Dear Mr. Garrison,

Redemptive Cycles is a registered 501(c)(3) non-profit bicycle shop in Birmingham, Alabama that offers a unique range of programs to the community outside of its normal day-to-day bike shop operations and sales. We believe that an E-Bike voucher program for Birmingham residents could make a tremendous positive impact not just on our environment but in the lives of our residents who often struggle with transportation access issues that constrain their ability to get to jobs and essential services.

As such, Redemptive Cycles would gladly participate in an E-Bike voucher program and accept these vouchers at the point of sale. We believe Redemptive is uniquely equipped to aid the implementation of this initiative as a number of our programs are complementary to increasing E-Bike ownership in the community. For example, Redemptive offers a sliding scale repair program that helps residents maintain bicycles by paying what they are able. We also offer mechanics classes, and public work stations that will enable the community to perform repairs and daily maintenance on their E-Bikes.

We sincerely hope the City of Birmingham is awarded these funds and can't wait to get to work making an even larger impact in our residents lives.

Sincerely,

A handwritten signature in black ink, reading "Brian Gosdin". The signature is fluid and cursive, with the first name "Brian" and last name "Gosdin" clearly distinguishable.

Brian Gosdin

Executive Director
