**PESTICIDE PROGRAM DIALOG COMMITTEE  
MEETING (PPDC)**

**ED MESSINA, DIRECTOR  
OFFICE OF PESTICIDE PROGRAMS  
U.S. ENVIRONMENTAL PROTECTION AGENCY**

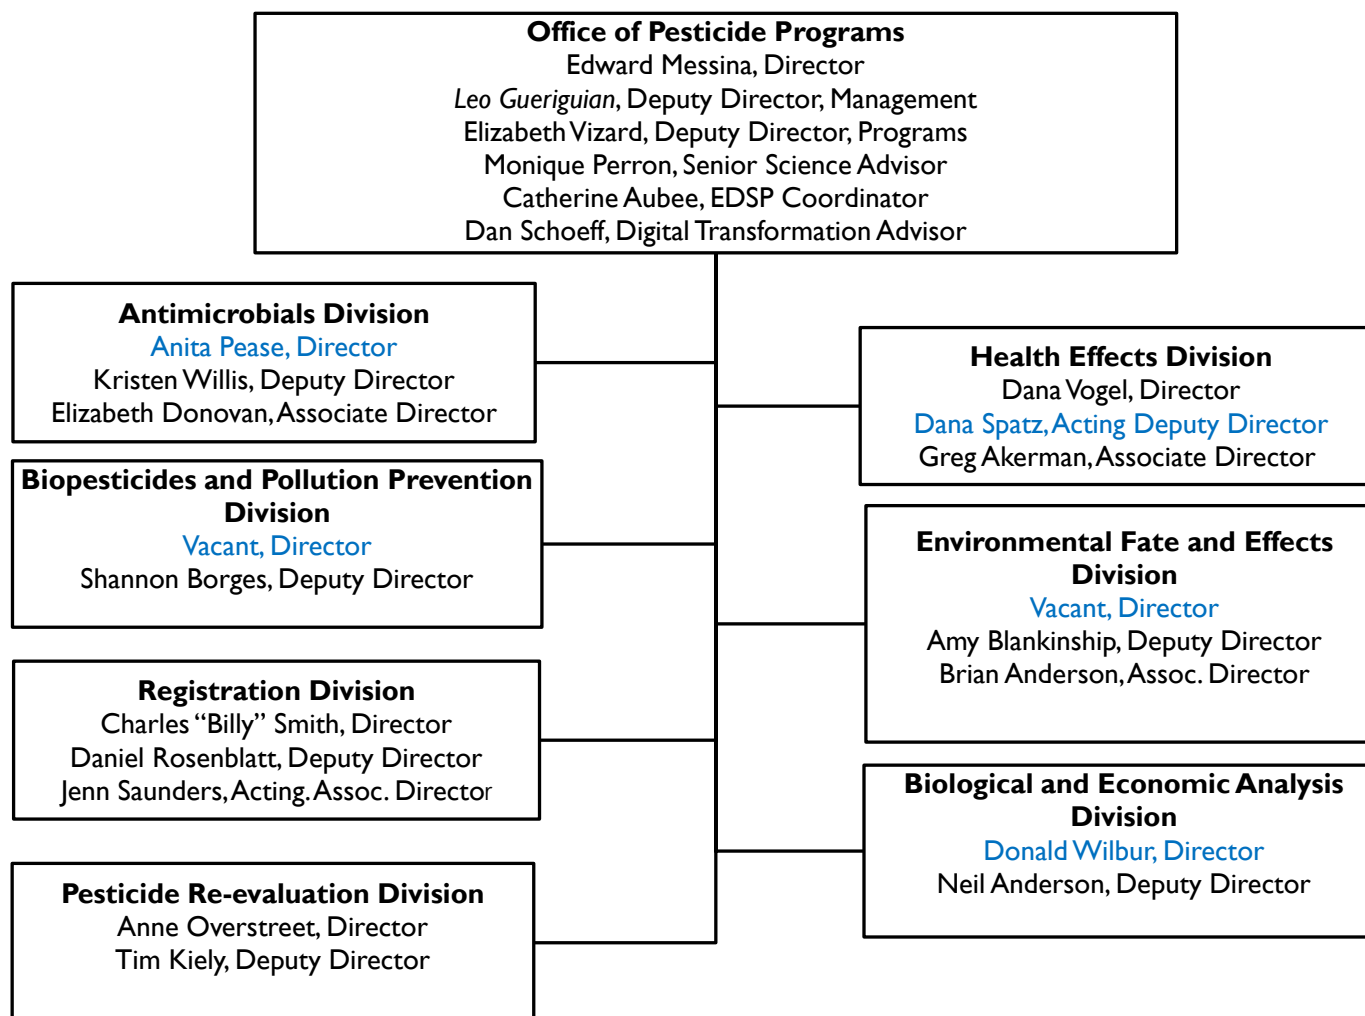

**JUNE 17, 2025**

---

# MEETING AGENDA

- 
- People
  - Priorities
  - Process
  - Technology
  - New Active Ingredients
  - Registration & Registration Review
  - Policy Updates
  - Crop Tours
  - Thank You
  - Questions

# **PRIORITIES AND PROCESS IMPROVEMENTS**

# Administrator Zeldin's Pillars and OPP's Work

- **Pillar 1: Clean Air, Land, and Water**

- Utilizing new approach methodologies and integrating EDSP decisions and data needs into FIFRA decisions.
- Refining pesticide use limitation areas (PULAs) to protect listed species and critical habitat under the Endangered Species Act.

- **Pillar 3: Permitting Reform, Cooperative Federalism, and Cross-Agency Partnership**

- Reducing the backlog of PRIA and non-PRIA actions, continued transparency with industry on performance metrics and performance data to show where progress is being made and where more improvement is needed.

## FY25 Goals

- Complete 30 new AIs by September 30, 2025.
- Complete 40 new uses, by September 30, 2025.
- Reduce overall backlog (cases past their due date) of non-PRIA cases from baseline in FY 2024 of 14,000 actions down to 10,000 actions by the end of the fiscal year for a total reduction of 25 percent, by September 30, 2025.
- Reduce overall backlog (cases past their due date) of notifications and amendments from baseline in FY 2024 of 4,195 actions down to 3,000 actions by the end of the fiscal year for a total reduction of 25 percent, by September 30, 2025.
- Reduce average days late and percentage of cases late for completed PRIA actions from FY 24 average of 170 days and 76 percent, respectively, by September 30, 2025.

# FY25 Goals

- Complete 4 Preliminary Work Plans
- Complete 1 Final Work Plan
- Complete 4 Proposed Interim or Final Decisions
- Complete 7 Interim Decisions
- Complete 1 Final Decision
- Implement office-wide digital transformation to move data and legacy apps to a cloud-based format.

## FY25 Goals

- Implement six office-wide process improvements projects to provide measurable results for increasing the speed and timeliness of pesticide applications.
- FTE levels managed within FY25 enacted payroll budget to support priority registration actions
- Foster strong collaboration with Federal, State, NGO, and Industry Associations.
- Appropriately represent Agency priorities and policies at various, requested speaking engagements at Federal, State, NGO, and Industry association meetings, while keeping resource constraints and backlog goals in mind.

# Administrator Zeldin's Pillars and OPP's Work

- Since January 20, 2025, our non-PIRA backlog decreased from 13,270 to 9,798 actions, so we continue to make progress.
- Rolling out the MyPest, which for the first time allows registrants of pesticide products the ability to monitor the status of their pesticide registration submissions in real-time, providing much-needed transparency to the registration process.
- Implementing PRIA 5 deliverables to build efficiencies into our program. Actions like, reduced PRIA fee categories, further integration of MyPest and Salesforce, and increased use of structured labeling, will have significant positive impacts on our workstreams.
- Continuing work on Digital Labeling to make pesticide labels easier to submit, review, and ultimately, for consumers to read, crosses both pillars.

## PESTICIDE REGISTRATION IMPROVEMENT ACT (PRIA) 5 IMPLEMENTATION - FY 25 ACTIVITIES

- EPA webpage on PRIA 5 Implementation:
  - <https://www.epa.gov/pria-fees/pria-5-implementation>
- PRIA Annual Report
- Non-PRIA backlog reduction and review timeframes for new actions
- IT modernization efforts
- Bilingual labeling implementation- FAQs, translation guide, implementation plan, outreach
- Vector Expedited Review Voucher (VERV) Program
- Data Evaluation Record (scientific study summaries) process implementation
- Third-Party Audit
- Training

## **PRIA COALITION SUPPORTED EFFORTS AND COLLABORATION**

- January 6, 2025, letter from the Coalition described support for eight ongoing OPP process improvement projects
  - Non-PRIA backlog reduction
  - Update to PRN 98-10
  - Revising CSF formatting scheme
  - Increasing predictability in acute tox and product chem review times
  - Update to PRN 98-1
  - Structured and digital labeling efforts
  - Greater use of Salesforce in the science divisions
  - ISB process improvements
- OPP appreciates the support and continues to make progress in these areas

## PROCESS IMPROVEMENT PROJECT EXAMPLES ACROSS OPP

- Tracking, communicating, and reporting registration and registration review deliverables and timelines using lean visual management across all of OPP, including science divisions.
- Standardization, templates, and draft industry analysis to assist timely OPP review
  - DER template creation/revisions
  - Developing technical screen guidance
  - Guidance to registrants on providing benefits information for new conventional AIs/new uses
  - Identifying which risk assessments can be streamlined (e.g., lower risk chemicals)
  - Standardizing “raw data” formats to shorten review time
  - Sharing/posting regulatory checklists with registrants

## PROCESS IMPROVEMENT PROJECT EXAMPLES ACROSS OPP

- Use of Automation and digital labeling tools to speed review timelines
  - Use of coded program to batch similar public comments
  - ESA tool improvements (web-based app, automation of BE analyses)
- Sharing resources across divisions:
  - BEAD lab efforts to review product chem, acute tox, and efficacy data for RD/AD
  - Expansion of registration review label review with HED to reduce backlog
  - Sharing regulatory expertise and staff time across PRD and RD
- Fast-track amendment strategies to increase completions
- Planned administrative withdrawal of certain AD non-coded PRIA submissions FRN

## CHANGES TO PESTICIDE DATA SUBMISSION PROCESS

- On April 3rd, EPA announced improvements to simplify the process for companies submitting data to the agency as part of a pesticide registration package.
- Companies are required to submit a document called a “data matrix” form when their pesticide registration packages contain cited data from outside sources.
- Companies were required to submit two versions of the data matrix form (in either paper or electronic format): one for internal agency use and one with reference data redacted for public use.
- The agency determined that there was no need for a redacted version and is now only asking for one unredacted version of the form to be used for both internal and public use.
- EPA will also no longer accept paper submissions of this form and will only accept this information via a web-based portal.
- This improvement will make the agency’s processing of this information more efficient and reduces burden for companies.

## DIGITAL TRANSFORMATION UPDATE

- Document Solutions Project and Data Solutions Project: Moving to cloud based, low code solutions to lower ongoing costs, extracting data automatically (e-label) to lower contract costs and utilizing AI tools to lower science contract costs;
- Process Automation, Data Analysis, Visualizations: Process Automation (DCI Builder/letters), process mapping (OPP-wide), time to delivery (science staff to regulatory staff), time in process steps of workflows and workload (touch-time and level of effort performance metrics).
- Customer-facing information through MyPest App: Externally facing dashboards to improve customer experience for pesticide registrants to track submitted actions and obtain projected completion dates and bi-directional communication with OPP (PRIA 5 deliverable).

# PROGRAM UPDATES

# **REGISTRATION AND REGISTRATION REVIEW**

## LIST OF NEW AIS PROPOSED AND FINALIZED THIS FISCAL YEAR

- **Metamitron** – registered one technical and two end use plant growth regulator products for use on apple and pear trees, implementing a new structured label.
- **Cyclobutrifluram** - proposed registration decision for controlling nematodes and select soil and seedling diseases in and on turfgrass, ornamentals, romaine lettuce, cotton and soybean seeds.
- **Isocycloseram** - proposed registration decision for ten products for use on agricultural crops, turf and ornamentals, and outdoor uses for commercial, industrial, and domestic sites.
- **Vadescana** – proposed registration on one technical and two end use products to provide control Varroa mites in bee hives. Also registered a new varroacide product containing l-glutamic acid.
- **Florylpicoxamid** - registered three products for use on food crops and golf courses.
- **Veratrine** – registered for application to walls and other vertical structures for non-food commodities.
- **Glufosinate-P** – registered to control weeds in conventional and glufosinate-resistant field corn, sweet corn, soybean, cotton, and canola.
- **Diflufenican** - proposed registration decision for two products for preplant and preemergence control of broad leaf weeds including waterhemp, Palmer amaranth, and other pigweed species in corn and soybean.

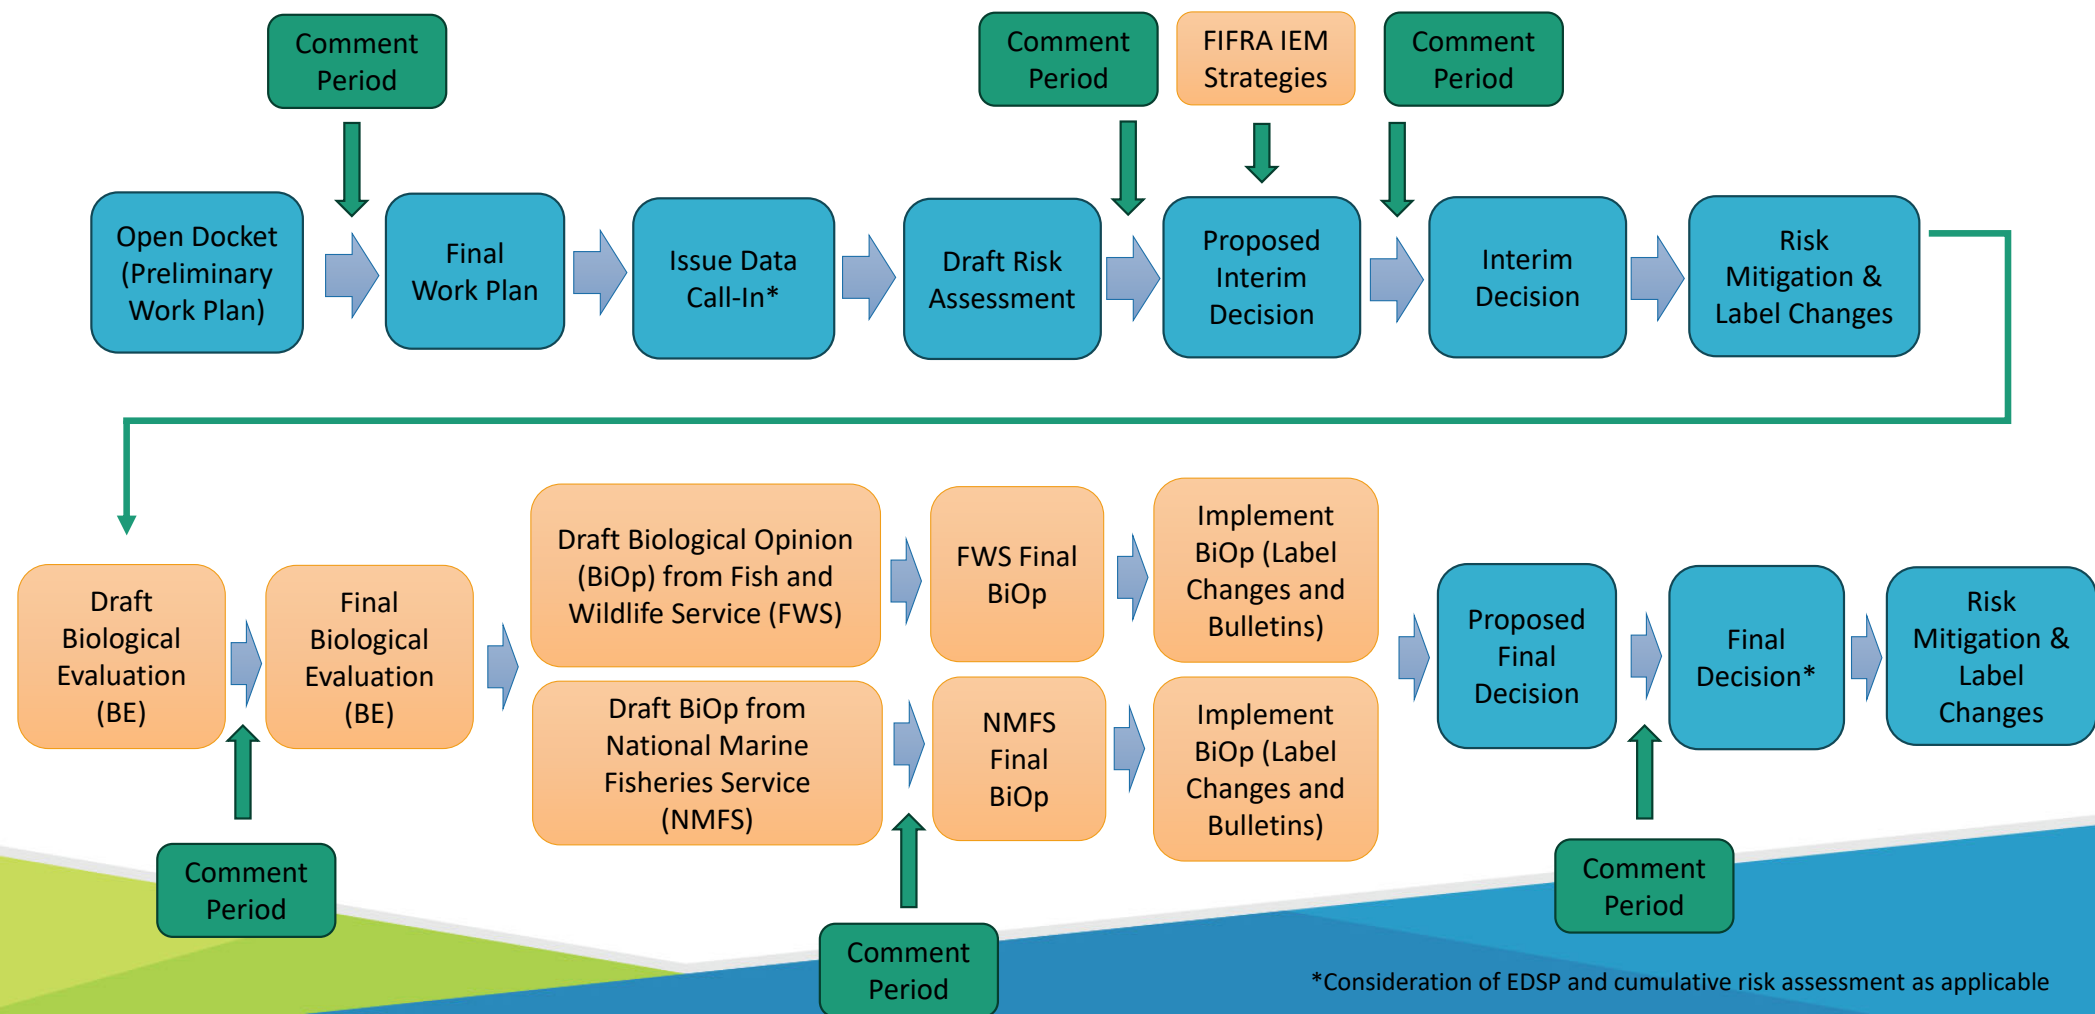

# PESTICIDE REGISTRATION REVIEW

- The FY 2023 omnibus set a new deadline of October 1, 2026, for completing the first phase of registration review.
- There are 799 registration review cases due by October 1, 2026 - 734 cases registered prior to FY 2007 that carried forward, and 65 new active ingredients registered after FY 2007 with registration review due dates that fall before October 2026.
- Of the 799, through September 2024 there were:
  - 732 cases (or 92%) for which draft risk assessments are completed (70 remain).
  - 634 cases (or 79%) for which final or interim decisions are completed (163 remain).

\*After publication EPA generally holds a 60-day public comment period.

# Pesticide Registration Review Process

# DICROTOPHOS

- On April 18<sup>th</sup>, EPA released the Interim Registration Review Decision (ID) for the pesticide dicrotophos. The ID identifies mitigation measures to reduce potential human health and ecological risks.
- Dicrotophos is an organophosphate insecticide that is used on cotton for the suppression or control of arthropod pests.
- The Proposed Interim Decision released in June 2024 identified human health risks of concern for occupational handlers and bystanders from non-occupational spray drift, and ecological risks of concern (birds, mammals, pollinators, and aquatic invertebrates).
- EPA is requiring that mitigation measures be implemented through updated product label language, including application buffers, updated Personal Protective Equipment (PPE) requirements, drift and runoff mitigation techniques, guidance for ecological incident reporting, and more.

# **POLICY UPDATES**

# INSECTICIDE STRATEGY

- In April, EPA issued the final Insecticide Strategy that identifies practical protections for federally endangered and threatened species from the use of insecticides, while providing flexibility for pesticide users and growers.
- The Strategy identifies mitigations aimed at protecting more than 900 species listed by the U.S. Fish and Wildlife Service (FWWS) that EPA considers when it registers a new insecticide or reevaluates an existing one.
- We may amend the Strategy and supporting documents based on lessons learned from implementation through FIFRA actions and stakeholder engagement and will provide further updates as needed.
- We are developing digital tools for growers to make it easier to identify PULA areas and mitigation measures for spray drift and runoff.

# COMMUNICATING ES MITIGATION – WEBINAR

- The webinar will provide an overview of the ecological mitigation measures found on the mitigation menu webpage and include a demonstration of how to use available tools.
- Timing: Summer 2025

# REFINED LISTED SPECIES MAPPING

- On June 12th, EPA published the refined interim core maps identifying areas important to 12 threatened or endangered (listed) species and their critical habitats as designated by the FWS.
- These maps are used for developing pesticide use limitation areas (PULAs) and will allow EPA to protect listed species from the use of pesticides through geographically specific mitigations.
- EPA developed a process with input from FWS, USDA, and support from University of GA for refining maps.
- Maps in development by:
  - Industry and consultants, Commodity/interest group, Environmental Non-Governmental Organizations (E-NGOs), EPA, and Others
- About 500 species maps are scheduled to be refined as part of consultation, registration/re-evaluation, ESA strategy PULAs, and other purposes.
- There are opportunities for input!
- EPA is releasing maps as they become ready at:  
<https://epa.maps.arcgis.com/home/item.html?id=ccfd477229344b6a87bdf33f7007ed01>

# June-August OPP 2025 Crop Tours: Tentative Schedule

(OPP POC: Jasmin Jackson)

Host	Location
IR-4	DC area (regional)
AEM (& Partners) Precision Ag Field Demo Day	Newburg, MD
North Dakota Grain Growers Association E-Tour	Grand Forks, North Dakota
California Rice Commission	Sacramento, CA
Snake River Sugarbeet Tour	Idaho (TBD)
Michigan Corn	Michigan (TBD)
California Specialty Crops Council	California (TBD)
Corteva Chesapeake Farms	Chesapeake Farms, MD
National Potato Council	Bangor, Maine
