RE: Town of Weymouth - Arthur J. Bilodeau Water Treatment Plant
Potable Water Treatment Facility General Permit
NPDES General Permit No. MAG6400060 Notice of Intent

DEC - 8 2009

To Whom It May Concern:

On behalf of the Town of Weymouth, please find enclosed a complete Notice of Intent (NOI) for coverage of the Arthur J. Bilodeau Water Treatment Plant (WTP) under the National Pollutant Discharge Elimination System (NPDES) General Permit for discharges from Potable Water Treatment Facilities (PWTF). The Bilodeau WTP is located at 95 Winter Street in Weymouth, Massachusetts (refer to Figure 1 - Site Locus). This NOI details the re-application of the WTP's existing NPDES PWTF General Permit (MAG6400060), which was terminated March 15, 2002 and requested to be re-issued in a letter dated January 17, 2008 (refer to Attachment II). A transmittal number was not referenced in the 2002 Notice of Intent.

This complete NOI package consists of the following:

- Environmental Protection Agency (EPA) PWTF NPDES General Permit NOI form;
- Site figures including a site locus, site plan identifying WTP's discharge location, and the WTP's process flow diagram;
- A copy of the January 17, 2008 letter to the Massachusetts DEP requesting the re-issuance of the WTP's previously terminated NPDES General Permit;
- A copy of the March 15, 2002 letter from the EPA to the Town acknowledging the termination of the WTP's NPDES General Permit;
- A copy of the March 11, 2002 letter from the Town to the EPA requesting the termination of the WTP's NPDES General Permit;
- A copy of the February 22, 2002 letter from the EPA to the Town authorizing the WTP's NPDES General Permit;
- A copy of the February 19, 2002 letter from the MA DEP to EPA support for authorizing the WTP's NPDES General Permit;
- A copy of January 8, 2001 Notice of Intent from the Town to the EPA requesting coverage of the WTP under the NPDES General Permit; and
- Copies of the laboratory analytical reports for the September 2009 and October 2009 NPDES discharge monitoring events.

The NOI form provides an overview of the existing Bilodeau WTP physical and chemical treatment processes. The WTP currently has two lined residuals lagoons that discharge to the Mill River, a Class A waterbody in the Weymouth and Weir watershed.
