## Part II. Self-Assessment

The Department of Correction (DOC) received correspondence from the Environmental Protection Agency (EPA) on May 28, 2004 determining the Notice of Intent (NOI) submission was administratively complete. From the time the NOI's were prepared and before they were submitted the DOC began a prioritization list of areas for investigation including but not limited to:

- Entry Points into the storm drainage system(s) maintained by the DOC.
- Documentation of discharges points on and off the DOC property.
- Coordination with Towns that are also MS4s
- Illicit connections identification (None were found).
- Investigation of infrastructure and identification of problem drainage areas.

Through the State of Massachusetts Clean State Program, an oil-water separator was installed to handle parking lot drainage. In summary, the storm drainage systems operated by the DOC are not combined systems where sewer and storm water are served by the same system.

In the past year no problems that required attention were identified. The facility has undertaken a regular inspection program to repair older catch basin structures.

The DOC completed construction of a "ground mounted photovoltaic system" during the last permit period. This construction was less than 18,500 square feet.

Many of the milestones and goals have been met – however, due to funding issues, others are still in progress.

## Part III. Summary of Minimum Control Measures

### 1. Public Education and Outreach

| BMP ID #                | BMP Description                            | Responsible Dept./Person Name | Measurable Goal(s)               | Progress on Goal(s) – Permit Year 6 (Reliance on non-municipal partners indicated, if any)                                                   | Planned Activities – Permit Year 7                               |

7b. WLA Assessment

#### Part IV. Summary of Information Collected and Analyzed

At the Framingham the location of the drain lines and outfall have been identified. The primary drainage system discharges into the storm drain system operated by the Town of Framingham. A secondary drainage area discharges into a manmade swale. The last year has been spent organizing information, compiling new information and sorting new information as it comes in. In summary, the DOC has a very good understanding of the drainage system and has taken the necessary steps to prevent pollution from entering the drain system. Cleaning which occurred over the past 10 months did not indicate that significant repairs or other drain maintenance was necessary. One catch basin was rebuilt due to other infrastructure repairs.

Inmate labor is used to pick up litter and other road side debris several times per year.

No illicit connections were found.

#### Part V. Program Outputs & Accomplishments (OPTIONAL)

##### Programmatic

|                                                |      |              |
|------------------------------------------------|------|--------------|
| Stormwater management position created/staffed | YES  | Staff by DRM |
| Annual program budget/expenditures             | (\$) |              |
|                                                |      |              |
|                                                |      |              |

##### Education, Involvement, and Training

|                                                                         |               |           |
