RE: EPA Climate Pollution Reduction Grant Application

Mr. Hobby,

I am writing to offer my full support for the City of Bainbridge's application for funding for Electric Vehicle (EV) related industry initiatives. As the U.S. Representative for Georgia's 2nd Congressional District, I am keenly aware of the importance of promoting sustainable transportation solutions and fostering economic development within our communities.

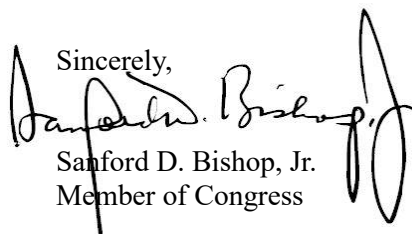

The transition to electric vehicles represents a critical step towards reducing carbon emissions, combating climate change, and promoting energy independence. By investing in EV-related industries, the City of Bainbridge has the opportunity to not only contribute to these broader goals but also to create new job opportunities and drive economic growth locally.

Furthermore, Bainbridge's commitment to embracing clean transportation aligns with federal initiatives aimed at advancing EV infrastructure and adoption nationwide. As Congress continues to explore avenues for funding and support in this sector, it is imperative that communities like Bainbridge receive the resources they need to realize their goals and contribute to our collective efforts in combatting climate change.

I am confident that the City of Bainbridge possesses the capacity to effectively utilize any funding awarded towards EV-related industry initiatives. Whether it be expanding charging infrastructure, supporting EV manufacturing, or incentivizing EV adoption, I believe that Bainbridge's efforts will serve as a model for other communities across our state and nation.

I look forward to witnessing the positive impact of Bainbridge's initiatives in the realm of electric vehicles and beyond. I support your application for funding and I urge the EPA to give it fair consideration according to all applicable laws, rules, and regulations. Thank you for your dedication to building a more sustainable and prosperous future for our community.

Sincerely,

Sanford D. Bishop, Jr.
Member of Congress
