Re: Fort Mojave Smoke Shop Minor NSR Permit - Request for Termination
Source ID: 32
Permit #: C-2018-3

Dear Mr. Kennedy:

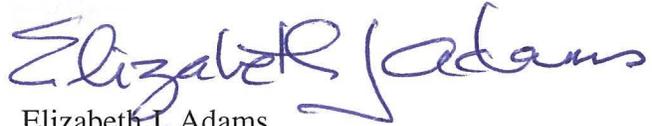

On May 30, 2019, the U.S. Environmental Protection Agency, Region 9 (EPA) received your request to terminate the Fort Mojave Smoke Shop (Facility) Minor New Source Review (NSR) Permit No. C-2018-3, issued under the Federal Indian Country Minor NSR program (40 CFR 49.151-161). The permit authorized the construction and operation of a soil vapor extraction (SVE) system with catalytic oxidation at the Facility, located within the Fort Mojave Indian Reservation near Mojave Valley, Arizona.

In your request, you stated that the Leaking Underground Storage Tank remedial activities at the Facility are completed. Your request included a letter from the EPA's Underground Storage Tanks Program determining that No Further Action was necessary at this time for the remediation project. In your 2018 annual compliance report dated February 20, 2019, you also stated that the Facility stopped operating the SVE system on October 9, 2018.

The EPA grants your request to terminate minor NSR permit No. C-2018-3. Please be aware that the existing gasoline dispensing facility must be registered under the Tribal Minor NSR program, as required by 40 CFR 49.151(c)(iii). The registration form is located at <https://www.epa.gov/caa-permitting/region-9-tribal-minor-nsr-form-existing-source-registration-form-reg>. A sample potential to emit calculator for gasoline dispensing facilities is located at <https://www.epa.gov/tribal-air/5-source-categories-gasoline-dispensing-facilities-final-rule>. Additionally, if in the future any new emissions units are installed at the existing facility, such installation may require a preconstruction permit under the tribal NSR rules.

If you have any questions, please contact Khoi Nguyen of my staff at (415) 947-4120 or nguyen.thien@epa.gov.

Sincerely,

Elizabeth J. Adams
Director, Air and Radiation Division
