Part II. Self-Assessment

This year the Town experienced a transfer of leadership at the Public Works Department with the retirement of Everett “Bud” Jordan, the Public Works Director, and the hiring of Dennis G. McCarthy, as his replacement. Bud Jordan had singularly administered the MS4 permit program for the entire prior eight year term of the current permit duration. It is anticipated with new leadership in the Public Works Department, implementation or completion of many of the prior established objectives, and the anticipated new NPDES permit requirements the Town is well positioned to adequately address its future storm water management obligations.

During this eighth and hopefully final year of the current permit the Town has continued to minimize the impact of storm water runoff on the environment by accomplishing the following:

- Participate in two household hazardous waste collections.
- Substantially reduce the application of winter road sand.
- Fund the final phase of the storm water infrastructure date acquisition.
- Reduce the application of road salt by revising salt application procedures during snow & ice removal operations.
- Increase attendance and participation in the Seacoast Storm Water Coalition meetings.
- Continue its residential waste oil collection program.
- Fund the Fairhill Drainage Improvement project.
