City of Albuquerque Sustainability Office,

It is with excitement about the potential of our continued collaboration in the provision of energy efficiency retrofits and beneficial electrification that the CRPG fund represents, that I offer the full support of Prosperity Works for the City proposal.

With the proposed funding, we have the opportunity to build on our years of experience providing essential service to those most in need and hardest to reach. As you know, we have provided energy efficiency services to more than 1,200 homes in the City of Albuquerque and Bernalillo County reducing their costs, their energy and water consumption, and emissions while also improving the health, safety and comfort of aging housing stock. Much of the work that has been done in Albuquerque and been significantly enhanced by City funding and we look forward to taking this bold step to improve the living conditions of LIDAC communities across the Metro Statistical Area in single family homes (SB1), multifamily units (SB2), community centers (SB3) and educational spaces (SB4).

Our partnership and high impact outcomes have set a high bar for excellence in the field that is unrivaled in our state, and perhaps, the nation. By way of this letter, I express our intention to sign a Memorandum of Agreement (MOA) by July 1st 2024 with the City of Albuquerque to support the Coalition application in the CRPG EPA Grant should it be awarded.

High Regards,

Ona Porter
