Part II. Self-Assessment

The Town of Foxborough, MA has completed the required self-assessment and has determined that our municipality is in compliance with our permit conditions, except for the provisions shown below. The exceptions shown below refer to our Form BRP WM 08A and the BMP ID #'s in the Part D Storm Water Program Summary.

Part D.1 BMP ID #5 Educate Students & Adults. We have prepared a Household Hazardous Waste brochure that the School Department has handed out to all students in the Foxborough School system (preschool, K through 12) just prior to the April vacation. We also launched the Town wide web page this year and have the brochure shown on our page. We also advertise the event in the local newspapers, CATV, hang a large banner on our building, post the event on our local message board, post the event on Town of Foxborough Webpage and Twitter account. The brochure is available at Town Hall and the Library.
We continue to work with the Neponset River Watershed Association in continuation of their educational efforts in Town.

Part D.2 BMP ID#10 All new CB's have warning cast directly on structure, No Dumping Drains to Stream.

Part D.2 BMP ID#12 Staff was trained by Environmental Partners as part of a grant awarded to SERSG. The training will include both in the field staff and office staff.
The Neponset River Watershed Association has performed sampling and testing in Foxborough and this BMP should be evaluated and possibly revised to include their testing for adherence to the permit. Also, waiting for new NPDES permit with new requirements.

Inter Municipal Agreement was signed and in place July 1, 2014. This will allow for the expansion of the sewer treatment plant shared between Mansfield, Norton and Foxborough. Additional sewer capacity will be used for prevention and elimination of failing septic systems and potential for pollution entering storm water system.

Part III. Summary of Minimum Control Measures

7b. WLA Assessment

We will continue with program to install hoods on all new catch basins installed by the Highway Department. The Foxborough Highway Dept. also installs hoods in existing catch basins. This has been successful in improving stormwater quality. Our original Subdivision Control Regulations, enforcement of the state's Wetland Protection Act by the Conservation Commission, and our General Bylaws have been effective in improving the quality of stormwater runoff.

Water quality testing is being performed by the Neponset River Watershed Association and may be economically and technically advantageous to use this data.

Streets were swept using highway department staff. All streets in town were swept in the month of April.

Received a grant as part of South East Regional Services Group(SERSG). Working with Environmental Partners Group on education of Town staff.

Town Staff along with MAPC are working to update the Subdivision Rules and Regulations, including Low Impact Development, Stormwater Bylaw and Regulation. This work will continue in 2015 and be finalized after the new EPA permit is released.

Awaiting new NPDES permit for inclusion of any new requirements.
