Time period January 2011 July 2012. This would include letters of invitation plus letters and communications between EPA staff about the workgroup. Please ensure the charter is included.	01/02/2024
2024-EPA-01297	Bogardus, Kevin	E&E News	I request the licensing agreement between EPA and Lands' End related to the EPA Lands' End National Store. This licensing agreement is described in the Dec. 21, 2023 email EPA Deputy Administrator Janet McCabe sent to EPA employees, which is excerpted below and attached to this request: "Dear Colleagues, I hope you all have been enjoying your time with family and friends as the holidays are upon us. This year has been special to me because I have had a chance to connect with many of you while on the road and here at headquarters. You play an important role in energizing senior leadership by showing your EPA passion and pride every day. Whether it's protecting the communities we serve or taking care of each other, you have made it your mission to always show your EPA spirit. In keeping with that theme, I'm excited to share fantastic news with you! You can now proudly show your EPA pride by purchasing apparel featuring our official EPA logo. EPA has signed a licensing agreement with Lands' End to introduce the all-new EPA Lands' End National Store (exit), where you can explore a wide range of high-quality products tailored to your preferences. Check out the options available and wear your EPA pride in style! Through our collaboration with Lands' End, you now have access to an extensive selection of products, all available for online purchase. This is a great option for those of you who are still looking for last minute gifts. The personalized gear may not make it on time for the holiday, but it's the thought that counts. So, consider visiting the site so that you — and your friends and family — can show support for EPA in the new year! Our Lands' End Store is just the first online store to launch. We plan to include additional merchants soon. If you have questions or suggestions, please email epanationalstore@epa.gov. At this time, all purchases must be made for personal use using personal credit cards. Happy shopping! I wish you and your families a happy holiday season, for those celebrating holidays, and I wish everyone a happy and healthy New Year. Janet McCabe signature"	01/02/2024
2024-EPA-01299	Bogardus, Kevin	E&E News	I request any audio and/or video recordings of the "Remarks at Office of Environmental Justice and External Civil Rights One-Year Anniversary Event" in EPA headquarters on Nov. 15, 2023 as listed on EPA Administrator Michael Regan's public calendar. Please click on this link for more detail on Administrator Regan's calendar, which lists this meeting (https://www.epa.gov/senior-leaders-calendars/calendar-michael-s-regan-epa-administrator).	01/02/2024
2024-EPA-01296	Bogardus, Kevin	E&E News	I request the roughly $1 million interagency agreement between EPA and the Smithsonian Institution Exhibit Group related to the National Environmental Museum and Education Center. This is described in the Dec. 1, 2023 email EPA Deputy Administrator Janet McCabe sent to EPA employees, which is excerpted below and attached to this request: "Dear Colleagues, If you've been onsite here in the William Jefferson Clinton-North complex in Washington, D.C., you may have seen the construction that's happening in the space on the ground floor near Pennsylvania Avenue. Or maybe you missed the construction zone all together as you rushed out the door to grab a quick bite to eat or a cup of tea between meetings. Whether you've noticed the construction or not, a small team of EPA employees has been working closely with the Smithsonian Institution's Exhibit Group to update, upgrade, and expand the EPA exhibit that was once located in the Ronald Reagan Building to provide an environmental education experience for visitors of all ages. As a nation, our history is intertwined with the environmental movement. From the Tribal communities who have cared for and called our lands home for centuries, to the work of Rachel Carson, to the states and communities who have fought to protect their air, land, and water, every single one of us has played a role in this movement and in protecting our public health and the environment. We've cleaned up contaminated sites and turned them into economic engines for communities. We've reduced dangerous air pollution like mercury and sulfur dioxide and the greenhouse gases that are causing our climate to change. We've removed countless contaminants from our drinking water, and we've cleaned up our nation's most treasured waterways. And we continue to engage in meaningful ways with environmental justice and disadvantaged communities to bring about positive changes in every single zip code. There are many moments in our nation's history that teach us where we have been and that we need to know and understand to create a healthier, safer future. This upgraded and expanded museum will give us all a space to share these stories with our community, students, visitors to our nation's capital, the occasional passerby, and more. I'm really looking forward to "opening day" early next year when visitors will be able to learn about our environment, our history, and the environmental heroes, like each of you, who have spent their careers fighting for the health and well-being of people across our country and for the environment. While we put the finishing touches on the National Environmental Museum and Education Center, please continue to pardon our dust and our noise. I can't wait to share all of our work – and your work – with everyone. Stay tuned for more to come! As always, thank you for everything that you do every day to help EPA achieve its mission. Janet McCabe signature"	01/02/2024
2024-EPA-01298	Bogardus, Kevin	E&E News	I request any audio and/or video recordings of the "Fireside Chat with League of Conservation Voters" in Washington, DC on June 14, 2023 as listed on EPA Administrator Michael Regan's public calendar. Please click on this link for more detail on	01/02/2024

2024-EPA-01292	Hamko, Dakota	-	1. Any documents shared between the Colorado agencies and EPA Region 10 concerning modification of NPDES permit number IDG010000, including the following Colorado agencies: a. The Colorado Environmental Agriculture Program (“EAP”) b. The Colorado Division of Environmental Health and Sustainability c. The Colorado Department of Public Health and Environment (“CDPHE”) d. The Water Quality Control Division (“WQCD”) or Water Quality Control Commission (“WQCC”) e. The Colorado Attorney General’s Office f. The Colorado Department of Agriculture (“CDA”) 2. Any documents shared between Colorado agencies and EPA Region 10 concerning or responding to the 2023 public notice and comment period for NPDES permit number IDG010000. a. This specific notice and comment period occurred from July 18, 2023, thru September 1, 2023. 3. Any documents shared between Colorado agencies and EPA Region 10 concerning legally required monitoring requirements for CAFOs. 4. Any documents shared between Colorado agencies and EPA Region 10 concerning CAFO waste impoundment seepage rates. 5. Any documents shared between Colorado agencies and EPA Region 10 concerning the Ninth Circuit opinion in Food & Water Watch v. EPA, 20 F.4th 506 (9th Cir. 2021). Clarification on 1/5/2024 - We are indeed asking for communications between Colorado and Region 10, even though Colorado is served by Region 8, because we are requesting documents related to the NPDES CAFO permit that Region 10 issued for Idaho. For this reason, we do not wish to modify our request. [Clarification from January 17, 2024: Part 2 of the request 2024-EPA-01293 is added to request 2024-EPA-01292 request and removed from 2024-EPA-01293: All internal communications between EPA Region 10 and EPA Headquarters regarding: a. 2024-R7-01094	Hall, Christina	Spencer Fane	I request all records (in written, electronic, or any other format) relating to the AltEn, LLC facility/site in Mead, Nebraska, dated June 1, 2022, to the present. Please note that this request also specifically includes records related to the off-site placement or storage or land application of materials that came from or were processed at the AltEn, LLC facility/site, or any actions taken as a result of these off-site actions (such as sampling of these off-site areas, etc.), or any other off-site impacts of the AltEn, LLC facility/site. This request also includes communications with persons or entities outside of EPA (examples: other agencies, lawyers, residents, citizens groups, companies, etc.) about the AltEn, LLC facility/site or any of the other above subjects. I expect that EPA's Region 7 or Office of Research and Development (ORD) would hold the most responsive records, but if EPA offices outside of EPA Region 7 or ORD also hold responsive records, I also request those.	01/02/2024

2024-EPA-01332	Horan, Jennifer	ERIS	I would like to request the most current nationwide version of the Polychlorinated Biphenyls (PCB) Transformer Registration Database (to include current and historical sites, as far as PCB transformer registrations date back) for all ten EPA Regions in Excel format. My prior fulfilled FOIA Request for this data (EPA-2022-001881) was received in February of 2022. The Excel file I was provided at that time was dated for October 15, 2019. If there have been any updates to this data, I would like to request the most current version available. I submitted a FOIA request last in April of 2023 in attempt for a newer data file (EPA-2023-003572); however, the result of that request was that no records or updated file was yet available. For this new request, I'm checking in again to see if one may now be available. Previous file received in Feb 2022 is attached for reference. Thank you! 2024-EPA-01329	Courchesne, Christophe	Environmental Advocacy Clinic, Vermont Law and Gra	This is a Freedom of Information Act (FOIA) request, 5 U.S.C. § 552, for the production and release of records pertaining to the Environmental Protection Agency's (EPA) involvement in the National Environmental Policy Act (NEPA) review of the license application for the Pensacola Dam Hydroelectric Project, situated on the Grand Lake-of-the-Cherokees in northeastern Oklahoma, as a cooperating agency with the Federal Energy Regulatory Commission (FERC), including but not limited to the Letter of Understanding for the Pensacola Hydroelectric Project sent by FERC (Project No. 1494) to EPA on October 23, 2023. Local Environmental Action Demanded Agency, Inc. (LEAD Agency) requests the following records in the control or possession of the EPA: All correspondence, briefings, memoranda, e-mails, or other communications, internal or external, concerning EPA's potential and actual involvement in FERC's review of the license application for the Pensacola Hydroelectric Project, including but not limited to FERC's Letter of Understanding for the Pensacola Hydroelectric Project sent to the EPA on October 23, 2023. The Supreme Court of the United States has held that there is a "strong presumption in favor of disclosure" of requested information under FOIA that "places the burden on the agency to justify the withholding of any requested documents" as well as the burden "to justify the redaction of identifying information in a particular document . . . ." Dept. of State v. Ray, 502 U.S. 164, 173 (1991). The exemptions to releasing documents under FOIA, including the deliberative process privilege of Exemption 5, are specific and are to be interpreted narrowly. Coastal States Gas Corp. v. Dept. of Energy, 617 F.2d 854, 862 (D.C. Cir. 1980). In the event that access to any of the requested documents is denied, the remainder must still be released "after deletion of the portions which are exempt . . . ." 5 U.S.C. § 552(b)(9). LEAD Agency requests that you provide all non-exempt portions that are "reasonably segregable." LEAD Agency further requests that you describe the withheld and redacted material in detail and specify the legal basis for the withholding or redaction as required by 5 U.S.C. § 552(b)(9). Please separately state your reasons for not invoking your discretion to release the requested documents in the public interest. LEAD Agency reserves the right to appeal pursuant to 5 U.S.C. § 552(a)(6)(A)(i)(III)(aa). LEAD Agency anticipates that you will make the requested materials available within the statutorily prescribed period. 5 U.S.C. § 552(a)(6). 2024-EPA-01334	Barad, Richard	Water Center at Penn	Hello, My name is Richard Barad and I work as a Research Fellow at the Water Center at the University of Pennsylvania. The Water Center is currently working with partners to better understand the number of Clean Water SRF projects and the spatial distribution of projects that involve green-infrastructure and/or nature-based solutions in six states. The six states are Delaware, Pennsylvania, New Jersey, Michigan, Wisconsin, and Ohio. We were able to download project data for 2021 and 2022 by needs category and location using the report breakout tools available here: https://sdwis.epa.gov/ords/sfdw_pub/r/sfdw/owsrf_public/cw-state-national-report?p25_report_select=CW%20Assistance%20by%20Needs%20Category. However, we are ideally looking for data for the past five years and thus are wondering if you are able to share project level data for the past five years (i.e: 2018 – 2022) for the six listed states. 2024-EPA-01344	Bogardus, Kevin	E&E News	I request the briefing described in the following excerpt from House Report 117-400: "The Committee remains concerned by the rise in harmful algal blooms (HABs) due to an increase in extreme weather events and climate variability throughout the Great Lakes, and believes that investing GLRI funding in innovative projects including wetland and other natural infrastructure project designs, technologies, algae remediation through harvesting or cultivation, or through other approaches, both nutrient and HAB reduction benefits can be achieved at landscape scales. The Agency is directed to brief the Committee on its current and historical allocation of funds among the five focus areas, with a focus on Area 3 (nutrients) and Area 4 (habitat) in fiscal year 2022. Additionally, the Committee urges the Agency to focus on HAB reduction efforts in Great Lakes re- gions where nutrient loading contributes the most to HABs. The Committee strongly supports projects that have cross-cutting bene- fits across focus areas and directs the Agency to use GLRI funding to support efforts that yield benefits to more than one focus area by combining resources from multiple focus areas and to develop a more flexible and responsive allocation process which ensures that States and local communities have the capacity and tools to re- spond to the growing threat that HABs and other environmental challenges pose to the Great Lakes." Please see page 89 of House Report 117-400 (https://www.congress.gov/117/crpt/hrpt400/CRPT-117hrpt400.pdf). I also note the joint explanatory statement of Division G of the Consolidated Appropriations Act, 2023, Public Law No: 117-328, which requires House Report 117-400 be complied with. Please see page 1 of the joint explanatory statement of Division G of the Consolidated Appropriations Act, 2023, Public Law No: 117-328, for more detail on this requirement (https://www.appropriations.senate.gov/imo/media/doc/Division%20G%20-%20Interior%20Statement%20FY23.pdf). Please consider any final briefing materials accompanying this briefing for members of Congress and/or congressional staff	01/04/2024

2024-EPA-01347	Bogardus, Kevin	E&E News	I request the report described in the following excerpt from House Report 117-400: "The Committee notes that in fiscal year 2023, the Agency plans to use the official version of its latest Motor Vehicle Emissions Simulator (MOVES) model, known as MOVES3, to estimate impacts of the Agency's emission control programs. The Committee notes it has yet to receive the report directed in House Report 117–83 which required EPA to outline the updates that were incorporated in MOVES3 regarding emissions effects of ethanol-blended fuels in light-duty vehicles in comparison to the MOVES2014 modeling tool. In compiling this report, the Agency should ensure that it incorporates the best available data and science to ensure that the MOVES3 model does not irrationally penalize higher blends of ethanol and instead Characterizes the air pollution effects of blending ethanol in gasoline." 2024-EPA-01346	Bogardus, Kevin	E&E News	I request the briefing described in the following excerpt from House Report 117-400: "Environmental Justice.—The Committee appreciates the Admin-istration's commitment to addressing environmental justice and is extremely pleased to see this commitment reflected in the Agency's budget request. The Committee continues its commitment to Envi-ronmental Justice through the funding structure established in fis-cal year 2022 and supports the Administration's current suite of environmental justice programs. The Committee directs the Agency to work with its state and local co-regulators to identify and prioritize environmental compli-ance reviews and enforcement strategies in the most overburdened communities where pollution monitoring, reports from community members, or other data suggest the likelihood of compliance issues and where EJScreen or evidence of historical redlining and other discriminatory practices indicate potential impacts on vulnerable populations. Additionally, the Committee directs the Agency, in consultation with the Council on Environmental Quality, to develop a framework for accounting for cumulative impacts from environ-mental contaminants in the issuance of permits under the federal environmental laws implemented by the EPA. The Committee ex-pects that all environmental justice initiatives are supported through appropriate staffing levels. Finally, the Committee directs the EPA to provide a briefing to the Committee on the implementa-tion and results of these activities." 2024-EPA-01222	Bromberg, Kevin	Small Business Low Risk Coalition (SBLRC)	We appreciate the information and progress shared with us thus far, including the insights discussed in the November 6th letter to EPA (see below) and the promising news distilled from reading the October 30th EPA note. Based on the available information, it appears that the EPA has already established and maintained a more extensive database containing all the monitoring data used to derive annual averages, exceedances, AIM Levels, and AIM exceptions. This data is crucial for a comprehensive understanding of the AIM program's performance, and we believe it is essential for the public to understand these important governmental operations. This file is found at https://echo.epa.gov/tools/data-downloads. Industrial Stormwater - Multi-Sector General Permit (MSGP) Name Help Page Description Additional Implementation Measures (AIM) Dataset (8/7/23) (ZIP) (40 KB) Multi-Sector General Permit Additional Implementation Measures Data Download Summary Link to download the most recent EPA Additional Implementation Measures (AIM) data. We wrote to EPA in November 6, 2023 stating: The October 30th note yielded some promising news. Based on the information currently available from EPA, it appears that the Agency must have already established and maintained a more extensive database containing ALL the monitoring data used to derive annual averages, exceedances, AIM Levels, and AIM exceptions. These data were essential for producing the August 2023 AIM exceedances dataset. For instance, EPA needed to calculate running averages of ALL monitoring data to determine the appropriate AIM Level designations, and included information about exceptions to determine when a facility returned to baseline. It seems that this detailed supplementary data was not included in the zip data file, but we believe it is crucial for a comprehensive understanding, as elaborated in the October 13 and previous letters. This additional data essentially provides all the missing data required to identify all monitoring data and all Level determinations for all facilities subject to AIM under the 2021 MSGP – the data necessary for evaluating the effectiveness of the 2021 AIM monitoring, which encompasses approximately half of the industrial sectors. Request for Documents To assist in our evaluation and to provide clarity about the MSGP data maintained by the Agency, we kindly request the following information: (1) Instructions and Documentation: We request a copy of any documents provided to the EPA, contractors, or	01/04/2024

			other personnel that include instructions for the development of the August 7, 2023 AIM file available on the ECHO website at https://echo.epa.gov/tools/data-downloads. Additionally, please provide any related quality control requirements which were developed specifically for this task or MSGP data generally (i.e., excluding generally applicable EPA data quality requirements, such as those contained in EPA regulations, guidelines, and manuals). Furthermore, we seek documentation of any internal or external databases used to create the August 2023 AIM zip file. This includes details such as data fields (including AIM monitoring data, indicator monitoring data [if any], sector, dates of monitoring, AIM Levels), data sources, and the date the file was created. 2024-EPA-00939	Choi, Dahyun	Princeton University	I am requesting records related to Greenhouse Gas Reporting Program (GHGRP). The GHGRP ensures that data submitted to EPA are accurate, complete, and consistent through a multi-step process. This process begins when the reporter enters their data. After the report is submitted, it is evaluated against an extensive array of electronic checks that will "flag" potential errors. These flags are manually reviewed to assess the cause of the flag and if found to be a potential error, EPA will follow up with the reporter (Please see more details here: https://www.epa.gov/sites/default/files/2017-12/documents/ghgrp_verification_factsheet.pdf). I would like to request records on (i) a full set of reports submitted to EPA for verification check between 2010 and 2023, (ii) a list of reports that were found by EPA to have a potential error (failed check), (iii) a list of reports that resolved the issue by explaining to EPA why the failed check was not an error, and (iv) a list of reports that were corrected and resubmitted after EPA review and failed checks. At a minimum, the data should include (i) the reports - a collection of reports submitted for review between 2010 and 2023, (ii) identifying information about the reporters who submitted each report in the GHGRP program between 2010 and 2023, and (iii) a list of reports that EPA has identified as potential errors between 2010 and 2023. Thank you for your time and assistance. Sincerely, Dahyun	01/05/2024

2024-OCSPP-02378	Crofton, Kevin	-	This request is made on behalf of myself under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552. I am currently a retired developmental neurotoxicologist and private citizen working on a project that aims to support the transition from animal-based testing to the use of alternative non-animal testing methods for assessing the potential developmental neurotoxicity hazards of chemicals. To this end, the goal of my project is to: 1) facilitate the development of non-animal alternative models for development neurotoxicity by informing the comparison to in vivo results; and, 2) make this data publicly available by publication in a peer reviewed journal or other publicly accessible format. I note that this goal is in line with Administrator Wheeler's statement on 09/10/2019 to reduce animal testing by 30% in 2025. Subsequent to my previous request (FOIA request EPA-2020-003946) for all Developmental Neurotoxicity Studies that have been submitted to the Office of Pesticide Products. I am now requesting a listing of all Reproduction studies submitted to the Office of Pesticide Products that contain a cohort of offspring that were tested for developmental neurotoxicity. This should include, but not be limited to, studies submitted under the following: • EPA 870.3800 (Reproduction and Fertility Effects) studies that contain a developmental neurotoxicity cohort • OECD Guideline 443 (Extended One-Generation Reproductive Toxicity) study that contain a developmental neurotoxicity cohort • OECD Guideline 416 (Two-Generation Reproduction Toxicity) study that contain a developmental neurotoxicity cohort • EU Method B.56 (Extended One Generation Study) that contain a developmental neurotoxicity cohort. • And any other reproductive or developmental studies contain a developmental neurotoxicity cohort Please include not only studies of active ingredients, but also (to the degree possible) any positive control studies that have been submitted in support of the above mentioned studies. For these studies I would like the following information: 1) The MRID number of the study 2) The author and title of the study 3) The year of the study. Please note that I do not require printed versions of any of this information. An electronic file is acceptable and preferred.	01/05/2024
2024-OCSPP-02375	Crofton, Kevin	-	This request is made on behalf of myself under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552. I am currently a retired developmental neurotoxicologist and private citizen working on a project that aims to support the transition from animal-based testing to the use of alternative non-animal testing methods for assessing the potential developmental neurotoxicity hazards of chemicals. Subsequent to my previous request (FOIA request EPA-2020-003946) for all Developmental Neurotoxicity Studies that have been submitted to the Office of Pesticide Products, I am now requesting the following documents. I have provided information to help with the searches. 1. A search for any documents, internal discussions, emails (or related materials) related to any policy, guidance, procedure related to interpretation of changes in brain weights relative to body weights in DNT or extended-one gen studies that included DNT cohorts. 2. Any documents, memos, or other material that will explain why a 2021 HHRA memorandum for fluazinam memo stated there was no evidence of developmental neurotoxicity in the following two statements. a. p.21: "The developmental neurotoxicity study was conducted with a technical with significantly less of the impurity, and there were no lesions or developmental neurotoxicity concerns (see section 4.4.2). b. p.22: "A developmental neurotoxicity (DNT) study containing a lower concentration of Impurity-5 was submitted to address the concerns regarding the vacuolization observed. In the study, there was no evidence of vacuolization of the brain or any other treatment-related pathology up to the highest dose tested." However, the 2007 DER concluded that there were effects on startle (dose related decrease in both the 'regular' ASR and the pre-pulse testing) as well as decreases in absolute brain weight (~6%). Please provide an explanation for this discrepancy. Is there a memo or DER from the time in between the 2207 DER and 2009 HHRA memo that revised the conclusions on the DNT study? c. 2024-EPA-02434	Foy, Morgan	UC-Berkeley	Hi, I would like to request information on all EPA awards or sub-awards to state governments from 1972-2022. I know this information is on usaspending.com for the most recent years, but it only has a few years of data. Ideally, I am looking for the information as it appears on the usaspending site but for the earlier years as well. For instance, I'm interested in individual awards to state governments with information such as award amount, award purpose, date and to what state agency received the award. Please contact me if I can clarify in any way. Thank you! (Date Range for Record Search: From 01/01/1972 To 12/31/2022)	01/08/2024

2024-EPA-01509	Reed, Beverly	-	US EPA Region 5 is investigating a site in Martins Ferry, OH called 4K Industrial. The site also contains a fracking waste business called Austin Master Services. On March 31st, 2023, Douglas Ballotti sent me an email stating "The EPA Superfund program will initiate a Site Inspection (SI) at the 4K/AMS facility in order to collect data to evaluate potential releases at the AMS facility." Please provide communications regarding this ongoing investigation between Mr. Ballotti and his Superfund division staff, Francisco Arcuate, Public Affairs Specialist, Debra Shore, Region 5 Administrator, and Monica Onyszko, Region 5 Corrective Action Hazardous Waste, and individuals representing 4K Industrial Park and/or Austin Master Services, LLC. Please provide any communication, written, emailed or otherwise, and any meeting notes and/or field notes regarding the Site Inspection (SI) that the letter referred to. Please also provide any communication between US EPA staff and 4K Industrial and/or AMS regarding the RCRA prior historic hazardous waste that is also on site. Ms. Onyszko is handling that. Please also provide any official EPA documents from this investigation into 4K/AMS if any such documents have been produced from any on site inspections or otherwise that have occurred since the issuance of the letter, including analytical/lab analysis from samples taken at the site and/or pictures taken at the site. 2024-EPA-01539	Paul, Sean	George Washington University	I am seeking data about EPA's Risk Management Program, which is a program under the Clean Air Act that requires stationary sources handling extremely hazardous materials to develop strategies to reduce the likelihood of accidental releases. I am seeking this data because I am conducting a research project as a part of my PhD dissertation work. I understand I would like to access the following data: Summary data describing all RMP facilities across the United States. A recent GAO report (linked below) provided data on some RMP facilities, including EPA ID numbers for these facilities, but I would like to access the remainder of this dataset. If possible, I would also like instruction on how to link this data to other EPA datasets, such as the Facility Registry Service in EPA's ECHO Database. https://www.gao.gov/products/gao-22-104494 I would like data on the he history of inspections conducted at all RMP facilities, including: - The date the inspection took place - What the outcome of the inspection was (i.e., if the facility was found in violation of RMP regulations) - Whether corrective actions were taken in response to the inspection I would also like to access data regarding accidental releases at RMP facilities, including: - The date of the accidental release - The cause of the accidental release - The nature of the release (i.e., what chemical was released, how, and in what quantities) - Whether corrective actions were taken to control the release and to ensure it does not happen again in the future. I would like as many years of data as are available, but at least from years 2000-2020 would be appreciated.	01/16/2024

2024-EPA-01574	Burgoon, Lyle	Raptor Pharm & Tox, Ltd	I am requesting all responsive records for the following study performed by ORD scientist L. Earl Gray, Jr.: Biologically relevant reductions in fetal testosterone and Insl3 induced by in utero exposure to high levels of di-isononyl phthalate (DINP) in male rates. (2023) Toxicology and Applied Pharmacology (465): 116454. Responsive records that we seek include all of the following: 1) All spreadsheets and other electronic files that contain raw and summary data used to prepare tables, figures, or other summary information contained in the aforementioned paper. Raw data are defined as those data that are used to compute summary statistics to include means/averages, standard deviations, standard errors, and similar summary statistics. Note that Dr. Gray included previously published data in the aforementioned paper -- we are requesting these files as well. 2) All electronic files that contain the SAS code used to instruct SAS software to perform statistical analyses. Note that we are aware that Dr. Gray included some SAS code in the Supplemental Materials of the aforementioned paper. However, we want all of the true and correct files that contain the SAS code that SAS used to perform these analyses. Note that Dr. Gray included previously published data in the aforementioned paper -- we are requesting these files as well. 3) All QA documents, including any and all audit records, pertaining to the study published in the aforementioned paper. 4) All Operating Procedures used in the performance of the study/studies mentioned in the aforementioned paper. 5) The source code for the randomization procedure used to assign the pregnant rats to treatment groups. This is to ensure that the randomization procedure actually performs randomization. 6) The current animal use study protocol approved by ORD. The paper lists that the protocol was approved by NHEERL IACUC; however, NHEERL has not been in existence for several years, so there are concerns about the validity of the IACUC approval. The Approval number was: IRP-NHEERL-RTP/RTD/EB/LEG/01-01-00, LAPR: 01-02-006UD. Thank you.	01/17/2024

2024-EPA-01626	Burgess, Ron	Tierra Group International, LTD.	McDermitt Mine in Nevada. Any information on the mine's closure plan, pollution as a result of tailings deposition or other mine activity, tailings deposition in general, tailings storage facility in general or specifically the design process of it. Any information on the mine, specifically the tailings and the tailings storage facility and anything that may have resulted from them would be helpful as we are looking to update the current closure status with newer regulations. The mine itself was closed during the 90's, but any documents after the actual closure would also be helpful if the mine was reviewed after it's official closure. I believe that tailings deposition at the tailings storage facility did not begin until the 80's, but documents from as early as the 60's may inform what was going on in the history of the mine. Tailings deposition and the closure of the tailings storage facility can have very large environmental impacts, and the federal government oversaw most mine closures prior to the creation of individual state departments of environmental protection. This information would assist our process of updating the closure status of the tailings storage facility, allowing us to enable safe management of the tailings. If there are documents about this mine that can be shared with the town of McDermitt it would increase their ability to understand the historic deposition of tailings near to their hometown. We would commercially benefit from a disclosure as the information would be used in our work, granting us a better understanding of the history and makeup of the site that would ease our investigation and allow us to plan future investigations with less difficulty. Thank you. (Date Range for Record Search: From 01/01/1960 To 01/01/2024)	01/19/2024

Identifier No. 74401FNSTLNUMBE •Clean Water Act Discharge Monitoring Reports (“DMRs”) submitted for the Fansteel facility from 1970 to 2001 Reports may have been submitted by the following reporting entities: Fansteel, Inc., Fansteel Metallurgical Corporation, Fansteel Products Company, Inc., Fansteel Metals, Inc., or FMRI, Inc. To the extent that any responsive documents are classified, I request that they be declassified and/or sanitized for our review. For all records responsive to this request that are not produced based on an asserted exemption from disclosure, please prepare a privilege and/or exemption log describing, at a minimum; (i) the type of record withheld; (ii) the date(s) of the creation of the record; (iii) the subject of the record; (iv) the identity of the author and all recipients of the records; and (v) a detailed description of the basis upon which the record is being withheld (e.g., the	01/22/2024

			claim of privilege, FOIA exemption, etc.). To the extent any responsive records are withheld based upon a claim of privilege or other exemption from disclosure, please produce redacted copies of all non-privileged or non-exempt factual material contained within such records. If responsive materials have been destroyed or transferred to the custody of another agency, please provide me with documentation of destruction or transfer. I would also appreciate receiving any materials you can release to me as soon as possible, rather than waiting for all the responsive documents to clear your review process. History Associates agrees to pay all reasonable and standard processing fees authorized by 5 U.S.C. 552(a)(4)(A) and the applicable regulations up to $300. Should the fees exceed this amount, please call me with an estimate of the total costs in order that specific expenditures beyond $300 can be authorized. Should you have any questions or concerns regarding this request, please contact me at (b) (6) [redacted]. (Date Range for Record Search: From 01/01/1970 To 12/31/2001)

2024-EPA-01193	Crandall, Janna	ProGuard, Inc.	Good morning. I was not able to enter this request on the epa site, it suggested going directly to you. My name is Janna Caron Crandall "Carie". As of 9/22/22 I am CEO of a company called ProGuard, Inc. My brother Bradford G. Crandall Jr, his attorney Greg Dyer, Brandi Paloma were removed on cause 9/22/22. There is a company Bio-Lab doing Business as ProGuard, which is a violation of our trademark and trade secrets. ProGuard has no agents, but there is a company Lewis & Harrison that has signed with the epa, and others, and coordinated with international entities with an attorney by the name of Vetter. I stopped counting at 42 countries. Could you please help me and our board understand what has transpired back to the 1990's? We have a product Cinnacure 58866-12 which received full epa approval in 1999. From that there is a ready to use 58866-13 that my brother cancelled in CA without our knowledge a month before he was removed. Our tradesecrets via Lewis & Harrison signing as ProGuard agent (which ProGuard never approved) has made many assignments to companies such as Bayer, Valero, Mycotech, Certis, etc. ProGuard has 7 trademarks using ProGuard tradesecrets apparently. Again, ProGuard has no agents. Please provide us information which you likely may have available to you through the epa and Fifra filings. Many epa numbers are involved, ProGaurd is 58866, and in some states 1142, 65626, 5185, and more. Could you provide: - Prior annual production reports - Prior agent assignments and agent actions, specifically Lewis & Harrison, Barbara Vetter, Smart & Biggar law firm out of Canada, Greg Dyer lawyer in CA and NV claiming to be General Counsel of ProGuard which is false, etc. - Bio-Lab pesticide registrations using the brand names “Proguard” and “Pro Guard” which are trademarked under our company and not authorized for Bio-Lab to use. - Valero has confirmed to us they have done business with a Bio-Lab dba ProGuard. But we have no knowledge of this. If you could help us with epa numbers acquired using our Cinnemaldahyde trade secrets that began with Cinnacure 58866-12, we were cleared in 1999 for pesticide, herbicide, fungicide, disinfectant and other. This is a full spectrum product that unfortunately others have gone behind our backs with. Individuals to focus on as well would include Charles "Jiggs" Davis who worked with my brother Brad Crandall Jr on this scheme, Masua Robinson who took epa registrations and registered a Cinnacure Ready to Use 58866-13 in California using just our 58866-12 epa Cinnacure approval, and much more. My parents are the bank, the investors for ProGuard. My brother has left over $4 M in dept on my parents' estate. My father remains majority holder of ProGuard, Inc. Again, thank you for reading through this, it's something. I have done a lot of research by states and learned what I can. I have a box from Lewis & Harrison up to 2004, when they assign to Bio-Lab dba ProGuard, without out knowledge. I learned they trademarked Pro Guard, and let that expired and just used our ProGuard trademake and trade secrets. They were signing as Agent of ProGuard without our knowledge. That work under my parents' company EB Stone, which at the time my parents' owned 100 percent. My brother Bradford G. Crandall Jr did not have signing authority nor approval to do what appears has be . . . The description has exceeded the character limit.	01/26/2024

2024-EPA-01722	Bergin, Dillon	N/A	To Whom It May Concern: Pursuant to the Freedom of Information Act, I hereby request the following records: The locomotive and rail yard nonroad mobile source emissions inventory data for all states and rail yards in the most recent triennial inventory year of the EPA's NEI , in a machine-readable database or spreadsheet format such as Excel, CSV, Access, SQL or XML. The data should include all fields in the database or spreadsheets that contain non-exempt information. I also request all documentation that describes the layout of the database’s tables and fields, and that provides the definitions of any field names, codes, and abbreviations used in the database. This information may be gathered together in a single document like a data dictionary, entity layout, or user's guide. If that is the case, I request access to and copy of said document. The requested documents will be made available to the general public, and this request is not being made for commercial purposes. In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. 2024-EPA-01754	Bogardus, Kevin	E&E News	I request the written agreements for the Intergovernmental Personnel Act assignments for incoming and outgoing personnel at EPA from Jan. 20, 2021 to Jan. 20, 2024. I also request any modifications to these agreements during this same time period. As specified in 5 U.S.C. § 3373-3375, before the IPA assignment begins, the assigned employee and the federal agency, the state, local, tribal government, institution of higher education or other eligible organization must enter into a written agreement recording the obligations and responsibilities of the parties. Federal agencies must maintain a copy of each assignment agreement, including any modification to the agreement, under 5 CFR Part 334. Responsive records to my request will likely be found with EPA's IPA coordinator in EPA's Office of Mission Support. (Date Range for Record Search: From 01/20/2021 To 01/20/2024)	01/29/2024
2024-EPA-01755	Bogardus, Kevin	E&E News	I request the "requested information" EPA has sent to the Office of Management and Budget regarding EPA's return-to-office goals and plans as described in the Jan. 19, 2024 email White House Chief of Staff Jeff Zients sent to cabinet-level officials. The text of Zients' email is copied and pasted below: "Hi team – We've all been focused on a mission critical priority: meaningfully increasing in-person work. Over the last few months, we've made some progress: A number of agencies have exceeded their goal of having staff work together in-person at least 50% of the time by last Fall, including the Departments of Veterans Affairs, Energy, Defense, State, as well as USAID. To highlight just one example, Secretary Blinken has set an expectation at the State Department that all employees will be in the office 3 or 4 times a week, recognizing that when it comes to diplomacy, there's no substitute for engaging face-to-face. Every agency is moving or has already moved towards a posture where hybrid teams are working in-person at least 50 percent of the time. However, some of your agencies are not where they need to be and have work ahead to meet your goals. Per the attached, your agency should have a system for monitoring implementation progress fully in place. I expect that you are personally tracking your progress, and taking appropriate action to meet your agency goals. It is time to close this out. Please have your Deputy or Chief of Staff send to OMB (redacted email) the attached requested information by next Friday, January 26, which will outline where you are today against your goal, your concrete plans and timing for achieving your goal, and additional implementation steps you will take. OMB has sent this request to your teams in parallel. As I said last summer, these changes will allow us to come back	01/29/2024

			together — and come back stronger — to best serve the American people. I ask that you double down on your leadership to increase in-person work, especially at a time where the service of you and your team has never been more important. Thanks, JZ"

Please include the full email chain and attachments relevant to any responsive documents to provide further context. To further narrow down the scope of the request, requester does not seek correspondence that merely forwards press clippings, such as news accounts or opinion pieces, newsletters, and published or docketed materials, if that correspondence has no comment or no substantive comment added by any party in the thread. The terms "pertaining to," "referring," "relating," or "concerning" with respect to any given subject means anything that constitutes, contains, embodies, reflects, identifies, states, refers to, deals with, or is in any manner whatsoever pertinent to that subject.The term "record" means any written, recorded, or graphic matter of any nature whatsoever, regardless of how recorded, and whether original or copy, including, but not limited to, the following: memoranda, reports, expense reports, books, manuals, instructions, financial reports, working papers, records, notes, letters, notices, confirmations, telegrams, receipts, appraisals, pamphlets, magazines, newspapers, prospectuses, inter-office and intra-office communications, electronic mail (emails), MMS or SMS text messages, instant messages, messaging systems (such as iMessage, Microsoft Teams, WhatsApp, Telegram, Signal, Google Chat, Twitter direct messages, Lync, Slack, and Facebook Messenger), contracts, cables, telexes, notations of any type of conversation, telephone call, voicemail, meeting or other communication. Please comply fully with 5 U.S.C. § 552(b). Accordingly, without limitation to the foregoing, if any portion of this request is denied for any reason, please provide written notice of the records or portions of records that are being withheld and cite each specific exemption of the Freedom of Information Act on which the agency relies. Moreover, to the extent that responsive records may be withheld in part produce all reasonably segregable portions of those records. Additionally, please provide all responsive documents even if they are redacted in full. This request is primarily and fundamentally for non-commercial purposes. As an investigative columnist and author, my request is in the public interest to inform the public regarding the agency's policies and procedures on the national stage relevant to domestic policy issues.	01/29/2024
2024-EPA-01782	Robinson, Steven	Cogency Global Inc	January 29, 2024 National Freedom of Information Officer U.S. EPA, Records, FOIA and Privacy Branch 1200 Pennsylvania Avenue, N.W. (2822T) Washington, D.C. 20460 Re: Freedom of Information Act Request Dear Sir or Madam: Pursuant to the Freedom of Information Act (FOIA), as amended, 5 U.S.C. §§ 552, et seq., and the U.S. Environmental Protection Agency's (EPA) rules issued thereunder, 40 C.F.R. Part 2, COGENCY GLOBAL INC., hereby requests from EPA copies of the draft and/or the final study reports of inhalation toxicity studies for the following two substances: • Chemical Abstracts Service Registry Number® (CAS RN®) 182442-95-1 (also known as premanufacture (PMN) case number P-04-0269); • CAS RN 177997-13-6 (also known as PMN case number P-15-0450). Documents responsive to this request likely will be maintained by the Office of Pollution Prevention and Toxics (OPPT). This office is identified solely to assist EPA in responding to this request and is not intended to limit the scope of this request in any way. Documents responsive to this request may be maintained by other EPA offices and divisions, and any such documents expressly are included within the scope of this request. COGENCY GLOBAL INC. understands that some of the documents responsive to this request may have to undergo confidential business information (CBI) review. COGENCY GLOBAL INC. requests that any responsive documents that do not have to undergo CBI review be provided to us as soon as possible. If for any reason you determine that portions of the requested information are exempt from disclosure under FOIA, please delete the allegedly exempt material, inform us of the basis for the claimed exemption, and furnish us with copies of those portions of the information that you determine not to be exempt. COGENCY GLOBAL INC. consents to such deletion at this time to facilitate your prompt response and in no way waives our right to appeal any determination that you may make regarding the applicability of any FOIA exemptions to the requested documents and information. COGENCY GLOBAL INC. requests that you provide us with accurate copies or a complete and accurate account of the information requested. This is a commercial request. COGENCY GLOBAL INC. agrees to pay reasonable search and reproduction costs; if these costs exceed $200, however, COGENCY GLOBAL INC. requests that you notify us before reproducing the documents. COGENCY GLOBAL INC. understands that it can expect a response within 20 days of your receipt of this letter. We prefer electronic copies of the documents, but if courier or overnight delivery is necessary, please contact us for delivery or pickup information. If you have any questions about this request or require further information, please contact us at 800.494.5225 or agency@cogencyglobal.com. Thank you for your attention to this matter. 2024-EPA-01768	Ingrams, Alex	Leiden University	To Whom It May Concern, I would like to access the undisclosed public comments submitted as part of the Office of Water's regulatory proposals in the following dockets: 1. EPA-HQ-OW-2011-0880-0001 As part of the proposed rule, 'Clean Water Act; Definitions: Waters of the United States', the OW invited public comments in 2011. According to the docket information on regulations.gov, there were 1,123,389 public comments received. However, only 20,590 were made public on regulations.gov. That means that 1,102,799 public comments are missing. 2. EPA-HQ-OW-2017-0203-0001 As part of the proposed rule, 'Definition of "Waters of the United States" – Recodification of Pre-Existing Rules' the OW invited public comments in 2017. According to the docket information on regulations.gov, there were 689,688 public comments received. However, only 15,090 were made public on regulations.gov. That means that 674,598 public comments are missing. 3. EPA-HQ-OW-2017-0300-0001 As part of the proposed rule, 'National Primary Drinking Water Regulations: Lead and Copper Rule	01/29/2024

			Revisions', the OW invited public comments in 2017. According to the docket information on regulations.gov, there were 79,646 public comments received. However, only 689 were made public on regulations.gov. That means that 78,957 public comments are missing. 4. EPA-HQ-OW-2021-0255-0001 As part of the proposed rule, 'Review of the National Primary Drinking Water Regulation: Lead and Copper Rule Revisions (LCRR)', the OW invited public comments in 2021. According to the docket information on regulations.gov, there were 55,445 public comments received. However, only 249 were made public on regulations.gov. That means that 55,196 public comments are missing. I understand that there are often good reasons for withholding some comments (e.g., duplicate comments, silly comments, obscene comments etc). However, I would like to see the original missing comments to understand better what those comments contained. I am a U.S. citizen but I currently work at Leiden University in the Netherlands where I am carrying out research on the regulatory public comments process in the US federal government. I would be grateful if you could share the public comments with me in an electronic file such as a PDF or an excel document. If preferable, I can also receive hard copies of the files to my address in the United States that I include with this FOI request. I do not need to receive all of the comments but just the missing ones. If is not possible to separate the missing from the totals then I would also happily receive the total number of comments. Sincerely, Alex Ingrams

2024-EPA-01830	Campbell, Daniel	Crowell & Moring, LLP	On behalf of our client, Liberty Mutual Insurance Company ("Liberty Mutual"), and pursuant to the provisions of the Freedom of Information Act ("FOIA"), as amended, 5 U.S.C. § 552, and 43 C.F.R. Part 2, we hereby request certain records and other materials related to the New-Indy Catawba Mill, located at 5300 Cureton Ferry Road, Catawba, South Carolina 29704, located in EPA's Region 4 (the "Catawba Mill"). For purposes of this FOIA request, New-Indy Catawba LLC is referred to as "New-Indy." The term "New-Indy" also includes New-Indy Catawba LLC's corporate affiliates and parents, to the extent involved in the issues at the Catawba Mill described below, including without limitation New-Indy Containerboard Catawba LLC, New-Indy JV LLC, The Kraft Group and Schwarz Partners. Specifically, Liberty Mutual requests copies of all documents and other materials, including notes, reports, and summaries or recordings of conversations where applicable, that relate to or discuss the following: • United States v. New-Indy Catawba LLC, Civil No. 0:21-cv-02053-SAL (D.S.C.), including any and all orders entered in this matter; • EPA's April 15, 2021 inspection of the Catawba Mill; • EPA's May 13, 2021 emergency order issued to the New Indy and/or the Catawba Mill to monitor and reduce hydrogen sulfide air pollution from the Catawba Mill; • EPA's efforts to measure air quality at the Catawba Mill following the May 13, 2021 emergency order; • EPA's notes, summaries, or recordings of all discussions with New-Indy regarding air quality issues and complaints; • Documents and other materials or data provided to EPA by New-Indy regarding air quality issues; • EPA's December 29, 2021 proposed consent decree in United States District Court in which New-Indy agreed to injunctive relief designed to prevent hydrogen sulfide concentrations above levels that endanger people's health from the Catawba Mill; • The November 16, 2022 Consent Decree approved by the U.S. District Court for the District of South Carolina that intended to resolve allegations that Catawba Mill was causing an imminent and substantial endangerment to public health or welfare or the environment under Section 303 of the Clean Air Act through its emissions of elevated levels of hydrogen sulfide. The consent decree also intended to ensure that New-Indy will be required to comply with requirements and stop elevated hydrogen sulfide emissions or face additional penalties; • EPA's $1.1 million penalty/fine issued against New-Indy for its "substantial endangerment" via emissions of elevated levels of hydrogen sulfide; • EPA's letter from Carol L. Kemker, Director, Enforcement and Compliance Assurance Division, to Tony Hobson at New-Indy detailing 19 new violations of the Clean Air Act from the Catawba Mill; • Any materials received from the South Carolina Department of Health and Environmental Control (DHEC) regarding air quality or Clean Air Act violations at or related to the Catawba Mill; • EPA's investigation into alleged or potential violations of the Clean Water Act relating to the Catawba Mill; • EPA's efforts to measure water quality at the Catawba Mill; • EPA's notes, summaries, or recordings of all discussions with New-Indy regarding water quality issues and complaints; • Documents and other materials or data provided to EPA by New-Indy regarding water quality issues; • . . . The description has exceeded the character limit.	02/02/2024

2024-EPA-01852	Brown, Carrie	HCPA	The Household & Commercial Products Association (HCPA) requests a copy of the following documents: EPA Draft Report on Preservatives, generated by Abt Associates (Abt). This document is based on a survey of industry and stakeholder outreach questions on the "Uses, Alternatives, and Benefits Assessment of Biocides in Paints, Coatings, Adhesives, and Sealants." The questions were part of an informal information-gathering session and not a formal data request to assess the uses and benefits of certain biocidal chemicals. The U.S. Environmental Protection Agency (EPA) Office of Pesticide Programs' (OPP) Antimicrobials Division (AD) gathered this information through Abt during the preliminary information collection phase of the reregistration process. HCPA represents industry and stakeholder partners involved in the development and use of preservatives in products. For this reason, the Agency worked with HCPA and other trade associations to collect the information for this survey. Additionally, HCPA members provided the Agency with key documents and a supplemental information session with subject matter experts (SMEs) to give the individuals an overview of preservation science. 2024-EPA-01961	Gallup, Larkin	Johns Hopkins University	I am looking for the amount of materials that a list of facilities process on an annual basis. All of the facilities are located in South Baltimore, in the 21226 zip code. For every site that I am looking for, I am trying to find how many tons of material that facility handles each year. For example, for the US Gypsum Company, knowing how many tons of gypsum are created and sent out at that particular plant each year, or for the Quarantine Road Landfill, how many tons of waste are accepted and how many leave the landfill per year. Since every facility on this list is a little different, I am essentially trying to understand the amounts of major categories of materials coming in and out of each site on a yearly basis. I am submitting the list of facilities and their addresses in a pdf file below.	02/08/2024

The disclosure of information that I am seeking is in the public interest because it will contribute significantly to public understanding of operations and activities of the government and I have no commercial interest in the requested material. As the EPA develops new environmental regulations and emission standards, it is critical that there be transparency around EPA meetings and communications, especially as these meetings and communications may include non-governmental interested parties. The request concerns the operations or activities of the government. The topic of the request concerns calendars that point to the activities of the government, including activities related to creating policy and passing regulations that impact the health and safety of the public. Furthermore, the requested materials will shed light on the activities of the EPA during a time when a relatively new administration is taking on ambitious environmental regulations. Disclosure is likely to contribute to an understanding of government operations or activities. The information requested includes calendars of EPA officials during a period in which the . . . 2024-EPA-02047	Frazin, Rachel	The Hill	The following request is most likely for EPA Region 4. I request a copy of the following documents: First, I request a copy of the "letter of intent" between DuPont and EPA in which DuPont committed to monitor groundwater for ammonium perfluorooctanoate (C-8) at its Fayetteville Works site. In case it is helpful, I am uploading a document I obtained through the PFAS administrative record that references the letter of intent. Second, I request copies of all correspondence between EPA Region 4 staff and DuPont referencing its Fayetteville facility starting two years before the date of the letter of intent until a month following the date of the letter of intent. "Correspondence" should include memos, letters and emails, including attachments and instances where relevant parties are carbon copied (cc'ed) or blind carbon copied (bcc'ed). If applicable, please provide these documents to me on a rolling basis. If possible, please provide me with electronic copies of these documents in PDF format. If it is not possible to do so, please contact me to discuss delivery of these records. I can be reached at (b) (6) [redacted]. Also, I believe that i originally submitted this request in October 2023. Unfortunately, as EPA was undergoing a switch, I think it got lost in the shuffle so I am resubmitting it now. In light of that, anything you can do to expedite the processing of this request would be much appreciated! (Date Range for Record Search: From 01/01/2000 To 05/27/2004)	02/13/2024

2024-EPA-02090	McCullen, Lyn	Zum Services Inc.	In 2023, Zum Services, Inc. submitted an application for the Environmental Protection Agency (EPA) 2023 Clean School Bus (CSB) Notice of Funding Opportunity (NOFO) EPA-OAR-OTAQ-23-06 and was awarded a grant for the Zum National Student Transportation Electrification & Vehicle-to-Grid (V2G) Project. We are thankful for the opportunity to accelerate the transition to clean, electric school transportation in four school districts in California. In anticipation of this year's grant release, we are reflecting upon our application and ways we can continuously improve. As such, it helps to understand the rationale behind the committee's decision. Will you please provide us with the evaluation committee's scoring breakdown for our (Zum Services, Inc.) grant application? Will you also please share the evaluation committee's comments regarding our (Zum Services, Inc.) grant application? We welcome the opportunity to learn from your input and feedback. 2024-EPA-02058	COLE, MARY	Resident/Abutter	I am looking into the current status for SEMS-ARCHIVE site MAD981063209. The site is the East Boston Shipyard at 256 Marginal Street, Boston MA 02128. I would like to receive copies of environmental investigation reports that detail soil and groundwater contamination at the site. Also, I would like to obtain a letter or document concerning the current status of the facility. My goal is to determine what contaminants are on site and their concentration within subsurface media. My goal is also to determine the horizontal boundaries of the contamination. The current owners are planning a large-scale excavation at the site, and I'm concerned about the potential dispersal of contaminants onto neighboring properties. 2024-EPA-02124	Yu, Huanzhen	The University of Manchester	Since I am currently doing a project on how whistleblowers affect corporate environmental performance, I utilize the "Facilities in Cases" file provided by the EPA (https://echo.epa.gov/tools/data-downloads/icis-fec-download-summary). However, the information provided by this dataset cannot satisfy my research needs, therefore I want to require more information on these cases. Specifically, could you provide me the data for each case regarding which triggered these cases? Are they triggered by EPA's regular inspections or triggered by external whistleblowers or any other information source? I know that the EPA provides a channel for people to report environmental misconduct on the EPA website, so are these EPA cases triggered by the whistleblowers who file a tip on the EPA website? The Occupational Safety and Health Administration (OSHA, thereafter) provides facility-level inspection data on the Department of Labor's website, their dataset categorizes their inspections by different reasons: planned inspection, employee complaints (employee whistleblowing), etc. Therefore, could you provide such data for me in the "Facilities in Cases" database to help me find which cases are related to the information from whistleblowers? Secondly, if you could not satisfy my above requirement, could you just highlight the cases that have been triggered by whistleblowers and provide me some statistics regarding the triggers of these EPA cases? Thirdly, if you still cannot satisfy my second need, let's move to the EPA inspection dataset (ICIS EPA Inspections (ICIS_FEC_EPA_INSPECTIONS.csv) which is also provided on the websites I mentioned above. For this dataset, could you provide me another column containing information on the triggers of these EPA inspections? Are they triggered by whistleblowers or just regular compliance processes like what OSHA does in their inspection dataset? Fourthly, if you still cannot satisfy my third requirement, I have another request. I know that the EPA provides a channel for people to report environmental misconduct on the EPA websites. Therefore, could you provide me with the facility-level data regarding these whistleblowing cases? I need the facility ID, parent company name, the time of whistleblowing, etc. (Date Range for Record Search: From 1/1/1970 To 2/1/2024)	02/15/2024

2024-EPA-02137	Sandy, Tom	Brown and Caldwell	Brown and Caldwell is working with Holland & Hart LLP to assist them in understanding the operational costs for the Kellogg Idaho central treatment plant (CTP) as part of their services to Bunker Hill Mining Corporation that was operated by EPA prior to the State of Idaho assuming ownership and operation in 2020/2021 after the upgrades. CTP address: 1005 W. McKinley Avenue, Kellogg ID 83837. We have made requests for operational cost information from the CTP from the Idaho Department of Environmental Quality (IDEQ). They have provided us with operational costs from the period November 2020 through December 2023 when they have been responsible for CTP operation and will continue to be, as well as Idaho National Discharge Pollutant Elimination System (NPDES) Discharge Monitoring Reports (DMRs) from January 2001 to December 2023. We are requesting the same operational information from EPA as it is our understanding that you were in charge of the operations prior to this period. Operational information we are seeking is as follows: lime demand, lime quantities used, lime costs, flocculant/polymer costs, utility costs (e.g., power, potable water, fiber optic, sewage, and solid waste), labor costs, EPA costs and other costs incurred to operate the plant. Please advise if you can assist us with obtaining this information or let us know who we should contact to request it. Thank you. 2024-EPA-02143	Grenon Gutierrez, Marissa	Anderson Kreiger	Background On March 16, 2022, the U.S. Environmental Protection Agency's (EPA) Office of Research and Development held a webinar entitled Mixtures Modeling Methods: Applications for Assessing Polychlorinated Biphenyls (PCBs), which addressed recent EPA research and approaches for assessing toxicity of mixtures of chemicals with a focus on PCBs. The purpose of the	02/16/2024

			webinar was to inform the public of new approaches for assessing toxicity that may form the basis EPA's updated Integrated Risk Information System (IRIS) assessment for PCBs. However, EPA did not provide details of the analyses underlying the new approaches presented in this webinar. It appears the agency will not release these analyses for public review until the 60-day public comment period for the IRIS assessment expected in fiscal year 2025. Several novel analyses and approaches were presented during the webinar. During their presentations, Drs. Laura Carlson and Jeff Gift of EPA noted the agency has developed a new model for assessing chemical mixtures called the Mixtures Similarity Tool ("MiST model"). Additional details of the MiST model were presented by Graham Glen and Joanne Trgovcich of ICF, working on behalf of EPA. The presenters noted the MiST model is an Excel-based tool adapted from a publication by Marshall et al. (2013). The presenters outlined several case study examples of the MiST model, including one which modeled rodent PCB toxicity data from Freeman et al. (2000) and used the MiST model in conjunction with the traditional approach of benchmark dose modeling. The underlying details and computations for this case example were not included in the presentation. According to the presentation, EPA may use the model to generate reference doses for various mixtures of PCBs as part of the updated IRIS assessment. This specific approach is novel and has not been previously applied to EPA chemical assessments. Novel approaches and science, such as the MiST model, should be thoroughly vetted in a public peer review process before being applied to IRIS assessments. This ensures that future regulatory decisions are based on sound and transparent science. However, EPA has not released the MiST model, nor has the agency provided any further communications regarding the applications of these tools to PCB mixtures assessment. Presently, there is no way the public can recreate the analyses shared by EPA in the webinar. Given that IRIS assessments present voluminous and complex toxicological information and analyses, EPA should provide the underlying models, analyses, and supporting documentation in advance of the limited 60-day public comment period so the public has a meaningful opportunity to participate in the public comment process. Requested Records I therefore request: (1) The full, current version of the MiST user guide; (2) The most current working MiST model as an Excel file or program that can functionally execute the analysis; (3) All documents concerning MiST model inputs, outputs, and associated analyses that EPA or ICF used for conducting benchmark dose modeling and MiST analysis of the Freeman et al. (2000) toxicity study (presented as Case 1 Study during the March 16, 2022 presentation by Carlson and Gift); (4) All documents concerning the manner in which the PCB congener neurotoxicity potency values from Pradeep et al. (. . . The description has exceeded the character limit.

2024-EPA-01996	Martin, Rebecca	Rebecca Martin Consulting	To whom it may concern: Pursuant to the Freedom of Information Act, 5 U.S.C. 552, as amended, Rebecca Martin Advocacy requests EPA compliance monitoring reports. Specifically, we request: Specifically, we request the pretreatment programs, industrial surveys and Fast Report of Significant Industries (FROSI) reports or forms from 2017-2021 for: NY0020290 - AMSTERDAM - C WASTEWATER TREATMENT PLANT; NY0020516 - SCHENECTADY WATER RESOURCE RECOVER FACILITY; NY0025976 - BEACON WATER POLLUTION CONTROL PLAN; NY0026042 - GLOVERSVILLE-JOHNSTOWN JOINT WWTP; NY0026255 - POUGHKEEPSIE STP; NY0026875 - Albany County Water Purification District - NORTH PLANT; NY0028240 - SARATOGA CO SEWER DIST #1; NY0029351 - KINGSTON WWTF; and NY0087971 - RENSSELAER CO SD 1 WWTP. This request includes all final documents that have ever been within the agency's custody or control, whether they exist in agency "working," investigative, retired, electronic mail, or other files currently or at any other time. All electronic records should be delivered in their original file format with metadata and any attachments included. Physical records should be scanned or otherwise converted into electronic format. For electronic records, please provide all records in their native file formats (i.e. not converted to PDF) with all metadata included, and for records such as emails which have files embedded or attached, please provide all attachments in their native formats. For instant messages, plain text is acceptable consistent with guidance issued by the National Archives and Records Administration. For any documents or portions of documents that you block release due to specific exemption (s) from the requirements of the Freedom of Information Act, please provide an index itemizing and describing the documents or portions of documents withheld. The index should, pursuant to the holding of Vaughn v. Rosen (484 F.2d 820 [D.C. Cir. 1973] cert. denied, 415 U.S. 977 [1974]), provide a detailed justification for claiming a particular exemption that explains why each such exemption applies to the document or portion of a document withheld. Fee Waiver Request We request that all fees be waived because "disclosure of the information is in the public interest . . . and is not primarily in the commercial interest of the requestor" (5 U.S.C. 552 (a) (4)(A)): 1. The records concern the operations or activities of the Government. The FOIA request is, by its terms, limited to identifiable activities of EPA, specifically relating EPA compliance monitoring reports for certain waste water treatment plants. 2. The disclosure of the requested records is likely to contribute to public understanding of these operations or activities. The requested material consists of documents made by EPA employees. As such, the requested records are the most meaningful documents that could be requested on this topic and will contribute to the understanding of wastewater treatment plants in New York state. 3. The release of these requested records will contribute significantly to public understanding of the governmental activities. The nature of the information should allow the public to see EPA compliance monitoring reports for wastewater treatment plants in New York. The general public has a keen interest in any factor bearing on EPA's compliance monitoring of wastewater treatment plan . . . The description has exceeded the character limit.	02/20/2024

2024-EPA-02126	Yu, Huanzhen	(b) (6)	Dear sir/madam, Hi, I am a finance PhD researcher from the (b) (6) . Since I am currently doing a project on how whistleblowers affect corporate environmental performance, I utilize the "Facilities in Cases" file provided by the EPA (https://echo.epa.gov/tools/data-downloads/icis-fec-download-summary). However, the information provided by this dataset cannot satisfy my research needs, therefore I want to require more information on these cases. Specifically, could you provide me the data for each case regarding which triggered these cases? Are they triggered by EPA's regular inspections or triggered by external whistleblowers or any other information source? I know that the EPA provides a channel for people to report environmental misconduct on the EPA website, so are these EPA cases triggered by the whistleblowers who file a tip on the EPA website? The Occupational Safety and Health Administration (OSHA, thereafter) provides facility-level inspection data on the Department of Labor's website, their dataset categorizes their inspections by different reasons: planned inspection, employee complaints (employee whistleblowing), etc. Therefore, could you provide such data for me in the "Facilities in Cases" database to help me find which cases are related to the information from whistleblowers? Secondly, if you could not satisfy my above requirement, could you just highlight the cases that have been triggered by whistleblowers and provide me some statistics regarding the triggers of these EPA cases? Thirdly, if you still cannot satisfy my second need, let's move to the EPA inspection dataset (ICIS EPA Inspections (ICIS_FEC_EPA_INSPECTIONS.csv) which is also provided on the websites I mentioned above. For this dataset, could you provide me another column containing information on the triggers of these EPA inspections? Are they triggered by whistleblowers or just regular compliance processes like what OSHA does in their inspection dataset? Fourthly, if you still cannot satisfy my third requirement, I have another request. I know that the EPA provides a channel for people to report environmental misconduct on the EPA websites. Therefore, could you provide me with the facility-level data regarding these whistleblowing cases? I need the facility ID, parent company name, the time of whistleblowing, etc. I really appreciate your help. USEPA correspondence describes this outside group as "folks on the Hill who generally want to partner with us in our work." The same correspondence describes the memo as representing "talking points/responses to [] questions that are likely to come up." As such, this memo was prepared for delivery to an outside group, and is not reasonably subject to claims of privilege.	02/21/2024
2024-EPA-02196	Webster, Chris	-	At the Buckhead Superfund Site (EPA Registry Id: 110071284728) EPA intends to leave contaminated soil in place and cover it with a cap. According to EPA's "A Citizen's Guide to Capping", "Capping involves placing a cover over contaminated material such as landfill waste or contaminated soil. Such covers are called 'caps.' Caps do not destroy or remove contaminants. Instead, they isolate them and keep them in place to avoid the spread of contamination.....The cap design selected for a site will depend on several factors, including the types and concentrations of contaminants present, the size of the site, the amount of rainfall the area receives, and the future use of the property....A cap for a hazardous waste landfill, however, might require several layers, including a vegetative layer, drainage layer, geomembrane, and clay layer." I request all materials related to the cap design EPA selected for installation at the Buckhead Slag Superfund Site (EPA Registry Id: 110071284728.) These materials should include (1) professional engineering design calculations, (2) soil boring logs, (3) information about the depth, extent & type of contamination being covered and (4) engineering specifications for the geomembrane, vegetative, drainage and clay layers.	02/21/2024

2024-EPA-01740	Aamot, Colin	-	Dear FOIA Officer, Pursuant to the Freedom of Information Act, 5 U.S.C. § 552, and the implementing FOIA regulations of the agency, I respectfully request the following: Documents sufficient to to account for all GLOMAR FOIA responses issued by the agency in 2023 (January 1, 2023 to December 31, 2023). Search Instructions: Please limit all searches in response to this Request from January 1, 2023, to the present. Please include the full email chain and attachments relevant to any responsive documents to provide further context. To further narrow down the scope of the request, requester does not seek correspondence that merely forwards press clippings, such as news accounts or opinion pieces, newsletters, and published or docketed materials, if that correspondence has no comment or no substantive comment added by any party in the thread. The terms "pertaining to," "referring," "relating," or "concerning" with respect to any given subject means anything that constitutes, contains, embodies, reflects, identifies, states, refers to, deals with, or is in any manner whatsoever pertinent to that subject.The term "record" means any written, recorded, or graphic matter of any nature whatsoever, regardless of how recorded, and whether original or copy, including, but not limited to, the following: memoranda, reports, expense reports, books, manuals, instructions, financial reports, working papers, records, notes, letters, notices, confirmations, telegrams, receipts, appraisals, pamphlets, magazines, newspapers, prospectuses, inter-office and intra-office communications, electronic mail (emails), MMS or SMS text messages, instant messages, messaging systems (such as iMessage, Microsoft Teams, WhatsApp, Telegram, Signal, Google Chat, Twitter direct messages, Lync, Slack, and Facebook Messenger), contracts, cables, telexes, notations of any type of conversation, telephone call, voicemail, meeting or other communication. Please comply fully with 5 U.S.C. § 552(b). Accordingly, without limitation to the foregoing, if any portion of this request is denied for any reason, please provide written notice of the records or portions of records that are being withheld and cite each specific exemption of the Freedom of Information Act on which the agency relies. Moreover, to the extent that responsive records may be withheld in part produce all reasonably segregable portions of those records. Additionally, please provide all responsive documents even if they are redacted in full. This request is primarily and fundamentally for non-commercial purposes. As an investigative columnist and author, my request is in the public interest to inform the public regarding the agency's policies and procedures on the national stage relevant to domestic policy issues.	02/22/2024

2024-EPA-02287	Edwards, Jacob	South Carolina Department of Consumer Affairs	Please provide, in accordance with 5 U.S.C. § 552, the requested documents pertaining to the 1978 rulemaking of the Resource Conservation Recovery Act. I have attached the proposed rule that mentions the document. On page 50 (out of 78) of the proposed rule it mentions that "Twenty-seven (27) background documents have been developed to support this proposed rule…" and shortly thereafter lists "(23) Utility Waste." I am interested in this referenced report on Utility Waste and any associated comments with said report. Please, if possible, provide me with an electronic version of this document and the associated comments. A response may be uploaded via your usual method in the FOIA portal or may be emailed to me at jedwards@scconsumer.gov. For any questions pertaining to this request, you may email me at jedwards@scconsumer.gov or call me at 803-734-4188. Note: Due to file size restrictions I could not attach the full rule. I have condensed the document down to three pages. On the third page there is a highlight that references the document I'm looking for. 2024-EPA-00178	Khachadourian, Ani	Lafayette College	I am a student working to become a civil engineer at Lafayette College. I am currently in an Environmental Site Assessment course where our entire semester is devoted a project to performing an ESA on a local site of our choosing. I choose the following site: 1991 Northampton Street, Easton, PA 18042. This site has been a printing plant since the early 1930's, but has been bought out by other companies and organizations. The original company, Mack Printing Company started in 1935 and was operating for several decades. I am looking for anything related to site plans, documents, potential environmental hazards associated with the site, and any concerns regarding their operations and local soil/groundwater quality. Currently, I am having some trouble finding documents that could further my search and understanding of the site holistically. Documents pertaining to any of the reasons above would be greatly appreciated. (Date Range for Record Search: From 01/01/1930 To 12/30/2023)	02/27/2024

2024-EPA-02344	Giordano, Noel	-	Dear FOIA office, I am writing to submit a Freedom of Information Act (FOIA) request to obtain information related to red tide occurrences in Florida for educational research purposes. I am requesting access to Fish and Wildlife Research Institute (FWRI) record about Florida red tide incidents. I am specifically asking of the following data: 1. Information about red tide events, including reports, FWRI analysis, and monitoring data. 2. Records pertaining to red tide-related environmental inspections, inquiries, or enforcement actions. 3. Memos, emails, or correspondence between FWRI staff members about public messaging, response activities, or red tide monitoring. 4. Any papers, investigations, or research on the subject of red	02/28/2024

			tide produced by the FWRI or under contract with the organization. I am mainly interested in obtaining records over the last five years, but other relevant material from other pertinent time periods would work as well. To help with my analysis and research, I would prefer to receive the records in electronic format, such as PDF or Excel files. My study attempts to advance knowledge of Florida's red tide phenomenon and its environmental effects. That is if the request provided complies with FOIA criteria. Do not hesitate to get in touch with me if you need any further details about my request. I may be reaches at (b) (6) . I appreciate you taking the time to consider this. Am looking forward to your reply. Regards, Noel Giordano (Date Range for Record Search: From 02/08/2019 To 02/27/2024)

2024-EPA-02384	Rome, Aaron	Writing for Green	THE FOLLOWING INFORMATION IS RESPECTFULLY REQUESTED: (1) The executed contract (including the full budget and full scope of work to be provided by the contractor) between the U.S. Federal Government (EPA) and EnDyna (https://endyna.com/) relating to the “technical assistance” referenced in the Environmental and Climate Justice Community Change Grants Program (FUNDING OPPORTUNITY NUMBER: EPA-R-OEJECR-OCS-23-04 ASSISTANCE LISTING NUMBER: 66.616). (2) The executed contract (including the full budget and full scope of work to be provided by the contractor) between the U.S. Federal Government (I believe the EPA is the contracting agency) and the remaining top 5 (as measured by total value of each individual contract) entities (other than EnDyna)other with which the U.S. Federal government has entered into a contract to provide “technical assistance” related to the Environmental and Climate Justice Community Change Grants Program (FUNDING OPPORTUNITY NUMBER: EPA-R-OEJECR-OCS-23-04 ASSISTANCE LISTING NUMBER: 66.616). BACKGROUND INFORMATION For clarity, I have pasted the following excerpt, word-for-word, from the Climate Justice Community Change Grants Program NOFO: “The Inflation Reduction Act (IRA) created the Environmental and Climate Justice Program (ECJP)—the largest investment in environmental and climate justice in U.S. history—when it was signed into law by President Biden on August 16, 2022. The ECJP is now contained in Section 138 of the Clean Air Act (CAA), 42 U.S.C. § 7438. Under this program, EPA was provided $2.8 billion to award grants to help disadvantaged communities address a wide range of environmental and climate justice issues, and $200 million for technical assistance related to these grants.” RATIONALE FOR THIS REQUEST Access to the information contained in these contracts is in the public interest. There is little transparency about the work of these technical assistance providers, nor have expectations of their deliverables been made clear to the public nor potential applicants to this funding opportunity. Per the NOFO referenced above, “The Community Change Grants will fund community-driven projects that address climate challenges and reduce pollution while strengthening communities through thoughtful implementation.” This ($200 million) is a huge sum of money, both in proportion to the total funds to be awarded to frontline communities, and in an absolute sense, yet, the form and nature of this “technical assistance” is murky. 2024-EPA-02373	Song, Lisa	ProPublica	I'm requesting the video files and images listed in "Attachment A - Media Log" in the following document: EPA Region 4 Air Enforcement Branch Final Inspection Report, for the facilities Westlake Vinyls, Inc.; Westlake Chemical OpCo, LP and Westlake Vinyls Inc. - PVC Plant. The plants are located in Calvert City, KY. The inspection took place April 11 - 20, 2023. The document number is "AEBFORM-012-R0" and was prepared by Andrew Mills. The media log is on page 12 of the inspection report. There should be 5 video files total, and 3 .jpg images. (One of the video files is labeled as "file corrupted," so if that file cannot be played, I do not need that file.) I've already requested these media files from Terry Johnson, press officer in the Region 4 Office of External Engagement and Outreach. Terry has been working to assemble the files for me, and told me in an email on Feb 28, 2024, that they "have the records in hand and have made a determination that they are releasable under FOIA, we should be able to respond rapidly."	03/04/2024

2024-EPA-02380	Lazarus, Barry	Lazco Investments LLC	Last year, 2023 Lazco Investments LLC made an application for EPA Registration (through Tamica Cain of EPA) of a product called Binkill. The application was made by an ex employee of mine Mr. Kieu Hang. He was delegated to handle the matter. Evidently our application was issued a 75 day letter explaining what further data was required before the registration would take place. I have never seen this letter and cannot contact Mr. Kieu Hang. As we are re-submitting could you please provide a copy of the 75 day letter to us? Our Bona Fides with EPA are well established as I am sure Tamica Cain will attest. If you wish I can also forward a long thread of emails between EPA and us. As this is a simple request for an already published document it would be appreciated if you could waive fees. It is a Tamica Cains suggestion that we contact you, she will be able to attest that our request has integrity and is genuine. This matter has been going for some time, I would be very grateful for a quick reply. Thanks Barry Lazarus	03/04/2024

2024-EPA-01934	Choi, Dahyun	Princeton University	Dear CalEPA Officer, I request a copy of the following documents (data), or documents containing the following information, be provided to me: (1) Copy of the log correspondence between the offices of all members of the California Legislature (both the Senate and the House of Representatives), and the California Environmental Protection Agency during the time period from January 1, 2000 through December 31, 2020. If information on these dates is not available, I request a copy of the existing records for the time period available between January 1, 2000 through December 31, 2020. By log correspondence I mean the document that the California Environmental Protection Agency uses to track all official correspondence with members of the California Legislature initiated by the member of the California Legislature and including responses from the the California Environmental Protection Agency to the member of the California Legislature, including details such as the particular member of California Legislature involved, the nature or summary of the correspondence, and the dates of the correspondence. If there are any fees for searching or compiling these records, please inform me if the cost will exceed $40. However, I would also like to request a waiver of all fees in that the disclosure of the requested information is in the public interest and will contribute significantly to the public's understanding of the operations or activities of the government and is not primarily in my commercial interest. I´m currently a PhD candidate at Princeton University. The records concern the operations or activities of the Government by documenting how individual legislators communicate policy implementation in their districts with other state officials. Understanding how and what frequency the legislative body of the state government corresponds with a state agency that implements policies contributes to the general public's understanding of how the government works for the public interest. While the general public may have knowledge about how it is represented through the lawmaking process, they are less aware of how their legislators can represent them through ensuring that policy is implemented in a way that is beneficial to constituents. Furthermore, it is important for the public to understand how responsive state agencies, such as the California Environmental Protection Agency, are to individual legislators. The information being disclosed is new. This type of representation has not been studied and there is very little awareness of it. This request is made for a scholarly and scientific purpose and not for commercial use. I request that the information I seek be provided in electronic format via email. I would be happy to communicate via my email at (b) (6) so that I may keep a copy of our correspondence for my records. Thank you for your help and consideration. I sincerely appreciate your public service!	03/05/2024

2024-EPA-02886	Raturi, Roger	-	HQ LEAD NUMBER: FY24-293890-3800-CV Background: Last month my mother and I had (b) (6) . I had a delayed onset of (b) (6) I stopped taking the (b) (6) to my mother. In 2018, I had similar (b) (6) but wasn't sure of the root cause. I now believe directly the perpetrators responsible for this act of bioterrorism(Mikkel Fischer,Mario Gessa) live at (b) (6) . released a chemical toxin in my air circulation unit in mid January. This AC unit is directly adjacent to the apartment complex, Sage. They own a AC maintenance business. I believe records will show that they may have purchased chemical toxins that upon exposure produce alarming symptoms. I believe this is true because someone was eerily standing outside this house awkwardly staring at me as I was leaving my home Friday morning, the morning after filing my first report with the EPA and speaking with an investigator, Reginald Barrino. 2024-EPA-02860	Starita, Paul	Singleton Schreiber LLP	We are requesting the following information: 1. Quality assurance plan(s) and modeling protocol(s) for all air quality monitoring, meteorological monitoring, ash sampling, wipe sampling (if conducted), and soil sampling (if conducted). 2. Complete hourly measured PM2.5 data that were collected at all five BAM PM2.5 monitoring sites and the 12 PurpleAir monitoring sites from site inception August 20, 2023 through the date of this request. These data are requested in the electronic format in which they are stored, such as in Excel, with formulas and all unit headers included, including identifying monitoring site numbers and with specified units for all data fields. 3. All time integrated samples for metals, asbestos, VOCs, and any other pollutants that were measured are requested in their fundamental form (typically 24-hour integrated samples) from site inception in August 2023 until the date of this request. 4. All available photographs and videos of the BAM and PurpleAir monitoring sites, including detailed coordinates that allow for the locations to be identified accurately (most of these monitors are located in zones that do not allow public access). 5. Identification of the archive status of all subsamples composited for ash sample DU-1, i.e., confirm that the subsamples were archived and available for further analysis. Identify the location of each subsample in sufficient resolution to accurately locate each subsample, such as by latitude and longitude, or other location accurate identifiers such as street address. 6. All available meteorological data collected in Lahaina in support of the 17 site air quality monitoring network are requested. These data are requested in the currently stored form (such as Excel, including all formulas) with site and unit headers included. Provide all available photographs that document the exposure for each meteorological monitoring station, identify the exposure height of the wind and other sensors, and provide accurate latitude and longitude data for each monitoring location. 7. An explanation is requested for relocation of all monitors, such as the removal of the monitor(s) at Princess Nahiena Elementary School. 8. Locations, date/time, and results for all available dust wipe samples (as available). 9. Locations, date/time, and results for all available soil samples (as available). 10. All available photos and video of the Lahaina fires of August 2023 including meta data identifying the location and date/time of each record as available. 11. 2024-EPA-02922	Garrison, Leah	-	I am requesting that my search includes Air, Water, ECAD, SEMD, and Land and Chemical data. I am seeking information regarding federal involvement of monitoring/funding/clean-up/follow-up of: EPA Superfund Site "Wicks Elementary" MID980679898 in Romulus, Michigan 48174, also known as "Romulus Distribution Center" Brownfield Site ACRES Property ID 253866, and EGLE Site ID 82000014. This site was formerly 2-3 landfills/dumps from potentially the 1940's to about the 1980's, and Know names of these landfills/dumps include Mendrek or Mendrick, Satterlee or Saterlee, Keane, and potentially Wick. Current Census Tract: 26163585800 Map locations: Wayne County, City (or Township) of Romulus, Section 7 T.3S., R.9E. and Section 8 T.3S., R.9E. Addresses may include 36411 Ecorse Rd and/or 36711 Ecorse Rd and/or 36603 Ecorse Rd,	03/06/2024

			and/or 36900 Wick Rd, and/or 37300 Wick Rd, Romulus (or Romulus Township) Wayne County, Michigan. Parcel numbers may include (but are not limited to) 80030990004000 80030990006700 80030990007000 80028990012703 80028990005700 80025990003000 80031990003000 80031990002000 The property purchased by my husband James Garrison in Oct. 2016 at 7245 Ozga St Romulus, MI 48174, located in what is known as the "Detroit Industrial Center Subdivision" (Lots 289-293, inclusive, L. 58, p. 96, Wayne County Records) parcel/Tax ID 80-030-01-0289-301, as well as five EGLE Wetland Conservation Easements (L.50039, P.980; 2012,) 100 year FEMA Floodplain (Panel 26163CO357F, 12/03/2013), as they are somewhat of a holding tank for the contents of the McClaughrey Drain, the Post Drain, the Branch Drain (no longer used from my understanding) and the Vealy Drain. My property is directly or indirectly impacted by all of these drains, which all have been impacted by nearby hazardous spills/NPL Sites/Superfund Sites. Again, I am requesting that my search includes Air, Water, ECAD, SEMD, and Land and Chemical data for all items mentioned (if/where applicable.) I would also like to request any financial information available pertaining to the clean-up of this site. It has been mentioned in local newspapers that Governor Blanchard allocated federal funding in 1990 toward the clean-up of this site, and a recent Brownfield Grant Request for Elmer Johnson Park (also part of this site but across the road) from the City of Romulus stated that the city was given federal funding from the 80's and 90's, but "records were not readily available." However, according to the current information available about this site now that it is a Brownfield Site, it is still contaminated, with drinking water, ground water, air, and soil all impacted. This area was just declared a "Major Disaster" by FEMA on Feb 8, 2024 due to the flooding from the aforementioned drains that occurred on Aug 24-26, 2023. These contaminated waters flooded my entire street/houses, school property, the EGLE wetlands, and surrounding industrial businesses. 2024-EPA-02934	Geiger, Jeremy	Zum Services, Inc.	In 2023, Zum Services, Inc. submitted an application for the Environmental Protection Agency (EPA) 2023 Clean School Bus (CSB) Notice of Funding Opportunity (NOFO) EPA-OAR-OTAQ-23-06, and was awarded a grant for the Zum National Student Transportation Electrification & Vehicle-to-Grid (V2G) Project. We are thankful for the opportunity to help lead the transition to clean, electric school transportation in four school districts across California. Zum is constantly striving to improve our collaboration with Federal, state, and local agencies in an effort to accelerate electric school bus deployment and the net-zero transition nationwide. As such, we seek to better understand the EPA's criteria and considerations for deploying grant funding to third-party student transportation providers via the CSB grant program. In anticipation of the upcoming opening of the CSB application window for 2024, we kindly request that the EPA share all 2023 CSB applications submitted by the entities listed below, as well as the evaluation committee's scoring breakdown and comments for each application. 1. Dattco, Inc. 2. First Student, Inc. 3. Harlows Bus Sales, Inc 4. Highland Csb 1, Llc 5. Student Transportation Of America, Inc. We welcome the opportunity to learn from this material and the EPA's feedback. Please let us know of any questions regarding our request. Many thanks in advance.	03/06/2024

2024-EPA-01933	Choi, Dahyun	Princeton University	Dear Pennsylvania Department of Environmental Protection (DEP) Officer, I request a copy of the following documents (data), or documents containing the following information, be provided to me: (1) Copy of the log correspondence between the offices of all members of the Pennsylvania Legislature (both the Senate and the House of Representatives), and the Pennsylvania Department of Environmental Protection during the time period from January 1, 2000 through December 31, 2020. If information on these dates is not available, I request a copy of the existing records for the time period available between January 1, 2000 through December 31, 2020. By log correspondence I mean the document that the Pennsylvania Department of Environmental Protection uses to track all official correspondence with members of the Pennsylvania Legislature initiated by the member of the Pennsylvania Legislature and including responses from the Pennsylvania Department of Environmental Protection to the member of the Pennsylvania Legislature, including details such as the particular member of Pennsylvania Legislature involved, the nature or summary of the correspondence, and the dates of the correspondence. If there are any fees for searching or compiling these records, please inform me if the cost will exceed $40. However, I would also like to request a waiver of all fees in that the disclosure of the requested information is in the public interest and will contribute significantly to the public's understanding of the operations or activities of the government and is not primarily in my commercial interest. I´m currently a PhD candidate at Princeton University. The records concern the operations or activities of the Government by documenting how individual legislators communicate policy implementation in their districts with other state officials. Understanding how and what frequency the legislative body of the state government corresponds with a state agency that implements policies contributes to the general public's understanding of how the government works for the public interest. While the general public may have knowledge about how it is represented through the lawmaking process, they are less aware of how their legislators can represent them through ensuring that policy is implemented in a way that is beneficial to constituents. Furthermore, it is important for the public to understand how responsive state agencies, such as the Pennsylvania Department of Environmental Protection, are to individual legislators. The information being disclosed is new. This type of representation has not been studied and there is very little awareness of it. This request is made for a scholarly and scientific purpose and not for commercial use. I request that the information I seek be provided in electronic format via email. I would be happy to communicate via my email at (b) (6) so that I may keep a copy of our correspondence for my records. Thank you for your help and consideration. I sincerely appreciate your public service!	03/07/2024

			the East Palestine Train Derailment (EPTD) starting on Feb. 3, 2023, and continuing through Feb. 3, 2024. Specifically, we are seeking all relevant documents, including but not limited to: 1. Field sampling protocols utilized by the EPA, Norfolk Southern, and EPA contractors during the EPTD. 2. Correspondence, memoranda, emails, and other communications exchanged between the EPA and any involved parties regarding the methodologies for testing and sampling. 3. Reports, assessments, or studies discussing the rationale behind the selection of specific methodologies and sampling techniques. 4. What are the quantitative criteria or thresholds used by EPA to determine either a need for additional sampling/investigation (screening level) or that there is a significant hazard/risk (action level). Please provide for all media, including air, water, groundwater, soil, sediment, garden crops, etc. 5. Regarding indicator compounds used by EPA to determine the likely formation of dioxins and furans, please provide a list and concentrations of such compounds and where they are measured, e.g. in the combustion plume, at known downwind ambient air locations, etc. Please provide scientific evidence of the validity of this approach and decision levels. 6. EPA measured fugitive dust emissions at various locations around East Palestine, particularly near ground zero and various remediation sites, using Hi-vol samplers. Please provide all particulate measurements, including size characteristics, filter characteristics, e.g. pore size and media composition, and sampled air volume for each sample. If any samples were additionally analyzed for chemical contaminants, please provide all results as well as specific QC measures, e.g. instrument calibrations. We request all data regards to specific analysis results of dioxin and Furans, including SVOC analysis. Further we request all communications regarding interpretation and/or applicability of same. We further request all results of total suspended particulates data and associated communications regarding interpretation or applicability. Please provide details of all violations found by the hi volume sampling in East Palestine, and subsequent reporting of same, and who was notified of the violations? Our request aims to obtain a comprehensive understanding of the strategies employed by the EPA and its contractors in assessing the environmental impacts of the EPTD. We are particularly interested in the reasoning behind the decisions made regarding sampling methodologies and the potential implications for public health and environmental safety. The application was made by an ex employee of mine Mr. Kieu Hang. He was delegated to handle the matter. Evidently our application was issued a 75 day letter explaining what further data was required before the registration would take place. I have never seen this letter and cannot contact Mr. Kieu Hang. As we are re-submitting could you please provide a copy of the 75 day letter to us? Our Bona Fides with EPA are well established as I am sure Tamica Cain will attest. If you wish I can also forward a long thread of emails between EPA and us. As this is a simple request for an already published document it would be appreciated if you could waive fees. It is a Tamica Cains suggestion that we contact you, she will be able to attest that our request has integrity and is genuine. This matter has been going for some time, I would be very grateful for a quick reply. Thanks Barry Lazarus."	03/07/2024

See attached image.png The EPA has a program that performs comment processing, including using deduplication software that distinguishes unique comments from mass mail campaign (or form letter) comments. The tool is accessible to each of the program or regional offices, but beyond that, each program office is responsible for performing its own analysis – and some have developed their own tools to aid this process. I seek a copy of the files (and exact URLs or dataset IDs for the public comments) accessed by the Federal-Wide Comment Analysis Tool, as well as files that are accessible by the Federal-Wide Comment Analysis Tool, including but not limited to The CDO Council Comment Analysis pilot that has shown that recent advances in Natural Language Processing (NLP) can effectively aid the regulatory comment analysis process, such that the proof-of-concept is a standardized toolset intended to support agencies and staff in reviewing and responding to the millions of public comments received each year across government, as well as Available Public Comment Data that Regulations.gov makes public comment data available through the web interface, bulk comment data download feature, and Application Programming Interface (API), including but not limited to comment form data fields collected by EPA by the General Services Administration (GSA), as the manager of Regulations.gov.	03/08/2024
2024-EPA-02959	Campbell, Christopher	Environmental Working Group	Request for Drinking Water Quality Data, 2020-2023 My name is Chris Campbell and I am a researcher at Environmental Working Group, a non-profit research and advocacy organization. In 2020, I communicated with the Region 8 FOIA Office via email regarding drinking water quality data for 2018 & 2019 for the State of Wyoming in 2020. My FOIA number for that request was EPA-R8-2020-005013. EWG is updating its database on water quality and is requesting water quality data for samples taken in calendar years 2020 through 2023 as well as some basic system information. The details of our request are highlighted in the request below. If you are unable to assist me with this request, please direct me to the appropriate contact. Thank you for your help with this matter. Sincerely, Request Summary: EWG is requesting an electronic copy of all chemical and microbial contaminant data obtained in compliance and non-compliance testing of public water supplies for samples taken in calendar years 2020 through 2023. If you have any questions, please call me at (b) (6) Data Requested: Contaminant monitoring results for raw/source and finished water – including detections, non-detects and results below the level of detection. Each result record should include a sample identification, water supplier identification, sampling date, contaminant name, contaminant concentration, units, qualifiers, sampling location (e.g. well name or intake designator), type of water sampled (e.g. raw/source or finished), test method, and any other available sampling designator (e.g. distribution system or point of entry). System information (PWS ID, system name, address, PWS type (community, non-community, etc.), population served, primary source (GW, SW, etc), city & county served, and percentages of ground/surface water or purchased ground/surface water (if available). Please include at least the following information. If it is easier to not limit the data dump, please do so to hasten the process. - water suppliers – community, non-transient non-community, and transient non-community water suppliers - time span – for samples taken in 2020 - 2023 - contaminants – regulated and unregulated chemical and microbial contaminants (including inorganics, organics, radionuclides, coliform, compliance testing programs, unregulated contaminant monitoring programs (specifically PFAS), and any other programs that have generated chemical and microbial test data for public water supplies) Data Format Requirements: - any non-proprietary format (e.g. ASCII delimited text or Dbase files) (Date Range for Record Search: From 1/1/2020 To 12/31/2023)	03/08/2024

2024-EPA-02032	Fermin, Jorge	Self	ENERGY STAR certified homes undergo a process of independent inspections and testing to ensure that they meet strict requirements set by the U.S. Environmental Protection Agency (EPA). In cases where a homeowner has concerns about the ENERGY STAR certification of their home, the first and best option is to attempt a resolution directly with the home builder. If a homeowner is unsuccessful in resolving their concerns through the builder, they can request a Certification Review (CR) for their home. Certification Reviews are administered by the EPA-recognized Home Certification Organization (HCO) that issued the home certification through a defined process. The assigned reviewer will complete the CR and prepare a Certification Review Report within 60 days of assignment. A copy of the report will be shared with the HCO, which will in turn share the report with the homeowner and EPA. https://www.energystar.gov/partner_resources/residential_new/certification_review I am seeking a copy of all Certification Review Reports submitted to the EPA on homes built by KB Home over the last year. 2024-EPA-02193	Tentindo, William	The Williams Institute	Pursuant to the federal Freedom of Information Act, 5 U.S.C. § 552, the Williams Institute at UCLA School of Law seeks access to and electronic copies of any "SOGI Data Action Plan" prepared by the Environmental Protection Agency ("EPA")	03/12/2024

			pursuant to Section 11(c) of Executive Order 14075 – Advancing Equality for Lesbian, Gay, Bisexual, Transgender, Queer and Intersex Individuals. "SOGI" refers to "sexual orientation/gender identity." The requested documents are not, upon information and belief, already available in the public domain. To assist in locating the SOGI Data Action Plan ("Plan"), we can provide the following details: • Executive Order 14075 was issued on June 15, 2022 and required agencies to submit a "Data Action Plan" to the "Co-Chairs of the Interagency Working Group on Equitable Data" within 200 days. The Plan was therefore likely prepared and/or submitted sometime sometime between June 15, 2022 to the date of the submission of this request, but not necessarily within the 200-day deadline set out by the Executive Order. • Per the Executive Order, the Plan details "how the agency plans to use SOGI data to advance equity for LGBTQI+ individuals and shall identify how the agency plans to implement the recommendations in the Federal Evidence Agenda on LGBTQI+ Equity." • The Plan would have been submitted by the head of "each agency that conducts relevant programs or statistical surveys related to the Federal Evidence Agenda on LGBTQI+ Equity," which includes the EPA, to the Co-Chairs of the Interagency Working Group on Equitable Data. Officers at the EPA who may have access to or knowledge of the final version of the DAP are Eric Wachter, Director, Office of the Executive Secretariat; Terrence Jackson, Acting Director, Office of Administrative and Executive Services; and JuanCarlos M. Hunt, Director, Office of Civil Rights. • Other federal agencies have already released their SOGI Data Plans publicly. The Department of Housing and Urban Development and the Department of Health and Human Services have both released their respective SOGI Data Action Plans. Investigators may find those publicly available documents helpful in identifying the EPA's Plan. We request that you produce responsive materials in their entirety, including all attachments, appendices, enclosures, and/or exhibits and in digital format. In the event you determine that the Plan contains information that falls within the statutory exemptions to mandatory disclosure, we request that such information be reviewed for possible discretionary disclosure. See Chrysler Corp. v. Brown, 441 U.S. 281, 293 (1979). If our request is denied in whole or part, we ask that you provide notice in writing and the reasons therefor. See 40 C.F.R. §§ 2.104(i)-(j). We reserve the right to appeal your decision to withhold any information or to deny a waiver of fees. We would appreciate your communicating with us by email or telephone, rather than by mail. Please call me at (b) (6) if you have any questions or wish to obtain further information about our request. Thank you for your assistance. Sincerely, Will Tentindo	
2024-EPA-02299	Johnson, Tamirra	-	Requested Records The following letter outlines a request under the Freedom of Information Act. I am a Master of Public Health graduate student seeking the unredacted records and data listed below regarding Case #06-2016-3403, a closed case against the ExxonMobil Beaumont Oil Refinery for the release of flammable substances at the facility on April 17, 2013. The fire caused by the release resulted in two deaths and ten injuries, all of whom were workers. Although a penalty was administered and paid, the list of chemicals was not provided, and the inspection report is not available from the Civil Enforcement Case Report summary available on EPA's Enforcement and Compliance History Online database. This information is necessary for interpreting if the administered penalties and resulting corrections are protective enough to prevent future incidents. Information requested: • Civil Enforcement Case Inspection Report • A list of the regulated flammable substances released during the April 17, 2013 incident at Hydro Desulfurizer Unit Two, including chemical abstract numbers • Ambient air quality monitoring data related to substances released in the April 17, 2013 incident in Beaumont, Texas from May 17, 2013 to June 17, 2013 Please note, the term data/information source is used in this document in a broad way to capture the heterogeneity of data/information in EPA inspection reports (e.g., data sets, published models, completed assessments, release data). Disclosure Method To the extent practicable, I am seeking electronic copies of the above documents in native file format, or, if that is not practicable, with full metadata for all fields. If any information requested herein was, but is no longer, in EPA's possession or subject to its control, please state whether it (a) is missing or lost, (b) has been destroyed, (c) has been transferred voluntarily or involuntarily to others, or (d) is otherwise disposed of, and in each instance, please explain the circumstances surrounding and authorization for such disposition of it, and state the date or approximate date of it. Please either email responsive records to me at (b) (6) or email me to request a link to a OneDrive folder where you can upload the records. Please release responsive records to me on a rolling basis. If you determine that any of the records I've described above are already publicly available, please let me know where to find them.	03/12/2024

2024-EPA-03081	Bogardus, Kevin	E&E News	I request the report described in the following excerpt from the joint explanatory statement of Division G of the Consolidated Appropriations Act, 2022, Public Law No: 117-03: "Advanced Biofuels from Canola Oil.-In addition to House guidance on 'Pathways for Renewable Fuel,' the Committees note that the Agency receives petitions for renewable fuel pathways that would enhance feedstock flexibility and support growth in the production and use of advanced biofuels. The Committees are aware that the Agency received a petition to include pathways for renewable diesel produced from canola oil as advanced biofuel. The Committees encourage the Agency to expedite review and report to the Committees on the status of the petition if a determination is not made within two years of the date of submission." Please see page 50 of the joint explanatory statement of Division G of the Consolidated Appropriations Act, 2022, Public Law No: 117-03 (https://docs.house.gov/billsthisweek/20220307/BILLS-117RCP35-JES-DIVISION-G.pdf). 2024-EPA-03080	Bennett, Kyla	Public Employees for Environmental Responsibility (PEER)	Pursuant to the Freedom of Information Act, 5 U.S.C. 552, as amended ("FOIA"), Public Employees for Environmental Responsibility ("PEER") requests certain documents from the U.S. Environmental Protection Agency ("EPA") relating to the testing of per- and polyfluoroalkyl substances ("PFAS") in pesticides prior to the issuance of its May 18, 2023 memo (see https://www.epa.gov/system/files/documents/2023-05/BEAD%20PFAS%20Study%20Results%202023.pdf) and associated press release. This request applies to all records obtained or created by EPA between January 19, 2023 and the present. Specifically, we request: • All documents, including but not limited to emails, memos, texts, letters, Microsoft Teams chats, transcriptions of phone calls, and meeting notes, relating to the results from the Sciex 6500+ LC/MSMS (note that we do not need the results of the test itself); • All documents relating to the decision not to include the results of the Sciex 6500+ LC/MSMS in the May 18, 2023 memo and associated press release; and • All documents relating to directing the preparation of the above-referenced memo and accompanying press release, including records reflecting which officials authorized, reviewed, and gave the order to publicly issue the memo and release, as well as the distribution list for same; and • All documents related to the decision not to include in the press release or memo the information that Dr. Steven Lasee had spiked the samples he provided to EPA. Possible custodians of these records include, but are not limited to, Dr. Yaorong Qian, Ed Messina, and Thuy Nguyen. This request includes all final documents that have ever been within the agency's custody or control, whether they exist in agency "working," investigative, retired, electronic mail, or other files currently or at any other time. All electronic records should be delivered in their original file format with metadata and any attachments included. Physical records should be scanned or otherwise converted into electronic format. For electronic records, please provide all records in their native file formats (i.e., not converted to PDF) with all metadata included, and for records such as emails which have files embedded or attached, please provide all attachments in their native formats. For instant messages, plain text is acceptable consistent with guidance issued by the National Archives and Records Administration. For any documents or portions of documents that you withhold from release due to the claimed application of specific exemption(s) from FOIA requirements, please provide an index itemizing and describing the documents or portions of documents withheld. The index should, pursuant to the holding of Vaughn v. Rosen (484 F.2d 820 [D.C. Cir. 1973] cert. denied, 415 U.S. 977	03/18/2024

			[1974]), provide a detailed justification for claiming a particular exemption that explains why you believe each such exemption applies to the document or portion of a document withheld.

2024-EPA-01999	Cole, James	-	I am requesting access to and copies of all information related to oil spills documented by ExxonMobil and/or its subsidiaries including Exxon, Mobil, Esso Fuels, XTO Energy, and their affiliates (collectively "Regulated Parties"). I am limiting my request to spills documented to have occurred on or between January 1, 2023 and December 31, 2023. Information requested includes dates and locations of spills as well as amount of oil discharged and whether crude or refined if recorded. "Records" for the purposes of this request include, but are not limited to, submitted spill forms, email communications concerning spills, Instant Messaging communications concerning spills, audio records of phone calls concerning spill events, and transcriptions of phone calls concerning spill events. Where records would be entirely duplicative only one record of each event is requested. I am requesting this information in PDF format where available. Where PDFs are unavailable, any other format that is readable without specialized software is acceptable. Specifically, I am interested in the following: 1. Oil spill records made by Regulated Parties pursuant to 40 C.F.R. § 110.6. 2. Records of fines levied against Regulated Parties for failure to notify under 33 C.F.R. § 153.205. 3. Oil spill records made by Regulated Parties pursuant to any other regulation. 4. Oil spill records made by Regulated Parties not pursuant to any regulation.	03/21/2024
2024-EPA-02308	Clark, Aaron	Bloomberg News	The United Nations Environment Programme's International Methane Emissions Observatory (IMEO) notified the US government on Oct. 31, 2023, or sometime soon thereafter (likely within a few days), about a significant cloud of methane observed by satellite in Texas Oct. 31, 2023. The notification was made through IMEO's Methane Alert and Response System (MARS) and is documented through the agency's methane data that is publicly available and downloadable from its website here: https://methanedata.azurewebsites.net/plumemap?mars=true I've uploaded the IMEO document as part of this submission request. You will need to copy the data and paste it into an Excel file but once you do that and the notification in question is in row 2048 of that document. The "TRUE" under the "notified" column indicates the MARS alert was made to the US government. We believe the initial notification was emailed to the State Department's Office of the Special Presidential Envoy for Climate and may have been sent to John Kerry, Richard "Rick" Duke, Claire Wang or Daniel Rochberg. We believe that one of these officials may have alerted the Environmental Protection Agency. We are seeking any emails from these individuals to the EPA related to that MARS notification and the Oct. 31 emissions event in Texas. We are also seeking any	03/21/2024

			internal EPA emails about the MARS notification and the Oct. 31 emissions event in Texas. The timeframe is from Oct. 31, 2023 to as close to the present as possible. Thank you.

2024-EPA-03201	Clark, Aaron	Bloomberg News	The United Nations Environment Programme's International Methane Emissions Observatory (IMEO) has notified the US government at least 28 times through its Methane Alert and Response System (MARS) between Jan 6, 2024 and Jan. 21, 2024 of significant US methane releases observed by satellite. The notifications themselves are not publicly available however the fact that the notifications were made are documented through the agency's methane data that is publicly available and downloadable from its website here: https://methanedata.azurewebsites.net/plumemap?mars=true I've uploaded the IMEO documentation of US MARS alerts as part of this submission request. The "TRUE" under the "notified" column indicates the MARS alert was made to the US government. We believe these notifications were emailed to the State Department's Office of the Special Presidential Envoy for Climate and may have been sent to John Kerry, Richard "Rick" Duke, Claire Wang, Daniel Rochberg or John Podesta. We believe that these alerts may have been shared with officials at the Environmental Protection Agency. We are seeking any emails from the State Department officials listed above to EPA officials related to MARS notifications. We are also seeking any EPA emails related to these MARS notifications. The timeframe is from Jan. 6, 2024 to Jan. 21, 2024. Our purpose with this request is to identify US oil and gas operators IMEO believes is responsible for the emissions that generated the MARS notifications and to learn if the US is taking any action as a result of the notifications.	03/22/2024

2024-EPA-02311	Clark, Randi	Farm Journal	Hello, I am looking for a current list facilities registered with the epa primarily with the RMP, but could be with other services such as frs, echo, icis (both). Specifically, I am looking for anything to do with golf courses, country clubs, hotel/resorts with golf courses etc. both public and private mapped and not mapped. This would be anything you guys have on them. The facility name, operator name, other names associated with the business, addresses (including, city, state, zip), phone numbers, and emails. I know you wont have all of them as there are roughly 16000 golf courses in the country, but I figure you guys will have most of them hopefully. Ive done searches using SIC and NAICS codes and I am getting small numbers and not quite right things. I figured submitting a foia would be best. I put 0 down for the fee amount. Just let me know what the fee will be and I will see if get it approved before moving forward. I am not saying I wont pay anything. Its more so that I need a number for approval first. Please let me know if you have any questions. Randi (Date Range for Record Search: From 01/01/2023 To 02/26/2024)	03/25/2024

2024-EPA-02302	Barkholz, Jane	-	Requested Records I am seeking the unredacted datasets/data sources listed below regarding acrylamide levels in foods collected from results of analysis of individual food product samples or composite food samples from the years 2016-2024. I request this information because acrylamide is a neurotoxicant and potential human carcinogen and was found in previous studies published in 2002-2006, 2011, and 2015 to be at high concentrations in a variety of foods in our diet, however, the FDA has not provided any data from any year since 2015. • Any data source or records related to acrylamide levels in food from the years 2016-2024. • Acrylamide Total Diet Study results or information from 2016-2024. • Acrylamide data collected of results from analysis of individual food product samples or composite food samples from the years 2016-2024. The term data source is used in this document in a broad way to capture the heterogeneity of data in TSCA risk evaluations (e.g., experimental studies, data sets, published models, completed assessments, release data. The use of the word "records" herein means information and documents of any kind, including, but not limited to: documents (handwritten, typed, electronic, or otherwise produced, reproduced, or stored), letters, emails, facsimiles, memoranda, correspondence, notes, databases, drawings, diagrams, maps, graphs, charts, photographs, minutes of meetings, summaries of telephone	03/28/2024

			conversations, notes and summaries of interviews, electronic and magnetic recordings of meetings, and any other compilation of data from which information can be obtained. Disclosure Method To the extent practicable, I am seeking electronic copies of the above documents in native file format, or, if that is not practicable, with full metadata for all fields. If any information requested herein was, but is no longer, in FDA's possession or subject to its control, please state whether it (a) is missing or lost, (b) has been destroyed, (c) has been transferred voluntarily or involuntarily to others, or (d) is otherwise disposed of, and in each instance, please explain the circumstances surrounding and authorization for such disposition of it, and state the date or approximate date of it. Please either email responsive records to me at (b) (6) [redacted], or email me to request a link to a OneDrive folder where you can upload the records. Please release responsive records to me on a rolling basis. If you determine that any of the records I've described above are already publicly available, please let me know where to find them.

2024-EPA-03342	Fotis, Stephen	Van Ness Feldman LLP	This FOIA request seeks to obtain the application that each of the three top-scoring applicants (as identified above) submitted in response to EPA's NCIF NOFO. Those portions of the top-scoring applications include copies of both the mandatory and optional documents that are specified in Section IV.B (pages 28-29) of the NCIF NOFO. In addition, this FOIA request seeks to obtain the following additional information relating to EPA's consideration and evaluation of the three top-scoring NCIF applications: a. The numerical scores (e.g., points) that EPA assigned to each of evaluation criteria for NCIF application components and cross-component evaluation criteria for each of the three top-scoring NCIF applications, as set forth in Section V.A (pages 41-53) of the NCIF NOFO; and b. Any other final reports, reviews, evaluations, or summaries that EPA has prepared on the final selection of those three top-scoring NCIF applications. Finally, this FOIA requests a list of all entities that submitted to EPA applications to receive NCIF grant funding as well as all information relating to EPA's decision to apply or not to apply the "other factors" in the final section process, as provided in Section V.B.4 (page 54) of the NCIF NOFO.
