RE: Letter of Support for Alaska DOT&PF's Application to the Climate Pollution Reduction Grants for the State of Alaska Energy Efficiency Upgrade Project

I am writing on behalf of the State of Alaska to extend our full endorsement of the State of Alaska Energy Efficiency Upgrade as a candidate for the Climate Pollution Reduction Implementation Grant. This project includes three measures from the Priority Sustainable Energy Action Plan (PSEAP):

1. DOT&PF will conduct energy audits and condition assessments and implement feasible energy efficiency upgrades at 18 State of Alaska-owned office facilities in the South Central, Interior, and Southeast Alaska areas.
2. DOT&PF will utilize an Energy Savings Performance Contract (ESPC) to perform energy retrofits at the William Jack Hernandez Sport Fish Hatchery and Ruth Burnett Sport Fish Hatchery, which will include investment-grade energy audits and comprehensive energy services, design, implementation, and commissioning of new or existing energy systems, verification and reporting of energy savings and guarantee of energy savings.
3. DOT&PF will retrofit street lighting from High-Pressure Sodium lamps to LED lights. Approximately 700 "cobra-head" and 10 high-mast lights are to be retrofitted along the Glenn Highway between Anchorage and the Mat-Su Borough.

DOT&PF recognizes the urgency to address GHG pollution contributing to climate change and is committed to pursuing measures that will achieve significant cumulative GHG reductions and achieve substantial community benefits. DOT&PF requests federal funding of \$41,027,497 to implement these GHG reduction measures across Alaska.

Thank you for your attention to this pivotal infrastructure project.  
Sincerely,

A handwritten signature in black ink, appearing to read "Ryan Anderson".

Ryan Anderson, P.E.  
Commissioner
