

**OFFICE OF INSPECTOR GENERAL**  
U.S. ENVIRONMENTAL PROTECTION AGENCY

May 01, 2025

**MEMORANDUM**

**SUBJECT:** Notification:  
Evaluation of Trends in Resource Conservation and Recovery Act State-Level  
Enforcement Data  
Project No. OSRE-FY25-0060

**FROM:** Gabby Fekete, Director  
Programs, Offices, and Centers Oversight Directorate  
Office of Special Review and Evaluation

**TO:** Jeffrey A. Hall, Acting Assistant Administrator  
Office of Enforcement and Compliance Assurance

The U.S. Environmental Protection Agency Office of Inspector General plans to begin an evaluation of Resource Conservation and Recovery Act enforcement trends. Our objective is to identify state-level trends in Resource Conservation and Recovery Act enforcement data for large quantity generators from 2020 through 2024.<sup>1</sup> We will conduct the evaluation using *Quality Standards for Inspection and Evaluation*, issued by the Council of the Inspectors General on Integrity and Efficiency.

We will contact you to arrange a mutually agreeable time to discuss our objective. At that time, we can discuss any concerns that you may have and answer any questions about the evaluation process, reporting procedures, methods used to gather and analyze data, and what we should expect of each other during the evaluation. Throughout the evaluation, we will provide updates on a regular basis.

We respectfully note that the Inspector General Act of 1978, as amended, authorizes the OIG to have timely access to personnel and all materials necessary to complete our objectives. Similarly, EPA Manual 6500, *Functions and Activities of the Office of Inspector General* (1994), requires that each EPA employee cooperate with and fully disclose information to the OIG. Additionally, Administrator Lee Zeldin, in a February 7, 2025 email to EPA employees, said that “the OIG requires information and assistance from EPA managers and staff on a regular basis” and outlined his expectation that EPA employees “report waste, fraud, and abuse to the OIG.” He explained that this “responsibility to report appropriate activity to the OIG is one of the most important and successful means the OIG has for identifying and stopping wrongdoing” and that review and oversight enable the Agency to be more effective in achieving

---

<sup>1</sup> According to the [EPA](#), large quantity generators are facilities that “generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.”

its mission. If an Agency employee or contractor refuses to provide requested materials to the OIG or otherwise fails to cooperate with the OIG, we will request that you immediately resolve the situation. Consistent with the Inspector General Act, we may report unresolved access matters to the administrator and to Congress.

We will post this memorandum on our public website at [www.epaoig.gov](http://www.epaoig.gov). Anyone with knowledge of potential fraud, waste, abuse, misconduct, or mismanagement related to this evaluation should contact the OIG Hotline at (888) 546-8740 or via an electronic form on the “OIG Hotline” [webpage](#).
