SUMMARY: MARCH 2008

AUG 18 2008

During the past year Rollinsford established a Water Quality Committee that collected water samples for test on Fresh Creek and its tributaries in the Town of Rollinsford. The Planning Board proposed an increase in setbacks for wet land and water bodies from 25 feet to 50 feet, which was passed at the March 2007 Town Meeting. The Highway Department continued its program of catch basin cleaning and repaired road washouts that occurred during high storm flows in the town. The need for more storm drains for existing homes with sump pumps built 60 years ago remains due to lack of funding sources. The slow rate of new building of homes in Rollinsford since 1990 has slowed to nearly a stop in the past year due to the decline in the housing market. Overall, the town has experienced few runoff or drainage problems during the past year.
