Re: Climate Pollution Reduction Grants – Implementation Grants Letter of Support

Secretary Khoury:

The Hyzon Motors Inc. (“Hyzon”) is pleased to offer this letter of support for your US Environmental Protection Agency’s Climate Pollution Reduction Grant (CPRG) Implementation Grant General Competition coalition application with the Oklahoma Department of Environment Quality.

Hyzon is a global supplier of high-performance hydrogen fuel cell technology focused on providing zero-emission power to decarbonize demanding industries. With agile, high-power technology designed for heavy-duty applications, Hyzon is at the center of a new industrial revolution fueled by hydrogen, an abundant and clean energy source. Hyzon focuses on deploying its fuel cell technology in heavy-duty commercial vehicles across North America today and in tomorrow’s power generation and energy storage, mining, construction, rail, marine, and airport ecosystems.

Hyzon believes that the projects outlined therein are critical for kickstarting the transition of heavy-duty diesel fleets to new zero-emissions fuel cell electric vehicles (“FCEVs”) in this region. We strongly support the proposal to fund heavy-duty hydrogen fueling infrastructure in Arkansas and Oklahoma and to offer incentives to mitigate the cost differential between diesel and FCEVs. We believe the Interstate 40 and Highway 412 Hydrogen Corridor Connector proposal is a strategic use and efficient use of CPRG implementation dollars that will connect major manufacturing, shipping, and logistics organizations in Arkansas and Oklahoma interested in transitioning their fleets to planned zero-emission corridors along Interstate 44 and 40. We also believe the proposal will enable the states to support further the build-out of hydrogen fueling infrastructure throughout Arkansas and Oklahoma.

We appreciate your leadership and dedication to advancing energy innovation in Arkansas that enhances our energy security, reduces emissions of harmful air pollutants, and supports shared goals for a sustainable and prosperous future. We are eager to support this and ongoing efforts to ensure clean, reliable transportation solutions that benefit this region and the entire country.

Sincerely,
