ENLIST ONE (A.I. 2,4-DICHLOROPHENOXY ACETIC)
EPA REGISTRATION NUMBER: 62719-695
COMMITMENT LETTER

Dear Ms. Ondish:

Corteva Agriscience is committed to continuing to work with EPA and FWS to protect federally listed threatened and endangered species and their designated critical habitats. In a recent meeting held on April 18, 2023 as part of the ongoing consultation for the Enlist One and Enlist Duo registrations, the FWS presented the current status of the Draft Biological Opinion, a step in the consultation process for Enlist One and Enlist Duo registrations. In this meeting, FWS presented their impact analysis concluding the mitigations currently on the label are sufficiently protective to minimize the potential for jeopardy in counties that are currently prohibited on the label, therefore whole county prohibitions are no longer necessary for the protection of endangered species. However, specific pesticide use limitation areas (PULAs) are necessary for the minimization of jeopardy for three listed species. A spreadsheet of the proposed PULAs for three species was provided to Corteva following this meeting. Corteva has provided comments back to relevant parties detailing the proposed implementation of the PULAs. Corteva Agriscience commits to implement the following changes to the label for the Enlist One and Enlist Duo Registrations:

- 1) Implement the relevant PULAs through the Bulletins Live! Two system for three species provided to Corteva in an email exchange from the US FWS (email from Irvin Huang on April 19, 2019). There is already a reference for Bulletins Live! Two on the Enlist One and Enlist Duo labels directing applicators to obtain and follow Bulletins Live! Two
- 2) Remove all county prohibitions

If you require additional information, please contact Reuben Baris, Regulatory Policy Leader at 317-209-6747 (reuben.baris@corteva.com).

Sincerely,
Reuben Baris
Regulatory Policy Leader
