

Year 7 Annual Report
Massachusetts Small MS4 General Permit
Reporting Period: July 1, 2024-June 30, 2025

Please DO NOT attach any documents to this form. Instead, attach all requested documents to an email when submitting the form. Also ensure any websites included on this form are to publicly accessible sites

Unless otherwise noted, all fields are required to be filled out. If a field is left blank, it will be assumed the requirement or task has not been completed. Please ONLY report on activities between July 1, 2024 and June 30, 2025 unless otherwise requested.

Part I: Contact Information

Name of Municipality or Organization:

EPA NPDES Permit Number:

Primary MS4 Program Manager Contact Information

Name:

Title:

Street Address Line 1:

Street Address Line 2:

City:

State:

Zip Code:

Email:

Phone Number:

Stormwater Management Program (SWMP) Information

SWMP Location (publicly available web address):

Date SWMP was Last Updated:

If the SWMP is not available on the web please provide the physical address:

Part II: Self-Assessment

First, in the box below, select the impairment(s) and/or TMDL(s) that are applicable to your MS4. Make sure you are referring to the most recent EPA approved Section 303(d) Impaired Waters List which can be found here: <https://www.epa.gov/tmdl/region-1-impaired-waters-and-303d-lists-state>

Impairment(s)

Bacteria/Pathogens Chloride Nitrogen Phosphorus
 Solids/ Oil/ Grease (Hydrocarbons)/ Metals

TMDL(s)

In State: Assabet River Phosphorus Bacteria and Pathogen Cape Cod Nitrogen
 Charles River Watershed Phosphorus Lake and Pond Phosphorus

Out of State: Bacteria/Pathogens Metals Nitrogen Phosphorus

Clear Impairments and TMDLs

Next, check off all requirements below that have been completed. **By checking each box you are certifying that you have completed that permit requirement fully.** If you have not completed a requirement leave the box unchecked. Additional information will be requested in later sections.

Year 7 Requirements

- Completed catchment investigations associated with Problem Outfalls
- Completed catchment investigations where information gathered on the outfall/interconnection indicated sewer input

Annual Requirements

- Provided an opportunity for public participation in review and implementation of SWMP and complied with State Public Notice requirements
- Kept records relating to the permit available for 5 years and made available to the public
- The SSO inventory has been updated, including the status of mitigation and corrective measures implemented
 - This is not applicable because we do not have sanitary sewer
 - This is not applicable because we did not find any new SSOs
 - The updated SSO inventory is attached to the email submission
 - The updated SSO inventory can be found at the following publicly available website:
https://www.foxboroughma.gov/departments/highway/stormwater_management
- Updated system map due in year 10 with information from completed catchment investigations
- Provided training to employees involved in IDDE program within the reporting period
- Properly stored and disposed of catch basin cleanings and street sweepings so they did not discharge to receiving waters

- All curbed roadways were swept at least once within the reporting period
- Enclosed all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Updated inventory of all permittee owned facilities as necessary
- O&M programs for all permittee owned facilities have been completed and updated as necessary
- Implemented all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implemented program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Inspected all permittee owned treatment structures (excluding catch basins)

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Bacteria/ Pathogens (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Annual Requirements

*Public Education and Outreach**

- Annual message was distributed encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
- Permittee or its agents disseminated educational material to dog owners at the time of issuance or renewal of dog license, or other appropriate time
- Provided information to owners of septic systems about proper maintenance in any catchment that discharges to a water body impaired for bacteria
- This is not applicable because there are no septic systems present

** Public education messages can be combined with other public education requirements as applicable (see Appendix F and H for more information)*

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Phosphorus (Combination of Impaired Waters Requirements and TMDL Requirements as Applicable)

Annual Requirements

*Public Education and Outreach**

- Distributed an annual message in the spring (April/May) encouraging the proper use and disposal of grass clippings and encouraging the proper use of slow-release and phosphorus-free fertilizers

- Distributed an annual message in the summer (June/July) encouraging the proper management of pet waste, including noting any existing ordinances where appropriate
 - Distributed an annual message in the fall (August/September/October) encouraging the proper disposal of leaf litter
- * Public education messages can be combined with other public education requirements as applicable (see Appendix H and F for more information)*

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

- Increased street sweeping frequency of all municipal owned streets and parking lots subject to Permit part 2.3.7.a.iii.(c) to a minimum of two times per year (spring and fall)

Structural BMPs

- Installed a structural BMP as a demonstration project within the drainage area of the water quality limited water or its tributaries. The type of BMP installed is (e.g. biofiltration):

- Any structural BMPs already existing or installed in the regulated area by the permittee or its agents was tracked and the phosphorus removal by the BMP was estimated consistent with Attachment 3 to Appendix F. The BMP type, total area treated by the BMP, the design storage volume of the BMP, and the estimated phosphorus removed in mass per year by the BMP were documented.

- No BMPs were installed
- The above referenced BMP information is attached to the email submission
- The above referenced BMP information can be found at the following publicly available website:

https://www.foxboroughma.gov/departments/highway/stormwater_management

Total estimated phosphorus removed in lbs/year from the installed BMPs: 0

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Solids, Oil and Grease (Hydrocarbons), or Metals

Annual Requirements

Good Housekeeping and Pollution Prevention for Permittee Owned Operations

- Increased street sweeping frequency of all municipal owned streets and parking lots to a schedule that targets areas with potential for high pollutant loads
 - The street sweeping schedule is attached to the email submission
 - The street sweeping schedule can be found at the following publicly available website:

https://www.foxboroughma.gov/departments/highway/stormwater_management

- Prioritized inspection and maintenance for catch basins to ensure that no sump shall be more than 50 percent full; Cleaned catch basins more frequently if inspection and maintenance activities indicated excessive sediment or debris loadings

Optional: If you would like to describe progress made on any incomplete requirements listed above or provide any additional details, please use the box below:

Optional: Use the box below to provide any additional information you would like to share as part of your self-assessment:

Part III: Receiving Waters/Impaired Waters/TMDL

Have you made any changes to your lists of receiving waters, outfalls, or impairments since the NOI was submitted?

- Yes
 No

If yes, describe below, including any relevant impairments or TMDLs:

We have updated our Stormwater Management Program to reflect the Massachusetts Year 2016 Integrated List of Waters, approved December 2019. The new list identified changes in impairments and segmentation. The added and removed impairments to categories 4 and 5 waters are identified in Appendices 2 and 3 of the 2016 list. An abridged table of relevant receiving waters with updated impairments has been added to the page 5 of the SWMP. An example of one such change is the Neponset River (73-01) which added: DDT IN Fish Tissue, Nutrient/Eutrophication Biological Indicators and removed: DDT, Excess Algal Growth, Sedimentation/Siltation, TSS, Turbidity.

Part IV: Minimum Control Measures

Please fill out all of the metrics below. If applicable, include in the description who completed the task if completed by a third party.

MCM1: Public Education

Number of educational messages completed during this reporting period: 0

Below, report on the educational messages completed during this reporting period. For the measurable goal(s) please describe the method/measures used to assess the overall effectiveness of the educational program.

BMP:1. Maintain Educational Website

Message Description and Distribution Method:

Maintained a comprehensive educational website to serve the Neponset Stormwater Partnership service area as a primary resource for key information for all four target audiences (<https://yourcleanwater.org>).

Targeted Audience: Residents, Businesses, Industry, and Developers

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

This year there were 22,477 page views and 5,164 total users

Message Date(s): July 2024- June 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:2. Operate Stormwater Hotline

Message Description and Distribution Method:

Operated a regional "stormwater hotline" to field questions and reports regarding stormwater management issues from across the region. Reports were collected via a website form, email submissions to stormwater@neponset.org, and phone calls to 781-575-0354 x 300. Responses to reports included answers to questions, additional information, follow up investigation, and/or referral of inquiries/reports to the appropriate municipal departments. Anonymity of inquires was maintained as requested.

Targeted Audience: Residents, Businesses, Industry, and Developers

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

A Foxborough resident reached out regarding stormwater flow onto her property after new paving in Foxborough.

Concern was relayed to Foxborough DPW who stated staff would investigate.

Message Date(s): July 2024

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP: 3. Distribute Pet Waste Information with Dog Licenses

Message Description and Distribution Method:

Educational "rack cards" and flyers on proper pet waste disposal were printed and provided to town clerks' offices in member towns to distribute with dog licenses, either in person or via mail. An example of the pet waste rack card is provided in Appendix 1 of NSP Annual Report.

Targeted Audience: Residents

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

All Towns participated in pet waste messaging. A total of 12,000 cards were distributed through Town Clerk offices in partner towns. This strategy is estimated to have reached the entire population of licensed dog owners in participating towns.

Message Date(s): Materials were distributed to Town Clerks' offices in January 2025 & distributed with dog licenses throughout the year.

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:4. Summer Pet Waste Campaign

Message Description and Distribution Method:

Prepared and published an educational campaign on proper disposal of pet waste. The campaign was distributed both as individual social media posts through the Neponset River Watershed Association's Facebook, Instagram, LinkedIn and X (formerly Twitter) accounts and as a single paid Facebook/Instagram advertisement which ran from July 9 to August 12 in certain areas. Member communities were invited to further distribute the message using whatever methods were available to them such as reposting to their own

social accounts.

Targeted Audience: Residents, Businesses, and Industry

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

Two social media posts were distributed with each Town/City's social media accounts tagged for ease of re sharing. Analytical data for each post may be found at Table-2 of NSP Annual Report.

For those communities who shared on their city/town accounts, this has been documented in Table-7 of NSP Annual Report.

NSP communities who participated in paid social media advertising reached 309,902 accounts. For further details see Table-8 of NSP Annual Report.

Message Date(s): July 2024

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:5. Fall Leaf Campaign

Message Description and Distribution Method:

Prepared and published educational campaign about the proper disposal of leaf litter and yard waste. The campaign was distributed both as individual social media posts through the Neponset River Watershed Association's Facebook, Instagram, LinkedIn and X (formerly Twitter) accounts and as a single paid Facebook/Instagram advertisement which ran in October 2024. An example may be seen at Appendix 2. Member communities were invited to supplement the message distribution using any methods available to them.

Additionally, physical flyers with similar information were printed and hung in each member community's Library, Recreation Department, Town Hall, and Council on Aging. Where community boards weren't available in certain locations additional flyers were given to the Board of Health or Conservation Commissions.

Targeted Audience: Residents, Businesses, and Industry

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

Three social media posts were distributed with each Town/City's respected social media accounts tagged for ease of resharing. Analytical data for each post are detailed in Table 3.

For those communities who shared on their city/town accounts, this has been documented in Table 7.

NSP communities who participated in paid social media advertising reached 375,098 accounts. For further

Message Date(s): October 2024

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:6. Spring Fertilizer and Grass Clipping Campaign

Message Description and Distribution Method:

Prepared and published educational campaign about the proper use of fertilizer and treatment of grass clippings. The campaign was distributed both as individual social media post through the Neponset River Water shed Association's Facebook, Instagram, LinkedIn, Blue Sky, and X (formerly Twitter) accounts and as a single paid Facebook/Instagram advertisement which ran in March-April 2025 in certain areas. An example may be seen at Appendix 3. Member communities were invited to further distribute the message using whatever methods were available to them.

Targeted Audience: Residents, Businesses, and Industry

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

One social media post was distributed with each Town/City's respected social media accounts tagged for ease of resharing. Analytical data for each post are detailed in Table 4.

For those communities who shared on their city/town accounts, this has been documented in Table 7.

NSP communities who participated in paid social media advertising reached 424,335 accounts. For further details see Table 8.

Message Date(s): April 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:7. Outreach to Septic System Owners

Message Description and Distribution Method:

Prepared and published educational information about proper maintenance of septic systems. The information was distributed through NepRWA's Facebook, Instagram, LinkedIn and X (formerly Twitter) accounts. Six posts were designed to coordinate with the U.S. EPA's SepticSmart Week in the month of September 2024 and included EPA-developed graphics and language that were translated in both English and Spanish. An

example may be seen at Appendix 4.

Targeted Audience: Residents and Businesses

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

Social media posts were distributed with each Town/City’s respective social media accounts and tagged for ease of resharing. Analytical data for these posts are detailed in Table 5.

Message Date(s): September 2024

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:8. Deicing

Message Description and Distribution Method:

Prepared and published three educational messages about best practices for deicing during the winter. The message was distributed as individual social media posts through NepRWA’s Facebook, Instagram, LinkedIn, Bluesky, and X (formerly Twitter) accounts. An example may be seen at Appendix 5. Member communities were invited to further distribute the message using whatever methods were available to them

Targeted Audience: Residents and Businesses

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

One social media posts was distributed with each Town/City’s respective social media accounts tagged for ease of resharing. Analytical data for post are detailed in Table 6.

Message Date(s): January/February 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:9. School Outreach Program

Message Description and Distribution Method:

During the 2024-2025 school year, in person lessons took place in grade 5 classrooms. The program focused on drinking water, local water resources, water conservation, stormwater infrastructure, impact of climate

change on stormwater and water resources, and stormwater pollution prevention techniques. The curriculum aligned with the MA 5th grade science curriculum standards. Information was presented using a PowerPoint presentation personalized for each town and school, a groundwater model, an Enviroscape model, and additional hands-on activities.

The program was delivered at the individual classroom level by a watershed educator over the course of one visit (stormwater only: Norwood, Quincy, Westwood) or two visits (Canton, Dedham, Foxborough, Medfield, Milton, Randolph, Sharon, Stoughton, and Walpole). Each visit took approximately 60 minutes. The educator also provided teachers with related classroom resources, which can be found in Appendix 6, including links to activities, interactives, videos and books, as well as follow-up brochures for students to share and spur conversations with their families. Copies of the Water Conservation and Stormwater presentations are available upon request.

In addition to the grade 5 programs, a one day 3-hour water program was presented at Westwood High School to a classroom of mixed-grade students who were participating in a weeklong end-of-the-year seminar called "Waterworld".

Targeted Audience: Residents

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

During the 2024-2025 school year a total of 164 classrooms were visited, representing an estimated 3,300 families. (56 classes were visited once and 108 classrooms were visited twice for a total of 272 classroom visits). Feedback from teachers was strongly positive for the in-person presentations and follow-up materials. Results are available upon request.

Message Date(s): September 2024 through June 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:10. Educational Outreach Evaluation

Message Description and Distribution Method:

Two surveys were conducted to establish a baseline prior to a winter stormwater pollution message and evaluate educational reach after the educational campaign. The first survey resulted in over 320 responses but after examining the responses it was clear that the survey had been hacked. An estimated 40 responses seemed to be authentic.

An email went out to the 40 authentic respondents with a post survey to which there were 16 responses.

Targeted Audience: Residents, Businesses, and Industry

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

Unfortunately, the 16 respondents for both surveys failed to answer all of the questions in the second survey, so results could not be compared. NSP staff will reevaluate and optimize for the next survey

Message Date(s): June 2024

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:11. Developer/Construction Outreach

Message Description and Distribution Method:

All Towns who participate in the Neponset Stormwater Partnership offer online building or stormwater permitting. A digital stormwater pollution prevention brochure aimed at developer/construction audiences was distributed to all permittees to be placed on their Town websites. The brochures include a QR code that links to the NSP website with additional resources including training workshops for Developer/Construction audiences and printable copies of the brochure. A copy may be found in Appendix 7.

Additionally, one social media message with similar information was prepared and distributed in April 2025. The message was distributed as an individual social media post through the Neponset River Watershed Association’s Facebook, Instagram, LinkedIn, BlueSky and X (formerly Twitter) accounts. Member communities were invited to further distribute the message using whatever methods were available to them.

Targeted Audience: Developer

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

One social media post was distributed with each Town/City’s respected social media accounts tagged for ease of resharing. Analytical data for the post are detailed in Table 9.

Message Date(s): Spring 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:12. Industrial Outreach

Message Description and Distribution Method:

Prepared and published educational campaign concerning stormwater best management practices geared

towards those in the industrial and commercial sectors in member Towns. The campaign was distributed both as individual social media posts through the Neponset River Watershed Association's Facebook, Instagram, LinkedIn, BlueSky, and X (formerly Twitter) accounts and as a single paid Facebook/Instagram advertisement which ran in April-May 2025 in certain areas. Member communities were invited to further distribute the message using whatever methods were available to them. An example may be seen at Appendix 8.

Targeted Audience: Industry

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

One social media post was distributed with each Town/City's respected social media accounts tagged for ease of resharing. Analytical data for each post are detailed in Table 10.

For those communities who shared on their city/town accounts, this has been documented in Table 7.

All NSP communities participated in one paid social media advertising campaign that reached 99,896 accounts. Additionally, the paid advertisement utilized the detailed targeting feature on META and was able to target employers, those with job titles, and accounts who had interest in various industrial fields. For further details see Table 8.

Message Date(s): Spring 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:13. Stormwater Education Presentations

Message Description and Distribution Method:

Delivered several stormwater-related presentations to various groups of residents. At these events, residents received basic information on stormwater pollution and tips to prevent it around their own residences and places of business.

Targeted Audience: Residents

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

The following presentations on stormwater awareness, pollution prevention, and climate impacts to stormwater occurred this year:

- May 2, 2025 From Roofs to Rivers: A Watershed Perspective on RDA (presented at the Stormwater Summit of the Environmental Business Council of New England)
- January 16, 2025 MS4 101 presentation at a public webinar hosted by NepRWA, CRWA and MyRWA
- December 10, 2024 Public presentation at the Mother Brook Community Arts in Dedham in partnership with the Mother Brook Neighborhood Association
- November 20, 2024 Building Resilience (with an emphasis on climate-driven stormwater pollution and flooding) presented to the Noanett Garden Club

- October 23, 2024 Presentation given to the general public at the Milton Public Library in partnership with the Milton Garden Club
- October 20, 2024 Friends of Wollaston Beach Annual Meeting (emphasis on stormdrain impacts to swimmable water quality and beach trash) presented to Friends of Wollaston Beach
- October 15, 2024, Presentation to the Dedham Water Resources Committee
- October 9, 2024 Presentation to residents of the Baker Square Condominium Association

Message Date(s): July 2024 through June 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:14. Regional Water Quality Forum

Message Description and Distribution Method:

Organized a public presentation on data from the 2024 Volunteer Water Quality Monitoring Program on March 6th, 2025 (MCM 1: Public Participation BMP 2). The presentation covered the results from the 2024 sampling season and how they fit into the broader context of long-term water quality trends in the watershed. Also discussed were remaining challenges facing various waterways in the Watershed, and actions individuals can take to address those challenges. In addition, X-Cel Adult Education program coordinator Lisa Holden gave a presentation on X-cel’s wastewater training program and surface water quality data collection with NepRWA. To expand the potential audience, the event was held in a hybrid model, both in person at the Canton Library and live via Zoom. Additionally, a recording of the presentation was posted to the NepRWA website and YouTube.

Results from 2023 and 2024 water quality seasons were also used to generate Boston Harbor report cards (with the Charles River Watershed Association, Mystic River Watershed Association, and EPA). River segments were graded on how well they met bacteria swimming and boating standards. An event was held August 23, 2024 in Medford, MA with all 3 watershed associations, with remarks from the mayors of Medford and Malden, as well as EPA Region 1 Water Division Director Ken Moraff, Mass Exec. Office of Energy and Env. Affairs undersecretary Stephanie Cooper, MassDEP Deputy Commissioner John Beling, MassDCR Deputy Chief Engineer Rob Lowell, MWRA Exec. Director Fred Laskey, Mashpee Wampanoag Tribal Member Hartman Deetz, and Empowering People for Inclusive Communities service warrior Jacob Costly-Jeong. A second event for the 2024 season was held June 17, 2025 in Hyde Park, Boston. Again, all 3 watershed associations and MWRA Executive Director Laskey were in attendance, along with Ken Moraff of EPA, MassDEP Commissioner Bonnie Heiple, State Representative Robert Consalvo, and Massachusetts Rivers Alliance Policy Director Heather Clish

Targeted Audience: Residents

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

There were more than 90 registrants for the Regional water quality forum event across both in-person and Zoom. Additionally, a recording of the presentation was uploaded to NepRWA’s YouTube channel, and included on the NepRWA website where it has received 21 views to date. The report card events were

attended by several media outlets and state and federal agency staff, with the results covered by WGBH, WBUR, the Boston Globe, and the Dorchester Reporter among others.

The report card events were attended by several media outlets and state and federal agency staff, with the results covered by WGBH, WBUR, the Boston Globe, and the Dorchester Reporter among others.

Message Date(s): August 23, 2024 and June 17, 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

BMP:15. Regional Water Quality Data Reports and Press Releases

Message Description and Distribution Method:

Organized data from the 2024 (May-October 2024) Volunteer Water Quality Monitoring Programs (Public Participation BMP 2) into town-specific reports and press releases. These materials were provided to participating towns to aid in the dissemination of the results of the water quality monitoring program to residents and/or the media. Years are offset, as data collected in 1 year (e.g. 2024) are analyzed and reported in the following year (i.e. 2025). Reports and press releases are available on the NSP website and available upon request.

Targeted Audience:

Responsible Department/Parties: Neponset Stormwater Partnership

Measurable Goal(s):

A report and press release were each prepared for the 6 participating towns (Canton, Dedham, Foxborough, Milton, Walpole, and Westwood). A draft summary press release, with NepRWA staff comments and municipal staff quotes were provided to relevant town officials for review and will be distributed to media once approved.

Message Date(s): June/July 2025

Message Completed for: Appendix F Requirements Appendix H Requirements

Was this message different than what was proposed in your NOI? Yes No

If yes, describe why the change was made:

Add an Educational Message

MCM2: Public Participation

Describe the opportunity provided for public involvement in the development of the Stormwater Management Program (SWMP) **during this reporting period:**

SWMP, annual report, and other associated information is posted on town website for download and viewing.

Was this opportunity different than what was proposed in your NOI? Yes No

Describe any other public involvement or participation opportunities conducted **during this reporting period:**

Public Involvement and Participation BMP PP1: Public Availability of NSP SWMP

Description: The NSP SWMP is available at YourCleanWater.org/SWMP.

Public Involvement and Participation BMP PP2: Operate Stormwater Hotline

Description: See BMP EO2 ([click here](#)).

Public Involvement and Participation BMP PP3: Community River Clean Ups

Description: Organized volunteer-based river cleanup events with sites throughout the watershed on September 28, 2024, and April 26, 2025. At the fall event, more than 250 volunteers worked at 12 locations to remove an estimated 200 bags of trash and other large debris from various waterways, parks, and wetlands. The spring event had 14 locations with approximately 150 volunteers to remove an estimated 200 bags of trash.

Public Involvement and Participation BMP PP4: Volunteer Water Quality Monitoring Program

Description: Organized a volunteer-based water quality monitoring program with 41 sites located throughout the Neponset River Watershed. Approximately 60 volunteers are involved in the program, and it is operated under the terms of a MassDEP-approved QAPP. The results are used to more meaningfully engage the public in the health of local waterways and the implementation of the MS4 program, to inform municipal IDDE efforts, to track overall progress in improving stream health and attaining designated uses throughout the watershed, and to provide local data that provides context for public outreach and education programs. Collected data is also used to calculate annual report card grades for water quality in the Neponset based on E. coli levels and swimming and boating criteria compliance rates. Participating municipalities also receive Town-specific annual reports regarding the waterways in their jurisdiction. In 2025, locations were revised to allow more actionable monitoring of ponds for eutrophication by monitoring chlorophyll and phosphorus, so as to better assist with potential nutrient impairment decision-making. Additional sampling was conducted in Milton, Walpole, Sharon, and Boston as part of a collaboration with X-Cel Adult Education.

Public Involvement and Participation BMP PP5: Regional Water Quality Forum

Description: See Public Education and Outreach BMP EO14.

Public Involvement and Participation BMP PP6: Stormdrain Marking

No reportable activities were conducted during FY25

MCM3: Illicit Discharge Detection and Elimination (IDDE)

Sanitary Sewer Overflows (SSOs)

Check off the box below if the statement is true.

- This SSO section is NOT applicable because we DO NOT have sanitary sewer

Below, report on the number of SSOs identified in the MS4 system and removed during this reporting period.

Number of SSOs identified: 1

Number of SSOs removed: 1

MS4 System Mapping

Percent of Phase II map complete: 100

Optional: Provide additional status information regarding your map:

MS4 System Map is being maintained and continually updated by Town's GIS Specialist.

Screening of Outfalls/Interconnections

If conducted, please submit any outfall monitoring results from this reporting period. Outfall monitoring results should include the date, outfall/interconnection identifier, location, weather conditions at time of sampling, precipitation in previous 48 hours, field screening parameter results, and results from all analyses. Please also include the updated inventory and ranking of outfalls/interconnections based on monitoring results.

- No outfalls were inspected
- The above referenced outfall screening data is attached to the email submission
- The above referenced outfall screening data can be found at the following publicly available website:

http://foxboroughma.gov/departments/highway/stormwater_management

Below, report on the number of outfalls/interconnections screened during this reporting period.

Number of outfalls screened: 0

Below, report on the percent of outfalls/interconnections screened to date.

Percent of outfalls screened: 100

Optional: Provide additional information regarding your outfall/interconnection screening:

Catchment Investigations

If conducted, please submit all data collected during this reporting period as part of the dry and wet weather investigations. Also include the presence or absence of System Vulnerability Factors for each catchment.

- No catchment investigations were conducted
- The catchment investigation data is attached to the email submission
- The catchment investigation data can be found at the following publicly available website:

Below, report on the number of catchment investigations completed during this reporting period.

Number of catchment investigations completed this reporting period:

Below, report on the percent of catchments investigated to date.

Percent of total catchments investigated:

Optional: Provide any additional information for clarity regarding the catchment investigations below:

IDDE Progress

If illicit discharges were found, please submit a document describing work conducted over this reporting period, and cumulative to date, including location source; description of the discharge; method of discovery; date of discovery; and date of elimination, mitigation, or enforcement OR planned corrective measures and schedule of removal.

- No illicit discharges were found
- The illicit discharge removal report is attached to the email submission
- The illicit discharge removal report can be found at the following publicly available website:

Below, report on the number of illicit discharges identified and removed, along with the volume of sewage removed during this reporting period.

Number of illicit discharges identified:

Number of illicit discharges removed:

Estimated volume of sewage removed: gallons/day

Below, report on the total number of illicit discharges identified and removed to date. At a minimum, report on the number of illicit discharges identified and removed since the effective date of the permit (July 1, 2018).

Total number of illicit discharges identified:

Total number of illicit discharges removed:

Optional: Provide any additional information for clarity regarding illicit discharges identified, removed, or planned to be removed below:

Employee Training

Describe the frequency and type of employee training conducted **during this reporting period:**

No additional training performed during this reporting period.

MCM4: Construction Site Stormwater Runoff Control

Below, report on the construction site plan reviews, inspections, and enforcement actions completed during this reporting period.

Number of site plan reviews completed: 16

Number of inspections completed: 970

Number of enforcement actions taken: 0

Optional: Enter any additional information relevant to construction site plan reviews, inspections, and enforcement actions:

Primary site plan review is outsourced to third party engineering firm, but all Town departments are still provided the opportunity to comment on proposals.

Publics Works and Conservation conduct routine site visits of on going construction projects at least 3 to 5 times per week to evaluate compliance.

MCM5: Post-Construction Stormwater Management in New Development and Redevelopment

As-built Drawings

Below, report on the number of as-built drawings received during this reporting period.

Number of as-built drawings received: 0

Optional: Enter any additional information relevant to the submission of as-built drawings:

Planning Department retains as-built plans for subdivisions and other redevelopment projects. DPW maintains as-builts for public infrastructure projects.

Street Design and Parking Lots Report

Below, describe any changes made or planned to be made to local regulations and guidelines based on the report completed in Year 4:

No change at this time.

Green Infrastructure Report

Below, describe progress towards making green infrastructure practices allowable based on the report completed in Year 4:

No change at this time.

Retrofit Properties Inventory

Below, list remaining permittee-owned properties that could be modified or retrofitted with BMPs to mitigate impervious areas (must maintain a minimum of 5 sites in inventory until less than 5 sites remain):

- East Street and Cocasset Street Intersection Redesign
- 90 North Carl Annon Court
- Payson Road Athletic Complex - North Parking Lot
- Payson Road Athletic Complex - South Parking Lot
- Payson Road Athletic Complex - Ernie George Field
- Kersey Point Conservation Area
- Sunset Estates
- Igo Elementary School
- Council on Aging
- Lane Homestead Conservation Area
- Cocasset Street Underpass Drainage

Below, list all properties that have been modified or retrofitted with BMPs to mitigate impervious area that were inventoried as part of 2.3.6.d of the permit and the type of BMP(s) implemented. Non-MS4 owned properties that have been modified or retrofitted with BMPs to mitigate impervious area may also be listed, but must be indicated as non-MS4.

- Edwards Roads Boat Ramp (Jellyfish Filters)
- Foxborough Regional Charter School

MCM6: Good Housekeeping

Catch Basin Cleaning

Below, report on the number of catch basins inspected and cleaned, along with the total volume of material removed from the catch basins during this reporting period.

Number of catch basins inspected: 2,235

Number of catch basins cleaned: 2,235

Total volume or mass of material removed from all catch basins: 6,500 cubic feet

Below, report on the total number of catch basins in the MS4 system.

Total number of catch basins: 2,235

If applicable:

Report on the actions taken if a catch basin sump is more than 50% full during two consecutive routine inspections/cleaning events:

Street Sweeping

Report on street sweeping completed during this reporting period using one of the three metrics below.

Number of miles cleaned: 188

Volume of material removed: [Select Units]

Weight of material removed: [Select Units]

Stormwater Pollution Prevention Plan (SWPPP)

Below, report on the number of site inspections for facilities that require a SWPPP completed during this reporting period.

Number of site inspections completed: 0

Describe any corrective actions taken at a facility with a SWPPP:

Department of Public Works is inspected quarterly. Remaining issues are inherent to outdated facility design. DPW building expansion with stormwater upgrades including dedicated vehicle wash facility, is expected to be completed in December 2025.

Additional Information

Monitoring or Study Results

Results from any other stormwater or receiving water quality monitoring or studies conducted during the reporting period not otherwise mentioned above, where the data is being used to inform permit compliance or permit effectiveness must be attached.

- Not applicable
- The results from additional reports or studies are attached to the email submission
- The results from additional reports or studies can be found at the following publicly available website(s):

https://www.foxboroughma.gov/departments/highway/stormwater_management

If such monitoring or studies were conducted on your behalf or if monitoring or studies conducted by other entities were reported to you, a brief description of the type of information gathered or received shall be described below:

Additional Information

Enter any additional information relevant to your stormwater management program implementation during the reporting period. Include any BMP modifications made by the MS4 if not already discussed above.

Year 8

Activities Planned for Next Reporting Period

Please confirm that your SWMP has been, or will be, updated to comply with all applicable permit requirements including but not limited to the year 8 requirements summarized below. (Note: impaired waters and TMDL requirements are not listed below)

Yes, I agree

Annual Requirements

- Annual report submitted and available to the public
- Annual opportunity for public participation in review and implementation of SWMP
- Keep records relating to the permit available for 5 years and make available to the public
- Properly store and dispose of catch basin cleanings and street sweepings so they do not discharge to receiving waters
- Annual training to employees involved in IDDE program
- Update inventory of all known locations where SSOs have discharged to the MS4
- Continue public education and outreach program
- Update outfall and interconnection inventory and priority ranking and include data collected in connection with the dry weather screening and other relevant inspections conducted
- Implement IDDE program
- Review site plans of construction sites as part of the construction stormwater runoff control program
- Conduct site inspection of construction sites as necessary
- Inspect and maintain stormwater treatment structures
- Log catch basins cleaned or inspected
- Sweep all curbed streets at least annually
- Continue investigations of catchments associated with Problem Outfalls
- Implemented SWPPPs for all permittee owned or operated maintenance garages, public works yards, transfer stations, and other waste handling facilities
- Review inventory of all permittee owned facilities in the categories of parks and open space, buildings and facilities, and vehicles and equipment; update if necessary
- Review O&M programs for all permittee owned facilities; update if necessary
- Implement all maintenance procedures for permittee owned facilities in accordance with O&M programs
- Implement program for MS4 infrastructure maintenance to reduce the discharge of pollutants
- Enclose all road salt storage piles or facilities and implemented winter road maintenance procedures to minimize the use of road salt
- Review as-built drawings for new and redevelopment to ensure compliance with post construction bylaws, regulations, or regulatory mechanism consistent with permit requirements
- Inspect all permittee owned treatment structures (excluding catch basins)
- Identify additional permittee-owned properties that could potentially be modified or retrofitted with BMPs to reduce impervious areas so that the permittee maintains a minimum of 5 sites in their inventory, until such a time when the permittee has less than 5 sites remaining

Provide any additional details on activities planned for permit year 8 below:
