

REGION 10
SEATTLE, WA 98101

July 29, 2026

Paul Turner, President
Turners, Inc.
158 Lukes Gulch
Grangeville, Idaho 83530

Dear Mr. Turner:

This letter approves the Request for Coverage under the General Air Quality Permit for New or Modified Minor Source Stone Quarrying, Crushing, and Screening facilities in Indian Country (SQCS General Permit) submitted by Turners, Inc. on April 6, 2026, and found as complete on July 27, 2026, pursuant to the Clean Air Act Tribal Minor New Source Review Program. The project for which SQCS General Permit coverage is sought by Turners, Inc. is the construction and operation of a synthetic minor SQCS plant located within Indian Country within the exterior boundaries of the Nez Perce Reservation (the Project).

Permittee: Turners, Inc.
158 Lukes Gulch
Grangeville, Idaho 83530

Location: Riener Pit
Old Highway 95
Ferdinand, Idaho 83526
Idaho County
Nez Perce Reservation

Permit #: R10-NSR-GP-2026-01

Determination

The U.S. Protection Agency, Region 10 carefully reviewed Turners, Inc.'s Request for Coverage and other relevant information to determine whether the Project met all the criteria to qualify for coverage under the SQCS General Permit. Based on our review of, and reliance on, all of the

information and representations provided in the Request for Coverage and other information originally submitted by Turners, Inc., as well as other relevant information, Region 10 determined that the Project met all such criteria and was eligible for coverage under the SQCS General Permit.¹ Accordingly, pursuant to 40 CFR 49.156(e), Region 10 approves the Request for Coverage for the Project.

This Approval and the SQCS General Permit authorize the Permittee to construct and operate the Project at the Riener Pit location listed above. The Permittee is subject to Version 1.0 of the SQCS General Permit, a copy of which is enclosed.² The analysis and basis for Region 10's determination is discussed in more detail in the enclosed Technical Support Document for this action.

All notifications and reports required by the SQCS General Permit can be sent electronically using EPA's Compliance and Emissions Data Reporting Interface. CEDRI can be accessed through the EPA's Central Data Exchange at <https://cdx.epa.gov/>. First-time users will need to register with CDX. If no specific reporting option is available in CEDRI, select "Other Report." If the system is unavailable or assistance is needed, please contact the EPA Region 10's Enforcement and Compliance Assurance Division at (206) 553-1200.

For any documents or information that contain Confidential Business Information or cannot otherwise be submitted via CEDRI, submit materials to EPA Region 10 at the following address:

Clean Air Act Compliance Manager
U.S. EPA – Region 10, 20-C04
1200 Sixth Avenue, Suite 155
Seattle, WA 98101-3123

This Approval of Request for Coverage must be posted prominently at the location of operation (Riener Pit, near Ferdinand, Idaho). Each affected emissions unit and any associated air pollution control technology will be referenced by and should be labeled with the applicable identification number listed below:

¹ Region 10 has determined that the company has provided information demonstrating that it has met the listed species and historic properties eligibility criteria in the SQCS General Permit, as discussed in the Technical Support Document.

² The SQCS General Permit is available at https://www.epa.gov/sites/default/files/2016-05/documents/stonequarryingpermit_final.pdf and a copy of this Approval will be posted on Region 10's website at <http://www.epa.gov/caa-permitting/air-permits-issued-epa-region-10>.

**Turners, Inc. SQCS Plant – Riener Pit, Nez Perce
Reservation
Affected Emission Units Covered by this Approval**

ID	Description of Affected Emission Units	Controls
#1	Jaw feeder: Pioneer jaw feeder, 34" drop, 200 tons/hour capacity	water spray
#3	Primary Crusher: Pioneer 150HP Jaw Crusher, 200 tons/hour capacity	water spray
#11	Secondary Crusher: Symons 200HP Cone Crusher, 200 tons/hour	water spray
#16	Tertiary Crusher: Kodiak 400HP Cone Crusher, 200 tons/hour	water spray
#2	Scalp Screen: Pioneer 7' x 8', 25HP	water spray
#7	Scalp Screen: JCI 5' x 14', 30 HP	water spray
#14	Screen: Superior 8' x 20' Triple-deck screener, 50 HP	water spray
#4	Conveyor: under-jaw conveyor, 48" drop, 200 tons/hour capacity	water spray
#5	Conveyor: under-scalp conveyor, 24" drop, 200 tons/hour capacity	water spray
#6	Conveyor: feed conveyor, 36" drop, 200 tons/hour capacity	water spray
#8	Conveyor: scalp discard conveyer, 12" drop, 200 tons/hour capacity	water spray
#9	Conveyer: 12" discard conveyer, 200 tons/hour capacity	water spray
#10	Conveyer: 72" discard conveyer, 200 tons/hour capacity	water spray
#12	Conveyer: secondary crusher discard conveyer, 48", 200 tons/hour capacity	water spray
#13	Conveyer: product conveyer to Superior screen, 48", 200 tons/hour capacity	water spray
#15	Conveyer: 48" product conveyer to Kodiak tertiary crusher, 200 tons/hour capacity	water spray
#17	Conveyer: 48" tertiary crusher discharge conveyer, 200 tons/hour capacity	water spray
#18	Conveyer: 48" under Superior screen conveyer, 200 tons/hour capacity	water spray
#19	Conveyer: 24" cross conveyer from Superior screen, 200 tons/hour capacity	water spray
#20	Conveyer: 24" cross conveyer from Superior screen, 200 tons/hour capacity	water spray
#21	Conveyer: 72" conveyer, 200 tons/hour capacity	water spray
#22	Conveyer: 36" short transfer conveyer, 200 tons/hour capacity	water spray
#23	Conveyer: 36" conveyer, 48' wheel radial stacker, 200 tons/hour capacity	water spray
#24	Conveyer: 48" conveyer to Bunker A, 200 tons/hour capacity	water spray
#25	Loadout Bunker: Bunker "A", 120", 200 tons/hour capacity	water spray
#26	Conveyer: 24" recycle conveyor, 200 tons/hour capacity	water spray
#27	Conveyer: 36" chip conveyor, 200 tons/hour capacity	water spray
#28	Conveyer: chip wheel radial stacker, 200 tons/hour capacity	water spray
#29	Loadout Bunker: Bunker "B", 102", 200 tons/hour capacity	water spray

ID	Description of Affected Emission Units	Controls
#30	Conveyer: 12" conveyer under secondary crusher, 200 tons/hour capacity	water spray
#31	Conveyer: 12" reject conveyor, 200 tons/hour capacity	water spray
#32	Conveyer: 120" reject conveyor, 200 tons/hour capacity	water spray
#33 *	Generator: Caterpillar 3412 diesel-fired internal combustion engine, 545 KW, model year 1989	Ultra-low sulfur diesel fuel
#34 *	Generator: Caterpillar 3406 diesel-fired internal combustion engine, 350 KW, model year 1997	Ultra-low sulfur diesel fuel
Portable Tank #1	Diesel storage tank: portable 10,000-gallon capacity tank	None

** Two listed Caterpillar generators are portable non-road engines exempt from the engine requirements in the SQCS General Permit, except general provisions #17 and #18 requiring use of ULSD. They are included here for information purposes.*

Applicable Permit Conditions

Your permitted source is subject to all terms and conditions in the SQCS General Permit as specified in the permit. Because your application did not request the elective synthetic minor limit for co-located sources in Condition 16, your source is not subject to that condition. Instead, your source must comply with the operating limit in Condition 15. Your application identifies the internal combustion engines as non-road engines. As long as the engines qualify as non-road engines, the engines are not subject to the permit conditions specific to generators. Specifically, Condition 31 source testing of engines does not apply to non-road engines.

Please note permit Condition 29, which requires a performance test (timeframes to complete the test are specified in Conditions 29). This test requires EPA Method 9 examination of opacity; sources typically seek the services of qualified air quality consultants or source testing firms to complete the test.

Additional Information

You are reminded that you must construct and/or modify and operate the affected emissions units, and any associated air pollution control technologies, in compliance with the SQCS General Permit and all other applicable federal air quality regulations and consistent with all the representations made in your Request for Coverage. You must comply with all applicable provisions of the SQCS General Permit, including those set forth in the attachments and emission limitations that apply to the affected emissions units at the permitted source. Noncompliance with any permit provision is a violation of the permit; may constitute a violation of the Clean Air Act; is grounds for an enforcement action; and is grounds for Region 10 to revoke the Approval and terminate your source's coverage under the SQCS General Permit. You may be subject to enforcement action for failure to obtain a preconstruction permit if you construct your source under this Approval and your source is later determined not to qualify for the conditions and terms of the SQCS General Permit.

Pursuant to 40 CFR 49.156(e)(8), this Approval will become invalid if you do not commence construction within 18 months after the date when this Approval becomes effective, if you discontinue construction for a period of 18 months or more, or if you do not complete construction within a

reasonable time. Region 10 may extend the 18-month period upon a satisfactory showing that an extension is justified.

Region 10's approval of your request for coverage under the SQCS General Permit is effective upon signature and is a final agency action for purposes of judicial review. The only issue subject to review is whether the Project is eligible for coverage under the SQCS General Permit. 40 CFR 49.156(e)(6).

Any petition for review of this approval action must be filed in the United States Court of Appeals for the appropriate circuit pursuant to CAA section 307(b).

If you have any questions, please contact Jay McAlpine at (206) 553-0094 or mc Alpine.jay@epa.gov.

Sincerely,

Karl Pepple
