RE: Notice of Intent for Non-Contact Cooling Water Discharge
Northern Elastomeric, Inc.
61 Pine Road
Brentwood, New Hampshire
NPDES General Permit # NHG250503

Dear Compliance Coordinator:

At the request of Northern Elastomeric, Inc. (NEI), GeoInsight, Inc. (GeoInsight) is submitting this Notice of Intent (NOI) to discharge non-contact cooling water (NCCW) under General Permit NHG250000. The United States Environmental Protection Agency (USEPA) published a notice issuing the General Permit in the Federal Register on July 31, 2008. NEI was authorized to discharge NCCW under the previous General Permit (the Permit) issued on April 25, 2000. The NOI form is included in Attachment A, and supplementary information is provided in the paragraphs that follow.

GENERAL FACILITY INFORMATION

The NEI facility is located at 61 Pine Road in Brentwood, New Hampshire. The facility location is shown on the topographic map included as Figure 1. NEI is an asphalt membrane manufacturing facility consisting of office, production, and warehouse space situated on a 39.56-acre parcel. The property was historically used as a gravel pit and is topographically relatively flat, excepting moderate to steep slopes located along the boundary with Pine Road to the west and along the south boundary of the property.

NCCW is extracted from three on-site ground water wells for use in cooling drums to lower the temperature of the rolled roofing products. The NCCW discharge rate is approximately 100 gallons per minute or 0.144 million gallons per day. The NCCW discharge is continuous

Fax (203) 271-8038

24 hours per day, regardless of the production schedule, excepting approximately 10 to 15 days in late December when the facility is closed and NCCW is not used.

DISCHARGE INFORMATION

The NCCW from the facility's two production lines is discharged to a concrete manhole located on the east side of the facility building in the vicinity of several storage silos (Figure 2). The NCCW flows through a culvert pipe and is discharged to a drainage swale located along the north property boundary. The swale collects runoff from the northern and northeast portion of the property, including storm water from a catch basin located within the facility's paved driveway. The NCCW and periodic storm water runoff discharges via the swale to a wetland area near the northeast property boundary (approximately 900 feet from the outfall). Subsequently, water flows through a wetland area located off the property to the Little River located approximately 1,500 feet east of the property boundary.

GeoInsight contacted the New Hampshire Department of Environmental Services (NHDES) on September 23, 2008 to discuss the applicability of calculating the seven day-ten year low flow (7Q10) of the receiving water body at the property. The NHDES suggested submitting the NOI without this information for its review because the NCCW is not discharged directly to the receiving water body. The location of the property relative to downstream receiving waters is illustrated on Figure 1. Also, a *NH Granit* Geographic Information System database printout (Attachment B) is included to illustrate surface hydrologic features in the vicinity of the facility and the generalized surface flow direction.

NON-CONTACT COOLING WATER SOURCE INFORMATION

Because the facility uses three ground water wells for the source of NCCW, GeoInsight sampled the NCCW effluent on September 22, 2008 in accordance with Part 5.4 of the General Permit. A sample was collected from the concrete manhole prior to discharge to the receiving water body and analyzed for chloride and the total recoverable metals antimony, arsenic, cadmium, chromium (total), chromium VI, copper, iron, mercury, nickel, silver, and zinc. Chloride, arsenic, and iron were reported at concentrations of 22 milligrams per liter (mg/L), 0.009 mg/L, and 0.13 mg/L, respectively. These concentrations are below the NHDES Surface Water Quality Standards for fresh water established in Env-Wq 1700. In addition, GeoInsight measured the pH and temperature of the effluent using field instrumentation during a visit on September 17, 2008. The pH of the NCCW effluent was measured to be 7.1 standard units and the temperature was 61 degrees Fahrenheit. These results are consistent with values measured routinely by the facility in accordance with its former Permit. The laboratory analytical report for the samples collected is included in Attachment C. It is important to note that a sample for hardness was not analyzed because NCCW is discharged to a drainage swale that otherwise receives only storm water; there is not a base flow in the swale aside from the NCCW flow. Therefore, an upstream sample location was not available.

DETERMINATION OF ENDANGERED SPECIES ACT ELIGIBILITY

GeoInsight contacted the New Hampshire Natural Heritage Bureau (NHB) to evaluate Endangered Species Act (ESA) eligibility. The review by the NHB, dated September 16, 2008, is included in Attachment D. The NHB indicated that there were not records in its database of known occurrences of sensitive species at the property. In addition, GeoInsight also checked the list of Federally Listed Endangered and Threatened Species in New Hampshire published by the U.S. Fish and Wildlife Service (Attachment D). This list also did not identify sensitive species located at the property or in the vicinity of the discharge. Therefore, the facility has met ESA eligibility Criterion D, listed in Appendix 2, Section B of the General Permit.

DOCUMENTATION OF NATIONAL REGISTER OF HISTORIC PLACES REQUIREMENTS

The National Register of Historic Places was accessed on the database maintained by the U.S. National Park Service website (Attachment E). A review of the database did not indicate historic or eligible properties that are on the subject property or in proximity to the discharge. Therefore, the facility met the requirement in Appendix 3, Section C (1) of the General Permit.

GeoInsight trusts that the information contained herein satisfies the requirements of the General Permit. Please contact us at (603) 314-0820 if you have questions regarding the contents of this letter or the enclosures.

Sincerely,
GEOINSIGHT, INC.

ATTACHMENT A
NOI FORM

APPENDIX 5

Suggested Form for Notice of Intent (NOI) for the Noncontact Cooling Water General Permit

1. General facility information. Please provide the following information about the facility.

a) Name of facility: Northern Elastomeric, Inc.		Type of Business: Asphalt Roofing Manufacturing
Facility Location Address : 61 Pine Road Brentwood, New Hampshire longitude: <u>71deg 00m 44s</u> latitude: <u>41deg 00m 00s</u>	Facility SIC codes: 2952	Facility Mailing Address (if not location address)
b) Name of facility owner: Northern Elastomeric, Inc.		Email address of owner: <u>pollard@nei-act.com</u>
Owner's Tel #: <u>800-998-4634</u> Owner's Fax #: <u>603-778-0609</u>		Owner is (check one): 1. Federal _____ 2. State _____ 3. Tribal _____ 4. Private <u>X</u> 4. Other _____ (Describe)
Address of owner (if different from facility address) 50 Pine Road, Brentwood New Hampshire		
Legal name of Operator, if not owner: _____ Operator Contact Name: <u>Sam Pollard</u> Operator Tel Number: <u>800-998-4634</u> Fax Number: <u>603-778-0609</u> Operator's email: <u>pollard@nei-act.com</u> Operator Address (if different from owner) _____		
d) Attach topographic map indicating the locations of the facility and the receiving water; all NCCW discharge points; upstream and downstream monitoring points. Map attached? <u>yes</u>		
e) Check Yes or No for the following: 1. Has a prior NPDES permit been granted for the discharge? Yes <u>X</u> No _____ If Yes, Permit Number: <u>NHG250503</u> 2. Is the discharge a "new discharge" as defined by 40 CFR Section 122.22? Yes _____ No <u>X</u> 3. Is the facility covered by an individual NPDES permit? Yes _____ No <u>X</u> If Yes, Permit Number _____ 4. Is there a pending application on file with EPA for this discharge? Yes _____ No <u>X</u> If Yes, date of submittal: _____		

2. Discharge information. Please provide information about the discharge, (attaching additional sheets as needed)

a) Name of receiving water into which discharge will occur: Drainage swale to the Little River.

State Water Quality Classification: B (Little River) Freshwater: x Marine Water: _____

b) Describe the discharge activities for which the owner/applicant is seeking coverage: Refer to letter.

c) **FOR MASSACHUSETTS FACILITIES ONLY:** Engineering Calculations: Submit the completed engineering calculation of the surface water temperature rise as shown in Attachment A of the General Permit. Check if attached: _____

d) Number of outfalls 1

For each outfall:

e) What is the maximum daily and average monthly flow of the discharge? Note that EPA will use the flow reported here as the facility's permitted effluent flow limit. Max Daily Flow 500,000 GPD Average Flow 144,000 GPD

f) What is the maximum daily and average monthly temperature of the discharge (in degrees F)? Max Temp. 67 Average Temp. 64

g) What is the maximum and minimum monthly pH of the discharge (in s.u.)? Max pH 7.38 Min pH 7.16

h) **FOR MASSACHUSETTS FACILITIES ONLY:** Is the source water of the NCCW potable water? Yes _____ No _____ If Yes, EPA will calculate the Total Residual Chlorine limit for facilities located in Massachusetts.

i) Is the discharge continuous? Yes _____ No x If no, is the discharge periodic (P) (occurs regularly, i.e., monthly or seasonally, but is not continuous all year) or intermittent (I) (occurs sometimes but not regularly) or both (B) _____
If (P), number of days or months per year of the discharge 355 days and the specific months of discharge Continuous except approximately 10 days in December
If (I), number of days/year there is a discharge _____

j) Latitude and longitude of each discharge within 100 feet: outfall 1: long. 71deg 00'40.5" lat. 43deg 00'8.2"; outfall 2: long. _____ lat. _____;
outfall .3: long. _____ lat. _____ (See http://www.epa.gov/tri/report/siting_tool)

k) Provide the reported or calculated seven day-ten year low flow (7Q10) of the receiving water Pending review by NHDES cfs

Please attach any calculation sheets used to support stream flow and dilution calculations. See General Permit Attachment B for equations and additional information.

MASSACHUSETTS FACILITIES: See Part 3.4 and Appendix 1 of the General Permit for more information on ACEC.

Areas of Critical Environmental Concern (ACEC): Does the discharge occur in an ACEC? Yes _____ No _____

If yes, provide the name of the ACEC: _____

3. NCCW Source Water Information. Please provide information about the NCCW source water, using separate sheets as necessary:

a) Indicate source of the NCCW (i.e., municipal water supply, private well, surface water withdrawal, groundwater): Source: <u>Three on-site ground water wells.</u> Name of Source Water: <u>Ground water</u> _____ Is the source registered/permitted under MA Water Management Act or NHDES Water User Registration Rule (Env Wq 2202)? Yes ☒ No _____ If yes, registration number: <u>20739-s01</u>	b) If source water is surface water: i) Is it a freshwater river or stream Yes _____ No _____ ii) Is it a lake? _____ reservoir? _____ iii) Is it tidal river? _____ estuary? _____ ocean? _____ c) Is the source water groundwater? Yes _____ No _____ If yes, see Appendix 8 and submit effluent and surface water test results, as required in Part 5.4 of the General Permit. d) Does the facility use both a primary and backup source of noncontact cooling water? Yes _____ No _____ If yes, attach information that identifies and explains the primary and backup sources of noncontact cooling water for and how often the backup supply was used in last three years.
---	---

4. Best Technology Available for CWIS

Are you subject to BTA requirements at Part 4.2 of the General Permit? (Facility's discharge is covered by this General Permit and the facility withdraws noncontact cooling water from surface source water). Yes _____ No ☒ If No, explain: Source water is not surface water.

If YES, attach the facility-specific BTA description as required in Part 4.3 of the General Permit. For additional information and guidance, see Questions 13-23 of the NCCW Fact Sheet, posted at <http://www.epa.gov/region1/npdes/nccwgp.html>. Provide a map showing the location of each CWIS intake structure; NCCW outfall(s) and any CWIS feature referred to in the BTA description.

Include in your description:

- _____ Measures to meet the General Permit Part 4.3.a general BTA requirements, including documentation that describes the facility's monitoring program for impinged fish and/or invertebrate; or the required alternative monitoring plan frequency and/or protocol
- _____ A characterization of the source water body's aquatic life habitat in the vicinity of each CWIS during the seasons when the CWIS may be in use
- _____ The attributes of the current CWIS
- _____ Design measures of the CWIS
- _____ Operation measures of the CWIS
- _____ Historical occurrence of impinged fish for the past five years
- _____ If applicable, a demonstration that the facility's intake rate is commensurate with a closed-cycle recirculation system
- _____ Other components to reduce impingement and/or entrainment of aquatic life

4. BTA FOR CWIS CONTINUED:

Provide the following information for each CWIS to support your attached facility-specific BTA description.

Design capacity of the of the CWIS _____MGD

Maximum monthly average intake of the CWIS during the previous five years _____MGD Month in which this flow occurred _____

Maximum through-screen design intake velocity _____feet/second (fps)

For facilities where the CWIS is located on a freshwater river or stream, provide the following information:

The source water's annual mean flow _____cubic feet/second (cfs) as available from USGS or other appropriate source

The design intake flow as a % of the source water's annual mean flow _____ Attach calculations if equal to or less than 5% of annual mean flow.

The source water's 7Q10 _____cfs. See Attachment B of the General Permit for more information on 7Q10 determinations.

The design intake flow as a percent of the source water's 7Q10 _____

5. Contaminant Information

If applicable, attach a listing of all non-toxic pH neutralization and/or dechlorination chemicals used, including chemical name and manufacturer; maximum and average daily quantity used as well as the maximum and average daily expected concentrations (mg/l) in the NCCW discharge, and the vendor's reported aquatic toxicity (NOAEL and/or LC₅₀ in percent for aquatic organism(s)). Not Applicable.

6. Determination of Endangered Species Act Eligibility: Provide documentation of ESA eligibility as required at Part 3.4 and Appendix 2, Part C, Step 4, of the General Permit. In addition, respond to the following questions.

- a) Are any listed threatened or endangered species, or designated critical habitat, in proximity to the discharge? Yes _____ No X
- b) Has any consultation with the federal services been completed? Yes _____ No X
- c) Is consultation underway? Yes _____ No X
- d) What were the results of the consultation with the U.S. Fish and Wildlife Service and/or NOAA Fisheries Service (check one):
 - a "no jeopardy" opinion _____ or written concurrence _____ on a finding that the discharges are not likely to adversely affect any endangered species or
- e) Which of the five eligibility criteria listed in Appendix 2, Section B (A,B,C,D or E) have you met? D
- f) Attach a copy of the most current federal listing of endangered and threatened species from the USF&W web site listed in Appendices 2, 2.1 and 4

7. Documentation of National Historic Preservation Act requirements: Please respond to the following questions:

- a) Are any historic properties listed or eligible for listing on the National Register of Historic Places located on the facility site or in proximity to the discharge? Yes _____ No X
- b) Have any State or Tribal historic preservation officers been consulted in this determination? Yes _____ or No X If yes, attach the results of the consultation(s).
- c) Which of the three National Historic Preservation Act requirements listed in Appendix 3, Section C (1,2 or 3) have you met? 1

8. Supplemental Information: Please provide any supplemental information. Attach any analytical data used to support the application. Attach any certification(s) required by the general permit

9. Signature Requirements: The Notice of Intent must be signed by the operator in accordance with the signatory requirements of 40 CFR Section 122.22 (see below) including the following certification:

I certify under penalty of law that (1) no biocides or other chemical additives except for those used for pH adjustment and/or dechlorination are used in the noncontact cooling water (NCCW) system; (2) the discharge consists solely of NCCW (to reduce temperature) and authorized pH adjustment and/or dechlorination chemicals; (3) the discharge does not come in contact with any raw materials, intermediate product, water product (other than heat) or finished product; (4) if the discharge of noncontact cooling water subsequently mixes with other wastewater (i.e. stormwater) prior to discharging to the receiving water, any monitoring provided under this permit will be only for noncontact cooling water; (5) where applicable, the facility has complied with the requirements of this permit specific to the Endangered Species Act and National Historic Preservation Act; and (6) this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted.

Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I certify that I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Facility Name:	NORTHERN ELASTOMERIC INC 61 PINE ROAD BIRCHWOOD ND

Suite 515 West
Manchester, NH 03103

PO Number: None
LabID: 15291
Date Received: 9/22/08

Project: 2810-001 NEI

Attached please find results for the analysis of the samples received on the date referenced above.

Unless otherwise noted in the attached report, the analyses performed met the requirements of Resource Laboratories, LLC Quality Assurance Plan. The Standard Operating Procedures (SOP) are based upon USEPA SW-846, USEPA Methods for Chemical Analysis of Water and Wastewater, Standard Methods for the Examination of Water and Wastewater and other recognized methodologies. The results contained in this report pertain only to the samples as indicated on the chain of custody.

Resource Laboratories, LLC maintains certification with the agencies listed below.

We appreciate the opportunity to provide laboratory services. If you have any questions regarding the enclosed report, please contact the laboratory and we will be glad to assist you.

Sincerely,
Resource Laboratories, LLC

Manchester, NH 03103

Date: 9/16/2008

From: NH Natural Heritage Bureau

Re: Review by NH Natural Heritage Bureau of request dated 9/16/2008

NHB File ID: NHB08-2123

Applicant: NEI

Tax Map(s)/Lot(s): Map 205, Lot 21
Brentwood

Project Categories:
Water/Wastewater: Wastewater facility

The NH Natural Heritage database has been checked for records of rare species and exemplary natural communities near the area mapped below. The species considered include those listed as Threatened or Endangered by either the state of New Hampshire or the federal government. We currently have no recorded occurrences for sensitive species near this project area.

A negative result (no record in our database) does not mean that a sensitive species is not present. Our data can only tell you of known occurrences, based on information gathered by qualified biologists and reported to our office. However, many areas have never been surveyed, or have only been surveyed for certain species. An on-site survey would provide better information on what species and communities are indeed present

This review is valid through 9/16/2009.

MAP OF PROJECT BOUNDARIES FOR: NHB ID# NHB08-2123

**FEDERALLY LISTED ENDANGERED AND THREATENED SPECIES
IN NEW HAMPSHIRE**

COUNTY	SPECIES	FEDERAL STATUS	GENERAL LOCATION/HABITAT	TOWNS
Belknap	Small whorled Pogonia	Threatened	Forests with somewhat poorly drained soils and/or a seasonally high water table	Meredith, Alton and Laconia
Carroll	Small whorled Pogonia	Threatened	Forests with somewhat poorly drained soils and/or a seasonally high water table	Albany, Eaton, Madison Wolfeboro, Brookfield and Wakefield
Coos	Canada Lynx	Threatened	Regenerating softwood forest, usually with a high density of snowshoe hare.	All Towns
	Dwarf wedgemussel	Endangered	Connecticut River main channel and Johns River	Northumberland, Lancaster and Dalton
Cheshire	Dwarf wedgemussel	Endangered	S. Branch Ashuelot River and Ashuelot River	Swanzy, Keene and Surry
Grafton	Dwarf wedgemussel	Endangered	Connecticut River main channel	Haverhill, Piermont, Orford and Lyme
	Small whorled Pogonia	Threatened	Forests with somewhat poorly drained soils and/or a seasonally high water table	Holderness
Hillsborough	Small whorled Pogonia	Threatened	Forests with somewhat poorly drained soils and/or a seasonally high water table	Weare
Merrimack	Karner Blue Butterfly	Endangered	Pine Barrens with wild blue lupine	Concord and Pembroke
	Small whorled Pogonia	Threatened	Forests	Danbury, Epsom, Warner and Allenstown
Rockingham	Piping Plover	Threatened	Coastal Beaches	Hampton and Seabrook
	Roseate Tern	Endangered	Atlantic Ocean and nesting at the Isle of Shoals	
	Small whorled Pogonia	Threatened	Forests	Northwood, Nottingham, and Epping
Strafford	Small whorled Pogonia	Threatened	Forests with somewhat poorly drained soils and/or a seasonally high water table	Middleton, New Durham, Milton, Farmington, Strafford, Barrington, and Madbury
Sullivan	Northeastern bulrush	Endangered	Wetlands	Acworth, Charlestown, Langdon and Walpole
	Dwarf wedgemussel	Endangered	Connecticut River main channel	Plainfield, Cornish, Claremont and Charlestown
	Jesup's milk-vetch	Endangered	Banks of the Connecticut River	Plainfield and Claremont

-Eastern cougar, gray wolf and Puritan tiger beetle are considered extirpated in New Hampshire.

-Endangered gray wolves are not known to be present in New Hampshire, but dispersing individuals from source populations in Canada may occur statewide.

-There is no federally-designated Critical Habitat in New Hampshire.
