Part II. Self-Assessment

The Town of North reading has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions.

The schedule modifications based on the Year 3 Annual Report Schedule for some of the best management practices (BMPs) include the following:

- **BMP 3B and 3D (Illicit Discharge Detection and Elimination) – extended schedule through Permit Year 6. The Town is expected to investigate the 24 suspect outfalls found during the illicit connection identification program and identify the source of the connection based on recommended methods identified in the Town’s *Storm Water Capital Improvement Report*. The Town recently passed the Storm Water Management Bylaw that includes Article I, Non-Storm Water Discharges that gives the Town the authority to require residents and businesses to eliminate any illicit connections they have to the storm drainage system. The Town completed mapping of storm water system in Permit Year 3, and is expected to continue updating GIS as needed based on as-built submissions and field work through Permit Year 6.**
- **BMPs 4A and 4B (Construction Site Stormwater Runoff Control) and BMP 5D (Post-Construction Stormwater Management in New Development and Redevelopment) – extended schedules through Permit Year 6. Town has met the original measurable goals; the Storm Water Management Bylaw was approved at Fall 2006 Town Meeting and became effective March 1, 2007 with the Attorney General Office’s approval. The Bylaw identifies the Building Inspector to be the Enforcement Officer for Article II, Construction and Post Construction Storm Water Management of New Developments and Redevelopments. The Town is working towards finalizing the Rules and Regulations for Article II in Permit Year 6.**
- **BMPs 6B and 6D (Pollution Prevention and Good Housekeeping in Municipal Operations) – extended schedule through Permit Year 6. Since the Town purchased a mechanical sweeper in 2005, street sweeping occurs on a more frequent basis in prioritized areas and will continue through Permit Year 6. The Town is expected to solicit price quotes for purchasing a vactor truck in Permit Year 6, in addition to scheduling and prioritizing catch basin cleaning based on recommendations provided in the *Storm Water Capital Improvement Report*.**
