

**Priority Area List –
2026 Diesel Emissions Reduction Act (DERA) National Program and the 2025-2026 DERA State Program**

In order to receive points under criteria 3.a and 3.b in Section 6 of the 2026 DERA National Program Notice of Funding Opportunity (NOFO), vehicles or equipment proposed for funding must be operated a majority of the time in one of the priority areas listed below. Also, priority areas are defined in the 2025-2026 DERA State Program Guide in Section VIII.C.b. These areas were identified as priority locations, by County Federal Information Processing Standards (FIPS) codes, for the DERA Program because they are identified as a 2020 Air Toxics Screening Assessment priority Diesel Particulate Matter (DPM) area or were designated, as of the release date of this NOFO, as Nonattainment Areas or Maintenance Areas for the following National Ambient Air Quality Standards. Data are sourced from the 2020 Air Toxics Screening Assessment (<https://www.epa.gov/AirToxScreen>) and the U.S. Environmental Protection Agency's Green Book of Nonattainment Areas for Criteria Pollutants (<https://www.epa.gov/green-book>).

- a) 8-Hour Ozone 2008 Standard (8-hour: 0.075ppm)
- b) 8-Hour Ozone 2015 Standard (8-hour: 0.070ppm)
- c) PM-2.5 1997 Standard (Annual: 15 µg/m³, 24-hour: 65 µg/m³)
- d) PM-2.5 2006 Standard (Annual: 15 µg/m³, 24-hour: 35 µg/m³)
- e) PM-2.5 2012 Standard (Annual: 12 µg/m³, 24-hour: 35 µg/m³)
- f) 2020 Air Toxics Screening Assessment Priority DPM Area*

*A priority DPM area is a county that contains at least one census tract where the modeled, area-weighted average ambient DPM concentration from the 2020 Air Toxics Screening Assessment, is above the 80th percentile (0.27 µg/m³) for census tracts nationwide. The 80th percentile is a programmatic cutoff designed to help us evaluate those areas that are most likely to have higher concentrations of DPM in the year of analysis (i.e., the year for which modeled DPM data are available); this level was not chosen based on risk or other health-based criteria or thresholds. Air Toxics Screening Assessment is a screening tool and there are limitations and uncertainties associated with it; see: <https://www.epa.gov/AirToxScreen/airtoxscreen-limitations>.
