Part II. Self-Assessment

The City of Peabody has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions. It is anticipated that additional progress will be made as municipal budgets improve in FY08 and beyond.

Peabody has an extensive household hazardous waste program. Besides a once a year drop off, we collect waste oil, car batteries, propane tanks, computer monitors, refrigerators, televisions, computer units, air conditioners, and yard waste at all times throughout the year. From this program, we properly manage a number of toxic substances and enhance protection of stormwater quality. We also collect leaves curbside 12 weeks/year and provide drop off yard waste at all times throughout the year.

We sweep streets in the spring to remove sediment, thus improving runoff water quality. The City annually cleans about 2500 catch basins (of our 4500 total) to ensure water quality is met.

We also have minimized or eliminated the generation of hazardous waste at our DPW facilities to eliminate environmental impacts. Our vehicles are stored inside and are highly maintained, reducing leaks of fuel, hydraulic fluids, and other maintenance related toxic materials.

GIS Mapping upgrades are taking place for 100% mapping of Peabody's 8,000 drain structures. The work is part of our city wide structural and non structural BMP's GIS Program Upgrade. The completion of this mapping will improve the maintenance of the stormwater system. Peabody is 90% complete with this task.

The Friends of Peabody's Lakes are locally meeting monthly in order to focus on all Peabody water bodies in educating the public and improving water quality/recreational opportunities for Peabody's water ways. This group also conducts local sampling and shoreline clean ups.

Part IV. Summary of Information Collected and Analyzed

Peabody's information was collected through a number of City departments, local watershed organizations, associations and volunteers. In our new permit year the City will be collecting and analyzing basic water monitoring data from several stream, ponds and lakes throughout Peabody. Water sample training is provided for all participants.
