Part II. Self-Assessment

The Town of Essex continues our good housekeeping practices for our municipal operations. We annually sweep all public roads and clean all catch basins with assistance from outside contractors. Town personnel routinely check/repair catch basins as needed and inspect all outfalls. When drainage problems are encountered we use the town's vactor truck to alleviate such problems when needed. The Town of Essex new sewer collection system has been on line for almost 5 years now.

This year we hired Green Scapes North Shore Coalition to assist with public education, outreach, etc in the future. With the help of Coneco Engineers we now have a modern, updated outfall map of the town's stormwater system. Mass Highway continues their work on Route 133 upgrades on Main Street. This includes new drainage, seawalls, sidewalks, curbing, etc. and is scheduled to be completed in November 2011.

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

MEASURABLE GOALS

- SX1** – Distribute flyers with information about what hazardous waste day is about and what it hopes to accomplish. Post banners around town to inform the public of dates and locations.
- SX2** – Send out flyers with water bills informing the public of the benefits of water conservation.
- SX3** – Distribute flyers to home owners and business owners on the effects of fertilizers and chemical lawn and garden products.
- SX4** – Work with Elementary School to develop a classroom education program.
- SX5** – Work with local girl and boy scouts on a drain stenciling program.
- SX6** – Work with the Elementary School with poster drawing and getting the children out into Town to see where the drains start and where they end.
- SX7** – Add more programs to the current hazardous waste day to increase amounts of materials.
- SX8** – Work with Board of Health to make sure we are made aware of all failing septic systems.
- SX9** – Continue to issue permits for all connections to the Towns storm drain systems.
- SX10** – Continue with the current storm water sampling program implemented in 1996.
- SX11** – Periodic inspections of outfalls to determine if street sweeping and catch basin cleaning is adequate.
- SX12** – Work with Conservation Commission to ensure construction site inspections are being performed and that the contractors are maintaining all barriers.
- SX13** – Visually inspect construction site entrances and exits to ensure streets are clean.
- SX14** – Work with Conservation Commission to ensure correct and proper placement of silt fences.
- SX15** – Work with the Planning Board to look at alternative pavers as an option for developments.
- SX16** – Visually inspect catch basins on private roads and work with homeowners to develop a plan that addresses cleaning and maintenance.
- SX17** – Work with Planning Board to reduce the amount of street curbing used in new developments.
- SX18** – Build a truck wash bay for cleaning Town vehicles. The Town has completed a new highway garage.
- SX19** – Look at current street sweeping schedule and determine if it is adequate.
- SX20** – Look at current cleaning schedule and inspect basins in between cleanings to determine if it is adequate.
- SX21** – Repair broken drain lines and catch basins that may have collapsed.
- SX22** – Build a new salt storage facility. Complete.
- SX23** – Install a public sewer system. The Town of Essex has completed the process of installing a public sewer system.
