

September 8, 2026

Mr. Jack Nygaard
Clyde Companies
730 N 1500 W
Orem, Utah 84057

Dear Mr. Nygaard:

This letter revises the approval of the Request for Coverage under the General Air Quality Permit for New or Modified Minor Source Hot Mix Asphalt Plants in Indian Country (HMA General Permit) originally issued to Suncore Construction & Materials, Inc. (formerly, Sunroc Corporation, dba Depatco Inc.) on June 21, 2023, pursuant to the Clean Air Act Tribal Minor New Source Review Program. The project for which HMA General Permit coverage was sought by Suncore was the construction and operation of a portable hot mix asphalt plant at the existing Gateway Pit within the exterior boundaries of the Fort Hall Reservation (the Project).

Permittee: Cylde Companies, Inc. – Suncore Construction & Materials, Inc.
730 N 1500 W
Orem, UT 84057

Location: Suncore Construction & Materials, Inc.
Gateway Pit
1850 Tank Farm Road
Pocatello, Idaho 83204
Power County
Fort Hall Reservation

Permit #: R10-TNSR-036-02 (replaces R10-TNSR-036-01)

Determination

The U.S. Environmental Protection Agency, Region 10, issued the original approval for Suncore Construction & Materials, Inc. (Suncore) to construct and operate the HMA facility under the HMA General Permit at this site on June 21, 2023 (Permit #R10-TNSR-033-01); this approval rescinded the previous June 27, 2018 approval under the HMA General Permit for Suncore (previously DePatco) to operate an HMA Plant at the Gateway pit (previously the J.K. Merrill & Sons Pit Quarry).

The EPA Region 10 received a request from Suncore in a letter dated March 10, 2026 providing notice of the removal and replacement of the Auxiliary Heater. Region 10 issued an administrative revision of the Approval of Coverage to account for the replacement of the equipment on March 31, 2026.

For this current administrative revision, Suncore submitted a letter, dated August 31st 2026, notifying Region 10 of a change of affected emission units at the facility. Namely, the two diesel generators associated with the source are removed and replaced with three new stationary engines. The three new engines are as follows: two Caterpillar C15 610 HP diesel generators manufactured in 2021, and an Atlas Copco QAS90 120 HP auxiliary generator manufactured in 2016.

EPA Region 10 carefully reviewed Suncore's original Request for Coverage and other relevant information to determine whether the Project meets all the criteria to qualify for coverage under the HMA General Permit. Based on our review of, and in reliance on, all of the information and representations provided in the Request for Coverage and other information submitted by Suncore as well as other relevant information, EPA Region 10 determined that the Project met and continues to meet all such criteria and is eligible for coverage under the HMA General Permit.¹ Accordingly, pursuant to 40 CFR 49.156(e), EPA Region 10 approved the Request for Coverage for the Project.

This Approval and the HMA General Permit authorize the Permittee to construct and operate the Project at the Gateway Pit, Pocatello, Idaho location listed above. The Permittee is subject to Version 1.0 of the aforementioned HMA General Permit, a copy of which is enclosed.² The analysis and basis for EPA Region 10's determination is discussed in more detail in the Technical Support Document for this action.

All notifications and reports required by the HMA General Permit can be sent electronically using EPA's Compliance and Emissions Data Reporting Interface. CEDRI can be accessed through EPA's Central Data Exchange (CDX) at <https://cdx.epa.gov>. First-time users will need to register with CDX. If no specific reporting option is available in CEDRI, select "Other Report." If the system is unavailable or assistance is needed, please contact EPA Region 10's Enforcement and Compliance Assurance Division at (206) 553-1200.

For any documents or information that contain Confidential Business Information or cannot otherwise be submitted via CEDRI, submit materials to EPA Region 10 at the following address:

Clean Air Act Compliance Manager
U.S. EPA – Region 10, 20-C04
1200 Sixth Avenue, Suite 155
Seattle, WA 98101-3123

This Approval of Request for Coverage must be posted prominently at the site location of operation (Suncore, Pocatello, Idaho). Each affected emissions unit and any associated air pollution control technology must be labeled with the applicable identification number listed below:

¹ EPA Region 10 has determined that Suncore provided information demonstrating that it has met the listed species and historic properties eligibility criteria in the HMA General Permit, as discussed in the Technical Support Document.

² The HMA General Permit is available at https://www.epa.gov/sites/production/files/2016-05/documents/hotmixasphaltpermit_1.pdf, and a copy of this Approval will be posted on Region 10's website at <http://www.epa.gov/caa-permitting/air-permits-issued-epa-region-10>

Suncore HMA Plant List of Affected Emission Units

ID #	Description of Affected Emission Units	Controls
1	HMA Dryer: Dryer ID: ADM MM225; manufactured 2008, portable, 88 mmBtu/hr burner, fueled with natural gas, propane, diesel	Baghouse
2a	Generator: Caterpillar C15, 610 HP, manufactured in 2021; fueled with diesel	Ultra-low sulfur diesel
2b	Generator: Caterpillar C15, 610 HP, manufactured in 2021; fueled with diesel	Ultra-low sulfur diesel
2c	Auxiliary Generator: Atlas Copco QAS90, 120 HP, manufactured in 2016; fueled with diesel	Ultra-low sulfur diesel
3a	Auxiliary Heater: 1.0 MMBtu/hour capacity; manufactured in 2013, fueled with natural gas, liquified petroleum gas, diesel	None
4	Material Handling, Transferring, loading and Storage Equipment: feeders, scalper screens, storage piles, conveyors and asphalt storage silos	None
5	Asphalt Oil Storage Tanks: 30,000 gallons and 35,000 gallons	None
6	Diesel Storage Tank: 12,000 gallons	None

Applicable Permit Conditions

Your permitted source is subject to all terms and conditions in the HMA General Permit as specified in the permit. Because your application requested the elective synthetic minor limit for co-located sources, this includes Conditions 17 and 20.b in the HMA General Permit.

Additional Information

You are reminded that you must construct and/or modify and operate the affected emissions units, and any associated air pollution control technologies, in compliance with the HMA General Permit and all other applicable federal air quality regulations and in a manner consistent with all the representations made in your Request for Coverage. You must comply with all applicable provisions of the General Permit, including those set forth in the attachments and emission limitations that apply to the affected emissions units at the permitted source. Noncompliance with any permit provision is a violation of the permit; may constitute a violation of the CAA; is grounds for an enforcement action; and is grounds for EPA Region 10 to revoke the Approval and terminate your source's coverage under the HMA General Permit. You may be subject to enforcement action for failure to obtain a preconstruction permit if you construct your source under this Approval and your source is later determined not to qualify for the conditions and terms of the HMA General Permit.

Pursuant to 40 CFR 49.156(e)(8), this Approval will become invalid if you do not commence construction within 18 months after the date when this Approval becomes effective, if you discontinue construction for a period of 18 months or more, or if you do not complete construction within a reasonable time. EPA Region 10 may extend the 18-month period upon a satisfactory showing that an extension is justified.

EPA Region 10's approval of your request for coverage under the HMA General Permit is effective immediately as of the date this letter is signed and is a final agency action for purposes of judicial review. The only issue subject to review is whether the Project is eligible for coverage under the HMA General Permit. 40 CFR 49.156(e)(6). Any petition for review of this approval action must be filed in the United States Court of Appeals for the appropriate circuit pursuant to CAA section 307(b).

If you have any questions, please contact Jay McAlpine at (206) 553-0094 or mc Alpine.jay@epa.gov.

Sincerely,

Karl Pepple
