Part IV. Summary of Information Collected and Analyzed

So far, no illicit connections into the Town's MS4 have been found. The Town is better than 70% sewerage so many problems with grey water/waste water have been eliminated. One incident of motor oil being dumped into MS4 was discovered and abated.

100% of catch basins have been stenciled.

Erosion control is being enforced for all new construction.

Post-construction Management of Stormwater has been improved by steady maintenance of all detention/retention basins by Highway Department paid for by fund established in 1988. Developers pay a per lot fee to maintain all MS4 structures in new subdivisions.

Part V. Program Outputs & Accomplishments (OPTIONAL)

(Since beginning of permit coverage unless specified otherwise by a **, which indicates response is for period covering April 1, 2006 through March 31, 2007)
