the lack of connected sidewalks and safe crossing options.

Based on the results we have identified a series of near-term (within one year) and medium-term fixes (two to three years) that are critical for making the area safer, along with a fuller list of improvements that are needed.

Reducing the speed limit on Route 7, providing more safe crossing options, adding high visibility crosswalks and pavement markings, and installing brighter pedestrian scale lighting are all interim steps that can be taken ahead of the Envision Route 7 Bus Rapid Transit (BRT) project expected within the next decade. The larger BRT project will provide the opportunity for a holistic redesign of Route 7 into a walkable, bike-friendly, transit-oriented corridor.

High-Risk Corridors

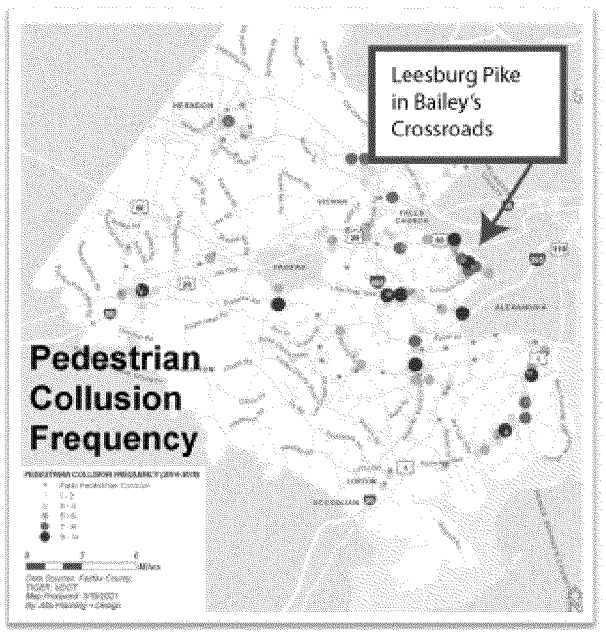


Image of Pedestrian Collision Frequency Map from Fairfax County's Safe Streets for All Program presentation (June 2021)

In developing the county's Safe Streets for All program, FCDOT found that four out of the top 10 high risk corridors in the county for pedestrians are in Bailey's Crossroads. Three segments are along Route 7 and one along Columbia Pike. Their presentation to the Board of Supervisors also notes that most pedestrian fatalities have been on roadways with posted speeds at 40 to 45mph such as Route 7.

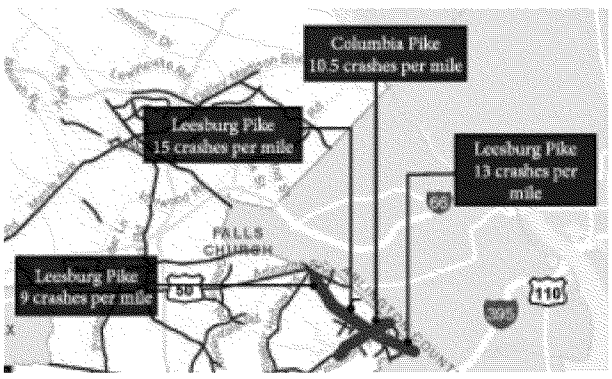

Image of High Risk Corridors from Fairfax County's Safe Streets for All Program presentation (June 2021) Bold red line = Top 10 High Crash Rate Corridors / Thin red line = High Risk Corridors

Meanwhile, in its Pedestrian Safety Action Plan, VDOT identified Route 7 and the Columbia Pike in Bailey's Crossroads to be within the top 1% of statewide pedestrian priority corridors based on crash data from 2016-2020. The Route 7 corridor through the Culmore community is also listed as a top 1% pedestrian priority corridor within the Northern Virginia district of VDOT.

Community Survey on Walking, Biking, and Transit

Share of Walking, Biking and Transit Use

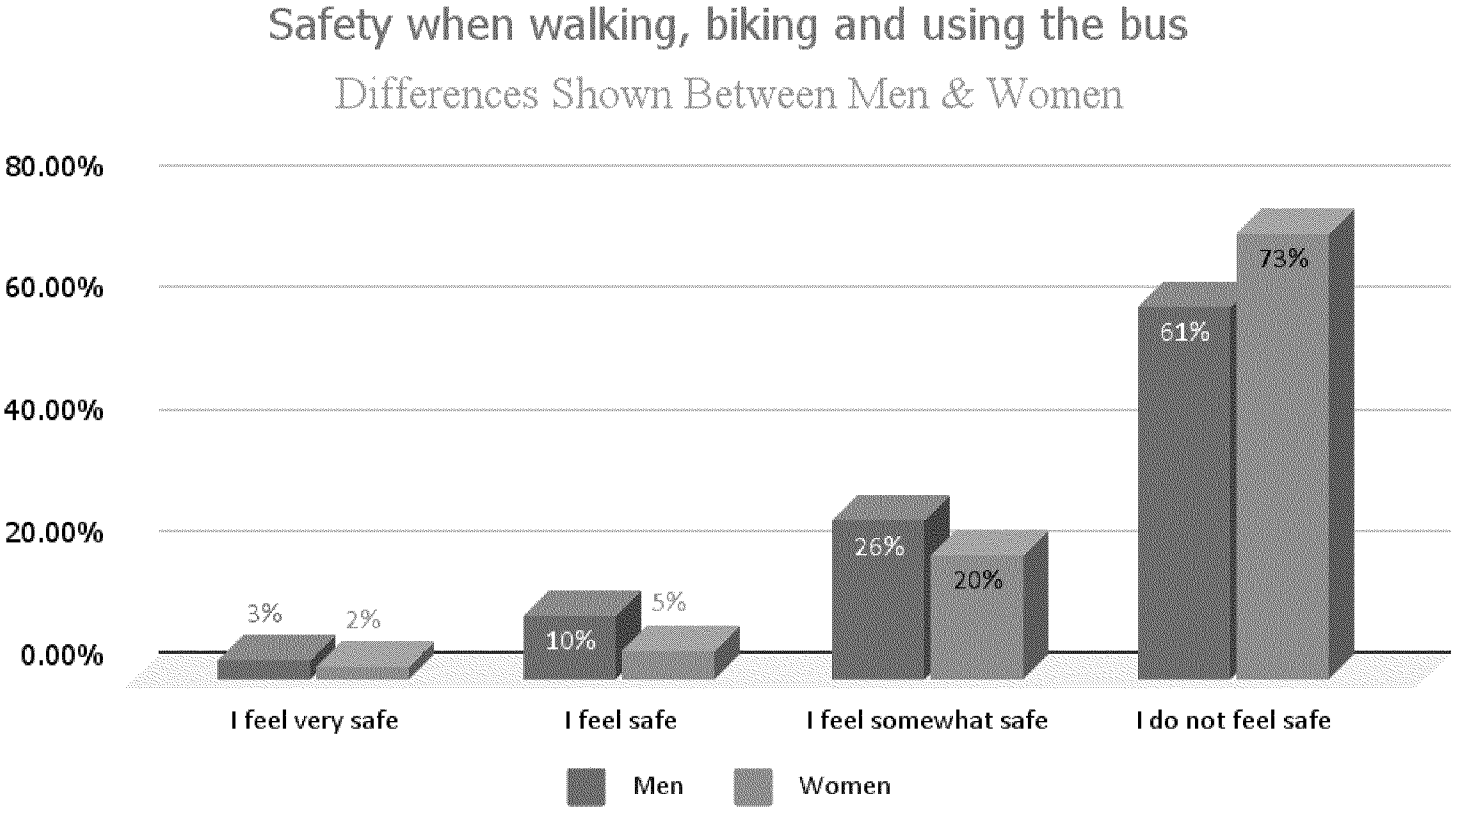
Five percent of respondents reported they bike everyday and 21% bike at least once a week. Survey respondents between 65-74 years old bike the most out of all age categories with 17% biking daily and 33% at least once a week.

There were some significant differences between men and women. 63% of women say they walk daily compared to 38% of men, and 35% of women take transit daily compared to 22% of men.

Overall, survey respondents from the Culmore community walk, bike, and use transit at considerably higher rates than Fairfax County residents as a whole. Looking at the Metropolitan Council of Government's most recent 2017/2018 Regional Travel Survey, the mode share split for all trips in Fairfax County was 2.5% rail, .8% bus, 5.3% walk, and 0.8% bike.

Fairfax County's Commuting Patterns Dashboard, based on the 2020 US Census American Community Survey of how commuters in Fairfax County travel to work, shows that countywide 4.5% take transit (rail and bus), 1.6% walk, and 0.2% bike.

> Jose Castillo has lived in Culmore for eight years and is concerned about the safety in the area where he shops, goes to the laundry, and works. "Every day, you can see the risks in the area," he says, "And unfortunately, there have already been human losses." He wants to improve the safety of people traveling on this road by eliminating and reducing risk factors.



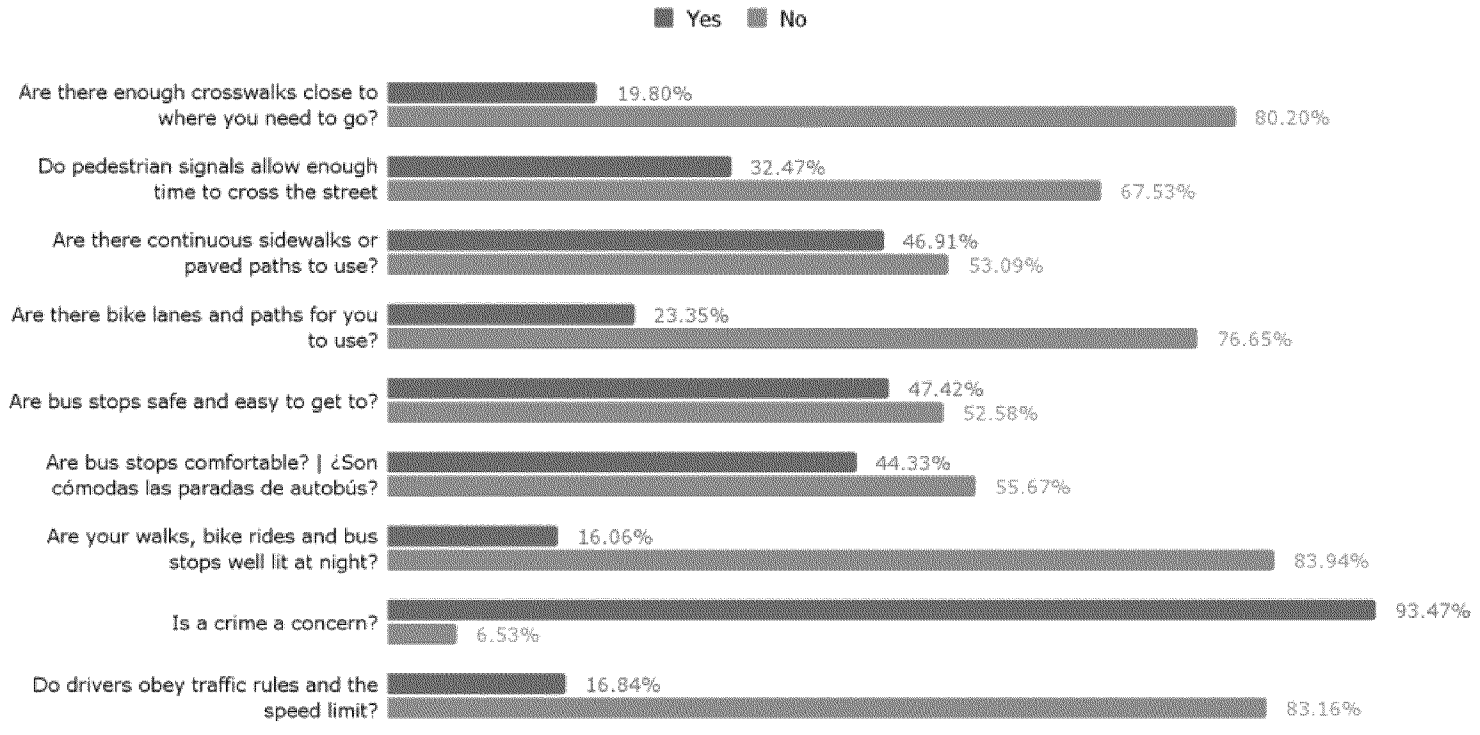
Tweet

Community Safety

Overwhelmingly, survey respondents indicated they do not feel safe walking, biking or getting to transit. 67% of survey respondents indicated they do not feel safe, while 23% said they feel somewhat safe. That means 90% of people feel less than safe when they travel around the community. Only 7.5% said they felt safe and 2.5% felt very safe.

Women, who report walking and taking transit at a frequency greater than men, also reported feeling unsafe 24% more than men.

The Problems



The biggest issues reported that affect safety were crime, dangerous driving, poor lighting, lack of bike infrastructure, not enough time to cross the street, and the lack of connected sidewalks and safe crossing

lighting when walking, biking or at bus stops. People who took the survey shared concerns about armed robberies and shootings, and felt the lack of lighting was part of the problem.

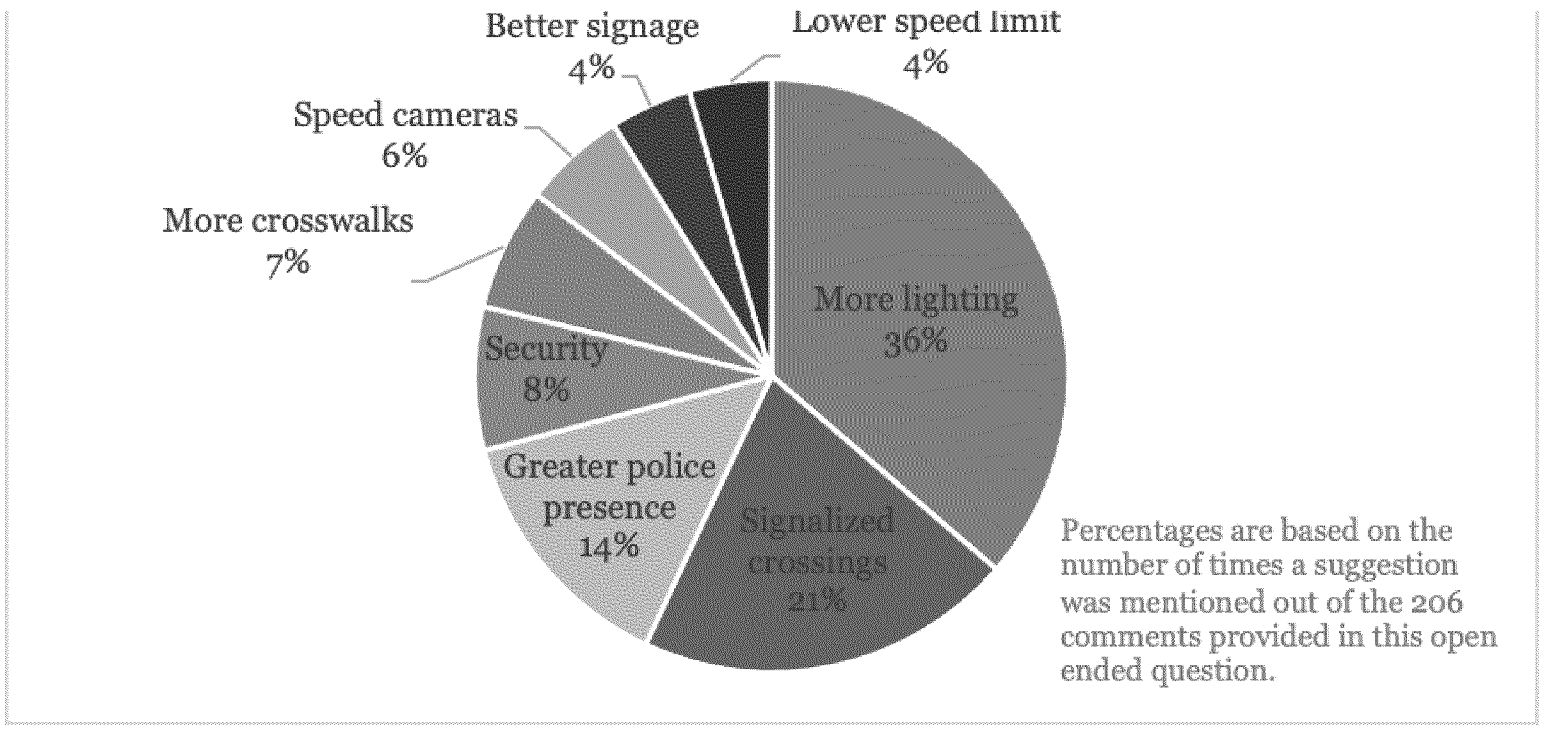
83% felt drivers didn't obey traffic rules or the 40mph speed limit. Several commented that they felt drivers didn't respect pedestrians as they crossed the street.

More than 75% reported there were not enough bike lanes or paths to ride safely.

More than half said there were not continuous sidewalks to use and that bus stops were not safe or easy to get to. Two thirds felt that pedestrian signals didn't give them enough time to cross the street.

Aurora Gamez who has lived in Culmore since immigrating from Honduras 20 years ago says, "It's very dangerous in this area. The road can get up to six lanes wide and often drivers speed down the stretch." She says the blocks are long with crosswalks available only every quarter mile or so."

Tweet



Survey respondents were asked if there are specific areas of concern in Culmore, Route 7 was mentioned most, followed by Glen Carlyn Drive and then Bellview Drive. Also mentioned was Charles Street, the Culmore Shopping Center, and Carlin Springs Road, which is outside of Culmore. Some noted problems of concern in this open ended question. Crossing the street, nighttime crossing, and lighting got the most mentions.

Better Lighting Leads List of Requested Improvements

More lighting, signalized crossings and more crosswalks, speed cameras, lowering the speed limit and better signage were the top suggestions offered by survey respondents. There were many additional suggestions including greater driver awareness, continuous sidewalks, bus stop lighting, bike paths, and snow removal.

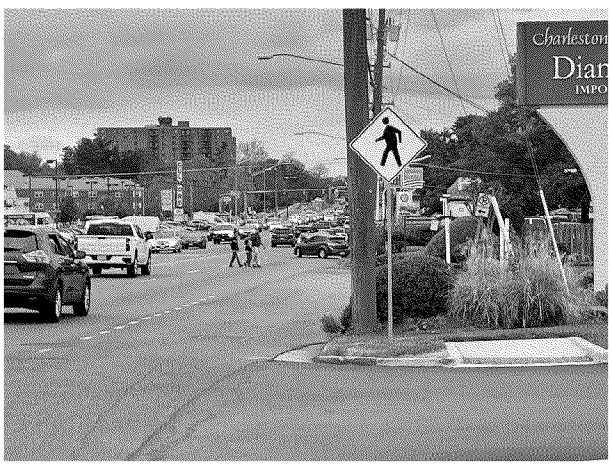
Community members commented that they would like to see a greater police presence, wanted help to deal with the violence and felt that police would offer a sense of security.

ED_016126_00001408-00008

Community Walking Audit

We conducted a walking audit on May 5, 2022, to assess and document firsthand experience of walking along and crossing Route 7 in the Culmore neighborhood. Held during the afternoon rush hour, it provided a good representation of the challenges people face navigating Route 7 on foot or by bike during high traffic. Joining CSG and CASA staff were several Culmore residents, the Fairfax Alliance for Better Bicycling, the Fairfax Families for Safe Streets, and the Mason District representative on Fairfax County's Trails, Sidewalks, and Bikeways Committee.

While walking a predetermined route, participants used a walk audit checklist developed by 8 80 Cities to take notes on their walking experience, conditions at bus stops, and the state of bicycling infrastructure. The audit observations and recommendations from participants are documented in this report and are intended to augment the survey data to inform transportation and planning efforts for future improvements to the community.



Culmore Walk Audit Route Blue line = walking route / Red markers = Audit observation points Black markers = locations with inadequate lighting

During the audit we observed at least 35 people walking, 2 bicyclists and 4 people riding scooters. Traffic was very heavy with drivers stacked up in the center turn lane in both directions on Route 7 waiting for breaks in traffic to turn. Drivers were queued up on Glen Carlyn Drive waiting to turn onto Route 7 at an uncontrolled intersection, with the lead vehicle blocking the crosswalk everytime they advanced. In the midst of this chaos, we saw approximately 15 people attempting to cross Route 7 midblock and at uncontrolled intersections. **We watched and held our breath as a family of seven with several children on scooters crossed at the uncontrolled Glen Carlyn Drive intersection.**

Key Observations and Findings

Unsafe and Uncomfortable Sidewalks

A group of pedestrians cross Route 7 at the Glen Carlyn Dr. and Magnolia Ave. intersection that does not have a crosswalk or signal. This is also the location of a dangerous missing sidewalk connection.

- There are some decent sidewalks along parts of Route 7 but significant missing gaps remain, creating a very unsafe and uncomfortable situation. The missing sidewalk between Magnolia Avenue and the shopping plaza at 5912 Leesburg Pike is extremely dangerous since the only option is to walk in the road, or use a cut-through path created through a hole in the fence that requires you to walk through the Liberty gas station service area and passed its oil storage containers and trash bins. The lack of light and visibility makes this connection an even worse choice at night. During the audit, we observed several people both walking in the road here and cutting through the gas station.
- An excessive number of driveways along Route 7 make the sidewalks disjointed and increase the number of conflicts with drivers.
- Sidewalks that exist generally allow just one to two people to walk comfortably. Three times our group had to step out of the way to make room for two bicyclists and a scooter rider to pass. In several locations, parked cars hung over the sidewalk narrowing the pathway even more.
- We noted some street sections had trees and landscaping, but many areas had nothing.
- The only places with street furniture for resting are in the pocket park at the corner of Charles Street and in the bus shelters. It's telling that every time we stopped at a bus shelter to assess, many in our group took advantage of the bench to sit and rest.

Intersections and Crossings

A family with children on scooters crosses Route 7 at Glen Carlyn Dr./Magnolia Ave. intersection that does not have crosswalks or a signal

to the Charles Street intersection and back. This is significantly farther than the 60 feet it would take to directly cross Route 7.

- There is no crosswalk on the north side of the intersection at Glen Forest Drive/Charles Street closest to the plaza and bus stop. This forces people to walk even farther trying to cross safely at the signal. We had to cross three streets just to get to the other side, taking us 7 minutes to get across Route 7 at this intersection. That doesn't count the length of time it takes to walk to/from the intersection to access the signal. It is 900 feet from the bus stop in front of the plaza to the intersection, across Route 7, and then back to the point across the street from the bus stop. Whereas it's 70 feet to cross midblock right at the bus stop.
- Audit participants felt either somewhat or not at all safe crossing at the signalized intersections.
- At the two traffic signals within the audit area, there are pedestrian signals but the uncontrolled intersections do not have pedestrian signals or crosswalks to cross Route 7.
- Nearly everyone felt the traffic signals required pedestrians to wait too long and that there wasn't enough time to cross. At the Glen Carlyn/Route 7 intersection, we saw a disabled man with a limp trying to hustle across to make the light.
- The curb radius for some intersections is large, allowing drivers to make right turns at higher speeds and increases conflict with people crossing the street. An example is at Route 7 eastbound right turn at Glen Carlyn Drive.
- While intersections have ADA curb cuts, for the most part the intersections and sidewalks would be challenging to navigate in a wheelchair. For visually impaired people, there is audio with the pedestrian signals at intersections but not much else to help them navigate.

The Danger at Bus Stops

- All of the bus stops within the audit area had a shelter, a bench for resting, and trash cans. They did not have bike parking or lighting. Bus stop lighting was mentioned as a need by several survey respondents.
- The buses came with decent frequency, and 2-3 transit riders were seen at almost all the stops within the audit area.
- All of the bus stops in the audit area, except one at the corner of Glen Carlyn Road near St. Anthony's, were located midblock and approximately 370 feet to 850 feet from the nearest signalized crossing option.

The Peril that Cyclists Face

- We saw one cyclist riding along Route 7 on the sidewalk narrowly avert being struck crossing Glen Forest Drive in the crosswalk by a left-turning driver. We also saw a person riding an electric scooter in one of the travel lanes westbound on Route 7.
- We saw no bike infrastructure within the audit area even though several people were biking and riding scooters and several bikes were locked up to fences and signs. Glen Carlyn Road has nice bike lanes but they end before reaching the intersection of Route 7, leaving cyclists to ride in traffic. We did not see adequate bike parking in the area.

to encourage a child or older relative to ride in the area.

Mobility and Safety Improvement Recommendations

Based on survey responses and walk audit observations, several needed pedestrian and bicyclist/scooter mobility and safety improvements have been identified and listed below. Fairfax County and VDOT should deploy tactical short-term solutions to save lives now while longer-term solutions are considered and planned. These short-term safety measures can be initiated as pilot projects that can be implemented quickly and then assessed and adjusted as part of longer-term planning.

Ultimately, Route 7 should be redesigned as a walkable, bike-friendly, transit boulevard as part of the Envision Route 7 Bus Rapid Transit project. We urge that all recommended pedestrian and bicyclist/scooter mobility and safety improvements be included in the plans.

In the near-term (Fall 2022):

- Lower the speed limit as an interim measure and add driver speed feedback signs to help reduce speeding in this area
- Install a temporary, in-street sidewalk connection using jersey barriers from Magnolia Avenue to the sidewalk in front of Bakersfield Rugs at 5928 Leesburg Pike
- Increase shoulder width through lane restriping
- Create a temporary to permanent midblock crossings to reduce the distance between crosswalks and make it easier for pedestrians to walk safely to bus stops and stores
- Implement a traffic safety education campaign in Culmore
- Provide leading pedestrian intervals and more time to cross Route 7 at signals

Within the next 2-3 years:

- Permanently reduce the speed limit on Route 7
- Add a signalized crossing at Glen Carlyn Drive/Magnolia Avenue across Route 7
- Provide crosswalks on all legs of the Charles Street/Glen Forest Drive/Route 7 intersection and Glen Carlyn Road/Route 7 intersection
- Stripe high visibility crosswalks across all side streets and driveways along Route 7
- Provide brighter pedestrian-scale lighting

All Recommended Mobility and Safety Improvements

Lower Speeds

- Lower the speed limit on Route 7 in Culmore to 25 mph

More Crosswalks

- Provide additional signalized crossing options for pedestrians on Route 7 between the Glen Carlyn Road and Crossroads Center Way intersections:

ED_016126_00001408-00012

Carlyn Drive and Charles Street
    - Near the Route 7/Payne Street intersection
- Add an additional crosswalk across Route 7 on the northwest side of the Charles Street/Glen Forest Drive intersection
- Add pedestrian refuge islands at all pedestrian crossings of Route 7
- Add high-visibility crosswalks across all side streets and driveways along Route 7
- Provide leading pedestrian intervals and more time for pedestrians to cross Route 7

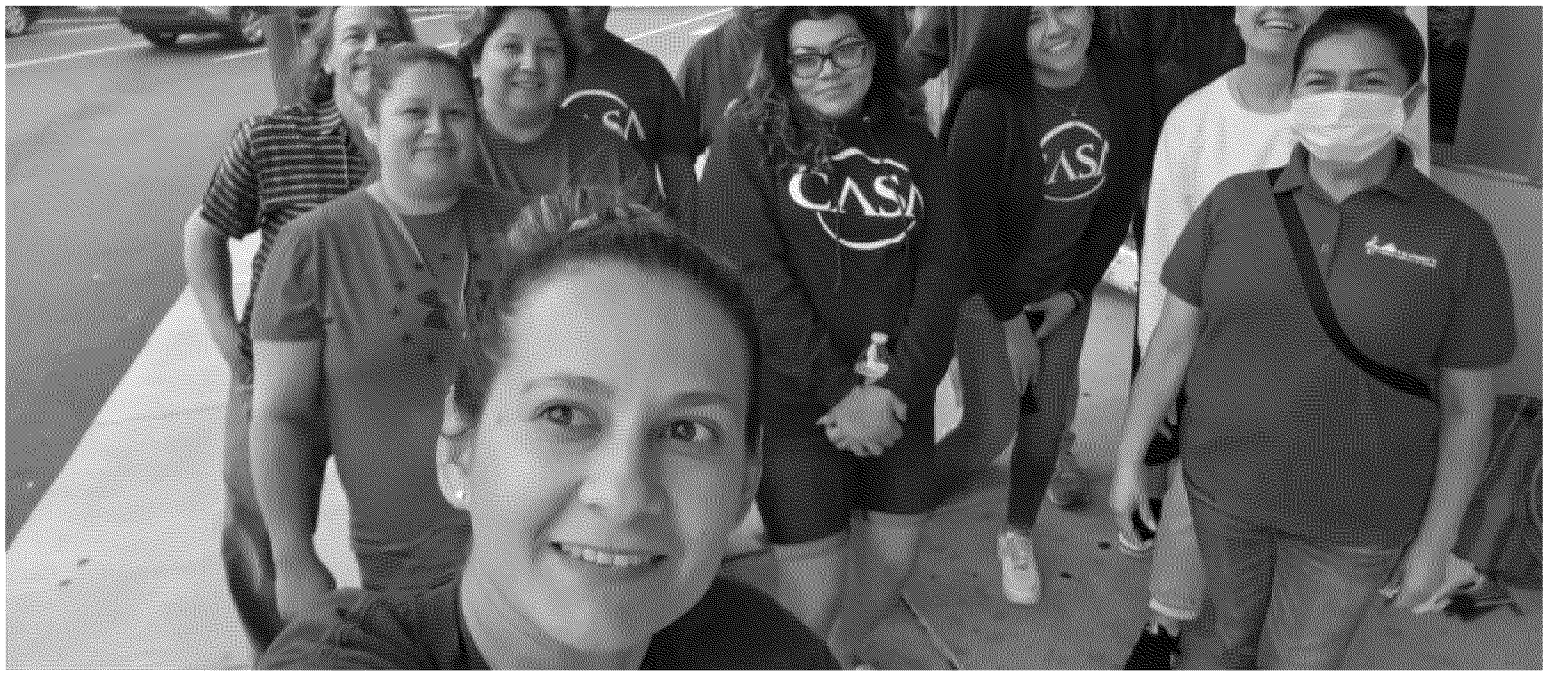
Complete Sidewalks and Paths

- Add missing sidewalk connections or shared-use paths along Route 7. This could be temporary for quick build opportunities until permanent improvements can occur.
    - On the northside, complete missing segments between Magnolia Avenue and the entrance to Bakersfield Rugs, between Payne Street and the Crossroads shopping center sidewalk
    - On the southside, complete segments between the Panera and Payne Street, and between Charles Street and Glen Carlyn Drive

Install Pedestrian Scale Lighting

- Install more pedestrian scale lighting. Locations of concern include:
    - Route 7 service road on the northeast side of the Glen Carlyn Road intersection
    - Glen Carlyn Drive near Walgreens
    - Behind the Culmore Shopping Center where the center driveway meets Glen Carlyn Drive
    - Glen Carlyn Road near Saint Anthony's Church
    - Eastside of Route 7 near the bus stop in front of 5918 Leesburg Pike
    - Westside of Route 7 between Charles Street and Glen Carlyn Drive

Provide Traffic Safety Education and Enforcement



- Add speed monitoring devices along Route 7
- Implement a traffic safety education program in the community

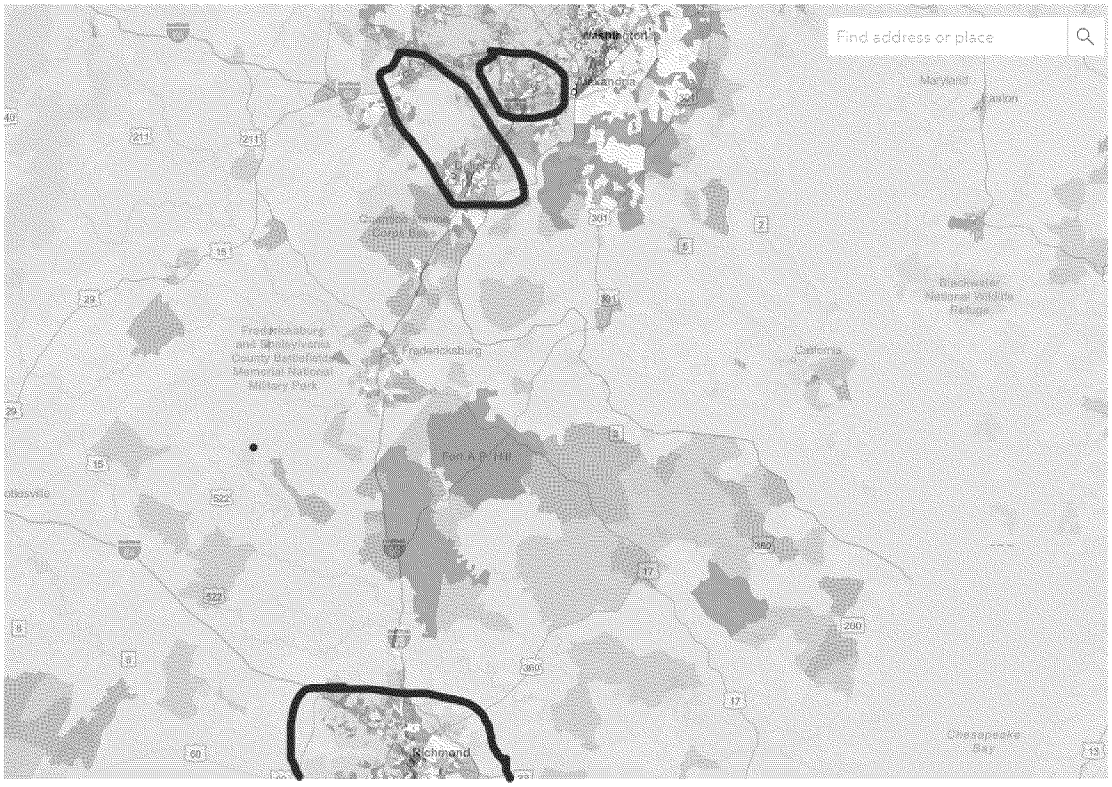
Add Bike Infrastructure

- Provide safe and connected bike infrastructure like protected bike lanes and shared-use paths
- Install bike parking, especially near bus stops

Conclusion

ED_016126_00001408-00013

The Route 7 corridor in the Culmore community of Bailey's Crossroads is known by county and state officials to be a high-risk area for pedestrians, and for the first time, the immigrant community has organized to speak out and demand safety precautions for where they love to live. This multi-lane arterial with its 40mph speed limit, excessive number of driveways and only two traffic signals continues to prioritize cars over the safety and comfort of everyone else navigating the community outside the car.



Home to a large immigrant population where many residents regularly walk, bike and use the bus, residents are forced to endure the unsafe conditions – which have already taken lives and seriously injured others – as they try to get to work, get the kids to school, run errands and just go about their daily lives. Yet, aside from new sidewalks in a few locations and some safety improvements in the surrounding neighborhoods, the main street through the heart of this community, Route 7, remains unchanged and unsafe.

Through the walkability survey, local community members spoke out from their homes, at the laundromat and out in the Culmore neighborhood, sharing their concerns and what they feel would make it better. Overwhelmingly, they feel unsafe, citing crime, dangerous driving, poor lighting, lack of bike infrastructure, and the lack of connected sidewalks and safe crossing options as the problem

Now is the time to provide the safety improvements the community deserves! Deploying tactical short-term solutions can start protecting lives now while longer-term solutions are considered and planned. Reducing the speed limit, providing additional signalized crossing options, more crosswalks and pavement markings, and brighter pedestrian scale lighting can be an interim step ahead of the Envision Route 7 Bus Rapid Transit project. Ultimately, Route 7 should be redesigned for all users as a complete street that is walkable, bike-friendly, and provides safe and easy access to transit while also providing safe movement for drivers.

Grassroots Campaign

Hundreds of Immigrants from Culmore Rally for Safer Streets Before Fairfax County Public Hearing

FALLS CHURCH, VIRGINIA – Immigrant advocacy organization CASA and the Coalition for Smarter Growth hosted a press conference and rally outside of Bailey's Elementary school as part of the Bailey's Crossroads Safe Streets campaign. At the public hearing, CASA members who reside in the area then shared with the Board of Supervisors the issues they face walking, biking, and riding the bus to get to work and their daily activities.

CASA Member Viviana Valverde is a single mom who cleans houses who shared: "The area around the Route 7 highway is where we regularly travel to get to our jobs, go shopping, do our laundry, and eat at local restaurants; this part of town has become more dangerous due to the lack of street, pedestrian, and cyclist signage. The immigrant community that calls Culmore home has suffered great damage from the high-speed traffic and lack of visibility in the area. I am especially concerned that there are still crashes that unfortunately claim so many lives. It is even more worrisome now that I have a one-month-old baby and have to transit this area with her in a stroller. We will no longer accept this and changes need to be made."

The campaign is dedicated to making Bailey's Crossroads safer, which is home to a large immigrant population. The Fairfax County Department of Transportation (FCDOT) and the Virginia Department of Transportation (VDOT) have identified that Route 7 corridor as a high-risk corridor for vulnerable road users based on years of data showing the high numbers of fatalities and serious injuries. Yet, not enough has been done to stem the traffic fatalities and injuries that plague residents trying to navigate their community on foot or by bike.

CASA Member Aurora Lopez shared, "I work at a laundromat in the area. As a resident of Culmore, I travel through the area to purchase groceries, work, and other activities. I have seen an increasing number of accidents since drivers speed in the area. Culmore lacks signaling for vehicles, cyclists, and pedestrians. Unfortunately, lives have already been lost due to the concerning issue. Therefore, as part of the community, I am here to raise awareness with the sole objective of obtaining a change in our community. Now we request you as the County authority to take action on the problems we face as a population that circulates on said road."

"We face an epidemic of dangerous roads across northern Virginia where moving cars is priortized over people's safety and Route 7 here in Culmore is a perfect example. Since 2015, along the one-mile stretch of road that essentially serves as the community's Main Street, there have been 18 pedestrian

In June, CASA and Coalition for Smarter Growth released a report from data collected by surveying Culmore residents. This Northern Virginia community has a high housing density within walking distance of grocery stores, restaurants, schools, religious institutions, and other services. Overwhelmingly, Culmore residents indicated they do not feel safe, citing poor lighting, lack of connected sidewalks and safe crossing options, no bike paths, and concerns about crime.

"About five months ago, we launched this community-powered campaign to get FCDOT, VDOT, and Supervisor Penny Gross to change the Culmore or Bailey's Crossroads area to save the lives of countless immigrants. Today, CASA members have the opportunity to share their stories and also express their concerns. We will continue to fight and uplift their voices until some change happens," said Eduardo Zelaya, director of Virginia organizing. "Let's make it essential that everyone gets home safely."

###

With over 122,000 lifetime Latino, immigrant, and working-class members across 46 US states, CASA is the foremost immigrant organization in the mid-Atlantic region and a national leader in supporting immigrant families and ensuring that all individuals have the core support necessary for full participation in society. Now a national immigrant powerhouse, CASA creates change with its powerbuilding model blending human services, community organizing, and advocacy in order to serve the full spectrum of the needs, dreams, and aspirations of members. Visit us at www.wearecasa.org and follow us on Twitter at @CASAforall.

The Coalition for Smarter Growth is the leading organization in the Washington, DC region dedicated to making the case for smart growth. Our mission is to advocate for walkable, bikeable, inclusive, transit-oriented communities as the most sustainable and equitable way for the region to grow and provide opportunities for all.

We Are CASA

All year long CASA provides critical services to immigrant and working-class families, and advocates for their rights. But our work is only possible because the support of people like you; individuals who stand with immigrants and understand that providing services to those in need uplifts our entire community. Will you join us in our fight for justice by giving today?

SAFE STREETS: New Video | Catalina's Story

Meet Catalina. Like many immigrants in Culmore, Catalina rides a scooter to work and struggles with the unsafe street conditions in the area. She is a CASA Member who joins the fight for safer streets in Culmore, sharing her story to help.

The Bailey's Crossroads community is home to a large immigrant population where many residents rely on walking, biking and using the bus to get to work and their daily activities. Catalina herself arrived to the United States almost two decades ago and has lived in Culmore for 8 years now.

The Fairfax County Department of Transportation (FCDOT) and the Virginia Department of Transportation (VDOT) have identified the Route 7 corridor as a high-risk corridor for vulnerable road users based on years of data showing the high numbers of fatalities and serious injuries. Yet, no significant investments in safety improvements have been made to stem the traffic fatalities and injuries that plague residents trying to navigate their community on foot or by bike.

Thank you, Catalina, for raising your voice to make sure that pedestrians, cyclists, drivers, everyone in the area is safe!

ATTACHMENT F

'Safe Streets' Testimony from CASA Member Ex. 6 Personal Privacy (PP)

"Hola, mi nombre es Ex. 6 Personal Privacy (PP)
Ex. 6 Personal Privacy (PP) Me convertí en un miembro activo de CASA dos años después de mi llegada, hace unos 6 años aproximadamente.

Soy padre de familia que emigro a este pais buscando un futuro mejor para mi y familia. Desde que me mude a este pais he venido a cumplir con mis deberes y derechos como todo un buen habitante contribuyendo a la economia de esta nacion a traves de mis impuestos.

He me dedicado a trabajar en el area de la jardineria y otros, en la actualidad me dedico a trabajar en una constructora en el area de electricidad.

Hoy estoy aqui como parte los habitantes de el sector de culmore o Bailey's Crossroads expresando mi preocupacion en la zona donde yo como habitante circulo a diaria como ha comprar mi comida o ir a la lavanderia e incluso a trabajar y en efecto he detectado una deficiencia en el area ya que se ha visto el incremento de accidentes por el aumentos de velocidad de los conductores a falta de senalizacion tanto para vehiculos como ciclistas y peatones, lastimosamente a tal problematica ya ha habido incluso perdida humanas por lo tanto como parte de la comunidad alzo mi voz con el unico objetivo es salvaguardar la integridad física de las personas que transitan por la vía pública eliminando y/o disminuyendo los factores de riesgo.

Solicitando a las autoridades competentes de el Condado a que tomen cartas a la problematica que nos enfrentamos como poblacion que circula por dicha via.
Solicitando senalizacion de transito mas actualizada e iluminación en el area o incluso reducir la velocidad de dicha via entre otros componentes claves como un reductor de velocidad o detector de velocidad.

Me dirijo a ustedes para solicitar dicho apoyo para nuestra comunidad y prevenir accidentes mortales o otras situaciones a lamentar.

Muchas Gracias por escuchar por testimonio."

ATTACHMENT G

'Safe Streets' Testimony from CASA Member Ex. 6 Personal Privacy (PP)

"Hello, my name is Ex. 6 Personal Privacy (PP) Ex. 6 Personal Privacy (PP) I became an active member of CASA a year ago and now I am supporting and enforcing my community with the Safe Streets campaign.

I am a mother of 2 children and awaiting the arrival of my third child. I work in the cleaning industry and for me and my family, it is worrisome that the area of Route 7 where we regularly travel to our work, to do our shopping, laundry, and the restaurants, have become more dangerous due to the lack of road, pedestrian and cyclist signage. Our community has suffered the ravages of the high speed and lack of visibility of the area and I am especially concerned that there are still cases of crashes that unfortunately have already claimed human losses. We no longer want that for the community, at least we need to reduce those types of incidents.

That is why I am here as a mother of a family, representative of the community that circulates this area every day and in the condition that I find myself of during my Gestation/pregnancy, I raise my voice and ask Fairfax County officials to take the lead and work for our community as if properly illuminating the roads, putting automated lights, speed reducers, marked signaling for pedestrians.

Thank you for hearing my testimony."

OMB Number: 2030-0020
Expiration Date: 06/30/2024

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Centro de Apoyo Familiar

Address: 6801 Kenilworth Ave, Suite 110

City: Riverdale

State: MD: Maryland Zip Code: 20737-1331

B. Unique Entity Identifier (UEI): FWM5H88B7455

C. Applicant/Recipient Point of Contact

Name: Walkiria Pool

Phone: Ex. 6 - Personal Privacy (PP)

Email: wpool@mycaf.org

Title: President

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

Na

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII.	**Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)**	☒ Yes	☐ No
	a. Do the methods of notice accommodate those with impaired vision or hearing?	☒ Yes	☐ No
	b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?	☒ Yes	☐ No
	c. Does the notice identify a designated civil rights coordinator?	☐ Yes	☒ No
VIII.	**Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))**	☒ Yes	☐ No
IX.	**Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))**	☒ Yes	☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
walkiria pool	President	04/13/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

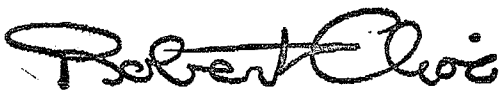
No

Dear Applicant:

We are pleased to inform you that upon review of your application for tax exempt status we have determined that you are exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Contributions to you are deductible under section 170 of the Code. You are also qualified to receive tax deductible bequests, devises, transfers or gifts under section 2055, 2106 or 2522 of the Code. Because this letter could help resolve any questions regarding your exempt status, you should keep it in your permanent records.

Organizations exempt under section 501(c)(3) of the Code are further classified as either public charities or private foundations. During your advance ruling period, you will be treated as a public charity. Your advance ruling period begins with the effective date of your exemption and ends with advance ruling ending date shown in the heading of the letter.



Shortly before the end of your advance ruling period, we will send you Form 8734, Support Schedule for Advance Ruling Period. You will have 90 days after the end of your advance ruling period to return the completed form. We will then notify you, in writing, about your public charity status.

Please see enclosed Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, for some helpful information about your responsibilities as an exempt organization.

Letter 1045 (DO/CG)

Letter 1045 (DO/CG)

Part X Public Charity Status *(Continued)*

e 509(a)(4)—an organization organized and operated exclusively for testing for public safety. ☐

f 509(a)(1) and 170(b)(1)(A)(iv)—an organization operated for the benefit of a college or university that is owned or operated by a governmental unit. ☐

g 509(a)(1) and 170(b)(1)(A)(vi)—an organization that receives a substantial part of its financial support in the form of contributions from publicly supported organizations, from a governmental unit, or from the general public. ☑

h 509(a)(2)—an organization that normally receives not more than one-third of its financial support from gross **investment income** and receives more than one-third of its financial support from contributions, membership fees, and gross receipts from activities related to its exempt functions (subject to certain exceptions). ☐

i A publicly supported organization, but unsure if it is described in 5g or 5h. The organization would like the IRS to decide the correct status. ☐

6 If you checked box g, h, or i in question 5 above, you must request either an **advance** or a **definitive ruling** by selecting one of the boxes below. Refer to the instructions to determine which type of ruling you are eligible to receive.

a **Request for Advance Ruling:** By checking this box and signing the consent, pursuant to section 6501(c)(4) of the Code you request an advance ruling and agree to extend the statute of limitations on the assessment of excise tax under section 4940 of the Code. The tax will apply only if you do not establish public support status at the end of the 5-year advance ruling period. The assessment period will be extended for the 5 advance ruling years to 8 years, 4 months, and 15 days beyond the end of the first year. You have the right to refuse or limit the extension to a mutually agreed-upon period of time or issue(s). Publication 1035, *Extending the Tax Assessment Period,* provides a more detailed explanation of your rights and the consequences of the choices you make. You may obtain Publication 1035 free of charge from the IRS web site at *www.irs.gov* or by calling toll-free [Ex. 6 - Personal Privacy (PP)] Signing this consent will not deprive you of any appeal rights to which you would otherwise be entitled. If you decide not to extend the statute of limitations, you are not eligible for an advance ruling. ☑

Consent Fixing Period of Limitations Upon Assessment of Tax Under Section 4940 of the Internal Revenue Code

b **Request for Definitive Ruling:** Check this box if you have completed one tax year of at least 8 full months and you are requesting a definitive ruling. To confirm your public support status, answer line 6b(i) if you checked box g in line 5 above. Answer line 6b(ii) if you checked box h in line 5 above. If you checked box i in line 5 above, answer both lines 6b(i) and (ii). ☐

(i) (a) Enter 2% of line 8, column (e) on Part IX-A. Statement of Revenues and Expenses. _____

(b) Attach a list showing the name and amount contributed by each person, company, or organization whose gifts totaled more than the 2% amount. If the answer is "None," check this box. ☑

(ii) (a) For each year amounts are included on lines 1, 2, and 9 of Part IX-A. Statement of Revenues and Expenses, attach a list showing the name of and amount received from each **disqualified person.** If the answer is "None," check this box. ☑

(b) For each year amounts are included on line 9 of Part IX-A. Statement of Revenues and Expenses, attach a list showing the name of and amount received from each payer, other than a disqualified person, whose payments were more than the larger of (1) 1% of line 10, Part IX-A. Statement of Revenues and Expenses, or (2) $5,000. If the answer is "None," check this box. ☑

7 Did you receive any unusual grants during any of the years shown on Part IX-A. Statement of Revenues and Expenses? If "Yes," attach a list including the name of the contributor, the date and amount of the grant, a brief description of the grant, and explain why it is unusual. ☐ Yes ☑ No

Mr. Jacob Burney
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
Washington, D.C.

Dear Mr. Burney,

My name is Dr. Sacoby Wilson. I am a Professor and Director of the Center for Community Engagement, Environmental Justice, and Health (CEEJH). CEEJH was founded in 2011 as a laboratory and relaunched in 2021 as a Center to assist frontline and fenceline communities impacted by environmental, climate, and energy justice issues through technical assistance, scientific support, and use of community-engaged research approaches including the community-based participatory research (CBPR) framework and community science. CEEJH has been working throughout the Mid-Atlantic for over a decade with community-based organizations including Centro de Apoyo Familiar (CAF). I also co-founded the Mid-Atlantic Environmental Justice Coalition (MAJC) with Namati which focuses on bringing frontline and fenceline communities together to develop a regional agenda to address environmental, climate, and energy justice concerns in the Mid-Atlantic. CAF is a member of MAJC, and Walkiria Pool, CAF Director, is the Co-Chair of the Maryland EJ Coalition.

Recently, CEEJH received a grant from the Robert Wood Johnson Foundation (RWJF) to launch the Mid-Atlantic Climate Action Hub (MATCH) whose goal is to provide technical assistance to communities impacted by environmental and climate justice issues. We have engaged community-based organizations in Prince George's County, Virginia, Eastern Shore/Southern Delaware, Philadelphia, and Baltimore to act as hubs for MATCH. CAF is a community hub for MATCH. Additionally, I am co-Director of the recently funded Thriving Communities Technical Assistance Center (TCTAC)(National Wildlife Federation is the lead and the UMD EFC is a core partner) for Region III. Through this TCTAC, we are using the same hub structure for MATCH. Through this TCTAC, we will provide technical assistance to communities impacted by environmental and energy justice issues to help them build their capacity to address their local concerns. The technical assistance will include providing grantwriting assistance.

Additionally, with Namati (lead organization), I am helping to develop and implement the Mid-Atlantic Environmental Justice Academy which was funded through an EPA Collaborative Problem-Solving Grant. Through this funding, we will be training members of impacted communities and other stakeholders to develop their skills to address their local environmental justice concerns. Furthermore, through funding from Meta, I have launched the Climate Justice Fellows Program, a sister program to the Mid-Atlantic EJ Academy, to train residents and other stakeholders on climate justice, equity, and health issues. Participants are required to complete a Capstone project as a way to provide direct support to a community experiencing climate justice, equity, and/or health issues.

I am writing mainly to express CEEJH's commitment to the CPS Model proposal developed by CAF entitled "Developing a National Model for the training of Environmental Community Operative

Promoters (ECO-promoters) for multi-generational, culturally competent, environmental health workers to bridge the gap between Hispanics and Environmental Health".

In the last twenty years, CAF has recruited and trained over two hundred Hispanic and Black "promotoras" (community health workers) from the more than 200 faith-based communities with whom they have active and vibrant relationships. The ECO-promoters program that CAF is proposing will build on the tremendous success it has already had in developing culturally competent, multi-generational "promotoras".

With offices in Prince Georges' County, Maryland, Washington, DC, Arlington, Virginia, and Lawrence, Massachusetts CAF is truly capable of developing, beta testing and "rolling-out" a bilingual national program like the one they describe in their proposal.

CEEJH is ready to contribute to the ECO-promoters' training curriculum throughout the three years of grant funding by offering the following workshops/ trainings:

1. **Intro to Environmental Justice –** Future ECO-promoters will learn how to define environmental justice, trace the history of environmental justice and examine how it interconnects with other social and environmental issues.
2. **Climate Justice & Climate Science –** Future ECO-promoters will learn about the basics of climate science, how to define climate justice while understanding the use of climate justice to examine the disproportionate impacts of climate change and discover how Marylanders are and will be impacted by climate change.
3. **Environmental Health Impacts-** Future ECO-promoters will learn how to define environmental health and explore environmental health basics and analyze disproportionate environmental health impacts in Maryland.
4. **Mapping Tools -** Future ECO-promoters will learn how mapping tools are created and their relevant uses, learn the basic tools and operations of MD EJSCREEN and EPA EJScreen and learn how to use the mapping tools to examine a climate justice issue where they live in Maryland.
5. **Community Capacity-Building -** Future ECO-promoters will learn about stakeholder engagement, the best practices for building partnerships and how to incorporate strategies for organizing and mobilizing the public.
6. **Community Science & Conducting Community-led Climate Change Inquiry -** Future ECO-promoters will learn how to define Community Science & Citizen Science and learn how to explore a variety of different community science tools such as hyper-local air quality monitoring, Photovoice and Block Assessments.
7. **Green & Natural Infrastructure** - Future ECO-promoters will learn about salutogenic features and strategies to mitigate extreme heat, flooding, & pollution, and use mapping and community science tools, such as Photovoice & park equity mapper to find gaps in access to green and natural infrastructure.

The proposal that CAF leadership is putting forth has the potential to be transformative at the regional, state and national levels. It is a program that can easily be expanded to encompass not only Hispanic communities but all types of communities everywhere throughout the nation.

As a designated environmental justice and climate action hub, future impact of the Region III TCTAC, and close collaboration with the Mid-Atlantic Environmental Justice Coalition, we feel we are particularly well suited to serve as a partner in the work of this proposed project. I personally have almost 25 years of experience using the EPA Collaborative Problem-Solving Model dating back to my

contribution to the efforts of the West End Revitalization Association to address the lack of basic amenities and the planned expansion of the 119 Bypass in the late 90s. I have integrated the CPS Model into all of my community-engaged research, scholarship, and practice since then. Should EPA have any questions about the outlined commitments, please reach out via the contact information noted below.

Sincerely,

Dr. Sacoby Wilson, Professor and Director

CASA DE RESTAURACION HISPANA CRISTIANA (CRHC)
6831 3rd Street Lanham MD 20706

April 13, 2023

Mr. Jacob Burney
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
Washington, D.C.

Dear Mr. Burney,

CASA DE RESTAURACION HISPANA CRISTIANA (CRHC) is pleased to provide this letter of commitment to support Centro de Apoyo Familiar (CAF) with its ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS) COOPERATIVE AGREEMENT PROGRAM. We are honored to be a partner for its Environmental Community Operative Promotora (ECO Promotoras) - A National Model for multi-generational, culturally competent environmental health workers to bridge the gap between Hispanics and Environmental Health

CASA DE RESTAURACION HISPANA CRISTIANA (CRHC) or House of Restauration, is a local non-profit organization based in Prince Georges County Maryland. CRHC was founded 25 years with its mission to help homeless men recover from substance abuse disorder and relearn how to become responsible and independent members of society. CAF has partnered with CRHC for over 8 years to educate program participants on environmental health issues, integrating our organization into the climate change arena, and turning participants into full-fledged community organizers to fight for greater equity in the climate change and environmental justice conversations. In addition, CAF has provided us with access to healthy food, and other major services such workforce development, financial literacy education, and access to affordable housing. CRHC has been a member of CAF's Connector Network for over 8 years. CAF's Connector is a network of over 200 faith based and community organizations that provides Capacity building and leadership support and outreach in the community.

This letter affirms our support for Centro de Apoyo Familiar (CAF) to do the following:

- Assist CAF with recruiting community promotoras.
- Help participating promoters develop a stronger inner self that is resilient, reflective and able to develop positive connections in the community.
- Provide venue settings for in- person instruction for hand on experiences and via Zoom with the instructor(s) teaching.

This program with add valuable opportunities to extend the support and strengthen Latinos in Prince Georges County.

If you need additional information or have any questions please do not hesitate to call me at Ex. 6 - Personal Privacy (PP)

Sincerely,

CASA DE RESTAURACION HISPANA CRISTIANA (CRHC)

Mr. Jacob Burney
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
Washington, D.C.

Dear Mr. Burney,

I am writing this letter to commit the support of Centro de Apoyo Familiar (CAF) ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS) COOPERATIVE AGREEMENT PROGRAM. We are pleased to provide this letter of commitment to support Centro de Apoyo Familiar (CAF) with its ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS) COOPERATIVE AGREEMENT PROGRAM. We are honored to be a partner for its Environmental Community Operative Promotora (ECO Promotoras) - A National Model for multi-generational, culturally competent environmental health workers to bridge the gap between Hispanics and Environmental Health.

Tabernaculo de Adoracion is a faith-based organization serving Latinos in the Northern Virginia area for the past 10 years and has been a member of CAF's Connector Network for over 10 years. CAF's Connector is a network of over 200 faith based and community organizations that provides capacity building and leadership support and outreach in the community. Tabernaculo de Adoracion will serve the community as a humanitarian agency of compassion and charity. We are involved in our community and provide support and outreach services to all community members.

This letter affirms our support for Centro de Apoyo Familiar (CAF) to do the following:

• Assist CAF with recruiting community promotoras.

• Help participating promoters develop a stronger inner self that is resilient, reflective and able to develop positive connections in the community.
• Provide venue settings for in- person instruction for hand on experiences and via Zoom with the instructor(s) teaching.

This program with add valuable opportunities to extend the support and strengthen Latinos in Northern Virginia.

We look forward to working with CAF in this new opportunity.

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☒ Yes ☐ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

NA

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☒ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

NA

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

NA

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Taxpayer:

This is in response to your request of Dec. 11, 2008, regarding your tax-exempt status.

Our records indicate that a determination letter was issued in November 2001, that recognized you as exempt from Federal income tax, and discloses that you are currently exempt under section 501(c)(3) of the Internal Revenue Code.

Our records also indicate you are a private foundation described under section 509(a) of the Code.

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

If you have any questions, please call us at the telephone number shown in the heading of this letter.

Sincerely yours,

Michele M. Sullivan

RE: Letter of Support

Dear Mrs. Dryden:

I am writing to express support for Community Housing & Empowerment Connections Inc.(CHEC) and the Delaware Environmental Justice Community Partnership application to the USEPA Grant program to build a collaborative Community-led Air Monitoring Network in Rural Communities in Southern Delaware that uses a collaborative problem solving process and attains the scientific rigor required for research, while also achieving benefits that overburdened and underserved communities residents seek. Additionally, this project will enhance the Connecting Black, Indigenous and People of Color to Clean Energy Opportunities program, by creating jobs for residents who are often left out.

Minority Workforce Development Coalition prides itself with working side by side with CHEC and others for many years to ensure that low-income communities are included in employment and economic opportunities that are science-based and clean.

We look forward to continued collaboration with CHEC and expanding environmental justice throughout the state of Delaware.

If additional information is required, please feel free to contact me at Ex. 6 - Personal Privacy (PP) or email, [HYPERLINK Ex. 6 - Personal Privacy (PP)].

Sincerely,

Kenneth Dryden
Chair
Minority Workforce Development Coalition

EDUCATION/TRAINING *(Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable. Add/delete rows as necessary.)*

INSTITUTION AND LOCATION	DEGREE *(if applicable)*	Completion Date MM/YYYY	FIELD OF STUDY
Delaware State University, Dover DE.	B.A.	05/1979	Business Administration
Certified Prevention Specialist, DSAMH Newark, DE		11/2011	Substance Abuse Prevention
Certified FAST Trainer		02/1999	
Licensed Prevention Provider, DSAMH		07/2004	
Certified Life Skills Training Instructor		07/2004	

A. Personal Statement

I embrace the opportunity to serve as Project Manager and Lead Agency for the proposed *Community - led Collaborative Air Monitoring Network in Rural Communities in Southern Delaware* under EPA Grant program. I am currently the executive director of Community Housing & Empowerment Connections Inc. and former executive director of the New Castle County Community Partnership, both combined for a total of thirty plus years of experience in the environmental and social justice field. I have an extensive background in community partnerships, capacity and coalition building that led to the development of 10 neighborhood coalitions (Edgemoor, Southbridge, Northeast Wilmington, Westside Wilmington, New Castle, Newark, Middletown/Odessa/Townsend and Route 40 Corridor), 2 countywide coalitions (Wilmington Prevention Coalition and New Castle Prevention Coalition) and 2 statewide community partnerships (Delaware Environmental Justice Community Partnership and Delaware Concerned Residents for EJ recently served as Community Co-PI for a ACCEL Retreat grant and previous PI for a federal Center for Substance Abuse Prevention (CSAP) grant to build a bi-level substance abuse prevention infrastructure statewide. I managed the implementation of a federal CSAP Drug Free Communities Grant and Community Coalition Grant Program to implement a nationally recognized substance abuse prevention program (FAST) in two neighborhood coalitions in New Castle County, DE.). Recently, led implementation of a pilot Partnership 4 Air Quality with partners at Christiana Care Health Services and an EPA funded *Community-led Air Quality Monitoring Network in New Castle County* with John Hopkins University. I possess the necessary leadership, expertise and training to successfully achieve the aims outlined in the proposed project.

B. Positions and Honors

1986 – 2008 Executive Director, New Castle County Community Partnership Inc.
2001 – Present Executive Director, Community Housing & Empowerment Connections Inc.
2018 – Present Chair, Delaware Environmental Justice Community Partnership
2019 – Present Chair, Delaware Concerned Residents for Environmental Justice
2019 – Present Member, Delaware State NAACP Health Committee

C. Contributions to Science

- Community Co-PI for Delaware CRT ACCEL Retreat *Health Impacts of Toxic Pollution: Developing Community Engaged Research* to bring community and researchers together for discussion and development of ideas and partnerships.

- Co-author of *the Environmental Justice for Delaware-Mitigating Toxic Pollution in New Castle County Communities* report (2017) with Union of Concerned Scientists, Environmental Justice Health Alliance, Delaware Concerned Residents for EJ, Coming Clean and Community Housing & Empowerment Connections Inc. This report studies the health risks for seven communities located along an industrial corridor in the northern portion of Delaware's New Castle County. These communities have higher percentages of people of color and/or higher poverty levels than the Delaware average. We found that people in the seven communities face a substantial cumulative health risk from exposure to toxic air pollution and their proximity to polluting industrial facilities, hazardous chemical facilities, and contaminated waste sites. These health risks are substantially greater in comparison to those of a predominantly White and affluent Delaware community as well as Delaware as a whole. Significant and expedited improvements in regulatory and public policy are needed at the national, state, and municipal levels to address these issues.

- Findings from the EJ report influenced Resolution 19-065 sponsored by City of Wilmington City Council Resolution to urge DNREC to consider Cumulative Impacts on environmental justice communities and health risks when issuing construction permits to industrial facilities that impact air quality.

D. Additional Information: Research Support and/or Scholastic Performance

- Presenter at the Earthjustice Hearing in Washington DC
- Testify before the U.S. Environmental Protection Agency Administrators to prevent roll backs of Regulations that protect communities against chemical disasters.
- Testify before the National Environmental Justice Advisory Council to protect against roll backs.
- Member of ACCEL CEO Community Advisory Council
- Member of the State NAACP Health Committee
- Former Member of Delaware Prevention Coalition
- Former Chair of Wilmington Prevention Coalition
- Former Member of Community Anti-Drug Coalition of America-CADCA
- Former Member of Delaware SPF-SIG Advisory Council
- Former Member of Weed and Seed Advisory Council
- Former Member of Delaware Criminal Justice Advisory Council

Building Community Power on the Frontlines

CHECinc

Community Housing and Empowerment Connections Inc.

Mission:
It is the mission of the Community Housing and Empowerment Connections Inc. (CHEC) to build, safe, healthy and strong communities through advocacy, education, empowerment and community partnerships.

Description:
Community Housing and Empowerment Connections Inc. is a community-based non-profit organization specializing in community organizing, advocacy, education and outreach. We are the black-led constituency that we serve. We have a trained staff of volunteers who have years of experience working with low-income communities of color to address social and environmental justice issues such as substance abuse, climate and environmental injustices. CHEC co-authored the *EJ for Delaware Report (2017)*; led the development of several coalitions that include: the Wilmington Prevention Coalition, the New Castle Prevention Coalition, Delaware Concerned Residents for EJ @CHEC and the Delaware Environmental Justice Community Partnerships. CHEC currently leads the first of its kind, Community Air Quality Monitoring Network and Advancing EJ Through Offshore Wind projects to address the needs of low-come, Black communities in Delaware.

History:
CHEC was established in 2001. It is an outgrowth of the New Castle County Community Partnership Inc a leader in prevention in 1990. CHEC and its partners saw their community slowly decline, due to social and environmental injustices. A decision was made to do something about it by joining forces with local, county, state and federal agencies, as well as other community and faith-based agencies to provide the necessary guidance and resources for change. Since its inception, CHEC has operated with local funding, committed volunteers and in-kind resources.

Our Partners:
We partner with the State NAACP-Health Committee, Delaware Concerned Residents for Environmental Justice @CHEC, Southern Delaware Alliance 4 Racial Justice, Minority Workforce Development Coalition and Clean Air Council. Our allies include: New Castle County, Christiana Care, ACCEL-DE, Building Equity & Alignment, Dream.org/GFA, Climate Justice Alliance, National Black EJ Network and many other neighborhood businesses and organizations.

DELAWARE CONCERNED RESIDENTS FOR ENVIRONMENTAL JUSTICE

April 10, 2023

Octavia Dryden
Executive Director
CHEC Inc.
Ex. 6 Personal Privacy (PP)
Bear, DE 19701

LETTER OF SUPPORT

Dear Ms. Dryden:

The Delaware Concerned Residents for Environmental Justice @CHEC (DCR4EJ) provides this letter of support to Community Housing and Empowerment Connections Inc. and its partners in pursuit of an USEPA Environmental Justice Collaborative Problem-Solving Cooperative Agreement program to implement the *Community-Led Collaborative Air Quality Monitoring Network in Rural Communities in Southern Delaware.*

The DCR4EJ @CHEC mission is to empower and inform people of the fundamental rights to clean air, water, land and food. Our group comprised of residents living in close proximity to environmental hazard have identified community air monitoring as central to environmental just. Therefore, we will designate a representative to serve on the Community Steering Committee, assist with recruiting other residents to participate in activities relative to the proposed project. DCR4EJ will promote the project through its environmental justice and community networks.

We highly recommend support for the proposed *Community-led Air Quality Monitoring in Rural Communities in Southern Delaware* project that uses a collaborative, community engaged process to develop a community-led air monitoring network and attains the scientific rigor required for research, while also achieving community priorities. This project will greatly benefit overburdened communities in southern Delaware to better understand and participate in air quality planning in their neighborhood.

Sincerely,

Amber Edwards

Amber Edwards

Member,
DCR4EJ

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Cribs for Kids, Inc.

Address: 5450 2nd Avenue

City: Pittsburgh

State: PA: Pennsylvania Zip Code: 15207

B. Unique Entity Identifier (UEI): UDNCWGQECYG8

C. Applicant/Recipient Point of Contact

Name: Bridget Gaussa

Phone: Ex. 6 Personal Privacy (PP)

Email: bgaussa@cribsforkids.org

Title: Chief Operations Officer

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

None

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

None

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95) ☒ Yes ☐ No

a. Do the methods of notice accommodate those with impaired vision or hearing? ☒ Yes ☐ No

b. Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications? ☒ Yes ☐ No

c. Does the notice identify a designated civil rights coordinator? ☐ Yes ☒ No

VIII. Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a)) ☒ Yes ☐ No

IX. Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974)) ☒ Yes ☐ No

X. If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.

Bridget Gaussa, COO, 5450 2nd Avenue, Pittsburgh, PA 15221 | bgaussa@cribsforkids.org | Ex. 6 Personal Privacy (PP) x

XI. If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.

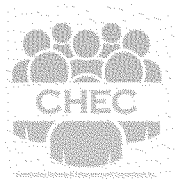
For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

A. Signature of Authorized Official	B. Title of Authorized Official	C. Date
Judith A Bannon	Chief Executive Officer	04/13/2023

For the U.S. Environmental Protection Agency



I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

ENVIRONMENTAL JUSTICE COLLABORATIVE PROBLEM-SOLVING (EJCPS)
COOPERATIVE AGREEMENT PROGRAM
RFA NUMBER: EPA-R-OEJECR-OCS-23-01

1.0 PROGRAM OBJECTIVES:

a. **Project Summary Page**:

- Project Title: Community-led Collaborative to Expand Air Quality Monitoring in Rural Communities in Southern Delaware
- Project Location: Southern Delaware Rural communities:
  Carlyle Village, Magnolia, Capital Park (Kent County)
  Bridgeville, Blades, and Rehobeth (Sussex County)
- Applicant Information: Community Housing & Empowerment Connections Inc. (CHEC)

Address: Ex. 6 Personal Privacy (PP) Bear, DE 19701
Primary Contact: Octavia Dryden,
Phone Number: Ex. 6 Personal Privacy (PP)
Email address: [HYPERLINK Ex. 6 - Personal Privacy (PP)]
Duns Number: 826231800 UEI# D5KJLNHA9K

- Brief Description of Applicant Organization: CHEC is a community-based nonprofit organization led by Black Women from the communities that they serve to address social, climate and environmental injustices through education, advocacy, and partnerships.
- Are you applying for the Small CBO Set Aside Track for $150,000 projects? **No**
- Project Abstract: This project aims to utilize the Environmental Justice Collaborative Problem-Solving Model to engage multi-stakeholders and expand a community air quality monitoring network, that achieves community priorities while supporting research, public policy and improved health outcomes, in rural communities in Southern Delaware.

- Project Types: Education and Monitoring
- Special Considerations: Underserved Rural Area Communities
- Environmental Issue: Air Quality
- Project Partner(s): Delaware Concerned Residents 4 EJ, Minority Workforce Development Coalition and John Hopkins University
- Will you need to develop a QAPP for your project? **Yes**

ED_016126_00001443-00001

b. Environmental and Public Health information of the Underserved Community

Southern Delaware is comprised of two counties, Kent and Sussex which are heavily rural community areas: Kent County is located in the central part of the state of Delaware. As of the 2010 census, the population was 162,310, making it the least populous county in Delaware. Rural area: 85.9% (504 square miles). The county seat is Dover, the state capital of Delaware. It is named for Kent, an English county. Wikipedia Area: 798 mi² Founded: 1683 Population: 184,149 (2021). Sussex County is located in the southern part of the U.S. state of Delaware, on the Delmarva Peninsula. As of the 2020 census, the population was 237,378. Rural area: 87.7% (821 square miles). The County seat is Georgetown, Wikipedia Area: 1,196 mi² and population is 247,527 (2021). Unemployment rate: 3.9% (Aug 2022)

Environmental quality, including air quality, is an important social determinant of health in many of these rural area communities. Exposure to air pollution is associated with multiple adverse health effects including increase risks of respiratory illness, hypertension, cardiovascular disease, cancer, pre-term birth and, most recently, increased mortality risk associated with the pandemic. Low-income, Black, people of color, children, the elderly, pregnant women, and those with existing health conditions are especially vulnerable to air pollution and its adverse health impacts. Nonetheless many of the communities identified in this project are chronically exposed to poor air quality.

c. Organization's Historical Connection to Underserved Community –

Community Housing & Empowerment Connections Inc. has more than thirty years of experience leading projects in EJ and rural communities in Delaware, both personally and professionally, therefore is authorized to lead the proposed project. CHEC is a community-based nonprofit established in 2001 to build, safe, healthy and strong communities through advocacy, education, empowerment and community partnerships. We are the constituency that we serve. CHEC currently leads the EPA funded Community-engaged Air Monitoring Network in New Castle County, DE; has developed and implemented national evidence-based prevention programs in Kent and Sussex County communities; led the development of several coalitions that include: the Wilmington Prevention Coalition, the New Castle Prevention Coalition, Delaware Concerned Residents for EJ and currently chair the Delaware Environmental Justice Community Partnership. Co-authored the *Environmental Justice for Delaware: Mitigating Toxic Pollution in New Castle County Communities* report in 2017.
(SEE Mandatory Other Attachments: IRS Letter)
(SEE Optional Other Attachments: CHEC Description, DEJCP Partnership Factsheet and

d. EJCPS Model

The proposed project will enhance the existing Community-led Air Quality Monitoring Network (CAMN) and Steering Committee by utilizing elements of the *Environmental Justice*

Collaborative Problem-Solving Model (CPS) for partnership building to address multi-stakeholder interests and concerns related to environmental justice, air quality monitoring and public health issues in distressed rural communities in Southern Delaware.
CHEC and its partners will use the CPS Model as part of its ongoing commitment to ensure environmental justice for all communities, including low-income and/or minority communities. Ensuring environmental justice means not only protecting human health and the environment for everyone, but also ensuring that all people are treated fairly and given the opportunity to participate meaningfully in the development, implementation, and enforcement of environmental laws, regulations, and policies in Delaware.

Environmental pollution and/or public health issues arise too often in urban, rural, and tribal communities that are environmentally, economically, and socially distressed. Situations where community residents are exposed disproportionately to environmental harms and risks require the application of science (both physical and social), environmental and civil rights law, public policy, urban planning, and other academic disciplines pertaining to community health, community development, natural resource management, and dispute resolution. These situations, more often than not, fall outside of the regulatory or programmatic responsibilities of any single governmental agency. It is virtually impossible for any single organization, institution, or sector of society, no matter how large or well established, to adequately address the environmental and/or public health problems experienced by communities.

Collaborative problem-solving, in the context of environmental justice, involves proactive, strategic, and visionary community-based processes that bring together multiple parties from various stakeholder groups from Kent and Sussex Counties (e.g., community groups, all levels of government, industry, and academia) to develop solutions to address local environmental and/or public health issues. Partnerships and negotiations are required to achieve such a goal. Partnerships refer to arrangements by which different stakeholders work together to achieve a common goal. These partnerships can range from informal working relationships to very structured arrangements in which goals, membership, ground rules, and operating principles are clearly defined. Negotiations refer to processes, ranging from informal to formal, by which different stakeholders, such as residents and government stakeholders agree to come together and resolve disagreements.

The CPS provides seven elements: that are cross-cutting and interdependent and will serve the proposed project in a proactive, strategic, and iterative manner:

CPS Element 1 - Issue Identification, Community Vision, and Strategic Goal Setting

Residents from these rural communities will serve on the existing CAMN Steering Committee to build upon existing leadership and experience. The Collaborative problem-solving process will allow them to move beyond identifying environmental and/or public health problems to formulating viable strategies to address and resolve them. This goal will be realized by: 1) creating a vision that articulates the desired outcomes to be achieved, and 2) developing a strategy that identifies the actions needed to produce such results. In a visioning process, the participants will think about what they want their community to eventually look like. In essence, the community visualizes what their own version of a healthy and sustainable community might be. Focus groups,

ED_016126_00001443-00003

leadership forums, retreats, and planning charettes will be used to accomplish this process. The visioning process helps to establish the community's goals. They serve as the basis for subsequent planning and action. Ideally, the vision will reflect the aspirations of the whole community rather than a small group of individuals.

CPS Element 2 - Community Capacity-Building and Leadership Development

This project will hire two Community EJ Coordinators from identified rural communities to build capacity of CHEC and the Steering Committee and implement the activities of the project as well as provide interested parties such as other residents with the leadership skills, information, and resources they need to achieve their own goals. Once all stakeholders are identified, and an environmental and/or public health concern is identified, it must: Educate itself about the issue; Gather appropriate information about the issue; Conduct assessments regarding the causes of and potential solutions to the problem; Identify and mobilize persons and organizations who can provide technical assistance; Educate residents about the problem and involve them in formulating solutions and strategies.

CPS Element 3 - Consensus Building and Dispute Resolution

This project will utilize the existing consensus used on the New Castle County project to resolve conflict. Conflict assessments are structured analyses that will be used to make informed decisions prior to and/or during consensus building and dispute resolution processes. While assessing the conflict, disagreements about facts or the interpretation of data may arise in virtually all situations involving disproportionate environmental and/or public health issues. When such disagreements occur, the stakeholders can jointly choose to use an expert or team of experts to conduct fact-finding in a neutral manner. Another key component when coming to consensus is to factor in contingency conditions that ensure agreements are implemented or enforced. Such conditions can provide for monitoring of the agreement or can trigger certain activities to occur if certain circumstances arise.

CPS Element 4 - Multi-Stakeholder Partnerships and Leveraging of Resources

The CAMN Steering Committee, consisting of entities representing different sectors of society (e.g., community, government, business and industry, academia) enable these entities to access needed resources. In this situation where community residents are adversely and disproportionately exposed to environmental harms and risks, the various stakeholder groups might require different kinds of assistance to ensure their effective participation in a collaborative problem-solving process. For example, community groups might need support in accessing government resources, while industry might need education on how to work effectively and proactively with communities. Well-designed partnerships are important vehicles for mobilizing the needed resources— human, institutional, technical, legal, and financial—to address a problem.

CPS Element 5 - Constructive Engagement by Relevant Stakeholders

ED_016126_00001443-00004

The project team understand that relevant noncommunity stakeholder groups and agencies can play an important role in participating and assisting in the collaborative partnership. The possible roles that each of these stakeholder groups will play are outlined below. Government agencies at the federal and state level will play many roles in collaborative problem-solving efforts. They can: 1) act as a convener or facilitator, 2) provide technical assistance, information, and organizational capacity, 3) assist in coordination and communications, 4) provide financial resources or services, 5) enforce applicable provisions of laws or regulations, 6) focus attention on a problem, and/or 7) provide legitimacy to an effort. Government agencies also help ensure that all relevant stakeholders come to the table.

CPS Element 6 - Sound Management and Implementation

CHEC and residents from underserved communities are driving the project therefore, addressing management and implementation issues will takes place early in the collaborative problem-solving process. CHEC will make every effort to ensure continuing cooperation among different parties, maintaining partnership focus and momentum, and keeping key decisionmakers involved. Equally important considerations are the community-based organization's: 1) decisions about the issues it chooses to address, 2) strategies it seeks to pursue, and 3) collaborations it forms. To the extent possible, the organization will think carefully through these questions as part of its initial goal setting and strategic planning process, not as an afterthought.

CPS Element 7 - Evaluation, Lessons Learned, and Replication of Best Practices

The evaluation of the proposed project will be more than an information-gathering activity. A quality assurance project plan will be developed and the results will be shared with all interested stakeholders and used for meaningful impact on decision-making. The project partners may utilize evaluations to make informed decisions to improve project performance. Lessons learned are significant conclusions regarding activities and outcomes, both positive and negative, which will have an impact on the project. Best practices refer to specific actions taken that helped make the project successful. Lessons learned will be shared with other community groups and interested stakeholders, so they can replicate best practices in their own efforts to address similar issues. Evaluation results are important elements in the overall process of analysis and feedback. The benefits extend beyond a specific project. They can be used to expand and enhance ongoing and future program performance.

In order to ensure meaningful community participation, the first step will build upon an existing community partnership and engagement structure to guide the project. Community Housing & Empowerment Connections Inc., a community-based nonprofit organization will serve as the lead agency, CHEC primary role will be to manage the project initiation and provide a strong community foundation. Our current grant from EPA to implement an air monitoring project in New Castle County has set the foundation for CHEC and its partners to hit the ground running with expanding a community-led air monitoring network in rural communities in Southern Delaware. The existing Community Steering Committee (CSC)—consisting of concerned residents, local advocates, and youth will contribute additional guidance, participation, and

ED_016126_00001443-00005

decision-making in key activities throughout this project. A broader group of residents in Southern Delaware will be convened to contribute their community-specific knowledge and perspectives to the project, including the site selection process. Other stakeholders will continue to be engaged through a technical advisory process, comprised of air monitoring experts from the local regulatory agency, the DNREC, the US EPA, and other local government agencies. More in-depth technical guidance and quality assurance will be provided by consultants at John Hopkins University and Clarity.

Meaningful community engagement is central to all steps of developing a collaborative Community Air Monitoring Network. Under the proposed project, Community residents and other stakeholders will serve on the Steering Committee making decisions, on project design and hosting monitors to selection of priority communities.

Our project community-engaged process is illustrated in the accompanying graphic
(SEE Optional Other Attachments: Steps of EJCPS Model).

e. Project Linkages

The proposed project aligns with the Justice 40 Initiative as well as with the EPA Draft FY 2022-2026 EPA Strategic Plan –Goal 2: Take Decisive Action to Advance Environmental Justice and Civil Rights, Objective 2.1: Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels by Building Community Capacity and Climate Resilience and Maximizing Benefits to Overburdened and Underserved Communities and improving air quality in rural communities in Southern Delaware.

f. Partner and Collaborate

Peter DeCarlo PhD, associate professor at John Hopkins University (JHU) will serve as a consultant to assist and advise the project team on the Quality Assurance Plan to collect and analyze data. He will also assist with evaluation of project performance and report on activities of project. Clarity a team of air quality experts will assist with measurement, software and data collection.

In addition to our main partner at JHU, the CAMN Steering Committee will include: community residents, neighborhood business and organizations, Christiana Care Health Services, Division of Public Health, the State NAACP-Health Committee, Delaware Concerned Residents for Environmental Justice@CHEC, Let the Truth Be Told Newsletter, Minority Workforce Development Coalition and Clean Air Council. Our allies include: state agencies, New Castle County, DE Natural Resources for Environmental Control, ACCEL-CTR Delaware and national partners: Building Equity & Alignment, Dream.org/Green for All, Climate Justice Alliance and many others.

2.0 Project Activities/Milestone Schedule/Detailed Budget Narrative

a. Project Activities:

Air pollution continues to be a national public health threat, and the expanding availability of small, low-cost air sensors has led to increased interest in both personal and crowd-sourced air monitoring. However, to date, few low-cost air monitoring networks have been developed by residents and with the scientific rigor or continuity needed to conduct public health surveillance and inform policy. We recently received support from EPA for a collaborative, community-engaged process to develop a community air monitoring network that attains the scientific rigor required for research, while also achieving community priorities in New Castle County communities. We now propose to expand our network to include six additional underserved communities in rural areas in Southern Delaware—Blades, Coverdale, Bridgeville and Rehobeth in Sussex County; and Magnolia Carlyle Village and Capital Park in Kent County—where other nearby environmentally-impacted communities face similar risks.

By utilizing the CPS model in engaging multi-stakeholders and community residents in the project design, monitor siting processes, data dissemination, and other key activities, the resulting air monitoring network data are relevant, trusted, understandable, and used by community residents. Integration of the EJCPS model elements helps guide partnership building to effectively address multi-stakeholder interests and concerns; spatial analysis and air monitoring best practices into the network development process ensures that the data are reliable and appropriate for use in policy and research activities. This collaborative approach results in a community air monitoring network that is better able to inform and engage community residents, support research activities, guide public policy, and improve public health. Below we provide the overall project description of the monitor siting process and outline the significance and challenges of this approach.

A recent analysis (*Environmental Justice for Delaware: Mitigating Toxic Pollution in New Castle County Communities*) of our project communities, located along industrial and highway corridor, demonstrates disproportionately poorer environmental exposures than the community of Greenville (85% white: 4% poverty). These exposures include poor air quality, high levels of Environmental Protection Agency (EPA) respiratory hazards and carcinogenic chemicals and substantial exposure to particulate matter from vehicles and industrial source. Not surprisingly, our communities have high rates of asthma, cancer, and other comorbidities. Compared to Greenville and to the state of Delaware overall, our communities suffer multiple disparities. We have significantly higher EPA respiratory hazard values than Greenville (range: 24%-71% higher) and the state overall (range: 13%-55% higher). As a result, our communities are placed at higher risk for respiratory illnesses, cardiovascular conditions, cancer, pre-term birth, COVID-19, as well as higher morbidity and mortality. This practice carries into the Southern Delaware communities as well.

Southern Delaware has minimal regulatory PM monitors to cover 399,837 residents in rural areas, approximately 2000 square miles. This regulatory network does not allow many residents to understand their local air quality, and its data are of limited use in identifying air pollution hotspots

ED_016126_00001443-00007

or examining other local trends. Furthermore, there has been historical mistrust of government air quality data by the Black, Indigenous and People of Color (BIPOC) community, primarily driven by observed disconnects between the reported air quality and what residents experience, compounded by a perceived lack of access to the data. Examples shared by community members include the standard practice of removing data for high pollution "exceptional events" (such as gas leaks) from regulatory datasets, as well as reported instances when regulatory monitors were offline or did not report very high PM levels when the air quality at those monitoring locations was poor enough to obscure visibility.

To meet Southern Delaware community residents needs for relevant, trusted, community-level air quality data, Community Housing & Empowerment Connections Inc. (CHEC), a community-based organization, and its main partner at the John Hopkins University (JHU) and Clarity are proposing the *Community-led Collaborative Air Quality Monitoring Project in Southern Delaware.* The project seeks funding from the U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA) Environmental Justice Collaborative Problem-Solving (EJCPS) Cooperative Agreement Program: RFA NUMBER: EPA-R-OEJECR-OCS-23-01 to utilize components of the CPS model of community partnership, community participation approaches and air monitoring best practices to expand a community air monitoring network (CAMN) of 20 low-cost monitors in rural communities in Southern Delaware. The goal of the network is to engage residents, provide residents with accurate, real-time data on air quality in their communities that could also be used in scientific analysis to identify local trends and hotspots. This model focuses on the project's innovative monitor siting methodology, which utilizes a phased approach that integrates a collaborative community process that's community-led to identify and select monitor sites, a monitor calibration and validation process, and spatial analysis as mechanisms to integrate community and scientific priorities into the design of the network.

Project Significance

Millions of people worldwide die prematurely every year as a result of outdoor air pollution. In particular, exposure to particulate matter (PM) has been found to be associated with an increased risk of mortality and excess hospitalization even at levels below regulatory limits. While governmental regulatory air monitoring plays an essential role in achieving air quality goals, the monitors used are expensive and require a high degree of training to operate and maintain. The resulting data typically have low geospatial resolution due to the sparseness of monitors, thus limiting their utility for understanding real-time, local-level air quality conditions. While the application of spatial interpolation techniques to regulatory monitoring data has been used to estimate air quality in locations without monitors, a greater number of air monitors distributed throughout an area of concern will improve a model's utility for identifying air pollution hot spots and characterizing local community exposures. Finally, despite being generated by high-quality monitors using federally-approved methods, regulatory air monitoring data may not be relevant, trusted, or understood by residents.

With the increasing availability and quality of small, low-cost air sensors, many public health and research projects are now employing next-generation air monitoring technology to conduct personal and local-level air monitoring. While not approved in the United States for use in regulatory monitoring, this new technology holds great potential for addressing gaps in regulatory

ED_016126_00001443-00008

air monitoring data to better characterize air quality at the community level. Yet, few projects have attempted to establish a permanent community air monitoring network that's community-led, collaborative and produces data that will address community information needs and support scientific research.

By involving our residents in decision-making, conducting transparent and inclusive activities, demystifying scientific processes, integrating community knowledge, and facilitating relationship-building, a collaborative community-engaged approach to research and other data collection activities can increase community trust, understanding, and use of the resulting data. As applied to air quality monitoring, a community-engaged approach may involve communities in determining research topics and study design, collecting data, conducting analysis, and interpreting and disseminating results to improve environmental and health outcomes. Early examples of community engagement in air monitoring involved grab sampling—taking a single sample within a short period of time—and were not intended for sustainable and continuous public health surveillance. There are also many examples of communities participating in the initiation, design, and/or implementation of efforts to monitor air pollution near specific sources, also known as fence-line monitoring. However, apart from a few case studies, communities have not traditionally been engaged in the design of community air monitoring networks, proposed here as the distributed installation of monitors to measure ambient air quality levels within geographic communities. Instead, community air monitoring networks are often developed by siting monitors at locations of convenience or in locations selected without community consultation, resulting in monitoring data that are of limited utility for researchers or residents, respectively.

The siting of monitors in a network has important implications for the utility of the resulting data. Broadly speaking, data from monitors placed where people live and are most concerned about air quality are most useful for community needs, while data from monitors that are spread out and placed in a variety of land uses are most useful for modeling the spatial pattern of air quality using land use regression methods. Arguably important for both uses, data quality can be assured by incorporating air monitoring best practices, such as validation, quality assurance, and quality control procedures. However, to our knowledge, there has not been a community air monitoring network implemented at a county-wide scale that addresses these diverse priorities, our community seek. In this novice methodology, the activities of the project are designed and implemented by our community, therefore will be described in more detail under community engagement below.

Deployment of Monitors in Stages

The project team will use a staged approach to deploy the monitors (see diagram below). In Phase 1, the first set of 10 monitors will be deployed at sites selected through a community engaged process. In Phase 2, a second set of 10 monitors will be deployed based on the results of preliminary monitoring data from Phase 1. This staged approach ensures that community priorities for monitoring locations could be met in Phase 1, and that Phase 2 could be used to fill in any geographic gaps in data collection to ensure scientific integrity of subsequent spatial modeling conducted with the data.

Phase 1

Phase 2

Environmental Justice and Underserved Communities

The USEPA defines Environmental justice as the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.

While measuring pollution and addressing the multiple health impacts, exacerbated by covid-19 alone won't resolve the inequities our communities face, this data can support and further environmental justice and actions through the Justice 40 Initiative to confront air pollution and inform state and federal investments where they will have the largest benefits to health and obtaining equity.

The proposed *Community-led Collaborative Air Quality Monitoring* methodology used to site monitors addresses several barriers that environmental justice advocates and BIPOC face in meeting community needs. Specifically, regulatory monitoring networks are sparse, often do not have monitors in locations of most relevance to low income, Black, Indigenous communities of color, and not trusted by the community members. The increased availability of small, low-cost air sensors now makes it feasible for researchers to establish denser networks. However, without community input and engagement, the resulting data may still be of limited utility and may lack credibility within the BIPOC communities identified in this project. Community-led monitoring efforts are more likely to be trusted and relevant for communities; yet these efforts are often under-resourced, with limited access to scientific expertise or conventional monitoring equipment for colocations, resulting in monitoring data that may not achieve the level of scientific rigor or research utility that the community desires. Under this proposed project, our siting methodology is distinguished by the deliberate integration of community and scientific priorities. In fact, the conceptual separation of these priorities did not match our experience. Community participants consistently emphasized the importance of scientific quality, while a primary goal among research partners was to ensure that the CAMN meet community needs. We believe that a CAMN developed using this methodology can provide scientifically rigorous, community-relevant air

ED_016126_00001443-00010

quality data to complement the regulatory networks. The provision of real-time data at community-relevant locations means that individuals can use CAMN data to change behaviors to reduce PM exposures, while the ability to identify temporal and spatial pollution patterns increases the utility of the data for public health planning and policymaking at community and regional levels. As the next generation of small, low-cost air sensors offers new opportunities for establishing CAMNs, it is important to continue developing and utilizing siting approaches with respect to the ability to promote data quality and relevance for communities and researchers alike. It's our hope to promote increased interest for legislation that requires state and local regulatory agencies, to partner with organizations like CHEC to install community air monitoring systems in priority or environmental justice communities.

b. Milestones Schedule:

Project Timeline (2 years in total, 1 year of air sampling)

Activity	Oct - Dec 2023	Jan. – Mar. 2024	Apr. – Jun 2024	Jul – Sep 2024	Oct.- Dec 2025	Jan. – Mar. 2025	Apr. – Jun 2025	Jul – Sep 2025

3.0 – Environmental Results—Outcomes, Outputs and Performance Measures

The proposed project aligns with the EPA Draft FY 2022-2026 EPA Strategic Plan –Goal 2: Take Decisive Action to Advance Environmental Justice and Civil Rights, Objective 2.1: Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels by Building

Community Capacity and Climate Resilience and Maximizing Benefits to Overburdened and Underserved Communities and improving air quality.

The proposed project will work with EPA focus on advancing environmental justice and civil rights by engaging residents in identified rural area communities on key activities including technical assistance, regulation development, and financial assistance.

The proposed project will work with EPA to promote early integration of environmental justice and civil rights considerations in the regulatory process. CHEC will undertake air monitoring and other assessment approaches to address these long-neglected air quality and public health problems.

a. Environmental Results- Outputs and Outcomes-

   The expected outputs of the project include utilizing the expanding a Steering Committee statewide comprised of residents, experts, researchers and government agencies as decision-making body. Establish a CAMN that would provide residents in rural communities with accurate, real-time data on air quality in their communities that could also be used in scientific analyses to identify local trends and hotspots. The process will include deployment of 20 monitors within the CAMN over a two- year period, with significant community engagement throughout. The real-time CAMN data will be made publicly available through the Air Monitoring website. An interactive web map showing real-time data for each site, along with summary data for individual monitors, will be available on the website.

b. Performance Measures and Plan-

   CHEC will serve as the community-based organization to lead and provide oversight and coordination responsibilities of the overall project that include grant management; personnel; financial and program management.

   - Overseeing subrecipients, and/or contractors and vendors;
   - Tracking and reporting project progress on expenditures and purchases; and
   - Tracking, measuring, and reporting accomplishments and proposed timelines/milestones.

c. Sustainability Plan and Community Vision:

   Consultants/Contractors will be hired to coordinate and carry out specific activities of the plan to effectively achieve goals of the project.

Selection of priority communities. In March 2024, the CSC will begin the monitor siting process, in which monitor placement would be a priority due to the vulnerability of the residents to air pollution and health impacts. First, the CSC will review community survey data (collected from pilot CAMN project), county-specific maps and tables of various environmental, health, and social indicators, and consider factors that impact personal and community vulnerability to air pollution

ED_016126_00001443-00013

and emerging health risks. The CSC will then use consensus voting to select the priority communities.

Land use characterization. To ensure that data from the Phase 1 monitors sites could be used to model PM concentrations (to inform Phase 2), it is important that the first set of sites represent diverse land uses and potential air pollution sources. Environmental priorities related to air pollution will be identified and ranked by the CSC. Based on prioritization, researchers will compile spatial data on land uses, stationary air emissions, crematoriums, roadway proximity, railroads, solar plants, vehicle emissions, vehicle-related dust (e.g., off-roading), and ports. The CSC will also recruit expertise from the public health department to provide input on community vulnerability factors, and spatial data on demographic variables and health outcomes, such as asthma and emerging health risks were compiled as well.

Identification and prioritization of potential sites. In September 2024, residents from the priority communities will be recruited to participate in a 2 -day training process to identify and prioritize potential air monitoring sites in their communities. On the first day, participants will learn about air monitoring, uses of air quality data, and considerations for monitor siting. Participants will be grouped by community to (1) review maps of their community; (2) consider who in their community is most vulnerable to air pollution, where an air monitor would be most useful, and how the monitoring data might be used; and (3) create a list of potential air monitoring sites based on these considerations. Participants will not be limited in the number of sites they could identify, and consensus may not be required for a site to be considered a potential site.

The following day, the community participant groups will visit their respective candidate sites. With training from the previous day, groups will assess site characteristics (such as building height, security, likelihood of available Wi-Fi and AC power supply, and locations of nearby air pollution sources), take photos or videos of the site using a mobile device, and report this information on a custom-designed mobile web form (see Figure 2) modified from, CHEC's existing community environmental reporting website. Smartphones will be provided when needed, along with paper forms as back-ups. Each group will submit one mobile web form per site. Once all forms are completed, the participant groups will review their reports and select three priority monitor sites for their community.

Selection of Phase 1 monitoring sites. Of the 10 monitors to be deployed in Phase 1, one will be set aside for colocation with a state regulatory monitor (operated by DNREC) and another will collocate with a non-regulatory monitor to allow researchers to assess data quality of the CAMN instruments. Sites for the remaining 10 monitors will be selected by the project team from the entire list of potential sites and will be guided by two requirements. First, at least one monitor should be placed in each of the identified priority communities, with the larger communities of Kent and Sussex County receiving at least two monitors. This will ensure that each priority community would have community-specific data. Second, each of the PCA region types should be represented at least once in the final set of 10 monitors. This will ensure that monitoring data could be used to conduct a land use regression in Phase 2.

ED_016126_00001443-00014

Site recruitment. Recruitment of air monitoring sites will begin March 2025. Site-specific contact methods will be used, such as formal letters, introduction through a trusted intermediary, or a cold visit. Multiple meetings, sometimes with different individuals (e.g., business owners, schools, etc.), may be required for each site. A factsheet will be provided to each site describing the project, the air monitors, and the requirements and benefits of hosting a monitor. CHEC will then co-sign a form with each site representative that will confirm permission for CHEC staff to install a monitor at the location and, with reasonable notice, gain access to the monitor to perform maintenance and repairs. If a site declines participation, an alternate site will be contacted.

Deployment of Phase 1 monitors. The Quant AQ and, Purple Air commercially available monitors currently to be used for the project, will provide continuous PM monitoring and/or modifications deemed necessary by Southern Delaware community residents. The monitors will include a protective shelter, where necessary, that does not inhibit measurements. At the sites, monitors may be installed on porches, fences or the unobstructed sides of buildings, higher than 3 feet above the ground. Monitors will be connected to AC power and to the Internet via that site's own internet service or, with solar power as available. Data will be delivered via the Internet to John Hopkins University (JHU) servers.

Phase 2: Selection of Monitoring Sites Based on Data Analysis

Monitor calibration and field validation. To ensure data quality, each of the monitors will be calibrated and field validated against both PM2.5 and PM10 federal equivalent method (FEM) beta-attenuation monitors (BAMs) and federal reference method (FRM) gravimetric filters at a colocation site in the project area. The PurpleAir, and Quant AQ monitors are designed to make the most accurate measurements possible using low-cost sensor technology. We will rely on the calibration and Quality Assurance/Quality Control QA/QC of these sensors as delivered from the manufacture as a first level of QA/QC. Comparisons across monitors, and with regulatory measurements will also be performed periodically.

Spatial analysis of preliminary air quality data. To determine where Phase 2 monitors should be placed, a preliminary map of air pollution concentrations across the county will be utilized or developed by a spatial expert of one of our CSC partners, as needed.

Site selection and deployment of Phase 2 monitors. In May 2024, the project team and CSC members will examine the proposed Phase 2 monitor locations using results of surveys to identify potential monitor sites. A formal site selection process may or may not be used. CHEC and interested CSC community members may visit locations to identify and recruit monitoring sites, ideally within a two-mile buffer of the proposed location.

4.0 Programmatic Capability

A. Organizational Experience

As previously stated, Community Housing & Empowerment Connections Inc. (CHEC) was recently awarded an EPA grant and is currently meeting the reporting requirements under the federal cooperative agreements. Community Housing and Empowerment Connections Inc. (CHEC) is a community-based non-profit organization established in 2001 by a community resident turned environmental justice advocate. CHEC specializes in community organizing, advocacy, education and outreach. We are the constituency that we serve. We have a trained staff of volunteers and consultants who have years of experience working in low-income communities of color to address social and environmental justice issues in their neighborhood. CHEC, Inc. will provide oversight and coordination for this project. CHEC co-authored the *EJ for Delaware Report (2017)*; along with the Union of Concerned Scientists; led the development of several community coalitions that include: the Wilmington Prevention Coalition, the New Castle Prevention Coalition, Delaware Concerned Residents for EJ@CHEC and the Delaware Environmental Justice Community Partnerships. CHEC is currently the lead agency for the Community-led Air Monitoring Network for EJ communities in New Castle County, Delaware.

B. Staff Experience

Octavia Dryden, is founder and CEO of Community Housing & Empowerment Connections Inc. (CHEC, Inc.), the lead agency of this project. She has life experience along with more than thirty years of work experience leading community projects in the targeted communities. She served as Co-Principal Investigator with Delaware State University on a ACCEL -CTR sponsored Retreat on Toxic Pollution and Health Impacts. She was Community PI for a pilot Community Air Monitoring Network, in collaboration with Christiana Care Health Services.

Community EJ Specialists will be hired under contract to support project team and coordinate activities of the project to include: trainings, meetings, site, host and maintain monitors in selected communities.

Our partners at John Hopkins University and Clarity will assist the project team with quality assurance, measurement, software and data collection for the project.

C. Expenditure of Awarded Grant Funds

Community Housing and Empowerment Connections, Inc. strives to have the best possible internal controls and financial systems. The financial policies and procedures are created by the staff and approved by the Board of Directors to guide the work of staff and outsourced financial management.

The Board of Directors of CHEC, Inc. will annually appoint a Finance Committee who works under the Board Treasurer to ensure the appropriate preparation of an annual budget, appropriate handling and distribution of funds, and the appropriate preparation and presentation of regular financial statements. The Finance Committee directs, reviews, and presents the annual audit to the Board of Directors.

The Finance Committee oversees that CHEC, Inc. provides accurate, timely financial reports and information returns. The Finance Committee will regularly review financial statements, including a balance sheet and a comparison of actual financial activity to the approved budget. The staff will maintain a calendar of report deadlines and will advise the Board of Directors to ensure that all financial reports and information returns have been filed as required

5.0 Past Performances

Community Housing & Empowerment Connections Inc. (CHEC) was recently awarded the following grant under federal and/or non-federally funded assistance agreements:

Project Name: Community-led Engaged Air Monitoring Network in New Castle County, Delaware

U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA)
Enhanced Air Quality Monitoring for Communities
RFA NUMBER: EPA-0AR-OAQPS-22-01

6.0 Quality Assurance Project Plan (QAPP) Information

The proposed project has been designed to make the most accurate measurements possible using low-cost sensor technology. Particulate Matter measurements and corrections have been documented in the research literature and described in detail (Hagan and Kroll, 2020). For low-cost electrochemical sensors designed to measure gas-phase species, best practices for calibration of those sensors are described in (Hagan et al. 2018) and (Cross et al. 2017). We will rely on the calibration and Quality Assurance/Quality Control QA/QC of these sensors as delivered from the manufacture as a first level of QA/QC. Comparisons across monitors, and with regulatory measurements will also be performed periodically. Our partner with Peter DeCarlo PhD, associate professor and the research team at John Hopkins University will serve in advisory capacity on the project to ensure that the results of the work performed will satisfy the stated performance and/or acceptance criteria. Additionally, Clarity a team of air quality experts will assist the project with measurement, software and data collection. Together as a team we will develop a QAPP on the project.

Title: Happy, Healthy, Lead-Free Me!

Project Location: Nationwide, with select outputs targeting rural communities.

Applicant Information:

Cribs for Kids, Inc. Non-Profit # 25-1442806
5450 Second Avenue, Pittsburgh, PA 15207
Tel: Ex. 6 Personal Privacy (PP) Email: info@cribsforkids.org

Brief Description of Organization (100 words or less)

Cribs for Kids is a national, non-profit organization, dedicated to the health of young children. For over 25 years, Cribs for Kids has provided safe sleep equipment and caregiver education to those living in historically disadvantaged communities. With a network of over 1,800 partners nationwide, a fulfillment facility, and an online training platform, Cribs for Kids has demonstrated its ability to disseminate children's preventative health education and safety equipment. In July 2022, Cribs for Kids entered a partnership with NH Division of Public Health Services (DPHS) to distribute and promote the recently released children's board book, *Happy, Healthy, Lead-Free Me!*

Are you applying for Small CBO Set Aside Track: NO

Project Abstract

Through a collaborative effort between Cribs for Kids (CBO) and five, committed partners, this project provides public education and training on the negative impact of childhood lead exposure, prevention strategies, and the importance of pediatric blood lead level testing. Priority is placed on strengthening education efforts in environmental justice communities and underserved rural areas. With partnerships and engagement with community-based organizations nationwide, the project will address the lead exposure prevention knowledge gap among families with young children, through the promotion and donation of the recently released *Happy, Healthy, Lead-Free Me!* children's board book and the development of an online training course for the early care and education workforce.

Project Types: Public Lead Exposure Prevention Education and Training

Special Considerations: Rural Areas

Environmental Considerations: Childhood Lead Exposure Prevention Education

List of Partners:

Pediatric Environmental Health Specialty Unit Region 1/Boston Children's Hospital (PEHSU)
NH Chapter of the American Academy of Pediatrics (NHAAP)
Center for Advancing Rural Health Equity at Dartmouth Health (CARHE)
NH Division of Public Health Services (NHDPHS), *Healthy Homes and Lead Poisoning Prevention Program*
National Coalition of On Campus Child Care Centers (N4C)

Will you need to develop a QAPP for your project: NO

ED_016126_00001451-00002

Section 1: Background: The Story of the Development of *Happy, Healthy, Lead-Free Me!*
(Background text provided by NH Division of Public Health Services (NHDPHS) with contributions from NH Chapter of American Academy of Pediatrics (NHAAP) and Region 1 Pediatric Environmental Health Specialty Unit at Boston Children's Hospital (PEHSU-1) All three are committed project partners.)

Opportunities for lead exposure are plentiful in many children's environments. Most parents are not engaged in lead poisoning prevention materials until *after* their children are exposed. Research has demonstrated that children's literature can be an effective educational vehicle for 'anticipatory guidance' for the adult reader due to the emotional engagement when reading, its use of simple language, and the potential for repeated readings. (Hutton 2017)

The Environmental Protection Agency had identified education as an important intervention to reduce and prevent childhood lead exposure. A children's board book on lead poisoning prevention and the importance of pediatric blood lead level testing, distributed to families *before* their children are exposed, would be a valuable primary prevention tool. However, after completing an extensive search and review of children's literature in 2019, NH Division of Public Health Services (NH DPHS) was unable to locate a children's board book with lead exposure prevention messaging. They identified that none existed.

The program's Health Communications Specialist Gail Gettens, MS and Environmental Team Lead Knatalie Vetter spearheaded the development of a children's board book, *Happy, Healthy, Lead-Free Me!* with clinical support provided by the NH Chapter of the American Academy of Pediatrics (NHAAP) and the Region 1 Pediatric Environmental Health Specialty Unit (PEHSU) at Boston Children's Hospital, with funding from CDC and EPA cooperative agreements.

The plans for the book included engaging illustrations with diverse characters, rhyming children's text, along with using the *Simple Steps* approach to parent education 'subtitles' to appear on each page, to be available in multiple additional languages. Professional illustrator Allison Valentine designed page layouts and illustrated the board book. A clinical and technical review involving many internal and external partners was completed. Beta-editions, printed in English and Spanish, were distributed to over 90 families, to read to their children and provide feedback. Revisions were made based on the review process and a final draft was completed.

The book has been translated into multiple additional languages including Chuukese, Dari, Nepali, Portuguese, Somali, Spanish, and Swahili. An associated webpage, www.leadfree.me, which can be accessed by a QR code on the book's jacket, was branded with book artwork and using the same Simple Steps approach to messaging, provides additional information and resources for families on lead exposure prevention. A Creative Commons license was placed on the book restricting commercial use to ensure its availability, affordability, and its use as a

ED_016126_00001451-00003

children's health outreach and education resource. A US board book printer using certified lead-free inks and with a production facility in Amherst, NY, was selected.

The inaugural printed editions of *Happy, Healthy, Lead-Free!* shipped from Pint Size Production in December 2022. National positive interest and demand were immediate – both affirming and overwhelming. It quickly became apparent that a national, non-profit partner with both a children's health mission and a proven ability to manage inventory, and fulfillment logistics was needed -- *and quickly*. When book development partners, NHDPHS, NHAAP, and PEHSU-1 first connected in June 2022, with Cribs for Kids, a non-profit organization dedicated health and safety of young children, together we knew the perfect collaborative partner to both take on and take care of, *Happy, Healthy, Lead-Free!* had been found.

Section 1b. Environmental and Public Health Information

Childhood Lead Exposure in the US: Pediatric Environmental Public Health Epidemic

Despite considerable progress in reducing lead exposure through Federal actions removing lead from paint and gasoline, childhood lead exposure, as identified by elevated blood lead levels, continues to be a significant pediatric environmental health issue across the United States.[1] (View Figure 1- Map) Approximately 590,000 US children ages 1 through 5 years had elevated blood lead levels of 3.5 µg/dL, or greater, in 2016.[2]

Childhood lead exposure and disparities are widespread in the United States. While children in all areas of the United States are at risk of lead exposure, research studies highlight the environmental justice disparities among lead-exposed children.[1,2,3,4,5,6,7,8] Children of color, children living in poverty, with public health insurance, and living in older housing, are at greater adverse risk for lead exposure. (View Figure 2 Housing, Poverty, Race Disparities of childhood lead exposure.) The irreversible negative impact of childhood lead exposure only serves to amplify and entrench environmental justice and health disparities. [6, 9]

Children are exposed to lead in their own homes. Deteriorating lead-based paint and lead dust in pre-1978 housing is the most significant source of lead exposure in the US.[10,11] Findings on lead-based paint/hazards from the American Healthy Homes Survey II (2019), as presented by the US Department of Health and Human Services, indicate that 29.4% or 34.6 million US housing units have lead paint and that 15.4% or 18.2 million have significantly deteriorated lead paint.[12] (View Figures 3 and 4 US Housing with Lead Paint) In 2019, 4.3 million children resided in homes with lead paint.[2] Common renovation activities like sanding, cutting, and demolition in older housing can also create hazardous lead dust. The amount of lead dust that can harm a child is so tiny, it is not visible on hands, toys, pacifiers, floors, and other surfaces. Very young children can swallow lead dust during routine daily activities such as eating, crawling, playing, and normal hand-to-mouth activities. [10]

Lead is a dangerous toxin that harms nearly every part of a child's body, especially the brain. There is no safe level of lead exposure for young children. Lead exposure can cause well-

ED_016126_00001451-00004

documented adverse effects that impair academic performance and cause significant behavior challenges.[13,14,15,16,17] The effects that even low-level lead exposure has on the brain's learning systems often referred to as lead's 'Neurobehavioral Signature" – include a significant negative impact on cognitive ability, speech and language, hearing, visual-spatial skills, attention, impulse control, social behaviors, emotional regulation, and motor skills.[18] Children with lead exposure cannot avoid the negative impact. There are no treatments that can reverse the potentially devastating effects of childhood lead exposure. Once a child's health or cognition has been harmed by lead, the effects are irreversible and continue into adulthood.[16,17,18]

Families with young children across the US, living in both urban and rural areas, are frequently uninformed about the negative impact of lead exposure on children's health and development, common sources of lead exposure that may exist in their children's environment, and the importance of pediatric lead level testing. [19, 20, 21] Most families do not engage in childhood lead exposure and prevention education materials until *after* their children are exposed. This knowledge gap in understanding the impact of childhood lead exposure, prevention strategies, and the importance of testing, especially among families with young children living in high-risk, environmental justice communities and rural, underserved areas, serves to increase the number of children identified with elevated blood lead levels in these areas and amplify existing health disparities.

This project seeks to address and reduce the existing prevention education knowledge gap among families with young children in overburdened and underserved communities, with the goal of reducing childhood lead exposure. The planned, core activities of this project provide anticipatory guidance on lead exposure prevention and the importance of lead level testing to families with children, using a proven prevention messaging approach, delivered to families through *trusted* messengers – their children's pediatric healthcare providers and early care and education providers. Section 1b. References

Section 1c. Organization's Historical Connection to Underserved Community

For over 25 years, the mission of Cribs for Kids has been to prevent sudden infant death, which disproportionately affects underserved populations. Cribs for Kids' successful approach was to educate caregivers on infant health and safety and provide cribs for households in need. Since its inception, Cribs for Kids has expanded its partner network across the United States to include over 1800 partner organizations that replicate the Cribs for Kids education model. Partners, such as Louisiana Healthcare Connections and their mission to reduce health disparities and create health equity for Medicaid recipients in the state of Louisiana, benefit from Cribs for Kids' ability to directly supply members with products and resources that ensure infant safety in every home.

ED_016126_00001451-00005

Section 1d. EJCP Model

The proposed project will undertake all seven (7) elements of the EJCPS model. **Elements 1 – 4** of the EJCPS model have already been successfully accomplished during the planning process for this project application. Cribs for Kids, in collaboration with the project's committed partners, has facilitated issue identification, output and outcome goals, and implementation timelines. (See Logic Model and Work Plan.) Planning work with partner organizations has identified leadership roles and responsibilities in completing mutually agreed-upon outputs and associated key activities. This application includes five (5) Letters of Commitment from partners detailing the resources and networks to be leveraged for the timely and successful completion of outputs. Constructive engagement of partners, **Element 5,** has begun – many having been actively collaborating for many months, and will only increase if the proposal is funded. (See above Background Section pg. 2) This application identifies a skilled and experienced Project Manager, and includes both a Performance Measurement Plan, and a Work Plan/Milestone Schedule (pages 14-16) with partner responsibilities, timeframes for implementation, and finish dates of major activities. These components will support the successful undertaking of **Elements 6 and 7**.

Section 1e. Project Linkages The proposed outputs and expected outcomes outlined in this project application and milestone schedule support both the EPA Goal 2 (advancing environmental justice and civil rights) and Objective 2.1 (building community capacity to maximize benefits to overburdened and rural underserved communities). This project provides nationwide public education and training on childhood lead exposure, prevention strategies, and the importance of pediatric blood lead level testing, prioritizing overburdened environmental justice communities and rural underserved areas. (See above Section B: Environmental and Public Health Information) A collaboration of diverse, community-based partners with a proven history of supporting the health and development of children are committed to ensuring the successful completion of project outputs and outcomes that align with and support EPA's environmental justice goals and objectives. (See below Section F: Partner and Collaborate)

Section 1f. Partner and Collaborate This project application includes letters of commitment from five (5) partner organizations from multiple stakeholder groups including government, pediatric healthcare providers and their professional organizations, a pediatric environmental health specialty unit, early care and education leaders, and programs located on campuses of academic institutions, and those advancing rural and population health equity. These letters detail the roles, resources, subject matter expertise, clinical and technical assistance, and networks each partner is contributing to ensure the successful completion of project outputs and outcomes. The project's Work Plan/Milestone Schedule (pages 14-16) details each partner's assigned responsibilities in completing key activities and final outputs. Many of the partners have been actively collaborating for close to a year. (See above Background Section pg. 2) All committed partners have already been collaborating to plan key activities and develop the project's Work Plan/Milestone Schedule. A collaborative and committed investment in the

ED_016126_00001451-00006

successful completion and sustainability of project outputs and outcomes has been established. This proposal's five (5) partners are:

- NH Division of Public Health Services - Healthy Homes and Lead Poisoning Prevention Program (DPHS) Read Letter of Commitment. ***Key points***: developed *Happy, Healthy, Lead-Free Me!,* and state-level online training for the early care and education workforce that will serve as a model for the project. Technical and subject matter expertise, national networks including state offices of rural health, education presentations, participate in progress and performance measure review and meetings. Located in a state with large rural, underserved areas.
- Pediatric Environmental Health Specialty Unit Region 1/Boston Children's Hospital (PEHSU) *(subaward)* Read Letter of Commitment. ***Key points***: *original partner in developing* Happy, Healthy, Lead-Free Me!. Academic teaching hospital and CDC-funded environmental health specialty clinic. Subject matter expertise and clinical review. Wide-reaching national clinical and public health networks. GPS data and mapping for target outreach to EJ and underserved regions. Education presentations and active promotion of board book as an effective clinical adjunct. Participate in progress and performance measure review and meetings.
- NH Chapter of the American Academy of Pediatrics (NHAAP) Read Letter of Commitment ***Key points***: *original partner in developing Happy, Healthy, Lead-Free Me!.* Subject matter expertise and clinical review. National networks including the American Academy of Pediatrics and rural health centers. Pediatrics. Invested in promoting the widespread use of board books by pediatricians as an evidence-based, effective clinical adjunct that engages both child and family. Participate in progress and performance measure review and meetings.
- Center for Advancing Rural Health Equity at Dartmouth Health (CARHE) Read Letter of Commitment. ***Key points***: Part of an academic teaching hospital fully located in an underserved, rural area (one of only two in the US), dedicated to addressing complex rural health disparities. Innovations in population health. Wide-reaching national clinical, academic, and rural health networks.
- National Coalition of On-Campus Child Care Centers (N4C) *(subaward)* Read Letter of Commitment. ***Key points***: Non-profit leadership organization of child care programs located on campuses of institutions of higher education across the US – providing child care services, child development research, early care and education training for students, and workforce development. Diverse, widespread networks. Training module technical review and beta-testing.
- Actively engaged with families with young children across the US. Participate in progress and performance measures.

This project proposal includes two planned subawards to support activities of partnering community-based organizations. Subawards are included in the project budget for NC4 and PEHSU. These subawards are detailed in the 'Other' section of the attached proposal budget and comply with EPA Subaward Policy subawards under 2 CFR 200.330, 200.331, and 200.332. There are no Participant Support Costs included in the proposal. EPA Subaward Policy guidance and Appendix D Subaward Agreement Template will be used in developing partner subaward agreements to ensure all applicable requirements of 2 CFR 200.330, 200.331, and 200.332. 2 are fully met.

Section 2a: Project Activities and Work Plan/Milestone Schedule

Section 2a. Project Objectives and Activities

ED_016126_00001451-00007

Objective 1: Strengthen Partnerships and Engage Organizations in Lead Exposure Prevention

Output 1 (page 14): Increase public and partner organization awareness of the recently released children's board book *Happy, Healthy, Lead-Free Me!* as an innovative and engaging anticipatory guidance resource for families with young children on childhood lead exposure prevention and the importance of pediatric blood lead level testing, with targeted outreach to healthcare and family support organizations serving environmental justice communities and rural areas.

• **Develop Engagement Materials for *Happy, Healthy, Lead-Free Me!*** *(Work Plan Activity 1.1)*
Develop social media tool kit with sample posts and graphics on board book's content, release, availability, and additional languages. Make a media toolkit available to all committed project partners for dissemination through their networks and channels. Create information postcards on the book's content, release, availability, and additional languages.

• **Establish Partnerships by Disseminating *Happy, Healthy, Lead-Free Me!* Sample Books and Engagement Materials** *(Work Plan Activity 1.2)*
A sample *Happy, Healthy, Lead-Free Me!* book along and engagement materials will be distributed to 3000 organizations, including, state rural health associations, state offices of rural health, state and regional chapters of the American Academy of Pediatrics, Pediatric Environmental Health Specialty Units, members of the National Association of Rural Health Clinics, lead hazard control programs, National Association of On-Campus Child Care Programs, childhood lead poisoning prevention programs, and Crib for Kids partners. Project partners will promote the availability of complimentary sample print editions through electronic request URL at their continuing medical education (CME) and professional development events.

• **Exhibit at National Children's Health Conference** *(Work Plan Activity 1.3)*
Attend national children's health conference to provide wide-reaching education and outreach to attendees providing services in environmental justice communities and rural, underserved areas, on release, available, and donation program of *Happy, Healthy, Lead-Free Me!* board book.

• **Facilitate Presentations on *Happy, Healthy, Lead-Free Me!*** *(Work Plan Activity 1.4)*
Facilitate educational presentations on the development and availability of the *Happy, Healthy, Lead-Free Me!* board books for pediatric healthcare providers, public health professionals, lead hazard control programs, and family support organizations to engage additional community-based organizations. Educational sessions will introduce the book's innovative approach to outreach using children's literature to provide anticipatory guidance to families with young children about lead exposure prevention and the importance of pediatric blood lead level testing.

Objective 2: Develop and Implement Book Donation Program for Rural, Underserved Communities

ED_016126_00001451-00008

Output 2 (page 15): Develop and implement a book donation program targeting rural health centers and family support programs serving rural, underserved communities to ensure new childhood lead exposure anticipatory guidance resource, *Happy, Healthy, Lead-Free Me!* board books are accessible and available to families with young children living in rural, underserved areas.

• **Establish a Book Donation Program** (*Work Plan Activity 2.1)*
Cribs for Kids (COB) will facilitate a work group of committed partners and technical experts to develop and implement the book donation program. The workgroup will create donation program guidance, the application process, and selection criteria for donations to rural area service providers, along with necessary program forms and documentation.

• **Develop Engagement Materials for Book Donation Program (***Work Plan Activity 2.2)*
A media release, a social media tool kit with graphics and sample posts, and website content with information on the book donation program will be developed. Project partners will disseminate engagement materials through their networks and platforms. Information on the book donation program will be shared at exhibits at national conferences.

• **Post Information about Donation Program Online (***Work Plan Activity 2.3)*
Post information about the donation program, application, how to apply, eligibility requirements, and selection process on Cribs for Kids (CBO) website. Partners will post links on their websites.

• **Identify and Engage Potential Applicants from Rural Areas.** *(Work Plan Activity 2.4)*
Work with partner organizations to identify and engage potential applicants.
Donate 45,000 Happy, *Healthy, Lead-Free Me!* board books during a three-year project period.

• **Establish Book Donation Inventory and Fulfillment System** *(Work Plan Activity 2.5)*
Cribs for Kids will create and manage an inventory and fulfillment logistic system to ensure the immediate availability of *Happy, Healthy, Lead-Free Me!* board books for shipping to donation recipients in rural, underserved areas.

Objective 3: Strengthen Partner's Abilities to Engage with Their Communities and Provide Lead Exposure Prevention

Output 3 (page 16): A free, online training module on childhood lead exposure prevention for early care and education workforce. A state-level, state-specific training module developed with several CDC cooperative grants will serve as a model for the training for a national audience, to be developed by this project. The training module content to include common sources of childhood lead exposure, the negative impact of lead exposure on children's development, prevention strategies, early educational interventions that can improve the outcomes for infants, toddlers, and preschool children impacted by lead exposure, and importance of having pediatric blood

ED_016126_00001451-00009

lead level testing completed and documented on children's health assessment forms. The training module will be available at no cost and will include downloadable resources, including the EPA's Renovate Right booklet, the EPA's Protect Your Family from Lead in the Home booklet, and the US Office of Special Education Program's Topical Issue Brief Intervention IDEAs for Infants, Children, and Youth Impacted by Lead Exposure Idea Brief

• **Develop learning objectives and content for the online training module.** (*Work Plan Activity 3.1)* Cribs for Kids (CBO) will facilitate a work group to include partners and their subject matter experts to develop the training module's learning objectives and create content for a national audience.

• **Complete necessary IT build for online availability.** *(Work Plan Activity 3.2)*
Build an IT structure to the host training module on Cribs for Kids online education platform, to include a certificate of completion upon successfully finishing the course and knowledge assessment, appropriate to meet state childcare regulatory requirements for documenting professional development hours.

• **Plan and implement review by both subject matter experts and early care and education workforce training and development experts.** *(Work Plan Activity3.3)*
Plan and implement technical reviews by diverse subject matter experts. Collect, aggregate, and evaluate feedback to determine and complete appropriate and needed revisions.

• **Beta-test with early care and education workforce.** *(Work Plan Activity 3.4)*
Plan and implement a beta-testing process with diverse members of the early care and education workforce. Collect, aggregate, and evaluate feedback to determine and complete appropriate and needed revisions.

• **Launch training module and disseminate information on availability.** *(Work Plan Activity 3.5)* Make 'live' completed online training module. Disseminate information on its availability through partner organization networks. Prepare quarterly training completion analytics.

Section 2b. Work Plan/Milestone Schedule (pages 14-16)
Section 2c. Itemized Budget Sheet (submitted as 'Other Attachment')

3.0 Environmental Results
Section 3a. Project Logic Model (submitted as 'Other Attachment')
Section 3b. Performance Measurement Plan - (view here)
The project's Performance Measurement Plan outlines how project progress and outputs will be monitored throughout the three-year project period. The project's Logic Model, Performance Measurement Plan and Work Plan/Milestone Schedule were developed to ensure key activities and short-term outputs, in support of expected results, are completed within specified timeframes. The project's Milestone Schedule details outputs, performance measures and

ED_016126_00001451-00010

implementation dates, responsible committed partner, and completion date. Progress on performance measures will be reported within the Milestone Schedule on the schedule outlined in this plan. Project Manager, key personnel, and committed partners are required to attend annual performance measure review meetings, to be held each year for the duration of the project, to assist with monitoring project outputs.

Section c. Sustainability Plan and Community Vision

Currently, Cribs for Kids works to address the issue of sudden infant death, which disproportionately affects underserved communities. Cribs for Kids offers a variety of free programs, educating caregivers on infant health and safety in communities across the United States. These free programs are sustained through the sale of infant safety products at reduced rates. This *Happy, Healthy, Lead-Free Me!* project will fit seamlessly into Cribs for Kids *Safe and Healthy Homes* programming. Cribs for Kids has an established network of partner organizations nationwide that replicate our programs to fit their community needs. For this project, Cribs for Kids has identified multiple community stakeholders, such as pediatric healthcare organizations and early childhood educators, with a mutual goal of knowledge gap reduction surrounding lead exposure risk, a plight that inordinately afflicts underserved communities. Due to the accessibility of Cribs for Kids programming, communities can sustain the momentum of the project through continued education on lead exposure risk reduction. Cribs for Kids will maintain its collaboration with partners to spread consistent messaging for their community members to address lead exposure and remediation practices.

4.0 Programmatic Capability

Section 4a. Organizational Experience

For over 25 years Cribs for Kids has been dedicated to, and successful in, supporting the health and safety of young children and their families living in overburdened and underserved communities. Our mission, partners, organizational infrastructure, educational platforms, facilities, and demonstrated ability to 'get the job done' should inspire confidence in review committee members in our capabilities to successfully complete the key activities, outputs, and expected outcomes outlined in this project proposal.

Cribs for Kids has successfully developed an infrastructure that promotes mutually beneficial community relationships. By becoming partners, organizations gain access to our infant safety online training programs, educational resources, and our online store with discounted pricing on infant safety and related products. From our 15,000-square-foot inventory and fulfillment center, these products are shipped to partners and their community members across the nation. The sales from these products help to fund Cribs for Kids educational platform and flexible learning systems that partners can use to conveniently replicate and differentiate education material to fit their community needs.

View Cribs for Kids' Our Story video here.

View Welcome to Cribs for Kids Headquarters video here.

ED_016126_00001451-00011

Section 4b. Staff Experience/Qualifications of Project Manager

The project manager for this program is Bridget Gaussa, the Chief Operations Officer for Cribs for Kids. Employed by Cribs for Kids since 2016, Gaussa maintains a passion for and understanding of the built environment; accompanied by a career expanding over several industries including commercial real estate, construction, healthcare, environmental sustainability, warehouse, and retail operations. At Cribs for Kids, Gaussa oversees the day-to-day operations of the organization and resource distribution programs.

Cribs for Kids Director of Development, Andrea Wilson was essential to building Cribs for Kids online training platform. The training platform will serve as the foundation for and will house, the online education portion of the project. The fulfillment needs of this project will be integrated into Cribs for Kids' successful inventory and shipping logistics operation. The warehouse staff currently distributes all infant health and safety engagement materials, safe sleep board books, and equipment.

Section 4c. Expenditure of Awarded Grant Funds

Cribs for Kids maintains its financially secure status through the implementation of systemic checks and balances. Nicole Smith, Chief Financial Officer, collaborates with the Board of Directors Finance Committee to submit quarterly financial reports for Board review and approval. Additionally, the accuracy of financial records is assured by annual financial auditing completed by Herbein Associates, CPAs, and Advisors. View Cribs for Kids Completed Administrative Capacity Questionnaire.

5.0 Past Performance

The Cribs for Kids program was built on support from and partnerships with community organizations, along with generous early donations and development activities. In recent years, because of our successful program model and our historic funders, many of our programs have become financially self-sustaining through our crib distribution program. Historically, Cribs for Kids has explored new funding opportunities and partnerships to launch additional programs to support the health and safety of children in underserved and overburdened communities.

Most recently the Jefferson Regional Foundation generously funded the Cribs for Kids At Home Program. In 2020, when our partners were not able to provide in-person safe sleep education and safe sleeping environments to families as a reward for attending their safe sleep classes, we launched the At Home Program. The program incorporated health and safety training and Cribettes shipped directly to the homes of caregivers in need. This program is now self-sustaining with several of our partners routinely still using the program to benefit families in overburdened and rural communities. During the grant period, the Jefferson Foundation required two reports: an interim progress report and a final report. These reports were submitted on time and detailed our successful completion of all outputs – providing over $45,000 worth of cribs

ED_016126_00001451-00012

and anticipatory child health and safety messaging to families in need living in disadvantaged communities. The reports were accepted and met all requirements for the Jefferson Regional Foundation review team.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: Environmental and Social Justice Associates

Address: Ex. 6 Personal Privacy (PP)

City: Lake Leelanau

State: MI: Michigan Zip Code: 49653

B. Unique Entity Identifier (UEI): UTTJELX84US9

C. Applicant/Recipient Point of Contact

Name: Eileen C O'Rourke

Phone: Ex. 6 Personal Privacy (PP)

Email: Ex. 6 Personal Privacy (PP)

Title: President and Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

NA

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

NA

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

Eileen C ORourke	President and Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

Dear Taxpayer:

This is in response to your Sep. 18, 2012, request for information regarding your tax-exempt status.

Our records indicate that you were recognized as exempt under section 501(c)(3) of the Internal Revenue Code in a determination letter issued in August 1994.

Our records also indicate that you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section(s) 509(a)(1) and 170(b)(1)(A)(vi).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

Please refer to our website www.irs.gov/eo for information regarding filing requirements. Specifically, section 6033(j) of the Code provides that failure to file an annual information return for three consecutive years results in revocation of tax-exempt status as of the filing due date of the third return for organizations required to file. We will publish a list of organizations whose tax-exempt status was revoked under section 6033(j) of the Code on our website beginning in early 2011.

Dartmouth Health

Center for Advancing Rural Health Equity

March 29, 2023

U.S. Environmental Protection Agency
EPA Community Based Organizations
EJ Grant Application Selection Committee
Washington DC

Dear Committee Members:

This letter of commitment is written in support of the activities of Cribs for Kids, the community-based organization (CBO) based in Pittsburgh, PA, and their proposal requesting funding of their project to distribute educational materials regarding childhood lead poisoning prevention to environmental justice and rural communities.

The Center for Advancing Rural Health Equity (CARHE) is based out of Population Health at Dartmouth Health. Rural northern New England is home to Dartmouth Health (DH), New Hampshire's only academic health system. It is a regional and globally recognized center of excellence renowned for its research, education and clinical practice, with a commitment to the delivery of effective and patient-centered care.

In September 2020, leaders from DH, Geisel School of Medicine and Dartmouth College committed to the 2022 launch of a Center for Advancing Rural Health Equity (CARHE) to address long-standing rural health disparities, eliminate unjust variations in health outcomes, and create greater alignment of effort across health delivery, education, research and community in the region. Advancing rural health equity in rural northern New England requires the acquisition of new knowledge, new ways of collaborating, new skills and competencies, and significant outreach to create stronger community partnerships.

To pursue, advance and sustain rural health equity is a deeply complex and challenging effort. It takes the collective impact of multiple organizations, cross-sector coordination, to address and overcome the magnitude and complexities of rural health inequities and pave the way to better health and well-being for rural constituents and communities. With this goal of collective impact of multiple organizations, we commit to being a project partner.

As a committed project partner, CARHE will be able to actively support the development of the project's proposed board book donation program that would provide *Happy, Healthy, Lead-Free Me!* board books, at no cost, to pediatric healthcare providers and community agencies located in rural area. The book donation program would provide 15,000 books per year, for each year of the three year grant period. This planned activity would provide 45,000 books to children living in rural, underserved areas nationwide.

CARHE and Dartmouth Health know, first hand, the proven value of *Happy, Healthy, Lead-Free Me!* as a clinical adjunct for our DH pediatric healthcare providers practicing in rural Northern New England. We want *all* rural health programs to learn of this new resource and as many as possible to have access to it.

Dartmouth Health

Center for Advancing Rural Health Equity

Dartmouth Health pediatricians were involved with the development of this engaging clinical adjust since its inception, providing clinical review during the book's development. This board book which serves dual purpose of supporting early literacy while providing lead exposure prevention education to the adult reader, is now widely distributed by DH pediatricians during Well Child Check visits to their very young children and their families, many who reside in rural areas of Northern New England.

We proudly share what our DH pediatric healthcare providers are saying about *Happy, Healthy, Lead-Free Me!*

"Beautiful, effective, and fun! We are so proud to have been able to collaborate with the NH DPHS on this initiative to create Happy, Healthy, Lead-Free Me! It is an innovative and creative way of teaching families about the dangers of lead and the importance of lead level testing while allowing children to benefit from the amazing developmental gains associated with reading. The pediatricians across the state who are enthusiastically handing out the book and the families who are receiving it - all universally love it!"

- Erik Shessler, MD, Chair of General Pediatrics, Dartmouth-Hitchcock in Manchester and President of NHAAP

"It's great to be able to give a book to families about a health topic in an age-appropriate presentation for the patient. The rhyming board book format is familiar to parents and children, making it a comfortable fit with the routine of reading stories. The age-appropriate presentation, bright colors, diversity of the characters, and availability in additional languages makes this book a winner!"

- Eleanor Maguire, ANPR, Pediatric Nurse Practitioner, Dartmouth-Hitchcock in Nashua

Happy, Healthy, Lead-Free Me! is an innovative approach to educating families on childhood lead exposure prevention and the importance of pediatric lead level testing. As a committed and collaborative partner, CARHE will actively facilitate the dissemination of information about the book's recent release, associate resources, and the book donation program for rural areas, using our board network of clinical health care providers and public health professionals.

We endorse the Cribs for Kids proposal, commit to being a partner, and strongly urge you to approve its funding. The results of this project will support the health of very young children and their families living in rural areas, as well as those living in environmental justice communities, who are face with complex challenges and health disparities, including higher rates of childhood lead exposure.

Please feel free to contact my office for further information regarding the activities of Population Health and the Center for Advancing Rural Health Equity at Dartmouth Health.

Sincerely,

Sally Kraft, MD

National Coalition for Campus Children's Centers

Engage • Network • Advocate

April 12, 2023

U.S. Environmental Protection Agency
EPA Community Based Organizations
EJ Grant Application Selection Committee
Washington DC

Dear Committee Members:

The National Coalition for Campus Children's Centers (N4C) is a nonprofit educational membership organization supporting excellence in programs for young children in communities of higher learning by providing opportunities for leadership, professional development, research, networking, and advocacy. Our members include early care and education program administrators, teachers, and faculty all of whom are directly associated with a higher education, campus based early childhood program. N4C's members are part of diverse organizational, funding, and program structures at university and college campuses across the United States. These programs include childcare centers and laboratory schools where future early childhood teachers and practitioners receive training and hands on experience. While each program possesses unique qualities, the membership of N4C share a passion for doing what is best for children, student parents and the community at large. Joining Cribs for Kids (COB) and this project as a committed partner aligns perfectly with our N4C mission.

As a committed partner, N4C looks forward to working with Cribs for Kids, a non-profit, community-based organization (COB) with the mutual goal of successful completion of the project output of an on-line training for the early care and education workforce. The training module to be developed will include information on the negative impact of childhood lead poisoning, prevention strategies, the importance of pediatric lead level testing, and resources providing guidance on how to best meet educational needs of children affected by lead. No national, no cost, on-line training with the outlined content designed for the early care and education workforce currently exists.

Unfortunately, a large knowledge gap exists in the United States on the lead hazards frequently found in children's environments and the life-long, negative, impact of even low levels of lead exposure during early childhood. In addition, many educators are not familiar with the evidence-based early interventions and teaching strategies to support lead exposed children. N4C is a committed partner in the development and dissemination of training and resources to reduce this knowledge gap and protect children. The development and launch of this on-line training

would be a very valuable training and outreach resource on preventing childhood lead exposure and providing early education interventions for lead-exposed children.

N4C looks forward to working with Cribs for Kids and utilizing our board of directors, members, and member networks to:

- Participate in the training module development workgroup
- Assist with technical review of training module draft by diverse faculty and practitioners
- Facilitate beta-testing of training module draft with diverse students and student parents from all regions of the United States.
- Disseminate information about the release and availability of the on-line training to members across the USA via an active listserv and at N4C sponsored events
- Review quarterly project progress and update reports to be distributed by Cribs for Kids.
- Participate in bi-annual performance measure review meetings to be facilitated by Cribs for Kids to monitoring project outputs and tracking progress during the project period.

The members of N4C are child development and early childhood education professionals from all across the United States, all of whom are invested in the quality and access of education provided to students, student parents and children alike. N4C is committed to supporting the work of the Cribs for Kids proposal.

Sincerely,

Kelly Jamison

New Hampshire Chapter

American Academy of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN®

April 7, 2023

U.S. Environmental Protection Agency
EPA Community Based Organizations
EJ Grant Application Selection Committee
Washington DC

Dear Committee Members:

New Hampshire Chapter of the American Academy of Pediatrics submits this letter detailing our committed partnership with Cribs for Kids, a community-based organization (CBO) located in Pittsburgh, PA, and their proposal requesting funding of their project to promote, distribute, and donate printed editions of the recently released children's board book, *Happy, Healthy, Lead-Free Me!*.

The mission of the New Hampshire Chapter of the American Academy of Pediatrics is to unite the pediatric community and the community at large around innovative solutions to the most critical challenges facing the children in New Hampshire, their families, and the pediatricians who care for them. With our mission in mind, NHAAP became an enthusiastic partner when approached by NH Division of Public Health Services, Healthy Homes and Lead Poisoning Prevention Program, about plans to development of children's board book that would both engage children and provide lead exposure prevention guidance to the adult reader. NHAAP, involved from its inception, provided clinical review of the book during its development. Since the book's release, we have enthusiastically promoted awareness of the book's availability to pediatricians as effective clinical adjunct. We are happy to report that both the pediatricians handing out the book and the families who are receiving it --- ***all love it!***

Childhood lead exposure is a significant pediatric environmental health issue across the United States. We are committed to working with Cribs for Kids as they promote, distribute, and donate printed editions of *Happy, Healthy, Lead-Free Me!*, both in English and the many additional languages available. We are committed to ensuring that as many pediatric healthcare providers as possible, nationwide, learn of this creative, innovative, anticipatory

guidance resource and valuable clinical adjunct. As the book was developed here, in the rural state of New Hampshire, NHAAP is also dedicated to Cribs for Kids' success is establishing a book donation program for pediatric healthcare providers and family support programs serving rural communities.

As a committed project partner, NHAAP will:

- Alert other State and Regional AAP Chapters of the book's release, availability and planned book donation program for rural areas. Provide information on the board book and associated resources to the American Academy of Pediatrics (AAP) for dissemination through national channels and partner networks.
- Alert other environmental and public health partners of the book's release, availability and planned book donation program for rural areas.
- Make books available at NHAAP-sponsored CME events for pediatric and family healthcare providers.
- Make available electronic request for complimentary copy URL available on NHAAP website.
- Provide clinical review of any future updated or revised book editions and associated resources
- Review quarterly project progress reports to be distributed to project partners by Cribs for Kids, to assist with monitoring project outputs and tracking progress to expected results throughout the project period.

Please feel free to contact me for further discussion of NHAAP activities as a committed project partner with Cribs for Kids.

Sincerely,

Erik Shessler, MD
President – NH Chapter of the American Academy of Pediatrics

April 5, 2023

U.S. Environmental Protection Agency
EPA Community Based Organizations
EJ Grant Application Selection Committee
Washington, DC

Dear Committee Members:

The New Hampshire Department of Health and Human Services, Division of Public Health Services (DPHS) enthusiastically supports Cribs for Kids' application to the U.S. Environmental Protection Agency for Environmental Justice grant funding.

This letter of commitment is written in support of the activities of the 'Cribs for Kids' community-based organization located in Pittsburgh, PA, and their proposal requesting funding of their project to distribute anticipatory guidance and education materials on childhood lead exposure, prevention strategies, and importance of pediatric blood lead level testing to environmental justice and rural communities. Many of their proposal's activities involve the promotion and distribution of the recently released children's board book, *Happy, Healthy Lead-Free Me!* and associated resources.

DPHS can proudly say that this children's board book, *Happy, Healthy, Lead-Free Me!* was developed by the DPHS's Healthy Homes and Lead Poisoning Program, with clinical support from New Hampshire Chapter of the American Academy of Pediatrics and the Region 1 Pediatric Environmental Health Specialty Unit at Boston Children's Hospital. The book's development was supported with funding from cooperative agreements with both the Center for Disease Control and Prevention (CDC) and the Environmental Protection Agency (EPA). This board book represents an innovative approach using children's literature to educate families on childhood lead exposure and the importance of testing by engaging both child and the adult reader to support successful delivery of anticipatory guidance.

The two-year book development and review process culminated with the inaugural printed editions of *Happy, Healthy, Lead-Free!*, printed with lead-free inks, arriving in December 2022. Not only were we delighted with the final product – but so were *many* others. The immediate positive interest and demand for the book across the nation was both affirming and overwhelming. It quickly became apparent that a national, non-profit partner with both a children's health mission and proven ability to manage inventory and order fulfillment logistics was needed -- and quickly. In June 2022, when the DPHS book development team first connected with Cribs for Kids, it was quickly apparent that the perfect collaborative partner to both take on, and take care of, *Happy, Healthy, Lead-Free Me!* had been found. The DPHS has been engaged in a positive, productive, collaborative partnership with Cribs for Kids ever since.

As the initial developer of this creative, evidence-based, anticipatory guidance resource for families, the DPHS is dedicated to its continued success, availability, and sustainability. As a Cribs for Kids partner, we will:

- Utilize DPHS's Office of Rural Health and its participation in the National Organization of State Rural Health Programs to support and promote a proposed board book donation program for pediatric health care providers and family support organizations located in rural, underserved areas across New Hampshire;

- Utilize the HHLPPP Health Educator, Lead Hazard Compliance Supervisor, and Nurse Case Managers to provide subject matter expertise on lead poisoning prevention and technical review of deliverables as needed for completion of proposed activities;

- Utilize the HHLPPP Health Educator to participate in presentations on the book's development and technical and clinical review process;

- Utilize in-person meetings, along with website and social media channels to share information on the book's availability and associated prevention resources with public health partners;

- Utilize the HHLPPP Health Educator to review and provide feedback on quarterly project progress measure reports to be distributed to project partners by Cribs for Kids; and

- Utilize the HHLPPP Health Educator to attend bi-annual progress measure review meetings, to be facilitated by Cribs for Kids, to assist with monitoring project outputs and tracking progress to expected results throughout the project period.

The New Hampshire Department of Health and Human Services, Division of Public Health Services endorses the Cribs for Kids proposal and strongly urge you to approve its funding. The results of this project will support the health of those living in rural, underserved areas, as well as those living in environmental justice communities, by providing families with anticipatory guidance on childhood lead exposure and prevention strategies while supporting children's early literacy development.

Sincerely,

Patricia Tilley, M.Ed.
Director
Division of Public Health Services

March 29 2023

U.S. Environmental Protection Agency
EPA Community Based Organizations
EJ Grant Application Selection Committee
Washington DC

Dear Committee Members:

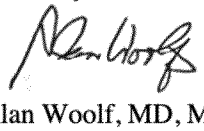
This letter of commitment is written in support of the activities of the 'Cribs for Kids' community-based organization (CBO) based in Pittsburgh, PA, and their proposal requesting funding of their project to distribute educational materials regarding childhood lead poisoning prevention to environmental justice and rural communities. The Region 1 New England Pediatric Environmental Health Specialty Unit (R1 PEHSU), in collaboration with and managed by the Pediatric Environmental Health Center (PEHC) at Boston Children's Hospital, routinely undertakes a number of outreach activities every year educating both health care professionals and the public about resources available to parents for the prevention of childhood lead poisoning. We commit to continue the enthusiastic collaboration with this partnership that we have enjoyed since the book's inception. In the proposed project, the R1 PEHSU/PEHC would specifically highlight the availability of and help with the distribution of the board book *Happy Healthy Lead Free Me* and its associated resources to its contacts among clinicians practicing in environmental justice and rural communities across New England and elsewhere in the United States. how the board book is an innovative and engaging clinical adjunct for pediatricians that supports successful prevention messaging to adult reader.

Definitions of EJ communities vary by state and we will endeavor to identify qualifying populations and the health care providers serving them. While definitions of EJ communities vary by state, we will identify environmental justice communities using the EPA definition of those having:

- Multiple, disproportionate environmental health burdens
- Population vulnerability
- Limited effective participation in decisions with environmental and health consequences

We will seek access to state-level GPS mapping which indicates areas of highest concentrations of lead-contaminated soils or older, likely contaminated housing. State-level blood lead testing statistics will reveal which communities have the highest percentages of elevated blood lead levels in the preschool-aged child population. Such analyses have, in the past, revealed neighborhood-level data that have overlapped heavily with previously designated environmental justice communities.

With subcontract funding, the Region 1 PEHSU/PEHC would be able to connect many more pediatric health care providers and public health organizations – and children – to the board book, childhood lead poisoning prevention fact sheets, and other lead-specific educational resources. We can identify many activities that we ~~could manage and~~ commit to for this project.



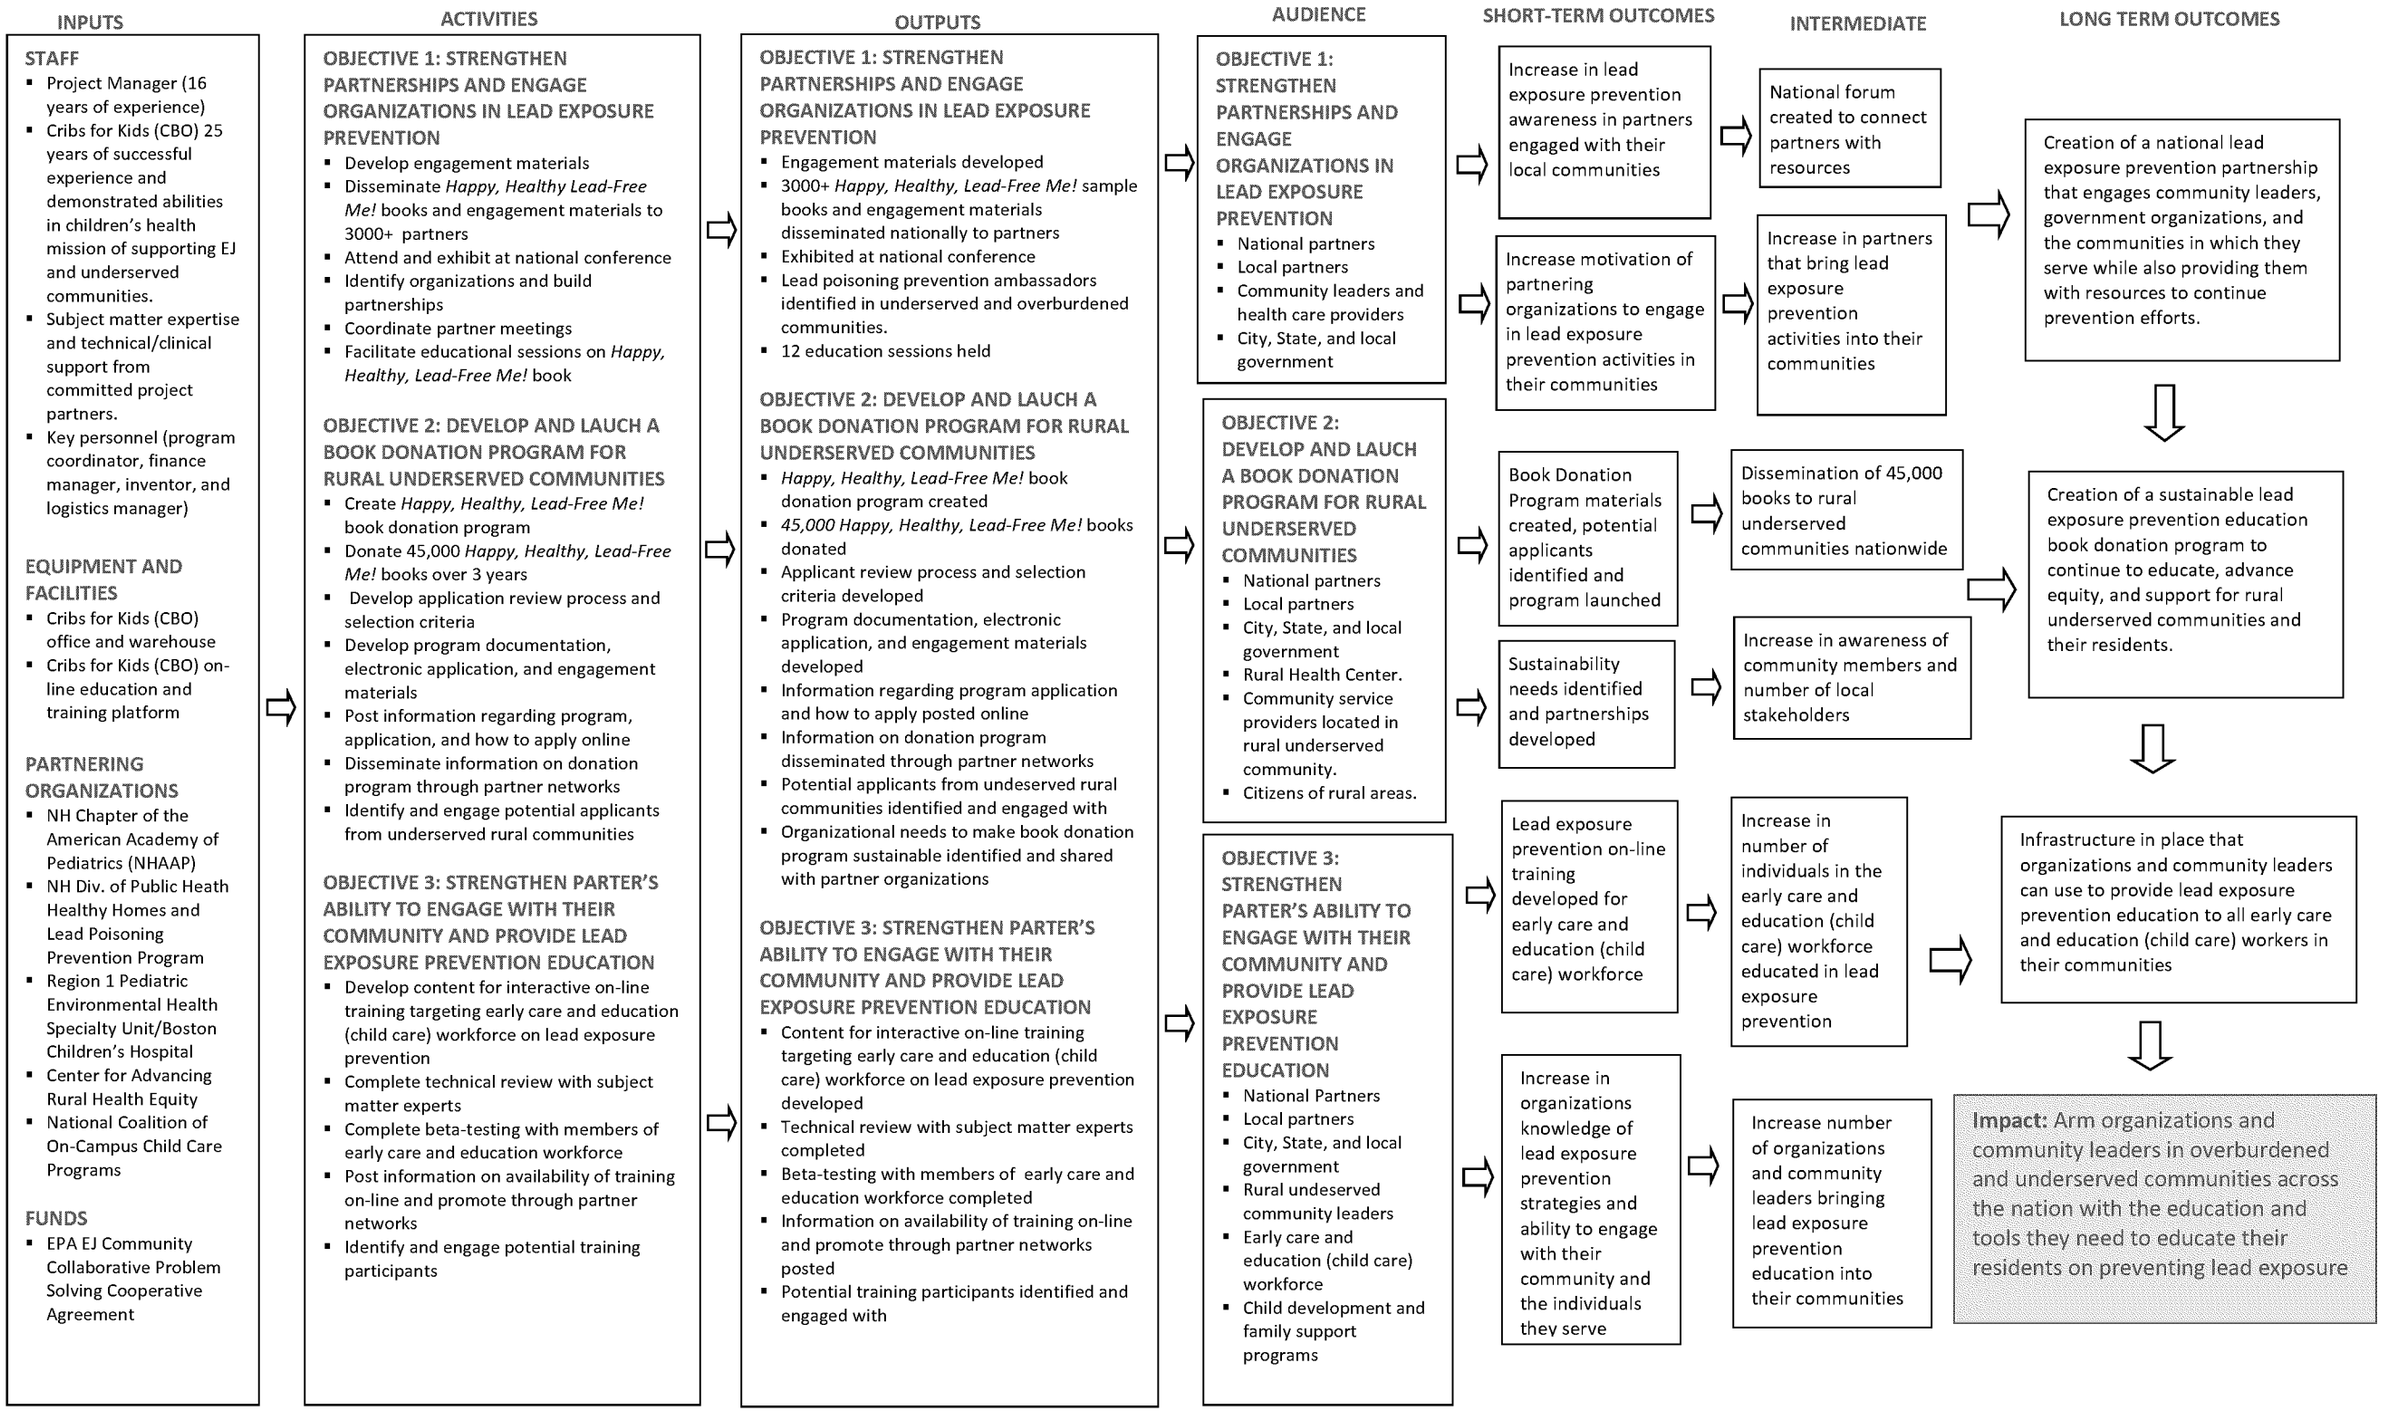
We believe our efforts will contribute to ensuring the project's success over its three years of operations. Specifically we would:

- Promote distribution of the board books and lead prevention resources through contacts with health care providers within hospitals, community health centers, office practices, and other clinics throughout New England, promoting its availability especially to those clinicians working in rural locales and environmental justice communities. Including the availability in toolkits available for newborn parents and primary health clinics.
- Promote the book's availability on-line at its website and its social media platforms, which include Twitter and Facebook
- Make other pediatric medical care providers, health systems, public health and environmental health departments, county health departments – aware of the book and the research supporting children's literature as effective vehicle for anticipatory guidance messaging to the adult reader.
- Work with state chapters of the American Academy of Pediatrics in alerting their pediatric health care provider members to the availability of the book.
- Work with other regional PEHSUs across the United States to promote the book and distribute flyers with information on acquiring the book for parents of young children to their target audiences in their catchment areas, including rural locales and environmental justice communities.
- Make available the flyers on how to obtain copies of the book at continuing education events, clinical education conferences, lead testing webinars, as is possible.
- Make available electronic requests for complimentary copies available to attendees of Region 1 PEHSU grand round presentations.
- Commit to reviewing quarterly project performance measure reports to be distributed to project partners by Cribs for Kids
- Commit attending bi-annual performance measure review meetings to be facilitated by Cribs for Kids, to assist with monitoring project outputs and tracking progress to expected results throughout the project period.

The Region 1 PEHSU/PEHC faculty and staff originally provided clinical review during the book's development and have provided continued, and enthusiastic, collaboration with book's release and promotion. We offer the continuation of this collaboration in support and promotion of the board book – largely in assisting with connections, introductions, and communication channels to pediatric healthcare and children's environmental health specialists, to help Cribs for Kids disseminate information on book availability and book donation program. A subaward contract is planned between Cribs for Kids and Boston Children's Hospital to facilitate the partnership and ensure the project's success.

We endorse the Cribs for Kids proposal and strongly urge you to approve its funding. The results of this project will be of great value to families living in rural areas as well as those living in environmental justice communities. Please feel free to contact my office for further information regarding the activities of R1 PEHSU and the PEHC at Boston Children's Hospital.

Cordially,



Alan Woolf, MD, MPH, FAAP, FAACT, FACMT
Director and Principal Investigator, Region 1 New England Pediatric Environmental Health Specialty Unit
Director, Pediatric Environmental Health Center, Boston Children's Hospital
Associate Chief Medical Education Officer, Boston Children's Hospital
Professor of Pediatrics, Harvard Medical School

	Description	Total
Personnel	• Project Manager @ annual salary at 12.5% of time on project = $41,500 for three years • Development Director to assist with project tech 15% of time on project (3yrs) = 27,000 for three years • Distribution Coordinator will be responsible for the Happy, Healthy, Lead Free Me books at 50% of time $70,500 for three years on project • Warehouse labor for book distribution, blended rate 12% of time $24,375 for three years on project	163,375.00
Fringe Benefits	• Project Manager 12.5% of salary (includes medical, dental, life insurance) = $3,600 for three years • Development Director 15% of salary (includes medical, dental, life insurance) = $2,835 for three years • Distribution Coordinator 50% of salary (includes medical, dental, life insurance) = $9,450 for three years • Warehouse Labor blended rate of 12% of salary (includes medical, dental, and life insurance) = $2,268 for three years	17,778.00
Conference and Travel	Conferences & Seminars Exhibit fees plus travel expenses • 2024 MCO NAMD Conference $3,250 to exhibit • Mileage to MCO conference. Pgh to DC and rtn, 242 miles each way @ .655 per mile = $ 317. • Hotel Accomodations for Conference $300 per night = $600 • MHPA Conference $5,000 to exhibit • Mileage to MHPA conference in DC from Pittsburgh and return 242 each way. Total 484 miles at $0.655/mi = $317.02 • MHPA Conference hotel accomodations $400 per night for two nights = $800.00	10,284.00
Equipment	• Educational updates and enhancements to the Safe Sleep Academy Safe and Healthy Home Section - modify/adjust to make training applicable nationally. Content will be available to freely use and modify for their States. Includes software to track partner contact and order information @$15,000/yr for three years. Website coding for updates to educational platform $3,600. Interactive online educational upgrades $3,540 for a total of $52,140 • Rural Health Book Donation Software - Submittable $5,200 each year for three years for $15,600, and DocuSign $3,200 for the first year and $2,700 for years two and three for a total of $8,600 = $25,200	77,340.00

Supplies	• Dell Vostro Laptop for Distribution Coordinator to be used to achieve program goals $879.00 • Books (Available in all languages). Will print 51,840 in all languages. 45,000 for distribution to rural communities, 6,840 for promotional books. Of the 6,840 promotional books 3,680 will be mailed to partners and organizations that request a copy. The remaining amount will be used at conferences and seminars to 51,840 books @ 2.50 each = $129,600 • Shipping Supplies: 1,204 labels at .60 each = $722.40	131,201.40
Indirect Costs	• Indirect building and utility expense @$3,640 per year for three years = $10,921.20 • Postage & Shipping of 3,680 books to be mailed as the promotion of the book program @ $6.25 each = $23,000 • Postage & Shipping of 1,204 cases of books to be shipped as the book donation program @ $25 = $30,100	64,021.60
Other	• Subaward to PEHSU-1 Boston Regional - Dr. Woolf Promotional expenses $10,000 per year for three years = $30,000 • Sub Award to NC4 for participating in the training module development work group, technical review, and beta testing. Disseminate information regarding the availablity of online training to members across the USA and participate in performance measure reviews. $2,000 per year for three years = $6,000	36,000.00
	Total	500,000.00

ACTIVITIES
OBJECTIVE 1: STRENGTHEN PARTNERSHIPS AND ENGAGE ORGANIZATIONS IN LEAD EXPOSURE PREVENTION
Develop engagement materials
Disseminate Happy, Healthy Lead-Free Me! books and engagement materials to 3000+ partners
Attend and exhibit at national conference
Identify organizations and build partnerships
Coordinate partner meetings
Facilitate educational sessions on Happy, Healthy, Lead-Free Me! book
OBJECTIVE 2: DEVELOP AND LAUCH A BOOK DONATION PROGRAM FOR RURAL UNDERSERVED COMMUNITIES
Create Happy, Healthy, Lead-Free Me! book donation program
Donate 45,000 Happy, Healthy, Lead-Free Me! books over 3 years
Develop application review process and selection criteria
Develop program documentation, electronic application, and engagement materials
Post information regarding program, application, and how to apply online
Disseminate information on donation program through partner networks
Identify and engage potential applicants from underserved rural communities
OBJECTIVE 3: STRENGTHEN PARTER'S ABILITY TO ENGAGE WITH THEIR COMMUNITY AND PROVIDE LEAD EXPOSURE PREVENTION EDUCATION
Develop content for interactive on-line training targeting early care and education (child care) workforce on lead exposure prevention
Complete technical review with subject matter experts
Complete beta-testing with members of early care and education workforce
Post information on availability of training on-line and promote through partner networks
Identify and engage potential training participants
OUTPUTS
OBJECTIVE 1: STRENGTHEN PARTNERSHIPS AND ENGAGE ORGANIZATIONS IN LEAD EXPOSURE PREVENTION
Engagement materials developed
3000+ Happy, Healthy, Lead-Free Me! sample books and engagement materials disseminated nationally to partners
Exhibited at national conference
Lead poisoning prevention ambassadors identified in underserved and overburdened communities.
12 education sessions held
OBJECTIVE 2: DEVELOP AND LAUCH A BOOK DONATION PROGRAM FOR RURAL UNDERSERVED COMMUNITIES
Happy, Healthy, Lead-Free Me! book donation program created
45,000 Happy, Healthy, Lead-Free Me! books donated
Applicant review process and selection criteria developed
Program documentation, electronic application, and engagement materials developed
Information regarding program application and how to apply posted online
Information on donation program disseminated through partner networks
Potential applicants from undeserved rural communities identified and engaged with
Organizational needs to make book donation program sustainable identified and shared with partner organizations
OBJECTIVE 3: STRENGTHEN PARTER'S ABILITY TO ENGAGE WITH THEIR COMMUNITY AND PROVIDE LEAD EXPOSURE PREVENTION EDUCATION
Content for interactive on-line training targeting early care and education (child care) workforce on lead exposure prevention developed
Technical review with subject matter experts completed
Beta-testing with members of early care and education workforce completed
Information on availability of training on-line and promote through partner networks posted
Potential training participants identified and engaged with
AUDIENCE
OBJECTIVE 1: STRENGTHEN PARTNERSHIPS AND ENGAGE ORGANIZATIONS IN LEAD EXPOSURE PREVENTION
National partners
Local partners
Community leaders and health care providers
City, State, and local government
OBJECTIVE 2: DEVELOP AND LAUCH A BOOK DONATION PROGRAM FOR RURAL UNDERSERVED COMMUNITIES
National partners
Local partners
City, State, and local government
Rural Health Center.
Community service providers located in rural underserved community.
Citizens of rural areas.
OBJECTIVE 3: STRENGTHEN PARTER'S ABILITY TO ENGAGE WITH THEIR COMMUNITY AND PROVIDE LEAD EXPOSURE PREVENTION EDUCATION
National Partners
Local partners
City, State, and local government
Rural undeserved community leaders
Early care and education (child care) workforce
Child development and family support programs
SHORT-TERM OUTCOMES
Increase in lead exposure prevention awareness in partners engaged with their local communities
Increase motivation of partnering organizations to engage in lead exposure prevention activities in their communities
Book Donation Program materials created, potential applicants identified and program launched
Sustainability needs identified and partnerships developed
Lead exposure prevention on-line training developed for early care and education (child care) workforce
Increase in organizations knowledge of lead exposure prevention strategies and ability to engage with their community and the individuals they serve
INTERMEDIATE
National forum created to connect partners with resources
Increase in partners that bring lead exposure prevention activities into their communities
Dissemination of 45,000 books to rural underserved communities nationwide
Increase in awareness of community members and number of local stakeholders
Increase in number of individuals in the early care and education (child care) workforce educated in lead exposure prevention
Increase number of organizations and community leaders bringing lead exposure prevention education into their communities
LONG TERM OUTCOMES
Creation of a national lead exposure prevention partnership that engages community leaders, government organizations, and the communities in which they serve while also providing them with resources to continue prevention efforts.
Creation of a sustainable lead exposure prevention education book donation program to continue to educate, advance equity, and support for rural underserved communities and their residents.
Infrastructure in place that organizations and community leaders can use to provide lead exposure prevention education to all early care and education (child care) workers in their communities
Impact: Arm organizations and community leaders in overburdened and underserved communities across the nation with the education and tools they need to educate their residents on preventing lead exposure

Ex. 6 Personal Privacy (PP)

Washington, DC 20011 • Ex. 6 - Personal Privacy (PP) • Ex. 6 - Personal Privacy (PP)

Education

Michigan State University – Bachelor's of Science in Forestry May 2012

Profile

- Middle School Math Teacher and Team Lead in DC Public Charter School
- Outdoor Recreation Program Manager with 16 years of experience with K-12 students in urban environments
- Exceptionally skilled at relationship building, cultivating culturally relevant experiences, and partnerships
- Committed to intergenerational community based stewardship of people and the environment

Accomplishments

- Middle School Math teacher building a classroom focused on the good for the community and the strength of learning
- Served more than 1,500 adults and children in classrooms and parks focused on STEAM and recreation programs
- Consistently develop a reputation for being resourceful, inclusive, and caring among students, communities, and coworkers
- Facilitated programs that raised more than $143,000 funds and independently secured two grants through networking
- Deliver relationship-based and trauma-informed program management, resulting in an abundance of resources, activities, and continuous engagement
- Completed six triathlons in one year and recently The Women's National Half Marathon

Areas of Expertise

- Team leadership
- Interpersonal skills
- Conflict resolution
- Curriculum development
- Classroom management
- Project based learning
- Program & event planning
- Staff & volunteer management
- Urban parks & green spaces
- Community & family engagement
- Logistics, operations, and organization (tasks & spaces)
- Forestry, watersheds, and ecosystems
- Out of school time programming
- Relationship building & storytelling
- Outdoor urban recreation

Relevant Experience

Middle School Math Teacher & Team Lead Washington, DC
Center City Public Charter Schools - Petworth Campus Aug. 2018 - Present

- Growing a classroom community centered on the learning and safety of all
- Provide cultural and age relevant math lessons to 6 - 8th graders aligned with the Eureka math curriculum
- Actively seek feedback from my co-teacher, students, peers and leaders on how to become a more effective teacher
- Work with families to facilitate academic conversations led by students (Student Led Conferences)
- Support a culture of error by modeling making mistakes and working with others to problem solve and improve
- Middle school team lead for 7th - 8th grade teachers; collect agenda items, facilitate meeting; disseminate information; organize middle school events; facilitator between teachers and leadership
- Co-planned a school wide outdoor adventure day in a park near the school & math statistics class at Kingman Island
- Cross collaborated with other campuses to provide project based learning experiences for students; resulting in students' math comic books being printed and distributed in the community
- Advocated for and supported changes in campus & network wide student and staff policies
- Hosted after school baking and biking clubs to engage students in math outside of the classroom
- Advisory Lead - teacher for a student small group focused on social emotional learning and development; took students on weekend field trips to strengthen relationships
- Professional development - continuous participant and facilitator; math lessons shared at network wide Celebration of Learning as examples of age and culturally relevant teaching

NatureFest Education Coordinator & Volunteer Coordinator Washington, DC
Friends of Kenilworth Aquatic Gardens Nov. 2016 - Aug. 2018

- Provide nature-based learning and outdoor experiences for 150 children (grades K – 6th) in four neighborhoods
- Maintain partnerships with the National Park Service and the DC Promise Neighborhood Initiative
- Direct camps for up to 100 students, including planning and implementing programs, managing a $30,000 budget, supervising up to 30 community staff members, purchasing supplies, and coordinating 27 vendors
- Interviewed, hired, and trained 14 teens and young adults to serve as camp junior counselors
- Document camp participation and produce quarterly reports
- Facilitate pre-training for hired employees and weekly partner meetings
- Plan and facilitate Family Nature Days for 200+ community members, designed to engage and build relationships between families living in the immediate communities with the park, the Friends group, and park rangers
- Recruit and support up to 290 volunteers for events, including Earth Day, National Public Lands Day, and monthly Saturday volunteer events

Additional Experience

My time in D.C. started as an AmeriCorps member serving Byte Back, Inc.as a computer literacy teacher for adult learners in Wards 5 - 8. I transitioned to being Byte Back's development associate, leading the sustainable growth of individual donors. After this, I spent time as an after school teacher and site lead for People Animals Love. We provided science and animal focused curriculum to students at John Burroughs, Miner and Stanton elementaries. While having these jobs I also volunteered for four years with the DC Chapter of the Sierra Club's - Inspiring Connections Outdoors program. One Saturday a month we took kids from the Washington Highlands neighborhood on DMV outdoor adventures.

Executive Director, Friends of Anacostia Park, Washington, DC

JUNE 2021 – PRESENT

- Grown operating revenue by 3x, leveraging individual and institutional engagement strategies to augment our base of financial support
- Established human resources, financial management and administrative protocols after sunsetting the National Park Foundation's fiscal sponsorship
- Strengthened our high-impact Board of Directors by increasing community representation and activating networks for resource development
- Spearheaded strategic planning with our Board of Directors and community of stakeholders, setting a clear vision for organizational development
- Brokered a healthy collaboration with the National Park Service and formalized our role as their official philanthropic partner
- Support the professional development of a growing team of 5 full-time employees and 24 part-time employees
- Pioneered community-driven conservation that has resulted in the creation of green jobs and the removal of 30,000 lbs of trash from the watershed
- Elevated community voice through participatory planning for Anacostia Park, an urban national park that has endured decades of institutional neglect

Chief Development Officer, National Winter Activity Center, Vernon, NJ

MARCH 2019 – JUNE 2021

- Shephered an anchor gift of $3.5 million for our capital campaign
- Spearheaded external communications for the 2020 NorAm Cup
- Developed strategic plan in partnership with our CEO and Board of Directors
- Raised $50,000 in corporate partnerships at our 3rd Annual Golf Outing and $100,000 through a crowdfunded annual campaign
- Developed capital campaign to secure $10,000,000 over 4 years

Skills

- Spanish fluency
- Portuguese proficiency
- HTML, cloud migration strategy
- Raiser's Edge, Salesforce and Blackbaud CRM management
- Classy, Charity Buzz and event planning expertise
- Member of the Friends Leadership Institute, a cohort of conservation executives
- Accomplished guitar player and winner of WAMU 88.5's 2016 Tiny Desk Contest

Director of Development, Reach Out and Read, New York, NY

JANUARY 2018 – MARCH 2019

- Raised $400,000 from individual contributions at our 20th Anniversary Gala
- Secured $350,000 DYCD contract to expand literacy initiatives across the city
- Stewarded corporate partnerships and volunteer engagement experiences at program sites, connecting business professionals to our mission and impact
- Developed our brand strategy and led the redesign of our website
- Designed our Giving Tuesday and Annual Appeal campaign, securing $20,000

Advancement Consultant, New York, NY

MARCH 2016 – DECEMBER 2017

Friends of Island Academy, December 2016-December 2017

- Secured $605,000 in foundation grants and individual donations
- Organized the Let Kids Be Kids crowdfunding campaign, raising $27,000
- Drove planning for our annual gala, securing $55,000 in contributions and a pledge from Mayor De Blasio to get all youth out of Rikers Island
- Raised $45,000 through our Annual Appeal mailer campaign

Goods for Good, August 2016-December 2016

- Led the planning of Kids For Good, securing $22,500 in sponsorships

New York City Mission Society, March 2016-August 2016

- Worked with CEO to develop diversity plan for Board of Directors
- Worked with VP of Development to build a donor prospect engagement plan

Development, Higher Achievement, Washington, DC

JUNE 2011 – MARCH 2016

Manager of Grants, August 2015-March 2016

- Led gala planning effort with our President's Council, raising $1.1 million
- Headed foundation engagement, securing over $500,000 in grants

Manager of Program Quality and Evaluation, December 2013-August 2015

- Constructed the proposal narrative that helped HA secure $12 million from the Department of Education's i3 Program
- Built Higher Achievement's financial model and dashboard, helping Directors refine program quality while reducing costs
- Planned the Middle School Matters Conference, convening local politicians and community leaders to discuss the future of extended learning
- Served as project manager for migration to a cloud-based infrastructure

Center Director of the Alexandria Achievement Center, June 2011-December 2013

- Served as head administrator for our rigorous extended learning program, managing 100 volunteers, 8 part-time staff and 3 full-time staff

Specialist, Advocates for Justice and Education, Washington, DC

NOVEMBER 2010 – JUNE 2011

- Served as case manager for children in need of special education services

Development Associate, Life Pieces to Masterpieces, Washington, DC

SEPTEMBER 2009 – OCTOBER 2010

- Led prospect research and proposal development with Executive Director

Development Intern, The SEED Foundation, Washington, DC

JUNE 2008 – NOVEMBER 2008

- Conducted prospect research for CEO, Raj Vinnakota, and provided logistical support for the opening of the SEED School of Baltimore

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

Preaward Compliance Review Report for All Applicants and Recipients Requesting EPA Financial Assistance

Note: Read Instructions before completing form.

I. A. Applicant/Recipient (Name, Address, City, State, Zip Code)

Name: FRIENDS OF ANACOSTIA PARK

Address: Ex. 6 Personal Privacy (PP)

City: WASHINGTON

State: DC: District of Columbia Zip Code: 20020-4619

B. Unique Entity Identifier (UEI): Ex. 6 Personal Privacy (PP)

C. Applicant/Recipient Point of Contact

Name: Richard Trent

Phone: Ex. 6 Personal Privacy (PP)

Email: richard@thefoap.org

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

N/A

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

N/A

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☒ Yes ☐ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

N/A

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

N/A

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

EPA Form 5700-54 (Rev 4-02)

	Description	Percentage of Total Budget	Annual Total Request	Total Request
Personnel	Project Administrator (PA): Eileen O'Rourke is the President and Executive Director for the ESJA and will serve as the Project Administrator (PA). She will be responsible for overseeing the administration of the grant and working with the Project Manager and Partners on all grant reporting requirements. The PA will also oversee the management and disbursement of project funds to the Project Partners. This will include supervising financial tracking, bookkeeping, accounting, and reporting. The PA will operate at [redacted] FTE for the project [redacted] annually for a project total of [redacted] Legal & Policy Director (LPD), Danielle Diamond, will help develop viable social and environmental justice policy solutions, outlined in a comprehensive action plan and report with community-driven prioritized strategies and policy recommendations. The LPD will operate at [redacted] for the project. [redacted] annually for a project total of [redacted] over the course of 3 years = [redacted]		Ex. 6 Personal Privacy (PP)	
Fringe Benefit	N/A			$0.00
Travel	N/A			$0.00
Equipment	N/A			$0.00
Supplies	N/A			$0.00
Contractual	N/A			$0.00
Construction	N/A			$0.00
Indirect Costs	ESJA will utilize project funds for the administration of grant funding.ESJA does not have a federally negotiated rate agreement for this type of work and is therefore charging a 10% de minimis rate.	10.00%	$16,666.60	$44,950.00
Other	EJSA will administer a sub-award to Dr. Sacoby Wilson. Dr. Sacoby Wilson will provide workshops to members of ESJA, SHEN, and the communities they serve related to environmental justice and community engagement strategies, work with SHEN and ESJA to develop and implement community-based participatory research strategies so that various elements of the Collaborative Problem Solving model are incorporated into all aspects of the activities that are described in the proposed project through community forums, assist the principal investigators in the development and implementation of a comprehensive Health Impact Assessment related to the Seaford community that actively encourages and incorporates community feedback at each stage of the process, provide technical assistance workshops related to the assessment of environmental justice issues present in the targeted areas of the project, assist in the analysis and interpretation that results from the implementation of the proposed Health Impact Assessment, and assist in the development and implementation of community-driven policy initiatives that address structural issues that may be at the root of the environmental burdens that are addressed in this proposal.		Ex. 6 Personal Privacy (PP)	
	ESJA will administer a sub-award to CSI EJ. Dr. Chris Heaney, Director of CSI EJ, and his team will deploy 4 stationary MODULAIR-PM units with sonic anemometers to obtain real-time estimates of PM concentrations, particle size distribution, wind speed, and wind direction, collect settled dust samples from the surfaces of the air monitoring units using sterile dual-tipped cotton swabs in liquid Aimes medium (Trained community members will collect weekly swabs and ship them to our Environmental Health Microbiology and Immunology Laboratory (EHMIL) for processing and analysis), analyze surface swabs for the presence and magnitude of poultry-specific markers of fecal contamination using RT-qPCR protocols, provide expertise in community-based air monitoring and data analysis, assisting in the design and implementation of community-based air monitoring programs, and conduct drives through areas of interest with real-time gas analyzers to measure concentrations of NH3, H2S, CH4, and CO2 at 1-second intervals.		Ex. 6 Personal Privacy (PP)	
	EJSA will administer a sub-award to Sussex Health & Environmental Network (SHEN). SHEN will offer expertise in environmental justice and community engagement methodologies, leverage existing relationships with local community-based organizations in Seaford, collaborate in the development and implementation of community-based participatory research strategies, collaborate in the development and implementation of community-driven policy initiatives based on collected data, assist in assembling a Community Advisory Board (CAB), and provide expertise and support in local environmental and public health issues, community outreach, and capacity building. SHEN will purchase neccessary equipment for stationary Air Monitoring.	22%	$36,666.67	$110,000.00
	EJSA will administer a sub-award to Ephphatha Care Foundation (ECF). ECF will offer expertise on current health issues impacting the community, such as increased rates of asthma and other health disparities faced by the community, provide translation and interpretation services to ensure effective communication with Creole-speaking community members, assist in community outreach and engagement efforts, particularly among the Haitian community, provide local knowledge and expertise on health and wellness issues related to environmental concerns, ensure the Haitian community is represented on the Community Advisory Board (CAB) and throughout the project.	4%	$6,666.67	$20,000.00
	EJSA will administer a sub-award to Latino Initiative on Restorative Justice (LIRJ). LIRJ will offer expertise in environmental justice and community engagement methodologies, particularly in the Latinx community, leverage existing relationships with local Latinx community-based organizations and community members in Seaford, collaborate in the development and implementation of community-based participatory research strategies and implementation of community-driven policy initiatives based on collected data, ensure the Latinx community is represented on the Community Advisory Board (CAB) and throughout the project, provide expertise and support in local environmental and public health issues, community outreach, and capacity building, and translation of relevant materials for the Latinx community throughout the SHADID project.	5%	$8,333.33	$25,000.00
	EJSA will administer a sub-award to Community Advisory Board members. Stipends = $2,000 x 5 members x 3years	6%	$10,000.00	$30,000.00
			Total	$494,450.00

Phase	Output	Short-term Outcomes	Intermediate Outcomes	Long-term Outcomes
1	Formation of a 5-Member Community Advisory Board (CAB)	Enhanced community involvement and representation in the project.	Improved communication between community members, technical experts, and policymakers	Increased community resilience and decision-making power
	Training and capacity building for 100 community members	Community members equipped with knowledge and skills to monitor and assess environmental and health risks	Active community participation in addressing environmental and health challenges	Empowered community advocating for their health and well-being
1-2	Comprehensive surface swab and air quality data with 300 sample swabs, 5 stationary air monitoring stations, and 36 mobile air monitoring runs	Informed understanding of the pollution sources and their impacts on the community	Data-driven strategies for mitigating pollution and enhancing public health outcomes	Improved air quality and reduction in pollution-related health issues
2	Create a Health Impact Assessment (HIA) report	Identification of potential health effects of existing pollution sources and the proposed biogas facility	Development of appropriate mitigation measures based on the HIA findings	Enhanced health equity and reduced health disparities
	Create 1 comprehensive action plan and policy recommendation report	Prioritized solution-based strategies to tackle environmental and health issues	Policy changes that positively impact health equity and address cumulative impacts and health inequities	Improved well-being and quality of life for the community
3	Implementation of strategies outlined in the action plan	Tangible progress towards reducing pollution levels and improving public health	Continuous improvement in community health and environmental conditions	Sustainable community-led initiatives addressing environmental justice issues
	Dissemination of best practices and replication	Increased awareness and adoption of effective strategies for addressing environmental justice issues	Broader improvements in public health and environmental quality in other communities facing similar challenges	Widespread improvement in environmental and public health outcomes across diverse communities and regions
All Phases	Thorough evaluation of the project's successes and challenges in each phase	Informed understanding of the project's effectiveness and areas for improvement	Adaptation and refinement of strategies based on evaluation findings	Long-lasting positive impact on environmental and public health

Dr. Christopher Heaney
Director
Community Science & Innovation for Environmental Justice

April 12, 2023

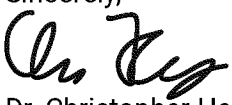
Mr. Jacob Burney
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
Washington, D.C.

Subject: Letter of Commitment for the Seaford Health Assessment and Data for Informed Decisions (SHADID) Project

Dear Mr. Burney,

I am writing on behalf of Community Science & Innovation for Environmental Justice (CSI EJ) to express our commitment to the SHADID project, in partnership with Environmental & Social Justice Associates (ESJA), Sussex Health & Environmental Network (SHEN), and other stakeholders. We recognize the importance of addressing the environmental and public health challenges faced by the underserved community of Seaford, Delaware, and are committed to lending our expertise and resources to support the project's goals.

As a technical partner, CSI EJ will contribute the following support to the SHADID project:



- Deploy 4 stationary MODULAIR-PM units with sonic anemometers to obtain real-time estimates of PM concentrations, particle size distribution, wind speed, and wind direction.
- Collect settled dust samples from the surfaces of the air monitoring units using sterile dual-tipped cotton swabs in liquid Aimes medium. Trained community members will collect weekly swabs and ship them to our Environmental Health Microbiology and Immunology Laboratory (EHMIL) for processing and analysis.
- Analyze surface swabs for the presence and magnitude of poultry-specific markers of fecal contamination using RT-qPCR protocols.
- Provide expertise in community-based air monitoring and data analysis, assisting in the design and implementation of community-based air monitoring programs.
- Conduct drives through areas of interest with real-time gas analyzers to measure concentrations of NH_3, H_2S, CH_4, and CO_2 at 1-second intervals.

Our involvement in the SHADID project extends beyond securing a sub-award or contract. As an institution dedicated to public health, we are committed to understanding and addressing gaps in regulatory permitting processes related to public health and air quality exposure. Our collaboration with the SHADID project will provide crucial insights into Seaford's exposure levels, which can inform policy changes at the local, state, and federal level.

By partnering with ESJA, SHEN, and community partners participating in the SHADID project, CSI EJ aims to contribute to the long-term health and well-being of Seaford's residents, while also advancing our own mission to improve public health and advance environmental justice on a broader scale. We are eager to leverage our expertise to address the pressing environmental justice and health inequity issues faced by the Seaford community.

As a designated environmental justice and climate action hub and a part of the Regional Air Monitoring of Poultry Emissions in Delmarva (RAMPED) project, which includes the Seaford, Delaware community and Sussex Health & Environmental Network, we feel we are particularly well suited to serve as a partner in the work of this proposed project. I have integrated the CPS Model into all of my community-engaged research, scholarship, and practice.

Sincerely,

Dr. Christopher Heaney

Washington, D.C.

Subject: Letter of Commitment for the Seaford Health Assessment and Data for Informed Decisions (SHADID) Project

Dear Mr. Burney,

I am writing to express the commitment of Ephphatha Care Foundation to the SHADID project. We have been deeply involved with the Haitian community in Seaford, advocating for their environmental and public health interests, particularly in the fight against the proposed regional scale biogas facility. This facility and its potential impacts threaten the health and safety of our Creole-speaking communities in the area.

As a partner in this project, Ephphatha Care Foundation will provide the following support:

- Offer expertise on current health issues impacting the community, such as increased rates of asthma and other health disparities faced by the community.
- Provide translation and interpretation services to ensure effective communication with Creole-speaking community members.
- Assist in community outreach and engagement efforts, particularly among the Haitian community.
- Provide local knowledge and expertise on health and wellness issues related to environmental concerns.
- Ensure the Haitian community is represented on the Community Advisory Board (CAB) and throughout the project.

Our organization has a vested interest in the success of the SHADID project, as we have been advocating for the Haitian community's health and well-being through our work centered on closing the gap of health care disparities in underserved areas. By participating in this partnership, we aim to address gaps in policy at the local, state, and federal levels while increasing civic engagement, community cohesion, and citizen empowerment, particularly for our Haitian community stakeholders. We look forward to continuing work with Sussex Health & Environmental Network and other partners to ensure the successful implementation of the SHADID project and its impact on the Seaford community.

Sincerely,

Emanie Dorival, CNRP
Founder and CEO

Charito Calvachi-Mateyko
Executive Director
The Latino Initiative on Restorative Justice

April 12, 2023

Mr. Jacob Burney
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
Washington, D.C.

Subject: Letter of Commitment for the Seaford Health Assessment and Data for Informed Decisions (SHADID) Project

Dear Mr. Burney,

The Latino Initiative for Restorative Justice is proud to confirm our commitment to the SHADID project. Over the past two years, we have been working on the ground with the Latinx community in Seaford, fighting against the proposed regional scale biogas facility. The facility's potential impact on the health and safety of our Spanish-speaking communities surrounding the site is of great concern to us.

In support of the SHADID project, The Latino Initiative for Restorative Justice commits to:

- Offer expertise in environmental justice and community engagement methodologies, particularly in the Latinx community.
- Leverage existing relationships with local Latinx community-based organizations and community members in Seaford, Delaware.
- Collaborate in the development and implementation of community-based participatory research strategies.
- Collaborate in the development and implementation of community-driven policy initiatives based on collected data.
- Ensure the Latinx community is represented on the Community Advisory Board (CAB) and throughout the project.
- Provide expertise and support in local environmental and public health issues, community outreach, and capacity building.
- Translation of relevant materials for the Latinx community throughout the SHADID project.

Our vested interest in this partnership extends beyond the SHADID project. We are dedicated to increasing civic engagement, community cohesion, and citizen empowerment, particularly for our Latinx community stakeholders. This project aligns with our mission and will help us advance policies at the local, state, and federal levels to protect our communities from environmental health hazards.

Through our participation in the SHADID project, we are confident that we can contribute to a more accurate analysis of exposure in Seaford, helping to address gaps in policy and regulatory permitting processes concerning public health and air quality exposure, and ensure the Latinx community interests are represented in this project. We look forward to collaborating with other partners and playing a vital role in ensuring the project's long-term success.

Sincerely,

Charito Calvachi-Mateyko

Subject: Letter of Commitment for the Seaford Health Assessment and Data for Informed Decisions (SHADID) Project

Dear Mr. Burney,

Sussex Health & Environmental Network (SHEN) is excited to express our commitment to the SHADID project. As a community-based organization focused on environmental justice and health equity in Sussex County, Delaware, we understand the importance of this project in addressing the underlying issues impacting local communities, particularly Black, Indigenous, and People of Color (BIPOC) and low-wealth communities.

In our ongoing fight against a proposed regional scale biogas facility, we have established strong relationships and alliances with organizations such as Ebenezer Haitian Seventh-Day Adventist Church, Ephphatha Care Foundation, and the Latino Initiative on Restorative Justice. These partnerships, along with our collaborations with the University of Maryland Center for Community Engagement, Environmental Justice, and Health (CEEJH) and the Johns Hopkins Bloomberg School of Public Health (JHBSPH), have strengthened our capacity to address environmental health threats and injustices in our community.

In support of the SHADID project, SHEN commits to:

- Provide Project Manager and Co-Manager from SHEN Staff
- Offer expertise in environmental justice and community engagement methodologies.
- Leverage existing relationships with local community-based organizations in Seaford, Delaware.
- Collaborate in the development and implementation of community-based participatory research strategies.
- Collaborate in the development and implementation of community-driven policy initiatives based on collected data.
- Assist in assembling a Community Advisory Board (CAB).
- Provide expertise and support in local environmental and public health issues, community outreach, and capacity building.

Our vested interest in this partnership goes beyond project SHADID. SHEN is dedicated to ensuring a clean and healthy environment for future generations in Sussex County. This project aligns with our mission and will help us advance policies at the local, state, and federal levels to protect our communities from environmental health hazards.

We are confident that our collaboration in the SHADID project will have a significant and lasting impact on the health and well-being of the Seaford community. We look forward to working together to achieve our shared goals.

Sincerely,

Maria Payan

April 11, 2023

Mr. Jacob Burney
Office of Environmental Justice & External Civil Rights
Environmental Protection Agency
Washington, D.C.

Dear Mr. Burney,

I am writing to express my commitment and that of my colleagues at the Center for Engagement, Environmental Justice and Health (CEEJH) at the University of Maryland to the proposal entitled, "The Seaford Health Assessment and Data for Informed Decisions (SHADID)" being submitted by the Sussex Health & Environmental Network (SHEN) in collaboration with their fiscal sponsor, the Environmental & Social Justice Associates (ESJA).

My name is Dr. Sacoby Wilson. I am a Professor and Director of the Center for Community Engagement, Environmental Justice, and Health (CEEJH). CEEJH was founded in 2011 as a laboratory and relaunched in 2021 as a Center to assist frontline and fenceline communities impacted by environmental, climate, and energy justice issues through technical assistance, scientific support, and use of community-engaged research approaches including the community-based participatory research (CBPR) framework and community science. CEEJH has been working throughout the Mid-Atlantic for over a decade with community-based organizations including Sentinels of the Eastern Shore (SESH). I also co-founded the Mid-Atlantic Environmental Justice Coalition (MAJC) with Namati which focuses on bringing frontline and fenceline communities together to develop a regional agenda to address environmental, climate, and energy justice concerns in the Mid-Atlantic. The Maryland EJ Coalition is actively engaged in these efforts in the state of Maryland.

Recently, CEEJH received a grant from the Robert Wood Johnson Foundation (RWJF) to launch the Mid-Atlantic Climate Action Hub (MATCH) whose goal is to provide technical assistance to communities impacted by environmental and climate justice issues. We have engaged community-based organizations in Prince George's County, Virginia, Eastern Shore/Southern Delaware, Philadelphia, and Baltimore to act as hubs for MATCH. SESH is a community hub for MATCH. In addition, I am Co-Director of the Community Engagement Core (CEC) for CHARMED, a NIH funded Center to provide scientific support to communities impacted by environmental health issues in the Maryland region. SESH is on the community partnerships board of the CEC. Additionally, I am co-Director of the recently funded Thriving Communities Technical Assistance Center (TCTAC)(National Wildlife Federation is the lead and the UMD EFC is a core partner) for Region III. Through this TCTAC, we have a hub structure using the same hub structure for MATCH. Through this TCTAC, we will provide technical assistance to communities impacted by environmental and energy justice issues to help them build their capacity to address their local concerns. The technical assistance will include providing grantwriting assistance. Additionally, with Namati (lead organization), I am helping to develop and implement the Mid-Atlantic Environmental Justice Academy which was funded through an EPA Collaborative Problem-Solving Grant. Through this funding, we will be training members of impacted communities and other stakeholders to develop their skills to address their local environmental justice concerns. Furthermore, through funding from Meta, I have launched the Climate Justice Fellows Program, a sister program to the Mid-Atlantic EJ

Academy, to train residents and other stakeholders on climate justice, equity, and health issues. Participants are required to complete a Capstone project as a way to provide direct support to a community experiencing climate justice, equity, and/or health issues.

CEEJH is excited to participate as a partner to provide the following technical assistance to SHEN and ESJA throughout the three years of grant funding that they receive from the EPA:

1. We will provide workshops to members of their organizations and the communities they serve related to environmental justice and community engagement strategies.

2. By way of community forums, virtual and in-person, we will work with SHEN and ESJA to develop and implement community-based participatory research strategies so that various elements of the Collaborative Problem Solving model are incorporated into all aspects of the activities that are described in the proposed project.

3. We will assist the principal investigators in the development and implementation of a comprehensive Health Impact Assessment related to the Seaford, Delaware community that actively encourages and incorporates community feedback at each stage of the process.

4. We will provide technical assistance workshops related to the assessment of environmental justice issues present in the targeted areas of the project.

5. We will assist in the analysis and interpretation that results from the implementation of the proposed Health Impact Assessment.

6. We will assist in the development and implementation of community-driven policy initiatives that address structural issues that may be at the root of the environmental burdens that are addressed in this proposal.

As a designated environmental justice and climate action hub, future impact of the Region III TCTAC, and close collaboration with the Mid-Atlantic Environmental Justice Coalition, we feel we are particularly well suited to serve as a partner in the work of this proposed project. I personally have almost 25 years of experience using the EPA Collaborative Problem-Solving Model dating back to my contribution to the efforts of the West End Revitalization Association to address the lack of basic amenities and the planned expansion of the 119 Bypass in the late 90s. I have integrated the CPS Model into all of my community-engaged research, scholarship, and practice since then. Should EPA have any questions about the outlined commitments, please reach out via the contact information noted below.

Sincerely,

Dr. Sacoby Wilson, Professor and Director

University of North Carolina, Chapel Hill Anthropology/Envir Sci University of North Carolina, Chapel Hill Envir Health Micro/Virol University of North Carolina, Chapel Hill Epidemiology

University of North Carolina, Chapel Hill W.K. Kellogg Health Scholars Program – Community Track

A. Personal Statement

I am an environmental and occupational epidemiologist with training in exposure sciences, microbiology, immunology, toxicology, and community-based participatory research (CBPR). I am Associate Professor of Environmental Health and Engineering, Epidemiology, and International Health and founding Director of the Environmental Health Microbiology and Immunology Laboratory (EHMIL), the Salivary Biomarkers of Infectious Diseases (SPID) Program, and Community Science and Innovation for Environmental Justice (CSI EJ) Initiative at the Johns Hopkins Bloomberg School of Public Health (JHSPH). I lead research that bridges the population and laboratory sciences with applications in four focus areas. First, is the developmental origins of disease via pregnancy and birth cohorts designed to advance understanding of how occupational and environmental exposures alter immune function and infectious disease pathogenesis during pregnancy and early life. Second, is zoonotic One Health "spillover" in workplaces with intensive human-livestock contact. Third, is the development and validation of non-invasive oral fluid-based immunological biomarkers of workplace pathogen exposure and infection to improve understanding of the natural history and ecology of infectious diseases, particularly those that are occupationally-mediated. Fourth, is CBPR focused on addressing community-identified environmental health and environmental justice concerns. I acquired the expertise needed to carry out the proposed pilot project through my leadership of a multidisciplinary team to address environmental health concerns of industrial food animal production (IFAP) air pollution in partnership with community leaders on the DelMarVa peninsula, government agencies, and academics.

B. Positions, Scientific Appointments, and Honors

Positions

2022- Director, Community Science and Innovation for Environmental Justice (CSI EJ) Initiative, Bloomberg School of Public Health, Johns Hopkins University, Baltimore, MD

2020- Director, Johns Hopkins Salivary Biomarkers of Infectious Diseases (SPID) Program, Bloomberg School of Public Health, Johns Hopkins University, Baltimore, MD

2017- Associate Professor, Environmental Health Sciences (primary), Epidemiology (joint), and International Health (joint), Bloomberg School of Public Health, Johns Hopkins University, Baltimore, MD
2013- Adjunct Faculty, Institute for Interdisciplinary Salivary Bioscience Research, University of California, Irvine, CA
2012- Director, Environmental Health Microbiology and Immunology Laboratory (EHMIL), Bloomberg School of Public Health, Johns Hopkins University, Baltimore, MD
2011-2017 Assistant Professor, Environmental Health Sciences (primary), Epidemiology (joint), Bloomberg School of Public Health, Johns Hopkins University, Baltimore, MD
2010-2020 Fixed-term Faculty, Department of Environmental Sciences and Engineering, UNC Chapel Hill
2009-2011 W.K. Kellogg Health Scholar, Community Track, UNC Chapel Hill
2008-2009 Postdoctoral Fellow, Occupational and Environmental Epidemiology, UNC, Chapel Hill
2007-2008 USEPA Pre-doctoral Trainee, Epidemiology Branch, USEPA, Chapel Hill, NC 2007-2008 Teaching Assistant, Department of Epidemiology, UNC Chapel Hill
2004-2006 NIEHS Pre-doctoral Trainee, Occupational and Environmental Epidemiology, UNC Chapel Hill
1998-2004 Research Assistant, Department of Environmental Sciences and Engineering, UNC Chapel Hill

Other Experience and Professional Memberships

2009-2010 STAR Grant Section Review Panel, Understanding the Role of Nonchemical Stressors and Developing Analytic Methods for Cumulative Risk Assessments. USEPA.

Restorative Justice
Consultant and Practitioner / Trainer

- Extensive experience as a Trainer specializing in Restorative Justice and Peacemaking Circles (trauma and resilience identification, awareness and healing methods applied to groups of people) to provide training and teach Circles to organizations and governments.
- Demonstrated expertise in Restorative Justice and its diverse applications by leading groups of individuals through restorative methods to provide a public forum and structure to communicate their trauma in a significantly personal and healing manner. This group process requires an experienced practitioner who can mobilize individuals to discuss resilience and trauma in a positive and curing manner.
- Proven history in training across various disciplines besides conflict transformation and restorative justice, including community relations with social equity orientation.
- Language Fluency: English and Spanish; knowledgeable in Hispanic/Latino and Indigenous Cultures.

AREAS OF EXPERTISE

- Restorative Justice
- Peacemaking Circle
- Racial Justice
- Hispanic/Latino/Indigenous Culture
- Healing arts/Double Reiki Master

EDUCATION

- **Pontifical Catholic University of Ecuador, PUCE** - Quito, Ecuador 1977 to 1988
  Doctorate Degree in Law; Attorney at Law; Bachelor's Degree in Law
- **Eastern Mennonite University** - Harrisonburg, VA - M.A. in Conflict Transformation 2005 to 2006
  Fields of study: Restorative Justice, Trauma Healing, Arts and Peacebuilding; Strategies for Trauma Awareness and Resilience; Circle Processes for Conflict Transformation.
  Practicum: Restorative Justice practices among indigenous people in Ecuador.

PROFESSIONAL EXPERIENCE

Virtual Racial Justice Healing Circles
- Program developer/Circle keeper for the community at large 2019 to Present

Healing Each Other Program
- Program developer, facilitator at Georgetown Work Release Program 2017 to pandemic

Rosario Calvachi-Mateyko & Associates, LLC - Lewes, DE 2009 to Present
Principal consultant
- International trainer on Restorative Justice, Circles and STAR-based training

Latino Initiative on Restorative Justice, Inc. - Lewes, DE 2009 to Present
Executive Director
- Trainer for diverse field applications of restorative justice

Delaware Humanities - Wilmington, DE 2009 to Present

COMMUNITY ACTIVITIES

- Founder member of NOW Delaware 2021 - curent
- Legislative Education Subcommittee African American History 2021
- Co-founder, weekly virtual Church of the People/Iglesia del Pueblo under national Poor People's Campaign 2020 - current
- Delaware Poor People's Campaign, Steering Committee member 2020 - 2021

- Interpreter, Unity Across Language & Lenguage Warriors 2020 - current
- Chair, *Votamos We Vote* Coalition 2019 - current
- Coordinator, Delaware Civil Rights Coalition 2017 - current
- Board member ACLU-DE 2016 - 2022
- Sussex Unity member, Lewes, Delaware. 2014 - 2016
- Member of the Delaware Heritage Commission appointed by Delaware Governor Markell 2011 - current
- Co-Chair, Delaware Hispanic Commission appointed by two last Delaware Governors 2011 - 2022
- Member, Delaware Coalition for Justice 2010 - 2013
- Chair, Historic and Cultural Committee from GACHA 2009 - 2011
- Founder Member, Executive Director, of Latino Initiative on Restorative Justice Inc. 2009 - current

Ex. 6 Personal Privacy (PP)

Ex. 6 - Personal Privacy (PP) | Arvada, CO 80004 | Ex. 6 - Personal Privacy (PP)

Strategic Business Consultant and Entrepreneur offering expertise in:

Short- & Long-Term Strategic Planning | Program Administration | Sustainable Agriculture Systems | Natural Resource Stewardship | Technology Integration | Food System Logistics Innovation

- **Visionary, strategic, engaging leader with a focus on the triple bottom line** – financial, social, and environmental stewardship through sustainable agriculture and regenerative farming.
- **6 years of relevant experience leading a sustainable agriculture organization** with a focus on strengthening local food systems and small-scale farming to feed people in under-resourced communities. 20+ years as an environmental consultant in natural resource management.
- **5+ years of direct staff leadership**; **15+ years of project team leadership.** Outstanding ability to recruit, engage, and mobilize multi-faceted teams to achieve ambitious, complex goals.
- **Big-picture systems thinker with scientific background and talent for integrating diverse perspectives** and resources into peak-performing interdependent systems.
- **Influential relationship-builder** who builds trust needed for public and private partnerships.
- **Respected as a values-driven, committed, thought leader and driver of transformational, sustainable agricultural practices**.

Work Experience

Principal| ECO Mission Solutions **2021 to Present**

Strategic business development consulting services to startup businesses in the agricultural and local food industry sector.

- **Developing fundraising plans** for ag-food businesses and partnering with funders to advance inclusive and sustainable food system solutions.
- **Building business plans** for ag-food startups. Most recently developed business plan for East Denver Food Hub.
- **Facilitating hub-to-hub coordination** to build local food networks such as Rocky Mountain High Plains Food Chain Collaborative.
- **Identifying infrastructure gaps** to enhance aggregation and distribution of regional products with a focus on food equity and sustainable technologies.
- Assisting with the **development of institutional procurement** practices and policy.

CEO | Founder, RADIANT INNOVATION **2020 to Present**

Early phase technology startup and consulting services

- **Identified opportunity to transform food system storage and distribution infrastructure** to better manage movement and preservation of perishable food. Envisioned a dynamic, cost-effective "post-harvest" and "last-mile" micro food hubs using sustainable, off-grid refrigeration design.
- **Engaged diverse teams of scientists and engineers**, researchers at Colorado School of Mines, NREL, as well as **entrepreneurs, patent attorneys, and strategic investment partners** in support of a rapid launch schedule.
- **Envisioned, researched, and co-developed an easily deployable, off-grid, refrigerated storage unit**, outfitting a shipping container with patentable hardware and software. Other uses: emergency food storage, vaccine distribution, and temporary mortuaries.
- **Currently positioning the company for new hires to support future development phases of the business.**

CEO | Founder, GOFARM **2014 to 2021**

A 501(c)3 nonprofit organization focused on systems-approach to building a plentiful supply of affordable, sustainably grown local food for healthy bodies, communities, and the planet.

- **Drove launch and development of all strategies, annual action plans, budgets, key initiatives, and programs for a sustainable nonprofit organization.**
- **Selected, onboarded, and mentored a peak-performing staff of 13** in program management, public health, agriculture, marketing/fundraising, food supply logistics, and community development, as well as bilingual community relations specialists and seasonal interns.
- **Developed strategic action plan for racial equity**: an equity statement, cultural responsiveness, and inclusion as key considerations in operations. Oversee staff participation in food equity committees.
- **Recruited, engaged, and collaborated with a powerful board of directors**.
- **Optimized impact of a $1.5M operating budget**. Oversee reporting to federal, state, county, city, and private funders representing ~65% of the revenues of the organization.

Researched, developed, and launched 3 major, interdependent programs:

- **Farmer Assistance** – Facilitated land access and mentoring for successful launch and profitable scale of 13 independent farm businesses operated by young, passionate farmers.
- **Local Food Share** –A community-supported agriculture model providing efficient distribution of produce to 800+ shareholders annually and buying from 48 small-scale production farmers.
- **Community Food Access** – A grant-funded approach to providing fresh local produce to 1,200 families annually in under-resourced communities while ensuring fair market prices for farmers.

Directed development of new technology:

- Led development of an innovative GIS assessment tool for efficient placement of micro food hubs (last mile distribution locations). Users include Jefferson County, the City of Lakewood, food banks, and other government stakeholders needing help finding good locations for food markets.

Noteworthy achievements:

- Jefferson County Public Health awarded GoFarm Public Health Champion of the year – 2016.
- Achieved >$2.0M in grant funding from private, state, and local organizations.
- Built a robust, sustainable organization.

Environmental Consulting Experience **2005 to 2015**

AQUA TERRA CONSULTANTS (2009-2015) – *Water resources consulting*

- Built and managed innovative project teams of 2-12, including environmental engineers and scientists as well as finance specialists to deliver on contract objectives.
- Developed proposals for federal, state, and local initiatives aimed at defining land use impacts on watersheds around the country for successful acquisition of contracts valued at $2-3M with multiple projects valued at $20K to $1M.
- Designed curricula for a workshop on US EPA's Climate Assessment Tool (CAT), a tool to help watershed managers assess and manage the impacts of climate change at a watershed scale.
- Provided technical assistance in development of a watershed management plan on Fort Benning military installation (~180K acres), addressing impacts of military activities, natural resources management, and climate change.

EARTH CARE RESOLUTIONS (2007-2009) – *Natural resources consulting*

- Acquired and delivered management of water and land resources for federal and state land managers.
- Facilitated the award of a multi-million-dollar contract with Strategic Environmental Research and Development Program for AQUA TERRA Consultants. Hired by AQUA TERRA following contract award.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Sincerely,

Stephen A. Martin
Director, Exempt Organizations

Project Summary Page

Project Title: Seaford Health Assessment and Data for Informed Decisions (SHADID)
Project Location: Seaford, Delaware (including Haitian Creole and Latinx communities); Zip Code: 19973
Applicant Information: Environmental & Social Justice Associates, Ex. 6 Personal Privacy (PP) Lake Leelanau, Leelanau County, Michigan. Project Administrator: Eileen O'Rourke; Eileen O'Rourke, Ex. 6 - Personal Privacy (PP)
Brief Description of Applicant Organization:
Environmental & Social Justice Associates (ESJA) bring deep professional experience, including in law, science, social justice, policy, community organizing and community advocacy to individuals, families, organizations, indigenous, diverse, low-income, ethnically rooted, and other communities experiencing environmental and social justice challenges. We strive to achieve community-driven, equitable and just solutions by providing direct impactful expert assistance.
Are you applying for the Small CBO Set Aside Track for $150,000 projects? No
Project Abstract: The Seaford Health Assessment and Data for Informed Decisions (SHADID) project seeks to address the disproportionate environmental and public health harms and risks faced by low-income and minority residents in Seaford, Delaware. The project will expand existing community air monitoring efforts, characterize particulate emissions, perform a full Health Impact Assessment on the proposed Bioenergy Devco Anaerobic Digester Facility, and use the EPA's EJ Collaborative Problem Solving (CPS) Model to develop and implement policy changes and an action plan that positively impacts health equity in the Seaford Community. The project will involve a community advisory board composed of 60% members from the community and 40% technical experts from public health and/or environmental health fields. The project aims to identify existing pollution sources, decrease social isolation, build community capacity, increase civic engagement, create policy changes that positively impact health equity, increase opportunities for building inclusive economies, and improve the wellbeing of communities experiencing health inequities through a replicable model that can be shared with communities across the region and beyond.
Project Type(s): This project includes community engagement, air monitoring, public education, and capacity building.
Special Considerations: This project will address Health Impact Assessments and Rural Areas
Environmental Issue: The SHADID project will focus on health inequities stemming from air pollution from existing industries and pollution that could be added by a proposed regional scale biogas facility in an environmental justice community.
List of Project Partners:
Dr. Sacoby Wilson (Technical)
Community Science & Innovation for Environmental Justice (CSI EJ) Dr. Chris Heaney (Academic/Technical)
Sussex Health & Environmental Network (SHEN) - Maria Payan, Michael Payan (CBO)
Ephphatha Care Foundation (ECF) - Emanie Dorival (Local Healthcare Foundation)
Latino Initiative on Restorative Justice - Charito Calvachi-Mateyko (CBO)
QUAPP: Our project will require a QUAPP.

b. Environmental and Public Health information of the Underserved Community

The percentiles provided from EPA's EJScreen tool inform perspective on how the selected block group or buffer area compares to the entire state, EPA region, or nation. According to the tool, if a given location is at the 95th percentile nationwide, this means that only 5 percent of the US population has a higher block group value than the average person in the location being analyzed. A 1.75 mile radius was analyzed utilizing EPA EJScreen which demonstrated disparate impacts to the project location on accord of several environmental justice indexes, pollution, and their sources. For example, in Environmental Justice indexes alone, this area ranked in **state percentile** 79 for Air Toxics Respiratory Health Index, 60 for Traffic Proximity, 81 for Lead Paint, 77 for Superfund Proximity, 71 for Underground Storage Tanks, and 63 for Wastewater Discharge. In regards to socioeconomic indicators, the area ranks at state percentile 81 for Demographics, 70 for People of Color, 87 for Low Income, 67 for Limited English Speaking Households, 84 for Less than a Highschool Education, 83 for populations Under 5 years of age, and finally, state percentile 67 for Low Life Expectancy.

In that same 1.75 mile radius analyzed around the proposed Bioenergy Devco site, EPA's EJScreen tool identifies that of the 3,216 population, 50% are people of color. 33% of the population are black, and 14% are Hispanic. Additionally, 4% of the population identifies as "some other race" not captured by EJScreen's American Community Survey demographics. Furthermore, educational attainment in the populations above age 25 demonstrate that 76% of the population holds no degree, but "some college" and below – high school graduate, no diploma, or less than 9th grade education. 11% of people speak a non-English language at home, and of that 11%, 5% speak English "less than very well". Spanish is the second most populous language spoken in the area behind English. The Center for Disease Control (CDC) and The Agency for Toxic Substances and Disease Registry (ATSDR) offer an Environmental Justice Index (EJI) Explorer tool that provides data identifying areas that may require special attention, or additional resources to improve health and equity, contribute to cumulative impacts on health, and generally measure environmental justice and health equity. A score of >0.75 or above indicates a high prevalence of a chronic condition test. Domain rankings are interpreted as an overall EJI score; for example, "0.85 signifies that 85% of tracts in the nation likely experience less severe environmental burden or social vulnerability attributable to that domain than the tract(s) of interest, and that 15% of tracts in the nation likely experience more severe environmental burden or social vulnerability attributable to that domain," per the CDC.

An analysis run on the proposed Bioenergy Devco site, located at 28338 Enviro Way, Seaford, DE 19973, yields the following results. Two census tracts, 504.03 and 518.01, located in Sussex County, directly encompass affected communities. For census tract 504.03, there are documented high prevalence of the following chronic conditions: Potentially Hazardous & Toxic Sites (notably National Priority List Sites, at .97) ranked at .75; regarding socioeconomics, No High School Diploma ranked at .76; household characteristics overall ranked at .84, with heightened domains specifically under youth (under 17 years of age) at .78 and ability to speak English "Less than Well", at .77. This census tract additionally ranked at .76 for prevalence of mobile homes. Three conditions out of five were identified under CDC's high pre-existing chronic disease prevalence: asthma, high blood pressure, and diabetes. The neighboring census tract, 518.01, demonstrated similar data points of interest: National Priority List Sites ranked at .91; Built Environment overall ranked at .77, indicating a lack of recreational parks (.78), and lack of walkability (.92); for socioeconomic indicators, there is a .77 ranking for overall poverty, and a .81 ranking for lack of internet access, affecting community members' ability to meaningful engage in public processes. This census tract ranked at .82 for mobile home prevalence, and demonstrated three out of five high pre-existing chronic disease prevalence: asthma, diabetes, and poor mental health. The underserved community directly impacted by disproportionate environmental and public health harms and risks is located near Seaford, Delaware, and is composed primarily of low-income People of Color who have limited English proficiency. The community is primarily Haitian Creole and Latinx and is disproportionately affected by the negative environmental and health impacts of large-scale poultry production and processing, commercial traffic emissions, and other industrial pollution. These atmospheric emissions include particulate matter, ammonia, and volatile organic compounds, which can contribute to health issues such as aggravated asthma, headaches, anxiety, and bronchitis. These pollutants can cause respiratory problems, heart disease, and other adverse health effects, particularly in children and the elderly. Our project focuses on addressing and assessing the cumulative impacts of existing pollution from various sources in the Seaford, Delaware community. These pollution sources include factory farms, industrial facilities, truck traffic, and an active EPA Superfund site, as well as the potential pollution from the proposed Bioenergy Devco site. Air pollution is a significant concern for the community, as emissions from industrial operations, transportation, and agricultural activities can lead to respiratory problems, cardiovascular diseases, and other health issues among community members. Water contamination is another critical issue, with the potential for hazardous substances from industrial activities, agricultural runoff, or inadequate wastewater treatment to contaminate local water sources. This contamination can pose serious health risks, including gastrointestinal illnesses, reproductive issues, and neurological disorders. Additionally, the community faces environmental justice disparities due to factors such as race, income, and lack of political power. This leads to disproportionate exposure to environmental hazards and associated health risks, resulting in health disparities and reduced access to resources and opportunities for addressing environmental and public health issues. The project seeks to achieve several environmental and public health outcomes that will directly benefit the underserved community. These results include: **Identification and mitigation of pollution sources:** By pinpointing the existing pollution sources, the project aims to develop targeted strategies to reduce or eliminate their impact on the community's health and environment. This will lead to improved air and water quality, which will benefit residents' overall well-being. **Increased community engagement and empowerment:** By involving the community in the decision-making process and providing them with the necessary tools and information, the

project seeks to empower residents to advocate for their own health and well-being. This will result in a more resilient and informed community, better equipped to address future environmental and public health challenges. **Enhanced health equity:** The project aims to address the disproportionate environmental and public health issues faced by the underserved community. By advocating for policy changes and raising awareness of these issues, the project seeks to create a more equitable distribution of environmental burdens and benefits, ultimately improving health outcomes for community members. **Inclusive economic development:** By promoting opportunities for inclusive economies, the project seeks to ensure that the economic benefits of environmental improvements are shared equitably among community members. This could include job creation in sustainable industries, support for local businesses, and access to resources for economic growth. **Improved well-being and quality of life:** As a result of the project's efforts to address environmental and public health issues, the underserved community will benefit from improved well-being and quality of life. This includes not only better physical health but also enhanced mental and emotional well-being due to reduced stress and anxiety related to environmental and health concerns. Seaford, situated in Sussex County, Delaware, is a small rural community. Seaford faces several challenges typical of rural communities, including limited access to healthcare, educational and employment opportunities, and fewer public resources compared to urban areas. The rural nature of Seaford contributes to its unique environmental and public health issues. The town's economy is largely based on agriculture, with a significant number of factory farms and other agricultural operations in the surrounding areas. While these activities provide employment for the local population, they can also contribute to air and water pollution and create other environmental concerns. Additionally, Seaford's rural location means that many residents rely on private wells for drinking water and septic systems for wastewater management, which can be vulnerable to contamination from nearby pollution sources. Limited access to healthcare facilities and public transportation can exacerbate health disparities, making it difficult for residents to access needed care and services. The project is tailored to address the unique challenges faced by the rural community of Seaford, taking into account its specific environmental and public health issues. One key component of the project is the implementation of a Health Impact Assessment (HIA), which will play a crucial role in understanding and addressing the environmental and public health concerns in Seaford.

c. Organization's Historical Connection to Underserved Community

Sussex Health & Environmental Network (SHEN) has a strong historical connection with the underserved community in Seaford, Delaware. The organization was founded in 2018 to address environmental justice issues in the region, particularly those related to the poultry industry and related infrastructure. Over the past 2 years, SHEN has been actively involved in working with low-income and underserved communities in Seaford to address local environmental and public health issues. SHEN has conducted numerous community meetings and events to inform residents about the environmental and public health impacts of the poultry industry and other polluting industries in the region, including the proposed anaerobic digester facility.

SHEN has also worked closely with community members, local community groups and faith based groups in Seaford to develop and implement community-based solutions. SHEN has partnered with local community groups to develop a community-driven air quality monitoring program, which has been successful in identifying areas of concern and advocating for improved regulatory oversight. SHEN has also worked with community organizations to advocate for stronger regulations and enforcement of environmental and public health standards in the poultry industry and related infrastructure.

Recent efforts in the community have focused on addressing the disproportionate environmental and public health impacts of the proposed anaerobic digester facility in Seaford and filing a Title VI civil rights administrative complaint to the EPA, when communities were left out of the opportunity to meaningfully participate in the public process. SHEN has been actively involved in providing information to residents about the potential impacts of the facility and advocating for the community's right to participate in the decision-making process. SHEN has partnered with other organizations to kickstart community-based air quality monitoring efforts in locations throughout Delmarva including Seaford through the Regional Air Monitoring of Poultry Emissions in Delmarva (RAMPED) Study. RAMPED aims to 1) to build capacity for community science, 2) characterize CAFO-related air pollutants in the Eastern Shore region of Maryland and Delaware, and 3) set up a local, community-led and maintained air monitoring network. The RAMPED study will help empower neighbors living near poultry CAFOs and biofuel transition stations to participate in scientific efforts that could help change policy regarding agricultural facilities in their communities, as well as help develop more sustainable and safe food animal production. With the deployment of different air monitors, we will establish a community-driven and maintained air monitoring network in the Delmarva region. There are no air monitors in close proximity to impacted communities to assess exposure to pollutants originating from poultry CAFOs and associated biofuel infrastructure. The Delaware Department of Natural Resources and Environmental Control (DNREC) maintains an air monitor in Sussex County, DE; however, this air monitor does not adequately capture the pollutants that community members proximal to poultry CAFOs are experiencing. SHEN recently submitted a public comment about the lack of monitors to sufficiently capture poultry production pollution in Sussex County, DE. A hyperlocal air monitoring network in this area with strong regional CAFO influence is needed to understand the impact that the industrial food industry has on community members in the Delmarva peninsula. To characterize air pollutant mixtures in these communities and build capacity for community science, we will establish a local network of monitors and provide trips with gas analyzers to measure concentrations of ammonia (NH3), hydrogen sulfide (H2S), methane (CH4), carbon dioxide (CO2), as well as particulate matter (PM) of differing sizes and composition. Overall, SHEN's historical connection to the underserved community in Seaford has been characterized by active engagement, advocacy, and collaboration with community members and organizations. The organization has worked to empower communities to address local environmental and public health issues and to promote environmental justice in the region.

Community Driven Participation: Community-driven participation is a key aspect of our project plan. We believe that the community members who are most impacted by the environmental and public health issues should be directly involved in developing solutions to these issues. Therefore, we will establish a Community Advisory Board (CAB) to ensure that community members are meaningfully engaged in the decision-making process and have ownership over the data and monitoring process. The underserved community's residents and organizations have been actively involved in developing the current project plan through community meetings, consultations, and collaborative planning sessions. Community members have played a crucial role in shaping the project's direction and will continue to be involved in decision-making processes throughout the project's implementation. We recognize that the community members are the experts on the environmental and public health issues that impact their daily lives. Therefore, we are committed to ensuring that they have a meaningful role in all aspects of the project. We will work with the CAB to plan, design, and implement all aspects of

the project in a way that reflects the concerns and priorities of the community. We believe that by empowering the community to take an active role in the decision-making process, we can achieve more effective and sustainable solutions that address the environmental and public health challenges faced by the underserved community.

d. EJCPS Model

For the SHADID project, several elements of the EJCPS Model will be undertaken: **Community Vision and Strategic Planning:** The project has already engaged with the community to create a vision and strategic plan to address environmental and public health issues. This process will continue to evolve as the project progresses and new insights are gained. **Capacity Building and Leadership Development:** The project will invest in capacity building and leadership development for community members, equipping them with the skills and knowledge to monitor air quality in their own neighborhood, address environmental justice issues and advocate for policy changes. **Issue Identification and Research:** The project will identify key environmental and public health concerns through community engagement, research, and data collection, including air monitoring and Health Impact Assessment of the 1.75 mile radius around the proposed Bioenergy Devco Anaerobic Digester Facility. **Multi-Stakeholder Partnerships and Leveraging of Resources:** The SHADID project will establish partnerships with various stakeholders, including academia, local organizations, and technical experts, to leverage resources and expertise in addressing the identified issues. **Conflict Resolution and Negotiation:** The project will employ conflict resolution and negotiation strategies to address disagreements and facilitate consensus among stakeholders, ensuring that the needs and priorities of the community are met. **Developing and Implementing Solutions:** Based on the research findings and community input, the project will work collaboratively with stakeholders to develop and implement policy changes and interventions that positively impact health equity and environmental justice. **Evaluation, Lessons Learned, and Replication:** The project will conduct ongoing evaluation and monitoring of its progress, extracting lessons learned and refining strategies as needed. These findings can be shared with other communities facing similar challenges, serving as a model for addressing environmental justice issues.

e. Project Linkages

The SHADID project promotes environmental justice and civil rights at federal, tribal, state, and local levels by addressing the disproportionate environmental and public health burdens faced by low-income and minority communities in Seaford, Delaware. The project aims to create policy changes and interventions that positively impact health equity, environmental justice, and civil rights. **Federal level:** By aligning with EPA's EJ Collaborative Problem Solving (CPS) Model and engaging with federal agencies, the project ensures that its objectives are in harmony with federal environmental justice and civil rights priorities. This collaboration can lead to increased support, resources, and policy advocacy at the federal level. **Tribal level:** Although the SHADID project primarily focuses on Seaford, Delaware, the strategies and lessons learned can be adapted and shared with tribal communities facing similar environmental and public health challenges. Engaging with tribal leaders and organizations can promote knowledge exchange, collaboration, and tailored solutions that respect tribal sovereignty and cultural context. **State level:** The project can collaborate with state agencies and policymakers to influence state-level regulations and policies addressing environmental justice and public health concerns. By demonstrating the effectiveness of its interventions and policy changes in Seaford, the project can serve as a model for other communities across Delaware and contribute to statewide progress on environmental

justice and civil rights. **Local level:** At the local level, the SHADID project actively engages with community members, local organizations, and government officials to address environmental and public health issues. By building the capacity of community members, fostering multi-stakeholder partnerships, and developing tailored solutions, the project supports local efforts to create a more equitable, healthy, and just environment for all residents.Through these various approaches, the SHADID project aims to promote environmental justice and civil rights across federal, tribal, state, and local levels, ensuring that the needs and priorities of underserved communities are recognized and addressed in the decision-making process.

f. Partner and Collaborate

The project promotes collaboration by engaging partners from academia, a local health foundation, CBOs, faith-based groups, and local government to develop and implement solutions addressing environmental and public health issues. The proposed partnerships through this project are continuations of long standing collaborations that SHEN and partners have established over the years while working on environmental justice (EJ) issues in both the region, hyperlocally, and nationwide. Diversity in partnerships enhances the project's ability to achieve its goals and ensures a comprehensive approach to addressing the community's concerns (CPS Element 4). The approach to both long standing work and this project centers on the continuation of valuable partnerships with members of the community and the incorporation of other stakeholders. Community partners will be leaders involved with all phases of the project to ensure efforts are culturally competent and responsive to community needs (CPS Element 1). Furthermore, SHADID will promote the use of the CPS model within all partner organizations to ensure cohesiveness across stakeholders and into EJ solutions. Through this collaboration, the SHADID project aims to create policy change and other intervention methods that will empower community members to continually access spaces and resources to make long-term progress.

Dr. Sacoby Wilson will provide workshops to members of ESJA, SHEN, and the communities they serve related to environmental justice and community engagement strategies, work with SHEN and ESJA to develop and implement community-based participatory research strategies so that various elements of the Collaborative Problem Solving model are incorporated into all aspects of the activities that are described in the proposed project through community forums, assist the principal investigators in the development and implementation of a comprehensive Health Impact Assessment related to the Seaford community that actively encourages and incorporates community feedback at each stage of the process, provide technical assistance workshops related to the assessment of environmental justice issues present in the targeted areas of the project, assist in the analysis and interpretation that results from the implementation of the proposed Health Impact Assessment, and assist in the development and implementation of community-driven policy initiatives that address structural issues that may be at the root of the environmental burdens that are addressed in this proposal.

Dr. Chris Heaney, Director of CSI EJ, and his team will deploy 4 stationary MODULAIR-PM units with sonic anemometers to obtain real-time estimates of PM concentrations, particle size distribution, wind speed, and wind direction, collect settled dust samples from the surfaces of the air monitoring units using sterile dual-tipped cotton swabs in liquid Aimes medium (Trained community members will collect weekly swabs seasonally and ship them to our Environmental Health Microbiology and Immunology Laboratory (EHMIL) for processing and analysis), analyze surface swabs for the presence and magnitude of poultry-specific markers of fecal contamination using RT-qPCR protocols, provide expertise in community-based air monitoring and data analysis, assisting in the design and implementation of community-based air monitoring

programs, and conduct drives through areas of interest with real-time gas analyzers to measure concentrations of NH3, H2S, CH4, and CO2 at 1-second intervals.

Sussex Health & Environmental Network, **Maria Payan & Michael Payan** will act as Project Manager and Co-Manager, respectively, and offer expertise in environmental justice and community engagement methodologies, leverage existing relationships with local community-based organizations in Seaford, collaborate in the development and implementation of community-based participatory research strategies, collaborate in the development and implementation of community-driven policy initiatives based on collected data, assist in assembling a Community Advisory Board (CAB), and provide expertise and support in local environmental and public health issues, community outreach, and capacity building. **Ephphatha Care Foundation** will offer expertise on current health issues impacting the community, such as increased rates of asthma and other health disparities faced by the community, provide translation and interpretation services to ensure effective communication with Creole-speaking community members, assist in community outreach and engagement efforts, particularly among the Haitian community, provide local knowledge and expertise on health and wellness issues related to environmental concerns, ensure the Haitian community is represented on the Community Advisory Board (CAB) and throughout the project. Emanie Dorival of ECF is deeply involved in the Haitian community and specifically the local Haitian church where her husband is the pastor. She regularly cosponsors meetings and events with SHEN at the church.

Latino Initiative on Restorative Justice will offer expertise in environmental justice and community engagement methodologies, particularly in the Latinx community, leverage existing relationships with local Latinx community-based organizations and community members in Seaford, collaborate in the development and implementation of community-based participatory research strategies and implementation of community-driven policy initiatives based on collected data, ensure the Latinx community is represented on the Community Advisory Board (CAB) and throughout the project, provide expertise and support in local environmental and public health issues, community outreach, and capacity building, and translation of relevant materials for the Latinx community throughout the SHADID project.

Environmental & Social Justice Associates will offer expertise in grant administration, finance management and project reporting, as well as work with SHEN, its Partners and the communities they serve in the development and implementation of community-driven policy initiatives to address the social injustices and environmental burdens that are the subject of this project.

The table below provides details on the partners. Community, advocacy, and technical partners described will be assisting with activities outlined to achieve project objectives. More information on groups attached. Each partner has a vested interest in addressing environmental and public health issues in the community and promoting environmental justice. Dr. Sacoby Wilson and his colleagues at the Center for Engagement, Environmental Justice and Health (CEEJH) at the University of Maryland have a vested interest in the Seaford Health Assessment and Data for Informed Decisions (SHADID) project due to their expertise in community-engaged research approaches, including the community-based participatory research (CBPR) framework and community science. CEEJH is committed to assisting frontline and fenceline communities impacted by environmental, climate, and energy justice issues through technical assistance and scientific support. The Latino Initiative on Restorative Justice is dedicated to increasing civic engagement, community cohesion, and citizen empowerment, particularly for Latinx community stakeholders. This project will support their mission of advancing equitable policies at the local, state, and federal levels to protect communities from

Partner	Project Role	Expertise & Resources
Dr. Sacoby Wilson (Technical)	Lead Health Impact Assessment examining cumulative impacts of existing pollution and assessing potential pollution sources associated with the proposed Bioenergy Devco project	Expertise in Health Impact Assessments, environmental justice, and community engagement
Community Science & Innovation for Environmental Justice, Dr. Chris Heaney (Technical)	Contribute expertise in community-based air quality monitoring, data analysis, and microbial source tracking marker analysis	Expertise in air quality monitoring, data analysis, and academic resources
Sussex Health and Environmental Network (Community-Based Organization): Maria Payan, Michael Payan	Support community outreach, engagement, and capacity-building activities	Expertise in local environmental and public health issues, community outreach, and capacity building
Ephphatha Care Foundation (Local Health Foundation): Emanie Dorival	Assist with community engagement and provide resources and support for Haitian Creole-speaking residents	Expertise in community engagement, local health, language and cultural support, and resources for Haitian Creole-speaking residents
Latino Initiative on Restorative Justice (Community-Based Organization): Charito Calvachi-Mateyko	Support engagement of Latinx community members and promote restorative justice	Expertise in Latinx community engagement, restorative justice, and cultural competency
Environmental & Social Justice Associates, Eileen O'Rourke, Danielle Diamond	Handle grant reporting and expense management, help the community develop proposed policy initiatives	Expertise in environmental policy, social justice, and non-profit grant management and administration

environmental health hazards. SHEN has demonstrated years of dedication working towards a clean and healthy environment for future generations in Sussex County. Ephphatha Care Foundation has been advocating for the Haitian community's health and well-being through work centered on closing the gap of health care disparities in underserved areas. As a designated environmental justice and climate action hub and a part of the Regional Air Monitoring of Poultry Emissions in Delmarva (RAMPED) project, which includes the Seaford, Delaware community and Sussex Health & Environmental Network, Community Science & Innovation for Environmental Justice are particularly well suited to serve as a partner in the work of this proposed project, due to their continued integration of the CPS Model into all community-engaged research, scholarship, and practice. We will leverage these existing partnerships to continue to strengthen connections with community members through community science and community-based participatory research (CBPR) - a framework that has enabled communities disproportionately burdened by environmental hazards to collect their own data and use these data to understand and address cumulative impacts of these hazards on human health. The team will also draw on years of partnerships with a wide variety of stakeholders and numerous resources available through partners, as well as within our respective teams.

The applicant organization plans to maintain and sustain these relationships through regular communication, ongoing collaboration, and shared learning experiences.

The project intends to fund partners' participation in the project. The proposed financial transactions will comply with applicable requirements in 2 CFR Part 200 on competitive procurement or for subrecipients EPA's Subaward Policy or EPA Guidance on Participant Support Costs.

2.0 Project Activities / Milestone Schedule / Detailed

a. Project Activities

The following is a detailed description of the steps our organization will take to meet the program objectives and execute the project:

Step 1: Community Engagement and Formation of Community Advisory Board (CAB): We will host a series of community meetings to engage local residents and stakeholders in the project. During these meetings, we will establish a Community Advisory Board (CAB) composed of 60% community members and 40% technical experts from public health and environmental health fields. The CAB will adopt leadership roles, decision making procedures, steps for conflict resolution, and formal operating procedures (**CPS Elements 1-5**). In Step 1, as part of the community engagement plan, the team will primarily use the community-based participatory research (CBPR) framework and the US EPA EJ CPS model. Dr. Wilson (technical

partner) has extensive experience using both in his work as shown by his resume and his extensive publication record and will help guide the team in the use of CBPR and the EPA EJ CPS model. Community members, partners, and the CAB will meet regularly to develop outreach plans, assign project tasks, identify areas of interest for mobile air quality monitoring; hosts for stationary MODULAIR-PM air quality monitoring; teams for settled dust sample collection; and agree on how to educate and update the community regularly (CPS Elements 3 and 4). Actualizing the principle that CBPR builds on the strengths and resources of the community, the CAB will play a major role in the proposed project. If funded, the CAB will be engaged in all stages of the research process including development of study design, methods, implementation, review, and dissemination. They will also provide input via monthly conference calls and email with the team to discuss issues and challenges related to trust, group conflict, power, and shared decision-making. We will discuss and select strategies for addressing these issues (CPS Elements 4 and 7). The CAB will also address any cultural concerns, language concerns, and compensation for project participants. CAB members will receive $2,000/year. In CBPR, it is critical for partners to agree upon the terms of collaboration and ensure equity between partners including addressing social inequality. Studies have shown that there are power imbalances between researchers and community partners. To address these issues, the CAB will play a pivotal role in informing how the partnership operates and how the study is implemented. In collaboration with SHEN, the team will develop MOUs that will outline the terms of collaboration, including: (1) co-design (and redesign as needed) of study questions, framework, and methods; and (2) co-generation of deliverables, data ownership, data sharing, and dissemination. Trust is an essential component of successful activities in CBPR. These activities include regular check-ins; a Google Calendar to ensure that all activities, projects, and events are featured on a yearly calendar that can be electronically accessed.

CAB meetings will be held virtually via Zoom. Project Leaders will host initial meetings with the CAB to review the project. The CAB will engage and meet with project partners, along with community members to begin tailoring the Project to self-identified goals and activities, further integrating CPS Elements 1 and 2. **Anticipated products/results:** The formation of a CAB that represents the interests of the community and provides valuable guidance throughout the project. A community-led CAB in collaboration with technical experts will serve to increase awareness of environmental justice issues and resources throughout the region, increase connectivity between environmental justice advocates and frontline/fenceline communities.

Step 2: Training and Capacity Building: We will provide training and capacity-building opportunities for community members to effectively monitor and assess environmental and health risks. This includes teaching them how to use mobile and stationary air monitoring equipment, participating in settled dust collection, interpret data, and conduct health impact assessments. Community members will learn how to identify, monitor, and evaluate data collected using air quality monitors from CSI EJ. Dr. Sacoby Wilson, Director, CEEJH, who has extensive experience working with underserved and adversely impacted communities, will contribute to capacity building activities through collaborative HIA training and engagement efforts (CPS Elements 1 and 2). The project team will work with partners to co-develop any additional training materials, leveraging the CPS Model and any materials developed previously by partners, strengthening community science and empowerment approaches to addressing EJ issues.

Anticipated products/results: An empowered community with the knowledge and skills necessary to actively participate in the project and address environmental and health challenges.

Step 3: Air Quality Monitoring and Data Collection: Community members will work together with technical partners to conduct air quality monitoring using mobile and stationary monitoring equipment as well as characterizing particulate emissions through the analysis of surface swabs used on the monitors. During Step 3, the project director and community will work with project partners, other residents, CEEJH, and Dr. Heaney to co-develop a community-based air quality monitoring plan. In a series of meetings, community members will work with project partners to discuss the best routes for mobile monitoring and the best stationary locations. The CAB will provide feedback on the community-based air quality monitoring plans in each area. Data will be collected on various air pollutants, including particulate matter (PM 1, PM 2.5, PM 10), ammonia, carbon dioxide, methane, and hydrogen sulfide. We will deploy 4 stationary MODULAIR-PM units with sonic anemometers (QuantAQ Inc., Somerville, MA) in Seaford, DE to obtain real-time estimates of PM concentrations, particle size distribution, wind speed, and wind direction. These 4 units will supplement the MODULAIR-PM unit set up as a control in Selbyville, DE in late 2022 to provide an air monitoring network. The Selbyville monitor will be approximately 35 miles away from the four monitors located in Seaford, DE. The Selbyville monitor was deployed in a lower density poultry CAFO and commercial traffic area to evaluate background concentrations. The 4 newly located MODULAIR-PM units will be located near sites of concern determined in collaboration with local community members and community partners in Seaford, DE. The monitors will be hosted by community members after oral consent is obtained. The goal is to deploy monitors proximal to sites of concern in Seaford, DE, as well as in a comparison or background area (Selbyville), to best capture the pollutant, wind speed and wind direction patterns. This configuration will allow us to better capture the variability in plumes and pollutant dispersion into adjacent communities. Figure 1 provides estimates of potential locations for the new stationary units in close proximity to poultry CAFOs, poultry processing facilities, biogas plants, refineries, and anaerobic digesters, areas with high commercial traffic rates, as well as the location of community-identified ammonia plumes. Trail cameras will also be attached to the MODULAIR units with permission of the unit host, oriented to capture time lapsed photos of the site of interest and potential particle-generating events (airing out of barns, removing litter, truck traffic, etc). The combination of air quality data with time-stamped photos will provide evidence of activities that can be associated with observed PM concentrations.[24] To enhance source apportionment and determine spatial variability, we will conduct drives through the areas of interest with the real-time gas analyzers (G2204 & G2103 Picarro Inc, Santa Clara, CA) to measure concentrations of NH_3, H_2S, CH_4 and CO_2 at 1-second intervals. The G2103 and G2204 gas analyzers (Picarro Inc, Santa Clara, CA) use Cavity Ring-down Spectroscopy to measure real-time measurements with parts-per-trillion levels of detection of ammonia, and methane and hydrogen sulfide, respectively. We will collect settled dust samples from the surfaces of the body of the air monitoring unit and solar panel of the 5 MODULAIR-PM units using sterile dual-tipped cotton swabs in liquid Aimes medium. Swabs from the main monitor unit and solar panel will be collected weekly for approximately a 3-week period each season. We plan to collect the following samples: swabs from the front and back of the monitor unit (2), swabs from the front and back of the solar panel (2) and a blank swab per monitor (1). Grouping sampling periods into seasons allows for an assessment of seasonal trends. In addition, utilizing sampling periods each season will be a more manageable workload for community partners. Swabs from each week will be collected by trained community members and shipped to Dr. Heaney's Environmental Health Microbiology and Immunology Laboratory (EHMIL) for processing and analysis. Surface swabs will be analyzed for the presence and

magnitude of poultry-specific markers of fecal contamination, LA-35 and cytB, using reverse transcription-quantitative polymerase chain reaction (RT-qPCR) protocols. Having weekly source-tracking information, we can then look at potential associations between the fecal marker and PM concentrations in the 8, 12 and 24 hours prior to swab collection. With changing PM concentrations due to wind speed and wind direction, looking at PM past 24 hours might not give an accurate picture of exposure. Throughout the air monitoring process, all project partners will meet regularly with project manager and each other to further facilitate community plan, design, and implementation of air monitoring. The CAB, project manager, co-manager, technical partners, and community leaders will host a two-day retreat to discuss challenges related to trust, conflict, power, and decision-making. Community leaders develop strategies for addressing issues. project manager and co-manager, CAB and CEEJH host report back workshops for communities to present progress, data collected, and breakout rooms utilized for increased cross community interaction (CPS Elements 6 and 7). **Anticipated products/results:** Comprehensive air quality data including microbial source tracking marker particulate characterization that will inform the development of solution-based strategies and help evaluate the effectiveness of pollution reduction efforts.

Step 4: Health Impact Assessment: In collaboration with public health researchers, the community will conduct a full community-led Health Impact Assessment (HIA) to evaluate the potential health effects of existing pollution sources and the proposed biogas facility. The project introduces a significant technical advancement by utilizing a unique multi-method approach for assessing the impact of cumulative impacts and environmental injustice on exposure to air pollution, and its impact in regard to health outcomes and impacts. This approach includes the establishment of not only a new air quality monitoring network, but the implementation of a health impact assessment. HIAs play a crucial role in recognizing and remedying the inequitable and disproportionate distribution of environmental hazards that burden environmental justice communities. The community-led aspect of the HIA is essential to ensure an inclusive, relevant, and effective assessment (CPS Elements 1, 2). Through direct lead and involvement of the affected community in the HIA process, our community-led HIA will provide a more accurate and comprehensive understanding of health impacts of factory farms, industrial facilities, truck traffic, active EPA Superfund sites, as well as the potential pollution from the proposed Bioenergy Devco site. Community members provide valuable local knowledge and lived experiences that will inform the assessment process and ensure that its findings reflect the reality of the affected community. As noted previously, the project area suffers disproportionate impacts in regards to the built, social, and natural environments in which the community members live, play, work, and worship. Community members play a critical role in leading efforts to assess, recommend, and evaluate health impacts of decisions that affect their community. A key step in this process is to collect qualitative and quantitative information to create a profile of existing health conditions. This information can then be used to identify, evaluate, and prioritize assessed health impacts, in particular to the impact both the proposed biogas facility, and existing concentrated sources of pollution will exacerbate. It is crucial to involve stakeholders in the assessment process, which will include both community members (leading), and partners. **Anticipated products/results:** A detailed HIA report that provides valuable insights into the health risks faced by the community and informs the development of appropriate mitigation measures. Unlike previous efforts that have typically relied on a single method for exposure assessment, such as stationary monitoring networks, Geographic Information Systems (GIS), or satellite remote sensing, this approach combines the strengths of each method combined with the

community knowledge and power to provide an unparalleled understanding of exposure disparities and cumulative impacts within the study area. By engaging in this process, community members help ensure there is a comprehensive understanding of the health impacts locally, and can make informed choices that promote the health and well-being of the community.

Step 5: Development of Solution-Based Strategies and Policy Recommendations: Utilizing the data gathered from air quality monitoring and the HIA, the CAB, in collaboration with community members, technical experts, and policymakers, will utilize the EPA's EJ CPS Model to create and prioritize solution-based strategies to tackle the identified environmental and health issues. Additionally, they will develop a policy recommendation report that addresses local, state, and federal policies, incorporating cumulative impacts and health inequities in zoning, permitting, and other relevant policies.

In order to create these solution-based strategies, the team will disseminate research data and results from the air quality monitoring to government agencies and commissions in the study area, following the CPS model (CPS Elements 4-5). The team will incorporate CPS Elements 4-6 through: engagement with regulators, county and state officials, policymakers, and other stakeholders to develop solutions-based strategies informed by the air quality data collected during Step 3 activities. The CAB will act as the steering committee for the CPS structure. These dissemination meetings will serve as a bridge to translate information into new programs, policies, and initiatives to improve environmental health and eliminate environmental health disparities in the communities. The team will work with the appropriate county and state agencies to help disseminate information for additional community stakeholders, policymakers, and other interested groups. **Anticipated products/results:** A comprehensive action plan detailing specific strategies for mitigating pollution and enhancing public health outcomes in the community, along with a policy recommendation report focused on local, state, and federal policies that take into account cumulative impacts and health inequities in zoning, permitting, and other pertinent policy areas.

Step 6: Implementation of Action Plan: The community will collaborate with stakeholders to implement the strategies outlined in the action plan (CPS Elements 4, 5). This may include policy advocacy, infrastructure improvements, or the development of community-led initiatives. The data, outputs and outcomes achieved throughout the project will be incorporated into these collaboratively crafted action plans. Action plans will additionally demonstrate increased community capacity to perform environmental and environmental health surveillance; increased capacity to perform community-driven initiatives such as air quality monitoring; and finally, promote action planning that includes equity, cumulative impacts, and environmental justice as central considerations. This plan may also serve as a tool for advancing EJ work in other regions. **Anticipated products/results:** Tangible progress towards reducing pollution levels and improving public health in the underserved community.

Step 7: Dissemination of Best Practices and ReplicationActivity: We will share the lessons learned and best practices from our project with other communities, organizations, and policymakers facing similar environmental justice challenges. This may include presenting at conferences, hosting workshops, or publishing articles and case studies. Action plans, results, and best practices will be disseminated within other communities who face disproportionate and cumulative climate impacts across the state and beyond, via trusted community-based organizations and partners. Knowledge-sharing will additionally occur with any action plans created, via partnerships with other CBOs, partners, and dissemination through applicable county

or state agencies (CPS Elements 4-7). **Anticipated products/results:** Increased awareness and adoption of effective strategies for addressing environmental justice issues in other communities, leading to broader improvements in public health and environmental quality.

Evaluation and Reporting Continuously Throughout Project: We will continuously evaluate the project's progress by tracking key performance indicators and gathering feedback from community members and stakeholders. We will also provide regular progress reports to funding agencies and other interested parties. **Anticipated products/results:** A thorough evaluation of the project's successes and challenges, which will inform future initiatives and help other communities facing similar issues.

b. Milestone Schedule:

Phase	Activity	Milestones	Timeframe
1	Continued Community Engagement and Formation of CAB	Formation of CAB	Month 1-3
	Training and Capacity Building	Community training on air monitoring equipment, data interpretation, and HIA	Month 4-6
1-2	Air Quality Monitoring and Data Collection	Completion of air quality data collection	Month 7-18
1-3	Health Impact Assessment	Completion of HIA report	Throughout Entire Project
2	Development of Solution-Based Strategies and Policy Recommendations	Completion of action plan and policy recommendation report	Month 21-23
3	Implementation of Action Plan	Progress in reducing pollution levels and improving public health	Month 24-33
	Dissemination of Best Practices and Replication	Sharing lessons learned, presenting at conferences, hosting workshops, and publishing articles	Month 34-36

c. Itemized Budget Sheet / Budget Narrative: Please see the attached budget sheet.

3.0 Environmental Results – Outputs, Outcomes, and Performance Measures (Logic Model)

Environmental Results – Outputs, Outcomes: Please see attached Logic Model.

b. Performance Measurement Plan: The Performance Measurement Plan for the SHADID project is designed to ensure that project performance and progress are continually tracked and monitored throughout the project period. The plan will help evaluate the effectiveness of the project in achieving the expected outputs and outcomes, and will facilitate necessary adjustments as the project progresses. **Establish Key Performance Indicators (KPIs):** To measure project progress effectively, we will establish Key Performance Indicators (KPIs) that align with the project's outputs and outcomes. These KPIs will serve as quantifiable benchmarks for evaluating the project's success in achieving its goals. Example KPIs include the number of community members trained, the amount of air quality data collected, and the number of policy recommendations adopted. **Periodic Review Meetings:** Periodic review meetings will be held with project partners, stakeholders, and the Community Advisory Board to discuss the project's progress, share findings from the data analysis, and address any challenges or concerns. These meetings will provide an opportunity to collaboratively review and evaluate the project's performance and make adjustments as needed to improve its effectiveness. **Continuous Improvement and Adaptation:** Based on the insights gathered from data analysis, progress

reports, and review meetings, the project team will adapt and refine strategies as necessary to address challenges and improve project performance. This continuous improvement process will ensure that the project remains responsive to the community's needs and maximizes its potential for achieving the desired outputs and outcomes. **Final Evaluation and Reporting:** At the end of the project period, a comprehensive final evaluation will be conducted to assess the project's overall success in achieving its objectives. This evaluation will consider the project's performance against the established KPIs and the extent to which the project has achieved its expected outputs and outcomes. The results of this evaluation will be documented in a final report that will be shared with project partners, stakeholders, and the community. The Performance Measurement Plan will provide a robust framework for tracking and monitoring project performance, ensuring that the SHADID project remains focused on achieving its goals and delivering meaningful environmental and public health improvements for the underserved community in Seaford, Delaware. **c. Sustainability Plan and Community Vision** The SHADID project aims to empower the underserved community in Seaford, Delaware, by addressing environmental and public health issues and promoting health equity. The Sustainability Plan and Community Vision outline how we will leverage the results and momentum of the project, in conjunction with Sussex Health & Environmental Network's (SHEN's) current work, to advance the community's long-term goals and objectives and ensure the project's impact extends beyond its initial implementation. **Building on SHEN's Initiatives and Community Engagement:** The project will build on SHEN's existing work in the community, which focuses on addressing environmental justice and health inequities through community engagement, empowerment, and ongoing air monitoring projects. SHEN is a community hub partner on the Mid-Atlantic Climate Action Hub steering committee, a part of Region III TCTAC, and if funded, EPA's Environmental Justice Thriving Communities Grantmaking Program. These provide additional infrastructure for community members to sustain efforts past the duration of this project. SHEN has been heavily engaged in the fight against the proposed Bioenergy Devco regional-scale anaerobic digester project, which poses significant threats to the environment and public health. The organization has worked with community members to file a Title VI civil rights administrative complaint to the EPA and has educated and empowered the local Haitian Creole and Latinx communities. By collaborating with SHEN, we will benefit from their expertise, experience, and established relationships within the community, ensuring a more effective and sustainable project implementation. **Community Ownership and Empowerment:** A critical component of the project's sustainability is fostering a sense of community ownership and empowerment. By actively involving community members in project activities, decision-making processes, and the Community Advisory Board, and leveraging SHEN's community engagement initiatives, we aim to instill a sense of responsibility and pride in the project's outcomes. This approach will create a vested interest in sustaining the project's momentum and achieving long-term change, as well as addressing ongoing challenges, such as the Bioenergy Devco project. **Capacity Building and Skill Development:** We will provide training and capacity-building opportunities for community members to develop the necessary skills to address environmental and public health challenges. By equipping residents with the knowledge and tools to monitor air quality, conduct health impact assessments, and advocate for policy changes, and building on SHEN's ongoing air monitoring projects using stationary and mobile monitors with cameras to ground truth observations, we will help create a community that is self-reliant and capable of continuing the project's work in the future. **Collaboration with Local Organizations and Stakeholders:** To ensure long-term support for the project, we will engage

and collaborate with local organizations, stakeholders, and policymakers throughout the project's implementation, including SHEN and other community partners. By forging strong partnerships with these entities, we will create a network of support that will help sustain the project's initiatives and contribute to the community's long-term goals, such as challenging harmful projects like the Bioenergy Devco proposal. **Integration into Existing Community Initiatives:** To maximize the project's impact and sustainability, we will integrate our activities into existing community initiatives led by SHEN and other organizations that focus on environmental justice, health equity, and inclusive economic development. This approach will help leverage the resources and expertise of established organizations and ensure that our project aligns with and supports the broader community vision. **Long-Term Funding Strategies:** To support the project's sustainability, we will explore and pursue long-term funding strategies, including applying for grants, securing sponsorships, and exploring collaborations with private and public partners. By diversifying our funding sources, we aim to ensure the project's continued financial stability and its ability to advance the community's goals and objectives. **Dissemination and Replication:** We will share the lessons learned, best practices, and success stories from our project with other communities, organizations, and policymakers facing similar environmental justice challenges. This will promote the adoption of effective strategies in other communities and contribute to broader improvements in public health and environmental quality nationwide. By implementing this Sustainability Plan and Community Vision, we aim to create lasting change in the Seaford community and contribute to a healthier, more equitable future. Our approach focuses on building on SHEN's initiatives, fostering community ownership and empowerment, capacity building, collaboration with local organizations and stakeholders, integration into existing community initiatives, long-term funding strategies, and dissemination and replication. By leveraging the results and momentum of the SHADID project, we will strive to not only address immediate environmental and public health concerns but also build a strong foundation for ongoing community-led action against environmental injustice and health disparities, such as the fight against the Bioenergy Devco project. This holistic approach will ensure that our project's impact extends far beyond its initial implementation, benefiting the Seaford community and other communities facing similar challenges across the nation.

4. Programmatic Capability

a. Organizational Experience:

ESJA is a new organization, in that it was just recently formed, yet our staff have significant proven experience developing and implementing organizational and financial management systems that meet 501(c)(3) best management practices. ESJA also hase decades of experience administering and managing government and other large grants and individual organizational budgets exceeding 4 million dollars. ESJA also has significant legal and policy advocacy experience, including working on-the-ground with frontline communities dealing with environmental injustices, in particular having worked extensively with SHEN and Project Manager and Principal Investigator, Maria Payan, in numerous states across the Eastern United States, including Sussex County Delaware on matters relating to the Bioenergy Devco development proposal.

Staff Experience/Qualifications of the Project Manager

Maria Payan, Project Manager and the Co-Founder and Director of SHEN has 20+ years of experience in community organizing and will work with all stakeholders. As project manager, she will continue and advance the CBPR project and campaigns to protect overburdened communities with the community input in the decision-making process. Maria is the Co-Founder

and Director of SHEN, a designated environmental justice and climate action hub partner, part of the Region III TCTAC, and a member of the Mid-Atlantic Environmental Justice Coalition. SHEN is also part of the ongoing Regional Air Monitoring of Poultry Emissions in Delmarva (RAMPED) Study. SHEN has been actively working in the Seaford community for the past 2 years and working in Sussex County, Delaware for nearly 6 years. SHEN, in collaboration with our local partners, filed a Title VI administrative complaint with the EPA focused on the proposed Bioenergy Devco Anaerobic Digester facility's permitting process. Other engagement with the Seaford community is outlined above. Maria has worked with Danielle Diamond of EJSA for over a decade fighting environmental injustices associated with industrial food animal production and its related infrastructure.

Michael Payan of SHEN, will serve as the co-manager, supporting the Project Manager working with partners to achieve project objectives. Michael and SHEN have ongoing long-term relationships with the listed partners and extensive experience in community-based participatory research as a community organizer and marketing and communications specialist with broad experience applying digital marketing tools to campaigns for non-profit organizations and individuals working to advance social and environmental justice. In this capacity, Michael has worked to build people power, economic opportunities, and a safe environment, uplift the voices of impacted overburdened communities and ensure their participation in developing sustainable community-oriented solutions, and build a collective voice for healthy communities and inclusiveness in representation. He is the Co-Founder of SHEN, organizing around community health issues such as assessing impacts related to industrial chicken farming, GIS mappings and health training. Michael has contributed to community and citizen science projects including work with CEEJH and Johns Hopkins University School of Public Health. Michael has worked on environmental justice and health issues related to industrial chicken farming in the Delmarva region. Michael has also worked with CEEJH to perform health impact assessments, used GIS to assess differential burden of industrial chicken farming, provided training and workshops to impacted residents, and provided technical assistance on zoning and planning issues.

Dr. Chris Heaney, an environmental and occupational epidemiologist with training in exposure sciences, microbiology, immunology, toxicology, and community-based participatory research (CBPR). Dr. Heaney is Associate Professor of Environmental Health and Engineering, Epidemiology, and International Health and founding Director of the Environmental Health Microbiology and Immunology Laboratory (EHMIL), the Salivary Biomarkers of Infectious Diseases (SPID) Program, and Community Science and Innovation for Environmental Justice (CSI EJ) Initiative at the Johns Hopkins Bloomberg School of Public Health (JHSPH). Dr. Heaney specializes in CBPR focused on addressing community-identified environmental health and environmental justice concerns.

Sacoby Wilson, PhD, is an Associate Professor at the Maryland Institute for Applied Environmental Health, School of Public Health, UMD-College Park, where he directs the Center for Community Engagement, Environmental Justice, and Health (CEEJH). He has 25+ years of experience as an EJ advocate and 20+ years of experience as an environmental health scientist in exposure science, air quality monitoring, GIS mapping, and CAFOs. Dr. Wilson will act as a technical expert on this project. Dr. Wilson has almost 25 years of experience using the EPA Collaborative Problem-Solving Model integrated the CPS Model into all of his community-engaged research, scholarship, and practice.

Eileen O'Rourke, has significant prior experience administering government and other large grants in her former role as Executive Director for GoFarm, as well as in other capacities. She

has 10 years of full-time professional experience in providing technical support to the Strategic Environmental Research and Development Program. This work included all aspects of grant administration i.e., developing statements of needs to support grant solicitations, managing the application submission process, reviewing applications, developing and managing a peer review selection process, tracking and monitoring of awarded projects, developing strategic selection criteria, work plans and program performance metrics, and managing the program budget ($4.3M). She also has been a P.I. for numerous federal, state and local grants,providing invaluable experience and perspective as a grant writer, recipient, and manager. Eileen will provide project grant administration and reporting support.

Danielle J. Diamond, Esq., has been a Visiting Fellow with Harvard Law School since 2021, and also serves as ESJA's Chief Legal & Policy Director. She has well over a decade of experience working on complex regulatory matters intersecting local, state and federal environmental laws and directing hundreds of local rural community campaigns across nearly 30 states to address the negative consequences of industrial animal agriculture. Through this work, she regularly consulted with project manager and Principal Investigator, Maria Payan, to provide support for numerous community-driven initiatives across the Eastern Shore, including efforts relating to the Bioenergy Devco development. For this particular project, Ms. Diamond will assist SHEN, its partners, and the local communities they serve, in utilizing their community-driven research to strategize and develop viable social and environmental justice policy solutions for the problems they are confronting, which will include a comprehensive action plan and policy recommendation report with prioritized solution-based strategies and proposed policy to positively impact health, equity, well-being and quality of life for the community.

Expenditure of Awarded Grant Funds, and plan for compliance with EPA's Pre-award Compliance Review for Nonprofit Organizations The project manager will collaborate with EJSA administrative personnel, as outlined in the budget details, in addition to project co-manager, consultants, and technical partners to guarantee prompt and proficient project management and reporting. This project encompasses comprehensive plans for routine partner meetings and communication, a board oversight committee, and our administrative processes that provide multiple safeguards for proper handling of funds obtained through grant programs. EJSA intends to conduct regular audits, ensure compliance with all legal requirements and regulations and to preserve precise records while implementing suitable data collection and reporting methodologies.

5.0 Past Performance The staff at EJSA boast a well-established history of effectively managing large grants, including government grants. We currently have several pending government grant applications with local community partners, Sussex Health and Environmental Network (SHEN) and Sentinels of Eastern Shore Health (SESH), that we have committed to serve as a fiscal sponsor for. However, as a new 501(c)(3) organization, this project will be the first government grant in which ESJA will provide both fiscal sponsorship as well as overall grant administration and project reporting support. Eileen O'Rourke, the Project Administrator, will be responsible for oversight over the management of both grant funding and reporting.

Casey Trees
WASHINGTON DC

April 14, 2023

Casey Trees
3030 12th Street NE
Washington, DC 20017

To Whom It May Concern:

The purpose of this correspondence is to express our organization's support for a more intentioned collaboration with Friends of Anacostia Park (FoAP)—especially as it pertains to community-led greening and watershed revitalization efforts in the historic national park.

Over the last year, we have collaborated with Friends of Anacostia Park in numerous ways. First, we helped the organization source a tree for a soft launch tree planting ceremony in October 2021. We have tabled at the Late Skates—Friends of Anacostia Park's flagship event that brings hundreds of residents and park visitors to the Anacostia Park Skating Pavilion for boat rides and free skate rentals. More recently, we worked with Friends of Anacostia Park for a volunteer engagement with DC United teaching all parties involved how to mulch trees then leading the group in the mulching of 20 trees around the Pavilion.

Moving forward, we are interested in serving as a sourcing partner, arboreal consultant and park restoration collaborator with FoAP, as the organization works with the National Park Service to enhance the tree canopy in Anacostia Park. Such enhancements will augment the number of shaded areas in the Park for visitors and mitigate issues surrounding stormwater runoff into the Anacostia River.

We are excited to build on our collaborations of the last year for the betterment of the Anacostia Park ecosystem and uplift of nearby neighborhoods who regularly use the Park.

Sincerely,

Mark Buscaino
Executive Director

To Whom It May Concern:

This letter acknowledges our organization's intent to connect the forest remediation work of our Park Stewards program with the park restoration effort of Friends of Anacostia Park's (FoAP) Friends Corps. Since 2018, our Park Stewards have removed 900,000 pounds of trash and cut invasive vines from 3,500 trees in Fort Stanton Park, Suitland Parkway, Oxon Run Parkway and Shepherd Parkway. Our decision to work more closely with Friends of Anacostia Park represents our first cleanup effort in Anacostia Park, and we believe the remediation of the forests on the edges of the Park are key to improving the health and vitality of the local ecosystem.

Earlier this summer, we established a connection with Friends of Anacostia Park—leading a trash removal training and taking some of their Friends Corps members into the forests on the outskirts of the Park. We believe that a formal collaboration between our organization and FoAP will result in the removal of 10,000 pounds of trash, the cutting of vines from at least 40 trees and the removal of at least 20 ailanthus trees from Anacostia Park. Our Park Stewards—working with the Corps—will not only remediate the forest patch in Anacostia Park, but also spread awareness about the importance of not littering and limiting single-use plastics.

Warmly,

Merrit Drucker

April 14, 2023

Dear Review Committee,

As a local nonprofit watershed organization, Anacostia Watershed Society is committed to protect and restore the Anacostia River watershed and its watershed communities. This letter signals our intent to continue our partnership with Friends of Anacostia Park (FoAP) and support their Corps training as a part of the RSTOR initiative. We will also work with FoAP to facilitate on-water programming and boat tours that help local residents develop a deep and resounding connection to the Anacostia River and national park in their "backyards."

Anacostia Watershed Society works to protect and restore the Anacostia river by uniting different partners around the river restoration effort—and that work often involves a) deputizing local residents to lead the conservation charge; and b) helping residents foster a connection to the Anacostia River through meaningful explorations of its beauty. Our goal of making the river fishable and swimmable is a goal shared by the mostly BIPOC residents of Wards 7/8 in DC, who have continued to enjoy Anacostia Park through decades of institutional neglect. This collaboration with Friends of Anacostia Park will be an important step in stewarding a culture of environmentalism and resident-led conservation in a community that has remained resilient in the face of underinvestment.

Our work with Friends of Anacostia Park will include:

- Leading our Watershed Stewards Academy training program with the Friends Corps, which equips community leaders with the resources needed to address local pollution problems;
- Leading on-water activities, boat tours at FoAP's community events, and an orientation to help Corps members build their knowledge of river restoration.

The George Washington House • 4302 Baltimore Avenue • Bladensburg, MD 20710-1031
o. Ex. 6 - Personal Privacy (PP) • f. Ex. 6 - Personal Privacy (PP) • info@anacostiaws.org • www.AnacostiaWS.org

Thank you for your consideration of this proposal. We look forward to deepening our partnership with Friends of Anacostia Park and the surrounding community through the success of this RSTOR Initiative.

Sincerely,

Ariel Trahan
Director of River Restoration Programs
Anacostia Watershed Society

Title: Executive Director

II. Is the applicant currently receiving EPA Assistance? ☐ Yes ☒ No

III. List all pending civil rights lawsuits and administrative complaints filed under federal law against the applicant/recipient that allege discrimination based on race, color, national origin, sex, age, or disability. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

IV. List all civil rights lawsuits and administrative complaints decided against the applicant/recipient within the last year that alleged discrimination based on race, color, national origin, sex, age, or disability and enclose a copy of all decisions. Please describe all corrective actions taken. (Do not include employment complaints not covered by 40 C.F.R. Parts 5 and 7.)

V. List all civil rights compliance reviews of the applicant/recipient conducted under federal nondiscrimination laws by any federal agency within the last two years and enclose a copy of the review and any decisions, orders, or agreements based on the review. Please describe any corrective action taken. (40 C.F.R. § 7.80(c)(3))

VI. Is the applicant requesting EPA assistance for new construction? If no, proceed to VII; if yes, answer (a) and/or (b) below.

☐ Yes ☒ No

a. If the grant is for new construction, will all new facilities or alterations to existing facilities be designed and constructed to be readily accessible to and usable by persons with disabilities? If yes, proceed to VII; if no, proceed to VI(b).

☐ Yes ☐ No

b. If the grant is for new construction and the new facilities or alterations to existing facilities will not be readily accessible to and usable by persons with disabilities, explain how a regulatory exception (40 C.F.R. 7.70) applies.

VII. **Does the applicant/recipient provide initial and continuing notice that it does not discriminate on the basis of race, color, national origin, sex, age, or disability in its program or activities? (40 C.F.R 5.140 and 7.95)** ☒ Yes ☐ No

a. **Do the methods of notice accommodate those with impaired vision or hearing?** ☒ Yes ☐ No

b. **Is the notice posted in a prominent place in the applicant's/recipient's website, in the offices or facilities or, for education programs and activities, in appropriate periodicals and other written communications?** ☒ Yes ☐ No

c. **Does the notice identify a designated civil rights coordinator?** ☐ Yes ☒ No

VIII. **Does the applicant/recipient maintain demographic data on the race, color, national origin, sex, age, or disability status of the population it serves? (40 C.F.R. 7.85(a))** ☒ Yes ☐ No

IX. **Does the applicant/recipient have a policy/procedure for providing meaningful access to services for persons with limited English proficiency? (Title VI, 40 C.F.R. Part 7, *Lau v Nichols* 414 U.S. (1974))** ☒ Yes ☐ No

X. **If the applicant is an education program or activity, or has 15 or more employees, has it designated an employee to coordinate its compliance with 40 C.F.R. Parts 5 and 7? Provide the name, title, position, mailing address, e-mail address, fax number, and telephone number of the designated coordinator.**

XI. **If the applicant is an education program or activity, or has 15 or more employees, has it adopted grievance procedures that assure the prompt and fair resolution of complaints that allege a violation of 40 C.F.R. Parts 5 and 7? Provide a legal citation or applicant's/ recipient's website address for, or a copy of, the procedures.**

For the Applicant/Recipient

I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law. I assure that I will fully comply with all applicable civil rights statutes and EPA regulations.

Ariam A Ford	Executive Director	04/14/2023

For the U.S. Environmental Protection Agency

I have reviewed the information provided by the applicant/recipient and hereby certify that the applicant/recipient has submitted all preaward compliance information required by 40 C.F.R. Parts 5 and 7; that based on the information submitted, this application satisfies the preaward provisions of 40 C.F.R. Parts 5 and 7; and that the applicant has given assurance that it will fully comply with all applicable civil rights statures and EPA regulations.

A. *Signature of Authorized EPA Official	B. Title of Authorized Official	C. Date

Instructions for EPA FORM 4700-4 (Rev. 04/2021)

General. Recipients of Federal financial assistance from the U.S. Environmental Protection Agency must comply with the following statutes and regulations.
Title VI of the Civil Rights Acts of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The Act goes on to explain that the statute shall not be construed to authorize action with respect to any employment practice of any employer, employment agency, or labor organization (except where the primary objective of the Federal financial assistance is to provide employment). Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act provides that no person in the United States shall on the ground of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under the Federal Water Pollution Control Act, as amended. Employment discrimination on the basis of sex is prohibited in all such programs or activities. Section 504 of the Rehabilitation Act of 1973 provides that no otherwise qualified individual with a disability in the United States shall solely by reason of disability be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. Employment discrimination on the basis of disability is prohibited in all such programs or activities. The Age Discrimination Act of 1975 provides that no person on the basis of age shall be excluded from participation under any program or activity receiving Federal financial assistance. Employment discrimination is not covered. Age discrimination in employment is prohibited by the Age Discrimination in Employment Act administered by the Equal Employment Opportunity Commission. Title IX of the Education Amendments of 1972 provides that no person in the United States on the basis of sex shall be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Employment discrimination on the basis of sex is prohibited in all such education programs or activities. Note: an education program or activity is not limited to only those conducted by a formal institution. 40 C.F.R. Part 5 implements Title IX of the Education Amendments of 1972. 40 C.F.R. Part 7 implements Title VI of the Civil Rights Act of 1964, Section 13 of the 1972 Amendments to the Federal Water Pollution Control Act, and Section 504 of The Rehabilitation Act of 1973.

Items "Applicant" means any entity that files an application or unsolicited proposal or otherwise requests EPA assistance. 40 C.F.R. §§ 5.105, 7.25. "Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organizations, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance. 40 C.F.R. §§ 5.105, 7.25. "Civil rights lawsuits and administrative complaints" means any lawsuit or administrative complaint alleging discrimination on the basis of race, color, national origin, sex, age, or disability pending or decided against the applicant and/or entity which actually benefits from the grant, but excluding employment complaints not covered by 40 C.F.R. Parts 5 and 7. For example, if a city is the named applicant but the grant will actually benefit the Department of Sewage, civil rights lawsuits involving both the city and the Department of Sewage should be listed. "Civil rights compliance review" means: any federal agency-initiated investigation of a particular aspect of the applicant's and/or recipient's programs or activities to determine compliance with the federal non-discrimination laws. Submit this form with the original and required copies of applications, requests for extensions, requests for increase of funds, etc. Updates of information are all that are required after the initial application submission. If any item is not relevant to the project for which assistance is requested, write "NA" for "Not Applicable." In the event applicant is uncertain about how to answer any questions, EPA program officials should be contacted for clarification.

1.0 PROGRAM OBJECTIVES

Project Summary

Title: The Friends Corps RSTOR (Reconnecting Stewards to Our River) Initiative

Project Location: Anacostia Park, Wards 7 & 8, Washington, District of Columbia, 20020

Applicant Information: Friends of Anacostia Park; Ex. 6 Personal Privacy (PP) Washington, D.C. 20020; Richard Trent; Richard@thefoap.org; Ex. 6 - Personal Privacy (PP)

Description of Organization: Friends of Anacostia Park (FoAP) enriches the lives of DC residents by preserving Anacostia Park and connecting surrounding communities to its redevelopment. FoAP envisions the restoration of a clean Anacostia Park that supports a vibrant ecosystem and the wellness of local residents. We protect the natural and built environment of the Park by ensuring local residents own the revitalization effort, and we activate the space as a meaningful convening point for all visitors. As the official philanthropic partner of the National Park Service (NPS), we safeguard the health of the Park ecosystem and its neighboring communities.

Small CBO Set Aside Track: Yes; employee roster can be found in additional attachments.

Project Abstract:

The Friends Corps RSTOR Initiative puts Wards 7/8 residents at the helm of the stormwater management and Anacostia River restoration effort. Support from this grant would enable FoAP to partner with Casey Trees, Ward 8 Woods, and the Anacostia Watershed Society to broaden our watershed restoration expertise and expand a community-driven stormwater management campaign to educate youth and park-goers on the importance of watershed rehabilitation. The scope of the Friends Corps RSTOR initiative encompasses five crucial components for improving river health:

1. Removing trash and single-use plastics from the riparian forests that would have ended up in the watershed (goal: 30,000 lbs. removed)
2. Enrolling Friends Corps members in Anacostia Watershed Society's Watershed Stewards Academy—a citizen science and ecological survey course that teaches local residents how to recognize and address local pollution (goal: 50% of Friends Corps enrolled and graduating)
3. Removing invasive species and vines that kill trees, leading to coastal erosion and the destabilization of our park ecosystem (goal: 400 sq. ft. removed)
4. Planting trees along the River and throughout the Park to reduce coastal erosion (goal: 50 trees)
5. Facilitating boat rides, on-river activities and community forums in partnership with Anacostia Watershed Society to process the legacy of environmental racism and trauma that have dealt a blow to our culture of environmentalism and help residents foster a personal connection to the Anacostia River (goal: 3 community forums).

This project will be led entirely by our Friends Corps—who will receive formal water quality monitoring, tree maintenance and invasive/trash removal trainings. Corps members will also play a crucial role in bringing residents east of the River to our planned community forums and on-river activities to discuss what residents can do about the rampant litter and trash problem in Anacostia.

Project Types: Environmental job training, stormwater issues & water quality monitoring, public education.

ED_016126_00001486-00001

Special Considerations: No special consideration applicable.

Environmental Issues: Stormwater & water quality, environmental justice & health.

List of Project Partners: Ward 8 Woods (CBO), Casey Trees (CBO), Anacostia Watershed Society (CBO).

Quality Assurance Project Plan: A QAAP is not needed for applicant project.

Environmental and Public Health Information of the Underserved Community

There is a deeply symbiotic relationship between the health of the Anacostia River and the health of surrounding communities. Indigenous populations in the area began declining when coastal forests were razed hundreds of years ago to make way for the profitable tobacco trade—a move that destabilized coastal soil and greatly impacted the River's depth. Wildlife suffered when the River was dredged a century ago, and the natural wetlands were suffocated to make space for Anacostia Park. The native ecosystem continued to languish through decades of industrialization, which once made Anacostia River the most polluted body of water in America.

The inequitable planning decisions of the last 70 years caused Anacostia Park to fall into disrepair as institutional disinvestments left the predominantly BIPOC citizenry languishing. These poorly planned infrastructure investments and adverse city planning decisions—like the establishment of racially segregated Park zones, the legacy sewage systems that polluted the River, or the construction of Interstate 295 that cut off neighboring BIPOC communities from the park—reflect the racial and economic inequities of the past. Nevertheless, the resilience of the Park reflects the resilience of the surrounding community, who feel a deep sense of ownership over Anacostia Park and have continued to convene there.

The demographics of the Park's neighboring Wards (7/8) reflect the decades of institutional disinvestment that have plagued the area. Residents east of the Anacostia River are 92% Black--the legacy of redlining and economic segregation. Nearly 1 out of 5 Anacostians are unemployed, whereas only 1 out of 25 Washingtonians are jobless. Only 25% of Ward 8 residents own their homes, so the specter of green gentrification hangs over all talk of "revitalization." A recent study conducted by Active Kids, Healthy Communities identifies neighborhoods east of the Anacostia River—namely Wards 7/8—as "physical activity deserts," or urban areas where it is difficult to find a safe place to engage in physical activity. As seen on EJScreen, out of all Wards in DC, food deserts exist only in Wards 7/8. Additionally, EJScreen reflects the low life expectancy and high asthma rates experienced by Ward 7/8 residents, where a majority of the tracts in these Wards fall under the 95-100 percentile. Moreover, Anacostia Park's construction on a floodplain is reflective of the institutional missteps that have occurred over the past century; as such, residents will be the first to experience the ramifications of climate change.

The COVID-19 pandemic and subsequent quarantine highlighted the ways that urban parks can function as mental health resources for underserved areas. This sea-change in our thinking around park use happened at the same time that Anacostia Park began going through a renaissance of sorts—as real estate developers and city planners began debating how the land in and around Anacostia Park should be used. The influx of new residents into Wards 7 and 8 has generated renewed interest in the restoration of Anacostia Park, but multiple challenges loom large. Invasive species are dominating the Park and disrupting the vegetative balance near the

River. Thousands of pounds of trash remain buried in the soil of the Park's forests. Moreover, the underfunding of the NPS has given way to maintenance and resource management backlogs that stymie progress. Without a community-led effort to address these pressing challenges— and a sustained campaign to re-educate local residents about this unique relationship between the people and the River—the ecosystem will continue to degrade, and many residents will remain steadfast in their nihilism. Working to address this inequity head-on, FoAP is committed to turning the challenges of revitalization into an opportunity for community uplift. As such, we tether all of our conservation and park restoration efforts to economic opportunities for local residents.

Organization's Historical Connection to Underserved Community

When the National Park Service (NPS) and National Park Foundation (NPF) began incubating Friends of Anacostia Park in 2018, the point was to put residents in charge of the park revitalization effort and avoid the planning missteps of the past. NPF hired environmental activist, Akiima Price, who pioneered a model for *meaningful engagement* that put Anacostia residents at the center of the Park redevelopment effort—ensuring that the uplift of the Park would not become decoupled from the hopes and dreams of local residents. Ms. Price's weekly park cleanups with engaged residents and volunteers paved the way for the development of FoAP's Friends Corps—the workforce development cohort that leads in-park conservation, increases the visibility of local residents in the Park and expands access to the Park through culturally-relevant program facilitation. Comprised of regular park-users from Anacostia, the Corps is uniquely positioned to lead the greater Park community in the rehabilitation of the watershed because they couple strong, personal ties to Anacostia neighborhoods with technical expertise in land and water conservation.

Across our national park ecosystem, Friends groups work to ensure that green spaces are preserved, rivers are cleaned and wildlife is protected. For Friends groups serving parks situated in urban environments, the moral imperative is slightly different. Those Friend groups are charged with figuring out the best ways to leverage the human and social capital of nearby residents to restore parks while supporting the economic uplift of historically underserved communities. Community-led environmental initiatives have often been stymied by institutional players who took a deficit-minded approach to evaluating the qualifications and capabilities of local leaders to do transformational work. Our model flips this problematic paradigm on its head and connects conservationists from the neighborhood with the means for economic uplift.

Anacostia residents experience physical barriers to park access--like Interstate 295 that separates 155,000 BIPOC residents from the natural asset in their backyard--and psychic barriers to Park access connected to a legacy of inequitable development in the region. Bruce Holmes, who lives Ex. 6 Personal Privacy (PP) was admonished as a child for visiting the River when his parents heard bodies were floating in the River. Phyllis Nelson remembers the crime that proliferated around the entrances of the Park in the 1980s. Today, Mr. Holmes and Ms. Nelson are senior managers on our Corps, educating the next generation of park stewards. Our *meaningful engagement* approach—which acknowledges all residents' capacity for impacting positive change—makes space for personal transformation and equips residents with the skills to lead park conservation efforts.

Because Anacostia Park is in Ward 7/8's backyard, its revitalization impacts the lives of nearly 150,000, mostly BIPOC residents. To avoid the inequitable development missteps of the past, all programmatic efforts put community in the driver's seat of the restoration effort and looking for every opportunity to meaningfully engage residents in the Park's uplift—be it through gainful employment, arts-based programming or youth development. The core principle of our organizational model acknowledges that people contribute to the uplift of Anacostia Park in unique and important ways. Not every park-goer is capable of making a six-figure contribution to our mission; many folks, however, have dedicated thousands of hours to making the Park a more vibrant place. In every handshake and in every conversation is the recognition of the importance of both financial and human capital in the Park restoration effort.

We recognize that each park-goer shows up at Anacostia Park with different needs that need to be met. Some visitors need to feel a deep and abiding sense of community; others need recreational activities. To speak to these unique needs, we look to hire folks from all walks of life whose personal stories resonate with the many unique stories of our park-goers. Our Friends Corps, who will be leading the efforts of our RSTOR initiative, are returning citizens, older adults/elders, young adults, single mothers, single fathers, artists and athletes all committed to expanding access to Anacostia Park and making the space beautiful.

In revitalization, people like Mr. Holmes and Ms. Nelson play a pivotal role because park-work is not simply capital-intensive; it is labor-intensive, as well. There is a long history in Anacostia of outsourcing park-work and pushing green job opportunities away from the mostly BIPOC neighborhood. It is a missed opportunity that deepens residents' cynicism towards the planning process. To address that problematic legacy, our programming connects the dots between the restoration of the park and the economic empowerment of the Anacostia community—improving the Park while providing residents with living wage employment in the process. Anacostia residents inherited a polluted River and suffered health consequences that spanned multiple generations. Today, those residents own the restoration of the Park.

Already the RSTOR initiative is having an impact on the health of the watershed. Our team, working in partnership with Ward 8 Woods and Casey Trees, planted 120 trees and removed 23,850 pounds of trash from Anacostia Park since October 2022. The Corps also removed 297 invasive species—including ailanthus vines, bush honeysuckle and English ivy. Pleased with the outcomes of the first year of RSTOR, the National Park Service has encouraged us to seek out additional private and public support to bolster this effort moving forward. Augmented support will enable us to bring community-led conservation to other parts of the Park, which spans 1,200 acres along the Anacostia River.

EJCPS Model

Element 1 – Issue Identification, Community Vision, and Strategic Goal Setting

Friends of Anacostia Park was built on the understanding that the Park's revitalization could not be decoupled from the visions and ideas of residents in nearby neighborhoods. To that end, FoAP leads participatory planning efforts with NPS to ensure that Anacostians have ample opportunities to share their dreams for the future of the Park.

Our approach to community engagement, vision-setting and collective goal-planning leverages creative placemaking and in-park activations to capture data from the community. This way, our data gathering and planning efforts are culturally relevant and unintrusive.

Our community forums, like our Late Skates, leverage casual connections to activate cultural kinship and crystallize a culture of environmentalism. For instance: last summer, we asked NPS to extend the community comment window for the Development Concept Plan—the process by which the National Park Service gathers Anacostia residents' visions for the future of the Park and brings them to fruition. FoAP served as a cultural interpreter and community engagement advisor to ensure the hopes of the community were woven into the planning process. At the Late Skates, we led activities and conversations with attendees designed to gauge their hopes for the future of the Park—then shared their feedback with NPS.

After soliciting community feedback for the Development Concept Plan (DCP), the National Park Service halted its planning effort after community members asked NPS to engage the surrounding neighborhoods more intentionally around the reimagining of the Park. NPS has deputized us to facilitate more community discussions regarding the future of the Park. As such, the community forums that are a crucial component of this request will build on the data gathering and participatory planning efforts of the last year.

Element 2 – Community Capacity-Building and Leadership Development

The Friends Corps began officially in 2021 with three Anacostia residents who had been frequenting Anacostia Park for decades. Working at the behest of the National Park Service, Akiima Price worked with different training partners to build the technical expertise of this inaugural Corps so that they could competently work alongside Park Rangers to revitalize the Park. The RSTOR initiative builds on this initial model and scales it—keeping local residents at the heart of the revitalization push while tapping institutional expertise to guide the effort.

Our Friends Corps workforce development program turns the revitalization of urban parks into an opportunity to connect residents of underserved communities with meaningful work opportunities outdoors. We hire returning citizens, seniors and young parents–populations that are often overlooked as job-seekers–and empower them to lead the Park conservation effort through regular trash and invasive removal, tree planting and community engagement. As such, we increase community access to the Park by strengthening the culture of outdoor exploration in this mostly BIPOC region of DC.

Our foundational goal at Friends of Anacostia Park is to build a clean Anacostia Park that supports a vibrant ecosystem and the wellness of nearby communities. To that end, our efforts are always refracted through the lenses of *park health* and *community health*. The stated aims of the RSTOR initiative—to leverage the expertise and passion of local residents to mitigate challenges with stormwater management and shepherd a culture rooted in environmental justice—are congruent with the goals of improving park and community health. We remain focused on this unique approach to remediation because most of our team has witnessed firsthand the deleterious effects of underinvesting in urban parks, outsourcing park-work and failing to carve out space for residents to build cultures of environmental accountability.

Element 3 – Consensus Building

The greatest resource for leading this conservation effort is the trust and buy-in of local residents. What we are seeing now in Anacostia Park—from the growth of the Corps to the activation of the Park as a convening point—is a groundswell of community support for our existence and for the community-led uplift of the Park. There is a palpable sense amongst community members

ED_016126_00001486-00005

that something different is happening. We take care to engage the community around nearly every initiative we spearhead, engendering our engagements with the spirit of mutual trust.

While multiple organizations exist to protect the health of the Anacostia River watershed, fewer organizations own meaningful connections with residents and are poised to build consensus around community campaigns. Our commitment to meaningful engagement with local residents enables us to marshal the human capital needed to power this work, lead the revitalization charge with a focus on equity, and serve in the role of community convener and consensus-builder. The secret to our meaningful engagement and consensus building is acknowledging the unique ways folks contribute to the uplift of the Park—be it with their time, skills and/or money. Getting to *yes* with a group of invested residents means first recognizing the important ways that they are already enriching the Park.

Element 4 – Multi-Stakeholder Partnerships and Leveraging of Resources

Since June 2020, Friends of Anacostia Park has participated in 320 meetings with 62 different community organizations--most based in Wards 7 or 8. The reason for all the meetings--in addition to building consensus for the existence of the Friends group--was to distill our unique value proposition in a landscape that is already filled with different actors.

We also rely on close collaboration with environmental nonprofits to bolster the conservation skills of our Corps. We work with a variety of partners to help power our conservation and Corps training efforts. Anacostia Watershed Society, Anacostia Riverkeeper, Ward 8 Woods and other regional environmental organizations led the training of our Friends Corps. Working with Anacostia environmental leaders, those organizations have also endorsed FoAP's RSTOR initiative. RSTOR—which is a small-scale local-initiative situated in a larger watershed rehabilitation effort—is a multi-pronged approach to community stormwater management and park preservation focused on riparian forest preservation, the beautification of high-traffic areas in Anacostia Park, the remediation of the Anacostia River and helping residents destigmatize river use through guided exploration.

FoAP is a steering member of the Anacostia Park and Community Collaborative (APACC)--a Clean Water Action-backed assembly of 60+ organizations working in or around Anacostia Park. Recognizing that the revitalization effort happens at the nexus of public consensus and private investment, we serve as a liaison between NPS and the myriad of community-based organizations that are deeply committed to the uplift of Anacostia Park.

Element 5 – Constructive Engagement by Relevant Stakeholders

In Wards 7 and 8—where generations have witnessed the fallout of poor planning decisions and inequitable development—cynicism functions as a protective mechanism, as armor. However, the success of the RSTOR initiative relies on the zeal and optimism of an energized and engaged citizenry. Our RSTOR community forums, like our Late Skates, will leverage culturally relevant programming to ensure community members have the ability to participate in the collaborative problem-solving process and share their concerns and feedback with FoAP and NPS. The community forums our Corps will facilitate as a part of this RSTOR push will build on our track record as a convenor and get residents to consider what steps they can take to improve the vitality of the watershed.

ED_016126_00001486-00006

Most importantly, our RSTOR community forums and boat rides—planned with Anacostia Watershed Society—will leverage recreation, on-water exploration and casual connection to activate cultural kinship and crystallize a culture of environmentalism. The best exchanges in Anacostia Park often happen with music playing in the background and burgers grilling somewhere nearby. To get residents to confront the tragic legacy of institutional disinvestment and pollution—while devising strategies for tackling those problems today—folks' guards must be down.

Element 6 – Evaluation

An ancillary benefit of our formal partnership with NPS is our dogged focus on program evaluation and data-tracking. As the official philanthropic partner of NPS, we are subject to reporting requirements around volunteer and visitor engagement, conservation efficacy and program development. This means that so much of our evaluation thinking is baked into our program operations. All events—including the forums we are hosting as a part of RSTOR—feature exit surveys to gauge visitor enjoyment/dissatisfaction. Our Friends Corps members complete entrance and exit surveys, meant to track the growth in their technical skillsets and feelings about their professional potential. Finally, our program outcomes are shared with our community of stakeholders at the end of every year. This meeting will be more than a forum for holding FoAP accountable for the work we are doing; it is also an opportunity to strengthen the kinship amongst the residents and park-goers we serve.

Project Linkage

The RSTOR Initiative promotes environmental justice and civil rights at federal, state, and local levels. Historically, the revitalization of urban parks resulted in the omission of BIPOC communities from the planning and visioning process.. We fight that legacy by putting residents at the helm of the revitalization effort and ensuring the benefits of revitalization redound to the surrounding community (increased park use, improved health, green job creation). Our status as the official philanthropic partner of the National Park Service—and liaison between the Anacostia community and the administrative forces governing the land and water—means that our sanctioning government agencies are augmenting their internal capacities for letting culturally relevant community engagement drive the re-imagining of Anacostia Park.

The legacy of discourse around environmentalism and conservation has focused heavily on the need to preserve certain plant or animal species—seldom considering the ways urban communities interact with urban ecosystems. Our model of community-driven restoration sees ecosystem preservation and community uplift as one-in-the-same. In other words, FoAP focuses on the conservationists as much as the actual conservation efforts. We believe that a healthy, economically stable Anacostia is a precondition for sustainable conservation in Anacostia Park. Current park-goers and young people—who are the next generation of park stewards—must feel a meaningful sense of ownership over the restoration of the Park in order for the revitalization to happen in an equitable manner.

In Wards 7/8, establishing sustainable initiatives means consensus-building at the grassroots level and leveraging work to create opportunities for economic empowerment. Where possible, we connect the revitalization of the Park to the economic uplift of Anacostians. Restoring the Park and River in an equitable manner is not limited to fundraising for physical improvements — we elevate the voices of residents and put the community in the driver's seat of the planning

effort. The ethos at the heart of our mission acknowledges the symbiotic relationship between the health of the park ecosystem and the health of nearby neighborhoods—or as environmental activist, Dennis Chestnut, says: "If the community isn't healthy, then the River isn't healthy." As such, FoAP fosters a thriving planet by carving out space for residents to discuss the lingering traumas connected to decades of institutional neglect and create leadership opportunities and living wage employment for residents committed to addressing these wider, environmental challenges.

Partners and Collaborate

Though Corps members bring a wealth of technical experience to this project, FoAP is not an expert in stormwater management. Rather, FoAP has activated Anacostia Park as a convening point and training site for the empowerment of local residents. It is for this reason that we are partnering closely with Casey Trees, Ward 8 Woods, and the Anacostia Watershed Society to successfully execute RSTOR.

We collaborate with Casey Trees, a local nonprofit committed to improving the District's tree canopy, to sustainably source trees for the Park. Casey trees is committed to implementing 40% tree cover in DC by 2032, with much of this work to be done in Wards 7 & 8. They have already aided FoAP in the planting of 120+ trees in the Park. As a CBO with native tree expertise, Casey Trees will provide maintenance training for Friends Corps members and aid in the source, transport, and planting of native trees.

Ward 8 Woods is also a close partner, leading trash removal trainings for our Friends Corps earlier this year and working with us to cut vines from trees in the riparian forest and haul out thousands of pounds of trash. Their sustained investment in Ward 7/8 comes from years of hiring from these wards and a commitment to restoring Ward 8 forests. As a CBO with cleanup expertise, Ward 8 Woods will facilitate additional training for the 2023 Friends Corps cohort and continue to aid in the removal of vines and trash from the Park.

The Anacostia Watershed Society aims to empower a legion of watershed residents to be educated stewards of the Anacostia River. As a CBO with watershed restoration experience, they will train Friends Corps members through their Watershed Stewards Academy—a citizen science and ecological survey course that teaches residents how to address local pollution. Additionally, they will aid in the facilitation of community forums, boat rides and on-river activities that help residents foster connections to the River and process the legacy of environmental racism and trauma that have dealt a blow to our culture of environmentalism.

2.0 PROJECT ACTIVITIES/ MILESTONE SCHEDULE

Our partners, Anacostia Watershed Society and Anacostia Riverkeeper, have identified single-use plastics, coastal erosion and invasive species as some of the biggest threats to the health of the Anacostia River Watershed. Support from this grant would enable FoAP to partner with Casey Trees, Ward 8 Woods, and the Anacostia Watershed Society to broaden our watershed restoration expertise and expand a community-driven stormwater management campaign to educate youth and park-goers on the importance of watershed rehabilitation.

As a part of our RSTOR (Reconnecting Stewards to Our River) initiative, Corps members spearhead efforts that improve park and river health directly, including:

- Reducing the levels of polluted stormwater runoff that ends up in the River through trash pickups;
- Reducing coastal erosion and the destabilization of Anacostia Park's ecosystem from invasive species proliferation and an under-developed tree canopy;
- Training Friends Corps members, through the Watershed Stewards Academy, to recognize local pollution and develop strategies for addressing it;
- And facilitating community discussions/forums to process the legacy of environmental racism and trauma that have dealt a blow to our culture of environmentalism.

This project will be led entirely by our Friends Corps—who have received formal water quality monitoring, tree maintenance and invasive/trash removal trainings. Corps members will also play a crucial role in bringing local residents to our planned community forums to discuss what residents can do about the rampant litter and trash problem in Anacostia.

A key element of this proposal involves carving out space for residents to convene, discuss the lingering traumas connected to decades of institutional neglect and build consensus around a strategy for reducing litter in the Park and working towards a cleaner Anacostia River. Facilitating conversations like that in Anacostia—where an influx of new residents is heightening the specter of green gentrification— can be difficult and culturally charged. An element of creative placemaking is needed to ensure that discussions are equitable and culturally relevant.

While we designed the RSTOR initiative to specifically address Anacostia River and the issues it faces, we believe our work serves as a model for urban parks of all sizes across the United States. At the core of our mission is the understanding that meaningful engagement within BIPOC communities is required to combat the legacy of environmental injustice. Underserved populations start to feel a sense of ownership over a communal space once they can reflect on memories that bind them inextricably to a space—and when they are provided opportunities for economic uplift. We hope to be a model for urban parks across the country that have experienced similar institutional neglect and disinvestment.

3.0 ENVIRONMENTAL RESULTS – OUTPUTS, OUTCOMES, AND PERFORMANCE MEASURES

Speaking to this challenge, we believe our RSTOR initiative can show under-resourced communities that working towards a green economy starts by tackling the problems in your backyard. All of the efforts of our RSTOR initiative will be led by community members, with a focus on strengthening the culture of environmental accountability that is starting to develop among residents, including:

- Stormwater Management and Land Conservation: Newly-constructed diversion tunnels have reduced sewage overflows in the river, but eroded dirt from nearby riparian forests and microplastics (from litter) that make their way to the river are negatively impacting the watershed's health. The RSTOR initiative will fight these challenges by empowering our Corps to plant trees that reduce erosion and broaden the Park's canopy, remove invasives that destroy ecological balance and eliminate trash from the Park.

- Creating Cultures of Environmental Accountability: The Friends Corps will host in-park programming and community forums, leading conservation campaigns that encourage residents to take ownership of the restoration effort.

Sharpening our programmatic focus in 2023, we are examining the efficacy of this initiative through the lenses of park health and community health--acknowledging their symbiotic relationship. As such, we track the following key outcomes:

Park Health (led by the Friends Corps):

- The planting of at least 50 native trees along Anacostia Drive, which runs for miles along the river banks in Anacostia Park;
- The removal of at least 1000 square feet of English Ivy, bush honeysuckle and ailanthus in the Park's forest;
- The removal of at least 30,000 pounds of trash from the Park;
- And monthly water quality monitoring, led by our Friends Corps members.

Community Health:

- Ensure that 50% of Friends Corps members participate and graduate from the Watershed Stewards Academy;
- The growth of our Friends Corps workforce development program by 30%-- augmenting the presence of residents in the Park leading conservation efforts;
- Establish a regular boat ride schedule at 75% of FoAP's events and community gatherings;
- The facilitation of at least 3 community forums that will help build community consensus around the revitalization of the Park and the economic empowerment of nearby neighborhoods.

4.0 PROGRAMMATIC CAPABILITY

Since our founding, Friends of Anacostia Park (FoAP) has been able to significantly boost community presence in the Park, staying on track with our goal of centering the needs of local residents in the park redevelopment effort. The Friends Corps--our flagship program that trains local residents to serve as park stewards--has grown dramatically from 3 members to 18. Corps members are easily identifiable in the Park, holding park-goers accountable for their use of park space and pioneering engaging programming for youth and older adults. Moreover, Corps members have completed a) Anacostia Watershed Society's Watershed Stewards training, b) Riverkeeper's water quality monitoring trainings, c) invasive species removal training with NPS, d) trash removal trainings with Ward 8 Woods and e) bike maintenance training with the Washington Area Bicyclist Association (WABA). As such, our Corps members are gaining transferable technical skills while making the Park a more inviting and culturally relevant convening point for surrounding neighborhoods.

In August 2022, we onboarded Lydia Daniel, our Director of Programs who brings a wealth of outdoor education and youth development expertise to the role. Ms. Daniel has been working to grow our Corps and refine our in-park programming. Over the past 10 years, Lydia Daniel has served a multitude of workforce development, environmental and educational non-profits in Washington, DC. Lydia is committed to providing Ward 7 & 8 residents with meaningful programming and equitable resource access. Before Friends of Anacostia Park, Ms. Daniel spent

four years teaching middle school math at Center City Public Charter Schools. Ms. Daniel is dedicated to uplifting lives by connecting people to the beauty of nature. She believes everyone has the capacity to live vibrantly in Southeast DC with support from the local community.

5.0 PAST PERFORMANCE

D.C. Department of Energy and Environment

In partnership with the Chesapeake Bay Trust, DOEE provided $35,000 for the implementation of RSTOR in December of 2022. We have adequately and timely reported on our progress through the first required interim report on February 28, 2023. An additional interim report is due June 1st, and the final report is due August 15th. Expected outcomes and outputs have stayed on track, some of which have been 100% implemented and others that are approximately halfway done.

REI Cooperative Action Fund

The REI Cooperative Action Fund provided FoAP with $50,000 for two years to bolster our community-driven programming.

General Motors

General Motors provided FoAP with $15,000 to bolster the RSTOR initiative in January of 2023. An impact report is due June 24th, and the final report is due October 29th, 2023.

6.0 QUALITY ASSURANCE PROJECT PLAN (QAPP) INFORMATION

The RSTOR initiative is not subject to the creation of a Quality Assurance Project Plan, as we will not be collecting any scientific data.

ED GAINEY
MAYOR

KAREN ABRAMS
DIRECTOR

CITY OF PITTSBURGH
DEPARTMENT OF CITY PLANNING

April 12, 2023

U.S Environmental Protection Agency
Washington, D.C.

Members of the Environmental Protection Agency Grantmaking Committee,

The City of Pittsburgh is pleased to offer our commitment and support to Grounded Strategies in their pursuit of funding through the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program.

Should this funding be awarded to Grounded, they will be creating an intentional meadow on a vacant lot for the purposes of enhancing the natural infrastructure value of an underutilized vacant parcel in order to capture and filter stormwater, create healthy natural habitat for insects and birds, and mitigate heat-island effects. Grounded planted a pilot meadow on a City-owned lot through the Adopt-A-Lot program last year. It was a wonderful educational project for the Larimer community, and a great example of what can be done on vacant land to bring more natural infrastructure to a neighborhood.

The City of Pittsburgh commits to offering our support to Grounded by participating in round-table discussions with neighborhood residents to better understand and address their concerns surrounding natural infrastructure installation and management, as well as assisting Grounded in identifying lots that could work for their projects and figuring out ways to obtain permission to use those lots. We will provide neighborhood residents with information on how they can access land through the Adopt-A-Lot program, and connect Grounded, neighborhood, and City residents to resources such as mulch, water access, and technical assistance that will make their project more successful.

Thank you for considering Grounded as a possible recipient of the Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program grant.

Sincerely,

Shelly Danko+Day
Urban Agriculture and Food Policy Planner

Form 990 required: Yes

Dear Taxpayer:

We're responding to your request dated May 07, 2018, about your tax-exempt status.

We issued you a determination letter in May 2009, recognizing you as tax-exempt under Internal Revenue Code (IRC) Section 501(c)(3).

We also show you're not a private foundation as defined under IRC Section 509(a) because you're described in IRC Sections 509(a)(1) and 170(b)(1)(A)(vi).

Donors can deduct contributions they make to you as provided in IRC Section 170. You're also qualified to receive tax deductible bequests, legacies, devises, transfers, or gifts under IRC Sections 2055, 2106, and 2522.

In the heading of this letter, we indicated whether you must file an annual information return. If you're required to file a return, you must file one of the following by the 15th day of the 5th month after the end of your annual accounting period:

- Form 990, Return of Organization Exempt From Income Tax
- Form 990EZ, Short Form Return of Organization Exempt From Income Tax
- Form 990-N, Electronic Notice (e-Postcard) for Tax-Exempt Organizations Not Required to File Form 990 or Form 990-EZ
- Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation

According to IRC Section 6033(j), if you don't file a required annual information return or notice for 3 consecutive years, we'll revoke your tax-exempt status on the due date of the 3rd required return or notice.

You can get IRS forms or publications you need from our website at www.irs.gov/forms-pubs or by calling 800-TAX-FORM Ex. 6 - Personal Privacy (PP)

If you have questions, call Ex. 6 - Personal Privacy (PP) between 8 a.m. and 5 p.m.,

The Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program

Prepared for the United States Environmental Protection Agency || April 14, 2023

Project Title	Lots of Wildflowers
Project Location	Allegheny County, Pennsylvania
Applicant Information	Grounded Strategies 6401 Penn Avenue 3rd Floor, % Ascender Pittsburgh, PA 15206 Groundedpgh.org Find us on socials @groundedpgh
Brief Description of Applicant Organization	Grounded Strategies works to improve the social, economic, and environmental health of distressed and transitional communities by building capacity to reclaim vacant and underutilized land.
Are you applying for the Small CBO Set Aside Track for $150,000 projects?	No
Project Abstract	This project falls under Grounded's Land Stewardship Innovation program area. Using funds from the EPA's Environmental Justice Collaborative Problem-Solving Cooperative Agreement Program, Grounded will train and equip neighborhood residents to install wildflower meadows on vacant and underutilized parcels within Allegheny County, Pennsylvania. To actively deliver environmental justice, we will perform this work specifically in neighborhoods and municipalities experiencing hypervacancy as a result of of redlining, industrial collapse, and white flight from the urban core of the Pittsburgh area. In addition to the aforementioned issues, these areas also lack high-quality green space at any scale, and are instead blanketed by lots overgrown with

ED_016126_00001497-00001

	aggressive, non-native plant species, overflowing with litter, or (at best) managed as infrequently upkept lawns. The installation of wildflower meadows will improve the quality of life of residents living in hypervacancy while simultaneously improving the urban ecology and climate resilience of Pittsburgh's Black communities.
Project Type(s)	This will be a combination public education and demonstration project where Grounded will install a biodiverse meadow planting, and then teach resident stewards to replicate this effort elsewhere.
Special Considerations	Climate Change/Disaster Resiliency
Environmental Issue	This project will encompass the environmental issue areas air, water and soil quality. The installation of intentional meadows has greater implications for the environmental health of neighborhoods and their residents, but within the Pittsburgh context air pollution mitigation, stormwater capture and management through natural infrastructure, and soil contaminant mitigation are primary concerns.
List of Project Partners	Penn State Extension City of Pittsburgh, Department of City Planning
QAPP Required	Yes

A. Environmental and Public Health information of the Underserved Community

The cohort for the public education portions of this project will be drawn primarily from Pittsburgh neighborhoods similar in character to (and including): Homewood South (97.4% nonwhite), Larimer (89% nonwhite), and Middle Hill (92.6% nonwhite). The demonstration project will take place in the Homewood South neighborhood (vacancy rate%), which experiences more severe flooding, urban heat-island effect, and disparities in access to food compared to nearby neighborhoods.

This project seeks to help in addressing the urban heat-island effect in the immediate term mitigating this effect through intentionally managed vegetated stands. Longer

ED_016126_00001497-00002

term, these meadow installations will also serve to accumulate fertility and increase pollinator biodiversity, enhancing the effectiveness of nearby agricultural endeavors (including those of the nearby Oasis Farm and Fishery). Furthermore, the resident stewards who are trained in meadow installation will be able to replicate this effect in their neighborhoods - armed with the knowledge and skills gained through this project, they will have an effective tool to improve non only the aesthetics, but also the functional natural infrastructure in their communities.

These meadow spaces will help to mitigate the spread of lead-contaminated dust plumes from vacant parcels, reducing the overall health burden of that contaminant in these communities, as well as reducing the risk for asthma among the surrounding populations.

B. Organization's Historical Connection to Underserved Community

Grounded has a 16 year track record of working with residents of redlined communities of Allegheny County. During this time, our focus has remained around upgrading the greenspace uses of vacant and underutilized parcels; however, for the past 5 years Grounded has made a concerted effort to address the systems of oppression that created the disparities in access, wealth, and land ownership in our service area.

Homewood was one of the very first neighborhoods where Grounded (then GTECH) started on-the-ground interventions based on catalyzing community members to participate in the reimagination of overgrown, litter-strewn parcels into vibrant community greenspaces, flanked by sunflowers.

This initial effort was meant to draw attention to one problem in particular that residential areas in legacy industrial regions face - high levels of soil lead contamination from the overuse of lead-based paints in previously demolished structures.

Grounded's efforts were noticed by community members and these initial catalytic projects opened the door to conversations about how vacant parcels can be upgraded to leverage the ecosystem services provided by natural infrastructure.

From our early days through today, Grounded only works in communities where residents have invited us into the conversation. Any modifications of parcels within the

community involve a community-informed design process, including design charrettes, where we solicit feedback from neighbors about what they wish the fate of the parcel to be.

C. EJCPS Model

Grounded's work towards environmental and social justice is so impactful because it represents the values we hold ourselves to internally: representation, consensus, healing, transparency, participation, and joy.

Steward Contractor Program

Grounded's resident stewardship program pays interested community members to maintain a baseline of care for greenspaces in their neighborhood. Participants are recruited, hired, trained, equipped, supported, compensated, and celebrated for their work.

Application	***EJCPS Overlap***
For this project, we plan to engage four (4) Steward Contractors for three (3) years at $1,500/year. ($20/hour)	#2 - Community Capacity-Building & Leadership Development

Youth, Elder, & Family Engagement

Grounded wants to achieve an intergenerational impact. That means moving beyond the segmentation of age groups in favor of engaging families and households as a unit.

Application	***EJCPS Overlap***
For this project, we are excited to grow upon our relationships with partners like Penn State Extension and AARP to reach the full spectrum of student and seniors through the community learning sessions.	#1 - Issue Identification, Community Vision & Strategic Goal Setting #4 - Multi-Stakeholder Partnerships & Leveraging of Resources

Resident Led Citizen Science

Grounded places the tools of vacant land R&D in the hands of resident experts. Our resident driven land stewardship pilot programs test and demonstrate innovative parcel scale reclamation strategies.

Application	***EJCPS Overlap***

ED_016126_00001497-00004

This project is all about creating a dedicated, accessible, and well equipped space within community for underserved residents to engage with the scientific process at an exploratory and tactile level.	#1 - Issue Identification, Community Vision & Strategic Goal Setting #2 - Community Capacity-Building & Leadership Development

Community Scale Data Set Construction

Using residents as community data experts, Grounded is able to curate surveys, construct and map localized data sets, and provide a grass roots analysis of environmental justice issues to contrast institutional sources.

Application	***EJCPS Overlap***
Community scale data types to be collected and analyzed under this project include groundwater, soil, sediment, surface water, air, biota and fauna samples.	#2 - Community Capacity-Building & Leadership Development #5 - Constructive Engagement by Relevant Stakeholders #7 - Evaluation, Lessons Learned, and Replication of Best Practices

Resident Maintenance Advisory Committee (MAC)

The MAC serves as a forum for residents to create standards of oversight for maintenance, care, and consistency of Grounded sites in their neighborhoods. In addition to creating a sense of community pride, and ensuring the development accessible and welcoming spaces, the MAC allows residents to think critically about shifting away from simply mowing to actively improving the urban ecology.

Application	***EJCPS Overlap***
Grounded program participants from four (4) different neighbrhoods will attend monthly 2-hour meetings in the spring and fall to collect community feedback on the wildflower installations, plan clean-ups, facilitate community co-design charrettes, and to set standards about other vacant lot uses, vegetation, safety, and habitat scores.	#1 - Issue Identification, Community Vision & Strategic Goal Setting #2 - Community Capacity-Building & Leadership Development #3 - Consensus Building & Dispute Resolution

ED_016126_00001497-00005

	#7 - Evaluation & Replication of Best Practices

Whole Ecosystem Solutions

When evaluating a site intervention, Grounded staff look at the entire story. From soil health and biodiversity, to land-loss history and potential opportunities for restorative justice.

Application	***EJCPS Overlap***
When assessing potential planting sites, Grounded's Land Stewardship Innovation and Land Use Policy teams will collaborate to execute our Groundtruthing Method. Grountruthing is our method of documenting and analyzing existing site conditions to include the stories and histories of the people who's lives happened where a vacant lot now sits. With this trauma informed context, we are able to identify environmentally just end uses and end users of vacant land to ensure our work is always in line with community vision.	#1 - Issue Identification, Community Vision & Strategic Goal Setting #5 - Constructive Engagement by Relevant Stakeholders #7 - Evaluation, Lessons Learned, and Replication of Best Practices

Grounded Board Advisory Groups

Each program area has a Board Advisory Group (BAG) comprised of board members and staff. Staff provide updates and board members contribute expertise, insights, and direction to specific programming-related issues.

Application	***EJCPS Overlap***
The Grounded Strategies BAG for Sustainable Urban Landscapes and this project include Dr. Danielle Andrews-Brown of Virginia Commonwealth University, and Dr. Shondrica Burrell of Morgan State University.	#5 - Constructive Engagement by Relevant Stakeholders #6 - Sound Management & Implementation #7 - Evaluation, Lessons Learned, and Replication of Best Practices

Annual Market Rate Alignment Process

ED_016126_00001497-00006

Every year, our CFO completes a market analysis to understand Grounded's competitiveness as an employer. We currently intend to meet the 50th percentile of market rate and are setting goals for the future. This ensures that as an organization focused on transparency, equity, and equal opportunity in the public sphere, we can provide the same for our staff. This also ensures we attract top tier talent to provide services for our community partners.

Application	***EJCPS Overlap***
The annual market rate alignment process has and will be applied to all staff members at Grounded strategies on an annual basis.	#6 - Sound Management & Implementation #7 - Evaluation, Lessons Learned & Replication of Best Practices

Senior Staff Leadership Team

Comprised of Director level staff members, the senior staff leadership team meets bi-weekly to discuss higher level operational matters and ensure the flow of information across all parts of the organization.

Application	***EJCPS Overlap***
Director of Programming Becca Simon is charged with the oversight of all programmatic objectives and sits on the Senior Staff Leadership Team. This ensures that project updates reach the highest level of decisionmaking on a regular basis, exhibiting the best practice of adaptive management.	#6 - Sound Management & Implementation #7 - Evaluation, Lessons Learned & Replication of Best Practices

D. Project Linkages

Supports EPA Strategic Plan Goal 2 (Take Decisive Action to Advance Environmental Justice and Civil Rights), Objective 2.2 (Promote Environmental Justice and Civil Rights at the Federal, Tribal, State, and Local Levels)

E. Partner and Collaborate

Penn State Extension's Role:

ED_016126_00001497-00007

- Provides expanded options for youth audiences via its 4-H programming
- Provides expanded options for adult audiences through its Master Gardener and Master Watershed Steward programming
- Penn State Extension is mission driven to provide science-based outreach and education to audiences who intervene on the land, in particular for agricultural endeavors

City of Pittsburgh Department of City Planning's Role:

- Facilitate parcel access process for the Grounded demonstration project site
- Facilitate parcel access processes for interested neighborhood residents after Grounded education sessions
- The City of Pittsburgh will gain badly needed assistance in maintaining its overabundance of vacant parcels by facilitating resident intervention on, and upkeep of, these spaces.

Community Members' Role:

- Provide valuable feedback regarding the initial installation of our demonstration project about site design through our charrette process
- Engage further community members in conversation about the value of natural infrastructure in the urban environment
- Community members stand to gain significantly from this effort through the direct beautification of parcels within their neighborhood, as well as streamlined avenues of access and ownership for parcels within their neighborhood

Grounded has maintained each of these partner relationships over the course of several years, and has intentions to deepen these collaborations by leveraging the resources awarded by the Environmental Protection Agency. Within our service area, the City of Pittsburgh is the largest municipal partner, so preserving this relationship is vital to our organizational viability. We regularly connect with multiple City departments during the day-to-day operations of our organization, and so whether or not we receive this award that relationship will continue.

ED_016126_00001497-00008

Most nascent of these relationships is Grounded's link to Penn State Extension: they have proved to be a reliable provider of services and technical assistance, covering gaps in our staff's expertise around specialized knowledge (topics such as animal husbandry, soil fertility management, and riparian buffer construction) tangential to, but not directly involved with, the work we routinely address. Again, whether or not we receive this funding, this is a valuable partnership that we fully intend to maintain.

F. Project Activities

Wildflower Meadow Public Education & Citizen Science

Grounded staff will create original workshops, events, social media posts, and other content to support resident education around the value of natural infrastructure within the urban fabric. Neighborhood residents will be the main audience for Grounded activities on this project: they will participate in design charrettes, inform the creation of educational materials, and participate directly in the implementation of meadow installations on vacant parcels.

Site Selection, Access, & Design

Grounded will work with the City of Pittsbrugh, the resident Maintenace Advisory Committee and community partners to identify optimal sites for meadow installation. Grounded will support the community to pursue an site access through Pittsburgh's existing adopt a lot program. Grounded will then support residents through a community co-design process to lay out site plans for the urban meadow installations.

Capacity Building & Preparation

Grounded will work with Penn State University Extension to train resident contractors assigned to installing and caring for the urban meadow sites. PSU Extension offers specialized Master Gardener, Master Watershed steward, and 4-H programming suitable for a range of audiences and learning abilities. Contractors and resident stewards will receive the benefits of science-based education on environmental issues that has been purposefully adapted to a variety of audiences.

Wildflower Field Installation

Grounded contractors will mobilize heavy equipment to remove rubble and prevent damage to lighter duty equipment, and injury to program participants during on-site planting activities. Selected plantings for the sites will provide aesthetic and functional (carbon sequestration, stormwater management, air filtration, provisioning services, etc.) improvements to historically disinvested neighborhoods.

Wildflower Field Maintenance

Grounded-built Wildflower meadows will be maintained on an annual basis through Grounded's Resident Contractor program, ensuring each site has a baseline standard of care as set by the resident Maintenance Advisory Committee.

G. Milestone Schedule

	2023				2024												2025+							
	S	O	N	D	J	F	M	A	M	J	J	A	S	O	N	D	J	F	M	A	M	J	J	+
Public Education & Citizen Science	1																							
Site Selection, Access, & Design	2																							
Capacity Building & Preparation	3																							
Wildflower Meadow Installation*								4		5		6								7		8		
Wildflower Meadow Maintenance																				9				

Notes

1. Public Engagement & Workshops on the benefits of Wildflower Meadows
2. Community Co-Design Charrettes, Site Selection
3. Contractor Training, Volunteer Engagement, Ground Preparation, Weed Control
4. Soil amendment, Hydration, First sowing and Plant Installation
5. Second sowing and Plant Installation
6. Third Sowing and Plant Installation, Secondary Weed Control
7. Fourth sowing, First Mowing, Topdressing
8. Infill Planting with Plugs, Weeding
9. Ongoing annual maintenance by Grounded Steward Contractors

H. Budget Narrative

See attached Budget Narrative

I. Environmental Results (Logic Model)

See attached Logic Model

J. Performance Measurement Plan

Grounded will measure the following parameters in our implementation of this project:

ED_016126_00001497-00010

1. Number of education sessions delivered [12]
    a. Number of participants in education sessions [5 per session]
2. Number of meadow sites installed [2]
    a. Number of species added per site [20]
    b. Square footage of lawn and barren ground converted to meadow cover [400]
    c. Pounds of biochar incorporated into project sites [1,200]
    d. Pounds of wildflower seed applied to community-serving projects [50]
3. Number of community centered maintenance advisory meetings held [25]
    a. Pre- and Post- project resident greenspace satisfaction surveys [2]

K. Sustainability Plan & Community Vision

The Lots of Wildflowers project* is part of and will contribute to the broader goals of Grounded's Land Stewardship Innovation program (LSI). LSI programming works with residents, communities, and institutions to co-create and demonstrate 22nd century standards for sustainable land stewardship and a thriving urban ecology. Part of the Sustainable Urban Lanscapes branch, the Lots of Wildflowers project will become part of the greater thought leadership Grounded is pushing out into the world through conference presentations, academic partnerships, and joint ventures with for-profits.

- Sustainable Urban Landscapes - BMP Research, Consulting, and Demonstrations*
- Land Lab - Management & Programming of Grounded Owned R&D Sites
- Steward Contractor Program - Skilled and compensated residents providing a baseline of care for vacant lots in their communities
- Refresh Fund - Revolving funds for stewards to sustain and grow existing sites
- PGH Mobile Toolbox - Reservable mobile tool shed that both stewards and Grounded staff use to power high impact work days and technical site projects.

L. Organizational Experience

Systemic racism in urban planning and public policy has created the conditions for hypervacancy (concentrations of vacant land lacking decades of investment) to disproportionately impact Pittsburgh's Black communities. Because they live in hypervacancy, a child achieves less academically, is chronically sicker, and earns less over a lifetime than their peers who do not live with hypervacancy. That's why Grounded is

ED_016126_00001497-00011

using vacant and underutilized land to improve environmental, socioeconomic and physical health.

Since 2007, Grounded has initiated and supported 175+ vacant land projects throughout the Pittsburgh region. Grounded has three primary program areas: Design and Placemaking, Land Stewardship Innovation, and Land Use Policy. All of our interventions included elements of youth, elder, & family engagement; resident-led citizen science, community-scale data set construction, and whole ecosystem solutions.

The 2020 launch of our newest program area Land Use Policy represents a pivot in the way Grounded uses vacant land as a medium for community change. Grounded is moving beyond simply stabilizing, beautifying, and stewarding vacant urban land. In Pittsburgh, legal and liability constraints mean residents and community groups face formidable hurdles to access city-owned vacant sites for neighborhood greenspace projects. Even when granted, access and the installment of physical improvements does not translate into ownership and equity. This creates a system where Black folks and people of color are tending to Pittsburgh's thousands of distressed properties, but are barred from reaping the benefits of land ownership.

If cared for properly, the ecosystem dividens of vacant lots include the potential for provisioning services (water, food), regulating services (climate and air pollution), cultural services (recreation, education), and supporting services (nutrient cycling, soil building)(G. Kim, 2016). The ultimate goal is to ensure that residents reap the full breadth of benefits of the capital and equity built on and around vacant lots in their communities.

M. Staff Experience / Qualifications

Masoud Sayles

Role: Senior Project Manager of Land Stewardship Innovation

Will lead all aspects of day-to-day activity regarding the implementation of the demonstration project and educational sessions.

ED_016126_00001497-00012

Masoud is a lifelong resident of the Ex. 6 Personal Privacy (PP) . A graduate of Penn State University with a degree in Geobiology, Masoud passionately pursues his interest in permaculture design. Prior to joining Grounded, Masoud worked joyfully alongside gardeners at his local community garden, as well as finding employment propagating plants for a local neighborhood nursery. During this time, he worked alongside members of his community in creating various gardens and on trash cleanups, engendering within him an interest in both social and environmental justice. At Grounded Strategies, he is thrilled to be a part of a group that proliferates green spaces throughout Allegheny County. While on staff at Grounded, Masoud also obtained Sustainable Landcare Accreditation.

In addition to his role at Grounded, Masoud serves on the Board of Directors of the Pittsburgh Food Policy Council and on the Board of Directors of Allegheny Land Trust, where he continually challenges the decisions and statements of other board members to be more inclusive and equitable, and encourages the recruitment of more diverse board members to ensure just outcomes from organizational actions across the county he calls home.

Riley McGrath

Role: Project Coordinator: Resident and Volunteer Resources

Will provide direct task oriented support to the Senior Project Manager of Land Stewardship Innovation for the implementation of the demonstration project and the management of program participants through our educational offerings.

Riley studied Environmental Studies and Urban Studies and earned certificates in Sustainability and Geographic Information Systems at the University of Pittsburgh. While in Undergrad, they spent a lot of time volunteering with different environmental organizations both on and off campus and grew passionate about environmental stewardship and urban sustainability.

Prior to joining Grounded, Riley completed a service year with PULSE (Pittsburgh Urban Leadership Service Experience) where they were a project assistant with Watersheds of South Pittsburgh.

Rebecca Simon

Role: Director of Programming

Will ensure overall compliance with grant activities, budget expenditures, and reporting requirements.

Becca received her undergraduate degree in International Political Economy and Environmental Policy & Decision Making from the University of Puget Sound in 2019. Post undergrad, Becca served as a FoodCorps AmeriCorps Service Member in Ronan, MT doing nutrition, gardening, and food justice education with Kindergarten-5th grade students. After FoodCorps, Becca moved to Pittsburgh to serve as a Fellow with Repair the World Pittsburgh where she was committed to helping engage the Pittsburgh community in acts of service and learning.

Skylar McGinley

Role: Development & Communications Project Manager

Will support project team in project documentation and multi-media storytelling.

Skylar has a Bachelor of Science in English from the College of Wooster in Wooster, OH. After graduating, he took part in the Photography Intensive course at Pittsburgh FIlmmakers (now part of Pittsburgh Center for Arts and Media).

Before Grounded, Skylar worked as the New Media Producer at the Children's Museum of Pittsburgh where he created the majority of the content that was put onto their various social media platforms.

N. Expenditure of Awarded Grant Funds

The following financial policies are outlined in Grounded's process manual and enforced by jointly our Director of Operations and Chief Financial Officer.

Receipts and Invoices

ED_016126_00001497-00014

When a Project is active, expenses must be accounted for in the form of receipts and invoices. Both money coming in and going out should have an easy to follow paper trail. *Receipts & Invoices should be scanned and sent to RECEIPTS@GROUNDEDPGH.ORG. Invoices are due by Tuesday at 3pm, the bookkeeper processes twice a month. The Finance Team may choose to wait to generate a check until closer to when the invoice is due. Invoices that require payment to individuals and LLC businesses must have a W9 accompanying them. If receipts are lost or not received for certain purchases, the purchaser is expected to create a replacement receipt detailing the purchase, project, reason and means of purchase and stamp it as though it was an official receipt. A template can be found in the EGNYTE Administrative Folder under Templates.

Credit Card Purchases

All full-time program staff will be provided an individual company credit card. Upon receipt, employees must sign the Grounded Credit Card Policy, which can be obtained from the Director of Ops. All staff will be provided program budgets with allowed expenses allocated for program purchases.

Authorized uses of the credit card include program supplies, materials and expenses approved per project or program budget. All travel purchases need to be approved at least two weeks in advance by the Executive Team. Travel requests should include transportation, lodging and meal per diem information. Purchases for professional development or other organizational expenses need to be approved in advance by the Executive Team.

Receipts from purchases made with a company credit card should be compiled, properly coded and submitted on a weekly basis, and no later than the 2nd day of the following month. Unauthorized use of the credit card includes personal or non-business expenditures of any kind, expenditures that have not been properly authorized or not explicitly needed for project needs, meals, entertainment, gifts or other expenditures which are prohibited by Grounded budget and/or policies, Federal, state, or local laws or regulations, or grant conditions or policies of the entities from which Grounded receives funds.

ED_016126_00001497-00015

Any purchase over $500, even if budgeted to a project or program, must be approved by the Executive Director to ensure consistency with overall organizational budget. Additionally, alcohol should not as a rule be purchased with Grounded funds unless previously approved by the Executive Director. Please alert your manager to request permission or guidance if directed to do so without approval. Violation of this policy may result in the loss of company credit card for a period of 1 month, and if this reoccurs, further disciplinary action may be taken. If you find that you have exceeded your credit card limit contact the Director of Operations, Exec Director, or the CFO for a balance increase.

Mileage and reimbursement for expenses

To be reimbursed for expenses paid out of pocket that could not be paid with your Grounded credit card (such as for cash or check purchases), you will need to submit the Personal Expenses Reimbursement Form. Please hold all receipts and requests to submit one monthly total. If you have mileage to include in your request, fill out the adjacent mileage log and your total will be automatically input in the first line of expenses. Note the purpose of the travel, such as meeting, site visit, as well as the origin and destination. Finally, document total trip mileage and it will auto calculate the total reimbursement based on the current IRS mileage rates for the year. Do not erase or alter this line in anyway. If you do not have mileage for the month, leave this line blank and only print and submit the sheet in this tab. If you have only mileage and no reimbursement, only print the mileage form. After approval by the Director of Operations or Executive Director, submit reimbursement to the "Outgoing Invoices" folder located by the printer. The stamp is not required for personal reimbursement requests as this information is already included in the form itself. Mileage is also reimbursable for bike mileage at .25 per mile.

Invoice Requests

Project managers are responsible for requesting official Grounded invoices be sent; these invoices will be generated by the Bookkeeper, and by default will be emailed to the customer unless otherwise requested. To request, complete the Invoice Request Form (Google Doc). Invoice requests are due Tuesday by 3pm to be generated on Thursday.

ED_016126_00001497-00016

Check Requests

If an individual needs to be paid they must submit an invoice to Grounded with a W-9 completed (we require a new one every calendar year) OR the Grounded Staff member can submit a check request. Templates for this can be found under the "Templates" on Google Drive

Financial Reporting

Reports are generated by Project Manager on a monthly basis for each active project. Project Managers are responsible for reviewing the reports to ensure allocations have been done accurately. PMs should also input expenditures into their budgets.

O. Past Performance

Funder	Amount	Awarded	Completion Summary	Reporting Requirements
US EPA	$30,000	2019	Sucessful project to reduce lead toxicity in neighborhood vacant lots awarded from 11/2019 to 11/2020. QAPP required.	Progress report submitted on June 23, 2021. Final report submitted on December 1, 2022.
PPP Loan (SBA)	$112,915	2021	Grounded qualified for and received a loan pursuant to the Paycheck Protection Program (PPP), a program under the Coronavirus Aid, Relief, and Economic Security Act.	Grounded recognized revenue of $112,915 on the statement of activities as PPP grant revenue as of December 31, 2021, as the conditions of the loan were met.
PA Department of Environmental Protection	$10,375	2021	Environmental Education project successfully completed in 2022 with PA DEP Closeout Letter issued to Grounded on 9/15/2022.	Midterm report submitted on 2/17/2022. Final report submitted on 7/19/2022.
Pittsburgh Community Development Block Grant	$2,500	2021	Community beautification project successfully completed and all expenses reimbursed.	Report and reimbursement requests submitted August 2021.

Richard King Mellon Foundation	$200,000	2021	Incentive driven resident stewardship program providing care for vacant lots successfully completed in December 2022.	Mid term project report submitted October 21, 2023. Final project report submitted January 24, 2023.
Grable Foundation	$40,000	2021	Youth focused project using underutilized vacant land to install safe greenspaces allowing for diverse, sensory-rich, and open-ended play vital for developing strong executive functioning skills successfully completed in January 2023.	Interim report submitted on 3/31/2022. Final report to be submitted 5/1/2023.
