Dear Commissioner Tovar,

The Midwest Climate Collaborative supports the Coalition application from the City of Chicago and County of Cook for \$199 million for the Climate Pollution Reduction Grant. The Midwest Climate Collaborative is a multi-sector network working for a carbon neutral, climate resilient, interconnected Midwest region. We support organizations working to equitably reduce emissions and build resiliency at the local, state, and regional level. We support this application because it will not only benefit the residents of Chicago and Cook County, but serve as an example of how other Midwestern communities can deliver benefits to their residents and work for cleaner, healthier, more equitable communities.

The Chicago/Cook County CRPG Coalition Proposal advances highly effective Greenhouse Gas reduction strategies that also have strong Environmental Justice benefits. Measures include an Industrial Decarbonization component (for Chicago, Suburban Cook County, and DuPage County) to assist smaller and medium sized businesses, to install energy efficient and electrified equipment, renewable energy, and refrigerant replacement systems, while reducing toxics and air pollution in Environmental Justice areas. The program will also address food waste in Chicago and Cook County through creation of food scrap collection programs and the infrastructure to support them. And it will pursue aggressive energy efficiency, electrification and renewable energy strategies in public buildings such as schools, libraries and public housing in low income and distressed communities to reduce air pollution, provide jobs, and create educational working models for aggressively addressing climate change.

The proposal shared by the project team to drastically reduce our GHG emissions and catalyze economic opportunities within the clean energy economy is critical for the Chicago region and we look forward to working closely to support this effort. Please do not hesitate to contact me for further assistance or information.

Sincerely,
