Angela Tovar
Commissioner, City of Chicago Department of Environment
Via Electronic Mail

Dear Commissioner Tovar,

Plant Chicago supports the Coalition application from the City of Chicago and County of Cook for \$199m for the Climate Pollution Reduction Grant. My organization's mission is to cultivate local circular economies. Our education, food access, small business, and solar outreach programs prioritize our neighborhood of Back of the Yards and surrounding southwest side communities. We support this application because of the potential benefits it will bring to these communities.

The Chicago/Cook County CRPG Coalition Proposal advances highly effective Greenhouse Gas reduction strategies that also have strong Environmental Justice benefits. Measures include an Industrial Decarbonization component (for Chicago, Suburban Cook County, and DuPage County) to assist smaller and medium sized businesses, to install energy efficient and electrified equipment, renewable energy, and refrigerant replacement systems, while reducing toxics and air pollution in Environmental Justice areas. The program will also address food waste in Chicago and Cook County through creation of food scrap collection programs and the infrastructure to support them. And it will pursue aggressive energy efficiency, electrification and renewable energy strategies in public buildings such as schools, libraries and public housing in low income and distressed communities to reduce air pollution, provide jobs, and create educational working models for aggressively addressing climate change.

The proposal shared by the project team to drastically reduce our GHG emissions and catalyze economic opportunities within the clean energy economy is critical for the Chicago region and we look forward to working closely to support this effort. Please do not hesitate to contact me for further assistance or information.

Sincerely,

Jonathan Pereira
Executive Director
Plant Chicago, NFP
