Skills Summary: Executive leader and manager with extensive experience in project development from inception to completion. Skilled in developing capital projects during planning, design, construction, and warranty periods. Excellent background in facility design, construction, scheduling, and budgeting. Experienced in managing design and construction contracts from thousands to millions of dollars in value. Progressive experience with state procurement regulations and innovative procurement processes.

Employment **UAF Design and Construction** August 1998 to Present
Current title: Director

- Direct the comprehensive management of UAF's capital, programs including maintaining fiscal control of construction projects funds and budgets.
- Manage multidiscipline design and construction projects from inception to completion ranging from several thousand dollars to multi-million dollars. Prioritize and manage multiple assignments simultaneously
- Handle site selection and layout, define design criteria, and complete initial planning and cost estimates.
- Develop innovative procurement packages including Design Build and Construction Manager at Risk and obtain approval from the UA Procurement Officer.
- Ensure design and construction projects meet current Alaska Statute, building codes, UAF Policies, and safety standards. Proficient in the building and fire code to ensure the safety and welfare of all UAF faculty, staff, and students.
- Coordinate and obtain all federal, state, and local regulatory permits and approvals.
- Interface with UAF users, meet their requirements and expectations, and create positive relationships with the campus community
- Travel to remote campus sites, develop and implement capital construction projects that positively affect the local community.
- Negotiate construction and consultant contracts to the benefit of the university

- Supervise a staff of engineers, managers, and administrative assistants during project development and construction. Utilize their talents and resources to make projects successful
- Provide overall department management and leadership including organizational resource allocation, capital projects oversight, project assignments, and workload administration.

Fire Chief

1995 to 2016

Ester Volunteer Fire Department

Ester, AK

- Provide leadership and direction to diverse group of paid and volunteer firefighters, medics, and apparatus operators under varying adverse and arduous conditions.
- Effectively deliver emergency services to the residents on the fire service district
- Supervise a staff of 30 volunteers, ensuring they are trained and ready for all types of emergencies
- Provide budgetary control, approving all purchases and allocated tax dollars within multiple budget categories.
- Perform duties as a firefighter, EMT, hazardous material first responder, apparatus operator, and incident commander.
