7b. WLA Assessment

The S319 Grant was obtained by the Lake Boon Association and the Lake Boon Commission. The DPW has agreed to cooperate with both groups in helping to reduce phosphorus loading and other contaminants from entering Lake Boon. The Town as well as the two groups agreed that installing catch basin with leaching trenches were best because it will recharge the groundwater as well as stop direct discharge into the Lake. The two groups will be responsible for sampling pre and post construction runoff.
