

# Hold the Date(s) USEPA National HAB Program CyanoSymposium 2026

## Human and Animal Health Impacts of Cyanobacteria

March 16, 18, 23, & 25 from 1:00-5:00 p.m. EST

Please join us for EPA's Biennial Virtual CyanoSymposium. This year we take a deep dive into the effects of cyanobacteria and cyanotoxins on humans and other animals, especially domestic pets. Each of the four half-day virtual sessions of the CyanoSymposium will feature a mixture of academic, federal, state and tribal experts sharing different aspects of the science and management of cyanotoxin effects on health.

This year's CyanoSymposium was developed and is co-hosted alongside the US Centers for Disease Control and the US Food and Drug Administration.

### Please plan to join us

Detailed Webinar Information, Registration, and Agenda to Follow
