Air Plan Approval; Oklahoma; Updates to the State Implementation Plan for New Source Review Permitting and General SIP Provisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Clean Air Act (CAA or the Act), the Environmental Protection Agency (EPA) is approving identified portions of revisions to the Oklahoma State Implementation Plan (SIP) submitted by the State of Oklahoma designee between 2002 and 2025 to update the Oklahoma New Source Review (NSR) permit program and make general updates to the Oklahoma SIP.

DATES: This rule is effective on August 3, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R06–OAR–2024–0031. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet. Publicly available docket materials are available electronically through <https://www.regulations.gov>.

SUPPLEMENTARY INFORMATION:

Throughout this document “we,” “us,” and “our” means the EPA.

I. Background

The background for this action is discussed in detail in our November 17, 2025, proposal (90 FR 51247). In that document we proposed approving identified portions of revisions to the Oklahoma SIP submitted by the State of Oklahoma designee between 2002 and 2025 to update the Oklahoma NSR permit program and make general updates to the Oklahoma SIP. We received comments on our proposal. Our responses to the comments follow.

II. Response to Comments

Comment: Citizens Rulemaking Alliance requests that the EPA withdraw any final action until it either (a) prepares and docketed an Initial Regulatory Flexibility Analysis (IRFA) for this action or (b) supplements the record with a reasoned factual basis supporting a certification under 5 U.S.C. 605(b) that the action will not have a significant economic impact on a substantial number of small entities, including data specific to Oklahoma NSR applicability and permitting costs.

Response: The EPA disagrees with this comment. The regulatory analysis provisions of the Regulatory Flexibility Act (RFA) are only triggered by a threshold determination by the Agency that this rule will have a significant economic impact on a substantial number of small entities. This action merely approves Oklahoma’s choices for implementing the air permitting requirements of the Clean Air Act and does not impose any additional requirements beyond those required by State law. Because the Agency has certified this rule will not have a significant economic impact, sections 603 and 604 of the RFA do not apply to

this rulemaking. See 5 U.S.C. 605(b). No changes have been made to the final rule because of this comment.

Comment: Citizens Rulemaking Alliance requests that the EPA prepare and docket an Unfunded Mandates Reform Act (UMRA) statement or, at a minimum, a non-conclusory analysis explaining why this action does not impose a “Federal private sector mandate” or meet the expenditure threshold and why UMRA section 202 does not apply, given that EPA’s approval renders the NSR requirements federally enforceable on private parties.

Response: The EPA disagrees that this action triggers any obligation to prepare and docket an UMRA statement. The UMRA requirements are triggered if the direct cost of all Federal private sector mandates will exceed \$100 million annually. This action merely approves the State of Oklahoma’s choices of revisions as meeting Clean Air Act requirements. This action does not impose any Federal private sector mandate on Oklahoma as that term is defined in 2 U.S.C. 658.

Comment: Citizens Rulemaking Alliance requests that EPA identify the applicable Office of Management and Budget (OMB) control number(s) for any information collection requirements (ICR) implicated by the approved NSR program (e.g., permit applications, monitoring, recordkeeping, reporting, public notice submissions), and explain whether the SIP revisions increase or otherwise alter the burden under the Paperwork Reduction Act (PRA). If the burden changes, submit the necessary ICR revision to OMB.

Response: The PRA generally provides that every Federal agency must obtain OMB approval before using identical questions to collect information from 10 or more persons. See 44 U.S.C. 3502(2); 3507. The EPA is not conducting nor sponsoring the collection of information from 10 or more persons. The EPA approves the

revisions to the Oklahoma permitting programs and general SIP updates, thereby approving State choices as meeting the Clean Air Act. The EPA has complied with the PRA by certifying that the PRA does not apply to this action. This approval does not impose any additional requirements beyond those required by State law. No changes have been made to the final rule because of this comment.

Comment: Citizens Rulemaking Alliance requests that EPA confirm it is not invoking the Administrative Procedure Act's good cause exceptions to shorten the effective date or bypass ordinary notice-and-comment, or else provide a specific, record-supported good cause showing.

Response: The EPA's November 17, 2025 (90 FR 51247), proposed rulemaking included a 30-day public comment period which closed on December 17, 2025. In this action, we are finalizing our November 17, 2025, proposed rulemaking. The EPA did not invoke or rely on the good cause exceptions at Administrative Procedure Act Section 553(b). No changes have been made to the final rule because of this comment.

Comment: Citizens Rulemaking Alliance requests that the EPA provide a side-by-side of the SIP-approved NSR text and the proposed replacement, with a plain-language explanation of practical impacts on applicability, exemptions, monitoring/recordkeeping, and public notice.

Response: Section II of the November 17, 2025 (90 FR 51247 at 51249), preamble states "the accompanying Technical Support Document for this action includes a detailed analysis of the submitted revisions to the Oklahoma SIP which are the subject of this proposed rulemaking." The November 17, 2025 (90 FR 51247), proposed rulemaking included instructions on how to access the rulemaking docket on www.regulations.gov. The rulemaking docket includes our Technical Support Document, which provides a side-by-side comparison of the existing SIP requirements and the proposed revisions, the EPA's evaluation of each proposed revision and the EPA's justification for approval. The Technical Support Document was available in the rulemaking docket for the entirety of the 30-day public comment period. No changes have been made to the final rule because of this comment.

Comment: Citizens Rulemaking Alliance requests that the EPA extend the comment period at least 30 days after the EPA docket the supplemental RFA/UMRA/PRA materials.

Response: The EPA published a proposed rule on November 17, 2025 (90 FR 51247), in the **Federal Register** proposing action on Oklahoma's SIP submissions. This proposed rulemaking included significant detail in the preamble regarding the nature of the proposed action and the EPA's basis for approving the Oklahoma submissions under the Clean Air Act. The proposed rulemaking provided a 30-day comment period for the public to submit data, views, or arguments regarding the EPA's proposed action. As demonstrated by the responses to comments in this document, the EPA has considered all relevant comments received on its proposal. The EPA has no obligation to extend the comment period because no supplemental materials have been added to the docket. No changes have been made to the final rule because of this comment.

Comment: During a discussion on December 5, 2025, the Oklahoma Department of Environmental Quality (ODEQ) provided the following requests for clarification and typographical errors for the EPA's consideration:¹

1. The discussion at 90 FR 51249 providing the general overview of the Oklahoma tiering system could be misinterpreted to indicate that all Tier I applications require web public notice (90 FR 51247, November 17, 2025). The Tier I web notice only applies to specific air quality permit applications as indicated elsewhere in the preamble rather than broadly to all Tier I applications.

2. There is a typographical error in the submittal date for the reasonable possibility in recordkeeping rulemaking. See 90 FR 51247 at 90 FR 51250, "On January 24, 2023, Oklahoma submitted revisions to OAC 252:100–8–36.2 adopted on June 21, 2002, effective September 15, 2022." (emphasis added)

3. The overview description of the general permitting program at 90 FR 51249, incorrectly states that general permits apply to facilities between 40 TPY and 100 TPY in an industry group for which a general permit has been issued (90 FR 51247, November 17, 2025). The ODEQ clarified that the general permit does not have a lower TPY limit.

4. The ODEQ requests that the EPA update the description of permit exempt overview at 90 FR 51255 to more closely reflect the rule language and avoid any misinterpretation (90 FR 51247,

November 17, 2025). Suggested edits would be:

A permit exempt facility cannot be subject to any major source permitting requirement under OAC 252:100–8, any work practice standard, equipment standard, or emission standard under either (a) New Source Performance Standards in 40 CFR part 60, or (b) National Emissions Standards for Hazardous Air Pollutants at 40 CFR part 63.

Response: The EPA appreciates the clarifications and typographical corrections to the November 17, 2025 (90 FR 51247), proposed rulemaking identified by the ODEQ. We agree that each clarification and typographical correction of the proposed rulemaking preamble is appropriate and instruct the public to read the November 17, 2025 (90 FR 51247), preamble with these clarifications and corrections. No changes have been made to this final rule because of these comments.

Comment: The Quapaw Nation requested clarification on how the EPA expects the State of Oklahoma to implement the SIP in certain areas of Indian Country pursuant to the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005 ("SAFETEA"). Specifically, the Quapaw Nation requested clarification on the EPA's expectations for the State with respect to engaging the Quapaw Nation on issues that may affect the Nation's members or resources.

Response: As explained in section III. Impact on Areas of Indian Country in the November 17, 2025 (90 FR 51247), proposed rulemaking and again in this final action, on May 12, 2025, the EPA approved the State of Oklahoma's request under section 10211(a) of SAFETEA to administer all of the State's EPA-approved environmental regulatory programs—including the State's SIP—in certain areas of Indian country. This means the ODEQ will implement the SIP-approved requirements for the Indian country lands included in the SAFETEA approval that are located within the Quapaw Nation reservation. Neither the May 12, 2025, SAFETEA decision, nor the approval of the State's SIP under the CAA, requires the State to engage with affected Tribes. However, although not required by the EPA's approvals, consistent with longstanding Agency policy, the EPA encourages Tribes and States to coordinate on environmental matters of mutual concern and believes such coordination may be particularly useful in this case, where the State is administering a program in Indian country. Thus, the EPA encourages the Quapaw Nation and other interested Tribes to coordinate

¹ The EPA has docketed the Record of Communication of the December 5, 2025, discussion with ODEQ in our rulemaking docket, EPA–R06–OAR–2024–0031, accessible on <https://www.regulations.gov>.

with the State on issues relating to implementation of the SIP. The Nation specifically raised permitting as an example where State/Tribal engagement would be useful. The EPA notes that because the Nation has CAA Treatment as a State (TAS) approval under sections 126 and 505(a)(2) of the CAA, the State is required to comply with affected State status notifications to neighboring States, which includes the Nation. No changes have been made to our final rule because of this comment.

Comment: The Quapaw Nation does not support, and requests that the EPA disapprove, the expansion of the “permit exempt facility” categories for minor new source review permitting under OAC 252:100–7–1.1 and OAC 252:100–7–2. The Quapaw Nation states that Oklahoma should “be imposing more stringent permitting requirements rather than expanding exemptions, even for minor contributors to air pollution.”

Response: The EPA disagrees with the commenter. As stated in the November 17, 2025 (90 FR 51247), proposed rulemaking, “State agencies have discretion to determine the scope of the State’s minor NSR program, provided that the program continues to satisfy the requirements of 40 CFR 51.160–51.164.” See 90 FR 51247 at 90 FR 51255. The EPA provided our evaluation of the Oklahoma permit exempt program, including the technical justification provided by the ODEQ regarding the impact of the permit exempt program on air quality. No changes have been made to our final rule because of this comment.

Comment: The Quapaw Nation does not support, and requests that the EPA disapprove, the revisions to OAC 252:100, Subchapters 7 and 8 that would allow permit applicants to begin construction prior to receiving the construction permit. The Quapaw Nation expressed concern “that allowing a project to move forward up to this stage of construction, after significant resources are expended but before a requisite permit is granted, could create unnecessary pressure on the permit decision-makers that would not otherwise be present.”

Response: The EPA appreciates the concern presented by the commenter but disagrees that the provisions for allowing construction prior to permit issuance will create unnecessary pressure on the permit decision-makers. The November 17, 2025 (90 FR 51247 at 90 FR 51254 through 51255), proposed rulemaking provides our analysis of the provisions for construction prior to minor NSR permit issuance and demonstrates consistency with the requirements of the CAA and the EPA’s

regulations. The SIP-approved language at OAC 252:100–7–2(b)(5) and OAC 252:100–8–4(a)(1)(D) expressly provides that the Oklahoma DEQ retains the authority to deny the permit application without consideration of and regardless of any investment made by the permit applicant prior to permit issuance. No changes have been made to the final rule because of this comment.

III. Impact on Areas of Indian Country

Following the U.S. Supreme Court decision in *McGirt v. Oklahoma*, 140 S. Ct. 2452 (2020), the Governor of the State of Oklahoma requested approval under section 10211(a) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, Public Law 109–59, 119 Stat. 1144, 1937 (August 10, 2005) (“SAFETEA”), to administer in certain areas of Indian country (as defined at 18 U.S.C. 1151) the State’s environmental regulatory programs that were previously approved by the EPA outside of Indian country. The State’s request excluded certain areas of Indian country further described below. In addition, the State only sought approval to the extent that such approval was necessary for the State to administer a program in light of *Oklahoma Dept. of Environmental Quality v. EPA*, 740 F.3d 185 (D.C. Cir. 2014).²

The EPA has approved Oklahoma’s SAFETEA request to administer all of the State’s EPA-approved environmental regulatory programs in the requested areas of Indian country. As requested by Oklahoma, the EPA’s approval under SAFETEA does not include Indian country lands, including rights-of-way running through the same, that: (1) qualify as Indian allotments, the Indian titles to which have not been extinguished, under 18 U.S.C. 1151(c); (2) are held in trust by the United States on behalf of an individual Indian or Tribe; or (3) are owned in fee by a Tribe, if the Tribe (a) acquired that fee title to such land, or an area that included such land, in accordance with a treaty with the United States to which such Tribe was a party, and (b) never allotted the land to a member or citizen of the Tribe (collectively “excluded Indian country lands”).

The EPA’s approval under SAFETEA expressly provided that to the extent the EPA’s prior approvals of Oklahoma’s

environmental programs excluded Indian country, any such exclusions are superseded for the geographic areas of Indian country covered by the EPA’s approval of Oklahoma’s SAFETEA request.³ The approval also provided that future revisions or amendments to Oklahoma’s approved environmental regulatory programs would extend to the covered areas of Indian country (without any further need for additional requests under SAFETEA).

As explained above, the EPA is approving revisions to the Oklahoma air permitting program which will apply statewide in Oklahoma. Consistent with the D.C. Circuit’s decision in *ODEQ v. EPA* and with the EPA’s SAFETEA approval, these SIP revisions will apply to areas of Indian country as follows: (1) pursuant to the SAFETEA approval, the SIP revisions will apply to all Indian country in the State of Oklahoma other than the excluded Indian country lands as described above; and (2) pursuant to the D.C. Circuit’s decision in *ODEQ v. EPA*, the SIP revisions will also apply to any Indian allotments or dependent Indian communities that are located outside of any Indian reservation over which there has been no demonstration of Tribal authority.

IV. Final Action

We are approving under section 110 of the CAA, revisions to the Oklahoma SIP that update the Oklahoma NSR programs to maintain consistency with Federal requirements and revise the incorporation by reference dates for Federal requirements. We have determined that the following revisions were developed in accordance with the CAA and the EPA’s regulations, policy, and guidance for SIP development and NSR permitting. The EPA approves the following as revisions to the Oklahoma SIP:

- Removal of Regulations 1.4.1(a)–(c) and 1.4.2(a)–(d), (f), and (g) adopted on March 30, 1994, submitted May 16, 1994.
- Revisions to OAC 252:4–7–13, Notices, adopted on June 11, 2021, effective September 15, 2021, and submitted to the EPA on September 13, 2022.
- Revisions to OAC 252:100–4–7–32, Air quality applications—Tier I, adopted on March 25, 2003, effective

² In *ODEQ v. EPA*, the D.C. Circuit held that under the CAA, States have the authority to implement a SIP in non-reservation areas of Indian country in the State, unless there has been a demonstration of Tribal jurisdiction. Under the D.C. Circuit’s decision, the CAA does not provide authority to States to implement SIPs in Indian reservations.

³ The EPA’s prior approvals relating to Oklahoma’s SIP frequently noted that the SIP was not approved to apply in areas of Indian country (except as explained in the D.C. Circuit’s decision in *ODEQ v. EPA*) located in the State. See, e.g., 85 FR 20178 at 85 FR 20180 (April 10, 2020). Such prior expressed limitations are superseded by the EPA’s approval of Oklahoma’s SAFETEA request.

- Definitions of “Department,” “Executive Director,” and “Person” at 27A 2–1–102.

The EPA finds that the provisions in OAC 252:4–7–1, 4–7–2, 4–7–3, 4–7–4, 4–7–5, 4–7–6, 4–7–7, 4–7–8, 4–7–9, 4–7–10, 4–7–11, 4–7–12, 4–7–13, 4–7–14, 4–7–15, 4–7–16, 4–7–17, 4–7–18, 4–7–19, and 4–7–31 are applicable to the entirety of the Oklahoma air permit program and the amendatory language table at 40 CFR 52.1920(c) will be modified to reflect this finding and remove the comments from the Explanation column.

The EPA is removing OAC 252:100–5–2.2 from the Oklahoma SIP at 40 CFR 52.1920(c) because the CAA section 110(a)(2)(L) fee requirement has been

superseded by the approved Oklahoma part 70 program.

The EPA is removing definitions of “affected source,” “affected unit,” paragraph (E) of “applicable requirement,” “designated representative,” “responsible official,” “small unit,” and “unit” from OAC 252:100–8–2, OAC 252:100–8–4(b)(9), OAC 252:100–8–6(a)(5), and OAC 252:100–8–6.3 from the Oklahoma SIP at 40 CFR 52.1920(c) because these provisions pertain solely to Acid Rain program requirements that are implemented through the approved Oklahoma part 70 program.

The EPA is updating the amendatory language table at 40 CFR 52.1920(c) to correct the citation for OAC 252:100–7–60.1, Cotton gins, and correct the State effective dates for OAC 252:100–5–1, OAC 252:100–8–1, OAC 252:100–8–1.2, OAC 252:100–8–1.3, OAC 252:100–8–1.4, OAC 252:100–8–1.5, OAC 252:100–8–3, OAC 252:100–8–6.2, OAC 252:100–8–7.3, OAC 252:100–8–7.4, OAC 252:100–8–7.5, OAC 252:100–8–30, OAC 252:100–8–37, OAC 252:100–8–38, OAC 252:100–8–50, OAC 252:100–8–53, OAC 252:100–8–54.1, OAC 252:100–8–55, OAC 252:100–8–56.

The EPA is also taking ministerial action to correct an error in our final rule published on January 26, 2026 (91 FR 3046), effective February 25, 2026. In this rule, the EPA finalized our approval of all the revisions to the Open Burning provisions OAC 252:100–13 submitted on November 22, 2024. We inadvertently excluded inclusion of OAC 252:100–13–8.1 from the amendatory instructions for 40 CFR 52.1920(c). We are correcting this omission in this final approval.

V. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of revisions to the Oklahoma regulations for air permitting as described in section IV of this preamble. The EPA has made, and will continue to make, these materials generally available through <https://www.regulations.gov> (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final action of EPA’s approval, and will be

incorporated by reference in the next update to the SIP compilation.

VI. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

This approval of revisions to the Oklahoma SIP that that update the Oklahoma regulations for air permitting will apply to certain areas of Indian country throughout Oklahoma as discussed in the preamble, and therefore has Tribal implications as specified in E.O. 13175 (65 FR 67249, November 9, 2000). However, this action will neither impose substantial direct compliance costs on federally recognized Tribal governments, nor preempt Tribal law. This action will not impose substantial direct compliance costs on federally recognized Tribal governments because no actions will be required of Tribal governments. This action will also not preempt Tribal law as no Oklahoma Tribe implements a regulatory program under the CAA, and thus does not have applicable or related Tribal laws. Consistent with the EPA Policy on Consultation and Coordination with Indian Tribes (December 7, 2023), the EPA offered consultation to Tribal governments that may be affected by this action and provided information about this action. The EPA received no requests for Tribal consultation on the proposed rule.

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by August 31, 2026. Filing a petition for reconsideration by the Administrator of this final rule does

not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See CAA section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: June 23, 2026.

Walter Mason,
Regional Administrator, Region 6.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart LL—Oklahoma

- 2. In § 52.1920:
 - a. In paragraph (c), revise and republish the table titled, “EPA Approved Oklahoma Regulations”; and
 - b. In paragraph (e), amend the second table titled “EPA Approved Statutes in the Oklahoma SIP” by adding the entries for “27A O.S. 2–1–102” and “27A O.S. 2–5–104” in numerical order.
- The revision and addition read as follows:

§ 52.1920	Identification of plan.

RIN 0970–AD37

Reducing Bureaucracy and Burden for Children, Youth, and Family Programs

AGENCY: Family and Youth Services Bureau (FYSB), Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This final rule removes duplicative and unnecessary sections from the Runaway and Homeless Youth Program regulations. These amendments will streamline the Runaway and Homeless Youth Program regulations to make them more accessible to the public.

DATES: Effective August 31, 2026.

FOR FURTHER INFORMATION CONTACT: Adam N. Jones, Deputy Chief of Staff, Immediate Office of the Assistant Secretary, Administration for Children and Families, Department of Health and Human Services, Washington, DC 202–417–0115 or Deregulation@acf.hhs.gov. A plain language summary of the final rule is posted at <https://www.regulations.gov>.

SUPPLEMENTARY INFORMATION:

I. Statutory Authority

This final rule is being issued under the authority granted to the Secretary of Health and Human Services by the Runaway and Homeless Youth Act of 1974, as amended, hereafter referred to

as the “Act,” 34 U.S.C. 11201 *et seq.* 34 U.S.C. 11202 specifically authorizes rulemaking.

II. Background

The Runaway and Homeless Youth (RHY) Program, authorized under the Runaway and Homeless Youth Act (34 U.S.C. 11201 *et seq.*), authorizes HHS to provide grants to public and nonprofit private entities to deliver services to runaway and homeless youth and youth at risk of homelessness. The RHY program includes the Basic Center Program, the Transitional Living Program (including the Maternity Group Home Program), and the Street Outreach Program, which together support emergency shelter, transitional housing, outreach, counseling, and comprehensive supportive services to promote youth safety, well-being, and long-term stability. The RHY program also funds a national communications system, grants for training and technical assistance, and grants for research, evaluation, training, and service projects. HHS has issued regulations for the RHY Program at 45 CFR part 1351.

HHS initially published regulations for the RHY Program on November 20, 1978. Office of Human Development Services, Department of Health, Education, and Welfare, 43 FR 55634 (Nov. 20, 1978) (codified at 45 CFR pt. 1351). The regulations were most recently amended on December 20, 2016 at Runaway and Homeless Youth, 81 FR 93030. The most recent revisions added program performance standards and provided additional updates to reflect changes in the RHY Act made through the Reconnecting Homeless Youth Act of 2008 (Pub. L. 110–378). *See* Runaway and Homeless Youth, 81 FR 93030, 93030 (Dec. 20, 2016). We are now rescinding several sections of 45 CFR part 1351 to clarify program requirements, reduce unnecessary administrative burden, and better align the regulations with current statutory authority and language, while

maintaining program operations and effective management of grant funds.

III. Executive Summary

This final rule rescinds multiple RHY Program regulation sections that can be delineated into two categories: those that are duplicative and those that are unnecessary because they are better suited for a different format.

The duplicative regulation sections are those that carry no legal weight because their requirements are listed elsewhere in applicable law, such as in statute. Duplicative regulations impose no new obligations and offer no new guidance because the authority and requirements are pulled directly from other statutes and regulations. In many cases, the language in the regulation is identical to the language in the RHY Act.

Several of the regulation sections are better suited to a different format, such as a Notice of Funding Opportunity (NOFO). These sections either include summaries of program goals or objectives that do not impose any requirements beyond the language in the authorizing statute or they include information generally found in grant documents such as NOFOs. In some cases, the sections merely direct grant applicants and recipients to follow instructions in NOFOs and provide no additional information. These sections are being removed to allow them to be published in the more appropriate format.

Effective Date

This final rule will become effective 60 days from the date of its publication.

Severability

The purpose of this section is to clarify ACF’s intent with respect to the severability of the provisions of this NPRM. As explained above, ACF is removing sections of the RHY regulations because we determined that doing so would make the regulations
