Part II. Self-Assessment

Working with our engineers, CDM Smith, the Town prepared a village area stormwater evaluation report, conducted a village area building inspection program to locate private I & I sources and implemented a wet-weather sampling program which has been completed. In 2013, we submitted a grant application to the Buzzards Bay National Estuaries Program for dry weather sampling but were denied. We will continue to look for other possible grants and money to proceed with this program. Once funding is located, we plan to continue with a dry weather sampling at 15 outfalls within the village area and other areas of Town to characterize stormwater run-off during the year.

At the Annual Town Meeting in May 2013, we will be asking for funding for Phase 1A of the Five-Phase Capital Improvement Plan. Phase 1A will replace 4,500 feet of drains and two down-stream defenders to improve water quality in Sippican Harbor.
