

TRAVIS B WALBECK, P.E.
TRAINING MANAGER
NATIONAL CENTER FOR ASPHALT TECHNOLOGY
travis.walbeck@auburn.edu | 334-740-9176

EDUCATION & PROFESSIONAL EXPERIENCE

- + B.S., Civil Engineering, Utah State University, 2000
- + Auburn University, NCAT, Training Manager / Engineer (05/19–Present)
- + West Virginia Division of Highways, State Pavement Engineer (9/15-5/19)
- + West Virginia Division of Highways, Asphalt Group Supervisor (2/14-9/15)
- + Triad Engineering, Inc, West Virginia, Senior Engineer (3/09-2/14)
- + Rosenberg Associates, Utah, Project Manager (4/05-3/09)
- + InSite Engineering, Utah, Design Engineer (4/02-4/05)
- + Timinkas Engineering Consultants, Nevada, Design Engineer (5/00-4/02)
- + Registered Professional Engineer: Utah & West Virginia

SUMMARY

Travis has over 23 years of experience as a civil engineer working in the private, public, and educational sectors. Since joining NCAT in 2019, he has grown the training program in attendance and offerings, with some delivery methods evolving to meet the ever-changing way technical staff needs to obtain training. The training programs that Travis manages top \$500,000 annually and reach, on average, 1,200 – 1,500 asphalt professionals each year. He remains active in national organizations such as TRB, the Emulsions Task Force, and the Consortium for Asphalt Pavement Research and Implementation. He assists with NCAT research projects, delivers courses for FHWA, and develops custom courses to meet agency and industry needs. Travis maintains his Professional Engineer licenses in Utah and West Virginia.

RELEVANT EXPERIENCE

Travis' experience working within the West Virginia Division of Highways Materials Division, leading both the asphalt and pavements groups, gave him practical experience that translates to his current training environment. During his time at NCAT, he worked on FHWA projects that included developing and delivering asphalt materials training components. He was the PI and an SME on the FHWA Mobile Asphalt Technology Center's (MATC) Quality in the Asphalt Paving Process workshop. He also worked on the Every Day Count (EDC) 6 initiative of Targeted Overlay Pavement Systems (TOPS), developing materials and delivering the pilot asphalt workshop. He also works to market the training programs with NCAT through print, web-based media, email, and direct contact. These marketing efforts carried the training programs through the pandemic by including webinars and virtual training with agencies and courses open to the asphalt industry worldwide. Travis is frequently invited to speak at conferences and training events by agencies, trade associations, and industry, typically speaking 8 to 10 times yearly at these events. The Training In Your Pocket online training program he developed continues to grow momentum and has reached hundreds of subscribers around the country and beyond.
