

John Phillip Jennings, P.E. Bio

John Phillip Jennings has been the State Materials Engineer since November of 2018. The State Materials Engineer is responsible for the oversight of the effective selection and control of all materials used by ALDOT in road and bridge construction through the areas of specifications, testing procedures, and research efforts. The position is also responsible for the oversight of the state Independent Assurance (IA) program, oversight of the project certification of materials program (BMT-38) and oversight of the Department's Radiation Safety Program. Mr. Jennings has also been a member of the Interstate Maintenance Review Committee since 2018 inspecting interstates with the assistance of Alabama's local FHWA representative to determine the proper maintenance scoping for all Alabama interstates. He has worked for the Department for 14 years after spending 4 years working in the private sector in site development and has a Bachelor of Civil Engineering from the University of Alabama Birmingham.
