Part II. Self-Assessment

The Town of Salisbury has had many budgetary limitations in the past several years. The Department of Public Works continues to have a realistic approach with dealing with Stormwater concerns. As indicated in Part III, the majority of our Year 2 goals were achieved or are presently being completed/implemented. Deviations from the proposed goals include:

1b - Monthly updates on the local access cable channel were not provided. Messages will be posted more regularly with pertinent Stormwater information.

1d - The town website is relatively new and quarterly updates where not realistic. The Town Manager and Director of Public Works propose to update the website with appropriate public information on an as needed basis, but at a minimum semi - annually.

2a - A Citizen Advisory Committee was proposed. However, volunteers were not found.

2b - Waste Oil Collection- The annual collection has been determined to provide the residents with a sufficient mechanism for disposal. Semi -annual collection will be reviewed, but at this time has been determined to not be needed

Part III. Summary of Minimum Control Measures

1. Public Education and Outreach

BMP ID #	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 2 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Permit Year 3

7b. WLA Assessment

Part IV. Summary of Information Collected and Analyzed

Six to eight outfall locations were sampled and analyzed by Merrimack Valley Planning Commission and volunteers from Eight Towns and a Bay. All sample results indicated bacteria results below thresholds.

Salisbury Beach area did not have any beach closures during season.
