**Printed Name:** Greg Balukonis

**Title:** Town Administrator

**Date:** 5/4/2006

## Part II. Self-Assessment

The Town of North Reading has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions.

The schedule modifications for some of the best management practices (BMPs) include the following:

- BMPs 1A, 1B, 2A, and 2B (Public Education and Outreach and Public Involvement and Participation BMPs) - extended schedules through Permit Year 5. Town has met the original measurable goals; the Wastewater and Storm Water Advisory Committee (WSWAC) and/or local volunteer organizations (including the Reading/North Reading Stream Team and Martins Pond Association) continue to hold meetings and work on programs as specified in the Annual Report.
- BMP 3C (Ordinance development to prohibit non-storm water flows) - extended schedule through Permit Year 5. Bylaw expected to be presented at Fall 2006 Town Meeting.
- BMP 3D (Storm Water map development) - extended schedule through Summer 2005. Outfall mapping was finalized based on the completion of outfall assessments in Summer 2005.
- BMPs 4C, 4E, 5A, and 5B (Construction and Post Construction ordinance requirements) - extended schedule through Permit Year 5. Bylaw expected to be presented at Fall 2006 Town Meeting.
- BMPs 4D and 5C (BMP Manual/Handbook) - completed BMP Manual ahead of schedule in Summer 2005.
- BMPs 6A and 6C (Employee Training and Spill Response and Prevention) - completed employee training and Good Housekeeping Manual ahead of schedule in Permit Year 2.

As part of the Town's Storm Water Management Program, a comprehensive assessment of the Town-wide drainage system was conducted and summarized into a Storm Water Capital Improvement Program report. The CIP includes recommendations for long term operation and maintenance and capital improvement projects that are intended to address flooding problems and improve the water quality of waterbodies within the Town. These waterbodies include the impaired waterbodies (Ipswich River, Martins Brook, and Martins Pond) and the Skug River.

## Part III. Summary of Minimum Control Measures

### 1. Public Education and Outreach

| BMP ID #      | BMP Description                   | Responsible Dept./Person Name | Measurable Goal(s)                              | Progress on Goal(s) – Permit Year 3<br>(Reliance on non-municipal partners indicated, if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Planned Activities – Permit Year 4                                                                                          |
|---------------|-----------------------------------|-------------------------------|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| 1A<br>Revised | Two meetings with Town            | DPW/<br>M. Soraghan           | Hold a meeting on storm water in Town.          | WSWAC held several meetings to act as a forum for public input on storm water management issues in Town.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | WSWAC to continue to hold regular meetings to act as a forum for public input on storm water management issues in the Town. |
| 1B<br>Revised | Develop plan for public education | DPW/<br>M. Soraghan           | Identify and develop public education programs. | WSWAC implemented public education programs. Activities included: coordination with the Reading/North Reading Stream Team and the Martins Pond Association, development of public outreach materials including septic system brochures, local newspaper advertisements, storm water information and links on Martins Pond's website; and programs for storm drain stenciling and river clean-ups. Please refer to the attached document entitled "Martins Pond Assessment and Remediation Project Water Flow Improvements and Public Outreach Report", January 18, 2006, that includes a description of public education and outreach activities that the Martins Pond Reclamation Study Committee has been involved with. | Continue to coordinate public outreach activities.                                                                          |
| Revised       |                                   |                               |                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                             |

**7b. WLA Assessment**

#### Part IV. Summary of Information Collected and Analyzed

- The draft "Martins Pond Assessment and Remediation Project Diagnostic/Feasibility Study", November 5, 2005, by Merrimack College provides the first installment of a Diagnostic/Feasibility Study to continue water quality assessment work conducted on Martins Pond and assess potential nonpoint source pollution in the Martins Pond Watershed. Team members include the Town of North Reading, the Martins Pond Association, Malcolm Pirnie, Inc., and Merrimack College.

#### Part V. Program Outputs & Accomplishments (OPTIONAL)

##### Programmatic

|                                                |       |  |
|------------------------------------------------|-------|--|
| Stormwater management position created/staffed | (y/n) |  |
| Annual program budget/expenditures             | (\$)  |  |
|                                                |       |  |
|                                                |       |  |

##### Education, Involvement, and Training

|                                                                           |               |   |
|---------------------------------------------------------------------------|---------------|---|
| Estimated number of residents reached by education program(s)             | (# or %)      |   |
| Stormwater management committee established                               | (y/n)         | Y |
| Stream teams established or supported                                     | (# or y/n)    | Y |
| Shoreline clean-up participation or quantity of shoreline miles cleaned   | (y/n or mi.)  | Y |
| Household Hazardous Waste Collection Days                                 |               |   |
| <ul style="list-style-type: none"> <li>days sponsored</li> </ul>          | (#)           | 1 |

|                                        |  | (est. gpd) |                   |
| % of population on sewer               |  | (%)        | 1%                |
| % of population on septic systems      |  | (%)        | 99%               |
|                                        |  |            |                   |
|                                        |  |            |                   |

### Notes:

1. Based on available mapping of outfalls.
2. Updated based on revised mapping and outfall assessments conducted.
3. 100% of all new and existing outfalls have drainage plans filed with Town.
4. 100% correlates to the percentage of outfalls visited and GPS located.
